MOCHLISCUS, (dim. of *μοχλος,* 'a lever,') Lever.

MOCHLUS, (*μοχλος,*) Lever.

MOCHTHUS, (*μοχθος,*) Agony.

MOCK-KNEES, Crusta genu equinæ.

MOD'ELLING PROC''ESS. A term proposed

by Dr. Macartney, of Dublin, to signify the mode in which wounds are healed without inflammation or suppuration, by a deposit of plastic matter from the surface of the wound, by which the gap is more rapidly filled,—portion being laid upon portion, without waste, after the manner of clay in the hands of the sculptor;—hence the term.

MODI'OLUS, ('the nave of a wheel.') *Pyr'amis* seu *Ax'is* seu *Columel'la coch'leæ*. A hollow cone in the cochlea of the ear, forming a nucleus, axis, or central pillar, round which the gyri of the cochlea pass. The modiolus forms the inner and larger portion of the central pillar, and is the cavity seen at the bottom of the meatus auditorius internus. It lodges a branch of the auditory nerve. The central portion of the modiolus contains a number of minute canals, and is called in consequence *Tractus spira'lis foramino'sus*. Into these the nerves of the cochlea enter, and pass out at right angles between the bony plates forming the zona ossea of the lamina spiralis, to be expanded on the membranous portion of the lamina.

MODIOLUS, *Mas*, also means the crown of the trepan.

MODIRA CANIRAM, Strychnos colubrina.

MO'DIUS. A dry measure, the third of an amphora, equal to the bushel.

MO'DUS OPERAN'DI, ('mode of operating.') This term is applied to the general principles upon which remedies act in morbid states of the body;—a subject of much interest, although involved in considerable obscurity.

The following classification will convey some idea of the ways in which different organs may be excited into action.

1. By actual or immediate contact of the remedy, and by absorption or mediate contact.
2. By an impulse conveyed by the nerves, through an impression made on the stomach or elsewhere, or by remote sympathy.
3. By contiguous or continuous sympathy, or by mere proximity or continuity of parts.

MOËLLE, (from *medulla;* according to some, from μυελος, 'marrow,') Marrow—*m. Allongée*, Medulla oblongata—*m. Épinière*, Medulla spinalis—*m. Vertébrale*, Medulla spinalis.

MŒNIA DENTIUM, ('walls of the teeth,') Alveoli dentium.

MŒROR, ('sorrow,') Athymia.

MOFETTE, Azote, see Mephitism.

MOF'FAT, MIN'ERAL WA'TERS OF. Moffat is a village situate about 56 miles S. W. of Edinburgh. The water is a cold sulphureous: containing, in a wine gallon, 36 grains of chloride of sodium, 5 cubic inches of carbonic acid, 4 of nitrogen, and 10 of sulphohydric acid. It resembles Harrowgate water in its properties.

A strong chalybeate spring was discovered there about the year 1828, which contains sesquisulphate of peroxide of iron, sulphate of alumina, and uncombined sulphuric acid.

MOGIGRAPHIA, (μογις, 'with difficulty,' and γραφω, 'I write,') Cramp, writers'.

MOGILA'LIA, *Parala'lia*, (μογις, 'with difficulty,' and λαλειν, 'to speak.') This word is inaccurately written by Paul Zacchias,—*Mola'lia*, and *Molila'lia*. Difficult or defective articulation. Impediment of speech. See Balbuties.

MOGOSTOCIA, (μογος, 'difficulty, and τοκος, 'parturition,') Dystocia, Laborious labour.

MOGUS, (μογος,) Agony.

MOHAWK TASSEL, Eupatorium purpureum.

MOHR'IA THURIF'RAGA, (after Prof. D. M. H. Mohr, a botanist of Kiel.) A South African fern, *Nat. Ord.* Filices, the dry leaves of which, pulverized and made into an ointment with fat, are serviceable in burns and scalds.

MOIGNON, (from Celt. *Moign*, 'maimed,') Stump.

MOIS, ('month,') Menses.

MOIS'TURE, *Ma'dor*, (F.) *Moiteur*. Simple humidity of the skin. The skin is said to be *moist* or in a state of moisture when there is slight prespiration.

MOITEUR, (old F. *moisteur*,) Moisture.

MOLA, ('a mill,') Maxillary bone, Molar tooth, Mole, Patella.

MOLAGOCODI, Piper nigrum.

MOLAIRE, Molar.

MOLALIA, Mogilalia.

MO'LAR, *Mola'ris*, *My'licus*, (F.) *Molaire, Meulière*. That which bruises or grinds; (from *molaris*, 'a grindstone,' or *mola*, 'a mill.')

MOLAR GLANDS. Two small bodies formed by a collection of mucous crypts; seated in the substance of the cheeks, between the masseter and buccinator muscles, and whose excretory ducts open into the mouth opposite the last molar tooth.

MOLAR TEETH, *Grind'ers*, *Jaw Teeth*, *Mola'res permanen'tes den'tes*, *Den'tes mola'res* seu *maxilla'res* seu *gom'phii* seu *clava'les*, *Mo'læ*, *Gom'phioi*, *My'lacri*, *Mylodon'tes*, *My'lodi*, *Momis'ci*, *Lag'teeth*, *Wall teeth*, (Prov.) *Az'zle teeth*, *Ax'le teeth*, *Cheek teeth*, *Wang teeth*, (F.) *Dents molaires* ou *mâchelières*, occupy the farther part of each alveolar arch. Their coronæ are broader than they are high: unequal; tuberculated; and the roots are more or less subdivided. They are 20 in number, 10 in each jaw. The first two pairs of molar teeth in each jaw have been called *lesser molares*, *premo'lar* or *bicusp'id*, *Dentes bicuspida'ti* seu *bucca'les*. The coronæ have two tubercles; the outer being more prominent and larger than the inner. The root is commonly simple; sometimes bifurcated. The other three pairs have been termed, *Great molares*—*Dents multicuspidées* (Ch.). Their coronæ are cubical, rounded, and have, at the upper surface, four or five tubercles, separated by deep furrows. The root is divided into two, three, four, and five *fangs*, which are more or less curved. The third great molaris appears a long time after the others, and hence has been called *Dens sapien'tiæ* or *Wisdom tooth*.

MOLASSES, Melasses.

MOLE, *Mo'la*, (*moles*, 'mass.') *My'lē*, *Zephyr'ius fœ'tus*, *Ger'men fal'sum*, *Pseudocye'sis mola'ris*, *Gravid'itas mola'ris*, *Moon'calf*, old French, *Fardeau*. A fleshy, insensible, at times, soft—at others, hard—mass; of variable and determinate size, which forms in the uterus, and is slightly united by vessels to that organ; from which its feeble vitality is derived. It has been conceived by some to be always owing to imperfect conception; but moles may form in the undoubted virgin. They seem to be owing to a morbid process; and certainly are generally connected with conception. At times, they contain parts of the fœtus; but commonly do not. At very different periods, in different women, the diseased mass is expelled from the uterus, with ordinary symptoms of abortion; and the case requires similar management. See, also, Nævus, (Sax. mal,) and Conception, false.

MOLE PLANT, Euphorbia lathyris.

MOLEC'ULAR, *Molecula'ris*, (F.) *Moléculaire*. Of or belonging to molecules or minute portions of any thing. Hence *molecular* death, in contradistinction to *somatic* death.

MOL'ECULE, *Molec'ula*, *Mass'ula*: (F.) *Molécule*, (dim. of *moles*, 'a mass.') A minute portion of any body. Also, the *cicatric'ula*, *mac'ula*, *gallatu'ra*, *gelat'inous mol'ecule*, *tread of the cock*, or embryo part of the impregnated ovum, observable by the microscope before the ovum has left the ovarium of the hen. It lies under the epidermic coats of the yolk, and upon its proper coat. If the ovum, according to Valentin, be lacerated and its contents minutely examined, the cicatricula is found like a grayish white disk, which in

its whole periphery is dense, granulous, and opake; but in the centre presents a clear, non-granulous, and perfectly diaphanous point. Purkinje found, that when he removed the dark granulous mass by suction with a small tube, there remained a perfectly transparent vesicle filled with a pellucid lymph, which had a decidedly spherical form, but, being extremely delicate, was easily lacerated, and then its fluid escaped. As he found this, which later naturalists have named —after its discoverer—the *Purkin'jean ves'icle*, in the ova of the ovary, but could not see it in ova, which had already entered the oviduct, he gave it the name *germinal vesicle*, or *germ cell*, *vesic'ula prolif'era* seu *germinati'va*, *Blastocyst'inx*, (F.) *Vésicule germinative*. Besides a perfectly colourless fluid, this contains one or more dark corpuscles, which appear as a nucleus through the including membrane in the shape of opake spots—the *ger'minal spot*, *mac'ula germinati'va* seu *ger'minans*, *nu'cleus germinati'vus*, *Blastocar'dia*, *Cor'culum ger'minis*, *Blastoce'lis*, *Wagne'rian spot* or *vesicle*, (F.) *Tache germinative*. The small dots, observed by Valentin in the Wagnerian vesicles and arising in them have been termed *Valentinian Vesicles*. The granulous membrane—its thickened portion, the so-called 'cicatricula,'—and the germinal vesicle, constitute those parts of the ovum which pass immediately into the original foundation of the embryo, the *blastoderma* or *germinal membrane*, *vesic'ula blastodermat'ica* seu *blastoder'mica*, *blastoder'mic vesicle*.

In the nomenclature of Professor Agassiz, the yolk membrane is an *ec'toblast*, the 'Purkinjean Vesicle,' a *me'soblast*; the 'Wagnerian Vesicle' an *en'toblast*, and the 'Valentinian Vesicle,' an *entosth'oblast*. See Cytoblast.

MOLECULE, GELATINOUS, Molecule.

MOLÈNE, Verbascum nigrum.

MOLES GANGLIFORMIS, ('gangliform mass,') Ganglion of Gasser.

MOLIBDUS, (*μολιβδος*,) Plumbum.

MOLILALIA, Mogilalia.

MOLI'MEN, pl. MOLI'MINA, (*molior*, 'to strive.') An attempt, a struggle. Hence:

MOLIMEN CRIT'ICUM. An impulsion towards a sudden solution or crisis of a disease.

MOLIMEN HÆMORRHAG''ICUM. The hemorrhagic diathesis or impulsion.

MOLIMEN HÆMORRHOIDA'LĒ. The hemorrhoidal diathesis or impulsion. See Hæmorrhois.

MOLIMEN MENSTRUA'LĒ. The menstrual diathesis or impulsion.

MOLIMEN NATURÆ SALUTARIUM, Instinct.

MOLKENKUR, Whey cure.

MOLLESCENCE, (*mollis*, 'soft,') Mollities.

MOLLET, (dim. of (F.) *mou*, *mol*, 'soft,') Sura.

MOLLIPUFFS, Lycoperdon.

MOLLIS MATER, ('tender mother,') Pia mater.

MOLLIT''IES, (from *mollis*, 'soft.') *Molles'cence*, *Malacis'mus*, *Mollit''ia*, *Mollitu'do*, *Emollit''ies*, *E. morbo'sa*, *Mollit''io*, *Malax'is*, *Malaco'ma*, *Malaco'sis*, *Malthax'is*, (F.) *Ramollissement*; (G.) Malakien of Fuchs. Preternatural softness of an organ or part of an organ.

MOLLITIES CER'EBRI, *Malaco'sis Cer'ebri*, *Encephalomala'cia*, *Encephalomalax'is*, *Encephalomalaco'sis Necrenceph'alus* (W. Farr), *Cerebromala'cia*, *Encephalosep'sis*, *Molles'cence* or *soft'ening* or a kind of *liquefaction of the cerebral substance*; the remainder preserving its ordinary consistency. (F.) *Ramollissement du cerveau*. The neurine often contains small clots of blood, giving rise to what has been termed *Apoplexie capillaire*, (Cruveilhier.) The symptoms denoting it are equivocal.

MOLLITIES CORDIS, Cardiomalacia.

MOLLITIES MEDUL'LÆ SPINA'LIS, *Myelomala'cia*, (F.) *Ramollissement de la Moëlle Épinière*. Softening of the spinal marrow.

MOLLITIES OS'SIUM, *Malacosteo'sis*, *Malacos'teon*, *Emollit''ies os'sium*, *Paros'tia flex'ilis*, *Osteomalaco'sis*, *Ostcomala'cia*, *Rachi'tis* seu *Rhachi'tis adulto'rum*, *Spina vento'sa* (of some), *Soft'ening of the bones*, (F.) *Ostéo-malacie*, *Osteo-malaxie*, *Ostéo-malakie*, *Ramollissement des os*. A rare affection, in which the bones are deprived of their salts, particularly of the phosphate of lime, and consist only, or mainly, of gelatin; hence they acquire a degree of suppleness which renders them unfit for the performance of their functions. The disease generally affects all the bones; but it is especially remarkable during life in the long bones, which assume any curvature that may be wished. Very violent pain is often experienced in them; and the urine frequently contains an enormous proportion of calcareous phosphate. The patient is compelled to remain in the horizontal posture; the bones no longer being fixed points for the muscles to act upon. The disease, has, hitherto, always terminated fatally, and dissection has exhibited the gelatinous nature of the bones; which, by desiccation, have become transparent, as if they had been macerated in acid.

Experience has afforded no means of relief in this dreadful affliction. The alkaline salts, earthy phosphates, &c. are of little or no use; the disease being in the cells of nutrition.

MOLLITIO, Mollities.

MOLLITUDO, Mollities.

MOLLUS'CUM, *Athero'ma*, *Ochthi'asis*, ([L.] *Molluscum*, 'a knotty growth on the bark of the maple.') A cutaneous affection, which consists of numerous tumours, varying in size from that of a pea to that of a pigeon's egg, filled with an atheromatous matter, which are developed in the substance of the derma, and are of various shapes, some having a large base, — others adherent by means of a pedicle.

Molluscum contagio'sum, (F.) *Acné molluscoïde*, a singular variety, is characterized by the presence of hard, round, tubercles, which are smooth and transparent, and, when pressed, pour out from an orifice in their summits a little opake or milky fluid.

The disease is probably seated in the sebaceous follicles. If internal treatment be adopted at all, it must consist of eutrophics, as arsenic, iodine, &c. The external treatment consists in the employment of measures calculated to excite the tubercles to inflammation, as by touching them with potassa.

MOLOCHE, (*μολοχη*,) Malva rotundifolia.

MOLOPES, (*μωλωψ*, 'a weal,') Vibices.

MOLYBDÆNUM MAGNESII, (*μολυβδος*, 'lead,') Manganese, black oxide of.

MOLYBDOCACHEXIA, (*μολυβδος*, 'lead,' and *cachexia*,) Saturnismus.

MOLYBDOCOLICA, (*μολυβδος*, 'lead,' and *colica*,) Colica metallica.

MOLYBDONOSUS, (*μολυβδος*, 'lead,' and *νοσος*, 'disease,') Leadpoisoning.

MOLYBDOPARESIS, (*μολυβδος*, 'lead,' and *παρεσις*, 'paralysis,') Palsy, lead.

MOLYBDUS, (*μολυβδος*,) Plumbum.

MOLYBDOSIS, (from *molybdus*, and *osis*,) Leadpoisoning.

MOLYNE, (*μολυνη*,) Anus.

MOLYNIE, (*μολυνιη*,) Anus.

MOLYNSIS, (*μολυνσις*, from *μολυνω*, 'to taint,') Miasma.

MOMIE, Mummy.

MOMIN, Mamei.

MOMISCI, Molar teeth. Also the parts of the molar teeth connected with the gums.

MOMOR'DICA, *M. Balsam'ina*, (*mordeo*, *momordi*, *morsum*, 'to bite,') *Balsam'ina*, *Nevrosper'-*

ma cuspida'ta, Balmapple, Balsam apple, (F.) *Balsamine, Pomme de merveille. Ord.* Cucurbitaceæ. The fruit of this oriental tree, *Pomum mirab'ilē* seu *hierosolymita'num,* was formerly considered vulnerary.

MOMORDICA ASPERA, M. Elaterium.

MOMOR'DICA ELATE'RIUM: *M. as'pera, Elate'rium, Ecba'lia Elate'rium, Ecba'lium officina'rum* seu *agres'tē* seu *cordifo'lium, Cu'cumis agres'tis* seu *asini'nus* seu *sylves'tris, Charan'tia, Guarer'ba or'ba, Ecbo'lium elate'rium, Wild, Squirt'ing,* or *Ass'es' cu'cumber,* (F.) *Concombre Sauvage, Momordique. Nat. Order,* Cucurbitaceæ. The dried sediment from the juice is the *elaterium* of the shops. (See Extractum Elaterii.) It is a most powerful cathartic, and, as such, has been used in dropsies. Its active principle is the *El'atin, El'aterin* or *Ec'balin.* Dose, gr. ¼ to gr. j. until it operates.

MOMORDIQUE, Momordica elaterium.

MO'NAD, (*μονας,* gen. *μοναδος,* 'a unit.') A simple particle, or atom, or unit. The smallest of all visible animalcules. A primary cell or germ.

MONÆ, Nates.

MONAR'DA, (after N. Monardes, a Spanish botanist,) *M. did'yma* seu *coccin'ea* seu *purpu'rea* seu *Kalmia'na, Scar'let Rose balm, Moun'tain mint, Oswe'go Tea, Moun'tain Balm, Horsemint, Square stalk, Red balm;* a beautiful indigenous plant, *Sex. Syst.* Diandria Monogynia. *Nat. Ord.* Labiatæ, has the excitant properties of Monarda punctata.

MONARDA ALLOPHYL'LA, M. fistulosa — m. Clinopodia, M. fistulosa — m. Coccinea, Monarda — m. Didyma, Monarda.

MONARDA FISTULO'SA, *M. rugo'sa* and *oblonga'ta; M. clinopod'ia* seu *allophyl'la, Wild bergamot', Horsemint.* The leaves have a fragrant smell; and an aromatic, somewhat bitter taste. They are reputed to be nervine, stomachic, and deobstruent [?].

MONARDA KALMIANA, Monarda—m. Oblongata, M. fistulosa.

MONARDA PUNCTA'TA, *Horsemint, Monarda,* (Ph. U. S.) Indigenous in the United States. Stimulant and carminative. The *Oleum monardæ* is officinal in the United States.

MONARDA PURPUREA, Monarda — m. Rugosa, M. fistulosa.

MONDER (F.), (from [L.] *mundare,* 'to clean.') To render clean or pure. In *Pharmacy,* it means to separate any substance from its impure or useless portion. In surgery, *monder* ou *mondifier une plaie,* is to clean or deterge a wound.

MONDIFICATIFS, ([L.] *mundus,* 'clean,' and *facere,* 'to make,') Detergents.

MONDIFIER UNE PLAIE, ('to cleanse a wound,') see *Monder.*

MONE'MERON, *Monoē'meron, Monohe'meron;* (*mono,* and *'ημερα,* 'a day.') A name given to several collyria, which were supposed to be capable of curing diseases of the eyes in a day.

MONENTERUM, (*mono,* and *εντερον,* 'intestine,') Colon.

MONE'SIA. A vegetable extract imported into Europe from South America, in hard, thick cakes. It is prepared from the bark of a tree, whose botanical name is uncertain—probably *Chrysophyl'lum glycyphlæ'um* seu *Buranhem, Burunhem, Guaranhem; Ord.* Sapotaceæ. It is very friable, and its fracture very much resembles that of a well-torrefied cocoanut. It is wholly soluble in water; and its taste—which is at first sweet like liquorice—sometimes becomes astringent. It is on account of its astringent properties that it has been prescribed in chronic bronchitis, hæmoptysis, diarrhœa, leucorrhœa, uterine hemorrhage, &c. It has been applied locally, in the form of ointment, (*Mones.* p. 1, *Adipis,* p. vij.)

The dose of Monesia is from 12 to 40 grains a day.

MONEYWORT, Lysimachia nummularia.

MONGO'LIAN. Anthropologists give the name *Mongolian race* to a variety of the human species, spread over a great part of the north of Asia, in China, India, Thibet, the Moluccas, &c. The individuals composing it have the skin of a brown red, forehead flat, nose broad, cheeks prominent, and lips large. See Homo.

MONGREL, ([Sax.] mengan, or mængan, 'to mix,') Hybrid.

MONIPLIES, [Sc.] ('many plies or folds,') Omasum.

MO'NISM, *Monis'mus,* (*μονας,* 'unity.') The doctrine, which declares matter and mind to be identical.

MONK PHYSIC''IANS AND SUR'GEONS. A class of practitioners of whom Frère Cosme and Jacques Beaulieu in France, and Pravetz in Germany, were the most distinguished.

MONKSHOOD, Aconitum — m. Common, Aconitum napellus—m. Salutary, Aconitum anthora — m. Wild, Aconitum uncinatum.

MONNI'NA POLYSTA'CHIA, (after Monnino, Count de Florida Blanca, a Spanish promoter of botany.) A beautiful South American plant. *Nat. Ord.* Polygaleæ. *Sex. Syst.* Diadelphia Octandria. The bark of the root is a powerful astringent, and much used in South America in diseases of the bowels.

MONNYPLIES, [Sc.] ('many plies or folds,') Omasum.

MONO, (from *μονος,* 'one alone,') in composition, one alone, only one.

MONOBLEP'SIS, (*mono,* and *βλεψις,* 'sight.') An affection in which vision is confused, imperfect, and indistinct, when both eyes are employed; but perfect or nearly so, when either eye is used singly.

MONOCAR'PÆ, (*mono,* and *καρπος,* 'fruit.') A division of cutaneous affections, of the family Eczematosen, of Fuchs, which includes strophulus, psydracia, and ecthyma.

MONOCEPH'ALUS, (*μονοκεφαλος,* from *mono,* and *κεφαλη,* 'head.') A compound monster having two bodies with a single head.

MONOCLE, Monoculus.

MONOCOLON, Cæcum, Rectum.

MONOCRA'NUS, (*mono,* and *κρανον, κρανιον,* 'cranium.') A monster with one cranium, but with the face in part double.

MONOCULUM, Cæcum.

MONOC'ULUS, *Mon'ocle, Monophthal'mus, Unioc'ulus, Unoc'ulus,* (F.) *Monocle,* (*mono,* and *oculus,* 'an eye.') A bandage employed to maintain topical applications over one of the eyes. This bandage, called by some surgeons *Simplex oc'ulus,* (F.) *Œil simple,* is made of a roller three or four ells long, rolled into a single ball. See Cyclops.

MONODIPLO'PIA, (*mono, διπλοος,* 'double,' and *ωψ,* 'eye.') Double vision with one eye.

MONOEMERON, Monemeron.

MONOGAS'TRIC, *Monogas'tricus,* (*mono,* and *γαστηρ,* 'stomach.') That which has but one stomach. Man is *monogastric;* ruminating animals, on the contrary, are *polygastric.*

MONOGENY, (*mono,* and *γενος,* 'kind,') see Generation.

MON'OGRAPH, MED'ICAL, *Monograph'ia med'ica,* (*mono,* and *γραφη,* 'description.') An *ex professo* treatise on a single class of diseases, or on a single disease or medical subject.

MONOHEMERON, Monemeron.

MONOMACHON, Cæcum.

MONOMACUM, Cæcum.

MONOMANIA, see Melancholy—m. Homicidal, Homicidal insanity—m. Incendiary, Pyromania.

MONOMA'NIAC, *Monomani'acus*, (F.) *Monomane, Monomaniaque.* One who labours under monomania, or insanity chiefly on one subject.

MONOMANIE. Melancholy — *m. Homicide*, Homicidal insanity.

MONOMMATOS, (*μονομματος*, from *mono*, and *ομμα*, 'eye,') Cyclops.

MONOMORIA, (*mono*, and *μωρια*, 'silliness,') see Melancholy.

MONOM'PHALUS, (*mono*, and *ομφαλος*, 'a navel.') A monster produced by the union of two bodies having a common umbilicus. Such a double monster is called by I. G. St. Hilaire *Monomphal'ian*, (F.) *Monomphalien.*

MONONCŒ'A, (*mono*, and *νοος*, 'thought.') Thought on one subject, as in monomania.

MONOPAGIA, (*mono*, and *παγιος*, 'fixed,') Clavus hystericus, Hemicrania.

MONOP'ATHY, *Monopathi'a*, (*mono*, and *παθος*, 'disorder.') A state in which one organ or function is disordered. Applied to melancholy or monomania, which is said to be a *monopathic* affection.

MONOPEGIA, (*mono*, and *πηγνυμι*, 'to fix,') Clavus hystericus, Hemicrania.

MONOPHTHALMUS, (*mono*, and *οφθαλμος*, 'eye,') Cyclops, Monoculus.

MONOPLAS'TIC, *Monoplas'ticus*, (*mono*, and *πλασσω*, 'I form.') That which has one form. A *monoplastic element*, in histology, is one which retains its primary form.

MONOPODIA, (*mono*, and *πους*, gen. *ποδος*, 'a foot,') Sympodia.

MONOPS, (*μονωψ*, from *mono*, and *ωψ*, 'eye,') Cyclops.

MONOPSIA, (*mono*, and *οψις*, 'vision,') Cyclopia.

MONOPUS, (*mono*, and *πους*, 'a foot.') Having one foot. See Symmeles.

MONOR'CHIS, gen. *Monor'chidis*, (*μονορχις*, from *mono*, and *ορχις*, gen. *ορχιδος*, 'testicle,) (F.) *Monorchide.* One who has only one testicle. The condition is *Monorchid'ia.*

MONORGANICI, see Local.

MONOS'CELUS, (*μονοσκελης*,) (*mono*, and *σκελος*, 'a leg.') One legged.

MONOSI'TIA, (*μονοσιτια*, from *mono*, and *σιτος*, 'food,' 'repast.') The habit of taking only one meal in the day.

MONOSO'MIAN, (F.) *Monosomien*, (*mono*, and *σωμα*, 'a body.') An epithet applied to a double monster, which seems, in the first instance, to have had but one body.

MONOT'ROPA UNIFLO'RA, (*mono*, and *τροπος*, 'a turn,—the solitary flower turned to one side.') *Indian pipe, Iceplant, Pipe-plant, Nest root, Fit root. Ord.* Ericaceæ. An indigenous plant, whose juice, mixed with water, has been extolled by the Indians in ophthalmia. The dried root in powder has been given in epilepsy and nervous diseases.

MONS VEN'ERIS, ('mount of Venus,') *Montic'ulus Ven'eris, Ephebæ'um*, (F.) *Mont de Vénus, Pénil, Motte, Éminence sus-pubienne.* The more or less projecting eminence, situate at the base of the hypogastrium, above the vulva and in front of the os pubis. At the period of puberty it becomes covered with hair, formerly called *Tresso'ria.*

At times, mons veneris is applied to the corresponding part in the male.

MONSEL'S SALT, see Ferri sulphas — m. Solution, see Ferri sulphas.

MONSO'NIA OVA'TA, (after Lady Ann Monson, aid to Lee in his Introduction to Botany,) *Keita*, of the Hottentots. A plant of the *Nat. Ord.* Geraniaceæ, which grows at the Cape of Good Hope. The root and herb are very astringent, and are used successfully in dysentery.

MON'STER, *Mon'strum*, ('anything strange.') *Porten'tum, Te'ras, Pe'lor, Pelo'ria, Pelo'rium, Pelo'rum*, (F.) *Monstre.* Any organized being, having an extraordinary vice of conformation, or a preternatural perversion of every part, or of certain parts only.

The following classification embraces the main varieties of malformations — *Vit'ia pri'mæ conformatio'nis.*—1. Those in which certain parts of the normal body are absent or defective—*mon'stra deficient''ia*, constituting *Ectrog''eny* of Serres, — *Monstros'ity by defect'*, (F.) *Anomalie* ou *Monstruosité par défaut, Agénésie.* 2. Those produced by fusion or coalition of organs—*coalit''io par'tium, sym'physis.* 3. Those, in which parts, united in the normal state, are separated from each other—*clefts, fissures.* 4. Those in which normal openings are occluded—*atre'sia.* 5. Those by excess, or in which certain parts have a disproportionate size—*mon'stra abundan'tia, Monstros'ity by excess'*, (F.) *Monstruosité par excès, Hypergénésie.* 6. Those, in which one or more parts have an abnormal position — *si'tus muta'tus.* 7. Those affecting the sexual organs — *hermaph'roditism*; and to these "true malformations" Vogel adds 8. Diseases of the fœtus, and abnormal states of its envelopes.

Amongst the numerous hypotheses entertained on the origin or cause of monsters, or of monstrosity—*terato'sis, monstros'itas*, (F.) *monstruosité*, as the state has been called — three only are worth mentioning. They have been attributed, 1. To the influence of the maternal imagination on the fœtus in utero. 2. To accidental changes, experienced by the fœtus at some period of its uterine existence: and 3. To a primitive defect in the germs. The second seems to be the only one that is philosophical.

Cases of *supernumerary fingers* and *toes*, which fall under the 5th division of the above classification, are, probably, owing to an excess of formative action in the part; and it may be a question, whether many of the cases of diplogenesis are not owing to this rather than to a fusion of two germs.

As a medicolegal question, monsters, if capable of action as individuals, have the same rights as other persons.

MONSTERS, COMPOUND, see *Unitaire* — m. Double, see Diplogenesis—m. Triplet, see Triplet.

MONSTRA ABUNDANTIA, see Monster—m. Deficientia, see Monster—m. Trigemina, see Triplet—m. Triplica, see Triplet.

MONSTRE, Monster — *m. Composé*, see *Unitaire—m. Unitaire*, see *Unitaire.*

MONSTROSITAS, see Monster.

MONSTROSITY, see Monster — m. by Defect, see Monster — m. by Excess, see Monster — m. by Inclusion, see *Emboîtement.*

MONSTRUM, Monster.

MONSTRUOSITÉ, see Monster — *m. par Défaut*, see Monster — *m. par Excès*, see Monster—*m. par Inclusion*, see *Emboîtement.*

MONT DE VÉNUS, Mons Veneris.

MONTBRI'SON, MIN'ERAL WA'TERS OF. Montbrison is a town in France, in the department of the Loire, fifteen leagues from Lyons. There are three cold springs which are highly acidulous, and used as refrigerants and aperients.

MONT-DE-MAR'SAN, MIN'ERAL WA'TERS OF. Mont-de-Marsan is a small French town, 10 leagues from Dax: where there is a chalybeate spring, somewhat frequented.

MONT-D'OR', MIN'ERAL WA'TERS OF. Mont-d'Or is a village seven leagues from Clermont, (Puy-de-Dôme,) at which are several mineral springs, cold and thermal. Those of the Fountain *La Madelaine* and of the *Great Bath*, are thermal, temp. 112° Fah., and contain carbonic

acid, subcarbonate and sulphate of soda, chloride of sodium, subcarbonate of lime and magnesia, alumina and oxide of iron. Those of *St. Margaret* are cold, and contain much carbonic acid. Season, from the 15th of June to the 14th of September.

MONTECATI'NI, MIN'ERAL WA'TERS OF. This town is situate near Borgo-Buggiano, in Tuscany. The springs are thermal; ranging from 78° to 118° Fahrenheit.

MONTHLY COURSES, Menses — m. Illness, see Menses — m. Periods, Menses.

MONTICULUS CEREBELLI, (dim. of *mons*, gen. *montis*, 'a mountain,') see Vermiform processes of the Cerebellum — m. Veneris, Mons veneris.

MONTPELL'IER, CLI'MATE OF. This seat of a celebrated medical school in the S. E. of France was at one time renowned for its climate, and especially in regard to its adaptation to consumptive cases. This is now exploded, and it is at present esteemed an unfit residence for them. The climate possesses the general characters of that of southeastern France—being dry, hot, and irritating; subject to frequent vicissitudes, and especially to blasts of keen, cold, northerly winds. It is, indeed, most injurious in pulmonary diseases.

MOON, *Lu'na*, *Sele'nē*, *Me'nē*, (Sax. Mona, [G.] Mond,) (F.) *Lune*. The moon has been supposed to exert considerable influence over the human body, in health and disease. Such influence has been grossly exaggerated. Not many years ago, it would have been heretical to doubt the exacerbation of mania at the full of the moon; yet it is now satisfactorily shown, that if the light be excluded at this period, the *lunatic* is not excited more than ordinarily.

MOONCALF, Mole.

MOONED, Lunatic.

MOONSTROKE, see *Coup de soleil*.

MOONSTRUCK, Lunatic.

MOORBERRY, Vaccinium oxycoccos.

MOORGRASS, Potentilla anserina.

MOORSHEAD, Alembic.

MOORWORT, BROADLEAVED, Andromeda mariana.

MOOSEWOOD, Dirca palustris.

MOPE-EYE, Myopia.

MOPHETA, see Mephitism.

MOPSICAL, Myopic.

MORBEUX, Morbid.

MORCEAU DU DIABLE, ('devil's bit,' from [L.] *mordere, morsum*, 'to bite,') see Tube, Fallopian—*m. Frangé*, see Tube, Fallopian.

MORCELLEMENT (F.), (from [L.] *mordere, morsum*, 'to bite.') 'Dividing into pieces.' A mode adopted by M. Maisonneuve for removing successfully a large fibrous tumour of the neck.

MORCHEL'LA ESCULEN'TA, (from Morchel, the German name,) *Phal'lus esculen'tus, Helvell'a esculen'ta, Fun'gus fugino'sus, Meru'lius, Com'mon Morell'*, (F.) *Morille. Nat. Order*, Fungi. A fungus, which is esteemed a luxury, entering into ragouts and other dishes, or cooked itself between slices of bacon. It has been considered to be aphrodisiac.

MORDEX, gen. *Mor'dicis*, (from *mordere*, 'to bite,') Tooth.

MOR'DICANT, *Mor'dicans, Ca'lor mor'dicans*, (*mordeo*, 'I bite.') A morbid heat, causing a disagreeable pungent sensation in the fingers of the physician.

MORDICES, (pl. of *mordex*,) Teeth: see Tooth.

MOREA (*μορεα*,) Morus nigra.

MORELL, COMMON, Morchella esculenta.

MORELLE, Boletus esculentus — *m. à Fruit noir*, Solanum — *m. Furieuse*, Atropa belladonna —*m. en Grappes*, Phytolacca decandra—*m. Grimpante*, Solanum dulcamara.

MORETARIUM, Mortar.

MORE'TUM. A kind of salad, with the ancient Romans, made of garlic, parsley, vinegar, oil, &c.

MORE'TUS, (*morum*, 'the mulberry.') Ancient name of a cordial julep, into the composition of which the syrup of mulberries entered.

MORGAGN'I, HU'MOUR OF, *Hu'mor Morgagnia'nus*, (F.) *Humeur de Morgagni*. A peculiar, transparent, slightly viscid fluid, found between the crystalline and its capsule.

MORGELINE, (from [L.] *morsus gallinæ*, 'hen's bite' [?]), Alsine media.

MORGUE (F.). A *deadhouse*, in France, wherein persons, found dead, are exposed with the view of being recognized by their friends — *Necrocomi'um, Necrodochi'um, Necros'tou.*

MORI SUCCUS, see Morus nigra.

MORIA, (*μωρια*,) Idiotism—m. Demens, Idiotism, Dementia — m. Demens lerema, see Dementia — m. Imbecilis amnesia, Amnesia.

MORIBUND, (from *morior*, 'to die,') Psychorages.

MORILLE, Morchella esculenta.

MORINGA APTERA, (*Muringo*, in Malabar,) see Guilandina moringa — m. Nux, Ben, Guilandina moringa — m. Oleifera, Guilandina moringa — m. Pterygosperma, Guilandina moringa — m. Zeylanica, Guilandina moringa.

MORION, (*μοριον*, 'a part, a member,') Genital organ, Penis.

MORIOPLAS'TICĒ, *Chirur'gia curto'rum* seu *anaplas'tica, Restitu'tio organ'ica* seu *par'tium deperdita'rum, Transplanta'tio, Autoplas'ticē, Chirur'gia plas'tica, Anaplas'tic Surg''ery, Autoplas'ty, Autoplas'tic* or *Plastic Surg''ery*, (*μοριον*, 'a part,' and *πλαστικος*, 'forming.') The restoration of lost parts. The operations for this purpose have various names, according to the part concerned, as *Cheiloplastice, Ceratoplastice, Rhinoplas'tice*, &c.

MORNING GLORY, BLUE, Convolvulus nil.

MO'RO, (*morum*, 'a mulberry,' *Morum*, (F.) *Mûre*. A small abscess resembling a mulberry. A small tumour, of a similar appearance, particularly on the genital organs after impure coition.

MOROCHITES, Morochthus.

MOROCHI'THUS, *Moroch'tus, Morochi'tes, Merochi'tes, Meroc'tes, Galax'ia, Leucograph'ia*, (F.) *Pierre au lait, Milkstone.* An Egyptian stone, used by the ancients as an application to the intertrigo of children: probably a variety of fuller's earth, inasmuch as it appears to have been used by fullers.

MOROCHTUS, Morochthus.

MOROCOMIUM, (*μωρια*, 'folly, idiocy,' and *κομεω*, 'to care for,') Morotrophium.

MORODOCHIUM, (*μωρια*, 'folly, idiocy,' and *δεχομαι*, 'to receive,') Morotrophium.

MOROSIS, (*μωρωσις*,) Fatuitas, Idiotism.

MOROSITA'TES, (*moro'sus*, 'morose,' 'peevish,' 'fretful,' from *μωρια*, and *μωρωσις*, 'stupidity.')

A generic name given by Linnæus to an order of Vesaniæ, in which he included pica, bulimia, polydipsia, antipathia, nostalgia, panophobia, satyriasis, nymphomania, tarentismus, and hydrophobia.

MOROTROPH'IUM, *Morocomi'um, Morodochi'um, Manicocomi'um*, (*μωρος*, 'fatuous,' and *τροφη*, 'support.') An *insane' establishment, lu'natic asy'lum, mad'house, Bed'lam*, (F.) *Hôpital des fous, Maison petite.*

MORPHÆA, Morphew — m. Alba, Lepra alphoides—m. Nigra, Lepra nigricans.

MORPHÉE, Morphew.

MOR'PHEW, (low L.) *Morphæ'a*, (F.) *Morphée.* A term vaguely applied to scurfy eruptions on the face. *Morphæa* was formerly applied to squamous diseases in general.

MORPHIA, (*Μορφευς, Morpheus*, the 'god of sleep,') Morphina — m. Acetate of, Morphinæ acetas—m. Citrate of, see Morphinæ sulphas—m. Lactate of, see Morphinæ sulphas—m. Muriate of, see Morphinæ sulphas — m. Sulphate of, Morphinæ sulphas — m. and Zinc, double iodide of, Zinc and Morphia, double iodide of.

MORPHIÆ ACETAS, Morphinæ acetas — m. Citras, see Morphinæ sulphas—m. Hydrochloras, Morphinæ murias — m. Murias, see Morphinæ sulphas — m. Sulphas, Morphinæ sulphas.

MORPHIC, *Morphique.*

MOR'PHIATED, *Morphia'tus*, (F.) *Morphiné.* Impregnated with morphia or with one of its salts.

MOR'PHICA, (see *morpho.*) Monstrosities of birth. The 3d order, class *Typhica* of Good.

MORPHI'NA, *Mor'phia, Mor'phium, Morphi'nē, Mor'phine.* A solid, colourless alkali; crystallizable in beautiful pyramids, truncated and transparent; soluble in alcohol, and slightly so in boiling water. It exists, combined with meconic acid, in opium. It may be obtained by decomposing, by means of ammonia or calcined

magnesia, an aqueous solution of opium made in the cold. The following is the process of the Pharm. U. S. *Opium*, sliced, ℔j; *Distilled water*, *Alcohol*, *Animal charcoal*, each a sufficient quantity; *Solution of ammonia*, f℥vj. Macerate the opium with four pints of distilled water for 24 hours, and having worked it with the hand, digest for 24 hours, and strain. Macerate the residue twice successively with distilled water, and strain. Mix the infusions: evaporate to six pints, and filter; then add first five pints of alcohol, and afterwards three fluidounces of the solution of ammonia, previously mixed with half a pint of alcohol. After 24 hours, pour in the remainder of the solution of ammonia, mixed as before with half a pint of alcohol; and set the liquor aside for 24 hours, that crystals may form. To purify these, boil them with two pints of alcohol till they are dissolved; filter the solution, while hot, through animal charcoal, and set it aside to crystallize.

Morphia dissolves perfectly in the acids, which it saturates; and with which it forms very crystallizable salts, with the exception of the acetate. All these salts have a bitter taste, and act upon the animal economy in the same manner as opium, but more powerfully. The *acetate* is the salt commonly employed in medicine. It was, at one time, supposed that Morphia is the purely sedative part of opium, divested of its irritating properties; but experience has not confirmed this. On the contrary, it will generally disagree where opium does. Onesixth of a grain has been considered equal to a grain of opium.

MORPHI'NÆ ACE'TAS, *Mor'phiæ Ace'tas*, *Mor'phium ace'ticum*, *Ac''etate of Morphine*, *Acetate of Mor'phia*. A salt formed by saturating morphia with acetic acid. (*Morphia*, in powder, freed from narcotina by boiling with sulphuric ether, ℥j; *Distilled water*, Oss; *Acetic acid*, a sufficient quantity. Mix the morphia with the water; then carefully drop in the acid, constantly stirring until the morphia is saturated and dissolved. Evaporate the solution in a waterbath to the consistence of syrup. Lastly, dry the acetate with a gentle heat and rub it into powder.—Ph. U. S.) Dose, from ⅛th of a grain to half a grain.

MORPHI'NÆ SUL'PHAS, MOR'PHIÆ SUL'PHAS, *Sul'phate of Mor'phia*. A salt, formed like the sulphate, by saturating morphia with sulphuric acid, evaporating and crystallizing. Dose, the same as of the acetate.

Lac'tate, *Mu'riate*, and *Cit'rate of Mor'phia*, *Mor'phiæ ci'tras*, have likewise been used; but they possess little or no advantages over the other salts. The sulphate and muriate are officinal in the Ph. U. S. The muriate—MOR'PHIÆ MU'RIAS, *M. Hydrochlo'ras*, (Ph. B., 1864,)—is directed to be prepared as follows. (*Morphiæ*, in pulv., ℥j; *Aquæ destillatæ*, Oss; *Acid. muriat.* q. s. Mix the morphia with the water; carefully drop in the acid, till the morphia is saturated and dissolved. Evaporate and crystallize.) Dose from ⅛th of a grain to half a grain.

MORPHINÉ, Morphiated.

MORPHIQUE, *Morph'icus*, *Morph'ic*, (from *morphia*. Applied in pharmacy to any composition of morphia.

MORPHIUM, Morphina—m. Aceticum, Morphinæ acetas.

MORPHO, (*μορφη*, 'shape or form,') in composition, the same.

MORPHOLOG''ICAL, *Morpholog''icus*, (*morpho*, and *λογος*, 'a description.') That which has relation to the anatomical conformation of parts. Applied, at times, to the alterations in the *form* of the several parts of the embryo, in contradistinction to *histological*, which is applied to the transformation by which the tissues are gradually generated. In comparative anatomy, it is applied to the history of the modifications of forms, which the same organ undergoes in different animals, and, more generally, to the doctrine of the forms of organized bodies.

MORPHOLOGY, Anatomy, see Morphological.

MORPHOL'YSIS, (*morpho*, and *λυσις*, 'solution.') Destruction of organization. An agent that occasions such destruction is called a *morpholyt'ic*.

MORPHOLYTIC, see Morpholysis.

MORPHON'OMY, *Morphonom'ia*, (*morpho*, and *νομος*, 'a law.') The laws of organic formation. The department of anatomical science which teaches the laws of organic configuration.

MORPHOT'IC, *Morphot'icus*, (*μορφη*, 'shape.') A term applied to organic or anatomical elements in contradistinction to the inorganic.

MORPHOTOMY, (*morpho*, and *τεμνω*, 'to cut,') see Anatomy.

MORPIO, see Pediculus.

MORPION, Crab-louse, see Pediculus.

MORRHUA AMERICANA, see Oleum jecoris asclli.

MORS, gen. *Mor'tis*, Death—m. Apparens, Asphyxia—m. Putativa, Asphyxia—m. Repentina, Demotivus lapsus.

MORSELLUS, (dim. of *morsus*, 'a bite,') Tabella.

MORSULI ANTIMONIALES, (pl. of *morsulus*,) Tabellæ antimoniales Kunckelii—m. Stibii, Tabellæ antimoniales Kunckelii.

MORSULUS, (dim. of *morsus*, 'a bite,') Tabella.

MORSURE, Degmos—*m. du Diable* ('devil's bite'), see Tube, Fallopian.

MORSUS, gen. *Morsûs*, (*mordeo*, *morsum*, 'to bite,') Degmos—m. Diaboli, Scabiosa succisa, see Tube, Fallopian—m. Gallinæ, Alsine media—m. Stomachi, Cardialgia—m. Ventriculi, Cardialgia.

MORT, Adeps.

MORT, (from *mors*, gen. *mortis*, 'death,') Dead, Death—*m. Apparente*, Asphyxia—*m. du Chien*, Cholera—*m. aux Chiens*, Colchicum autumnale—*m. du Diable*, Scabiosa succisa—*m. Né*, Still-born—*m. aux Panthères*, Doronicum pardalianches.

MORTA, Pemphigus.

MOR'TAL, *Morta'lis*, (from *mors*,) *Lethalis*, *Leta'lis*, *Thanato'des*, *Thanas'imus*, (F.) *Mortel*. That which is subject to death;—that which causes death:—as, *man is mortal*; a *disease is mortal*. Of old, it was the custom to have a division of *mortal* or *deadly* wounds, which gave rise to many errors in medico-legal investigations, as the mortality, *Lethal'itas*, *Letal'itas*, (F.) *Léthalité*, of wounds depends upon various circumstances; and it is often a matter of extreme difficulty to pronounce whether or not a wound is necessarily mortal.

MORTAL'ITY, *Mortal'itas*, (F.) *Mortalité*. This word, taken in an extended sense, expresses the condition of all organized bodies,—of being subject to the cessation of life. In the sense in which it is most frequently employed, it signifies, the *death rate*,—the proportional quantity of individuals who, in a certain population, die in a given time. If we assume the population of the earth to be one thousand millions, and a generation to last thirty-three years; in that space of time, the one thousand millions must all die, and, consequently, the number of deaths will be, by approximation,

Each year	30,000,000
Each day	82,109
Each hour	3,421
Each minute	57
Each second	1 nearly.

If, on the other hand, as has been supposed, the number of deaths is to that of the births as TEN to TWELVE: there will be born,

Each year	36,000,000
Each day	98,356
Each hour	4,098
Each minute	68
Each second	1 & 2-15ths.

It would not be proper to regard the *value of life* in different countries, or in different periods in the same country, to be indicated by the average mortality; inasmuch as in one case a greater mortality may occur amongst children, and in another amongst adults.

MORTALITY, BILLS OF, *Bills of Necrol'ogy, Mor'tuary Reg''isters*, (F.) *Tables de Mortalité*. Tables, instituted for the purpose of exhibiting the number of deaths, &c., in a given time. Well-kept bills of mortality are of great use to the physician and political economist. Those of London were proverbial for their inaccuracy and insufficiency; especially as regards the complaints of which the persons had died. They were formerly made out by the parish clerks, and the information was conveyed to them by two old women, who were appointed in each parish, and were called *Searchers*; — their duty being to see that the deceased had died a natural death. This defective system has, however, been abolished; and the Registrar-General's annual reports of births, deaths, and marriages, exhibit how admirably vital statistics are now collected in Great Britain.

MOR'TAR, *Morta'rium, Moreta'rium, Morto'rium, Pi'so, Ac'onē, Pi'la, Hol'mus, Ig'dē, Ig'dus*, (F.) *Mortier*. A vessel for reducing to powder different solid substances, and for making certain mixtures. Various substances are employed in the construction of mortars;—iron, marble, glass, wedgewood ware, &c.

MORTARIOLUM, (dim. of *mortarium*, 'a mortar,' or cavity resembling a mortar.) Alveolus.

MORTARIUM, Mortar.

MORTEL, Mortal.

MORTIER, Mortar.

MORTIFER, (*mors*, gen. *mortis*, 'death,' and *fero*, 'I carry.') Lethiferous.

MORTIFICATIO, (*mors*, gen. *mortis*, 'death,' and *fio*, 'I become.') Mortification—m. Pulmonum, Necropneumonia.

MORTIFICA'TION, *Mortifica'tio, Necro'sis, Sphacela'tion*. The loss of vitality in a part of the body. The incipient stage of mortification, when the case is still recoverable, is called *Gangrene*; when totally dead, *Sphacelus*. Mortification of a bone is called Necrosis.

MORTIFICATION, COLD, Sphacelus — m. Ergot, Ergotism — m. Hot, Gangrene — m. Mildew, Ergotism.

MORTOOTH, Cupri sulphas.

MORTUARY REGISTERS, Mortality, bills of.

MORTUUS, (from *mors*,) Dead.

MORULA, (from *morum*, 'a mulberry.') Button scurvy.

MORUM (*μορον*), see Morus nigra—m. Palpebræ internæ, Trachoma carnunculosum.

MO'RUS NI'GRA, *M. lacinia'ta, Mul'berry Tree, Mor'ea, Sycami'nus. Sycamin'ea*, (F.) *Mûrier Noir. Ord.* Urticaceæ. The fruit of the mulberry tree, *Morum, Sycami'num*, (F.) *Mûre*, is pleasant, sweet, subacid, and abounds with a deep violet-coloured juice. *Mo'ri suc'cus* (Ph. L.). A syrup is directed in the London Pharmacopœia. The bark of the root has been regarded as an anthelmintic.

MORUS RU'BRA, *Red Mul'berry, Wild Mul'berry*; indigenous. The root has been used to destroy tænia.

MORVE, (from *morbus*, 'a disease.') Mucus, Nasal mucus; see Equinia — *m. Farcineuse*, see Equinia.

MOS, gen. *Mo'ris*, Habit.

MOS MORBI BENIG'NUS seu MALIG'NUS. The benign, or malignant character of a disease.

MOSCHARDI'NA, *Muscer'da*, (*μοσχος*, 'musk.') A lozenge for the mouth, composed of musk, ambergris, and other aromatics.

MOSCHELÆ'ON, (*μοσχος*, 'musk,' and *ελαιον*, 'oil.') *Moscolæ'a*. A compound aromatic oil, containing musk.

MOSCHUS, (*μοσχος*,) Musk — m. Arabum, Hibiscus abelmoschus — m. Factitius, Musk, artificial.

MOSCOLÆA, Moschelæon.

MOSLICH, Maslach.

MOSQUITA, see Mosquito.

MOSQUI'TO (S.), (dim. of [S.] *mosca*, 'a fly.') *Musquito, Cu'lex mosqui'to*. A very troublesome insect in warm, moist situations. Curtains, called *Mosquito curtains* or *bars*, are used by way of protection. The entrance of mosquitos into the bedchamber may also be prevented, to a certain extent, by keeping the doors and windows closed until the lights are extinguished. The pain and itching from the bites are alleviated by washing them with hartshorn.

MOSQUITA is a name given, by the Portuguese, to small, red pimples on the skin, resembling the bites of the mosquito.

MOSS BERRY, Vaccinium oxycoccos—m. Ceylon, Fucus amylaceus — m. Club, Lycopodium — m. Cup, Lichen pyxidatus — m. Edible, Fucus amylaceus — m. Haircap, Polytrichum Juniperinum — m. Iceland, Lichen Islandicus — m. Irish, Fucus crispus—m. Jaffna, Fucus amylaceus—m. Marine, Fucus amylaceus — m. Pearl, Chondrus crispus—m. Stone, *Tripe de roche*—m. Wall, common yellow, Parmelia parietina.

MOTAMEN, (*movere, motum*, 'to move.') Motion.

MOTATIO, Motion.

MOTE (*μοτη*), Carbasus, Linteum.

MOTEUR, Motory.

MOTHER, ([Sax.] *moδορ*,) Hysteria, Phlegm.

MOTHER'S MARKS, Nævus—m. Spots, Nævus.

MOTHERWORT, Leonurus cardiaca, Matricaria.

MOTIL'ITY, *Motil'itas*, (from *movere, motum*, 'to move.') (F.) *Motilité, Motricité*. Faculty of moving; moving power; contractility.

MO'TION, *Mo'tus, Mo'tio, Mota'tio, Mota'men, Commo'tio, Permo'tio, Cive'sis, Movement*, (F.) *Mouvement*. The act of changing place. The various motions may be divided into, — *First*, the *voluntary*, or those that are executed under the influence of the brain. *Secondly*, the *involuntary*, which may be subdivided into, 1. Those of the *reflex* kind, as the closure of the larynx on the contact of acrid vapours, of the pharynx on that of the food,—a function of the spinal marrow; and, 2. Those that are executed under the organic and other nerves of involuntary function. It is probable, too, that every living tissue is capable of moving responsive to its appropriate irritant. See Irritability.

MOTION, CILIARY, see Cilia — m. Involuntary, see Automatic — m. Vibratory, see Ciliary — m. Voluntary, Autocinesis.

MOTIVE, Motory.

MOTOR, Motory — m. Externus, Motor oculi externus—m. Oculi, Motores oculorum.

MO'TOR OC'ULI EXTER'NUS, *Motor externus, Ner'vus tim'idus* seu *abdu'cens*, (F.) *Nerf oculo-musculaire externe* (Ch.), *Nerf moteur oculaire ex-*

terne. Sixth pair of nerves. arises from the furrow which separates the pons Varolii from the medulla oblongata. It enters the cavernous sinus; anastomoses on the outside of the carotid artery with two filaments furnished by the superior cervical ganglion; enters the orbit by the sphenoidal fissure, and is lost on the rectus externus oculi. This pair is, also, called *Abducen'tes.*

MOTO'RES OCULO'RUM, *Moto'rii Oculo'rum, Ocula'res commu'nes, Ophthal'mici exter'ni, Motor Oculi, M. O. commu'nis, Oculo-moto'rius, Common Oculo-mus'cular Nerves,* (F.) *Nerfs moteurs oculaires communs* (Ch.), The *third pair of nerves, Par tert'ium.* This nerve arises from a depression at the inner side of the peduncles of the brain, between the tuber annulare and corpora mammillaria. It enters the outer part of the cavernous sinus, and passes into the orbitar cavity. Behind the sphenoidal fissure, it divides into two branches; the one *superior* and the other *inferior.* The *former* is lost on the rectus superior oculi and the levator palpebræ superioris; the *latter*—the larger of the two—divides into three branches, which pass to the rectus internus, rectus inferior, and lesser oblique. The last furnishes a filament, which passes to the ophthalmic ganglion.

MOTORIAL, Motory.

MOTORPATHY, (*motor,* and *πάθος,* 'affection,) Kinesipathy.

MO'TORY, *Mo'tive, Mo'tor, Moto'rial, Mo'trix, Kinet'ic* or *Cinet'ic,* (F.) *Moteur.* That which moves or causes movement, as *motor nerves* in contradistinction to *sensory.*

MOTOS, (*μοτος,*) Linteum, Tent.

MOTO'SIS. The application of lint to a wound.

MOTRICITÉ, Motility.

MOTRIX, (*movere, motum,* 'to move,') Motory.

MOTTE, Mons veneris.

MOTUM, (*μοτον.*) Carbasus, Linteum.

MOTUS, gen. *Mo'tûs,* (*movere, motum,* 'to move,') Motion—m. Assimilationis, Plastic force—m. Automaticus, see Automatic—m. Compressorius, Peristole—m. Cordis diastalticus, Diastole—m. Hæmorrhoidalis, Hæmorrhois—m. Intestinorum, Borborygmus—m. Involuntarius, see Autocinesis—m. Peristalticus, Peristole—m. Testudineus, Peristole—m. Vermicularis, Peristole—m. Voluntarius, Autocinesis.

MOUCHE, (from *musca,* 'a fly,') Cantharis—*m. d'Espagne,* Cantharis.

MOUCHER L'ACTION DE, (from (L.) *mucus*) Munctio.

MOUCHES, see Pains, labour—*m. Volantes,* see Metamorphopsia.

MOUCHETURE. see Scarification.

MOUCHOIR EN TRIANGLE, Couvrechef, see *Bandeau.*

MOUFETTE, see Mephitism.

MOULD, (from *modulus,* dim. of *modus,* 'a measure, or standard of measure,') Fontanella.

MOULE, (from *musculus,* [?]) Mytilus edulis.

MOULEUR, (from *molaris,* 'a millstone,') Muller.

MOULTING, (from *mutare,* 'to change,') Desquamation.

MOUNTAIN ASH, Sorbus aucuparia—m. Ash, American, Sorbus Americana—m. Service, Sorbus aucuparia—m. Sickness, Puna.

MOUREILLER, Malpighia mourella.

MOURON DES OISEAUX, (from *murus,* 'a wall,') Alsine media—*m. Rouge,* Anagallis.

MOUSE EAR, Alsine media, Hieracium pilosella.

MOUSESIGHT, Myopia.

MOUSSE DE CORSE, (from *muscus,* 'moss') Corallina Corsicana—*m. d'Islande,* Lichen Islandicus—*m. d'Irlande,* Fucus crispus—*m. Marine perlée,* Lichen Islandicus—*m. Perlée,* Fucus crispus.

MOUSSERON, see Agaric.

MOUSSEUX, Frothy.

MOUSTACHE, Mystax.

MOÛT DE LA BIERE, ([old F.] *moust,* from (L.) *mustus,* 'new',) Wort.

MOUTARDE, (Mustard,) Sinapis—*m. des Allemands,* Cochlearia armoracia—*m. des Moines,* Cochlearia armoracia.

MOUTH, Sax. muð,) *Os, Ca'vum O'ris, Sto'ma, Gab,* (Sc.) *Mow,* (Prov.) *Gob,* (F.) *Bouche.* This word sometimes signifies the cavity situate between the jaws, and containing the tongue, &c.; —at others, the outer orifice of that cavity, *Peristom'ium.* The mouth, in the first acceptation, *Cav'itas* seu *Spa'tium Oris,* is the cavity bounded, *above,* by the palatine arch; *below,* by the tongue; *before,* by the lips; and *behind,* by the velum palati and pharynx. The sides of the mouth and the organs it contains are lined by a mucous membrane. The *anterior* aperture of the mouth is, sometimes, called *facial*—the posterior, *pharyngeal.* In the mouth are the teeth, gums, alveolar margins, tongue; the excretory ducts of the salivary glands, and those of a number of mucous follicles, &c. It is in this cavity that the food is cut, torn, or bruised by the teeth; is impregnated with saliva, and formed into a mass or *bolus,* which is then subjected to the act of deglutition. The mouth contains the organs of taste; and it serves in respiration, articulation, expectoration, suction, &c.

The condition of the mouth requires to be attended to in *Semeiology.* The state of the mucous membrane, like that of the tongue, indicates the condition of the membrane of the alimentary canal generally.

MOUTH. *Os, Aperture'ra, Orific''ium, Hia'tus, Peristo'mium,* is, also, applied to the open extremities of vessels or other canals.

MOUTH ROOT, Coptis.

MOUTH, SORE, Aphthæ.

MOUTH WATERING, see Salivation.

MOUVEMENT, Motion—*m. Péristaltique,* see Peristole.

MOVEMENT, (*movere, motum,* 'to move,') Dejection, Motion—m. Cure, Kinesipathy.

MOW (from [F.] *moue,*) Mouth.

MOX'A, *Moxibu'rium.* A word by which the Chinese and Japanese designate a cottony substance, which they prepare by beating the dried leaves of the *Artemisia moxa,*—a kind of mugwort. With this down they form a cone, which is placed upon the part intended to be cauterized, and is set fire to at the top. The heat and pain gradually increase, in proportion as the combustion proceeds downwards, until ultimately an eschar may be formed. In Europe and this country, the same operation is usually practised with a cylinder of cottonwool, or with one formed from the pith of the greater sunflower. This mode of cauterization is employed as a powerful counter-irritant; which it assuredly is. Sloughing may be in some measure prevented, according to Baron Larrey, by the application of liquid ammonia to the burnt part.

The term moxa has been extended to any substance, which by gradual combustion on or near the skin is employed as a counterirritant,—as the *elec'tric* or *galvan'ic mox'a* or *caut'ery,* in which voltaic electricity is employed as the cauterizing agent.

MOXIBURIUM, (*moxa,* and *buro,* for *uro, ustum,* 'to burn,') Moxa.

MOXIBUS'TION, *Moxibus'tio, Moxocaus'is, Encaus'is.* Mode of cauterization by means of moxa.

MOXOCAUSIS, (*moxa*, and *καυσις*, 'burning,') Moxibustion.

MOXON'S EFFERVESCING MAGNESIA, see Magnesia, effervescing, Moxon's.

MUCAGO, (from *mucus*,) Mucilage.

MUCARUM, Mucharum.

MUCCINIUM, (from *mucus*,) Mucilage.

MUCÉDINÉES, (*μυκης*, 'fungus,') see Fungus.

MUCEDO, (from *mucus*,) Mucilage.

MUCHA'RUM, *Muca'rum*. A barbarous term, formerly used for an aqueous infusion of roses, sweetened, and evaporated to the consistence of syrup.

MUCIFIC, (*mucus*, and *facere*, 'to make,') Blennogenous.

MU'CIFORM, *Muciform'is*, *Myxo'des*, *Blenoï'des*, *Blennoï'deus*, (*mucus*, and *forma*, 'form.') Resembling mucus in character or appearance.

MU'CILAGE, *Mucila'go*, *Muca'go*, *Muce'do*, *Muccin'ium*, (from *mucus*.) A mixture of gum and a small quantity of matter analogous to mucus, which is found in abundance in linseed, quince-seed, &c. It is obtained by heating in water the parts, or products, of plants which contain it. It is much used in the preparation of emollient cataplasms and the greater part of the demulcent *tisanes*, (F.) *Hydrolés*, *Hydrolites*.

MUCILAGE, see Liquor sanguinis—*m. Adragant*, Mucilago astragali tragacanthæ—*m. de gomme Adragante*, Mucilago astragali tragacanthæ—*m. Arabique*, Mucilago acaciæ—*m. de gomme Arabique*, Mucilago acaciæ.

MUCILAGE, ANIMAL, Mucus.

MUCILAGE OF BARLEY, Mucilago hordei—m. of Quince-seeds, Decoctum cydoniæ—m. of Rice, see Oryza—m. of Sassafras pith, Infusum sassafras medullæ.

MUCILAGE OF SLIPPERY ELM BARK, Infusum ulmi.

MUCILAGE, STARCH, Mucilago amyli.

MUCILAGINEUX, Mucilaginous.

MUCILAG'INOUS, *Mucilagino'sus*, *Gummo'sus*, *Gummio'des*, *Gummido'des*, (F.) *Mucilagineux*. Gummy. Resembling gum. That which possesses the character of mucilage.

MUCILAGO, gen. *Mucilag'inis*, Mucilage, Mucilago Acaciæ, Synovia.

MUCILAGO ACA'CIÆ, *M. Acaciæ Arab'icæ* seu *Gum'mi Arab'icæ*, *Mucila'go*, *Mistu'ra Aca'ciæ*, *Mucilage of aca'cia* or *of gum Ar'abic*, (F.) *Mucilage Arabique* ou *de gomme Arabique*. (*Acaciæ gum.* contus. ℥iv; *Aq. bullient.* Oss. Rub the gum with the water gradually added.) Demulcent. To allay cough; but, chiefly, to suspend insoluble matters in water.

MUCILAGO AM'YLI, *Starch mu'cilage*, *Decoc'tum Am'yli*. (*Amyli*, ℥iij; *Aquæ*, Oj. Rub the starch with the water gradually added; then boil till it forms a mucilage.—Ph. L.) Demulcent. Generally given *per anum*.

MUCILAGO ARTICULORUM seu JUNCTURARUM, Synovia.

MUCILAGO ASTRAG'ALI TRAGACAN'THÆ, *M. tragacanthæ* (Ph. U. S.) seu *gum'mi tragacan'thæ*, *Mu'cilage of trag'acanth*, (F.) *Mucilage Adragant* ou *de gomme Adragante*. (*Gummi tragacanth.* ℥j; *Aquæ bullient.* Oj. Macerate for 24 hours; triturate till the gum is dissolved, and press through linen.) Used for pharmaceutical purposes.

MUCILAGO CRETICA, Misturæ cretæ—m. Gummi Arabici, M. acaciæ.

MUCILAGO HOR'DEI, *Mu'cilage of Bar'ley*. (*Hordei*, ℥ss, (avoirdupois), *Aquæ*, f℥xvi. Triturate well; and boil. Ph D.) A vehicle for substances given in enemata.

MUCILAGE SASSAFRAS, Infusum sassafras medullæ.

MUCILAGO SEMINIS CYDONII MALI, Decoctum cydoniæ—m. Gummi Tragacanthæ, M. astragali tragacanthæ—m. Tragacanthæ. M. astragali tragacanthæ—m. Ulmi, Infusum ulmi.

MUCIN, Mucus.

MUCIP'AROUS, *Mucip'arus*, (F.) *Mucipare*, (*mucus*, and *pario*, 'I bring forth.') Mucus-producing; as *muciparous* glands or follicles.

MUCI'TIS, *Mycoderml'tis*, *Blennophlogo'sis*, *Blennymeni'tis*, (*mucus* and *itis*,) Inflammation of a mucous membrane.

MUCKSWEAT, (Sc. *muck*, 'dirt,') Desudatio.

MUCOCE'LE, *Hernia sacci lacryma'lis*, (*mucus*, and *κηλη*, 'rupture.') An enlargement or protrusion of the mucous membrane of the lachrymal passages, giving occasion to fistula lacrymalis. Also, dropsy of the lachrymal sac.

MUCOËNTERITIS, see Enteritis.

MUCOPU'RULENT, *Mucopurulen'tus*, *Pyoblen'nicus*, (from *mucus*, and *pus*.) Having the character or appearance of mucus and pus.

MUCOR, Euros, Mucus—m. Mucedo, see Fungus—m. Narium, Nasal mucus.

MUCORINÉES, see Fungus.

MUCOSIN, see Mucus.

MUCOSITAS, Mucosity, Mucus.

MUCOS'ITY, *Mucos'itas*, (F.) *Mucosité*. A fluid, which resembles mucus, or contains a certain quantity of it.

MU'COUS, *Muco'sus*, *Blenno'des*, *Myxo'des*, (from *mucus*,) (F.) *Muqueux*. An epithet for all bodies containing mucilage or mucus. It is, also, sometimes used synonymously with gummy. In *pathology*, it is occasionally employed to express the seat of a disease, as *mucous disease*, *mucous phlegmasia*; that is, having its seat in a mucous membrane.

MUCOUS CORPUSCLES, see Mucus—m. Layer, see *Tache embryonnaire*—m. Membranes, see Membranes—m. Web, Corpus mucosum.

MUCRO, Apex.

MUCRO seu *Cor'yphē* seu *Fun'dus* seu *Ver'tex Cor'dis*. The apex or point of the heart.

MUCRO HUMERI, Acromion.

MUCRONATA CARTILAGO, (from *mucro*,) Xiphoid cartilage.

MUCRONATUM OS, Xiphoid cartilage.

MU'CULENT, *Muculen'tus*, (from *mucus*.) Slimy, viscid.

MUCUNA, see Dolichos prurieus—m. Pruriens, Dolichos pruriens—m. Prurita, see Dolichos pruriens.

MU'CUS, (*μυκος*,) *Mu'cor*, *Muco'sus hu'mor*, *Mucos'itas*, *Myx'a*, *My'cus*, *La'pē*, *Pitui'ta*, *Blen'na*, *Zoömy'cus*, *Zoömyx'a*, *Pit'uite*, *An'imal mu'cus*, *An'imal mu'cilage*, (F.) *Muqueux animal*, *Morve*, *Mucilage animal*, (presumed to be from *mungere*, 'to wipe the nose.') A substance, analogous to vegetable mucilage; from which, however, it differs by affording subcarbonate of ammonia on distillation. Mucus exudes through the skin, in a state of combination with a peculiar oily matter; and, drying, forms the epidermis. It constitutes, in part, the different epidermeous productions, as the hair, nails, wool, and horn of animals, feathers of birds, and scales of fish. It is found at the surface of the mucous membranes, and presents some difference in its composition and properties, according to the particular mucous membrane from which it is obtained. Its chief organic constituent is an albuminoid compound,—*mu'cin*, *mu'cosin*. Mucus preserves the membranes moist, and in a state best fitted for the performance of their functions. The French give the term *glaire* to the thick, stringy mucus, secreted by the mucous membranes when in a state of disease.

When mucus is examined with the microscope it is found to contain numerous epithelial scales or flattened cells; together with round, granular bodies, commonly termed *mucous cor'puscles* or *mucous glob'ules*, which are contained in a fluid portion—*li'quor mu'ci*.

Mucus Carphodes, see Carphodes—m. Cartharticus, Lichen Islandicus—m. Malpighii, Corpus mucosum—m. Narium, Nasal mucus.

MUDAR, *Madar.* The *Calo'tropis muda'rii* seu *mada'rii, C. gigante'a, Ascle'pias gigante'a, Mado'rius. Ord.* Asclepiadaceæ. In the Hindoo practice of physic, the bark of the root, as well as the concrete juice of the plant, enters into various compound formulæ for the cure of elephantiasis and many other disorders. Experiments instituted by Dr. Duncan, Jr., exhibit its properties to be like those of ipecacuanha. Mixed with oil it is used in gout in Malabar.

MUDGE'S INHALER, see Inhaler.

MUDLICK, see Kentucky, mineral waters of.

MUET, (from *mutus,*) Mute.

MUGUET, (from *muscus*, 'moss,' [?]) Aphthæ, Convallaria maialis—*m. des Bois*, Asperula odorata—*m. de Mai*, Convallaria maialis.

MUGWORT, Artemisia vulgaris.

MULÂTRE, Mulatto.

MULAT'TO, (F.) *Mulâtre*, (S.) *Mulata*..An individual of the human species engendered of a white and black race, (from *mulus*, 'a mule.')

The following table, according to Mr. Lawrence, after Ulloa, exhibits the proportion of white blood in the various castes,—arising from the hybridous admixture of white and black,—according to the principles sanctioned by usage.

PARENTS.	OFFSPRING.	DEGREE OF MIXTURE.			
Negro and White	Mulatto	1-2	White,	1-2	Black.
White and Mulatto	Terceron	3-4	—	1-4	—
Negro and Mulatto	Griffo, Griff, or Zambo, or Black Terceron,	1-4	—	3-4	—
White and Terceron	Quarteron or Quadroon	7-8	—	1-8	—
Negro and Terceron	Black Quarteron or Quadroon	1-8	—	7-8	—
White and Quarteron	Quinteron	15-16	—	1-16	—
Negro and Black Quarteron	Black Quinteron	1-16	—	15-16	—

The last two were considered to be respectively white and black, in the British West India Islands; and the former, prior to modern changes, were white by law, and consequently free.

Terceron is now scarcely used; and Quarteron or *Quadroon* takes its place. See Half Caste. The Octoroon is the old Quadroon. In other words, at the present day, a Quadroon is the offspring of a white and mulatto; an *Octoroon*, of the white and quadroon. No other term is used for farther dilutions.

Mulatto Jack, Fever, yellow.

MULBERRY CALCULUS, ([G.] Maulbeere), see Calculi, urinary and mural.

Mul'berry Mass. The mulberry-like appearance, presented by the embryo at a very early stage, when the different cells have drawn around them a portion of the vitellus or yolk.

Mulberry Rash, see Typhus—m. Red, Morus rubra—m. Tree, Morus nigra—m. Wild, Morus rubra.

MULES (F.), *Mulæ.* Chilblains on the heels.

MULET, (from *mulus*, 'a mule,') Hybrid.

MULGEDIUM ACUMINA'TUM, (*mulgere, mulsum*, 'to milk,') *Lactu'ca villo'sa, Blue Let'tuce;* and

Mulgedium Florida'num, *Lactu'ca Florida'na, Son'chus Florida'nus, False Let'tuce;* indigenous plants; *Order*, Compositæ; have the reputation of curing the bites of rattlesnakes.

MULIEBRIA, (from *mulier,*) Menses, Vulva.

MULIEBRITY, Mulieritas.

MULIEBROS'ITAS, (*muliebris*, appertaining to women,') *Philogyn'ia.* Fondness for women. Hence, *Muliebro'sus, Mulera'rius*, and *Muliero'sus;* one who is fond of women.

MULIEBROSUS, see Muliebrositas.

MULIER, gen. *Muli'eris*, Woman—m. Medica, see Iatrine—m. Obstetrix, Midwife.

MULIERARIUS, see Muliebrositas.

MULIER'ITAS, *Mulieb'rity, Womanhood.* The state of puberty in the female.

MULIEROSUS, see Muliebrositas.

MULIER PLENA, ('a full woman,') Pregnant.

MULLED WINE, (from *mollire*, 'to make milder,') see Wine.

MULLEIN, BLACK, Verbascum nigrum—m. Broad-leaved, great, Verbascum nigrum—m. Yellow, Verbascum nigrum.

MUL'LER, (from *molaris*, 'a millstone,' *mola*, 'a mill,') (F.) *Mouleur.* A moulder. A stone held in the hand, with which any powder is ground upon a horizontal slab. It is sometimes called *mullet.* (F.) *Mollette.*

MULLIGRUBS, Tormina, Colic.

MULLIN, Melizomum.

MULOMEDICINA, (*mulus*, 'a mule,' and *medicina,*) Veterinary art.

MULOMEDICUS, see Hippiater.

MULSA ACIDA, (*mulsus*, 'mixed with honey') Oxyglycus.

MULSUM, Hydromeli—m. Vinosum, Œnomel.

MULTIFIDUS SPINÆ, (*multus*, 'many,' and *findere*, 'to divide,') Transversalis dorsi.

MULTIFŒTA'TION, *Multifœta'tio*, (*multus*, 'many,' and *fœtus.*) Pregnancy with more than two fœtuses.

MULTILOC'ULAR, *Multilocula'ris*, (F.) *Multiloculaire*, (*multus*, 'many,' and *loculus*, 'a small place, a cell.') Having many cells or small cavities.

MULTIMAM'MÆ, (F.) *Multimammes*, (*multus*, 'many,' and *mamma*, 'a breast.') A variety of hypergenesis, in which there are supernumerary mammæ.

MULTIP'AROUS, *Multip'arus*, (F.) *Multipare*, (*multus*, 'many,' and *parire*, 'to bring forth.') One that brings forth several young at the same time. Such a birth is called *plu'ral.*

MULTIPLICATION MÉRISMATIQUE, see Generation.

MULTITESTIS, (*multus*, and *testis*, 'a testicle,') Polyorchis.

MULTITUDO, gen. *Multitu'dinis*, (*multus*, 'many,') Plethora.

MULTIVORANTIA, (*multus*, and *vorare*, 'to devour,') Polyphagia.

MULTIVOROUS, Polyphagous.

MUMIA, Mummy—m. de Medullis, Marrow.

MUMISATIO, Mummification.

MUMMIFICA'TION, *Mumisa'tio*, (*mummy*, and *fio*, 'to be made.') *Sceleteu'sis, Skeleteu'sis.* The mode of preparing a mummy.

MUM'MY, *Mu'mia*, (Arab. *Moumya*, from *mum*, 'wax.') *Rebolea, Rebona, Sceleteum'a*, (F.) *Momie.* A dead body simply dried, or dried after having been embalmed. The latter acceptation is the most common. Formerly, the Egyptian mummy was extolled as useful in contusions. It was presumed, also, to have healing, tonic, and resolvent properties. It is now only regarded as an archaical curiosity. See Skeleton.

MUMPS, Cynanche parotidea.

MUNCHATOE, Mystax.

MUNC'TIO, (F.) *l'Action de moucher*, (*mungere*, *munctum*, 'to blow the nose.') The act of blowing the nose.

MUND'IA SPINO'SA, (from *mundus*, 'clean, neat,' from its appearance.) A plant of the *Nat. Ord.* Polygalæ, which grows in Southern Africa, and a decoction of whose branches is used in atrophy, phthisis, &c.

MUNDIFICANTIA, (*mundus*, 'clean,' and *facere*, 'to make,') Detergents.

MUNDIFICATIVA, Detergents.

MUNGOS RADIX. Ophiorrhiza mungos.

MUNGREL, (see Mongrel,) Hybrid.

MUNIMENTUM CASTITATIS, ('muniment of chastity,') Hymen.

MUQUEUX, Mucous—*m. Animal*, Mucus.

MUQUEUSE, Membrane, (Mucous.)

MUR, Murr, see Coryza.

MÛRAL (F.), *Mura'lis*, ([F.] *Mûre*, 'a mulberry,') *Mulberry*. Vesical calculi are so called, when rugous and covered with tubercles or asperities. They are composed of oxalate of lime.

MURE, Moro, see Morus nigra.

MURFLES, Ephelides, Papulæ.

MU'RIA, *Hal'mē*, *Salsila'go*, *Salse'do*, *Salsitu'do*, *Salsu'go*, *Brine*, (F.) *Saumure*, (ἁλμυρις, 'salt water.') This was formerly used as a glyster in dysentery, in certain inveterate neuralgiæ, &c. Muria was also a kind of pickle or sauce made by the Romans from the tunny fish.

MURIA, Soda, muriate of.

MURIAS AURICONATRICUM, see Gold.

MURIATE D'AMMONIAQUE, Ammoniæ murias—*m. d'Ammoniaque et de fer*, Ferrum ammoniatum—*m. d'Or*, Gold, muriate of, see Gold.

MURIAT'IC AC''ID, (from *muria*;) *Ac''idum sa'lis* seu *muri'num concentra'tum* seu *sa'lis culina'ris* seu *sa'lis mari'ni*, *Spir'itus sa'lis mari'ni* seu *sa'lis Glauberi* seu *sa'lis ac''idus* seu *fu'mans*, *Ac''idum hydrochlo'ricum*, *A. muriat'icum* (Ph. U. S.), *Spir'it of salt*, (F.) *Acide hydrochlorique* ou *muriatique*. An aqueous solution of chlorohydric acid gas of S. g. 1·16. The odour of muriatic acid is suffocating; taste very acid and caustic. It is nearly colourless when pure; but commonly of a pale yellow; volatile; the fumes visible. Muriatic acid is possessed of tonic and antiseptic properties. It is used in typhus; cutaneous eruptions; in gargles for inflammatory and putrid sore throats, (gtt. xxx to f℥vj of water,) &c. When added to a pediluvium, it renders it stimulating.

ACIDUM MURIAT'ICUM DILU'TUM of the Ph. U. S. contain four troyounces of muriatic acid, to a pint of distilled water.

MURIDE, (after *Muria*,) Bromine.

MÛRIER NOIRE, Morus nigra.

MU'RIFORM, *Moriform'is*, ([F.] *mûre*, 'a mulberry,' and [L.] *forma*, 'shape.') Mulberry shaped, as *Muriform mass* or *body*, (F.) *Amas* ou *Corps mûriforme*. The collection of vitelline globes proceeding from the segmentation of the vitellus.

MURIGENE, (*muria* and γενναω, 'to generate,') Chlorine.

MURINA, (after *Muria*,) Bromine.

MUR'MUR, (F.) *Murmure*. (A word existing both in the Romanic and Teutonic languages, and probably a variety of onomatopœia;—*mur mur* expressing the kind of sound which the word indicates.) A low continued or continuously repeated sound, as that of flame, or of a stream running over a stony bottom.

MURMUR AURIUM, Tinnitus Aurium—m. Intestinale seu Intestinorum seu Ventris, Borborygmus.

MURMUR, RES'PIRATORY, (F.) *Bruit respiratoire* ou *vésiculaire*, *Murmure vésiculaire*. The noise heard during inspiration and expiration, especially the former. It is produced by the passage of the air through the bronchial tubes and into the air-cells. It has been also called *murmur of the expan'sion of the lungs*, (F.) *Bruit d'expansion pulmonaire*; and, when distinctly vesicular, *Respiration of the cells* or *vesic'ular respiration*, (F.) *Respiration* ou *murmure vésiculaire*. Vesicular respiration is of course absent when the cells of the lungs have been obliterated from any cause. We may then have the *Respiration nulle*, *Absence du bruit respiratoire*, *Silence*, *and Respiration silencieuse* of the French writers.

At times, it is rude during inspiration or expiration, or both—the *Respiration rude* or *R. râpeuse* of the French. At others, there is a *blowing* sound, (F.) *Souffle*, *Respiration soufflante*, as if some one were blowing into the auscultator's ear through a tube. This is heard in the healthy state over the larynx, trachea, (F.) *Souffle trachéal*, and about the bifurcation of the bronchia, (F.) *Souffle bronchique*; but when it proceeds from the lungs it denotes disease. It may be *tubular* or *diffused*. In the former, the *whiffing murmurs* appear to occur in a space limited to the immediate neighbourhood of the part examined. In the latter, they are produced with but moderate intensity, and sometimes at a distance from the ear, over a tolerably extended space.

The respiration, perceived over the trachea and bronchia in health, is called *tracheal* or *bronchial* or *tubal*, (F.) *Respiration bronchique*, *Souffle tubaire*, according to the situation in which it is heard.

MURMUR, UTERINE, *Bruit placentaire*—m. Utero-placental, *Bruit placentaire*—m. Vesicular, Murmur, respiratory.

MURMUR, WHIFFING, see Murmur, respiratory.

MURR, *Mur-rain*, (Sax. myrrhan, 'to destroy,' or from (L.) *mori*, 'to die.') (F.) *Claveau*, *Clavelée*, *Pestilent''ial Fe'ver*. An epizootic, perhaps contagious, disease, having some resemblance to smallpox, which affects cattle—especially sheep; and is said to have been transferred to man.

MURRAIN, Murr, see Coryza.

MURREN, Murr, Coryza.

MURTON, (μυρτον,) Clitoris.

MURTUM, Clitoris.

MUSA, (after Antonius Musa, physician to Augustus,) M. Paradisiaca—m. Cliffortiana, M. Paradisiaca—m. Mensaria, M. Paradisiaca.

MU'SA PARADISI'ACA, *Mu'sa*, *M. Mensa'ria* seu *Cliffortia'na*, *Amu'sa*, *Pal'ma hu'milis*, *Fi'cus Indica*, *Ba'ta*, *Plat'anus*, *Plan'tain tree*, (F.) *Plaintain-arbre*, *Platanier*, *Bananier commun*. *Family*, Musaceæ. *Sex. Syst.* Hexandria Monogynia. It grows in many parts of India and South America. The fruit, which is largely eaten for bread, consists of a mealy substance, *Plan'tain meal*, *Conquin-tay*. It is clammy; has a sweetish taste, and will dissolve in the mouth without being chewed. The spike of the fruit often weighs forty or fifty pounds. The leaves of the tree serve the Indians for tablecloths and napkins. Being smooth and soft, they are also employed as dressings for blisters. The water from the soft trunk is astringent, and sometimes used in diarrhœa.

MUSA SAPIEN'TUM. The *Bana'na tree*, *Baco'ba*, (F.) *Figuier-bananier*, *Bananier*, *Bacove*. This differs somewhat from the last. The fruit, *Bana'na*, (S.) *Platano*, is shorter, straighter, and rounder; the pulp softer and of a more luscious taste. When ripe, it is very agreeable; it is eaten like the plantain, and relished by all ranks of people in the West Indies. Both varieties are natives of Guinea.

MUSC, (from μοσχος,) Musk.

MUSCA HISPANICA, ('Spanish fly,') Cantharis.

MUSCÆ, ENTOMYZOID, see Metamorphopsia—m. Volitantes, see Metamorphopsia.

MUSCADE, see Myristica moschata.

MUSCADIER, Myristica moschata.

MUSCERDA, Moschardina. Also, the dung

of mice, (*mus*, 'a mouse,' and *merda*, 'dung,') formerly given in epilepsy.

MUS'CLE, (old Eng.) *Brawn, Mus'culus, To'rus, Lacer'tus, Mys, My'on*, (from μυς, 'a mouse or rat;' because, say some etymologists, the ancients compared the muscles to flayed mice or rats. According to Diemerbroeck, Douglass, Chaussier, &c., μυων, comes rather from μυειν, 'to close,' 'to move,' &c., a function proper to muscles. This etymon is the more probable.) Muscles have been divided into those of *Ani'mal life* or *of the life of rela'tion — vol'untary muscles* — which execute movements under the influence of the will; as the muscles of the limbs, head, trunk, &c., and into those of *organ'ic life — involl'untary muscles* — which contract under the influence of certain special stimuli; as the heart, fleshy fibres of the stomach, &c. *Mix'ed muscles* are those which belong partly to each of these divisions;— as the muscles of respiration, and the sphincters. Muscles that act in opposition to each other are called *antag'onists*; thus, every extensor has a flexor for an antagonist, and conversely. Muscles that concur in the same action are termed *congen'erous*. The muscles present numerous varieties in form, size, situation, use, &c., and have been divided, by some, into *long, broad*, and *short*. Each of these divisions comprises *sim'ple* and *com'pound* muscles. *Simple* or *rectiliu'ear muscles* have all their fibres in a similar direction, and only one body—as the *Sartorius, Pronator quadratus*, &c. *Com'pound muscles* are those which have only one belly and several tendons, as the flexors of the fingers and toes; or several bellies and several tendons,—as the biceps flexor cubiti, sacrolumbalis, &c. To the compound muscles belong, also, the *ra'diated muscles*. Their fibres set out from a common centre, and are arranged like the radii of a circle; — such are the diaphragm, iliacus, temporal, &c. *Pen'nated* or *Pen'niform Muscles*: their fibres are arranged in two rows, which are united at a median line, at greater or less angles; nearly as the feathers are inserted into a quill. The palmaris longus is one of these. *Sem'ipenniform muscles*: their fibres are oblique, as in the last case; but they are inserted only on one side of the tendon. *Holl'low Muscles* are,— the heart, intestines, urinary bladder, &c.

Much difference has existed in the enumeration of muscles. Some authors reckon them at upwards of 400. Chaussier admits only 368. The greater part of them are in *pairs*. Very few are *az'ygous*.

TABLE OF THE MUSCLES, ARRANGED AFTER THE MANNER OF DR. BARCLAY, ACCORDING TO THEIR ACTIONS.

THE HEAD IS MOVED

Forwards by	*Backwards by*	*To either side by*
Platysma myoides, Sternomastoideus, Rectus anticus major, " " minor,	Part of trapezius, Splenius capitis, Complexus, Trachelomastoideus, Rectus posticus major, " " minor, Obliquus capitis superior.	Platysma myoides, Sternomastoideus, Part of trapezius, Splenius capitis, " colli, Trachelo-mastoideus, Complexus.

Assisted (when the lower jaw is fixed) by

Mylohyoideus,
Geniohyoideus,
Geniohyoglossus,
Digastrici.

THE NECK IS MOVED

Forwards by	*Backwards by*	*Laterally by*
Platysma myoides, Sternomastoideus, Digastricus, Mylohyoideus, Geniohyoideus, Geniohyoglossus Omohyoidei, Sternohyoidei, Thyrohyoidei, Rectus anticus minor, Longus colli.	Part of trapezius, Rhomboideus minor, Serratus posticus superior, Splenius capitis, " colli, Complexus, Trachelomastoideus, Transversalis colli, Interspinales colli, Semispinales colli, Rectus posticus major, " " minor, Obliquus capitis superior, " " inferior, Scaleni postici, Levator scapulæ.	Various combinations of those muscles which separately move it forwards and backwards, assisted by the scaleni, intertransversales, and recti laterales.

THE TRUNK IS MOVED

Forwards by	*Backwards by*	*Laterally by*
Rectus abdominis, Pyramidalis, Obliquus externus abdominis, Obliquus internus, Psoas magnus, " parvus,	Trapezius, Rhomboideus major, Latissimus dorsi, Serratus posticus superior, " " inferior, Sacrolumbalis, Longissimus dorsi, Spinales dorsi. Semispinales dorsi, Multifidus spinæ. Intertransversales dorsi et lumborum.	Obliquus externus, " internus, Quadratus lumborum, Longissimus dorsi, Sacrolumbalis, Serrati postici, Latissimus dorsi.

Assisted (when the arms are carried forwards) by

Pectoralis major,
" minor,
Serratus magnus.

THE SCAPULA IS MOVED.

Upwards by	*Downwards by*	*Forwards by*	*Backwards by*
Trapezius, Levator scapulæ, Rhomboidei.	Lower part of trapezius, Latissimus dorsi, Pectoralis minor.	Pectoralis minor, Serratus magnus,	Part of trapezius, Rhomboidei, Latissimus dorsi.

THE HUMERUS IS MOVED

Forwards by	*Backwards by*	*Inwards by*	*Rotated inwards by*
Part of deltoid, Part of pectoralis major,	Part of deltoid, Teres major, " minor, Long head of triceps, Latissimus dorsi.	Part of pectoralis major, Latissimus dorsi.	Subscapularis, *Assisted occasionally by* Pectoralis major, Latissimus and teres major. *Outwards by* Supraspinatus, Infraspinatus, Teres minor.
Assisted in some circumstances by Biceps, Coracobrachialis.			

THE FOREARM IS MOVED

Forwards by	*Backwards by*	*Rotated inwards by*
Biceps, Brachialis anticus, Pronator teres, *Assisted by* Flexor carpi radialis, " sublimis, " ulnaris, Supinator longus.	Triceps, Anconeus.	Pronator teres, Flexor carpi radialis, Palmaris longus, Flexor sublimis, Pronator quadratus. *Outwards by* Biceps, Supinator brevis, Extensor secundi internodii.

THE CARPUS IS MOVED

Forwards by	*Backwards by*	*Outwards by*	*Inwards by*
Flexor carpi radialis, Palmaris longus, Flexor sublimis, " carpi ulnaris, " profundus, " longus pollicis.	Extensor carpi radialis longior, Extensor carpi radialis brevior, Extensor secundi internodii, Indicator, Extensor communis digitorum, Extensor proprius pollicis.	Flexor carpi radialis, Extensor carpi radialis longior, Extensor carpi radialis brevior, Extensor ossis metacarpi, Extensor primi internodii.	Flexor sublimis, " carpi ulnaris, " profundus, Extensor communis digitorum. Extensor minimi digiti, Extensor carpi ulnaris.

THE THUMB IS MOVED

Inwards and forwards, across the palm, by	*Outwards and backwards by*	*Upwards and forwards, away from the other fingers, by*	*Backwards and inwards, to the other finger, by*
Opponens pollicis, Flexor brevis, " longus.	Extensor ossis metacarpi pollicis, Extensor primi internodii, Extensor secundi internodii.	Abductor, *Assisted by part of the* Flexor brevis.	Adductor, Extensor primi internodii, Extensor secundi internodii.

THE FINGERS ARE MOVED

Forwards, or flexed, by	*Backwards, or extended, by*	*Outwards, to radial border, by*	*Inwards by*
Flexor sublimis, " profundus, Lumbricales, Interossei, Flexor brevis digiti minimi, Abductor digiti minimi.	Extensor communis, " minimi digiti, Indicator.	Abductor indicis, " digiti minimi, Interossei.	Abductor digiti minimi, Interossei.

THE THIGH IS MOVED

Forwards by	*Backwards by*	*Inwards by*	*Outwards by*
Psoas magnus, Iliacus, Tensor vaginæ femoris, Pectineus, Adductor longus, " brevis.	Gluteus maximus, Part of gluteus medius, Pyriformis, Obturator internus, Part of adductor magnus, Long head of biceps, Semitendinosus, Semimembranosus.	Psoas magnus, Iliacus, Pectineus, Gracilis, Adductor longus, " brevis, " magnus, Obturator externus, Quadratus femoris.	Tensor vaginæ femoris Gluteus maximus, " medius, " minimus, Pyriformis.

THE THIGH IS ROTATED

Inwards by	*Outwards by*
Tensor vaginæ femoris, Part of gluteus medius, *And, when the leg is extended, by* Sartorius, Semitendinosus.	Gluteus maximus, Part of gluteus medius, Pyriformis, Gemellus superior, Obturator internus, Gemellus inferior, Quadratus femoris, Obturator externus, Psoas magnus, Iliacus, Adductor longus, " brevis, " magnus, Biceps cruris, slightly.

THE LEG IS MOVED

Backwards, or flexed, by	*Extended by*
Semiteudinosus, Biceps, Semi-membranosus, Gracilis, Sartorius, Popliteus.	Rectus, Crureus, Vastus externus, " internus.

THE FOOT IS MOVED

Forwards, or flexed, by	*Backwards, or extended, by*	*Inclined inwards by*	*Outwards by*
Tibialis anticus, Extensor proprius pollicis, Extensor longus digitorum. Peroneus tertius.	Gastrocnemius, Plantaris, Soleus, Flexor longus digitocum, " longus pollicis, Tibialis posticus, Peroneus longus, " brevis.	Extensor proprius pollicis, Flexor longus digitorum, " longus pollicis, Tibialis posticus.	Peroneus longus, " brevis, Extensor longus digitorum, Peroneus tertius.

THE TOES ARE MOVED

Backwards, or flexed, by	*Forwards, or extended, by*	*Inclined inwards by*	*Outwards by*
Abductor pollicis, Flexor brevis digitorum, Abductor minimi digiti, Flexor longus pollicis, " digitorum, " accessorius, Lumbricales, Flexor brevis pollicis, Adductor pollicis, Flexor brevis minimi digiti, Interossei.	Extensor longus digitorum, Extensor proprius pollicis, " brevis digitorum.	Abductur pollicis, Interossei.	Abductor pollicis, " digiti minimi, Interossei.

Muscles have been variously named. 1. *According to their uses,* as diaphragm, buccinator, extensors, flexors, adductors, abductors, levators, depressors, &c. 2. *According to their position,* as interspinales, interossei, subclavius, poplitæus, anconeus, cubitalis, iliacus, temporalis, &c. 3. *According to their shape,* as trapezius, splenius, lumbricalis, serratus, digastric, deltoid, scalenus, rhomboides, &c. 4. *According to their dimensions,* as pectoralis major, rectus capitis anticus major, pectoralis minor, glutæus maximus, medius, and minimus. 5. *According to their direction,* as obliquus abdominis, transversalis abdominis, rectus femoris, rectus abdominis, &c. 6. *According to their composition,* as semimembranosus, semitendinosus, complexus, &c. 7. *According to their attachments,* or the different points of the skeleton with which they are connected by means of tendons or aponeuroses; as sternocleidomastoideus, sternohyoideus, &c. On this is grounded the nomenclature of M. Dumas, and that of Chaussier, which is full of meaning.

The end of the muscle, which adheres to the most fixed part, is usually called the *origin* or *head, caput,* (F.) *Tête;* and that which adheres to the more movable part, the *insert'ion* or *tail, cauda,* (F.) *Queue;* the intervening part or *bod'y* of the muscle being called the *ven'ter, gaster,* or *bel'ly, Ven'ter mus'culi, Me'dium mus'culi,* (F.) *Ventre:* hence the names gastrocnemii, digastricus, biceps, and triceps; according as they have two bellies, two or three heads, &c.

Muscles are formed,—1. Essentially of the *mus'cular* or *flesh'y fi'bre,* (see Muscular Fibre.) 2. Of *Are'olar tis'sue,* which unites together the fibres. This areolar tissue is not very visible between the fine and loose fibres; but becomes more so, when they unite in more considerable fasciculi. It forms, moreover, to each muscle, an external envelope, which unites it to the neighbouring parts, and admits of its motion. This envelope was formerly called *Tu'nica pro'pria musculo'rum.* 3. Of *Ar'teries.* These proceed from neighbouring trunks, and are, generally, very large. Their size and number are always in proportion to the bulk of the muscle. With the exception of some viscera, as the lungs and the kidneys, there are few organs that receive as much blood as the muscles. 4. Of *Veins.* They follow the same course in the muscles as the arteries. Bichat asserts that they are generally devoid of valves. 5. Of *Lymphat'ics.* Of these we know little, and cannot easily follow them between the fleshy fibres. 6. Of *Nerves.* These are numerous, and of different sizes. They, almost all, proceed from the encephalon; some, however, issue from ganglions, and accompany the arteries. In general, they penetrate the fleshy tissue along with the vessels, with which they are closely united. After they have entered the muscles, they divide and subdivide until they are lost sight of.

MUSCLE CANIN, Levator anguli oris — *m. Cannelé,* Ischiotrochanterianus.

Muscle of Gavard. The oblique muscular fibres of the stomach.

MUSCLE GRAND FESSIER, Glutæus major —m. of Guthrie, Compressor urethræ—m. of Horner, Tensor tarsi — m. of Houston, Compressor venæ dorsalis penis.

Muscle Juice. A fluid surrounding the fibres of striated muscle and the fibre-cells of smooth muscles, which differs from the liquor sanguinis of the blood; containing a considerable amount of casein. It seems to be produced within the sarcolemma, through which it exudes.

MUSCLE TRÈS LARGE DU DOS, Latissimus dorsi — m. Merkel's, ceratocricoid — m. of Wilson, Compressor urethræ.

MUS'CULAR, *Muscula'ris, Musculo'sus, Toro'sus,* (F.) *Musculaire, Musculeux.* That which belongs or relates to the muscles. Well furnished with muscles, *Lacerto'sus.*

Muscular Ar'teries. Arteries that are distributed to the muscles. The name *Muscular Arteries of the eye* has been especially given to two branches sent off by the ophthalmic artery:—the one, *inferior,* which furnishes branches to the rectus inferior oculi, lachrymal sac, &c., and some of the anterior ciliary arteries: the other — the *superior,* which is sometimes wanting; but, when it exists, gives branches to the rectus superior oculi and levator palpebræ superioris.

Muscular Contrac'tion. The exertion of the power, possessed by muscles, of shortening themselves, or of contracting to produce motion:—*muscular motion* being the change in the situation and relation of organs, induced by muscular contraction. When a muscle contracts, its fibres assume more the zigzag direction, and the extremities approximate; but the bulk of the whole muscle is not augmented. This contraction takes place, at times, with extreme velocity: a single thrill, in the letter r. can be pronounced in the 1-30.000th part of a minute. The *force* of contraction, *Myody'namis,* depends upon the healthy physical condition of the muscle, combined with due energy of the brain. The *duration,* in voluntary motion, is for a certain time dependent upon the will:—contractions, excited involuntarily, cannot be so long maintained.

Muscular Cur'rent. A current which, according to Matteucci, exists in every living muscle, whose tendinous extremities are not equally disposed — one, for example, forming a cord; the other broad and ribbonlike—and which circulates in the muscle from the tendinous extremity to the muscular surface.

Muscular Fi'bre, *Flesh'y fi'bre, Fi'lum muscula'rē, Fibril'la muscula'ris.* A name given to the filaments, which, by their union, form the muscles. This fibre is flat, soft, downy, linear, but little elastic, and more or less red. It is firmer in adults than in the young or the aged; of the same size in the great and small muscles; and runs its course without bifurcation or ramification. It is but slightly resisting in the dead body, tearing readily; but during life it supports very great efforts without laceration. It is, itself, composed of a considerable number of fibrils, similar to each other, and subdividing almost *ad infinitum.* The ultimate filaments, into which the fibre can be decomposed by mechanical means, seem to be hollow or tubular. The fibre exists under two forms, the *stri'ated* or *striped,* (F.) *Fibre striée,* and the *non-striated, smooth,* or *unstriped,* (F.) *Fibre lisse;* the muscles composed of the former ministering, as a general rule, to the *animal functions,* — the latter always, perhaps, to the *organic.* The colour of the muscular fibres is red in man, and white in several animals. A greater or less number,—united in fasciculi, *Fascic'uli* seu *Lacer'ti musculo'rum,* approximated to each other, and forming a distinct mass, of very variable size and shape, the extremities being attached to bones by means of tendons,—constitutes a muscle. In this are included areolar membrane, vessels and nerves. See Muscle.

Muscular Nerves. The nerves distributed to the muscles are so named. Winslow calls the 4th pair of nerves—*Nerf musculaire oblique supérieur.*

Muscular Sys'tem. A term given to the aggregate of the muscles of the body.

Muscular Veins. These bring back the blood, which has been carried to the muscles by the muscular arteries.

MUSCULARIS, 'stout,' 'strong,' Corroborant.

MUSCULATION, See Locomotion.

MUSCULATURE (F.) The condition of the

muscular system:—as *une bonne musculature*, 'a good condition of the muscular system.'

MUSCULEUX, Muscular.

MUSCULI ACCESSORII AD SACROLUMBALEM, see Sacrolumbalis — m. Papillares, Columnæ carneæ—m. Pectinati, Pectinated muscles.

MUSCULIN, see Fibrin.

MUS'CULOCUTA'NEOUS. *Musculocuta'neus*, (from *musculus*, and *cutis*, 'skin.') That which appertains to muscles and skin.

MUSCULOCUTANEOUS NERVE. This name is especially given to two nerves;—the *one*, the *External cuta'neous nerve*, furnished by the brachial plexus (see Cutaneous):—the *other*, given off from the poplitæus externus, (F.) *Nerf Sciatique, Poplité externe, Prétibio digital* (Ch.). It descends on the anterior and outer part of the leg,—at first, hid among the muscles; becomes superficial about the middle of the leg; and divides into two branches, which pass superficially on the back of the foot. Two musculocutaneous nerves—superior and inferior—proceed from the first lumbar. The *supe'rior mus'culocuta'neous — il'ioscrotal, il'iohypogas'tricus*, which divides into two branches,—abdominal and scrotal. The *infe'rior mus'culocuta'neous* is smaller than the superior, and is distributed as its name, *il'ioïn'guinal*, indicates.

MUSCULORACHIDÆ'US. Belonging or relating to muscles and to the spine. A name given to branches, furnished behind by the intercostal, lumbar, and sacral arteries, which are distributed to the spine and to the muscles of the neighbourhood.

MUSCULOSPIRAL NERVE, Radial nerve.

MUSCULOSA EXPANSIO, ('muscular expansion,') Platysma myoides.

MUSCULOSUS, Muscular.

MUSCULUS, Muscle — m. Acclivis, Obliquus internus abdominis.

MUSCULUS ANOM'ALUS. A muscular fasciculus, attached only to the superior maxillary bone, with which the Levator labii superioris alæque nasi muscle is related.

MUSCULUS AUXILIARIUS, Pyramidalis abdominis—m. Constrictorius, Sphincter—m. Cutaneus, Platysma myoides — m. Eustachii, Laxator tympani — m. Fallopii, Pyramidalis abdominis — m. Femoris membranosus, Fascia lata—m. Patientiæ, Levator scapulæ — m. Penicillatus, Levator labii inferioris — m. Risorius Santorini, see Platysma myoides—m. Scandularius, Parathenar—m. Subcutaneus, Platysma myoides—m. Succenturiatus, Pyramidalis abdominis — m. Succingens, Diaphragm—m. Supercilii, Corrugator supercilii—m. Testicondus, Cremaster — m. Testis, Cremaster — m. Tubæ novæ, Circumflexus.

MUSCUS ARBOREUS. ('tree moss,') Lichen plicatus—m. Caninus, Lichen caninus—m. Catharticus, Lycopodium selago—m. Clavatus, Lycopodium — m. Corallinus, Corallina Corsicana — m. Cranii humani, Lichen saxatilis—m. Erectus, Lycopodium selago—m. Helminthocortos, Corallina Corsicana—m. Islandicus, Lichen islandicus—m. Marinus, Corallina Corsicana—m. Maritimus, Corallina—m. Pulmonarius quercinus, Lichen pulmonarius—m. Pyxidatus, Lichen pyxidatus — m. Pyxoides terrestris, Lichen pyxidatus—m. Villosus, Peristroma.

MUSEAU DE TANCHE, ('the tench's mouth or snout,') Os uteri.

MUSENA BARK, see Rottlera Schimperi.

MUSE'UM ANATOM'ICUM, *Supel'lex anatom'ica*. An anatomical museum.

MUSHROOM, ([F.] *Mousseron*,) Fungus.

MU'SIC, *Mu'sica*, (F.) *Musique*, (μουσα, *musa*, 'a song.') The art of producing harmonious and cadenced sounds; an art, which has, at times, been beneficially used in diseases, particularly in those of the mind; or on which the mind could act in a salutary manner.

MUSICAL SOUND, *Sifflement modulé*.

MUSICOMA'NIA, *Musomania*, (*music*, and *mania*.) A variety of monomania in which the passion for music is carried to such an extent as to derange the intellectual faculties.

MUSING, LISTLESS, (from *musa*, 'study,') Aphelxia otiosa.

MUSIQUE, Music.

MUSK, *Mos'chus, Mosch*, (Arab.), (F.) *Musc*. A peculiar concrete animal substance, of a very diffusible odour, bitter taste, and a deep brown colour: solid, and enclosed in the preputial follicles of *Mos'chus moschif'erus, Musk Deer*, (F.) *Chevrotain porte-musc*. It is possessed of stimulant and antispasmodic properties. Dose, gr. v to ʒj in bolus.

MUSK, ARTIFICIAL, *Mos'chus factit'ius, Resi'na Suc'cini*. (*Ol. succini rectif.* 1 part, *Acid. nitric.* 4 parts. Digest;—a black matter will be deposited, which must be well washed with water.)

MUSKGRAPE FLOWER, Bulbus vomitorius.

MUSKMALLOW, Hibiscus abelmoschus.

MUSKROOT, Sumbul.

MUSKSEED, see Hibiscus abelmoschus.

MUSKWOOD, Thymiama.

MUSOMANIA, Musicomania.

MUSQUITO, Mosquito.

MUSSÆN'DA FRONDO'SA, *Belil'la, Beleson*, A decoction of this Ceylonese plant has been esteemed refrigerant.

MUSSEL, Mytilus edulis.

MUSSELLED, see Mytilus edulis.

MUSSITA'TIO, *Mussita'tion*, (from *mussitare, mussitatum*, itself from *mussare*, 'to murmur.') A condition, in which the tongue and lips move, as in the act of speaking, but without sounds being produced. This sort of murmuring is an unfavourable sign in disease, as indicating great cerebral debility.

MUSTA'CEUM, (from *Mustum*, 'must,' used in making it.) A kind of wedding-cake with the ancients, which consisted of meal, aniseed, cummin, and several other aromatics; its object—it has been conceived—being to prevent or remove the indigestion occasioned by too great indulgence at the marriage feast. *Laureolam in mustaceo quærere*—"to seek for glory in pitiful performances." (Cicero.)

MUSTACHE, Mystax.

MUSTARD, BLACK, [F.] *moutarde*, (from *moût*, 'must,' because the seeds were bruised with vinegar or must—hence, according to some, from *mustum ardens*, [?]), Sinapis — m. Clammy, Polanisia graveolens—m. Essence of, Whitehead's, see Sinapis—m. False, Polanisia graveolens—m. Green, Lepidium sativum—m. Hedge, Erysimum —m. Mithridate, Thlaspi campestre—m. Stinking hedge, Alliaria—m. Treacle, Thlaspi arvense—m. White, Sinapis alba—m. Wild, Sinapis arvensis.

MUSTELANEUS, (from *mustela*, 'a weasel,') Galeancon.

MUSTUM, ('juice of the grape,') Wort.

MUTACIS'MUS, *Mu'tacism*, (μυτακιζω, 'I use the letter *m*, μυ, too frequently.') A vicious pronunciation; consisting, according to Sauvages, in the frequent repetition of the letters M, B, and P, which are substituted for others.

MUTA'TIO SEX'US. 'A change or conversion of sex.' A notion prevailed in antiquity that such a conversion was possible.

MUTE, *Mu'tus, Dumb*, (F.) *Muet*. Affected with mutitas.

MUTEO'SIS, (*mutus*, 'dumb.') (F.) *Mutéose*. Under this name is comprehended every phenomenon of expression, voluntary and involuntary, which impresses the sight or touch.

MUTILA'TION, *Mutila'tio, Maim'ing*, (*mutilus*, 'broken.') The removing or privation of a limb, or of some other external part of the body. In all

countries, this crime has been punished with severity.

MUTINUM, Penis.

MUTISME, Mutitas.

MU'TITAS, (from *mutus*, 'dumb,') *Alu'lia, Anaud'ia, Dumb'ness, Speech'lessness, Mu'tism*, (F.) *Mutisme, Mutité*. Impossibility of *articulating* sounds; although they can be elicited. Dumbness is often congenital, and united with deafness, of which it is an effect. In some cases it is accidental.

MUTITAS SURDO'RUM, *Apho'nia Surdorum, Surdomu'titas, Deafdumbness, Deaf mutism*, (F.) *Surdimutité*. Speechlessness from deafness; congenital, or produced during infancy. The subjects of this affection are called *deafdumb*, (F.) *Sourds-muets*.

MUTITÉ, Mutitas.

MUTO, Penis.

MUTONIATUS, (from *muto*,) Membrosus.

MUTTERKORN, Ergot.

MUT'TON TEA. Prepared from a pound of *mutton*, freed from the fat and cut into thin slices; and a pint and a half of boiling soft *water* poured over them, as in the case of beef tea; except that it requires to be boiled for half an hour after the maceration, before it is strained through a sieve.

MUTUNNUS, (from *muto*,) Priapus.

MUTUS, Mute.

MYACANTHA, Ruscus.

MYALGIA, (*myon*, and *αλγος*, 'pain.') Cramp.

MYASTHENI'A, (*myon*, and *ασθενεια*, 'debility.') Muscular debility.

MYCES, (*μυκης*,) Fungus.

MYCETO'MA, (from *myces*, and *oma*,) Fungus disease. An affection of the hands and feet which prevails extensively in India, and is ascribed to the growth of a fungus,—*Chio'nyphē Carteri*, (after Dr. H. V. Carter.)

MYCHMUS, (*μυχμος*,) Suspirium.

MYCHTHISMUS, (*μυχθισμος*,) Moaning, Suspirium.

MYCODERM'A, gen. *Mycoderm'atis, My'coderm*, (*myces*, and *δερμα*, 'skin.') A cryptogamous growth, which constitutes the crusts of favus. See Porrigo favosa. Also, a mucous membrane, see Membrane.

MYCODERMA CEREVISIÆ, Torula cerevisiæ.

MYCODERMA PLI'CÆ, *Tricomaph'yton*. A cryptogamous growth, said to be the essence of Plica.

MYCODERMITIS, (*mycoderma*, and *itis*.) Mucitis.

MYCODES, (from *myces*, and *odes*.) Fungoid.

MYCODIARRHŒA, see Diarrhœa.

MYCODYSENTERIA, see Dysentery.

MYCOPHTHISIS, see Bronchorrhœa.

MYCORTHOPNŒ'A. Orthopnœa from excessive secretion of mucus in the air passages—*Orthopnœ'a pituito'sa*.

MYCOSIS, (*myces*, and *osis*,) Fungus.

MYCTER, (*μυκτηρ*,) Nasus.

MYCTERES, (*μυκτηρες*,) Myxæ, Nares.

MYCTEROPHONIA, (*mycter*, and *φωνη*, 'voice.') Rhinophonia.

MYCTEROXE'ROTES, *Mycteroxero'sis*, (*mycter*, and *ξηροτης*, 'dryness.') *Na'rium sic'citas*. Dryness of the interior of the nose.

MYCUS, (*μυκος*,) Mucus.

MYDE'SIS, (*μυδαω*, 'I abound with moisture, I am putrid.') Moisture. In its most general sense it means *corruption*. By some it is used for a mucous discharge from inflamed eyelids.

MY'DON, (*μυδων*,) Fungous or putrid flesh in certain fistulous ulcers. Also, flesh putrid from mouldiness.

MYDRI'ASIS, *Platycor'ia, Platycori'asis, Amydri'asis*. A name given by several writers to morbid dilatation of the pupil—*Coromydri'asis*—and by others to weakness of sight produced by hydrophthalmia, or superabundance of humours, (from *μυδος*, 'moisture.')

MYDRIAT'ICUS, *Mydriat'ic*. Relating to or causing dilatation of the pupil. Certain narcotics, as opium, contract the pupil in poisonous doses; whilst others, as belladonna, dilate it. Owing to this antagonism, the mydriatic belladonna has been given in poisoning from opium.

MYELAL'GIA, (*myelus*, and *αλγος*, 'pain.') Pain in the spinal marrow.

MYELANALOSIS, (*myelus*, and *αναλωσις*, 'wasting.') Tabes dorsalis.

MYELAPOPLEXIA, Apoplexia myelitica.

MYELATELI'A, (*myelus*, and *ατελεια*, (*a*, privative, and *τελος*, 'end,') 'want of end or finish.') Incompleteness of the spinal marrow.

MYELATROPHIA, (*myelus*, and *ατροφια*, 'atrophy.') Tabes dorsalis.

MYELIN, (from *myelus*,) see Nerve fibres.

MYÉLITE, Myelitis.

MYELI'TIS, *M. parenchymato'sa* seu *spina'lis, Inflamma'tio medul'læ spina'lis, Spini'tis, Spinodorsi'tis, Notomyeli'tis, Rachiomyeli'tis, Rachialgi'tis* (of some), (F.) *Myélite, Inflammation de la moëlle épinière, I. rachidienne*, (*myelus*, and *itis*.) Inflammation of the spinal marrow or its membranes;—indicated by deep-seated burning pain in the spine, with various nervous and vascular irregularities of function. It is not common. Dr. Marshall Hall proposes to call inflammation of the membranes of the brain *Meningi'tis*; that of the substance of the brain *Myeli'tis*.

MYELITIS CONVULSIVA, Chorea, electric—m. Parenchymatosa, Myelitis—m. Petechialis, Meningitis, cerebrospinal—m. Spinalis, Myelitis—m. Exsudativa, Hydrorachis.

MYELOCHYSIS, (*myelus*, and *χυω*, 'to pour out.') Hydrorachis.

MYÉLOCONE, (F.) (*myelus*, and *κονια*, 'dust.') A mixture of fatty matters found in the substance of the brain. (Couerbe.)

MY'ELOCYTES, (*myelus*, and *κυτος*, 'a mass, body, or cell.') Granules of the brain. Nuclei of the cells of the gray substance.

MYELOGANGLIITIS, (*myelus*, *γαγγλιον*, 'a ganglion,' and *itis*.) Cholera (sporadic).

MY'ELOÏD, *Myeloï'des, Myelo'des*, (*myelus*, and *ειδος*, 'resemblance.') Marrowlike.

MYELOID TU'MOUR, *Fibroplast'ic tumour*. A sarcomatous tumour, the more characteristic constituents of which are—peculiar many-nucleated corpuscles, which have been recognized as constituents of the marrow and diploe of bones, especially in the fœtus and in early life.

MYELOMA, gen. *Myelo'matis*, (from *myelus*.) See Encephaloid.

MYELOMALACIA, (*myelus*, and *μαλακια*, 'softness.') Mollities medullæ spinalis.

MYELOMENINGITIS, (*myelus*, *μηνιγξ*, 'a membrane,' and *itis*.) Meningitis, spinal.

MYELOMYCES, (*myelus*, and *myces*,) see Encephaloid.

MYELON, (from *myelus*,) Medulla spinalis.

MYELOPARALYSIS, (*myelus*, and *paralysis*,) Paraplegia.

MYELOPHTHISIS, Tabes dorsalis—m. Sicca, Tabes mesenterica.

MYELOPHY'MATA, *Tuber'cula medul'læ spina'lis*, (*myelus*, and *φυμα*, 'a tumor.') Tubercles of the spinal marrow.

MYÉLOPLAXE, (*myelus*, and *πλαξ*, 'a plate or lamella.') Plates or lamellæ with numerous nuclei in the marrow of bones. (Robin.)

MYELORRHAGIA, (*myelus*, and *ῥηγνυμι*, 'to break forth.') Apoplexia myelitica.

MYELOSPONGUS, (*myelus*, and *σπογγος*, 'a sponge, a fungus.') See Encephaloid.

MYELUS, (*μυελος*,) Marrow, Medulla spinalis—m. Diauchenius, Medulla spinalis—m. Dorsites,

Medulla spinalis—m. Notiæus, Medulla spinalis—m. Psoites, Medulla spinalis.

MYENERGI'A, (*myon*, and *energia*,) Muscular strength.

MYGMUS, (*μυγμος*,) Suspirium.

MYIOCEPHALUM, (*μυια*, 'a fly,' and *κεφαλη*, 'head,' from its resemblance.) Ptosis iridis.

MYIODEOP'SIA, (*μυιωδης*, 'appertaining to flies,' and *οψις*, 'vision,') see Metamorphopsia.

MYIODOPSIA, Metamorphopsia.

MYITIS, (*myo*, and *itis*.) Myositis, Rheumatism, acute.

MYLABRIS CICHORII, (*μυλαβρις*,) see Cantharis—m. Punctata, see Cantharis—m. Pustulata, see Cantharis.

MYLACEPH'ALUS, (*μυλη*, 'a mole,' *a*, privative, and *κεφαλη*, 'head.') A monster with only traces of viscera, and without head or extremities.

MYLACRI, (*μυλακροι*, from *μυλη*, 'a millstone.') Molar teeth.

MYLACRIS, Patella.

MYLE, (*μυλη*, 'a millstone.') Patella, Mole.

MYLICUS, Molar.

MYLO, (from *μυλη*, 'a mill.') In composition, the jaw, especially the lower jaw.

MYLODI, (*μυλη*, 'a mill,' and *οδους*, 'a tooth.') Molar teeth.

MYLODONTES, Molar teeth.

MYLOGLOS'SUS. Winslow has given this name to muscular fibres which pass from the posterior part of the myloid line of the lower jaw, and from the sides of the base of the tongue to the parietes of the pharynx. These fibres belong to the constrictor superior pharyngis.

MYLOHY'OID FUR'ROW OR GROOVE. A furrow which passes from the superior orifice of the inferior dental canal of the lower jaw in the same direction as the canal, and lodges the *mylohyoid nerve*, a branch of the inferior-dental.

MYLOHYOID LINE, see Mylohyoideus.

MYLOHYOID NERVE, see Mylohyoid furrow.

MYLOHYOÏDEUS, *Myloÿ'des*, *Diaphrag'ma oris*, (F.) *Mylo-hyoïdien*. The *Mylopharyngeus* of Morgagni and Santorini. This muscle is situate at the upper and anterior part of the neck, behind the lower jaw. It is broad, flat, and has the form of a truncated triangle. It arises from the *internal oblique*, *internal maxillary*, or *mylohyoid line* of the lower jaw bone, and is inserted at the fore part of the body of the os hyoides. Its innermost fibres unite with those of the opposite side to form a raphe on the median line. The mylohyoideus raises the os hyoideus and carries it forward, or it depresses the lower jaw.

MYLOPHARYNGEUS, Constrictor pharyngis, Mylo-hyoideus.

MYLOŸDES, Mylohyoideus.

MYOCARDITIS, (*myon*, and *carditis*.) Carditis.

MYOCE'LĒ, *My'ocele*, (*myon*, and *κηλη*, 'a tumor.') A muscular tumor.

MYOCEPHALI'TIS, *Myi'tis cephal'ica*, (*myon*, *κεφαλη*, 'head,' and *itis*.) Inflammation of the muscles of the head.

MYOCEPHALON, (*μυια*, 'a fly,' and *κεφαλη*, 'head,' from its resemblance.) Ptosis iridis.

MYOCŒLIAL'GIA, (*myon*, *κοιλια*, 'abdomen,' and *αλγεω*, 'I suffer.') Pain in the muscles of the abdomen.

MYOCŒLI'TIS, *Myocœli'tis*, *Inflamma'tio musculo'rum abdomina'lium*, (*myon*, *κοιλια*, 'lower belly,' and *itis*.) Inflammation of the muscles of the abdomen.

MYODE'MIA, (*myon*, and *δημος*, 'fat.') Fatty degeneration of muscle.

MYODEOPSIA, (*μυιωδης*, 'appertaining to flies,' and *οψις*, 'vision.') Metamorphopsia.

MYO'DES, (*myon*, and *odes*.) Like unto muscle. Muscular.

MYODESOPIA, (*μυιωδης*, 'appertaining to flies.' and *οψις*, 'vision.') Metamorphopsia.

MYODESOPSIA, Metamorphopsia.

MYODYNA'MIA, *Vis muscula'ris*, (*myon*, and *δυναμις*, 'power.') The force or power of a muscle.

MYODYNAMICS, see Muscular contraction.

MYODYNAMIOMETER, (*myodynamia*, and *μετρον*, 'measure.') Dynamometer.

MYODYNAMOMETER, Dynamometer.

MYODYN'IA, (*myon*, and *οδυνη*, 'pain.') Pain in the muscles,—rheumatismal or other. Rheumatism.

MYODYNIA INFLAMMATORIA, Myositis.

MYOG'RAPHY, *Myogra'phia*, (*myon*, and *γραφειν*, 'to describe.') An anatomical description of the muscles.

MY'OID, *Myoï'des*, (*myon*, and *ειδος*, 'resemblance.') An epithet given to tumours composed of fibre cells or muscular fibres of organic life.

MYOLEM'MA, gen. *Myolem'matis*, *Myole'ma*, (*myon*, and *λεμμα*, 'a coat.') The membranous tube of each muscular fibre. It has also the same signification as *Sarcolemma*.

MY'OLIN, (from *myon*.) A name given by Mr. Erasmus Wilson to a transparent substance that fills the cells, which, he conceives, by their juxtaposition form the ultimate muscular fibril.

MYOL'OGY, *Myolog''ia*, *Sarcolog'ia*, *Mysiolog''ia*, (*myon*, and *λογος*, 'a discourse.') That part of anatomy which treats of the muscles.

MYOMALA'CIA, (*myon*, and *μαλακια*, 'softness.') Softening of muscle.

MYON, (*μυων*,) Muscle.

MYONARCO'SIS, (*myon*, and *ναρκη*, 'stupor.') Numbness of the muscles.

MYONITIS, (*myon*, and *itis*.) Myositis.

MYON'OSUS, *Myonu'sus*, *Myopathi'a*, (*myon*, and *νοσος*, 'disease.') A disease of the muscles.

MYOPALMUS, (*myon*, and *παλμος*, 'agitation.') Subsultus tendinum.

MYOPARALYSIS, see Paralysis.

MYOPATHIA, (*myon*, and *παθος*, 'affection.') Myonosus.

MYOPE, Myops.

MYOPHO'NIA, (*myon*, and *φωνη*, 'voice.') The sound of muscular contraction,—as that of the ventricles of the heart during the systole of that organ.

MYO'PIA, *Myopi'asis*, *Luscios'itas*, *Myo'sis*, *Parop'sis propin'qua*, *Amblyo'pia dissito'rum*, *Dyso'pia dissito'rum*, *Dyspho'tia*, *Vi'sus ju'venum*, (*μυς*, 'a mouse,' and *ωψ*, 'the eye,') *My'opy*, *Shortsightedness*, *Nearsightedness*, *Mousesight*, *Purblindness*, (Old E.) *Mope-eye*, *Moap-eye*, (F.) *Vue courte*, *V. basse*. The state of those who can only see objects very near. The defect is owing to the too great convexity or depth of the eye, or to too great density of the humours, and is palliated by wearing concave glasses.

MYOP'IC, *Myop'icus*, *Mope-eyed*, *Mop'sicol*, *Shortsighted*, *Pore'blind*, *Pur'blind*, *Spur'blind*. Relating or appertaining to myopia.

MYOPODIORTHO'TICON, (*myopia*, and *διορθωτικον*, 'having power to correct.') An apparatus for the cure of shortsightedness.

MY'OPS, *Lucio'sus*, *Myo'pus*, *My'ope*. One affected with myopia or shortsightedness.

MYOPY, Myopia.

MYORRHEX'IS, (*myon*, and *ῥηξις*, 'rupture.') Rupture of a muscle.

MYOSARCO'MA, gen. *Myosarco'matis*, (*myon*, and *sarcoma*.) A sarcomatous tumour in which muscular fibres are found.

MYO'SIS, (*μυω*, 'I close the eyes.') *Microcor'ia*. Smallness of the pupil. *Phthi'sis pupilla'ris*. Permanent contraction of the pupil. It is usually caused by iritis, and is extremely difficult to cure. When it exists to such an extent as to obliterate the pupil, it is called *Synize'sis*. Also, Myopia.

MYOSITE, Myositis.

MYOSITIC, *Myosit'icus*, from *Myosis*. Causing contraction of the pupil,—as opium.

MYOSI'TIS, *Myi'tis, Mysi'tis, Myoni'tis, Sarci'tis, Rheumatis'mus phlegmono'des, Myodyn'ia inflammato'ria, Phlegma'sia myoïca, Inflamma'tio* seu *Phleg'monē Musculo'rum*, (F.) *Myosite, Inflammation des muscles*, (*myon*, and *itis*.) A name proposed by Sagar for inflammation of the muscles. Also, Rheumatism.

MYOSOTIS, (*μυοσωτις*, from *μυς*, gen. *μυος*, 'a mouse,' and *ους*, gen. *ωτος*, 'ear.') Hieracium pilosella, Rheumatism, Rheumatism, acute; (from *myon*.)

MYOSPASMUS, Cramp.

MYOS'TICI (*Morbi*), (*myon*, and *οστεον*, 'a bone.') Diseases of the bones and muscles, in the classification of Dr. Wm. Farr.

MYOTIL'ITY, *Myotil'itas*, (F.) *Myotilité*, (from *myon*.) Muscular contractility.

MYOT'OMY, *Myotom'ia*, (*myon*, and *τεμνειν*, 'to cut.') The part of practical anatomy which treats of the dissection of the muscles. Also, the surgical operation of the division of muscles to remove deformity.

MYOTYRBE, (*myon*, and *τυρβη*, 'disorder.') Chorea.

MYRAC'OPUM, (*μυρον*, 'an ointment,' *a*, privative, and *κοπος*, 'fatigue.') An ointment used by the ancients in cases of fatigue.

MYRCIA ACRIS, see Spiritus myrciæ.

MYREPSUS, (*μυρεψος*, from *μυρον*, 'an ointment.') Unguentarius.

MYRIAGRAMME, (*μυρια*, '10,000,' and *γραμμα*, 'gramme.') A weight equal to 10,000 grammes, or to 26 pounds, 9 ounces, and 6 drachms Troy.

MYRIAMÈTRE. A measure of 10,000 metres; equal to 16 miles, 1 furlong, 156 yards, and 14 inches.

MYRICA ASPLENIFOLIA, (after *μυρικη*, 'the tamarisk.') Comptonia asplenifolia—m. Cerifera, see Cera flava et alba, and Wax, myrtle.

MYRI'CA GA'LĒ, *M. palus'tris, Myr'tus Brabant'tica* seu *Ang'lica, Myrtifo'lia Bel'gica, Ga'lē, Ga'gel, Rhus sylves'tris* seu *Bel'gica, Ac'aron, Elæag'nus, E. Cor'do, Chamælæag'nus, Dodonæ'a, Dutch myr'tle, Sweet gale, Sweet willow*, (Sc.) *Scotch gale*, (F.) *Piment Royal, Thé de Simon Pauli, Galé odorant. Ord.* Myricaceæ. *Sex. Syst.* Dicœcia Tetandria. The leaves, flowers, and seeds have a strong, fragrant smell, and a bitter taste. They are used for destroying moths and cutaneous insects. The infusion is given internally as a stomachic and vermifuge.

MYRICA PALUSTRIS, M. Gale.

MYRINGA, see Tympanum.

MYRINGI'TIS, *Inflamma'tio tym'pani*, (*myrin'ga*, 'the membrana tympani,' and *itis*.) Inflammation of the membrana tympani; and, also, of the tympanum.

MYRINX, gen. *Myrin'gis*. see Tympanum.

MY'RIS, (*μυρις*,) *Myrothe'cē, Narthe'cia, Narthe'cium, Nar'thex*, (*μυρον*, 'a perfumed oil or ointment.') A perfumed oil jar or ointment box.

MYRIS'TICA, (*μυρον*, 'a liquid perfume,' from *μυρειν*, 'to flow,') *M. Moscha'ta* seu *aromat'ica* seu *officino'lis* seu *fra'grans, Comacon. Nat. Ord.* Myristiceæ. The tree which produces the nutmeg and mace. (F.) *Muscadier*. The *Nutmeg. Myristica*, (Ph. U. S.), *Myrist'icæ* seu *Myris'ticæ moscha'tæ nu'cleus, Nux moscha'ta* seu *unguenta'ria, Nucis'ta, Nux myris'tica* seu *aromat'ica, Chrysobal'anus Gale'ni, Unguenta'ria, As'sala*, (F.) *Muscade*, is the kernel of the fruit. It has a fragrant, aromatic odour; an agreeable pungent taste, and is much used for culinary purposes. Alcohol extracts its active matter. It has the properties of aromatics in general; being stimulant and stomachic. The volatile oil — *O'leum myris'ticæ* seu *nucist'æ æther'eum* — possesses the virtues of the nutmeg. Dose of the nutmeg, gr. v to ℈j;—of the oil, gtt. ij to gtt. vj.

Mace, Ma'cis, Flo'res macis seu *ma'cidis*, (F.) *Fleurs de muscade*, is the arillus of the fruit. It is membranous, with the odour and taste of the nutmeg, and is possessed of similar qualities. The *O'leum macis* seu *ma'cidis* is a fragrant, sebaceous substance, expressed in the East Indies. It is only used externally. It is the *Adeps myris'ticæ, Myris'ticæ o'leum express'um, O'leum* seu *Bal'samum nucis'tæ, Butter of nutmegs, Express'ed oil of Mace*.

MYRISTICÆ NUCLEUS, see Myristica moschata.

MYRISTICATIO HEPATIS, Liver, nutmeg.

MYRMECIA, (*μυρμηκια*,) Formica.

MYRMECIASIS, (*μυρμηκιασις*,) Convulsio cerealis, Formication.

MYRMECIASMUS, (*μυρμηκιασμος*,) Convulsio cerealis. Formication.

MYRMECISMUS, Convulsio cerealis, Formication.

MYRMECIZON, (*μυρμηκιζων*,) Formicant.

MYRMECOSIS, Convulsio cerealis, Formication.

MYRMEX, (*μυρμηξ*,) Formica.

MYROBAL'ANUS, (*myron*, and *βαλανος*, 'a nut;' so called, because formerly used in ointments:) *Angeloc'acos, Myro'bolan, Glans unguenta'ria, Pal'ma unguentario'rum*. A dried Indian fruit, of the plum kind, of different species of *Termina'lia*. *Ord.* Combretaceæ. Of this there are several varieties—the *M. Bellir'ica* or *Bellir'ic myro'bolan, Bellegi, Bellerigi, Belnileg*:—the *M. cheb'ula* or *Chebule myrob'alan*; the *M. cit'rina* or *Yel'low myrobalan, Ara'ra*; the *M. Em'blica* or *em'blic myrobalan*, and the *M. In'dica, Asʻuar, In'dian* or *Black myrob'alan*. All the myrobalans have an unpleasant, bitterish, very austere taste; and strike an inky blackness with a solution of steel. They are said to possess laxative as well as astringent properties.

MYROLÉS, (*myron* and *oleum*,) see Olea volatilia.

MYRON, (*μυρον*,) Myrum, Unguentum.

MYROPISSOCE'RON. A topical application in alopecia, referred to by Galen; (*myron*, *πισσα*, 'pitch,' and *κηρος*, 'wax.')

MYROPŒUS, (*myron*, and *ποιεω*, 'to make,') Unguentarius.

MYROPOLES, (*μυροπωλης*, from *myron*, and *πωλεω*, 'to sell,') Unguentarius.

MYROSPERMUM FRUTESCENS, (*myron*, and *σπερμα*, 'seed,') Myroxylum Peruiferum — m. Pereiræ, see Myroxylon Peruiferum—m. Peruiferum, see Myroxylon Perniferum — m. of Sonsonate, see Myroxylon Peruiferum—m. Toluiferum, see Toluifera Balsamum.

MYROXYLON, (*myron*, and *ξυλον*, 'wood,') see M. Peruiferum.

MYROX'YLON PERUIF'ERUM, *Myrosperm'um frutes'cens* seu *Peruif'erum, Quinquino, Caburei'ba. Nat. Ord.* Leguminosæ. Supposed to be the tree which affords the *Peru'vian bal'sam, Bal'samum Peruria'num* (Ph. U. S.) seu *Peruvianum ni'grum* seu *Perua'num* seu *In'dicum, Putzochill, Myrox'yli Peruif'eri bal'samum, Myrox'ylon, Caburei'ba, In'dian, Mex'ican*, or *Amer'ican bal'sam*, (F.) *Baume de Pérou* ou *des Indes*. This balsam consists of benzoic acid, resin, and essential oil. Its odour is fragrant and aromatic; taste hot and bitter: it is soluble in alcohol, and miscible in water by the aid of mucilage. It is stimulant and tonic, and considered to be expectorant: as such, it has been employed in paralysis, chronic asthma, chronic bronchitis, rheumatism, gleet, leucorrhœa, &c., and externally, for cleansing and stimulating foul indolent ulcers. Dose, gtt. v to gtt. xxx.

White Bal'sam of Peru, Nat'ural bal'sam, Bal'-

sanum al'bum, Sty'rax al'ba, Balsamelæ'on, is obtained by incision from *Myrospermum perniferum*.

The Myroxylon of Sonsonate in Central America — *Myrosperm'um Perei'ræ* of Dr. Royle, according to the Ph. B. (1864), furnishes balsam of Peru.

Myroxylon of Sonsonate, see M. Peruiferum — m. Toluiferum, Toluifera Balsamum.

MYR'RHA, (*μυρρα,*) *Bo'la, Stac'tē, Myrrh, Calo'nia, Smyr'na, Myr'rha ru'bra*, (F.) *Myrrhe*. The exudation (*μυρον*, from *μυρειν*, 'to flow') of a plant of Abyssinia or Arabia Felix, the *Balsamaden'dron myr'rha*. This gum-resin has a fragrant, peculiar odour; and bitter aromatic taste. It is in reddishyellow, light, brittle, irregular tears; partially soluble in distilled water when aided by friction. S. g. 1·360. It is stimulant; and has been used in cachectic affections, humoral asthma, chronic bronchitis, &c. Dose, gr. x. to ʒj.

Myrrha Imperfecta, Bdellium.

MYRRHINE, (*μυρρινη,*) Myrtus.

MYRRHIS ANNUA, (*μυρρις,*) Athamanta Cretensis—m. Major, Chærophyllum odoratum — m. Odorata, Chærophyllum odoratum.

MYRSINA AFRICANA, Tatzé.

MYRSINE, (*μυρσινη,*) Myrtus.

MYRSINELÆ'ON, (*μυρσινη*, 'myrtle,' and *ελαιον*, 'oil.') Oil of myrtle.

MYRSINI'TES, (*μυρσινιτης.*) Wine in which branches of myrtle have been macerated.

MYRTACANTHA, (*myrtus*, and *ακανθα*, 'a thorn,') Ruscus.

MYRTE COMMUN, Myrtus.

MYRTID'ANON, (*μυρτιδανον*, from *myrtus*, 'myrtle.') An excrescence growing on the trunk of the myrtle, and used as an astringent. With Hippocrates, either the myrtus caryophyllata or myrtus pimenta. [?] Also, a wine — *Vinum Myrtid'anum* — made from wild myrtle berries.

MYRTIFOLIA BELGICA, (*myrtus*, and *folium*, 'a leaf,') Myrica gale.

MYR'TIFORM, *Myrtiform'is, Myrto'des*, (*myrtus*, and *forma*, 'shape.') Having the shape of a leaf of myrtle. A name given to a muscle (depressor alæ nasi), to the fossa incisiva; to certain caruncles, &c.

MYRTIFORMIS, Compressor naris, Depressor alæ nasi.

MYRTI'TES, (*μυρτιτης*, from *μυρτον*, 'the myrtle berry.') A name given to a medicine prepared with honey and myrtle berries.

MYRTLE, Myrtus—m. Berry, Vaccinium myrtillus — m. Candleberry, see Wax, myrtle — m. Dutch, Myrica gale—m. Wax, see Wax, myrtle—m. Wild, Ruscus.

MYRTOCHEILIDES, (*myrton*, and *χειλις*, 'a small lip,') Nymphæ.

MYRTOCHILA, (*myrton*, and *χειλος*, 'a lip,') Nymphæ.

MYRTODES, (*myrtus*, and *odes,*) Myrtiform.

MYRTON, (*μυρτον,*) Clitoris.

MYRTUS, (*μυρτος,*) *Myr'tus commu'nis* seu *commu'nis Ital'ica, Myrsi'nē, Myrrhi'nē, The Myrtle*, (F.) *Myrte Commun. Ord.* Myrtaceæ. The berries of this plant have been recommended in alvine and uterine fluxes and other disorders of relaxation and debility. They are moderately astringent and somewhat aromatic.

Myrtus Acris, see Spiritus myrciæ — m. Anglica, Myrica gale — m. Brabantica, Myrica gale —m. Caryophyllata, see Spiritus myrciæ.

Myrtus Caryophylla'ta, *Calyptran'thes caryophylla'ta, Cas'sia* seu *Canel'la caryophyllata*, (F.) *Capelet, Cannelle giroflée*. The tree which is considered to afford the *Clove bark; Cor'tex caryophylla'tus* seu *caryophylla'ta*. This bark is a warm aromatic; resembling clove with an admixture of cinnamon. It may be used with the same views as cloves or cinnamon.

Myrtus Caryophyllus, Eugenia caryophyllata—m. Leucodendron, Melaleuca cajuputi.

Myrtus Pimen'ta, *Euge'nia Pimen'ta*. The tree which bears the *Jama'ica pepper, Pimen'tæ bac'cæ, Pimen'to ber'ries, Pimen'to, Pi'per caryophylla'tum* seu *chia'pæ* seu *odora'tum Jamaicensē* seu *Jamaicensē* seu *tabas'cum, Coc'culi Ind'i aromat'ici, Amo'mum pimen'ta, Fruc'tus pimen'ti, Carive, Caryophyll'us America'nus* seu *Pimen'ta, Allspice*, (F.) *Poivre de Jamaique, Toute épice, Assouron*. The unripe berries—*Pimen'ta, Pimento* (Ph. U. S.) — have an aromatic odour; resembling a mixture of cinnamon, nutmeg, and cloves; the taste is pungent, but mixed, like the odour. Like other peppers, this is stimulant and carminative. The oil — *O'leum Pimen'tæ* — possesses the virtues of the berries. The powdered fruit has been called *Quatre épices* or *Four spices*. Dose, gr. v to ʒij.

Aqua Pimen'tæ, Pimen'to wa'ter, is officinal in the London, Edinburgh, and Dublin Pharmacopœias. It is carminative. Dose, fʒj or fʒij.

MY'RUM, (*μυρον,*) *My'ron*. A perfumed oil or ointment. A liquid perfume. The spontaneously exuding juice of many plants, especially of that from which myrrh is obtained.

MYS, (*μυς.*) Muscle.

MYSIOLOGIA, (*mys*, and *λογος*, 'a discourse,') Myology.

MYSITIS, (*mys*, and *itis*, 'inflammation,') Myositis.

MYS'TAX, gen. *Mys'tacis, Mastax*, (*μυσταξ*, gen. *μυσταχος.*) The hair growing on each side of the upper lip in men. The *mustache'* or *mustachio*, (Old. Eng.) *Munchat'oe*, (F.) *Moustache*. Also, the upper lip.

MYSTE'RION, (*μυστηριον*, 'a mystery.') An arcanum, nostrum, or secret preparation in general. Also, an antidote, referred to by Galen and others.

MYSTRON, (*μυστρον.*) A Greek measure, which held about three drachms.

MYT'ILUS EDU'LIS, (*μυτιλος*, from *mys.*) The *common mussel*, (F.) *Moule*. A bivalve, the flesh of which, when at all in a state of decomposition, is highly poisonous. When fresh, it is an agreeable, but not very digestible article of diet, producing, in some persons, all the symptoms of urticaria. One affected with such phenomena is said, occasionally, to be *mus'selled*.

MYU'RUS, *Mein'rus*. A pulse is so called when it sinks progressively and becomes smaller and smaller like a mouse's tail; (from *μυς*, 'a mouse,' and *ουρα*, 'tail.') *Pul'sus myu'rus recip'rocus*, a pulse, which, after having become gradually weaker, resumes, by degrees, its former character.

MYXA, (*μυξα,*) Mucus, Sebestina.

MYXÆ, (*μυξαι,*) Nares.

MYXIOSIS, (from *μυξα*, 'mucus, and *οσις*,') Gonorrhœa impura.

MYXOIDES, (from *myxa*, 'mucus,' and *ειδος*, 'resemblance,') Muciform, Mucous.

MYXOR'RHOOS, (*μυξορροος*, from *μυξα*, 'mucus,' and *ρεω*, 'I flow.') One who is subject to mucous discharge. Applied to an infant that discharges a considerable quantity of mucus and saliva.

MYXOSARCO'MA, gen. *Myxosarco'matis*. (*μυξα*, 'mucus,' and *σαρξ*, gen. *σαρκος*, 'flesh.') A tumour which is *mu'cocar'neous*; partly mucous and partly fleshy.

MYXOTER, (*μυξωτηρ*, from *μυξα*, 'mucus,') Nasus.

MYZESIS, (*μυζεω*, 'to suck,') Sucking.

N.

N. This letter, in prescriptions, is an abridgment of *numero*, 'by number.'

NAB'ALUS AL'BUS, (from *ναβλα*, 'a harp,' owing to the lyrate leaves,) *Prenan'thes al'ba* seu *serpenta'ria, White Let'tuce, Li'on's Foot, Rat'tlesnake's Master, Rattlesnake root, Gall of the Earth.* An indigenous plant, of the *order* Compositæ, which, with several other species of the genus, is reputed to possess the power of curing the bites of serpents. The root has been used in dysentery.

NABALUS FRASERI has similar properties.

NABOT, Saccharum candidum.

NABO'THI GLAN'DULÆ, *O'vula* seu *O'va Nabo'thi* seu *Nabothia'na, Ova'ria Nabo'thi, Folli'culi rotun'di et oblon'gi, Vesic'ulæ* seu *Bul'læ rotun'dæ cervi'cis u'teri, V. semina'les muli'erum, Cor'pora* seu *Corpus'cula globo'sa, Glandulæ* seu *Hydat'ides cervi'cis u'teri, Glands of Na'both,* (F.) *Œufs* ou *Vésicules de Naboth.* Small, mucous crypts or follicles situate in the interstices of the duplicatures of the lining membrane of the cervix uteri. Naboth, from noticing them in a morbid condition, mistook them for ova; and hence they received the name *Ovula Nabothi.*

NACRA, *Nakra, Nasa.* A kind of influenza common in the East Indies.

NACRÉ, ([F.] *nacre,* 'mother of pearl,') Margaritaceous.

NACREOUS, Margaritaceous.

NÆVI, see Nævus—n. Pigmentary, see Nævus.

NÆ'VOID, *Nævoï'des,* (*nævus,* and *εἶδος,* 'resemblance.') Resembling nævus.

NÆVUS, pl. *Næ'vi; Næ'vus mater'nus* seu *Sigil'lum, No'ta mater'na, Ne'vus, Mac'ulæ matri'cis* seu *mater'næ* seu *matrica'les, No'tæ infan'tum, Lu'pus varico'sus, Stig'mata, Metrocel'ides, Congen'itæ no'tæ, Moth'er's* or *Fan'cy marks, Mo'ther's spots,* (F.) *Envie, Tache de naissance* ou *pigmentaire, Signe.* Spots of various kinds on the skin of children when born, which have been attributed to the influence of the maternal imagination on the fœtus in utero. They are of various appearances, some much better supplied with blood than others. Some are merely superficial or stain-like spots, *Pigmen'tary nævi;* others are prominent, *Vas'cular tu'mours,* and often have long, irregular hairs growing from them. These have usually been called *Moles, Spi'li, Spilo'mata, Epichro'ses spi'li,* &c. The red, rosy, violet or bluish spots are called by I. G. St. Hilaire, *Taches sanguines;* —those of an intermediate hue, between the normal colour and black, *Taches melanieunes.* See Telangiectasia.

When nævi are superficial, without any disposition to enlarge or spread, they need not be meddled with: but all those that partake of the character of aneurism by anastomosis had better be removed, where practicable.

NÆVUS SIGILLUM, Nævus.

NAFDA, Naphtha.

NAFTA, Naphtha.

NAIL, (Sax. nægl,) *Un'guis, O'nyx,* (F.) *Ongle.* A whitish transparent substance, similar to horn, which covers the dorsal extremity of the fingers. Three portions are distinguished in it; the *extremity,* which is free, at the end of the finger;—the *body* or middle portion adherent by its inner surface; and the *root, Onychorrhi'za. Rhizonych'ia, Ra'dix* seu *Ma'trix un'guis, In'timum un'guis,* (F.) *Matrice de l'ongle.* The last presents two distinct parts; the one, terminated by a thin, serrated edge, is buried in a duplicature of the skin, *Vallec'ula unguis,* which acts the part of a *nailfollicle;* the other, called *Lu'nula* seu *Semilu'nula* seu *Sele'nē* seu *Ar'cus* seu *Exor'tus* seu *Anat'olē* seu *Albe'do un'guium,* is whitish and of a semilunar shape, and is situate above the part where the epidermis terminates. The nails are composed of a horny tissue, of the same nature as that which forms the hoofs, horns, and scales of different animals. When the nail has been torn off, the papillæ of the skin become covered by a soft, whitish lamina, whose consistence gradually augments. New laminæ are then formed underneath, and give the nail the thickness it ought to possess. The corneous substance, being thus constantly produced at the extremity of each of these laminæ, the whole of the nail is pushed forwards, and it would grow indefinitely, were it not cut or worn by friction.

The nails protect and support the extremities of the fingers against the impression of hard bodies. They are, also, useful in laying hold of small bodies; and dividing those that have but little consistence.

NAILFOLLICLE, see Nail.

NAILSPRING, Hangnail.

NAIN, Nanus.

NAISSANCE, (from *nascor, natus,* 'to be born,') see Parturition.

NAJA TRIPUDIANS, *Cobra di Capello.*

NAKRA, Nacra.

NANGNAIL, Hangnail.

NANISME, see Nanus.

NANNARI, Hemidesmus Indicus.

NANNYBERRY, Viburnum lentago.

NANOCEPHALIA, (*nanus,* and *κεφαλη,* 'head,') see Nanocephalus.

NANOCEPH'ALUS. One of a monstrous state — *Nanocepha'lia* — in which the whole head or certain of its parts are too small, whilst the trunk and extremities are normal.

NANOCORMIA, see Nanocormus.

NANOCOR'MUS, (*nanus,* and *κορμος,* 'a trunk.') One of a monstrous condition—*Nanocorm'ia*—in which the trunk is too small, whilst the head possesses its normal size.

NANOMELIA, see Nanomelus.

NANOM'ELUS, (*nanus,* and *μελος,* 'a limb.') One of a monstrous condition—*Nanomel'ia* — in which some part of an extremity is too small, and the whole limb too short.

NANOSO'MIA, (*nanus,* and *σωμα,* 'body.') *Microso'mia, Microsoma'tia, Dwarf'ishness,* (F.) *Nanisme.* A state in which the entire body with all its parts is smaller than common.

NANOSOMUS, Nanus.

NA'NUS, (*νανος,*) *Pumil'io, Pu'milo, Pusil'lus,* 'a dwarf:' *Nanoso'mus,* (Prov.) *Crut, Rope, Spin'nick,* (Sc.) *Croïl, Crok, Dearch, Derch, Droich, Wrat'ack.* (*Pu'milus, Pumi'lius,* 'dwarfish.') (F.) *Nain.* One who is much below the usual stature. The term is applicable to all organized beings from man to the vegetable. Trees have their dwarfs, as the human species have theirs. Some curious authenticated instances of human dwarfs are on record. Bebe, the dwarf of Stanislaus, king of Poland, was 33 inches (French) long, and well proportioned. The Polish nobleman, Borwlaski, who was well made, clever, and a good linguist, measured 28 Paris inches. He had a brother, 34 inches high, and a sister 21. A Friesland peasant, at 26 years of age, had attained 29 Amsterdam inches. C. H. Stöberin, of Nürnberg, was under three feet high at 20, yet he was well proportioned and possessed of talents. General Tom Thumb, so called, was seen by the Author in 1847. He was said to be 15 years old; measured 28 inches in height, and when weighed at the mint was found to weigh

20 pounds and 2 ounces. Two remarkable Indian dwarfs were exhibited in the United States and in Europe, about the middle of the 19th century, under the name of '*Az'tec children*,'—the boy, from 7 to 8 years of age, was 33¾ inches in height, and weighed 20¾ pounds:—the girl, from 4 to 6 years of age, was 29½ inches high, and weighed 17 pounds. They were very deficient in intellect. See Pygmy.

NAPE OF THE NECK, Nucha.

NAPELLUS VERUS, (dim. of *napus*, 'a turnip,') Aconitum napellus.

NAPIÆ FLORES, see Citrus aurantium.

NAPHTHA, Acetone.

NAPH'THA, (ναφθα,) *Naf'da*, *Naf'ta*, *Nap'ta*, *Napta'lius*, *O'leum pe'træ al'bum*; (F.) *Naphthe*; from a Chaldaic and Syriac word signifying *bitumen*. A bituminous substance, found in Persia, Calabria, Sicily, &c. It is liquid, limpid, of a yellowishwhite colour, a smell slightly resembling that of oil of turpentine, and lighter than water. It resembles petroleum in its properties, and has been chiefly used as an external application; although occasionally, as an anthelmintic, and in inhalation in phthisis pulmonalis. Also, Æther.

NAPHTHA ACETI, Æther aceticus—n. Coal Tar, light, see Anæsthetic—n. Sulphurica, Æther sulphuricus—n. Vitrioli, Æther sulphuricus—n. Vitrioli camphorata, Tinctura ætherea camphorata—n. Vitrioli martialis, Tinctura seu Alcohol sulphuricoæthereus ferri—n. Wood, Acetone.

NAPH'THALIN, *Naphthali'na*. When coal tar is subjected to distillation, naphthaline passes over after coal naphtha. It is a white, shining, concrete, crystalline substance, fusible at 176° and boiling at 423°. It is soluble in alcohol, ether, naphtha and the oils, but insoluble in water. It has been used as an excitant expectorant, in the dose of 8 to 30 grains, in emulsion or syrup, and repeated. It has also been used as an anthelmintic; and, when made into an ointment, in psoriasis, lepra vulgaris, &c.

NA'PIFORM, *Napiform'is*, *Bu'nioid*, *Bunioï'des*, (*napus*, 'a turnip,' and *forma*, 'shape.') An epithet for a form of scirrhous tumour whose cut surface presents concentric lines resembling those seen in the interior of a turnip.

NAPIUM, Lapsana, Sinapis.

NA'PLES, CLI'MATE OF. The climate of Naples in its general characters resembles that of Nice, but it is more changeable: the sirocco too, which is little known in Nice, is severely felt at Naples. It is not a good residence for the phthisical invalid: Sir James Clark, indeed, considers it altogether unsuitable.

NAPLES, MIN'ERAL WA'TERS OF. In the Quarter Santa Lucia, near the coast, is a cold spring, rich in sulphuretted hydrogen and carbonic acid. It is much used as an aperient tonic, and in cutaneous affections.

NAPLES WA'TER, FACTIT''IOUS, *A'qua Neapolita'na* seu *acid'ula hydrosulphura'ta*, (F.) *Eau de Naples*. (*Acidulous water*, containing four times its bulk of carbonic acid, ℥xv, and ʒiij; *Hydrosulphuretted water*, ʒix; *Carbonate of soda*, gr. viij; *Carbonate of magnesia*, gr. x. M. *Ph. P.*)

NAPTA, Naphtha, Nata.

NAPUS, (ναπυ, 'mustard,') Sinapis—n. Leucosinapis, Sinapis alba—n. Sylvestris, Brassica napus.

NAPY, (ναπυ,) Sinapis.

NARCA, (νάρκη, 'stupor,') Narcosis.

NARCAPHTHE, Narcaphthon.

NARCAPH'THON, (νάρκαφθον,) *Nascaph'thon*. The bark of an aromatic tree formerly brought from India. By some, supposed to be that of the tree which affords the olibanum. It was used in fumigation, in diseases of the lungs. See Lacaphthon and Thymiama.

NARCE, (νάρκη, 'stupor,') Narcosis.

NARCEMA, (νάρκημα,) Narcosis.

NARCESIS, (νάρκησις,) Narcosis.

NARCISSE D'AUTOMNE, Colchicum autumnale—*n. Faux*, Narcissus pseudonarcissus—*n. des Près*, Narcissus pseudonarcissus—*n. Sauvage*, Narcissus pseudonarcissus.

NARCIS'SUS PSEUDONARCIS'SUS, (νάρκισσος, from νάρκη, 'stupor,') *N. festa'lis* seu *glau'cus* seu *grandiflo'rus* seu *hispan'icus* seu *ma'jor* seu *serra'tus* seu *sylves'tris*, *Bulboco'dium*, *Pseudonarcissus*, *Daf'fodil*, (old Eng.) *Aff'adil*, *Belle-Blome*, (Prov.) *Affrodile*, *Bell'flower*, *But'ter and Eggs*, *Lent rose*. *Ord.* Amaryllidaceæ. (F.) *Narcisse sauvage*, *Narcisse des près*, *Faux narcisse*, *Porillon*, *Aiault*, *Zouzinette*, *Jeannette*. The root is emetic and cathartic, in the dose of ʒij. The flowers are antispasmodic. Dose, 24 grains.

NARCODES, (νάρκωδης,) Narcotized.

NARCO'SIS, (νάρκωσις,) *Nar'cotism*, *Nar'cē*, *Nar'ca*, *Narce'ma*, *Narce'sis*, *Torpe'do*, *Tor'por*, *Stupor*, *Stupefac'tio*. The aggregate effects produced by narcotic substances. At times, narcotism is confined to a state of more or less profound stupor; and constitutes, in certain cases, a useful remedial condition; at others, it is a true poisoning, characterized by vertigo, nausea, a state of intoxication, or apoplexy, constant delirium, convulsive motions, &c. Emetics in strong doses, and not much diluted with water; purgatives and glysters are the first means to be used in this condition. The stupor may afterwards be combated by the use of exciting and stimulating drinks.

The production of narcosis or the effect of narcotics has been called *nar'cotization*.

NARCOSIS FOLLICULO'RUM. A state of the scalp, which Mr. Erasmus Wilson conceive to be dependent upon torpid action of the hair follicles, and in which the scalp and hair are found covered with a yellowish, dirtylooking powder, composed of an admixture of granular particles and furfuraceous scales.

NARCOSPASM'US, (*narce*, and σπασμος, 'spasm.') Stupor combined with spasm.

NARCOTIA, Narcotin.

NARCOTIC POISON, see Poison.

NARCOTICOÄCRID, see Poison.

NARCOT'ICS, *Narco'tica*, *Caro'tica*, *Obstupefacien'tia*, *Stupefacien'tia*, *Stupefa'cients*, (F.) *Stupéfactifs*, *Stupéfiants*. Substances, which have the property of stupefying;—as opium, stramonium, and hyoscyamus, (from *Narce*.) They are used in medicine as soothing agents; exerting their special influence on the brain and tubular matter of the spinal marrow. In small doses, as a general rule, narcotics stimulate; in large, they act as sedatives. The following is a list of the chief narcotics:—Aconitum, Ætherea, Belladonna, Cannabis, Conium, Digitalis, Humulus, Hyoscyamus, Lactucarium, Opium and Morphia, Stramonii Folia, Stramonii Semina; Mental Narcotics, (Appropriate Music, Monotonous sounds, or any succession of monotonous impressions.)

NAR'COTIN, *Narcoti'na*, *Narco'tia*, *Anarcoti'na*, *Opia'num*; (same etymon,) (F.) *Sel de Dérosne* ou *d'opium*, *Opiane*, *Principe crystallizable de Dérosne*. A solid, white, inodorous, and insipid substance; by some considered to be alkaloid; by others neuter; crystallizable in straight prisms with a rhomboidal base; fusible like the fats; soluble in boiling alcohol and ether, and scarcely soluble in water. Narcotin produces all the unpleasant effects of opium; but at the same time, throws the animal into a state of stupor. It is not used in medicine, on account of these objections. The salts, which are very bitter, have been used successfully in India for the cure of intermittents.

NARCOTIZATION, see Narcosis.

NARCOTISM, Narcosis.

NAR'COTIZED, *Tor'pidus, Narco'des.* Affected with stupor, as from the use of a narcotic.

NARD, CELTIC, Valeriana Celtica — n. Indica, Nardus Indica—*n. Indien*, Nardus Indica—*n. Indique*, Nardus Indica—*n. Petit*, Aralia nudicaulis—*n. Sauvage*, Asarum.

NARDOSTACHYS JATAMANSI, Nardus Indica—n. Patrinia, Nardus Indica.

NARDUM GALLICUM, Valeriana Celtica.

NARDUS AMERICANUS, Aralia nudicaulis —n. Celtica, Valeriana Celtica—n. Celtica altera, Arnica montana.

NARDUS IN'DICA, (*ναρδος,*) *Spi'ca nar'di* seu *In'dica, Andropo'gon nar'dus* seu *citriodo'rus, Ord.* Gramineæ [?]; or *Nardos'tachys* seu *Valeria'na* seu *Patrin'ia Jatamansi, Valeria'na spi'ea; Order*, Valerianaceæ; *Indian nard, Spikenard.* The root of this plant is one of the ingredients in the mithridate and theriaca. It is moderately warm and pungent, and has a flavour by no means disagreeable. It is used by the Orientals as a spice: — (F.) *Nard Indien* ou *Indique.* An ointment was formerly used, called *Unguen'tum nardi'num.* It was prepared of *Nard, Malaba'thrum leaves, Oil of worms, Costus, Amomum, Myrrh,* &c., and was used as a detergent.

NARDUS MONTANA, Asarum—n. Rustica, Asarum.

NA'RES, (pl. of *naris,*) *Rhi'nes, Cav'itas* seu *Cav'um* seu *Ca'vea* seu *Caver'na na'rium, Na'sus inter'nus, Myete'res, Myx'æ, Na'rium ad'itus, Ocheteum'ata, The nos'trils,* (Prov.) *Snir'rels, Snurles,* (F.) *Narines.* Two elliptical apertures, situate beneath the nose, and separated from each other by the cartilaginous *septum* seu *colum'na nasi.* These apertures are continually open, and give passage to the air we breathe, and to the mucous fluids secreted in the nasal fossæ.

NARES INTERNÆ, Nasal fossæ.

NARES, POSTE'RIOR, *Na'res postre'mæ, Extre'mæ na'res, Os'tia posterio'ra* seu *Choa'næ na'rium, Na'rium Ex'itus,* (F.) *Arrière-narines, Ouvertures postérieures des fosses nasales,* are the posterior apertures of the nasal cavities, which establish a communication between those cavities and the pharynx. They are bounded, *above,* by the body of the sphenoid bone; *below,* by the palate bone, and the base of the velum pendulum; and, on the *outside,* by the internal ala of the pterygoid process. They are separated from each other by a septum, of which the vomer is the bony part.

NARIFUSO'RIA, (*nares,* 'the nostrils,' and *fundere, fusum,* 'to pour.') Medicines, which are dropt or put into the nostrils.

NARINES, Nares.

NARIUM ADITUS, ('entrance or passage of the nostrils,') Nares — n. Siccitas, Mycteroxerotes.

NARROW CHEST, see Lordosis.

NARTHECIA, Formulary, Myris.

NARTHECIUM, (*ναρθηκιον,* dim. of *ναρθηξ,* 'a case of ointments,') Formulary, Myris.

NARTHEX, (*ναρθηξ,*) Formulary, Myris, Splint —n. Asafœtida, see Asafœtida.

NASA, Naera, Nata.

NA'SAL, *Nasa'lis,* (from *nasus,* 'the nose.') That which relates to the nose.

NASAL AR'TERY. This is the largest of the two branches in which the ophthalmic artery terminates. It issues from the orbit, above the tendon of the orbicularis palpebrarum, passes above the side of the root of the nose, and anastomoses with the last extremity of the facial. Haller gave the name *nasal* to the spheno-palatine. He also called the dorsales nasi, furnished by the external maxillary, *Nasa'les latera'les.*

NASAL BONES, *Os'sa na'si* seu *nasa'lia, Ossic'ula na'si,* (F.) *Os nasaux, Os propres du nez.* These bones are situate beneath the nasal notch of the os frontis, and occupy the space between the nasal or angular processes of the superior maxillary bone. Their shape is nearly quadrilateral. They have an *external* or *cutaneous* surface, an *internal* or *nasal,* and four margins. Each is articulated with its fellow, with the os frontis, ethmoid, and superior maxillary bones. They ossify from a single point.

NASAL CAR'TILAGE, *Cartila'go triangula'ris Na'si.* A cartilage formed of three portions, which unite at the dorsum nasi, and are distinguished into the *cartilage of the septum,* and the *lateral cartilages.* This cartilage is continuous, *above,* with the ossa nasi, and, *inferiorly,* with membranous fibrocartilages, which form the supple and movable part of the nostrils. They are two in number—the one before, the other behind.

NASAL DUCT, Lachrymal duct — n. Eminence, Mesophryon.

NASAL FOS'SÆ, *Ca'vi na'rium, Na'res inter'næ.* Two large, anfractuous cavities, situate between the orbits below the cranium, and lined by the pituitary or Schneiderian membrane. These cavities have no communication with each other; but the various sinuses in the neighbouring bones—the ethmoidal, sphenoidal, superior maxillary, &c. —all communicate with them. The general cavity of each nostril is divided by the ossa spongiosa into three *meatus* or *passages,* which run from before backwards. 1. The *Mea'tus na'rium supe'rior,* placed at the upper, inner, and back part of the superior spongy bone. 2. The *Mea'tus me'dius,* situate between the superior and inferior spongy bones; and 3. The *Mea'tus infe'rior,* situate between the inferior spongy bone and the bottom of the nose. The Schneiderian membrane receives the first pair of nerves, and various branches from the fifth pair. The arteries are furnished by the branches of the *internal maxillary,* known under the names of sphenopalatine, infraorbitar, superior alveolar, palatine, pterygopalatine; by the supraorbitar, and ethmoidal branches of the ophthalmic artery; by the internal carotid, superior labial, and dorsales nasi. Its veins are little known, and generally follow the course of the arteries. The lymphatics are almost unknown. The nasal fossæ are the seat of smell; they aid, also, in respiration and phonation.

NASAL MEATUS, see Nasal fossæ.

NASAL MU'CUS, *Mu'cus na'rium, Phleg'ma na'rium crav'sum, Mu'cor* seu *Pitui'ta* seu *Blen'na* seu *Lym'pha mucolen'ta na'rium,* vulgarly called *Snot, Snob, Snoth,* (F.) *Morve,* is the mucus secreted by the Schneiderian membrane.

NASAL NERVE, *Naso-palpébral* (Ch.), *Nasooculo'ris* (Sömmering), *Nasocilia'ris.* One of the three branches of the ophthalmic nerve of Willis. It enters the orbit by the sphenoidal fissure, passes along the inner paries of that cavity, and divides, opposite the internal and anterior orbitar foramen, into two branches. 1. The *internal* and *posterior,* which passes into the *Foramen orbitarium internum anterius,* enters the cranium beneath the dura mater, and passes into the nasal fossæ, through an aperture at the side of the *Crista galli.* It afterwards divides into several filaments: one of them — the *Nasolo'bar,* of Chaussier — is very small, and descends on the posterior surface of the os nasi, and ramifies on the integuments of the ala nasi. A second terminates near the septum; others descend along the outer paries of the nasal fossæ. 2. The other is *external* and *anterior,* and is called the *external nasal nerve.* It is distributed to the outside of the orbit. Before dividing, the nasal nerve communicates with the ophthalmic ganglion, and gives off two or three ciliary nerves. Sömmering has given the name *Posterior Nasal Nerves* to the nerves which arise from the internal part of the sphenopalatine ganglion.

NASAL NOTCH, (F.) *Échancrure nasale.* A semi-

circular notch, situate between the nasal prominence of the frontal bone, and articulated with the nasal bones and the nasal processes of the superior maxillary bones.

Nasal Process, Maxillary bone, superior.

Nasal Prom'inence, (F.) *Bosse nasale.* A prominence, situate on the median line, at the anterior surface of the os frontis, between the two superciliary arches.

Nasal Region, *Re'gio nasa'lis.* The region of the nose.

Nasal Spines. These are three in number.

1. The *Supe'rior na'sal spine* of the os frontis, occupying the middle of its nasal notch, and articulated before with the nasal bones, behind with the ethmoid. 2. The *infe'rior* and *ante'rior na'sal spine*, situate at the inferior part of the anterior opening of the nasal fossæ. It is formed by the two superior maxillary bones; and 3. The *infe'rior* and *poste'rior na'sal spine, Épine gutturale* (Ch.), a process, formed on the mesial line by the two palate bones at the posterior part of the palatine arch.

NASALE, (from *nasus,*) Errhine.

NASALIS, Compressor naris.

Nasa'lis La'bii Superio'ris. A small muscular slip, which runs up from the middle of the orbicularis and the lip to the tip of the nose. It lies exactly in the furrow, and is occasionally a levator of the upper lip, or a depressor of the tip of the nose.

NASAS, Nata.

NASATUS, ('long nosed,' from *nasus*:—the size of the nose being supposed an index of that of the male organ.) Membrosus.

NAS'CALE. A kind of pessary, made of wool, or cotton, which was formerly introduced into the vagina, after being impregnated with oil, ointment, or some other proper medicament.

NASCAPHTHON, Narcarphthon.

NASDA, Nata.

NASI, see Oryza.

NASITAS, (from *nasus,*) Rhinophonia.

NASITIS, (*nasus,* and *itis,*) Rhinitis—n. Postica, Angina nasalis.

NA'SO, *Nasu'tus,* (from *nasus.*) One who has a long nose. In composition, the nose.

NASOCILIARIS (Nervus), Nasal nerve.

NA'SOLA'BIAL, *Na'solabia'lis*; (from *naso,* and *labium,* 'a lip.') Relating to the nose and lip.

Nasolabial Line. A line or furrow, which separates the lip from the cheek, and commences at the ala nasi.

Nasolabialis. A muscular fasciculus described by Albinus, which arises from the anterior extremity of the septum nasi, and terminates in the orbicularis oris.

NA'SOPAL'ATINE, *Na'so-palati'nus.* That which belongs to the nose and velum palati.

Nasopalatine Gan'glion is situate in the foramen palatinum anterius. Its greater extremity receives the two naso-palatine branches; whilst the smaller gives off two or three filaments, which reach the palatine vault, where they ramify on the membrane of the same name, anastomosing with filaments of the great palatine nerve.

Nasopalatine Nerve, *Nerve of Cotun'nius,* is furnished by the spheno-palatine, which proceeds from the ganglion of Meckel. It traverses the vault of the nasal fossæ, and proceeds upon the septum between the two layers of the pituitary membrane. It enters the anterior palatine canal, and terminates at the superior angles of the naso-palatine ganglion, without attaining the mouth.

NASOPALPÉBRAL, Orbicularis palpebrarum.

NASTA, Nata.

NASTURTIUM AMPHIBIUM, (*nasus,* and *torquere,* 'to twist,' owing to the effect of its pungency,) see Sisymbrium — n. Aquaticum, Cardamine pratensis, Sisymbrium nasturtium—n. Bursa pastoris, Thlaspi bursa — n. Hortense, Lepidium sativum—n. Indicum, Tropæolum majus—n. Officinale, Sisymbrium nasturtium — n. Palustre, see Sisymbrium — n. Peruvianum, Tropæolum majus —n. Pratense, Cardamine pratensis—n. Sativum, Lepidium sativum.

NASUM DILATANS, ('dilating the nose,') Pyramidalis nasi.

NA'SUS, *Na'sum, Nose,* ([Sax.] næpe, nepe,) *Rhin, Rhis, Or'ganon olfac'tûs* seu *odora'tûs* seu *olfacto'rium, Promonto'rium fa'ciei, Myxo'ter, Emuncto'rium cer'ebri, Snout.* (Sc.) *Neis, Nes,* (F.) *Nez.* The nose is a pyramidal eminence, situate above the anterior apertures of the nasal fossæ, which it covers; and, consequently, occupying the middle and upper part of the face, between the forehead and upper lip, the orbits and the cheeks. Its lateral surfaces form, by uniting angularly, a more or less prominent line, called *Dor'sum* seu *Rha'chis* seu *Spi'na Na'si,* (F.) *Dos du nez.* This line terminates, anteriorly, by the *lobe,*—*Lob'ulus.* The sides are called *A'læ Na'si, Pin'næ Na'ris.* (F.) *Ailes du nez.* The *columna* is the inferior part of the partition. Its apex or tip has been called *Glob'ulus nasi.*

The chief varieties of the nose are the *aq'uiline,* the *flat nose,* (F.) *Nez camard* ou *épaté,* and the *snub nose,* (F.) *Nez retroussé.* The nose is formed, besides its bones, of fibro-cartilage, cartilage, muscles, vessels, and nerves; and its use seems to be to direct odours to the upper part of the nasal fossæ.

Nasus Internus, Nares.

NASUTUS, Naso.

NA'TA, *Nat'ta, Na'sa, Nas'da, Nas'ta, Na'sæ, Nap'ta.* A fleshy, indolent excrescence, having the shape of the nates.

NATARON, Natron.

NATA'TION, *Nata'tio, (natare, natatum,* (itself from *nare,*) 'to swim.') *Swim'ming.* The action of swimming, or of supporting one's self, or moving upon the water. Swimming resembles the horizontal leap in its physiology—the medium being water instead of air. The difference between the specific gravity of the human body and that of water is not great: so that but little exertion is required to keep a part of the body above water. Swimming is a healthy gymnastic exercise, combining the advantages of bathing.

NA'TES, sing. *Na'tis,* 'a buttock,' *Ephre'rana, Po'dex, Clu'nes, Glu'toi, Glu'ti, Glu'tia, Sedi'lia, Py'gē, Mo'næ, Bot'tom, Back'side, Poste'riors, But'tocks,* (Prov.) *Tout,* (Sc.) *Doup, Dowp, Dolp, Drod'dum, Hur'dies, Len'dis,* &c., (F.) *Fesses.* Two round projections, at the inferior and posterior part of the trunk, on which we sit, the *seat,* (F.) *Siége.* Amongst the mammalia, man alone has the nates prominent and round. They are formed chiefly by the skin, and a thick layer of areolar tissue, which covers the three glutæi muscles.

The cleft between the nates is the *Ri'ma clu'nium.*

Nates Cerebri, Quadrigemina corpora—n. et Testes, Quadrigemina corpora.

NATIS, see Nates.

NATRIUM, Sodium.

NATRIX. ('a water serpent,') Penis.

NATROCRENÆ, (*natron,* and κρηνη, 'a well,') Natropegæ.

NA'TRON, (νιτρον,) *Na'trum, Na'taron, Ni'trum, Ana'tron, Aphroni'trum,* (from *Natron,* a lake in Judæa.) A saline compound, very abundant in Egypt, which is almost wholly formed of subcarbonate of soda.

NATRONIUM, Sodium.

NATROPE'GÆ, *Natrocre'næ,* (*natron,* and πηγη, 'a spring.') Soda springs.

NATRUM, Natron—n. Arsenicicum, Arseniate of soda—n. Biboracicum, Borax—n. Chloratum liquidum, Liquor sodæ chlorinatæ—n. Muriaticum, Soda, muriate of—n. Muriatum, Soda, muriate of—n. Vitriolatum, Soda, Sulphate of—n. Nitricum, Soda, nitrate of—n. Oxymuriaticum, Soda, chloride of—n. Oxyphosphorodes, Soda, phosphate of—n. Subboracicum, Borax—n. Sulphuricum, Soda, sulphate of—n. Præparatum, Soda, subcarbonate of—n. Tartarizatum, Soda, tartrate of.

NATTA, Nata.

NATULÆ, (dim. of *nates*,) Quadrigemina tubercula.

NATU'RA, (*nasci*, *natus*, 'to be born or arise.') *Phy'sis*. Nature. Also, the genital organs.

NATURA MORBI. The essence or condition of a disease.

NATURAL PARTS, Genital organs.

NATURALIA, Genital organs.

NA'TURISM, *Nat'uralism*. A view which attributes every thing to nature, as a sage, prescient, and sanative entity. See Expectation, and Vis Medicatrix Naturæ.

NA'TURIST. A physician who scrupulously investigates, interprets, and follows the indications presented by nature in the treatment of disease.

NATUS MORTUUS, Still-born.

NAU'CLEA GAM'BIR, (ναυς, 'a ship,' and κλειω, 'to enclose,'—the half capsule being hull-shaped,) *Unca'ria gam'bir*. A plant of the *Nat. Order*, Rubiaceæ, native of the Malayan Peninsula and Indian Archipelago, which yields large quantities of the kind of Catechu known by the names *Terra Japon'ica* and *Square Catechu*, and which, in Indian commerce, is called *Gambier* or *Gambir*. It is a powerful astringent, much used in tanning, and in medicine. See Catechu.

NAUPATHIA, (ναυς, 'a ship,' and παθος, 'affection,') Nausea marina.

NAU'SEA, (ναυτια,) *Nau'sia*, *Nausi'asis*, *Nausio'sis*, *Nau'tia*, *Queas'iness*, *Squeas'iness*, (F.) *Nausée*, *Envie de vomir*; (from ναυς, (L.) *navis*, 'a ship;' because those unaccustomed to sailing are so affected.) Sickness. Inclination to vomit.

NAUSEA, KREAT'IC, (κρεας, gen. κρεατος, 'flesh.') The sickness and vomiting, excited, in some nervous patients, by the smallest portion of animal food.

NAUSEA MARI'NA, *Mor'bus nau'ticus*, *Vom'itus navigan'tium* seu *mari'nus*, *Naupathi'a*, *Seasickness*, (F.) *Mal de mer*. The sickness, vomiting, &c., experienced at sea by those unaccustomed to a sealife; and from which those who are accustomed are not always exempt. It generally ceases when the person becomes habituated to the motion of the vessel, and not till then.

NAUSÉABOND, Nauseant.

NAUSEABUNDUS, (from *nausea*,) Nauseant.

NAU'SEANT, *Nau'seans*, *Nauseabun'dus*, (F.) *Nauséabond*, *Nauséeux*. An agent that excites nausea, which is a state of diminished action. Nauseants are, hence, valuable remedies in diseases of excitement.

NAUSÉE, Nausea.

NAUSIA, (ναυσια,) Nausea.

NAUSIASIS, Nausea.

NAUSIO'SIS, (*nausia* and *osis*.) This word, besides being synonymous with nausea, has been used to express the state of venous hemorrhage, when blood is discharged by jets.

NAUTIA, (ναυτια,) Nausea.

NAVEL, ([Sax.] napela,) Umbilicus—n. String, Funiculus umbilicalis—n. Wort, Cotyledon umbilicus—n. Wort, Venus's, Cotyledon umbilicus.

NAVET, (from *napus*. 'the turnip,') Brassica rapa—*n. du Diable*, Bryonia alba—*n. Galant*, Bryonia alba.

NAVETTE, Brassica rapa.

NAVIC'ULAR, *Navicula'ris*, *Naviform'is*, (F.) *Naviculaire*, (from *navicula*, 'a little ship.')

NAVICULAR FOS'SA, *Fos'sa Navicula'ris* seu *Scaphoï'des*, *Navic'ula*, *Scaph'ula*. See Scaphoid. This name has been given, 1. To a small depression between the entrance of the vagina and the posterior commissure of the labia major or fourchette. 2. To a perceptible dilatation, presented by the urethra in man, near the base of the glans. 3. To the superficial depression which separates the two roots of the helix. This is also called *Sca'pha*.

NAVICULARE OS, Scaphoides os.

NAVIFORMIS, (*navis*, 'a ship,' and *forma*, 'form,') Navicular.

NAVIS, ('a ship,') Vulva.

NEARSIGHTEDNESS, Myopia.

NEARTHRO'SIS, (νεος, 'young or new,' and αρθρον, 'a joint.') A new joint.

NEBLE, Nipple.

NEB'ULA, (from νεφελη, 'a cloud,') *Nu'bes*, *Nubec'ula*, *Ne'phos*, *Neph'clē*, *Nephe'lion*, *Vi'sus nebulo'sus*, (F.) *Nuage*, *Ombrage*. A slight speck on the cornea. A mist or cloud suspended in the urine. See Caligo.

NEBULOUS, Nepheloid.

NEC"ESSARY, *Necessa'rius*, (*ne*, and *cessare*, 'to cease.') The *Necessaries of Life*, *Vi'tæ necessita'tes*, (F.) *Besoins de la vie*, include every thing requisite for the maintenance of life, and particularly food.

NECK, ([Sax.] hnecca, necca,) Collum—n. Derbyshire, Bronchocele.

NECK OF THE FOOT, Instep.

NECK, STIFF, Torticollis—n. Swelled, Bronchocele—n. Wry, Torticollis.

NECK'LACE, AN'ODYNE, (F.) *Collier anodin*. These are formed of the roots of hyoscyamus, Job's tears, allspice steeped in brandy, or the seeds of the wild liquorice vine, to suit the fancy of the prescriber. They are employed to facilitate dentition in children, and to procure sleep in fever!

NECKWEED, Veronica beccabunga, V. peregrina.

NECRÆ'MIA, (*necro*, and αιμα, 'blood.') Death of the blood. Death beginning with the blood.

NECRENCEPHALUS, (*necros*, and εγκεφαλος, 'encephalon,') Mollities cerebri.

NECROBIOSIS, see Degeneration.

NECROBIOT'IC, *Necrobiot'icus*, (*necros*, and βιος, 'life.') Relating or appertaining to necrobiosis or morbid metamorphosis.

NECROCEDIA, (*necros*, and κηδος, 'funereal attentions,') Embalming.

NECROCOMIUM, (*necros*, and κομεω, 'to care for,') *Morgue*.

NECRODES, (νεκρωδης, from *necros*, and *odes*,) Cadaverous.

NECRODOCHIUM, (νεκροδοχειον, from *necros*, and δεχομαι, 'to receive,') *Morgue*.

NECROLOGY, BILLS OF, (*necros*, and λογος, 'a discourse,') Mortality, bills of.

NEC'ROMANCY, *Necromanti'a*, *Necyomanti'a*, (νεκρομαντεια, from *necros*, and μαντεια, 'divination.') Divination by the dead. Conjuration; the black art, *Nigromanti'a*, *Negromanti'a*, (*niger*, 'black,' and μαντεια, 'divination.')

NECROMANTIA, Necromancy.

NECRONARCEMA, (*necros*, and ναρκημα, 'stiffness,') Rigor mortis.

NECROPHOB'IA, (*necros*, and φοβος, 'fear.') Exaggerated fear of death. This symptom occurs in patients whose the disease is not mortal; as in hypochondriasis. In fevers, it is not a good symptom.

NECROPNEUMO'NIA, *Pneumo'nia gangræno'sa* seu *typho'sa*, *Gangræ'na* seu *Mortifica'tio* seu *An'thrax* seu *Carbun'culus Pulmo'num*, *Pneumosep'sis*, *Pneumoc'acē*, (F.) *Gangrène du Poumon*,

Pneumonécrosie of Piorry; (*necros*, and *pneumonia*.) Gangrenous inflammation of the lungs. This may be *diffused* or *circumscribed*. The only pathognomonic symptom is the extraordinary and repulsive odour of the breath and expectoration. The treatment consists in the use of the chlorides internally, or of chlorine by inhalation; allaying irritation by opium, and supporting the patient by winewhey and nourishing diet.

NECROPSIA, (*necros*, and *οψις*, 'seeing,') Autopsia cadaverica.

NECROPSY, Autopsia cadaverica.

NECROS, (*νεκρος*,) Cadaver.

NECROSCOPIA, (*necros*, and *σκοπεω*, 'to examine,') Autopsia cadaverica.

NECROSCOP'IC, *Necroscop'icus*, (F.) *Necroscopique*, (*necros*, and *σκοπεω*, 'I view.') Relating to necroscopy or examination after death.

NECROSCOPY, Autopsia cadaverica.

NECROSED, see Necrosis.

NECROSEMEIOT'ICE, (*necros*, and *σημειον*, 'a sign.') The doctrine of the signs of death.

NECRO'SIAL, *Necrosia'lis*, *Necrot'ic*, *Necrot'icus*. Relating or appertaining to death or mortification, or to necrosis,—as '*necrosial* fever;' the fever that accompanies necrosis.

NECRO'SIS, (F.) *Nécrose*, (*νεκρωσις*, from *νεκροω*, 'I kill.') Death, mortification. Especially, the state of a bone or of a portion of a bone deprived of life. *Osteogangræ'na*, *Osteonecro'sis*. The bone, in such case, is said to be *necrosed'*. Necrosis may take place without the surrounding soft parts being struck with gangrene. It is to the bones what gangrene is to the soft parts. The part of the bone affected with necrosis becomes a foreign body, similar to the gangrenous eschar, and its separation must be accomplished by the efforts of nature, or by art. When necrosis occurs in the centre of long bones, it never extends to their articular extremities. The exterior layers of bone form a canal round the dead portion or *seques'trum*; between these swollen layers and the sequestrum suppuration takes place; the matter presses against the bony canal; perforates it, and is discharged by apertures, which become fistulous.

In the treatment, the exit of the sequestrum must be facilitated by proper incisions, by the application of the trephine to the bone, &c.

NECROSIS CEREALIS, Ergotism — n. Dentium, Dental gangrene—n. Ustilaginea, Ergotism.

NECROSTOA, (*necros*, and *στοα*, 'a gallery,') *Morgue*.

NECROTIC, Necrosial.

NECROTOCION, (*νεκροτοκιον*, from *necros*, and *τοκος*, 'a child.') A dead or stillborn child.

NECROTOMY, (*necros*, and *τομη*, 'section,') Dissection.

NECTAN'DRA CINNAMOMOÏ'DES, *Lau'rus cinnamomoï'des*, *Cinnamo'mum sylves'trē America'num*: *Order*, Lauraceæ; native of New Grenada, where it is called *Canela*; has the odour and taste of cinnamon, and is used as such.

NECTANDRA CYMBA'RUM, *Ocote'a cymba'rum* seu *ama'ra*, grows in Oronoko, where it is called *Sass'afras*. The bark is aromatic, bitter, and stomachic; and Von Martius thinks it is an ingredient in the curare poison.

NECTANDRA PUCHURY, see Pichurim beans — n. Rodiei, see Bebeeru.

NEC'TAR, (*νεκταρ*, from *νη*, a particle of negation, and *κταω*, 'I kill.') A pleasant liquor, feigned by the poets to have been the drink of the gods, and to have rendered immortal those who partook of it. A name given, by the ancients, to many drinks; and particularly to one made with wine, evaporated and sweetened with honey.

NECTARIUM, Inula helenium.

NECUSIA, (*νεκω*, 'to kill,') see Wound.

NECYOMANTIA, (*νεκυς*, 'a dead body,' and *μαντεια*, 'divination,') Necromancy.

NEDYIA, (*νηδυια*,) Intestines.

NEDYS, (*νηδυς*.) The belly, abdomen, stomach, uterus.

NEE'DLE, (Sax. neþl, nædl, from Teut. n e t e n, 'to sew.') *Acus*, *Bel'onē*, *Ra'phis*, *Ra'phion*, *Rha'phis*, *Rha'phion*, *Aces'tra*, (F.) *Aiguille*. A steel instrument, used in many professions. In *Surgery*, a steel, gold, silver, or platinum instrument, that may be round, flat, or triangular, straight, or curved, supported or not by a handle, but having almost always a point, by means of which it can penetrate the textures; and either near the point, or more commonly, near the other extremity, an aperture or eye for the reception of a thread or tape, which it introduces into the parts. The *Aiguille à appareil* of the French is the ordinary sewing needle used in the making of bandages, &c.

NEEDLE, A'CUPUNCTURE, (F.) *Aiguille à Acupuncture*. An inflexible gold or silver needle; conical, very delicate, four inches long, furnished with a handle, and, at times, with a canula shorter than it by about half an inch. An ordinary needle, waxed at the head, will answer as a substitute for this. See Acupuncture.

NEEDLE, CAT'ARACT, *A'cus ophthal'mica*, (F.) *Aiguille à cataracte*. Needles of gold, silver, and steel have been used; the latter, alone, at the present day. The cataract needle is employed to depress or tear the crystalline when opake. This needle is usually made from 15 to 24 lines long; and is attached to a fine handle. The extremity may be, as in Scarpa's and Langenbeck's, pointed, prismatic, triangular and curved; in Dupuytren's and Walther's, flat, curved, and sharp-edged; in Hey's, flat, with a semicircular and sharp end; or, as in Beer's, Siebold's, Schmidt's, Himly's, Von Gräfe's, &c., straight and spearpointed. A mark is generally placed upon the handle to inform the operator, — when the instrument is engaged in the eye,—what side corresponds to the crystalline.

NEEDLE FOR A COUNT'EROPENING, *A'cus invagina'ta*, (F.) *Aiguille à Contre-ouverture* ou *engainée* ou *à gaine*, — a long, narrow instrument of steel; the point of which is fine and sharp on both sides; — the heel (*talon*) having an aperture to receive a thread, tape, &c., provided with a flat, silver sheath, shorter than the blade, the point of which it covers when passing through parts that have to be respected.

NEEDLE, DESCHAMPS', *Paupe's needle*, (F.) *Aiguille de Deschamps*, *A. à manche*, &c., is the last described needle fixed to a handle. The eye is placed near the point. It is employed in the ligature of deep-seated arteries.

NEEDLE, FIS'TULA, (F.) *Aiguille à Fistule*. A long, flat, flexible, silver instrument; having an aperture near one extremity; blunt at the other. This was formerly used for passing a seton into fistulous ulcers. On one of its sides was a groove for guiding a bistouri in case of necessity.

Also, a long, steel instrument, terminated by a point like that of a trocar, which Desault employed for penetrating the rectum, when operating for fistula that had no internal aperture.

NEEDLE, HARELIP, (F.) *Aiguille à Bec de Lièvre*. A small, silver canula, to which is attached a spearpoint, that can be readily withdrawn. This needle, armed with the point, is introduced at one side of the fissure in the lip, and through the other. The twisted suture is then applied, and the pin withdrawn.

NEEDLE, LIG'ATURE, (F.) *Aiguille à ligature*. A long, steel instrument, sharp towards one extremity, with an eye near the other, which was formerly used for suspending the circulation of blood prior to amputation, by being passed through

the limb, so as to include the principal artery and a part of the muscles and integuments.

Also, a steel instrument of various dimensions, round towards one of its extremities, which was straight, and furnished with an aperture; curved and flat towards the opposite, which was pointed, and had a slight ridge on its concave side. At the commencement of the last century, this instrument was used to pass ligatures around vessels.

Also, a steel instrument of various dimensions, flat, regularly curved in the form of a semicircle, with a sharp or lance point, and a long eye, used with advantage in place of the last.

NEEDLE, PAUPE'S, Needle, Deschamps'.

NEEDLE, SE'TON, (F.) *Aiguille à Séton.* A long, narrow, steel blade; pointed and sharp at one extremity; pierced at the other by an aperture. The *Aiguillē à contre-ouverture* may be used for the same purpose.

NEEDLE, SU'TURE, (F.) *Aiguille à Suture.* For the twisted suture, the hare-lip needle is used; for the others, the straight or curved needle: the straight needle is preferable for stitching up the abdomen, &c., in dissection. In the suture of the tendons, a curved needle has been used; flat on both sides, and cutting only at the concave edge, in order that the instrument may pass between the tendinous fibres without dividing them.

NEEDLEBEARER, *Porte-aiguille.*

NEEDLECARRIER, *Porte-aiguille.*

NEEM, see Melia azedarach.

NEESING, Sneezing.

NÈFLE, Mespilus (the fruit).

NÉFLIER, Mespilus.

NEFREN'DES, properly, 'sucking pigs.' *No'doi, Eden'tuli.* Persons devoid of teeth. Young children, for instance, who have not cut them; or aged persons, who have lost them. This state is called *Nefren'dia, Odon'tia eden'tula.*

NEGOTIUM PARTURITIONIS, ('affair of parturition,') Parturition.

NÈGRE, Negro — *n. Blanc* ('white negro,') Albino.

NEGRETIA PRURIENS, Dolichos pruriens.

NE'GRO, (S. and P. *negro,* from (L.) *niger,* 'black,') *Ni'grita,* (F.) *Nègre.* One of the Æthiopian race. See Homo and Mulatto.

NEGRO, PIED, see Achroma.

NEGROMANTIA, (*niger,* 'black,' and *μαντεια,* 'divination,') see Necromancy.

NEIÆRA, (*νειαιρα,*) Abdomen.

NEIGE, Snow.

NEIR, (Sc. *nicre,*) Kidney.

NEIRA, (*νειρα,*) Abdomen.

NEIS, Nasus.

NELUM'BIUM LU'TEUM, *Yel'low ne'lumbo, Yel'low wa'ter lil'y, Pond lily, Water shield, Water nuts, Water chin'capin, Rat'tle nut, Sa'cred bean.* A beautiful water plant, common in the United States, and belonging to *Nat. Ord.* Nymphaceæ; *Sex. Syst.* Polyandria Polygynia. The leaves are cooling and emollient when applied to the surface. The roots, leaves, and nuts are eaten. The last are called by the Indians and others *water chincapins.*

NELUMBO, YELLOW, Nelumbium luteum.

NENDO, Angelica lucida.

NENNDORF, MIN'ERAL WA'TERS OF. Nenndorf is a village three and a half German miles from Hanover. Its cold sulphureous spring is much celebrated.

NENUPHAR, Nymphæa alba—*n. Blanc,* Nymphæa alba—*n. Jaune,* Nymphæa lutea—n. Lutea, Nymphæa lutea—*n. Odorant,* Nymphæa odorata.

NEO, (from *νεος,* 'new,') in composition, new.

NEOARTHRO'SIS, (*neo,* and *αρθρον,* 'a joint.') A new joint; an artificial joint.

NEOG'ALA, (*neo,* and *γαλα,* 'milk.') Milk secreted immediately after the colostrum. Also, the colostrum.

NEOGENES, (*νεογενης,* from *neo,* and *γενω,* 'to be born,') *Nouveau-né.*

NEOGILUS, (*νεογιλος,*) *Nouveau-né.*

NEOGNUS, (*νεογνος,*) *Nouveau-né.*

NEOGONUS, (*νεογονος,*) *Nouveau-né.*

NEOMEMBRANE, see Membrane, false.

NEONATUS, (*neo,* and *natus,* 'born,') *Nouveau-né.*

NE'OPLASM, *Neoplasm'a,* gen. *Neoplasm'atis,* (F.) *Néoplasme,* (*neo,* and *πλασσω, πλαττω,* 'I form.') A new formation or tissue; the product of morbid action.

NE'OPLASTY, *Neoplas'ticē.* An operative process for the formation of new parts. It includes autoplasty, cicatrization of wounds, and the formation of adhesions.

NEOSCYTECHUS, (*neo, σκυτος,* 'leather,' and *ηχος,* 'a sound,') see *Craquement de Cuir neuf.*

NEOTOCICTERUS, (*neo, τοκος,* 'one born,' and *icterus,*) Icterus infantum.

NEOTTIA, (*νεοττια,* 'a nest,'—from the arrangement of the roots,) Goodyera pubescens.

NEP, Nepeta.

NEPEN'THA DESTILLATO'RIA, *Bandu'ra.* A Ceylonese plant, the root of which is astringent.

NEPEN'THES, (*νεπενθης,* from *νη,* 'neg.,' and *πενθος,* 'grief.') A remedy much extolled by the ancients against sadness and melancholy.

The women of Thebes, according to Diodorus Siceliotes, alone possessed the secret of its composition; and, according to Homer, Helen introduced it from Egypt. Some suppose it to have been opium.

NEPENTHES, Bangue—n. Opiatum, Pilulæ opiatæ.

NEP'ETA, (from *Nepete,* a town in Italy [?]), *N. Cata'ria* seu *vulga'ris, Cata'ria vulga'ris, Her'ba fe'lis, Nep, Cat'nep, Cat'nip, Cat'mint,* (F.) *Herbe aux Chats, Cataire. Ord.* Labiatæ. The leaves, *Cata'ria,* (Ph. U. S.), have a smell and taste like those of an admixture of spearmint and pennyroyal. It has been recommended in uterine disorders, dyspepsia, flatulency, &c., like pennyroyal; and is much used on the American continent in domestic medicine, in flatulencies, &c., of children.

NEPETA AGRESTIS, Melissa nepeta — n. Glechoma, Glechoma hederacea—n. Vulgaris, Nepeta.

NEPHALIOTES, (*νηφαλιοτης,* from *νηφω,* 'I abstain,') Temperance.

NEPHELE, (*νεφελη,* 'a cloud,') Enæorema, Nebula.

NEPHELION, (*νεφελιον,* 'a little cloud,') Nebula.

NEPHE'LOID, *Nephelo'ides, Nephelo'des, Neb'ulous, Nubilo'sus,* (*νεφελοειδης,* from *νεφελη,* 'a cloud,' and *ειδος,* 'resemblance.') An epithet applied to urine when it is cloudy — *Uri'na nephelo'des.*

NEPHOS, (*νεφος,* 'a cloud,') Nebula.

NEPHRÆMORRHAGIA, (*nephrus,* and *hæmorrhagia,*) see Hæmaturia.

NEPHRAL'GIA, *Do'lor Nephret'icus, Neural'gia Re'num,* (F.) *Névralgie des Reins, Dysnéphronervie,* (*nephrus,* and *αλγος,* 'pain.') Pain and neuralgia in the kidney.

NEPHRALGIA ARENOSA, see Gravel — n. Calculosa, see Gravel — n. Rheumatica, Lumbago.

NEPHRANURIA, (*nephrus, a,* priv. and *ουρον,* 'urine,') Ichuria renalis.

NEPHRAPOS'TASIS, *Nephropyo'sis, Abscess'us rena'lis,* (*nephrus,* and *αποστασις,* 'abscess.') Renal abscess.

NEPHRATON'IA, (*nephrus,* and *ατονια,* 'want of tone.') *Re'num aton'ia* seu *paral'ysis.* Atony of the kidney.

NEPHRAUX'Ē, (*nephrus,* and *αυξω,* 'to increase.') Enlargement of the kidney.

NEPHRELCO'SIS, *Nephropyo'sis, Helco'sis renu'lis,* (*nephrus,* and *ἕλκωσις,* 'ulceration.') Ulceration of the kidney.

NEPHRELMIN'TIC, *Nephrelmin'ticus,* (*nephrus,* and *ἕλμινς,* gen. *ἕλμινθος,* 'a worm.') That which is owing to the presence of worms in the kidney.

NEPHREMPHRAX'IS, (*nephrus,* and *εμφρασσω,* 'I obstruct.') A name given by Ploucquet to obstruction of the kidneys.

NEPHRET'IC, *Nephrid'ius, Nephrit'ic, Nephrit'icus,* (from *nephrus.*) That which relates to the kidney. Applied, especially, to pain, &c., seated in the kidney.

NEPHRET'ICUM, in *Materia Medica,* means a medicine employed for the cure of diseases of the kidney.

Nephreticum Lignum, Guilandina moringa.

NEPHRIT'ICUS LA'PIS, *Tal'cum nephrit'icum,* (F.) *Pierre néphrétique, Jade néphrite* ou *oriental.* A green, fatty kind of stone,—once used as an amulet against calculus and epilepsy,—an absurd name, as there can be no such remedy.

NEPHRIA, (*νεφρος,* 'kidney,') Kidney, Bright's disease of the.

NEPHRID'ION, *Pingue'do rena'lis,* (*νεφριδιος,* 'pertaining to the kidney.') The fat which surrounds the kidney.

NEPHRIDIUM, Capsule. renal.

NEPHRIDIUS, (*νεφριδιος,*) Nephretic.

NEPHRINE, (from *nephrus,*) Oxyd, cystic, Urea.

NÉPHRITE, Nephritis—*n. Albumineuse,* Kidney. Bright's disease of the.

NEPHRITES, (from *nephrus,*) Asphaltites.

NEPHRITIC, Nephretic.

NEPHRITICI (*morbi,*) in the classification of Dr. Wm. Farr, renal diseases.

NEPHRITICUM LIGNUM, Guilandina moringa.

NEPHRITIS, (from *nephrus,*) Asphaltites.

Nephri'tis, *Empres'ma Nephri'tis,* (*nephrus,* and *itis,*) *Renum inflamma'tio, Nephrophleg'monē,—Inflammation of the Kidney,* (F.) *Néphrite, Inflammation des Reins,* is characterized by acute pain; burning heat, and a sensation of weight in the region of one or both kidneys; suppression or diminution of urine; fever; dysuria; ischuria; constipation, more or less obstinate; retraction of the testicle, and numbness of the thigh of the same side. It may be distinguished into *simple,* and *calculous nephritis—Lithonephri'tis.* In the latter, the urine often contains small particles of uric acid or of urate of ammonia. The most common causes of nephritis are,—excess in irritating and alcoholic drinks; abuse of diuretics; blows or falls on the region of the kidneys; the presence of renal calculi, &c. It may be distinguished from lumbago by the pain which attends the latter on the slightest motion, &c. It usually terminates by resolution in from one week to two or three. It may, however, end in suppuration *—pyonéphrite;*—or may become chronic—*chrononéphrite.* In the treatment, antiphlogistics, as bleeding, baths, &c., are required to the full extent; with the use of diluents, opiates, &c.

Nephritis Albuminensis, Kidney, Bright's disease of the—n. Albuminosa, Kidney, Bright's disease of the—n. Associated, Kidney, Bright's disease of the—n. Cachectic, Kidney, Bright's disease of the—n. Calculous, see Nephritis.

Nephritis, Des'quamative. A condition of Bright's disease, in which epithelial cells are seen by the microscope in the urine.

Nephritis, Sociata, Kidney, Bright's disease of the.

NEPHROCHALAZOSIS, (*nephrus,* and *χαλαζα,* 'hail,' 'granulation,') Kidney, Bright's disease of the.

NEPHROCOCCOSIS, (*nephrus,* and *κοκκος,* 'a grain or berry,') Kidney, Bright's disease of the.

NEPHROCOLICA, Colica nephretica.

NEPHROCYSTO'SIS, (*nephrus, κυστις,* 'a cyst or bladder,' and *osis.*) A morbid condition, which consists in the formation of cysts in the bladder.

NEPHRODES, (*νεφρωδης,*) Nephroid.

NEPHRODIUM FILIX MAS, (from *nephrus,*) Polypodium filix mas.

NEPHROG'RAPHY, (*nephrus,* and *γραφη,* 'a description.') An anatomical description of the kidney.

NEPHROHÆ'MIA, (*nephrus,* and *αἱμα,* 'blood.') Hyperæmia or congestion of the kidney.

NEPH'ROID, *Nephroï'des, Nepuro'des, Reniform'is,* (*nephrus,* and *ειδος,* 'form, resemblance.') Reniform. Having a resemblance to a kidney—as '*nephroid* cancer,' so called because the morbid growth resembles the kidney in structure.

NEPHROLITHI'ASIS, (*nephrus,* and *λιθος,* 'a stone.') The disease of calculus in the kidney; *Lith'ia rena'lis, Lithi'asis nephrit'ica, L. Rena'lis.* See Gravel.

NEPHROLITH'IC. Belonging to calculi in the kidneys. This epithet has been applied to ischuria, occasioned by calculi formed in the kidneys.

NEPHROLITHOTOMY, Nephrotomy.

NEPHROL'OGY, *Nephrolog''ia,* (*nephrus,* and *λογος,* 'a treatise.') A treatise on the kidneys. Dissertation on the kidneys and their functions.

NEPHROMALA'CIA, (*nephrus,* and *μαλακια,* 'softness.') Softening of the kidney.

NEPHRON'CUS, *Tumor rena'lis,* (*nephrus,* and *ογκος,* 'a tumour.') A tumefaction of the kidney.

NEPHROPARAL'YSIS, *Nephropar'esis, Nephroplē'gia, Paral'ysis renum* seu *rena'lis.* Paralysis of the kidneys.

NEPHROPARESIS, (*nephrus,* and *παρεσις,* 'loss of tone,') Nephroparalysis.

NEPHROPHLEGMAT'IC, *Nephrophlegmat'icus,* (*nephrus,* and *φλεγμα,* gen. *φλεγματος,* 'phlegm.') A name given, by some authors, to ischuria produced by mucus contained in the urine.

NEPHROPHLEGMONE, (*nephrus,* and *φλεγμονη,* 'inflammation,') Nephritis.

NEPHROPHTHI'SIS, (*nephrus,* and *φθισις,* 'consumption.') Phthisis from suppuration of the kidney.

NEPHROPLE'GIA, (*nephrus,* and *πληγη,* 'a stroke,') Nephroparalysis.

NEPHROPLETHOR'IC, *Nephropletho'ricus,* (*nephrus,* and *πληθωρα,* 'plethora.') Belonging to plethora of the kidneys. An epithet given to ischuria dependent upon this cause.

NEPHROPY'IC, *Nephropy'icus,* (*n phrus,* and *πυον,* 'pus.') Belonging to suppuration of the kidney.

NEPHROPYOSIS, Nephrapostasis, Nephrelcosis.

NEPHRORRHAG''IA, *Hæmatu'ria rena'lis, Hæmorrhag''ia re'num,* (*nephrus,* and *βαγη,* 'rupture;') *Profluvium sanguinis e re'nibus.* Hemorrhage from the kidney.

NEPHROS, (*νεφρος,*) Kidney.

NEPHROSCLE'RIA, (*nephrus,* and *σκληρια,* 'hardness;') *Indura'tio re'num.* Induration of the kidneys.

NEPHROSPAS'TIC, *Nephrospas'ticus,* (*nephrus,* and *σπαω,* 'I draw.') That which depends upon spasm of the kidney. An epithet given to a variety of ischuria.

NEPHROTHROM'BOID, *Nephrothromboï'des,* (*nephrus,* and *θρομβος,* 'a clot.') That which depends upon clots of blood, contained in the kidneys or their ducts. An epithet for a species of ischuria.

NEPHROT'OMY, *Nephrolithot'omy, Nephrotom'ia, Nephrolithotom'ia, Sec'tio rena'lis, S. re-*

nis, (*nephrus*, and *τεμνειν*, 'to cut.') Dissection of the kidney. Also, an operation proposed with the view of extracting calculi formed in the kidney, by means of an incision into the tissue of that organ.

NEPHRUS, (*νεφρος*,) Kidney.

NEPIOS, (*νηπιος*,) Infans.

NEPIOTES, (*νηπιοτης*,) Infancy.

NEPTA, Asphaltum.

NERA, Toddy.

NERE, (Sc.) ([G.] Niere,) Kidney.

NERF, Nerve — *n. Circonflexe*, Axillary nerve — *n. Dentaire*, Dental nerve — *n. Fessier*, Gluteal nerve — *n. Glosso-pharyngien*, Pharyngoglossal nerve — *n. Gustatif*, see Lingual nerve — *n. Suspubien*, Suprapubian nerve — *n. Sympathique*, Trisplanchnic nerve—*n. grand Sympathique*, Trisplanchnic nerve — *n. Tibiale branche*, Popliteal internal — *n. Trachéal*, Laryngeal inferior nerve —*n. Trachélo-dorsal*, Spinal nerve—*n. Trijumeau*, Trigemini—*n. à Trois cordes*, Trigemini—*n. Tympanique*, Chorda tympani — *n. Vague*, Pneumogastric nerve — *n. Vertébro-digital*, Musculocutaneous nerve.

NERFS BRONCHIQUES, Bronchial nerves —*n. Ciliaires*, Ciliary nerves — *n. Craniens*, Cerebral nerves — *n. Moteurs oculaires communs*, Motores oculorum — *n. Rachidiens*, Vertebral nerves —*n. Sacrés*, Sacral nerves — *n. Sous-costales*, Intercostal nerves.

NÉRION, Nerium oleander.

NÉRIS, MIN'ERAL WA'TERS OF. Néris is on the high road from Moulins to Limoges, eighty leagues from Paris. There are four springs, the water of which is clear, inodorous, tasteless, and has an unctuous feel. It contains carbonic acid gas, carbonate of soda, and sulphate of soda, chloride of sodium, silex, and an animal matter to which its 'oleaginous' property is probably owing. The waters are generally used in the form of thermal baths. Season, from the 20th of May to the 15th of October.

NE'RIUM, (*νηρος*, 'humid,' because growing in moist places.) N. oleander.

Ne'rium Antidysenter'icum, *Wright'ia antidysenter'ica*. The tree which affords the *Codaga'pala Bark*, *Cones'si cor'tex*, *Tillicher'ry cor'tex*, *Cor'tex profluvii*. *Family*, Apocyneæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Codagapale*, *Cropale*. The bark of this Malabar tree is of a black colour, externally, and is generally covered with a white moss or scurf. It has an austere, bitter taste, and has been recommended as an astringent in diarrhœa, dysentery, &c.

Nerium Odo'rum, *Kunaree*, of India, is a well known poison, and extensively used as such.

Nerium Olean'der, *Ne'rium*, *Rhododoph'nis*, *Rosa'go*, (F.) *Laurier rose*, *Laurose*, *Nérion Rosage*, *Rhododaphné*. The leaves are reputed to be narcotic. The infusion is employed internally, in herpetic affections, and the powder, incorporated with lard, is used in the itch.

NEROLI, see Citrus aurantium.

NERONIA'NA seu NERO'NICA PHLEBOTOM'IA. An epithet given, for some cause, to phlebotomy, when more than one vein was opened on the same day, or to bleeding *coup sur coup*. Termed *Neroniana*, because the philosopher Seneca was bled to death under Nero [?].

NERPRUN PURGATIF, (or *Noirprun*, '*prunus nigra*,') Rhamnus.

NERVE, (*νευρον*, 'a string.') *Ner'vus*, *Neu'ron*, (F.) *Nerf*. (*Neuron* and *Nervus* meant also, with the ancients, a tendon and a ligament, *Partes nervo'sæ*; and hence the different acceptations of 'nervous;'—'a man of *nerve*—a strong, *nervous* man; and a weak, *nervous* woman.') The nerves are tubular cords of the same substance as that which composes the encephalon and spinal marrow. They extend from one or other of the nervous centres to every part of the body, communicating, frequently, with each other; forming *plexuses*, and, occasionally, *ganglions*; and being, at length, lost in the parenchyma of organs. There are 42 pairs, and, according to their origin, they are termed *Cranial* or *Encephalic*, and *Spinal*. Each nerve is composed of several filaments or cords placed alongside each other, and is surrounded by a neurilemma. The encephalic nerves, in general, have only one root in the brain, whilst the spinal arise from the marrow by two roots: the one from an anterior fasciculus of filaments, the other from a posterior, separated from each other by the *Ligamentum denticulatum*; uniting outside this ligament, and presenting, near the intervetebral foramen, a ganglion formed only by the posterior root. The two roots make, afterwards, but one nerve; and, like the encephalic nerves, proceed to their destination, subdividing into rami and ramusculi, until they are finally lost in the texture of the organs. The trunks first formed are commonly round, and proceed alone, or accompany the great vessels, being placed in the areolar spaces which separate the organs, and are thus protected from injury. Their manner of termination we are not acquainted with; whether the nervous pulp, for instance, as is more probably the fact, is distributed or lost in a membrane, as seems to be the case with the nerves of sight, hearing, and smell,—or is looped:—see Corpuscles, Pacinian, and Corpuscula tactûs. Certain it is, that there is considerable difference in the organs, as respects the quantity of nerves that terminate in them; and the particular arrangement of the nervous extremities. Some organs have numerous nerves; others seem to have none: a circumstance which influences considerably the sensibility of parts. Observation has shown, that certain motor fibres cross the median line and affect muscles on the side opposite to that from which they originate; but the influence is very limited. See *Entrecroisement*.

The *Encephal'ic nerves* arise from the encephalon, or are inserted into it, (according as we consider the brain the origin or termination of the nerves;) and make their exit by foramina at the base of the skull. They are 12 in number. The spinal nerves are 31 in number, 8 *cervical*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*: the four inferior cervical being much larger than the superior, because they furnish the nerves of the upper extremities.

SYNOPTICAL TABLE OF THE NERVES.

I. *Cranial* or *Encephalic Nerves.*

1. *Olfactory* (1st pair.)	Divided into internal, external, and middle branches, which are distributed on the Schneiderian membrane.
2. *Optic* (2d pair.)	Terminate in the retina.
3. *Motores oculorum* (3d pair.)	*Superior Branch.* To the rectus superior oculi and levator palpebræ superioris. *Inferior Branch.* To the rectus internus, rectus inferior and lesser oblique muscles; a filament which goes to the ophthalmic ganglion.
4. *Pathetici* (4th pair.)	To the greater oblique muscle of the eye.
5. *Par Trigeminum* (5th pair.)	*Ophthalmic Branch.* Divided into three branches. 1. The *lachrymal branch*, to the lachrymal gland and upper eyelid. 2. *Frontal branch*, to the forehead and upper eyelid. 3. *Nasal branch*, to the eyelids, nasal fossæ, and nose. *Superior Maxillary Branch.* 1. The *orbitar branch*, to the orbit. 2. The *posterior* and *superior dental*, to the last three molar teeth and gums. 3. The *anterior dental*, to the incisor, canine, and two lesser molares. 4. *Infraorbitar*, to the upper lip, cheek, and nose. *Inferior Maxillary Branch.* 1. *Temporal* profound branches, to the temporal muscle. 2. *Masseterine* branch, to the masseter muscle. 3. *Buccal*, to the inner surface of the cheek. 4. *Pterygoid*, to the internal pterygoid muscle. 5. *Lingual*, to the mucous membrane of the tongue. 6. *Inferior dental*, to the teeth of the lower jaw, and to the lower lip. 7. *Auricular* branch, to the pavilion of the ear and forehead.
6. *Abducentes* (6th pair.)	To the rectus externus oculi.
7. *Facial* (Portio dura of the 7th pair.)	1. At its exit from the cranium, the *posterior auricular*, *stylohyoid*, and *inframastoid*, to the pavilion of the ear, the mastoid process, the digastricus, and the muscles attached to the styloid process. 2. Near the parotid gland, the *temporal*, *malar*, *buccal*, *supramaxillary*, and *inframaxillary* to the whole superficies of the face.
8. *Auditory* (Portio mollis of the 7th pair.)	To the vestibule, semicircular canals, and cochlea.
9. *Glossopharyngeal* (Portion of the 8th pair.)	To the base of the tongue and pharynx.
10. *Par Vagum* (8th pair.)	1. *IN THE NECK*, — a *pharyngeal* branch to the pharynx; *superior laryngeal* branch to the larynx, and to some muscles of the inferior hyoid region. *Cardiac* branches to the cardiac plexus. 2. *IN THE CHEST*, — the *inferior laryngeal* branch to the larynx *pulmonary* branches, which form the plexus of the same name: *œsophageal* branches to the œsophagus. 3. *IN THE ABDOMEN*, — *gastric* branches to the parietes of the stomach: filaments which go to the neighbouring plexuses.
11. *Spinal* or *Accessory of Willis*	At its exit from the cranium — the *accessory of the pneumogastric nerve* anastomosing with this nerve. In the neck — filaments to the trapezius muscles.
12. *Hypoglossal* (9th pair.)	*Cervicalis descendens*, to the muscles of the inferior hyoid region and to the cervical nerves. Filaments to the muscles of the tongue.

II. *Spinal* or *Vertebral Nerves.*

1. *Cervical Nerves.*

1st *Cervical Pair*	*Anterior Branch.* Anastomosing *par arcade* with the second pair.
2d *Cervical Pair*	*Anterior Branch.* A branch anastomosing with the first pair: a branch which goes to the cervical plexus.
3d and 4th *Cervical Pairs*	*Anterior Branch.* Concurring in the cervical plexus.

The *Posterior Branch* of these four pairs ramifies on the occiput and muscles of the superficial and deep-seated cervicoöccipital regions.

Cervical Plexus	DESCENDING BRANCHES. — 1. *Internal descending*, anastomosing with a branch of the hypoglossus. 2. *Phrenic branch*, to the diaphragm. 3. *External descending branches*, dividing into supraclavicular, supraacromial, infraclavicular, and cervicales profundi, to the muscles and integuments of the upper part of the chest and shoulder, to the trapezius, levator scapulæ, rhomboideus, &c. ASCENDING BRANCHES. — 1. *Mastoid*, to the posterior and lateral part of the head and the inner surface of the pavilion of the ear. 2. *Auricular*, to the parotid gland and pavilion of the ear. *Superficial Cervical Branches.* (2.) To the platysma myoides, digastricus, the integuments of the neck, &c.
5th, 6th, and 7th *Cervical Pairs*	*Anterior Branches.* Assisting in the formation of the brachial plexus. *Posterior Branches.* To the muscles and integuments of the posterior part of the neck and upper part of the back.
Brachial Plexus	1. *Thoracic Branches.* To the anterior and lateral parts of the chest. 2. *Suprascapulary* branch to the muscles of the posterior scapular region. 3. *Infrascapulary* branches (3.) to the subscapularis, teres major, teres minor, and latissimus dorsi. 4. The *brachial internal cutaneous*, to the integuments of the palmar and dorsal surfaces of the forearm, near the ulnar margin. 5. The *brachial external cutaneous*, principally to the integuments of the palmar and dorsal surfaces of the forearm, near the radial margin. 6. The *median nerve*, to the

Brachial Plexus.....	forearm, hand, and palmar surface of all the fingers. 7. The *cubital nerve*, to the last two fingers. 8. The *radial*. to the first three. 9. The *axillary*, around the shoulderjoint, and to the neighbouring muscles.

2. *Dorsal Nerves, (Nervi dorsales.)*

1*st Dorsal Pair*.....	*Anterior Branch.* To the brachial plexus.
2*d* and 3*d Dorsal Pairs*.....	*Anterior Branches.* An intercostal and brachial branch.
4*th*, 5*th*, 6*th*, and 7*th Dorsal Pairs*.....	*Anterior Branches. Internal* branches, to the intercostals, triangularis sterni, pectoralis major, and to the skin. *External* branches to the integuments of the chest. the obliquus externus abdominis, and the skin of the abdomen.
8*th*, 9*th*, 10*th*, and 11*th Dorsal Pairs*...	*Anterior Branches. Internal* branches, to the transversalis, obliquus internus, and rectus muscles, and to the skin of the abdomen. *External* branches. to the integuments of the chest, and to the muscles and skin of the abdomen.
12*th Dorsal Pair*.....	*Anterior Branch.* To the first lumbar nerve, and to the muscles and skin of the abdomen as far as the iliac crest.

The *Posterior Branches* of the dorsal nerves are distributed to the muscles and integuments of the back and loins.

3. *Lumbar Nerves.*

1*st*, 2*d*, 3*d*, and 4*th Lumbar Pairs*.....	*Anterior Branches.* Concurring to form the lumbar plexus.
5*th Pair*.....	*Anterior Branch.* Aiding in forming the sciatic plexus.

The *Posterior Branches* of the lumbar nerves are distributed to the loins, sacrum, and nates.

Lumbar Plexus.....	1. *Musculocutaneous Branches*, to the number of three. One *superior*. to the muscles of the abdomen, to the fold of the groin, and the scrotum: a *middle*, to the integuments and muscles of the abdomen: and an *inferior*, to the skin of the thigh. 2. A *genito-crural* branch to the integuments of the scrotum, the groin, and the thigh. 3. The *crural* nerve, to the Integuments and muscles of the thigh, skin of the leg, and foot. 4. The *obturator* nerve, to the muscles at the inner part of the thigh. 5. The *lumbosacral*, to the sciatic plexus. It gives off the *gluteal* nerve to the glutæi muscles.

4. *Sacral Nerves.*

1*st*, 2*d*, 3*d*, and 4*th Sacral Pairs*.....	*Anterior Branches.* They form by their union the sciatic plexus.
5*th* and 6*th Pairs*.....	*Anterior Branches.* To the parts in the vicinity of the coccyx.

The *Posterior Branches* ramify on the muscles and integuments of the nates

Sciatic Plexus.....	1. *Hemorrhoidal nerves*, to the rectum. 2. *Vesical*, to the bladder. 3. *Uterine* and *vaginal*, to the vagina and uterus. 4. *Inferior gluteal*, to the gluteal muscles, perinæum. and integuments of the posterior part of the thigh. 5. *Pudic*, to the perinæum, penis, or vulva. 6. *Sciatic*, divided into the *external popliteal*, which ramifies on the integuments and muscles of the external side of the leg, on the dorsum of the foot, and the dorsal surface of the toes; and into the *internal popliteal*, distributed on the dorsal surface of the two last toes, to the muscles of the foot, and on the plantar surface of all the toes.

Classifications of the nerves have been recommended according to their uses, in preference to the ordinary anatomical arrangement. It has been remarked that the encephalic nerves have generally one root; the spinal two. Experiments and pathological facts have proved that the anterior column of the marrow—*funic'ulus ante'rior*—and the anterior roots of the spinal nerves are inservient to volition or voluntary motion: and that the posterior column—*funic'ulus poste'rior*—and roots are destined for sensibility. Hence the spinal nerves, which have two roots, must be the conductors both of motion and feeling; whilst the encephalic, which, with but few exceptions, have but one, can possess but one of these properties:—they must be either *sensitive* or *motor*, according as they arise from the posterior or anterior column of the medulla; and, consequently, three classes of nerves may be distinguished.

1. *Sensory*.....	Arising, by a single root, from the posterior column of the medulla oblongata or spinal marrow.
2. *Motor*.	Arising, by a single root, from the anterior column of the same parts.
3. *Sensory and Motor*.....	Which have two roots: one from the anterior, and one from the posterior column.

The tubules of all the afferent or sensory nerves cross to the opposite side of the spinal marrow, and an impression received by them is conveyed along the vesicular matter to the sensory ganglia of the encephalon; whilst the efferent or motor fibres cross only at the anterior pyramids of the medulla oblongata.

According to Sir Charles Bell, the medulla oblongata is composed of three columns on each side,—an *anterior*, a *middle*, and a *posterior*. Whilst the anterior and posterior columns produce the nerves of motion and sensation respectively, the middle, according to Sir Charles, gives rise to a third set of nerves—the *respiratory*. To this order belong:—

1. The accessory nerve of Willis, or *superior respiratory*.
2. The par vagum.
3. The glossopharyngeal.
4. The facial or *respiratory of the face*.
5. The phrenic.
6. A nerve which has the same origin as the phrenic;—the *external respiratory*.

When a horse has been hardridden, every one of these nerves is in action.

This division is now, however, generally abandoned, and there does not seem to be a third column, especially destined for the movements of respiration.

Sir C. Bell, again, reduced the system of nerves to two great classes. 1. Those that are *regular, primitive, symmetrical,* and common to all animals, from the worm to man, which have double roots, and preside over sensibility and motion: and, 2. The *irregular* or *superadded,* which are added to the preceding, in proportion as the organization of animals offers new or more complicated organs. To the first class belong all the spinal nerves and at least one encephalic—the 5th pair;—to the second, the rest of the nervous system.

Dr. Marshall Hall proposed a division of the nervous system, which is calculated to explain many of the anomalous circumstances so frequently witnessed. He proposed to divide all the nerves into, 1. The *cerebral* or the sentient and voluntary. 2. The *true spinal* or excito-motory. 3. The *ganglionic* or *cyclo-ganglionic,* the nutrient and secretory. If the sentient and voluntary functions be destroyed by a blow upon the head, the sphincter muscles will still contract when irritated, because the irritation is conveyed to the spine, and the reflex action takes place to the muscle so as to throw it into contraction. But if the spinal marrow be now destroyed, the sphincters remain entirely motionless, because the centre of the system is destroyed. Dr. Hall maintained that a peculiar set of nerves constitutes, with the vesicular centre of the marrow as their axis, the second subdivision of the nervous system; and as those of the first subdivision are distinguished into sentient and voluntary, these may be distinguished into the *excit'tor* and *mo'tory.* The *first,* or the *excitor nerves,* pursue their course principally from internal surfaces, characterized by peculiar excitabilities, to the centre of the medulla oblongata and m. spinalis; the *second* or the *motor nerves* pursue a reflex course from the medulla to the muscles. having peculiar actions concerned principally in ingestion and egestion. The motions connected with the first or cerebral subdivision are sometimes, indeed frequently, *sponta'neous;* those connected with the true spinal are, he believes, *always excited.* He thought, too, that there is good reason for viewing the fifth and posterior spinal nerves as constituting an external ganglionic system for the nutrition of the external organs; and he proposed to divide the *ganglionic* subdivision of the nervous system into, 1. The *internal* ganglionic, which includes that usually denominated the sympathetic, and probably filaments of the pneumogastric; and, 2. The *external* ganglionic, embracing the fifth and posterior spinal nerves. To the *cerebral* system he assigned all diseases of sensation, perception, judgment, and volition—therefore all painful, mental, and comatose, and some paralytic diseases. To the true *spinal, excitomotory, reflex,* or *diastaltic nervous system,* he referred all spasmodic and certain paralytic diseases. He properly added that these two parts of the nervous system influence each other both in health and disease, as they both influence the ganglionic system.

The main views of Dr. Hall on the excitomotory or reflex system have been generally embraced. Much, however, has still to be accomplished, notwithstanding the activity of modern observers, before the precise functions of the different nervous centres can be regarded as definitely determined.

The nerves are sheathed and are united to the neighbouring parts, by an abundant layer of fatty areolar texture, which sends inwards prolongations that separate the nervous cords and filaments from each other. The arterial trunks distributed to them transmit branches into their interior. The veins follow the same course as the arteries. Absorbents are not easily traced even on the greatest trunks.

Nerve, Accessory, of Willis, Spinal nerve—n. Articular, Axillary nerve—n. Buccinator, Buccal nerve.

Nerve Cells, see Neurine—n. of Cotunnius, Nasopalatine nerve.

Nerve, Facial, see Facial nerve—n. Femoral Cutaneous, see Genitocrural nerve—n. Femoropopliteal, lesser, Sciatic nerve, lesser.

Nerve Fi'bres, *Fi'la ner'vea, Fi'bræ ner'veæ.* In the nerves of the higher animals two forms of nerve fibre exist—the *tu'bular,* and the *gelat'inous.* In the minute fibrils or tubules, *Tu'buli ner'vei,* full of nervous matter, which constitute the former, there is a difference between the central and peripheral portion;—the former has been called the *axis cyl'inder* and *prim'itive* and *flattened band;* the latter, the *medullary* or *white substance of Schwann—nerve medul'la, med'ullary sheath* or *matter, my'elin*—being that to which the peculiarly white aspect of cerebro-spinal nerves is principally due. In the gelatinous fibre no tubular envelope can be distinguished, and the white substance of Schwann seems to be wanting. It contains numerous cell-nuclei. See Neurine.

Nervi Mol'les; 'soft nerves.' The anterior branches of the superior cervical ganglion of the great sympathetic, which accompany the carotid artery and its branches, around which they form intricate plexuses, and here and there small gan-

glia. They are called *molles* from their softness, and *subrufi* from their reddish hue.

Nervi Odoratorii, Olfactory nerves—n. Reversivi, Laryngeal inferior nerves—n. Subrufi, Nervi molles—n. Vulneratio, Neurotrosis.

NERVIMO'TION, *Nervimo'tio*, (*nerve*, and *motio*, 'motion.') A name given by M. Dutrochet, to the movement which is caused in the organs of the senses by external agents, and transmitted to the muscles by the nerves.

NERVIMO'TOR, (F.) *Nervimoteur*. An epithet given by M. Dutrochet to external agents which are capable of causing nervimotion.

NER'VINE, *Nervi'nus*, *Neurot'ic*, *Neurit'ic*, *Antineurot'ic*, *Antineuropath'ic*, (F.) *Nervin*, *Névritique*, *Névrotique*. A medicine which acts on the nervous system.

NERVOPATHIC, Neuropathic.

NER'VOSISM. The doctrine which maintains that all morbid phenomena are owing to variations in the nerve force.

NER'VOUS, *Nervo'sus*, *Neuro'des*, *Ner'veus*, *Neu'ricus*, (F.) *Nerveux*. (Same etymon,) Relating or belonging to the nerves. Strong. Also, weak, irritable.

Nervous Attack', (F.) *Attaque des nerfs*, is an affection accompanied with spasm, pain, and different nervous symptoms, to which impressible individuals are liable.

Nervous Centres, see Centres, nervous.

Nervous Diath'esis, termed *Atax'ia spirituum*, *Anoma'lia nervo'rum*, *Status nervo'sus* seu *erethit'icus*, *Diath'esis* seu *Constitu'tio nervo'sa*, *Ner'vousness*, (F.) *Névrosisme*. Medically, *nervousness* means unusual impressibility of the nervous system. Formerly, it signified strength, force, and vigour. Recently, it has been applied to a hypochondriacal condition verging upon insanity, occasionally occurring in those in whom the brain has been unduly tasked;—a condition termed by some *cerebrop'athy*; by others, *brain fag*.

Nervous Diseases, *Mor'bi Nervo'si*, (F.) *Maladies nerveuses*. Affections seated in the nervous system. To purely functional disease of the nerves Dr. Laycock has given the name *neuræ'mia*, and to the class of diseases he applies the epithet *neuræ'mic*.

Nervous Flu'id, *Nervous prin'ciple*, *Flu'idum* seu *Liq'uidum ner'veum*, *Suc'cus ner'veus*, *Spir'itus vita'lis*. The fluid which is supposed to circulate through the nerves, and which has been regarded as the agent of sensation and motion. Of this fluid we know nothing, except that it resembles, in many respects, the electric or galvanic. It was formerly called *Animal spirits*, *Spir'itus anima'les*, (F.) *Esprits animaux*.

Nervous Pain, Neuralgia.

Nervous Pow'er, *Nerve power*, *Vis nervo'sa* seu *nervo'rum*, *Neurodyna'mia*, *Neurody'namis*. The power of the nerves as exhibited in the living organism.

Nervous Principle, Nervous fluid.

Nervous Syst'em. The nerves and nervous centres considered collectively. See Nerves.

Nervous System of the Automatic Functions, Trisplanchnic nerve—n. System, ganglionic, see Trisplanchnic nerve—n. System, organic, see Trisplanchnic nerve—n. System of the senses, Medulla oblongata—n. System of voluntary motion, &c., Medulla spinalis.

NERVOUSNESS, Nervous diathesis.

NERVUS, see Nerve, Penis—n. Acusticus, Auditory nerve—n. Ambulatorius, Pneumogastric nerve—n. Anonymus, Trigemini—n. Auditorius, Auditory nerve—n. Caroticus, Carotid nerve—n. Cervicofacialis, Cervicofacial nerve—n. Communicans faciei, Facial nerve—n. Cutaneus internus, see Saphenous nerves—n. Cutaneus internus longus, see Saphenous nerves—n. Decimus, Pneumogastric—n. Ganglionicus, Trisplanchnic nerve—n. Genitocruralis, Genitocrural nerve—n. Hypoglossus, Hypoglossus.

Nervus Impar. A prolongation of the neurilemma below the lower extremity of the spinal cord, as a fibrous filament, which is inserted into the base of the coccyx. It was formerly regarded as a nerve, hence its name.

Nervus Incisivus, Incisive nerve—n. Innominatus, Trigemini—n. Ischiadicus, Sciatic nerve—n. Juvenilis, Penis—n. Latus, Achillis tendo—n. Lingualis lateralis, Pharyngoglossal nerve—n. Lingualis medius, Hypoglossal nerve—n. Loquens, Hypoglossus—n. Lumboinguinalis, Genitocrural nerve—n. Mixtus, Trigemini—n. Musculi pterygoidei, Pterygoid nerve—n. Nasociliaris, Nasal nerve—n. Opticus, Optic nerve—n. Pneumogastricus, Pneumogastric—n. Pudendus externus, see Genitocrural nerve—n. Quintus, Trigemini—n. Spermaticus, see Genitocrural nerve—n. Subcutaneus malæ, Orbitar nerve—n. Sympathicus magnus, Trisplanchnic nerve—n. Sympathicus medius, Trigemini, Pneumogastric nerve—n. Sympathicus minor, Facial nerve—n. Sympathicus, Trisplanchnic nerve—n. Sympathicus medius, Trigemini—n. Temporofacialis, Temporofacial nerve—n. Timidus, Motor oculi externus—n. Tremellus, Trigemini—n. Trisplanchnicus, Trisplanchnic nerve—n. Trochlearis, Pathetic nervus—n. Vagus, Pneumogastric nerve—n. Vagus cum accessorio, Spinal nerve—n. Vasomotorius, Trisplanchnic nerve.

NES, Nasus.

NESPITE, Melissa calamintha.

NESTIA, (*νηστεια*,) Fasting.

NESTIATRIA, (from *nestia*, and *ιατρεια*, 'medical treatment.') Limotherapeia.

NESTIS, (*νηστις*, 'a faster.') Jejunum.

NESTITHERAPEIA, Limotherapeia.

NESTOTHERAPEIA, Limotherapeia.

NESTROOT, Monotropa uniflora.

NETLEAF, Goodyera pubescens.

NETTING, Urine.

NETTLE, ARCHANGEL, WHITE, (Sax. *netel*,) Lamium album—n. Day, Lamium album—n. Dead, Lamium album, L. amplexicaule—n. Dwarf, Urtica urens—n. Hedge, Galeopsis—n. Horse, Solanum Carolinense—n. Pillbearing, Urticaria pilulifera.

Nettle Rash, Urticaria—n. Springe, Urticaria.

Nettle, Stinging, Common, Urtica.

Nettle Tree, Celtis occidentalis.

NETWORT, Goodyera pubescens.

NEURADYNAMIA, (*neuron*, *a*, and *δυναμις*, 'power.') Neurasthenia.

NEURÆMIA, (*νευρον*, 'a nerve,' and *αιμα*, 'blood.') See Nervous diseases.

NEURÆMIC, see Nervous diseases.

NEU'RAL, (from *neuron*.) Relating to a nerve or to the nervous system or centres.

Neural Arch. The arch formed by the posterior projections connected with the body of the vertebra, which protect the medulla.

Neural Axis, see Encephalon—n. Spines, Spinous processes.

NEURAL'GIA, (*neuron*, and *αλγος*, 'pain.') *Rheumatis'mus spu'rius nervo'sus*, *Neurodyn'ia*, *Nervous pain* or *pang*, (F.) *Névralgie*, *Névrodynie*. A generic name for a number of diseases, the chief symptom of which is a very acute pain, exacerbating or intermitting, which follows the course of a nervous branch, extends to its ramifications, and seems, therefore, to be seated in the nerve. The principal neuralgiæ have been distinguished by the names *facial* (of which the *infraorbitar*, *maxillary*, and *frontal* are but divisions)—the *ilioscrotal*, *femoropopliteal*, *femoropretibial*, *plantar*, and *cubitodigital*. A division of *anomalous* neuralgiæ has likewise been admitted.

All varieties of neuralgia are obstinate, and the greatest diversity of means has been made use of:—bleeding, general and local,—emetics, purgatives, rubefacients, vesicants, actual cautery, narcotics, mercurial frictions, electricity, destruction of a portion of the nerve, &c. The most successful remedy, perhaps, is the carbonate of iron, given in doses of some magnitude; as, for instance, ℥ss or ℈ij twice or thrice a day, in molasses. This plan of treatment, continued for a month or two, will often relieve, and ultimately remove this much dreaded affection. The mode in which it acts is by no means clear; but it is almost as certain as any other remedy used in disease in producing its salutary effects. The bowels must be kept free, and all inflammatory symptoms removed during its administration.

Neuralgia Anom'alous. Under this name Chaussier has included different neuroses, some of which are characterized by acute pains circumscribed within a short compass, or extending by irradiations, but not having their seat in the course of a nerve; and others which are occasioned by tumours in the course of a nerve, or which succeed contusions or incomplete divisions of nerves.

Neuralgia Brachialis, Brachialgia—n. Brachiothoracica, Angina pectoris—n. Cerebralis, Hemicrania—n. Cœliaca, Neuralgia of the solar plexus (Romberg)—n. Cruralis, N. femorotibialis.

Neuralgia Cu'bitodigita'lis, *Is'chias nervo'sa digita'lis.* In this variety the pain extends from the part where the nerve passes under the inner condyle to the back of the hand and to its cubital edge.

Neuralgia Dentalis, Odontalgia nervosa.

Neuralgia, Fa'cial, *Neuralgia fa'cici, Tris'mus maxilla'ris* seu *Dolorif'icus* seu *Clon'icus, Opsial'gia, Do'lor cru'cians fa'ciei* seu *faciei period'icus, Hemicra'nia idiopath'ica, Autal'gia doloro'sa, Tic douloureux, Do'lor fa'cici* seu *faciei typ'ico characte'rē* seu *faciei Fotheryill'i, Rheumatis'mus cancro'sus, Rhematis'mus larva'tus, Prosopal'gia, Prosopodyn'ia, Fe'bris top'ica, Ophthalmodyn'ia period'ica, Tortu'ra O'ris, Affec'tus spasmodicoconvulsi'vus Labio'rum, Face ague,* is characterized by acute lancinating pains, returning at intervals; and by twinges in certain parts of the face, producing convulsive twitches in the corresponding muscles. It may be seated in the frontal nerve, in the infraorbitar, or in the maxillary branch of the fifth pair.

Metopodyn'ia, Brow ague, Neural'gia fronta'lis, Ophthalmodyn'ia, Tic douloureux, Do'lor period'icus, &c., commences at the superciliary foramen and extends along the ramifications of the frontal nerve that are distributed on the forehead, upper eyelid, caruncula lacrymalis, and nasal angle of the eyelids. Sometimes it is felt particularly in the orbit.

Neuralgia infraörbita'ria, Do'lor fa'ciei a'trox, Rheumatis'mus cancro'sus, Tris'mus clon'icus, Prosopal'gia, Fe'bris top'ica, Odontal'gia remit'tens et intermit'tens, Hemicra'nia se'va, Infraörbitor neuralgia, Tic douloureux, is chiefly felt in the infraörbitar foramen, whence it passes to the cheek, upper lip, ala nasi, lower eyelid, &c.

In *Neuralgia maxilla'ris, Gnathal'gia, Gnathoneural'gia, Tic douloureux, Tris'mus catarrha'lis maxilla'ris,* the pain usually sets out from the mental foramen and passes to the chin, lips, temple, teeth, and tongue.

Neuralgia, False. A term assigned to pains along a nerve or its ramifications, produced by some body compressing it,—those pains terminating with the removal of the compressing cause.

Neuralgia Fem'oro-poplitæ'a, *N. Ischiad'ica, Sciat'ica, Schi'as, Ma'lum ischiad'icum, Mor'bus ischiad'icus, Pas'sio ischiad'ica, Ischi'agra, Ischial'gia, Is'chias, Ischio'sis, Ischioneural'gia, Coxal'gia, Do'lor Ischiad'icus nervo'sus, Is'chias, I. nervo'sa Cotug'nii* seu *Cotunnii, Malum Cotunnii, I. nervo'sa posti'ca* seu *rheumat'ica, Neurisch'ias, Cox'agra, Ischiat'ica,* (Prov. Devonshire) *Bone-shave,* (F.) *Sciatique, Goutte sciatique.* This is characterized by pain following the great sciatic nerve from the ischiatic notch to the ham, and along the peroneal surface of the leg to the sole of the foot. It is often considered to be a form of rheumatism—*rheumatism of the hip.*

Neuralgia Fem'oroprætibia'lis, *N. cru'ral, Is'chias nervo'sa anti'ca, Sciat'ica anti'ca.* In this the pain, setting out from the groin, spreads along the fore part of the thigh, and passes down, chiefly on the inner side of the leg, to the inner ankle and back of the foot.

Neuralgia Frontalis, see N. Facial—n. of the Heart, Angina pectoris.

Neuralgia Hepatica, Hepatalgia.

Neuralgia Iliosro'tal has been rarely observed. It is characterized by a very acute pain in the course of the branches of the first lumbar pair; this pain follows the crista ilii and accompanies the spermatic vessels to the testicle, which is often painfully retracted.

Neuralgia, Infraorbitar, see N. Facial—n. Ischiadica, N. Femoropopliteal—n. Lead, see Lead rheumatism—n. Lienis, Splenalgia.

Neural'gia Mam'mæ, *Ir'ritable breast.* An exceedingly painful affection of the female mamma, unaccompanied by inflammation.

Neuralgia Maxillaris, see N. Facial

Neuralgia Planta'ris. This is rare; and the pain is confined to the course of the plantar nerves.

Neuralgia Renum, Nephralgia—n. Spinalis, Spinal irritation—n. Testis, Orchidalgia.

NEURANAGENNE'SIS, *Neuranaph'ysis,* (*neuron,* and *ἀναγεννάω,* 'to regenerate.') Regeneration or renewal of a nerve.

NEURANAPHYSIS, (*neuron, ana,* 'again,' and *φυω,* 'to grow.') Neuranagennesis.

NEURAPOPHYSIS, see Vertebræ.

NEURASTHENI'A, *Neuradyna'mia, Debil'itas nervo'sa.* Debility or impaired activity of the nerves, (*neuron,* and *ἀσθενεια,* 'debility.') See Irritable.

NEURECTOM'IA, (*neuron,* and *ἐκτομη,* 'excision.') Excision of a nerve.

NEURICUS, (from *neuron,*) Nervous.

NEURILEM'MA, gen. *Neurilemm'atis, Neurile'ma, Neurily'ma, Neu'rymen, Perineu'rion, Fis'tula* seu *Tu'bulus* seu *Cop'sula* seu *Involu'crum nervo'rum, Membra'na* seu *Membran'ula* seu *Tu'nica* seu *Indumen'tum nervo'rum, Vagi'na nervo'rum,* (F.) *Névrilème, Périnèvre,* (*neuron, and λεμμα,* 'a coat.') The fine transparent, and apparently fibrous membrane that surrounds the nerves, to every filament of which it forms a true canal.

Robin restricts the term *périnèvre* to the structure that invests the primitive bundles of nerves; and every nervous filament. It differs from the neurilemma in its ordinary acceptation, which forms a coat of some thickness in the larger nerves, and supports the nutrient vessels, whilst the *périnèvre* exhibits no capillaries.

NEURILEMMATITIS, Neurilemmitis.

NEURILEMMI'TIS, *Neurilemmati'tis, Neurolemmati'tis, Neurymeni'tis, Neurilymi'tis,* (F.) *Névrilémite,* (*neurilemma,* and *itis.*) Inflammation of the neurilemma.

NEURIL'ITY, *Neuril'itas,* (from *neuron.*) The property, possessed by nerve-fibre, of exciting contraction in a muscle, secretion in a gland, and sensation in a ganglionic centre.

NEURILYMA, (*neuron,* and *ειλυμα,* 'a covering,') Neurilemma.

NEU'RINE, (from *neuron,*) *Medul'la nervo'rum,* (F.) *Névrine, Albumine cérébrale* ou *du cerveau.* The substance of which the nervous system is composed. It consists chiefly of albumen and a peculiar fatty matter, associated with phosphorus. There are two kinds of neurine—the one *vesicular* or consisting essentially of *nerve vesicles* or *nerve cells* or *corpuscles,* or, as they are sometimes called, from their prevailing in the ganglia—*ganglion corpuscles* and *ganglion globules;* the other, the *tubular,* formed—as the word imports—of *tubules.* The former is the *cineritious* or *cortical* nervous matter of the older anatomists;—the latter, the *white* or *medullary.* The *vesicular* neurine has appeared to be restricted to the production and distribution of nervepower; the *tubular,* to its conduction; yet the experiments of Dr. Brown-Séquard show, that the former conveys sensitive impressions from the posterior spinal roots to the brain. Most of the nerve cells are furnished with one process, hence termed *unip'olar;* others have two processes—the *bi'polar;* whilst others are devoid of processes—the *a'polar.*

NEURISCHIAS, Neuralgia femoropoplitæa.

NEURITIC, Nervine.

NEURI'TIS, *Inflamma'tio nervo'rum, Neurophlogo'sis, Neurophleg'monē,* (F.) *Inflammation des Nerf, Névrite,* (*neuron* and *itis,*) Inflammation of a nerve.

NEUROBLACI'A, (*neuron,* and *βλακεια,* 'stupor.') Insensibility of the nerves.

NEUROCHONDRO'DES, (*neuron, χονδρος,* 'a cartilage,' and *odes,*') A hard substance between a sinew and a cartilage.

NEURODES, (*νευρωδης,* from *neuron* and *odes,*) Nervous.

NEURODYNAMIA, (*neuron,* and *δυναμις,* 'power,') Nervous power.

NEURODYNAMIS, Nervous power.

NEURODYNIA, (*neuron,* and *οδυνη,* 'pain,') Neuralgia.

NEUROGAMIA, (*neuron,* and *γαμος,* 'marriage,') Magnetism, animal.

NEURO'GLIA, (*neuron,* and *γλια,* 'glue.') A form of connective tissue, which binds the nervous elements together. (Virchow.)

NEUROG'RAPHY, *Neurograph'ia,* (F.) *Névrographie,* (*neuron,* and *γραφη,* 'a description.') The part of anatomy which describes the nerves.

NEUROHYPNOL'OGY, *Neurohypnolog''ia,* (*neuron, υπνος,* 'sleep,' and *λογος,* 'a treatise.') A name given by Mr. Braid to his theory of magnetic sleep. See Magnetism, animal.

NEUROHYPNOTISM, see Magnetism, animal.

NEUROLEMMATITIS, Neurilemmitis.

NEUROL'OGY, *Neurolog''ia,* (F.) *Névrologie,* (*neuron,* and *λογος,* 'a discourse.') The part of anatomy which treats of the nerves.

NEURO'MA, gen. *Neuro'matis,* (F.) *Névrôme,* (from *neuron.*) A morbid enlargement of a nerve. Applied to subcutaneous, circumscribed, and highly painful tumours formed on the tissue of the nerves; and likewise to a small, hard, grayish tumour, *Neuroma'tion, Nervous ganglion, painful tu'bercle,* of the size of a pea, which is observed in the course of nerves, and appears to be formed from the neurilemma.

NEUROMALA'CIA, (*neuron,* and *μαλακια,* 'softening.') Softening of nerves.

NEUROMATION, Neuroma.

NEUR'OMATOID, *Neuromatoï'des,* (*neuroma,* and *ειδος,* 'resemblance.') Resembling neuroma; as a '*neuromatoid* tumor.'

NEUROMETRÆ, (*νευρομητραι,*) Psoæ.

NEUROMYELI'TIS, (*neuron, μυελος,* 'marrow,' and *itis.*) Inflammation of the medullary matter of the nerves.

NEURON, (*νευρον,*) see Nerve.

NEURON'OSOS, *Neuronu'sos,* (*neuron,* and *νοσος,* 'a disease.') A disease of the nerves.

NEURONYG'MĒ, *Neuronyg'mus, Neuronyx'is,* (*neuron,* and *νυγμη,* 'puncture;') *Punc'tio ner'vi.* Puncture of a nerve.

NEUROPATH'IC, *Neuropath'icus, Nervopath'ic,* (F.) *Névropathique,* (*neuron,* and *παθος,* 'affection.') Belonging to disease of the nerves, *Neuropathi'a, Neuron'osus, Neurop'athy,* (F.) *Névropathie*: see Neuroses.

NEUROPHLEGMONE, (*neuron,* and *φλεγμονη,* 'inflammation,') Neuritis.

NEUROPHLOGOSIS, (*neuron,* and *φλογωσις,* 'inflammation,') Neuritis.

NEUROPLAS'TY, *Neuroplas'tice,* (F.) *Névroplastie,* (*neuron,* and *πλαστικος,* 'forming.') M. Serres applies this term to a ganglionary alteration of the peripheral nerves.

NEUROPYRA, (*neuron,* and *πυρ,* 'fire, fever,') Fever, nervous, Typhus mitior.

NEUROPYRETUS, Fever, nervous, Typhus mitior.

NEURO'SES, (F.) *Névroses,* (*neuron,* and *osis.*) A generic name for diseases supposed to have their seat in the nervous system, and which are indicated by disordered sensation, volition, or mental manifestation; without any evident lesion in the structure of the parts, and without any material agent producing them. Such is the usual definition. Broussais attributes them to a state of irritation of the brain and spinal marrow.

NEUROSKELETON, see Skeleton.

NEUROSPASMI, see Spasm.

NEUROSTHENI'A, (F.) *Névrosthénie,* (*neuron,* and *σθενεια,* 'strength.') Excess of nervous irritation. Nervous irritation.

NEUROTHE'LĒ, (F.) *Névrothèle,* (*neuron,* and *θηλη,* 'a nipple.') A nervous papilla.

NEUROTHELIC APPARATUS, Corpus papillare.

NEUROTIC, Nervine, see Neurotica.

NEUROT'ICA. Diseases of the nervous function. The 4th class of Good's Nosology. *Neurotics,* in the classification of Dr. Taylor, are poisons, which belong to the narcotic and narcotico-acrid classes of Orfila. They are divided by him into the *Cerebral,* as morphia; the *Spinal,* as strychnia; and the *Cerebrospinal,* as conia and aconitia.

NEUROTOME, *Névrotome.*

NEUROT'OMY, *Neurotom'ia,* (*neuron,* and *τομη,* 'incision,') (F.) *Névrotomie.* Dissection of nerves. Also, an incised wound and section of a nerve.

NEUROTRO'SIS, *Neurotros'mus,* (*neuron,* and *τρωσις,* 'wounding.') *Nervi vulnera'tio.* Wound or wounding of a nerve.

NEUROTROSMUS, Neurotrosis.

NEURYMEN, (*neuron,* and *'υμην,* 'a membrane,') Neurilemma.

NEURYMENITIS, Neurilemmitis.

NEUTA, Neutha. A membrane, according to Paracelsus, which covers the eyes and ears of the fœtus in utero.

NEU'TRAL, (*neuter,* 'neither.') Belonging to neither in particular.

NEUTRAL SALTS, *Sec'ondary salts,* (F.) *Sels neutres.* Salts, composed of two primitive saline substances, combined together, and not possessing the characters of acid or of base.

NÉVIS, MIN'ERAL WA'TERS OF. Thermal springs in the department of Allier, France. Temperature, 136° to 148° Fahrenheit.

NÉVRAGMIE (F.), (*névro,* and *αγμος,* 'fracture.') The bruising or section of a nervous cord.

NÉVRALGIE, Neuralgia—*n. du Foie,* Hepatalgia—*n. des Reins,* Nephralgia—*n. de l'Utérus,* Hysteralgia.

NÉVRILÈME, Neurilemma.

NÉVRILÉMITE, Neurilemmitis.

NÉVRINE, Neurine.

NÉVRITE, Neuritis.

NÉVRITIQUE, Nervine.

NÉVRO (F.), (from *neuron*,) in composition, 'nerve.'

NÉVRODYNIE, Neuralgia.

NÉVROGRAPHIE, Neurography.

NÉVROLOGIE, Neurology.

NÉVRÔME, Neuroma.

NÉVROPATHIE, Neuropathy.

NÉVROPATHIQUE, Neuropathic.

NÉVROPLASTIE, Neuroplasty.

NÉVROSE DU CŒUR, Angina pectoris—*n. Utérine*, Hysteria.

NÉVROSES, Neuroses.

NÉVROSISME, Nervousness.

NÉVROSTHÉNIE, Neurosthenia.

NÉVROTHÈLE, Neurothele.

Appareil Névrothèle. The papillary apparatus, or arrangement of the skin in the aggregate.

NÉVROTIQUE, Nervine.

NÉVROTOME, Neurotome, Neurot'omus; (from *nevro*, and τεμνω, 'I cut,' 'I dissect.') An instrument used by anatomists to dissect the nerves. It is a long and very narrow scalpel, having two edges.

NÉVROTOMIE, Neurotomy.

NEVUS, Nævus.

NEW JERSEY, MIN'ERAL WA'TERS OF. In the upper part of Morris county and in the county of Hunterdon, near the top of Musconetcong mountain, there are chalybeate springs, which are resorted to. See Schooley's Mountain.

NEW YORK, MIN'ERAL WA'TERS OF. The chief waters are those of Saratoga, Ballston, Sharon, and Avon, which see. A spring at Catskill contains sulphates of magnesia, soda, and lime; carbonates of lime, magnesia, and iron, and chlorides of sodium, calcium and magnesium. The Stockport and Columbia springs contain sulphates of magnesia, lime, and soda; chlorides of magnesium and calcium; carbonates of magnesia and lime; organic matter and carbonic acid.

NEXUS STAMINEUS OCULI, ('stamineous connection of the eye,') Ciliary body.

NEZ, Nasus.

NGERENGERE. A singular disease, with the New Zealanders, which Dr. Arthur S. Thomson considers to be a variety of such diseases as the Elephantiasis Græcorum, Lepra of the Cossacks, &c., and which he proposes to call *Lepra gangræno'sa*.

NICANDRA ANOMALA, (after Nicander, a physician of Colophon,) Anisodus luridus.

NICARAGUA WOOD, see Cæsalpinia.

NIC'COLI SALES, *Salts of Nick'el*, (F.) *Sels de Nickel*. These salts are gentle tonics, and have been given with advantage in periodic headache, and in chlorosis and amenorrhœa. The dose of the sulphate is gr. ss or gr. j, three times a day.

NICCOLUM, Nickel.

NICE, CLI'MATE OF. The climate of Nice possesses some advantages over the neighbouring climates of Provence and Italy, being free from the sirocco of the latter, and protected from the mistral of the former. Spring is the most unfavourable season. The climate is very dry. It has been a great winter retreat for the consumptive: but does not deserve the encomiums that have been passed upon it.

NICHE, see Lingula.

NICKAR TREE, Gymnocladus Canadensis.

NICK'EL, *Nic'colum*, (from [G.] Nickel, 'a prostitute.') A term of detraction, applied by the old German writers to what was regarded as a kind of false copper ore.) A white malleable metal, s. g. 8·8; less oxidizable than iron. The sulphate has been given as a tonic in the dose of half a grain to a grain.

Nickel, Salts of, Niccoli sales.

NICODE'MI O'LEUM, *Oil of Nicode'mus*. An oil made by digesting, for some time,—in a mixture of white wine and olive oil,—old turpentine, litharge, aloes, saffron, oxyd of zinc, &c.

NICOTIANA, (after Jean Nicot, who first introduced it into Europe about 1560,) N. tabacum —n. Minor, N. rustica.

Nicotia'na Rus'tica, *N. mi'nor, Priapei'a, Hyoscy'amus lu'teus, Eng'lish* or *Wild Tobac'co. Ord.* Solanaceæ. The leaves possess the properties of tobacco, but are milder.

Nicotiana Taba'cum or Tab'acum, *Nicotia'na, Her'ba taba'ci, Taba'cum, Pe'tum, Pe'tun, Hyoscy'amus Peruvia'nus, Tobac'co, Virgin'ia tobacco, Drunk'wort*, (F.) *Tabac, Nicotiane*. Tobacco is a violent acronarcotic; its properties seeming to depend upon a peculiar principle, *Ni'cotin* or *Nico'tianin*. It is narcotic, sedative, diuretic, emetic, cathartic, and errhine. In incarcerated hernia, it is injected, in the form of smoke or infusion, but requires great caution. It is extensively and habitually used as an errhine and sialogogue. The infusion is used to kill vermin, and in some cutaneous eruptions.

NICOTIANE, Nicotiana tabacum.

NICOTIANIN, see Nicotiana tabacum.

NICOTIN, see Nicotiana tabacum.

NICTATIO, Hippus, Nictation.

NICTA'TION, *Nicta'tio, Nictita'tio*. (*nictare, nictatum*, 'to wink,') 'winking.' *Clo'nus nictita'tio, Blepharism'us, Palpebra'tio, Twink'ling of the eye*, (F.) *Clignotement, Cillement*. A rapid and repeated movement of the eyelids, which open and shut alternately. As occasionally performed, it is physiological; if repeatedly, a disease. It seems to be executed chiefly by the motor 7th pair of nerves; but it is necessary that the excitor 5th pair should likewise be in a state of integrity.

NIDAMENTUM, (*nidus*, 'a nest,') Decidua.

NIDDICK, Nucha.

NIDOREUX, Nidorous.

NI'DOROUS, *Nidoro'sus*, (F.) *Nidoreux*, from *Ni'dor, Cnis'sa*, 'the smell of any thing burnt,' &c. Having the smell of burnt or corrupt animal matter.

NIDUS, ('a nest,') Nidus hirundinis.

Ni'dus Hirun'dinis, *Ni'dus, Swal'lows' Nest*. A deep fossa in the cerebellum—so called from its fancied resemblance—situate between the velum medullare posterius in front, and the nodulus and uvula behind.

NIEDERBRONN, MIN'ERAL WA'TERS OF. Saline waters in the department of Bas-Rhin, France, which contain chloride of sodium, sulphate of magnesia, and carbonic acid.

NIELLE, Nigella.

NIEPA BARK, see Samadera Indica.

NIGELLA, Coptis.

Nigel'la, *N. Sati'va*; *Ord.* Ranunculaceæ; (*nigrella*, (from *niger*, 'black,') in allusion to the seed.') *Melan'thium, Cumi'num Ni'grum, Fen'nel flower, Nut'meg flow'er, Dev'il in a bush*, (F.) *Nigelle, Nielle, Faux cumin, Fleur Sainte-Catherine*. This small southern European and Syrian plant was formerly used medicinally as an expectorant and deobstruent, errhine, sialogogue, &c.

NIGELLE, Nigella.

NIGHTBLINDNESS, Hemeralopia.

NIGHT EYES, Crusta genu equinæ—n. Mare, Incubus.

NIGHTSHADE, AMERICAN, Phytolacca decandra—n. Bittersweet, Solanum dulcamara—n. Common, Solanum—n. Deadly, Atropa belladonna — n. Enchanter's, Circæa Lutetiana — n. Garden, Solanum—n. Palestine, Solanum sanctum —n. Red, Phytolacca decandra—n. Stinking, Hyoscyamus niger—n. Vine, Solanum dulcamara—n. Woody, Solanum dulcamara.

NIGREDO À SOLE, ('blackness from the sun,') Ephelides.

NIGRITA, Negro.

NIGRITIES, ('blackness,') Melanopathia — n. Ossium, Caries.

NIGRITISM, Melanopathia.

NIGRITUDO, gen. *Nigritu'dinis*, ('blackness,') Melanosis — n. Pulmonum, Melanosis pulmonum.

NIGROMANTIA, (*niger*, 'black,' and *μαντεια*, 'divination,') Necromancy.

NIGROR, ('blackness,') Melasma.

NIGRUM OCULI, ('black of the eye,') Pupil.

NIHIL ALBUM, Zinci oxydum—n. Griseum, Zinci oxydum.

NILIACUM, (from Nilus, 'the Nile,') Mel.

NIMA QUASSIOÏ'DES, *Simar'ba quassioïdes*, a native of Nepal and the Himalaya mountains, is as bitter as quassia, and is used like it.

NINDSIN, Sium ninsi.

NINE BARK, Spiræa opulifolia.

NINEDAY FITS, Trismus nascentium.

NINSI, Sium ninsi.

NINSING, Panax quinquefolium.

NINZIN, Sium ninsi.

NIPHABLEPSIA, (*νιφα*, 'snow,' and *ablepsia*, 'blindness,') Snowblindness.

NIP'PLE, (Sax. *nȳpele.*) The *Teat, Tit, Te e, Dug, Pap*, (Old Eng.) *Neble, Tit'ty; Acromas'tium, U'ber, Staph'ylis, Staphyl'ium, Bubo'na, Mammill'la, Mammel'la, Papil'la, P. mam'mæ, U'beris a'pex, The'le, Tit'thē, Tit'thos, Tit'thion, Tit'this*, (F.) *Mamelon, Bout de sein.* The conical tubercle, situate at the centre of the breast. Towards the central part of each breast the skin changes colour, and assumes a rosy tint in young females, or a reddish brown in those who have suckled several children. The circle is called the *Are'ola* or *Aure'ola of the nip'ple.* The nipple is capable of erection on being excited.

NIPPLE, ARTIFICIAL, *Bout de Sein.*

NIPPLEWORT, Lapsana.

NIRLES, Herpes pblyctænodes.

NIRMALLEES, Strychnos potatorum.

NIRMILLIES, Strychnos potatorum.

NI'SUS, *Nix'us, Pei'ra, Strain'ing*, (*nitor, nisus*, and *nixus*, 'to endeavour.') A voluntary retention of the breath, so as to force down the diaphragm; the abdominal muscles being at the same time contracted forcibly. In this manner the contents of the abdomen are compressed; and the evacuation of the fæces, urine, &c., is effected.

NISUS, Effort—n. Formativus, Plastic force.

NISUS PARTURIEN'TIUM. The efforts or forcing during parturition.

NITEDULA, (*niteo*, 'to shine,') Cicindela.

NITON, MIN'ERAL WA'TERS OF. These springs in the Isle of Wight contain iron, and sulphate of alumina and potassa.

NITRAS, gen. *Nitra'tis*, (from *nitre*,) Nitrate — n. Hydrargyricus, see Hydrargyri nitras — n. Hydrargyrosus, Hydrargyri nitras — n. Kalicus, Potassæ nitras — n. Lixiviæ, Potassæ nitras — n. Natricum, Soda, nitrate of—n. Plumbicus, Plumbi nitras — n. Potassæ cum sulphure fusus, Potassæ nitras fusus sulphatis paucillo mixtus — n. Subbismuthicum, Bismuth, sub-nitrate of.

NI'TRATE, *Ni'tras, Azo'tas, A'zotate.* A salt, formed of a base and nitric acid. Several nitrates are employed in medicine.

NITRATE ACIDE DE MERCURE, see Hydrargyri nitras — *n. d'Ammoniaque*, Ammoniæ nitras—*n. d'Argent*, Argenti nitras—*n. Mercureux*, Hydrargyri nitras.

NITRE, Potassæ nitras — n. Cubic, Soda, nitrate of.

NI'TRIC, *Ni'tricus*, (F.) *Nitrique*, (from *nitrum*, 'nitre.') Appertaining or relating to nitre.

NITRIC AC''ID, *Ac''idum ni'tricum* seu *azo'ticum* seu *sep'ticum* seu *ni'tri, A'qua for'tis, Ni'trous ac''id, Spir'itus ni'tri du'plex* seu *nitri fu'mans* seu *nitri Glauberi* seu *nitri ac''idus, Azot'ic acid, Dephlogis'ticated nitrous acid, Oxysepton'ic acid*, (F.) *Acide nitrique* ou *azotique.* Nitric acid is obtained from nitre—*Ni'trate of potas'sa.* Its odour is suffocating; taste very acid and caustic. It is corrosive, liquid, colourless, and transparent. S. g. 1.42. Ph. U. S.

Strong nitric acid is rarely used except as an application to foul, indolent ulcers, or to warts. When given internally, it is in the form of the ACIDUM NI'TRICUM DILU'TUM, *Spir'itus nitri simplex* seu *nitri vulga'ris — Dilu'ted nitric acid*, which, in the Pharmacopœia of the United States, (1863,) consists of *nitric acid*, three Troy ounces, *water*, a pint. Diluted largely with water, it is used, as a drink, in fevers of the typhoid kind; in chronic affections of the liver, syphilis, &c.; but in the latter affections, it is not to be depended upon.

NITROGEN, (*nitre*, and *γενναω*, 'I generate.') Azote.

NITROGEN, GAS'EOUS OX'IDE OF, *Ni'trous ox'ide, Protox'ide of nitrogen* or *of a'zote, Par'adise, Intox'icating* or *Laughing gas, Dephlogis'ticated nitrous gas, Gas azo'ticum oxygenatum.* This gas, when respired, produces singular effects; great mental and corporeal excitement; and, generally, so much exhilaration as to render the appellation, "*laughing gas*" by no means inappropriate. It has not been much used in medicine, although recommended in paralysis. Its effects are too violent and too transient to render it a valuable remedial agent; and, in the delicate, it has been productive of unpleasant effects, inducing palpitation, fainting, and convulsions.

NITROGEN, PROTOXIDE OF, Nitrogen, gaseous oxide o..

NITROGÈNE, Azote.

NITROGENIUM, Azote.

NI'TROGENIZED, *A'zoted, A'zotized.* (F.) *Azoté.* Containing nitrogen or azote; — as a *nitrogenized, azoted*, or *azotized* aliment, animal food, for example, — in contradistinction to the *nonnitrogenized, nonazoted*, or *nonazotized*, (F.) *Nonazotés, anazotiques*, or those that do not contain nitrogen; — saccharine and oleaginous aliments, for example.

NITROGLYCERIN, Glonoin.

NITROMURIAT'IC AC''ID, *Ac''idum nitromuriat'icum* seu *muriaticum nitro'soöxygena'tum, Mens'truum au'ri, Nitrohydrochlor'ic* or *Hydrochloroni'tric acid, Aqua re'gia* seu *styg''ia* seu *re'gis, Chrysalea*, (F.) *Eau régale.* A mixture of the nitric and muriatic acids has been used in diseases of the liver, in the form of a bath for the feet and legs, made sharply acidulous. It has, also, been employed, and with more uniform results, in cutaneous affections. Whatever advantages it may possess in internal diseases — and these advantages are doubtful—they are probably dependent upon the chlorine formed by the mixture, or upon the properties possessed by the mineral acids in general. See Chlorine.

The *Acidum nitromuriaticum* of the Pharmacopœia of the United States (1863) is formed by mixing three Troy ounces of *nitric acid* with five of muriatic acid.

Acidum Nitromuriaticum dilu'tum, Dilu'ted Ni-

tromuriatic Acid is made of *nitric acid*, a Troy ounce and a half; *muriatic acid*, ℥iiss; *Distilled water*, Oj.

NITROUS OXIDE, Nitrogen, gaseous oxide of.

NITRUM, (*νιτρον,*) Natron, Potassæ nitras—n. Antiquorum, Soda—n. Cubicum, Soda, nitrate of—n. Factitium, Borax—n. Flammans, Ammoniæ nitras—n. Lunare, Argenti nitras—n. Prismaticum, Potassæ nitras—n. Rhomboidale, Soda, nitrate of—n. Saturninum, Plumbi nitras—n. Tabulatum, Potassæ nitras fusus sulphatis paucillo mixtus—n. Vitriolatum, Potassæ sulphas—n. Vitriolatum Schroederi, Potassæ sulphas.

NIX, gen. *Nivis*, Snow—n. Fumans, Calx viva—n. Zinci, Zinci oxydum.

NIXUS, Nisus—n. Parturientium, Nisus parturientium.

NOAH'S ARK, Cypripedium luteum.

NO'BLE, *No'bilis.* Principal, Essential.

NO'BLE PARTS, *Par'tes no'biles* seu *essentia'les.* Some anatomists have given this name to parts, without which life cannot exist; such as the heart, liver, lungs, brain, &c. The organs of generation have, likewise, been so called.

NO'CAR, (*νωκαρ,*) *Tor'por Soporif'icus.* Lethargic torpor.

NOCTAMBULATIO, (*nox, noctis*, 'night,' and *ambulare, ambulatum*, 'to walk,') Somnambulism.

NOCTAMBULISMUS, Somnambulism.

NOCTAMBULUS, Somnambulist.

NOCTISURGIUM, (*nox, noctis*, 'night,' and *surgere*, 'to arise,') Somnambulism.

NOCTUI'NI OC'ULI, ('owl's eyes,' from *noctua*, 'an owl.') Gray or blue eyes.

NOCTURNA' BELLA, ('nocturnal wars,') Coitus.

NOCTUR'NAL, *Noctur'nus, Nycter'inus*, (from *nox*, gen. *noctis*, 'night.') Relating to night, as *Febris noctur'na* seu *nycter'ina.* A fever occurring in the night.

NODDING, Annuitio, Nutatio.

NODDLEPOX, Syphilomania.

NODE, *No'dus, Emphy'ma exosto'sis perios'tea*, (F.) *Nodosité. Nœud.* A hard concretion or incrustation, which forms around joints attacked with rheumatism or gout. Some include, under this name, exostoses, articular calculi, ganglions, and even the chronic swellings of the joints known under the name of white swellings.

NODES, (*νωδης*, from *νη*, priv. and *οδους*, 'a tooth,') Edentulus.

NODI DIGITORUM MANUS, Phalanges of the fingers—n. Hæmorrhoidales, see Hæmorrhois—n. Lactea, Infarctus mammæ lacteus—n. Nervorum, Ganglions, nervous.

NODOI, (*νωδοι*, sing. *νωδος*, trom *νη*, priv. and *οδους*, 'a tooth,') Nefrendes.

NODO'SIS, (from *nodus*, and *osis.*) The formation or existence of nodes.

NODOSITÉ, Node.

NOD'ULI ARAN'TII, (pl. of *nodulus,*) *Noduli Morgagn'ii, Cor'pora Aran'tii.* The small sesamoid bodies situate on the periphery of the semilunar valves of the aorta and pulmonary artery for the better occlusion of the artery.

NODULI MORGAGNII, Noduli Arantii—n. Nervorum, Ganglions, nervous.

NOD'ULUS, (dim. of *nodus*, 'a knot.') A small knot. A small prominence or lobule in the portion of the cerebellum, which forms the posterior boundary of the fourth ventricle. The nodulus is on the median line, and before the uvula. See Vermiform process, inferior.

NODULUS UTERINUS, Pessary.

NO'DUM RELIGA'RE. ('to fasten a knot or tie,') (F.) *Nouer l'Aiguillette.* To prevent by enchantment the venereal act; or to render impotent!

NODUS, ('a knot or tie,') Articulation, Edentulus, Encystis, Hamma—n. Cerebri, Pons Varolii—n. Chirurgicus, Knot, surgeon's—n. Encephali, *Nœud de l'Encéphale*, Pons Varolii—n. Hystericus, Angone—n. Vitæ, Centrum vitale.

NOEMA, (*νοημα*, from *νοεω*, 'to think,') Thought.

NOESIS, (*νοησις,*) see Intellect.

NŒUD, ('a knot,') Node—*n. du Chirurgien*, Knot, surgeon's—*n. d'Emballeur*, Knot, packer's.

NŒUD DE L'ENCÉPHALE (F.), *Nodus Enceph'ali.* M. Cruveilhier, under this name, includes the pons Varolii, peduncles of the cerebrum and cerebellum, and the tubercula quadrigemina.

NŒUD VITAL, ('vital knot,') Centrum vitale.

NŒUDS, (pl. of *nœud,*) Calculi, arthritic.

NOIR (from [L.] *niger*, 'black,') *ANIMAL*, ('animal black,') Carbo animalis—*n. d'Os*, Carbo animalis.

NOISETIER, Corylus avellana.

NOISETTE, (dim. of *noix.*) Corylus avellana (nut.)

NOIX, ('a walnut,' from *nux*, gen. *nucis*, 'a nut,') Juglans regia (nux)—*n. Américaine*, Jatropha curcas—*n. des Barbades*, Jatropha curcas—*n. Cathartique*, Jatropha curcas—*n. d'Eau*, Trapa natans—*n. de Galle*, see Quercus infectoria—*n. d'Igasur*, Ignatia amara—*n. de Serpent*, see Thevetia Ahouai—*n. Vomique*, see Strychnos nux vomica.

NOLI ME TANGERE, ('do not touch me,') Lupus, see *Chancreux* (*Bouton*).

NOMA, (*νομη*, from *νεμω*, 'to corrode,') Cancer aquaticus—n. Pudendorum, Colpocace infantilis.

NO'MAD, *Nomade, No'mas*, (*νομας*, gen. *νομαδος*, from *νομη*, 'pasturage.') An epithet given to people who have no fixed habitation, and who travel, with their flocks, from country to country, for pasturage. Such are the Tartars. By analogy, the word *Nomad'ic* has been applied to a spreading ulcer.

NOMBRIL, Umbilicus—*n. de Vénus*, Cotyledon umbilicus.

NOME, (*νομη,*) Cancer aquaticus, Phagedenic ulcer.

NO'MENCLATURE, *Nomencla'tio, Nomenclatu'ra, Onomatolog''ia, Onomatocle'sis, Termonol'ogy, Terminol'ogy, Glossol'ogy, Orismol'ogy*, (*ονομα*, 'name,' and *καλεω*, 'I call.') A collection of terms or words peculiar to a science or art. In all sciences, nomenclature is an object of importance; and each term should convey to the student a definite meaning. The Lavoisierian nomenclature was a valuable gift to chemistry: and anatomy has derived advantage from the labours of Barclay, Dumas, and Chaussier, who have given names to parts indicative of their situation. See Muscle. The nomenclature of pathology has required the greatest attention; and although repeated attempts have been made to improve it, the barbarous terms that disgrace it are still frequently adopted. It consists of Hebrew and Arabic terms; Greek and Latin, French, Italian, Spanish, German, English, and even Indian, African, and Mexican; often barbarously and illegitimately compounded. A want of principle in forming the technical terms of medicine is everywhere observable. They have been formed for example, —1. From *colour*; as *Melæna, Melas, Atrabilis, Leuce, Alphos, Chlorosis, Rubeola, Scarlatina, Purpura*, &c. 2. From *duration*; as *ephemeral, quotidian, tertian*, and *quartan, continued*, and *intermittent*, &c. 3. From *Birds, Beasts, Fishes, Insects*, and *Plants*; as *Rabies canina, Cynarche, Boulimia, Pica, Hippanthropia, Elephantiasis, Urticaria, Lichen, Ichthyo'sis*, &c. 4. From *Persons* or *Places*; as *Morbus Herculeus, Facies Hippocratica, Lepra Arabum, Plica Polonica, Sudor Anglicus, Morbus Gallicus, Ignis Sancti Antonii, Chorea Sancti Viti*, &c.

NOMUS, (*νομος*, from *νεμω*, 'to corrode,') Cancer aquaticus.

NONAZOTED, see Nitrogenized.

NONCOMPOS, Lunatic.

NONCOMPOS MENTIS, ('not possessing mind,') Lunatic.

NONNAT'URALS, *Nonnatura'lia*. Under this term the ancient physicians comprehended air, meat, and drink, sleep and watching, motion and rest, the retentions and excretions, and the affections of the mind. They were so called, because they affect man without entering into his composition, or constituting his *nature*; but yet are so necessary that he cannot live without them.

NONNITROGENIZED, see Nitrogenized.

NONPLACENTAL, see Placental.

NONSANE, Insane.

NONSTRIATED MUSCULAR FIBRE, see Muscular fibre.

NONVIABLE (F.) (from *non*, and *viable*.) Applied to a new-born child not capable of continued existence. See Viable.

NONUS HUMERI PLACENTINI, (*nonus*, 'the ninth,') Teres minor — n. Linguæ musculus, Genioglossus—n. Vesalii, Peronæus tertius.

NOODLES, ses Turundæ Italicæ.

NOOS, (*νοος*,) Intellect.

NORICE, ([F.] *Nourrice*,) Nurse.

NORMA VERTICALIS, ('vertical rule,') see Normal.

NORMAL, *Norma'lis*, (*norma*, 'a perpendicular,' 'a rule.') According to rule; perpendicular.

The *normal line*, *norma vertica'lis*, of Blumenbach, is a vertical line let fall from the prominence of the frontal bone and shaving the superior maxillary, so as to mark the projection of the latter bone beyond the arch of the forehead.

NORRIS'S DROPS, see Antimonium tartarizatum.

NORTH CAROLINA, MIN'ERAL WA'TERS OF. The chief springs are the *Warm* and *Hot Springs of Buncombe*. Temperatures varying from 94° to 104° Fah. They have not much mineral impregnation, and have the properties of the thermal waters in general.

NORTON'S DROPS, Liquor hydrargyri oxymuriatis.

NORYSS, ([F.] *Nourrice*,) Nurse.

NOSACERUS, (*νοσακερος*,) Sickly.

NOSE, Nasus,—n. Bleed, Epistaxis.

NOSE, RUNNING AT THE, Coryza.

NOSELI'A, (*νοσηλεια*,) *Nosocome'sis*, *Nosocomi'a*. Care of the sick.

NOSEMA, (*νοσημα*,) gen. *Nose'matis*, Disease.

NOSENCEPH'ALUS, (F.) *Nosencéphale*, (*νοσος*, and *εγκεφαλος*, 'brain.') A monster whose skull is open only on the frontal and parietal regions, the posterior fontanelle being distinctly present.

NOSERUS, (*νοσηρος*,) Insalubrious, sick.

NOSEUMA, gen. *Noseu'matis*, (*νοσευμα*,) Disease.

NOSOCHTHONOGRAPHIA, (*νοσος*, *χθων*, 'the earth,' and *γραφω*, 'to describe,') Geography, medical.

NOSOCHTHONOLOGIA, (*νοσος*, *χθων*, 'the earth,' and *λογος*, 'a description,') Geography, medical.

NOSOCOMESIS, (*νοσοκομησις*, from *νοσος*, and *κομεω*, 'to care for,') Nosclia.

NOSOCOMIA, Noselia.

NOSOCO'MIAL, *Nosocomia'lis*, (from *Nosocomium*.) Relating to an hospital,—as '*nosocomial* or hospital fever.'

NOSOCOMIUM, (*νοσοκομειον*,) Hospital.

NOSOCOMUS, (*νοσοκομος*,) *Infirmier*.

NOSOCRATIC, (*νοσος*, and *κρατος*, 'power,') Specific.

NOSOCRINIES, (*νοσος*, and *κρινω*, 'I separate,') Dinerises.

NOSODES, (*νοσωδης*, from *νοσος*, and *odes*,) Insalubrious, Sick, Sickly.

NOSODOCHIUM, (*νοσοδοχειον*, from *νοσος*, and *δεχομαι*, 'to receive,') Hospital.

NOSOGENESIS. (*νοσος*, and *γενεσις*, 'generation,') Pathogeny.

NOSOGENIA, (*νοσος*, and *γενναω*, 'to engender,') Pathogeny.

NOSOGENY, Pathogeny.

NOSOGEOGRAPHY, Geography, medical.

NOSOG'RAPHY, *Nosograph'ia*, (F.) *Nosographie*, (*νοσος*, and *γραφω*, 'I describe.') A description of diseases.

NOSOHÆMIA, (*νοσος*, and *'αιμα*, 'blood,') Hæmatonosus.

NOSOHÉMIE, Hæmatonosus.

NOSOL'OGISM, *Nosologis'mus*. The abuse of nosological arrangements in pathology.

NOSOL'OGY, *Nosolog''ia*, (F.) *Nosologie*, (*νοσος*, and *λογος*, 'a discourse.') A name given to that part of medicine whose object is the classification of diseases. The most celebrated nosological systems have been those of Sauvages (1763), Linnæus (1763), Vogel (1764), Sagar (1776), Macbride (1772), Cullen (1772), Darwin (1796), Selle, Crichton (1804), Parr (1809), Swediaur (1812), Pinel (1813), Young (1813), Good (1817), Hosack (1818), &c. Besides these general nosographies, others have been published on *Surgery* exclusively, none of which are particularly worthy of enumeration amongst nosological systems. Nosological arrangements have, also, been formed of single families or groups of diseases. Plenck, of Baden, is the author of two different treatises of this kind: the one, a methodical arrangement of the diseases of the eyes, and the other, of cutaneus diseases. Dr. Willan published an arrangement of cutaneous diseases, which was completed by Dr. Bateman, and adopted into the Nosology of Dr. Hosack. Mr. Abernethy, also, published a methodical classification of tumours, and many other partial nosological classifications might be enumerated. Also, Pathology.

NOSON'OMY, *Nosonom'ia*, (*νοσος*, and *ονομα*, 'name.') The nomenclature of diseases.

NOSOPH'YTA, (*νοσος*, and *φυτον*, 'a plant.') Diseases supposed to be produced by, or to consist in the development of parasitic plants—as porrigo, mentagra, &c.

NOSOPH'YTODERM'ATA, (from *nosophyta*, and *derma*, 'skin.') Nosophyta affecting the skin. Mr. Erasmus Wilson reckons five of these—*Favus*, *Trichosis*, *Mentagra*, *Alopecia areata*, and *Chloasma*.

NOSOPŒ'US, *Nosopoiēt'icus*, (F.) *Nosopoétique*, (*νοσος*, and *ποιεω*, 'I make.') That which causes disease.

NOSORGANIES, (*νοσος*, and *οργανον*, 'an organ,') Organic diseases.

NOSOS, (*νοσος*,) Disease.

NOSOTAX'Y, *Nosotax'ia*, (*νοσος*, and *ταξις*, 'arrangement.') The distribution and classification of diseases.

NOSOTHEO'RIA, (*νοσος*, and *θεωρια*, 'doctrine.') The doctrine or theory of disease.

NOSTAL'GIA, (*νοστος*, 'a journey home,' and *αλγος*, 'pain.') *Nostoma'nia*, *Nostras'ia*, *Apodemial'gia*, *Pathopatridal'gia*, *Pothopatridalg'ia*, *Philopatridal'gia*, *Philopatridoma'nia*, *Ademon'ia*, *Ademos'ynē*, *Homesickness*, (F.) *Nostalgie*, *Maladie du pays*. An affection produced by the desire of returning to one's country. It is commonly attended by slow wasting, and sometimes by hectic, which may speedily induce death. M. Pinel properly regards it as a variety of melancholy.

NOSTOMANIA, (*νοστος*, 'a journey home,' and mania,') Nostalgia.

NOSTRASSIA, (*nostras*, 'of our country,') Nostalgia.

NOSTRILS, ([Sax.] nœɣðýl, 'nosehole,') Nares.

NOSTRUM, (*noster*, 'our own,') Arcanum.

NOSTRUM, CHITTICK'S. An empirical remedy for stone in the bladder, said to be a solution of alkali in veal-broth.

NOTA MATERNA, ('mother's mark,') Nævus—n. Primitiva, Groove, primitive.

NOTÆ INFANTUM, ('infants' marks') Nævi.

NOTAL, (from *notus*,) Dorsal.

NOTAL'GIA, *Notial'gia*, (*Nostalgia*, improperly, of Köchlin and others,) (νωτος, 'back,' and αλγος, 'pain.') Pain in the back. Spinal irritation.

NOTANENCEPHALIA, (νωτος, and *anencephalia*,) see Notencephalus.

NOTCH, (Teut. Noche, Ital. *Nocchia*,) *Emargina'tio*, *Emarginatu'ra*, (F.) *Échancrure*. A depression or indentation of different shape and size, observed on the circumference or edges of certain bones.

NOTCH OF THE CONCHA, Incisura tragica.

NOTCH, ETHMOID'AL, (F.) *Échancrure ethmoïdale*, is situate on the frontal bone, and joins the ethmoid.

NOT'CHES, ISCHIAT'IC, (F.) *Échancrures Ischiatiques*, are two in number:—the *greater* and the *less*. The *former* is large, situate at the inferior part of the pelvis, and formed by the sacrum and ilium. It gives passage to the sciatic nerve, pyramidalis muscle, and to the superior gluteal vessels and nerves. The *latter* is much smaller than the other, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

NOTCH, PAROT'ID, (F.) *Échancrure parotidienne*, is the triangular space comprised between the parotid edge of the inferior maxillary bone and the mastoid process; so called, because it lodges the parotid gland. The notches in soft parts are generally called Fissures.

NOTCH, SCAP'ULAR, *Incisu'ra scapula'ris*, *Lu'nula scap'ulæ*, (F.) *Échancrure scapulaire*. The notch on the superior edge or *costa* of the scapula, which is converted into a foramen by means of a ligament, and gives passage to the suprascapular nerve.

NOTCH, SEMILUNAR OF THE STERNUM, *Fourchette*.

NOTENCEPHALIA, see Notencephalus.

NOTENCEPH'ALUS, (νωτος, 'the back,' and εγκεφαλος, 'the brain.') A monster whose head, with the brain, is on the back. The condition is termed *Notencepha'lia* and *Notanencepha'lia*.

NOTHEUSIS, (νοσευσις,) Degeneration.

NOTHIA, (νοσεια,) Degeneration.

NOTHROTES, (νωθρωτης,) Torpor.

NOTHUS, (νοθος,) False.

NOTIÆUS, (νωτιαιος,) Dorsal—n. Myelus, Medulla spinalis.

NOTIALGIA, Notalgia.

NOTOMÈLE, (*notus*, and μελος, 'unprofitable.') A monster with superfluous flesh on the back.

NOTOMYELITIS, (*notos*, and *myelitis*,) Myelitis.

NOTOMYELUS, (*notos*, and μυελος, 'marrow,') Medulla spinalis.

NOTUS, (νωτος,) Dorsum, Vertebral column.

NOUÉ, (*Bandage*) (F.); 'knotted,' (from *nœud*, (L.) *nodus*, 'a knot.') A bandage which has a considerable number of knots placed over each other. It is made with a roller, 6 or 7 ells long, rolled into two balls, and is used to compress the parotid region, after the extirpation of the parotid gland.

Also, an epithet applied to children in whom the disease of rickets has swollen the articulations.

It is, likewise, applied to the gout when it has caused nodes on the joints.

NOUER L'AIGUILLETTE, ('to knot the *aiguillette*,') Nodum religare.

NOUET (F.), *Nod'ulus*. A bag filled with medicinal substances, infused in a liquid to communicate their properties to it.

NOUFFER'S, MADAME, REMEDY, Polypodium filix mas.

NOURRICE, Nurse.

NOURRICIER, Nutritious.

NOURISSON, Nursling.

NOURRITURE, Aliment.

NOUS, (νους,) Intellect.

NOUURE, (from *nouer*, 'to knot,') Rachitis.

NOUVEAU-NÉ (F.), 'newborn,' *Neona'tus*, *nuperrimè Natus*, *Neog'enes*, *Neog'iles*, *Neog'ilus*, *Neog'onus*, *Neog'nus*, *Infans recens natus*. That which has been just born. A newborn infant.

NOVACULA, Razor.

NOW ([Sc.], from [Sax.] cnolle, 'the top of a hill,') Vertex.

NOYAU, (from *noix*, 'a nut,') see Cytoblast—*n. Cancéreux*, see Cancer cell.

NOYAU CENTRAL DES PÉDONCULES DU CERVELET, Corpus dentatum.

NOYER, (from *noix*, 'a nut, a walnut,') Juglans regia—*n. de Ceylon*, Adhatoda.

NOYRIS, Nurse.

NUAGE, (from [L.] *nubes*, 'a cloud,) Nebula—*n. de la Cornée*, Caligo.

NUBECULA, (dim. of *nubes*,) Enœorema, Nebula.

NUBES, ('a cloud,') Enœorema, Nebula.

NU'BILE, *Nu'bilis*, *Marriageable*, *Marriable*, 'fit to marry.' Generally, the period of puberty is considered to be the age at which both sexes are *nubile*. They are truly nubile, however, only when they are fitted to procreate healthy and vigorous children, and are competent to discharge their duties as parents.

NUBIL'ITY, *Nubil'itas*, (F.) *Nubilité*. The state of being nubile or marriageable.

NUBILOSUS, (*nubes*, 'a cloud,') Nepheloid.

NUCES (pl. of *nux*, 'a nut,') AQUATICÆ, ('water nuts,') see Trapa natans—n. Querĉus, see Quercus alba.

NU'CHA, *In'ium*, *Nucha cap'itis*, (F.) *Nuque*. The *nuke*, hinder part or *nape* of the neck, (Prov.) *Niddick*. The part where the spinal marrow begins.

Ligamen'tum Nuchæ. A strong ligament from the neck, proceeding from one spinous process to another, and inserted into the occipital bone. It is very strong in quadrupeds. It is called in them *Paxywaxy*, *Paxwax*, *Packwax*, formerly, *Faxwax*, and *Taxwax*.

NU'CHAL, *Nucha'lis*, (from *nucha*.) Relating or appertaining to the nucha or nape of the neck.

NUCHAL RE'GION, *Re'gio nu'chæ* seu *nucha'lis* seu *occipita'lis infe'rior*. The region of the nucha or nape of the neck.

NUCISTA, (from *nux*, gen. *nucis*, 'a nut,') see Myristica moschata.

NUCK, CANAL OF. A small prolongation of the peritoneum often sent into the inguinal canal of the female fœtus. So called, from Nuck, who first described it.

NU'CLEATED, *Nucleu'tus*, (F.) *Nucléé*, (*nucleus*, 'a kernel.') Having a nucleus or central particle. Applied to the elementary cells of organized tissues; the vital properties of which are seated in the nucleus. See Cytoblast.

NUCLEATED CELL, see Cytoblast.

NUCLEI CEMBRÆ, see Pinus Cembra — n. Ossei, Ossification, points of—n. Pineæ, see Pinus pinea.

NUCLEIN, see Globules of the blood.

NUCLÉOLE, see Cytoblast.

NUCLÉOLULE, see Cytoblast.

NUCLEOLUS, (dim. of *nucleus*,) see Cytoblast.

NUCLEUS, 'a kernel,' see Cytoblast—n. Blastodermatis, *Tache embryonnaire*—n. Centralis, Corpus dentatum — n. Cicatriculæ, *Tache embryonnaire*—n. Dentatus, Corpus dentatum—n. Dentis, Dental pulp—n. Encased, Cytoblast—n. Fimbriatus, Corpus dentatum — n. Furunculi, see Furunculus—n. Germinal, see Molecule — n. Germinativus, see Molecule — n. Olivæ, Corpus dentatum—n. Ossificationis, Ossification, point of—n. Rhomboidalis, see Corpus dentatum.

NUCULA TERRESTRIS, (dim. of *nux*, gen. *nucis*, 'a nut,') Bunium bulbocastanum.

NUKE, Nucha.

NULE-KNEED, Entogonyancon.

NUMERICAL METHOD, see Method, numerical.

NUM'MULAR, *Nummula'ris*, *Num'mulated*, (from *nummus*, 'money.') Relating to money. An epithet applied to the sputa in phthisis, when they flatten at the bottom of the vessel, like a piece of money; and to the mode of aggregation of the red corpuscles of the blood — '*nummular* rolls.'

NUMMULARIA, Lysimachia nummularia.

NUMPOST, Abscess.

NUPHAR AD'VENA, (Arab.) *Nymphæ'a ad'vena*, *Yellow Pondlily*, *Spatterdock*. *Order*, Nymphaceæ; indigenous in Canada and the United States. The root is a popular tonic, and the fresh root bruised is applied as a cataplasm.

NUPHAR LUTEUM, Nymphæa lutea.

NUQUE, Nucha.

NURICE, Nurse.

NURSE, ([Sax.] nopice,) *Nu'trix*, (from *nutrio*,) *Tithe'nē*, *Lactans*, *Lac'ticans*, *Nu'triens*, *Thelas'tria*, *Mam'ma*, (L.) *Nutrice*, (F.) *Nourrice*, (Sc.) *Noyris*, *Noryss*, *Nurice*, *Norice*. One who suckles her own child or another's. Also, one that has the care of a sick person, *Caretaker*, (F.) *Gardemalade*.

NURSE, DRY. One who gives every care to a child, but does not suckle it.

NURSE, MONTH'LY. One who attends a woman during the month of her parturient state.

NURSE, WET, (Sc.) *Milkwoman*. A female, who suckles the child of another.

To '*nurse artificially*,' is to bring up a child by the hand.

NURSLING, (from *nurse*,) (F.) *Nourrisson*. An infant nursed by its mother or by another.

NUS, (νους,) Intellect.

NUSUS, (νουσος,) Disease.

NUT ([Sax.] hnut, [L.] *nux*,) BARBADOES, see Jatropha curcas—n. Brazilian, see Pichurim beans — n. Butter, Juglans cinerea — n. Cembros, see Pinus cembra—n. Clearing, Strychnos potatorum—n. French, Juglans regia—n. Ground, Apios tuberosa, Arachis hypogea—n. Para, see Pichurim beans — n. Physic, Jatropha curcas—n. Pine, see Pinus picea — n. Pistachio, see Pistacia vera —n. Poison, see Strychnos nux vomica—n. Purging, see Jatropha and Croton tiglium—n. Rattle, Nelumbium luteum — n. Sassafras, see Pichurim beans—n. Soap, see Sapindus saponaria.

NUT TREE, MALABAR, Adhatoda.

NUT, VOMIC, see Strychnos nux vomica — n. Zirbel, see Pinus picea.

NUTA'TION, *Nuta'tio*, (*nutare*, *nutatum*, 'to nod.') Nodding. Also, a constant oscillation of the head, by which it moves involuntarily in one or more directions.

NUTATOR CAPITIS, ('nodder of the head,') Sternocleidomastoideus.

NUTMEG, (*nux moschata*,) see Myristica moschata — n. Butter, see Myristica — n. Flower, Nigella—n. Liver, Liver, nutmeg.

NUTMEGS, Testes.

NUTRICATIO, (*nutrio*, 'to nourish,') Nutrition.

NUTRICIER, Nutritious.

NUTRICIUS, Nutritious.

NUTRIENS, Aliment, Nurse.

NUTRIMEN, Aliment.

NUTRIMEN'TAL, *Nutrimenta'lis*, *Aliment'al*, *Alimen'tary*, *Alimenta'lis*, (F.) *Alimenteux*. Having the qualities of food or nutriment.

NUTRIMENTUM, Aliment, Pabulum.

NUTRITIF, Nutritive.

NUTRIT''ION, *Nutrit''io*, *Nutrica'tio*, *Nutri'tus*, *Alitu'ra*, *Threp'sis*, (*nutrire*, *nutritum*, 'to nourish.') Nutrition is that function by which the nutritive matter already elaborated by the various organic actions, loses its own nature, and assumes that of the different living tissues,—to repair their losses and maintain their strength. Sometimes the word is used in a more extended signification, to express the whole series of actions by which the two constant movements of composition and decomposition are accomplished, in organized bodies. Nutrition, then, would comprehend digestion, absorption, respiration, circulation, and assimilation; the latter being *nutrition*, properly so called, and being effected in the intermediate system over the whole of the body,—the cells of the tissues attracting from the blood the elements necessary for their reparation.

NUTRITION, FORCE OF, Plastic force.

NUTRIT''IONAL, *Nutritiona'lis*. Relating or appertaining to nutrition.

NUTRIT''IOUS, *Nutric''ius*, *Nu'tritive*, *Alib'ilis*, *Troph'imus*, *Tropho'des*, (F.) *Nourricier*, *Nutricier*, *Alibile*. Having the quality of nourishing: as nutritious food, nutritious lymph, &c.

NUTRITIOUS or NU'TRITIVE AR'TERIES, (F.) *Artères nutricières*. Arterial branches which enter the *foramina nutricia* of long bones, and penetrate to the medullary membrane.

NU'TRITIVE, Nutritious, (F.) *Nutritif*. Also, relating to nutrition: hence the '*nutritive* functions,' or those that are concerned in nutrition.

NUTRITUS, Aliment, Nutrition.

NUTRIX, gen. *Nutri'cis*, Mamma, Nurse.

NUTS, WATER, Nelumbium luteum.

NUX (gen. *Nucis*, 'a nut') AROMATICA, see Myristica moschata — n. Avellana, Corylus avellana (nut)—n. Barbadensis, Jatropha curcas—n. Becuiba, Ibicuiba—n. Cathartica Americana, Jatropha curcas — n. Gallæ, see Quercus cerris — n. Juglans, Juglans regia — n. Medica, Coco of the Maldives—n. Metella, Strychnos nux vomica—n. Methel, Datura stramonium — n. Moschata, see Myristica moschata — n. Myristica, see Myristica moschata—n. Pistacia, see Pistacia vera—n. Unguentaria, see Myristica moschata — n. Vomica, Strychnos nux vomica.

NYCTALOPE, see Nyctalopia.

NYCTALOPEX, (νυκταλωπηξ,) see Nyctalopia.

NYCTALO'PIA, (νυκταλωπια, from *nycto*, and οπτομαι, 'I see,') *Parop'sis Lucif'uga*, *Nyctalopi'asis*, *Cæ'citas diur'na*, *Vi'sus noctur'nus*, *Oxyo'pia*, *Hemeralo'pia* (moderns), *Amblyo'pia meridia'na*, *Hemeratyphlo'sis*, *Hemerotyphlo'sis*, *Photophob'ia*, *Dyso'pia lu'minis*, *Vi'sus a'crior*, *Nyc'talopy*, *Dayblindness*, *Diur'nal amauro'sis*, (F.) *Vue nocturne*, *Aveuglement de Jour*. The faculty of seeing during the night, with privation of the faculty during the day. It affects both eyes at once, when idiopathic. Its duration is uncertain, and treatment very obscure. It is, however, a disease of nervous irritability, and one of excitement of the visual

nerve in particular. The indications of cure will consequently be — to allay direct irritation in every way; to excite counterirritation by blisters; and to gradually accustom the eye to the impression of light.

One labouring under this affection is called a *Nyc'talope*, *Nyc'talops*, *Nyctalo'pex*.

Nyctalopia has also been used for night blindness. See Hemeralopia.

NYCTALOPS, gen. *Nyctalo'pis*, (νυκταλωψ,) see Nyctalopia.

NYCTALOPY, Nyctalopia.

NYCTERINUS, (νυκτερινος,) Nocturnal.

NYCTHEMERON, see Dies.

NYCTHE'MERUM, (*nycto*, and *ἡμερα*, 'day.') The space of 24 hours, or of a day and night. Certain complaints continue only so long.

NYCTO, (from *νυξ*, gen. *νυκτος*, 'night,') in composition, night.

NYCTOBADIA, (*nycto*, and *βαινω*, 'to walk or mount,') Somnambulism.

NYCTOBASIS, (*nycto*, and *βασις*, 'walking,') Somnambulism.

NYCTOBATESIS, (*nycto*, and *βαινω*, 'to walk or mount,') Somnambulism.

NYCTOBATIA, Somnambulism.

NYCTOTYPHLOSIS, (*nycto*, and *τυφλος*, 'blind,') Hemeralopia.

NYGMA, gen. *Nyg'matis*, (*νυγμα*, 'a prick,' from *νυσσειν*, 'to pierce,') Wound, punctured.

NYGMATICUM EMPLASTRUM, ('wound plaster,') Emplastrum resinæ.

NYMPHA, (*νυμφα*,) Clitoris, see Nymphæ.

NYM'PHÆ, (*νυμφαι*,) *Alæ mino'res* seu *inter'næ mino'res clitor'idis* seu *muli'ebres mino'res*, *Carun'culæ cuticula're*, *Cris'tæ clitor'idis*, *Collic'uli vagi'næ*, *Myrtochi'la*, *Myrtochei'lides*, *La'bia mino'ra* seu *inter'na* seu *puden'di mino'ra*, (F.) *Nymphes*, *Petites lèvres*. Two membranous folds, which arise from the lateral parts of the prepuce of the clitoris, and descend on the inner surface of the labia majora; terminating, by becoming gradually thinner, about the middle of the circumference of the orifice of the vagina. They are formed each of two folds of the mucous membrane of the vulva; and contain, in their substance, a thin layer of spongy, erectile tissue. Their use seems to be,—not, as was once supposed, to direct the course of the urine, which notion gave rise to their name, (after the fabulous *Water nymphs*,) but to favour the elongation and dilatation of the vagina in pregnancy and labour.

The word *νυμφη*, *Nymphē*, has also been used synonymously with clitoris by Oribasius, Aëtius, &c.

NYMPHÆA ADVENA, (*νυμφαια*,) Nuphar advena.

NYMPHÆ'A AL'BA, *Lenconymphæ'a*, *Nen'uphar*, *Microlenconymphæ'a*, *Casta'lia specio'sa*, *White Waterlily*, (Sc.) *Cam'bieleaf*, (F.) *Nénuphar* ou *Nénufar blanc*, *Lis des étangs*, *Lune* ou *Volant d'Eau*. *Nat. Ord.* Ranunculaceæ. *Sex. Syst.* Polyandria Monogynia. Formerly employed as a demulcent, antaphrodisiac, emollient, and slightly anodyne remedy.

NYMPHÆA INDICA, N. nelumbo—n. Major lutea, N. lutea.

NYMPHÆA LU'TEA, *N. ma'jor lu'tea* seu *umbilica'lis*, *Nu'phar lu'teum*, *Nen'uphar lu'tea*, *Yellow Waterlily*, (Sc.) *Cam'bieleaf*, (F.) *Nénuphar jaune*. Used for the same purposes as *Nymphæ'a alba*. The flowers are called in Norfolk, England, *Brandybottles*.

NYMPHÆA NELUM'BO, *N. In'dica*, *Fa'ba Ægypti'aca*, *Cy'amus Ægypti'acus*, *Pon'tic* or *Ægyp'tian Bean*. The fruit of this is eaten raw in Egypt and some of the neighbouring countries; and is considered to be tonic and astringent.

NYMPHÆA ODORA'TA, *Sweet-scentéd Waterlily*, *Sweet water* or *White Pond* or *Toad Lily*, *Cow* or *Water Cab'bage*, (F.) *Nénuphar odorant*. An indigenous plant, growing in most parts of the United States in fresh water ponds, and on the borders of streams, and having large white, beautiful, sweet-scented flowers. The root is very astringent and bitter. It is sometimes made into a poultice and used as a discutient.

NYMPHÆA UMBILICALIS, N. lutea.

NYMPHE, (*νυμφη*,) Clitoris, see Nymphæ.

NYMPHES, Nymphæ.

NYMPHI'TIS, (*nympha*, and *itis*,) *Epiderrhi'tis*, *Inflamma'tio Clitor'idis*. Inflammation of the clitoris.

NYMPHOMA'NIA, (*nympha*, and *μανια*, 'fury,') *Fu'ror uteri'nus*, *Uteroma'nia*, *Lagne'sis fu'ror femini'nus*, *Metroma'nia*, *Ædœogar'galus*, *Ædœogargaris'mus*, *Thelygon'ia*, *Erotoma'nia*, *Ædœma'nia*, *Aidoioma'nia*, *Cytheroma'nia*, *Meloncho'lia uteri'na*, *Sympto'ma turpitu'dinis*, *Andromania*, *Gynæcoma'nia*, *Machlos'ynē*, *Tenti'go vene'rea*, *Hysteroma'nia*, *Salac'itas vulvæ*, *Uteri pruri'tus*, *Brachu'na*, *Arsa'tum*, *Œstroma'nia*, (F.) *Nymphomanie*, *Fureur utérine*. An irresistible and insatiable desire, in females, for the venereal act. It occurs in those particularly, who possess a nervous temperament, and vivid imagination, especially if excited by improper language, masturbation, &c. Its course, as described, is as follows. In the commencement, the sufferer is a prey to perpetual contests between feelings of modesty and impetuous desires. At an after period, she abandons herself to the latter, seeking no longer to restrain them. In the last stage the obscenity is disgusting; and the mental alienation, for such it is, becomes complete. The treatment consists in the use of the same means as are required in the satyriasis of man. When the mental alienation is complete, solitude is indispensable.

NYMPHON'CUS, (*nympha*, and *ογκος*, 'a tumour.') A morbid tumefaction of the nymphæ.

NYMPHOT'OMY, *Nymphotom'ia*, *Nympha'rum Sec'tio*, (F.) *Nymphotomie*, (*nympha*, and *τεμνειν*, 'to cut.') An operation, known and practised for a long time, which consists in the excision of the nymphæ. The operation is had recourse to, when they are attacked with scirrhus, cancer, fungus, or gangrene; or when they are so large as to interfere with walking or coition. *Nymphotomy* is the circumcision of the female. It is practised in some countries.

Some authors have used the term *Nymphotomy* for amputation of the clitoris.

NYSTAG'MUS. A partial rotatory movement of the eyeball from side to side. (F.) *Souris*. Also, Coma vigil, (*νυσταγμος*, 'sleep.')

NYXIS, (*νυσσειν*, 'to pierce,') Puncture.

O.

OAK, BLACK, (Sax. ac, æc,) Quercus tinctoria —o. Common, Quercus robur—o. Jerusalem, Chenopodium botrys.

Oak Lungs, Lichen pulmonarius.

Oak Or'chard Ac''id Springs. These springs — eight in number—are in Genesee county, New York, eight miles from Lockport. They are acid salines, consisting of free sulphuric acid, sulphate of protoxide of iron, and sulphates of alumina, magnesia, and lime. They are powerfully astringent and tonic.

Oak, Poison, Rhus toxicodendron — o. Red, Quercus rubra montana — o. Sea, Fucus vesiculosus — o. Spanish, Quercus rubra montana — o. White, Quercus alba.

OAKUM, see Linteum.

OĂR'IC, *Oär'icus*, (F.) *Oarique*, (from *oarion*.) Relating or appertaining to the ovary.

OĂRIOCYESIS, (*oarion*, and *κυησις*, 'pregnancy,') Pregnancy, ovarian.

OĂRION, (*ωαριον*, from *ωον*, *ovum*, 'an egg,') Ovary.

OĂRION'CUS, *Oariophy'ma*, *Ova'rium tu'midum*, *Tu'mor Ova'rii*, (*oarion*, and *ογκος*, 'swelling.') Ovarian tumour.

OĂRIOPAREC'TAMA, gen. *Oarioparectem'atis*, *Oophoraux'ē*, (*oarion*, and *παρεκτεινειν*, 'to extend.') Enlargement of the ovary.

OĂRIOP'ATHY, *Oariopathi'a*, *Oophor'opathi'a*, (*oarion*, and *παθος*, 'affection.') Disease of the ovary.

OĂRIOPHYMA, (*oarion*, and *φυμα*, 'a swelling,') Oarioncus.

OĂRIORRHEX'IS, (*oarion*, and *ῥηξις*, 'rupture.') *Ruptu'ra Ova'rii*. Rupture of the ovary.

OARIOSCIR'RHUS, (*oarion*, and *scirrhus*.) Scirrhus of the ovary.

OARIOSTERESIS, (*oarion*, and *στερησις*, 'privation,') Oariotomy.

OĂRIOT'OMY, *Oariotom'ia*, *Ovariotom'ia*, *Oäriostere'sis*, *Ovariot'omy*, (*oarion*, and *τομη*, 'incision.') The operation for removing the ovary.

OĂRI'TIS, *Oöphori'tis*, *Oori'tis*, *Inflamma'tio Ova'rii*, *Ovari'tis*, (F.) *Inflammation de l'Ovaire*, (*oarion*, and *itis*.) Inflammation of the ovarium. When occurring in childhood, it is the *Lochoöphoritis* of some.

OARIULE, (*oarion*, and *ὑλη*, 'cicatrix,') Corpus luteum.

OARIUM, (*ωαριον*,) Ovary.

OARIYDROPS, (*oarion*, and *ὑδρωψ*, 'dropsy,') Hydroarion.

OĂRTHROC'ACĒ, (formed by contraction from *omoärthrocace*.) Said to be used by Rust to designate inflammation of the scapulohumeral articular surfaces.

OATMEAL, see Avena.

OATS, (Sax. aɛn,)Avena — o. Water, Zizania aquatica.

OB (L.), in composition, 'on, before, over, against, towards.' At times, it is only intensive; and, at others, it means inversely. Before *c* and *f*, it is often changed into *oc*, *of*; and before *p*, always into *op*.

OBAUDITIO, (*ob*, and *audire*, *auditum*, 'to hear,') Baryecoia.

OBAUDITUS, Baryecoia.

OBCÆCATIO, (*ob*, and *cæcare*, *cæcatum*, 'to blind,') Cæcitas.

OBDORMIT''IO, (*ob*, and *dormio*, *dormitum*, 'I sleep.') The state of being asleep; also, of the limbs being asleep;—*Stu'por ar'tuum*.

OBDUCTIO LEGALIS, Autopsia cadaverica legalis.

OBELÆA RAPHE, (*οβελος*, 'a spit or arrow,') Sagittal suture.

OBESITAS, ('fatness,') Polysarcia — o. Colli, Struma adiposa — o. Nimia, Pimelosis — o. Viscerum, Physconia adiposa.

OBÉSITÉ, Polysarcia.

OBESITY, Polysarcia.

OBESUS, ('fat,') Corpulent.

OBFUSCATIO, (*ob*, and *fuscare*, *fuscatum*, 'to make dark,') Amaurosis.

OBITUS, (*ob*, and *ire*, 'to go,') Death.

OBJECT'IVE CONE. The cone of light proceeding from an object, the apex of which is on the object, and the base on the cornea.

Objective Sensations, see Sensation.

OBLINITIO, (*ob*, and *linere*, 'to besmear,') Inunction.

OBLIQUE', *Obli'quus*. Any thing inclined, or which deviates from the vertical line. Anatomists have given this name to certain muscles, which have an oblique direction as regards the plane that divides the body into two equal and symmetrical halves. These are:—

Oblique Muscles of the Abdomen. They are two in number, and distinguished into: 1. *Obliquus Exter'nus Abdom'inis* seu *descen'dens exter'nus* seu *descendens* seu *ma'jor*, (F.) *Ilio-pubo costo-abdom'inal*, *Costo-abdom'inal* (Ch.), *Grand oblique*, *Oblique externe*. One of the broadest muscles of the body. It is situate at the lateral and anterior part of the abdomen; and is flat and quadrilateral. It is attached, *above*, to the outer surface and lower edge of the 7 or 8 last ribs: *below*, to the anterior third of the external lip of the crista ilii: *before*, it terminates at the linea alba by means of a broad and strong aponeurosis, which covers the rectus, and presents towards its inferior part two very solid fibrous fasciculi, which are inserted, — the one at the symphysis, the other at the spine of the pubis, — under the name of *Pillars of the Abdominal Ring*. These pillars leave between them an opening, which forms the inferior orifice of the inguinal canal. The obliquus externus abdominis depresses the ribs, and carries them backwards during a strong expiration. It impresses on the chest a movement of rotation, and bends the thorax upon the pelvis, and conversely. It contracts, also, the abdominal cavity. 2. *Obliquus Inter'nus Abdominis* seu *ascen'dens* seu *mi'nor* seu *inter'nus* seu *ascendens internus*, *Mus'culus accli'vis*, (F.) *Ilio-lombo-costo-abdominal*, *Ilio-abdominal* (Ch.), *Muscle petit oblique* ou *oblique interne*, is broad, especially before; thin, and irregularly quadrilateral, like the preceding, beneath which it is situate. It is attached, above, to the inferior edge of the cartilages of the 5th, 4th, 3d, and 2d false ribs; below, to the anterior two-thirds of the interstice of the crista ilii, to the posterior part of the crural arch, and to the pubis; behind, to the spinous processes of the last two lumbar vertebræ, and to those of the first two portions of the sacrum; before, to the linea alba. Its upper fibres run obliquely upwards and forwards; the middle are horizontal; and the lower pass obliquely downwards and forwards.

These last, in the male, are dragged down through the inguinal ring, when the testicle descends, and form the two fasciculi of the cremaster.

The obliquus internus resembles the O. externus in function.

Oblique Muscles of the Eye, *Amato'rii*, *Circumagen'tes*, *Rotato'res Oc'uli*, are two in number. They are distinguished into: 1. *Obliquus Superior Oc'uli*, *Amato'rius mus'culus*, *Trochlea'ris*,

Trochlea'tor, Obliquus ma'jor, Circumductio'nis op'ifex, Longis'simus oc'uli, (F.) *Optico-trochlei sclérotic'ien, Grand trochléateur* (Ch.), *Grand oblique de l'œil, Oblique supérieur de l'œil, Amoureux (Muscle,)* is situate at the inner and upper part of the orbit. It is small, round, fusiform, and reflected upon itself in the middle of its course. Behind, it is attached to the inside of the foramen opticum; and when it arrives opposite the internal orbitar process, it becomes a small, round tendon, which slides in a cartilaginous pulley fixed to the os frontis, and is reflected, at an acute angle, to proceed downwards and outwards, and to attach itself to the outer and back part of the globe of the eye. This muscle carries the globe of the eye forwards and inwards; making it experience a movement of rotation, which directs the pupil downwards and inwards. This is conceived to be an involuntary muscle as well as the next. In sleep, according to Sir C. Bell, when the power over the straight or voluntary muscles of the organ is nearly lost, the eye is given up to the oblique muscles, which lodge the transparent cornea under the upper eyelid. At the approach of death, the same thing is observable; hence, the turning up of the eye, at such time, is not an evidence of agony or suffering, but of insensibility. 2. *Obli'quus Infe'rior* seu *mi'nor oc'uli,* (F.) *Maxillo-sclérotic'ien, Petit Trochléateur* (Ch.), *Petit oblique* ou *oblique inférieur de l'œil,* is situate at the anterior and inferior part of the orbit. It is flat and attached to the inner and anterior part of the orbitar surface of the superior maxillary bone, on the outside of the lachrymal gutter; from thence it passes outwards and backwards, and terminates by an aponeurosis, at the posterior and inner part of the globe of the eye. It carries the globe of the eye inwards and forwards; and directs the pupil upwards and outwards.

Oblique Muscles of the Head. These are two in number. 1. *Obliquus Superior* seu *mi'nor Cap'itis,* (F.) *Trachélo-atloïdo-occipital, Atloïdo-sous-mastoïdien* (Ch.), *Muscle oblique supérieur* ou *petit oblique de la tête.* This muscle is situate at the sides of, and behind, the articulation of the head: it is flat and attached, on the one hand, to the top of the transverse process of the atlas; and, on the other, terminates at the occipital bone, beneath the inferior curved line, and sometimes, also, at the mastoid region of the temporal bone. It extends the head,—inclining it to one side. 2. *Obliquus Inferior Cap'itis, Obliquus ma'jor,* (F.) *Spini-axoïdo-trachéli-atloïdien, Axoïdo-atloïdien* (Ch.), *Oblique inférieur* ou *grand oblique de la tête,* is situate at the posterior part of the neck and head. It is round, fusiform; attached to the spinous process of the axis, and proceeds to terminate behind and below the summit of the transverse process of the atlas. It impresses, on the first vertebra and the head, a movement of rotation, which turns the face to one side.

Oblique Processes, see Vertebræ.

OBLIQUE EXTERNE, Obliquus externus abdominis—*o. Grand,* Obliquus externus abdominis—*o. Grand de l'œil,* Obliquus superior oculi—*o. Grand de la tête,* Obliquus inferior capitis—*o. Inférieur de l'œil,* Obliquus inferior colli—*o. Inférieur de la tête,* Obliquus inferior capitis—*o. Interne,* Obliquus internus abdominis—*o. Petit,* Obliquus internus abdominis—*o. Petit de l'œil,* Obliquus inferior oculi—*o. Petit de la tête,* Obliquus superior oculi—*o. Supérieur de l'œil,* Obliquus superior oculi—*o. Supérieur de la tête,* Obliquus superior capitis.

OBLIQUITÉ DE LA MATRICE, Retroversio uteri.

OBLIQUUS, (*ob,* and *liquis,* 'slanting.) Oblique—u. Ascendens, O. Internus abdominis—o. Auris, Laxator tympani—o. Descendens externus, O. externus abdominis—o. Externus abdominis, see Oblique muscles of the abdomen—o. Internus abdominis, see Oblique muscles of the abdomen—o. Major, O. externus abdominis, O. inferior capitis, O. superior oculi—o. Minor, O internus abdominis—o. Minor capitis, O. superior capitis—o. Minor oculi, O. inferior oculi.

OBLIT'ERATED, *Oblitera'tus:* (*obliterare,* (*ob,* and *litera,*) 'to efface.') A vessel or duct is said to be obliterated, when its parietes have approximated and contracted such an adhesion to each other that the cavity has completely disappeared.

OBLITERATIO COMPLETA, Hapantismus.

OBLIVIO, ('forgetfulness,') Amnesia—o. Iners, Lethargy.

OBLOBIUM, (*ob,* and λοβος, 'a lobe,') Antilobium.

OBNUBILA'TION, (F.) *Obnubila'tio,* (*ob,* and *nubilare, nubilatum,* 'to be cloudy,') Giddiness, dazzling.

OB'OLUS, *Onolosat.* A weight of 9 or 10 grains.

OBSCŒNÆ PARTES, ('obscene parts,') Genital organs.

OBSCURCISSEMENT DE LA VUE, (from *obscurus,* 'obscure,') Caligo.

OBSERVA'TION, *Observa'tio,* (*ob,* and *servare, servatum,* 'to keep,' e. g. in sight.) *Tere'sis, Symparatere'sis.* Act of examining a thing by means of the external senses. This word is employed in several acceptations. It expresses—1. The action of observing—2. The aggregate of knowledge, afforded by observation. In French—but not in English—it means the *case* or history of the phenomena presented by a patient in the course of a disease.

OBSERVATION, Case—o. Method of, Numerical method.

OBSTET'RIC, *Obstet'rical, Obstet'ricus, Maieu'tical, Maieu'ticus,* (*obstare,* (*ob,* and *stare,*) 'to stand before.') Relating or appertaining to Obstetrics,—as '*obstetric* auscultation,' '*obstetric* exploration,' &c.

Obstetric Chair, Labour chair.

OBSTETRICANS, Accoucheur.

OBSTÉTRICIE, Obstetrics.

OBSTETRICS. *Tokol'ogy, Tocol'ogy, Maiei'a, Maeei'a, Maei'a, Maecu'tica ars, Ars obstetric''ia, Obstet'ricy,* (F.) *Obstétrique, Obstétricie.* The art of midwifery. Midwifery in general.

OBSTETRICY, Obstetrics.

OBSTÉTRIQUE, Obstetrics.

OBSTETRIST, Accoucheur.

OBSTETRIX, Midwife.

OBSTIPATIO, (*ob,* and *stipare, stipatum,* 'to cram close,') Constipation—o. Alvina, Constipation—o. Tenesmus, Tenesmus.

Obstipatio, see Hump.

OBSTIPITAS CAPITIS seu COLLI, (*obstipo,* 'to lean to one side,') Torticollis.

OBSTIPITÉ, Torticollis.

OBSTRUCTIO, (*obstruo,* (*ob,* and *struere, structum* 'to build,') 'I stop up by building against,') Emphraxis, Stegnosis—o. Alvi, Constipation—o. Ductûs alimentarii, Constipation—o. Ductûs Stenoniani, Stenostenosis—o. Intestinalis, Constipation—o. Pulmonum pituitosa febrilis, Peripneumonia notha—o. Recti Spastica, Stricture of the Rectum, spasmodic.

OBSTRUCTION OF THE INTESTINES, Enteremphraxis.

OB'STRUENS, *Oppilati'vus.* A medicine which closes the orifices of ducts or vessels.

OBSTUPEFACIENTIA, (*ob,* and *stupefacere,* 'to benumb,') Narcotics.

OBTONDANT, Obtundens.

OBTRUNCATIO, (*ob,* and *truncare, truncatum,* 'to cut off,') Decollation.

OBTUNDENS, (F.) *Obtondant,* (*obtundere,* (*ob,* and *tundere,* 'to beat,') 'to beat against,' and

therefore to blunt the edge.) An epithet applied to remedies that were supposed, according to an erroneous theory, to be possessed of the power of blunting the acrimony of the humours. A demulcent is one of these.

OBTURAMENTUM, (*obturare, obturatum,* 'to stop up,') Emphragma.

OBTURATEUR, Obturator—*o. du Palais,* Palate, artificial.

OBTURATIO, Emphraxis.

OBTURATION DES DENTS, Plugging.

OBTURA'TOR, *Obturato'rius,* (F.) *Obturateur.* An instrument adapted for closing an opening caused by a wound or disease, as '*Obturator of the palate,*' see Palate, artificial. Also a name given in anatomy to several parts connected with the Obturator foramen.

Obturator Ar'tery, *Arte'ria obturato'ria* seu *obtura'trix,* (F.) *Sous-pubio fémorale* (Ch.), *Artère obturatrice,* arises, most commonly, from the hypogastric. It is, however, frequently given off from the epigastric; a matter of importance to be determined in cases of femoral hernia. Of 500 obturator arteries examined by M. J. Cloquet, 340 were furnished by the hypogastric, and 152 by the epigastric or crural. When it arises from the hypogastric, it passes forwards and outwards, and then turns horizontally into the cavity of the pelvis, to issue from this cavity by the opening left at the upper part of the obturator membrane. When, on the contrary, the obturator artery arises from the epigastric or the crural, it descends obliquely inwards, behind the os pubis, to the obturator foramen. At its exit from the pelvis, the artery divides into two branches, a *posterior* and an *anterior,* which are distributed to the muscles of the anterior and superior part of the thigh.

Obturator Fora'men, *Fora'men Obturato'rium* seu *obtura'tum* seu *infrapubia'num* seu *ova'lē* seu *thyroïdeum* seu *Thyroï'des* seu *Am'plum Pel'vis,* (F.) *Trou sous-pubien.* A large opening, of an oval or triangular form, in the anterior part of the os innominatum, on the outside of the symphysis pubis and beneath the horizontal ramus of the os pubis. This foramen is closed by a membranous ligament.

Obturator Lig'ament or Mem'brane, *Subpu'bic mem'brane,* is a fibrous membrane, fixed to the whole circumference of the obturator foramen, except above, where an opening remains for the passage of the vessels and nerves of the same name.

Obturator Mus'cles, *Obturato'res, Rotato'res fem'oris.* These are two in number. They are divided into

a. Obturator Extcr'nus, Extra-pelvio-pubi-trochantérien, Sous-pubio-trochantérien externe (Ch.). A muscle, situate at the anterior and inner part of the thigh. It is broad, flat, and triangular; and is attached, on the one hand, to the anterior surface of the os pubis, to that of the ischium, and to the anterior surface of the obturator ligament. Its fleshy fibres couverge to the tendon, which proceeds to be inserted at the inferior part of the cavity of the great trochanter. This muscle rotates the thigh outwards.

b. Obturator Inter'nus, Marsupia'lis, Bursa'lis, Intra-pelvio-trochantérien, Sous-pubio-trochantérien interne (Ch.), is seated, almost entirely, in the pelvis. It arises from the inner surface of the obturator ligament, and from the posterior part of the circumference of the obturator foramen, and is inserted, by means of a strong tendon, running between the two portions of the gemini, into the cavity at the root of the great trochanter; after having turned upon the ischium, which forms for it a kind of pulley. This muscle also rotates the thigh outwards.

Obturator Nerve, *Sous-pubio-fémoral,* (Ch.), proceeds principally from the 2d and 3d lumbar nerves. It descends into the pelvis; gains the obturator foramen; gives branches to the obturator muscles, and divides, behind the abductor primus and pectinalis, into two branches; one *anterior,* whose branches are distributed to the first two adductors, gracilis, and integuments; the other, *posterior,* distributing its ramifications to the obturator externus and third adductor.

Obturator Vein has, ordinarily, the same arrangement as the artery. It is common, however, to find it arising from the epigastric; whilst the corresponding artery proceeds from the hypogastric, and conversely.

OBTURATORES, Obturator muscles.

OBVOLVENTIA, (*obvolvere,* 'to cover over,') Demulcents.

OC, as a prefix, see Ob.

OCA, Oxalis tuberosa.

OCCÆCATIO, (*oc,* and *cæcus,* 'blind,') Cæcitas.

OCCIP'ITAL, *Occipita'lis,* (from *Occiput,* gen. *Occip'itis.*) That which belongs to the occiput.

Occipital Ar'tery. This arises from the posterior part of the external carotid, beneath the parotid. It proceeds backwards, passes between the mastoid process and the transverse process of the atlas; reaches the occipital bone and divides into two branches, which may be called ascending posterior and anterior, and are distributed to the neighbouring muscles and ligaments.

Occip'ital Bone, *Os occip'itis* seu *occipit'ii* seu *occipita'lē* seu *sphe'nobasila're* seu *memo'riæ* seu *nervo'sum* seu *basila're* seu *pro'ræ* seu *pyx'idis* seu *sex'tum cra'nii* seu *lambdoï'des* seu *lamb'dæ* seu *pup'pis* seu *nervo'sum* seu *fibro'sum* seu *pelvicephal'icum,* (F.) *Os occipital,* is situate at the posterior and inferior part of the cranium, which it assists in forming. It is flat, symmetrical, and curved upon itself. It presents, 1. An *occip'ital* or *posterior surface,* which is convex, and has, upon the median line, the *bas'ilary surface,* the *fora'men mag'num,* through which passes the spinal marrow with its membranes and vessels,—the *external occipital crest,* the *external occipital protuberance;* and, at the sides, the *upper curved line, large rough arched ridge* or *transverse arch* or *lin'ea semicircula'ris,* the *lower curved line,* the *posterior con'dyloid fossæ,* the *condyles* for the articulation of this bone with the atlas; and the *anterior con'dyloid fossæ,* pierced by a foramen for the passage of the ninth pair of nerves. 2. A *cer'ebral* or *anterior surface.* On the median line are: the *bas'ilary fossæ,* the *inner or'ifice* of the foramen magnum, the *internal occipit'al crest,* the *internal occipit'al protu'berance,* the *cru'ciform spine;* a *channel,* which lodges the termination of the straight sinus, and, on each side, the *occipit'al fossæ,* distinguished into *superior* or *cer'ebral,* and *inferior* or *cerebel'lous,* and separated by a groove which lodges the lateral sinus. 3. The surfaces of the occipital bone are separated by four ridges and four angles. The two superior edges are articulated with the parietal bones; the two lower join the temporal; and the anterior angle, under the name *bas'ilary process,* is united to the sphenoid.

The occipital bone is developed from four points of ossification; and sometimes from a greater number.

Occipital Mus'cle, *Occipita'lis.* Many anatomists have given this name to the posterior fasciculus of the occipitofrontalis.

Occipital Nerve, *Suboccip'ital nerve,* (F.) *Première paire trachélienne* (Ch.), *Nerf occipital* ou *sous-occipital.* It arises from the upper part of the spinal marrow by eight or ten filaments, united into two fasciculi. Thus formed, it passes between the foramen magnum and the posterior arch of the atlas; and, at this place, forms a long ganglion, afterwards dividing into two branches. Of

these, the *anterior*, which is long and small, makes a turn above the transverse process of the atlas and forms an anastomotic noose with a branch of the second cervical nerve. The *posterior* branch, larger and shorter, divides into seven or eight branches, which are distributed to the muscles of the upper and back part of the neck.

Occipital Region, Occiput.

Occipital Vein. Its roots follow exactly the course of the branches of the artery, and unite into a single trunk, which opens into the internal jugular vein, and sometimes into the external.

OCCIPITIUM, Occiput.

OCCIP'ITOÄT'LOID, *Occipitoatloïdeus*, (F.) *Occipitoatloïdien*. That which has reference to the occiput and atlas.

Occipitoatloid Articula'tion is the articulation of the condyles of the occipital bone with the superior articular cavities of the atlas. It is strengthened by two ligaments—the one *anterior*, the other *posterior*, called *occipitoätloid ligaments*: the one extends from the anterior, the other from the posterior arch of the atlas to the corresponding portion of the circumference of the foramen magnum.

OCCIPITOÄX'OID, *Occipitoäxoïdeus*, (F.) *Occipito-axoïdien*. That which relates to the occipital bone and the axis or second vertebra.

Occipitoaxoid Articulation is the connexion of the occipital bone with the axis or second vertebra, although these bones are not really articulated, but are merely retained in apposition by three strong ligaments, the posterior of which is called the *occipito-axoid*, and the two others *odontoid*.

OCCIPITOFRONTA'LIS, *Digas'tricus cra'nii, Epicra'nius, Fronta'lis et occipitalis*. The majority of anatomists call by this name the whole of the fleshy plane, with the epicranial or coronal aponeurosis (see *Calotte*,), which covers the head from the occiput to the forehead. It is attached, by its posterior fasciculus, to the two outer thirds of the upper curved line of the occipital bone, and to the outer surface of the mastoid portion of the temporal; and, by its anterior fasciculus, it terminates at the eyebrow, where it becomes confounded with the superciliaris, pyramidalis nasi, and orbicularis palpebrarum.

The occipitofrontalis, by the contraction of its anterior fasciculus, draws forward a part of the integuments of the cranium. It wrinkles the skin of the forehead transversely, and may also contribute to open the eye by its decussation with the orbicularis palpebrarum. The posterior fasciculus of the muscle draws backwards a part of the skin of the cranium, and assists in stretching the common aponcurosis.

OCCIPITOMENINGE'AL. That which belongs to the occipital bone and to the meninge or dura mater.

Occipitomeningeal Ar'tery, in Chaussier's nomenclature, is a branch of the vertebral, given off to the dura mater at its entrance into the cranium.

OC'CIPUT, gen. *Occip'itis, Occipit'ium*, (*oc*, and *caput*, 'the head.') *Re'gio occipita'lis, In'ion, Opisthocra'nium, Opisthoceph'alon, Hysterocra'nium, Pro'ra*. The back part of the head, formed by the occipital bone.

Occiput, Soft, Craniotabes.

OCCLU'SION, *Occlu'sio*, (*occludere, occlusum*, 'to shut up.') Sometimes this word signifies, simply, the transient approximation of the edges of a natural opening—the *occlusion of the eyelids*, for example; at others, it is synonymous with imperforation, as *occlusion of the pupil, vagina*, &c.

OCCULT DISEASES, see Latent.

OCEAN SPRINGS, see Mississippi, mineral waters of.

OCHEMA, gen. *Oche'matis*, (*οχημα*,) Vehicle.

OCHETEUMATA, (pl. of *οχετευμα*, 'a canal.') Nares.

OCHETOS, (*οχετος*,) Canal.

OCHEUMA, (*οχευμα*,) Coition, Fecundation.

OCHEUS, (*οχευς*, from *εχω*, 'to hold.') Scrotum.

OCHLE'SIS, (*οχλος*, 'a crowd.') *Crowd poisoning*. A morbid condition induced by the crowding together of sick persons under one roof.

OCHREA (from *ωχρος*, 'pale') RUBRA, ('*red ochre*.') Hæmatites.

OCHRIASIS, (*ωχριασις*,) Paleness.

OCHROMA, (*ωχρος*, 'pale.') Paleness.

OCHROPYRA, (*ωχρος*, 'yellow,' and *πυρ*, 'fever.') Fever, yellow.

OCHROTES, (*ωχροτης*,) Paleness.

OCHROTYPHUS, (*ωχρος*, 'yellow,' and *typhus*.) Fever, yellow.

OCHTHIASIS, (*οχθος*, 'a hill, a protuberance.') Molluscum.

OCHTHODES, (*οχθος*, 'the hard edge of an ulcer.') Callous.

OCIMUM ADSCENDENS, *ωκιμον*, from *ωκυς*, 'swift,' owing to its swift growth.) O. Basilicum.

O'cimum Basil'icum, *O. adscen'dens* seu *pilo'sum* seu *racemo'sum* seu *citra'tum, Beren'daros, Basil'icum, B. ma'jus* seu *citra'tum, Com'mon* or *Cit'ron bas'il*, (F.) *Basilic commun*. *Nat. Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This herb has a fragrant odour and aromatic taste. It is used as a condiment, and has been supposed to possess nervine properties.

Ocimum Caryophylla'tum, *O. min'imum, Small* or *Bush bas'il*, possesses properties similar to the former. It is sometimes used as snuff.

Ocimum Citratum, O. Basilicum—o. Pilosum, O. Basilicum—o. Racemosum, O. Basilicum.

OCOTEA AMARA, Nectandra cymbarum—o. Cymbarum, Nectandra cymbarum—o. Pichurim, see Pichurim beans—o. Puchury, see Pichurim beans.

OCREA, Hippocampus minor, Shin.

OCTA'NA, *Hebdomadu'ria, Fe'bris hebdomada'ria*, (*octo*, 'eight.') A fever whose paroxysms recur every week;—a suppositious case.

OCTA'RIUS, (from *octo*, 'eight.') A pint. The eighth part of a wine-gallon. Same etymon. It contains sixteen fluidounces (Ph. U. S.),—20 fluidounces imperial measure. See Weights.

OCTOPUS Synapheocephalus, Hemipages.

OCTOROON, (from *octo*, 'eight,') see Mulatto.

OCTUNX, (*octo*, 'eight,' and *uncia*, 'an ounce.') A weight of eight ounces.

OC'ULAR, *Ocula'ris*, (F.) *Oculaire*, (from *oculus*.) Of or belonging to the eye.

Ocular Cone. The cone formed within the eye by a pencil of rays proceeding from an object; the base of the cone being on the cornea, the apex on the retina.

OCULARES COMMUNES, Motores oculorum—o. Dentes, Canine teeth.

OCULARIA, (from *oculus*.) Euphrasia officinalis.

OCULI MARMARYGODES, Metamorphopsia—o. Palpebrarum scabies pruriginosa, see Ophthalmia tarsi.

OC'ULIST, *Oculis'ta, Ophthalmia'ter, Med'icus ocula'rius* seu *ophthal'micus*, (from *oculus*.) One who occupies himself chiefly with the management of diseases of the eye.

OCULISTIQUE, Ophthalmology.

OCULOMOTORIUS, Motor oculi.

Oculomuscular Nerves, Common, Motores oculorum.

OCULUM MOVENS PRIMUS, Rectus internus oculi—o. Movens quartus, Rectus inferior oculi—o. Movens secundus, Rectus externus oculi—o. Movens tertius, Rectus superior oculi.

OCULUS, (*ωκος*,) Eye—o. Bovinus, Hydrophthalmia—o. Bovis, Chrysanthemum leucanthe-

mum—o. Bubulus, Hydrophthalmia—o. Cæsius, Glaucoma—o. Duplex, Binoculus—o. Elephantinus, Hydrophthalmia—o. Genu, Patella—o. Lacrymans, Epiphora—o. Leporinus, Lagophthalmia—o. Purulentus, Hypopyon—o. Simplex, see Monoculus—o. Typhonis, Scilla.

OCY, (ωκυς, 'quick.') In composition, quick.

OCYMUM, see Ocimum—o. Sylvestre, Clinopodium vulgare.

OCYODINIC, (*ocy*, and ὠδιν, 'a labor pain.') Ocytocio.

OCYPH'ONUS, (*ocy*, and φονος, 'murder.') An agent that kills speedily.

OCYTOCEUS, (ωκυτοκειος,) Ocytocic.

OCYTOC'IC, *Oxytoc'ic, Ocytoce'us, Ocytoc'ius, Ocyodin'ic, Odinago'gus*, (*ocy*, and τοκος, 'labor.') Any thing that expedites parturition.

OCYTOCIUS, (ωκυτοκιος,) Ocytocic.

OCYT'OCUS, (ωκυτοκος.) A quick or easy labor.

OD. A term employed by Reichenbach to designate an "effective force," which, according to him, not only manifests itself in contact with man, as in the case of magnets, crystals, the hands, &c., but also at distances, as from the sun, moon, and stars; indeed, from all matter. Such a force is termed by him *od'ic*.

ODAXIS'MUS, *Odaxes'mus*, (οδαξησμος, from οδαξω, 'I bite.') *Odontocne'sis, Odontocnes'mus*. A sensation of biting or pricking, as that in the gums which precedes the appearance of the teeth.

ODES, (ωδης.) A suffix, at times having the signification of *oid*, but generally indicating, like *osus* in Latin terms, 'consisting of,' or 'full of.'

ODEUR, Odour.

ODIC, see Od.

ODIN, (ωδιν,) Pain (labour).

ODINAGOGUS, (*odin*, and αγω, 'I lead.') See Ocytocic.

ODINOL'YSIS, (*odin*, and λυσις, 'solution.') Mitigation of labour pains.

ODINOPŒ'IA, (*odin*, and ποιεω, 'I make.') Agents that excite or encourage labour pains.

ODIS, (ωδις,) Pain (labour).

ODME, (οδμη,) Odour.

ODONTAGOGON, (οδονταγωγον, *odonto*, and αγω, 'I draw.') Dentagra.

ODON'TAGRA, (οδονταγρα, from *odonto*, and αγρα, 'a seizure.') A rheumatic or gouty pain in the teeth. Also, Dentagra.

ODONTAL'GIA, (οδονταλγια, from *odonto*, and αλγος, 'pain.') *Den'tium do'lor, Tooth'ache, Odon'tia, O. doloro'sa, Gomphi'asis, Gomphias'mus, Odontodyn'ia*, (F.) *Odontalgie, Douleur des dents, Fluxion sur les dents, Mal de dent* ou *d'amour* ou *de Saint Médard*. A disease dependent upon a variety of causes affecting the cavity of the tooth, but generally owing to caries, which exposes the cavity to the action of the air, and to extraneous matters in general. Hence the treatment consists in plugging the tooth or destroying the sensibility of the nerve by powerful stimulants; and, if these means fail, in extracting the tooth.

ODONTALGIA CARIOSA, Dental gangrene—o. Dentitionis, Dentition—o. Hæmodia, Hæmodia.

ODONTALGIA NERVO'SA, *Neural'gia Denta'lis*. Neuralgia of the teeth. Characterized by periodical pain, shooting with the utmost violence along the branches of the fifth pair distributed to the affected jaw.

ODONTALGIA REMITTENS ET INTERMITTENS; Neuralgia infraörbitaria.

ODONTALGIC, Antiödontalgic.

ODONTALGIE, Odontalgia.

ODONTALGIQUE, Antiodontalgic.

ODONTAMBLYOGMUS, (*odonto*, and αμβλυς, 'blunt.') Hæmodia.

ODONTATROPH'IA, *Atroph'ia Den'tis*, (F.) *Atrophie des Dents*, (*odonto*, and *atrophia*, 'atrophy.') Atrophy of the teeth.

ODONTHÆMODIA, Hæmodia.

ODONTHARPAGA, (*odonto*, and ἁρπαζειν, 'to lay hold of.') Dentagra.

ODONTHYALOPH'THORA, (*odonthyalus*, 'enamel,' and φθορα, 'corruption.') Destruction of the enamel of the teeth.

ODONTHYALUS, (*odonto*, and ὑαλος, 'glass.') Enamel of the teeth.

ODONTHYPERÆSTHESIS, Hæmodia.

ODONTIA, Odontalgia.

ODON'TIA DEFOR'MIS. Deformity of the teeth from error of shape, position, or number.

ODONTIA DENTITIONIS LACTANTIUM, see Dentition (first)—o. Dentitionis puerilis, see Dentition (second)—o. Edentula, see Nefrendes—o. Excrescens, Epulis—o. Incrustans, Odontolithus—o. Stuporis, Hæmodia.

ODONTIASIS, (οδοντιασις,) Dentition.

ODONTIATER, (*odonto*, and ιατρος, 'physician.') Dentist.

ODONTIATRIA, Dentistry.

ODONTIC, Antiödontalgic.

ODONTI'TIS, *Odontophleg'monē*, (*odonto*, and *itis*.) Inflammation of the teeth.

ODONTO, (οδους, gen. οδοντος, 'tooth.') In composition, tooth.

ODONTOBOTHRI'TIS, *Odontophatni'tis, Inflamma'tio alveolo'rum*, (*odontobothrium*, and *itis*.) Inflammation of the alveoli.

ODONTOBOTHRIUM, (*odonto*, and βοθριον, 'a small pit.') Alveolus.

ODONTOCERAM'IC, *Odontoceram'icus*, (*odonto*, and κεραμος, 'potters' earth.') Relating or appertaining to porcelain teeth;—as the '*odontoceram'ic art*,' *Odon'tocer'amotech'ny*, the art of making porcelain teeth.

ODONTOCERAMOTECHNY, see Odontoceramic.

ODONTOCLA'SIS, (*odonto*, and κλασις, 'fracture.') *Fractu'ra den'tis*. Fracture of a tooth.

ODONTOCNESIS, (*odonto*, and κνησις, 'itching.') Odaxismus.

ODONTOCNESMUS, Odaxismus.

ODONTODES, (οδοντωδης,) Odontoid.

ODONTODYNIA, (*odonto*, and οδυνη, 'pain.') Odontalgia.

ODONTOG'ENY, *Odontogen'ia, Odonto'sis*, (*odonto*, and γενεσις, 'generation.') Generation or mode of development of the teeth.

ODONTOGLYPHON, (οδοντογλυφον, from *odonto*, and γλυφειν, 'to hollow.') Dentiscalpium, Gum lancet.

ODONTOGLYPHUM, Dentiscalpium, Gum lanect.

ODONTOG'RAPHY, *Odontogra'phia*, (*odonto*, and γραφη, 'a description.') A description of the teeth.

ODON'TOID, (οδοντοειδης,) *Odontoï'des, Odonto'des, Dentiform'is, Denta'lis, Dentoïdeus, Pyrenoïdes*, (*odonto*, and ειδος, 'shape, resemblance.') An epithet given to the *Processus dentatus* of the second vertebra or axis.

ODONTOID LIG'AMENTS, *Ligamen'ta ala'ria* seu *Mauchar'tii*, (F.) *Ligaments odontoïdiens*, are two strong and short conical fasciculi, whose truncated summits embrace the sides of the odontoid process, and whose bases are fixed in the fossæ at the inner side of the condyles of the occipital bone. Their direction is obliquely outwards and slightly upwards. They enter into the composition of the occipito-axoid articulation, strengthen the junction of the head with the vertebral column, and limit the movement of rotation of the atlas on the axis.

Other ligamentous fibres pass from the highest portion of the processus dentatus to the anterior margin of the foramen magnum of the occipital bone, constituting the *Ligamen'tum suspenso'rium den'tis*.

Odontoid Process, see Axis.

ODONTOL'ITHUS, (F.) *Odontolithe*, (*odonto*, and λιθος, 'a stone.') A sort of incrustation of a yellowish colour, which forms at the coronæ of the teeth, and is called *Tar'tar*, *Tar'tarus Den'tium*, *Odon'tia incrus'tans*, *Cal'culus denta'lis*, (F.) *Tartre des dents*, *T. dentaire*. It consists of seventy-nine parts of phosphate of lime, twelve and a half of mucus, one of a particular salivary matter, and seven and a half of animal substance, soluble in chlorohydric acid. A species of infusoria, *Dentic'ola hom'inis*, has been found in it.

ODONTOL'OGY, *Odontolog''ia*, (*odonto*, and λογος, 'a discourse.') A treatise on the teeth.

ODONTOLOXIA, (*odonto*, and λοξος, 'oblique.') Odontoparallaxis.

ODONTONECROSIS, Dental gangrene.

ODONTOPARALLAX'IS, *Odontolox'ia*, (*odonto*, and παραλλαξις, 'deviation.') Irregularity and obliquity of the teeth, (Prov.) *Snaggle teeth*.

ODONTOPHATNE, (*odonto*, and φατνη, 'a crib, a stall.') Alveolus.

ODONTOPHATNITIS, (*odontophatne*, and *itis*,) Odontobothritis.

ODONTOPHYIA, (οδοντοφυια, from *odonto*, and φυω, 'to grow.') Dentition.

ODONTOPLEROSIS, (*odonto*, and πληροω, 'I fill.') See Filling.

ODONTOPRISIS, (*odonto*, and πρισις, 'gnashing of teeth.') Brygmus, Stridor dentium.

ODONTORRHIZA, (*odonto*, and ῥιζα, 'root.') See Tooth.

ODONTOSEI'SIS, *Odontoseis'mus*, *Den'tium vaeillan'tia*, (*odonto*, and σεισις, 'shaking.') Looseness of the teeth.

ODONTOSEISMUS, Odontoseisis.

ODONTOSIS, Dentition, Odontogeny.

ODONTOSMEGMA, (οδοντοσμηγμα, from *odonto*, and σμηγμα, 'a detersive substance.') Dentifrice.

ODONTOSPHACELISIS, (*odonto*, and σφακελος, 'gangrene.') Dental gangrene.

ODONTOSPHACELISMUS, Dental gangrene.

ODONTOSTERE'SIS, (*odonto*, and στερησις, 'privation.') Loss of the teeth.

ODONTOSYNERISM'US, (*odonto*, and συνερίζειν, 'to strike together.') (F.) *Claquement*. Chattering of the teeth.

ODONTOTECHNY, (*odonto*, and τεχνη, 'art.') Dentistry.

ODONTOTHECA, (*odonto*, and θηκη, 'a sheath.') Dental follicle.

ODONTOTHÈQUE, Dental follicle.

ODONTOTHERAPIA, (*odonto*, and θεραπεια, 'healing.') Dentistry.

ODONTOTHRYPSIS, Odontotripsis.

ODONTOTRIMMA, gen. *Odontotrim'matis*, (*odonto*, and τριβω, 'to rub.') Dentifrice.

ODONTOTRIP'SIS, *Odontothryp'sis*, *Abra'sio den'tium*, (F.) *Usure des Dents*, (*odonto*, and τριψις, 'friction.') Abrasion or wearing away of the teeth.

ODONTOTRYPY, Odontrypy.

ODON'TRYPY, *Odontot'rypy*, *Odontotryp'ia*, (*odonto*, and τρυπαω, 'I perforate.') The operation of perforating a tooth to evacuate purulent matter confined in the cavity of the pulp.

ODOR, gen. *Odo'ris*, Odour.

ODORAMENTUM, (from *odor*,) Odoriferum.

ODORANT, see Odour.

ODORAT, Olfaction.

ODORATIO, Olfaction.

ODORATUS, Olfaction — o. Deperditus, Anosmia.

ODORIFEROUS GLANDS, see Sebaceous glands.

ODORIF'ERUM, (*odor*, and *fero*, 'I carry;') *Odoramen'tum*. A medicine that gives odour or flavour. A scent. A perfume.

ODOROUS, see Odour.

ODOS, ("οδος,) Way.

O'DOUR, *O'dor*, *Od'mē*, *Os'mē*, (F.) *Odeur*. A smell. Odours are subtle particles, constantly escaping from the surface of certain bodies hence called *o'dorous*, (F.) *Odorant*. They act, in some manner, by actual contact with the nerves of the Schneiderian membrane, and give occasion to the sense of smell or olfaction,

ODOUS, (οδους, gen. οδοντος,) see Teeth.

OD'YNE, (οδυνη, 'pain,') *Do'lor*, *Odyne'ma*. A very common suffix to words; as in Pleurodyne.

ODYNEMA, gen. *Odyne'matis*, (οδυνημα,) Odyne.

ODYNEPHO'BIA, (*odyne*, and φοβεω, 'I fear,') Fear or dread of pain.

ODYNODES, (οδυνωδης,) Painful.

ODYNOPOET'IC, *Odynopoe'tieus*, *Dolorif'ieus*, *Dolorif'ic*, (F.) *Odynopoétique*, *Dolorifique*, (*odyne*, and ποιειν, 'to make,') Causing pain.

ŒCIOMA'NIA, *Oikeioma'nia*, (οικειος, 'belonging to a household or family,' and *mania*.) A form of moral insanity, characterized by domestic perversity.

ŒCONOMIA, (οικονομια, from οικος, 'a house,' and νομος, 'law,') Economy — œ. Animalis, Physiology.

ŒDALICUS, (οιδεω, 'to swell,') Œdematous.

ŒDALIUS, (οιδαλεος,) Œdematous.

ŒDE'MA, gen. *Œde'matis*, (οιδημα, 'a swelling,') *Hydron'eus*, *Œdemat'ia*, *Hyderon'eus*, *Hydaton'eus*, *Hydrocœde'ma*, *Hydrede'ma*, *Hy'drops cellula'ris ar'tuum*, *Phlegma'tia*, *Leucophlegma'tia*, *Ecphy'ma œdemat'icum*, (F.) *Œdème*, *Œdématie*, *Enflure*. Swelling produced by the accumulation of a serous fluid in the interstices of the areolar texture. This swelling is soft; yields under the finger; preserves the impression for some time, and is pale and without pain. It presents the same characters as anasarca, which is general œdema. Its etiology and treatment are also the same. See Anasarca.

Œdema Acutum, see Anasarca.

Œdema Arsenica'lis. The swelling of the eyelids and face, induced by continued use of the preparations of arsenic.

Œdema Calidum, see Anasarca — œ. Capitis Hydrocephalus externus.

Œdema Cer'ebri, (F.) *Œdème du cerveau*. Œdema of the brain. A condition of the cerebral pulp, in which there is an infiltration of serous fluid into it, so that it appears more moist or watery than common; and, when sliced or pressed, small drops of water are seen to ooze out.

Œdema, Compact, Induration of the cellular tissue — œ. Cruentum, Suggillation — œ. Febrile, see Anasarca—œ. Fugax, Anathymiasis.

Œdema of the Glot'tis, *Œ. glot'tidis*, *Œdem'atous Laryngi'tis* or *angi'na*, *Laryngi'tis submuco'sa* seu *œdemato'sa* seu *seropurulen'ta*, *Hy'drops glot'tidis*, *Angi'na aquo'sa* seu *laryngœ'a œdemato'sa*, *Submu'cous Laryngi'tis*, (F.) *Laryngite œdémateuse*, *L. œdémateuse et séro-purulente* ou *sous-glottique* ou *sous-muqueuse*, *Angine laryngée œdémateuse*, *Œdème de la glotte*. A disease consisting of serous or seropurulent infiltration into the submucous tissue of the glottis. The symptoms resemble those of croup; but the disease attacks the adult rather than the child. The age is, indeed, a principal means of diagnosis between the two affections.

The disease is almost always fatal. The treatment has to vary according to the accompanying general symptoms.

Œdema Hystericum, Anathymiasis.

Œdema Lacteum, Phlegmatia dolens.

Œdema of the Lungs, *Œ. pulmo'num*, *Pneumoeh'ysis*, *Pneumonœde'ma*, *Hy'drops* seu *anasar'ca Pulmo'num*, *Hydropneumo'nia*, (F.) *Œdème du Poumon*. Laënnec has so called the infiltration of serum into the tissue of the lung, carried to such an extent as to diminish its permeability

to air. It is not an uncommon sequela of pneumonia, and the major exanthemata. The respiration is laborious; the respiratory murmur scarcely perceptible, although the thorax is largely expanded, and there is a slight *râle crépitant*, particularly at the base and inferior part of the lung. The sound on percussion is clear, and on both sides equally so. The cough is attended with aqueous expectoration. In some cases the respiration becomes peurile in a small portion of the summit of the lung.

ŒDEMA NEONATORUM, Induration of the cellular tissue — œ. Palpebrarum, Hydroblepharon — œ. Puerperarum, Phlegmatia dolens—œ. Pulmonum, Œdema of the lungs — œ. Pulmonum chronicum, Hydropneumonia — œ. Scroti aquosum, Oschydrœdema — œ. Scroti cruentum, Oschæmatœdema—œ. Scroti purulentum, Oscheopycedema — œ. Scroti urinosum, Urocele — œ. Spasticum, Anathymiasis—œ. Uvulæ, Staphylœdema.

ŒDEMATIA, Œdema.

ŒDÉMATIE, Œdema.

ŒDEMATOSARCA, Œdemosarca.

ŒDEMATOSCHEOCE'LE, *Œdemoscheoce'lē, Oscheoce'lē œdemat'ica*. Oscheocele with œdema of the scrotum.

ŒDEM'ATOUS, *Œdemato'sus, Œdemat'icus, Œdemato'des, Œdal'ius, Œdal'icus, Edem'atous*, (F.) *Œdémateux*. Affected with œdema, (F.) *Œdématie;* of the nature of œdema.

ŒDÈME, Œdema — *œ. du Cerveau*, Œdema cerebri — *œ. Douloureux des femmes en couche*, Phlegmatia dolens—*œ. de la Glotte*, Angina œdematosa, Œdema of the glottis — *œ. des Nouvelles accouchées*, Phlegmatia dolens—*œ. actif des Nouvelles accouchées*, Phlegmatia dolens—*œ. du Tissu cellulaire des nouveau-nés*, Induration of the cellular tissue.

ŒDEMOSAR'CA, (*œdema*, and *σαρξ*, gen. *σαρκος*, 'flesh,') *Œdematosar'ca*. A species of tumour mentioned by M. A. Severinus, which holds a middle place between œdema and sarcoma.

ŒDEMOSCHEOCELE, Œdematoscheocele.

ŒIL, (*oculus*,) Eye — *œ. de Bœuf*, Anthemis tinctoria — *œ. Double*, Binoculus — *œ. de Lièvre*, Lagophthalmus—*œ. Simple*, see Monoculus.

ŒILLET GIROFLÉE, Dianthus caryophyllus.

ŒILLIÈRE, (from *œil*,) Scaphium oculare.

ŒNAN'THE, *Œ. crocata* seu *chærophyl'li fo'liis, Hem'lock drop'wort, Hem'lock water drop'wort. Nat. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia, (*œnos*, and *ανθος*, 'a flower;' its flowers smelling like the vine.) A violent poison of the acro-narcotic class. Its juice has been recommended in certain cutaneous diseases; but it is scarcely ever used. It is employed in fomentations.

ŒNANTHE AQUATICA, Phellandrium aquaticum —œ. Phellandrium, Phellandrium aquaticum—œ. Striata rigida, Seseli tortuosum.

ŒNELÆ'ON, (*œnos*, and *ελαιον*, 'oil.') A mixture of oil and wine. Also, rectified spirit or alcohol.

ŒNODES, (*οινωδης*, from *œnos*, and *odes*,) Vinous.

ŒNOG'ALA, gen. *Œnogalac'tis*, (*οινογαλα*, from *œnos*, and *γαλα*, 'milk,' — 'a mixture of wine and milk.') According to some, wine as warm as new milk.

ŒNOG'ARON, *Garum vino mistum*. Wine mixed with garum.

ŒNOIDES, (*οινοειδης*, from *œnos*, and *ειδος*, 'resemblance,') Vinous, Winelike.

ŒNOLATURE, (from *œnos*,) see Vinum.

ŒNOLÉ, see Vinum.

ŒNOLOTIF (F.). A name given by M. Béral to a medicine intended for external use, whose excipient is wine.

ŒNOMA'NIA, *Oinoma'nia*, (*œnos*, and *mania*.) Delirium tremens. Properly, wine-mania. An insatiable desire for intoxicating liquors.

Œ'NOMEL, *Œnom'eli*, (*œnos*, and *μελι*, 'honey.') *Mel vino'sum, Mul'sum Vino'sum*. Honey wine. Wine mead. See Hydromel.

ŒNOPHLYGIA, (*οινοφλυγια*, from *œnos*, and *φλυω*, 'to overflow,') Temulentia.

ŒNOPHLYXIS, (*οινοφλυξις*,) Temulentia.

ŒNOS, (*οινος*,) Wine.

ŒNOSTAGMA, gen. *Œnostag'matis*, (*οινος*, and *σταζω*, 'to distil,') Spiritus vini rectificatus.

ŒNOTHE'RA BIEN'NIS, (*œnos*, and *θηρ*, 'wild,' [?]) *Œ. Mollis'sima* seu *murica'ta* seu *gauroi'des, Ou'agra, Eve'ning Prim'rose, Tree Primrose, Primrose tree, Cureall, Sca'bish*. An indigenous plant, common on the borders of fields, and in natural hedges. *Ord.* Onograceæ. *Sex. Syst.* Octandria Monogynia. Its properties are mucilaginous and slightly acrid. A decoction has been used in cases of infantile and other eruptions.

ŒNOTHERA GAUROIDES, Œ. biennis—œ. Muricata, Œ. biennis.

ŒSOPHAGE, Œsophagus.

ŒSOPHAGE'AL, or ŒSOPHAG''EAL, *Œsophagæ'us*, (from *œsophagus*,) (F.) *Œsophagien*. Relating or belonging to the œsophagus.

ŒSOPHAGEAL AP'ERTURE OF THE DI'APHRAGM, *Fora'men œsophage'um*, (F.) *Ouverture œsophagienne du diaphragme*. An opening in the diaphragm for the passage of the œsophagus.

ŒSOPHAGEAL APERTURE OF THE STOM'ACH. A name given to the superior or *cardiac* orifice of the stomach, to distinguish it from the inferior or *pyloric*. See Cardia.

ŒSOPHAGEAL MUS'CLE, *Œsophagæ'us*. Some anatomists have given this name to the transverse muscular fibres which surround the œsophagus at its upper extremity.

ŒSOPHAGEAL TUBE, see Tube, œsophageal.

ŒSOPHAGEURYS'MA, gen. *Œsophageurys'matis, Œsoph'agus succenturia'tus*, (*œsophagus*, and *ευρυσμα*, 'dilatation.') Dilatation of the œsophagus.

ŒSOPHAGIALGIA, (*œsophagus*, and *αλγος*, 'pain,') Œsophagismus.

ŒSOPHAGIARCTIA, (*œsophagus*, and *arctare*, 'to make narrow,') Dysphagia constricta.

ŒSOPHAGIEN, Œsophageal — œ. (muscle), Constrictor Œsophagi.

ŒSOPHAGIS'MUS, *Œsophagis'mus*, Spasm of the œsophagus, *Dysphag'ia Spasmod'ica* seu *Spas'tica* seu *Nervo'sa, Strictu'ra œsoph'agi spasmod'ica, Œsophagial'gia, Œsophagospasm'us, Tenes'mus Gu'læ*, (F.) *Ténesme de l'œsophage*. By some used synonymously with œsophagitis, dysphagia, and contraction of the œsophagus.

ŒSOPHAGI'TIS, *Angi'na* seu *Cynan'chē œsophagæ'a, Dysphag'ia inflammato'ria, Inflammat'io œsoph'agi* seu *Gu'læ*, (F.) *Œsophagite, Angine œsophagienne*, (*œsophagus*, and *itis*.) Inflammation of the œsophagus.

ŒSOPHAGODYN'IA, (*œsophagus*, and *οδυνη*, 'pain.') Pain in the œsophagus.

ŒSOPHAGOPATHI'A, *Mor'bus Œsoph'agi*, (*œsophagus*, and *παθος*, 'affection.') A morbid condition of the œsophagus.

ŒSOPHAGOPLE'GIA, *Dysphag'ia paralyt'ica. Læmoparaly'sis*, (*œsophagus*, and *πληγη*, 'a stroke.') Paralysis of the œsophagus.

ŒSOPHAGORRHAG''IA, (*œsophagus*, and *ῥαγη*, 'a rupture.') Hemorrhage from the œsophagus.

ŒSOPHAGORRHŒ'A, (*œsophagus*, and *ῥεω*, 'I flow.') Discharge of blood or mucus from the œsophagus.

ŒSOPHAGOSPAS'MUS, (*œsophagus*, and *σπασμος*, 'spasm.') Spasm of the œsophagus.

ŒSOPHAGOSTENOMA, (*œsophagus*,

στενος, 'narrow,' and *oma.*) Dysphagia constricta.

ŒSOPHAGOT'OMY, *Œsophagotom'ia,* (F.) *Œsophagotomie,* (*œsophagus,* and τεμνειν, 'to cut.') An incision made into the œsophagus for the purpose of extracting foreign bodies from it.

ŒSOPH'AGUS, (οισοφαγος, from οιω, future οισω; I carry,' and φαγω, 'I eat;') *Gu'la, Fis'tula cibu'lis, Fis'tula* seu *Infundib'ulum Ventric'uli, Vi'a stom'achi et ven'tris, Glut'tus,* (F.) *Œsophage.* The *Gullet.* A musculomembranous canal, cylindrical, and depressed from before to behind, which extends from the inferior extremity of the pharynx to the upper orifice of the stomach. At its origin, it is situate in the median line; but beneath the larynx, it deviates to the left, and in the chest experiences different reflections. In its cervical portion, it corresponds, behind, with the spine; before, with the larynx and trachea; and, at the sides, it is close to the primitive carotids, internal jugular veins, par vagum, recurrent nerves, &c. In its inferior or thoracic portion, the œsophagus is entirely contained in the posterior mediastinum; and enters the abdomen through the œsophageal aperture, *Foro'men œsophage'um,* of the diaphragm. The œsophagus is composed of a very strong muscular layer, sometimes called *Tu'nica vagina'lis gu'læ;* formed, itself, of two sets of fibres, the *external* being generally longitudinal, the *internal* transverse or annular; and of a mucous membrane which is soft, fine, thin, and white, especially at its lower part. It is continuous, above, with the mucous membrane of the pharynx. The mucous follicles, found beneath it, are not numerous, and have been called *Œsophage'al glands.* The arteries of the œsophagus proceed, in the neck, from the thyroid; in the chest, from the bronchial arteries and directly from the aorta;—in the abdomen, from the inferior phrenic, and coronaria ventriculi. Its veins empty themselves into the inferior thyroid, the vena cava superior, the internal mammary, azygos, bronchial, phrenic, and coronaria ventriculi. Its lymphatics pass into the ganglia surrounding it. Its nerves are afforded by the pharyngeal and pulmonary plexuses; by the cardiac nerves; the thoracic ganglia, and, especially, by the pneumogastrics and their recurrent branches.

ŒSOPHAGUS SUCCENTURIATUS, Pharyngocele.

ŒSTROMANIA, (οιστρος, 'imperious erotic impulse,' and *mania,*) Nymphomania.

ŒS'TRUAL, *Œstrua'lis,* (from *œstrum.*) Appertaining or relating to orgasm, especially venereal orgasm.

ŒSTRUATION, see Heat.

ŒSTRUM, Clitoris, Orgasm.

ŒSTRUM VEN'ERIS, *Œ. vene'reum, Œs'trus vene'reus;* (οιστρος, *œstrus,* 'imperious erotic impulse.') A vehement desire for sexual intercourse. Orgasm. With some, *œstrum* signifies Clitoris.

ŒSTRUS, (οιστρος,) Clitoris, Orgasm, see Ectozoa —œ. Venereus, Œstrum venereum.

Œ'SYPUS, (οισυπος, from οις, 'a sheep.') The greasy matter of unwashed wool; formerly employed in friction in diseased joints.

ŒUF, Ovum, *Œ. de De Graaf,* Folliculi Graafiani—*œ. de Naboth,* Nabothi glandulæ.

OFFICE, PHYSICIAN'S or SURGEON'S, Iatrion.

OFFICINA, for *Opificina,* (from *opifex,* (*opus,* and *facio,*)'a workman,') 'a shop,' Pharmacopolium.

OFFIC"INAL, *Officina'lis.* An epithet for medicines found in the shop of the apothecary, ready prepared — *usua'lia;* in opposition to *majistral* or *extemporaneous,* — those prepared after the prescription of the physician.

OFFIUM, Affion, Opium.

OFFSPRING, Epigone.

OFFUSCATIO, (*of,* for *ob,* and *fuscare,* 'to make dark,') Amaurosis.

OGLA, Oegala.

OGNON or *OIGNON,* (from *unio,*) Allium cepa, a Corn — *o. Marin,* Scilla.

OHI'O, MIN'ERAL WA'TERS OF. *Yel'low Spring* is a chalybeate, situate in Greene county, 64 miles from Cincinnati. It is somewhat frequented.

OID, *Oi'des,* (οειδης, from ειδος, 'form, resemblance.') A suffix, denoting 'resemblance,' as in ethmoid, sphenoid, &c.

OÏDIUM ABORTIFACIENS, (ωον, 'an egg,' and ειδος, 'resemblance,') see Ergot—o. Albicans, Aphthaphyte—o. Schoenleini, see Porrigo favosa.

OIE, Sorbus domestica.

OIGNON, Ognon.

OIKEIOMANIA, Œciomania.

OIKIOMIASM'ATA, *Oikeiomiasm'ata,* (from οικειος, belonging to a household and *miasmata.*) Morbific emanations from domestic sources.

OIL, ([Sax.] æl,) *O'leum, Elæ'on,* (F.) *Huile;* (from ελαια, 'the olive.') A collective name, under which two classes of fluids are included, very different from each other: those belonging to the one class, are viscid, mawkish, or almost insipid; those of the other are nearly devoid of viscidity, and are caustic and very volatile. The former are called *fat* or *fixed oils;* the latter *volatile* or *essential oils* or *essences.*

OIL, see Ricinus communis.

OIL OF ALMONDS, Oleum amygdalarum — o. of bitter Almonds, Oleum amygdalæ amaræ — o. of Amber, rectified, see Succinum — o. of Anda, see Anda — o. Animal, Oleum animale — o. Animal, of Dippel, Oleum animale Dippelii — o. of Bay, Daphnelæon — o. of Bays, Oleum laurinum — o. and Beeswax, Unguentum ceræ — o. of Ben, see Guilandina moringa—o. of Benjamin or Benzoin, Oleum benzoini — o. Benne, see Sesamum orientale — o. of Bergamot, see Bergamot.

OIL OF BONES, see Marrow.

OIL, BRITISH. An empirical preparation often used in cases of sprains. A committee of the Philadelphia College of Pharmacy recommended the following form for its prenaration.—*Ol. Terebinth., Ol. Limi usitatis.* āā f℥iij, *Ol. Succini., Ol. Juniper.* āā f℥iv, *Petrol. Barbadens.* f℥iij, *Petrol. American.* (*Seneca Oil,*) f℥j. M.

OIL OF CACAO, Butter of Cacao — o. of Cade, see Juniperus Oxycedrus—o. Camphor, see Camphor — o. of Canada fleabane, Oleum Erigerontis Canadensis—o. Carron, Linimentum aquæ calcis—o. of the Cashew nut, see Anacardium occidentale—o. Castor, see Ricinus communis — o. of Chabert, Oleum animale empyreumaticum Chaberti—o. of Cinnamon, see Laurus cinnamomum—o. of Cloves, Eugenia caryophyllata—o. Cod, O. Jecoris aselli — o. Codliver, O. Jecoris aselli — o. of Copaiba, Oleum Copaibæ — o. Cornspirit, Oil, fusel — o. of Cubebs, see Piper cubeba — o. of Cypress, Cyprinum oleum — o. of Dill, see Anethum graveolens —o. Dippel's, Oleum animale Dippelii—o. of Egg, see Ovum—o. Ethereal, Oleum Æthereum—o. of Fennel, see Anethum — o. of Fern (male,) see Polypodium filix mas — o. Flaxseed, see Linum usitatissimum.

OIL, FU'SEL, *Al'cohol amyl'icum* (Ph. U. S., 1863), *Fermento'leum Sola'ni, Fou'sel oil, Pota'to oil, Grain oil, Corn'spirit oil, Pota'to spir'it oil, Oil of pota'toes, Amyl'ic al'cohol, Hy'drated ox'ide of am'yle,* ([G.] Fusel, an epithet for poor brandy.) An acrid volatile oil, formed in the manufacture of potato or grain brandy, which is not easily separable from it, and is obtained by continuing the process after the ordinary spirit has ceased to come over. Its chemical constitution is analogous to that of alcohol. It exhales a powerful and peculiarly suffocating odour.

S. g. ·818. In small doses it is highly stimulating,—acting like narcotics in general. In large doses it destroys the mucous membrane of the stomach. It is used by the British Pharmacopœia in the preparation of Sodæ valerianas.

Oil of Geranium, Oleum graminis Indici—o. Gingergrass of Nemaur, Oleum graminis Indici—o. Grain, Oil, fusel—o. Grass of Nemaur, Oleum graminis Indici.

Oil, Haer'lem. An empirical preparation supposed to consist chiefly of petroleum, turpentine, and balsam of sulphur. Used internally in renal and rheumatic affections.

Oil, Kekune, see Aleurites triloba—o. Krumholz, see Pinus mughos—o. Kukin, see Aleurites triloba—o. of Lemons, see Citrus medica—o. Lily, see Lilium candidum—o. Linseed, see Linum usitatissimum—o. of Mace, expressed, see Myristica—o. of Mastich, see Pistacia Lentiscus—o. of Mucilages, Oleum e mucilaginibus—o. Neatsfoot, Oleum bubulum—o. of Nicodemus, Nicodemi oleum—o. Nut, Juglans cinerea—o. of Nutmegs, see Myristica moschata—o. Olive, Oleum olivæ—o. Palm, see Cocos butyracea—o. Paper, Pyrothonide—o. Parsley, Apiol—o. Pennyroyal, see Hedeoma pulegioides—o. of Pike, Oleum lucii piscis—o. Poppy, see Papaver—o. of Potatoes, Oil, fusel—o. Potato, Oil, fusel—o. Potato spirit, Oil, fusel—o. Rag, Pyrothonide—o. Red, see Hypericum perforatum—o. Rock, Petroleum—o. Roosa, oleum graminis Indici—o. of Rose Geranium, Oleum graminis Indici—o. of Roses, see Rosa centifolia—o. of Rue, Peganelæon, see Ruta—o. Salad, Oleum olivæ—o. of Scorpion, see Scorpion—o. Seneca, Petroleum, New York—o. Skateliver, see Oleum Jecoris aselli—o. of Spike, Oleum terebinthinæ—o. of Spike, see Lavandula spica—o. of Spikenard, Oleum graminis Indici—o. Sulphuretted, Balsamum sulphuris simplex—o. of Tartar, Liquor potassæ subcarbonatis—o. of Theobroma, Butter of Cacao—o. of Thyme, see Thymus—o. of Tobacco, Oleum tabaci—o. of Turpentine, Oleum terebinthinæ—o. of Turpentine, rectified, Oleum terebinthinæ rectificatum—o. of Valerian, Oleum valerianæ—o. of Vitriol, Sulphuric acid—o. Walnut, Belgaum, see Aleurites triloba—o. Walnut, Spanish, see Aleurites triloba—o. of Wine, Oleum æthereum.

Oils, Animal, Olea animalia—o. Distilled, Olea volatilia—o. Empyreumatic, Olea empyreumatica—o. Essential, Olea volatilia—o. Ethereal, Olea volatilia—o. Expressed, Olea fixa—o. Fatty, Olea fixa—o. Fixed, Olea fixa—o. Fugacious, Olea fugacia—o. Medicinal, Olea medicinalia—o. Volatile, Olea volatilia.

OILY, Oleaginous—o. Grain, Sesamum orientale.

OINOMANIA, Œnomania.

OINOS KRITHES, (οινος κριθης, 'barley wine,') Cerevisia.

OINTMENT, Unguentum—o. of Aconitia, Unguentum Aconitiæ—o. Antimonial, Unguentum antimonii—o. of Antimony, tartarized, Unguentum antimonii.

Ointment, Arsen'ical, (of *Sir Astley Cooper.*) This is made of *Arsenious acid*, ʒj; *Sulphur*, ʒj; *Spermaceti cerate*, ℥j. It is spread on lint, and applied to cancerous sores.

Ointment of Atropia, Unguentum atropiæ—o. Banyer's, Unguentum Calomelanos compositum—o. Basilicon, Unguentum resinæ—o. Bay, Unguentum laurinum—o. of Belladonna, Unguentum belladonnæ—o. of Benzoin, Unguentum Benzoini—o. Blister, Cerate of cantharides—o. Blistering, green, Unguentum lyttæ medicatum—o. Blistering, milder, Unguentum lyttæ—o. Blistering, yellow, Unguentum lyttæ medicatum aliud—o. Blue, Unguentum hydrargyri—o. of Calomel, Unguentum calomelanos—o. of Calomel, compound, Unguentum calomelanos compositum—o. Citrine, Unguentum hydrargyri nitratis—o. of Cocculus Indicus, Unguentum cocculi—o. of Creasote, Unguentum creasoti—o. Cucumber, see Cucumis sativus—o. Cyrillo's, Unguentum muriatis hydrargyri oxygenati medicatum—o. Digestive, simple, Unguentum digestivum simplex—o. Edinburgh, see Unguentum veratri—o. Elder, Unguentum sambuci—o. of Elemi, Unguentum elemi—o. for the Eyes, (Smellome's,) see Ceratum resinæ—o. of Galls, Unguentum gallæ—o. of Galls, compound, Unguentum gallæ compositum—o. Garlic, see Allium—o. of Glycerin, see Fat—o. Golden, Unguentum hydrargyri nitrico-oxidi—o. Golden, Singleton's, see Singleton's golden ointment—o. Goulard's, Ceratum plumbi compositum—o. Green, Unguentum sambuci—o. Hellebore, white, Unguentum veratri—o. Helmerich's, Unguentum sulphuratum alcalinum ad scabiem—o. of Hemlock, Unguentum conii—o. of Hydriodate of Potass, Unguentum potassæ hydriodatis—o. of Iodide of Lead, Unguentum plumbi iodidi—o. of Iodide of Mercury, Unguentum hydrargyri iodidi—o. of red Iodide of Mercury, Unguentum hydrargyri iodidi rubri—o. of Iodide of Sulphur, Unguentum sulphuris iodidi—o. of Iodine, Unguentum Iodini—o. of Iodine, compound, Unguentum iodini compositum—o. Issue, Dr. Physick's, see Unguentum lyttæ medicatum aliud—o. Itch, Unguentum sulphuris compositum—o. Itch, Bailey's, see Unguentum sulphuratum ad scabiem—o. Itch, Bateman's, see Unguentum sulphuratum alcalinum ad scabiem—o. Itch, Helmerich's, Unguentum sulphuratum alcalinum ad scabiem—o. Itch, Jackson's, Unguentum sulphuris compositum—o. of Lard, Unguentum ceræ—o. Lead, compound, Unguentum plumbi compositum—o. of white oxide of Lead, Unguentum oxidi plumbi albi—o. of Lydia, Bacaris—o. Marshmallow, Unguentum de althæâ—o. Mercurial, Unguentum hydrargyri—o. Mercurial, milder, see Unguentum hydrargyri—o. Mercurial, strong, see Unguentum hydrargyri—o. of gray oxide of Mercury, Unguentum oxidi hydrargyri cinerei—o. of nitrate of Mercury, Unguentum hydrargyri nitratis—o. of nitric oxyd of Mercury, Unguentum hydrargyri nitricoöxydi—o. of Mezereon, Unguentum mezerei—o. of Nitrous acid, Unguentum acidi nitrosi—o. of Pitch, Unguentum resinæ nigræ—o. of Pitch, black, Unguentum resinæ nigræ—o. Plunkett's, for cancer, Plunkett's ointment—o. red Precipitate, Unguentum hydrargyri nitricoöxydi—o. of white Precipitate, Unguentum hydrargyri præcipitati albi—o. Resin, Ceratum resinæ flavæ—o. Resin, black, Unguentum resinæ nigræ—o. of Rosewater, Unguentum aquæ rosæ—o. Saturnine, Unguentum plumbi superacetatis—o. Savine, Ceratum Sabinæ—o. Soldier's, Martiatum unguentum—o. of Spanish flies, Cerate of Cantharides, Unguentum lyttæ—o. Spermaceti, Unguentum cetacei—o. of Stramonium, Unguentum stramonii—o. of Subacetate of copper, Unguentum subacetatis cupri—o. of Sugar of lead, Unguentum plumbi superacetatis—o. Sulphur, Unguentum sulphuris—o. Sulphur, compound, Unguentum sulphuris compositum—o. Sympathetic, Hoplochrisma—o. Tar, Unguentum picis liquidæ—o. Tartar emetic, Unguentum antimonii—o. Tobacco, Unguentum Tabaci—o. Tutty, Unguentum oxidi zinci impuri—o. of Veratria, Unguentum veratriæ—o. Verdigris, Unguentum subacetatis cupri—o. Wax, Unguentum ceræ—o. White, Unguentum oxidi plumbi albi—o. Zinc, Unguentum zinci—o. of impure oxide of Zinc, Unguentum oxidi zinci impuri.

OÏOCALYM'MA, gen. *Oïocalymm'atis*, *Oïocalyp'trum*, (ωιον, ωον, 'egg,' and καλυπτειν, 'to cover;') *Membra'na O'vuli cortica'lis.* The membrane of the eggshell.

OKEN'S BODY, Corpus Wolffianum.

OKRA, Hibiscus esculentus.

OLD AGE, Senectus.

OLD MAN, Artemisia abrotanum,

OLD WIFE'S SHIRT, Liriodendron.

O'LEA ANIMA'LIA, *An'imal oils*, (F.) *Huiles animales*. A name given to fixed oils holding in solution the mucilaginous and gelatinous principles of certain animals, as the *Oil of frogs*, *Oil of scorpions*, *Oil of spiders*, &c. Sometimes, also, the term *animal oils* is given to empyreumatic oils, produced during the decomposition of animal substances by heat.

OLEA DESTILLATA, O. Volatilia.

OLEA EMPYREUMAT'ICA, *Empyreumat'ic oils*, (F.) *Huiles empyreumatiques* ou *pyrogénées*, *Pyrélaïnes*. Oils which have an empyreumatic or burnt smell. They are obtained by treating vegetable or animal matters by heat, in close vessels. They do not exist in organized bodies, but are formed during their decomposition by fire. The animal oil of Dippel is an empyreumatic oil.

OLEA, *O. Europæ'a*, *O. sati'va* seu *lancifo'lia* seu *polymor'pha* seu *Gal'lica*, *Oli'va*, *Ol'ive tree*, *Elæ'a*, (F.) *Olivier*; (Fruit) *Olive*. *Nat. Ord.* Jasmineæ. *Sex. Syst.* Diandria Monogynia. The leaves of the olive are bitter, and an extract prepared from them, and a substance called *olivi'na*, the bitter principle of the leaves, have been given in Italy as antiperiodics. The fruit, when pickled, is extremely grateful to some stomachs. Olives, as met with in the shops, are prepared from the green, unripe fruit, repeatedly steeped in water. To this, some quicklime or alkaline salt is added, and, afterwards, they are washed and preserved in a pickle of common salt and water. From this fruit is prepared the *Olive oil* or *Salad oil* of the Pharmacopœias, which is obtained by grinding and pressing the olives, when thoroughly ripe. The finer and purer oil issues first by gentle pressure, and the inferior sort on heating what is left, and pressing it more strongly. See Oleum Olivæ. In Calabria, an odorous resin exudes from its trunk, which is employed as a perfume by the Neapolitans.

A gum flows from certain wild olives, in warm countries, which consists, according to Pelletier, of a resin, a little benzoic acid, and a peculiar substance, called *Ol'ivile*. It is in yellow masses, of a slightly acrid taste, and of a vanilla smell. It is called *O'leæ gum'mi*, *O. resi'na*, and *O. bals'amum*, (F.) *Gomme olivier*, and is esteemed astringent and detersive.

O'LEA FIX'A SEU PIN'GUIA, *Express'ed*, *Fix'ed* or *Fatty oils*, (F.) *Huiles fixes* ou *grasses*, *Oléols*. All the oils obtained from the seeds or pericarps of vegetables, without distillation, and which are viscid, but slightly odorous and sapid; lighter than water, and insoluble in alcohol. The rancidity of oils depends on the absorption of oxygen, and therefore they should be kept in bulk as much as possible, and in narrowneeked bottles, so that a very small surfaee only can be exposed to the air. All the fixed oils are emollient, and, in a certain dose, they act as purgatives and emeties. They are prepared by expressing the fruit or seed containing them.

OLEA FUGA'CIA, *Fuga'cious oils*, (F.) *Huiles fugaces*. A name given to oils which are so volatile that, in order to obtain them, reeourse must be had to a different process from that employed for other essential oils. Such are the oils of jessamine, lily, violet, &c.

OLEA GALLICA, O. Europæa — o. Lancifolia, O. Europæa.

OLEA MEDICINA'LIA, *Medic''inal oils*, (F.) *Huiles Médicinales*, *Eléolés*, *Solutions parles huiles*. A name given to oils prepared by macerating, infusing or boiling medicinal substanees in olive or any other fixed oil. These oils may then be regarded as oily solutions of certain medicinal substances; whence they can never be simple. They have, however, been divided into *simple* and *compound medicinal oils*. To the former belong the *Oils of St. John's wort*, of the *Solanum nigrum*, &c.; to the other — which have often been called *Oily balsams*, (F.) *Baumes huileux* — the *Balsams of Fioraventi*, *Metz*, &c. Medicinal oils are, almost always, employed externally.

OLEA POLYMORPHA, O. Europæa—o. Sativa, O. Europæa.

OLEA VOLATIL'IA, *O. destilla'ta*. *Æthero'lea*, *Vol'atile*, *Ethe'real*, *Essen'tial*, or *Distil'led Oils*, *Es'sences*, (F.) *Huiles volatiles* ou *essentielles* ou *distillées* ou *éthérées*, *oléolats*, *oléules*. Oils found in aromatic vegetables, and in every part of them, except in the interior of the seeds. The majority are obtained by distillation; but some by expression. They possess unctuosity, inflammability, and viscidity, like the fixed oils; but they are generally odoriferous, pungent, and acrid. The greater part are lighter than water; but some are heavier, and congeal at a moderate temperature. They dissolve, in small quantity, in distilled water, by simple agitation. Almost all are soluble in alcohol. The odour and taste are the usual tests of their goodness. To preserve them, they should be kept in a cool place, in small bottles, quite full and well corked. Volatile oils are possessed of the aromatic properties of the plants whence they are obtained. They are all, when applied externally, stimulant and rubefacient. Pharmaceutical preparations, in which substances are dissolved in volatile oils, (F.) *Solutions par les huiles volatiles*, are termed by Béral, *Myrolés*.

OLEAG''INOUS, *Oleagino'sus*, *Oleo'sus*, (F.) *Oléagineux*; (from *oleum*.) Oily; containing oil, —as 'an *oleaginous* or *oily* mixture.'

OLEA'MEN, gen. *Olea'minis*, *Oleamen'tum*, (from *oleum*.) Any soft ointment prepared of oil.

OLEANDER, (from *olea*, 'the olive,') Rhododendron chrysanthemum.

OLECRANARTHRI'TIS, (*olecranon*, *αρθρον*, 'joint,' and *itis*,) Inflammation of the elbow joint.

OLECRANARTHROC'ACE, (*olecranon*, *αρθρον*, 'articulation,' and *κακια*, 'vice or disease.') Inflammation of the articular surfaces of the elbow.

OLECRAN'IAL, (F.) *Olécranien*. Relating or belonging to the olecranon.

OLECRANOID CAVITY, see Ulna.

OLEC'RANON, *Olecra'non*, *Olec'ranum*, (*ωλεκρανον*,) *Olec'ranon mob'ilē*, (F.) *Olécrane*, (*ωλενη*, 'the elbow,' and *κρανον*, 'the head.') *Acrole'nion*, *Additamen'tum neca'tum*, *An'con*, *Proces'sus ancone'us* seu *uncina'tus*, *Glans* seu *Coro'na* seu *Coro'na poste'rior* seu *Additamen'tum unca'tum Ul'næ*, *Ver'tex Cu'biti*, *Patel'la fix'a*, *Ros'trum exter'num* seu *poste'rius*, *Top of the cubit*. Head or protection of the elbow. A large process at the upper extremity of the ulna, on which we lean. When this process is fractured, it is apt to be drawn up by the triceps, and much care is required to keep the parts in apposition.

OLEFIANT GAS, CHLORIDE OF, see Anæsthetic.

OLEIN, (from *oleum*,) see Fat—o. Codliver, see Oleum jecoris aselli.

OLENE, (*ωλενη*,) Ulna.

OLEOCERATUM, Cerate — o. Aquâ subactum, Ceratum Galeni.

OLÉO-CÉROLÉ, Cerate.

OLÉOLATS, Olea volatilia.

OLÉOLÉS, Olea volatilia.

OLÉOLS, Olea fixa.

O'LEORES'IN, *O'leo-resi'na*. A resin dissolved in volatile oil. The oleo-resins are made by passing ether through the powdered drug by displace-

ment, and evaporating the ether, until the liquid is of an oily consistence. They not only contain the resin but the essential oil of the drug.

Oleoresin of Capsicum, Oleoresina Capsici—o. of Cubebs, Extractum Cubebæ fluidum—o. of Ginger, Oleoresina Zingiberis — o. of Lupulin, Oleoresina Lupulinæ — o. of Pepper, Extractum Piperis fluidum.

OLEORESINA, Oleoresin.

Oleoresi'na Cap'sici, *Oleores'in of Cap'sicum.* (Prepared by the action of *ether* on *capsicum* powder, by displacement, and evaporating the ether.)

Oleoresina Cubebæ, Extractum Cubebæ fluidum.

Oleoresina Lupuli'næ, *Oleoresin of Lu'pulin.* (Prepared like Oleoresina Capsici.)

Oleoresina Piperis, Extractum Piperis fluidum.

Oleoresina Zingib'eris, *Oleoresin* or *Pip'eroid of Ginger.* (Prepared by the action of *ether* and *alcohol* on ginger powder, by displacement, and evaporating the volatile part.) Used in the formation of ginger-drops chiefly.

OLÉOSACCHAROLÉ, Elæosaccharum.

OLEOSACCHARUM, Elæosaccharum.

OLEOSUS, Oleaginous.

OLERA, (pl. of *olus*, 'a potherb,') see Lachanon.

OLETTE, MIN'ERAL WA'TERS OF. At Olette, in the department Pyrénées Orientales, is a thermal spring, which raises the thermometer to 190° Fah. It is the hottest in France.

OLÉULES, Olea volatilia.

OLEUM, (from *olea*, 'the olive,') Oil—o. Abietis, see Pinus picea — o. Absinthii, Artemisia absinthium, (oil of) — o. Acusticum, *Huile acoustique.*

O'leum Æthe'reum, *Spir'itus æ'theris aleo'sus, Æthe'real oil (formed in the distillation of ether), O'leum vi'ni, Oil of wine, Heav'y oil of wine, Sweet oil of vit'riol,* (F.) *Huile douce de vin.* A peculiar oleaginous matter, obtained by continuing the distillation, after the whole of the sulphuric ether has passed over in the process for the preparation of the latter. It is used only as an ingredient in the compound spirit of ether. It is officinal in the Ph. U. S.

Oleum Ammoniatum, Linimentum ammoniæ fortius.

Oleum Amyg'dalæ Ama'ræ, *Oil of Bit'ter Al'monds.* An oil, obtained by distilling with water the kernels or the fruit of Amygdalus communis, variety *Amara.* Its action is like that of hydrocyanic acid — four drops having destroyed a dog. Dose, a quarter of a drop to a drop. A drop to a fluidounce of water forms a wash, which has been used in Prurigo senilis, and other forms of itching.

Oleum Amygdala'rum, *Oleum amyg'dalæ, O. A. dulcis,* (Ph. U. S. 1863,) *Oil of Almonds.* (F.) *Huile d'amandes. (Expressed from sweet almonds, of Amygdalus communis.* ℥xvj of almonds yield ℥v of oil.) It is inodorous, insipid, and of a pale straw colour, and is employed as a demulcent and emollient.

Oleum Anacardii, see Anacardium occidentale.

Oleum Anima'lē, *An'imal oil,* (F.) *Huile animale.* An oil obtained by the decomposition of the immediate principles of animals, subjected to the action of heat. It is fetid, and always contains a certain quantity of carbonate of ammonia. See Olea empyreumatica. The name *animal oil* is sometimes also given to the fat contained in the fatty vesicles. The composition of this fat does not, indeed, differ from that of the fixed oils.

Oleum Animalē Dippe'lii, *O. Cor'nu Cer'vi, O. C. C. rectifica'tum, O. pyroanima'lē depura'tum* seu *anima'lē æthe'reum, Pyro'leum os'sium rectifica'tum, An'imal oil, An'imal oil of Dip'pel,* (F.) *Huile animale de Dippel* ou *de corne de cerf,* is obtained by distilling animal matters, especially hartshorn, on the naked fire. The carbonate of ammonia, which it contains, renders it partly soluble in water, and communicates to it the stimulant properties for which it is used in medicine. It is employed as an antispasmodic.

Oleum Anima'lē Empyreumat'icum Chaber'ti, *O. Empyreumat'icum* seu *anthelmin'ticum* seu *contra tæ'niam Chaber'ti, Empyreumat'ic oil of Chab'ert, Oil of Chab'ert,* (F.) *Huile anthelmintique de Chabert,* is made by adding one part of *animal oil* to three parts of *oil of turpentine,* leaving them to combine for four days, and then distilling three parts. An effective anthelmintic. Dose, a teaspoonful three times a day.

Oleum Animaliza'tum per Infusio'nem, (F.) *Huile animalisée par infusion, H. aromatique* ou *de petits chiens.* A preparation, formerly esteemed tonic and cephalic. It was obtained by boiling new-born puppies in oil, first depriving them of their blood, skin, and intestines. When the decoction was cold, origanum, thyme, pennyroyal, St. John's wort, and marjoram were added.

Oleum Anisi, see Pimpinella anisum — o. Anthelminticum Chaberti, Oleum animale empyreumaticum Chaberti—o. Anthemidis, see Anthemis nobilis—o. Aurantii, see Citrus aurantium—o. Balaninum, Guilandina moringa (oleum) — o. Balsami, see Amyris opobalsamum.

Oleum Benzo'ini, *Oil of Ben'zoin* or *Ben'jamin.* An oil obtained by heating, in a sandbath, the matter which remains after benzoic acid has been separated from benzoin by the aid of heat. It has been regarded as balsamic and sudorific.

Oleum Bergamii, see Bergamot.

Oleum Bu'bulum, *Neat'sfoot oil,* (F.) *Huile de pieds de bœuf.* It is obtained by boiling in water for a long time the feet or bones of the beef—*Bos domes'ticus*—previously deprived of the hoof. It is introduced into the officinal list of the Ph. U. S. as an ingredient of the ointment of nitrate of mercury.

Oleum Cacao Spissatum, Butter of Cacao—o. Cadinum, see Juniperus oxycedrus — o. Cajuputi, Caieput (oil) — o. Camphoræ, see Camphor — o. Camphoratum, Linimentum camphoræ—o. Carapæ, see Carapa Guianensis — o. Cari seu Carui, see Carum — o. Caryophylli, see Eugenia caryophyllata.

Oleum Ced'rinum, *Essentia de cedra,* (F.) *Huile de cédrat.* The oil of the peel of citrons, obtained in Italy in a particular manner, without distillation.

Oleum Chaberti, O. animale empyreumaticum Chaberti—o. Chenopodii, see Chenopodium anthelminticum—o. Cicinum, see Ricinus communis—o. Cinnamomi, see Laurus cinnamomum—o. Contra Tæniam Chaberti, Oleum animale empyreumaticum Chaberti.

Oleum Copai'bæ, *Oil of Copaï'ba,* (*Copaib.* ℥xij; *Aquæ,* Oxvj. Distil three gallons; separate the oil; return the water to the copaiba, and again distil three gallons. Separate the oil, and add it to the other. Ph. U. S.) Dose, gtt. x to xxx.

Oleum Cornu Cervi, O. animale Dippelii—o. Cubebæ, see Piper cubeba.

Oleum Erigeron'tis Canaden'sis, *Oil of Canada Fleabane.* (By distillation from the herb.)

Oleum Euphorbiæ Lathyridis, see Euphorbia lathyris — o. Fixum nucum cocos butyraceæ, see Cocos butyracea—o. Fœniculi, see Anethum—o. Gabianum, Petroleum — o. Gallinæ, Alkale — o. Gaultheriæ, see Gaultheria — o. Hedeomæ, see Hedeoma pulegioides — o. Hyperici, see Hyperi-

cum perforatum — o. Infernale, Jatropha cureas (oil)

Oleum Gram'inis In'dici, *Grass oil* of Nemaur, *Gin'gergrass oil, Roosa oil;* called, by the perfumers, *oil of gera'nium,* and *oil of rose geranium,* and occasionally sold as *oil of spikenard,* is obtained from *Andropo'gon cal'amus aromat'icus* of India. It is used as a perfume, and like the essential oils in general.

Oleum Jecinoris Aselli, Oleum jecoris aselli.

Oleum Jec'oris Asel'li, *O. Mor'rhuæ* (Ph. U. S.) seu *Jec'oris Mor'rhuæ* seu *Jecin'oris Asel'li, Arun'gia Ga'di, A. Pisci'na mari'na, Cod'liver oil, Cod oil,* (F.) *Huile de morue* ou *de Foie de morue.* The animal oil, which appears under this name in commerce, is obtained from several of the species belonging to the genus Gadus. The Cod, *Ga'dus mor'rhua* (Ph. B. 1864); the *Dorse* or *Dorsch, Ga'dus Calla'rias, Mor'rhua America'na;* the Coalfish, *Ga'dus carbona'rius;* the Burbot, *Ga'dus lo'ta, Lo'ta vulga'ris;* the Pollock, *Ga'dus polla'chius;* the Ling, *Lo'ta mol'va;* the Torsk, *Bros'mius vulga'ris.* There is reason also to believe, that on the American coast it is obtained, too, from the Hake, *Ga'dus merluc'cius,* and the Haddock, *Ga'dus æglifi'nus.* The clearest sorts are generally used. An excellent eutrophic, in tuberculous and strumous affections, rheumatism, chronic cutaneous diseases, tumours of the mammæ, &c. The dose for an adult is from f℥ij to f℥iss.

Codliver o'lein, prepared by subjecting codliver oil to a low temperature and separating the olein by pressure, has been used in the same cases as the oil.

Skateliver oil, O'leum ra'iæ, obtained from *Ra'ia batis* and *R. clava'ta,* is used in the same cases and doses.

Oleum Jecoris Morrhuæ, Oleum jecoris aselli —o. Juniperi, see Juniperis communis—o. Juniperi empyreumaticum, see Juniperus oxycedrus—o. de Kervâ, see Ricinus communis — o. Kervinum, see Ricinus communis.

Oleum Lauri'num, *O. lauri, Daphnelæon, Oil of bays.* An oil obtained from bayberries, and sometimes used in sprains and bruises, unattended with inflammation. See Unguentum laurinum.

Oleum Lavandulæ, see Lavandula—o. Lentiscinum, Schinelæon — o. Limonis, see Citrus medica — o. Lini, see Linum usitatissimum—o. Lini cum calce, Linimentum aquæ calcis.

Oleum Lu'cii Pis'cis, *Oil of Pike.* From the liver of the *Esox lucius* an oil is spontaneously separated, which is used in some countries to remove specks on the cornea.

Oleum Macidis, see Myristica.

Oleum Malabathri, see Malabathrum—o. Mariæ, see Fagara octandra — o. Martis, see Ferri chloridum—o. Mastichinum, see Pistacia lentiscus — o. Melaleucæ leucodendri, Caieput (oil) — o. Menthæ piperitæ, see Mentha piperita — o. Menthæ viridis, see Mentha viridis—o. Monardæ, Monarda punctata—o. Morrhuæ, O. jecoris aselli.

Oleum e Mucilagin'ibus, *Oil of Mu'cilages.* (*Rad. althææ* rec. ℔ss; *Sem. lini, Sem. fœnugræci,* ää ℥iij; *Aquæ,* Oij. Boil for half an hour; add *Ol. oliv.* Oiv; continue the boiling till the water is nearly consumed, and pour off the oil.) Emollient.

Oleum Myristicæ, see Myristica moschata—o. Myristicæ expressum, see Myristica—o. Neroli, see Citrus aurantium—o. Nucistæ, see Myristica—o. Nucistæ æthereum, see Myristica.

Oleum Oli'væ, *O. Oliva'rum, Ol'ive* or *Sal'ad oil.* An inodorous, insipid, and transparent oil; obtained by expression from the olive, when ripe. It is demulcent and emollient, — possessing the qualities of the fixed oils in general.

An inferior kind, obtained by boiling olives in water, and skimming the oil from the surface, is also used in Pharmacy. See Olea Europæa.

Oleum Omphacinum, Omotribes — o. Origani, see Origanum — o. Oxydi cupri viride, Balsam, green, of Metz—o. de Palmâ Christi, see Ricinus communis — o. Palmæ, see Cocos butyracea — o. Palmæ liquidum, see Ricinus communis — o. Petræ, Petroleum—o. Petræ album, Naphtha—o. Picinum, Brutia, Pisselæum—o. Pimentæ, see Myrtus pimenta—o. Pini purissimum, O. terebinthinæ rectificatum—o. Pulegii, see Mentha pulegium—o. Pyro-animale, O. animale Dippelii — o. Raiæ, see Oleum jecoris aselli — o. Ricini, see Ricinus communis—o. Rosæ, see Rosa centifolia—o. Rosarum, Rhodelæon—o. Rosmarini, see Rosmarinus — o. Rutæ, Peganelæon—o. Rutæ, see Ruta — o. Sabinæ, see Juniperus Sabina — o. Sassafras, see Laurus sassafras—o. Sesami, see Sesamum orientale—o. Sinapis, see Sinapis—o. Spicæ, see Lavandula spica—o. Spicæ vulgaris, O. terebinthinæ—o. Succini, see Succinum — o. Succinum rectificatum, see Succinum.

Oleum Sulphura'tum, *Bal'samum sulph'uris sim'plex, Sulph'uretted oil.* (*Sulphur. lot.* ℥ij; *Ol. olivæ.* ℔j. Heat the oil in a large iron pot, and throw in the sulphur by degrees; stirring the mixture after each addition till they unite.) It is stimulating, and was formerly much used in coughs, asthma, &c., and, externally, to foul ulcers.

Oleum Taba'ci, *Oil of Tobac'co.* In the form of ointment, (gtt. xx to ℥j of lard,) applied to indolent tumours, ulcers, &c. (An empyreumatic oil, obtained from coarsely-powdered tobacco by heating the retort to dull redness.—Ph. U. S.)

Oleum Tartari per Deliquium, Liquor potassæ subcarbonatis — o. Templinum, see Pinus mughos.

Oleum Terebin'thinæ, *Oil of Tur'pentine.* The volatile oil distilled from the turpentine of pinus palustris, and other species of pinus.

Oleum Terebin'thinæ Rectifica'tum, *O. pi'ni puris'simum O. T. purifica'tum* seu *terebin'thinæ æthe'reum, Rec'tified oil of tur'pentine, Sp. of tur'pentine. Common oil of turpentine* is also called *Com'mon oil of Spike, O'leum spi'cæ vulga'ris.* (*Olei terebinth.* Oj; *Aquæ,* Oiv. Distil over the oil.) It is stimulant, diuretic, anthelmintic, and rubefacient. Dose, gtt. x to f℥j.

Guesto'nian Embroca'tion for rheumatism consists of *Ol. terebinth., Ol. oliv.* ää f℥iss; *Acid. sulph. dil,* f℥iij.

Oleum Theobromæ Cacao Expressum, Butter of cacao — o. Thymi, see Thymus — o. Tiglii, see Croton tiglium.

Oleum Valeria'næ, *Oil of Vale'rian.* The distilled oil of the root of *Valeria'na officina'lis.* — Ph. U. S. Dose, four or five drops.

Oleum Vini, O. æthereum — o. Vitrioli, Sulphuric acid—o. Vitrioli dulce, Æther sulphuricus.

OLFACTIF, Olfactory.

OLFAC'TION, *Olfac'tus,* (*olfacere, olfactum,* (*olere,* 'to smell,' and *facere,* 'to make,') 'to smell;') *Osphre'sis, Osphra'sia, Osphre'sia, Osme'sis, Odora'tio, Odora'tus, Sen'sus osmomet'ricus, Sense of smell, Smell'ing,* (F.) *Odorat.* The sense by which we perceive the impressions made on the olfactory nerves by the odorous particles suspended in the atmosphere. The olfactory nerve or first pair has usually been considered the great nerve of smell; and it is probably the nerve of special sensibility, general sensibility being communicated by the branches of the fifth pair, distributed on the pituitary membrane of the nose and sinuses.

OLFACTIVE, Olfactory.

OLFACT'ORY, *Olfac'tive, Olfacti'vus, Olfacto'rius, Osphran'ticus, Osphrante'rius, Osphre'ticus,* (F.) *Olfactif.* That which belongs or relates to the sense of smell.

Olfactory Bulb, see Olfactory nerves.

Olfactory Foram'ina, (F.) *Trous olfactifs,*

are the holes in the cribriform plate of the ethmoid bone, through which the olfactory nerve passes.

Olfactory Ganglion, see Olfactory nerves—o. Lobe, see Olfactory nerves.

Olfactory Nerves, *Ethmoid'al nerves, Par pri'mum Nervo'rum cer'ebri, Ner'vi odorato'rii, Proces'sus mamilla'res* seu *papilla'rum* seu *mamillares cer'ebri ad na'res* seu *papilla're, Caru'culæ mamilla're,*—the *first pair of encephal'ic nerves.* This nerve, which probably arises from the medulla oblongata, is observed to leave the brain, opposite the inner part of the fissure of Sylvius, by three roots; which, by their union, form a triangular knot or expansion. When it reaches the ethmoid fossa it expands and forms a triangular ganglion, or grayish, soft bulb,—*Bul'bus olfacto'rius, Olfac'tory bulb, gang'lion, tu'bercle,* or *lobe,*—which furnishes, from its inferior surface, the branches that have to be distributed to the nasal fossæ. These filaments are numerous; they pass through the foramina in the cribriform plate and enter the nasal fossæ. They are distinguished into the *internal, external,* and *middle.* The former are distributed over the mucous membrane, covering the outer paries of the nasal fossæ; the second descend upon the septum, and the third are lost, almost immediately, on the portion of the pituitary membrane that lines the vault of the fossæ.

Olfactory Tubercle, see Olfactory nerves.

OLFACTUS, gen. *Olfactûs,* Olfaction—o. Acutus, Hyperosphresia — o. Amissio, Anosmia — o. Deficiens, Anosmia—o. Depravatus, Parosmia.

OLIBANUM, (from λιβανος, 'the frankincense tree' [?],) see Juniperus lycia — o. Arabicum, see Juniperus lycia—o. Indicum, see Juniperus lycia — o. Sylvestre, see Pinus abies — o. Vulgare, see Pinus abies.

OLIGÆMIA, (*oligo,* and αἱμα, 'blood,') Anæmia, Hæmaporia, Hypæmia.

OLIGIDRIA, (*oligo,* and ἱδρως, 'sweat,') Ischidrosis.

OLIGO, (from ολιγος, 'few, little;') in composition has these significations.

OLIGOBLEN'NIA, (*oligo,* and βλεννα, 'mucus.') A deficiency of mucus.

OLIGOCHOL'IA, (*oligo,* and χολη, 'bile.') Paucity of bile.

OLIGOCH'YLUS, (*oligo,* and χυλος, 'juice,' 'chyle.') An epithet for food which is but little nutritive; which furnishes little chyle.

OLIGOCOP'RIA, (*oligo,* and κοπρος, 'excrement.') Scantiness of alvine evacuations.

OLIGOCYTHÆ'MIA, (*oligo,* κυτος, 'a cell,' and 'αιμα, 'blood.') A condition of the blood in which there is paucity of red corpuscles.

OLIGODAC'RYA, (*oligo,* and δακρυ, 'a tear.') Paucity of the lachrymal secretion.

OLIGOGALACTIA, (*oligo,* and γαλαξ, gen. γαλακτος, 'milk,') Agalactia.

OLIGOGALIA, Agalactia.

OLIGOHÆMIA, (*oligo,* and 'αιμα, 'blood,') Anæmia, Hæmaporia, Hypæmia.

OLIGOMANIA, (*oligo,* and *mania,*) see Melancholy.

OLIGOPO'SIA, (*oligo,* and ποσις, 'drink.') Diminution in the quantity of drinks.

OLIGOPSYCHIA, (*oligo,* and ψυχη, 'mind,') Imbecility.

OLIGOSIA'LIA, (*oligo* and σιαλον, 'saliva.') Paucity of saliva.

OLIGOSPER'MIA, (*oligo,* and σπερμα, 'sperm.') Paucity of spermatic secretion.

OLIGOSPOND'YLUS, (*oligo,* and σπονδυλος, 'a vertebra.') A monster with defective vertebræ.

OLIGOTRICH'IA, (*oligo,* and θριξ, gen. τριχος, hair.') Want of hair. Paucity of hair.

OLIGOTROPH'IA, *Par'cior nutrit''io,* (*oligo,* and τρεφω, 'I nourish.') Deficient nourishment.

OLIGURE'SIA, *Oligure'sis, Oligoure'sis, Oligoure'sia, Oligu'ria,* (*oligo,* and ουρεω, 'I pass urine.') Morbidly diminished urinary secretion.

OLIGURIA, Oliguresia.

OLISTHEMA, (ολισθημα, from ολισθαινω, 'to slip,') Luxation.

OLIVA, ('the olive,') see Olea.

OLIVÆ, Corpora olivaria.

OLIVAIRE, Oliveshaped.

Cautère Olivaire, of the French surgeons, is a cautery whose extremity is terminated by a button having the shape of an olive.

OLIVARIS, Oliveshaped.

OLIVARY, Oliveshaped — o. Bodies, Corpora olivaria.

Ol'ivary Proc''ess, *Proces'sus Oliva'ris,* is a small ridge, running transversely between, and a little behind, the roots of the anterior clinoid processes of the sphenoid bone, and by some considered as the fourth clinoid process.

OLIVE, see Olea—o. Tree, Olea Europæa.

OL'IVESHAPED, *Oliva'ris, Olivifor'mis, Ol'ivary,* (F.) *Olivaire.* Resembling an olive. See Corpora olivaria.

OLIVES, Corpora olivaria—o. Pickled, Colymbades.

OLIVIER, Olea Europæa — o. *de Bohême,* Ledum palustre.

OLIVIFORMIS, (*oliva,* and *forma,* 'shape,') Oliveshaped.

OLIVINA, see Olea Europæa.

OLLA CAPITIS, (*olla,* 'a pot,') Cranium.

OLMITELLO, MIN'ERAL WA'TERS OF. A thermal spring in the isle of Ischia. Temperature, 100° Fahrenheit.

OLOPHLYC'TIS, gen. *Olophlyc'tidis,* (ολοφλυκτις, from ὁλος, 'entire,' and φλυκτις, 'a vesicle,') Herpes.

OLOPHO'NIA, (ολλω, ολλυω, 'I lose,' and φωνη, 'voice.') Congenital misconstruction of the vocal organs.

Olophonia Labii Lobata, Harelip—o. Linguæ frænata, see Ankyloglossum.

OLSNITIUM, Peucedanum palustre.

OLUS, (pl. of *olera,* 'a pot herb,') Lachanon.

OLYMPIAN SPRINGS, see Kentucky, mineral waters of.

OMA, (ωμα,) in the termination of many pathological words, signifies morbid condition, as in sarc*oma,* ather*oma,* &c.

OMACEPH'ALUS, (F.) *Omacéphale,* (*omo,* and ακεφαλος, 'devoid of head.') A genus of paracephalous monsters, without any neck — a slight depression indicating the limits of the head and body.

O'MAGRA, *Ho'magra,* (*omo,* and αγρα, 'a seizure.') Gout in the shoulder.

OMAL'GIA, (*omo,* and αλγος, 'pain.') Pain in the shoulder.

OMARTHRI'TIS, (*omo,* αρθρον, 'a joint,' and *itis.*) Inflammation of the shoulder-joint.

OMARTHROC'ACĒ, (*omo,* αρθρον, 'a joint,' and κακος, 'bad.') Arthrocace of the shoulder-joint. Caries or suppuration of the shoulder-joint.

OMA'SUM, *Oma'sus, Psalte'rium, Ma'nyplies,* (Sc.) *Mou'iplies, Mou'nyplies,* (F.) *Feuillet, Millefeuillet, Livret, Psautier.* The third stomach of ruminant animals.

OMBILIC, Umbilicus.

OMBILICAL, Umbilical.

OMBILIQUÉ, Umbilicated.

OMBRAGE, (from *umbra,* 'a shade,') Nebula.

OMENTA, (pl. of *omentum,*) Meninges.

OMENTESIS, Epiploitis.

OMENTITIS, (*omentum,* and *itis,*) Epiploitis.

OMENTULA, (pl. of *omentulum*, dim. of *omentum*,) Appendiculæ pinguedinosæ.

OMENTUM, Epiploon — o. Colicum, Epiploon, colic — o. Gastrocolicum, Epiploon, gastrocolic — o. Gastrosplenic, Epiploon, gastrosplenic — o. Great, Epiploon, gastrocolic — o. Hepatogastricum, Epiploon, gastrohepatic — o. Lesser, Epiploon, gastrohepatic—o. Majus, Epiploon, gastrocolic—o. Minus, Epiploon, gastrohepatic — o. Ossium, Periosteum — o. Sac of the, see Epiploon, gastrohepatic—o. Third, Epiploon, colic.

OMICHESIS, (*ομιχεω*, 'to pass urine,') Micturition.

OMICHMA, (*ομιχμα*,) Urine.

OMI'TIS, (*omo*, and *itis*.) Inflammation in or about the shoulder-joint.

OMMA, gen. *Omm'atis*, (*ομμα*,) Eye, Vision.

OMNIPHAGUS, (*omnis*, 'all,' and *φαγω*, 'to eat.') Omnivorous.

OMNIVORE, Omnivorous.

OMNIV'OROUS, *Omniv'orus*, *Omniph'agus*, *Pantoph'agus*, (F.) *Omnivore*, (*omnis*, 'all,' and *voro*, 'I eat.') An epithet for animals which eat every kind of food, animal or vegetable — *Pantoph'agists*.

OMO, (from *ωμος*, 'shoulder,') in the composition of anatomical terms, means the scapula or shoulderblade; in other cases, the shoulder.

OMOCLAVICULAR, see Coracoclavicular.

OMOCOTYLE, see Glene.

OMOHYOÏDEUS, *Cor'acohyoïdeus*, *Hyoïdis Quartus Mus'culus*, (F.) *Scapulo-hyoïdien*, *Omohyoïdien*, *Omoplat-hyoïdien*. This muscle is situate obliquely at the sides and front of the neck. It is slender, long, and flat. It arises from the superior costa of the scapula, near the semilunar notch, and from the ligament that runs across it, and is inserted at the sides of the inferior margin of the body of the os hyoides. It consists of two fasciculi, united by a common tendon, and is a true digastric muscle. It depresses the os hyoides, carrying it a little backwards, and to one side, except when it acts with its fellow, when the bone is depressed, and drawn obliquely backwards.

OMOPHAG''IA, (*ωμοφαγια*,) *Omosit'ia*, (*ωμος*, 'raw,' and *φαγω*, 'I eat.') Fondness for raw food. Eating of raw food.

OMOPH'AGUS, *Homoph'agus* (improperly.) One who eats raw flesh.

OMOPLAT-HYOÏDIEN, Omohyoideus.

OMOPLATE, (*omo*, and *πλατυς*, 'broad, flat,') Scapula—o. *Col de l'*, Collum scapulæ.

OMOS, (*ωμος*,) Crude, Humerus.

OMOSITIA, (*ωμοσιτια*, from *ωμος*, 'raw,' and *σιτος*, 'food,') Omophagia.

OMOTAR'ICHOS, (*ωμοταριχος*, from *omo*, and *ταριχος*, 'pickled.') *Salsamen'tum cru'dum*; *Salt'ed Tun'ny Fish*, in particular. Properly, the neck or shoulder-piece of a salted animal. Once much recommended against the bites of vipers, and in hydrophobia.

OMOTES, (*ωμοτης*,) Crudity.

OMOTOCIA, (*ωμοτοκια*, from *ωμος*, 'unripe,' and *τοκος*, 'birth,') Abortion.

OMOT'RIBES, (*ωμοτριβης*, from *ωμος*, 'unripe,' and *τριβω*, 'I bruise,') *Omphac''inum O'leum*. Oil expressed from unripe olives.

OMPHACE, (*ομφακη*, from *ομφαξ*, 'an unripe grape,') Verjuice.

OMPHA'CION, (*ομφακιον*, from *ομφαξ*, 'an unripe grape.')—*Succus u'væ acer'bæ*, *Ompha'cium*. The juice of unripe grapes. Also, Verjuice.

OMPHACIS, (*ομφακις*, from *ομφαξ*, 'unripe.') An unripe gallnut.

OMPHACI'TES (VINUM), (*ομφακιτης*.) A name given to wine prepared from the unripe grape.

OMPHACIUM, (*ομφακιον*,) Omphacion, Verjuice.

OMPHACOM'ELI, (*ομφαξ*, 'an unripe grape,' and *μελι*, 'honey.') A sort of oxymel, made of the juice of unripe grapes and honey.

OMPHALELCO'SIS, (*omphalos*, and 'ελκος, 'an ulcer.') Ulceration of the navel.

OMPHALEXOCHE, (*omphalos*, and *εξοχη*, 'a standing out,') Exomphalus.

OMPHALI'TIS, (*omphalos*, and *itis*.) Inflammation of the umbilicus.

OMPHALO, (*ομφαλος*, 'navel,') in composition, navel.

OMPHALOCARPUS, (*omphalos*, and *καρπος*, 'fruit,') Galium aparine.

OMPHALOCELE, (*omphalos*, and *κηλη*, 'rupture,') Exomphalos.

OM'PHALOCRA'NIODID'YMUS, (from *omphalos*, *κρανιον*, 'the cranium,' and *διδυμος*, 'a twin.') A double monster, in which the umbilical cord or the rudiment of one fœtus is rooted in the cranium of another.

OMPHALOMANTI'A, *Om'phalomancy*, (*omphalos*, and *μαντεια*, 'prophecy.') A species of divination, practised by credulous matrons, who pretend to be able to know the number of children a female will have, by the number of knots in the navel string of the child.

OM'PHALOMESENTER'IC, *Omphalomesenter'icus*, *Om'phalomesara'icus*, (*omphalos*, and *mesenterium*, 'the mesentery.') Appertaining or relating to the umbilicus and mesentery.

OMPHALOMESENTER'IC VES'SELS, *Vitel'lomesenter'ic*, *Vit'elline ves'sels*. Haller gave this name to two very fine vessels, which spread their ramifications on the parietes of the umbilical vesicle. There is an *omphalo-mesenteric artery* and *vein*. The *omphalomesenteric artery* is a branch of the superior mesenteric;—the vein empties itself into the trunk, or into one of the branches of the superior mesenteric. Velpeau affirms, that they inosculate with a branch of the second or third order of those great vessels, with those in particular that are distributed to the cæcum, and he regards them to be the vessels of nutrition of the umbilical vesicle. They are occasionally met with in the fœtus, at the full period, under the form of whitish filaments, which extend from the mesenteric vessels to the umbilicus.

OMPHALOMESERAIC, Omphalomesenteric.

OMPHALONCUS, (*omphalos*, and *ογκος*, 'a swelling,') Omphalophyma.

OMPHALONEURON, (*omphalos*, and *νευρον*, 'a sinew, a ligament,') Funiculus umbilicalis.

OMPHALONEURORRHEXIS, (*omphaloneuron*, and *ῥηξις*, 'rupture,') Omphalorrhexis.

OMPHALOPHLEBI'TIS, (*omphalos*, and *phlebitis*, 'inflammation of a vein.') Inflammation of the umbilical vein.

OMPHALOPHY'MA, gen. *Omphalophy'matis*, *Omphalon'cus*, (*omphalos*, and *φυμα*, 'tumour.') A tumefaction of the navel.

OMPHALOPROPTOSIS, (*omphalos*, and *προπτωσις*, 'a falling forwards,') Exomphalus.

OMPHALORRHAG''IA, *Omphalor'rhagē*, (*omphalos*, and *ῥηγνυμι*, 'I break out.') Hemorrhage from the umbilicus, in the new-born in particular.

OMPHALORRHEX'IS, (*omphalos*, and *ῥηξις*, 'rupture.') *Omphaloneurorrhex'is*. Rupture of the navel string.

OMPHALOS, (*ομφαλος*,) Umbilicus.

OMPH'ALOSITE, (*omphalos*, and *σιτος*, 'nourishment.') A monster that possesses an imperfect kind of life, which ceases when the umbilical cord is divided.

OMPHALOT'OMY, (*ομφαλατομια*,) *Omphalatom'ia*, (*omphalos*, and *τεμνω*, 'I cut.') The division of the navel string.

OMPHALUS, (*ομφαλος*,) Umbilicus.

OMUS, (*ωμος*,) Crude, Humerus.

ONAGRA, Œnothera biennis.

ONANIA, (after *Onan*,) Masturbation.

ONANISM, Masturbation.

O'NAR, (*οναρ,*) Somnium.

ONCOME. A Scotch term, according to Sir Walter Scott, for "mysterious diseases, which baffle the regular physician."

ONCOS, (*ογκος,*) Tumour.

ONCO'SES, (*oncos,* and *osis.*) Tumours, as diseases.

ONCOSIS, (*ογκωσις,*) Intumescence.

ONCOT'OMY, *Oncoto'mia, Onkot'omy,* (*oncos,* and *τομη,* 'incision.') The opening of an abscess with a cutting instrument, or the excision of a tumour.

ONCTION, (from *ungere, unctum,* 'to anoint,') Inunction.

ONCUS, (*ογκος,*) Swelling, Tumour.

ONDULATION, (from *unda,* 'a wave,') Fluctuation.

ONEBERRY, Paris.

ONEIROCRIT'ICUS, *Oneiroc'rites,* (*oneiros,* and *κρισις,* 'judgment.') One who judges according to dreams.

ONEIRODYN'IA, (*oneiros,* and *οδυνη,* 'pain.') A painful dream. *Incubus* and *Somnambulism* are oneirodyniæ.

Oneirodynia Activa, Paroniria, Somnambulism—o. Gravans, Incubus.

ONEIRODYNIE GRAVATIVE, Incubus.

ONEIROG'MUS, (*ονειρωγμος,*) *Oneirog'ynē.* A lascivious dream; pollution; nocturnal pollution.

ONEIROGONORRHŒA, Pollution, nocturnal.

ONEIROGONOS, (*oneiros,* and *γονος,* 'seed,') Pollution.

ONEIROL'OGY, *Oneirolog''ia,* (*oneiros,* and *λογος,* 'a description.') The doctrine of dreams.

ONEIROMANTI'A, (*oneiros,* and *μαντεια,* 'divination.') The art of divining by dreams; or of interpreting dreams.

ONEIRON, (*ονειρον,*) Somnium.

ONEIRON'OSUS, (*oneiros,* and *νοσος,* 'a disease.') *Somnia'tio morbo'sa.* Morbid, uneasy dreaming.

ONEIROPOLESIS, (*ονειροπολησις,*) Somnium.

ONEIROPOLIA, (*ονειροπολια,*) Somnium.

ONEIROS, (*ονειρος,*) Somnium.

ONERA ALVI, ('load of the bowels,') Excrement — o. Ventris, ('load of the belly,') Excrement.

ONGLADE, (from *ungula,* dim. of *unguis,* 'a nail.') See Onychogryphosis.

ONGLE, (from [L.] *unguis,*) Nail—*o. Incarné,* Onychogryphosis.

ONGLÉE (F.), *Digito'rum stupor à gelu.* Painful numbness at the extremities of the fingers, caused by cold.

ONGLET, (after *Ongle,*) Pterygion.

ONGUENT, Unguentum — *o. d'Althéa,* Unguentum de Althææ—*o. Blanc,* Ceratum cetacei—*o. de Blanc de baleine,* Unguentum cetacei—*o. Blanc de Rhazes,* Unguentum plumbi subcarbonatis—*o. de Céruse,* Unguentum plumbi subcarbonatis — *o. Citrin centre la galé,* Unguentum hydrargyri nitras — *o. Digestif simple,* Unguentum digestivum simplex — *o. Gris,* Unguentum oxidi hydrargyri cinereum—*o. de Guimauve,* Unguentum de althææ — *o. de Laurier,* Unguentum laurinum — *o. Mercuriel,* Unguentum hydrargyri — *o. Napolitain,* Unguentum hydrargyri — *o. de Nitrate de mercure,* Unguentum hydrargyri nitratis—*o. de Poix et de cire,* Basilicon—*o. de Soldat,* Martintum unguentum—*o. de Sureau,* Unguentum sambuci—*o. de Tornamira,* Unguentum plumbi subcarbonatis.

ONION, COMMON, ([L.] *unio,*) Allium cepa —o. Sea, Scilla.

ONIS'CUS, *Asel'lus, Cu'tio, Porcel'lio, Porcel''ius, Por'culus,* (dim. of *ονος,* 'an ass.') A genus of insects, *Class,* Crustaceæ, very common in cellars and dark and moist places.

Onisci Asel'li, *Millep'edes, Asel'li, Millep'eds. Fu'bæ, Wood'lice, Sla'ters, Hog'lice,* (F.) *Cloportes ordinaires,* had, at one time, a place in the pharmacopœias. They were considered stimulant and diuretic, and useful in jaundice.

ONITIS, (*ονιτις,* gen. *ονιτιδος,*) Origanum dictamnus.

ONKOTOMY, Oncotomy.

ONOLOSAT (Arab.), Obolus.

ONOMATOCLESIS, (*ονομα,* gen. *ονοματος,* 'a name,' and *καλεω,* 'to call,') Nomenclature.

ONOMATOLOGIA, (*ονοματολογια,* from *ονομα,* gen. *ονοματος,* 'a name,' and *λογος,* 'a discourse,') Nomenclature.

ONONIS ANTIQUORUM, (*ονωνις,*) O. spinosa.

Ono'nis Arven'sis, (F.) *Bugrane des champs,* has properties like the next.

Ononis Spino'sa, *Ano'nis, Res'ta* seu *Arres'ta bo'vis, Remora Ara'tri, Ono'nis antiquo'rum, Rest harrow,* (F.) *Arrête-bœuf, Bugrande épineuse, Bugrane. Nat. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The root of this plant was once used as a diuretic.

ONOPORDON ACAN'THIUM, (*ονος,* 'the ass,' and *περδω,* 'to break wind,') *Onopor'dum acan'thium, Car'duus tomento'sus, Acan'thium, Ac'anos, A. spi'na, Spi'na al'ba, Cot'ton This'tle,* (F.) *Chardon aux Ânes. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia æqualis. The expressed juice has been recommended as a cure for cancer, applied externally.

ONOPORDUM ACANTHIUM, Onopordon acanthium.

ONTHUS, (*ονθος,*) Fimus.

ONTOL'OGY, *Ontolog''ia,* (F.) *Ontologie,* (from *ων,* gen. *οντος,* 'a being,' and *λογος,* 'a discourse.') A term sometimes used for metaphysics generally; but, more frequently, for that portion of it which deals in generalities; and which embraces, therefore, the speculative and chimerical. It was in this last sense, that Broussais spoke of *medical ontology,* (F.) *Ontologie médicale.*

ONYCHA, see Bdellium, and Cistus creticus.

ONYCHATROPH'IA, *Atroph'ia un'guium,* (*onycho,* and *atrophia,* 'want of nourishment.') Atrophy of the nails.

ONYCHAUX'Ē, *Hypertroph'ia un'guium,* (from *onycho,* and *αυξη,* 'increase.') Unusual increase of the size and thickness of the nails.

ONYCHEXALLAX'IS, (*onycho,* and *εξαλλαξις,* 'change.') A morbid condition of the nails.

ONYCHIA, (from *ονυξ,* gen. *ονυχος,* 'a nail,') Paronychia.

ONYCHI'TIS, (*onycho,* and *itis.*) Inflammation of a nail. See Paronychia.

ONYCHO, (*ονυξ,* gen. *ονυχος,* 'a nail,') in composition, a nail.

ONYCHOCAMPE, (*onycho,* and *καμπη,* 'curvature,') Onychogryphosis.

ONYCHOCLA'SIS, (*onycho,* and *κλασις,* 'fracture.') Fracture of a nail.

ONYCHOCLI'NĒ, *Onychostro'ma,* (*onycho,* and *κλινη,* 'a bed.') The sensitive bed or stroma under the nail.

ONYCHOCRYPTOSIS, (*onycho,* and *κρυπτος,* 'concealed,') Onychogryphosis.

ONYCHOGRYPHO'SIS, *Onychogrypo'sis, Onychogrypto'sis, Onychocam'pē, Gripho'sis, Grypho'sis,* (*onycho,* and *gryposis,* 'crookedness.') Curvature of the nails; such as occurs in hectic individuals. Also, growing in of the nails; *Onychocrypto'sis, Incarna'tio* seu *Adunca'tio* seu *Arctu'ra un'guium, Onyx'is,* (F.) *Ongle incarné, Onglade.*

ONYCHOMANTI'A, (*onycho,* and *μαντεια,* 'divination.') Divination from the appearance of the nails.

ONYCHON'OSI, *Onychonu'si*, (*onycho*, and *νοσος*, 'a disease.') Disease of the nails.

ONYCHOPH'THORA, *Onychophtho'ria*, *Onycoph'thora*, *Onycophtho'ria*, (*onycho*, and *φθορα*, 'degeneration.') A degenerate condition or destruction of the nails.

ONYCHOPHY'MA, gen. *Onychophy'matis*, (*onycho*, and *φυμα*, 'a tumour.') A painful degeneration of the nails, which become thick, rough, and crooked. It occurs as a symptom of syphilis and of lepra.

ONYCHOPTO'SIS, *Piptonych'ia*, *Diæ'resis Unguiæ*, (*onycho*, and *πτωσις*, 'falling.') The falling off of the nails.

ONYCOPHTHORA, Onychophthora.

ONYCHORRHIZA, (*onycho*, and *ῥιζα*, 'a root.') See Nail.

ONYCHOSTROMA, (*onycho*, and *στρωμα*, 'a bed,') Onychocline.

O'NYX, gen. *O'nychis*, (from *ονυξ*, gen. *ονυχος*,) Hook (blunt), Nail, Pterygion. Also, a collection of purulent matter between the laminæ of the cornea, having the shape of a nail.

ONYXIS, see Onychogryphosis.

ONYXITIS, (*ονυξ*, and *itis*,) see Paronychia.

OOCYESIS, (*oon*, and *κυησις*, 'pregnancy,') Pregnancy, ovarian.

OODEOCELE, see Hernia (foraminis ovalis.)

OODES, (*ωωδης*, from *ωον*, 'an egg,' and *odes*,) Aqueous humour, Oval.

OÖG'ALA, (*oon*, and *γαλα*, 'milk,') *Oög'la*, *Og'la*, *Pulsex Ov'is et Lactē*. Milk of eggs. A preparation of eggs and milk.

OOGLA, Oogala.

OOIDES, (*ωοειδης*, from *oon*, and *ειδος*, 'resemblance,') Aqueous humour, Oval.

OOLEMMA PELLUCIDUM, gen. *Oolemm'atis*, (*oon*, and *λεμμα*, 'a sheath,') Zona pellucida.

OOLEUCON, (*oon*, and *λευκος*, 'white,') Albumen ovi.

OÖLOG''IA, *Ovolog''ia*, *Ovol'ogy*, (*oon*, and *λογος*, 'a discourse.') A description of the ovum.

OON, (*ωον*,) Ovum.

OONINE, (from *oon*,) Albumen.

OÖPH'AGOUS, *Oöph'agus*, (*oon*, and *φαγω*, 'I eat.') Feeding on eggs.

OOPHORAUXE, (*oophorum*, and *αυξη*, 'increase,') Oarioparectama.

OOPHORITIS, (*oophorum*, and *itis*,) Oaritis.

OOPHOROPATHIA, (*oophorum*, and *παθος*, 'affection,') Oariopathy.

OOPHORUM, (*oon*, and *φερω*, 'to bear,') Ovary.

OORITIS, Oaritis.

OP, as a prefix, see Ob.

OPAC''ITY, *Opac''itas*, *Opakeness*, (*opacus*, 'obscure.') Quality of that which is opake. The property possessed by some bodies of not allowing the light to traverse them. It is opposed to transparency. *Opacity of the cornea* constitutes *albugo* or *leucoma*; — opacity of the crystalline causes cataract.

OPAKE, *Opa'cus*, *Opa'cous*. An epithet given to bodies, which do not permit the passage of rays of light. The *opake cornea* is the sclerotica, in contradistinction to the *transparent cornea* or true cornea.

OPAKENESS, Opacity.

OPALESCENT, Opaline.

OP'ALINE, *Opales'cent*. That which resembles the opal. A fluid is said to be opaline when milky, and when it presents an appearance more or less like that of the opal.

OPE, (*οπη*,) Foramen.

OPEOCELE, (*ope*, and *κηλη*, 'rupture,') see Hernia.

OPERATIO, (*opus*, gen. *operis*, 'work,') Action. Operation—o. Chirurgica, see Operation—o. Chymica seu pharmaceutica, Operation, chymical, &c. —o. Simplex, Haplotomia.

OPERA'TION, *Opera'tio*. The application of instruments to the human body with the view of removing disease. The object of an operation, *opera'tio chirur'gica*, is generally to divide or reunite parts, to extract extraneous or noxious bodies, and to replace organs that are wanting, by different instruments or artificial means. The principal operatory methods have been called *Syn'thesis*, *Diæ'resis*, *Exæ'resis*, and *Proth'esis*. Frequently the most difficult subject connected with an operation is to decide when it is absolutely called for or advisable, and when improper.

OPERATION, BILATERAL, see Lithotomy—o. *Césarienne*, Cæsarean section.

OPERATION, CHYM'ICAL or PHARMACEU'TICAL, *Opera'tio chym'ica* seu *pharmaceu'tica*, is any process whose object is the preparation of medicines; their combinations with each other, analysis, and decomposition;—such are, *solution*, *distillation*, *sublimation*, *evaporation*, *digestion*, *maceration*, *infusion*, *decoction*, *calcination*, &c. Some of these operations are mechanical; others, really chymical.

OPERATION, HIGH, see Lithotomy — o. *à Lambeau*, see Flap — o. Lateral, see Lithotomy — o. Sigaultian, Symphyseotomy.

OPERATIONS, Capital, see Surgery, operative —o. Major, see Surgery, operative—o. Minor, see Surgery, operative.

OP'ERATOR. A surgeon who is in the habit of practising the greater operations. One who performs any operation. To be a good operator, the surgeon must be well acquainted with anatomy, and be possessed of strong nerve. See Surgeon.

OPER'CULUM, *Operto'rium*, *Operimen'tum*, (from *operire*, 'to cover.') A cover or lid. In fishes, the gill cover.

OPERCULUM ASPERÆ ARTERIÆ, Larynx - - o Cutis, Epidermis — o. Ilei, Bauhin, valve of - - o Laryngis, Epiglottis — o. Oculi, Palpebra.

OPERCULUM PAPILLA'RUM. A shield for the nipple.

OPERIMENTUM, (from *operire*, 'to cover,') Operculum—o. Intestinorum, Epiploon—o. Prætensum abdominis, Peritonæum.

OPERTORIUM, Operculum.

OPHELIA CHIRATA, Gentiana chirayta.

OPHIASIS, (*οφιασις*) Calvities, Porrigo decalvans.

OPHIOGLOS'SUM VULGA'TUM, *O. ova'tum* seu *echinoglos'sum*, (*ophis*, and *γλωσσα*, 'tongue,') *Lin'gua serpenta'ria*, *Ad'der's Tongue*, (F.) *Langue de Serpent*. *Ord.* Filices. *Sex. Syst.* Cryptogamia. This plant was formerly considered to be vulnerary.

OPHIOPH'AGOUS, *Ophioph'agus*, (*ophis*, and *φαγω*, 'I eat.') An epithet for animals which feed on serpents. Pliny has called certain African tribes by this name.

OPHIORRHI'ZA, *O. mun'gos*, (*ophis*, and *ῥιζα*, 'root.') *Family*, Gentianaceæ. *Sex. Syst.* Pentandria Digynia. The name of the plant whose root has been called *Ra'dix Serpen'tum*, *Mun'gos Ra'dix*. The bitter root is much esteemed in Java, Sumatra, &c., for preventing the effects that usually follow the bite of the *naja*, a venomous serpent; with which view it is eaten by the natives. It is, also, a reputed anthelmintic.

OPHIOSTAPHYLON, (*ophis*, and *σταφυλη*, 'a grape,') Bryonia alba.

OPHIOXYLON, Ophioxylum.

OPHIOX'YLUM, (*ophis*, and *ξυλον*, 'wood.') *Ophioxylum* seu *Ophioxylon serpenti'num* seu *trifolia'tum*, *Acawe'ria*, *Lig'num serpen'tum*, *Ord.* Apocynaceæ, has been recommended in the bites of serpents, and in intermittents. It is said to be very bitter.

OPHIS, (*οφις*,) Serpent.

OPHI'TES, (*οφιτης*, from *ophis*,), *Serpenti'nus*,

Ser'pentine or *Black Por'phyry.* This rock was formerly worn as an amulet, to cure diseases of the head.

OPHRYS, (ὀφρυς,) Supercilium.

OPHTHAL'MAGRA, (*ophthalmos*, and αγρα, 'a seizure.') A sudden gouty or other pain of the eye.

OPHTHALMAL'GIA, (*ophthalmos*, and αλγος, 'pain.') Pain in the eye, Neuralgia of the eye.

OPHTHALMEMPASMA, gen. *Ophthalmempasm'atis*, (*ophthalmos*, and εμπασσειν, 'to strew upon,') Collyrium siccum.

OPHTHAL'MIA, (from *ophthalmos*,) *Ophthalmi'tis, Oculo'rum inflamma'tio, Cau'ma ophthalmi'tis, Ophthalmopo'nia, Inflamma'tion of the Eye, Ophthal'my,* (F.) *Ophthalmie, Ophthalmite, Inflammation de l'œil, Catarrhe oculaire.* Three great varieties of ophthalmia, independently of the *acute* and *chronic* (which conditions occur in all inflammations,) may be reckoned:—the *Ophthalmia membrana'rum, O. purulen'ta,* and *O. tar'si.* The first is characterized by the general symptoms of ophthalmia;—pain and redness of the eye or its appendages; with intolerance of light, and unusual flow of tears; the inflammation being seated chiefly in the coats of the eyeball. It is the *Hymenophthal'mia, Ophthalmia tarax'is* seu *hu'mida* seu *ve'ra* seu *chemo'sis, Conjunctivi'tis, Inflamma'tio conjuncti'væ, Symphymeni'tis, Syndesmi'tis, Catarr'hal ophthalmia, Ophthalmoconjunctivi'tis, Ophthalmodesmi'tis, Epiph'ora* (Galen), *Conjuncti'val* or *Lach'rymose Ophthal'mia, Tarax'is* (Paulus of Ægina), *Chemo'sis* (Aëtius,) (F.) *Conjonctivite, Inflammation de la conjonctive.* In the second,—*Ophthal'mia purulen'ta* seu *puriform'is Blennophthal'mia, Bleph'aroblenorrhœ'a, Ophthalmoblennorrhœ'a, Blennorrhœa oc'uli*—the internal surface of the palpebræ associates in the inflammation of the eyeball; and there is a copious secretion of a purulent fluid. An epidemic and contagious [?] variety of this is the *Ægyp'tian Ophthalmia, O. epidem'ica* seu *purulen'ta epidem'ica* seu *contagio'sa* seu *catarrha'lis bel'lica* seu *bel'lica* seu *Asiat'ica* seu *purulen'ta contagio'sa, Blennorrhœ'a Oc'uli Ægypti'aca, Lœmophthal'mia, Conjunctivi'tis puromuco'sa contagio'sa* seu *Ægypti'aca, Blepharo'tis glandula'ris contagio'sa, Adeni'tis palpebra'rum contagio'sa, Sup'purative ophthalmia, Epidem'ic conta'gious ophthal'mia*—called *Ægyp'tian,* from its prevalence in Egypt during the British Expedition under Sir Ralph Abercrombie. The inflammation is rapid and destructive; granulations shoot from the tunica conjunctiva, and occasionally there is intolerable pain, often succeeded by delirium. In newborn children, a species of purulent ophthalmia, *O. purulen'ta infan'tum* seu *neonato'rum, Blepharophthalmia* seu *Lippitu'do* seu *Blennorrhœ'a Oc'uli* seu *Ophthal'moblennorrhœ'a* seu *Blepharoblennorrhœ'a* seu *Blepharopyorrhœ'a* seu *Pyophthal'mia, Psoraophthal'mia neonato'rum, Adenosynchitoni'tis, Adenologadi'tis,* (F.) *Ophthalmie puriforme des nouveau-nés,* in which the palpebræ are florid and peculiarly tumid, is by no means uncommon. It seems to be caused by acrid discharges from the mother, applied to the eye of the infant during its exit; or to the stimulus of the light, when the child first opens its eyes. A severe form of purulent ophthalmia — *Hyperconjonctivite* (Piorry) — is produced by the application of gonorrhœal matter to the eye. It is the *Ophthalmia gonorrho'ica, Blennorrhœ'a oc'uli gonorrho'ica, Gonorrhoblepharrhœ'a, Conjunctivi'tis blennorrhag''ica* seu *gonorrho'ica, Gonorrhœ'al Ophthal'mia,* (F.) *Ophthalmie blennorrhagique, Conjonctivite blennorrhagique.*

Ophthalmia is likewise modified by the condition of the constitution, and hence we have *strumous, variolous,* and other inflammations of the conjunctiva.

The *third* variety—the *Ophthalmia Tar'si* seu *glutino'sa, Blepharophthal'mia, Blepharo'tis, Blepharoti'tis, Blephari'tis, Blepharadeni'tis, Adenophthalmia,* is seated chiefly in the tarsus; the sebaceous crypts secreting a viscid and acrid fluid, that glues and ulcerates its edges, and irritates the eye.

When accompanied with ulceration and much itching, it constitutes *Psorophthal'mia, Oc'uli palpebra'rum Sca'bies prurigino'sa, Bleph'arophthal'mia ulcero'sa, Ophthal'mia pso'rica, Tin'ea tarsi* seu *cilia'ris, Tinea of the Eyelids.*

The different forms of inflammation of the conjunctiva are thus classed by M. Desmarres:—

- Conjunctivitis.....
  - 1. Pure or phlegmonous.
  - 2. Pustular.
  - 3. Granular or catarrhal.
    - Contagious.
    - Noncontagious.
    - Miasmatic.
    - Exanthematic.....
      - Erysipelatous.
      - Variolous.
      - Morbillous.
      - Scarlatinous.
  - 4. Purulent.....
    - Of new-born infants.
    - Gonorrhœal.
    - Egyptian.

Conjunctivitis, when slight, requires little treatment: the antiphlogistic regimen—and particularly avoiding exposure to light—being all that is necessary. When more severe, along with this, general and local bloodletting, especially by leeches to the side of the septum narium, must be employed, so as to make a decided impression on the system; with nauseating doses of antimony, purgatives, blisters (at some distance from the organ), refrigerants, and astringents, cold or warm, according to circumstances, to the eye. In *Pu'rulent Ophthal'my* these measures must be still more actively employed, otherwise disorganization will speedily follow;—the granulations which form on the adnata of the eyelids may be removed with the scissors, and the sore be touched with a solution of alum. *Ophthal'mia Tar'si* must be treated on general principles, when severe. It usually, however, requires merely the antiphlogistic regimen, with the occasional use, especially at night, of a slightly stimulating ointment, such as the unguentum hydrargyri nitricoöxydi, considerably reduced with lard. The ointment prevents the eyelids from being glued together during the night, and thus obviates the irritation caused by attempts at separating them in the morning.

OPHTHALMIA, ÆGYPTIAN, see Ophthalmia—o. Asiatica, see Ophthalmia—o. Bellica, see Ophthalmia—o. Biliosa, Ophthalmocholosis—o. Catarrhal, see Ophthalmia—o. Catarrhalis bellica, see Ophthalmia—o. Chronica, Lippitudo—o. Conjunctival, see Ophthalmia—o. Contagiosa, see Ophthalmia—o. Epidemica, see Ophthalmia—o. Glutinosa, see Ophthalmia—o. Gonorrhœal, see Ophthalmia—o. Gonorrhoica, see Ophthalmia—o. Granular, Trachoma—o. Humida, see Ophthalmia—o. Lachrymose, see Ophthalmia—o. Membrana-

ium, see Ophthalmia—o. Neonatorum, see Ophthalmia—o. Phlyctenular, see Ophthalmia—o. Psorica, see Ophthalmia tarsi—o. Puriformis, see Ophthalmia—o. Purulenta, see Ophthalmia—o. Taraxis, see Ophthalmia—o. Tarsi, see Ophthalmia—o. Ulcerosa, Helcophthalmia—o. Varicose, Cirsophthalmia—o. Vera, see Ophthalmia.

OPHTHALMIATER, (*ophthalmos*, and *ιατρος*, 'a physician.') Oculist.

OPHTHALMIATRI'A, *Ophthalmiatrotech'nica*, *Ophthalmotherapi'a*, (F.) *Oculistique*. The art of the oculist. Treatment of diseases of the eye.

OPHTHALMIATROTECHNICA, (*ophthalmiater*, and *τεχνη*, 'art.') Ophthalmiatria.

OPHTHAL'MIC, *Ophthal'micus*, (F.) *Ophthalmique*, (from *ophthalmos*.) That which relates or belongs to the eye.

Ophthalmic Ar'tery, *A. orbitaire*, (Ch.) arises from the internal carotid, and issues from the cranium by the foramen opticum. At first it is situate at the outer and lower side of the optic nerve, but ascends above this nerve and passes towards the inner angle of the orbit. It furnishes in its course the *lachrymal*, *centralis retinæ*, *infraorbitars*, *ciliaries*, *anterior ciliaries*, *inferior and superior musculars*, *anterior and posterior ethmoidals*, and *superior and inferior palpebrals*. After having given off these, it divides into two branches—the *frontal* and *nasal*, which furnish a number of ramifications—some superficial, others deepseated.

Ophthalmic Gang'lion, *Lentic'ular* or *Cil'iary ganglion*, *Ganglion ophthal'micum*, seu *semilunar'ē* seu *ciliar'ē*, *G. orbitaire*, (Ch.) is one of the smallest ganglions of the body, and formed by the 5th and 3d pairs of encephalic nerves. It is situate at the outer side of the optic nerve near the bottom of the orbit; is irregularly quadrilateral and flat; its colour of a reddish gray. Behind, it communicates by its posterior angles—by means of nervous filaments—with the nasal nerve of the ophthalmic, the motor oculi, and offsets from the sympathetic. Each of its anterior angles furnishes a fasciculus of small nerves. These are the ciliary nerves.

Ophthalmic Nerve, *Ophthalmic Nerve* of Willis, *Orbito-frontal*, (Ch.) is the smallest and first of the three branches given off by the 5th pair. It proceeds along the external paries of the cavernous sinus, and enters the orbit by the sphenoidal fissure. It divides into three branches, one, *external*—the lachrymal nerve; another, *superior*—frontal nerve; and the last, *internal*—the nasal nerve. See Lachrymal, Frontal, Nasal.

Ophthalmic or Op'tic Rem'edy, *Ophthal'micum* seu *Op'ticum*, (F.) *Topique ophthalmique*, is a medicine employed locally in ophthalmia.

Ophthalmic Sinus, see Cavernous Sinus.

Ophthalmic Vein has the same arrangement as the artery, which it accompanies in all its divisions. It issues from the orbit at the inner part of the sphenoidal fissure, and discharges its blood into the cavernous sinus.

The name *Facial Ophthalmic* has been given to the branch by which the facial vein communicates with the ophthalmic.

OPHTHALMICA, Euphrasia officinalis.

OPHTHALMICI EXTERNI, Motores oculorum.

OPHTHALMICUM, Ophthalmic remedy.

OPHTHALMIDIUM, (dim. of *ophthalmos*,) Microphthalmus.

OPHTHALMIE BLENNORRHAGIQUE, see Ophthalmia—*o. Puriforme des Nouveau-nés*, see Ophthalmia.

OPHTHALMITE, Ophthalmia.

OPHTHALMI'TIS, (*ophthalmos*, and *itis*.) Ophthalmia. Occasionally restricted to inflammation of the globe of the eye, in which both the external and internal structures are involved.

OPHTHALMIUM, (dim. of *ophthalmos*,) Microphthalmus.

OPHTHALMO, (from *οφθαλμος*, 'eye.') In composition, eye.

OPHTHALMOBLENNORRHŒA, Ophthalmia (purulent)—o. Neonatorum, see Ophthalmia (purulenta infantum).

OPHTHALMOCARCINO'MA, gen. *Ophthalmocarcino'matis*. Cancer of the eye.

OPHTHALMOCELE, (*ophthalmo*, and *κηλη*, 'tumor.') Exophthalmia.

OPHTHALMOCHOLO'SIS, (*ophthalmo*, and *χολη*, 'bile.') *Ophthal'mia bilio'sa*. Ophthalmia from biliary derangement. [?]

OPHTHALMOCHROITES, (*ophthalmo*, and *χροιζειν*, 'to colour.') See Choroidea tunica.

OPHTHALMOCONJUNCTIVITIS, see Ophthalmia.

OPHTHALMOCOPIA, (*ophthalmo*, and *κοπος*, 'fatigue.') Copyopia.

OPHTHALMODESMITIS, (*ophthalmodesmum*, and *itis*.) See Ophthalmia.

OPHTHALMODESMUM, (*ophthalmo*, and *δεσμος*, 'a band.') Conjunctiva tunica.

OPHTHALMODULI'A, (*ophthalmo*, and *δουλεια*, 'servitude.') Eyeservice. The title of a book by Bartisch on diseases of the eye.

OPHTHALMODYN'IA, (*ophthalmo*, and *οδυνη*, 'pain.') Pain, and especially rheumatic pain of the eye. Plenck has given this name to neuralgia of the frontal nerve, in which the pain radiates particularly towards the bottom of the orbit. See Neuralgia, frontal.

Ophthalmodynia Periodica, Neuralgia, facial.

OPHTHALMŒDE'MA, gen. *Ophthalmœde'matis*, (*ophthalmo*, and *οιδημα*, 'œdema.') Œdema of the conjunctiva.

OPHTHALMOG'RAPHY, (*ophthalmo*, and *γραφη*, 'a description.') The part of anatomy which gives a description of the eye. An anatomical description of the eye.

OPHTHALMOL'OGY, *Ophthalmolog''ia*, (*ophthalmo*, and *λογος*, 'a discourse.') The part of anatomy which treats of the eye. An anatomical treatise on the eye. A description of the eye in health and disease.

OPHTHALMOMELANO'MA, *Ophthalmomelano'sis*, (*ophthalmo*, and *melanoma*.) Melanoma of the eyeball.

OPHTHALMOM'ETER, (*ophthalmo*, and *μετρον*, 'measure.') An instrument of the nature of compasses, invented by F. Petit, for measuring the capacity of the anterior and posterior chambers of the eye in anatomical experiments.

OPHTHALMOMYÏ'TIS, *Ophthalmomyosi'tis*, (*ophthalmo*, *μυς*, 'a muscle,' and *itis*.) Inflammation of the muscles of the eye.

OPHTHALMOPARALYSIS, Ophthalmoplegia.

OPHTHALMOPHLEBOTOM'IA, (*ophthalmo*, *φλεψ*, gen. *φλεβος*, 'a vein,' and *τομη*, 'incision.') Bleeding from the vessels of the conjunctiva.

OPHTHALMOPHTHAR'SIS, *Ophthalmophthi'sis*, (*ophthalmo*, and *φθαρσις*, 'corruption.') Destruction of the eyeball.

OPHTHALMOPHTHISIS, Ophthalmophthalmsis.

OPHTHALMOPLE'GIA, *Ophthalmoparal'ysis*, (*ophthalmo*, and *πλησσω*, 'I strike.') Paralysis of one or more of the muscles of the eye.

OPHTHALMOPONIA, (*ophthalmo*, and πονος, 'suffering.') Ophthalmia.

OPHTHALMOPTOMA, Ophthalmoptosis.

OPHTHALMOPTO'SIS, *Ophthalmopto'ma*, (*ophthalmo*, and πτωσις, 'a prolapse.') A word employed by some authors in the sense of exophthalmia, by others in that of hydrophthalmia.

OPHTHALMORRHAG''IA, (*ophthalmo*, and ῥηγνυμι, 'I break forth.') Hemorrhage from the tunica conjunctiva. It is rare.

OPHTHALMOS, (οφθαλμος,) Eye.

OPHTHALMOSCOPE, see Ophthalmoscopia.

OPHTHALMOSCOP'IA, *Ophthal'moscopy*, (*ophthalmo*, and σκοπεω, 'I regard attentively.') The art of judging of the temper, &c., of a person by examining his eyes. The art of judging of health or disease by inspection of the eyes. Exploration of the eyes in order to a diagnosis.

Ophthal'moscope, ophthalmoscop'ium, ophthalmos'copum, Spec'ulum oc'uli. An instrument which, by reflecting the light on the retina, enables the condition of the interior of the eye to be appreciated. To a form of the ophthalmoscope the name *Anagnos'takis* has been given, after a young Greek physician, who, it was thought, invented it.

OPHTHALMOSTA'TUM, *Ophthal'mostat*, (*ophthalmo*, and στασις, 'station.') *Spec'ulum oc'uli.* An instrument for fixing the eye. The action of fixing the eye is termed *Ophthalmos'tasis.*

OPHTHALMOTHERAPIA, (*ophthalmo*, and θεραπεια, 'treatment.') Ophthalmiatria.

OPHTHALMOT'OMY, *Ophthalmotom'ia*, (*ophthalmo*, and τεμνω, 'I cut.') The part of anatomy which treats of the dissection of the eye. It has also been applied to extirpation of the eye.

OPHTHALMOXEROSIS, (*ophthalmo*, and ξηρωσις, 'dryness.') Xerophthalmia.

OPHTHALMOX'YSIS, (*ophthalmos*, and ξυω, 'I scrape.') A name given to the scarification sometimes practised on the conjunctiva in cases of ophthalmia.

OPHTHALMOXYS'TRUM, *Ophthalmoxys'ter, Ophthalmoxyste'rium, Xys'trum ophthal'micum.* An instrument for scraping the eye. Name given to a small brush, with barbs like an ear of barley or rye, intended to scarify the eyelids in certain cases of ophthalmia.

OPHTHALMOZO'A, (F.) *Ophthalmozoaires*, (*ophthalmo*, and ζωον, 'an animal.') Entozoa or parasites in the globe of the eye and its appendages.

OPHTHALMUS, (οφθαλμος,) Eye.

OPHTHALMYMENI'TIS, *Ophthalmohymeni'tis*, (*ophthalmo*, ὑμην, 'membrane,' and *itis*.) Inflammation of one or more of the membranes of the eye.

OPIACÉ, Opiate.

OPIACUM, Opiatum.

OPIANE, Narcotine.

O'PIANINE, *Opiani'na, Opia'nia*, (from *opium*.) An alkaloid discovered in opium, which resembles morphia in its properties and doses.

OPIANUM, Narcotine.

OPIAT, Opiate—*o. Dentifrice*, Dentifrice.

O'PIATE, *Opia'tum, Opia'cum, Papavera'ceum, Meco'nicum*, (F.) *Opiat, Opiacé*, (from οπιον, (οπος, 'juice,') 'opium.') A medicine containing opium. A medicine that procures sleep. An *electuary*;—formerly, an electuary which contained opium.

O'PIATED, *Opia'tus*, (F.) *Opiaté, Laudanisé.* Impregnated with opium or laudanum. Affected by opium or laudanum.

OPIATUM, Opiate.

OPIA'TUM FEBRIF'UGUM, *Electua'rium de Ki'nâ Ki'nâ; Electuary of Cincho'na.* (*Pulv. cinch.* ℥xviij, *Ammon. muriat.* ℥j, *Mellis, Syrup. absinth.* āā ℥ij. Make into an electuary. *Ph. P.*) Given when cinchona is indicated.

OPIATUM MESENTER'ICUM, *Electua'rium de Al'oë, Muria'tē Hydrar'gyri et Fer'ro.* (*Gum. ammon.* ℥ss, *Sennæ* ℥vj, *Hydrargyri submuriat., Rad. Ari., Aloës socotrin*, āā ℥ij, *Pulv. scammon. comp.* (vulg. *de tribus*,) *Rhei rad.* āā ℥iij, *Ferri limatur. porphyrisat.* ℥ss. Bruise and mix together, add of *Compound syrup of apples* double the weight of the other matters, and make into an electuary. *Ph. P.*) Dose, ℥ss to ℥ij, in obstructions of the liver, mesentery, &c.

OPIATUS, Opiated.

OPION, (οπιον, dim. of οπος, 'juice,') Opium

O'PIOPHIL, *Opioph'iler, Opioph'ilus*; (οπιον, *opium*, and φιλεω, 'I love.') A lover of opium. There was in Paris, in 1853, a club of opium smokers, who called themselves *O'piophils.*

OPISMA, (οπισμα,) Succus.

OPIS'THENAR, (οπισθεναρ,) *Dorsum manûs*, (*opistho*, and θεναρ, 'the flat of the hand.') The back of the hand.

OPISTHO, (οπισθε, 'behind, backwards,') in composition the same.

OPISTHOCEPHALON, (*opistho*, and κεφαλη, 'the head,') Occiput.

OPISTHOCRANIUM, (*opistho*, and κρανιον 'the skull,') Occiput.

OPISTHOCYPHOSIS, (οπισθοκυφωσις, from *opistho*, and *cyphosis*,) Cyphoma.

OPISTHOLOB'IUM, *Opistho'tium*, (*opistho*, and λοβιον, 'the lobe of the ear.') Any agent applied behind the ear.

OPISTHOTIUM, (*opistho*, and ους, gen. ωτος, 'the ear,') Opisthotolobium.

OPISTHOT'ONUS, (οπισθοτονος,) *Raptus postergu'neus, Tet'anus dorsa'lis* seu *posti'cus* seu *postergu'neus*, (*opistho*, and τεινω, 'I stretch.') A species of tetanus, in which the body is bent backwards.

OPIUM, (οπιον, dim. of οπος, 'juice,') see Papaver—*o.* Colatum, Extractum opii—*o.* Depuratum, Extractum opii.

OPIUM EATERS, Theriaki.

OPIUM, LETTUCE, see Lactuca.

OPOBALSAMUM, (οπος, 'juice,' and βαλσαμον, 'a balsam,') see Amyris opobalsamum.

OPOCARPASON, Carpasium (juice.)

OPOCEPH'ALUS, (ωψ, 'the face,' and κεφαλη, 'head,') (F.) *Opocéphale.* A genus of monsters having the two ears approximated or united under the head; the jaws atrophied; and no mouth or nose.

OPODELDOC, Opodeldoch.

OPODEL'DOCH, *Opodel'toch, Opodel'doc.* An unmeaning term, frequently used by Paracelsus. Formerly, it signified a plaster for all external injuries, and was occasionally used, generically, like *Saponula*, for the union of soap with one or more volatile oils: now, it is applied to the Linimentum Saponis Compositum.

OPODELDOCH, STEER'S. A liniment, called after the inventor. There are many formulæ for its preparation. The following is one. *Sap. alb.* ℔j, *Camphor.* ℥ij, *Ol. rorismarini* f℥iv, *Spiritus vini rectificati* Oij. See Linimentum Saponis Compositum.

OPODEOCELE, (οπη, 'a foramen,' ειδος, 'resemblance,' and κηλη, 'a rupture,') see Hernia.

OPODIDYMUS or OPODYMUS, (ωψ, 'the face,' and διδυμος, 'double,') Diprosopus.

OPOIDIA GALBANIFERA, (from οπος, 'juice,' οποδης, 'juicy,') see Bubon Galbanum.

OPOLÉ, (οπος, 'juice,') Succus.

OPOLIDE, Succus.

OPOPANACUM, Pastinaca opopanax.

OPOPANAX, (οποπανας; from οπος, 'juice,' and *panax*,) see Pastinaca opopanax — *o.* Chironium, Pastinaca opopanax.

OPOPANAXWORT, Pastanaca opopanax.

OPOPIOS, (οπωπιος,) Optic.

OPOPONAX, Pastinaca opopanax.

OPORA, (οπωρα,) see Autumn.

OPO'RICE, (οπωρα, 'autumn.') A medicine, composed of several autumnal fruits, particularly quinces, pomegranates, &c., and wine. It was formerly administered in dysentery, diseases of the stomach, &c.

OPOS, (οπος,) Succus expressus — o. Silphion, Laserpitium.

OPPIDULUM, ('a little town,') Vulva.

OPPILATIO, (*oppillare, oppilatum*, 'to shut up,') Emphraxis — o. Telæ Cellulosæ, Induration of the cellular tissue.

OPPILATIVUS, Obstruens.

OPPO'NENS, (F.) *Opposant*, (*op*, and *ponere*, 'to place.') That which faces or is put in opposition to something. The name has been given to two muscles of the hand.

OPPONENS MIN'IMI DIG''ITI, (F.) *Opposant du petit doigt, Carpo-métacarpien du petit doigt* (Ch.), *Métacarpien du petit doigt*. This muscle has the same shape and arrangement as the preceding, but is of less size. It is situate in the hypothenar eminence. Its fibres are inserted into the anterior annular ligament of the carpus, and terminate on the whole length of the inner edge of the 5th metacarpal bone. This muscle carries the 5th metacarpal bone forwards and outwards, and thus augments the concavity of the palm of the hand.

OPPONENS POL'LICIS, *Flexor ossis metacar'pi pollicis, F. primi interno'dii* (Douglas), *Opponens pollicis manûs, Antith'enar* sive *semi-interosseus pollicis*, (F.) *Carpo-métacarpien du pouce* (Ch.), *Métacarpien du pouce, Opposant du Pouce*. A small, flat, triangular muscle, situate in the substance of the thenar eminence. It is attached, on the one hand, to the anterior annular ligament of the carpus and to the trapezium; and on the other, to the whole of the outer margin of the first metacarpal bone. This muscle impresses on the first bone of the metacarpus a movement of rotation, which opposes the thumb to the other fingers.

OPPOSANT, Opponens—o. *du Petit doigt*, Opponens minimi digiti—o. *du Pouce*, Opponens pollicis.

OPPRESSIO, (from *opprimere*, (*op*, and *premere, pressum,*) 'to press against,') Catalepsy, Oppression—o. Nocturna, Incubus.

OPPRESSION, *Oppres'sio, Thlip'sis, Catathlips'is*. A state, in which the patient experiences a sensation of weight in the part affected. When employed abstractly, it means, particularly, *Oppression of the chest, Oppres'sio, Pec'toris*, (F.) *O. de Poitrine*.

OPPRESSION, *Oppres'sio vi'rium*, (F.) *Oppression des forces*, is, also, used for that condition, at the commencement of fevers, &c., in which the system is opposed rather than debilitated, and where the vascular action arises, as the obstruction to free circulation is relieved by bleeding, purging, &c.

OPS, (ωψ,) Eye.

OPSEONUSI, Opsionusi.

OPSIALGIA, (οψις, 'the countenance,' and αλγος, 'pain,') Neuralgia, facial.

OPSIGONUS (DENS), (οψιγονος, from οψε, 'late,' and γενω, 'to be born,') see Dentition.

OPSIODOUS, (οψε, 'late,' and οδους, 'a tooth,') see Dentition.

OPSIONU'SI, *Opseonu'si*, (οψις, 'vision,' and νουσος, 'a disease;') *Mor'bi vi'sûs*. Diseases of vision.

OPSIOTOC'IA, (οψε, 'late,' and τοκος, 'birth;') *Partus sero'tinus*. Parturition after the usual period. See Pregnancy.

OPSIS, (οψις, 'countenance,') Pupil, Vision.

OPSOMA'NIAC, *Opsom'anes*, (F.) *Opsomane*, (ψον, 'aliment,' and μανια.) One who loves some particular aliment to madness.

OPTESIS, (οπτησις, 'roasting or broiling,') Assatio.

OP'TIC, (οπτικος, *Op'ticus, Opo'pion*, (F.) *Optique*, (from οπτομαι, 'I see.') That which relates to vision.

OPTIC CEN'TRE, *Centrum op'ticum*. The optic centre of the crystalline is the point at which the various rays proceeding from an object cross in their way to the retina.

OPTIC COMMISSURE, see Chiasm.

OPTIC FORA'MEN, *Fora'men op'ticum*, (F.) *Trou optique*. A round opening in the sphenoid bone, near the base of its lesser ala, through which the optic nerve passes.

OPTIC GANGLIA, Quadrigemina tubercula.

OPTIC GROOVE. A transverse groove on the superior surface of the sphenoid bone, on which the commissure of the optic nerve rests, and which is continuous on each side with the optic foramen.

OPTIC LOBES, Quadrigemina tubercula.

OPTIC NERVE, *Nervus op'ticus* seu *visi'vus* seu *viso'rius, Par secun'dum* seu *op'ticum* seu *viso'rium, Nerve of the 2d pair, Oc'ular nerve* of Chaussier. The optic nerves are remarkable for their size; for their running a longer course within than without the cranium; and for their furnishing no branch from their origin to their termination. They do not seem to arise, as was long supposed, from the optic thalami, but from the tubercula quadrigemina. Immediately after their origin, the *optic tracts, Tractus op'tici*, proceed forwards; are, at first, broad and flat; but afterwards become narrower and round. In front of the fossa pituitaria, they unite and decussate, each nerve proceeding through the optic foramen of the sphenoid bone with the ophthalmic artery, and through the *Fora'men op'ticum choroïdeæ*, to form the retina. The nerve passes to the back part of the globe of the eye, becomes narrower, and enters that organ at a flattened circular papilla—*Collic'ulus* seu *Papill'a nervi optici*—to give rise to the nervous expansion called the retina. Between the colliculus and the yellow spot of Sömmering, a small projection or fold of the retina passes—*plica centra'lis ret'inæ*. Besides its neurilemma, the optic nerve is surrounded by a sheath, furnished by the dura mater. This accompanies it as far as the eye.

The optic nerve is the nerve of special sensibility of the eye. In the centre of the nerve, there is a *punc'tum cæ'cum, mac'ula nigra*, where the central artery enters the eye, and the corresponding vein passes out. If a ray of light falls on this spot it is not appreciated.

OPTIC REMEDY, see Ophthalmic remedy — o. Thalami, Thalami nervorum opticorum—o. Tracts, see Optic nerve.

OPTICO-TROCHLÉI-SCLÉROTICIEN, Oblique, superior, of the eye.

OPTICUM, Ophthalmic remedy.

OPTICUS, (οπτικος,) Optic.

OPTILOS, οπτιλος,) Eye.

OPTIQUE, Optic.

OPTOM'ETER, (οπτομαι, 'I see,' and μετρον, 'a measure.') An instrument for measuring the distance of distinct vision.

OPUNTIA, (from Οπους, *Opus*, gen. *Opuntis*, 'a town of Locris,) Cactus opuntia—o. Vulgaris, Cactus opuntia.

OR, (from *aurum*,) Gold—o. *Blanc*, Platinum—o. *Cyanure d'*, see Gold — o. *Divisé*, see Gold — o. *Hydrochlorate d'*, see Gold—o. *Iodure d'*, see Gold —o. *Métallique*, see Gold—o. *Nitromuriate d'*, see Gold — o. *Oxide d'*, see Gold — o. *et de Sodium chlorure d'*, see Gold—o. *et de Soude, Hydrochlorate d'*, see Gold — o. *et de Soude, Muriate d'*, see Gold.

ORA SERRATA, ('serrated edge,') see Ciliary (Body).

ORACHE, SPREADING, Atriplex patula—o. Stinking, Chenopodium vulvaria.

O'RAL, *Vo'cal*, (F.) *Oral*, (from *os*, gen. *oris*, 'a mouth.') Relating to the mouth or to speech.

ORANGE, (from modern Lat. *aurantium*, itself from *aurum*, 'gold'—the colour of the fruit,) Citrus aurantium—o. Bitter, see Citrus aurantium—o. Flowers of the, see Citrus aurantium.

Orange Grass, Hypericum sarothra—o. Root, Hydrastis Canadensis — o. Tree, Citrus aurantium.

OR'ANGEADE, (from orange.) A drink, made with orange juice diluted with water. It is antiphlogistic, and often recommended in acute diseases.

ORANGES, see Citrus aurantium—o. Curassoa, Aurantia curassaventia.

ORBES CARTILAGINOSI TRACHEÆ, (*orbis*, 'circle,') see Trachea.

ORBICULAIRE DES LÈVRES, Orbicularis oris—*o. des Paupières*, Orbicularis palpebrarum.

ORBIC'ULAR, *Orbicula'ris*, (F.) *Orbiculaire*, (from *orbis*, 'a circle.') Spherical, Circular.

Orbicular Bone, *Os orbicula'rē* seu *lenticula'rē* seu *Syl'vii* seu *orbicula'rē Syl'vii*, *Glob'ulus stap'edis os'sis*, *Epiph'ysis cru'ris longio'ris incu'dis*, *Ossic'ulum orbicula'rē* seu *squamo'sum* seu *cochlea'rē* seu *quar'tum*, is the smallest of the four bones of the ear. It is scarcely perceptible, round, convex on two surfaces, and situate between the long ramus of the incus and the head of the stapes.

Orbicular Muscles are muscles with circular fibres surrounding some natural opening of the body. 1. *Orbicula'ris* seu *Constric'tor O'ris*, *Sphinc'ter Labio'rum*, *Sem'i* seu *Demiorbicula'ris*, *Su'prasemiorbicula'ris*, *Labia'lis*, *Osculato'rius*, *Basia'tor*, (F.) *Labial*, *Orbiculaire des lèvres*. A muscle situate in the substance of the lips, and extending from one commissure to the other. It is formed of two very distinct portions, of a semi-oval shape; one belonging to the upper lip, the other to the lower. Their extremities cross at the commissures, and are confounded with the other muscles of the parts. The use of this fleshy muscle is to bring the lips together, and to close the aperture of the mouth, by making it represent a sort of *bourrelet* with radiated wrinkles. It is an antagonist to every other muscle of the lips. 2. *Orbicularis Palpebra'rum* seu *oc'uli* seu *palpebra'rum ciliа'ris*, *Palpebra'rum du'o mus'culi*, *Palpebra'lis*, *Constric'tor* seu *Sphinc'ter Palpebra'rum* seu *Oc'uli*, (F.) *Naso-palpébral* (Ch.); *Maxil'lo-palpébral*, *Palpébral*, *Orbiculaire des paupières*. A muscle common to both the eyelids, and seated in their substance. It is broad, thin, transversely oval, and cleft in its great diameter. It is attached to the nasal process of the superior maxillary bone; to the internal angular process of the frontal bone, and to the orbitar process of the superior maxillary bone. From these origins the muscle passes outwards, under the skin of the eyelids, surrounding the orbit in a circular manner, extending somewhat beyond it, and covering the upper part of the cheek. It is inserted into the skin of the eyelids, its upper and inner edge being intimately connected with the frontal and corrugator muscles. Its use is to close the eye, by bringing the eyelids together. The part of the orbicularis which covers the cartilages of the eyelids, and which is remarkably thin, is the *Mus'culus Ciliа'ris* of some authors.

ORBICULARIS OCULI, Orbicularis palpebrarum, see Orbicular muscles—o. Oris, see Orbicular muscles—o. Palpebrarum, see Orbicular muscles—o. Palpebrarum ciliaris, see Orbicular muscles—o. Recti, Sphincter ani externus.

ORBICULUS CILIARIS, (dim. of *orbis*, 'a circle,') Ciliary ligament, Ciliary zone.

ORBIS GENU, Patella.

OR'BIT, *Or'bita*, *O. oc'uli*, *Troch'ia*, *Con'chus* seu *Cav'itas* seu *Fo'vea* seu *Pelvic'ula oc'uli*, (F.) *Orbite*, (from *orbis*, 'a circle.') The circular cavities are so called, which lodge the organs of sight. The *orbits* or *orbitar fossæ* or *cavities*, *conchi*, κογχοι, are situate at the upper part of the face, and are composed of seven bones, viz.,—the *frontal*, above; the *palate* and *superior maxillary*, below; the *sphenoid* and *malar*, externally; and the *ethmoid* and *lachrymal*, internally. The orbit is filled by the globe of the eye, with its different accessory parts — muscles, nerves, vessels, the lachrymal gland, &c. Its margin is termed *margo orbita'lis*.

ORBITA, Orbit—o. Oculi, Orbit.

ORBITAL, Orbitar—o. Fissure, inferior, Sphenoidal fissure—o. Fissure, superior, Maxillary fissure.

OR'BITAR, *Orbita'rius*, *Orbita'lis*, *Or'bital*, (F.) *Orbitaire*. Relating or belonging to the orbit.

Orbitar Apoph'yses or Proc''esses terminate the two extremities of the orbitar arch. The *external* is much more prominent, and is articulated with the cheekbone; the *internal* is thinner, and joins the os unguis.

Orbitar Arch, (F.) *Arcade orbitaire*, is the projecting, round margin, which separates the *frontal* and *orbitar* surfaces of the os frontis, and forms a part of the circumference of the orbit.

Or'bitar Fis'sures, (F.) *Fentes orbitaires*. These are situate in the orbit. They are two in number: one *superior*, the Sphenoidal; the other *inferior*, the Sphenomaxillary.

Orbitar Foram'ina. Of these there are several:—1. The *Fora'men orbita'rium supe'rius*, (F.) *Trou orbitaire supérieur*, which is situate at the junction of the inner third of the orbitar arch with its two outer thirds, and gives passage to the frontal nerve. 2. The *Foram'ina orbita'ria inferio'ra* seu *inter'na*, *Foram'ina Ethmoï'dea*. These are situate at the upper part of the internal paries of the orbit, are formed by the union of two notches of the os frontis with two similar ones of the ethmoid; and are distinguished into *anterior* and *posterior*. The former gives passage to the ethmoidal filament of the nasal nerve and to a small artery.

Orbitar Nerve, *Nervus orbita'lis* seu *orbita'rius* seu *subcuta'neus ma'læ*, is a branch given off from the superior maxillary. It enters the orbit by the sphenomaxillary fissure, and divides into two filaments; the one — *ma'lar* — which passes over the cheekbone, is distributed to the orbicularis palpebrarum, and anastomoses with the facial nerve; the other—*tem'poral*—which passes to the temporal fossæ, and anastomoses with the inferior maxillary and facial, to become afterwards subcutaneous.

Orbitar Surface, see Maxillary bone (superior).

ORBITO-ÉXTUS-SCLÉROTICIEN, Rectus externus oculi — *o. Intus-Sclérotícien*, Rectus internus oculi — *o. Maxillo-labial*, Levator labii superioris proprius — *o. Palpébral*, Levator palpebræ superioris — *o. Sus-palpébral*, Levator palpebræ superioris.

ORCHANET, Anchusa tinctoria.

ORCANETTE, Anchusa tinctoria.

ORCHALGIA, Orchidalgia.

ORCHEA, (ορχεα,) Scrotum.

ORCHEI'TIS, *Oschi'tis*, *Oschei'tis*, *Inflamma'tio scro'ti*, (*orchea*, *and itis.*) Inflammation of the scrotum, also Hernia humoralis.

ORCHEOCATABASIS, Orchidocatabasis.

ORCHEOCELE, Orchiocele.

ORCHEOTOMY, (*orchis*, and τεμνειν, 'to cut,') Castration.

ORCHESTROMANIA, (ορχηστηρ, 'a dancer,' and *mania*,) Chorea.

ORCHIDA, (*from orchis*,) Spirocolon.

ORCHIDAL'GIA, *Orchial'gia, Orchidodyn'ia, Orchiodyn'ia,* (*orchis, and* αλγος, 'pain.') Pain of the testicle. Neuralgia of the testicle. Irritable testicle; a form of neuralgia.

ORCHIDATROPH'IA, *Atroph'ia testic'uli, orchis,* and *atrophia,* 'atrophy.') Atrophy or wasting of the testicle.

ORCHIDITIS, (*orchis,* and *itis,*) Hernia humoralis.

ORCHIDOCARPUM ARIETINUM, (*orchis,* and καρπος, 'fruit,') see Carica papaya.

ORCHIDOCATAB'ASIS. *Orcheocatab'asis, Descen'sus testiculo'rum,* (*orchis,* and καταβασις, 'descent.') The descent of the testes into the scrotum.

ORCHIDOCELE, (*orchis,* and κηλη, 'tumor,') Hernia humoralis.

ORCHIDODYNIA, (*orchis,* and οδυνη, 'pain,') Orchidalgia.

ORCHIDOMYELO'MA, (*orchis,* μυελος, 'marrow,' and *oma,*) Medullary, fungus of the testicle.

ORCHIDONCUS, (*orchis,* and ογκος, 'a swelling,') Hernia humoralis.

ORCHIDOSCIRRHUS, see Orchiocele.

ORCHIDOTOMY, (*orchis,* and τεμνειν, 'to cut,') Castration.

ORCHILL, Lichen roccella.

ORCHIOCE'LĒ, *Orcheoce'lē,* (*orchis,* or *orchea,* and κηλη, 'a rupture.') A tumour of the testicle. Scrotal hernia. Hernia humoralis. A name given to several diseases of the testicle and its envelopes, essentially differing from each other.

ORCHIOCE'LĒ SCIRRHO'SA, *Scirrhoce'lē, Orchidoscirrhus, Orchioscirrhus.* A scirrhous tumor of the testis.

ORCHIODYNIA, (*orchis,* and οδυνη, 'pain,') Orchidalgia.

ORCHIOSCIRRHUS, see Orchiocele.

ORCHIOTOMIA, (*orchis,* and τεμνειν, 'to cut,') Castration.

ORCHIS, gen. *Or'chidis* or *Orchis,* (ορχις, gen. ορχιδος or ορχεως,) Testicle—o. Bifolia, see Salep—o. Butterfly, Orchis bifolia—o. Latifolia, see Salep—o. maculata, see Salep.

ORCHIS MAS'CULA, *Satyr'ion, Testic'ulus cani'nus, Cynosor'chis, Dogs' stones, Male or'chis, Ballockgrass, Male Fools' stones, Twinroot. Ord.* Orchidaceæ. This root had a place in some pharmacopœias, on account of the glutinous, slimy juice it contains. The root of the *Orchis bifo'lia* or *Butterfly orchis* has likewise been collected. It has been used as a demulcent. Its fancied aphrodisiac virtues seem to be owing to its resemblance to ορχις, 'a testicle,' whence its name.

Salep is obtained from this variety of the orchis, and from the *Orchis morio,* &c. See Salep.

ORCHIS MILITARIS, see Salep—o. Round-leaved, Large, Platanthera orbiculata.

ORCHITE, Hernia humoralis.

ORCHITIS, (*orchis,* and *itis,* 'inflammation,') Hernia humoralis.

ORCHITOMIA, (*orchis,* and τεμνειν, 'to cut,') Castration.

ORCHOI, (ορχος, 'a row,') see Tarsus.

ORCHOTOMIA, (*orchis,* and τεμνειν, 'to cut,') Castration. Also, removal of the tarsi.

ORDEAL NUT, *Calabar' Bean;* (F.) *Fève du Calabar, Fève épreuve du Calabar;* called *Esere* by the natives of Calabar, is from a plant of the natural family, Leguminosæ—the *Physostig'ma veneno'sum*—closely resembling a Dolichos. It is possessed of virulent acro-narcotic properties. One or two drops of a solution of an extract of the bean, introduced under the eyelids, rapidly contracts the pupil, and may be used where myositics are indicated. Its active alkaloid is termed *Physostig'mine.*

ORDEOLUM, Hordeolum.

ORDEUM, Hordeum.

ORDINAIRES, (from (L.) *ordo,* gen. *ordinis,* 'an established process,') Menses.

ORDO MEDICINALIS, Police, medical.

ORDONNANCE, (from *ordonner,* 'to order,') Formula, Prescription.

OREILLE, (from (L.) *auris,*) Ear—o. *d'Âne,* Symphytum—o. *d'Homme,* Asarum—o. *d'Ours,* Primula veris—*o. de Souris,* Hieracium pilosella.

OREILLETTE, (dim. of *oreille,* (L.) *auricula,* 'a small ear,') Asarum, Auricle of the heart.

OREILLONS, (from *oreille,*) Parotis, Cynanche parotidæa.

ORELIA GRANDIFLORA, Allamanda.

ORELLANA, see Terra Orleana.

OREOSELINUM, (ορος, 'a mountain,' and σελινον, 'parsley,') Athamanta aureoselinum—o. Africanum, Bubon galbanum—o. Legitimum, Athamanta aureoselinum—o. Nigrum, Athamanta aureoselinum.

OREXIS, (ορεξις,) Appetite, Pyrosis—o. Cynodes, Boulimia.

OR'GAN, *Or'ganum, Or'ganon,* (οργανον, from εργον, 'work,' 'an instrument.') Part of an organized being, destined to exercise some particular function. Thus, the eyes are organs of sight; the muscles are organs of motion, &c. The collection of organs, which concur in any function, is called *appara'tus.*

ORGAN, Mentha pulegium.

ORGAN OF GIRALDÈS, *Corps innominé de Giraldès.* A small linear body at the upper end of the testicle in the spermatic cord, regarded by Giraldès as the remains of the Wolffian body, and analogous to the 'appendage to the ovary' of the female.

ORGAN OF ROSENMULLER, Parovarium.

ORGANA GENERATIONI INSERVIENTIA, Genital organs—o. Genitalia, Genital organs—o. Sexualia, Genital organs—o. Südoripara, see Perspiration—o. Urogenitalia, Urogenital organs—o. Uropoetica, Urinary organs.

ORGANES GÉNITAUX, Genital organs.

ORGAN'IC, (οργανικος,) *Organ'icus,* (F.) *Organique.* Relating to an organ or organs, and to beings possessed of organs. Hence, ORGANIC FUNCTIONS are those possessed by both animals and vegetables. It, as well as *teleorgan'ic,* is also used synonymously with *vital,* in contradistinction to *physical.*

ORGANIC CHEMISTRY, see Chymistry.

ORGANIC DISEASES OR LE'SIONS—*Nosorganies* of Bouchut—are such as concern the organ itself, in contradistinction to *functional, rat''ional,* or *dynam'ic,* which merely concern the function. Of course, *organic* diseases of a part are always more serious than *functional.*

ORGANIC NERVOUS SYSTEM, see Trisplanchnic nerve.

OR'GANICISM, OR ORGAN'ICISM, *Organicism'us,* (from *organ.*) The doctrine of the localization of disease, or which refers it always to a material lesion of an organ. *Organicism* is the antithesis to *vitalism.* The great principle of the supporters of the former doctrine, (F.) *École organicienne,* is, that life is the result of organization.

ORGANISATIO, Organization.

ORGANISATUS, Organized.

ORGANISÉ, Organized.

OR'GANISM. The living economy. Many physiologists have used this word synonymously with organization; but it more especially designates the aggregate of vital actions in organized beings, animal as well as vegetable. The collection of parts composing an organized body, and the laws which govern it.

OR'GANITE, (from *organ.*) According to Dr. Milne Edwards, an elementary organ,—a blood-corpuscle, for example.

ORGANIZABIL'ITY, (*organisatio,* and *habi-*

lis, 'suitable.') Capability of organization, or of being formed into living tissue. Substances possessed of such capability—as fibrin—are said to be organizable.

ORGANIZABLE, see Organizability.

ORGANIZA'TION, *Organisa'tio.* The manner of structure proper to different beings. It is also employed in the sense of the structure of a part; as the *organization of the heart*, &c.

Organization, Compounds of, Principles, immediate.

OR'GANIZED, *Or'ganis instruc'tus, Organisa'tus*, (F.) *Organisé.* That which is composed of organs.

Organized Bod'ies, (F.) *Corps organisés*, are those endowed with life; i. e. animals and vegetables: in contradistinction to *inorganic* bodies, which comprise the mineral kingdom. See Corpus.

ORGANOCHEMIA, Chymistry, organic.

ORGANOG''ENY, *Organogen'ia, Organogen'esis*, (*organ*, and *γενεσις*, 'generation.') The doctrine of the formation of different organs.

ORGANOGNO'SIA, (*organ*, and *γνωσις*, 'knowledge.') The knowledge and discrimination of organized bodies.

ORGANOG'RAPHY, *Organograph'ia*, (*organ*, and *γραφη*, 'a description.') A description of the organs of a living body.

ORGANOLEPTIC, (*organ*, and *ληψις*, 'action of receiving,') Plastic.

ORGANOLOGY, (*organ*, and *λογος*, 'a description,') Anatomy, Craniology.

ORGANON, (*οργανον*), Organ—o. Olfactûs, Nasus.

ORGANONOM'IA, (*organ*, and *νομος*, 'a law.') The doctrine of the laws of organic life.

ORGANOP'ATHISM, *Or'ganopathol'ogy*, (*organ*, and *παθος*, 'an affection.') The doctrine of *organop'athies*, or of '*organopath'ic states*,' of Piorry, which consists, essentially, in studying the pathological condition of the organs in each individual case.

ORGANOPLASTIES, (*organ*, and *πλασσειν*, 'to form,') see Training.

ORGANOSCOPY, (*organ*, and *σκοπεω*, 'I examine,') see Craniology.

ORGANOZOONOMIA, (*organ*, *ζωον*, 'an animal,' and *νομος*, 'a law,') Zoonomia.

ORGANUM, (*οργανον*,) Instrument, Organ.

OR'GASM, (*οργασμος*,) *Orgas'mus, Orgo'sis, Œstrus, Œstrum*, (*οργαω*, 'I desire ardently,' 'I am excited.') A strong impulse or desire for something. State of excitement and turgescence of any organ whatever. Erethism. Applied particularly to the height of venereal excitement in sexual intercourse.

ORGASMUS, Orgasm, Turgescence.

ORGAS'TICA. The second order of the class *Genetica* of Good. Defined to be diseases affecting the orgasm; organic or constitutional infirmity disordering the power or the desire of procreating.

ORGE, (*οργη*,) Rage.

ORGE, Hordeum—o. *Perlé*, see Hordeum.

ORGEAT, (from *orge*, because formerly made with barley water,) Syrupus amygdalæ.

ORGELET, (dim. of *orge*,) Hordeolum.

ORGEOLET, (dim. of *orge*,) Hordeolum.

ORGOSIS, Orgasm.

ORICHALCUM, (aurichalcum, or from *ορος*, 'a mountain,' and *χαλκος*, 'brass,') Brass.

ORICULAR, Auricular.

ORICULE, Auricle, Pavilion of the ear.

ORIFICIUM, (*os*, gen. *oris*, 'a mouth,' and *facere*, 'to make,') Mouth. — o. Dextrum Ventriculi, Pylorus — o. Uteri, Os uteri — o. Uterinum, see Uterus—o. Vaginale, see Uterus—o. Ventriculi sinistrum, Cardia.

ORIG'ANUM, *O. vulga're* seu *heracleot'icum*, *ριγανον*, from *ορος*, 'a mountain,' and *γανος*, 'delight.') *Cuni'la bu'bula, Majora'na mancura'na, Zazarhen'di her'ba, Wild* or *Common mar'joram, Mancura'na*, (F.) *Pied de lit. Ord.* Labiatæ. *Sex. Syst* Didynamia Gymnospermia. This plant resembles marjoram in smell; and has a pungent taste, much like thyme. It is aromatic and stimulant; and its oil possesses the properties of the essential oils in general. The oil, *Oleum origani* (Ph. U. S.), is very pungent, and is rarely given internally. It is used in toothache.

Origanum Aquaticum, Eupatorium cannabinum—o. Creticum, O. dictamnus.

Origanum Dictam'nus, *O. Cre'ticum, Dictam'nus Cre'ticus, Amar'acus tomento'sus, Oni'tis, Ditt'any of Crete*, (F.) *Dictamne de Crète.* The leaves of this plant were once recommended as emmenagogue and alexipharmic.

Origanum Heracleoticum, Origanum.

Origanum Majora'na, *O. majoranoï'des, Majora'na, M. horten'sis, Sweet mor'joram, Samp'suchum, Samp'sychum, Agriorig'anum, Amar'acus*, (F.) *Marjolaine.* Its odour is strong and fragrant; taste aromatic and bitterish. Its properties are those of a stomachic and errhine. It is chiefly used, however, for culinary purposes, and as a snuff in headache.

Origanum Syriacum, Teucrium marum.

ORIGINAIRE (F.), (*origo*, gen. *originis*, 'origin.') This term has been used, by French writers, in the same sense as *congenital.* It is particularly applied to affections depending upon faulty conformation, or to faulty conformation itself.

ORIGO, (*orior*, 'to arise,') Arche.

ORISMOLOGY, (*ορισμος*, 'a definition,' and *λογος*, 'a discourse,') Terminology.

ORLEANA, see Terra Orleana.

ORME, (*ορμη*,) Appetite.

ORME, Ulmus — o. *Champêtre*, Ulmus—o. *Pyramidale*, Ulmus.

ORMEAU, Ulmus.

ORMS'KIRK MED'ICINE. A celebrated antylissic remedy, supposed to consist of *Pulv. Cretæ*, ℥ss; *Bol. Armen.* ℥iij; *Alumin.* gr. x; *Pulv. Inulæ*, ℥j; *Ol. Anisi*, gtt. vj.

This is taken for a dose every morning for six times, in a glass of water, with a small proportion of fresh milk.

ORNAMENTUM FOLIACEUM, see Tube, Fallopian.

ORNITHOG'ALUM ALTIS'SIMUM. (*ορνιθογαλον*, a fanciful name, from *ορνις*, gen. *ορνιθος*, 'a bird,' and *γαλα*, 'milk.') A South African plant, *Nat. Ord.* Asphodelæ, the fleshy bulb of which is diuretic. An oxymel is prepared of it, which is given in catarrh, asthma, phthisis, and hydrothorax. It resembles squill in its medical properties.

Ornithogalum Maritimum, Scilla—o. Squilla, Scilla.

ORNITHOGLOSSA, (*ορνις*, gen. *ορνιθος*, 'a bird,' and *γλωσσα*, 'a tongue,') see Fraxinus excelsior.

ORNUS EUROPÆA, see Fraxinus ornus — o. Mannifera, Fraxinus ornus — o. Rotundifolia, Fraxinus ornus—o. Sylvestris, Fraxinus excelsior.

OROBAN'CHĒ VIRGINIA'NA, (*orobus*, and *αγχω*, 'I strangle.') *Epiphe'gus* seu *Epifa'gus America'nus* seu *Virginia'nus, Virgin'ia broom-rope, Beechdrops, Cancerroot. Family*, Orobanchoideæ. This parasitic plant is astringent, and a peculiar and extremely nauseous bitter. It is most powerful when fresh. It has been used in dysentery; and, externally to obstinate ulcers.

Orobanchē America'na, and O. Uniflo'ra, have the same properties, and are likewise, called *Cancerroot, Earthclub*, and *Clapwort.*

OROBE, (*οροβος*,) Ervum ervilia.

OROBION, see Ervum ervilia.

OROBOÏ'DES, (*orobus*, and *ειδος*, 'form.') *Orobo'des.* Having the shape of the orobus. A name given to urine, *Urina orobo'des* seu *oroboï'-*

des, when depositing a substance of a fawn colour, like the meal of the orobus.

OROBUS, (οροβος,) Ervum ervilia — o. Faba, Vicia faba.

ORONGE, (from *orange*, its color,) see Agaric.

ORONOSUS, (ορος, 'a mountain,' and νοσος, 'a disease,') Puna.

OROPHALL'US, (ορος or ορρος, 'the rump,' and φαλλος, 'the male organ.') A monster having a second male organ originating from the rump.

OROS, (ορος,) *Croupion*, Serum.

OR'PIMENT, *Auripigmen'tum*, *Or'pin*, *Risigal'lum*, *Rissigallum*, *Clo'anx*, *Elo'mē*, *Si'ra*, *Lempnias*, *Spec'ulum cit'rinum*, *Y'ridos*, *Y'ridē*. The native yellow sulphuret of arsenic. It is poisonous, but less so than the oxide. It is, also, called *Adari'go*, *Adar'uech*, *Ahu'sal*, *Althana'cha*, *Azar'net*. The Turks prepare a depilatory with it, which they call *Rus'ma*.

ORPIN, Orpiment — o. *Brûlant*, Sedum — o. *Grand*, Sedum telephium — o. *Reprise*, Sedum telephium.

ORPINE, Sedum telephium.

ORRHOCHEZIA, (ορρος, 'serum,' and χεζω, 'to go to stool,') Diarrhœa, serous.

ORRHOCYST'IS, (ορρος, 'serum,' and κυστις, 'a bladder.') An encysted tumour containing a serous fluid.

ORRHOHYMENES, (ορρος, 'serum,' and υμην, 'a membrane,') see Membrane (serous).

ORRHOHYMENITIS, (ορρος, 'serum,' υμην, 'a membrane,' and *itis*,) Hydrohymenitis.

ORRHOPYG'ION, (ορρος, 'extremity,' and πυγη, 'the nates.') The inferior extremity of the vertebral column. The os coccygis. Also, the raphe, extending from the penis to the anus, and separating the scrotum into two parts.

ORRHORRHŒ'A, (ορρος, 'serum,' and ῥεω, 'I flow.') A morbidly increased secretion of a serous fluid.

ORRHOS, (ορρος,) *Croupion*, Serum.

ORRHYMENES, (ορρος, 'serum,' and υμην, 'a membrane,') see Membrane (serous).

ORRHYMENITIS, (*orrhymenes*, and *itis*,) Hydrohymenitis.

ORRIS, Iris Florentina—o. Common, Iris Germanica,

ORSEILLE, Lichen roccella.

ORTEIL, (from *articulus*, 'a joint,') Digitus pedis.

ORTHO, (from ορθος,) straight, right, upright, in composition.

ORTHOCO'LUM, (*ortho*, and κωλον, 'limb.') Stiffness of the limb so that it is kept quite straight.

ORTHODON'TIA, *Orthodon'ticē*, *Orthodontosie*, (*ortho*, and οδους, gen. οδοντος, 'a tooth.') The part of dentistry which is concerned in the treatment of irregularity of the teeth.

ORTHODO'RON, (ορθοδωρον, from *ortho*, and δωρον, 'a palm.') A measure with the Greeks, equal to eleven finger-breadths.

ORTHOG'NATHOUS, (*ortho*, and γναθος, 'jaw.') Having a vertical jaw. A term applied to the form of head in which the facial angle approaches the right angle; *Orthogna'thus*.

ORTHOMORPHIA, (*ortho*, and μορφη, 'shape,') Orthopædia.

ORTHOMORPHOSIS, Orthopædia.

ORTHONTROPIA, (*ortho*, and εντρεπειν, 'to convert,') Orthopædia.

ORTHOPÆDI'A, *Orthopæ'dicē*, *Orthomor'phia*, *Orthomorpho'sis*, *Orthoutrop'ia*, *Orthope'dics*, (*ortho*, and παις, gen. παιδος, 'a child.') The part of medicine whose object is to prevent and correct deformity in the bodies of children. Often used, however, with a more extensive signification, to embrace the correction or prevention of deformities at all ages. *Orthosomat'ics*, *Orthosomat'icē*, (from ορθος, 'right,' and σωμα, 'body,') has been proposed as a preferable term.

ORTHOPE'DIC, *Orthopæ'dicus*. Relating to orthopædia,—as *Orthope'dic Institu'tion*, *Institu'tum orthopæ'dicum* seu *orthopæ'dium*: an institution for the correction or prevention of deformities in children.

ORTHOPEDICS, Orthopædia.

ORTHOPE'DIST, *Ortho'ter*, *Orthopæ'dicus*. One who practises orthopædia.

ORTHOPHO'NIA, (*ortho*, and φωνη, 'voice.') A good pronunciation.

ORTHOPHREN'IC, *Orthophren'icus*, (*ortho*, and φρην, 'mind.') Relating to sound mind, and to the cure of insanity.

ORTHOPHTHAL'MIC, *Orthophthal'micus*, (*ortho*, and οφθαλμος, 'eye.') Relating or belonging to the correction of deviations of the eyeball,—as of strabismus.

ORTHOPNŒ'A, *Suffoca'tio*, *Strangula'tio*, *Præfoca'tio*, *Pnix*, *Pnixis*, *Pni'gos*, *Pnig'ma*, *Enthyp'noē*, *Enthypnœ'a*, *An'gor*, *Apnœ'a* (*ortho*, and πνεω, 'I respire.') Impracticability of breathing in the horizontal posture. Necessity of being in the erect posture, in order to respire.

ORTHOPNŒA CARDIACA, Angina Pectoris — o. Convulsiva, Asthma — o. Cynanchica, Cynanche trachealis — o. Hydrothoracica, Hydrothorax—o. Hysterica, Angone — o. Pituitosa, Mycorthopnœa —o. Tussiculosa, Pertussis.

ORTHOSOMATICE, (*ortho*, and σωμα, 'body,') Orthopædia.

ORTHOSOMATIQUE, Orthopædia.

ORTHOTER, (ορθωτηρ,) Orthopedist.

ORTHYSTEROPTOMA, gen. *Orthysteropto'matis*, (*ortho*, υστηρα, 'uterus,' and πτωμα, 'a fall,') Prolapsus uteri.

ORTHYSTEROPTOSIS, Prolapsus uteri.

ORTIE, Urtica—*o. Blanche*, Lamium album—*o. Brûlante*, Urtica urens — *o. Morte*, Lamium album—*o. Morte des Bois*, Galeopsis—*o. Romaine*, Urtica pilulifera.

ORTILLUS, (from *articulus*, 'a joint,') Digitus pedis.

ORTYX, (ορτυξ,) Tetrao coturnix.

ORUS, (ορος,) *Croupion*, Serum.

ORVALE, Salvia sclarea.

ORVIETA'NUM. (From the Italian quack, Hieronymus Ferrantes, of Orvieto.) An electuary regarded as an invaluable antidote, and composed of *Old theriac*, *Dried vipers*, *Scorzonera*, *Carlina*, *Imperatorium*, *Angelica*, *Bistort*, *Rosemary*, *Juniper*, *Cinnamon*, *Cloves*, *Mace*, *Honey*, and a crowd of other substances. Its medical properties resembled, in some respects, those of the theriac. (It was so called, according to some, because invented by Orvietano, a celebrated charlatan; or, according to others, from Orvieto, a town in Italy.)

ORY'ZA, (ορυζα,) *Ory'za sati'va*, *Ory'zum*, *Rice*, (F.) *Riz*. *Family*, Gramineæ. *Sex. Syst.* Hexandria Monogynia. A plant, almost aquatic, indigenous in China, one of the richest productions of Egypt, and which prospers in the warmer regions of the four quarters of the globe. The grain inclosed in the husk is called by the Malays *Pad'dy*, *Padi*, or *Pad'die*; when deprived of the husk, *Bras*, and when boiled, *Nasi*. Its amylaceous seeds, *Ory'za*, *Ory'zum*, *Hor'deum galac'ticum*, nourish more men than those of wheat and rye together. Besides being alimentary, they are demulcent and emollient. *Gard'iner's alimen'tary prepara'tion* is very finely ground ricemeal.

Mu'cilage of Rice, *Rice water*, may be formed by taking one ounce of *rice*, and, having washed it, macerating it for three hours in a quart of tepid soft *water*, in a pan placed upon a stove; then boiling the whole slowly for another hour, and straining through a sieve.

It may be sweetened and acidulated, or be prepared with milk, like arrowroot, and be used as a demulcent.

Rice Jelly is made by macerating a sufficient quantity of clean *rice* in as much *water* as will cover it; boiling slowly, adding water as it evaporates, until the rice is reduced to a pap, sweetening and flavouring with *lemonjuice* or *vanilla*, and passing through a fine sieve into a form or mould. It may be eaten alone or with milk; and is a good dietetic preparation for those of weak digestive powers.

Ground rice. Take a tablespoonful of *ground rice*, a pint and a half of milk, and half an ounce of *can'died lem'onpeel.* Rub the rice smooth with the milk: then add the lemonpeel cut into small pieces; boil for half an hour, and strain whilst the milk is hot. It is used in the same cases as rice jelly.

ORYZUM, (ορυζον,) Oryza.

OS, gen. *Os'sis*, Bone, dim. *Ossiculum;* OS, gen. *O'ris*, Mouth — o. Acromii, Acromion — o. Adjutorium, Humeri os—o. Alæforme, Sphenoid—o. Alagas, Coccyx, Sacrum — o. Alatum, Sphenoid bone—o. Amphideon, Os uteri — *o. Anonyme*, Innominatum os — o. Anonymum, Innominatum os —o. Anticum, *Avant bouche*— o. Arcuale, Temporal bone — o. Armale, Temporal bone — o. Asser, Sternum — *o. de l'Assiette*, Ischion — o. Azygos, Sphenoid — o. Ballistæ, Astragalus — o. Basilare, Occipital bone, Palate bone, Sacrum, Sphenoid—o. Baxillare, Sphenoid—o. Bicorne, Hyoides os—o. Brachiale, Humeri os—o. Brachii, Humeri os—*o. du Bras*, Humerus — o. Calcis, Calcaneum — o. Capitatum, Magnum os—o. Caudæ, Occipital bone — o. Clunium, Sacrum — o. Coccygis, Coccyx—o. Colatorii, Sphenoid bone — o. Colatorium, Ethmoid bone — o. Coliforme, Ethmoid—o. Convolutum superius, Turbinated bone, middle—o. Coronale, Frontal bone—o. Coxæ, Innominatum os—*o. Coxal*, Innominatum os, Ischion — *o. Criblenx*, Ethmoid—o. Cribriforme, Ethmoid—o. Cribrosum, Ethmoid—o. Cristatum, Ethmoid — *o. Crochu*, Os unciforme.

OS CROTAPHALE. A name given by M. Béclard to a bone sometimes met with at the anterior and inferior angle of the parietal bone; from κροταφος, 'the temple.'

Os Crotaphiticum, Temporal bone — o. Cubicum, Ethmoid bone — o. ad Cubitale, Radius — o. Cubiti Inferius, Ulna — *o. de la Cuisse*, Femur —o. Cuneiforme, Sphenoid — o. Cuneo comparatum, Sphenoid — o. Cymbiforme, Scaphoid bone —o. Disciforme, Patella — o. Durum, Temporal bone—o. Ensiforme, Sternum.

OS ÉPACTALE, (from επακτος, 'superadded.') A name given to one of the ossa Wormiana; particularly to one met with in the posterior fontanelle, and which has been described by G. Fischer, under the name *Os Epacta'lē* seu *Goëthia'num.*

OS ÉPACTAUX, Wormiana ossa.

Os Exter'num. The entrance into the vagina, in contradistinction to the *Os inter'num* or *Os u'teri.*

Os Extra Ordinem Carpi. Os pisiforme — o. Femoris, Femur — o. Fibrosum, Occipital bone—o. Foraminulentum, Ethmoid — o. Frontis, Frontal bone — o. Genæ, Malæ os — o. Gladioli, Sternum — *o. Grand*, Magnum os — *o. Grand, col du*, Collum ossis magni—o. Grandinosum, Cuboid—o. Gutturis, Hyoides os—o. Hamatum, Os unciforme — *o. Hors du rang*, Os pisiforme — o. Hyoides, Hyoides os—o. Hypopium, Malæ os — o. Hypseloides, Hyoides os — o. Inconjugatum, Sphenoid —o. Incudi similis, Incus—o. Inferius ventriculi, Pylorus—*o. Innominé*, Innominatum os—*o. Intercalés*, Wormiana ossa—o. Internum, see Uterus—o. Interparietale, Interparietal bone — o. Inverecundum, Frontal bone — o. Ischii, Ischion — o. Jugale, Malæ os — o. Jugamentum, Malæ os—o. Juguli, Clavicle — o. Lacrymale, Unguis os — o. Lambdæ, Occipital bone—o. Lambdoides, Hyoides os, Occipital bone — o. Lapideum, Temporal bone —o. Lapidosum, Temporal bone — o. Latum, Sacrum—o. Latum humeri, Scapula—o. Lenticulare, Os orbiculare, Os pisiforme—o. Lepidoides, Temporal bone—o. Linguæ, Hyoides os—o. Linguale, Hyoides os — o. Lithoides, Temporal bone — o Magnum, neck of the, Collum ossis magni — *o. Malaire*, Malæ os—o. Malare, Malæ os—o. Maxillæ superioris undecimum, Vomer—*o. Maxillaire inférieure*, Collum mandibulæ—*o.* Memento mori, Temporal bone — o. Memoriæ, Occipital bone—o. Mendosum, Temporal bone — o. Morsus Adami, Thyroid cartilage—o. Mucronatum, Xiphoid cartilage—o. Multangulum majus, Trapezium os—o. Multangulum minus, Trapezoides os — o. Multiforme, Ethmoid, Sphenoid — *o. Nasaux*, Nasal bones—o. Naviculare, Os scaphoides—o. Nervale, Temporal bone—o. Nervosum, Occipital bone—o. Occipiti, Occipital bone — o. Orbiculare, Os pisiforme—*o. du Palais*, Palate bone — o. Palati, Palate bone—*o. Palatin*, Palate bone — o. Papillare, Sphenoid—o. Parietale inferius, Temporal bone—o. Paxillare, Sphenoid—o. Pectinis, Pubis, os—o. Pectoris, Sternum—o. Pelvicephalicum, Occipital bone — o. Pelvis laterale, Innominatum os — o. Perone, Fibula—o. Petrosum, Temporal bone—o. Polygonum majus, Trapezium os—o. Polygonum minus, Trapezoides os — o. Polymorphon, Sphenoid—*o. de la Pommette*, Malæ os — o. Posterum, Pharynx — o. Præruptæ rupi assimilatum, Temporal bone—o. Procubitale, Ulna — *o. Propres du nez*, Nasal bones — o. Proræ, Frontal bone, Occipital bone—o. Pterygoideum, Sphenoid—o. Pubis, see Pubis, os — o. Pudicum, Malæ os—o. Puppis, Frontal bone, Occipital bone — o. Pyramidale carpi, Trapezoides os—o. Pyxidis, Occipital bone — o. Rationis, Frontal bone — *o. du Rayon*, Radius—o. Sacrum, Sacrum — o. Saxeum, Temporal bone—o. Scutiforme, Patella — *o. de Sèche*, Sepia — o. Sedentarium, see Ischiatic — o. Semilunare, Lunare os — o. Sextum cranii, Occipital bone—*o. du Sinciput*, Parietal bones, see Sinciput—*o. Sous-ethmoïdal*, Turbinated bone, inferior — o. Sphecoideum, Sphenoid — o. Sphænobasilare, Occipital bone—o. Sphenoidale, Sphenoid — o. Sphenoides, Sphenoid—o. Spongiosum, Ethmoid—o. Spongiosum inferius, Turbinated bone, inferior—o. Spongiosum medium, Turbinated bone, middle — o. Spongiosum superius, Turbinated bone, middle, Turbinated bone, superior — o. Spongoides, Ethmoid—o. Squamosum, Temporal bone—o. Suboculare, Malæ os—*o. Surnuméraires*, Wormiana ossa —*o. Susmaxillaire*, Maxillary (superior) bone—o. Sylvii, Os orbiculare—o. Syncipitis, Frontal bone —o. Temporis, Temporal bone — o. Tesseræ, Astragalus, Cuboid—o. Thyreoides, Patella—o. Tibiæ minus, Fibula — o. Tincæ, Os uteri — *o Triangulaires*, Wormiana ossa — o. Turbinatum, Turbinated bone, middle—o. Turbinatum inferius, Turbinated bone, inferior — o. Uncinatum, Os unciforme — o. Unguis, see Unguis os—o. Upsiloides, Hyoides os.

Os U'teri, *Os tin'cæ* seu *inter'num* seu *amphid'eon* seu *amphid'eum, Protos'porus, Os'chion, Hysteros'toma, Os'culum* seu *orific''ium u'teri, Hysterostom'ium*, (F.) *Museau de Tanche.* The mouth of the womb, see Uterus.

Os Uteri Externum, see Uterus — o. Uteri internum, see Uterus — o. Varium, Cuboid—o. Vesiforme. Sphenoid—o. Vomeris, Vomer—*o. Wormiens*, Wormiana ossa—o. Xiphoides, Sternum—o. Ypseloides, Hyoides os — o. Zygomaticum, Malæ os.

OSANORE, see Artificial teeth.

OSCEDO, (*os*, 'the mouth,' and *ciere, citum*, 'to move,') Yawning.

OSCHÆMATŒDE'MA, gen. *Oschæmatœde'matis, Oschæmœde'ma, Œde'ma scroti cruen'tum*, (*osche*, 'αιμα, 'blood,' and οιδημα, 'œdema.') Effusion of blood into the scrotum.

OSCHÆMŒDEMA, Oschæmatœdema.

OSCHE, (οσχη,) Scrotum.

OSCHEITIS, (*osche*, and *itis*,) Orcheitis, Oschitis.

OSCHEOCARCINOMA, Cancer, chimney-sweepers'.

OSCHEOCE'LĒ, *Oschoce'lē*, *Scrotoce'lē*, (*oscheon*, and κηλη, 'tumour,') *Scro'tal her'nia*, see Bubonocele. Sauvages uses *oscheocele* in the sense of *Drop'sy of the scro'tum*, see Hydrocele.

OSCHEOCELE AQUOSA, Hydroscheocele—o. Flatulenta, Physocele—o. Hydatidosa, Hydatidocele—o. Œdematica, Œdematoscheocele — o. Seminalis, Spermatocele — o. Urinalis, Urocele—o. Varicosa, Varicocele.

OSCHEOCHALASIE, (*oscheon*, and χαλασις, 'relaxation.') A tumour resulting from hypertrophy of the areolar tissue of the scrotum, and the excessive extension of the skin of the part,—an affection which has been confounded with sarcocele.

OSCHEON, (οσχεον,) Scrotum.

OSCHEON'CUS, *Oschon'cus*, *Oscheophy'ma*, *Oschophy'ma*, (*oscheon*, and ογκος, 'a tumour.') A preternatural swelling of the scrotum.

OSCHEOPHYMA, (*oscheon*, and φυμα, 'a swelling,') Oscheoncus.

OSCHEOPLAS'TIC, *Oscheoplas'ticus*, (*oscheon*, and πλασσω, 'I form.') An epithet given to the operation for restoring the scrotum when lost. *Os'cheoplasty.*

OSCHEOPYŒDE'MA, gen. *Oscheopycede'matis*, *Oschopycede'ma*, *Œde'ma scroti purulen'tum*, (*oscheon*, πυον, 'pus,' and *œdema*.) Purulent tumefaction of the scrotum.

OSCHEUS, (οσχεος,) Scrotum.

OS'CHION, (οσχιον.) The raised margin of the os uteri. According to some, an excrescence from the os uteri.

OSCHI'TIS, *Orchei'tis*, *Oschei'tis*, *Inflamma'tio scro'ti*, (*oschc*, and *itis*.) Inflammation of the scrotum.

OSCHOCARCINOMA, gen. *Oschocarcino'matis*, Cancer, chimney-sweepers'.

OSCHOCELE, Oscheocele, Scrotocele.

OSCHONCUS, Oscheoncus.

OSCHOPHYMA, gen. *Oschophy'matis*, (*oschus*, and φυμα, 'a swelling,') Oscheoncus.

OSCHOPYŒDEMA, Oscheopycedema.

OSCHURŒDE'MA, gen. *Oschurœde'matis*, (*oschus*, ουρον, 'urine,' and οιδημα, 'œdema.') Œdema from effusion of urine into the scrotum.

OSCHUS, (οσχος,) Scrotum.

OSCHYDRŒDE'MA, (*oschus*, ὑδωρ, 'water,' and οιδημα, 'œdema.') *Œdema scroti aquo'sum*. Watery œdema of the scrotum.

OSCILLA'TIO, Irritability, Oscillation.

OSCILLA'TION, *Oscilla'tio*, (from *oscillare*, *oscillatum*, 'to swing.') Vibration, *Vibra'men*, *Vibra'tio*, *Vibra'tus*. Also, a partial rotatory movement of the eyeball to and from its anteroposterior axis.

OS'CITANT (FEVER), *Fe'bris os'citans*, (F.) *Fièvre oscitante*, (*oscitare*, 'to yawn,' from *os*, 'the mouth,' and *ciere*, *citum*, 'to move.') A fever, in which the patient is continually yawning.

OSCITATIO, Yawning.

OSCULATORIUS, (from *osculum*, dim. of *os*, 'a mouth,') Orbicularis oris.

OSCULUM UTERI, (*osculum*, dim. of *os*, 'a mouth,') Os uteri.

OSCUS, (οσχος,) Scrotum.

OSEILLE, (from *oxalis*,) Rumex acetosus—o. *Boucher*, Rumex scutatus—o. *Petite*, Rumex scutatus—o. *Ronde*, Rumex scutatus—o. *Rouge*, Rumex sanguineus.

OSIER, (from ιτεος,) Salix alba—o. Red, Cornus sericea.

OSIS, (ωσις.) A suffix in many terms, which signifies the condition in general; and, in pathological terms, the morbid condition.

OS'MAZOME, *Os'mozome*, *Osmazo'ma*, *Osmozo'ma*, *Os'mazone*, *Zomod'mum*, (F.) *Matière extractive du Bouillon*, *Extrait de viande*; *Extrac'tive* or *Sapona'ceous ex'tract of meat*; (*osme*, and ζωμος, 'soup.') M. Thénard gave this name to an extractive matter, contained in muscular flesh and in the blood of animals, which he considers of a peculiar nature. It has an agreeable smell and taste, and is found in *Bouillons* of meat, in the proportion of one part to seven of gelatin. Vauquelin discovered it in some fungi. It is the substance which gives the flavour of meat to soups, and hence its name. It is a mixture of different crystallizable and uncrystallizable principles with empyreumatic products.

Osmazome has been prescribed in the dose of ℥ss to ℥j, in broth or in powder, with aromatics, as a stimulant to the digestive actions and a restorer of appetite in convalescence. An *Osmazome choc'olate*, *Chocola'ta cum osmazo'ma*, has been introduced as an analeptic article of diet. It consists of *chocolate* ℔j to *osmazome* ℥j.

OSME, (οσμη,) Odour.

OSMESIS, (οσμησις,) Olfaction.

OSMIDRO'SIS, (*osme*, and ἱδρως, 'sweat,') Perspiration of an unusual odour.

OSMITOP'SIS ASTERISCOI'DES, (from οσμη, 'an agreeable odour,' (?) *Bel'lis*. A plant, of the Cape of Good Hope, which, from its smell and taste, seems to contain camphor; hence its antispasmodic virtues. In infusion, it is said to be beneficially employed in cough, hoarseness, and diseases of the chest generally, and is said to be serviceable in flatulent colic. Infused in spirit, *spir'itus bell'idis*, it has been used successfully as an external remedy in paralysis.

OSMOMETRICUS SENSUS, (*osme*, and μετρον, 'measure,') Olfaction.

OSMON'OSI, *Osmonu'si*, *Mor'bi olfac'tûs*, (*osme*, and νοσος, 'a disease.') Diseases of olfaction.

OSMONOSOLOG''IA, (*osme*, νοσος, 'disease,' and λογος, 'description.') The doctrine of, or a treatise on, the diseases of the sense of smell.

OSMORRHI'ZA LONGIS'TYLIS, (*osme*, and ῥιζα, 'a root,') *Sweet Cic''ely*. An indigenous plant, *Order*, Umbelliferæ, which flowers in May and June. It is an agreeable aromatic, having much of the flavour of anise.

OSMOSE, *Osmo'sis*, (ωσμος, 'impulse.') The force by which fluids are impelled through moist membrane and other porous septa, in endosmotic and exosmotic actions.

OSMOT'IC, *Osmot'icus*. Relating or belonging to osmose: as '*osmotic* force,' the force which induces osmose.

OSMOZOME, Osmazome.

OSMUND ROYAL, Osmunda regalis.

OSMUN'DA CINNAMO'MEA, (from *Osmunder*, one of the names of Thor, a Scandinavian deity,) *Cin'namon Fern*. Indigenous; *Order*, Filices; is regarded to be demulcent, subastringent, and tonic. Boiled in milk, it yields a fine mucilage, which is useful in diarrhœa.

OSMUN'DA REGA'LIS, *O. spectab'ilis*, *Fi'lix Flor'ida*, *Flow'ering Fern*, *Osmund-royal*. This plant was once thought to possess astringent and emmenagogue virtues.

OSMUNDA SPECTABILIS, O. regalis.

OSOROR, Opium.

OSPHRANTERIUS, (οσφραντηριος,) Olfactory.

OSPHRANTICOS, (οσφραντικος,) Olfactory.

OSPHRASIA, (οσφρασια,) Olfaction.

OSPHRESIOL'OGY, *Osphresiolog''ia*, (*osphresis*, and λογος, 'a discourse.') A treatise on olfaction and odours. *Osmol'ogy*, *Osmolog''ia*.

OSPHRESIS, (οσφρησις.) Olfaction.

OSPHRETICUS, (οσφρητικος,) Olfactory.

OSPHRIS'TICĒ, (from *osphresis.*) The doctrine of the phenomena of odours.

OSPHYALGEMA, gen. *Osphyalge'matis*, (*osphys*, and *αλγημα*, 'pain,') Coxalgia.

OSPHYALGIA, (*οσφυαλγια*, from *osphys*, and *αλγος*, 'pain,') Coxalgia.

OSPHYARTHRITIS, (*osphys*, and *arthritis*,) Osphyitis.

OSPHYARTHROCACE, (*osphys*, and *arthrocace*,) Coxarum morbus.

OSPHYI'TIS, *Osphy'tis*, *Osphyarthri'tis*, *Inflamma'tio cox'æ*, (*osphys*, and *itis.*) Inflammation of the parts about the hip.

OSPHYRRHEUMA, (*osphys*, and *ῥευμα*, 'rheumatism,') Lumbago.

OSPHYS, (*οσφυς*,) Haunch, Lumbi.

OSPHYTIS, Osphyitis.

OSSA BREGMATIS, Parietal bones — o. Convoluta inferiora, Turbinated bones, inferior — o. Digitorum manûs, Phalanges of the fingers — o. Digitorum pedis, Phalanges of the toes—o. Epactalia, Wormiana ossa — o. Nasalia, Nasal bones—o. Nasi, Nasal bones—o. Nervalia, Parietal bones —o. Pisiformia lingualia, see Hyoides, os—o. Raphogeminantia, Wormiana ossa — o. Sesamoidea, Sesamoid bones—o. Sincipitis, Parietal bones—o. Spongiosa, Turbinated bones — o. Suturarum, Wormiana ossa — o. Tertia maxillæ superioris, Turbinated bones — o. Tetragona, Parietal bones —o. Triangularia, Sphenoidal cornua — o. Triangularia Blasii, Wormiana ossa — o. Triquetra, Wormiana ossa—o. Triticea, see Hyoides, os—o. Turbinata, Turbinated bones — o. Verticalia, Parietal bones.

OSSEINE, (from *os*, 'a bone,') Ostein.

OSSELET, (dim. of *os*, 'a bone,') Ossiculum.

OSSELETS DE BERTIN, Sphenoidalia cornua — *o. de l'Oreille*, Ossicula auditûs — *o. de l'Ouie*, Ossicula auditûs — *o. du Tympan*, Ossicula auditûs.

OS'SEOUS, *Os'seus*, *Osteo'des*, *Osto'des*, *Ostoï'des*, *Os'toid*, (F.) *Osseux*, (*os*, 'a bone.') Bony. Resembling bone.

OSSEUX, Osseous.

OSSICLES, Ossicula, see Ossiculum.

OSSICULA, pl. of Ossiculum.

OSSIC'ULA AUDI'TÛS, *O. Aur'is*, (F.) *Osselets de l'oreille* ou *de l'ouie* ou *du tympan*. The small bones or *ossicles* situate in the cavity of the tympanum, and forming an uninterrupted chain from the membrane of the tympanum to that of the fenestra ovalis. They are four in number; and their series, from without to within, is as follows: *Malleus*, *Incus*, *Os orbiculare*, *Stapes*.

OSSICULA BERTINI, Sphenoidalia cornua — o. Innominata, Innominata minora ossa — o. Nasi, Nasal bones—o. Sesamoidea, Sesamoid bones—o. Triticea, see Hyoides, os.

OSSIC'ULUM, pl. *Ossic'ula*, *Osta'rion*, (F.) *Ossicule*, *Osselet*, (dim. of *os*, 'a bone.') A small bone.

OSSICULUM COCHLEARE, Orbicular bone — o. Incudi Comparatum, Incus — o. Malleolo assimilatum, Malleus — o. Molari denti comparatum, Incus—o. Orbiculare, Orbicular bone—o. Quartum, Orbicular bone—o. Squamosum, Orbicular bone.

OSSIFICA'TION, *Ossifica'tio*, *Ossifac'tio*, (*os*, 'a bone,' and *facere*, 'to make.') *Osteogen'ia*, *Osteogen'esis*, *Ostco'sis*, *Osto'sis*. Formation of bone. Development or increase of the osseous system. Ossification takes place in the same manner as the nutrition of other parts. The bones are, at first, mucous, and afterwards cartilaginous; the cartilage at length receives the phosphate of lime, and is, at the same time, replaced by a gelatinous parenchyma, when the bone has acquired the whole of its development.

OSSIFICATION, POINTS OF, *Punc'ta* seu *Nu'clei ossificatio'nis*, *Nu'clei os'sei*, are the points where the ossification of a bone commences, whence it extends to other parts. Almost all the bones present a greater or less number of points of ossification. Besides the natural ossification, which we observe in the fœtus and in the first periods of life, there are also *acciden'tal ossifications*, such as those frequently remarked, after the inflammation of serous membranes, in the parietes of arteries, and to which the terms *Osthex'ia*, *Incrusta'tion*, and *Petrifac'tion* have sometimes been applied.

OSSIFRAGA, (*os*, 'a bone,' and *frangere*, 'to break,') Osteocolla.

OSSIS SACRI ACUMEN, ('point of the sacrum bone,') Coccyx.

OSSISANA, (*os*, 'a bone,' and *sanare*, 'to heal,') Osteocolla.

OSSIV'OROUS, (*os*, 'a bone,' and *voro*, 'I devour.') A species of tumour, mentioned by Ruysch, which destroys a bone.

OS'TAGRA, *Os'teagra*, (*osteon*, and *αγρα*, 'seizure.') A forceps to cut or remove portions of bone.

OSTALGIA, (*osteon*, and *αλγος*, 'pain,') Osteocopus.

OSTARIUM, (*οσταριον*, dim of *οστεον*, 'a bone,') Ossiculum.

OSTARTHRITIS, Arthrophlogosis.

OSTARTHROCACE, Spina ventosa.

OSTEAGRA, Ostagra.

OSTEALGIA, Osteocopus.

OSTÉIDE, Osteoid.

OS'TEIN, *Os'teïne*, *Os'seine*, (from *osteon.*) The animal matter of bone.

OSTEITES, (from *osteon*,) Osteocolla.

OSTEI'TIS, *Osti'tis*, (*osteon*, and *itis*,) *Inflamma'tio Os'sis*. Inflammation of bone; characterized by violent shooting and lancinating pains in a bone.

OSTEMBRYON, (*osteon*, and *εμβρυον*, 'embryo,') Lithopædion.

OSTEMPYE'SIS, *Osteëmpye'sis*, *Ostempyo'sis*, (*osteon*, and *εμπυησις* (*εν*, and *πυον*), 'effusion of pus.') An abscess in the interior of a bone.

OSTEMPYOSIS, Ostempyesis.

OSTEOANABROSIS, Osteonabrosis.

OSTEOCE'LĒ, (*osteon*, and *κηλη*, 'a rupture.') A hernia in which the sac is cartilaginous and bony:—a rare case. Also, osseous induration of one or both testicles.

OSTEOCHONDROPHYTE, (*osteo*, *χονδρος*, 'a cartilage,' and *φυω*, 'to grow,') Chondroma.

OSTEOCLASIS, (*osteo*, and *κλασις*, 'a fracture,') Fracture.

OSTEOCOL'LA, (*osteon*, and *κολλα*, 'glue.') *Gluebone*, *Stone* or *Bone binder*; *Ossif'raga*, *Holos'teus*, *Osissa'na*, *Ostei'tes*, *Amos'teus*, *Osteol'ithos*, *Stelochi'tes*. A name given to petrified carbonate of lime, found in some parts of Germany and other portions of the globe; so called, because it has been supposed to possess the power of favouring the formation of *callus* in fractures. It is the *Chaux carbonatée concretionnée incrustante* of Haüy. Not used.

OSTEOC'OPUS, (*οστεοκοπος*,) *Osteal'gia*, *Ostal'gia*, *Osteodyn'ia*, *Os'teocope*, (*osteon*, and *κοπος*, 'fatigue.') *Boneache*, *Bone-ague*. Pain in the bones,—as in syphilis.

OSTEOCYST'OID, *Osteocystoï'des*, (*osteon*, *κυστις*, 'a sack or cyst,' and *ειδος*, 'appearance.') A morbid growth in bone, consisting of the formation of cysts filled with puriform or other fluid.

OSTEODENTINE, see Tooth.

OSTEODES, (from *osteon*,) Osseous.

OSTEODYNIA, Osteocopus.

OSTEOGANGRÆNA, Necrosis.

OSTEOGENIA, (*osteon*, and *γενω*, 'to beget,') Ossification.

OSTEOG'RAPHY, *Osteogra'phia*, (*osteon*, and *γραφειν*, 'to describe.') Description of the bones. The part of anatomy which describes the bones.

OSTEOHELCOSIS, (*osteon*, and *ἕλκος*, 'an ulcer,') Caries.

OS'TEOID, *Osteoï'des*, (F.) *Ostéide*, (*osteon*, and *εἰδος*, 'appearance.') An accidental bony production, or more frequently a morbid production, which is a calcareous incrustation — (F.) *Concrétion ossiforme* — of the normal tissue, or of fibrous tumours.

OSTEOLITHOS, (*osteon*, and *λιθος*, 'a stone,') Osteocolla.

OSTEOL'OGY, *Osteolog''ia*, (*οστεολογια*, from *osteon*, and *λογος*, 'a discourse.') The part of anatomy which treats of bones.

OSTEOL'YSIS, *Osteol'ysis*, (*osteon*, and *λυω*, 'I dissolve.') Necrosis or death of the bone, as in hospital gangrene, in which the dead parts are of soft consistence.

OSTEOMA, gen. *Osteo'matis*, (from *osteon*,) Exostosis.

OSTEOMALACIA, (*osteon*, and *μαλακια*, 'softness,') Mollities ossium—o. Infantum, Rachitis.

OSTEOMALACOSIS, Mollities ossium.

OSTEOMYELITIS, (*osteomyelon*, and *itis*,) Medullitis.

OSTEOMYELON, (*osteon*, and *μυελος*, 'marrow,') Marrow.

OSTEON, (*οστεον*,) Bone — o. Hieron, Sacrum.

OSTEONABRO'SIS, *Ostcoanabro'sis*, (*osteon*, *a*, priv., and *βρωσις*, 'nutriment.') Atrophy of the osseous texture marked by diminution of volume.

OSTEONCOSIS, (*osteon*, and *ογκος*, 'a tumour,') see Exostosis.

OSTEON'CUS, (*osteon*, and *ογκος*, 'a tumour.') A bony tumour.

OSTEONECROSIS, Necrosis.

OSTEON'OSI, *Osteonu'si*, (*osteon*, and *νοσος*, 'a disease.') *Mor'bi os'sium*. Diseases of the bones.

OSTEOPÆDION, (*osteon*, and *παιδιον*, 'a small child,') Lithopædion.

OSTEOPALINCLA'SIS, (*ostcon*, *παλιν*, 'again,' and *κλασις*, 'fracture.') The breaking again of a bone which has united unfavourably.

OSTEOPHY'MA, gen. *Osteophy'matis*, (*osteon*, and *φυμα*, 'a swelling,') Osteoncus. Sometimes used in the sense of Exostosis. By Lobstein applied to a bony production originating in the deep-seated layers of the periosteum, in the vicinity of a carious bone, and which seems to be intended to obviate the weakness resulting from the destruction of the bone.

OSTEOPHYTE, (*osteon*, and *φυω*, 'to grow,') Exostosis, Osteophyton.

OSTEOPH'YTON, *Os'teophyte*. Under this name, Rokitansky describes a deposition of bony matter, found by him on the inner surface of the parietes of the skull of pregnant women.

OSTEOPLASTIC, see Osteoplasty.

OS'TEOPLASTY, (F.) *Ostéoplastie*, (*osteon*, and *πλασσειν*, 'to form.') An operation by which the total or partial loss of a bone is remedied. The filling of the cavity of a tooth with some appropriate substance; hence termed *Osteoplas'tic*.

OSTEOPLEU'RA, *Pleurosto'sis*, (*osteon*, and *πλευρον*, 'a rib.') Ossification of the cartilages of the ribs.

OSTEOPORO'SIS, *Osteosclero'sis*, (*osteon*, and *πωρωσις*, 'induration.') Induration of a bone, from the deposition of too much bony matter. Also, a bony degeneration, which consists in too great porosity with hardening. [?]

OSTEOPSATHYROSIS, (*osteon*, and *ψαθυρος*, 'friable,') Fragilitas ossium.

OSTEOSARCO'MA, gen. *Osteosarco'matis*, *Osteosarco'sis*, *Sarcosto'sis*, *Hæmatexosto'sis*, (*osteon*, *σαρξ*, gen. *σαρκος*, 'flesh,' and *oma*.) Disease of the bony tissue, which consists in softening of its laminæ, and their transformation into a fleshy substance, analogous to that of cancer; accompanied with general symptoms of cancerous affection. The word has often, also, been used synonymously with spina ventosa.

OSTEOSARCOSIS, (*osteon*, *σαρξ*, gen. *σαρκος*, 'flesh,' and *osis*,) Osteosarcoma.

OSTEOSCLEROSIS, (*osteon*, and *σκληρος*, 'hard,') Osteoporosis.

OSTEOSIS, (from *osteon*,) Ossification.

OSTEOSPONGIO'MA, gen. *Osteospongio'matis*, *Osteospongio'sis*, (*osteon*, and *σπογγος*, 'a sponge or fungus,' and *oma*.) A fungous condition of bone, *Spina vento'sa*.

OSTEOSTEATO'MA, gen. *Osteosteato'matis*, *Exosto'sis steatomato'des*, (*osteon*, and *στεαρ*, gen. *στεατος*, 'suet or fat.') A name given to bony tumours or degenerations, which sometimes belong to osteosarcoma; at others, to spina ventosa, exostosis, &c.

OSTÉOTOME; same etymon as Osteotomy. A bone saw, which has the form of a chain. Also any bone saw, *Osteot'omus*, *Osteotom'ium*, *Osteotom'icum*.

OSTEOTOMICUM, Osteotome.

OSTEOT'OMIST, *Osteotomis'ta*. An instrument, invented by Dr. D. Davis, for cutting the bones of the fœtal cranium, where it becomes necessary to greatly reduce the size of the head in parturition.

OSTEOTOMIUM, Osteotome.

OSTEOTOMUS, Osteotome.

OSTEOT'OMY, *Osteotom'ia*, (*osteon*, and *τεμνειν*, 'to cut,' (*τομη*, 'an incision.')) The part of practical anatomy whose object is the dissection of bones.

OSTEOTOPHUS, Tophus.

OSTEOTYLUS, (*osteon*, and *τυλος*, 'callus,') Callus.

OSTEULCUM, (*οστευλκος*, from *osteon*, and *ελκειν*, 'to draw,') Bonenippers.

OSTEUM, (*οστεον*,) Bone.

OSTHELCUS, (*osteon*, and *ἕλκος*, 'an ulcer,') Caries.

OSTHEXIA, (*osteon*, and *'εξις*, 'habit,') see Ossification.

OSTIARIUS, ('a doorkeeper,' from *ostium*, 'a door,') Pylorus.

OSTIOLUM, (dim. of *ostium*.) A small door or gate.

OSTIOLA CORDIS, *Val'vulæ cordis*, *Pellic'ulæ cordis*. The valves of the heart.

OSTITIS, Osteitis.

OS'TIUM, (from *os*, 'a mouth,') *Orific''ium*, a door or gate,—of the heart, for example. The opening—*Os'tium a'trioventricula'rē* seu *ventric'uli veno'sum*—between the auricle and ventricle of each side. *Os'tium ventric'uli arterio'sum*, is the opening at the origin of the pulmonary artery and aorta.

OSTIUM ABDOMINALE, see Tube, Fallopian — o. Arteriosum, see Ostium—o. Atrioventriculare, see Ostium—o. Cutaneum, see Urethra—o. Duodenale ventriculi, Pylorus—o. Internum, see Ostium uteri —o. Œsophageum, Cardia.

OSTIUM U'TERI. The vulva; the vagina. The term *Os'tium inter'num* has been applied to the inferior opening of the uterus, which establishes a free communication between the cavities of the body and neck, and which is often obliterated in old women. The neck of the uterus; the mouth of the uterus. See Uterus.

OSTIUM UTERINUM, see Tube, Fallopian — o. Vaginale urethræ, see Urethra — o. Vesicale, see Urethra—o. Venosum, see Ostium—o. Ventriculi Duodenale seu Pyloricum seu Dextrum seu Inferius, Pylorus.

OSTODES, (*οστωδης*, from *osteon*, and *odes*,) Osseous.

OSTOID, (*osteon*, and *εἰδος*, 'resemblance,') Osseous.

OSTOIDEA SUBSTANTIA, see Tooth.

OSTOMA, (*osteon*, and *oma*,) Exostosis.

OSTOSIS, (from *osteon*, and *osis*.) Ossification.

OS'TREA, *Os'treum*, *Os'trea edu'lis*, (F.) *Huître*. *Class*, Acephala. The oyster. The oyster is a wholesome article of diet, often advised as analeptic and easy of digestion.

The shells, *Tes'æ Ostreæ*, *Tes'tæ* (Ph. U. S.), *Conchæ*, (F.) *Écailles d'huîtres*, have been received into the Pharmacopœias, and used medicinally. Their virtues are similar to those of the carbonate of lime. See Creta.

OSTREUM, (οστρεον,) Ostrea.

OSTREION, (οστρειον,) Ostrea.

OSTRUTHIUM, Imperatoria.

OSWEGO TEA, Monarda coccinea.

OSYRIS, (οσυρις,) Antirhinum linaria.

OTACOUST'IC, *Otacous'ticus*, (F.) *Otacoustique*, (*oto*, and ακουω, 'I listen.') Any instrument is so called which improves the sense of hearing, —as the different species of trumpets.

OTAGRA, (ωταγρα, from *oto*, and αγρα, 'a seizure,') Otalgia.

OTAL'GIA, (ωταλγια,) *O'tagra*, *Otod'ynē*, *Otal'gy*, (F.) *Otalgie*, (*oto*, and αλγος, 'pain.') Pain in the ear; *Do'lor au'rium*, *Spas'mus au'rium*, *Earache*. See Otitis.

OTAL'GIC, *Otal'gicus*, (F.) *Otalgique*. An epithet for remedies used in otalgia.

OTECHUS, (*oto*, and ηχος, 'sound,') Tinnitus aurium.

OTEMPLAS'TRUM, *Otoplas'ta*, *Otoplas'trum*, (*oto*, and εμπλαστρον, 'a plaster.') A plaster put behind the ears.

OTEN'CHYTES, (ωτεγκυτης,) *Oten'chyta*, (*oto*, εν, 'into,' and χυω, 'I pour.') *Si'pho auricula'ris*. A species of syringe, used for injecting the ear.

OTHELCOSIS, (*oto*, and 'ελκωσις, 'ulceration.') Ulceration or suppuration of the ear.

OTHONE. (οθονη,) Linteum.

OTHONION, (οθονιον,) Linteum.

OTHYGROTES, (*oto*, and 'υγροτης, 'moisture,') Otirrhœa.

OTIATER, (*oto*, and ιατρος, 'physician,') Aurist.

OTIATRI'A, *Otiat'ricē*, *Otoiatri'a*, (*oto*, and ιατρεια, 'medicine.') The business of the aurist. The management of diseases of the ear; *Aural Medicine* and *Surgery*, *Ear Surgery*.

OTIATRICE, Otiatria.

OTIATRUS, Aurist.

O'TIC, *O'ticus*, (F.) *Otique*, (from ους, gen. ωτος, 'ear.') Belonging or relating to the ear. A medicine employed in diseases of the ear.

Otic Gan'glion, *Otogan'glium*, *Gan'glion auricula'rē* seu *o'ticum*, *Auric'ular gan'glion*, *Gan'glion of Ar'nold*, (F.) *Ganglion maxillo-tympanique*. This is a small ganglion, although more than double the size of the ophthalmic; ash-coloured and pulpy like the ganglions of the sympathetic. It is situate in advance of the ganglion of Gasser, on the lower surface of the inferior maxillary nerve, at the inner margin of the foramen ovale of the sphenoid bone. See Petrous ganglion.

OTIRRHŒ'A, *Otorrhœ'a*, *Othy'grotes*, *Blennotorrhœ'a*, (F.) *Catarrhe de l'Oreille*, (*oto*, and ῥεω, 'I flow.') Discharge of a purulent or puriform liquid, from the meatus auditorius externus, *Pyorrhœ'a au'rium*, *Otopyorrhœ'a*, *Pyoötorrhœ'a*, *Otorrhœ'a purulen'ta*. It is a symptom of chronic otitis. Some authors, have, indeed, used the term synonymously with chronic otitis. When it extends to the brain, it is termed *cer'ebral otorrhœ'a*; and when from the middle or internal ear, it is termed *Internal otorrhœa*, *Otorrhœ'a inter'na*, and *Entotorrhœ'a*.

Otirrhœa, Cerebral, see Otirrhœa.

OTITES, (ωτιτης, 'appertaining or relating to the ear,') see Digitus.

OTI'TIS, *Otophleg'monē*, *Empres'ma oti'tis*, *Inflamma'tio au'ris*, *Inflamma'tion of the ear*, (F.) *Otite*, *Inflammation de l'oreille*, (*oto*, and *itis*.) Inflammation of the mucous membrane of the ear, characterized by excruciating pain; intolerable humming in the ear, with a discharge of mucus generally from the meatus externus or from the Eustachian tube. When the inflammation is restricted to the lining membrane of the meatus, it is termed *otitis catarrha'lis*. Otitis is divided into *external* and *internal*, according as it affects the meatus auditorius, or the cavity of the tympanum or internal ear. It may be *acute* or *chronic*. *Acute otitis* commonly terminates in a few days in a favourable manner, with the aid of antiphlogistics. *Chron'ic oti'tis*, *otirrhœ'a*, is almost always accompanied by a purulent discharge from the meatus auditorius. It is often incurable, and may ultimately give occasion to disease of the internal ear, and even of the brain.

Otitis Catarrhalis, see Otitis.

O'TIUM, (ωτιον, dim. of ους, gen. ωτος, 'ear,') *Ota'rium*. A small ear. The auricle or pavilion of the ear.

OTO, (from ους, gen. ωτος, 'the ear,') in composition, ear.

OTOCEPH'ALUS, *Momo'tia*, (*oto*, and κεφαλη, 'head.') A monster, whose ears are in contact, or united into one.

OTOCLEI'SIS, (*oto*, and κλειω, 'I close.') Closure or obstruction of the ear.

OTOCONIA, (*oto*, and κονια, 'dust,') see Otoliths.

OTODYNE, (*oto*, and οδυνη, 'pain,') Otalgia.

OTOGANGLIUM, Otic ganglion.

OTOGLYPHIS, (ωτογλυφις, from *oto*, and γλυφειν, 'to hollow,') Earpick.

OTOGLYPHIUM, (ωτογλυφον,) Earpick.

OTOG'RAPHY, *Otogra'phia*, (*oto*, and γραφη, 'a description.') The part of anatomy which describes the ear.

OTOIATRIA, Otiatria.

O'TOLITHS, *Otol'ithi*, *O'tolites*, (F.) *Otolithes*, (from *oto*, and λιθος, 'a stone.') White calcareous substances contained in the membranous vestibule, and seeming to be suspended in the fluid of the vestibule by means of a number of nervous filaments proceeding from the auditory nerve. Their universal presence in the ear of the mammalia would seem to show that they are inservient to audition. When the substance is of a looser consistence, it is called *Otocon'ia*, (F.) *Otoconie*, *Ear powder*, (from *oto*, and *conia*.)

OTOL'OGY, *Otolog''ia*, (*oto*, and λογος, 'a discourse.') The part of anatomy which treats of the ear. An anatomical treatise on the ear.

OTOPATHEMA, Otopathy.

OTOP'ATHY, *Otopathi'a*, *Otopathe'ma*, (*oto*, and παθος, 'affection.') A diseased condition of the ear.

OTOPHLEGMONE, Otitis.

OTOPHONE, (*oto*, and φωνη, 'sound,') Ear trumpet.

OTOPLASTA, (*oto*, and πλασσειν, 'to cover over,) Otemplastrum.

OTOPLAS'TICE, *O'toplasty*, (*oto*, and πλαστικος, 'forming.') The operation for restoring a lost ear.

OTOPLASTRUM, Otemplastrum.

OTOPYORRHŒA, (*oto*, πυον, 'pus,' and ῥεω, 'to flow,') Otirrhœa.

OTORRHAG''IA, (*oto*, and ῥαγη, 'rupture.') Bleeding from the ear or ears.

OTORRHEUMATIS'MUS, (*oto*, and ῥευματισμος, 'rheumatism;') *Otal'gia rheumat'ica*. Rheumatic earache.

OTORRHŒA, Otirrhœa—o. Cerebral, see Otirrhœa—o. Interna, see Otirrhœa—o. Purulenta, Otirrhœa.

O'TOSCOPE, *Otoscop'ium*, (*oto*, and σκοπη, 'examination.') Any instrument for examining the condition of the ear. An elastic stethoscope, the

ends of which are tipped with ivory — one to be inserted into the meatus of the patient, and the other applied to the ear of the examiner has been so called; as well as one formed on the principle of the ophthalmoscope, laryngoscope, &c.

OTOT'OMY, *Ototom'ia*, (*oto*, and *τεμνειν*, 'to cut.') The part of practical anatomy which teaches the mode of dissecting and preparing the ear.

OTTO OF ROSES, see Rosa centifolia.

OTTOWAY DISEASE, *Mal de la Baie de Saint Paul.*

OUACHITA SPRINGS, see Arkansas, mineral waters of.

OUÏE, (from *audire*, 'to hear,') Audition.

OULA, (*ουλα*,) Gingivæ.

OULE, (*ουλη*,) Cicatrix.

OULITIS, (*oula*, and *itis*,) Ulitis.

OULORRHAGIA, (*oula*, and *ῥαγη*, 'a breaking forth,') Ulorrhagia.

OUNCE, *Un'cia*. A weight equal to the 16th part of a pound avoirdupois, the 12th of a pound troy. It is composed of 8 drachms. See Weights and Measures.

OURAQUE, Urachus.

OURARI, Curare.

OUREMA, gen *Oure'matis*, (*ουρημα*,) Urine.

OURLES, (from *oreille*,) Palotitis, Cynanche parotidæa.

OUROLOGY, (*ouron*, and *λογος*, 'a discourse,') Uronology.

OURON, (*ουρον*,) Urine.

OUROSCOPY, (*ouron*, and *σκοπεω*, 'I examine,') see Uromantia.

OUS, gen. *O'tos*, (*ους*, gen. *ωτος*,) Ear.

OUTHAR, (*ουθαρ*,) see Mamma.

OUVERTURE CADAVÉRIQUE, Autopsia cadaverica.

OVA GRAAFIANA, Folliculi Graafiani—o. Nabothi, Nabothi glandulæ.

OVAIRE, Ovarium.

O'VAL, *Ova'lis*, *Oö'des*, *Oöi'des*, *Ova'tus*, (F.) *Ocale*, *Ové*, (from *ovum*.) Egg-shaped; elliptic. That which is round and oblong like an egg.

OVAL FORA'MEN, *Fora'men ova'lĕ*, *Foramen oö'des*, (F.) *Trou ovale*. The foramen obturatorium; also, the foramen in the inner paries of the middle ear, which opens into the vestibule; the foramen in the sphenoid bone, through which the third branch of the fifth pair issues from the cranium; and the aperture, in the fœtus, between the auricles of the heart. See Botal Foramen.

OVAL FOS'SA, *Fossa ova'lis*, *Fo'vea ova'lis*, *Val'vula* seu *Vestig''ium Foram'inis ova'lis*, is a depression observed in the right auricle of the heart, in the septum, which separates it from the left auricle. It has thick and strong edges, at its upper and fore part, called *Colum'næ foram'inis ova'lis*, *Isth'mus* seu *An'nulus Vieusse'nii*, *An'nulus* seu *Lim'bus fos'sæ ova'lis*: in the fœtus called *An'nulus foram'inis* seu *fossæ ova'lis*. The fossa ovalis, in the adult, replaces the inter-auricular aperture in the septum auricularum of the fœtus.

OVALBUMEN, Albumen ovi.

OVA'RIAN, *Ova'rial*, *Ovaria'nus*, (F.) *Ovarien*, *Ovarique*; (from *ovarium*.) Relating or belonging to the ovary—as *Ovarian pregnancy*.

OVARIAN ARTERY, Spermatic artery—o. Dropsy, Hydroärion — o. Nerves, Spermatic plexus of nerves—o. Pregnancy, see Pregnancy, ovarian—o. Veins, Spermatic veins — o. Vesicles, Folliculi Graafiani.

OVARIOTOMY, (*ovarium*, and *τεμνειν*, 'to cut,') Oariotomy.

OVARIQUE, Ovarian.

O'VARISTS, *O'vists*. Those physiologists who think that the phenomena of generation, in the human species and in every species of animal, result from the development of the ova or ovula of the female, merely incited by the male. Not many of the physiologists of the present day can be classed among the ovarists. The doctrine is called *O'varism* and *O'vism*.

OVARITIS, (*ovarium*, and *itis*,) Oaritis.

OVARIULE, (*ovarium*, and *ὑλη*, 'cicatrix,') Corpus luteum.

OVA'RIUM, (*ωαριον*, dim. *ωον*, *ovum*.) The *O'vary*. *Eyghed*; *Tes'tis muli'ebris* seu *femine'us*, *Ova'rion*. *Ooph'orum*, *Gynoa'rium*, *Vesica'rium*. (F.) *Ovaire*. The ovaries are the organs in which the ova are formed in oviparous animals. By analogy, the name has been given to the organs which the ancients called the *testicles* of the female. They are two ovoid bodies, almost as large as the testicles in man, placed on each side of the uterus, between the Fallopian tube and round ligament, and in the substance of the broad ligament. Their outer extremity gives attachment to one of the projections of the fimbriated extremity of the Fallopian tube; and the internal is fixed to the uterus by a small ligamentous cord, called *Ligamen'tum rotun'dum ova'rii*, *Lig'ament of the O'vary*, *Mesoa'rium*. The ovaries are composed of a very close, spongy texture—*stroma*,—and of small vesicles — *Follic'uli Graafia'ni*,—filled with a clear fluid: these vesicles contain ovules, which detach themselves from the ovarium before and after fecundation, and are carried into the cavity of the uterus by the Fallopian tube.

OVARIUM NABOTHI, Nabothi glandulæ—o. Tumidum, Oarioncus.

OVATION, see Parturition.

OVATUS, (from *ovum*,) Oval.

OVÉ, Oval.

OVEREATING, COLIC FROM, Colica crapulosa.

OVERO BUTUA. Pareira brava.

OVICAPSULE, (*ovum*, and *capsule*,) see Folliculi Graafiani.

OVIDUCT, (*ovum*, and *ductus*, 'duct,') Tube, Fallopian.

OVIDUCTUS MULIEBRIS, Tuba Fallopiana.

OVIG''EROUS, *O'riger*, *Ovig''erus*; (*ovum*, and *gero*, 'I bear.') Containing or producing ova or eggs.

OVIPARITÉ, see Oviparous.

OVIP'AROUS, *Ovip'arus*, (F.) *Ovipare*, (*ovum*, and *pario*, 'I bring forth.') An epithet applied to animals which are hatched from eggs outside of the body. The condition may be termed *Ovip'arousness*, (F.) *Oviparité*. See Generation.

OVIPAROUSNESS, see Oviparous.

O'VIPONT, (F.) *Oviponte*, ([L.] *ovum*, [F.] *œuf*, and *ponte*,) 'the laying of an egg.' A term applied to the escape of the ovum from the ovary; whilst *ovulation*, includes, also, the process of its maturation.

OVISAC, (*ovum*, and *sac*,) see Folliculi Graafiani—o. Tunic of the, see Folliculi Graafiani.

OVISM, see Ovarists.

OVISTS. Ovarists.

OVOLOGY, (*ovum*, and *λογος*, 'a discourse,') Oology.

OVOVIVIP'AROUS, (F.) *Ovo-vivipare*, (*ovum*, *vivus*, 'living,' and *pario*, 'I bring forth.') Oviparous animals, whose ova are hatched within the mother,—vipers, for example. See Generation.

OVULA (pl. of *Ovulum*) GRAAFIANA, 'ovules of De Graaf,' Folliculi Graafiani — o. Nabothi, Nabothi glandulæ.

O'VULAR, *Ovula'ris*; (from *ovulum*.) Relating or belonging to the ovule.

OVULA'TION. The formation of ova in the ovary, and the discharge of the same. Also, the development of the embryo from the egg. See Ovipont.

SPONTA'NEOUS OVULA'TION, (F.) *Ovulation spontanée*, is the spontaneous formation and discharge

of ova which takes place in the female of the mammalia. See Heat, and Menses.

OVULE, Ovulum.

OVULINE, (from *ovulum*,) Decidua reflexa.

O'VULUM, *O'vule*, (dim. of *ovum*.) A small egg. That which has the appearance of a small egg. See Ovum.

O'VUM, *Oön*, (F.) *Œuf*, *Lyg*. The egg of *Phasia'nus Gallus*, the *common hen*, is chiefly used as food. The different parts are, likewise, employed in medicine. The shell, *Auran'eum*, *Auran'tum*, (F.) *Coque* ou *Coquille d'œuf*, calcined, is esteemed an absorbent. The *Oil of the egg* is emollient, and is used, externally, to burns and chaps. The *Yolk* or *Yelk of the egg* — *Vitel'lus* seu *Vitel'lus o'vi*, *Lec'ithos*—renders oils, &c., miscible with water. Eggs, when lightboiled, are easy of digestion; but, when very hardboiled or fried, they are more rebellious.

Egg Brandy is made by taking of *Brandy* f℥iv; *Cinammon water*, f℥iv; the yolks of two *eggs*; *Sugar*, ℥ss; and *Oil of cinnamon*, gtt. ij. Mix the yolks of the eggs first with the water, the oil and the sugar, stirring constantly. Then add the brandy little and little, until a smooth fluid is formed. It is an agreeable mode of giving brandy in adynamic states.

Egg'nog, is a drink made of eggs, rum or brandy, milk and sugar beaten up together.

In *Pharmacy*, *white of egg*, which consists chiefly of albumen, is used for clarifying syrups, &c. *Yolk of egg*, (F.) *Jaune d'œuf*, beaten up with warm water and sugar, and *aromatized* with orangeflower water, forms an emulsion, which is emollient, and known under the name *Lait de poule* or *chicken's milk*.

Anatomists give the name *Ova*, *O'vula*, *O'vules*, (F.) *Œufs*, to round vesicles, containing a humour similar to the yolk of egg, which are situate in the ovaries of the female, and, when fecundated, constitute the rudiments of the fœtus. During gestation, the embryo and its enveloping membranes retain the name *Ovum*, (F.) *Œuf*. The changes induced in the mammalia after impregnation greatly resemble those in the bird.

Ovum, Testicle — o. Hystericum, see Clavus hystericus.

OX, in composition, see Oxy.

OXALAS SUBPOTASSICUS, Potass, oxalate of.

OXALAT'IC, *Oxalat'icus*. Relating to *oxalates*: hence *Oxolat'ic* or *Oxal'ic acid Diath'esis*; the habit of body which favours the formation and deposition of oxalates from the urine.

OXAL'IC AC''ID, (ὀξαλις, 'sorrel,') *Ac''idum oxali'num* seu *sacchari'num* seu *hydrocarbo'nicum* seu *acetosel'læ* seu *oxal'icum* seu *sac'chari*, *Ac''id of sugar* or *of sor'rel*, *Car'bonous acid*. An acid found in sorrel. It crystallizes in long, colourless, quadrangular prisms, and is generally found, in nature, united with lime or potassa. It has been proposed, in a diluted state, as a refrigerant, but it is unnecessary; and, besides, in quantity, it is a virulently acrid poison. It was once largely employed for cleaning boottops; and, as it strongly resembles the sulphate of magnesia, has often been taken for it. Several fatal cases are, indeed, on record. For its antidotes, &c., see Poison.

OXALIC ACID DIATHESIS, see Oxalatic.

OXALIDE, Oxalis acetosella.

OXALIS ACETOSA, gen. *Oxal'idis*, (from ὀξυς, 'acid,' owing to the sharpness of its juice,) Rumex acetosus.

Ox'alis Acetosel'la, *O. America'na*, *Ox'ys al'ba*. The systematic name of the *Woodsorrel*, *Cuckoobread*, *Sour Tref'oil*, *White sor'rel*, *Mountain Sor'rel*, *Trifo'lium aceto'sum*, *Oxitriphyl'lum*, *Lu'jula*, *Allelu'ja*, *Acetosel'la*, *Oxyphyl'lon*, *Oxytriphyl'lon*, *Pa'nis cu'culi*, (F.) *Surelle*, *Oxalide*, *Pain a Coucou*, *Alleluia*. *Ord.* Oxalidaceæ. *Sex. Syst.* Decandria Decagynia. This plant has a gratefully acid taste, and is used in salads. It has been esteemed refrigerant, antiscorbutic, and diuretic.

Oxalis Americana, O. Acetosella.

Oxalis Stric'ta, *Yel'low woodsorrel*; indigenous, has similar virtues to O. Acetosella.

Oxalis Tubero'sa, *O'ca*. A tuberous plant, whose ovalshaped root is used as food by the Peruvians. It is watery, has a sweetish taste, and is much liked.

OXALIUM, Potass, oxalate of.

OXAL'MĒ, (ὀξαλμη, from ὀξυς, and ἁλς, 'salt.') A mixture of vinegar and salt.

OXALURIA, Urine, oxalic.

OXELÆ'ON, (ὀξελαιον, from *oxy*, and ελαιον, 'oil.') A mixture of vinegar and oil, used as a condiment.

OXÉOLÉ, (from ὀξυς,) *Acétolé*.

OX EYE, Helenium autumnale — o. Gall, Bile of the ox.

OXICÈDRE, (ὀξυκεδρος,) Juniperus oxycedrus.

OXID, Oxyd.

OXIDATION, Oxydation.

OXIDE, Oxyd.

OXIDUM, Oxyd, see Oxydum.

OXI'NES, (ὀξινης, [οινος,] from ὀξυς, 'sharp.') Wine already sour, but not yet vinegar.

OXITRIPHYLLUM, (*oxy*, and τριφυλλον, 'trefoil,') Oxalis acetosella.

OXODE, Oxyd.

OXODES, (ὀξωδης,) Acidulous.

OXOIDES, (from *oxy*, and ειδος, 'resemblance,') Acidulous.

OXTER, Axilla.

OXURE, Oxyd.

OXUS, (ὀξυς,) Aceticum acidum, Acetum.

OXY, (from ὀξυς, 'acute,') in composition, acute, quick, pointed, sharp, acid. In the composition of chemical terms, *oxy* and *ox* mean oxygen.

OXYA, (ὀξυα,) Fagus sylvatica.

OXYACANTHA, (ὀξυακανθα, from *oxy*, and ακανθα, 'a thorn,') Mespilus oxyacantha.

Oxycan'tha Gale'ni, *Ber'beris*, *B. vulga'ris*, *Spi'na ac''ida*, *Crespi'nus*, (F.) *Épine vinette*, *Vinettier*. *Family*, Berberideæ. *Sex. Syst.* Hexandria Monogynia. The *Bar'berry*. The fruit of the berries, *Bar'berries*, is gratefully acid, and moderately astringent. By preparing an alcoholic extract of the root *Ber'beris*, (Ph. U. S.) and adding water to it, a pulverulent brown substance is thrown down, which, when dissolved in alcohol and evaporated, yields the bitter principle, *Ber'berin*, which is an excellent stomachic in the dose of 2, to 10 grains.

The American Barberry, *Ber'beris Canaden'sis*, *Pip'peridge Bush*, *Sow'berry*, differs slightly from the European. It flourishes on mountains and hilly districts from Canada to Virginia.

OXYÆSTHESIA, (*oxy*, and æsthesia,) Hyperæsthesis.

OXYAPHE, (*oxy*, and αφη, 'touch,') Hyperaphia.

OXYAPHIA, Hyperaphia.

OXYBAPHION, (ὀξυβαφιον, from ὀξυς, 'acid,' or ὀξος, 'vinegar,' and βαπτειν, 'to dip,') see Acetabulum.

OXYBLEP'SIA, (ὀξυβλεψια, from *oxy*, and βλεπω, 'to see,') Acuteness of sight.

OXYBOL'IA, (*oxy*, and βολη, 'ejection.') Too rapid emission of sperm.

OXYCÈDRE, (ὀξυκεδρος,) Juniperus oxycedrus.

OXYCEPHA'LIA, 'Sugar-loaf head,' (*oxy*, and κεφαλη, 'head.') Monstrosity in which the head is peaked like a sugar-loaf.

OXYCOCCOS, (*oxy*, and κοκκος, 'berry,') Vaccinium oxycoccos — o. Macrocarpus, see Vaccinium oxycoccos—o. Palustris, Vaccinium oxycoccos.

OX'YCRATE, *Oxycra'tum*, (ὀξυκρατον, from *oxy*,

and κραω, 'I mix;') *Pos'ca, Phus'ca.* A mixture of vinegar and water; frequently used in medicine as a refrigerant and antiseptic.

OXYCRO'CEUM EMPLASTRUM, (*oxy*, and κροκος, 'saffron.') A plaster, composed of *saffron, pitch, colophony, yellow wax, turpentine, galbanum, gum ammoniac, myrrh, olibanum,* and *mastic.* It was employed as a strengthening plaster.

OXYCUM, Oxygen.

OX'YD, *Ox'id, Ox'ide, Ox'yde, Ox'ydum, Ox'idum,* (F.) *Oxyde, Oxode, Oxure.* A combination, not acid, of a simple body with oxygen.

Oxyd, Calculous, Oxyd, cystic.

Oxyd, Cyst'ic, *Cal'culous* or *Ves'ical ox'yd, Cys'tine, Neph'rine, Scorodos'mine.* A species of urinary calculus, having the shape of confused, yellowish, semitransparent, insipid, very hard crystals. When distilled, it furnishes subcarbonate of ammonia, like all nitrogenized matters. It dissolves in the nitric, sulphuric, phosphoric, and oxalic acids.

Oxyd, Vesical, Oxyd, cystic.

OXYDA'TION, *Oxyda'tio, Oxida'tion, Oxygena'tion.* The action of oxydizing a body; that is, of combining it with oxygen, a combination from which results an oxyd.

OXYDE, Oxyd.

OXYDE D'ANTIMOINE SULFURÉ, Oxydum stibii sulphuratum — *o. Gris* ou *noir de Mercure,* see Hydrargyri oxydum cinereum.

OXYDER'CIA, (οξυδερκια,) *Oxydor'cia, Visûs a'cies,* (*oxy*, and δερκω, 'I see.') Sharpness of vision.

OXYDER'CICUS, *Oxyder'ces.* A medicine which sharpens the sight.

OXYDORCIA, (οξυδορκια,) Oxydercia.

OXYDUM, Oxid—o. Antimonii cum phosphate calcis, Antimonial powder.

Oxydum Fer'ri Ni'grum, *Fer'ri ox'idum ni'grum, Black ox'yd of i'ron.* The scales, which fall from iron, when heated, consist of iron combined with oxygen. They have been used like the chalybeates in general. The Edinburgh Pharmacopœia has a *Fer'ri ox'idum ni'grum,* made by precipitating, by *ammonia,* a solution of the mixed *sulphate of protoxide* and *sesquioxide of iron.* An analogous preparation is in the Dublin Pharmacopœia, under the name *Fer'ri ox'ydum magnet'icum, Magnet'ic ox'ide of i'ron, Mar'tial E'thiops.*

Oxydum Ferricum Crystallizatum Nativum, Hæmatites—o. Hydrargyri completum, Hydrargyri nitrico-oxydum—o. Hydrargyricum, Hydrargyri nitrico-oxydum—o. Hydrargyricum præparatum, Hydrargyri oxydum cinereum—o. Hydrargyrosum, Hydrargyri oxydum cinereum.

Oxydum Stib'ii Sulphura'tum, *He'par antimo'nii, Cro'cus metallo'rum* seu *antimo'nii,* (F.) *Oxyde d'antimoine sulfuré, Foie d'Antimoine.* This was formerly exhibited in the cure of fevers, but it is now rarely employed.

OXYDUM URICUM, Uric oxide.

OXYECOIA, (οξυηκοια, from *oxy*, and ακοη, 'hearing,') Hyperacusis.

OXYG'ALA, (αξυγαλα, from *oxy*, and γαλα, 'milk.') Sour milk. The *Oxygala equi'num, Caracos'mos,* is reckoned amongst the delicacies of the Tartars.

OXYG'ARON, (οξυγαρον, from *oxy*, and γαρον, 'garum.') A composition of garum and vinegar.

OX'YGEN, *Oxygen'ium, Empy'real, Pure, Vi'tal* or *dephlogis'ticated Air, Oxyg''enes, Ox'ycum, Princip'ium oxyg''enans* seu *oxygenet'icum* seu *acidif'icans* seu *ac''idum, Elemen'tum acidif'icum,* (F.) *Oxygène, Air du feu;* (οξυς, 'acid,' and γενναω, 'I engender,' that is, *generator of acids;* and such it was believed to be *exclusively,* at the period when the name was given to it. This is now known not to be the case.) Oxygen is an elementary principle, largely distributed in nature. It exists in the air, in water, in several acids, in all the oxyds, and in vegetable and animal substances It is obtained by decomposing the peroxyd of manganese or the chlorate of potassa by heat in close vessels. Although oxygen, in the state of admixture in which it is found in the atmosphere, is of vital importance, it cannot be respired in a pure state with impunity. Animals die in it long before the whole of the oxygen is consumed. The properties of oxygen seem to be stimulant. It increases the force and velocity of the pulse, and has, accordingly, been used in cases of chronic debility, chlorosis, asthma, scrofula, dropsy, paralysis, &c. It requires to be diluted with from 10 to 20 parts of atmospheric air; one to two quarts being used during the day.

OXYGENATED WATER, Hydrogen, peroxide of.

OXYGENATION, Oxydation.

OXYGÈNE, Oxygen.

OXYGÉNÈSES. A name given by Baumes to diseases which he attributed to disordered oxygenation.

OXYGEUSIA, (*oxy*, and γευσις, 'taste,') Hypergeustia.

OXYG'LICUS, *Oxyg'lyces,* (οξυγλυκες, from *oxy*, and γλυκυς, 'sweet;') *Mul'sa ac''ida, Ace'tum mulsum dul'cē.* Prepared by macerating and boiling honeycomb (from which the greater part of the honey has been taken) in water, and adding vinegar. An *Oxymel.*

OXYHYDROCARBURETUM EX OLEO PYROXYLICO PARATUM, Creasote.

OXYLAPATHUM, (*oxy*, and λαπαθον, 'dock,') Rumex acutus.

OX'YMEL, *Apom'eli, Mel accta'tum,* (F.) *Acétomel,* (οξυμελι, from *oxy*, and μελι, 'honey.') Honey and vinegar boiled to a syrupy consistence. (*Mel. despumat.* ℔v, *Acid. acetic.* ℥vij, *Aq. destillat.* f℥viij. Add the acid to the water and mix them with the honey previously heated.—Ph. L.) It is cooling;—externally detergent.

Oxymel Æruginis, Linimentum Æruginis.

Oxymel Col'chici, *O. of mead'ow saf'fron,* (F.) *Oxymel colchique.* (*Rad. Colch. recent. in laminas tenues sectæ* ℥j, *Aceti destillati* ℔j, *Mellis despumat.* pond. ℔ij. Macerate in a gentle heat for 48 hours. Press and boil the liquor with the honey to the thickness of a syrup; stirring with a wooden spoon. Ph. D.) It is expectorant and diuretic. Dose, f℥j, in gruel.

OXYMEL COLCHIQUE, O. colchici — o. of Meadow saffron, O. colchici.

Oxymel Scil'læ, *O. of squills, O. Scillicit'icum, Mel scil'læ.* (*Mellis despumat.* Oiss, *Aceti scillæ,* Oij. Boil in a glass vessel over a gentle fire to a proper consistence. Ph. U. S.) It is reputed to be expectorant and diuretic. Dose, f℥j to f℥ij.

Oxymel of Squill, O. scillæ.

OXYMYRRHINE, (*oxy*, and μυρρινη, 'myrtle,') Ruscus.

OXYMYRSINE, (οξυμυρσινη,) Ruscus.

OXYNGIUM, Adeps suillus.

OXYNI'TRON, (*oxy*, and νιτρον, 'nitre.') Name of a plaster, composed chiefly of vinegar and nitre, and recommended by Aëtius.

OXYNOSEMA, gen. *Oxynose'matis,* (*oxy*, and νοσημα, 'disease,') Acute disease.

OXYNOSOS, (*oxy*, and νοσος, 'disease,') Acute disease.

OXYNUSOS, (*oxy*, and νοσος, 'disease,') Acute disease.

OXYO'PIA, *Galero'pia, Hyperop'sia, Suffu'sio excla'rans, A'cies visûs,* (*oxy*, and ωψ, 'sight.') Excessive acuteness of the sense of sight. Instances have occurred where persons could see the stars in the day time. The cause is seated in great sensibility of the retina. The term has been used synonymously with nyctalopia.

OXYOSPHRE'SIA, *Oxyosphra'sia*, (*oxy*, and *ὀσφρησις*, 'smell.') Excessive acuteness of the sense of smell.

OXYPHLEGMA'SIA, *ὀξυφλεγμασια*, (from *oxy*, and *φλεγμασια*,) *Acu'ta et ve'hemens inflamma'tio.* A violent inflammation.

OXYPHŒNICON, (*oxy*, 'acid,' and *φοινικιος*, 'deep red.' [?]) Tamarindus.

OXYPHO'NIA, *Vox acu'ta*; (*ὀξυφωνια*, from *oxy*, and *φωνη*, 'voice;') *Paraphо'nia clan'gens* seu *ulcero'sa*, *Clan'gor*, *Vox clango'sa*, *Leptopho'nia.* A shrill and squalling voice,—frequently, a symptom of morbid affection of the larynx.

OXYPHYLLON, (*oxy*, and *φυλλον*, 'a leaf,') Oxalis acetosella.

OXYPODIA, (*oxy*, and *πους*, gen. *ποδος*, 'foot,') see Kyllosis.

OXYREG'MIA, (*ὀξυρεγμια*, from *oxy*, and *ερευγω*, 'I belch.') *Ruc'tus ac'idus*, Acid eructation.

OXYR'IA RENIFORM'IS, (*ὀξυς*, 'sharp, acid,') *Ru'mex diq''ynus*, *Bo'real sour'dock*, *Moun'tain Sor'rel*, *Welsh sor'rel.* A plant, *Ord.* Polygonaceæ, *Sex. Syst.* Diandria Digynia, which grows in the northern parts of America and Europe; blossoming in the spring. It possesses the same properties as Oxalis acetosella.

OXYRRHOD'INON, *Ace'tum rosa'tum*, (*oxy*, and *ῥοδον*, 'a rose.') A composition of vinegar and roses. (*Ol. rosat.* ℥ij, *acet. rosat.* ℥j.) Used as a liniment in herpes and erysipelas.

OXYS, (*ὀξυς*,) Acid, Acute—o. Alba, Oxalis acetosella.

OXYSAC'CHARUM, (*oxy*, and *σακχαρον*, 'sugar.') A mixture of sugar and vinegar; termed *Oxysac'charum vomiti'vum*, when it held in solution the glass of antimony; and *Oxysac'charum scillit'icum*, when it contained squills.

OXYSAL DIAPHORET'ICUM AN'GELI SALÆ. A preparation of Angelo Sala. Acetate of potass exposed to the atmosphere; and consequently fallen into a state of deliquium.

OXYTARTARUS, Potassæ acetas.

OXYTES, (*ὀξυτης*,) Acidity.

OXYTOC'IA, (*oxy*, and *τικτω*, 'I bring forth.') Rapidity of parturition.

OXYTOC'IC, *Oxyt'ocus.* A medicine which promotes delivery.

OXYTRIPHYLLON, (*oxy*, and *τριφυλλον*, 'trefoil,') Oxalis acetosella.

OXYURE VERMICULAIRE, Ascaris vermicularis.

OXYURIS VERMICULARIS, (*oxy*, and *ουρα*, 'a tail,') Ascaris vermicularis.

OYSTER GREEN, Ulva latissima — o. Plant, Tragopogon — o. Root, Tragopogon — o. Vegetable, Tragopogon.

OYSTER SHELLS, Ostreæ testæ—o. s. Prepared, Testa præparata.

OZOSTOMIA, (*ὀζη*, 'a stench,' and *στομα*, 'mouth,') Breath, offensive.

OZÆ'NA, (*ὀζαινα*,) *Cory'za enton'ica* seu *purulen'ta* seu *ozæno'sa* seu *ulcero'sa* seu *virulen'ta* seu *malig'na*, *Pyorrhœ'a nasa'lis*, *Entozæ'na*, *Rhini'tis ulcero'sa*, *Ulcus na'rium fœ'tens*, (*ὀζη*, 'a fetid smell.') (F.) *Ozène*, *Punaisie.* An affection of the pituitary membrane, which gives occasion to a disagreeable odour similar to that of a crushed bed-bug; hence the name *Punais*, by which the French designate one labouring under ozena. It is, sometimes, owing to caries of the bones; but is, perhaps, most frequently dependent upon syphilitic ulceration of the pituitary membrane, with or without caries of the bones of the nose.

OZÆNA BENIGNA, Coryza, chronic.

OZE, (*ὀζη*,) Breath, offensive.

OZEMUN, Albumen.

OZÈNE, Ozæna.

O'ZON, O'ZONE; (*ὀζω*, 'I smell of something.') The powerfully odorous matter produced when a current of ordinary electricity passes from pointed bodies into the air. It generally is presumed to be a peculiar modification of oxygen; and in varying quantity in the atmosphere is supposed to affect the health of man; but knowledge of this matter is exceedingly vague.

Air containing ozone is said to be *o'zonized*, (F.) *Ozonisé*, *Ozoné.*

P.

P. A contraction of *Pugillus.*
P. Æ., A contraction of *Partes æquales.*
P. P., A contraction of *Pulvis patrum.*
} See Abbreviation.

PAB'ULUM, *Tro'phē*, *Phor'bē*, *Alimen'tum*, *Nutrimen'tum.* Food, aliment. The *animal heat* and *animal spirits*—unmeaning terms—were formerly considered the *Pabulum vitæ.*

PACAY, Prosopis dulcis.

PACCHIO'NI, GLANDS or CORPUSCLES OF, *Pacchio'nian Bod'ies*, *Glandulæ Du'ræ Ma'tris* seu *du'ræ Menin'gis*, *Tuber'cula par'va* seu *Cor'pora glandifor'mia du'ræ ma'tris*, (F.) *Glandes de Pacchioni*, *Granulations cérébrales*, (after Pacchioni, an Italian anatomist.) Small, whitish, or yellowish bodies, sometimes separate, at others united like a bunch of grapes, which are observed in several parts of the dura and pia mater. They receive vessels, but apparently no nerves. Their texture and uses are unknown. A considerable number is observed in the longitudinal sinus, covered by the internal membrane.

PACHÆ'MIA, *Pachyæ'mia*, *Pachæ'ma*, *Pachyæ'ma*, (*pachy*, and *αιμα*, 'blood.') Too great thickness of the blood.

PACHEABLEPHARO'SIS, *Pacheableph'ara*, *Pachybleph'aron*, *Pachyblepharo'sis*, *Pach'ytes*, (*pachy*, and *βλεφαρον*, 'an eyelid.') A name given, by some authors, to a thickening of the eyelids, produced by tubercles or excrescences formed on their margins. It is the same affection as that which Sauvages designates *Coli'go à Pacheblepharo'si.*

PACHETOS, (*παχετος*,) see Laqueus.

PACHULOSIS, (*παχυλος*, 'thick,') Pachylosis.

PACHY, (*παχυς*, 'thick,') in composition, thick.

PACHYÆMIA, Pachæmia.

PACHYBLEPHARON, Pacheablepharosis.

PACHYCHOL'IA, (*pachy*, and *χολη*, 'bile.') Morbid thickness of the bile.

PACHYDERMATOCE'LĒ, (*pachy*, *δερμα*, gen. *δερματος*, 'skin,' and *κηλη*, 'a tumour.') A disease of the dermoid tissue, apparently congenital, which increases, at times from a small mole or spot to the size and appearance of a relaxed and very emaciated mamma.

PACHYDERMIA, Elephantiasis.

PACHYLO'SIS, *Pachulo'sis*, (*παχυλος*, 'thick.') An inordinate production of the epidermis dependent upon hypertrophy of the papillæ of the skin.

PACHYMENINGI'TIS, *Per'imeningi'tis*, (*pa*

chymeninx, 'dura mater,' and *itis*, 'inflammation.') Inflammation of the dura mater.

PACHYMENINX, (*pachy*, and *μηνιγξ*, gen. *μηνιγγος*, 'a membrane,') Dura mater.

PACHYNSIS, (*παχυνσις*, from *παχυνω*, 'to make thick.') Polysarcia adiposa.

PACHYNTICA, (*παχυντικα*,) Incrassantia.

PACHYSMUS, (*παχυσμος*, from *παχυς*, 'thick,') Polysarcia adiposa.

PACHYTES, (*παχυτης*, 'thickness,') Pachebleparosis.

PACINIAN CORPUSCLES, (after Pacini,) see Corpuscles.

PACKING, OF THE HYDROPATHISTS; *Émaillotage.*

PACKWAX, see Nucha.

PAD, ([S.] *Pajado*, from *paja*, 'straw' [?];) *Plumace'olus*, *Pulvil'lus*, *Pulvin'ulus*, *Par'vum pulvi'nar*;—a *cush'ion*, a *little cushion*; a *junk*; (F.) *Coussinet.* A small bag, filled with feathers, wool, hair, bran, chaff, &c. It is used to compress or support parts. In the treatment of certain fractures, soft pads or cushions, called by the French *Remplissages*, are placed between the splints and the fractured limb, in order that the prominent parts may not be chafed by the splints.

PADDIE, see Oryza.

PADDY, see Oryza.

PADNOON, Bitneben.

PAD'UA, MIN'ERAL WA'TERS OF. Near Padua, in Italy, there are several thermal sulphureous springs, the hottest of which is 188° Fah. The chief establishments are Abano, Battaglia, and Montegrotto.

PADUS, (*παδος*,) Prunus padus—p. Avium, Prunus padus—p. Laurocerasus, Prunus laurocerasus.

PÆDAN'CHONĒ, (*pædo*, and *αγχω*, 'I strangle;') *Angi'na Sic'ca.* Name of a fatal species of cynanche, mentioned by M. A. Severinus; probably the *Cynanche Trachealis*, or *Cynanche Maligna.*

PÆDARTHROCACE, (*pædo*, and *arthrocace*,) Spina ventosa.

PÆDATROPH'IA, *Atrophia infan'tilis*, *Marasmus lactan'tium*, (*pædo*, *a*, priv., and *τροφη*, 'nourishment.') Atrophy of children. Tabes mesenterica.

Pædatrophia Glandulosa, Scrofula.

PÆDENCÉPHALIE, (*pædo*, and *εγκεφαλος*, 'encephalon,') Hydrocephalus internus.

PÆDERAS'TIA, (*παιδερασια*,) *Pædica'tio*, *Cinæ'dia*, (F.) *Pédérastie*, (*pædo*, and *ερως*, 'love.') The love of boys. A disgraceful passion, common in ancient times, but now unknown. These terms are likewise applied to the crime of sodomy.

PÆDERAS'TIC, *Pæderas'ticus.* Relating or appertaining to pæderastia.

PÆDEROTA VIRGINICA, Leptandra virginica.

PÆDI'A, (*παιδεια*,) *Educa'tio infan'tum.* The bringing up or education—physical as well as moral—of children.

PÆDIATRI'A, *Pædiat'rica*, *Pædiat'rics*, (*pædo*, and *ιατρεια*, 'medical management.') Treatment of the diseases of children.

PÆDICÁTIO, (*pædicare*, *pædicatum*, 'to commit pæderastia,') Pæderastia.

PÆ'DICI, *Pai'dici* (*morbi.*) Developmental affections, as malformations and teething.—(Dr. W. Farr.)

PÆDICTERUS, (*pædo*, and *icterus*, 'jaundice,') Icterus infantum.

PÆDION, (*παιδιον*,) Infans.

PÆDO, (*παις*, gen. *παιδος*, 'a child,') in composition, child, boy.

PÆDOBAROMACROMETER, (*pædo*, *βαρος*, 'weight;' *μακρος*, 'large,' and *μετρον*, 'measure.') Baromacrometer.

PÆDOMETER, (*pædo*, and *μετρον*, 'measure,') Baromacrometer.

PÆDON'OSUS, (*pædo*, and *νοσος*, 'disease.') A disease of childhood.

PÆDOPHLEBOTOM'IA, (from *pædo*, *φλεψ*, 'a vein,' and *τομη*, 'incision.') *Venæsec'tio puero'rum.* Bleeding performed on children.

PÆDOT'RIBES, *Min'ister Gymnas'tæ*, (*pædo*, and *τριβω*, 'I train.') In ancient gymnastics, the officer acquainted with all the prescribed exercises, and who carried them into effect, according to the direction of the superior.

PÆDOT'ROPHY, *Pædotroph'ia*, (F.) *Pédotrophie*, (*pædo*, and *τροφη*, 'nourishment.') The part of hygiene which concerns the nourishment of children.

PÆEOSYNE, (*παιησυνη*,) Medicine.

PÆON, (*Παιων*, 'the god of physic,') Physician.

PÆO'NIA, *P. officina'lis* seu *mas'cula* seu *nemora'lis* seu *fem'ina* seu *loba'ta*, *Hæmago'gum*, *Pe'ony*, or *Pi'ony*, *male and female.* (F.) *Pivoine*, *Pione*, *Herbe Sainte-Rose*, (from *Παιων*, 'the god of physic.') The root, flowers, and seeds were long esteemed powerful medicines. They are feebly astrigent, and have been considered to be narcotic and antispasmodic. They have been given, particularly, in intermittents and epilepsy, but are not now used. The flowers are called *Rosæ benedic'tæ*, *R. re'giæ.*

PÆONICE, (*παιωνικη*, [*τεχνη*,] 'medical,' [art.]) Medicina.

PÆONICUS, (*παιωνικος*,) Medical.

PÆONIS, (*παιωνις*,) Medicina.

PÆONIUS, (*παιωνιος*,) Medical.

PAGAPOPLEX'IA, (*παγος*, 'icy coldness,' and *αποπληξια*, 'apoplexy.') Apoplexy from cold.

PAGOS, (*παγος*,) Peritonæum.

PAIDIA, (*παιδεια*,) Infancy.

PAIDICI, Pædici.

PAIDION, (*παιδιον*,) Infans.

PAIGIL, Primula veris.

PAIN, ([old F.] *painer*, 'to torment;' Sax. pinan, 'to torture.') *Do'lor*, *Al'gos*, *Algе'ma*, *Alge'do*, *Alge'sis*, *Odynē*, *Ache*, *Aitch*, (Sc.) *Hachse*, (Prov.) *Crazy*, *Wark*; *Mis'ery*, (especially a constant annoying pain or suffering,) (F.) *Douleur.* A disagreeable sensation, which scarcely admits of definition. It is generally symptomatic, and is called *acute*, (F.) *aiguë*, when sharp and violent; when short and sudden a *twinge*, and, when more violent, a *pang*; *pungent*, (F.) *pongitive*, when it resembles that which would be produced by a sharp instrument run into the part: *heavy*, (F.) *gravative*, when attended with a sensation of weight; *tensive*, when the part seems distended: *lan'cinating*, when occurring in shoots: *lac'erating* or *tearing*, when the part seems to be tearing: *burning*, (F.) *brûlante*, when resembling that produced by a burn, &c.

Pain, Sun, Hemicrania.

PAIN, (from *panis*, 'bread,') see Triticum—*p. à Concou*, Oxalis acetosella—*p. de Madagascar*, Jatropha manihot—*p. de Porceau*, Cyclamen.

PAINFUL, *Odyno'des*, (F.) *Douloureux.* Full of pain.

PAINS, *La'bour pains*, *Throes*, *Throws*, *Parturien'tis dolo'res*, *O'din*, *O'dis*, *Dolo'res ad par'tum*, *Tor'mina parturien'tium*, (F.) *Mal d'Enfant*, *Douleurs.* The uneasy sensations that accompany labor, and are owing to uterine contraction. The pains that precede actual delivery, and are simply employed in dilating the os uteri, are called *grinding*: those which extrude the child, *forcing.* Those which take place in the first days after delivery, and are employed in forcing away coagula, &c., are termed *Afterpains*, *Dolo'res* seu

Tor'mina post par'tum, D. puerpera'rum, (F.) *Tranchées utérines.*

"*To take a pain,*"—"To try a pain,"—is to make an examination *per vaginam,* during labour, to discover its progress, character, &c.

The French term the pains, which precede and announce labour, *mouches;* those which accompany it, *douleurs;* and those which occur immediately afterwards, *tranchées* ou *coliques.*

PAINS, AFTER, see P. labour.

PAINS, GNAW'ING, *Dolo'res roden'tes.* Pains resembling what might be produced by the gnawing of an animal.

PAINT, (*pingere, pinctum,* 'to paint,' [L.] *pinto,* [F.] *peint;*) *Pigmen'tum, Fu'cus,* (F.) *Fard.* A name given to different substances, employed for embellishing the complexion or rendering the skin softer. The substances most commonly used for this purpose are:—the *Subni'trate of Bis'muth,* (F.) *Blanc de fard.* A spirituous solution of benzoin, precipitated by water, and forming *Vir'gin's milk,* (F.) *Lait virginal;* the red or *rouge* of the carthamus; *Spanish white;* the oxides of lead, tin, and mercury, vermilion, red saunders, &c. All paints may be said to be noxious. They injure the skin; obstruct perspiration; and, thus, frequently lay the foundation for cutaneous affections. See Cosmetic.

PAINT, Indian, Hydrastis Canadensis, Sanguinaria Canadensis—p. Yellow, Hydrastis Canadensis.

PAIS, (παις, gen. παιδος,) Boy.

PALAD, Vertex.

PALÆSTRA, (παλαισπρα, 'a place for wrestling,' from παλη, 'wrestling.') Gymnasium.

PALAIS, Palate.

PALAME, (παλαμη,) Palm.

PALATAL, Palatine.

PAL'ATE, *Pala'tum, Hypero'a, Hypero'um, Uranis'cus, Uranus, Roof of the mouth, Fos'sa Palati'na, Pala'tum stab'ile* seu *du'rum* seu *os'seum, Hard Pal'ate,* (F.) *Palais.* The upper part of the cavity of the mouth; a kind of parabolic vault formed by the two superior maxillary bones and the two palate bones, covered with a thick and dense mucous membrane; bounded, before and at the sides, by the superior dental arch; and behind by the velum palati. A whitish line runs along the middle, from before to behind, at the anterior extremity of which is a tubercle corresponding to the inferior orifice of the anterior palatine canal. The arteries of the palate and corresponding gums proceed from the palatine, alveolar, infraorbitar, labial, and buccal branches. The veins follow a similar course. The nerves are given off from the palatine, facial, infraorbitar, superior dental, and from the nasopalatine ganglion.

PALATE ARTIFIC''IAL, *Obtura'tor for the pal'ate,* (F.) *Obturateur du Palais.* A plate of tortoiseshell, silver, vulcanite, &c., used to close a deficiency of the palate.

PALATE BONE, *Os Pala'ti* seu *basila'rē,* (F.) *Os Palatin* ou *du Palais,* is a small bone of an irregular shape, situate at the posterior part of the nasal fossæ and palate. It seems formed by the union of two bony plates joined at right angles to each other; so that one is *inferior* and *horizontal;*—the other, *superior* and *vertical.* The *horizontal* or *palatine portion, Arch of the palate,* is quadrilateral. Its upper surface forms part of the nasal fossæ; the lower forms part of the palatine arch, and contains the inferior orifice of the *posterior palatine canal.* Its *anterior* edge is articulated with the palatine process of the superior maxillary bone; the *posterior* is free and sharp. It gives attachment to the velum palati, and presents an eminence, which, when joined with one on the opposite side, forms the posterior nasal spine. Its inner edge is articulated with the corresponding bone; its outer is confounded with the vertical portion. The *vertical* or *ascending portion* has the form of a long square. The inner surface forms part of the outer paries of the nasal fossæ. Its outer surface is unequal, and is articulated with the superior maxillary bone; behind, it presents a vertical groove, which forms part of the posterior palatine canal; and, above, a small free surface, which looks into the zygomatic fossa. Its anterior edge is united with the superior maxillary bone; the posterior is unequal, and rests on the internal ala of the pterygoid process. The angle, which it forms by uniting with the posterior edge of the horizontal portion, presents a very prominent pyramidal eminence, called the *tuberosity of the palate bone.* Its upper margin is surmounted by two eminences;—the one, anterior, called the *orbitar process;*—the other, posterior, the *sphenoid process.* These two processes are separated by an almost circular notch, which the sphenoid bone forms into a foramen, called the *sphenopalatine.*

This bone appears to be developed from a single point of ossification. It is articulated with the sphenoid, ethmoid, the cornua sphenoidalia, superior maxillary bone, the inferior spongy bone, the vomer, and its fellow.

PALATE, CLEFT, see Harelip—p. Falling down of the, Uvulitis—p. Fissured, see Harelip—p. Hard, Palate—p. Soft, Velum pendulum palati.

PAL'ATINE, *Pal'atal, Palati'nus, Pal'atic,* (from *palatum.*) Relating or belonging to the palate.

PAL'ATINE OR PAL'ATAL AR'TERIES are two in number. They are distinguished into, 1. The *superior palatal* or *palatine, Palati'na descen'dens* or *Pal'atomaxil'lary,* which leaves the internal maxillary behind the top of the orbit; descends into the pterygomaxillary fissure, and enters the posterior maxillary canal. Its branches are distributed to the velum palati and the nasal fossæ. 2. The *inferior* or *ascending palatine* or *palatal,* which is very small, and separates from the facial near its origin. It passes along the lateral and superior part of the pharynx, between the pillars of the velum palati, and divides into a number of ramusculi, which are distributed to the pharynx, the corresponding tonsil, the Eustachian tube, and the velum palati.

PALATINE CANALS' OR DUCTS. These are two in number. The *anterior, Duc'tus incisi'vus* seu *Naso'lo-palati'nus, Inci'sive canal,* is situate at the anterior part of the palatine arch, and is formed by the two superior maxillary bones. It is single beneath, but opens above by two apertures, one into each nasal fossa. The foramen is called *Fora'men incisi'vum* seu *Palati'num ante'rius* seu *Alveola'rē ante'rius* seu *cæ'cum os'sis maxilla'ris superio'ris.* The *posterior palatine canal* is situate at the posterior part of the palate. It is formed by the palate and superior maxillary bones, ascends between these two bones, and in its course gives rise to two or three small accessory palatine canals, which open above the tuberosity of the palate bone. It transmits the nerves and vessels which bear its name. The foramen is called *F. Palati'num poste'rius* seu *Palatomaxilla'rē* seu *alveola'rē poste'rius.*

PALATINE MEMBRANE is the fibro-mucous membrane that lines the palate or roof of the mouth.

PALATINE OR PALATAL NERVES, *Gutturo-palatins* (Ch.), are three in number, and arise from the inferior part of the sphenopalatine ganglion. 1. The *great Palatine, Palatin inférieur* (Ch.), is situate anteriorly to the two others, and descends into the posterior palatine canal; gives a *nasal* filament and a *staphyline* filament, and is distributed on the palate. 2. The *middle palatine, Guttural* (Ch.), which arises behind the preceding,

enters one of the accessory palatine canals, and is distributed to the tonsils and velum palati. 3. The *little palatine nerve*, situate still more backward than the last, which loses itself by several filaments in the uvula, tonsils, and follicles of the palatine membrane.

PALATITE, (*palatum*, and *itis*.) Uranisconitis.

PALATITIS, Uranisconitis.

PALATOGLOSSUS, Glossostaphylinus.

PALA'TOPHARYNGE'US, *Pharyn'gostaphyli'nus*, *Staphyli'nopharyngeus*, *Thyropharyngo'staphyli'nus*, part of the *Hyperopharyngeus*, (F.) *Palato-pharyngien*, *Stylo-pharyngien* (Ch.). A membranous muscle, broader at its middle than at its extremities, and situate vertically in the lateral paries of the pharynx and velum palati. It includes the peristaphylopharyngeus, pharyngostaphylinus, and thyrostaphylinus of Winslow. When the palatopharyngei contract together, they depress the velum. They elevate and shorten the pharynx, and act principally in deglutition.

PALATO-PHARYNGIEN, Palatopharyngeus—p. Salpingeus, Circumflexus—*p. Salpingien*, Circumflexus.

PALATOSTAPHYLINI, see Azygos muscle.

PALATUM, Palate—p. Durum, see Palate—p. Fissum, Hyperoöchasma, see Harelip—p. Mobile, Velum pendulum palati—p. Molle, Velum pendulum palati—p. Osseum, see Palate—p. Pendulum, Velum pendulum palati.

PALE, (παλη, 'dust.') Pollen.

PA'LEA CABOT'II. A fern of Java, the delicate filaments of which, derived from the stipes, act as mechanical styptics.

PALE'NESS, *Pal'lor*, *Och'rotes*, *Ochro'ma*, *Ochri'asis*, *Leuco'sis*, *Dealba'tio*, *Lu'ror*, (F.) *Pâleur*. Whiteness of complexion. It appears to be owing to a diminution or alteration of the blood circulating in the capillary vessels, and is often a sign of disease.

PÂLES COULEURS, ('pale colors.') Chlorosis.

PALET, (from [F.] *pelote*,—'itself,' from *pila*, 'a ball.') Head.

PALETTE (F.) 'a battledore.' *Pal'mula*, *Fer'ula*. An instrument of percussion. It has the shape of a spatula with a long handle; is made of very light, white wood, and has been proposed by M. Percy for what is called the *Massage*, a kind of pressure or kneading, exerted by the hand on the body and limbs, to excite the tone of the skin and subjacent tissues.

Palette (from *patella*) also means a cup for bleeding; and the xiphoid cartilage [?].

PALETTE DE CABANIS. An instrument invented by Cabanis, of Geneva, to draw out the extremity of the stylet when passed into the nose, in the operation for fistula lacrymalis. It is composed of two plates of silver, pierced with several holes, and movable on each other. To use it, the instrument must be carried into the nose, so that the holes of the two plates correspond. When the end of the stylet is received into one of these holes, it is pinched, by sliding one of the plates on the other, and is easily withdrawn.

PALETTE À PANSEMENT. A small splint of thin, scooped wood, having the shape of the hand, and used to support the hand in certain cases,—when burnt, for example,—in order to prevent the fingers from being deformed by the cicatrices.

PÂLEUR, ([L.] *pallor*.) Paleness.

PALI PLAGUE, see Plague.

PALICOUR'EA CRO'CEA, *Psycho'tria crocea*, *Order*, Cinchonaceæ, a native of the West Indies, is possessed, according to Von Martius, of emetic properties.

PALICOUREA MARCGRAAV'II, *Erva do rato*, *Galva'nia Velloxii*, a native of Brazil, is poisonous, and employed there to kill rats and mice.

PALICOUREA OFFICINA'LIS, a native of Brazil, is reputed to be a powerful diuretic in small doses.

PALICOUREA SPECIO'SA, *Goldshrub*, a native of New Granada and Brazil. The leaves are considered to be antisyphilitic. The decoction in large doses is poisonous.

PALILLO, Campomanesia lineatifolia.

PALIMPISSA, (παλιμπισσα, 'pitch reboiled,' from παλιν, 'again,' and πισσα, 'pitch.') Pinus sylvestris.

PALINCOTESIS, (παλιγκοτησις, from παλιν, 'again,' and κοτος, 'animosity.') Recrudescentia.

PALINDROME, Palindromia.

PALINDROM'IA, *Palin'dromē*, (παλιν, 'again,' and δρομος, 'a course.') This word signifies with some a reflux of fluids from the exterior towards the interior; and, according to others, the relapse of an affection—the recurrence—*Recur'sio*, *Repeti''io*.—of a paroxysm or disease,—*Mor'bus recidi'vus*, *Mor'bi recur'sus*.

PALINGENESIA, (παλιγγενεσια, from παλιν, 'again,' and γενεσις, 'generation.') Regeneration.

PALLA, (παλλα,) Pila.

PALLAT, Vertex.

PALLIA'TION, *Pallia'tio*, (*palliare*, *palliatum*, 'to cover, mask,' from *pallium*, 'a mantle.') The act of palliating; that is, of causing the symptoms of a disease to mitigate, without curing it. The medical art can frequently only moderate the symptoms of a disease, prevent it from making progress, prolong the days of the patient, and diminish his sufferings. This is *palliative treatment*. (F.) *Traitement palliatif*.

PAL'LIATIVE, *Palliati'vus*, *Antipath'ic*, *Enantiopath'ic*, (F.) *Palliatif*. A remedy or mode of treatment which only relieves a disease, without curing it. The *palliative* treatment,—*Cu'ra palliati'va*, is placed in antithesis to the radical,—*Cu'ra radica'lis*; see Radical.

PALLIDULUS, (dim. of *pallidus*, 'pale.') *Blafard*.

PALLIDUS MORBUS, Chlorosis.

PALLOR, Paleness—p. Virginum, Chlorosis.

PALM, *Pal'ma*, *Pal'amē*, *Vo'la*, *V. ma'nûs*, *Plate'a*, *The'nar*, *A'ges*, *Agos'tus*, *Poc'ulum*, *Pat'era*, *Supel'lex* seu *Supellec'tilē Diog''enis*, (F.) *Paume* ou *Creux de la main*. The hollow or inside of the hand. It is limited *without* by the thenar eminence, which answers to the thumb; *within*, by the hypothenar eminence, which answers to the little finger; *above*, by the wrist-joint; and *below* by the four fingers.

PALM. GOMUTO, see Toddy.

PALMA, Palm—p. Christi, ('palm of Christ,') Ricinus communis—p. Cocos, Cocos nucifera—p. Dactylifera, Date tree—p. Humilis, Musa paradisiaca—p. Indica vinaria secunda, see Toddy—p. Unguentariorum, Myrobalanus.

PAL'MÆ U'TERI PLICA'TÆ, (pl. of *palma*, 'the branch of a tree.') *Ar'bor vi'tæ uteri'nus*, *A. u'teri vivi'ficans*. The arborescent striæ in the interior of the cervix uteri.

PALMAIRE, Palmar—*p. Cutané*, Palmaris brevis—*p. Grand*, Palmaris magnus—*p. Grêle*, Palmaris longus—*p. Long*, Palmaris longus.

PAL'MAR, *Palma'ris*, (F.) *Palmaire*, (from *palma*.) That which concerns the palm of the hand. The palm has sometimes been divided into three regions, called *palmar*. 1. The *external palmar region* corresponds to the thenar eminence. 2. The *internal palmar region* is formed by the hypothenar eminence; and 3. The *middle palmar region* is the hollow of the hand, (F.) *Creux de la main*.

PALMAR APONEURO'SIS, *Palmar fas'cia*. A strong triangular aponeurosis, which arises from

the inferior tendon of the palmaris brevis and the anterior annular ligament of the carpus. It covers the whole palm of the hand, and adheres, somewhat strongly, to the skin of the part. The *palmar ligaments* are small, very numerous, fibrous fasciæ, which unite the different bones of the carpus and metacarpus.

Palmar Arch'es, (F.) *Arcades* ou *Crosses palmaires.* The curved extremities of the radial and cubital arteries in the palm of the hand. There are two palmar arches:—the one, *cubital* or *superficial,—grande Arcade palmaire* of Chaussier, furnishes at its convexity towards the fingers the collateral arteries of the fingers, and the internal collateral of the thumb; the other, the *radial, profound,* or *deep-seated,—petite Arcade palmaire* of Chaussier, is deep in the palm of the hand beneath the tendons of the flexor muscles of the fingers. It gives some small branches only to the surrounding parts. The palmar veins accompany the corresponding arteries.

Palmar Arteries, see Palmar arches—p. Fascia, P. aponeurosis.

Palmar Mus'cles. These are three in number. 1. *Palma'ris Mag'nus, Flex'or carpi radia'lis, Radia'lis intern'us,* (F.) *Épitrochlo-métacarpien* (Ch.), *Palmaire grand, Radial antérieur.* A long fusiform muscle, which passes obliquely from the inner tuberosity of the humerus to the upper extremity of the second metacarpal bone. It bends the hand. 2. *Palmaris Lon'gus, Latescen'tis chor'dæ mus'culus, Ulna'ris grac''ilis,* (F.) *Épitrochlo-carpi-palmaire* (Ch.), *Palmaire long, P. grêle.* This muscle is situate on the inner side of the last. It is very slender, and passes from the inner tuberosity of the humerus to the anterior annular ligament of the carpus, and to the palmar aponeurosis, which it seems to form by the vanishing of its fibres. It stretches the palmar aponeurosis, and bends the hand. 3. *Palmaris Bre'vis, Ca'ro quadra'ta, Carpiæ'us,* (F.) *Palmaire cutané.* A small, thin, quadrilateral muscle; situate before the thenar eminence. It passes from the annular ligament of the carpus to the integuments of the palm of the hand, which it wrinkles by its contraction.

Palmar Veins, see Palmar arches.

PALMARIS BREVIS, see Palmar muscles—p. Longus, see Palmar muscles—p. Magnus, see Palmar muscles.

PALMETTO, SAW, Chamærops serratula.

PALMI-PHALANGIENS, Lumbricales manus.

PALMISTRY, (from *palma,* 'the palm of the hand,') Chiromancy.

PAL'MOSCOPY or PALMOS'COPY, *Palmoscop'ia,* (παλμος, 'palpitation,' and σκοπεω, 'I view.') Investigation of the beating of the heart and pulse. Prognosis from the beating of the heart and pulse.

PALMULA, (dim. of *palma,*) Date, *Palette.*

PALMUS, (παλμος,) Palpitation—p. Cordis, Palpitation—p. Plumbarius, Colic, metallic—p. Vomitus, Vomiting.

PALO DE CALENTURAS, (S.) 'fever wood,' Calenturas, Cinchona—p. de Vacca, Galactodendron utile—p. de Velas, Parmentiera' cerifera.

PALOMMIER, Gaultheria.

PALPA'TION, (*palpare, palpatum,*) 'to feel.') The sense of touch. It is also used for the mode of exploring diseases by feeling or pressing upon the diseased organ. A delicate and discriminating touch—*tac'tus erudi'tus*—is important in the diagnosis of many morbid conditions.

PAL'PEBRA, *Pal'pebrum,* (supposed to be from *palpitare,* 'to palpitate,' owing to its frequent motion. [?]) *Bleph'aron. Oper'culum* seu *Ostiper'culum oc'uli, Eye'lid,* (Prov.) *Eyebreck,* (Sc.) *Eewinker,* (F.) *Paupière.* The eyelids are two movable vela, situate in front of the eye; which by their separation permit the organ to receive the impression of light, or by their greater or less occlusion protect it from the influence of too great light, or from the action of extraneous bodies. They are separated, above, from the forehead, by the eyebrows; and, below, are confounded with the cheeks. They are distinguished into *upper, Pal'pebra ma'jor* seu *supe'rior, Epicœ'lis;* and *lower, Pal'pebra mi'nor* seu *infe'rior, Hypocœ'lis, Hypocœ'lum.* The former is much broader and more movable than the latter. They are separated by a transverse cleft—*Fissu'ra palpebra'rum*—and their edges are thick, and furnished with the cilia or eyelashes. Supported by the tarsal cartilages, they unite at the extremities of the transverse diameter of the orbit, forming two angles, the innermost being called the *greater angle of the eye,* or *inner* or *greater canthus;* the other, the *lesser,* or *external angle* or *canthus.* When brought together, a triangular space is left between their posterior surfaces and the conjunctiva, which has been called *Ri'vus lacryma'lis.* They are formed, 1. Of a thin dermoid texture: 2. Of a muscular membrane,—a portion of the orbicularis: 3. Of a particular fibrous membrane: 4. Of the tarsi: 5. Of a mucous membrane,—a part of the tunica conjuctiva.

Their vessels and nerves are called Palpebral.

Palpebra Inferior Extrorsum Flexa, Ectropion—p. Tertia, Valvula semilunaris.

PALPEBRÆ SUPERIORIS PRIMUS, ('first [muscle] of the upper eyelid,') Levator palpebræ superioris.

PAL'PEBRAL, *Palpebra'lis,* (F.) *Palpébral, Blépharique,* (from *palpebra.*) That which belongs or relates to the eyelid.

Palpebral Arteries are those distributed to the eyelids. They are two in number; an *upper* and a *lower.* The *former* arises from the ophthalmic, a little beyond the cartilaginous pulley of the greater oblique muscle, and descends towards the upper eyelid, over which it is distributed. The *latter* arises at the side of, and a little behind, the preceding, and sends its ramifications to the lower eyelid and the neighbouring parts. The palpebral veins have a similar arrangement; except that some of them open into the temporal and labial veins.

Palpebral Flux, Pu'riform. A puriform discharge, furnished by the glands of Meibomius, when inflamed; and to which Scarpa attributes fistula lacrymalis in many cases.

Palpebral Lig'aments are distinguished into *superior* and *inferior.* Some anatomists, with Winslow, have described, under this name, the fibrous layer which is attached,—on the one hand, to the outer part of the circumference of the orbit; on the other, to the tarsal cartilages.

Palpebral Nerves, *Nerves of the eyelids,* arise, particularly, from the frontal and lachrymal branches; from the ophthalmic nerve of Willis; and from the facial, nasal, and infraörbitar branch of the superior maxillary nerve.

PALPEBRALIS, Orbicularis palpebrarum.

PALPEBRARUM APERIENS RECTUS, Levator palpebræ superioris—p. Duo musculi, Orbiculares palpebrarum.

PALPEBRATIO, (*palpebrare,* 'to wink,') Nictation.

PALPEBRUM, Palpebra.

PALPITATIO, Palpitation—p. Arteriarum, see Palpitation—p. Cordis trepidans, Cardiotromus.

Palpitatio Membro'rum. A term used by Gaubius for involuntary shaking of the legs.

PALPITA'TION, *Palpita'tio, Pal'mus, P.* seu *Tre'mor Cor'dis, Palpita'tio* seu *Pulsa'tio Cor'dis,*

Vibra'tio Cardi'aca seu *Cor'dis, Cardiog'mus, Cardiopal'mus, Subsul'tio, Clo'nus Palpita'tio*, (Sc.) *Dunt, Dount*, (F.) *Palpitation, P. du Cœur*, (*palpitare, palpitatum*, 'to throb.') A name given to the pulsations of the heart, when they become stronger, more extensive, or more sensible to the individual than ordinarily. Palpitations occur in a number of affections. They are, sometimes, owing to organic diseases of the heart—hypertrophy, inflammation, &c.; at others, to a disease in some other viscus; whilst, frequently, they are merely nervous.

PALPITATION is sometimes felt in the arteries, constituting *Palpitatio Arterio'sa*.

PALPITATION DU CŒUR, Palpitation.

PALSIED, Paralytic.

PALSY, Paralysis—p. Bell's, Paralysis, Bell's—p. Histrionic, Paralysis, Bell's.

PALSY, LEAD, *Paral'ysis saturni'na* seu *metal'lica, Molybdopar'esis*, (F.) *Paralysie saturnine, Metal'lic Palsy, Paint'ers' Palsy*. The paralysis of the upper extremities especially, induced by the poison of lead. Palsy of the intestines, thus induced, is called, by Piorry, *Auentércnervie saturnine*.

PALSY, METALLIC, see Palsy, lead — p. Painters', P. lead—p. Scribe, Cramp, writers'.

PALSY, SEMP'STRESSES. An affection analogous to writers' cramp, which usually consists in an entire or partial loss of sensation at the end of the right thumb and index finger, with inability to hold the needle.

PALSY, SHAKING, Paralysis agitans — p. Trembling, Paralysis agitans — p. Wasting, *Atrophie musculaire progressive*.

PALSY WORT, Primula veris.

PALTA, Persea gatissima.

PALUDAL, (*palus*, gen. *palu'dis*, 'a marsh,') Elodes.

PALUDAPIUM, ('marsh apium,') Apium graveolens.

PALUDÉEN, Elodes.

PALUDOSUS, Elodes.

PALUS, gen. *Palu'dis*, Marsh, Penis—p. Sanctus, Guaiacum.

PALUSTER, (from *palus*, 'a marsh,') Elodes.

PALUSTRE, Elodes.

PAMBIOMA, gen. *Pambio'matis*, Panbioma.

PÂMOISON, (*pamer*, 'to faint,') Syncope.

PAMPINIFORM PLEXUS, (*pampinus*, 'a tendril,' and *forma*, 'form,') Corpus pampiniforme.

PAMPINIFORME CORPUS, see Corpus pampiniforme.

PAMPLE'GIA, *Panple'gia*, (*pan*, and πλεγω, 'I strike.') General paralysis. Palsy of the whole body.

PAN, PANTO, (παν, neuter of πας, gen. παντος, 'all,') in composition, all.

PANACE'A, (πανακεια,) *Cathol'icon, Cathol'icum*, (F.) *Panacée*, (*pan*, and ακεομαι, 'I cure.') *Universa'lē reme'dium, Panchres'ton*. A pretended universal remedy. There is no such thing in existence.

PANACEA DUCIS HOLSATIÆ, Potassæ sulphas — p. Duplicata, Potassæ sulphas — p. Lapsorum, Arnica montana — p. Mercurii rubri, Hydrargyri nitrico-oxidum — p. Pectoris, Glechoma hederacea —p. Vegetabilis, Crocus.

PANACÉE, Panacea—*p. Anglaise*, Magnesiæ carbonas.

PANA'DA, (dim. of [I.] *pane*, [L.] *panis*, 'bread,') *Pana'do, Pana'ta, Panatel'la*. Bread, boiled in water to the consistence of pap; sometimes administered to the sick.

SIMPLE BREAD PANADA may be made by putting any quantity of grated stale *bread* into enough *water* to form a moderately thick pulp; covering it up, and leaving it to soak for an hour; then beating it up with two tablespoofuls of *milk*, and a small portion of *refined sugar*, and boiling the whole for ten minutes, stirring all the time.

PANAIS, Pastinaca sativa.

PANARIS, Paronychia.

PANARITIUM, Paronychia.

PANARIUM, Paronychia.

PANATA. Panada.

PANATELLA, Panada.

PANAX, gen. *Pan'acis*, (παναξ, gen. πανακος, from *pan*, and ακεομαι, 'to cure,') see Panax quinquefolium—p. Costinum, Pastinaca opoponax—p. Heracleum, Pastinaca opoponax — p. Pastinacea, Pastinaca opoponax.

PANAX QUINQUEFO'LIUM, *Aurelia'na* seu *Ara'lia Canaden'sis, Gin'seng, Nin'sing, Gen'sang, Sang, Red'berry, Five fingers*. (Same etymon as Panacea.) *Family*. Araliaceæ. *Sex. Syst*. Polyandria Monœcia. This plant grows in North America. The root—*Pa'nax* (Ph. U. S.), *Ra'dix gin'seng*—is about the thickness of the little finger; an inch or two in length, often dividing into two branches; of a whitish-yellow colour; wrinkled on the surface, and of a compact, almost horny, texture. It has no smell, but a very sweet taste, combined with a slight degree of aromatic bitterness. It is much esteemed by the Chinese, who pay a high price for it. It is a gentle and agreeable stimulant.

PANAX SCHIN'SENG, *Asiat'ic Ginseng*, a native of Asia, has been usually confounded with the last. The root, *ra'dix nin'si*, has like virtues.

PANBIO'MA, *Pambio'ma*, gen. *Pambio'matis*, (*pan*, and βιος, 'life.') The original animating principle. The general principle of life.

PANCHRESTON, *Panchrestum*, (πανχρηστος, from *pan*, and χρηστος, 'useful,') Panacea.

PANCHRESTUM CHINÆ, see Quinium.

PANCHYMAGO'GUM, *Pantago'gon*, (*pan*, χυμος, 'juice,' and αγω, 'I drive away.') A medicine which the ancients believed capable of purging away all sorts of humours.

PANCHYMAGOGUM MINERALE, Hydrargyri submurias.

PANCŒNONOSUS, (*pancœnus*, and νοσος, 'disease,') Pandemic.

PANCŒNOSUS, Pandemic.

PANCŒNUS MORBUS, (πανκοινος, from *pan*, and κοινος, 'common,') Pandemic.

PANCŒNONUSUS, Pandemic.

PANCRA'TIUM, (πανκρατιον, from *pan*, and κρατος, 'strength.') An athletic exercise with the Greeks. Applied also to a plant, which was considered all powerful.

PAN'CREAS, gen. *Pancre'atis*, (παγκρεας, gen. παγκρεατος, from *pan*, and κρεας, 'flesh;' i. e. quite fleshy.') *Callic'reas, Pan'creum, Lac'tes, Pulvi'nar ventric'uli, To'tum carno'sum, Gland'ula salliva'lis abdom'inis, Pancre'ūē, Sweet'bread*. A gland, deeply seated in the abdomen, and lying transversely on the vertebral column, between the three curvatures of the duodenum, behind the stomach, and to the right of the spleen. Its left extremity is called the *tail* of the pancreas; it is smaller than the right, which is called the *head*. At its right portion, it has, almost always, a greater or less prolongation; called, by Winslow, and some others, the *les'ser pan'creas*, (F.) *Petit pancréas, Pancreas of Aselli, Pancreas mi'nus*. The pancreas resembles the salivary glands in structure, and has been called the *Abdom'inal Sal'ivary Gland*. It is composed of lobes and granulated lobules, distinct, and united by areolar tissue. From each of the granulations of these lobes arise the radicles of its excretory duct, which are very delicate, and united like veins. The duct itself, *Duc'tus Pancreat'icus* seu *Wirsungia'nus, Pancreat'ic duct, Canal* or *Duct of Wir'sung* or *Wir'sungs*, (F.) *Canal pancréatique*, proceeds in a serpentine course through the substance of the organ; and when it has reached behind

the second portion of the duodenum, it becomes free, and is of the size of a crow's quill. It opens at an acute angle into the choledoch duct, or proceeds close to it, opening separately into the duodenum. The *Pancreatic arteries* are very numerous and small. They proceed from the cœliac, splenic, superior mesenteric, right gastroepiploic, coronaria ventriculi, and left capsular. Its *veins* open into the radicles of the vena porta; and, particularly, into the splenic and lesser mesenteric. Its *nerves* emanate from the solar plexus, and its lymphatics pass into ganglions, to which it gives its name. The pancreas secretes the *Pancreat'ic juice, Suc'cus* seu *Li'quor Pancreat'icus, Lym'pha Pancre'atis*, (F.) *Suc pancréatique*, which resembles the saliva. When this juice is mixed with amylaceous matters, it converts them into dextrin and glucose. Its great use appears, however, to be, to emulsify fatty matters by virtue of a peculiar albuminoid principle—*pan'creatin*, coagulable by heat or alcohol—which it contains.

Pancreas of Aselli, see Pancreas—p. Minus, see Pancreas—*p. Petit*, see Pancreas—p. Second, Brunner's glands.

PANCREATAL'GIA, (*pancreas*, and *αλγος*, 'pain.') Pain or disease of the pancreas.

PANCREATEMPHRAX'IS, (*pancreas*, and *εμφρασσω*, 'I obstruct.') Obstruction of the pancreas.

PANCREAT'IC, *Pancreat'icus*, (F.) *Pancréatique*. Relating to or affecting the pancreas.

Pancreatic Arteries, see Pancreas—p. Duct, see Pancreas—p. Juice, see Pancreas—p. Nerves, see Pancreas.

Pancreatic Sarco'ma of Ab'ernethy, *Emphy'ma sarco'ma pancreat'icum*. A tumour, in irregular masses, connected by loose fibrous substance, like the irregular masses of the pancreas. Found in the areolar substance; but, more usually, in lymphatic glands, chiefly in the female breast.

Pancreatic Veins, see Pancreas.

PANCREATIN, see Pancreas.

PANCREATI'TIS, *Inflamma'tio pancre'atis*, (F.) *Inflammation du Pancréas*, (*pancreas*, and *itis*.) Inflammation of the pancreas;—an affection, the phenomena of which are not well known.

PAN'CREATOID, (*pancreas*, and *ειδος*, 'appearance.') *Pancreatoi'des*. A tumour resembling the pancreas in structure.

PANCREATON'CUS, (*pancreas*, and *ογκος*, 'a swelling.') Tumour of the pancreas.

PANCRENE, (*pan*, and *κρηνη*, 'a spring,') Pancreas.

PANCREUM, Pancreas.

PANDA'LEA, *Panda'lenm*. A kind of lozenge used by the Arabian physicians.

PANDALEUM, Pandalea.

PANDALITIUM, (corrupted from *panaritium*.) Paronychia.

PANDEMIA, (*πανδημια*,) Pandemic.

PANDEM'IC, *Pan'demy, Pande'mia, Mor'bus Pande'mius* seu *Pandémus* seu *Pancœ'mus, Pancœ'nosus, Pancœnon'osus, Pancœnom'sus*, (F.) *Pandémie*, (*pan*, and *δημος*, 'people.') An epidemic which attacks the whole, or a great part, of the population.

PANDÉMIE, Pandemic.

PANDEMY, Pandemic.

PANDICULA'TION, *Pandicula'tio, Scordine'ma, Scordinis'mus, Clo'nus Pandicula'tio*, (*pandiculari*, (*pandere*, 'to stretch out,') 'to stretch, as one awaking from sleep.') *Stretch'ing, Hal'ices*, (pl.) An action, which consists in elevating the upper limbs, and throwing the head and trunk backwards, at the same time that the lower limbs are extended. This series of motions of the extensor muscles is in some measure independent of the will, and is accompanied by yawning, which is equally involuntary. In the state of health, stretching occurs before and after sleep; especially when we are fatigued. It is also observed at the onset of certain paroxysms of fever, hysteria, &c.

PANDOCE'UM, *Pandochi'um, Pandoci'um*, (*pan*, and *δεχομαι*, 'to receive.') A house or hotel that receives all classes. A general hospital, or one that admits all cases.

PANDOCHIUM, (*πανδοχειον*,) Pandoceum.

PANDOCIUM, (*πανδοκιον*,) Pandoceum.

PANG, (like Pain, or from Sax. pingan, 'to prick, to torture,') see Pain—p. Breast, suffocative, Angina pectoris.

PANHIDRO'SIS, (*pan*, and *'ιδρωσις*, 'sweating.') *Sudor universa'lis*. Sweating over the whole body.

PANHYPERÆMIA, (*pan*, and *hyperæmia*,) Plethora.

PANIC D'ITALIE, Panicum Italicum.

PANIC GRASS, ITALIAN, Panicum Italicum.

PANICAUT, Eryngium campestre—*p. Maritime*, Eryngium maritimum.

PANICUM DACTYLON, Cynodon dactylon.

Pan'icum Ital'icum, (from *panis*, 'bread,') *Ital'ian Pan'ic Grass, In'dian Mil'let, Gnin'ea Corn, Barba'does Mil'let, Mil'ium In'dicum, Sorg'hum, Hol'cus Sorg'hum, Durra*, (F.) *Millet des oiseaux* ou *à grappes, Panic d'Italie. Nat. Ord.* Graminæ. The seed—*Mil'ii Sem'ina*—are much esteemed in Italy, being a constant ingredient in soups, and made into a variety of forms for the table.

Panicum Milia'ceum, *P. mil'ium, Com'mon Mil'let, Mil'ium, M. Pan'icum* seu *Esculent'um, Cen'chron, Cen'chrus*, (F.) *Millot ordinaire, Mil.* Millet-seed are esteemed a nutritious article of diet, and are often made into puddings.

Panicum Milium, P. miliaceum.

PANIDRO'SIS, (*pan*, and *'ιδρως*, 'sweat.') General or universal perspiration.

PANIS, ('bread,') see Triticum æstivum—p. Canicaceus, see Canicæ—p. Cibarius seu secundarius, Syncomistos—p. Cuculi, Oxalis acetosella—p. Porcinus, Cyclamen.

PANIV'OROUS, *Paniv'orus*, (*panis*, 'bread,' and *voro*, 'I devour.') Subsisting on bread.

PANNA AFRICA'NA. A tæniafuge root, introduced into Germany, and supposed to be the male fern.

PANNI, Swathing clothes.

PANNICLE, (dim. of *pannus*, 'a web,') Membrane.

PANNICULE, Panniculus—*p. Charnu*, Panniculus carnosus.

PANNIC'ULUS, (dim. of *pannus*, 'a web,') (F.) *Pannicule*. A membrane. Pterygion.

Panniculus Adiposus, Cellular membrane.

Panniculus Carno'sus, *Tu'nica carno'sa, Mus'cular Web, Man'tle*, (F.) *Pannicule charnue*, is a general covering found in the quadruped, and formed by a thin, subcutaneous muscle, which serves to move the skin. It exists only in certain parts of the human body,—as in the forehead, where it is formed by the occipito-frontalis; in the neck, by the platysma myoides; and, in the scrotum, by the cremaster muscle.

Panniculus Cordis, Pericardium—p. Hymenæus, Hymen—p. Virginalis, Hymen.

PANNIKELL, Cranium.

PAN'NUS. A piece of cloth. A web. This word has several other meanings, many of which are equivocal. It means a tent for a wound, and also an irregular nævus or mark on the skin. Modern ophthalmologists apply it to an opake and vascular condition of the anterior membrane of the cornea, almost invariably produced by the continuance of purulent or strumous ophthalmia, or by chronic inflammation of the cornea. This

part becomes nebulous, covered with red vessels, and opake. At times, the sclerotic conjunctiva undergoes a similar change to that which occurs in the corneal portion.

Pannus Hepaticus, Chloasma—p. Lenticularis, Ephelides.

PANOCHIA, Bubo.

PANOPHO'BIA, *Pantopho'bia, Panpho'bia, Athym'ia, Pa'vor,* (F.) *Frayeur nocturne, Souci,* (from Παν, 'the god Pan,' and φοβος, 'fear.') A panic or fear inspired by the god Pan, according to the opinion of the ancients. Others derive it, and with more probability, from παν, 'all,' and φοβος, 'fear.' This universal and groundless fear is morbid, and is a symptom of melancholy.

PANOPHTHALMI'TIS, (*pan,* and *ophthalmitis.*) Inflammation of the whole eye.

PANPHOBIA, Panophobia.

PANPLEGIA, Pamplegia.

PANSCLERO'SIS, (*pan,* and σκληρωσις, 'hardness.') Complete induration of a part.

PANSE, (from *pantex,* pl. *pantices,*) Ingluvies.

PANSEMENT, Dressing.

PANSIES, Viola tricolor.

PANSPER'MIA, (*pan,* and σπερμα, 'sperm.') The theory of *Dissemination of Germs,* according to which, ova or germs are disseminated over all space, undergoing development under favourable circumstances.

PANSY, Viola tricolor.

PANTAGOGON, (*panto,* and αγω, 'to drive out,') Panchymagogum.

PANTANENCEPHA'LIA, (*panto,* and *anencepha'lia.*) Entire absence of brain—the same as anencephalia with I. G. St. Hilaire.

PANTATROPHI'IA, (*panto,* and ατροφια, 'atrophy.') Universal atrophy.

PANTHOD'IC, *Panthod'icus,* (*panto,* and 'οδος, 'a way.') An epithet applied by Dr. Marshall Hall, to a course of nervous action proceeding from one point in all directions to every other.

PANTICES, Ingluvies, Intestines.

PANTING, ([F.] *panteler,* 'to pant,') Anhelatio.

PANTO, in composition, see Pan.

PANTOGANGLIITIS, (*panto, ganglion,* and *itis,*) Cholera.

PANTOPHAGISTS, (*panto,* and φαγω, 'I eat,') see Omnivorous.

PANTOPHAGUS, Omnivorous.

PANTOPHOBIA, (*panto,* and φοβος, 'fear,') Hydrophobia, Panophobia.

PANTOZOOTIA, Panzootia.

PANUS, Phygethlon—p. Faucium, Stomatopanus—p. Inguinalis, Bubo.

PANZOÖT'IA, *Pantozoötia;* (*pan,* and ζωον, 'animal.') An endemic or epidemic disease affecting animals generally.

PAP, (from *papilla,*) Mamma, Nipple. Also, a soft food made of bread boiled or softened with water, (Sc.) *Breadberry.*

Pap of the Hass, Uvula—p. of the Throat, Uvula.

PAPAS AMERICANUS, Solanum tuberosum.

PAPA'VER, *P. somnif'erum, Me'con, Lethe'a.* The *White Pop'py, Papa'ver sati'vum,* (F.) *Pavot des Jardins. Ord.* Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. The ripe Capsule of the White Poppy, *Codi'a, Seu'phion, Papav'eris Ca'put* seu *Cap'sula, Papa'ver,* (Ph. U. S.,) *Me'con, Pop'pyhead,* is used in fomentation as an anodyne and relaxant to inflamed or ulcerated parts. The expressed oil of the seeds—*Poppy oil*—is called by the French *Huile d'Œillette.* It is from the poppy that O'pium—called, also, *O'pium Thebai'cum, Succus Theba'icus, Meco'nium, O'pion, Ma'nus Dei, Affion, Aff'ium, Amphiam, A'finm, Osoror, Lau'danum, Me'con, So'pio,* (Prov.) *Pop'py pill,* (F.) *Opium brut* ou *cru*—is procured. It is the concrete juice obtained after the flowering of the plant, by making longitudinal incisions in the unripe capsules; and is commonly obtained from the Levant or India, where the poppy grows abundantly. Opium is a compound of morphia, narcotina, meconic acid, codeia, narcein, meconin, caoutchouc, fecula, resin, oil, and several other substances. *Turkey Opium* is of a heavy and slightly fetid odour. Its taste is nauseous, bitter, acrid, and warm: it is in flat pieces; solid and tenacious; of a dark brown colour, and yellowish when powdered; making a light brown, interrupted, streak on paper. In *East India Opium* the odour is the same, and empyreumatic; the taste is less bitter, but more nauseous, and the colour darker. The varieties of opium known in commerce are the *Smyrna,* the *Constantinople,* the *Egyptian,* the *Persian,* and the *Indian.* Opium is stimulant in small doses; sedative in large; narcotic and anodyne; operating through the nervous system. It is a most valuable remedy in all painful affections and inflammations, when given so as to produce its full, sedative effects, especially in peritonitis. In diarrhœa and dysentery it acts as an astringent; and in intermittents it will often prevent the paroxysm. In typhus, in small doses, it acts as a cordial; in larger it allays irritation and produces sleep. When applied externally, its narcotic effects are developed; and, hence, it is a useful application to irritable sores, painful tumours, &c. Dose, gr. ¼ to ½ as a stimulant; gr. j to iij as a sedative.

Papaver Cereale, P. rhœas—p. Corniculatum, Chelidonium majus—p. Erraticum, P. rhœas—p. Luteum, Chelidonium majus.

Papaver Ni'grum. This is merely a variety of the white poppy, producing black seeds.

Papaver Rhœ'as. The systematic and pharmacopœial name of the *Red corn'poppy, Corn' rose, Papa'ver errat'icum* seu *cerea'lē* seu *ru'brum, Cop'per rose, Red-mailkes,* (F.) *Coquelicot.* The heads of this species contain a milky juice of a narcotic quality. A syrup, *Syru'pus Rhœ'ados,* of its flowers—*Rhœ'as*—has been directed, which has been esteemed diaphoretic and slightly soothing; but it is more admired for its color than for any other property.

PAPAVERACEUM, (from *papaver,*) Opiate.

PAPAVERCULUM, (from *papaver,* the inspissated juice of which it resembles,) Meconium.

PAPAV'ERINE, *Papaveri'na, Papaveri'num;* (from *papaver.*) An alkaloid contained in opium; Codeine.

PAPAW TREE, Carica papaya.

PAPAYER, Carica papaya.

PAPER, BLISTERING, see Sparadrapum vesicatorium.

PAPIER ÉPISPASTIQUE, ('blistering paper,') see Sparadrapum vesicatorium—*p. Médicamenté,* see Sparadrapum—*p. Vésicant,* see Sparadrapum vesicatorium.

PAPIL'LA, pl. *Papillæ,* (F.) *Papille.* The end of the breast, the nipple. See Nipple. An eminence similar to a nipple. A name given to small eminences, more or less prominent, at the surface of several parts, particularly of the skin and mucous membranes, in which latter situation they are also called villi. See Villous. They contain the ultimate expansions of the vessels and nerves, and are susceptible, in some cases, of a kind of erection. They are also called *Papil'læ nervo'sæ* seu *Ner'veæ, P. Pyramida'les, Ner'vous papil'læ,* (F.) *Papilles* ou *Papilles nerveuses, Houppes nerveuses.*

Papilla Lacrymalis, see Lachrymal puncta—p. Mammæ, Nipple—p. Nervi optici, see Optic nerve—p. Pili, see Hair.

Papillæ, see Corpuscles, Pacinian—p. Calyciformes, see Papillæ of the tongue—p. Capitatæ, see Papillæ of the tongue—p. Circumvallatæ, see

Papillæ of the tongue — p. Conical, see Papillæ of the tongue — p. Conoidal, see Papillæ of the tongue — p. Filiform, see Papillæ of the tongue — p. Fungiform, see Papillæ of the tongue — p. Fungoid, see Papillæ of the tongue.

Papillæ of the Kid'ney, (F.) *Mamelons du rein*, are the projections into the pelvis of the kidney of the apices of the cones—*Pyr'amids of Malpig'hi, Pyram'ides Malpighia'næ* — of the tubular substance of the organ. They are also called *Proces'sus mamilla're, Carun'culæ papilla're*, and *Papill'æ renum.*

Papillæ, Lenticular, see Papillæ of the tongue — p. Maximæ, see Papillæ of the tongue — p. Mediæ, see Papillæ of the tongue — p. Minimæ, see Papillæ of the tongue—p. Mucosæ, see Papillæ of the tongue — p. Nerveæ, Corpuscles, Pacinian — p. Nervous, see Papilla — p. Pyramidal, see Papillæ of the tongue — p. Pyramidales, see Papilla — p. Renum, see Papillæ of the kidney — p. Semilenticulares, see Papillæ of the tongue.

Papillæ of the Tongue are very numerous and marked. They are observed particularly at the upper surface of the organ, and are distinguished into—1. *The Lentic'ular papil'læ, Papil'læ muco'sæ* seu *max'imæ* seu *capita'tæ* seu *valla'tæ* seu *circumvalla'tæ* seu *trunca'tæ* seu *calyci'formes.* They are arranged at the base of the tongue in two oblique lines, having the shape of the letter V, and united angularly at the foramen cæcum. They have, in general, an ovoid or spherical shape, and have seemed to be mucous follicles similar to those of the palate, lips, &c. 2. The *Fun'giform* or *Fun'goid Papil'læ, Papil'læ me'diæ* seu *semilenticula're*s, are of indeterminate number, but always more numerous than the preceding. They are irregularly disseminated near the edges and the point of the tongue; have a rounded and flattened head, supported by a short and narrow footstalk. Their tint is whitish. 3. The *Con'ical, Conoid'al* or *Pyram'idal papil'læ, P. min'imæ* seu *villo'sæ*, are the most numerous of all. Their arrangement is more regular in the forepart of the tongue than behind. They resemble small cones; the base being towards the tongue, and the apex free. The anterior are very small, and have been called *Fil'iform papil'læ.* They appear to be produced by the terminations of the filaments of the lingual nerve, and are surrounded by an evident vascular network.

Papillæ Truncatæ, see Papillæ of the tongue —p. Vallatæ, see Papillæ of the tongue—p. Villosæ, see Papillæ of the tongue.

PAP'ILLARY, *Papilla're, Papill'ous*, (F.) *Papillaire*, (from *papilla.*) Of or belonging to the nipple or to the papillæ.

Papillary Body, Corpus papillare.

PAPILLI-AUT-MAMMILLI-FORMIS, Mastoid.

PAPILL'IFORM, *Papilliform'is*, (*papilla*, and *forma*, 'form.') Having the shape or appearance of a papilla.

PAPILLO'MA, gen. *Papillo'matis*, (*papilla*, and *oma.*) A tumour, whose specific elements are those of the papillæ of the normal skin; and which, consequently, is composed of a stem of fibrous or homogeneous connective tissue; is club-shaped, cylindrical or acuminated, and covered with a layer of epithelial cells, similar to those of the normal papillæ.

PAPILLOUS, Papillary.

PAPOOSE ROOT, Caulophyllum thalictroïdes.

PAPPE, Mamma.

PAP'PEA CAPEN'SIS, (after Dr. Karl W. L. Pappe, a botanist of Leipzig.) A small tree of the *Nat. Ord.* Sapindaceæ, common in Cafferland, the fruit of which is called *Wild Plum.* It furnishes a vinous beverage and excellent vinegar. Its kernel contains an oil, which, although catable, is somewhat cathartic, and is recommended as an external application in tinea capitis, alopecia, &c.

PAPPUS, (παππος.) The down on the chin and cheeks.

PAPPUS AMERICANUS, Solanum tuberosum.

PAP'ULA, pl. *Papulæ.* Akin to *papil'la.* A *pim'ple, Excor'mia*, (Prov.) *Pouke, Puckle*, (Sc.) *Pluke, Plouk*, (F.) *Papule, Bouton, Bourgeon.* A small acuminated elevation of the cuticle, with an inflamed base; very seldom containing a fluid, or suppurating, and commonly terminating in scurf or desquamation. An eruption of pimples is called in Devonshire *Murfles.*

Papulæ is the first order of Willan and Batcman's arrangement of cutaneous diseases.

Papula Agria, Lichen agrius—p. Fera, Herpes exedens—p. Miliaris, Miliary fever—p. Typhosa, Spots, red.

Papulæ, Lichen—p. Siccæ, Lichen—p. Sudorales, Sudamina—p. Sudoris, Miliary fever.

PAPULAR, Papulose.

PAPULE, Papula.

PAPULEUX, Papulose.

PAP'ULOSE, *Papulo'sus, Pap'ulous, Papula'tus, Papula'ris, Pim'pled, Pap'ular*, (F.) *Papuleux.* Of or belonging to, resembling, or covered with papulæ or pimples.

PAQUERETTE VIVACE, Bellis.

PAR NERVO'RUM, *Syz'ygi nervo'rum.* A pair of nerves.

Par Nonum, Hypoglossus—p. Opticum nervorum, Optic nerve—p. Primum nervorum cerebri, Olfactory nerve—p. Quartum, Pathetic nerve—p. Quintum nervorum cerebralium, Trigemini—p. Secundum nervorum, Optic nerve—p. Septimum sive faciale, Facial nerve—p. Tertium, Motores oculorum—p. Trigeminum, Trigemini—p. Trium funiculorum, Trigemini—p. Vagum, Pneumogastric—p. Visorium, Optic nerve.

PARA, (παρα.) A common prefix, 'by, near, contrary to, through,' (*per ;*) 'above and beyond,' (*ultra ;*) 'besides,' (*præter.*) In certain terms, as in *Paracusis, Parapsis, Parabysma*, &c., used by Dr. Good, *para* means a defective or morbid condition.

Para Nut, see Pichurim beans.

PARABALA'NUS, (παραβαλλειν, (from *para*, and βαλλειν, 'to cast,') 'to expose one-self.') A name given by the ancients to a person who devoted himself to the service of the sick in hospitals; and particularly during epidemics and the plague.

PARABYS'MA, gen. *Parabys'matis*, (παραβυσμα, from *para*, and βυειν, 'to stuff.') Infarction or engorgement of an organ—as *Parabysma Lie'nis*, Engorgement of the spleen.

Parabysma Mesentericum, Tabes mesenterica.

PARABYS'TIA, Engorgement or infarction of an organ with blood.

PARACELSIS'TA, *Paracel'sist, Paracel'sian*, (after Paracelsus.) A follower of Paracelsus.

PARACELSISTICA MEDICINA, see Spagyrists.

PARACENTE'SIS, (παρακεντησις, from παρακεντεω, (*para*, and κεντεω, 'I pierce,') 'I pierce through.') *Perfora'tio, Punc'tio, Punctu'ra, Cenembate'sis, Cente'sis, Compunc'tio*, (F.) *Paracentèse.* Puncturing. The operation of *tapping* to evacuate the collected fluid in ascites, ovarial dropsy, &c.

Paracentesis Thoracis, Thoracocentesis.

PARACENTETERION, (παρακεντετηριον,) Trocar.

PARACENTETE'RIUM, (παρακεντητηριον,) Woolhouse has given this appellation to a small trocar employed by Nuck for puncturing the eye in cases of dropsy of that organ.

PARACENTICION, Trocar.

PARACEPHA'LUS, (F.) *Paracéphale*, (from *para*, and *κεφαλη*, 'head.') A genus of monsters, with the head badly formed, but voluminous; the face distinct, with a mouth; rudimental sensorial organs, and thoracic members.

PARACHRŒ'A, (*para*, and *χροα*, 'colour.') Morbid change of colour of the surface, especially of the face.

PARACHROMA, gen. *Parachro'matis*, (*παρα*, and *χρωμα*, 'colour.') Achromatopsia.

PARACHROSIS, Decoloration.

PARACINEMA, Luxation.

PARACINE'SES, (*para*, and *κινησις*, 'motion.') Diseases of the motor nerves; morbid movements of voluntary muscles.

PARACMASIS, (*παρακμασις*,) Decline.

PARACMAS'TIC, *Paracmas'ticus*, (*παρακμαζω*, (*para*, and *ακμη*, 'the highest point,') 'I decrease.') Decreasing. An epithet for a distemper which gradually decreases. Also, according to Galen, the period of life when a person is said to grow old, which he places at from 35 to 49, after which he is said to be old—a definition that would not suit us at the present day.

PARACMASTICUS, (*παρακμαστικος*,) see Acmasticus.

PARACME, (*παρακμη*,) Decline.

PARACOE, (*παρακοη*, from *para*, and *ακοη*, 'hearing.') See Cophosis, Paracusis.

PARAC'OPE, (*παρακοπη*,) *Paraph'ora*, *Paracru'sis*, (*παρακοπτω*, (*para*, and *κοπτω*, 'I strike,') 'I strike falsely.') Delirium. In Hippocrates, it means the slight delirium which sometimes occurs in febrile diseases.

PARACOUSIA, (*para*, and *ακουω*, 'to hear.') See Cophosia.

PARAC'RISES, (*para*, and *κρισις*, 'secretion.') Diseases of the secretory function.

PARACRUSIS, (*παρακρουσις*, from *para*, and *κρουω*, 'I strike.') Paracope.

PARACU'SIS, (*παρακουσις*, from *para*, and *ακουσις*, 'the act of hearing.') Cophosis. Also, perverted audition.

PARACUSIS A'CRIS, *Audi'tus a'crior*, *Paracu'sis oxycoi'a*. The hearing painfully acute, and intolerant of the lowest sounds; a symptom in otalgia, epilepsy, cephalitis, and febrile affections.

PARACUSIS DUPLICATA, Double hearing — p. Imaginaria, Tinnitus aurium — p. Imperfecta, Double hearing, P. perversa—p. Obtusa, Baryecoia—p. Oxycoia, P. acris.

PARACUSIS PERVER'SA, *P. Willisia'na* seu *imperfec'ta*, *Perverse' hear'ing*. The ear only sensible to articulate sounds when excited by other and louder sounds intermixed with them.

PARACUSIS SURDITAS, see Cophosis—p. Willisiana, Paracusis perversa.

PARACYCLE'SES, (*para*, and *κυκλησις*, (*κυκλος*, 'a circle,') 'circulation.') Diseases of the blood as regards its distribution and motion.

PARACYESIS, (*para*, and *κυησις*, 'pregnancy.') Pregnancy, morbid, Pregnancy, preternatural—p. Abortus, Abortion — p. Tubaria, Salpingocyesis.

PARACYNAN'CHE, (*para*, and *cynanche*.) Inflammation of the external muscles of the larynx. According to others, a slight cynanche.

PARÆSTHESIA, Paresthesis — p. Olfactoria, Parosmia.

PARÆSTHESIS, Paresthesis — p. Auditûs flacca, Proptoma auricularum.

PARÆTHENAR, Parathenar.

PARAGEUS'IS, (*para*, and *γευσις*, 'taste.') Ageustia. Also, perversion of taste, *Parageus'sia*, *Parageust'ia*, *Allotriogeus'tia*, *Gus'tus deprava'tus*.

PARAGEUSTIA, Parageusis.

PARAGLOS'SA, *Paraglos'sē*, (*para*, and *γλωσσα*, 'the tongue.') Swelling of the tongue; *Dysphagia Lingua'sa*, *Glassomegis'tus*, *Macroglos'sa*, *Prolap'sus lin'guæ*. Sauvages, under the term *Paraglossa deglutito'ria*, means a pretended doubling of the tongue into the pharynx, (F.) *Renversement de la langue*. See Glossocele.

PARAGOGE, (*παραγωγη*, from *para*, and *αγω*, 'to lead.') Abduction, Coaptation.

PARAGOMPHO'SIS, *Paragomphosis cap'itis*, (*para*, and *γομφωσις*, 'a nailing.') Incomplete wedging of the head of the child in the pelvis during labour.

PARAGUAY-ROUX, see Spilanthus oleracea.

PARALALIA, (*para*, and *λαλια*, 'speech.') Mogilalia—p. Nasalis, Rhinophonia.

PARALAMP'SIS, (*παραλαμψις*, from *παραλαμπω*, (*para*, and *λαμπω*, 'I shine,') 'I shine at the side of.') *Mac'ula corneæ maryarita'cea*, *Per'la*. A cicatrix on the transparent part of the eye.

PARALEREMA, (*παραληρημα*, from *para*, and *ληρος*, 'foolish talk.') Delirium.

PARALLAGE, (*παραλλαγη*,) Insanity.

PARALLAGMA, gen. *Parallag'matis*, (*παραλλαγμα*,) *Chevauchement*.

PARALLAXIS, (*παραλλαξις*, 'aberration.') *Chevauchement*, Insanity.

PARALLE'LA. A kind of scurfy, cutaneous eruption, affecting the palms of the hands in parallel lines, and symptomatic of the venereal disease, according to Forestus.

PARALLELISM OF DISEASES, Isopathia.

PARALOGIA, (*παραλογια*, from *para*, and *λογος*, 'a discourse.') Delirium.

PARALOPHI'IA, (*para*, and *λοφια*, 'the first vertebra of the back.') The lower and lateral part of the neck, near the vertebræ.

PARALYSÉ, Paralytic.

PARALYSIE, Paralysis—*p. Musculaire atrophique*, *Atrophie musculaire progressive*—*p. Saturnine*, Palsy, lead.

PARAL'YSIS, (*παραλυσις*,) *Par'esis*, *Resolu'tio membro'rum* seu *nervo'rum*, *Ca'rus paral'ysis*, *Catal'ysis*, (F.) *Paralysie*, *Résolution des membres*; *Aneu'ria*, *Anev'ria*, *Anervismie* of Piorry; *Palsy*, (*παραλυω*, (*para*, and *λυω*, 'I loosen,') 'I relax.') Abolition or great diminution of the voluntary motions, *Myoparal'ysis*, and sometimes of sensation in one or more parts of the body.

Palsy is said to be *local* when it affects only a few muscles. When it extends to half the body, vertically or horizontally, it is called *Hemiple'gia* or *Paraple'gia*. It is commonly symptomatic of disease of the brain or of the nerves themselves, and is a frequent accompaniment, precursor, or successor of apoplexy,—*Phrenoparal'ysis*. The immediate cause is, generally, pressure, either by blood effused, or by serum, or by vascular turgescence. At its onset, therefore, bloodletting may be advisable; but, afterwards, the disease becomes one of nervous debility, and requires stimulants to the paralyzed parts, or to the mucous membranes, — frictions, sinapisms, blisters, the moxa, baths, electricity, galvanism, purgatives, and the nux vomica, which last has the property of exciting movements where the will has no longer power. The disease generally admits only of palliation, and is extremely apt to recur.

PARALYSIS, Primula veris.

PARALYSIS AG''ITANS, *P. trem'ula*, *Syn'clonus ballis'mus*, *Scelotyr''bē festi'nans*, *Tre'mor*, *Tro'mos*, *Sha'king Pal'sy*, *Trem'bling Pal'sy*. A variety of tremor, in which the muscles are in a perpetual alternation of contraction and relaxation.

PARALYSIS, BELL'S, *Bell's Pal'sy*, *Histrion'ic Paral'ysis* or *Pal'sy*, *Paral'ysis facia'lis*, *Prosopoparal'ysis*, *Tris'mus dias'trophē Sauvage'sii*, *Dias'trophē Gale'ni*, *Hemiple'gia facia'lis*, *O'ris tortu'ra paralyt'ica Linnæ'i*, *Hemiprosople'gia*. The paralysis of the face induced by a lesion of

the portio dura has been called Bell's Palsy, owing to Sir Charles Bell having been one of the first to investigate it minutely.

Paralysis Beriberia, Beriberi—p. Extremitatum, Acroparalysis.

Paralysis, Diphtherit'ic, *P. diphtherit'ica.* A singular consequence, at times, of diphtheria, supervening when the patient is convalescing or apparently well. It may affect only the palate or pharynx, or be more general; and usually gets well, although slowly.

Paralysis Facialis, Paralysis, Bell's — p. General, of the Insane, Dementia paralytica—p. Hemiplegia, Hemiplegia—p. Histrionic, Paralysis, Bell's—p. of the Insane, Dementia paralytica—p. Intestini recti, Proctoparalysis—p. Intestinorum, Enteroparalysis—p. Linguæ, Glossolysis—p. Medullaris, Paraplegia—p. Metallica, Palsy, lead—p. Muscular, progressive, *Atrophie musculaire progressive* — p. Nervi hypoglossi, Glossoplegia — p. Nervi vagi in parte thoracicâ, Asthma—p. Nervorum thoracis, &c., Stethoparalysis—p. from Poisons, P. Venenata—p. Rachialgia, Colic, metallic.

Paralysis, Re'flex. Palsy occasioned by irritation reflected through the excitomotory nervous system to parts in themselves healthy,—as in the case of palsy from dentition, or of an injury of a nerve on one side of the body occasioning palsy on the other. Reflex paralysis would seem, at times, to assume the paraplegic form — *re'flex paraple'gia.* The cure must depend on the removal of the primary cause.

Paralysis Renum, Nephroparalysis—p. Saturnine, Paraplegia — p. Tremula, Paralysis agitans —p. Palsy, lead—p. Scorbutica, Pellagra—p. Spinalis, Paraplegia — p. Vacillans, Chorea.

Paral'ysis Venena'ta, *Paralysis e vene'nis, Paralysis from poisons.* Paralysis, the result of poisonous substances—as of lead, mercury, arsenic, ergot, &c.

Paralysis e Venenis, P. Venanata—p. Ventriculi, Gastroparalysis.

PARALYT'IC, (παραλυτικος,) *Paralyt'icus, Par'alyzed, Pal'sied,* (F.) *Paralysé, Paralytique.* Affected with or causing paralysis.

Paralytic Stroke, see Stroke, paralytic.

PARALYTICUS, (παραλυτικος,) Paralytic.

PARALYZED, Paralytic.

PARAME'NIA, (*para,* and μην, 'a month.') *Menstrua'tio anom'ala, Menses anom'ali, Mismenstrua'tion.* Difficult menstruation. Disordered menstruation.

Paramenia Difficilis, Dysmenorrhœa — p. Erroris, Menstruation, vicarious—p. Obstructionis, see Amenorrhœa—p. Profusa, Menorrhagia—p. Superflua, Menorrhagia.

PARAME'RIA, (παραμηρια, *para,* and μηρος, 'the thigh.') The internal parts of the thigh.

PARAMESOS, (παραμεσος, from *para,* and μεσος, 'the middle.') Annular finger, see Digitus.

PARAMO DE RUIZ, MIN'ERAL WA'TERS OF. A remarkable acid spring in New Grenada. It contains free sulphuric and chlorohydric acids, and has a temperature of 157° Fah.

PARANEPHRI'TIS, (*para,* and *nephritis.*) Inflammation of the renal capsules, *Inflamma'tio re'num succenturiato'rum.*

PARANEPHRUS, (*para,* and νεφρος, 'kidney.') Capsule, renal.

PARANŒA, (παρανοια, from *para,* and νους, 'understanding.') Delirium, Dementia.

PARANYMPH'US, (παρανυμφος, *para,* and νυμφη, 'a young spouse, a bride.') A name given by the ancients to him who led the bride to the house of her husband. The term was adopted into the ancient schools of medicine to designate the usual discourse pronounced at the end of the prescribed period of study for licentiate, in which the qualifications and merits of the candidates were described.

PARAPATHIA, (*para,* and παθος, 'affection.') Pathomania.

PARAPECHYON, (παραπηχιον, from *para,* and πηχυς, 'the elbow.') Radius.

PARAPHIA, (*para,* and αφη, 'touch.') Parapsis.

PARAPHIMO'SIS, (παραφιμωσις,) *Periphimo'sis, Circumligatu'ra, Phimo'sis circumliga'ta, Pe'nis lipoderm'us,* (*para,* and φιμοω, 'I bridle.') Strangulation of the glans penis, owing to the opening of the prepuce being too narrow. It frequently happens in persons affected with phimosis, when the prepuce has been pushed violently behind the base of the glans, during copulation, &c. In paraphimosis the narrow and resisting aperture of the prepuce forms, behind the corona glandis, a kind of ligature, which strangulates the part, causes it to swell and inflame, and even to become gangrenous. Attempts must be made to bring back the prepuce. These excite considerable pain, yet they must be persevered in for some time, and should they not succeed, the ring formed by the tumefied prepuce must be cut transversely, and the antiphlogistic treatment be adopted.

PARAPHOBIA, (*para,* and φοβος, 'dread.') Hydrophobia.

PARAPHO'NIA, παραφωνια, from *para,* and φωνη, 'voice.') Affection of the voice, when its character or *timbre* is less agreeable.

Paraphonia Clangens, Oxyphonia — p. Gutturalis, Asaphia — p. Nasalis, Rhinophonia — p. Puberum, Hirquitalitas—p. Rauca, Raucedo—p. Ulcerosa, Oxyphonia.

PARAPHORA, (παραφορα, from *para,* and φερω, 'to carry,') Delirium, Paracope.

PARAPHRENESIS, (*para,* and φρην, 'the mind,') Paraphrenitis — p. Diaphragmatica, Diaphragmitis.

PARAPHRÉNIE, Insanity.

PARAPHRENI'TIS, (from *para,* φρην, 'the mind,' or φρενες, 'the diaphragm,' and *itis,*') *Paraphrene'sis,* (F.) *Paraphrénésie.* A name given to inflammation of the diaphragm, which was supposed always to produce delirium:—as well as to the delirium itself accompanying that affection. See Phrenitis.

PARAPHROSYNE, (παραφροσυνη,) Delirium.

PARAPLAS'TIC, *Paraplas'ticus,* (*para,* and πλαστικος, 'formative.') Possessed of depraved formative powers, — as Carcinoma, Encephaloma, Melanosis, &c.

PARAPLE'GIA, (παραπληγια,) *Paraplex'ia, Rachioparal'ysis, Rhachioparal'ysis, Rhachiople'gia, Myeloparal'ysis, Paral'ysis spinu'lis* seu *medulla'ris, Ca'rus paral'ysis paraple'gia,* (F.) *Paraplégie,* (*para,* and πλησσω, 'I strike.') Palsy of the lower half of the body, including the bladder and rectum. It is, generally, owing to disease of some part of the cerebrospinal axis; especially of the spinal portion. The ancients sometimes used the term for incomplete apoplexy. Some authors have, also, made a distinction between *paraplegia* and *paraplexia,*—using the former for *partial apoplexy,*—the latter for *general* or *complete apoplexy.*

PARAPLEGIA, REFLEX, see Paralysis, reflex.

PARAPLEURITIS, Pleurodynia.

PARAPLEXIA, (παραπληξια,) Paraplegia.

PARAPOPHYSES, see Vertebra.

PARAP'OPLEXY, *Parapoplex'ia,* (*para,* and αποπληξια, 'apoplexy.') False apoplexy; a soporous state, resembling apoplexy; and especially that which occurs in the paroxysms of pernicious intermittents.

PARAP'SIS, *Paraph'ia,* (*para,* and απτομαι, 'I touch.') Sense of touch or general feeling vitiated or lost.

Parapsis Acris Teneritudo, Soreness—p. Ex-

pers, Torpor, Anæsthesia—p. Illusoria, Pseudæsthesia—p. Pruritus, Itching.

PARARMA, (*παραρμα,*) Fimbria.

PARARRHYTHMICUS, Pararrhythmus.

PARARRHYTH'MUS, (*παραρρυθμος,*) *Pararrhyth'micus*, (*para*, and *ῥυθμος*, 'rhythm.') An epithet for the pulse, when it has not the rhythm proper to the age and constitution of the individual.

PARARTHRE'MA, gen. *Parathre'matis*, (*παραρθρημα,*) *Pararthro'ma*, *Pararthre'sis*, *Parathro'sis*, *Parec'tasis*, *Parastrep'sis*, (*para*, and *αρθρον*, 'a joint,') Incomplete luxation; subluxation.

PARACEPAS'TRA, (*para*, and *σκεπεζω*, 'I cover.') A cap or bandage, which covers the whole head.

PARASCEUE, (*παρασκευη*, from *para*, and *σκευη*, 'equipment,') Apparatus.

PARAS'CHIDES, (*παρασχιδες*, from *para*, and *σκιζω*, 'I cleave.') Fragments or splinters of a broken bone.

PARASITAIRE, Parasitic.

PAR'ASITE, (*παρασιτος,*) *Parasi'tus*, (*παρασιτεω*, (*para*, and *σιτος*, 'corn,' 'food,') 'I eat by the side of.') Parasites are plants which attach themselves to other plants; and animals which live in or on the bodies of other animals,—so as to subsist at their expense. The mistletoe is a parasitic plant; —the louse a parasitic animal. Examples of parasitic animals are the *Pedic'ulus huma'nus corpo'ris*, *P. cap'itis*, *P. pu'bis*, *Pa'lex irri'tans*, *P. pen'etrans*, the *Ac'arus Sca'biei*, and the different entozoa.

PARASITIA, (*παρασιτια,*) Parasitism.

PARASIT'IC, (*παρασιτικος*) *Parasit'icus*, *Par'asitoid*, *Parasitoi'des*. Having the nature of, or resembling a parasite, — as 'parasitic growths,' tubercles, cancer, monster, (F.) *Parasitaire*, &c.

PARASITIC DISEASES, *Parasit'ici* (*morbi*) are such as are induced by, or connected with animal or vegetable parasites. See Porrigo favosa, Psora, &c.

PARASITICIDE, (*parasite*, and *cædere*, 'to kill,') Antiparasitic.

PAR'ASITISM, *Parasitism'us*, *Parasi'tia*. The condition of a parasite, or of an organized structure or body which lives on another organized body.

PARASITISMUS INTESTINALIS, Helminthiasis—p. Superficiei, Malis.

PARASITOG''ENY, *Parasitogen'ia*, *Parasitogen'esis*, (*parasite*, and *γενω*, 'to beget.') The corporeal condition, which favours the development of parasites.

PARASITOID, (*parasite*, and *ειδος*, 'resemblance,') Parasitic.

PARASITUS, (*παρασιτος,*) Parasite.

PARASPA'DIA, (*para*, and *σπαω*, 'I draw.') A preternatural opening of the urethra at the side of the penis. One whose urethra opens in this manner is called *Paraspadiæ'us* and *Paraspa'dias*.

PARASPADIÆUS, see Paraspadia.

PARAS'PHAGIS, (*παρασφαγις*, from *para*, and *σφαγη*, 'the throat.') The part of the neck contiguous to the clavicles.

PARAS'TATA, *Paras'tates*, (*παριστημι*, (*para*, and *ιστημι,*) 'I stand near.') The prostate. In Hippocrates, it means the epididymis. The epididymes were called by Herophilus and Galen *Varico'sæ parastatæ*, to distinguish them from *glandulo'sæ parastatæ* or *prostate*. Rufus of Ephesus called the Tubæ Fallopianæ *Parastatæ varico'sæ*.

PARASTATA ADENOIDES, Prostate—p. Glandula, Prostate—p. Glandulosa, Prostate.

PARASTATES, Parastata.

PARASTATI'TIS, *Epididymi'tis*; (*parastata*, 'epididymis,' and *itis*.) Inflammation of the epididymis.

PARASTREM'MA, gen. *Parastrem'matis*, *Parastrophē*, (*παραστρεμμα*, from *παραστρεφω*, (*para*, and *στρεφω*, 'I turn,') 'I distort or pervert.') Distortion. Convulsive distortion, especially of the face, the soft parts being drawn laterally.

PARASTREPSIS, Pararthrema.

PARASTROPHE, Parastremma.

PARASYNANCHE, (*παρσυναγχη,*) Cynanche parotidæa.

PARASYSTOLE, (*para*, and *συστολη*, 'contraction,') Acinesia.

PARATH'ENAR, *Parathenar*, (*para*, and *θεναρ*, 'the sole of the foot.') Winslow called *grand parathénar*, *parathenar major*, a portion of the abductor of the little toe, *musculus scandula'rius*; and *petit parathénar*, *parathenar minor*, the short flexor of that toe.

PARATHENAR MAJOR, Abductor minimi digiti pedis — p. Minor, Flexor brevis minimi digiti pedis.

PARATONIA, (*para*, and *τονος*, 'tension,') see Spasm.

PARATOPIA, (*para*, and *τοπος*, 'place,') Luxation.

PARATOP'IÆ. Diseases in which organs are removed from their proper position. See Ectopia.

PARATRIMMA, gen. *Paratrim'matis*, (*παρατριμμα*, from *para*, and *τριβω*, 'to rub.') Chafing.

PARATROPE, (*παρατροπη*, from *para*, and *τρεπω*, 'to turn.') Apotrope.

PARAT'ROPHY, *Parat'rophē*, *Paratroph'ia*. (*para*, and *τροφη*, 'nourishment.') Misnutrition.

PARBREAKING, ([G.] brechen, 'to vomit,') Vomiting.

PARDALIANCHES, (*παρδαλιαγχες*, from *παρδαλις*, 'a panther,' and *αγχειν*, 'to strangle.') Aconitum.

PARDALIANCHUM, Aconitum.

PAREC'TAMA, gen. *Parec'tamatis*, (*παρηκταμα,*) *Parec'tasis*, (*para*, *εκ*, 'out,' and *τεινω*, 'I stretch.') Immoderate extension, distension, or dilatation of a part—as of the heart.

PARECTASIS, (*παρεκτασις*) Pararthrema, Parectama.

PAREGOR'IC, (*παρηγορικος,*) *Paregor'icus*, *Sopiens*, (F.) *Parégorique*, (*παρηγορεω* (*para*, and *αγορευω*), 'I soothe, I calm.') That which soothes or assuages—as paregoric elixir. An anodyne.

PAREIA, (*παρεια,*) Gena.

PAREIRA, see P. brava.

PAREI'RA BRA'VA, *Cissam'pelos Pareira*, *Parey'ra*, *Bu'tua*, *Abu'ta*, *Albu'tua*, *Botou*, *Caa-peba*, *Overo butua*, *Wild Vine*, *Vel'vet leaf*. *Family*, Menispermeæ. *Sex. Syst.* Dicœcia Monadelphia. The root of this plant—*Pareir'a* (Ph. U. S.)—a native of South America and the West Indies, has a sweet taste, with considerable bitterness and slight roughness. It has been recommended in nephritic and calculous affections; but it is not much used. By A. de St. Hilaire, Pareira is assigned to *Cissampelos glaber'rima*.

PARELLE, Rumex hydrolapathum, R. patientia.

PAREMPTOSIS, (*παρεμπτωσις*, 'intrusion,') see Coincidentia.

PARENCEPHALIS, (*παρεγκεφαλις*, from *para*, and *εγκεφαλος*, 'the brain,') Cerebellum.

PARENCEPHALITIS, (*parencephalis*, and *itis*,) Cerebellitis.

PARENCEPHALOCE'LE, (*parencephalis*, and *κηλη*, 'a rupture.') *Her'nia of the cerebel'lum*; a very rare disease. It occurs under the form of a soft, indolent, or slightly painful tumour, without change in the colour of the skin, and is situate in the occipital region. It is constituted of the cerebellum, which escapes through an aperture in the occipital bone. Great attention must be paid not to mistake it for an ordinary tumour, as its extirpation would be attended with fatal consequences.

PARENCEPHALUS, Cerebellum.

PAREN'CHYMA, gen. *Parenchym'atis*, (παρεγχυμα,) *Ca'ro parenchymat'ica* seu *vis'cerum* seu *viscera'lis* seu *viscero'sa*, *Substan'tia parenchymato'sa*, *Prochen'ma*, (F.) *Parenchyme*. The texture of glandular and other organs, composed of agglomerated globules united by areolar tissue, and tearing with more or less facility. Such is the texture of the liver, kidneys, &c. Παρεγχυμα signifies, in Greek, effusion, (*para*, εν, and χυω, 'I pour,') and it was believed, that this tissue consisted of effused blood or other fluid.

Parenchyma Testis, Pulpa testis.

PAREN'CHYMAL, *Parenchym'atous*, *Paren'chymous*, *Parenchym'al'is*, *Parenchymat'icus*, (F.) *Parenchymateux*. Belonging or relating to the parenchyma of an organ.

PARENCHYMATI'TIS. (*parenchyma*, and *itis*.) *Inflammu'tio parenchymat'ica*. Inflammation of the substance of an organ.

PARENCHYMA'TOUS, Parenchymal.

PAR'ESIS, (παρεσις, from παριημι, 'I relax.') (F.) *Parésie*. Paralysis. According to some, a slight, incomplete paralysis, affecting motion but not sensation.

PARESTHE'SIS, *Paræsthe'sis*, *Paresthe'sia*, *Sen'sus imperfec'tus*, (*para*, and αισθησις, 'sensation.') Congenital misconstruction of the external organs of sense. A genus in the nosology of Good. Also, perversion of sensibility.

PARET'ICA EXARTHRO'SIS. Luxation from relaxation of the ligaments of a joint.

PARETICUS, (παρετος, 'relaxed,') Relaxant.

PAREYRA, Pareira brava.

PARFUM, (*per*, and *fumus*, 'smoke,') Suffimentum.

PARIERA, Pareira brava.

PARIES, gen. *Pari'etis*. 'a wall,' Table.

PARI'ETAL, *Parieta'lis*, *Pariet'inus*, (from *paries*,) (F.) *Pari'etal*. Appertaining to the parietes or walls of an organ or to the parietal bones.

Parietal Artery, see P. Bones.

Parietal Bones, *Os'sa parieta'lia* seu *vertica'lia* seu *ver'ticis* seu *sincip'itis* seu *breg'matis* seu *bregmat'ica* seu *nerva'lia* seu *tetrago'na*, are two fellow-bones, occupying the lateral and upper parts of the cranium, in the formation of which they assist. They have a quadrilateral shape: their external surface is convex; and presents, at its middle part, an eminence called the *Pari'etal protu'berance*, *Tu'ber parieta'lē*, (F.) *Bosse pariétale*. Their inner or cerebral surface, which is concave, has a depression that corresponds with the preceding eminence, and which is called the *Pari'etal fos'sa*, *Fos'sa parieta'lis*. Above and behind, near the superior edge of these bones, is a foramen, which does not always exist, called the *Pari'etal fora'men*, *Fora'men parieta'lē*, through which passes a vein—*pari'etal vein*—that opens into the superior longitudinal sinus of the dura mater: and an artery—*pari'etal ar'tery*—a branch of the occipital, which ramifies on the same sinus. Each parietal bone is articulated *above*, with its fellow; *below*, with the temporal bone: *before*, with the frontal; *behind*, with the occipital, and by the anterior and inferior angle with the great ala of the sphenoid; and is developed from a single point of ossification.

Parietal Foramen, see P. Bones—p. Fossa, see P. Bones—p. Protuberance, see P. Bones—p. Veins, see P. Bones.

PARIETA'RIA, (from *paries*, 'a wall,' because found on old walls.) *P. officina'lis*, *Helx'inē*, *Vitra'ria*, *Wall pel'litory*, (F.) *Pariétaire commune*, *Perce-muraille*, *Aumure*, *Herbe aux murailles* ou *aux Nones*. *Family*, Urticeæ. *Sex. Syst.* Polygamia Monœcia. This plant contains much nitrate of potassa, and was formerly largely employed as a diuretic, and, also, as an emollient; but it is not much used at the present day.

Parietaria Pennsylva'nica. *Amer'ican Pel'litory*, a small weed, flowering from June to August, has been used in juice or decoction as a diuretic, 'deobstruent,' and emmenagogue.

PARI'ETES, (pl. of *paries*, 'a wall,') (F.) *Parois*. A name given to parts which form the enclosures or limits of different cavities of the body, as the *Parietes of the cranium*, *chest*, &c.

PARIETINUS, Parietal.

PAR'IS, gen. *Par'idis*, *P. quadrifo'lia*, *Sola'num quadrifo'lium*, *U'va inver'sa* seu *lupi'na* seu *vulpi'na*, *One'berry*, *True'love*, (F.) *Parisette*, *Raisin de Renard*, *Herbe à Paris*, *Étrangle-loup*. It possesses narcotic properties, and was formerly considered a powerful philter. It is emetic, and is sometimes used externally as a resolvent and anodyne.

PARISAGOGE INTESTINORUM, (from παρεισαγω, 'to introduce improperly,') Intussusceptio.

PARISETTE, Paris.

PARISTII'MIA, (παριστμια, from *para*, and ιστμος, 'the throat.') A word employed to designate the tonsils, and, likewise, inflammation of the tonsils, *Cynanche tonsillaris*, and Cynanche in general.

PARISTHMIOT'OMUS, (*paristhmia*, and τεμνω, 'I cut.') An instrument with which the tonsils were formerly scarified.

PARISTHMITIS, (*paristhmia*, and *itis*,) Cynanche, C. tonsillaris.

PARISTHMIUM, (παριστμιον,) Tonsil.

PARISWORT, Trillium latifolium.

PARMACITY, (corr, from *spermaceti*,) Cetaceum—p. Poor Man's, Thlaspi bursa.

PARMELIA ISLANDICA, Lichen Islandicus.

PARME'LIA PARIET'INA, *Lichen pariet'inus*, *Yel'low wall Li'chen*, *Com'mon Yel'low Wall Moss*, which grows abundantly on trees and walls, *Order*, Lichenaceæ, is used in intermittent fever on account of its bitterness.

PARMELIA PLICATA, Lichen plicatus — p. Pulmonacea, Lichen pulmonarius — p. Roccella, Lichen roccella—p. Saxatilis, Lichen Saxatilis.

PARMENTIERA CERIF'ERA, (after Parmentier,) *Palo de velas*, *Can'dle Tree*. A forest tree in the valley of the Chagres,—*Nat. Ord.* Crescentiaceæ, — the long cylindrical fruit of which, resembling candles, serves for food for cattle.

PARMENTIÈRE, Solanum tuberosum.

PAROARION, (*para*, and ωαριον, 'ovarium,) Parovarium.

PAROCHETEUSIS, (παροχετευσις, from *para*, and οχετευω, 'to divert water from,') Derivation.

PARODINIA, (*para*, and ωδιν, 'labour pains,') Dystocia—p. Perversa, Presentation, Preternatural.

PARODON'TIDES, (*para*, and οδους, gen. οδοντος, 'a tooth,') Tumours on the gums; parulis, &c.

PAROIS, Parietes.

PAROLE, (from low Lat. *parabolare*, [F.] *parler*, 'to speak, to parley,') Voice, articulated.

PAROMPHALOCE'LĒ, (*para*, ομφαλος, 'the navel,' and κηλη, 'rupture.') Hernia near the navel.

PARONI'RIA, (*para*, and ονειρον, 'a dream.') Depraved, disturbed, or morbid dreaming; *Oneirodyn'ia acti'va*, *Erethis'mus oneirodyn'ia*. The voluntary organs connected with the passing train of ideas, overpowered by the force of the imagination during dreaming, and involuntarily excited to their natural or accustomed actions, while the other organs remain asleep.

Paroniria Ambulans, Somnambulism—p. Salax, Pollution.

PARONYCH'IA, *Paron'ychis*, *Paronychi'tis*, *Pan'aris*, *Redu'vio*, *Rediv'ia*, *Ver'mis* seu *Pteryg'ium dig''iti*, *Panarit''ium*, *Digit''ium*, *Pandalit''ium*, *Pas'sa*, *Dactyli'tis*, *Panari'tium*, *Onych'ia*, (F.) *Onglade*, (*para*, and ονυξ, gen. ονυχος, 'the

nail.') The ancients gave this name to an inflammatory tumour, — *Onychi'tis, Onyxi'tis* (Gross), —seated near the nail, and involving the pulp or matrix. Some of the moderns have extended it to inflammation of the hand, and even of the forearm. It usually means every phlegmonous tumour of the fingers or toes, and especially of the first phalanx. Four kinds of paronychia are commonly pointed out: 1. That seated between the epidermis and skin, called, vulgarly, in this country, *Run'round* — in France, *Tourniole, Vire.* 2. That seated in the subcutaneous areolar tissue. 3. That occupying the sheath of a tendon; and 4. That considered to be seated between the periosteum and bone. The last three are only different degrees of the same disease, constituting *Whit'low,* (Prov.) *Whickflaw, Teak,* (F.) *Mal d'aventure:* — the worst kinds, in English, are called *Fel'on, Cacoparonych'ia.* The inflammation generally commences in the subcutaneous areolar tissue, and spreads to other parts, occasioning excessive lancinating pain, owing to the parts being put upon the stretch; hence, the necessity of dividing them freely, — even down to the bone, when there is reason to believe that the affection belongs to the fourth division, — making use of emollient applications, the antiphlogistic treatment, and opiates to relieve pain.

PARONYCHIA, Asplenium ruta muraria — p. Digitium, Digitium.

PARONYCHIS, Paronychia.

PARONYCHITIS, Paronychia.

PAROPHOBIA, (*para,* and *φοβος,* 'dread,') Hydrophobia.

PAROPIA, (*παρωπια,* from *para,* and *ωψ,* 'the eye,') Canthus (lesser.)

PAROPLEXIA, (*para,* and *πλησσειν,* 'to strike,') Paraplegia.

PAROPSIS, (*para,* and *οψις,* 'sight,') Dysæsthesia visualis — p. Amaurosis, Amaurosis — p. Cataracta, Cataract — p. Glaucosis, Glaucoma — p. Illusoria, Pseudoblepsia — p. Lateralis, Dysopia lateralis — p. Longinqua, Presbytia — p. Lucifuga, Nyctalopia — p. Noctifuga, Hemeralopia — p. Propinqua, Myopia — p. Staphyloma, Staphyloma — p. Staphyloma purulentum, Hypopyon — p. Staphyloma simplex, Hydrophthalmia — p. Strabismus, Strabismus — p. Synezisis, Synezisis.

PAROPTE'SIS, (*παροπτησις,* from *para,* and *οπταω,* 'I roast.') Forcing a sweat by placing a patient before the fire or putting him in a dry bath.

PARORA'SIS, (*para,* and *οραω,* 'I see.') Perversion of sight, which prevents the person from judging accurately of the colour of objects. *Achromatop'sia.* Hallucination.

PARORCHID'IUM, (*para,* and *ορχις,* gen. *ορχιδος,* 'testicle.') Any position of one or both testicles, different from that which they ought to occupy in the scrotum; — whether they may not have descended through the abdominal ring, or are drawn up to the groins by the cremaster muscle.

PARORCHIDO-ENTEROCE'LE, *Hernia parorchidoënter'ica.* Internal hernia complicated with displacement of the testicle.

PAROS'MIA, Anosmia. Also, perversion of smell; *Parœsthe'sia olfacto'ria, Olfac'tus depravа'tus, Idiosyncra'sia olfacto'ria,* (from *para,* and *οσμη,* 'odour.')

PAROS'TIA, (*para,* and *οστεον,* 'a bone.') Bones untempered in their substance, and incapable of affording proper support.

PAROSTIA FLEXILIS, Mollities ossium — p. Fragilis, Fragilitas ossium.

PAROTIA, (*παρωτις,* from *para,* and *ους,* gen. *ωτος,* 'the ear,') Cynanche parotidæa.

PAROT'ID, *Gland'ula parotidæ'a* seu *ad Aur'es, Paro'tis, Animel'læ, Alimel'læ.* The largest of the salivary glands, seated under the ear, and near the angle of the lower jaw. It is composed of many separate lobes, giving rise to excretory ducts, which unite to form one canal, called the *Parot'id duct, Ste'no's* or *Ste'non's canal'* or *duct,* — the *Duc'tus supe'rior* or *Supe'rior sal'ivary canal',* of some, see Ductus salivalis superior. This duct, after having advanced horizontally into the substance of the cheek, proceeds through an opening in the buccinator muscle, and terminates in the mouth opposite the second upper molaris. About the middle of its course, it sometimes receives the excretory duct of a glandular body, situate in its vicinity, and called the *Ac'cessory Gland of the Parot'id, So'cia Parot'idis, Gland'ula so'cia parot'idis.* In the substance of the parotid are found — a number of branches of the facial nerve, of the transverse arteries of the face, and the posterior auricular. It receives, also, some filaments from the inferior maxillary nerve, and from the ascending branches of the superficial cervical plexus. Its lymphatic vessels are somewhat numerous, and pass into ganglions situate at its surface or behind the angle of the jaw. The parotid secretes saliva, and pours it copiously into the mouth.

PAROTID, ACCESSORY GLAND OF THE, see Parotid.

PAROTID APONEURO'SIS. A sheath of great thickness, continuous, below, with the cervical fascia. It forms a frame-work to the parotid by means of fibrous prolongations from its deep surface. Its density accounts for the pain of parotitis, and for the difficulty with which pus makes its way to the surface.

PAROTID ARTERIES, see Parotid — p. Duct, see Parotid — p. Veins, see Parotid.

PAROTIDE, Parotis.

PAROTIDEAN, *Parotidæ'us,* (F.) *Parotidien.* Belonging or relating to the parotid.

PAROTIDITIS, (*parotid,* and *itis,*) Cynanche parotidæa, Parotis.

PAROTIDON'CUS, *Tumor paro'tidis, T. Glan'dulæ parotidæ'æ,* (*parotid,* and *ογκος,* 'a tumour.') Swelling of the parotid.

PARO'TIS, gen. *Paro'tidis,* (*παρωτις,* from *para,* and *ους,* gen. *ωτος,* 'ear,') *Phleg'monē parotidæ'a, Inflamma'tio paro'tidum, Cynan'chē parotidæ'a, Paroti'tis, Parotidi'tis, Dioscu'ri,* (F.) *Parotide,* is the name of a tumour seated under the ear; which is reddish, hard, and attended with obtuse pain; the progress to suppuration being slow and difficult. Sometimes it is of a malignant character, sloughing, and long protracted. Some French pathologists restrict the term *parotide* to symptomatic parotitis — as to that which occurs in plague; whilst they apply the terms *Oreillons* or *Ourles, Parotoncies,* to Cynanche Parotidæa or Mumps. Also, the parotid.

PAROTIS, Parotid — p. Contagiosa, Cynanche parotidæa — p. Epidemica, Cynanche parotidæa — p. Seroso glutine tumens, Cynanche parotidæa — p. Spuria, Cynanche parotidæa.

PAROTITIS, (*parotis,* and *itis,*) Cynanche parotidæa, Parotis — p. Epidemica, Cynanche parotidæa — p. Erysipelatosa, Cynanche parotidæa — p. Polymorpha, Cynanche parotidæa — p. Specifica, Cynanche parotidæa.

PAROTONCIES, (*parotid,* and *ογκος,* 'a tumour,') see Parotis.

PAROVA'RIUM, properly *Paroä'rion, Corpus* seu *Corpus'culum con'icum Rosenmülleri, Organ or Body of Rosenmuller, Appen'dage to the O'vary,* (*para,* and *ωαριον,* 'the ovary.') A body closely analogous in structure to the epididymis, which is seated between the Fallopian tube and the ovary in the broad ligament. The Corpus Wolffianum concurs in its formation.

PAROXYN'TIC, (*παροξυν-ικος,*) *Paroxyn'ticus,* (F.) *Paroxyntique,* (*παροξυνω,* 'I excite.') Relating to a paroxysm.

Jours paroxyntiques are days on which paroxysms take place.

PAR'OXYSM, (*παροξυσμος,*) *Paroxys'mus,* (*παροξυνω,* from *para,* and *οξυνειν,* 'to render sharp.' 'I irritate.') *Im'petus, Insul'tus, Inva'sio, Exacerba'tio, Acces'sio, Acces'sus,* (Old. Eng.) *Ax'es, Access,* (F.) *Exacerbation, Redoublement, Accès.* The augmentation which supervenes at equal or unequal intervals in the symptoms of acute diseases. Also, a periodical exacerbation or fit of a disease.

PAROXYS'MAL, *Paroxysma'lis,* (F.) *Paroxystique.* Of or belonging to a paroxysm; — as a *paroxysmal* day, (F.) *Jour paroxystique;* a day on which a paroxysm of disease occurs.

PAROXYSMUS FEBRILIS, Pyrexia.

PAROXYSTIQUE, Paroxysmal.

PARS, gen. *Partis,* 'a part,' Genital organs—p. Corporis, Genital organs — p. Inferior pedis, Sole—p. Intermedia, see Corpus spongiosum urethræ — p. Mastoidea of Temporal Bone, Mastoid process — p. Naturalis medicinæ, Physiology — p. Obscœna, Genital organs — p. Petrosa, see Temporal Bone—p. Prima asperæ arteriæ, Larynx—p. Pyramidalis ossis temporis, see Temporal Bone—p. Squamosa, see Temporal Bone — p. Urethræ membranacea, see Urethra—p. Vaga, Pneumogastric — p. Virilis, Penis.

PARSLEY, COMMON, (corr. from *petroselinum,* [F.] *persil,*) Apium petroselinum — p. Fool's, Æthusa cynapium—p. Macedonian, Bubon macedonicum—p. Mountain, black, Athamanta aureoselinum — p. Poison, Conium maculatum — p. Spotted, Conium maculatum — p. Water, Cicuta maculata.

PARSNEP, COW, (corr. from *pastinaca* [?]), Heracleum spondylium, Heracleum lanatum — p. Crow, Leontodon taraxacum — p. Garden, Pastinaca sativa—p. Meadow, Thapsium Barbinode — p. Water, common, Sium latifolium.

PART, (from *parere, partum,* 'to bring forth,') see Parturition—*p. Légitime et illégitime,* see Parturition.

PARTES, pl. of *Pars,* Genital organs—p. Generationi inservientes, Genital organs—p. Genitales, Genital organs — p. Laterales nasi, Scapulæ nasi — p. Nervosæ, see Nerve — p. Obscœnæ, Genital organs.

PARTHENEIA, (*παρθενεια,*) Virginity.

PARTHENIUM FEBRIFUGUM, (from *παρθενος,* 'a virgin;' used in diseases of virgins,) Matricaria — p. Mas, Tanacetum.

PARTHENI'US (*Morbus*), (*παρθενειος,* 'relating or appertaining to a virgin.') A disease in a young female. Also, chlorosis.

PARTHENOGEN'ESIS, 'virgin birth;' (*παρθενος,* 'a virgin,' and *γενεαις,* 'generation.') The successive production of procreating individuals from a single ovum, without any renewal of fertilization.

PARTHENOL'OGY, *Parthenolog''ia,* (*παρθενεια,* 'virginity,' and *λογος,* 'a description.') A description or consideration of the state of virginity in health or disease.

PARTHENONOSUS, (*parthenus,* and *νοσος,* 'disease,') Chlorosis.

PARTHENUS, (*παρθενος,*) Virgin.

PARTIALIS, (*pars,* gen. *partis,* 'a part,') Local.

PARTICLES, PRIMITIVE, OF MUSCLES, Sarcous Elements.

PARTICULÆ SANGUINIS, (dim. of *pars,* gen. *partis,* 'a part,') Globules of the blood.

PARTIES, LES, 'the parts,' Genital organs —*p. Génitales,* Genital organs — *p. Génitoires,* Genital organs—*p. Honteuses,* Genital organs—*p. Naturelles,* Genital organs — *p. Nobles,* Genital organs — *p. Sexuelles,* Genital organs.

PARTIO, (*parere, partum,* 'to bring forth,') Parturition.

PARTRIDGE-BERRY, Gaultheria, Mitchella repens.

PARTS, THE, Genital organs.

PARTURA, (*parturire, parturitum,* itself from *parere,* 'to bring forth,') Parturition.

PARTU'RIENT, *Partu'riens.* Bringing forth, or about to bring forth, or having recently brought forth young.

The *Partu'rient, Puer'perous, Child'ing, Child'bed* or *Lying-in* or *Lying-down state, Confinement, Puerpe'rium,* generally comprises the period from parturition to perfect recovery, which is usually a month. In the north of England this is called the *steg month,* requires careful management, and is subject to various diseases.

A *Partu'rient* or *Parturifa'cient* is a medicine which induces or promotes labour; as ergot, and perhaps borate of soda. See Abortive.

PARTURIFACIENT, (*parturio,* 'to bring forth,' and *facere,* 'to make,') Parturient.

PARTURIT''ION, *Puerpe'rium, Par'tus, Par'tio, Parturit''io, Partu'ra, To'cus, To'cetus, Tex'is, Lochi'a, Apocyc'sis, Mæu'sis, Maieu'sis, Nego'tium* seu *Ac'tus parturitio'nis, Enix'us* seu *Enix'io* seu *Expul'sio fœ'tûs, Apol'ysis, Sta'tus parturien'di, Deliv'ery, La'bour, Child'bearing, Child'birth, Birth, Trav'ail,* (Sc.) *Childill, Crying, Crying out,* (F.) *Accouchement, Couche, Travail d'Enfant, Enfantement, Mise-bas.* The act of delivery of the fœtus and its appendages; also the state during and immediately after delivery—*Childbed,* (Sc.) *Gizzenbed, Gizzen,* see Parturient. Labour is the necessary consequence of conception, pregnancy, and the completion of gestation. It does not take place, at the full time, until after nine months of utero-gestation,—the causes producing it being the contraction of the uterus and abdominal muscles. By different authors, the stages of labour have been variously divided. We may, perhaps, admit of four. The *first stage* comprises the precursory signs. One, two, or three days before labour, a mucous discharge, streaked with blood, takes place from the vagina, which is called the *Sig'num, Leucorrhœ'a Nabo'thi, Hæmorrhag''ia Nabo'thi, La'bourshow* or *Show,* (F.) *Glaires,* and along with this, trifling grinding pains, called by the French *Mouches,* are felt in the loins and abdomen. *Second stage:*—Peculiar pains, which extend from the lumbar region towards the uterus; tension and dilatation of the neck and orifice of that organ; protrusion into the vagina of the envelopes of the fœtus, forming the *bag of waters,* (F.) *Poche des eaux;* and rupture or breaking of the waters. *Third stage:*—Contractions of the uterus and abdominal muscles; forcing pains; the head of the fœtus becomes engaged in the pelvis: the occiput being commonly situate above the left acetabulum, passes beneath the arch of the pubis. *Fourth stage:* — the head now presents at the vulva, the perineum being considerably distended; at length it clears the external parts, and the rest of the body is easily disengaged. The child still continues attached to the mother by the umbilical cord, which has to be divided. In the course of fifteen or twenty minutes, trifling pains occur, and the secundines are expelled. This completes delivery—the *birth,* (F.) *naissance* of the child. In by far the majority of cases, the head is the presenting part, the occiput directed anteriorly, and the face posteriorly. Of 12,633 children, born at the Hospital *La Maternité,* in Paris, from the 10th of December, 1797, to the 31st of July, 1806, the following were the presentations:

The head, with the face posteriorly...	12,120
The head anteriorly.....	63
The breech.....	198
The feet.....	147
The knees.....	3
Other positions.....	102
	12,633

The following table, drawn up from data furnished by Velpeau, gives an approximate view of the comparative number of presentations, in 1000 cases, according to the experience of the individuals mentioned:

	ACCORDING TO							
	Merriman.	Bland.	Madame Boivin.	Madame Lachapelle.	Naegele.	Lovati.	Hospital of the Faculté.	Boer
Regular or of the vertex	924	944	969	933	933	911	980	
I. *Occipitoanterior*	908		944	910		895

" Turning	16	4·7		7·8	7.2			5·9
" Cephalotomy	3·3	5·2	4.77	0·53	2·4			1·5

Labour has received different names, according to the period of pregnancy at which it occurs, and the mode in which it takes place. It is called *miscar'riage* or *abor'tion*, prior to the seventh month; *prem'ature la'bour*, *Omotoc'ia*, *Par'tus præ'cox* seu *præmatu'rus*, between this and eight months and a half; and *la'bour at the full period*, (F.) *Accouchement à terme*, when it happens at the end of nine months. Labours have likewise been variously divided by different authors. Perhaps the one into *Nat'ural* and *Preternat'ural*, is as good as any;—*natural Labour* meaning that which would occur without manual assistance; and *preternatural*, requiring the assistance of art, either by the hand solely, or with the aid of instruments—*instrumen'tal labour*, which M. Capuron calls *Accouchement Méchanique*. Professor Hodge admits the following classification:

- Eutocia.
  - Vertex presentations.
  - Pelvic presentations.
- Dystocia.
  - Various states of the fœtus.....
    - Large heads.
    - Malpresentations.
    - Plurality of children.
    - Deformities.
  - Conditions of the pelvis or uterus.
    - Deformed pelvis.
    - Displacements of the uterus.
  - Physiological states
    - Inordinate excitement.
    - Deficient excitement.
  - Pathological states
    - Local.
    - General.

Power'less labour, the *Inertie par épuisement* of Madame Lachapelle, is that in which the muscular powers from exhaustion are unable to accomplish delivery.

Forced labour or *parturition*, (F.) *Accouchement* ou *Avortement provoqué*, is labour or abortion, induced by art. When accompanied with other phenomena of a deranging character, it is said to be *com'plicated*. When the child, even when reduced in size, cannot pass, it is termed *impracticable*, &c. See Dystocia.

The French use the term *Part*, (L.) *Par'tus*, at times, synonymously with *delivery*; at others, with the *child*, *Maicuma*, *Mæcu'ma*. *Suppression de part* means concealment of delivery; *Part légitime*, a fœtus which comes into the world with the conditions necessary for its enjoying advantages granted by law; and *Part illégitime*, one that does not fall under those conditions.

TABLE OF THE COURSE AND MANAGEMENT OF DIFFERENT KINDS OF LABOURS.

I. Natural Labours;

Or those in which Delivery can be effected without Assistance.

- Head Presenting. (*Four Positions.*)
  - 1. *Occiput towards the Left Acetabulum.* — The head with the chin bent upon the breast clears the brim of the pelvis. Movement of rotation produced by the inclined planes of the pelvis; the occipital protuberance is carried behind the symphysis pubis, and the face towards the hollow of the sacrum.
  - 2. *Occiput towards the Right Acetabulum.* — The head attains the outlet: clears it; the occiput being first disengaged, and the face afterwards, which passes successively along the whole of the hollow of the sacrum. The shoulders enter the brim diagonally; and execute the movement of rotation. The one behind first clears the outlet. The same thing occurs with the nates.
  - 3. *Occiput towards the Right Sacroïliac Symphysis.* — The same course is here followed: except that after the rotary movement, the face passes behind the symphysis pubis, and the occiput into the hollow of the sacrum. The occiput is first extruded;—the face next.

NATURAL LABOURS.—CONTINUED.

	4. *Occiput towards the Left Sacroiliac Symphysis.*	When the chin presents and is turned forwards, the face is first expelled; the head is thrown backwards. This presentation is uncommon. If the chin present and be thrown backwards, natural delivery cannot be effected.
LOWER EXTREMITY PRESENTING. (*Four positions of the Feet, Knees, and Breech.*	1. *Heel, Tibia, or Sacrum towards the left Acetabulum.*	The nates enter the brim diagonally; movement of rotation: the one passes behind the symphysis pubis; the other towards the hollow of the sacrum. The one behind is first extruded.
	2. *Heel, Tibia, or Sacrum towards the Right Acetabulum.*	The same thing happens to the shoulders. The chin is bent upon the chest to clear the brim: movement of rotation: the occiput passes behind the symphysis pubis, and the face towards the hollow of the sacrum. The face clears the outlet first; the occiput last.
	3. *Heel, Tibia, or Sacrum towards the Right Sacroiliac Symphysis.*	The same progress, except that after the movement of rotation, the face is towards the pubis, and the occiput towards the sacrum. The face is here again delivered first.
	4. *Heel, Tibia, or Sacrum towards the Left Sacroiliac Symphysis.*	

II. PRETERNATURAL LABOURS.

1. *Those which require Manual Assistance only.*

I. PRESENTATION OF THE HEAD, UPPER EXTREMITIES, BACK, ABDOMEN, &c.

1. When the labour is without any serious complication, and the head is not in a good position at the brim of the pelvis, endeavours are to be made to place it in its natural position: the hand to be introduced with the fingers united, and the long diameter of the head to be placed diagonally in the brim, if possible. Or the lever may be fixed over the occiput, and, by drawing it down, a closer approximation of the chin and chest may be effected; the position of the head to the pelvis being at the same time attended to.
2. If complicated with syncope, convulsions, hemorrhage, want of uterine action, &c., the feet must be laid hold of, and the child *turned*. For this purpose, empty the rectum and bladder; and turn, if possible, prior to the escape of the liquor amnii. The female may be placed on her back or left side, with the breech over the edge of the bed. Use the right or left hand, according as the feet of the child are to the right or left side of the pelvis; always so introducing the hand, that the child shall be in its palm, and the back of the hand opposed to the inner surface of the uterus. The hand and arm to be introduced during an interval of pain; and they must be flattened and tranquil whilst the uterus is contracting forcibly. If both feet cannot be readily brought down, seize one, and tie a fillet around it.
3. If the toes point to the vertebral column, or to the abdomen of the mother, the head, in its descent, will not enter the pelvis: the chin and occiput will be hitched on the pubis and promontory of the sacrum. In such case, grasp the nates as soon as they have passed the os externum; and, during a pain, endeavour to direct the toes towards either sacro-iliac synchondrosis. When the fingers can be passed along the body of the child, and over the shoulders to the bend of the elbows, draw down the arms successively. When the body is expelled, and the head filling up the brim, the termination of labour must be accelerated by passing two fingers over the shoulder of the child; using moderate and steady extracting power, whilst one finger of the other hand, passed into the mouth, depresses the chin on the sternum. In this way, the head may be extracted.

2. *Those requiring the assistance of appropriate Instruments.*

GENERAL OBSERVATIONS.

If the pains become feeble, or inadequate from any cause;—or if the presenting part be firmly wedged in the pelvis; or the woman be becoming exhausted, instrumental assistance may be required. In all such cases, place the female on the back or left side, empty the bladder and rectum; wait till the os uteri is in a fit state; afford assistance during the pains; introduce the instrument during the intervals between the pains: have the patient on her left side (generally); and extract according to the axes of brim and outlet, as the case may be.

1. *Short Forceps*.....

Apply these to the sides of the head of the child, so that the ears and parietal protuberances may be within the fenestræ. Introduce the left-hand blade first; the index and middle fingers of the right hand guiding it to the ear. With the right hand pass the other in an opposite line, corresponding with the course of the first blade, guided by the fore and middle fingers of the left hand; the third and little fingers being employed to retain the lefthand blade in place; humour the instrument so as to allow the blades to lock. The handles may now be tied gently together. The force used must be from blade to blade, with a gentle, tractile effort.

2. *Long Forceps*.....

Applicable where the head has not entered the brim. The long forceps must be applied, in most cases, over the occiput and face of the child, so that the convex edges of the blades may be towards the hollow of the sacrum. When used, the power may be exerted from side to side, with moderate traction.

3. *Lever* or *Vectis*.....

The lever is applicable to the same cases as the forceps. It must not be used strictly as a lever, but as a hook with which to draw downwards. It may be applied to any part of the head, but is generally hitched on the occiput.

4. *Fillet* and *Blunt Hook*.....

In certain cases of breech and knee presentation, where the hand is sufficient, it may be necessary to pass over the joint a fillet, or the blunt hook, with which to exert some force of traction. The operation is very simple.

PRETERNATURAL LABOURS.—CONTINUED.

EMBRYULCIA.....

Disproportionate size of head, or distorted or deformed pelvis, may require the child to be destroyed, and its bulk lessened; or the Cæsarean section or symphysotomy, or the induction of premature labour may be called for.

The instruments, required here, are the *Perforator*, *Crotchet*, and *Craniotomy Forceps*. Make a steady pressure on the abdomen; pass two fingers of the left hand up to the head: feel for a suture or fontanel; introduce the perforator and bore through, until the progress of the instrument is arrested by its *shoulders*. Open the handles, and turn the instrument in different directions, so that the opening may be large enough to admit the perforator, with which the brain must be broken down.

If, after this, delivery cannot be accomplished without further aid, pass up the craniotomy forceps; open the handles slighly, and introduce the blade without teeth within the cranium. On closing the forceps, a hold is obtained; and a tractile force can now be exerted during the pains, and the extrusion of the child be effected.

Should great difficulty exist at the brim, the bones at the top of the head may have to be removed, until the base alone remains. The chin must then be brought through first.

The crotchet is often used instead of the craniotomy forceps, being passed into the opening made by the perforator, and hooked upon some bony projection in the interior of the skull; but it is not a good instrument. In presentations of the face demanding perforation of the cranium, the perforator should be introduced just above the nose, in the sagittal suture.

When it is necessary to open the head after the lower extremities have been expelled, the perforation must be made behind the ear.

SYMPHYSOTOMY AND CÆSAREAN SECTION.

In cases of great narrowness of the pelvis, the operation of *Symphysotomy* has been adopted by French practitioners,—rarely by British or American; and, in extreme cases, recourse has been had to the *Cæsarean Section*.

SEPARATION OF THE HEAD OF THE FŒTUS FROM THE BODY.

If the body of the fœtus has been forcibly separated, and the head left in the uterus, it must be laid hold of with one hand, and the forceps be applied; or the head be opened and delivered, as under embryulcia. Should the head have been brought away, and the body left behind, the feet must be brought down.

INDUCTION OF PREMATURE LABOUR.

In cases of narrowness of the pelvis, where the fœtus, at the full term, cannot be born alive, delivery may be brought about at an earlier period, or as soon as the child is capable of carrying on its functions independently of the mother.

The most advisable plan for accomplishing this object is merely to pass the finger round and round within the os and cervix uteri, so as to detach the decidua:—the membranes being thus left entire, and the life of the child not so much endangered, as where the membranes are punctured, and the waters evacuated. Parturition usually follows within forty-eight hours.

The laying of eggs by animals — *Ora'tion*—is called, in French, *Ponte*. The term has been applied to the periodical discharge — *Ponte périodique* — of ova, (F.) *Chute des Œufs*, which is supposed to take place from the ovaries at each menstrual period.

PARTURITION, DRY, Partus siccus.

PARTURIUM VANUM, *Fausse couche*.

PARTUS, gen. *Partûs*, (*parere, partum*, 'to bring forth,') Parturition — p. Abactio, Abortion — p. Abactus, Abortion — p. Cæsarcus, Cesarean section — p. Difficilis, Dystocia — p. Laboriosus, Dystocia, Laborious labour — p. Præcox, Parturition (premature) — p. Præmaturus, Parturition (premature)—p. Serotinus, Opsiotocia.

PARTUS SIC'CUS, *Dry la'bour* or *parturit'ion*. Labour, which is neither preceded nor attended by a discharge of the liquor amnii.

PARU'LIS, (παρουλις, from *para*, and *ουλον*, 'the gum.') *Aposte'ma paru'lis* seu *paroul'is*, *Phleg'monē Paru'lis*, *Gumboil*, *Alve'olar abscess*, (F.) *Parulie*. Small abscesses are so called which generally form in the alveoli and involve the gums, sometimes without any known cause, but which often depend upon carious teeth.

PARU'RIA, (*para*, and *ουρεω*, 'I pass urine.') Morbid secretion or discharge of urine.

PARURIA INCONTINENS, Enuresis — p. Incontinens aquosa, see Diabetes — p. Inops, Ischuria, false — p. Mellita, Diabetes — p. Retentionis, Ischuria—p. Retentionis renalis, Ischuria — p. Retentionis vesicalis, Retention of urine — p. Stillatitia, Strangury — p. Stillatitia mucosa, Cystirrhœa.

PARVITAS MORBOSA PARTIUM ORGANICARUM, 'morbid smallness of organic parts,' Microtesia.

PAR'YGRON, (παρυγρον, from *para*, and *'υγρος*, 'humid.') A liquid or moist preparation for allaying topical inflammation.

PAS, (from [L.] *passus*,) Step—*p. d'Âne*. Tussilago, Speculum oris — *p. de Lion*, Helleborus fœtidus.

PASMA, gen. *Pasm'atis*, (*κασσειν*, 'to sprinkle,') Catapasma.

PASQUE FLOWER, (from flowering about Easter,) Anemone pulsatilla.

PASSA, (*patior, passus*, 'to suffer,') Paronychia.

PASSÆ CORINTHIACÆ, (*passus*, 'dried,') see Vitis Corinthiaca.

PASSAGE, Dejection.

PASSAGES, DIGESTIVE, Ways, digestive — p. Second, Ways, second.

PASSAMBIO, Rio vinaigro.

PASSE-FLEUR, Anemone pulsatilla.

PASSE-PIERRE, ('pass stone,') Crithmum maritimum.

PASSERAGE, Iberis amara—*p. Sauvage*, Cardamine pratensis.

PASSERI'NA TARTONRAIRA, (from *passer*, 'a sparrow,' alluding to the beaked seed,) (F.) *Passerine de Tarton-raire*, *Tarton-raire*, *Gros Retombet*, *Trintanelle Malherbe*. *Family*, Daphnoideæ. A plant, whose bark is possessed of epispastic properties. An ointment, prepared like that of Mezereon, is said to possess more activity than the latter.

PASSERINE DE TARTON-RAIRE, Passerina tartonraira.

PASSIBILITY, GREAT, (*patior, passus*, 'to suffer,' and *habilis*, 'able,') Hyperæsthesis.

PASSIF, Passive.

PASSIFLO'RA LAURIFO'LIA, (*passio*, 'passion,' and *flos*, gen. *floris*, 'a flower,') *Bayleaved Pas'sion flow'er*. *Ord.* Passifloreæ. A native of Surinam. The fruit has a delicious smell and flavour, and quenches thirst, abates heat of the stomach, increases the appetite, &c.

PASSIFLORA MALIFOR'MIS, *Appleshaped Gra'nadil'la*. The fruit of this species is esteemed a delicacy in the West Indies, where it is served up at table in desserts.

Some of the genus are said to possess narcotic and emetic properties.

PASSIO, (*patior, passus*, 'to suffer,') Disease, Passion—p. Æmoptoica, Hæmoptysis—p. Cadiva, Epilepsy—p. Cardiaca, Cardialgia—p. Cholerica, Cholera — p. Cœliaca, Cœliac flux — p. Felliflua, Cholera — p. Hæmoptoica, Hæmoptysis — p. Hypochondriaca, Hypochondriasis — p. Hysterica, Hysteria — p. Iliaca, Ileus — p. Ischiadica, Neuralgia femoropoplitæa—p. Pleuritica, Pleuritis—p. Stomachica, Dyspepsia—p. Ventriculosa, Cœliac flux—p. Vomicoflua, Phthisis pulmonalis.

PASSION, *Pas'sio, An'imi Pathe'ma, Affec'tus, Emo'tio.* An active affection or emotion of the mind; as rage, terror, love, hatred, &c.

Passion Flower, Bayleaved, Passiflora laurifolia—*p. Hystérique*, Hysteria—p. Iliac, Ileus.

PASSIONES (pl. of *passio*) ANIMI, Affections of the mind.

PAS'SIVE, *Passi'vus*, (F.) *Passif.* An epithet for diseases which seem owing to a greater or less diminution of the strength, or which are without apparent reaction. Thus, passive hemorrhages are such as supervene in debilitated individuals, or under conditions in which increased action of the arteries can scarcely be presumed. The term *passive* has, also, been given to aneurisms of the heart with extenuation of the parietes; in opposition to *active* aneurisms, with thickness of the parietes—hypertrophy.

PASSULÆ MAJORES, (dim. of *passæ* [*uvæ*,]) see Vitis vinifera — p. Minores, see Vitis Corinthiaca.

PASSULA'TUM. A medicine in which the pulp of raisins or currants is a chief ingredient.

PASSUS, (*pandere, passum*, 'to extend,') Step.

PAS'SY, MIN'ERAL WA'TERS OF. This village is in the vicinity of Paris. There are several springs, containing sulphates of lime, iron, and magnesia, alum, common salt, carbonate of iron, carbonic acid, &c. They are employed as a tonic and astringent.

PASTA, (παστη,) Paste — p. de Althææ, Paste, marshmallow — p. Amygdalina, Confection (almond) — p. Caustica Viennensis, see Powder, Vienna — p. de Dactylis, Paste, date — p. Emulsiva, Confection (almond).

Pasta Glycyrrhi'zæ Gumma'ta et Anisa'ta seu *Mas'sa de extrac'to glycyrrhi'zæ.* A compound of *Extract of liquorice, Gum Senegal, Sugar, Florence orris-root,* and *Volatile oil of aniseed.* Demulcent.

Pasta de Jujubis, Paste of jujubes—p. Regia, Confection (almond).

Pasta Zin'ci Chlo'ridi, (F.) *Pâte de Canquoin, Paste of Chlo'ride of Zinc, Canquoin's Caus'tic Paste.* This paste is made of three strengths, consisting, respectively, of *Chloride of zinc*, 1 part; *Wheaten flour*, parts 4, 3 and 2; *Water*, sufficient to make a paste. This caustic destroys the part in a direct ratio with the thickness of the layer applied.

PASTE, *Pas'ta*, (F.) *Pâte.* A viscid, tenacious mixture. Also, a compound medicine, like the pastil, but less consistent, flexible, less saccharine, and more mucilaginous. Pastes of opium, &c., are used by the dentist in dental caries to relieve pain; and similar preparations of astringents and aromatics are applied to the gums, to give tone to them, and improve the breath. See Dentifrice.

A convenient paste for attaching labels to glass, or for other services, is made of *gum tragacanth* and *water*, to which *alum* is added. This the author always keeps by him. Another form is to make a solution of *Gum Arabic*, ℥j, *Boiling water*, f℥ij, and *Glycerin*, f℥ij; and another is made by mixing powdered *Gum Arabic*, and powdered *Tragacanth*, of each ℥ss, *Water*, f℥iss, *Acetic acid*, ♏xx.

Paste, Cagliari, see Turundæ Italicæ.

Paste of Chloride of Zinc, Pasta Zinci chloridi.

Paste, Date, *Mas'sa* seu *Pas'ta de dac'tylis.* Composed of *dates, sugar, gum Arabic, water*, and *orange-flower water.*—Ph. P. Demulcent.

Paste of Ice'land Moss, *Pas'ta Liche'nis*, (F.) *Pâte de lichen.* A paste made by boiling lichen Islandicus to a proper consistence, and adding gum Arabic and sugar.

The *Pâte de Lichen opiacée* contains opium in addition; about ½d of a grain to an ounce.

Paste, Italian, see Turundæ Italicæ.

Paste of Ju'jubes, *Pas'ta de ju'jubis, Mas'sa de zizypho'rum fruc'tu*, (F.) *Pâte de Jujube.* Composed of *jujubes, gum Senegal, sugar, water*, and *tincture of lemon-peel.* Demulcent.

Paste, Marshmal'low, *Mas'sa de gum'mi Arab'ico, Pas'ta de althæ'â*, (F.) *Pâte de Guimauve.* A compound of *Gum Arabic, Sugar, White of egg*, and *Orangeflower water.*—Ph. P. It is demulcent.

Paste, Tooth, see Dentifricium — p. Vienna, see Powder, Vienna—p. Ward's, Confectio piperis nigra.

PASTEL, (dim. of *pasta,*) Isatis tinctoria.

PASTÈQUE, Cucurbita citrullus.

PASTIL, *Pastil'lus, Avic'ula Cyp'ria, Cande'la fuma'lis, Phtho'is, Phthois'cus*, (dim. of *pasta.*) A compound of aromatic substances in various shapes; used as a fumigating material when set fire to. See Fumigation.

The French use the term *Pastille*, (L.) *Pastil'lus*, for a solid, dry, round, oblong, square, or triangular compound, whose base is essential oil, and sugar the excipient. These pastilles are in fact small lozenges, and only differ from the *tablette* in their lesser size. They are termed, also, *Saccharolés solides.*

PASTILLE, see Pastil.

PASTILLES DIGESTIVES D'HAUTERIVE-VICHY, see Trochisci Sodæ bicarbonatis —p. Fumigating, see Fumigation — *p. de Renaudot*, see Pilulæ de Hydrargyro, Scammonio et Aloe — *p. de Vichy*, see Trochisci Sodæ bicarbonatis.

PASTILLI DIGESTIVI DARCETII, see Trochisci Sodæ bicarbonatis — p. Emetinæ Pectorales, Trochisci emetinæ pectorales.

Pastilli de Men'thâ Piperi'tâ, *Pep'permint drops.* (*Sacch. alb., Aquæ menthæ pip., Aq. destillat.* ää ℥ij. Boil to the consistence of an electuary. Take of fine *White sugar* in powder, ℥iv; *Volatile oil of peppermint*, ℥ss. Mix, and add the electuary whilst warm. Drop it then on marble, and dry the *drops.*—Ph. P.)

PASTILLUS, Pastil.

PASTINACA ALTISSIMA, (dim. of *pasta*, from *pastus*, 'food,') P. opoponax — p. Anethum, Anethum graveolens — p. Graveolens, Anethum graveolens—p. Opaca, P. sativa.

Pastina'ca Opop'anax. *Ord.* Umbelliferæ. The name of the plant which furnishes the *Opoponax.* The plant, whence the gumresin is obtained, has, also, been called *Fer'ula opop'onax* seu *opop'anax, Pastina'ca altiss'ima, Laserpil'lum* seu *Seli'num chiro'nium, Opopana'cum, Pa'nax heracle'um* seu *costi'num, Pastina'cea, Ky'na, Hercules allheal, Opop'anaxwort.*

Opop'anax, Opopana'cis gummiresi'na, Opop'onax, Ge'zir, Pop'anax, Gum'mi Pan'acis, exudes from the roots when wounded. Its odour is strong and peculiar: taste, bitter and acrid. It is met with in the shops, in lumps of a reddish-yellow colour without; white within. It has been recommended as an antispasmodic and emmenagogue; but is seldom used. Dose, gr. x, to ℈j, in powder.

Pastinaca Pratensis, P. sativa.

Pastinaca Sati'va, *Elaphobos'cum, Pastina'ca*

sylves'tris seu *opa'ca* seu *praten'sis*, *Ane'thum* seu *Seli'num pastina'ca*, *Ban'ica*, *Gar'den parsnep*, (F.) *Panais*. The root is sweet and nutritious, and is in esteem as an article of food. It has been used as a diuretic and demulcent in calculous affections, &c.

PASTINACA SYLVESTRIS, P. sativa — p. Sylvestris tenuifolia officinarum, Daucus carota.

PATATE, ([S.] *batata*,) Convolvulus batatas.

PATCHOULI, Pogostemon patchouli.

PÂTE, (old [F.] *paste*,) Paste — *p. Arsénicale*, Arsenical paste—*p. de Canquoin*, Pasta Zinci chloridi—*p. Caustique de Vienne*, Powder, Vienna—*p. de Guimauve*, Paste, marshmallow — *p. du Jujube*, Paste of Jujubes.

PATEL'LA, *Rot'ula*, *R. ge'nu*, *Epigon'atis*, *Epigon'tis*, *Acromy'lē*, *Epigon'nis* seu *Epigu'nis* seu *Epig'onis*, *Mo'la* seu *Con'cha* seu *Oc'ulus* seu *Or'bis* seu *Scu'tum ge'nu*, *Os scutifor'mē* seu *disciformē* seu *thyreoï'des*, *Supergenua'lis*, *Caucaloï'des*, *My'lacris*, *My'lē*, *Gam'ba*, *Oleeranon mob'ilē*, (Prov.) *Copbone*, (F.) *Rotule*. (Diminutive of *patera*, 'a bowl,' so called from its shape.) A sort of sesamoid, flat, short, thick, rounded bone, situate in front of the knee, and enveloped in the substance of the tendon common to the extensor muscles of the leg. The posterior surface of the patella is divided into two *facettes*, united angularly, which are encrusted with cartilages, and each of which is articulated with one of the condyles of the femur. The patella is developed by a single point of ossification. When the patella is fractured, it is difficult to produce bony union. This can only be accomplished by keeping the fractured extremities closely in apposition.

PATELLA, Cup — p. Fixa, Oleeranon.

PATENCY OF THE FORAMEN OVALE, (from *pateo*, 'to be open,') see Cyanopathy.

PAT'ENT MED'ICINE, (F.) *Médecine brevetée* ou *patentée*, *Remède breveté* ou *patenté*. A medicinal compound, for the sale of which the proposer obtains from government an exclusive privilege. A specification of his *invention* must be registered in the Patent Office, and, hence, it differs from a secret medicine.

PATER OMNIUM VIVENTIUM, ('father of all living,') Penis.

PATERA DIOGENIS, (*patera*, 'a flat dish,') Palm.

PÂTEUX, (from *pâte*,) Clammy.

PATHEMA, (*παθημα*,) Affection, Disease.

PATHEMATOLOGY, (*pathema*, gen. *pathe'matis*, and *λογος*, 'a discourse,') Pathology.

PATHET'IC, *Pathet'icus*, *Pathétique*, (*παθητικος*, from *pathos*.) That which moves the passions. A name given to the superior oblique muscle of the eye, and, also, to the 4th pair of nerves.

PATHETIC MUSCLE, Oblique, superior, of the eye.

PATHETIC NERVE, *Ner'vus Pathet'icus* seu *trochlea'ris* seu *trochleuto'rius* seu *trochlea'tor*, the 4th *pair of nerves*, *Par quar'tum*, (F.) *Oculo-musculaire interne* (Ch.), *Nerf pathétique*, is the smallest encephalic nerve. It arises behind the inferior part of the tubercula quadrigemina (*testes*) at the lateral parts of the valvula Vieussenii. Its roots unite into one thin round cord, which makes a turn upon the peduncles of the brain, and passes into a canal of the dura mater, near the posterior clinoid process. It enters the orbit by the broadest part of the sphenoidal fissure, and terminates in the superior oblique muscle of the eye, by dividing into several filaments.

PATHÉTIQUE, Pathetic.

PATHETISM, Magnetism, animal.

PATHIC, (from *pathos*,) Morbid.

PATHICAL, Morbid.

PATHICUS, Morbid.

PATHNE, (*παθνη*,) Alveolus.

PATHOGENET'IC, *Pathogenet'icus*; *Pathogen'icus*, (*pathos*, and *γενεσις*, 'generation.') Relating to pathogeny.

PATHOGENETIC PHYSIOL'OGY, *Physiolog''ia pathogenet'ica*. That part of physiology which relates to the origin of disease.

PATHOGENICUS, Pathogenetic.

PATHOG''ENY, *Pathogen'ia*, *Nosogen'esis*, *Nosogen'ia*. The branch of pathology which relates to the generation, production and development of disease.

PATHOGNOMON'IC, *Pathognomon'icus*, *Sig'num conjunc'tum* seu *characteris'ticum* seu *mor'bi essentia'lē*, (*pathos*, and *γινωσκω*, 'I know.') A *characteristic symptom* of a disease.

PATHOG'RAPHY, *Pathograph'ia*, (*pathos*, and *γραφω*, 'I describe.') A description of disease.

PATHOLOGIA, Pathology — p. Humoralis, Humorism — p. Solidaris, Solidism.

PATHOLOG''ICAL, *Patholog''icus*, *Pathol'ogus*, (F.) *Pathologique*. Relating to pathology. Often used in the sense of pathical.

PATHOLOGICAL ANATOMY, see Anatomy.

PATHOL'OGIST, *Pathol'ogus*, (from *pathos*, and *λογος*, 'a discourse.') One versed in pathology.

PATHOL'OGY, *Pathematol'ogy*, *Patholog''ia*, *Pathematolog''ia*, *Patholog''icē*, (*παθολογικη* (*τεχνη*).) The branch of medicine whose object is the knowledge of disease. It has been defined *diseased physiology*, and *physiology of disease*. It is divided into *general* and *special*. The *first* considers diseases in common; — the *second* the particular history of each. It is subdivided into *internal* and *external*, or *medical* and *surgical*.

PATHOLOGY, HUMORAL, Humorism.

PATHOMA'NIA, *Paraputhi'a*, *Mor'al Insan'ity* (*pathos*, and *mania*.) *Ma'nia sine Deliv'io*. A morbid perversion of the natural feelings, affections, inclinations, temper, habits, moral disposition, and natural impulses, without any remarkable disorder or defect of the intellect or knowing and reasoning faculties, and particularly without any insane hallucination.

PATHOMYOTOM'IA, (*pathos*, *μυς* or *μυων*, 'muscle,' and *τομη*, 'incision.') The title of a work by Dr. John Bulwer (1649), being "a dissection of the significative muscles of the affections of the mind."

PATHOPTRIDALGIA, (*pathos*, *πατρις*, 'one's fatherland,' and *αλγος*, 'pain,') Nostalgia.

PATHOPOËT'IC, *Pathopoët'icus*, (F.) *Pathopoétique*, (from *pathos*, and *ποιειν*, 'to make.') Producing disease.

PATHOS, (*παθος*,) Affection, Disease.

PATIENCE, Rumex patientia—*p. d'Eau*, Rumex hydrolopathum—p. Garden, Rumex patientia—*p. Rouge*, Rumex sanguineus—*p. Sauvage*, Rumex acutus.

PATIENT, (*patior*, 'to suffer,') see Sick.

PATIENT OF DEATH, Agony.

PATIENTIA, Rumex patientia.

PATIENTIÆ MUSCULUS, Levator scapulæ

PATNE, (*πατνη*,) Alveolus.

PATOR NA'RIUM, (*pateo*, 'to be open.') The cavity or the opening of the nostrils.

PATRATIO, (from *patrare*, *patratum*, 'to accomplish,') Coition, Ejaculation, (of sperm.)

PATRINIA JATAMANSI, (after E. L. M. Patrin, a naturalist and traveller of Lyons.) Nardus Indica.

PATTE D'OIE (F.), 'Goose's foot.' An aponeurotic expansion, which covers the internal surface of the tibia at its upper part, and consists of the expansion formed by the tendons of the sartorius, gracilis, and semi-tendinosus muscles

PATURSA, Syphilis.

PAU, CLI'MATE OF. Pau is the capital of the department of the Lower Pyrenees, and is about 150 miles from Bordeaux, and 50 from Bayonne. The climate corresponds with that of the southwest of France generally; its great

quality is the comparative mildness of its spring, and exemption from cold winds. It is regarded as a favourable winter residence for invalids labouring under chronic affections of the mucous membranes. It is too changeable for the consumptive; and to be avoided by the rheumatic.

PAULLIN'IA, (after S. Pauli, Prof. of Botany at Copenhagen.) This is an extract from a plant of the same name in Brazil. It is prepared by the Indians, and appears to possess excitant powers. In Brazil, and the neighbouring countries, it is given in the form of tisane—the powder being mixed with cocoa — in diarrhœa and dysentery. It has been employed also as a tonic. An extract is prepared in Brazil from *Paullinia sor'bilis, Ord.* Sapindaceæ, known there under the name of *Guarana*, which is administered in similar pathological cases.

PAUME DE LA MAIN, Palm.

PAUNCH, (from *pantex*, pl. *pan'tices*,) Inguvies.

PAUONTA, (*παυειν*, 'to allay,') Sedatives.

PAUPIÈRE, Palpebra.

PAUSIME'NIA, (*παυσις*, 'cessation,' and *μηνες*, 'menses.') Cessation of the menses.

PAUSIS, (*παυσις*,) Sedation.

PAVANA WOOD, Croton tiglium.

PAVANNE, Laurus sassafras.

PAVIL'ION. The French give the name *pavillon*, (L.) *Papilio*, 'a canopy,' to the expanded extremity of a canal or cavity,—for example, of a catheter, sound, &c.

PAVILION OF THE EAR, *Auric'ula*, *Pin'na*, *O'tium*, *A'la*, (F.) *Auricule* ou *Oricule*, *Pavillon de l'oreille*, is seated behind the cheeks, beneath the temple, and anterior to the mastoid process. Its size varies in individuals. It is free above, behind, and below. Anteriorly and within, it is continuous with the neighbouring parts. Its outer surface has several prominences, the *He'lix*, *Ant'helix*, *Tra'gus*, *Antit'ragus*, and *Lobe*; and several cavities — the *groove of the He'lix*, the *Fos'sa navicula'ris* seu *scaphoides*, and the *Con'cha*. The skin which covers the pavilion is very fine, and studded with a number of sebaceous follicles. The auricle is fixed to the head by three fibro-areolar ligaments; — a *superior*, *anterior*, and *posterior*.

PAVILLON DE L'OREILLE, Pavilion of the ear—*p. de la Trompe*, see Tuba Fallopiana.

PAVIMENTUM CEREBRI, ('pavement of the brain,') Base of the brain.

PAVINA, Æsculus hippocastanum.

PAVITA'TIO, *Tre'mor*, (*pavitare*, *pavitatum*, 'to tremble from fear.') Trembling from fright.

PAVOR (L.), Dread. Great fright. Panophobia.

PAVO'RES NOCTUR'NI seu DORMIEN'TIUM. Fear during sleep.

PAVOT, Papaver.

PAW, ([F.] *patte*, (W.) *pawen*, 'a foot,') Manus.

PAWPAW, see Carica papaya.

PAXWAX, see Nucha.

PAXYWAXY, see Nucha.

PAZAHAR, Bezoar.

PEA, ([F.] *pois*,) Pisum—p. Garden, Pisum—p. Ground Squirrel, Jeffersoniana Bartoni — p. Hoary, Galega Virginiana — p. Love, Abrus precatorius—p. Nut, Arachis hypogea—p. Partridge, Cassia chamæcrista — p. Turkey, Galega Virginiana.

PEACH, (from Persicum, corr. from Persicum, 'Persian,') see Amygdalus Persica—p. Brandy, see Amygdalus Persica—p. Tree, Amygdalus Persica —p. Wood, see Cæsalpinia.

PEAGLE, Primula veris.

PEAR, ([Sax.] pera, [L.] *pirum*,) see Pyrus malus — p. Alligator, Persea gratissima — p. Anchovy, Grias cauliflora—p. Avocado, Persea gratissima.

PEARL, ([Sax.] pærl,) *Per'la*, *Mar'garon*, *Margari'ta*, *Margel'lium*, *Marge'lis*, *U'nio*, (F.) *Perle*. A roundish concretion of a silvery white colour, and brilliant polish, found in several shells, and especially in the *Avic'ula margaritif'era*, which has, hence, been called *Ma'ter perla'rum*, *Margari'ta*, and *Mother of pearl*, and is much used in the fabrication of handles for surgical instruments, &c. Pearls were formerly given in powder as astringents and antacids. They consist of lime and an animal matter.

PEARL ASH, Potash of commerce.

PEARL, MOTHER OF, see Pearl — p. White, Bismuth, subnitrate of.

PEAU, (from *pellis*,) Cutis—*p. Divine*, Condom.

PEAUCIER, (from *pellis*,) Platysma myoides.

PECAN or PECCAN NUT, see Hickory.

PEC'CANT, *Pec'cans*, (*peccare*, 'to sin.') Morbid, not healthy. An epithet given by the humourists to the humours when erring in quality or quantity. See Materia Morbosa.

PECHAN, Stomach.

PÊCHE, Peach, see Amygdalus Persica.

PECHEGUERA. A pulmonary disease affecting children three or four months old in South America, which is promptly fatal.

PÊCHER, Amygdalus Persica.

PECHIAGRA, Pechyagra.

PECHING, Anhelatio.

PECHU'RIM seu PICHU'RIM CORTEX. A highly aromatic bark, the produce of a species of laurus. It is extremely fragrant, like cinnamon, which it greatly resembles in its properties. In Portugal it is used in the cure of dysentery, &c. See Pichurim beans.

PECHY'AGRA, *Pechi'agra*, *Ancon'agra*, (*πηχυς*, 'the elbow,' and *αγρα*, 'a seizure.') Gout affecting the elbow.

PECHYS, (*πηχυς*,) Elbow.

PECHYTYRBE, Porphyra nautica.

PECKISH, ('disposed to peck,') (Prov.) Hungry.

PECTE, (*πηκτη*,) Cheese.

PECTEN, gen. *Pec'tinis*, ('a border, a row,') Pubes. Also, a comb.

PECTEN DENTIUM, see Sepes—p. Veneris, Scandix cerefolium.

PEC'TIN, (*πηκτος*, 'coagulated, curdled.') A name given by Braconnot to a principle which forms the basis of vegetable jelly. It is extensively diffused in the juices of pulpy fruits and roots, especially when they are mature; and occasions these juices to coagulate when they are mixed with alcohol or boiled with sugar.

It is the basis of one of the classes of elementary principles of Dr. Pereira—the *pectinaceous*.

PECTINACEOUS, Pectinous.

PECTINA'LIS, (*pecten*, gen. *pec'tinis*, 'the pubes;') *Pectinæ'us*, *Mus'culus liv'idus*, *Pectina'tus*, (F.) *Pubio-fémoral*, *Suspubio-fémoral* (Ch.), *Pectiné*. This muscle is situate at the inner and upper part of the thigh. It is long, flat, and triangular; is attached, above, to the space which separates the iliopectineal eminence from the spine of the os pubis; and, below, by a flat tendon, to the oblique line which descends from the lesser trochanter to the linea aspera. The pectinalis bends the thigh on the pelvis, and carries it outwards in adduction and rotation. It may also bend the pelvis on the thigh.

PEC'TINATED, *Pectina'tus*, *Pec'tiniform*, *Pec'tinate*, (F.) *Pectiné*, (from *pecten*, gen. *pectinis*, 'a comb.') Having the shape of the teeth of a comb.

PECTINATED MUS'CLES, *Pectina'ti mus'culi*. The fascicular texture observed in the right auricle of the heart: — *Mus'culi Auric'ulæ Pectina'ti*. Their main use probably is to prevent the over dilatation of the auricles.

PECTINATUS, Pectinalis.

PECTINÉ, Pectinalis, Pectinated.

PECTINEUS, Pectinalis.

PECTINIFORM, (*pecten*, 'a comb,' and *forma*, 'shape,') Pectinated.

PECTINOUS, *Pectina'ceus, Pectino'sus, Pectina'ceous*, (from *pectin.*) Of or belonging to pectin or vegetable jelly,—as a *pectinous* or *pectinaceous* vegetable principle.

PEC'TORAL, (*pectus*, 'the breast.') Relating to the breast. See Pectorals.

PECTORAL, GRAND, Pectoralis major.

PECTORALE, Corset.

PECTORALIS INTERNUS, Triangularis sterni.

PECTORA'LIS MA'JOR, *Pectora'lis, Sternocleidobrachia'lis*, (F.) *Sterno-costo-clavio-humeral, Sterno-huméral* (Ch.), *Grand Pectoral.* A large, flat, triangular muscle, situate at the anterior part of the chest, before the axilla. It is attached, on the one hand, by means of aponeurotic fibres, to the inner half of the anterior edge of the clavicle; to the anterior surface of the sternum, and to the cartilages of the first six true ribs;—on the other, by a strong tendon, which is inserted at the anterior edge of the bicipital groove of the humerus. The use of this muscle is to move the arm in various directions. If it be hanging by the side of the body, it carries it inwards and a little forwards. When the arm is raised, it depresses it and carries it inwards. It can, also, move it in rotation inwards. If the humerus be raised and fixed, the pectoralis major draws the trunk towards the upper extremity.

PECTORALIS MI'NOR, *Serra'tus anti'cus mi'nor*, (F.) *Costo-coracoïdien*, (Ch.), *Petit Pectoral, Petit dentelé antérieur.* This muscle is situate beneath the preceding, at the anterior and upper part of the chest. It is flat and triangular; is attached by its base, which appears digitated, to the upper edge and outer surface of the 3d, 4th, and 5th true ribs, and is inserted at the anterior part of the coracoid process. The pectoralis minor draws the scapula forwards and downwards, and makes it execute a rotatory motion, by virtue of which its inferior angle is carried backwards, and the anterior depressed. When the shoulder is fixed, it elevates the ribs to which it is attached, and aids in the dilatation of the chest.

PEC'TORALS, *Pectora'lia, Thorac''ica.* Medicines considered proper for relieving or removing affections of the chest.

PECTORAL DROPS, BATEMAN'S, consist chiefly of *tincture of castor*, with some *camphor* and *opium*, flavoured by *aniseed.* Gray gives the following formula: *Castor*, ℥j; *Ol. anisi*, ℥j; *Camph.* ℥v; *Cocci*, ʒiss; *Opii*, ʒvj; *Proof spirit*, a gallon.

A form, advised by a committee of the Philadelphia College of Pharmacy, is the following:—*Alcohol. dil.* cong. iv; *Santal. rubr. ras.* ℥j; digere per horas xxiv; cola, et adde *Pulv. opii, Pulv. catechu. Camphoræ*, āā ℥ij; *Ol. Anisi*, ʒiv. Digest for ten days.

PECTORILOQUE, (*pectus*, 'the breast,' and *loqui*, 'to speak.') One, according to Laënnec, who presents the phenomenon of *Pectoriloquism.* Also, a stethoscope.

PECTORILOQUIE, Pectoriloquy—*p. Chévrotante*, Egophony.

PECTORILOQUOUS BRONCHOPHONY, see Pectoriloquy.

PECTORIL'OQUY, *Pectoril'oquism, Cav'ernous voice, Pectorilo'quia*, (F.) *Pectoriloquie, Voix caverneuse, V. articulée.* Speech or voice coming from the chest. Laënnec has designated, by this name, the phenomenon often presented by consumptive individuals, when their chests are examined with the stethoscope. The voice seems to issue *directly* from the chest, and to pass through the central canal of the cylinder,—a phenomenon owing to the voice resounding in the anfractuous cavities, produced in the lungs by the suppuration or breaking down of tubercles, which constitute *abscesses* or *ulcers of the lungs.* By some, it is not separated from bronchophony, having been termed, at times, *strong bronchophony*, and *pectoril'oquous bronchophony.* See Laryngophony. *Whisp'ering pectoriloquy* is that produced by the whispering of the patient.

PECTORO'SUS, (from *pectus.*) One who has a broad chest.

PECTUS, gen. *Pec'toris.* Sternum, Thorax—p. Carinatum, see Carina and Lordosis.

PECULIUM, ('private property,') Penis.

PEDAGRA, Potassæ supertartras impurus.

PE'DAL, *Peda'lis, Podal'ic, Podal'icus*, (*pes*, gen. *pedis*, 'the foot.') Relating to the foot:—as

PEDAL APONEURO'SIS, (F.) *Aponévrose pédieuse.* A thin, aponeurotic layer, which invests the extensor brevis digitorum pedis, and separates the tendons of the foot from each other.

PEDBELLY (Prov.), Physconia.

PÉDÉRASTIE, Pæderastia.

PEDESIS, (πηδησις, from πηδαω, 'to leap,') Pulsation.

PEDETHMOS, (πηδηθμος,) Pulsation.

PEDIAL'GIA, *Pedional'gia, Pedioneural'gia*, (*pedion*, and αλγος, 'pain.') Pain in the side of the foot. Neuralgia of the foot in general. An affection of this kind, under the name *Pédionalgie*, prevailed in 1762 at Savigliano in Piedmont, and in 1806 amongst the military at Padua.

PEDICEL, Pedicle.

PEDICELLATED, Pediculated.

PÉDICELLÉ, Pediculated.

PED'ICLE, *Ped'icel, Pedic'ulus*, (F.) *Pédicule*, (dim. of *pes*, gen. *pedis*, 'a foot.') A slender stalk; also, the narrow portion of a part of a tumor for example,—from which it was developed, and is supported.

PEDICLE, VITELLINE, see Vesicula umbilicalis.

PEDICULARIA, (from *pediculus*,) Delphinium staphisagria.

PED'ICULATED, *Ped'icellated, Pedicula'tus, Pedicella'tus*, (F.) *Pédiculé, Pédicellé.* Supported by a pedicle.

PEDICULATIO, (from *pediculus*,) Phtheiriasis.

PÉDICULE, Pedicle.

PÉDICULÉ, Pediculated.

PEDIC'ULUS, *Pedun'culus, Phtheir, Louse*, (Prov.) *Bid'dy*, (F.) *Pou*, (dim. of *pes*, gen. *pedis*, 'a foot,' from its having many feet.) A genus of parasitic insects. The human body is infested by five kinds: the *Bod'ylouse*, or *Clotheslouse, Pedic'ulus vestimen'ti*, (F.) *Pou de corps;* the *Headlouse, Pedic'ulus cap'itis*, (F.) *Pou de la tête*, which lives in the hair; the *Crablouse, Mor'pio, Fera'lis pedic'ulus, Plat'ula, Phthi'rius inguina'lis, Pedic'ulus Pu'bis*, (F.) *Morpion*, which infests the hair of the pubes. Infusion of tobacco, or mercurial ointment, or ointment of white precipitate, or of red precipitate of mercury, readily destroys them. The louse occurring in phtheiriasis, *pediculus tabescen'tium*, is said to differ from the common louse. Also, a pedicle.

PEDICULUS CAPITIS, see Pediculus—p. Pubis, Crab-louse—p. Tabescentium, see Pediculus—p. Vestimenti, see Pediculus.

PÉDICURE, (*pes*, gen. *pedis*, 'foot,' and *curare*, 'to care for,') Chiropodist.

PEDICUS, (from *pes*, gen. *pedis*,) Extensor brevis digitorum pedis.

PÉDIEUX, (*muscle*,) Extensor brevis digitorum pedis.

PEDIGAMBRA, Ysambra.

PEDILAN'THUS TITHYMALOÏDES, (πεδιλον, 'a shoe,' and ανθος, 'a flower,') *Euphor'bia tithymaloïdes* seu *myrtifo'lia, Jewbush, Order*, Euphorbiaceæ, grows in various parts of the

West Indies. The practitioners of Curaçoa give a decoction in venereal cases. It is also used in domestic practice, in amenorrhœa. It is, moreover, known and used as *Ipecacuanha*.

PEDILU'VIUM, (*pedes*, 'the feet,' and *lavo*, 'I wash.') *Lavipe'dium*, (F.) *Pédiluve*, *Bain de pied*. A bath for the feet. See Bath.

PEDIOLUS, (dim. of *pes*, gen. *pedis*, 'a foot,') Petiolus.

PEDION, (πεδιον,) Sole.

PEDIONALGIA, Pedialgia.

PEDIONEURALGIA, Pedialgia.

PEDIUM, (πεδιον,) Tarsus.

PÉDONCULE, Peduncle.

PÉDONCULES DU CERVEAU, Peduncles of the brain—*p. du Cervelet*, Corpora restiformia—*p. du Conarium*, Peduncles of the pineal gland—*p. de la Glande pinéale*, Peduncles of the pineal gland.

PEDORA. The sordes of the eyes, ears, and feet.

PÉDOTROPHIE, Pædotrophy.

PED'UNCLE, *Pedun'culus*, (F.) *Pédoncule*, (dim. of *pes*, gen. *pedis*, 'a foot.') A flower stalk. This term has been applied to different prolongations or appendices of the encephalon.

Peduncles of the Brain, *Pedun'culi* seu *Cru'ra* seu *Cau'dex cer'ebri*, called, also, *Cru'ra anterio'ra medul'læ oblonga'tæ*, (F.) *Pédoncules du Cerveau*. Two white cords, about $\frac{3}{4}$ths of an inch in diameter, on the outside of the corpora albicantia. They arise from the medullary substance of the brain, and gradually approach, till they join the tuber annulare. They are formed, internally, of a mixture of cineritious and medullary matter; the former of which, being of a darker colour at one part than in any other part of the brain, has been called *Lo'cus ni'ger cru'rum cer'ebri*, *Substan'tia nigra pedun'culi*. It separates the main body of peduncular fibres into two parts,—the lower or superficial consists, almost wholly, of white fibres, collected into coarse fasciculi, and is called the *crust* or *basis* or *fascic'ulated portion of the pedunc'le*. The upper part is named *tegmen'tum*.

Peduncles of the Cerebel'lum, *Pedun'culi* seu *Cru'ra cerebel'li*, called, also, *Cru'ra posterio'ra*, are six in number, three on each side — a *superior*, a *middle*, and an *inferior*. The superior peduncles are generally known as the *Proces'sus cerebel'li ad tes'tes*, *Cru'ra cerebel'li ad cor'pora quadrigem'ina*, *Bra'chia copulati'va*: the inferior are the *Proces'sus cerebel'li ad medul'lam oblongatam*; and the middle are called, also, *Cerebel'lar ped'uncles* — *Proces'sus* seu *Cru'ra cerebel'li ad pon'tem*, *Bra'chia pontis*.

Peduncles, Inferior, of the Cerebellum, Corpora restiformia—p. of the Medulla oblongata, Corpora restiformia.

Peduncles of the Pin'eal Gland, *Pedun'culi cona'rii*, (F.) *Pédoncules de la glande pinéale*, *P. du Conarium*, are two medullary bands or strips, which seem to issue from the pineal gland, and proceed on each side upon the upper and inner region of the optic thalami. See Pineal Gland.

Pedunculi Cerebelli, Peduncles of the Cerebellum — p. Cerebri, Peduncles of the brain — p. Conarii, Peduncles of the pineal gland, see Pineal gland—p. Medullæ oblongatæ, Corpora restiformia.

PEDUNCULUS, Peduncle.

PEGA, (πηγη,) Canthus (lesser).

PEGANELÆ'ON, *O'leum ruta'ceum*, *O'leum rutæ*, (πεγανον, 'rue,' and ελαιον, 'oil.') Oil of Rue.

PEGANUM, (πεγανον,) Ruta.

PEGMIN, (from πηγνυω, 'to coagulate,') Corium phlogisticum.

PEINE, (πειvα,) Hunger.

PEINOTHERAPEIA, (*peine*, and θεραπεια, 'treatment,') Limotherapeia.

PEIRA, (πειρα,) Effort. Experience, Nisus.

PELA'DA, (F.) *Pelade*. A word of uncertain origin, applied to alopecia, especially to that resulting from syphilis. See Alopecia and Porrigo decalvans.

PELADE, Pelada—*p. Achromateuse*, Porrigo decalvans—*p. Décalvante*, Porrigo decalvans.

PELA'GIA. A kind of scaly erysipelas of the hands — sometimes of the legs; at others, of the face. Pellagra [?].

PELAGRA, Pellagra.

PELARGO'NIUM AN'CEPS, (πελαργος, 'a crane,' from the shape of the capsules,) *Peris'tera an'ceps*. A South African plant, *Nat. Ord.* Geraniaceæ, the decoction of which is used by the Malays in amenorrhœa, and to promote parturition and abortion.

Pelargonium Antidysenter'icum, *Jenkinso'nia antidysenter'ica*. This South African plant is used by the natives in dysentery. It is boiled in milk.

Pelargonium Cucul'latum. Common on the Table Mountain, Africa. It has been recommended in decoction as an enema in colic, nephritis, and suppression of urine. It is an excellent emollient, and was formerly exported to Holland under the name *Herba Althæ'æ*.

Pelargonium Tris'tē, *Polyac'tium tris'tē*. The root of this plant, which grows at the Cape of Good Hope, is somewhat astringent, and is used there in diarrhœa and dysentery, and as an anthelmintic.

PEL'ICAN, *Pelica'nus*, *Peleca'nus*, *Pel'ecan*, *Pel'ecas*, (πελεκαν, from πελεκαω, 'I cleave.') An instrument, curved at the end like the beak of a pelican. Its use is to extract teeth.

PELI'CIDE, *Pelli'dē*, *Mel coc'tum*. Boiled honey.

PELICOMETER, (πελιξ, gen. πελικος, 'a basin,' 'the pelvis,' and μετρον, 'a measure.') Pelvimeter.

PELIDNOMA, (πελιδνωμα, from πελιδνος, 'livid,' and *oma*,) Ecchymoma, Pelioma.

PELIO'MA, gen. *Pelio'matis*, *Pelidno'ma*, (πελωμα, from πελος, 'livid,' and *oma*.) A livid ecchymosis. See Ecchymoma.

PÉLIOSE, Purpura.

PELIOSIS, (πελιωσις, from πελος, 'livid,' and *osis*,) Purpura hæmorrhagica—p. Rheumatica, see Purpura simplex.

PELLA, (πελλα, 'skin,') Cutis, Prepuce.

PEL'LAGRA, *Pel'agra*, *Ichthyo'sis* seu *Tu'ber* seu *Impeti'go Pel'lagra*, *Elephanti'asis Ital'ica*, *Le'pra Mediolanen'sis* seu *Lombard'ica*, *Scorbu'tus alpi'nus*, *Ma'nia pella'gria*, *Erythe'ma endem'icum* seu *pel'lagrum*, *Derm'atagra*, *Erysip'elas period'ica nervo'sa chron'ica*, *Paral'ysis scorbu'tica*, *Insolazione de Primavera*, *Male del Sole*, *Scur'vy of the Alps*, (F.) *Mal de misère*, *Scorbut des Alpes*; (from πελλα, [?] 'skin,' and αγρα, 'seizure.') A disease, particularly noticed among the Milanese, which consists in the skin becoming covered with wrinkles, and assuming a scaly appearance, especially in the parts exposed to the air. The strength diminishes, the intellectual faculties and sensations become obscure, and cramps, convulsions, and other lesions of muscular contractility supervene. It is a singular endemic affection, and has been supposed to follow everywhere the introduction of Indian corn! Hence the name *Rapha'nia maïz'tica*, given to it by some of the Italian physicians.

An affection endemic in the Asturias is said to be a variety of pellagra. It is the *Ro'sa* seu *Le'pra Astu'rica*, *Mal de la Rosa*.

PEL'LENS, (*pellere*, 'to drive.') Driving; impelling.

Pellen'tia Medicamen'ta are medicines that promote the occurrence of the menstrual or hæmorrhoidal flux.

PELLET, (from *pila*, 'a ball,') see Globule.

PELLICLE, Pellicula.

PELLIC'ULA, *Pell'icle*, (dim. of *pellis*, 'a skin.') A thin skin or membrane; a film.

Pellicula Ovi, Membrana putaminis—p. Summa, Epidermis—p. Superior, Epidermis.

Pelliculæ Cordis, Ostiola cordis.

PELLIS, Cutis—p. Summa, Epidermis.

PELLITORY, Xanthoxylum fraxineum—p. American, Parietaria Pennsylvanica—p. Bastard, Achillea ptarmica—p. of Spain, Anthemis pyrethrum—p. Wall, Parietaria.

PELMA, (πελμα,) Sole.

PELOHÆ'MIA, (F.) *Pélohémie*, (πελος, 'dark,' and 'αιμα, 'blood.') A condition of the blood in which it is thick, syrupy, and of a very dark colour—as in gangrene, &c.

PELOR, (πελωρ,) Monster.

PELORIA, (from πελωρ,) Monster.

PELORIUM, (from πελωρ,) Monster.

PELORUM, (from πελωρ,) Monster.

PELOTE DE MER, (from *pila*, 'a round mass,') Pila marina.

PELTALIS seu PELTATUS CARTILAGO, (πελτη, 'a small shield,') Thyroid cartilage, Xiphoid cartilage.

PELTAN'DRA VIRGIN'ICA, (πελτη, 'a small shield,' and ανηρ, gen. ανδρος, 'anther,' from the shield-shaped stamens.) *A'rum Virgin'icum*, *Cal'la* seu *Leeon'tia* seu *Rensselae'ria Virgin'ica*, *Ar'row A'rum*, *Taraho'*, *Wam'pee*; indigenous; of the *Order* Araceæ. The fresh roots and seeds are acrid stimulants, like Arum.

PELTIDEA AMPLISSIMA, (πελτη, 'a small shield,') Lichen caninus—p. Aphthosa, Lichen aphthosus—p. Canina, Lichen caninus—p. Leucorrhiza, Lichen caninus—p. Malacea, Lichen caninus—p. Spuria, Lichen caninus.

PELTIGERA CANINA, Lichen caninus.

PELUDE, Pelicide.

PEL'VIC, *Pel'vicus*, *Pelvi'nus*, (F.) *Pelvien*, (from *pelvis*.) Belonging or relating to the pelvis.

Pelvic Aponeuro'sis, (F.) *Aponévrose pelvienne*. A tendinous lamina, given off from the sides of the pelvis, and from the entire circumference of the brim, which passes into and lines the pelvis, and is soon divided into two distinct layers;—one *external*, the *lateral pelvic* or *obturator fascia*, which is continued to line the sides of the pelvis, and covers the obturator internus muscle; the other, *internal* or *superior*, which passes inwards upon the side of the prostate, bladder, and rectum in the male, and of the bladder, vagina, and rectum in the female, in order to form the floor of the pelvis.

Pelvic Cav'ity, (F.) *Cavité pelvienne*. The cavity of the pelvis.

Pelvic Members. The lower extremities.

Pelvic Surface of the Il'ium. That which faces the pelvic cavity.

PELVICULA OCULI, (dim. of *pelvis*, 'a basin,') Orbit.

PELVID'YMUS, (F.) *Pelvidyme*, (*pelvis*, and δυεω, 'to mingle.') A monster united at the pelvis, and double above.

PELVIEN, Pelvic.

PELVIM'ETER, *Pelycom'eter*, *Pelicom'eter*, *Pelyom'eter*, *Pyelom'eter*, (F.) *Pelvimètre*, (*pelvis*, and μετρον, 'a measure.') A barbarous hybrid. This name has been given to different instruments, invented for measuring the diameters of the pelvis, and particularly the antero-posterior or fore-and-aft diameter of the brim:—*Pelvim'etry*, (F.) *Pelvimétrie*. Two have been chiefly employed, especially by French practitioners:—the *Compas d'épaisseur*, and the *Pelvimeter* of Coutouly. 1. The *Compas d'épaisseur* or *Cal'lipers* of Baudelocque, is formed like a pair of compasses—with blunt extremities—the branches of which can be moved at will. One of these is applied on the symphysis pubis, and the other on the sacrum. About three inches must be deducted from this measurement for the thickness of the mons veneris, pubis, and the base of the sacrum. 2. The *Pelvimeter of Coutouly* resembles the instruments used by shoemakers for measuring the length of the foot. The two branches are introduced, in a state of approximation, into the vagina, and then separated, so that one touches the promontory of the sacrum, the other comes behind the os pubis. It is a barbarous contrivance, and its introduction ought never to be attempted on the living subject. It does not, indeed, seem possible to introduce it without mischief.

The finger is, decidedly, the best pelvimeter, and by it we can judge whether the base of the sacrum be unusually prominent. Measurement of the pelvis by the hand has been called *Pelycochiromctre'sis*; (from πελυξ, 'the pelvis,' χειρ, 'the hand,' and μετρον, 'a measure.')

PELVIMETRY, see Pelvimeter.

PEL'VIS, gen. *Pelvis*, 'a basin,' *Cho'ana*, *Py'elus*, *Lec'anē*, (F.) *Bassin*; (from πελνς, πελις, or πελυξ, 'a basin,' because fancied to be shaped like an ancient basin.) The part of the trunk which bounds the abdomen below. It is a large, bony, irregular, conoidal cavity,—open above and below,—which supports and contains a part of the intestines, and the urinary and genital organs; and serves, at the same time, as a fixed point for the articulation of the lower limbs, the attachment of their muscles, and the execution of their movements. The pelvis supports, behind, the vertebral column, and is sustained, before, by the ossa femorum. It is situate, in the adult, near the middle part of the body, and is composed of four broad, flat, unequally thick bones, differing much in their shape, size, and arrangement, which touch, are articulated at some part of their surface, and intimately united by means of a number of ligamentous fasciæ. Of these bones, two are behind, on the median line,—the sacrum and the coccyx; the two others are before and at the sides,—the ilia. They are fellows, and unite, before, with each other. The most important parts of the pelvis, in an obstetrical point of view, are the *brim* and the *outlet*. The Brim, *Angus'tia abdomina'lis*, *Intro'itus*, *Apertu'ra pel'vis supe'rior*, *Up'per O'pening* or *Strait of the Cav'ity of the Pel'vis*, (F.) *Détroit supérieur*, *D. abdominal*, is the narrow part which separates the greater pelvis from the less—the *false* from the *true*, *Pel'vis ve'ra* seu *mi'nor*. In the well-formed woman it is elliptical, and slightly inclined forwards. Its *antero-posterior*, *sacro-pubic* or *con'jugate diameter*, in a *standard pelvis*, measures 4½ inches, but with the soft parts, 3⅝ inches; its *transverse* or *iliac* or *lateral*, 5¼ inches, but with the soft parts 4 inches; and its *oblique*, *Diam'eter of Deven'ter*, with the soft parts, 4⅝ inches. The Out'let, *Ex'itus*, *Infe'rior o'pening* or *strait*, *Angus'tia perinæa'lis*, (F.) *Détroit inférieur*, *D. périnéal*, forms the lower aperture of the pelvis. The anteroposterior diameter is here, on account of the mobility of the coccyx, 5 inches: the lateral, 4 inches. The Ax'is of the Pel'vis is important to be known in obstetries. The *Axis of the Brim* is indicated by a straight line drawn from the umbilicus to the apex of the coccyx;—the *Axis of the Out'let* by a line drawn from the first bone of the sacrum to the entrance of the vagina. An imaginary curved line which indicates the direction of the canal of the pelvis, has occasionally been termed the *curve of Ca'rus*, in consequence of its having been pointedly described by that German obstetrician.

Pelvis Aurium, Cochlea—p. Cerebri, Infundibulum of the brain.

Pelvis of the Kid'ney, *Pelvis rena'lis* seu *renum*, *Si'nus*, *Ven'ter* seu *Al'veus Re'num*, (F.) *Bassinet*. This is a small, membranous pouch,

occupying the posterior part of the fissure of the kidney. It is placed behind the renal artery and vein; is elongated from above to below; flattened from before to behind; irregularly oval in figure; and, below, contracts considerably, to be continuous with the ureter. It receives the orifices of the infundibula, which pour the urine secreted in the kidney into its cavity.

PELVIS MINOR, Pelvis — p. Ocularis, Scaphium oculare — p. Renalis, Pelvis of the kidney — p. Renum, Pelvis of the kidney—p. Vera, Pelvis.

PELVITROCHANTE'RIAN, *Pelvitrochanteria'nus*. That which relates to the pelvis and great trochanter. The *Pelvitrochanterian re'gion* is formed by the muscles—*pyramidalis, two obturators, gemini*, and *quadratus femoris* — which pass from the pelvis to the digital cavity of the great trochanter.

PELYCOCHIROMETRESIS, (πελυξ, gen. πελυκος, 'pelvis,' χειρ, 'hand,' and μετρον, 'measure,') see Pelvimeter.

PELYCOMETER, (πελυξ, gen. πελυκος, 'pelvis,' and μετρον, 'a measure.') Pelvimeter.

PELYOMETER, Pelvimeter.

PEM'MICAN or PEM'ICAN. Meat cured, pounded, and mixed with fat. It has been much used as nutriment on long overland journeys.

PEMPHIGO'DES, (πεμφιγωδης,) *Pemph'igoid*, (F.) *Pemphigode*. An epithet given by the ancients to the fever that accompanies pemphigus.

PEM'PHIGUS or PEMPHI'GUS, *Emphly'sis Pem'phigus, Pom'pholyx*, (from πεμφιξ, gen. πεμφιγος, 'a blister,') *Fe'bris bullo'sa* seu *vesicula'ris* seu *ampullo'sa* seu *pemphigo'des* seu *pemphingo'des, Exanthe'ma sero'sum, Mor'ta, Pem'phigus mor'ta* seu *Helvet'icus* seu *ma'jor* seu *mi'nor, Mor'bus bullo'sus* seu *vesicula'ris* seu *ampulla'ceus, Pem'phix, Pem'phyx, Ty'phus vesicula'ris, Vesic'ular Fe'ver, Blad'dery Fe'ver, Wa'terblebs*, (F.) *Fièvre bulleuse* ou *vésiculaire, Maladie bulleuse*. A disease, defined to consist of vesicles, scattered over the body; transparent, filbert-sized, with a red, inflamed edge, but without surrounding blush or tumefaction; on breaking, disposed to ulcerate; fluid, pellucid or slightly coloured; fever, adynamic. It is doubtful whether any such idiopathic fever has ever existed: the probability is, that the fever and vesications have been an accidental complication. Cullen thinks the *Pemphigus Helveticus* must have been malignant sore throat. If, however, such a distinct disease did exist, it was probably only as an endemico-epidemic.

PEMPHIGUS GANGRÆNOSUS, Rupia escharotica —p. Hungaricus, see Anthrax—p. Infantilis, Rupia escharotica—p. Major, Pemphigus—p. Minor, Pemphigus—p. Morta, Pemphigus—p. Variolodes, see Varicella.

PEMPHIX, gen. *Pemphi'gis*, (πεμφιξ,) Pemphigus.

PEMPHYX, (πεμφυξ,) Pemphigus.

PEMPTÆA FEBRIS, (πεμπτος, 'five,') Quintan.

PENÆA MUCRONATA, (after P. Pena, a French botanist,) see Sarcocolla — p. Sarcocolla, Sarcocolla.

PENCHE, Abdomen.

PENCIL LIKE PROCESSES, Styloid processes.

PENDULOUS ABDOMEN, Physconia.

PENDULUM PALATI, (from *pendere*, 'to hang,') Velum pendulum palati.

PÉNÉTRANT, Penetrating.

PEN'ETRATING, *Pen'etrans*, (F.) *Pénétrant*, (*penetrare, penetratum*, (*penitus intrare*,) 'to go into.') A wound is so called which penetrates one of the great splanchnic cavities—*Vulnus penetrans*.

A medicine is also so called, which is supposed to pass through the pores, and stimulate.

PENICILLUM, Compress, Penicillus.

PENICIL'LUS, *Penicil'lum, Penic'ulus*, ('a painter's brush; dim. of *penis*, 'a tail.') A tent or pledget. A pessary. The secreting glandiform extremities of the venæ portæ, (*Ac''ini bilio'si*), have been so termed, as well as the villous textures.

PENICILLUS, Tent.

PENICULUM, Compress.

PENICULUS, Penicillus, Tent.

PÉNIDE, Penidium.

PENIDES, Saccharum hordeatum.

PENID'IUM, *Penidium sacchara'tum*, (*penis*, 'a tail,' from the shape [?],) (F.) *Péníde, Sucre tors*. A kind of clarified sugar made up into rolls. *Barley sugar*. It is demulcent; see Saccharum hordeatum.

PÉNIL, Mons veneris.

PE'NIS, gen. *Pe'nis*, 'a tail,' (probably from *pendere*, 'to hang down,') *Cau'lis, Co'les, Colis, Cau'lon, Cau'los, Men'tula, Men'ta, Phal'lus, Pe'os, Ste'ma, Na'trix, Cap'ulus, Rhop'alum, Pos'thē, Pos'thium, Pros'thium, Cri'thē, Cor'ynē, Vo'mer, Pa'ter om'nium viven'tium, Pria'pus, Vir'ga, V. viri'lis, V. genita'lis, Ver'etrum, Sa'thē, Mem'brum viri'lē* seu *semina'lē* seu *genita'lē viro'rum, Mo'rion, Cy'on, Sic'ula, Ten'tum, Has'ta, H. nuptia'lis, H. viri'lis, Vas, Vas'culum, Pecu'lium, Vir'gula, Vir, Thyr'sus, Ten'sus, Cla'vus, Can'da sa'lax, Cau'da, Fas'cinum, F. viri'lē, Mu'to, Ner'vus, N. fistulo'sus* seu *fistula'ris* seu *juveni'lis, Per'tica per se, Sca'pus, Le'co, Cureu'lio, Ve'na, Con'tus, Te'lum, Gurgu'lio, Scep'trum, Ar'ma, Gla'dius, Lu'bricum Ca'put, Muti'num, Pa'lus, Pes'sulus, Ra'dix, Ra'mus, Rutab'ulum, Ar'ma Ven'tris, Colum'na ad'stans inguin'ibus, Colum'na, Pyr'amis, Trabs, Spi'na, Catapul'ta viri'lis, Ver'pa, Machæ'ra, Tau'rus, Pso'lē, Tur'tur*; the *Yard, Male organ*, &c., (F.) *Verge, Membre viril*. This organ, the use of which is to carry the seminal fluid into the female organs of generation, is cylindroid, long, and erectile, and situate before and beneath the symphysis pubis. In the ordinary state, it is soft and pendent in front of the scrotum. During erection, it becomes elongated, upright, and assumes a triangular shape. Its upper surface is called the *Dor'sum pe'nis*, (E.) *Dos de la verge*; and, at its anterior surface, there is a longitudinal projection formed by the canal of the urethra. The two sides of the penis are round, and its posterior extremity or root is attached to the pelvis. Its anterior extremity is free, and presents the glans, prepuce, and orifice of the urethra. The penis is formed of the corpora cavernosa, the principal seat of erection; the corpus spongiosum of the urethra, for the conveyance of the urine and sperm; and the glans, which terminates the canal. The *Arteries* of the penis are branches of the internal pudic. The *Veins* correspond with the arteries. The *Nerves* are from the internal pudic.

PENIS CEREBRI, Pineal gland — p. Factitious, Dildoo — p. Femineus, Clitoris — p. Lipodermus, Paraphimosis — p. Muliebris, Clitoris — p. Succedaneus, Dildoo.

PENNATUS, Penniform.

PEN'NIFORM, *Pennifor'mis, Penna'tus*, (*penna*, 'a pen,' and *forma*, 'form.') An epithet for muscles whose fleshy fibres are inserted at the side of a middle tendon, like the feathers of a pen on their common stalk. When on one side of the tendon, they are called *simple* or *single penniform*; when on both sides, *double penniform*.

PENNSYLVA'NIA, MIN'ERAL WA'TERS OF. The most celebrated are those of Bedford. The Carlisle, Ephrata, Yellow Springs, &c., are also frequented.

PENNYCRESS, Thlaspi.

PENNYROYAL, Mentha pulegium, Hedeoma pulegioides — p. Hart's, Mentha cervina.

PENNYWORT, ASIATIC, Hydrocotyle Asiatica.

PENSACOLA, see Saint Augustine.

PENSÉE, Viola tricolor—*p. Sauvage*, Viola tricolor.

PEN'SILE, *Pen'silis*, (from *pendere*, 'to hang.') Applied to tumours which hang by small roots.

PENSILIA, (*pendere*, 'to hang down,') Pudibilia.

PENSY, Viola tricolor.

PENTA, (πεντε, 'five,') in composition, five.

PENTAM'YRON, (*penta*, and μυρον, 'ointment.') An ancient ointment, consisting of five ingredients. These are said to have been—storax, mastich, wax, opobalsam, and unguentum nardinum.

PENTAPHAR'MACON, (πενταφαρμακον, from *penta*, and φαρμακον, 'remedy.') Any medicine consisting of five ingredients.

PENTAPHYLLUM, (πενταφυλλον, from *penta*, and φυλλον, 'a leaf,') Potentilla reptans.

PEN'TATEUCH, (SURG'ICAL,) *Pentaten'chus*, (πενταρευχος, from *penta*, and τευχος, 'a book,') which signifies the five books of Moses—Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. By analogy, some surgeons have given the name *Surgical Pentateuch* to the division of external diseases into five classes:—wounds, ulcers, tumours, luxations, and fractures.

PENTATH'ETUM, (*penta*, and τιθημι, 'to place.') An ancient plaster consisting of five ingredients.

PENULA, ('a cover,') Ingluvies.

PENZANCE', CLI'MATE OF. This is the chief residence of invalids in Cornwall, England, during the winter. It is situate on Mount's Bay, about ten miles from the Land's End. It is 5½° warmer in winter than in London, 2° colder in summer; scarcely 1° warmer in the spring, and only about 2½° warmer in the autumn. It is a very favourable winter residence for the phthisical invalid.

PEONY, Pæonia.

PEOS, (πεος,) Penis.

PEOT'OMY, *Peotom'ia*, (from *peos*, and τομη, 'incision.') Amputation of the penis.

PEPANSIS, (πεπανσις, from πεπαινω, 'to maturate,') Coction, Maturation.

PEPANTICUS, (πεπαντικος,) Maturative.

PEPASMUS, (πεπασμος,) Coction, Maturation.

PEPAS'TIC, *Pepas'ticus*, *Peptic*, *Pep'ticus*, (F.) *Pépastique*, *Peptique*. A medicine supposed to have the power of favouring the concoction of diseases. Maturative.

PEPEIRUS, (πεπειρος,) Concocted.

PEPERI, (πεπερι,) Piper.

PEPINO (S.). A *cucurbitacea*, which is cultivated in great abundance in the fields of Peru. The pulp or edible part is solid, juicy, and well flavoured; but is apt to disagree.

PEPO, (πεπων,) Cucurbita pepo—p. Lagenarius, Cucurbita lagenaria—p. Vulgaris, Cucurbita pepo.

PEPPER, (πεπερι,) Piper—p. Black, Piper nigrum—p. Bush, sweet, Clethra alnifolia—p. Cayenne, Capsicum annuum—p. Chilly, Capsicum annuum—p. Cubeb, Piper Cubeba—p. Decorticated, Fulton's, see Piper nigrum—p. Guinea, Capsicum annuum—p. Jamaica, Myrtus Pimento—p. Japanese, Fagara piperita—p. Long, Piper longum.

PEP'PER MALAGUET'TA. This term has been applied to the fruit or seeds of several zingiberaceous plants, as well as to the pimento. It is usually considered to be synonymous with *Grana Paradi'si*, *Grains of Par'adise*, and *Grana Guineen'sia*, *Guinea Grains*.

PEPPER POD, Capsicum annuum—p. Poorman's, Polygonum hydropiper—p. Tailed, Piper cubeba—p. Turnip, Arum triphyllum—p. Wa'., Sedum—p. Water, Polygonum hydropiper—p. Water, of America, Polygonum punctatum—p. White, Piper album.

PEPPERWORT, Lepidium.

PEP'SIN, *Pepsi'na*, *Pepsi'num*, *Chy'mosin*, *Gastérase*, *Diges'tive Prin'ciple*, (from πεψις, 'coction,' 'digestion.') A peculiar organic matter, which, in combination with the gastric acids, is considered to form the proper digestive solvent. Its chemical constitution is unknown. It would appear that its presence is necessary to induce changes in the elements of the food, which may enable the gastric acids to exert their proper action on them. One mode of obtaining it is by opening and reversing rennet bags—the fourth stomachs of ruminant animals—and washing them under a thin stream of cold water; scraping off the mucous membrane; reducing it to a pulp, and macerating it in distilled water for twelve hours; filtering, and adding to the liquor a sufficient quantity of acetate of lead; collecting the precipitate, and passing through it a current of sulphuretted hydrogen; filtering again; evaporating at a low temperature, and powdering the dry residue. Pepsin has been given in dyspepsia. A form of it, under the name *Poudre nutrimentive*, has been much used. A *wine of pepsin* has been made of *calves' rennets* 3, *sherry* Oij, *alcohol*, Oss. The rennets are washed clean, cut up, and macerated for fourteen days in the wine, shaking often. The alcohol is then added. Dose, a teaspoonful immediately after eating.

PEPSINUM, Pepsin.

PEPSIS, (πεψις,) Coction, Digestion.

PEP'TIC, *Pep'ticus*, (πεπτω, 'I digest,') *Pepas'tic*. An agent that promotes digestion, or is digestive. Also, applied adjectively to an article of food that is easy of digestion.

PEPTIC PERSUADER, see Pilulæ aloës et kinæ kinæ.

PEP'TONE, *Pep'tonum*, (from πεπτω, 'I digest.') A presumed definite combination between the solvent fluid in the stomach, and albuminous matters received into the organ as aliments. The same as Albuminose.

PER, 'by or through,' in composition. It often, also, gives intensity to the signification.

PERACEPH'ALUS, (*per*, and ακεφαλος, 'acephalus,') (F.) *Péracéphale*. A genus of monsters comprising one of the most extensive groups of the teratological series, characterized by a sufficiently regular form of the body: the absence of upper extremities,—the thorax being more imperfect than in acephali, or even completely null,—the essential conditions, consequently being in their degree of anomaly passing 'beyond' the true type of the acephalous monster.

PERACUTUS, Catoxys.

PERARTICULATIO, Diarthrosis.

PERATODYNIA, (πηρα, 'a pouch for provisions, a stomach,' and οδυνη, 'pain,') Cardialgia.

PERCE-CRANE, (*percer*, 'to pierce,' and *crane*, 'cranium,') Perforator.

PERCE-FEUILLE, (*percer*, 'to pierce,' and *feuille*, 'a leaf,') Bupleurum rotundifolium.

PERCE-MOUSSE, (*percer*, 'to pierce,' and *mousse*, 'moss,') Polytrichum.

PERCE-MURAILLE, (*percer*, 'to pierce,' and *muraille*, 'a wall,') Parietaria.

PERCE-PIERRE, (*percer*, 'to pierce,' and *pierre*, 'a stone,') Crithmum maritimum.

PERCEP'TA, (*percipere*, *perceptum*, (*per*, and *capio*,) 'to perceive,' 'receive.') A word used by some writers on hygiene to indicate, in a general manner, the effects of the nervous action on the animal economy: in other words, the sensations, the functions of the mind, and their deterioration or privation.

PERCEPTIBILITY, see Sensibility.

PERCEP'TION, *Percep'tio*. The appreciation which the brain has of an impression made upon an organ of sense.

PERCEPTIV'ITY. The power of perception.

PERCOLATIO, (*percolare, percolatum*, (*per*, and *colare*,) 'to strain through.') Filtration, Percolation.

PERCOLA'TION, *Percola'tio*. The terms percolation and *displace'ment* are applied, in pharmacy, to an operation of filtration, which consists in placing any substance, the virtues of which have to be extracted by a menstruum, in a funnel-shaped instrument, having a septum perforated with holes, or its tube stuffed with cotton or tow, and pouring fresh portions of the menstruum upon it until all its virtues have been extracted. The operation is used in the formation of certain infusions, extracts, tinctures, &c. See Ph. U. S. 1863.

An instrument used for this purpose is called a *displa'cer* or *per'colator*.

PERCOLATOR, see Percolation.

PERCUSS'. *Percu'tere*, (*per*, and *quatere*, 'to strike,') (F.) *Percuter, Frapper*. To strike upon, with the view of appreciating the resulting sound. To practise percussion.

PERCUS'SION, *Epicron'sis, Percus'sio*. When *immediate* or direct percussion is made on the chest or abdomen, the more or less perfect resonance is an index of the state of the contained organs; and the physician is thus aided in his diagnosis. For this purpose the part may be struck with the fingers, gathered into a bundle, and their tips placed upon a level. It is better, however, to employ *mediate percussion*, which consists in interposing, between the point of the fingers and the part, the finger of the other hand, or a *plexim'eter*, and striking this instead of the naked chest.

PERCUSSION, AUSCULTATORY, see Acouophonia.

PERCUTER, Percuss.

PERCUTEUR COURBÉ À MARTEAU (F.), ('curved hammer percussor.') An instrument used by Baron Heurteloup in the operation of lithotrity, in which a hammer is employed instead of a screw, to force together the blades of the instrument on the foreign body.

PERDO'NIUM. A medicated wine of herbs.

PERETERIUM, (περητηριον, from περαω, 'to bore,') Trepan.

PERETORIUM, Trepan.

PER'FORANS, (*perforare*, (*per*, and *forare*,) 'to bore through.') A name given to different muscles, whose tendons pass through intervals between the fibres or tendons of other muscles; thence called *per'forated*. See Flexor Longus Digitorum, &c. Under the name *Per'forating Ar'teries*, are included, 1. *In the hand*—arterial branches, given off by the profound palmar arch, which traverse the muscles and interosseous spaces. 2. *In the thigh*—three or four arteries, furnished by the profunda, which pass through the openings of the abductor magnus. 3. *In the foot*—the anterior and superior branches of the plantar arch.

PERFORANS CASSERII, see Cutaneous—p. Manûs, Flexor profundus perforans—p. Profundus, Flexor longus digitorum pedis profundus perforans.

PERFORATED SPOT, Locus perforatus.

PERFORATING ARTERIES, see Perforans.

PERFORATIO, Perforation—p. Cranii, see Perforator—p. Intestinorum, Enterobrosis—p. Ventriculi, Gastrobrosis.

PERFORA'TION, *Perfora'tio*, (*perforare, perforatum*, 'to bore through,') *Anatre'sis, Diatre'sis*. An accidental opening in the continuity of organs, either from an external or internal cause.

PERFORATION, Paracentesis—*p. de l'Estomac*, Gastrobrosis—*p. des Intestins*, Enterobrosis—p. Uteri, Uterus, rupture of the.

PER'FORATOR, *Perforato'rium*, (F.) *Perce-crane*. An instrument for opening the head of the fœtus in utero, when it is necessary to diminish its size. The operation is called *Cephalotom'ia, Perfora'tio cra'nii*. The Perforator, most commonly used, is *Smellie's Scis'sors*, which present a spear point when the handles are closed; with cutting edges at the sides and exterior, which act when the handles are separated.

PERFORATORIUM, Perforator.

PERFORA'TUS, (F.) *Perforé*. That which is pierced. Anatomists have given this name to muscles whose fibres or tendons separate to suffer other parts to pass through them. Such are the *Flexor brevis digitorum pedis, F. sublimis perforatus*, and *Coracobrachialis*. Also, to parts that are perforated for any purpose—as the *substan'tia perfora'ta* of the brain.

PERFORATUS CASSERII, Coracobrachialis.

PERFRICATIO, (*per*, and *fricare, fricatum*, 'to rub,') see Iatraleiptice.

PERFRIC'TIO, *Perfrige'rium, Catapsyx'is, Peripsyx'is* (*perfrigere, perfrictum*, (*per*, and *frigere*,) 'to shiver with cold.') Considerable refrigeration. Great sense of cold:—shivering.

PERFRIGERATIO, see Rigor.

PERFRIGERIUM, Perfrictio.

PERFUSIO, (*perfundere, perfusum*, (from *per*, and *fundere*,) 'to pour over,') Fomentation—p. Frigida, see Affusion.

PERI, περι, 'about, on all sides, round about;' also, an augmentative prefix.

PERIÆ'RESIS, (*peri*, and αιρεω, 'I take away.') A sort of circular incision, which the ancients made in the neighbourhood of large abscesses. The periæresis is now only practised in some cases of tumours.

PERIAL'GIA, (*peri*, and αλγος, 'pain.') A very violent pain.

PERIAMMA, gen. *Periam'matis*, (περιαμμα, from περι, and απτειν, 'to hang,') Amuletum.

PERIANAL, (*peri*, and *anus*,) Periproctic.

PERIAPTON, (περιαπτος, 'hung around,') Amuletum.

PERIARTERII'TIS, (from *peri*, and *arteriitis*, 'inflammation of an artery.') Inflammation of the sheath of an artery.

PER'IBLAST, *Per'iplast*, (F.) *Péribiaste*, (*peri*, and βλαστος, 'a germ.') The amorphous matter, which surrounds the *endoblast, endoplast*, (F.) *Endoblaste* or cell nucleus, and undergoes segmentation.

PERIBLEMA, gen. *Perible'matis*, (περιβλημα, from *peri*, and βαλλω, 'to throw,') Catablema.

PERIBLEP'SIS, (περιβλεψις, from *peri*, and βλεπω, 'I look.') The wild look that accompanies delirium.

PERIB'OLÉ, (περιβολη, from *peri*, and βαλλω, 'to throw.') The dress of a person. The pericardium. Also, the translation of morbific matters towards the surface of the body.

PERIBRO'SIS, (περιβρωσις,) (περι, and βρωσκω, 'I eat,') 'I eat around.') Ulceration or erosion at the corners of the eyelids.

PERICÆ'CAL, *Pericæca'lis*, (*peri*, and *cæcum*). That which surrounds the cæcum, hence '*pericæcal* abscess.'

PERICAR'DIAC, *Pericar'dic, Pericar'dial, Pericardi'acus, Pericar'dicus*, (F.) *Péricardique*. Relating to the pericardium,—as '*pericardial* murmur,' '*pericardial* effusion,' '*pericardial* arteries, veins,' &c. &c.

PERICARDIAL, Pericardiac.

PERICARDIQUE, Pericardiac.

PERICARDI'TIS, (*pericardium*, and *itis*,) *Inflamma'tio* seu *Pleuri'tis pericar'dii, Cardi'tis extér'na* seu *sero'sa* seu *membrano'sa, Exocardi'tis, Inflamma'tion of the pericar'dium*, (F.) *Péricardite*,

Inflammation du Péricarde. This is probably the proper appellation for most of those cases which have received the names *Cardi'tis, Cardiopericardi'tis, Cardopericardi'tis,* and *Cardiopericardi'tis.* Along with signs of pyrexia, the local symptoms resemble those of pneumonia. Those which point out that the pericardium is the seat of disease, are the following: — pain, referred to the region of the heart, or the scorbiculus cordis, —sometimes pungent, at others, dull and heavy: palpitation, accompanied with spasmodic twitchings in the neighbourhood of the heart, shooting up to the left shoulder; pulsation, and sometimes soreness of the carotids, with tinnitus aurium and vertigo: the breathing is by catches; dyspnœa considerable; pulse jarring, jerking, peculiar; the tongue white, covered with a mucous coat, and the skin often bathed in sweat, as in acute rheumatism. The *physical signs* during the first period are as follows. The action of the heart is generally evident to the eye, and may be felt by the hand. There is soreness to the touch over the intercostal spaces, and over a small surface in the epigastric region, when the pressure is directed upwards towards the pericardium. Percussion is usually natural, but at times there is dulness. On auscultation, the cardiac movements are found to be frequent, abrupt, jerking, and tumultuous; often irregular and intermittent. The pulse presents corresponding characters. When effusion of lymph has occurred, percussion may be negative, or be but slightly affected. On auscultation, in addition to the preceding signs, there may be one or more of the rubbing or friction sounds resembling the rustling of parchment, or of a sawing or rasping character. In some cases, the sound is like the creaking of new leather. This has been supposed to be pathognomonic of effused lymph. The most important point in the pathology of pericarditis is its connexion with acute rheumatism; and it forms one of the most dangerous occurrences in the latter disease. It may be *acute* or *chronic:* in either case, it is, of course, formidable. The most active depletion must be used; with large doses of opium, counterirritants, and all the means required in the most violent internal inflammations.

Pericarditis Exsudatoria Sanguinolenta, Hæmopericardium.

PERICAR'DIUM, *Pericar'dion,* (*peri,* and *καρδια,* 'heart,') *Perib'olē, Membra'na Cor circumplex'a, Involu'crum* seu *Ar'cula* seu *Cap'sa* seu *Cap'sula* seu *Cam'era* seu *Indumen'tum* seu *Panic'ulus* seu *Membra'na The'ca* seu *Sac'cus* seu *Sac'culus* seu *Scro'tum* seu *Vagi'na* seu *Vesi'ca* seu *Ar'ca* seu *Thal'amus regal'is* seu *Amphies'ma* seu *Bur'sa Cor'dis, Sac* or *Cap'sule of the Heart,* (F.) *Péricarde.* The pericardium is a membranous sac, which envelops the heart, and the arterial and venous trunks that pass from or into it. It is seated in the separation of the mediastinum, above the central aponeurosis of the diaphragm, to which it strongly adheres. Its shape is triangular, like that of the heart, to which it is fitted. The pericardium is composed of two membranes:—the one—*external*—fibrous; the other—*internal*—serous. The latter, having lined the inner surface of the external layer, is reflected over the heart, and covers it entirely; (*Epicar'dium,* (F.) *Épicarde,*) without, however, having the heart within it; in which arrangement it resembles other serous membranes. The pericardium envelops the heart; retains it in position, and facilitates its movements by means of the serous fluid contained in its cavity—*Ca'vum pericar'dii*—and secreted by the membrane—*Li'quor* seu *A'qua* seu *Hu'mor* seu *Lym'pha* seu *Uri'na Pericar'dii, Hydrocar'dia,* which it contains in greater or less quantity.

The *arteries* of the pericardium are small, and derived from the superior phrenic, anterior mediastinal and bronchial. The *veins* accompany them, and open into the brachiocephalic. No nerves have been traced to it. The *lymphatics* enter the lymphatic glands that surround the vena cava superior.

PERICARPIUM, (*περικαρπιον,* from *peri,* and *καρπος,* 'fruit,') Epicarpium.

PERICHOLIA, (*peri,* and *χολη,* 'bile,') Polycholia.

PERICHONDRI'TIS, *Inflamma'tio perichon'drii,* (*perichondrium,* and *itis.*) Inflammation of the perichondrium: hence *Perichondri'tis laryngea';* inflammation of the perichondrium covering the larynx.

PERICHON'DRIUM, (F.) *Périchondre,* (*peri,* and *χονδρος,* 'a cartilage.') A membrane of a fibrous nature, which covers cartilages that are nonarticular, and bears considerable analogy to the periosteum in organization and uses.

PERICHRISIS, (*περιχρισις,* from *peri,* and *χριω,* 'to anoint,') Circumlitio, Liniment.

PERICHRISTON, Circumlitio, Liniment.

PERIC'LASIS, (*περικλασις,*) (*peri,* and *κλαω,* 'I break.') A comminuted fracture, with denudation of the bone.

PERICLYMENUM, (*περικλυμενον,*) Lonicera periclymenum — p. Vulgare, Lonicera periclymenum.

PERICNE'MIA, (*peri,* and *κνημη,* 'the leg.') The parts surrounding the tibia;—the tibia itself.

PERICOLONI'TIS, *Pericoli'tis,* (*peri,* and *colonitis.*) Inflammation of the areolar tissue surrounding the colon.

PERICOLPI'TIS, (*peri, κολπος,* 'vagina,' and *itis.*) Inflammation of the areolar tissue surrounding the vagina.

PERICRANIŒDE'MA, gen. *Pericranicœde'matis,* (*pericranium,* and *οιδημα,* 'a swelling.') Œdema of the head, owing to fluid effused under the pericranium.

PERICRA'NIUM, *Pericra'nion, Pericra'nia,* (F.) *Péricrane,* (*peri,* and *κρανιον,* 'the cranium.') The periosteum, which covers the cranium externally.

PERICYSTI'TIS, (*peri,* and *cystitis.*) Inflammation of the areolar tissue separating the bladder from the neighbouring parts.

PERIDER'IA, (*peri,* and *δερη,* 'the neck.') Twisting of the cord round the neck of the child.

PERIDES'MIC, *Perides'micus,* (F.) *Peridesmique,* (*peri,* and *δεσμος,* 'a ligament.') Some nosologists have given this name to ischuria caused by a ligature round the penis or by stricture of the urethra.

PERIDES'MIUM. The delicate areolar tissue covering a ligament.

PERIDIASTOLE, see Diastole.

PÉRIDIDYME, (*peri,* and *διδυμος,* 'testicle.') See Testicle.

PERIDIDYMI'TIS, (F.) *Péridídymite,* (*peri, διδυμος,* 'testicle,' and *itis.*) Inflammation of the tunica albuginea testis.

PERID'ROMUS, (*περιδρομος,* from *peri,* and *δρομος,* 'a course.') The extreme circumference of the hairs of the head.

PERIGLOTTIS, (*peri,* and *γλωττα,* 'tongue.') Epiglottic gland. See Tongue.

PERIG'RAPHĒ, (*περιγραφη,* (*περι,* and *γραφω,* 'I write,') 'circumscription.') The aponeurotic intersections of the rectus abdominis are so called.

PERIHEPATITIS, (*peri,* and *hepatitis.*) See Hepatitis.

PERILARYNGI'TIS, (*peri,* and *laryngitis.*) Inflammation of the areolar tissue surrounding the larynx, which not unfrequently ends in *perilaryngeal abscess.*

PERILYMPH, Cotunnius, liquor of.

PERIMENINGITIS, (*peri*, and *meningitis*.) Pachymeningitis.

PERIMENINX, (*peri*, and μηνιγξ, 'a membrane.') Dura mater.

PERIMYELIS, (*peri*, and μυελος, 'marrow.') Medullary membrane.

PERIMYELITIS, (*peri*, and *myelitis*.) Meningitis, spinal.

PERIMYS'IUM, *Fas'cia*, (*peri*, and μυς, 'a muscle.') The areolar membrane or sheath—*vagi'na muscula'ris*—that surrounds a muscle, or its fasciculi. The sheath of the whole muscle is termed *Perimysium exter'num*; of the fasciculi, *Perimysium inter'num*.

PE'RIN, *Pe'ris*, (πηριν, πηρα, 'a sac or pouch.') With some this means the scrotum; with others, the testicle; with others, the vagina; with others, the peritonæum; and with others, the anus.

PERINÆOCELE, (*perinæum*, and κηλη, 'rupture.') Hernia, perineal.

PERINÆORRHAPH'IA, *Perinæor'rhaphy*, (*perinæum*, and ῥαφη, 'suture.') Suture of the perinæum, (F.) *Suture du Périnée*, in cases of laceration of the same.

PERINÆ'UM, (πηριν, gen. πηρινος, 'the scrotum [?].) *Interfemin'eum*, *Interfœmin'eum*, *Interfœmin'ium*, *Interfœ'mina*, *Iter femin'eum*, *Pe'ris*, *Pe'rin*, *Perine'um*, *Gressu'ra*, *Ple'chas*, *Am'phiplex*, *Mesos'celon*, *Mesos'celus*, *Perine'on*, *Perinæ'os*, *Perine'os*, *Tra'mē*, *Tra'mis*, *Tan'rus*, *Interforamine'um*, *Cocho'nē*, *Pli'chos*, *Mesome'rion*, *Fœ'men*, *Re'gio*, *Perinæ'i*, (F.) *Périnée*. The space at the inferior region of the trunk, between the ischiatic tuberosities, anus, and genital organs. It is smaller in the female than in the male; has a triangular shape, and is divided into two equal parts by a median line called *Ra'phē*. It is occasionally ruptured in labour. At times it has been made to extend posteriorly as far as the os coccygis. The part between the pudendum and anus is sometimes called *ante'rior perinæ'um*, to distinguish it from that which extends from the anus to the coccyx, called *poste'rior perinæ'um*.

PERINÆUS, Perineal.

PERINE'AL, *Perinæ'us*, *Perinæa'lis*, *Perinea'lis*. That which relates or belongs to the perinæum, as *Perineal artery*, *P. hernia*, &c.

PERINEAL APONEUROSIS, P. Fascia.

PERINEAL AR'TERY, *Arte'ria perinæa'lis*, *Superfic''ial ar'tery of the Perinæ'um*. A branch of the internal pudic distributed to the perinæum.

PERINEAL CUTANEOUS NERVE, See Sciatic nerve, lesser.

PERINEAL FAS'CIA, *Fas'cia perinæ'i*, *Perine'al aponeuro'sis*. The fasciæ,—*superficial* and *deep-seated*,—*Perine'al lig'ament*—*Cam'per's lig'ament*, *Trian'gular lig'ament*,—which belong to the perinæum.

PERINEAL FOS'SA, *Fos'sa perinæ'i*, *Ischiorectal fossa*. A conical fossa, the base of which corresponds with the skin; is formed anteriorly by the transversus perinæi muscle; behind, by the inferior border of the glutæus maximus; internally, by the levator ani; and externally, by the tuber ischii. It is filled up with fat and fibrous striæ.

PERINEAL ISCHU'RIA, *Ischu'ria Perinea'lis*. A name given by Sauvages to retention of urine, caused by a tumour seated in the perinæum.

PERINEAL LIGAMENT, see P. fascia.

PERINEAL NERVE. A branch of the internal pudic; which is mainly distributed to the perinæum and scrotum of the male, and to the vulva and perinæum of the female.

PERINEAL REGION, Perinæum.

PERINEAL SEC'TION, *Sec'tio perinæa'lis*. An incision into the perinæum for the cure of stricture of the urethra.

PÉRINÉE, Perinæum.

PERINEORRHAPHY, Perinæorrhaphia.

PERINEPHRI'TIS, (F.) *Phlegmon périnéphrétique*, (*peri*, and *nephritis*.) Inflammation of the external areolar and fibrous membranes of the kidney, or of their investing adipose areolar tissue.

PERINEPHRUS, (*peri*, and νεφρος, 'kidney.') See Kidney.

PERINEURION, (*peri*, and νευρον, 'a nerve.') Neurilemma.

PÉRINÈVRE, Neurilemma.

PERINYC'TIDES, (*peri*, and νυξ, gen. νυκτος, 'night.') An eruption appearing at night and disappearing by day.

PE'RIOD, (περιοδος,) *Peri'odus*, *Periodei'a*, *Periodeu'sis*, *Sta'dium*, *Circu'itus*, (F.) *Période*, (*peri*, and ὁδος, 'way.') *Cir'cuit*. *Periods* are the different phases or revolutions of a disease; or the epochs which are distinguishable in the course of it. Three periods are commonly enumerated. 1. The *augmentation*, *increase*, or *progress*, (*Incremen'tum*;) 2. The *ac'mē* or height, (F.) *État*, (*Sta'tus*;) and 3. The *decline*, (*Decremen'tum*.) Some authors reckon only the *invasion* and *termination*.

Period is sometimes used in describing an intermittent, for the time between the commencement of a paroxysm and that of the next, including the fit as well as interval.

PERIODS, MONTHLY, Menses.

PERIODEIA, (περιοδεια,) Period.

PERIODEUSIS, Period.

PERIODEUTES, (περιοδευτης, from *peri*, and οδευω, 'to travel.') Charlatan.

PERIODIC''ITY, *Periodic''itas*, *Rhythm*, (F.) *Périodicité*. The aptitude of certain physiological or pathological phenomena, in health or disease, to recur at particular periods, after longer or shorter intervals, during which they cease completely. Diseases thus recurring are called *period'ical* or *rhyth'mical*,—*Typo'ses*.

PERIODOL'OGY, *Periodolog''ia*, (*period*, δος, 'period,' and λογος, 'a discourse.') The doctrine of periodicity in health and disease.

PERIODONTI'TIS, (F.) *Périodontite*, *Inflammation de la Membrane alvéolo-dentaire*, (*peri*, οδους, gen. οδοντος, 'a tooth,' and *itis*.) Inflammation of the membrane that lines the socket of a tooth.

PERIODONTITIS GINGIVARUM, Ulitis.

PERIOD'OSCOPE, (*period*, and σκοπεω, 'I view.') An instrument, proposed by Dr. Tyler Smith, for the ready calculation of the periodical functions of the sex. It consists of a movable circular dial, upon which the months and days are engraved, fixed on a pivot in the centre of a large plate on which are numbered the different conditions of the reproductive system, as conception, abortion, premature labour, hemorrhage, labour, &c. By a knowledge of the date of conception, say November 14th, and fixing the movable plate opposite the point on the fixed plate which indicates conception, the observer is enabled at once to see that, allowing 280 days for gestation, labour may be expected about the 20th of August. The dial is made of card-board, and is affixed to a small volume, in which its uses and applications are explained.

PERIODUS LUNARIS, 'a lunar period.' See Menses—p. Morbi, Type—p. Sanguinis, Circulation.

PERIODYN'IA, (*peri*, and οδυνη, 'pain.') A violent and extensive pain.

PERION, (*peri*, and ωον, 'ovum.') Decidua.

PERIOR'BITA, *Perios'teum or'bitæ*, (F.) *Périorbite*, (*peri*, and *orbita*, 'the orbit.') An appellation used by some for the periosteum lining the orbit, which is a continuation of the dura mater. The inflammation of this periosteum is termed

Periorbi'tis or *Periorbiti'tis*, and *Inflamma'tio periosi'tei or'bitæ.*

PERIORBITIS, (*periorbita*, and *itis.*) See Periorbita.

PERIORBITITIS, see Periorbita.

PERIOSTEITIS. Periostitis.

PERIOS'TEOPHYTE, (*periosteum*, and φυω, 'I grow.') An osseous formation, commencing in the periosteum.

PERIOSTEOT'OMY, *Periosteotom'ia*, (*periosteum*, and τομη, 'incision.') The operation of dividing the periosteum.

PERIOS'TEUM, (περιοστεον,) *Perios'teon*, *Perios'teos*, *Perios'tium*, *Circumossa'lē*, *Membra'na os'sis*, *Omen'tum os'sium*, *Circumossa'lis Membra'na*, (F.) *Périoste*, (*peri*, and οστεον, 'a bone.') The periosteum is a fibrous, white, resisting medium, which surrounds the bones every where, except the teeth at their coronæ, and the parts of bones that are covered with cartilage. The external surface is united in a more or less intimate manner to the neighbouring parts by areolar tissue. Its inner surface covers the bone, whose depressions it accurately follows. It is united to the bone by small, fibrous prolongations; and especially by a prodigious quantity of vessels, which penetrate their substance. The periosteum unites the bones to the neighbouring parts. It assists in their growth, either by furnishing, at its inner surface, as M. Béclard demonstrated, an albuminous exudation, which becomes cartilaginous, and at length ossifies;—or by supporting the vessels which penetrate them to carry the materials of their nutrition. See Medullary membrane.

Periosteum Internum, Medullary membrane—p. Orbitæ, Periorbita.

PERIOS'TIC, *Perios'ticus*, (F.) *Périostique.* Relating or appertaining to the periosteum, or to parts surrounding a bone.

PERIOSTI'TIS, *Periostei'tis*, *Inflamma'tio periosi'tei*, (*periosteum*, and *itis.*) Inflammation of the periosteum.

PERIOS'TOMEDULLI'TIS, (F.) *Périostomédullite*, (*periosteum*, *medulla*, 'marrow,' and *itis.*) Simultaneous inflammation of the periosteum and medulla spinalis.

PERIOSTO'SIS, (*peri*, *osteon*, and *osis*,) (F.) *Périostose.* Tumour of the periosteum. Tumours are so called which are developed on bones, and formed by their outer membrane. These tumours are more rapidly developed, have a less degree of consistence, and sooner disperse than exostoses, which they resemble greatly.

PERIOSTOSTEI'TIS, (F.) *Périostostéite*, (*periosteum*, οστεον, 'a bone,' and *itis.*) Simultaneous inflammation of the periosteum and bone.

PERIPHACUS, (*peri*, and φακος, 'lens.') See Crystalline.

PERIPHERAD, see Peripheral aspect.

PERIPH'ERAL, *Peripher'ic* or *Periph'eric*, *Peripher'ical*, (*peri*, and φερω, 'I bear.') Relating or appertaining to the periphery or circumference.

Peripheral As'pect. An aspect towards the circumference of an organ. *Periph'erad* is used adverbially to signify 'towards the peripheral aspect.'

PERIPHERAL VASCULAR SYSTEM, Capillary system.

PERIPHIMOSIS, Paraphimosis.

PERIPHLEBI'TIS, (*peri*, and *phlebitis*, 'inflammation of a vein.') Inflammation of the sheath of a vein.

PERIPLAST, (*peri*, and πλασσω, 'to form,') Periblast.

PERIPLEUMONIA, (περιπλευμωνια,) Peripneumonia.

PERIPLEURITIS, (*peri*, and *pleuritis.*) Inflammation of the subserous areolar tissue of the costal pleura.

PERIPLOCA INDICA, (*peri*, and πλεκω, 'to twine,') Hemidesmus Indicus—p. Mauritiana, Scammony, Bourbon.

PERIP'LYSIS, (περιπλυσις, from *peri*, and πλυσις, 'the act of washing;') *Profluvium.* A copious discharge from any part, especially from the bowels.

PERIPNEUMO'NIA, *Peripleumo'nia*, *Peripneumoni'tis*, *True peripneu'mony*, (περιπνευμωνια, from *peri*, and πνευμων, 'the lung.') Inflammation of the substance of the lungs. See Pneumonia.

Peripneumonia Bilio'sa. Inflammation of the lungs, accompanied with bilious fever.

Peripneumonia Catarrha'lis. Bronchitis or pulmonary catarrh, with pain in some part of the chest. Peripneumonia notha.

Peripneumonia No'tha, *P. spu'ria* seu *pituito'sa* seu *catarrha'lis*, *Pneumo'nia no'tha*, *Pseu'doperipneumo'nia*, *Pseu'dopneumo'nia*, *Pseu'dopneumoni'tis*, *Bronchoc'acē*, *Blennotho'rax*, *Obstruc'tio pulmo'num pituito'sa febri'lis*, *Bronchi'tis asthen'ica*, *False* or *Bas'tard Peripneu'mony*, (F.) *Péripneumonie bâtarde* ou *fausse*, *Fausse pneumonie.* An inexact name, under which some affections are comprised that resemble pneumonia; and, especially chronic bronchitis with pleurodynia. See Bronchitis (chronic.)

Peripneumonia Pituitosa, P. notha.

PERIPNEUMONITIS, Peripneumonia.

PERIPNEUMONY, Pneumonia—p. Bastard, Peripneumonia notha.

Peripneumony, La'tent. Peripneumony whose symptoms are so obscure as to be recognized with difficulty.

PERIPROC'TIC, *Periproc'ticus*, (F.) *Périproctique*, (*peri*, and πρωκτος, 'anus.') Applied to organs or lesions around the anus.

PERIPROCTI'TIS, (*peri*, πρωκτος, 'the anus,' and *itis.*) Inflammation of the areolar tissue surrounding the rectum.

PERIPSYXIS, (περιψυξις, from *peri*, and ψυχω, 'to become cold,') Catapsyxis, Perfrictio.

PERIPYE'MA, (περιπυημα, from *peri*, and πυον, 'pus.') Suppuration around an organ;—a tooth for example.

PERIRRHŒ'A, *Perir'rhoē*, (περιρροια, from *peri*, and ῥεω, 'I flow.') Afflux of fluids from every point of the body towards an organ which has to remove them from the economy. Also, enuresis.

PERIS, (πηρις.) Perin.

PERISCELIS, (*peri*, and σκελος, 'leg,') *Jarretière.*

PERISCYPHISMUS, Periscythismus.

PERISCYTHIS'MUS, (περισκυθισμος,) *Periscy'thisis*, *Periscytis'mus*, *Periscy'tisis*, *Periscy'phisis*, *Periscyphismus*, *Scalp'ing*, (περισκυθισμος, from *peri*, and Σκυθης, 'a Scythian,' that is, 'scalping after the manner of the Scythians.') An operation described by Paulus of Ægina. It consisted of an incision made around the cranium, and was employed in habitual weakness of the eyes, pains of the head, &c.

PERISPHAL'SIS, *Circumduc'tio*, (from *peri*, and σφαλλω, 'I move.') A circular motion impressed on a luxated bone for the purpose of reducing it.

PERISPLENITIS, (*peri*, and *splenitis*,) see Splenitis.

PERISSODACTYLUS, (περισσος, 'superabundant,' and δακτυλος, 'finger,') Polydactylus.

PERISTAL'TIC, *Peristal'ticus*, (περισταλτικος, from *peri*, and στελλω, 'to contract,') (F.) *Péristaltique.* Relating or appertaining to peristole,—as '*peristaltic action.*' See Systaltic.

PERISTAPHYLINUS EXTERNUS, (*peri*, and σταφυλη, uvula,') Circumflexus musculus—p.

Inferior, Circumflexus musculus—p. Internus, Levator palati.

PERISTERA ANCEPS, (*περιστερα*, 'a pigeon,') Pelargonium anceps.

PERISTERIUM, (*περιστεριων*,) Verbena officinalis.

PERISTER'NA, (*peri*, and *στερνον*, 'the sternum.') The lateral parts of the chest.

PERIS'TOLĒ, (*περιστολη*,) *Mo'tus Peristal'ticus* seu *compresso'rius* seu *vermicula'ris* seu *testudin'eus*, (from *peri*, and *στελλω*, 'to contract.') The *peristaltic action* of the intestines, *Mo'tus peristal'ticus*, (F.) *Mouvement* ou *Action péristaltique*. It consists of a kind of undulation or vermicular movement, in appearance irregular, but in which the circular fibres of the muscular membrane of the intestine contract successively, from above downwards, in proportion as the chyme advances in the alimentary canal; so that, being compressed above, it is pushed into the next portion of the intestine, whose fibres are in a state of relaxation. When the fibres contract inversely, they occasion an *antiperistaltic action*. The peristaltic action is involuntary, and is not under the immediate influence of either brain or spinal marrow. It continues for some time after death.

PERISTOMIUM, (*περιστομιον*, from *peri*, and *στομα*, 'mouth,') see Mouth.

PERISTRO'MA, gen. *Peristro'matis*, *Mus'cus villo'sus*, *Crus'ta membrana'cea* seu *vermicula'ris*, (*περιστρωμα*, 'a coverlet,' from *peri*, and *στρωννυμι*, 'to spread.') The villous or mucous coat of the intestines.

PERISYS'TOLĒ, (*peri*, and *συστολη*, 'contraction.') The interval that exists between the systole and diastole of the heart, which is only perceptible in the dying.

PERITERION, (*peri*, and *τειρειν*, *terere*, 'to rub, to drill,') *Trépan perforatif*.

PERITESTIS, (*peri*, and *testis*,) Albuginea.

PÉRITOINE, Peritonæum.

PERITOME, (*περιτομη*, from *peri*, and *τεμνειν*, 'to cut.') Circumcision.

PERITONÆREX'IS, *Peritonæorex'is*, (*peritonæum*, and *ῥηγνυμι*, 'to break out.') Hernia formed by the rupture of the peritonæum.

PERITONÆ'UM, (*περιτοναιον*, *περιτονειον*, *περιτονιον*,) *Peritone'um*, *Peritonæ'on*, *Peritonei'on*, *Peritonæ'os*, *Peritoni'on*, *Peritome'os*, *Velamen'tum abdomina'lē*, *Tu'nica præten'sa* seu *Operimen'tum præten'sum* seu *Membra'na abdomi'nis*, *Pa'gon*, *Si'phac*, *Sy'phac*, *Ze'pach*, *Zi'phac*, (F.) *Péritoine*, (*peri*, and *τεινω*, 'I stretch.') A serous membrane, which lines the abdominal cavity, *Peritonæ'um parieta'lē*, extends over the greater part of the organs contained there, *Peritonæ'um intestina'lē* seu *viscera'lē*, envelops them wholly or in part, and maintains their respective relations by means of different prolongations and ligamentous folds:—the *mesentery*, *epiploon*, *mesocolon*, &c. Like all the serous membranes, the peritonæum, except in the female, is a sort of sac without aperture, which covers the abdominal organs, without containing them within it, and the internal surface of which is smooth, and lubricated by a serous fluid. In the male fœtus, the peritonæum furnishes a prolongation, which accompanies the testicle at the time of its descent, and, in the female fœtus, forms the *Canal' of Nuck*. Below the neck of the gall-bladder, the peritonæum has a triangular opening, called the *Fora'men* or *Hia'tus of Win'slow*, through which it proceeds behind the stomach, to form a sort of secondary cavity, called the *poste'rior cav'ity of the peritonæ'um*, (F.) *Arrière cavité péritonéale* ou *Cavité des Épiploons*.

PERITONÆUM DUPLICATUM, Epiploon, gastrocolic.

PERITONE'AL, *Peritonæ'us*, (F.) *Péritonéal*. That which appertains or relates to the peritonæum.

PÉRITONITE, Peritonitis—*p. Puerpérale*, see Peritonitis.

PERITONI'TIS, *Empree'ma* seu *Caum'a Peritoni'tis*, *Peritonæi'tis*, *Inflamma'tio* seu *Phleg'monē Peritonæ'i*, *Phlegma'sia* or *Inflamma'tion of the Peritonæ'um*, (*peritonæum*, and *itis*,) (F.) *Péritonite*, *Inflammation du Péritoine*. The characteristic signs of acute inflammation of the peritonæum are,—violent pain in the abdomen, increased by the slightest pressure, often by the simple weight of the bed-clothes. It generally occurs in the parturient state, *Lochoperitoni'tis*, and begins on the second or third day after delivery. At times, a malignant epidemic, and perhaps contagious, variety has made its appearance, and destroyed numbers of females. This has been described under the name *Puer'peral Fever*, *Metroperitoni'tis*, *Ene'cia Syn'ochus Puerpera'rum*, *Erythemat'ic* or *Nonplas'tic Puer'peral Peritoni'tis*, *Typhohæ'mic Peritoni'tis*, (F.) *Péritonite puerpérale*, *Métropéritonite puerpérale*, *Fièvre puerpérale*, *Typhus puerpéral*, *Adynam'ic* or *Malig'nant Puer'peral Fe'ver*, *Low Fe'ver of Child'bed*. It is, according to some, a malignant inflammation of the peritoneum and uterus; according to others, a *U'terine Phlebi'tis*. In any form it requires active treatment, early employed. The appearances on dissection are such as occur whenever a serous membrane has been inflamed, and such inflammation has produced death:—effusion of fluid with flakes of coagulable lymph in it; appearances of vascularity, &c., in the membrane. The treatment—in *active peritonitis*—must consist of the same course as recommended under Enteritis. In the *chronic* kind, symptoms must be combated as they arise, and it may be advisable to excite a new action in the system by means of mercury. In the epidemic and malignant variety, unless bleeding be freely employed at the very outset, it does harm. If used early, it may be of decided advantage. Everything depends upon arresting the morbid process at the outset.

PERITONITIS, ERYTHEMATIC, see Peritonitis—p. Hepatica, see Hepatitis—p. Nonplastic, see Peritonitis—p. Puerperal, see Peritonitis—p. Typhohæmic, see Peritonitis.

PERITTOMA, (*περιττωμα*, from *περισσος*, 'over and above,') Excrement.

PERITYPHLI'TIS, (F.) *Périty phlite*, (*peri*, and *typhlitis*, 'inflammation of the cæcum.') Inflammation of the areolar substance surrounding the cæcum. See Typhloëntеritis.

PERIÜTERINE, *Periüteri'nus*, (F.) *Périütérin*, (*peri*, and *uterus*.) That which is situated around the uterus; hence "*periüterine* inflammation" or "*periüterine* phlegmon,"—inflammation of the areolar tissue around the uterus.

PERIWINKLE, LESSER, ([L.] *pervinca*, [Sax.] pennince,) Vinca minor.

PERIZO'MA, gen. *Perizo'matis*, (*περιζωμα*, from *peri*, and *ζωννυμι*, 'to gird.') A bandage; a girdle. In Fabricius Hildanus, a truss. Herpes zoster. The diaphragm.

PER'KINISM. A therapeutical means, first employed by Dr. Elisha Perkins, of Norwich, Connecticut, towards the termination of the last century, and named after him. It consisted in drawing over affected or other parts the pointed extremities of two metallic rods, called *Metallic Tractors*, each made of a different metal. The success obtained was through the influence of the imagination; and, consequently, as a remedial agent, it ranks as high as animal magnetism, but no higher. The operation was, also, called *Tractora'tion*.

PER'KINIST. A believer in, and practiser of, Perkinism.

PERKINIS'TIC. Relating or belonging to Perkinism.

PERLA, Pearl, Paralampsis.

PERLE, Pearl.

PERMISSUS, (*permittere, permissum*, from *per*, and *mittere*, 'to suffer to pass through,') Licentiate.

PERMISTIO, (*per*, and *miscere, mistum* or *mixtum*, 'to mix,') Coition.

PERMIXTIO, Coition.

PERMOTIO, (*per*, and *movere, motum*, 'to move,') Motion.

PERNICIEUX, Deleterious.

PERNICIOSUS, (*per*, and *neco*, 'to destroy,') Deleterious.

PERNIO, Chilblain.

PERNOCTATIO, (*per*, and *nox*, gen. *noctis*, 'night,') Insomnia.

PERO, (πηρος, 'deficient,') in composition, deficient.

PEROCEPH'ALUS, (*pero*, and κεφαλη, 'head.') A monster with a defective head.

PEROCOR'MUS, (*pero*, and κορμος, 'trunk.') A malformation in which the trunk is defective, and too short, from the absence of one or more vertebræ,—the head and limbs being normal.

PERODACTYLEUS, (*perone*, and δακτυλος, 'a finger or toe,') Flexor longus digitorum pedis profundus perforans.

PERODYN'IA, (πηρα, 'a sac, stomach,' and οδυνη, 'pain,') see Cardialgia.

PEROMEL'IA, (*pero*, and μελος, 'a limb.') Congenital misconstruction, or mutilation of the limbs. A genus in the nosology of Good.

PEROM'ELUS. A monster possessed of the deformity mentioned above.

PERONE, (περονη, from πειρω, 'to transfix,') Fibula.

PÉRONÉ, Fibula—*p. Col du*, Collum fibulæ.

PERONE'AL, *Peronæ'us, Fibula'ris, Fib'ular*, (F.) *Péronier*, (from *perone*.) Belonging or relating to the fibula.

PERONEAL AR'TERY, *Fib'ular, A.*, arises from the popliteal, and is situate deeply in the posterior and outer part of the leg. It gives off branches of little importance. Near the outer ankle, it divides into two branches. I. The *posterior peroneal*, which descends behind the lower joint of the fibula, on the outer surface of the calcaneum. 2. The *anterior peroneal*, which crosses the inferior extremity of the interosseous ligament, to be distributed on the dorsal surface of the foot.

PERONEAL MUS'CLES are three in number. 1. *Peronæ'us Bre'vis* seu *Secun'dus* seu *Anti'cus* seu *Me'dius, Sem'ifibulæ'us*, (F.) *Grand-péronéo-sus-métatarsien, Court péronéo-latéral, Moyen Péronier*. A muscle, situate beneath the peronæus longus. It is attached, above, to the outer surface of the fibula, and terminates, below, at the posterior extremity of the 5th metatarsal bone, after having been reflected beneath the malleolus externus. It extends the foot upon the leg, at the same time raising a little the outer edge. It may, also, act upon the leg, and extend it upon the foot. 2. *Peronæ'us Lon'gus* seu *pri'mus* seu *posti'cus* seu *max'imus* seu *poste'rior*, (F.) *Tibi-péronéo-tarsien, Long péronier latéral, Péronéo-sous-tarsien*, (Ch.) *Muscle grand péronier*. This muscle is situate at the outer part of the leg. It is long, thick, and triangular above; thin, narrow, and flat below. It is attached above to the outer edge of the upper extremity of the fibula, and to the upper third of the outer surface of that bone. Below, it terminates at the outer part of the posterior extremity of the first metatarsal bone. This muscle extends the foot on the leg, turning its point outward, and raising its outer edge. It acts, also, upon the leg, which it extends on the foot. 3. *Peronæ'us Ter'tius, No'nus Vesa'lii*, (F.) *Péronier antérieur, Petit péronéo-sus-métatarsien* (Ch.,) *Petit Péronier*. A muscle, situate at the anterior, outer, and inferior part of the leg. It is long and flat, and is attached, above, to the inferior third of the anterior margin and inner surface of the fibula; terminating, below, at the posterior extremity of the 5th metatarsal bone. This muscle bends the foot on the leg, by raising its outer edge. It can, also, bend the leg on the foot.

PERONEAL NERVE, see Popliteal nerves.

PERONEAL VEIN follows the same course as the artery.

PERONEDACTYLIUS, (*perone*, and δακτυλος, 'a finger or toe,') Flexor longus digitorum pedis profundus perforans.

PÉRONÉO-LATÉRAL COURT, Peronæus brevis—*p. Phalanginien du gros orteil*, Flexor longus pollicis pedis—*p. Sous-phalangettien du pouce*, Flexor longus pollicis pedis—*p. Sous-tarsien*, Peronæus longus—*p. Sus-métatarsien*, Peronæus tertius—*p. Sus-métatarsien, grand*, Peronæus brevis—*p. Sus-phalangettien du pouce*, Extensor proprius pollicis pedis—*p. Sus-phalangien du pouce*, Extensor proprius pollicis pedis—*p. Tibi-sus-phalangettien commun*, Extensor communis digitorum pedis.

PERONEUM, (from *perone*,) Fibula.

PÉRONIER, Peroneal—*p. Grand*, Peronæus longus—*p. Latéral, long*, Peronæus longus—*p. Moyen*, Peronæus brevis—*p. Petit*, Peronæus tertius.

PERONODACTYLIÆUS, (*perone*, and δακτυλος, 'a finger or toe,') Flexor longus digitorum pedis profundus perforans.

PERONODACTYLIUS, Flexor longus digitorum pedis profundus perforans.

PEROSO'MUS, (*pero*, and σωμα, 'body.') A monster whose whole body is imperfectly developed.

PEROSPLANCH'NICA, (*pero*, and σπλαγχνον, 'a viscus.') Congenital misconstruction of the viscera. A genus in the nosology of Good.

PERPENDICULUM HEPATIS, (*perpendiculum*, 'a plumb line,' from *per*, and *pendere*, 'to hang,') Suspensory ligament of the liver.

PERPERACU'TUS. 'Extremely acute.' An epithet applied to very violent and rapid diseases.

PERPLEXI MORBI, (*per*, and *plectere, plexum*, 'to interweave,') see Complication.

PERPLICA'TION, *Perplica'tio*, (*per*, and *plico, plicatum*, 'to fold.') A method of tying arteries, which consists in making a small incision in the side of the artery, near its bleeding orifice, introducing a small pair of forceps, seizing the open extremity, and drawing it backward, through the aperture made in the side of the vessel, so as to form a kind of knot.

PERROSIN, see Pinus abies.

PERRY, see Cider.

PER'RY COUNTY WARM SPRINGS. These are in Pennsylvania, eleven miles from Carlisle, and fourteen from Harrisburg. Temperature 67°; impregnation not much. They are used for bathing.

PERSEA CAMFORA, (περσεα,) see Camphor—p. Cassia, Laurus cassia—p. Cinnamomum, Laurus cinnamomum—p. Cubeba, Piper cubeba.

PER'SEA GRATIS'SIMA, *Lau'rus Persea, Palta tree, Avoca'do* or *Al'ligator Pear*. A slender, very high tree of Peru, with a small domelike top, which grows on the eastern declivity of the Andes, and rises, at times, to the height of more than 60 feet. Its fruit—(S.) *Palta*—which is pear-shaped, is generally much liked. It dissolves, like butter, on the tongue, and hence is called, in some of the French colonies, *beurre végétale*. The leaves are reckoned balsamic, pectoral, and vulnerary. The seeds are very astringent.

PERSEA PICHURIM, see Pichurim beans—p. Sassafras, Laurus sassafras.

PERSIAN FIRE, see Anthrax.

PERSICA VULGARIS, (Περσικος, 'Persian,') Amygdalus Persica.

PERSICAIRE ÂCRE, Polygonum hydropiper—*p. Brulante*, Polygonum hydropiper—*p. Douce*, Persicaria—*p. Poivrée*, Polygonum hydropiper.

PERSICARIA, (from *persica*, 'peach-tree,' the blossoms being similar,') Polygonum Persicaria—p. Minor, Polygonum Persicaria—p. Mitis, Polygonum Persicaria—p. Urens, Polygonum hydropiper—p. Wandspiked, Polygonum Virginianum—p. Water, Polygonum amphibium.

PERSIL, (abbreviation of *petrosil*, from *petroselinum*,) Apium petroselinum—*p. d'Âne*, Chærophyllum sylvestre—*p. Faux*, Æthusa cynapium—*p. de Macédoine*, Bubon Macedonicum—*p. de Montagne*, Athamanta aureoselinum.

PERSIMMON, Diospyros Virginiana.

PERSOLATA, Arctium lappa.

PERSOLLATA, Arctium lappa.

PERSOLUTA, Arctium lappa.

PERSPECILLUM, (*per*, and *specio*, 'to behold,') see Spectacles.

PERSPIRABILE SANCTORIANUM, (after Sanctorius,) Perspiration.

PERSPIRA'TION, *Perspira'tio*, *Transpira'tio*, *Diffla'tio*, *Diap'noë*, *Diapnœ'a*, *Diapneu'sis*, *Perspirab'ilĕ Sanctoria'num*, (*per*, and *spirare*, *spiratum*, 'to breathe, exhale.') The *insensible transpiration* or exhalation continually going on at the surface of the skin and membranes. Sensible perspiration is called *sweat*. The perspiratory fluid is secreted by an appropriate glandular apparatus, termed by Breschet *diapnog''enous*, (F.) *Appareil diapnogène;* the *sudorip'arous glands*, *Glan'dulæ sudorip'aræ*, *Or'gana sudorip'ara*, *sweat glands*, consisting of a convoluted tube, situate beneath the true skin, and of spiral ducts, which open obliquely under the scales of the epidermis. A certain portion of the perspired fluid is thrown off by ordinary physical evaporation.

The *Pulmonary exhalation* or *transpiration* is that which takes place into the bronchia, and is sent out with the expired air.

PERS'PIRATORY, *Perspirato'rius*, *Trans'piratory*, *Transpirato'rius*, (F.) *Perspiratoire*, *Transpiratoire*. Relating or belonging to, or the product of, perspiration.

PERSTRICTION, (from *perstringere*, (*per*, and *stringere*, *strictum*,) 'to bind,') see Hæmostasia.

PERSUDATIO, (*per*, and *sudare*, *sudatum*, 'to sweat,') Diapedesis.

PERSULTATIO, (*persultare*, *persultatum*, 'to leap through,' from *per*, and *saltare*, 'to leap,') Diapedesis.

PERTE, (from *perdere*, *perditum*, 'to lose,') Metrorrhagia—*p. d'Appetit*, Anorexia—*p. de la Mémoire*, Amnesia—*p. de l'Odorat*, Anosmia—*p. de Sang*, Hæmorrhagia—*p. de la Voix*, Aphonia—*p. de la Vue*, Cæcitas.

PERTÉRÉBRANT, *Perter'ebrans*, (*per*, and *terebrare*, 'to bore.') The French give this epithet to an acute pain—*Douleur pertérébrante*—which occasions a sensation like that which would be produced by an instrument penetrating and lacerating a part;—the pain from whitlow, for example.

PERTES BLANCHES, (pl. of *perte*,) Leucorrhœa—*p. de Sang*, Metrorrhagia—*p. Séminales*, Spermatorrhœa—*p. Utérines*, Metrorrhagia—*p. Utérines blanches*, Leucorrhœa—*p. Utérines rouges*, Metrorrhagia.

PERTICA PER SE, ('a pole,') Penis.

PERTRUSIO MUTUA, (*per*, and *trudere*, *trusum*, 'to thrust,') Endosmose.

PERTURBATIONES ANIMI, (*perturbare*, *perturbatum*, (*per* and *turbare*,) 'to disturb greatly,') Affections of the mind.

PERTURBA'TRIX (*Medici'na*,) *Per'turbating treat'ment*, (F.) *Méthode* ou *Médecine perturbatrice;* a mode of treatment in which very active means are employed, and such as impress upon diseases a different course from that natural to them. It is the antithesis to the *Medicina expectans*. Much evil has resulted from such treatment, especially in febrile diseases.

PERTUSS'AL, *Pertussa'lis*, Relating or appertaining to pertussis.

PERTUS'SIS, (*per*, and *tussis*, 'a cough,') 'a violent cough.' *Tus'sis feri'na* seu *convulsi'va* seu *pu'eros strangu'lans* seu *quin'ta* seu *stomacha'lis* seu *an'hela clamo'sa* seu *stran'gulans* seu *delas'sans* seu *suf'focans* seu *amphemer'ina* seu *tussiculo'sa* seu *spasmod'ica* seu *asini'na* seu *cani'na*, *Bronchi'tis convulsi'va*, *Bronchocephali'tis*, *Pneu'sis pertus'sis*, *Amphemer'ina*, *Orthopnœ'a tussiculo'sa* seu *clango'sa* seu *suffocati'va* seu *clamo'sa* seu *spasmod'ica*, *Mor'bus cucul'lus* seu *cuculla'ris*, *Cucu'lus*, *Bechorthopnœ'a*, *Bex convulsi'va* seu *therio'des*, *Hoopingcough*, *Whoopingcough*, *Chin'cough*, *Kin'cough*, *Kind'cough*, (Germ. Kind, 'a child,') (Sc.) *Kink-host*, (Prov.) *Kinkhaust*, (F.) *Coqueluche*, *Catarrhe* ou *Bronchite convulsive*, *Toux convulsive* ou *quinteuse* ou *bleue*, *Maladie cuculaire*. A violent convulsive cough, returning by fits (F.) *Quintes*, at longer or shorter intervals; and consisting of several expirations, followed by a sonorous inspiration or *whoop*. The fits of coughing generally recur more frequently during the night, morning, and evening, than in the day. It is esteemed to be contagious, and attacks the young more particularly. It is rare for it to effect an individual for the second time. The duration is various,—six or eight weeks or more. Although the paroxysms are very violent, it is not a dangerous disease. It may, however, give rise to other affections, as convulsions, pneumonia, &c., when the complication is very dangerous, as the cause cannot be removed. Those children suffer the least, who evacuate the contents of the stomach during the fit. In the treatment, all that can be done is to palliate. It must be borne in mind, that the disease will, in time, wear itself out. If there be much tensive pain of the head, or fever, bleeding may be required, but it is seldom necessary. Narcotics occasionally afford relief, but it is temporary. Gentle emetics, given occasionally, when the paroxysms are long and dry, give decided relief, and aid in the expectoration of the morbid secretions. After the disease has continued for some weeks, and persists in part from habit, change of air is essential, and this, even should the change be to an atmosphere that is less pure.

PERU, see Lima.

PERUNCTIO, (*per*, and *ungere*, *unctum*, 'to anoint,') Inunction.

PERVENCHE, ([L.] *pervinca*,) Vinca minor.

PERVER'SION, *Perver'sio*, (*per*, and *vertere*, *versum*, 'to turn.') *Dias'trophē*, *Diastrem'ma*. One of the four modifications of function in disease: the three others being augmentation, diminution, and abolition. The humorists used this term also to designate disorder or morbid change in the fluids.

PERVERSION DE LA TÊTE DES OS ET DES MUSCLES, Loxarthus.

PERVIGILIUM, (*per*, and *vigilare*, 'to watch,') Insomnia, Coma vigil.

PES, gen. *Pe'dis*, (πους, gen. ποδος,) *Ich'nus*, (Sc.) *Fit*, (F.) *Pied*, 'the *foot*.' The inferior extremity of the abdominal member, representing a bony arch, an elastic vault, which transmits the weight of the body to the ground. It is divided into three parts;—the *tarsus*, *metatarsus*, and *toes*.

PES ALEXANDRINUS, Anthemis pyrethrum—p.

Anserinus, Chenopodium bonus Henricus, Facial nerve — p. Cati, Antennaria Dioica — p. Equinus, Pes equinus, see Kyllosis—p. Hippocampi major, Cornu ammonis — p. Hippocampi minor, Hippocampus minor—p. Hippopotami major, Cornu ammonis—p. Hippopotami minor, Cornu ammonis—p. Leonis, Alchemilla.

PESANTEUR, (from [F.] *peser*, [L.] *pendere*, *pensum*, 'to weigh,') Weight — *p. Spécifique*, Gravity, specific.

PÈSE-ACIDE, (*peser*, 'to weigh,' and *acid*,) Acidometer — *p. Liqueur*, Areometer — *p. Sirop*, Saccharometer.

PESETTE, Cicer arietinum.

PESSAIRE, Pessary—*p. Intraütérin*, Pessary, intra-uterine.

PES'SARY, *Pessa'rium*, (from πεσσος, 'a small stone or other substance for playing at draughts; a pessary.') *Pes'sus*, *Pes'sum*, *Pes'sulus*, *Penicil'lus*, *Ta'lus*, *Nod'ulus uteri'nus*, *Supposito'rium uteri'num*, *Glans*, *Lemnis'cus*, (F.) *Pessaire*. A solid instrument, composed of cork, ivory, or elastic gum, which is introduced into the vagina to support the uterus, in cases of prolapsus or relaxation of that organ; to keep vaginal hernia reduced, &c. The ancients made use of *med'icated pes'saries*, which they distinguished into emollient, astringent, aperient, &c., and they are still used. The form of pessaries is very variable;—round, oval, &c., according to fancy and circumstances.

PESSARY, EGYPTIAN, Ægyptius pessus.

PESSARY, INTRAÜTERINE, *Stem pes'sary*, (F.) *Pessaire intra-utérin*, *Redresseur utérin*. An instrument for rectifying uterine displacements—as anteversion and retroversion, consisting of a stem which is introduced into the uterus; this stem is attached to a flattened ovoid bulb or ball, on which the cervix uteri rests.—Connected with this is an external part or wire frame, which is attached, at one extremity, to a flat tubular portion, passing into the vagina, to be fixed to the intra-uterine portion. The wire frame is made to press upon the pûbis, so that the pessary can be kept in position *in utero*. This is essentially the intraüterine pessary of Professor Simpson of Edinburgh.

A modification of Prof. Simpson's instrument for rectifying malpositions of the uterus has been made by Dr. Sims, of New York. This consists in having a joint or hinge near enough the end to prevent its striking against the fundus uteri, and yet far enough to allow it to enter fully the cavity; making the os uteri the centre of motion. It is called by Dr. Sims the *u'terine el'evator*.

PESSARY, STEM, Pessary, intra-uterine.

PESSULUS, (dim. of *pessus*,) Pessary, Penis.

PESSUM, Pessary.

PESSUS, Pessary.

PEST. (*pestis*,) Plague.

PESTE, Plague—*p. Antonine*, Plague of Antoninus—*p. d'Athènes*, Plague of Athens—*p. Noire*, Death, Black.

PESTICHIÆ, Petechiæ.

PESTICIÆ, Petechiæ.

PES'TILENCE, *Pestilen'tia*, *Pestil'itas*, (from *pestis*, 'a pest.') A malignant spreading disease; —applied especially to plague.

PESTILENCE, CHOLERIC. Cholera spasmodica—p. Glandular, Plague—p. Hæmagastric, Fever, yellow—p. Septic, Plague.

PESTILENTWORT, Tussilago petasites.

PESTILENTIA, Pestilence, (from *pestis*,) Plague—p. Hæmagastrica, Fever, yellow.

PESTILENT''IAL, *Pestilentia'lis*, *Pestilentia'rius*, *Pestilentio'sus*, *Pestilen'tus*, (F.) *Pestilentiel*. Relating or appertaining to a pest or plague. *Pestilential diseases* are those that bear some resemblance to the plague in respect to mode of propagation, symptoms, danger, &c.

PESTILITAS, (from *pestis*,) Plague.

PESTIS, Plague — p. Acutissima, Plague — p. Adenoseptica, Plague—p. Americana, Fever, yellow — p. Antoniniana, Plague of Antoninus — p. Bellica, Typhus — p. Britannica, Sudor Anglicus —p. Bubonaria orientalis, Plague—p. Contagiosa, Plague—p. Glandulosa, Plague—p. Glossanthrax, Glossanthrax — p. Inguinaria, Plague — p. Intertropica, Fever, yellow—p. Nigra, Death, black—p. Occidentalis, Fever, yellow — p. Orientalis, Plague — p. Septica, Plague — p. Variolosa, Variola.

PESTLE, (from *pistillum*,) Pilum—p. Spring, see Pilum.

PET, (from *pedere*,) Fart.

PETALE, Phtheiriasis.

PÉTASITE, Tussilago petasites.

PETASITES, (πετασιτης, from πετασος, 'a sun hat,') Tussilago petasites — p. Hybrida, Tussilago petasites—p. Major, Tussilago petasites—p. Officinalis, Tussilago petasites — p. Rubens, Tussilago petasites—p. Vulgaris, Tussilago petasites.

PETAUR'UM, (πεταυρον.) A seat suspended by ropes, in which a person taking exercise sat, and was tossed about by assistants.

PETE'CHIÆ, *Petic'ulæ*, *Pestich'iæ*, *Pestic'iæ*, *Punctic'ula*, *Pur'pura malig'na*, *Por'phyra Græco'rum*, (F.) *Pétéchies*, (from [I.] *Pedecchio*, 'a flea-bite.') Small spots, similar in shape and colour to flea-bites, which occur spontaneously upon the skin, in the course of severe fevers, &c. They are, under such circumstances, signs of great prostration.

PETECHIÆ SINE FEBRE, Purpura simplex.

PETE'CHIAL, *Petechia'lis*. Resembling or accompanied by petechiæ.

PETECHIAL SCURVY, Purpura simplex.

PETECHIANOSIS, (*petechiæ*, and νοσος, 'disease,') Purpura hæmorrhagica.

PETER'S PILLS, Pilulæ Aloes et Cambogiæ —p. Worm lozenges, see Worm lozenges, Sherman's.

PETICULÆ, Petechiæ.

PETIGO, Impetigo.

PETINA, (from *pes*, gen. *pedis*, 'a foot,' or from *peto*, 'to go,') Sole.

PETI'OLUS, *Pedi'olus*, (dim. of *pes*, gen. *pedis*, 'a foot.') A footstalk or leafstalk of a plant. A petiole.

PETIOLUS EPIGLOT'TIDIS. The root of the Epiglottis.

PETIOLUS MALLEI, Manubrium mallei.

PETIT ARGENT, ('small silver,') Platinum —*p. Courier*, Influenza—*p. Lait*, Serum lactis—*p. Lait d'Hoffmann*, Serum lactis Hoffmanni—*p. Mal*, see Epilepsy — *p. Sus-maxillo-labial*, Levator anguli oris.

PETITE-POSTE, Influenza — *p. Vérole*, Variola.

PETITS-LAITS, see Serum lactis.

PETRÆLEUM, (*petro*, and ελαιον, 'oil,') Petroleum.

PETRÆUM, (μετραιος, 'living among rocks,') Solidago virgaurea.

PETRAPIUM, (*petro*, and *apium*, 'parsley,') Bubon Macedonicum.

PÉTRÉ, Petrous.

PÉTRÉOLE, Petroleum.

PÉTREUX, Petrous — *p. Os*, see Temporal bone.

PETRO, (πετρα and πετρος, 'rock,') in composition, rock; and the petrous or rocky portion of the temporal bone.

PETRO DEL PORCO, ('stone of the hog,') Bezoar of the Indian porcupine.

PÉTROLE, Petroleum.

PETRO'LEUM, *Petrolæ'um*, *Petræ'leum*, *Pe'træ o'leum*. *Bitu'men Petroleum*, *Pisselæ'um In'dicum*, *Rock Oil*, *Petroleum Barbaden'sē*, *Barba'does Tar*,

(F.) *Pétrole* ou *Pétréole*, (*petro*, and *ελαιον*, 'oil.') A bituminous substance flowing spontaneously from the earth, in various parts of the world, and abounding on this continent over a large area, embracing a part of Canada West from Lake Ontario to Lake Huron, and portions of Western New York and Western Pennsylvania, the south-eastern half of Ohio, all Northwestern Virginia, and the eastern district of Kentucky. It is of a fetid odour, and bitter, acrid taste. It is semi-liquid, tenacious, semi-transparent; of a reddish-brown colour; insoluble in water and alcohol; combines with fixed and essential oils and sulphur; and is partially soluble in ether. The petroleum found at Gabian, near Béziers, in France, has been called *Oleum Gabia'num*, (F.) *Huile de Gabian*, *Petroleum ru'brum*. It has been given as an excitant expectorant; and, mixed with tincture of assafœtida, in tapeworm. It is, also, used externally in chilblains, chronic rheumatism, affections of the joints and skin, and paralysis, and is a disinfectant and parasiticide.

New York Petroleum, called *Sen'eca Oil*, is used externally in similar cases.

Petroleum Barbadense, Petroleum.

Petroleum Sulphura'tum, *Bal'samum Sul'phuris Barbaden'sē*,—(Composed of *Petrol. Barbad.* ℥xvj, *Flor. Sulph.* ℥iv) has been used as a pectoral; and as a detergent to ulcers. It has been accounted antispasmodic and sudorific. Dose, gtt. x to xxx. Externally, it is used as a stimulant and discutient.

PETROÖCCIP'ITAL, *Petroöccipita'lis*. Belonging to the petrous portion of the temporal bone and to the occipital bone.

Petroöccipital Su'ture is formed by the junction of the petrous portion of the temporal with the occipital bone. It is a deep groove separating the bones, which have between them a thin layer of cartilage.

PETROSALPIN'GOPHARYNGE'US. A fleshy fasciculus, which extends from the sphenoid bone, from the petrous portion of the temporal bone, and from the Eustachian tube to the upper part of the pharynx. See Constrictor.

PETROSALPINGOSTAPHYLINUS, Circumflexus—p. Salpingo-staphylinus, Levator palati.

PETROSPHENOID'AL, *Petrosphenoida'lis*. Belonging to the petrous portion of the temporal bone and to the sphenoid bone.

Petrosphenoidal Su'ture;—a name given to the small suture which is formed by the anterior edge of the petrous portion of the temporal bone and the posterior edge of the sphenoid.

PETROSAL, Petrous.

PETROSELINUM, (*πετροσελινον*, from *petro*, and *σελινον*, 'parsley,') Apium petroselinum — p. Macedonicum, Bubon Macedonicum.

PETROSTAPHYLIN, Levator palati.

PETROSUM, OS, see Temporal.

PE'TROUS, *Petro'sus*, *Pétro'sal*, (F.) *Pétreux*, *Pétré*, *Pierreux*, (*πετρος*, 'a rock.') Resembling stone; having the hardness of stone. Relating or belonging to the petrous portion of the temporal bone.

Petrous Gan'glion, *Petro'sal Ganglion*, *Gan'glion of An'dersch*, is formed by the glossopharyngeal nerve, shortly after it emerges from the jugular fossa. From this ganglion, M. Jacobson of Copenhagen traced an anastomosing loop through the cavity of the tympanum, which left branches there, and was thence reflected downwards to join the Vidian nerve.—See Otic Ganglion. This has been called the *Nerve of Jacobson*, *Tympan'ic branch of the glossopharyngeal*; and the inosculation, *Jacobson's Anastomo'sis*.

Petrous Portion of Temporal Bone, see Temporal Bone — p. Process, see Temporal Bone.

Petrous Si'nuses, *Petro'sal Si'nuses*, are two venous sinuses of the dura mater, connected with the petrous portion of the temporal bone, and distinguished on each side, into:—1. The *superior petro'sal si'nus*. It arises from the cavernous sinus; follows the upper edge of the petrous portion which affords it a gutter; passes into the great circumference of the tentorium cerebelli, and opens into the lateral sinus where the latter experiences a bend near the base of the pars petrosa. Its form is triangular. 2. The *inferior petro'sal si'nus* arises from the cavernous sinus at the same point as the last, with which it communicates at the moment of its origin. It descends between the inferior edge of the pars petrosa and the basilary process, and terminates in the lateral sinus, at the sinus or gulf of the internal jugular vein. It is triangular, and broader at its extremities than at the middle.

PETUM, Nicotiana tabacum.

PETUN, Nicotiana tabacum.

PEUCE, (*πευκη*,) Pinus sylvestris.

PEUCEA BALSAMEA, see Pinus abies.

PEUCED'ANUM, (*πευκη*, 'the pine tree,' its leaves resembling those of the pine;) *P. officina'lē* seu *alsat'icum* seu *altis'simum* seu *panicula'tum* seu *terna'tum*, *Seli'num peuced'anum*, *Mar'athrum sylves'trē*, *Marathrophyll'um*, *Pinastel'lum*, *Fœnic'ulum porci'num*, *Bo'nus Ge'nius*, *Hog's Fen'nel*, *Sul'phurwort*, (F.) *Peucédane*, *Queue de Pourceau*, *Fenouil de Porc*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The root has a strong, fetid smell—somewhat resembling that of sulphureous solutions—and an acrid, unctuous, bitterish taste. It has been recommended as antihysteric and nervine.

Peucedanum Alsaticum, Peucedanum—p. Altissimum, Peucedanum — p. Austriacum, see P. palustre — p. Officinale, Peucedanum — p. Oreoselinum, Athamanta aureoselinum.

Peucedanum Palus'trē, *Thysse'lium* seu *Seli'num palus'trē*, *Seli'num sylves'trē* seu *thysseli'num* seu *lactes'cens*, *Thysseli'num*, *Olsnit'ium*, *Marsh seli'num*, a European plant, has been recommended as an anti-epileptic. In Courland it has been a famous remedy in epilepsy. *Peucedanum Austri'acum* is possessed of the same virtues.

Peucedanum Paniculatum, Peucedanum — p. Pratense, P. silaus.

Peucedanum Si'laüs, *P. praten'sē*, *Ses'eli praten'sē*, *Si'um* seu *Ligus'ticum* seu *Cnid'ium sil'aüs*, *Saxif'raga vulga'ris* seu *An'glica*, *Hippomar'athrum*, *Fœnic'ulum errat'icum*, *Eng'lish* or *Mead'ow Sax'ifrage*, (F.) *Séséli des prés*. The roots, leaves, and seeds have been recommended as aperients, diuretics, and carminatives. Rarely used.

Peucedanum Ternatum, Peucedanum.

PEUPLIER, Populus — *p. Baumier*, Fagara octandra — *p. de la Caroline*, Fagara octandra — *p. Franc*, Populus — *p. Noir*, Peucedanum.

PEXIS, (*πηξις*,) Concretion.

PEYERI GLAND'ULÆ, *Peyeri Plex'us glandulo'si*, *Gland'ulæ Peyeria'næ* seu *muco'sæ coagmina'tæ* seu *agmina'tæ* seu *mucip'aræ racema'tim conges'tæ intestino'rum* seu *intestina'les plexifor'mes* seu *spu'riæ*, *Corpus'cula glandula'rum simil'ia*, *Gland'ulæ in ag'men congrega'tæ intestino'rum*, *Enterad'enes*, *Pey'er's Glands*, *Ag'minated* or *ag'gregate glands*. Small glands situate beneath the villous coat of the intestines, (called after Peyer, who well described them.) They are clustered together, (F.) *Plaques de Peyer*, having a honeycomb appearance — *Plaques gaufrées*—and are extremely numerous. They occur most in the lower portion of the ileum, and resemble, in their morphology and functions, the lymphatic ganglions. They are, evidently, concerned in the great function of lymphosis.

PE'ZA, (*πεζα*.) The foot: according to some, the sole of the foot; and to others, the astragalus, the ankle.

PEZI'ZA seu PEZE'ZA AURIC'ULA, *Tremell'a auric'ula Ju'dæ, Auric'ula Ju'dæ, Auricula'ria sambu'ci* seu *sambu'cina, Exid'ia auric'ula Ju'dæ, Meru'lius auric'ula, Fun'gus sambu'cinus, Agar'icus Auric'ulæ formâ, Jew's Ear. Ord.* Fungi. This fungus is said to be astringent; but has chiefly been used in decoction or infusion as a gargle in relaxed sore throat.

PFEF'FERS OR PFÄF'FERS, MIN'ERAL WA'TERS OF, *Thermæ Piperi'næ, Th. faba'riæ.* These springs, which are in the Swiss Alps, are simply thermal: temperature 100° of Fahrenheit.

PHA'CĒ, (φακη, 'a grain of the lentil,') *Ervum lens.* Also, chloasma; lens; the crystalline lens; and a flask for the application of heat, so called owing to its flattened lenslike shape.

PHACELLUS, (φακελλος,) Fasciculus.

PHACELUS, (φακελος,) Fasciculus.

PHACHYMENITIS, Phacohymenitis.

PHACI, (pl. of *Phacus,*) Ephelides.

PHA'CICUS, *Phaco'tus, Phaco'des,* (from *phace.*) Lens-shaped, lenticular.

PHACI'TIS, *Phacoïdei'tis, Lenti'tis, Crystalli'tis, Cristalloïdi'tis, Gleni'tis,* (*phace,* and *itis.*) Inflammation of the crystalline lens. Inflammation of the capsule of the lens is termed *Capsi'tis, Capsuli'tis, Crystal'linocapsuli'tis,* and *I'hacocysti'tis.*

PHACOCOPIS, (*phace,* and κοπις, 'a knife,') Phacopis.

PHACOCYSTE, (*phace,* and κυστις, 'a cyst or bladder,') see Crystalline.

PHACOCYSTECTOM'IA, (*phacocyste,* and εκτομια, 'cutting out.') An operation for cataract, which consists in cutting out a part of the capsule of the lens.

PHACOCYSTITIS, (*phacocyste,* and *itis,*) see Phacitis.

PHACO'DES, (φακωϊης, *phace,* and *ades,*) Phacicus.

PHACOHYMENI'TIS, *Phakohymeni'tis, Phachymeni'tis, Phacymeni'tis, Inflamma'tio cap'sulæ len'tis;* (*phace,* 'υμην, 'a membrane,' and *itis.*) Inflammation of the capsule of the crystalline.

PHA'COID, *Phacoï'des,* (from *phace,* and ειδος, resemblance.') Resembling a lens. See Crystalline.

PHACOIDEITIS, (*phacoid,* and *itis,*) Phacitis.

PHACOMALACIA, (*phace,* and μαλακος, 'soft,') Cataract, soft.

PHACOMETACHORE'SIS, (*phace,* and μεταχωρεω, 'to change place.') Dislocation of the crystalline.

PHAC'OPIS, *Phacac'opis, Phaco'tus,* (*phace,* and κοπις, 'a knife,') *Scalpel'lum lenticula're.* A lenticular-shaped knife.

PHACOPALINGEN'ESIS, (*phace,* παλιν, 'again,' and γενεσις, 'generation.') Regeneration of the crystalline.

PHACOPS'IS, (*phace,* and οψις, 'vision.') The state of one who has chloasma or freckles on the face.

PHACOPTIS'ANA, *Pha'cium,* (*phace,* and πτισανη, 'drink.') A drink of lentils. A poultice of lentils.

PHACOS, (φακος,) Ervum lens.

PHACOSCOTOMA, (*phace,* and σκοτωμα, 'darkness,') Cataract.

PHACOSCLERO'MA, (*phace,* and σκληρος, 'hard,' and *oma.*) Induration of the crystalline.

PHACOTUS, (φακωτος, 'lensshaped,') Phacicus, Phacopis.

PHACUS, (φακος,) Ervum lens.

PHACYMENITIS, Phacohymenitis.

PHÆNOMENOLOGIA, (*phænomenon,* and λογος, 'a discourse,') Semeiology.

PHÆNOMENON, (φαινω, 'to manifest,') Phenomenon.

PHÆNOMENOSCOPIA, (*phænomenon,* and σκοπεω, 'to examine,') see Symptomatology.

PHAGÆNA, (φαγαινα, from φαγω, 'to eat,') Boulimia.

PHAGEDÆNA, (φαγεδαινα, 'a ravenous hunger,' from φαγω, 'to eat,') Boulimia, Phagedenic ulcer—p. Gangrænosa, Hospital gangrene—p. Sloughing of the mouth, Cancer aquaticus.

PHAGEDEN'IC, *Phagedæ'nous, Phagedæ'nicus, Depas'cens, Ro'dent,* (F.) *Phagédénique, Rongeant.* That which rapidly eats away.

PHAGEDENIC CHAN'CRE. A destructive form of primary syphilitic sore. A virulent variety has been long known in the London Hospitals under the name, "*Swan alley sore,*" from the miserable locality inhabited by prostitutes, in which it formerly prevailed.

PHAGEDENIC UL'CER, *No'mē, Phagedæ'na, Ul'cus depas'cens* seu *obam'bulans* seu *fer.'num,* (F.) *Ulcère phagédénique* ou *rongeante,* is one which rapidly eats and corrodes the neighbouring parts.

Phagedæ'ic, in Materia Medica, is a substance used for destroying fungous granulations in ulcers, &c.

PHAGEDENOUS, Phagedenic.

PHAKOHYMENITIS, Phacohymenitis.

PHALACRA, (φαλακρα,) Calvities.

PHALACROMA, (φαλακρωμα,) Calvities.

PHALACROSIS, (φαλακρωσις,) Calvities.

PHALACROTES, (φαλακροτης,) Alopecia.

PHALÆNA PINGUINALIS, (φαλαινα, 'a moth,') see Ectozoa.

PHALAIA. A barbarous term, employed by Basil Valentine to designate a universal medicine or panacea.

PHALANGAGRA, (*phalanx,* and αγρα, 'a seizure,') Phalangarthritis.

PHAL'ANGAL OR PHALAN'GAL, *Phalan'gian, Phalangia'nus,* (from *phalanx.*) Having relation to a phalanx.

PHALANGARTHRI'TIS, (*phalanx,* αρθρον, 'a joint,' and *itis,*) *Phalan'gagra.* Gout in the fingers. Inflammation of the joints of the fingers.

PHALANGE, (φαλαγγη,) Phalanx.

PHALANGES DES DOIGTS, see Phalanx—p. of the Fingers, see Phalanx—*p. des Orteils,* see Phalanx—p. of the Toes, see Phalanx.

PHALANGETTES, see Phalanx.

PHALANGETTIEN. Professor Chaussier uses this term for anything relating to the third phalanx of the fingers or toes,—*Phalangien,* for what relates to the first,—and *Phalanginien,* to the second.

PHALANGIAN, Phalangal.

PHALANGIEN, see *Phalangettien.*

PHALANGINES, see Phalanx.

PHALANGINIEN, see *Phalangettien.*

PHALANGIUM ESCULENTUM, (from φαλαγγιον, 'a venomous spider,' whose poison it was supposed to neutralize,) Scilla esculenta.

PHALANGO'SIS, *Hispid'itas,* (from φαλαγξ, 'a row of soldiers,' and *osis.*) An affection of the eyelids, in which the lashes are arranged in two or three rows. See *Trichiasis.* Also, dropping of the upper eyelid, from paralysis of the levator palpebræ superioris muscle.

PHAL'ANX, gen. *Phalan'gis,* (φαλαγξ, gen. φαλαγγος, 'a row of soldiers,') *Phalan'gē, Phalango'ma.* A name given to the small bones which form the fingers and toes, because placed alongside each other like a phalanx. They are distinguished into the *Phalan'ges of the fing'ers, Os'sa* seu *Ag'mina* seu *A'cies* seu *Artic'uli* seu *Scutic'ula* seu *Scu'tulæ* seu *No'di* seu *Interno'dia* seu *Scytal'ides* seu *Con'dyli Digito'rum Ma'nûs;* and the *Phalanges of the Toes, Os'sa* seu *Artic'uli* seu *Interno'dia Digito'rum Pe'dis.* I. *Phalanges of the fing'ers,* (F.) *Phalanges des doigts.* They are,

in each hand, fourteen.—three to each finger, and two to the thumb; and are situate one above the other. They are distinguished, numerically, reckoning from the base towards the tip of the finger. 1. The *first* or *metacarpal, Procon'dyli*, (F.) *Premières phalanges* ou *Phalanges métacarpiennes*. 2. The *second* or *middle phalanges*, (F.) *Secondes phalanges* ou *Phalanges moyennes, Phalangines*, (Ch.) 3. The *third phalanges, Metacon'dyli, Phalan'ges un'guium*, (F.) *Troisièmes phalanges* ou *Phalanges unguéales* ou *unguifères* ou *unguinales, Phalangettes* (Ch.), which terminate each finger, and support the nail. II. *Phalan'ges of the toes*, (F.) *Phalanges des Orteils*. They are the same in number as those of the fingers, but much smaller, and of a very different shape.

The phalanges of a finger or toe are united with each other; and the first with the metacarpal or metatarsal bone. They are developed from two points of ossification; one for the superior extremity, and the other for the body and inferior extremity.

PHAL'ARIS CANARIEN'SIS, *P. ova'ta*, (φαλαρος,—from φαω, 'I shine,'—'bright, shining,' in application to the seed.) *Cultivated Canary Grass*, (F). *Alpiste. Ord.* Graminceæ. *Sex. Syst.* Triandria Digynia. The seed of this grass, *Canary seed*, (F.) *Graines d'aspic*, afford a nourishing meal. The ancients recommended them for allaying pains in the kidney and bladder.

PHALARIS ZIZANOIDES, Andropogon muricatus.

PHALLAL'GIA, *Phallodyn'ia*, (*phallo*, and αλγος, 'pain.') Pain in the male organ.

PHALLANAS'TROPHE, (*phallo*, and αναστροφη, 'a turning back.') Distortion of the male organ backwards.

PHALLANCYLOSIS, (*phallo*, and αγκυλωσις, a bending,') Chordee.

PHALLI'TIS, *Priapi'tis*, (*phallo*, and *itis*.) Inflammation of the male organ.

PHALLO, (from φαλλος, 'the male organ,') in composition, the male organ.

PHALLOCAMPSIS, (*phallo*, and καμψις, 'bending,') Chordee.

PHALLOCARCINO'MA, gen. *Phallocarcino'matis*, (*phallo*, and καρκινωμα, 'cancer.') Carcinoma or cancer of the penis.

PHALLODYNIA, (*phallo*, and οδυνη, 'pain.')

PHALLON'CUS, (*phallo*, and ογκος, 'swelling.') Tumefaction of the male organ.

PHALLOPSOPII'IA, (*phallo*, and ψοφος, 'a noise.') Discharge of wind from the male urethra.

PHALLORRHAG''IA, (*phallo*, and ῥηγνυμι, 'I break forth.') Hemorrhage from the male urethra. Stimatosis.

PHALLORRHŒA, (*phallo*, and ῥεω, 'to flow,') Gonorrhœa.

PHALLORRHOÏS'CHESIS, (*phallo*, ῥοη, 'discharge,' and ισχειν, 'to withhold.') Sudden arrest of a gonorrhœal discharge.

PHALLUS, (φαλλος,) Dildoe, Penis—p. Esculentus, Morchella esculenta.

PHANEROG'AMOUS, *Phanerogam'ic, Phanerogam'icus*, (F.) *Phanérogame*, (φανερος, (φαω, 'I shine,') 'evident,' and γαμος, 'marriage.') An epithet used by botanists for plants whose sexual organs are apparent. It is, consequently, the opposite to *cryptogamous*.

PHANTASIA, (φανταζω, from φανταζω. (φαινω, 'to bring to light,') 'to make appear,') Delirium, Imagination.

PHAN'TASM, *Phantas'ma, Phanto'ma, Phas'ma*. A phantom, false appearance, apparition. Hallucination. Derangement of the sense of sight or of the intellectual faculties, causing objects to be perceived, which are not before the eyes.

PHANTASMA, gen. *Phantasm'atis*, (φανταϭμα, gen. φανταϭματος,) Phantasm, Pseudoblepsia.

PHANTASMATICUS, (from *phantasma*,) Phantasticus.

PHANTASMATOSCOPIA, (*phantasma*, and σκοπεω, 'I view,') Metamorphopsia.

PHANTASMOSCOPIA, Metamorphopsia.

PHANTAS'TICUS, (φανταστικος,) Inebriant. Creating phantoms—*phantasmat'icus*.

PHANTOM, (φαινω, 'to cause to appear,') Fantom—p. Tumour, see Fantom.

PHANTOMA, gen. *Phanto'matis*, Phantasm—p. Obstetricium, Fantom.

PHARMACEIA, (φαρμακεια,) Pharmacy, Poisoning.

PHARMACEUM, (φαρμακειον,) Apotheca.

PHARMACEU'MA, gen. *Pharmaceu'matis*, (φαρμακευμα,) Medicament.

PHARMACEUS, (φαρμακευς,) Apothecary.

PHARMACEUTA, (φαρμακευτης,) Apothecary.

PHARMACEU'TIC, *Pharmaceu'ticus, Pharmaceu'tical, Pharmaceutica'lis*, (F.) *Pharmaceutique*, (from *pharmacon*.) An epithet for everything belonging to pharmacy. Thus, we say, *Pharmaceutical preparations*, &c.

PHARMACEUTICE, (φαρμακευτικη [τεχνη]) Pharmacy.

PHARMACEUTIST, (φαρμακευτης,) Apothecary.

PHARMACEUTRIA, (φαρμακευτρια.) A woman who prepares or deals in drugs or poisons.

PHARMACIA, (φαρμακια,) Pharmacy, Poisoning.

PHARMACIEN, Apothecary.

PHARMACO, (from φαρμακον, 'a medicine,' 'poison,') in composition, generally medicine; at times, poison.)

PHARMACOCATAGRAPHOLOG''IA, *Catagraphol'og''ia, Ars for'mulas concinnan'di*, (*pharmaco*, κατα, 'beneath,' γραφη, 'a writing,' and λογος, 'a description.') The art of writing prescriptions.

PHARMACOCHYMIA, (*pharmaco*, and *chymia*,) Chymistry, pharmaceutical.

PHARMACODYNAM'ICS, (*pharmaco*, and δυναμις, 'power,') *Pharmacodynam'icē, Dynam'ical Mate'ria Med'ica, Pharmacodynum'ica doctri'na, Pharmacodynamiolog''ia*. A division of pharmacology, which considers the effects and uses of medicines.

PHARMACODYNAMIOLOGIA, (same etymon and λογος, 'a discourse,') Pharmacodynamic.

PHARMACOGNO'SIA, *Acogno'sia, Acogno'sia*, (*pharmaco*, and γνωσις, 'knowledge.') A division of pharmacology, which treats of simples, or unprepared medicines.

PHARMACOLOGIA, (*pharmaco*, and λογος, 'a discourse.') Materia medica.

PHARMACOMA'NIA, (*pharmaco*, and μανια, 'mania.') A mania for prescribing or for taking or giving medicine, or for drugging.

PHARMACON, (φαρμακον,) Medicament, Poison.

PHARMACOPŒ'IA, *Pharmacopœ'a, Co'dex medicamenta'rius*, (F.) *Pharmacopée*, (*pharmaco*, and ποιεω, 'I make.') A work, containing a collection of formulæ for the preparation, &c., of medicines: generally published by authority. Formerly, a chemical laboratory, *Laborato'rium chym'icum* seu *pharmaceut'icum*.

PHARMACOPOÈSE. The preparation of medicines.

PHARMACOPŒUS, Apothecary, Druggist.

PHARMACOPOLA, (φαρμακοπωλη, from *pharmaco*, and πωλεω, 'to sell,') Apothecary, Druggist.

PHARMACOPOLE, Apothecary, Druggist.

PHARMACOPO'LIUM, *Apothe'ca, Offici'na, Taber'na Med'ica*. The shop of the druggist or apothecary, (F.) *Apothicairerie*.

PHARMACOPOS'IA, (*pharmaco*, and ποσις, 'a potion.') A liquid medicine, especially one that is cathartic.

PHARMACO'SA MEDICAMEN'TA, from

pharmacon. Medicines that contain poisonous substances.

PHARMACOTHE'CA, (φαρμακοθηκη, *pharmaco*, and θηκη, 'a sheath.') A case for medicines. A medicine chest.

PHARMACOTHERAPI'A, *Pharmax'is*, (*pharmaco*, and θεραπεια, 'treatment.') Cure of diseases by medicine.

PHARMACTER, (φαρμακτηρ,) Apothecary.

PHARMACUM, (φαρμακον,) Medicament, Poison —p. Ægyptiacum, Ægyptiacum — p. Amatorium, Philter.

PHAR'MACUM AD AU'RES, *Ægypt'ium Medicamen'tum ad Au'res*. A name given to a medicine composed of bitter almonds, white pepper, saffron, myrrh, opium, frankincense, castor, verjuice, sulphate of iron, vinegar, pomegranate bark, unguentum nardinum, &c. It was believed to be useful for cleansing fetid ulcers in the ears.

PHARMACURGICUS, (*pharmaco*, and εργαν, 'to work,') Apothecary.

PHARMACURGUS, Apothecary.

PHAR'MACY, *Pharmaci'a*, *Pharmacu'ticē*, *Pharmax'is*, (from *pharmacon*.) The art which teaches the knowledge, choice, preservation, preparation, and combination of medicines. It was formerly divided into *Galen'ical* and *Chym'ical*. The former, called after Galen, embraced the operations to which medicines were subjected without chymistry;—the latter, *Chymical Pharmacy* or *Pharmacu'tic Chymistry*, *Pharmacochym'ia*, comprised the preparation of medicines founded on the chymical action of their principles.

PHARMAXIS, (φαρμαξις,) Pharmacotherapia, Pharmacy.

PHARNA'CEUM LINEA'RĒ, (called after Pharnaces, King of Pontus.) A South African plant, *Nat. Ord.* Paronychiaceæ, employed at the Cape in pulmonary affections. It is generally given in infusion.

PHARUS, (φαρος,) Pharynx.

PHARYGATHRON, (φαρυγαθρον,) Pharynx.

PHARYGETHRUM, (φαρυγεθρον,) Pharynx.

PHARYNGÆ'UM (SAL.), (from *pharynx*.) A compound of cream of tartar, nitrate of potassa, burnt alum, and distilled vinegar. It was formerly employed, united with honey and plantain-water, to make gargles, which were advised in quinsy.

PHARYNGALGIA, (*pharyngo*, and αλγος, 'pain,') Pharyngódynia.

PHARYNGĒ, Pharyngeal.

PHARYNGE'AL OR PHARYN'GEAL, *Pharyngæ'us*, *Fau'cial*. (F.) *Pharyngé*, *Pharyngien*, (from *pharynx*.) That which relates to the pharynx or fauces. A name given to the muscles, vessels, and nerves of the pharynx.

PHARYNGEAL AR'TERIES. These are two in number. The one—*supe'rior* or *pter'ygo-pal'atine*, *Ra'mus Pharyngæ'us supe'rior* of Haller — arises from the internal maxillary at the base of the zygomatic fossa, passes through the pterygopalatine canal, and proceeds to be distributed to the pharynx and the corresponding part of the Eustachian tube. The other — the *infe'rior* — *Pharyngæ'a ascen'dens* of Haller — arises from the external carotid, on a level with the facial. It ascends along the lateral and posterior part of the pharynx, and divides into two branches; the one — the *pharyngeal*, properly so called — is distributed to the pharynx; the other — the *meningeal* — gives its branches particularly to the dura mater.

PHARYNGEAL NERVE. A branch sent by the pneumogastric to the pharynx. It descends behind the internal carotid; communicates with the glosso-pharyngeal; and divides, opposite the middle constrictor of the pharynx, into a great number of filaments, which anastomose, in a multitude of different directions, with filaments of the glossopharyngeal nerve, of the superior laryngeal branch, and of the first cervical ganglion. These different nervous filaments united constitute the *pharyngeal plexus*, the irregular meshes of which send numerous ramifications to the pharynx.

PHARYNGEAL VOICE, see Voice.

PHARYNGEMPHRAX'IS, (*pharyngo*, and εμφραξις, 'obstruction.') Obstruction of the pharynx.

PHARYNGETHRON, (φαρυγγεθρον,) Pharynx.

PHARYNGEURYSMA, (*pharyngo*, and ευρυσμα, 'dilatation,') Pharyngocele,

PHARYNGICUS, (from *pharynx*,) Pharyngeal.

PHARYNGIEN, Pharyngeal.

PHARYNGISMUS, Pharyngospasmus.

PHARYNGITE, Cynanche pharyngea — *p. Tonsillaire*, Cynanche tonsillaris.

PHARYNGITIS, (*pharyngo*, and *itis*,) Cynanche pharyngea.

PHARYNGITIS APOSTEMATO'SA. Abscess of the pharynx.

PHARYNGI'TIS, DIPHTHERIT'IC, *Angi'na pseudomembrana'cea* seu *membrana'cea* seu *pellicula'ris* seu *plas'tica* seu *diphtherit'ica* seu *malig'na* seu *pseudomembrano'sa* seu *pestilentia'lis* seu *fau'cium exsudati'va Pseu'domem'branous Inflamma'tion* or *Diphtheri'tis* or *Diphthe'ria of the Throat*, *Hogskin angi'na*, (F.) *Angine couenneuse* ou *gutturale couenneuse* ou *pseudo-membraneuse* ou *plastique* ou *diphthéritique*, *Herpes guttural*. Diphtheritic inflammation of the pharynx. See Diphtheritis.

When *diphtheria* is spoken of, it is usually this affection that is meant; although the local phenomena are rather expressions of the peculiar adynamic condition, termed diphtheritic; which may destroy without much or any evidence of the pharyngeal affection. It is this adynamic condition which demands the main attention; — the pharyngeal exudation requiring but little. During convalescence, peculiar paralytic phenomena supervene at times. See Paralysis, diphtheritic. Diphtheritic pharyngitis is not new. It it manifestly the malignant sore-throat, which is described as having been so fatal —in the time of Horace Walpole, for example. See Cynanche maligna.

PHARYNGITIS, FOLLIC'ULAR, *Follicular Inflamma'tion of the Phar'ynx*, *Angi'na follicula'sa* and *A. glandulo'sa of the Pharynx*, *Ac'nē of the Throat*. Inflammation and enlargement of the follicles of the pharynx, occasionally extending to the larynx. Sometimes termed *Clergyman's Sorethroat*, *Rhetoran'chē*, *Tu'bercles of the Larynx* and *Fauces*, and *Tuber'cular Sorethroat*.

PHARYNGITIS, GANGRENOUS, Cynanche maligna.

PHARYNGO, (φαρυγξ, gen. φαρυγγος, in composition, the pharynx.)

PHARYNGOCACE, (*pharyngo*, and κακος, 'evil,') Cynanche maligna.

PHARYNGOCE'LĒ, *Pharyngeurys'ma*, *Diverti'culum* seu *Her'nia* seu *Prolap'sus Œsoph'agi* seu *pharyn'gis*, *Œsoph'agus succenturia'tus*, (from *pharyngo*, and κηλη, 'a tumour.') An enlargement at the upper part of the gullet, in which the food sometimes rests in considerable quantity.

PHARYNGODYN'IA, *Pharyngal'gia*, (*pharyngo*, and οδυνη, 'pain.') Pain in the pharynx.

PHARYNGOGLOS'SAL, *Glossopharynge'al*, *Pharyngoglossia'nus*. That which belongs to the pharynx and tongue.

PHARYNGOGLOSSAL NERVE, *Glossopharynge'al Nerve*, *Lingua'lis latera'lis*, (F.) *Nerf Glossopharyngien*, *Pharyngoglossien* — a portion of the eighth pair — arises from the superior and lateral parts of the spinal marrow, between the facial and pneumogastric nerves, by several filaments,

which soon unite into a single cord, that passes out of the cranium by the foramen lacerum posterius; goes downwards and forwards, and gains the posterior and inferior part of the tongue. Immediately after its exit from the cranium, it gives a branch to the meatus auditorius externus, and receives a filament from the facial, and another from the pneumogastric nerve. It then furnishes two other filaments, which descend upon the carotid artery, and unite at the bottom of the neck with branches from the cervical ganglions and cardiac nerves, and give two filaments to the stylopharyngeus muscle. The glossopharyngeus, after sending a twig or two to the tonsil, to the upper part of the pharynx and membrane of the epiglottis, divides into many branches, which run partly to the margin, and partly to the middle of the root of the tongue; supplying, especially, the papillæ majores, and the parts in their neighbourhood.

By some, this nerve is regarded as the controller of the associated motions of the tongue and pharynx. By others, it is esteemed to be the special nerve of gustation.

PHARYNGOG'RAPHY, *Pharyngogra'phia*, (*pharyngo*, and γραφη, 'a description.') An anatomical description of the pharynx.

PHARYNGOL'OGY, *Pharyngolog''ia*, (*pharyngo*, and λογος, 'a discourse.') The part of anatomy which treats of the pharynx.

PHARYNGOLYSIS, (*pharyngo*, and λυσις, 'solution,') Pharyngoplegia.

PHARYNGOPARALYSIS, Pharyngoplegia.

PHARYNGOPERISTOLE, (*pharyngo*, and περιστελλω, 'to contract,') Pharyngostenia.

PHARYNGOPLE'GIA, (*pharyngo*, and πλησσω, 'I strike.') *Dysphag'ia paralyt'ica* seu *tor'pida* seu *aton'ica*, *Angi'na paralyt'ica*, *Asthen'a Deglutitio'nis*, *Pharyngol'ysis*, *Pharyngoparal'ysis*, *Paral'ysis Œsoph'agi*, *Gu'læ Imbecil'litas*. Paralysis of the pharynx or œsophagus: commonly a symptom of general paralysis, or of approaching dissolution.

PHARYNGORRHAG''IA, (*pharyngo*, and ῥαγη, 'rupture.') Hemorrhage from the vessels of the pharynx.

PHAR'YNGOSCOPY, *Pharyngoscop'ia* (*pharyngo*, and σκοπεω, 'I view.') Inspection of the pharynx.

PHARYNGOSPAS'MUS, *Pharyngis'mus*, (*pharyngo*, and σπασμος, 'spasm.') Spasm or cramp of the pharynx.

PHARYNGOSTAPHYLINUS, (*pharyngo*, and σταφυλη, 'uvula,') Palatopharyngeus.

PHARYNGOSTEN'IA, *Pharyngoperis'tolē*, (*pharyngo*, and στενος, 'a narrowness.') Stricture or contraction of the pharynx.

PHARYNGOTOME, *Pharyngot'omus*, (*pharyngo*, and τεμνω, 'I cut.') An instrument, invented by J. L. Petit, used to scarify inflamed tonsils, and to open abscesses, which form in the parietes of the pharynx. It is composed of a long, narrow blade with a lancet point, enclosed in a sheath or canula of silver slightly curved. This instrument is carried to the part to be cut, and the point of the blade is made to pass out of the sheath, by pressing on a button at the end of the pharyngotome. A spring causes the blade to re-enter as soon as the pressure is removed.

PHARYNGOT'OMY, *Pharyngotom'ia*. Some authors have used this word synonymously with œsophagotomy. It means, also, scarification of the tonsils, or an incision made for opening abscesses there, &c.

PHAR'YNX, gen. *Pharyn'gis*, (φαρυγξ, gen. φαρυγγος,) *Phar'yx*, *Pha'rus*, *Gu'la*, *Læ'mus*. *Fau'ces*, *Pharyg'ethrum*, *Pharyn'gethron*, *Pharyn'gekhros*, *Pharyg'athron*, *Isth'mus*, *Isth'mion*, *Inglu'vies*, *Princip'ium gu'læ*, *Os poste'rum*, *Gur'ges*, *Bronchus*, (from φαρω, 'I cut or divide,') (F.) *Arrière-bouche*, *Gosier*, *Gorge*. A species of musculomembranous, symmetrical canal, on the median line, irregularly funnelshaped, and situate between the base of the cranium and the œsophagus, in front of the vertebral column. It is very narrow above; but dilates in the middle, and again contracts below, at its junction with the œsophagus. Into the anterior paries of the pharynx open, successively, from above to below,—the posterior orifices of the nasal fossæ; the Eustachian tubes; the posterior aperture of the mouth, and the top of the larynx. The pharynx is formed, externally, of a muscular coat, and, internally, of a mucous membrane, which is continuous, above, with the Schneiderian membrane; and in the middle, with that of the mouth; below, with that of the œsophagus; and, at the sides, with that of the Eustachian tubes. This membrane has no villi, and presents only a few inequalities, which are owing to the presence of muciparous follicles. The muscular coat of the pharynx is composed of the constrictor muscles, stylopharyngei, and pharyngostaphylini. The vessels and nerves are called *pharyngeal*. The pharynx serves as a common origin for the digestive and respiratory passages. It gives passage to the air, during respiration; and to the food at the time of deglutition.

PHARYNX, FOLLICULAR INFLAMMATION OF THE, Pharyngitis, follicular.

PHARYX, gen. *Phar'ygis*, (φαρυξ, gen. φαρυγος,) Pharynx.

PHASELUS, (φασηλος,) Phaseolus.

PHASE'OLUS, (φασηολος, 'a small boat,') *P. Vulga'ris*, *Phasi'olus*, *Phase'lus*, *Fase'lus*, *Fase'olus*, *Bo'na*, *Boo'na*, *Fa'ba*; *Kid'ney Bean*; *French Bean*; *Bush-bean*, *String-bean*, *Snap-bean*, *Snaps*, (F.) *Fusséole*, *Haricot*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. When young and well boiled, the unripe pods are used as a legume. They are easy of digestion, and delicately flavoured. The sweet taste of the juice is owing to the presence of mannite — *phascoman'nite*. The ripe beans — *haricot beans* — dried, are used in soups, &c.

PHASEOLUS CRE'TICUS, *Cajan*, *Cayan*. A decoction of the leaves, according to Ray, restrains the hemorrhoidal flux when excessive.

PHASEOLUS VULGARIS, Phaseolus.

PHASEOMANNITE, see Phaseolus.

PHASIA'NUS GAL'LUS, (from the river, Φασις, in Colchis, near the Black Sea,) *Cock*, (F.) *Coq*. The parts of generation of the cock, dried and pulverized, were formerly regarded as proper for increasing the quantity of semen. The fat was used as emollient and resolvent; the brain, in diarrhœa; the gall, in freckles and diseases of the eyes. These phantasies are now abandoned.

PHASIOLUS, (φασιολος,) Phaseolus.

PHASMA, (φασμα, from φαω, 'to cause to appear.') Phantasm.

PHATNE, (φατνη, 'a crib with divisions,') Alveolus.

PHATNION, (dim. of *phatne*,) Alveolus.

PHATNORRHAG''IA, *Stomatorrhag''ia alveolo'rum*, (*phatne*, and ῥηγνυμι, 'I break forth.') Hemorrhage from the alveoli.

PHAUSIN'GES, (φαυσιγγες, plural of φαυσιγξ, from φαυζω, 'I roast.') Spots or blisters on the legs, produced by heat; and, in a more extensive signification, by any other cause. Also, a pustule.

PHELLANDRE, Phellandrium aquaticum.

PHELLAN'DRIUM AQUAT'ICUM, *Phellandrium*, *Œnan'thē phellan'drium* seu *aquat''ica*, *Ligus'ticum phellan'drium*, *Fœnic'ulum aquat'icum*, *Cicuta'ria aquatica*, *Wa'ter Fen'nel*. *Fineleaved Wa'ter Hem'lock*, (F.) *Phellandre*, *Fenouil d'eau*, *Cigüe d'eau*, *Millefeuille aquatique*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. This

plant is stimulant and narcotic. It has been used in intermittents and dyspepsia. It has, also, been given in phthisis pulmonalis, and in cases of scrofulous atonic ulcers.

PHENE, Benzole.

PHENGOPHOBIA, (*φεγγος*, 'light,' and *φοβος*, 'dread,') Photophobia.

PHENIG'MUS, (*φοινιγμος*,) *Phœnig'mus*, (from *φοινιξ*, 'purple or red.') *Red Jaun'dice*. A cutaneous affection, consisting of redness diffused over the skin, without fever. Sauvages makes it a genus of his order *Icteritiæ*. Also, the act of irritating a part by a stimulating application.

PHENOL, Acid, phenic.

PHÉNOMÈNE, Phenomenon.

PHENOM'ENON, (*φαινομενον*,) *Phænom'enon*, (F.) *Phénomène*, (*φαινομαι*, 'I appear.') An extraordinary and unexpected event. In *Medicine*, it means any change, appreciable by our senses, which supervenes in an organ or function: — as the *phenomena* of the circulation, respiration, &c. It is used in pathology, synonymously with symptom.

PHENYLE, HYDRURET OF, Benzole.

PHEUGYDRON, (*φευγω*, 'to flee,' and *ὑδωρ*, 'water,') Hydrophobia.

PHI'ALA, A *Phi'al* or *Vi'al*, (F.) *Fiole*, (*φιαλη*, *φιλη*, 'a broad drinking cup, a saucer.') A small bottle, in which apothecaries are in the habit of sending out their mixtures, draughts, &c.: hence called *Med'icine Vials*, (F.) *Fioles à Médecine*. They are usually sold in grosses, and assorted into vials of oz. 8; oz. 4; oz. 3; oz. 2; oz. 1½; oz. 1; and oz. ½.

PHILADYNAMICA, (*philo*, *a*, and *δυναμις*, 'power,') Debilitants.

PHILANTHROPUS, (*philo*, and *ανθρωπος*, 'man,') Galium aparine.

PHILIA'TER, *Philia'tros*, (*φιλιατρος*, *philo*, and *ιατρικη*, 'medicine.') An amateur of medicine. One who studies medicine; *Studio'sus medici'næ*.

PHILO, (*φιλεω*, 'I love,') in composition, to love.

PHILOBIO'SIS, (F.) *Philobiosie*, (*philo*, and *βιος*, 'life.') The love of life.

PHILŒ'NIA, (*φιλοινια*, from *philo*, and *οινος*, 'wine.') Love of wine. Addiction to wine.

PHILOGYNIA, (*φιλογυνια*, from *philo*, and *γυνη*, 'a woman,') Muliebrositas.

PHILONIUM LONDINENSE, (after its proposer, Philo,) Confectio opii.

PHILOPATRIDALGIA, (*philo*, *πατρις*, 'one's country,' and *αλγος*, 'pain,') Nostalgia.

PHILOPATRIDOMANIA, (*philo*, *πατρις*, 'one's country,' and *mania*,) Nostalgia.

PHILOSOPHER'S STONE, see Alchymy.

PHILOSOPHIA CORPORIS VIVI, Physiology — p. Hermetica, Alchymy — p. per Ignem, Chymistry.

PHIL'TER, (*φιλτρον*, from *φιλεω*, 'to love,') *Philtrum*, *Phar'macum* seu *Poc'ulum amato'rium*, *Amato'rium venefic''ium*, (F.) *Philtre*. A medicine or drink considered capable of causing love.

PHILTRUM, Lacuna labii superioris.

PHILYRA, Tilia.

PHILY'REA LATIFO'LIA, (after *Phily'ra*, 'mother of Chiron.') A shrub of the south of France and Spain, *Ord.* Oleaceæ, whose leaves have been used as an astringent in ulcers of the mouth and throat. The flowers, steeped in vinegar, have been applied to the head in headache. The decoction of the leaves is said to be diuretic.

PHIMOS, (*φιμος*,) Capistrum.

PHIMO'SICUS. Relating to Phimosis.

Sauvages calls *Ischu'ria phimo'sica* seu *urethra'lis à phimo'si*, the retention of urine which depends upon phimosis.

PHIMO'SIS, improperly *Phymo'sis*, *Capistra'tio*, *Epago'gium*, *Ligatu'ra glan'dis*, *Strictu'ra præpu'tii*, *Reduc'tio præpu'tii impedi'ta*, (*φιμοω*, 'I bind tight.') A disease which consists in a preternatural narrowness of the opening of the prepuce, so that it cannot be carried behind the corona glandis. This affection is most commonly congenital. Sometimes it is accidental, and dependent upon tumefaction of the glans, or of the prepuce, as occurs in syphilis. To remedy this state, the prepuce may be divided by means of a bistoury and director; or circumcision may be practised.

PHIMOSIS ADNATA seu CONGENITA seu PUERILIS, Congenital phimosis—p. Circumligata, Paraphimosis—p. Congenita, P. adnata.

PHIMOSIS ŒDEMATO'DES, *Hydrophimo'sis*. Phimosis with œdematous swelling of the prepuce.

PHIMOSIS PUERILIS, Ph. adnata.

PHLASMA, gen. *Phlasm'atis*, (*φλασμα*, from *φλαω*, 'to bruise,') Contusion.

PHLEBARTERIODIALYSIS, (*phlebo*, *αρτηρια*, 'artery,' and *διαλυσις*, 'a loosing or separating,') see Aneurism.

PHLEBECTA'SIA, *Phlebec'tasis*, (*phlebo*, and *εκτασις*, 'dilatation.') Dilatation of a vein, or of a portion of a vein.

PHLÉBECTIARCTIE, (*phlebo*, and *arcto*, 'I contract.') Contraction of a vein.

PHLEBEMPHRAX'IS, (*phlebo*, and *εμφραξις*, 'obstruction.') Obstruction of a vein.

PHLEBES, pl. of *phlebs*, (*φλεβες*,) see Artery.

PHLEBEURYSMA, (gen. *Phlebeurysm'atis*, (*phlebo*, and *ευρυσμα*, 'dilatation,') Varix.

PHLEB'ICUS, (*φλεβικος*.) Relating or appertaining to a vein.

PHLEB'ION, (*φλεβιον*,) (dim. of *phlebs*,) A vein. A small vein,— *Ve'nula*.

PHLEBIS'MUS, (from *phlebs*.) A term employed by Dr. Marshall Hall for the turgescence of veins, produced by impeded return of the blood. See Trachelismus.

PHLEBI'TIS, *Inflamma'tio vena'rum*, (F.) *Phlébite*, *Inflammation des veines*, (*phlebo*, and *itis*.) Inflammation of the inner membrane of a vein, *Endophlebi'tis*, which sometimes follows bloodletting, and extends from the small wound made in that operation to the neighbouring parts of the venous system. The symptoms are, first, inflammation in the punctured part; and, afterwards, a knotty, tense, painful cord, following the direction of the vessel, and accompanied with more or less fever, according to the extent of the inflammation, the nervous symptoms, &c. Phlebitis, also, sometimes supervenes on the ligature or excision of the varices; after amputation, gun-shot wounds, delivery (*Uterine Phlebitis*, *Lochometrophlebi'tis*, *Metrophlebi'tis puerpera'lis*, *Phlebi'tis uteri'na*, *Metri'tis veno'sa*), the ligature of the umbilical cord, &c. It may terminate by resolution, suppuration, ulceration, or gangrene.

PHLEBITIS, CRURAL, Phlegmatia dolens — p. Uterina, see Peritonitis, and Phlebitis.

PHLEBO, (*φλεψ*, gen. *φλεβος*, 'a vein.') In composition, a vein.

PHLEBOG'RAPHY, *Phlebogra'phia*, (*phlebo*, and *γραφη*, 'a description.') A description of the veins.

PHLEB'OLITE, *Phlebol'ithus*, *Vein stone*, (F.) *Phlébolithe*, (*phlebo*, and *λιθος*, 'a stone.') A loose concretion, varying in size from that of a currant to that of a pea, occasionally found in the veins. It would seem to be formed in the blood.

PHLEBOLITHUS, Phlebolite.

PHLEBOL'OGY, *Phlebolog''ia*, (*phlebo*, and *λογος*, 'a discourse.') The part of anatomy which treats of the veins.

PHLEBOMETRITIS, (*phlebo*, and *metritis*,) Metrophlebitis.

PHLEBOPA'LIA, (*phlebo*, and *παλλω*, 'I palpitate.') With the ancients, *pulsation*, which they

conceived to be produced by the veins. See Pulsus venarum.

PHLEBOPHTHALMOTOM'IA, *Ophthalmophlebotom'ia*, (*phlebo*, *ὀφθαλμος*, 'the eye,' and *τεμνω*, 'I cut.') Blood-letting in the eye.

PHLEBOPLEROSIS ECPHRACTICA, (*phlebo*, and *πληρωσις*, 'fulness,') Inflammation.

PHLEBORRHAG'IA, (*φλεβορραγια*, from *phlebo*, and *ῥηγνυμι*, 'I break out.') Rupture of the veins; and, in a more extensive sense, venous hemorrhage.

PHLEBORRHEX'IS, (*phlebo*, and *ῥηξις*, 'rupture.') Rupture of a vein. Also, hemorrhage from a vein, *Phleborrhag''ia*.

PHLEBOSTENO'SIS, (*phlebo*, and *στενωσις*, 'contraction.') Constriction or contraction of a vein.

PHLEBOTHROMBO'SIS, (*phlebo*, and *thrombosis*.) Coagulation of blood in a vein.

PHLEBOTOMOMA'NIA, *Phlebotomania*, (*phlebotomy*, and *mania*.) An extravagant estimate of the value of blood-letting as a curative agent.

PHLEBOT'OMIST, (*phlebo*, and *τεμνω*, 'I cut.') A *bleeder*. One who practises particularly the art of phlebotomy. See Blood-letting.

PHLEBOTOMUM, (*φλεβοτομον*,) Fleam.

PHLEBOTOMY, (*φλεβοτομια*,) see Blood-letting.

PHLEBS, (*φλεψ*, gen. *φλεβος*,) Vein.

PHLEDONIA, (*φλεδονεια*, from *φλεω*, 'to talk idly,') Delirium.

PHLEGM, (*φλεγμα*,) *Phleg'ma*, *Pitui'ta*, *Pit'uite*, *Mu'cus*, *Moth'er*, (F.) *Phlegme*, *Pituite*. One of the four natural humours of the ancients, which, according to them, was cold and moist, as atrabilis was cold and dry. It predominated, especially, in winter.

Pituita was afterwards applied to every aqueous or excrementitious humour, such as the saliva, nasal and intestinal mucus, serum, &c. The terms *phlegm* and *pituita* are no longer used in physiology,—the different humours having received particular names; but the vulgar still use *phlegm* to designate a stringy mucus, expectorated, or rejected by vomiting. The ancient chymists gave the name 'phlegm' to aqueous, insipid, and inodorous products obtained by subjecting moist vegetable matters to the action of heat.

PHLEGMA, gen. *Phleg'matis*, (*φλεγμα*, gen. *φλεγματος*,) Phlegm — p. Narium Crassum, Nasal mucus—p. Vitrioli, Sulphuric acid (very dilute.)

PHLEG'MAGOGUE, *Phlegmago'gus*, (*phlegma*, and *αγω*, 'I expel.') A medicine formerly believed capable of '*cutting*' or removing phlegm.

PHLEGMAPYRA, (*phlegma*, and *πυρ*, 'fire, fever,') Fever, adeno-meningeal.

PHLEGMASIA, (*φλεγμασια*, from *φλεγω*, 'to inflame,') Inflammation, Phlegmon — p. Adenosa Adenitis—p. Alba dolens puerperarum, Ph. dolens — p. Cellularis, Induration of the cellular tissue — p. Glandulosa, Adenitis — p. Myoica, Myositis — p. of the Peritoneum, Peritonitis.

PHLEGMASIQUE, Inflammatory.

PHLEGMA'TIA, (from *phlegma*,) (F.) *Phlegmatie*. Œdema, Anasarca, Hydrops.

Phlegmatia Do'lens, *P. lac'tea* seu *alba dolens* seu *Leucophlegmasia dolens* seu *Spargano'sis* seu *Scelal'gia* seu *Œde'ma puerperarum*, *Scelon'cus anasar'ca sero'sa*, *Ecphy'ma œdemat'icum*, *Ecchymo'ma lymphat'icum*, *Is'chias a sparganosi*, *Œde'ma lac'teum*, *Galactœde'ma*, *Infarc'tus lac'tei extremita'tum*, *Metas'tasis lactis*, *Hysteral gia galac'tica*, *Hydrophlegma'sia textûs cellulo'si*, *Cru'ral Phlebi'tis*, *White leg*, *Swelled leg*, *Milk leg*, *White swel'ling of lying in women*, (F.) *Phlegmatie puerpérale*, *Œdème des nouvelles accouchées*, *Œdème douleureux des femmes en couche*, *Depôt laiteux sur la cuisse*, *Œdème actif des nouvelles accouchées*, *Enflure* ou *Engorgement des jambes et des cuisses de la femme accouchée*, *E. laiteuse des membres abdominaux*. It occurs, for the most part, in the second or third week after delivery: — is limited to the lower extremity, and chiefly to one side; exhibiting to the touch a feeling of numerous irregular prominences under the skin. It is hot, white, and unyielding; and is accompanied, sooner or later, with febrile excitement. After a few days, the heat, hardness, and sensibility diminish, and the limb remains œdematous for a longer or shorter period. The disease frequently, if not generally, consists in the obstruction of the iliac or other veins. Owing to the pressure of the gravid uterus—the flow of blood being obstructed —the liquid part of it is thrown out into the cellular membrane of the limb. Sometimes the vein is found completely obliterated.

The treatment consists in the use of antiphlogistics: — the application of leeches or cupping-glasses near the groin, fomentations to the limb, &c.; and, when the active state has subsided, the use of a roller, applied gently at first, but, afterwards, gradually tightened.

Phlegmatia Lactea, P. dolens.

PHLEGMATIÆ, see Empresma—p. Membranosæ et parenchymatosæ, Empresma.

PHLEGMAT'IC, (*φλεγματικος*,) *Phlegmat'icus*, *Phlegmato'des*, (F.) *Phlegmatique*. Abounding in phlegm, — as the '*phlegmatic* or *lymphatic* temperament.'

PHLEGMATIE, Phlegmatia — *p. Puerpérale*, Phlegmatia dolens.

PHLEGMATO'DES, (*φλεγματωδης*, from *phlegma*, and *ειδος*.) Full of inflammation, or phlegm.

PHLEGMATOCHEMY, (*phlegma*, and *χημεια*, 'chemistry,') see Chymistry.

PHLEGMATOPYRA, (*phlegma*, and *πυρ*, 'fire, fever,') Fever, adenomeningeal.

PHLEGMATORRHAG''IA, *Phlegmatorrhœ'a*, *Catarrh*, (*phlegma*, and *ῥαγη*, 'a breaking forth.') Stahl and his partisans gave this name to a copious secretion, by the nostrils, of a limpid and thin mucus, without inflammation. It is the *Cory'za Phlegmatorrhag''ia* of Sauvages. See Coryza.

PHLEGMATORRHŒA, (*phlegma*, and *ῥεω*, 'to flow,') Catarrh.

PHLEGMHYMENITIS, Phlegmymenitis.

PHLEG'MON, (*φλεγω*, 'I burn.') *Phlogo'sis phleg'monê*, *Phleg'monê*, *Phlegma'sia*, *Incen'dium*, *Inflammatio*, (Prov.) *Beal*. Inflammation of the areolar texture accompanied with redness, circumscribed swelling, increased heat and pain; which is, at first, tensive and lancinating; afterwards, pulsatory and heavy. It is apt to terminate in suppuration. It requires the antiphlogistic treatment, until suppuration seems inevitable, when the suppuration must be encouraged as the next favourable termination to resolution.

PHLEGMON PÉRINÉPHRÉTIQUE, Periphrenitis—p. Periuterine, see Periuterine.

PHLEGMONE, (*φλεγμονη*,) Inflammation, Phlegmon — p. Mammæ, Mastodynia apostematosa — p. Mastodynia, Mastodynia apostematosa — p. Musculorum, Myositis — p. Parotidæa, Parotis—p. Parulis, Parulis—p. Peritonæi, Peritonitis—p. Ventriculi, Gastritis.

PHLEGMONEUX, Phlegmonous.

PHLEGMONODES, (*φλεγμονωδης*,) Phlegmonous.

PHLEGMONOID, (*phlegmon*, and *ειδος*, 'resemblance.') Resembling phlegmon.

PHLEG'MONOUS, *Phlegmono'des*, *Phleg'monoid*, (F.) *Phlegmoneux*, (from *phlegmon*.) That which relates or belongs to phlegmon.

Phlegmonous Inflammation is the active inflammation of the areolar membrane; in contradistinction to erysipelatous inflammation, or that of the skin.

PHLEGMOPYRA, (*phlegma*, and πυρ, 'fire, fever,') Fever, adenomeningeal.

PHLEGMORRHAGIA, (*phlegma*, and ῥαγη, 'a breaking forth,') Blennorrhœa.

PHLEGMORRHAGIE PULMONAIRE, Bronchorrhœa.

PHLEGMORRHŒA, (*phlegma*, and ῥεω, 'to flow,') Blennorrhœa.

PHLEGMYMENI'TIS, *Phlegmhymeni'tis*, (*phlegma*, ὑμνη, 'a membrane,' and *itis*.') Inflammation of a mucous membrane.

PHLEGMYMENITIS ENTERICA, see Enteritis.

PHLEPS. (φλεψ, gen. φλεβος,) Vein.

PHLOGÆMIA, (*phlogia*, and αἱμα, 'blood,') see Hæmitis.

PHLOGIA, (φλογια,) Inflammation.

PHLOGICUS, (from *phlogia*,) Inflammatory.

PHLOGISTIC, (from *phlogia*,) Inflammatory.

PHLOGISTICI, Empresma.

PHLOGISTON, (φλογιζω, 'to burn,') Hydrogen.

PHLOGMUS, Verbascum thapsus.

PHLOGO'DES, (from *phlogia*, and *odes*.) *Infla'med, Inflamma'tus, Inflammato'rius.* Inflammatory. An epithet employed particularly to express the red colour of the face.

PHLOGOGENE, (φλοξ, gen. φλογος, 'flame,' and γενω, 'to beget,') Hydrogen.

PHLOGOPYRA, (φλοξ, gen. φλογος, 'flame,' and πυρ, 'fever,') Synocha.

PHLOGOSÉ, Inflamed.

PHLOGOSED, Inflamed.

PHLOGO'SIS, (φλογωσις,) *Incen'dium, Inflamma'tion*, (from *phlogia*.) Some writers use this word exclusively for external inflammation—phlegmon; others, for that which is superficial or erysipelatous.

PHLOGOT'ICA, *Inflammations.* The second order in the class *Hæmatica* of Good.

PHLOIOS, (φλοιος,) Cortex.

PHLOMUS, Verbascum thapsus.

PHLOOS, (φλοος,) Cortex.

PHLOR'IDZINE, *Phloridzi'na, Phlor'idzin*, (from *phloos*, and ῥιζα, 'root.') The bitter or active principle of the root and trunk of the apple, pear, cherry, and plum tree. It is deposited from the decoction on cooling; crystallizes in silky spicula of a dead white colour when in masses; or in long slender prisms or tables, when crystallized with care. 1000 parts of water, at a temperature of from 32° to 71°, only dissolve about one part; but at from 70° to 212°, it is dissolved in all proportions. It is very soluble in pure alcohol, but only slightly so in ether; s. g. 1.429. It has been administered successfully in intermittents, — 10 to 20 grains being generally required to arrest the paroxysm. It may be given either in the form of pill or powder.

PHLOUS, (φλους,) Cortex.

PHLOX, Verbascum thapsus.

PHLYCTÆ'NA, (φλυκταινα, from φλυω, 'to bubble up,') *Phlyctæ'nis, Phlyc'tis, Phlyza'cion, Ampull'a, Holophlyc'tis, Phlyc'tis, Phly'sis*, (F.) *Phlyctène.* A tumour formed by the accumulation of a serous fluid under the epidermis.

PHLYCTÆNOÏDES, (φλυκταινοειδης,) Phlyctenoid.

PHLYCTÆNOPHTHALMIA, see Phlyctenular.

PHLYCTÆNOSIS, (φλυκταινωσις,) The formation of phlyctænæ.

PHLYCTÆNULA, (dim. of *phlyctæna*,) see Hydatid and Phlyctenular.

PHLYCTÈNE, Phlyctæna.

PHLYCTENOID, *Phlyctænoï'des*, (*phlyctæna*, and εἱδος, 'resemblance.') Resembling phlyctæna. An epithet for a variety of herpes.

PHLYCTEN'ULAR, (from *phlyctænula*.) Of or belonging to phlyctænula,—as *phlyctennular ophthalmia*; inflammation of the eye, accompanied with phlyctænulæ on the cornea, *phlyctænophthalmia*.

PHLYCTIDES, (pl. of *phlyctis*,) Phlyctænæ.

PHLYCTID'IUM, (dim. of *phlyctis*.) A circular or annular spot of inflammation of the corium, encircled by a red ring or zone, within which suppuration takes place. The genuine small-pox pustule, and that produced by the application of tartar emetic ointment, are examples of it.

PHLYCTIS, gen. *Phlyc'tidis*, (φλυκτις,) Phlyctæna.

PHLY'SIS, (φλυσις, from φλυω, 'to bubble up.') A cutaneous eruption. An ulcerative, subcutaneous tumour: flat, tensive, glabrous: diffused, hot, throbbing; at length fluctuating, with an acrid ichor.

PHLYSIS, Phlyctæna—p. Ecthyma, Ecthyma—p. Impetigo, Impetigo — p. Porrigo, Porrigo — p. Scabies, Psora.

PHLYZACIA, Ecthyma.

PHLYZACION, (φλυζακιον, from φλυζω, 'to bubble up,') Phlyctæna.

PHOBODIPSON, (φοβοδιψον, from φοβος, 'dread,' and διψα, 'thirst,') Hydrophobia.

PHOCOM'ELUS, (φωκη, 'a seal,' and μελος, 'a limb.') A monster, in which the limbs are shortened; the hands and feet appearing to exist alone, and to be inserted immediately on the trunk, as in the seal and the herbivorous cetacea.

PHŒNICINE, (φοινιξ, gen. φοινικος, 'red,') Hæmatin.

PHŒNICISMUS, (φοινιξ, gen. φοινικος, 'red,') Rubeola.

PHŒNIGMUS, (φοινιγμος,) Phenigmus—p. Petechialis, Purpura simplex.

PHŒNIX DACTYLIFERA, (φοινιξ,) Date tree—p. Excelsa, Date tree.

PHŒNODINE, (from φοινωδης, 'blood red,') Hæmatin.

PHONAS'CIA, (φωνη, 'voice,' and ασκειν, 'to exercise.') The art of exercising the voice.

PHONA'TION, *Phona'tio, Phonc'sis, Phono'sis*, (from *phone*.) The physiology of the voice.

PHONE, (φωνη,) Voice.

PHONESIS, Phonation.

PHONET'IC, *Phonet'icus, Pho'nic, Pho'nicus*, (F.) *Phonétique, Phonique*, (φωνητικος, from φωνη, 'sound,' 'voice.') Relating or appertaining to sound or to the voice.

PHO'NICA, (φωνικα, from *phone*.) The first order of the class *Pneumatica*, in Good's Nosology. Defined: diseases affecting the vocal avenues:—the passage of the voice impeded, or its power suppressed or depraved.

PHONIQUE, Phonetic.

PHONON'OSI, *Ponom'si*, (*phone*, and νοσος, 'a disease.') *Ponopathi'æ, Mor'bi vo'cis.* Diseases of the voice.

PHONOSIS, Phonation.

PHONOPATHIÆ, (*phone*, and παθος, 'affection,') Phononosi.

PHORA, (φορα,) Gestation.

PHORBE, (φορβη,) Pabulum.

PHORONOM'IA, (φερω, 'I move,' and νομος, 'law.') The doctrine of muscular motion.

PHOROUS, (φορος, from φερω, 'I move or carry.') A suffix denoting conveyance. Hence, Galactophorous, &c.

PHOS, (φως, gen. φωτος,) Light.

PHOSPHAS, gen. *Phospha'tis, Phosphate.* A salt formed by the union of phosphoric acid with a salifiable base.

PHOSPHAS CALCIUM STIBIATUM, Antimonial powder—p. Calcis stibiatus, Antimonial powder—p. Natricum, Soda, phosphate of.

PHOSPHATE, Phosphas.

PHOSPHAT'IC, *Phosphat'icus*, (F.) *Phosphatique*, (from *Phosphorus*.) Relating to the phosphates; hence the *Phosphat'ic Diath'esis* is the

habit of body which favours or occasions the deposition of the phosphates from the urine.

PHOSPHÈNE, (*phos*, and *φαινω*, 'to become manifest,') Photopsia.

PHOSPHORE, Phosphorus.

PHOSPHORÉNÈSES. M. Baumes unites, under this generic name, diseases which he attributes to disordered phosphorization; i. e. to excess or deficiency of calcareous phosphates or its decomposition. Amongst these affections he ranks rachitis, osteomalacia, and gout.

PHOSPHORES'CENCE, *Phosphorescen'tia*, *Luminos'ity*, (from *phosphorus*.) The properties possessed by certain bodies of being luminous in obscurity, or under particular circumstances. This phosphorescence has been occasionally witnessed in man, when suffering from some wasting disease, and near death.

PHOSPHOR'IC AC"ID, *Ac"idum phosphor'icum*, (F.) *Acide phosphorique*. A solid, colourless compound; highly sapid; very soluble in water, and vitrifiable by fire. It exists in bones combined with lime. It has been employed in medicine in the form of lemonade, in passive hemorrhage, typhus, phthisis, marasmus, &c., and in injection in cases of cancer of the uterus. It does not seem preferable to other acids. *Acidum phosphoricum glacia'lē*, and *Acidum phosphoricum dilu'tum* are officinal in the Pharmacopœia of the United States of 1863.

PHOSPHORNECROSIS, (*phosphorus* and *necrosis*,) see Phosphorus.

PHOSPHORURIA, (*phosphorus*, and *ουρον*, 'urine,') Urine, phosphorescent. Also, urine containing an excess of phosphates. See Urine.

PHOS'PHORUS, (*φωσφορος*, 'a lightbearer,' from *phos*, and *φερω*, 'to carry,') *Phos'phorum*, *Autophos'phorus*, *Ig'nus philosoph'icus*, *Lu'men constans*, (*φως*, 'light,' and *φερω*, 'I carry.') (F.) *Phosphore*. An elementary, simple, or undecomposed substance; not metallic; solid; transparent or semitransparent; colourless; brilliant; flexible; of a sensible garlic odour; very inflammable, and susceptible of combining with the oxygen of the atmosphere, at even the ordinary temperature. S. g. 1.8. It does not exist pure in nature, but is found frequently united to other bodies. Its fumes in the manufacture of lucifer and Congreve matches have caused, it is said, necrosis of the lower jaw — *Phosphornecro'sis*, *phosphorus jaw disease*, *Lu'cifermatchmakers' Disease*, *Matches Disease*.

Phosphorus has been used in medicine, dissolved in ether or suspended in the yolk of egg, as a stimulant; but the greatest precautions are necessary in its administration: hence it is rarely employed.

PHOSPHORUS JAW DISEASE, see Phosphorus.

PHOSPHURIA, (*phosphorus*, and *ουρον*, 'urine.') Urine, phosphorescent. Also, urine containing an excess of phosphates. See Urine.

PHOTOCAMPSIS, (*phos*, and *καμψις*, 'bending,') Refraction.

PHOTOMA'NIA, (*phos*, and *mania*.) Insane delirium induced by light.

PHOTOPHO'BIA, *Phenopho'bia*, (*phos*, and *φοβος*, 'fear.') Aversion to light:—intolerance of light. Nyctalopia.

PHOTOPHOBICUS, Lucifugus.

PHOTOPHOBOPHTHAL'MIA, (from *phos*, *φοβος*, 'dread,' and *ophthalmia*.) Ophthalmia with great intolerance of light.

PHOTOPHOBUS, Lucifugus.

PHOTOP'SIA, *Vi'sus lu'cidus*, (*phos*, and *ωψ*, 'the eye.') A false perception of light, as of sparks, flashes of fire, &c., occasioned by certain conditions of the retina and brain, and by pressure on the eyeball. When pressure does not induce the luminous appearance, (F.) *Phosphène*, the existence of amaurosis may be inferred. See Metamorphopsia.

PHOTU'RIA, (*phos*, and *ουρον*, 'urine.') A luminous condition of the urine.

PHRAGMUS, (*φραγμος*, 'a fence,' from *φρασσω*, 'I enclose.') A row of teeth.

PHRASIS, (*φρασις*,) Voice, articulated.

PHRASUM, Marrubium.

PHREN, gen. *Phren'is*, (*φρην*, 'the mind,' and the organ of the mind.) Also, the diaphragm and scrobiculus cordis.

PHRENATROPH'IA, *Atroph'ia cer'ebri*, (*phren*, *a*, priv, and *τροφη*, 'nourishment.') Wasting or atrophy of the brain.

PHRENAUX'Ē, *Hypertroph'ia cere'bri*, (*phren*, and *αυξη*, 'increase.') Hypertrophy of the brain.

PHRENES, (*φρενες*,) Diaphragm.

PHRENESIA, (from *phren*,) Phrenitis.

PHRÉNÉSIE, Phrenitis.

PHRENESIS, (*φρενησις*.) Delirium, Phrenitis.

PHRENETIASIS, Delirium, Phrenitis.

PHRENET'IC, (*φρενητικος*,) *Phrene'ticus*, *Phreni'ticus*, *Frenet'ic*, (F.) *Phrénétique*. Relating or appertaining to phrenitis; frantic; mad.

PHRENETISMUS, Phrenitis.

PHRENIC, (from *phren*,) Diaphragmatic.

PHRE'NICA, (from *phren*.) Diseases affecting the intellect; characterized by error, perversion, or debility of one or more of the mental faculties, (*Phrenopathi'a*.) The first order of the class *Neurotica* of Good. Also, remedies that affect the mental faculties—*Phren'ics*.

PHRENICS, see Phrenica.

PHRENICULA or PHRENETICULA HYDROCEPHALICA, Hydrocephalus internus.

PHRÉNIQUE, Diaphragmatic.

PHRENISMUS, Phrenitis.

PHRENITICUS, (*φρενιτικος*,) Phrenetic.

PHRENI'TIS, gen. *Phreni'tidis*, (*φρενιτις*, gen. *φρενιτιδος*,) *Phrene'sis*, *Phrene'sia*, *Phreneti'asis*, *Phrenis'mus*, *Phrenetis'mus*, *Cephali'tis*, *Encephali'tis*, *Cerebri'tis*, *Cephalal'gia inflammato'ria*, *Karabitus* (Arab.), *Sibare*, *Sphacelis'mus cer'ebri*, *Empres'ma cephali'tis*, *Siri'asis*, *Seiri'asis*, *Sidera'tio*, *Inflamma'tio* seu *Cauma phreni'tis*, *Phren'sy*, *Frenzy*, *Delir'ium*, *Brain Fever*, (F.) *Phrénésie*, *Cérébrite*, *Inflammation du cerveau et du cervelet*, (from *phren*, and *itis*.) A disease characterized by violent pyrexia, pain in the head, redness of the face and eyes, intolerance of light and sound, watchfulness, and delirium, either furious or muttering. Its causes are the same as those of other inflammations: sometimes, however, it is induced by a *Coup de soleil*; by inebriation; violent mental emotions, &c. Some authors have given the name *Phreni'tis* and *Meningi'tis* to inflammation of the membranes of the brain; and that of *Cephali'tis*, *Encephali'tis*, or *Cerebri'tis* to inflammation of the substance of the brain; but there are no pathognomonic symptoms, which can lead us to refer the seat of the disease to either of those parts exclusively. Phrenitis is, of course, a very dangerous affection, from the importance of the organ concerned. The most active treatment must necessarily be pursued. Repeated bleeding; purging; the application of ice to the shaved head; a position in which the head is raised; and the avoiding of irritation of every kind;—form the remedial means during the violent stage. After this has yielded, counterirritants to the nape of the neck or to other parts of the body will be useful adjuvants. When the brain and meninges were affected only symptomatically, as in inflammation of the diaphragm, the disease was formerly called *Paraphreni'tis*.

Hydrocephalus acutus is a variety of phrenitis.

PHRENITIS CALENTURA, *Coup-de-soleil*—p. Latrans, Hydrophobia—p. Potatorum, Delirium tremens—p. Verminosa, Vercoquin.

PHRENOGLOTTISM, Asthma thymicum.

PHRENOLOG''ICAL, *Phrenolog''icus*, (F.) *Phrénologique*, (*phren*, and λογος, 'a discourse.') Relating or appertaining to phrenology.

PHRENOLOGY, (*phren*, and λογος, 'a discourse,') Craniology.

PHRENOMAG'NETISM, *Phrenomes'merism*, *Mes'merophrenol'ogy*. A term applied to the condition of a mesmerized person, in which, when any cerebral or phrenological organ — so called — is touched, the functions of the organ are manifested. It has been established, that no such phenomena can be elicited in children, or in those who have never seen a phrenological cast or picture.

PHRENOPARALYSIS, (*phren*, 'the mind,' and *paralysis*,) see Paralysis.

PHRENOPATHIA, (*phren*, 'the mind,' and παθος, 'affection,') see Phrenica.

PHRENOPATHI'A ÆTHE'REA. The aggregate of encephalic phenomena induced by the inhalation of ether.

PHRENSY, (from *phrenesis*,) Insanity, Phrenitis.

PHRICASMUS, (φρικασμος,) Horripilation.

PHRICE, (φρικη.) Horripilation.

PHRICIA, Horripilation.

PHRICIASIS, (φρικιασις,) Horripilation.

PHRICO'DES (FE'BRIS,) (φρικωδης, from φρικη, 'a shivering,' and *odes*,) *Horrif''ica*. A fever in which the chill is very intense and prolonged.

PHRYG''IUS (LA'PIS). An earthy matter found in Phrygia and Cappadocia, and formerly employed as an astringent.

PHTHARMA CALIGO, (φθαρμα, 'anything spoiled,') Caligo — p. Cataracta, Cataract — p. Glaucoma, Glaucoma.

PHTHARTICUS, (φθαρτικος, from φθειρω, 'to destroy,') Deleterious.

PHTHEIR, (φθειρ,) Pediculus.

PHTHEIRÆ'MIA, (φθειρω, 'to corrupt,' and αιμα, 'blood.') A state in which the plastic powers of the blood are deteriorated.

PHTHEIRI'ASIS, *Phthiri'asis*, (φθειριασις, from *phtheir*.) *Mor'bus pediculo'sus* seu *pedicula'ris*, *Pruri'go pedicula'ris*, *Pedicula'tio*, *Ma'lis pedic'uli*, *Peta'lē*, *Lou'siness*, *Lou'sy disease*', (F.) *Mâladie pédiculaire*, *Phthiriase*. A disease which consists in the excessive multiplication of lice on the human body, under conditions in which it does not ordinarily take place, and in spite of cleanliness. It has been asserted that the affection has often caused death. Simple and medicated baths have been recommended for its removal; lotions of the decoction or infusion of tobacco and stavesacre, mercurial frictions, &c.

PHTHEIRIUM, (from *phtheir*,) Delphinium staphisagria.

PHTHEIROCTONUM, (*phtheir*, and πτεινω, 'to kill,') Delphinium staphisagria.

PHTHINAS, (φθινας,) Phthisis.

PHTHINODES, (φθινωδης,) Phthisicus.

PHTHINOPO'RON, (φθινοπωρον, from φθινω, 'to decay,' and οπωρα, 'the beginning of autumn,') see Autumn.

PHTHIRIASE, (from φθειρ,) Phtheiriasis.

PHTHIRIASIS, Malis, Phtheiriasis.

PHTHIRIUM SCABIEI, see Psora.

PHTHIRIUS, Antiparasitic—p. Inguinalis, see Pediculus.

PHTHIROCTONUS, (φθειρω, 'to destroy,' and τεκνον, 'a child,') Abortive.

PHTHI'SES, (φθιω, 'to waste away.') In the classification of Fuchs, diseases attended with ulceration, hectic fever, and emaciation.

PHTHIS'IC, Phthisis. Also, a slight tickling cough, (Prov.) *Tissick*.

PHTHISICAL, Phthisicus.

PHTHIS'ICI (MORBI), in the classification of Dr. Wm. Farr, tubercular diseases.

PHTHIS'ICUS, (φθισικος.) *Phthino'des*, *Phthis'ical*, *Tis'ical*, (F.) *Phthisique*, *Poitrinaire*. Belonging to phthisis. Also, one labouring under phthisis, or who is *consumptive*.

PHTHISIE, Phthisis pulmonalis — *p. Aiguë*. Consumption, galloping — *p. Calculeuse*, Calculi, pulmonary, see Lithiasis pulmonum—*p. Carcinomateuse*, Phthisis, cancerous—*p. Galopante*, Consumption, galloping—*p. avec Mélanose*, Anthracosis pulmonum—*p. Mésentérique*, Tabes mesenterica—*p. Trachéale*, see Phthisis laryngea — *p. Tuberculeuse*, Phthisis pulmonalis.

PHTHISIOL'OGY, *Phthisiolog''ia*, (*phthisis*, and λογος, 'a discourse.') A treatise on phthisis.

PHTHISIOSUS, Tubercular consumption.

PHTHISIPNEUMONIA, Phthisis pulmonalis.

PHTHISIQUE, Phthisicus.

PHTHI'SIS, (φθισις, from φθιω, 'to waste away,') *Phtha'ē*, *Phthi'nas*, *Ta'bes*, *Te'cedon*, *Consumption*, *Decline'*, *Phthis'ic*, *Tis'ic*, from φθιω, 'I waste away, I decay.' This word, taken in a general sense, means progressive emaciation of every part of the body. It is usually, however, restricted to phthisis pulmonalis.

PHTHISIS ACUTA, Consumption, galloping — p. Black, see Anthracosis.

PHTHISIS, BRON'CHIAL, *Phthisis bronchia'lis*. Phthisis occasioned by the pressure of enlarged tuberculous bronchial glands, which, not unfrequently, communicate with caverns in the lungs, or with the bronchia.

PHTHISIS CALCULOSA, Lithiasis pulmonum.

PHTHISIS, CAN'CEROUS, *Scir'rhus*, *Carcino'ma et Fun'gus Pulmo'num*, *Med'ullary* or *Encepha'loid Tu'mour of the Lung*, (F.) *Cancer du Poumon*. Cancer of the lung, which gives rise to carcinomatous phthisis, (F.) *Phthisie carcinomateuse*, of Bayle.

PHTHISIS CONSUMMATA, see Ph. pulmonalis—p. Dorsalis, Tabes Dorsalis — p. Dyspeptic, see Phthisis — p. Exulcerata, Ph. pulmonalis — p. Hepatica, Hepatophthisis — p. Ischiadica, Ischiophthisis.

PHTHISIS LARYNGE'A, *Chron'ic Laryngi'tis*, *Laryngi'tis et Trachei'tis chron'ica*, *Tuberculo'sis laryn'gis et trache'æ*, *Laryn'go-et-Trache'ophthi'sis Laryn'gophthi'sis*, *Ul'cera* seu *Helco'sis Laryn'gis*, (F.) *Phthisie laryngée*, *Ulcère du larynx*, *Laryngite avec sécrétion de Pus*, is a species of consumption analogous to phthisis pulmonalis, produced by inflammation and ulceration of the interior of the larynx, and sometimes by caries of the cartilages. *Phthisis tracheu'lis*, *Trachéophthi'sis*, (F.) *Phthisie trachéale*, is a similar affection, seated in the trachea. Chronic inflammation of the larynx and trachea may exist, however, without tubercles or phthisis.

PHTHISIS MESERAICA, Tabes mesenterica — p. Mucosa, see Bronchorrhœa—p. Nodosa. Ph. pulmonalis—p. Notias, Tabes dorsalis—p. Pituitosa, see Bronchorrhœa.

PHTHISIS PULMONA'LIS, *Ph. pulmo'num* seu *pulmona'ris* seu *nodo'sa pulmona'lis ve'ra* seu *tuberculo'sa* seu *scrophulo'sa* seu *tuberculoülcera'ta* seu *purulen'ta exulcera'ta* seu *exulcera'ta*, *Mara'mus* seu *Hec'tica* seu *Hæmop'tysis phthi'sis*, *Pus'sio vomicof'lua*, *Phthisipneumo'nia*, *Ta'bes pulmona'lis*, seu *pulmo'num*, *Ul'cus pulmonum*, *Helco'sis pulmona'lis*, *Pneumonophthi'sis*, *Pneumonoph'thoë*, *Pneumop'thoë*, *Pulmo'nia*, *Tuberculo'sis Pulmo'num*, *Gongrophthi'sis*, *Mor'bus Ang'licus*, *Tuber'culous disease of the lungs*, *Pul'monary consumption*, *Consump'tion*, *Decline'*, *Phthis'ic*, *Tis'ic*, (Sc.) *Teu'sick*, (F.) *Phthisie*, *P. pulmonaire* seu *tuberculeuse*, *Crachement de pus*. Occasionally, this formidable disease occurs accidentally; but, usually, it is caused by a conformation obtained from progenitors. This, at least, predisposes to it; and but a slight exciting cause may be re-

quired to rouse the predisposition into action. It is less a disease of the torrid and frigid zones; and in the temperate regions its pathology is often intimately allied with that of scrofula. It consists in the formation of tubercles in the lungs, which sooner or later soften and break down. In such a constitution, ulcerations of the lungs do not readily heal; and hectic fever —the universal attendant upon irritability and debility — is established. This persists, and gradually wears down the patient, till he ultimately expires, exhausted by the irritative fever. The chief symptoms are the following. The patient feels a sense of uneasiness in the chest, with severe fits of coughing, or a short and dry cough with dyspnœa. This may be considered the incipient stage. The cough then becomes extremely troublesome, especially in the morning; and dyspnœa is increased on the slightest exertion. The expectoration is evidently purulent, with fever in the evening, and circumscribed redness of the cheeks; wasting and colliquative sweats early in the morning This must be considered the confirmed stage,—*Phthisis consumma'tu, Pneumophthi'sis.* In the third, or last stage, the hectic is constant, with small pulse, pungent heat, colliquative sweats, and diarrhœa. The weakness becomes extreme, and the patient exhausted. *Physical Signs.* — 1. In the first stage, whilst there are yet scattered miliary tubercles,—the only appreciable change at the exterior of the chest, and this is not constant, is a want of freedom in the movements under one or both clavicles. Percussion will generally discover a slight diminution of sound corresponding to the summit of one lung. In the same situation, auscultation shows that the inspiratory murmur is either weaker, rougher, or confused. The sound of expiration is more distinct. The voice and cough are rather more resonant, and wheezing or mucous *râles* are occasionally heard in the same region. 2. When the tubercular deposition has become more abundant, the motion of the chest is more markedly diminished under one or both clavicles. The loss of sound on percussion is more distinct, the inspiration, on auscultation, is bronchial, the expiration louder and more superficial, and the resonance of the voice and cough is increased. The rest of the lung is perhaps healthy, or the respiration may be puerile. 3. When the tubercles are undergoing softening, —in addition to the preceding signs, auscultation exhibits a subcrepitant *râle* around the apex of the lung, decreasing from above downwards. It is most distinct during or after the cough, and at the close of a deep inspiration. As the disease proceeds, the bubbling becomes successively larger, and ultimately gurgling is heard. The inspiration and expiration are cavernous or tracheal. The voice and cough indicate unusual resonance and pectoriloquy. The intercostal spaces are often depressed locally, and percussion may become gradually clearer and even tympanitic as the cavern increases.

It is only in the ineipient state of this formidable disease, that advantage can be expected from any plan of treatment; and of all means that can be devised, that of removing to a climate in which air and exercise can be daily enjoyed during the autumnal, winter, and spring months is the best. See Climate. If this be impracticable, the patient must ke kept in a regulated temperature, taking care that the chamber is duly ventilated; and gestation in the open air be used, whenever the atmosphere, although cold, is dry. The other indications will be: 1. To moderate inflammatory action: 2. To support the strength; and, 3. To palliate urgent symptoms. The whole treatment indeed is palliative. Counterirritants relieve pain: demulcents and mild opiates alleviate the cough: the mineral acids, united with opium, relieve the colliquative sweats; and chalk and opium the diarrhœa.

Dr. Wilson Philip has pointed out a particular species of phthisis, which is characterized, in the early stage, by a deranged state of the digestive organs; flatulent, irregular bowels; furred tongue; impaired appetite; unnatural fæces; and the epigastric region more or less full and tender on pressure. The affection of the lungs is here secondary. He calls it *'Dyspep'tic phthi'sis.*

Phthisis Pulmonalis Purulenta Exulcerata, Phthisis pulmonalis — p. Pulmonalis scrofulosa, Phthisis pulmonalis — p. Pulmonalis tuberculosa, Phthisis pulmonalis — p. Pulmonalis tuberculoülcerata, Phthisis pulmonalis — p. Pulmonalis vera, Phthisis pulmonalis — p. Pupillæ, Synezisis — p. Pupillaris, Myosis — p. Scrophulosa, Phthisis pulmonalis—p. Sicca, Tabes dorsalis —p. Tuberculosa, Phthisis pulmonalis — p. Uterina, Metrophthisis—p. Vesicalis, Cystophthisis.

Phthisis Weed, Ludwigia palustris.

PHTHISURIA, (*phthisis*, and *ουρον*, 'urine,') Diabetes.

PHTHISURIE, Diabetes—*p. Sucrée*, Diabetes mellitus.

PHTHOË, (*φθοη*,) Phthisis.

PHTHOIS, gen. *Phtho'idis*, (*φθοις*,) Pastil, Trochiscus.

PHTHOISCUS, (*φθοισκος*,) Pastil, Trochiscus.

PHTHONGODYSPHORIA, (*φθογγος*, 'a cry,' and *δυσφορια*, 'impatience,') Hyperacusis.

PHTHORA, (*φθορα*, 'destruction,') Abortion, Corruption, Plague.

PHTHORIUS, (*φθοριος*,) Abortive.

PHTHOROCTONUS, (*φθορα*, 'destruction,' and *τεκνον*, 'a child,') Abortive.

PHUCAGROSTIS MINOR, Pila marina.

PHUSCA, (*φουσκα*,) Oxycrate.

PHYGANTHROPIA, (*φυγω*, 'to flee,' and *ανθρωπος*, 'man,') Misanthropia.

PHYGETIU'LON, (*φυγεθλον*,) *Pa'nus, Phypella*, (from *φυω*, 'I grow,' [?].) Inflammation of the superficial lymphatic glands, not ending in suppuration.

PHYGŒDEMA, (*φυγη*, 'flight,' and *œdema*,) Anathyminsis.

PHYLACTERION, Amuletum.

PHYLACTE'RIUM, (*φυλακτηριον*, from *φυλασσω*, 'I preserve.') A *Phylac'tery*, (F.) *Phylactère.* An amulet:—a prophylactic.

PHYLAXIS, (*φυλαξις*,) Conservation.

PHYLLAN'THUS URINA'RIA, (*φυλλον*, 'a leaf,' and *ανθος*, 'a flower,') *Binkohumba. Ord.* Euphorbiaceæ. A plant employed in Ceylon, in decoction, as a diuretic.

PHYLLITIS, (*φυλλον*, 'a leaf,') Asplenium scolopendrium—p. Muraria, Asplenium ruta muraria—p. Rotundifolia, Asplenium trichomanoides.

PHY'MA, gen. *Phy'matis*, (*φυμα*, gen. *φυματος*, from *φυω*, 'I grow.') With the ancients, this word was used with great latitude: sometimes, in the sense of phlegmon, for tumours larger than a boil, and perfectly suppurative. In the nosology of Sauvages, *Phy'mata* is an order of diseases, to which he refers erysipelas, œdema, phlegmon, emphysema, scirrhus, &c. In that of Dr. Good it is a genus, including hordeolum, furunculus, sycosis, and anthrax.

Phyma Anthrax, Anthrax — p. Anthrax terminthus, Terminthus—p. Sycosis, Sycosis.

PHYMATODES, (*φυματωδης*,) Affected with phymata.

PHY'MATOID, *Phymatoï'des*, (F.) *Phymatoïde*, (*phyma*, and *ειδος*, 'resemblance.') A state of cancerous tissue, in which the dull yellow hue and the consistence resemble those of tubercle.

PHYMATO'SES, (from *phyma*, and *osis.*) Tuberculous diseases.

PHYMATOSIS, Excrescence—p. Cerebri, En-

cephalophymata — p. Elephantiasis, Elephantiasis—p. Lupus, Lupus—p. Pulmonum, see Tubercle — p. Verrucosa, Verruca.

PHYMOSIS, Phimosis.

PHYPELLA, Phygethlon.

PHYSA, (*φυσα*, 'wind,') Crepitation, Flatulence.

PHYSAGOGA, (*φυσα*, 'wind,' and *αγω*, 'to carry off,') Carminatives.

PHY'SALIS, (*φυσαλις*, 'a bladder,' referring to the inflated calyx,) *P. Alkeken'gi* seu *halicac'abum*, *Sola'num vesica'rium*, *Alchachen'gē*, *Alkeken'gi*, *Halicac'abum*, *Win'ter Cher'ry*, (F.) *Alkekenge*, *Coqueret*. *Ord.* Solanaceæ. *Sex. Syst.* Pentandria Monogynia. The berries are recommended as a diuretic, from 6 to 12 for a dose, in dropsical and calculous cases. It has been affirmed, that the whole plant—twigs, leaves, capsules and berries—possesses the antiperiodic virtues of Cinchona.

Physalis Alkekengi, Physalis — p. Halicacabum, Physalis—p. Obscura, Ph. viscosa—p. Pennsylvanica, Ph. viscosa—p. Pubescens, Ph. viscosa—p. Stramonium, Anisodus luridus.

Physalis Visco'sa, *P. obscu'ra* seu *Pennsylva'nica* seu *pubes'cens*, *Ground cherry*; indigenous. The berries are said to be diuretic and sedative.

PHYSCE, (*φυσκη*,) Abdomen, Colon.

PHYSCIA ISLANDICA, Lichen Islandicus—p. Nivalis, Lichen caninus.

PHYSCO'NIA, (*φυσκων*, 'the paunch.') *Ventros'itas*, *Ecphy'ma physco'nia*, *Emphrac'tica*, *Visco'nia*, *Potbelly*, *Tunbelly*, *Pen'dulous abdo'men*, *Swagbelly*, *Gorbelly*, (Prov.) *Gotchbelly*, *Pedbelly*. Physconia is a generic term, under which Sauvages has compromised every large tumour developed in the abdomen, that is neither fluctuating nor sonorous. Linnæus calls it *Hyposarca*. Often, these various terms are applied to excessive corpulency which gives to the abdomen the appearance indicated by them.

Physco'nia Adipo'sa, *Obes'itas* seu *Polysar'cia vis'cerum*. Accumulation of fat in the intestines.

Physconia Biliosa, Turgescentia vesiculæ fellæ.

Physconia Emphysemat'ica. Accumulation of air in the areolar tissue, or between the coats of particular viscera.

Physconia Lienis, Splenoncus — p. Mesenterica, Tabes mesenterica—p. Splenica, Ague cake.

Physconia Strumo'sa, *Scrof''ula abdomina'lis inter'na*. Tumid abdomen from scrophulous enlargement of the glands.

PHYSCONIE MÉSENTÉRIQUE, Tabes mesenterica.

PHYSECHEMA, (*φυσα*, 'wind,' and *ηχημα*, 'a sound,') *Bruit de soufflet*.

PHYSEMA, (*φυσημα*,) Tympanites, Physesis.

PHYSE'SIS, *Physe'ma*, (*φυσησις*, from *φυσαω*, 'I inflate.') An emphysematous tumour. Tympanites.

PHYSETER MACROCEPHALUS, (*φυσητηρ*, 'one that blows.') see Cetaceum.

PHYSIATRICE, (*physis*, and *ιατρεια*, 'treatment.') Vis medicatrix naturæ.

PHYSIAUTOCRATIA, (*physis*, *αυτος*, 'self,' and *κρατος*, 'power,') Vis medicatrix naturæ.

PHYSIAUTOTHERAPIA, (*physis*, *αυτος*, 'self,' and *θεραπεια*, 'treatment,') Vis medicatrix naturæ.

PHYSIC, (from *physis*,) Medicament, Medicina.

To *phys'ic* is to administer medicine, (F.) *Medicamenter*; and, at times, to purge.

Physic, Indian, Euphorbia corollata, Gillenia trifoliata—p. Root, Leptandra purpurea.

PHYSICAL, Medical—p. Signs, see Symptom.

PHYSIC''IAN, *Med'icus*, *Ia'tros*, *Aces'tor*, *Aces'ter*, *Al'theus*, *Pæon*, (Old Eng.) *Fesis'ian*, *Ficicion*, *Leche*, *Leech*, *Leuch*, *Leachman*, (Sc.) *Mediciner*, *Medicinare*, *Medcinare*, *Medicinar*, (*φυσικος*, 'an investigator of nature,' *φυσις*,) (F.) *Médecin*. Properly, one who has received his degree from an incorporated Institution, as Doctor of Medicine; but often applied in the United States to any one who practises physic. The French formerly used the word *physicien* in the same sense. It is now appropriated by them to the natural philosopher. *Phys'icist* has the same signification.

Physician-Accoucheur, *Accoucheur*—p. Alienist. Psychiater—p. Botanical, Herb doctor.

Physician, Family. One regarded as the regular attendant on a family.

Physician, Learned, Iatrosophista — p. Practical, Iatrotechna—p. Priest, see Asclepiadæ.

PHYSICIEN, Physician.

PHYSICIST, (from *physis*,) see Physician.

PHYS'ICS, MED'ICAL, *Iatrophys'ics*. Physics directly applied to medicine, — either to the explanation of the vital phenomena, the preservation of the individual, or the treatment of disease.

PHYSIOAUTOCRATIA, (*φυσις*, 'nature,' *αυτος*, 'self,' and *κρατος*, 'power,') Vis medicatrix naturæ.

PHYSIOG'NOMIST, *Physiogno'mon*, one who busies himself especially with, or pretends to be versed in, physiognomy.

PHYSIOG'NOMY, (Old Eng.) *Vis'nomy*, *Physiogno'mia*, *Physiogno'mica*, *Physiogno'micē*, *Physiono'mia*, *Physiognomon'ia*, *Physiogno'monē*, *Physiognomos'ynē*, *Physiognomo'sia*, *Anthroposcop'ia*, *Prosopomanti'a*, *Prosopolog''ia*, *Semiot'icē fa'ciei*, *Physiognomon'ica*, *Physiognom'ony*, *Met'oposcopy*, *Prosopo'sis*. (F.) *Physionomie*, (*φυσιογνωμονια*, from *physis*, 'reality,' and *γνωμη*, 'knowledge.') The art of knowing the dispositions of men from their external appearance; especially from the features. Every inference of this kind must necessarily be extremely fallacious, and cannot be reduced to rule, as was attempted by Lavater and others. In infantile diseases, numerous shades of expressions are evident, which experience teaches how to appreciate; and which afford useful guides in understanding the pathology of that period of existence.

PHYSIOLOGIA PATHOGENETICA, see Pathogenetic.

PHYSIOLOG''ICAL, *Physiolog''icus*, (F.) *Physiologique*. Relating or belonging to physiology.

Physiological Anatomy, see Anatomy — p. Doctrine, Broussaism.

PHYSIOLOGICE, Physiology.

PHYSIOL'OGISM, *Physiologis'mus*. Abuse of physiology. The improper application of physiological data to the theory of disease.

PHYSIOL'OGIST, *Physiol'ogus*. One who occupies himself specially, or is well acquainted, with physiology.

PHYSIOL'OGY, *Physiolog''ia*, *Biol'ogy*, *Bion'omy*, *Biot'ics*, *Biophænomenolog''ia*, *Physiolog''icē*, *Œconom'ia anima'lis*, *Anatom'ia vi'va*, *Anat'omē anima'ta*, *Anthropolog''ia*, *Microcosmogra'phia*, *Microcos'mica scien'tia*, *Cognit''io physiolog''ica*, *Pars natura'lis medici'næ*, *Philosoph'ia cor'poris vi'vi*; (from *φυσις*, 'nature,' and *λογος*, 'a description.') Formerly, Physiology meant the same as Physics, in its extensive signification, now does. At the present day, it includes the science which treats of the functions of animals or vegetables; an acquaintance with the phenomena the aggregate of which constitute life. It is the *science of life*. It is divided into *an'imal—Zoöphysiolog''ia*, or *Zoobiolog''ia*; and *veg''etable — Phytophysiolog''ia*, or *Phytobiolog''ia*, according as it considers the life of animals or of vegetables singly. *Compar'ative physiol'ogy* comprises both. Physiology is, also, *general* or *special*, according as it treats of life in the abstract or in some particular

species. To the latter belongs the *Physiology of Man*—called, also, *Hygien'ic Physiology* to distinguish it from *Pathological Physiology* or *Pathology*.

PHYSIOLOGY, PATHOGENETIC, see Pathogenetic.

PHYSIONOMIA, Physiognomy.

PHYSIONOMIE, Physiognomy—*p. Égarée*, see Wild.

PHYSIS, (*φυσις*,) Natura.

PHYSO, (from *φυσα*, 'air,') in composition, air.

PHYSOCE'LE, *Pneumatoce'lē, Her'nia vento'sa, Oschevce'lē flatulen'ta, Emphyse'ma Scro'ti*, (*physo*, and *κηλη*, 'a tumour.') An emphysematous tumour of the scrotum; probably a case of intestinal hernia, containing much flatus.

PHYSOCEPH'ALUS, (*physo*, and *κεφαλη*, 'head.') (F.) *Physocéphale*. Emphysematous tumefaction of the head.

PHYSOCŒLIA, (*physo*, and *κοιλια*, 'intestines,') Tympanites.

PHYSO'DES, (*φυσωδης*, from *φυσα*, 'air,' and *odes*.) Full of air; apparently full of air—applied to tumours, &c.

PHYSOME'TRA, *Emphyse'ma U'teri* seu *Uteri'num, Hysteroph'ysē, Hysteremphyse'ma, Metremphyse'ma, Inflatio U'teri, Tym'pany of the Womb, U'terine tympani'tes*, (from *physo*, and *μητρα*, 'the womb.') A light, tense, circumscribed protuberance in the hypogastrium, obscurely sonorous, with wind occasionally discharged through the os uteri with noise, *Hysteropsoph'ia, Ædœopsoph'ia uteri'na*.

PHYSONCUS, (*physo*, and *ογκος*, 'a swelling,') Emphysema.

PHYSOPSOPH'IA, (from *physo*, and *ψοφος*, 'a noise.') A discharge of air with noise.

PHYSOSPASMUS, Colica flatulenta.

PHYSOSTIGMA VENENOSUM, (*physo*, and *stigma*, in Botany, the top of the style,) Ordeal nut.

PHYSOSTIGMINE, see Ordeal nut.

PHYSOTHORAX, gen. *Physothora'cis*, Pneumothorax.

PHYTANATOMY, (*phyton*, and *anatomy*,) see Anatomy.

PHYTEL'EPHAS MACROCAR'PA, (*phyton*, and *ελεφας*, 'an elephant.') A tree of South America, called, by Willdenow, *Elephanta'sia*, the dense albumen of whose nut is the *vegetable ivory*, (F.) *Ivoire végétal*, which is as durable and nearly as hard as the ivory of the elephant.

PHYTICUS, (*φυτικος*,) Vegetative.

PHYTIVOROUS, (*phyton*, and *voro*, 'I devour,') Phytophagous.

PHYTOALOPECIA, (*phyto*, and *alopecia*,) Porrigo decalvans.

PHYTOBIOLOGIA, (*phyton*, *βιος*, 'life,' and *λογος*, 'a discourse,') see Physiology.

PHYTOCHYMISTRY, see Chymistry.

PHYTOLAC'CA DECAN'DRA, *P. vulga'ris, Pokeweed, Amer'ican nightshade, Cancerroot, Poke, Skoke, Jucato Calleloe* [?], *Jal'ap, Pig'eon Ber'ry, Jalap can'cer root, Red weed, Red nightshade, Coakum, Sola'num racemo'sum America'num* seu *mag'num Virginia'num ru'brum, Bli'tum America'num, Gar'get*, (F.) *Raisin d'Amérique, Phytolaque à dix étamines, Morelle en grappes, Méchoacan du Canada*. *Ord.* Chenopodeaceæ; *Sex. Syst.* Decandria Decagynia, (*phyton*, and *lacca*, because the colour of the juice of the berries resembles that of lacca.) The berries—*Phytolac'cæ Bac'ca* (Ph. U. S., 1863)—and roots—*Phytolaccæ Ra'dix*—are employed. The young stems, when boiled, are sometimes eaten at table; but when old, they must be cautiously used, as the plant is emetic and cathartic. It is most celebrated as a remedy in chronic rheumatism, and is given in the form of tincture of the ripe berries. It is, also, used in cutaneous eruptions, tinea capitis, itch, cancerous ulcers, &c.

The root is gathered and dried in the fall.

PHYTOLAQUE À DIX ÉTAMINES, Phytolacca decandra.

PHYTOLOGIA, (*phyton*, and *λογος*, 'a discourse,') see Vegetable—p. Medica, Botany, medical.

PHYTON, (*φυτον*,) Vegetable.

PHYTOPARASITE, Epiphyte.

PHYTOPATHOL'OGY, *Phytopatholog''ia*, (from *phyton*, and *pathology*.) Properly, the pathology of vegetables; but occasionally applied to the knowledge of morbid states induced by vegetable growths.

PHYTOPH'AGOUS, *Phytoph'agus; Phytiv'orous, Phytiv'orus*; (*phyton*, and *φαγω*, 'I eat.') Feeding or subsisting upon vegetables.

PHYTOPHYSIOLOGIA, (*phyton*, and *physiologia*,) see Physiology.

PHYTORGANIES, (*phyton*, and *οργανον*, 'an organ.') A name given by Bouchut to vegetable growths on the living body.

PHYTOSPERM'ATA, (F.) *Phytospermes*, (*phyton*, and *σπερμα*, 'sperm.') Particles similar to the spermatozoids of animals, observed in vegetables, and presumed to possess a similar agency in reproduction.

PHYTOTOMY, (*phyton*, and *τεμνειν*, 'to cut,') see Anatomy, (vegetable.)

PHYTOZOAIRE, (*phyton*, and *ζωον*, 'animal,') Zoophyte.

PHYTOZOON, (*phyton*, and *ζωον*, 'animal,') Zoophyte.

PI'A MA'TER, 'delicate mother,' *Pia* seu *mol'lis* seu *ten'uis Mater, Pia me'ninx, Meninx inte'rior* seu *vasculo'sa* seu *choroï'des, In'ner lam'ina of the Méningine*, (Ch.), *Membra'na vasculo'sa Cer'ebri, M. Cer'ebri ten'uis* seu *mol'lis* seu *pro'pria*, (F.) *Pie mère, Méningette*. The pia mater is a very delicate membrane, which covers the brain immediately, penetrates into its anfractuosities, and envelops, also, the cerebellum and the spinal prolongation, &c. Bichat does not regard it as a membrane, properly so called, but as a network of blood-vessels, united by a lax areolar tissue. The *Pia Mater exterior* is the portion of membrane which covers the exterior of the encephalon, and faces the arachnoid externally. The *Pia Mater interior* is that which lines the cerebral fossæ, into which it penetrates by a cleft situate between the posterior part of the corpus callosum and the fornix; and by two other fissures, situate between the corpora fimbriata and thalami nervorum opticorum. The pia mater contains a great number of granulations similar to the *Glandulæ Pacchioni*.

PIA MATER TESTIS, Tunica vasculosa—p. Meninx, P. Mater.

PIAN, Frambœsia.

PIANS, MOTHER OF, Mama-pian.

PIAR, (*πιαρ*,) Fat.

PIARHÆ'MIA, *Piarrhæ'mia, Lipæ'mia*, (*piar*, and *αιμα*, 'blood.') Fat in the blood.

PICA, Malacia—p. Africanorum, Chthonophagia.

PICAC, Euphorbia corollata.

PICACISM'US, *Pica'tio*, (*pix*, gen. *picis*, 'pitch.') Depilation by means of a pitch plaster.

PICATIO, Picacismus.

PICEA, (*pix*, gen. *picis*, 'pitch,') Pinus abies.

PICERION, (*πικεριον*,) Butter.

PICHU'RIM BEANS. The seed,—*Fa'ba Pichurim, F. Pechu'rei, Pa'ra nut, Sas'safras nut, Puxiri, Brazil'ian nut'meg*,—of a tree, supposed to be *Per'sea pichurim, Ocote'a pichu'rim* seu *Puchu'ry, Tetranthe'ra pichurim, Nectan'dra puchu'ry, Puchu'ry* or *Puchy'ry* of the Brazilians, *Ord.* Lauraceæ, which grows in Brazil, Guiana, Venezuela, and other parts of South America. They are of an elliptical shape; flat on one side, convex on the other; of an aromatic odour between that of

nutmeg and of sassafras, and of a spicy, pungent taste. The medical properties are the same as those of other aromatics. For the bark, see Pechurim cortex.

PICK, (from *puke*,) Emetic.

PICKEREL WEED, SHOVEL, Unisema deltifolia.

PICOTE, Variola.

PICOTEMENT, (from *piquer*, 'to prick,') Pricking.

PICOTIN, Arum maculatum.

PICRA, (from πικρος, 'bitter,) Pulvis aloës et canellæ.

PICRÆNA EXCELSA, (πικραινω, 'to be bitter,') Quassia.

PICRIA, (πικρια,) Bitterness.

PICRIS, (πικρος, 'bitter,') Cichorium intybus.

PICRIUM SPICATUM, Coutoubea alba.

PICROCHOLOS, (πικροχολος, from *picros*, and χολη, 'bile,') Bilious.

PI'CROMEL, *Bi'lin*, (*picros*, and μελι, 'honey.') A name given by Thénard to a colourless, soft substance, of an acrid, bitter, saccharine taste, nauseous smell, and very soluble in water, which is considered to be a *bi'late of so'da*. It is not an immediate principle, but a mixture of different substances. It forms part of the bile, and is generally classed amongst the animal immediate principles.

PICROPE'GÆ, *Pikrope'gæ*, (*picros*, and πηγη, 'a spring.') Mineral waters bitter from the presence of chloride of magnesium.

PICROS, (πικρος, 'bitter,') Amarus.

PICROTOX'IN, *Picrotox'ina*, *Picrotox'ine*, (*picros*, and *toxicum*, 'poison.') A vegetable alkali, discovered by M. Boullay in the *Menispermum Cocculus*. It crystallizes in quadrangular, white, brilliant, semitransparent prisms; which are excessively bitter, soluble in three parts of alcohol, and in fifteen of boiling water.

The Cocculus Indicus owes its poisonous properties to this principle.

PIE PLANT, Rheum rhaponticum — p. Rhubarb, Rheum rhaponticum.

PIE MÈRE, Pia mater.

PIE-MÉRITE, *Inflamma'tio pi'æma'tris*, (from *pie mère*, and *ite*, for itis.) Inflammation of the pia mater.

PIÈCE, Hepatitis — *p. d'Anatomie Artificielle*, see Artificial.

PIED, Pes — *p. d'Alexandre*, Anthemis pyrethrum — *p. d'Alouette des champs*, Delphinium consolida — *p. de Biche*, see Lever — *p. Bot*, see Kyllosis — *p. de Chat*, Antennaria dioica — *p. de Cheval marin*, Cornu ammonis — *p. de Griffon*, Gryphius pes, Helleborus fœtidus — *p. d'Hippocampe*, Cornu ammonis — *p. de Lièvre*, Arum maculatum — *p. de Lion*, Alchemilla — *p. de Lit*, Origanum — *p. d'Ours*, Acanthus mollis — *p. Plat*, see Kyllosis — *p. de Veau*, Arum maculatum — *p. de Veau triphylle*, Arum triphyllum.

PIEIROS, (πιειρος,) Fatty.

PIERRE, (from *petrus*, πετρος, 'a stone,') Calculus — *p. d'Aigle*, Ætites — *p. d'Aimant*, Magnet — *p. d'Azur*, Lapis lazuli — *p. Calaminaire*, Calamine — *p. à Cautère*, Potassa cum calce — *p. Divine*, Lapis divinus — *p. d'Écrevisse*, Cancrorum chelæ — *p. Infernale*, Argenti nitras — *p. Judaïque*, Judæus (lapis) — *p. au Lait*, Morochthus — *p. Médicamenteuse*, Medicamentosus lapis — *p. Néphrétique*, Nephreticus lapis — *p. Ponce*, Pumex.

PIERRES CRAYEUSES, 'chalk stones,' Calculi, arthritic — *p. au Fiel*, Calculi, biliary — *p. Stercorales*, Calculus of the Stomach and Intestines — *p. Urinaires*, Calculi, urinary.

PIERREUX, Petrous.

PIESTER, (πιεστηρ,) Press.

PIESTERION, (πιεστηριον,) Press.

PIESTRON, (πιεστρον, from πιεζω, 'I press.') An instrument recommended by Hippocrates for breaking the bones of the fœtal head when too large to be extracted otherwise.

PIGAMON JAUNÂTRE, Thalictron.

PIGEON BERRY, Phytolacca decandra — p. Breasted, see Lordosis — p. Tree, Aralia spinosa.

PIGMENT CELLS, see Cell, pigment.

PIGMENTAIRE, Pigmental.

PIGMEN'TAL, *Pig'mentary*, *Pigmenta'rius*, (F.) *Pigmentaire*, *Pigmenteux*, (from *pigmentum*.) Having relation to pigment or colouring matter.

PIGMENTAL APPARA'TUS, (F.) *Appareil pigmental*. The apparatus concerned in the coloration of the skin of the coloured varieties of man.

PIGMENTARIUS, see Unguentarius.

PIGMENTARY, Pigmental — p. Nævi, see Nævus.

PIGMENTEUX, Pigmental.

PIGMENTUM, (*pingere*, *pictum*, 'to paint,') Paint — p. Indicum, Indigo — p. Nigrum, see Choroidea tunica — p. Uracu, Terra Orleana.

PIGMY, Pygmy.

PIGNEROLE, Cantaurea calcitrapa.

PIGNON DES BARBADES, Jatropha curcas — *p. de Barbarie*, Jatropha curcas — *p. d'Inde*, Jatropha curcas — *p. d'Inde, petit*, Croton tiglium.

PIG'NUT, *Earth'nut*, *Ground'nut*. The bulbous root of *Bu'nium Bulbocas'tanum*. *Ord.* Umbelliferæ. (Called *pignuts*, from the fondness of the pig for them.) They have been considered to possess a styptic quality; and are deemed serviceable in atonic affections of the kidney. See Bunium bulbocastanum.

PIG'S FLARE, Adeps suillus.

PIKROPEGÆ, Picropegæ.

PIKRY, (from πικρος, 'bitter,') Pulvis aloës et canellæ.

PI'LA, (πιλος,) *Sphæ'ra*, *Pal'la*, *Ball*. A gymnastic exercise, much used by the ancients as well as moderns. Also, a mortar and a pestle — *Ac'onē*.

PILA, Mortar, Pillar — p. Damarum, Ægagropila.

PILA MARI'NA, *Sphæ'ra Mari'na* seu *Thalas'sia*, *Haleyoni'um rotun'dum*, (F.) *Pelote de Mer*, *Zostère*, *Algue marine*, *A. commune* ou *des Verriers*. Certain light, round, depressed, or oblong masses — inodorous and insipid — in which rushes, hairs, and the *débris* of shells are met with. These are found on the sea-shores, and have been regarded by Spielmann as consisting chiefly of the roots of the *Zoste'ra Mari'na* seu *Marit'ima*, *Alga Mari'na*, (*Big tangles*, *Ware*, *Wair*, *Sea-ware*, *Sea wrack*, *Eel grass*,) *Phucagros'tis minor*. Iodine is detected in the ashes, which accounts for their success in goître. They have, also, been given as a vermifuge.

PILA RUPICAPRARUM, Ægagropila.

PILAIRE, Pileous.

PILAR, Pileous.

PILARE MALUM, Trichosis.

PILA'TIO, (*pilus*, 'a hair.') Fracture of the cranium in which the fissure is narrow, and has the appearance of a hair — a *cap'illary fissure*, (F.) *Fente capillaire*.

PILE, (*pilus*,) Hair.

PI'LEA PU'MILA, (from *pilus*, 'a hair,' *pilosus*, 'hairy.') *Richweed*, *Clearweed*, *Coolweed*; indigenous; *Order*, Urticaceæ; flowering from July to September; has been used as a wash in poisoning by Rhus. It has a strong, grateful smell.

PILEOLUM. (dim of *pileus*,) *Calotte*.

PILEOLUS, Caul, Pileus.

PI'LEOUS, *Pilo'sus*, *Pi'lose*, *Pi'lous*, *Pi'lar*, (F.) *Pileux*, *Pilaire*, (from *pilus*, 'a hair.') That which relates to the hair. Hairy.

PILEOUS SYSTEM of Bichat is that formed by

the hair. It comprises the different species of hair of the human body.

PILES, BLEEDING, see Hæmorrhois — p. Blind, Cæcæ hæmorrhoïdes, see Hæmorrhois—p. Open, see Hæmorrhois.

PI'LEUS, (πιλεος, 'a hat, cap, or bonnet for the head.') *Pile'olus.* A shield. A nipple-like instrument, formed of various materials, and used by females for protecting the nipple during the child's sucking, when the part is painful. Also, a caul.

PILEUS, Cucupha — p. Hippocraticus, *Bonnet d'Hippocrate.*

PILEUX, Pileous.

PILEWORT, Ranunculus acris, and R. ficaria.

PILI ANALES, (pl. of *pilus,*) see Anal — p. Capitis, see Capillus — p. Cutis, Lanugo—p. Palpebrarum, Cilia — p. Pudendorum, Pubes — p. Subaxillares, see Axilla.

PILIER, ([L.] *pila,*) Pillar.

PILIF'EROUS, *Pilif'er*, (F.) *Pilifère*, (*pili*, 'hairs,' and *fero*, 'I bear.') Pile or hair bearing,'— as a '*piliferous* cyst,' — one containing hair.

PI'LIFORM, *Piliform'is*, (F.) *Piliforme*, (from *pilus*, and *forma*, 'form.') Having the form of a hair.

PILIMICTIO, (*pili*, 'hairs,' and *mictio*, 'urination,') see Trichiasis.

PILL, Pilula — p. Abernethy's, see Pilulæ hydrargyri — p. of Barbadoes Aloes, see Pilulæ aloes — p. of Socotrine Aloes, see Pilulæ aloes — p. of Aloes and camboge, Pilulæ aloes et cambogiæ — p. of Aloes and cinchona, Pilulæ aloes et kinæ kinæ — p. of Aloes and colocynth, Pilulæ aloes et colocynthidis — p. of Aloes and fetid gums, Pilulæ de aloe et fœtidis—p. of Aloes and ginger, Pilulæ aloes et zingiberis — p. of Aloes and iron, Pilulæ aloes et ferri — p. of Aloes and mastich, Pilulæ aloes et mastiches — p. Aloes and myrrh, Pilulæ aloes et myrrhæ — p. Aloetic, Pilulæ aloeticæ — p. Aloetic and assafœtida, Pilulæ aloes et assafœtidæ—p. PILL, BLAIR'S. An empirical preparation of colchicum, much used in England in cases of gout.

PILL, BLAUD'S. These pills, proposed by M. Blaud as antichlorotic, are formed as follows:— Take of *gum tragacanth*, in powder, six grains; *water*, one drachm. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pill similar to that of Vallet, substitute a drachm of powdered sugar for the mucilage. Add afterwards of *sulphate of iron*, in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potassa*, half an ounce. Beat until the mass becomes of a deepgreen colour, and of a soft consistence. Divide into 48 pills or boluses. Dose, one a day; gradually increasing to two, and afterwards to three.

PILL, BLUE, Pilulæ hydrargyri—p. Brandreth's, see Pilulæ aloes et cambogiæ—p. Calomel, Pilulæ hydrargyri chloridi mitis—p. Calomel, compound, Pilulæ hydrargyri submuriatis compositæ — p. Calomel and opium, Pilulæ calomelanos et opii—p. Camboge, Pilulæ cambogiæ compos. — p. Camboge, compound, Pilulæ cambogiæ compositæ — p. of Carbonate of iron, Pilulæ ferri carbonatis—p. Cathartic, compound, Pilulæ catharticæ compositæ — p. PILL, DINNER, see Pilulæ aloes et kinæ kinæ, and Pilulæ aloes et mastiches.

PILL, DINNER, OF MR. MAYO, is composed of *P. Rhei. gr. iv; Sodæ Carb. gr. j.*

PILL, EVERLAST'ING, *Pil'ula æter'na*, (F.) *Pilule perpetuelle.* A pill once in vogue, and said to be composed of metallic antimony. It was believed to have the property of purging as often as it was swallowed. A lady having swallowed one of these pills, became seriously alarmed at its not passing. "Madam," said her physician, "fear not; it has already passed through a hundred patients without any difficulty." — (Paris.)

PILL, FEMALE, Pilulæ de aloe et fœtidis — p. Ferruginous, of Vallet, see Ferri protocarbonas — p. Fothergill's, see Pilulæ aloes et colocynthidis — p. Frank's, see Pilulæ aloes et kinæ kinæ — p. PILL, LARTIGUE'S, *Pil'ulæ Col'chici* et *Digita'lis*, (F.) *Pilules de Lartigue.* (*Ext. Coloc.* c. ℥ss; *Ext. Sem. Colchic. alcoholic., Extract. Digital. alcoholic.* āā gr. iss; f. massa in pilul. x. dividend.) Dose, two, three, or more, in the 24 hours, in gout, until purging is induced.

This is a form that has been employed as a substitute for the *Pilules de Lartigue*, the composition of which is not known. M. Bouchardat recommends for the same purpose a combination of *Extractum colocynthidis compositum, Extractum colchici* and *Extractum opii*, which is almost identical with pills prescribed by Sir Henry Holford for the gout; the only difference being, that the latter substitutes *Dover's powder* for the *Extractum opii.* Prof. Wittstein affirms that their composition is *powdered colchicum*, two grains; *sugar* and *mucilage*, each half a grain.

PILL, OPIATE, OF LEAD, Pilulæ plumbi opiatæ.

PILL, LEE'S NEW LON'DON, is composed of *scammony, gamboge, calomel, jalap, aloes, soap*, and *syrup of buckthorn.*

PILL, LEE'S WIND'HAM, consists of *gamboge, aloes, soap*, and *nitrate of potassa.*

PILL MACHINE, *Pilulier.*

Pill Tile, see Pilula.

Pill, Turpentine, Pilulæ de terebinthinâ — p. Vallet's, see Ferri protocarbonas, and Pilulæ ferri carbonatis — p. Webster's, Pilulæ aloes et kinæ kinæ—p. Whytt's, see Pilulæ de aloe et fœtidis.

PIL'LAR, *Pi'la, Colum'na, Columel'la.* (F.) *Pilier.* A name given to several parts; as the *pillars of the velum palati, diaphragm,* &c.

PILLULA, Pilula.

PILNA, MINERAL WATERS OF, see Püllna.

PILON, Pilum.

PILOSELLA, (from *pilosus,*) Hieracium pilosella — p. Alpina, Hieracium pilosella.

PILOSUS, (from *pilus,* 'a hair,') Pileous.

PILOUS, Pileous.

PIL'ULA, pl. *Pil'ulæ, Pill'ula,* (dim. of *pila,* 'a ball.') *Coccus, Sphærid'ion, Catapot'ion, Catapot'otum, Sphæ'rion, Gongyl'ion, Gon'gylis, Gongylid'ium, Sphæ'rula Gale'ni.* A pill. (F.) *Pilule.* A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Bolus,* the latter being softer and larger.

Medicines are often given in the form of pill, on account of their disagreeable taste and odour, and for the like reason they are now sugar-coated. *Pilula* also means a *Pilular mass,* or the mass formed by the amalgamation of the different articles that enter into the composition of the pill. To form the mass into pills, it is rolled out and divided by the spatula on a *pill tile* or by a *pill machine.*

PILULÆ, see Pilula — p. Æternæ, Pill, everlasting — p. ex Aloe, P. aloes compositæ — p. de Aloe et cambogiâ, P. aloes et cambogiæ.

Pilulæ Al'oës, *P. Aloët'icæ* seu *ex Aloë et Sapo'nē, Aloet'ic Pill,* (F.) *Pilules d'aloes* ou *aloétiques.* (*Aloës in pulv.; Saponis sing.* ʒj; *Syr.* q. s. to form 240 pills — Ph. U. S.) Dose, gr. x to xx, in habitual costiveness.

Pilulæ Aloës Barbaden'sis, *Pill of Barbadoes Aloes* (Ph. B. 1864,) is made of *Aloes Barbad.,* in powder, ℥ij, *Sapo. dur.,* in powder, ʒj; *Ol. carui,* f. ʒj; *Confect. Ros.* q. s. to form a mass.

Pilulæ Aloës Compos'itæ, *P. ex Aloë, Compound Aloët'ic Pills.* (*Aloës spic. extract.* cont. ʒj; *Ext. gentianæ,* ʒss; *Olei carui,* gtt. xl; *Syr.* q. s.—Ph. L.) These are sometimes, also, called *Family pills, Antibilious pills,* &c.

Pilulæ Aloës Socotri'næ, *Pill of Socotrine Aloes,* of the same Pharmacopœia, is made of *Aloes Socotrin.* in powder, ℥ij; *Sapo dur.* in powder, ʒj; *Ol. myrist.* fʒj; *Confect. Ros.* ʒj.

Pilulæ Aloës et Assafœ'tidæ, *Aloët'ic and Assafet'ida Pills.* (*Aloës, Assafœtidæ, Saponis sing.* ʒss; *Aquæ,* q. s. to form 180 pills — Ph. U. S.) Purgative and stomachic. Dose, gr. x.

Pilulæ Aloës et Cambo'giæ, *P. de Al'oë et Cambo'giâ* seu *Hydrago'gæ Bon'tii, Pill of Aloes and Camboge'.* (*Aloës, Cambog., Gum ammoniac.,* āā p. æ. Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a waterbath, to a pilular consistence — Ph. P.) Purgative; used in dropsy. Dose, gr. xij to xxx.

Pe'ter's Pills—a nostrum—are formed of *Aloes, Jalap, Scammony,* and *Camboge,* of each equal parts.

The basis of *Mor'rison's Pills,* often called *Hygiene Pills,* of *Brand'reth's Pills,* and *Moff'at's Pills,* is said to be aloes, with *Camboge, Scammony,* &c.

Rush's Pills were formed of *Calomel, Aloes,* and *Camboge,* with *Oil of mint.*

Pilulæ Aloës et Colocyn'thidis, *P. ex Colocyn'thidē cum aloē* seu *Aloës cum Colocynthidē* seu *coc'ciæ* seu *coc'chii* seu *colocyn'thidis compos'itæ* seu *coc'ciæ mino'res, Pill of Al'oes and Col'ocynth.,* (F.) *Pilules panchymagogues* ou *universelles, Pilules cochées.* (*Pulp. coloc.* ʒss; *Aloës hepat., Scammon.* āā ʒj; *Sapon.* ʒij; *Ol. caryoph.* ʒj; *Syrup.* q. s.— Ph. D.) Cathartic. Dose, gr. v to x or more.

Foth'ergill's Pills consist of *aloes, scammony, colocynth,* and *oxide of antimony;* and *Har'vey's Antibil'ious Pills,* and *Ru'dius's Pills,* (see Extractum Rudii,) do not differ much from them.

Pilulæ Aloës et Fer'ri, *Pills of al'oes and Iron.* (*Ferri sulphat.* p. iij; *Aloës Barbad.* p. ij; *Pulv. arom.* p. vj; *Conserv. rosæ,* p. viij — Ph. Ed.) In atonic constipation. Dose, one to three pills.

Pilulæ de Aloë et Fœ'tidis, *P. Benedic'tæ Fulleri* seu *Ecphrac'ticæ* seu *Aloës martia'les, Pills of al'oes and fet'id gums, Fe'male pills,* (F.) *Pilules bénites de Fuller.* (*Aloës socotr., Sennæ, Assafœtidæ, Galbani,* āā ʒij; *Myrrh.* ʒiv; *Croci, Macis,* āā ʒj; *Ferri sulphat.* ʒiss. Reduce to powder separately, and add *Ol. succin.* gtt. viij: *Syr. artemisiæ,* q. s. — Ph. P.) Purgative, and given in hysteria. Dose, gr. xv to xx.

Whytt's Pills, given in similar cases, consisted of *Chloride of iron, Aloes, Extract of horehound,* and *Assafœtida.*

Stahl's Pills, much used as a tonic aperient in Germany, are made as follows:—*Ferri pulv.* ℈ss; *Aloës pulv.,* ℈ij; *Ext. colocynth.* ℈j; *Mucilag. acaciæ* q. s. ut fiant pil xl.

Pilulæ Aloës et Jalap'æ, commonly called *An'derson's pills, An'derson's Scots' pills, Scotch pills.* (*Aloës Barbad.* ℔j; *Rad. helleb. nigr., Rad. jalapæ, Potassæ subcarb.* āā ʒj; *Ol. anisi,* ʒiv; *Syrup. simpl.* q. s. M.) Dose, gr. x to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloës Barbadens.* ℥xxiv; *Saponis.* ʒiv; *Colocynthid.* ʒj; *Cambogiæ,* ʒj; *Ol. anis.* fʒss.

Holloway's Pills are said to be composed as follows: *Aloës* gr. lxij; *Rhei pulv.* gr. xxvj; *Piperis,* gr. viij; *Croci, Sodæ sulphat.* āā gr. iij, M. et f. pil. cxliv.

Pilulæ Aloës et Ki'næ Ki'næ, *P. stomach'icæ* seu *an'te ci'bum, Pill of al'oes and cincho'na,* (F.) *Pilules gourmandes.* (*Aloës socotr.* ʒvj; *Ext. cinchon.* ʒiij; *Cinnam.* ʒj; *Syrup. absinth.* q. s.— Ph. P.) Stomachic and laxative. Dose, gr. x to xx.

La'dy Cresping'y's pills, La'dy Web'ster's pills, La'dy Hesk'eth's pills; the *Pilules de Duchesne* (*Quercetanus*), the *Grains de Vie* ou *Pilules de Clérambourg;* the *Pilules Indiennes stomachiques de De la Croix,* the *Pilules de Barbier,* and the *Pilulæ stomach'icæ Mesuës,* (Ph. L. 1635,) resemble these. See Pilulæ Aloës et Mastiches.

Frank's Pills, much employed, also, as 'dinner

pills,' or, — to use the language of the eccentric Kitchener,—as *'peptic persuaders,'* are said to be much used, under the name *Graines de santé*, in various parts of Europe. They consist of *Aloes*, *Jalap*, and *Rhubarb*, with *Syrup of wormwood* as an excipient.

PILULÆ ALOES MARTIALES, P. de aloe et fœtidis.

PILULÆ ALOËS ET MAS'TICHES, *Pills of Al'oes and mas'tich.* (*Aloës socotrin.* in pulv. ℥iss; *Mastich.* pulv. *Ros. Gallic.* āā ℥ss, M. et divide in pil. cccc.—Ph. U. S. 1864.) The mastich is added to the aloes to prevent the too ready solution of the latter in the gastric and intestinal fluids; so that it is long in operating as a laxative. One is usually taken before dinner as a 'dinner pill.' It has been introduced into the Ph. U. S., 1864, as a form for *Lady Webster's pills.*

PILULÆ ALOËS ET MYR'RHÆ, *P. aloës cum myr'rhâ* seu *de aloë et myr'rhâ*, *P. Ru'fi* seu *Ruf'fi* seu *commu'nes*, *Ru'fus's* or *Ruf'fus's pills. Common pills, Pills of aloes and myrrh.* (*Aloës*, ℥ij; *Croci*, in pulv. ℥ss; *Myrrh.* ℥j; *Syr.* q. s. to form 480 pills.—Ph. U. S.) Cathartic and emmenagogue. Dose, gr. x to xx.

Hoop'er's Pills—possessed of similar properties—according to one of Gray's formulæ, are made as follows: *Ferri sulph.*, *Aquæ*, āā ℥viij. Dissolve. Add *Aloes Barbad.* ℔ij and ℥viij; *Canellæ albæ*, ℥vj; *Gum. myrrh.* ℥ij; *Opopanacis*, ℥iv.

The committee of the Philadelphia College of Pharmacy recommend the following form: *Aloës Barbadensis*, ℥viij; *Ferri sulphatis exsiccat.* ℥ij, and ℥iss, vel *Ferri sulph. crystall.* ℥iv; *Ext. helleb. nigr.* ℥ij; *Myrrh.* ℥ij; *Saponis*, ℥ij; *Canellæ*, in pulv. tritæ, ℥j; *Zingib.* in pulv. trit. ℥j.

Speediman's Pills consist of *aloes, myrrh, rhubarb, extract of chamomile,* and *essential oil of chamomile;* and the *Pills of Barthez, of aloes, myrrh, musk, camphor,* and *balsam of Peru.*

PILULÆ DE ALOE ET SAPONE, P. aloeticæ.

PILULÆ ALOËS CUM ZINGIB'ERĒ, *Pills of al'oes and gin'ger.* (*Aloës hepat.* ℥j; *Rad. zingib.* in pulv. ℥j; *Sapon. hispan.* ℥ss; *Ol. ess. menthæ pip.* ℥ss.—Ph. D.) In habitual costiveness. Dose, gr. x to xx.

PILULÆ AMMONIURE'TI CU'PRI, *P. Cu'pri, Pills of Ammo'niuret of cop'per,* (F.) *Pilules d'ammoniure de cuivre.* (*Ammoniur. cupri*, in pulv. ten. trit., gr. xvj; *Micæ panis*, ℈iv; *Aquæ carbonatis ammoniæ*, q. s. Beat into a mass, and divide into xxxij pills.—Ph. E.) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

PILULÆ ANTE CIBUM, 'pills before food,' P. aloes et kinæ kinæ.

PILULÆ ANTIBILIO'SÆ, *Bar'clay's Antibil'ious pills.* (*Extract of colocynth*, ℥ij; *Resin of jalap*, ℥j; *Almond soap*, ℥iss; *Guaiac*, ℥iij; *Emetic tart.* gr. viij; *Oils of juniper, carraway, and rosemary*, āā iv drops; *Syrup of buckthorn*, q. s. to form 64 pills.) Dose, two or three.

Dix'on's Antibil'ious pills are formed of *Aloes, Scammony, Rhubarb,* and *Tartarized antimony.*

PILULÆ ANTIHERPETICÆ, Pilulæ hydrargyri submuriatis comp.—p. Antihystericæ, P. galbani compositæ.

PILULÆ ANTISCROPHULO'SÆ, *P. ex ox'ido stib'ii et hydrar'gyri sulphure'to ni'gro compos'itæ.* (*P. scammon., Hydrarg. sulphur. nigr.* āā ℥ij; *Antimonii oxidi albi, Milleped., Sapon. amygdalin.* āā ℥iij; *Extract. glycyrrh.* ℥v. Make into a mass.—Ph. P.) Dose, gr. iv to xx.

PILULÆ ANTISPASTICÆ, P. galbani compositæ.

PILULÆ ASIAT'ICÆ, *Asiat'ic* or *Tanjore' pills.* (*Acid. arsenios.* gr. lv; *Piper. nigr.* pulv. ℥ix; *Acaciæ*, q. s. ut fiant pil. 800.) Each pill contains about one-fifteenth of a grain of arsenious acid. These pills are employed in India for the cure of syphilis and elephantiasis

PILULÆ ASSAFŒ'TIDÆ, *Assafet'ida pills.* (*Assafœtid.* ℥iss; *Saponis*, ℥ss. Beat with *water* so as to form a mass to be divided into 240 pills.—Ph. U. S.)

PILULÆ ASSAFŒTIDÆ COMPOSITÆ, P. galbani compositæ.

PILULÆ BALSAM'ICÆ, *P. Docto'ris Mor'ton.* (*Milleped.* pulverisat. ℥xviij; *Gum ammon.* ℥xj; *Acid. benzoic.* ℥vj; *Croci*, *Balsami Peruv.* āā ℥j; *Balsam. sulph. anisat.* ℥vj. Mix.—Ph. P.) Tonic, expectorant, and balsamic.

PILULÆ BARBAROSSÆ, see Barbarossæ pilulæ—p. Benedictæ Fulleri, P. de aloe et fœtidis.

PILULÆ CALOMELANOS COMPOSITÆ, P. Hydrargyri submuriatis compositæ.

PILULÆ CALOMEL'ANOS ET O'PII, *P. Hydrargyri chlor'idi et o'pii, Pills of Cal'omel and O'pium.* (*Hydrarg. chlorid. mit.* p. iij; *Opii*, p. j; *Confect. Ros.* q. s. To be divided into pills each containing two grains of calomel.—Ph. Ed.)

PILULÆ CAMBO'GIÆ COMPOS'ITÆ, *P. de gut'tâ gaman'drâ* seu *hydrago'gæ* seu *gum'mi gut'tæ aloet'icæ, Gamboge' pills, Com'pound camboge' pills,* (F.) *Pilules de gomme gutte composées.* (*Cambogiæ contritæ, Aloes spicat. extract. contriti, Pulv. cinnam. comp.* sing. ℥j; *Saponis*, ℥ij.—Ph. L.) Cathartic. Dose, gr. x to xx.

Mor'rison's Pills are said by Dr. Paris to be nothing more than the above, with the addition of a small portion of *Cream of tartar.*

PIL'ULÆ CATHAR'TICÆ COMPOS'ITÆ, *Com'pound cathar'tic pills.* (*Ext. colocynth. comp.* in pulv. ℥ss; *Ext. jalapæ*, in pulv., *Hydrarg. chlorid. mit.* āā ℥iij; *Gambog.* in pulv. ℈ij. M. Form into a mass with *water*, and make into 180 pills.—Ph. U. S.) Three for a dose.

PILULÆ COCCHII, P. aloes et colocynthidis—p. Coccinæ minores, P. aloes et colocynthidis—p. Coccinæ, P. aloes et colocynthidis—p. Colchici et digitalis, P. Lartigue's—p. Colocynthidis compositæ, P. aloes et colocynthidis—p. ex Colocynthide cum aloe, P. aloes et colocynthidis.

PILULÆ COLOCYNTH'IDIS ET HYOSCY'AMI, *Pills of Col'ocynth and Hen'bane.* (*Pil. Colocynth. comp.* p. ij; *Ext. Hyoscyam.* p. i.—Ph. E.) Dose, gr. v to gr. xx.

A much more elaborate formula is contained in the Ph. B. (1864.) (*Colocynth*, in powder, ℥j; *Barbadoes Aloes*, in powder, ℥ij; *Scammony*, in powder, ℥ij; *Sulphate of potassa*, in powder, ℥ij; *Oil of cloves*, f℥ij; *Extract of Hyoscyamus*, ℥iij; *Distilled water*, q. s. Beat into a mass.)

PILULÆ COMMUNES, P. aloes et myrrhæ.

PILULÆ CONI'I COMPOS'ITÆ, *Com'pound Pill of Hem'lock.* (*Ext. Conii* ℥v; *Ipecac.* pulv. ℥j; *Theriac.* q. s.—Ph. L.) Dose, gr. v three times a day.

PILULÆ COPAI'BÆ, *Pills of Copai'ba.* (*Copaib.* ℥ij; *Magnesiæ*, recenter præpar. ℥j. Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills.—Ph. U. S.) Each pill contains nearly five grains of copaiba. Two to six for a dose.

PILULÆ CUPRI, P. ammoniureti cupri.

PILULÆ CUPRI AMMONIA'TI, *Pills of ammo'niated Cop'per.* (*Cupri ammon.* in pulv. p. j; *Micæ panis*, p. vj; *Liq. ammon. carbonat.* q. s.—Ph. E.) Dose, one to six pills.

PILULÆ DE CYNOGLOS'SO, *P. de extrac'to o'pii.* (*Pulv. rad. cynoglos., Semin. hyoscyam. alb., Extract. opii vinos.* āā ℥iv; *Pulv. myrrh.* ℥vj; *Olibani.* ℥v; *Croci*, *Castor.*, āā ℥iss; *Syrup opii*, q. s.—Ph. P.) Anodyne. In cough, &c. Dose, gr. iv to gr. viij.

PILULÆ DEPURANTES, 'depurative pills,' P. hydrargyri submuriatis compositæ.

PILULÆ DIGITA'LIS ET SCIL'LÆ, *Pills of Digita'lis and Squill.* (*Digital., Scillæ*, āā p. j; *Elect. aromat.* p. ij.—Ph. E.) One or two pills for a dose.

Pilulæ Ecphracticæ, P. de aloe et fœtidis.

Pilulæ Fer'ri Carbona'tis, *Pills of car'bonate of i'ron, Vallet's pills, Vallet's ferru'ginous pills.* (*Ferri sulph.* ℥viij; *Sodæ carbonat.* ℥ix; *Mel. despumat.* ℥iij; *Sacchar.* ℥ij; *Aquæ bullientis*, Oij; *Syrup.* q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of f℥j of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible; then mix it with the honey and sugar. Lastly, heat the mixture in a water-bath, until it attains a pilular consistence.—Ph. U. S. 1863.) Dose, gr. v to xv. or more.

The formula in the Ph. B. (1864) is—*Saccharated Carbonate of iron*, ℥j; *Confection of Roses*, ℥ℌ. Beat into a mass.

Pilulæ Fer'ri Compos'itæ, *P. fer'ri cum myrrhâ, Com'pound pills of i'ron, Griffith's Pills*, (F.) *Pilules de fer composées.* (*Myrrh.* in pulv. ℥ij; *Sodæ carb., Ferri sulph.* āā ℥j; *Syrup.* q. s. Mix, to form 80 pills.—Ph. U. S.) Tonic. Dose, gr. x to xx.

Pilulæ Fer'ri Io'didi, *Pills of I'odide of i'ron.* (*Ferri sulphat.* ℥j; *Potass. iodid.* ℈iv; *Tragacanth.* pulv. gr. x; *Sacchar.* pulv. ℥ss. Beat with syrup into a mass, to form 40 pills.—Ph. U. S. 1851.) A modified form is given in the Ph. U. S. for 1863. Dose, one to three where a tonic and eutrophic is indicated.

Pilulæ Ferri cum Myrrhâ, P. Ferri compositæ.

Pilulæ Ferri Sulpha'tis, *Pills of Sul'phate of I'ron.* (*Ferri sulph. exsicc.* p. ij; *Ext. Taraxac.* p. v; *Conserv. Rosæ*, p. ij; *Glycyrrhiz.* pulv. p. iij.—Ph. E.) Dose, gr. v to gr. xx.

Pilulæ Fœtidæ, P. galbani compositæ.

Pilulæ Gal'bani Compos'itæ, *P. assafœ'tidæ compos'itæ* seu *fœ'tidæ* seu *gummo'sæ* seu *e gum'mi* seu *antispas'ticæ* seu *antihyster'icæ* seu *myr'rhæ compos'itæ, Com'pound gal'banum pill, Gum pill.* (*Galban., Myrrhæ*, āā ℥vj; *Assafœtidæ*, ℥ij; *Syrup.* q. s. to form 240 pills.—Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

Pilulæ Gummi, P. galbani compositæ—p. Gummi guttæ aloeticæ, P. cambogiæ compositæ—p. Gummosæ, P. galbani compositæ—p. de Guttâ gamandrâ, P. cambogiæ compositæ.

Pilulæ ex Helleb'oro et Myr'rhâ, *P. ton'icæ, Ba'cher's pills, Ton'ic pills of Ba'cher, Pills of hel'lebore and myrrh.* (*Ext. hellcb. nig., Myrrh.* āā ℥j; *Fol. cardui benedict.* in pulv. ℥iij. M.—Ph. P.) Tonic and emmenagogue. In dropsical, cutaneous, and verminous affections. Dose, gr. iv to gr. viij.

Matthews's pills, Star'key's pills, are formed of *Rad. hellcb. nigr., Rad. glycyrrh., Sapon. Castill., Rad. curcumæ, Opii purif., Syrup. croci*, āā ℥iv; *Ol. tereb.* q. s. ut fiat massa.—(Gray.)

Pilulæ Hydragogæ, P. cambogiæ compositæ—p. Hydragogæ Bontii, Pilulæ aloes et cambogiæ.

Pilulæ Hydrar'gyri, *P. mercuria'les, Mercu'rial* or *Blue pill, Blue mass, Pills of Mer'cury*, (F.) *Pilules de Mercure.* (*Hydrarg. purif.* ℥j; *Conf. rosæ*, ℥iss; *Glycyrrh.* pulv. ℥ss. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills.—Ph. U. S.) Antisyphilitic; mercurial;—in large doses, purgative.

A purgative pill, much prescribed by Mr. Abernethy, and called *Ab'ernethy's pill*, consisted of *Pil. hydrarg.* gr. x; *Jalap.* pulv. gr. xx; *Syrup. rhamni*, q. s. ut fiant pil. vj. Two were given at night, and the next morning a wineglassful of *infusum sennæ.*

Pilulæ Hydrargyri Chloridi et Opii, P. Calomelanos et Opii.

Pilulæ Hydrar'gyri Chlo'ridi Mi'tis, *Pills of mild chlo'ride of mer'cury, Cal'omel pills.* (*Hydrarg. chlorid. mit.* ℥ss; *Acaciæ*, in pulv. ℥j; *Syrup.* q. s. ut fiant pil. 240.—Ph. U. S.) Each pill contains one grain.

Pilulæ Hydrar'gyri Submuria'tis Compos'itæ, *Pilulæ Antimo'nii Compositæ*, (Ph. U. S. 1863,) *P. ex stib'io et hydrar'gyro* seu *antiherpet'icæ* seu *ex hydrargyro murial'ico mi'ti cum sul'phure stibia'to aurianti'aco* seu *resolven'tes cum mercu'rio* seu *depuran'tes* seu *hydrar'gyri submu'ria'tis, Pil'ulæ Hydrar'gyri chlo'ridi compo'sitæ, Pil'ulæ calomel'anos compos'itæ, Com'pound Cal'omel pill, Com'pound pills of submu'riate of mer'cury, Cal'omel pills, Plum'mer's pills, Red pill.* (*Hydrarg. submur., Antimon. sulphur. precipitat.* sing. ℥ij; *guaiac. resin.* pulv., *Syrup. fusc.* āā ℥ss. Beat together, and divide into ccxl pills. Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

Leake's pil'ula saluta'ria resembles these. It is used in syphilis.

Pilulæ Hydrargyri Submuriatis et Opii, P. Calomelanos et Opii.

Pilulæ de Hydrar'gyro, Scammo'nio et Al'oë, vulgo Mercuria'les, (F.) *Pilules Mercurielles* ou *de Mercure, Scammonée et Aloes.* (*Hydrarg. purif.* ℥j; *Mellis*, ℥xj. Rub until the globules disappear; then add *Aloes Socot., Scammon.* āā ℥ij; *Macis, Cinnam.* āā ℥ij. Make into a mass.—Ph. P.) *Uses*, same as the last, but they are more active. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Renaudot.*

Pilulæ ex Hydrargyro Muriatico miti cum Sulphure Stibiato Aurantiaco, Pilulæ hydrargyri submuriatis compositæ.

Pilulæ Ipecacuan'idæ et O'pii, *Pills of Ipecacuan'ha and O'pium.* (*Pulv. Ipecac. et Opii*, p. iij; *Conserv. Rosæ*, p. j.—Ph. E.) One grain of opium in about thirteen grains.

Pilulæ Ipecacuan'hæ cum Scillâ, *Pills of Ipecacuanha with Squill.* (*Pulv. Ipecac. comp.* ℥iij; *Scillæ* pulv., *Ammoniac.* in pulv. āā ℥j; *Theriac.* q. s.—Ph. L.) Dose, gr. v to x.

Pilulæ Mercuriales, P. hydrargyri, P. de hydrargyro, scammonio et aloe—p. Doctoris Morton, P. balsamicæ—p. Myrrhæ compositæ, P. Galbani compositæ.

Pilulæ Opia'tæ, *Pilulæ O'pii* (Ph. U. S.), *P. Theba'icæ, O'piate pills, Com'mon night pills, An'odyne pills*, (Prov.) *Squatting pills, Nepen'thes opia'tum*, (F.) *Pilules opiacées.* (*Opii* pulv. ℥j; *Sapon.* gr. xij; to be made into 60 pills.—Ph. U. S.) Each pill contains a grain of opium.

Pilulæ de Extracto Opii, P. de cynoglosso—p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, Pilulæ antiscrophulosæ.

Pilulæ Plumbi Opia'tæ, *Pilula Plumbi cum Opio*, (Ph. B. 1864,) *O'piate Pills of Lead, Pill of Lead and Opium.* (*Plumb. acetat.*, p. vj; *Opii*, p. j; *Conserv. Rosæ*, p. j. To be made into four grain pills.—Ph. E.) Each pill contains three grains of acetate of lead.

Pilulæ Qui'niæ Sulpha'tis. *Pills of sul'phate of qui'nia.* (*Quin. sulph.* ℥j; *Acaciæ*, in pulv. ℥ij; *Mel.* q. s. ut fiant pilulæ 480.—Ph. U. S.) Each pill contains a grain of the sulphate of quinia.

Pilulæ Resolventes cum Mercurio, P. hydrargyri submuriatis compositæ—p. de Rhabarbaro, Pilulæ rhei compositæ.

The stomachic nostrum, sold under the name

of *Mose'ley's pills*, consists merely of *rhubarb* and *ginger*.

PILULÆ RHE'I, *Pills of Rhubarb.* (*Rhei* pulv. ʒvj; *Saponis*, ʒij. M. et fiant pil. 120.—Ph. U. S.) Each pill contains three grains of rhubarb.

A good *Dinner* or *Stomach'ic pill* is made of *Rhei* pulv. ʒij; *Capsic.* pulv. ʒj; make into a mass with molasses, and divide into 60 pills. Dose, two or three before dinner.

PILULÆ RHE'I COMPOS'ITÆ, *P. de Rhabar'baro, Com'pound rhu'barb pills.* (*Rhei* pulv. ʒj; *Aloes*, pulv. ʒvj; *Myrrh.* pulv. ʒiv; *Ol. menthæ pip.* fʒss. Beat into a mass, with *Syrup of orange-peel*, to form 240 pills.—Ph. U. S.) Laxative and stomachic. Dose, gr. x to xx.

PILULÆ RHEI ET FER'RI, *Pills of Rhu'barb and Iron.* (*Ferri sulph.* exsiccat. p. iv; *Ext. Rhei*, p. x; *Conserv. Rosæ* p. v. Make into five grain pills.) Dose, as a tonic and laxative, two or three pills.

Grif'fitt's pills, so called after Dr. S. P. Griffitts, of Philadelphia, who prescribed them as a tonic aperient, were formed as follows:—*Rhei* pulv. ʒiss; *Ferri sulph.* ʒss; *Saponis*, ℈ij; *Aquæ*, q. s. ut fiat massa in pill. xl dividenda. Dose, three or four at bedtime.

PILULÆ RUFI, P. aloes et myrrhæ—p. Salutariæ, Leake's, see Pilulæ hydrargyri submuriatis compositæ—p. Saponaccæ, P. saponis cum opio—p. Saponis compositæ, P. saponis cum opio.

PILULÆ SAPO'NIS CUM O'PIO, *P. Sapona'ceæ* seu *sapo'nis compos'itæ, Pills of soap and opium*, (F.) *Pilules de savon et d'opium.* (*Opii*, ʒj; *Sapon.* ʒss. M.—Ph. U. S.) Four grains contain one of opium.

The Pharmacopœia of the United States has a form for the *Pil'ulæ o'pii, O'pium pills*, as well as for the *Pilulæ saponis compositæ*; the only difference between them being in the proportion of the ingredients. See Pilulæ opiatæ.

PILULÆ E SCILLÂ, P. Scillæ compositæ.

PILULÆ SCIL'LÆ COMPOS'ITÆ, *P. scillit'icæ* seu *scil'læ cum zingib'ere* seu *e scil'lâ, Com'pound squill pill* or *Compound Pills of Squill.* (*Scillæ* pulv. ʒj; *Zingib.* pulv., *Ammoniac.* pulv. ää ʒij; *Saponis*, ʒiij; *Syrup.* q. s. ut fiant pil. 120.—Ph. U. S.) Dose, two pills. Expectorant and diuretic. Dose, gr. x to xx.

PILULÆ SCILLÆ CUM ZINGIBERE, P. scillæ compositæ—p. Scilliticæ, P. scillæ compositæ—p. ex Stibio et hydrargyro, P. hydrargyri submur. compos.—p. Stomachicæ, P. aloes et kinæ kinæ.

PILULÆ STRYCH'NIÆ, *Pills of Strych'nia.* (Very pure *Strychnia*, 2 gr.; *Conserve of roses*, ʒss. Make into 24 pills.) One or two for a dose.

PILULÆ STY'RACIS, *P. S. Compos'itæ, Sto'raxæ Pills.* (*Styracis pur.* ʒvi; *Opii, Croci*, sing. ʒij.—Ph. E.) Five grains contain one of opium.

PILULÆ SUBLINGUALES, Hypoglottides.

PILULÆ DE TEREBIN'THINÂ, *Tur'pentine Pills.* Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste, which has the properties of turpentine, and has been administered in gleet, &c.

PILULÆ THEBAICÆ, P. opiatæ—p. Tonicæ, P. ex Helleboro et myrrhâ.

PIL'ULAR, *Pilula'ris*, (F.) *Pilulaire*, from *pilula.*) Relating or appertaining to pills,—as 'a *pilular* mass,' '*pilular* form,' &c.

PILULES, Pilulæ—*p. Agrégatives*, see Aggregate—*p. d'Aloes* ou *aloétiques*, Pilulæ aloeticæ—*p. d'Ammoniure de cuivre*, Pilulæ ammoniureti cupri—*p. de Barbier*, see Pilulæ Aloes et kinæ kinæ—*p. Bénites de Fuller*, Pilulæ de aloe et fœtidis—*p. Cochées*, Pilulæ aloes et colocynthidis—*p. de Duchesne*, see Pilulæ Aloes et kinæ kinæ—*p. de Fer composées*, Pilulæ ferri compositæ—*p. Ferrugineuses de Vallet*, see Ferri protocarbonas—*p. Gourmandes*, Pilulæ aloes et kinæ kinæ—*p. Indiennes stomachiques de Delacroix*, see Pilulæ aloes et kinæ kinæ—*p. de Lartigue*, Pill, Lartigue's—*p. de Mercure*, Pilulæ hydrargyri—*p. de Mercure*, &c., Pilulæ de hydrargyro, et scammonio et aloe—*p. Mercurielles*, Pilulæ de hydrargyro, scammonio et aloe—*p. Opiacées*, Pilulæ opiatæ—*p. Panchymagogues*, Pilulæ aloes et colocynthidis—*p. Perpetuelles*, Pill, everlasting—*p. de Savon et d'opium*, Pilulæ saponis cum opio—*p. Universelles*, Pilulæ aloes et colocynthidis.

PILULIER (F.), *Pill Machine'.* An instrument for rolling and dividing pills. Also the earthen pot in which pills are preserved.

PI'LUM, Pistil'lus, Pistil'lum, Hy'peros, Cer'cis, (F.) *Pilon.* A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

A *spring pest'le* is one attached above to a spring, so as to take off the weight, and thus lessen the labour of pounding.

PILUS, Capillus, Caul, Hair.

PIMELE, (πιμελη,) Fat.

PIMELECCHYSIS, (*pimele*, and εγχυσις, 'a pouring out,') Pimelorrhœa.

PIMELICUS, (from *pimele*,) Fatty.

PIMELI'TIS, (*pimele*, and *itis.*) Inflammation of the adipous tissue.

PIMELODES, (πιμελωδης,) Fatty.

PIMELO'MA, gen. *Pimelo'matis*, (*pimele*, and *oma.*) A fatty swelling.

PIMELORRHŒ'A, *Pimelec'chysis*, (*pimele*, and ῥεω, 'I flow.') A morbid discharge or disappearance of fat.

PIMELORTHOPNŒ'A, *Piorthopnœ'a*, (*pimele*, ορθος, 'upright,' and πνειν, 'to breathe.') Dyspnœa, practicable only in the erect attitude, owing to fat.

PIMELO'SIS, *Obes'itas nim'ia*, (from *pimele*, and *osis.*) Conversion into, or formation of, fat,—as *Pimelo'sis hepat'ica*, 'fatty degeneration of the liver.'

PIMELOSIS HEPATICA, Adiposis hepatica, see Pimelosis—p. Nimia, see Polysarcia.

PIMÉLOTIQUE, Corpulent.

PIMELU'RÍA, *Adiposu'ria*, (*pimele*, and ουρον, 'urine,') Fatty urine.

PIMENT, Capsicum annuum—*p. d'Eau*, Polygonum hydropiper—*p. Royal*, Myrica gale.

PIMENTA, see Myrtus pimenta.

PIMENTÆ BACCÆ, see Myrtus pimenta.

PIMENTO, ([S.] *pimienta*, 'pepper,') see Myrtus pimenta.

PIMIACULA, Lips of the Vulva.

PIMPERNEL BLUE, (see Pimpinel,) Scutellaria lateriflora—p. Red, Anagallis—p. Scarlet, Anagallis arvensis—p. Water, Veronica beccabunga.

PIMPILIM, Piper longum.

PIMPINEL, (*bipinella* or *bipennula*, from the double pennate order of its leaves,) see Pimpinella.

PIMPINEL ITALIAN, Sanguisorba officinalis.

PIMPINELLA ALBA, P. saxifraga—p. Angelicæfolia, Ligusticum podagraria.

PIMPINEL'LA ANI'SUM, *An'ise plant, Ani'sum, A. officina'lē* seu *vulga'rē, Si'son ani'sum, A'pium ani'sum, Sola'men intestino'rum, Anc'sum*, (F.) *Anis, Boucage anis. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A native of Egypt. The seeds, *Ani'sum*, (Ph. U. S.) *Sem'ina Ani'si, An'iseed*, (Old Eng.) *Aneys*, have an aromatic odour; and a sweetish, warm, grateful taste. They are carminative, and used in dyspepsia and in tormina of infants. Dose, gr. xv to ʒj, bruised. The oil.—O'LEUM ANI'SI, (F.) *Huile d'anis*—is officinal. Dose, gtt. v to xv. Most of the oil used in this country under the name of

Oil of An'ise is said to be obtained from *Illic''ium Anisa'tum*, in China.

A'qua ani'si, An'ise wa'ter, (Ph. D.), is made by mixing a fluidounce of *essence of anise*, with half a gallon (Imp. meas.) of *distilled water*, and filtering through paper.

PIMPINELLA, GREATER, P. magna—p. Hircina, P. Saxifraga—p. Laterifolia, Sion ammi.

PIMPINELLA MAG'NA seu *ni'gra* seu *ma'jor* seu *ru'bra; Great'er Pimpinel'la; Tragoseli'num mag'num* seu *ma'jus, Dau'cus, Cyan'opus*, (F.) *Boucage majeur*. The root has been extolled as diuretic and resolvent, as well as in erysipelatous ulceration, tinea capitis, rheumatism, &c.

PIMPINELLA MAJOR, P. magna — p. Nigra, P. magna—p. Nostras, P. saxifraga — p. Officinalis, Sanguisorba officinalis—p. Rubra, P. magna.

PIMPINELLA SAXIF'RAGA, *Sax'ifrage, Bur'net saxi'frage, Pote'rium sanguisor'ba, Sorbastrel'la, Tragoseli'num, T. saxif'raga, Pimpinel'la hirci'na* seu *umbellif'era* seu *al'ba* seu *nos'tras*, (F.) *Boucage mineur, Petit B., Pimprenelle, Rompt-pierre*. The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating garglo in paralysis of the tongue.

PIMPINELLA UMBELLIFERA, P. saxifraga.

PIMPLE, ([Sax.] pimpel,) Papula.

PIMPLED, Papulose.

PIMPRENELLE, Pimpinella saxifraga — *p. Noire*, Sanguisorba officinalis.

PIN. (Perhaps from *pennum*, low Latin: or from *spina* [?], or from Gael. *pin,*) *Spi'nu fer'rea, Spi'nula, A'cus capita'ta*, (F.) *Épingle*. An iron or brass instrument, generally of a small size, pointed at one extremity, and having a head at the other. It is used, in surgery, to fix rollers and dressings; and occasionally in sutures.

PIN, Pinus—*p. à Pignon*, see Pinus pinea.

PIN AND WEB, Caligo, Pterygion.

PINASTELLUM, (from *pinus,*) Peucedanum.

PINASTER, (from *pinus,*) Pinus sylvestris.

PINBONE, Ischion.

PINCE, (from *pincer*, 'to pinch,') Forceps—*p. à Anneaux*, see Forceps—*p. à Dissection*, see Forceps — *p. à Ligature*, see Forceps — *p. Lithodrassique*, see Lithodrassic—*p. de Museux*, see Forceps —*p. à Pansement*, see Forceps.

PINCÉ, Pinched.

PINCÉE, Pugillus.

PINCERS, Forceps.

PINCETTE, Forceps.

PINCH'ED, *Contrac'tus, Retrac'tus*, (F.) *Pincé, Grippé*. An epithet applied to the face, when the features are contracted or shrunken; as in violent abdominal affections, or during intense pain.

PICKNE'YA PU'BENS, *P. Pubes'cens, Geor'gia Bark, Bit'ter Bark, Flor'ida Bark, Fe'ver tree*. This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose of the powder, ʒj.

PINDARS, Arachis Hypogea.

PINE, Pinus.

PINE APPLE, Bromelia ananas—p. Aphernousli, Pinus cembra — p. Ground, Lycopodium complanatum—p. Ground, stinking, Camphorosma Monspeliaca—p. Loblolly, Pinus tæda — p. Mountain, see Pinus mughos—p. Mugho, see Pinus mughos — p. Prince's, Pyrola umbellata — p. Sap, American, Hypopitys lanuginosa — p. Stone, Pinus pinea — p. Sugar, see Arrow Root — p. Yellow, Pinus palustris.

PINEA, Pinus Pinea.

PIN'EAL OR PINE'AL, *Pinea'lis*, (F.) *Pinéal*, (*pinea*, 'a pine cone.') That which resembles a pine cone.

PINEAL GLAND, *Glan'dula pinca'lis, Cer'ebral epiph'ysis, Cona'rium, Conoï'des cor'pus, Cor'pus turbina'tum, Pe'nis* seu *Vir'ga* seu *Tur'bo cer'ebri*, is a small body, of conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles, *Sab'ulum cona'rii, Brain Sand, Pin'eal Sand*. When these are grouped together over the base of the gland, they form the *Acer'vulus Cer'ebri* of Sömmering, *Acer'vuli* seu *Lapil'li Glan'dulæ pinea'lis*. From its anterior parts arise two medullary striæ, which proceed over the posterior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix, — the *Habe'næ, Haben'ulæ* or *reins of the pineal gland —Pedun'culi cona'rii*, see Peduncles of the Pineal Gland.

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

PINEAL SAND, see Pineal gland.

PINEI, see Pinus pinea.

PINEOLI, see Pinus pinea.

PINEUS PURGANS, Jatropha curcas.

PINEWEED, Hypericum sarothra.

PINGUEC'ULA, *Pinguic'nla, Pterygʻium pinguē* seu *larda'ceum*, (from *pinguis*, 'fat,' 'fatty.') A small, whitishyellow tumour in the sclerotic conjunctiva and subjacent areolar tissue, close to the margin of the cornea on its nasal or temporal side; so called from its being supposed, but erroneously, to be of a fatty nature.

PINGUEDINOUS, Fatty.

PINGUEDO, gen. *Pingue'dinis*, Fat—p. Renalis, Nephridion.

PINGUICULA, Pinguecula.

PINGUIC'ULA VULGA'RIS, (from *pinguis*, 'fat.') *P. alpi'na, Sanic'ula monta'na* seu *Ebora cen'sis, Vi'ola palus'tris, Dodccath'eon Plin'ii, But'terwort, York'shire San'icle. Ord.* Lentibulaceæ. *Sex. Syst.* Diandria Monogynia. The unctuosity of this plant has caused it be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

PINGUID, Fatty.

PINGUIN, Bromelia pinguin.

PINGUITUDO, Polysarcia adiposa.

PINHOLE PUPIL, see Pupil, pinhole.

PINHONES INDICI, Jatropha curcas.

PINK, CAROLINA, Spigelia Marilandica.

PINK DYE. (*Stripped Safflower*, ʒj, *subcarb. of potass.* gr. xviij, *spirit of wine*, ʒvij; digest for two hours; add *distilled water*, ʒij; digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rosecolour.) Used as a cosmetic.

PINK, GROUND, Silene Virginica — p. Indian, Spigelia Marilandica—p. Wild, Silene Virginica.

PINKROOT, Spigelia marilandica — p. Demerara, Spigelia anthelmia.

PINNA, 'a wing,' Ala, Pavilion of the ear — p. Marina, see Byssus.

PINNACULUM FORNICIS GUTTURALIS, (dim. of *pinna,*) Uvula.

PINNÆ (pl. of *pinna*) HEPATIS, Lobes of the liver—p. Naris, see Nasus.

PINNULA, (dim. of *pinna,*) *Aileron*.

PINNULÆ HEPATIS, Lobes of the liver.

PINO'LI (S.). A preparation used for subsistence on long journeys in the West. It is parched corn, beaten or ground very fine, and sweetened with sugar, to be used with water, and drunk on the march. It is the *cold flour* of the Indians, and early Western pioneers.

PIÑONCILLO TREE, Castigleonia lobata.

PINS and NEEDLES, see Leg asleep.

PINSWEAL, Furunculus.

PINT, ([Sax.] *pýnt,*) Octarius.

PINTA, (from [S.] *pintar*, 'to paint.') *Blue stain:* a disease, which is said to prevail in Mexico, and to be a variety of Pityriasis versicolor.

PI'NUS A'BIES. *P. excel'sa* seu *pice'a, A'bies, A. ru'bra* seu *excel'sa* seu *pice'a, El'atē thelei'a, Picea, Norway Spruce Fir, Yewleaved Fir. Nat. Ord.* Coniferæ. *Sex. Syst.* Monœcia Monadelphia. The tops are used in making *Spruce Beer.*

Es'sence of Spruce, Essen'tia Abi'etis, is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made *Spruce Beer.*

This fir affords the Burgundy pitch and common frankincense. 1. *Bur'gundy* or *White pitch, Pix Burgun'dica* (Ph. U. S. 1863) seu *al'ba* seu *ar'ida* seu *abieti'na* seu *abi'etis, Resi'na abi'etis hu'mida, R. al'ba hu'mida, Pi'ni abi'etis resi'na spon'tē concre'ta,* (F.) *Poix blanche* ou *grasse* ou *jaune* ou *de Bourgogne.* This prepared concrete juice is of a close consistence, rather soft, of a reddishbrown colour, and not unpleasant smell. It is very adhesive to the skin; and, consequently, forms excellent plasters for remaining upon the part for some time;—as in cases of affections of the chest. 2. *Abi'etis Resi'na* (Ph. L. since 1809), *Com'mon Frank'incense, Perrosin, Tus, Thus, Th. fœmini'num* seu *vulga'rē, Olib'anum vulga'rē* seu *sylves'trē, Resi'na abi'etis sic'ca, Res'in of the Spruce Fir.* It is solid, dry, brittle; externally, brownishyellow; internally, whitish. Used in plasters like the last.

PINUS ABIES, see P. picea—p. Alba, P. picea.

PINUS BALSAME'A, *A'bies balsame'a* seu *balsamif'era, Peu'cea balsame'a, Bal'sam fir.* The tree which affords the *Can'ada Bal'sam, Bal'samum Canaden'sē* seu *de Can'ada, Resi'na strobili'na, Terebinth'ina Canaden'sis* seu *Pi'ni balsame'æ, Can'ada Tur'pentine* or *Bal'sam, Bal'sam of Fir,* (F.) *Baume de Canada.* It is one of the purest turpentines, and has the common properties of those substances, and is much employed by microscopic observers.

PINUS CANADEN'SIS, *A'bies Canaden'sis, Hem'lock, Hemlock Spruce.* A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and is found in the elevated and mountainous regions of the Middle States. The pitch — *Pix Canaden'sis, Can'ada Pitch, Hem'lock Pitch* — obtained from it is commonly known under the name *Hemlock Gum.*

PINUS CANDICANS, P. Picea.

PINUS CEM'BRA, *P. Monta'na, Aphernous'li Pine.* It yields an agreeably scented turpentine:—the *Carpa'thian Bal'sam, Bal'samum Carpath'icum* seu *Lib'ani, Carpath'icum, Bri'ançon Tur'pentine.* The nuts, *Cem'bro nuts, Nu'clei Cem'bræ,* have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

PINUS DAMAR'RA, *Ag'athis Damar'ra,* grows in the East India Islands. The juice speedily concretes into a very hard resin,—the *Damarra turpentine.*

PINUS EXCELSA, P. abies—p. Gallica, P. picea.

PINUS LA'RIX, *A'bies la'rix, La'rix, L. communis* seu *decid'ua* seu *Europæ'a* seu *pyramida'lis.* The *Larch,* (F.) *Mélèze.* From this tree exudes *Or'emberg gum, Bri'ançon manna, Gum'mi lar'icis* seu *Oremburgen'sē* seu *Uralen'sē, Man'na Briganti'na* seu *laricea'.* It also yields, by boring, *Com'mon Ven'ice Tur'pentine, Resi'na Lar'icis, Terebinth'ina Ven'eta* seu *larici'na, Pi'ni Lar'icis resi'na liq'uida,* (F.) *Térébenthine de Vénise* ou *de Mélèze.* It is usually thinner than the other sorts of turpentine.

PINUS MU'GHOS. The *Mountain* or *Mu'gho Pine, Pi'nus Pumil'io.* From the extremities of the branches exudes the *Resi'na Strobili'na,* of the Germans, or *Hunga'rian Bal'sam.* It is also obtained, by expression, from the cones. By distillation, the Hungarian balsam affords the *Krumholz oil, Ol'eum Templi'num.*

PINUS PALUSTRIS, see Pinus sylvestris.

PINUS PICE'A, *P. A'bies, A'bies, A. pice'a* seu *pectina'ta* seu *Gal'lica* seu *al'ba* seu *canadicans* seu *vulga'ris* seu *taxifo'lia, Europe'an Sil'ver Fir Tree, El'atē,* (F.) *Sapin commun.* By piercing the tubercles of the bark of this fir, the *Strasburg Turpentine,* is obtained:— the *Resi'na Abi'etis* (Ph. L. before 1809), *Oleum Abi'etis, Terebinth'ina Argentoraten'sis.*

PINUS PINASTER, see P. sylvestris.

PINUS PI'NEA, *Stone Pine, Pi'nea, Pi'nus, P. uberri'ma* seu *sati'va.* The nuts, *Zir'bel nuts, Pine nuts, Nu'clei Pi'neæ, Pi'nei, Pine'oli,* (F.) *Pin à pignons,* are eaten raw, or preserved like almonds. They are, also, used in emulsions.

PINUS PUMILIO, see Pinus Mughos — p. Sativa, P. pinea.

PINUS SYLVES'TRIS, *Pinas'ter, Peu'cē, Scotch Fir.* This pine, as well as *P. mariti'ma* (*P. Pinaster*), and other species of Pinus, affords common turpentine and its oil, resin, tar, and pitch. 1. *Com'mon Tur'pentine of Eu'rope, Terebinth'ina, T. vulga'ris* seu *commu'nis, Resi'na pi'ni, Bijon, Horse Tur'pentine, Bordeaux Tur'pentine,* (F.) *Térébinthine de Bordeaux, Térébinthine commune,* is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c., in horses, and for the distillation of the oil, (see Oleum Terebinthinæ.) The *white Tur'pentine* or *common Tur'pentine of Amer'ica— Terebinth'ina,* Ph. U. S. — is produced chiefly from *Pi'nus palus'tris, Yel'low pine,* and *P. ta'da, Loblol'ly pine,* and perhaps from other species inhabiting the Southern States. When the oil is distilled with water, yellow resin, or *Ros'in, Resi'na,* Ph. U. S., *Resi'na fla'va,* is left, which is only used in the formation of ointments and plasters. If without the addition of water, the residuum is *common res'in* or *Col'ophony.* 2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gal'lipot, Barras;* and *White Ros'in, Resi'na alba,* when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained — *Hygropis'sos, Pis'sa, Pix ce'dria* seu *liq'uida, Resi'na pi'ni empyreumat'ica liq'uida, Terebinth'ina empyreumat'ica, Alchitram, Alchitu'ra, Ce'dria,* (F.) *Goudron, G. végétale, Poix liquide, Brai liquide.*

Tar water, Aqua Pice'a seu *Picis, Infu'sum Picis liq'uidæ* (Ph. U. S. 1863,) seu *Picis empyreumat'icæ liquidæ, Po'tio pice'a,* (F.) *Eau de Goudron,* which is made by mixing two pints of *tar* with a gallon of *water,* stirring with a wooden rod for fifteen minutes, and, when the tar has subsided, straining and keeping in well stopped bottles, was, at one time, a fashionable remedy in numerous complaints, and its use has been revived, since its virtues have been presumed to be owing to creasote. It is employed chiefly in pulmonary affections, and the vapour has been recommended in phthisis and other diseases of the lungs. It is used externally as a detergent. A *wine* or *beer of tar, Tar'beer, Jews' beer,* has been employed in Philadelphia in similar cases. It may be made by adding to *tar* enough *beer* to saturate it, mixing, and allowing them to macerate for three days, with occasional agitation. The dose is a tablespoonful. 4. *Com'mon Pitch, Pix ni'gra, Black Pitch, Bur'nea, Bur'nia, Stone Pitch, Pix sic'ca, P. a'tra, P. nava'lis, Zopis'sa, Palimpis'sa, P. ar'ida* (Ph. L. before 1809), (F.) *Poix navale, P. noire,* is obtained by inspissating tar. It is used only as a resolvent in plasters.

PINUS TÆDA, see P. sylvestris — p. Taxifolia, P. picea — p. Uberrima, Pinus pinea — p. Vulgaris, P. picea.

PIONE, Pæonia.

PIONY, Pæonia.

PIORTHOPNŒA, (πιον, 'fat,' and *orthopnœa*,) Pimelorthopnœa.

PIOULQUES (F.). A kind of sucking pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

PIP, Syphilis.

PIPE PLANT, Monotropa uniflora.

PIPER, (πεπερι,) see Piper nigrum.

Pi'per Al'bum, *Leucop'iper*, *White Pepper*, is black pepper freed from its cuticle.

Piper Angustifolium, Matico—p. Aromaticum, P. nigrum—p. Betel, Betel—p. Brazilianum, Capsicum annuum—p. Caleuticum, Capsicum annuum.

Piper Capen'sē, a South African species, has all the properties of the peppers, and, in appearance and taste, greatly resembles cubebs. It possesses, too, similar virtues.

Piper Caryophyllatum, see Myrtus pimenta—p. Caudatum, P. cubeba—p. Chiapæ, see Myrtus pimenta.

Piper Cubeb'a, *Cubeb'a officina'lis*, *Per'sea* seu *Lau'rus cubeb'a*, *Litsæ'a cubeb'a* seu *piperi'ta*. *Ord.* Piperaceæ. A native of Java and Guinea. The odour of these berries—*Cubeb'a* (Ph. U. S.), *Com'peper*, *Com'peba*, *Cubal sini*, *Pi'per caudatum*, *Bac'cæ Pi'peris gla'bri*, *Cu'beb* or *Tail'ed Pepper*, *Cuma'mus*, (F.) *Poivre-à-queue*, *Quabebe*—is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil—*O'leum Cubebæ*, oil of cubebs—which is officinal in the Pharm. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa. Dose, from ℈j to ʒj, in powder, three or four times a day; of the volatile oil, 10 or 12 drops.

Tur'key yel'low ber'ries,—the dried fruit of the *Rhamnus Catharticus*—are often substituted for cubebs.

Piper Elongatum, Matico.

Piper Guineense, Capsicum annuum—p. Hispanicum, Capsicum—p. Indicum, Capsicum annuum—p. Jamaicense, see Myrtus pimenta.

Piper Lon'gum, *Macrop'iper*, *Acapat'li*, *Catutrip'ali*, *Pim'pilim*, *Chav'ica Roxburg'hii*, *Long Pep'per*, (F.) *Poivre long*. As we receive the berries, they consist of the unripe fruit dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative, and tonic, like the other peppers. Dose, gr. v to ʒj.

Piper Lusitanicum, Capsicum annuum—p. Methysticum, see Ava—p. Murale, Sedum.

Piper Ni'grum, *Melanop'iper*, *Molagoco'di*, *La'da*, *Pi'per aromat'icum*, *Black Pep'per*, (F.) *Poivre noir*. *Black Pepper*, *Piper* (Ph. U. S.), is the unripe fruit dried in the sun. *Virtues*, same as those of the other peppers. When freed from its husk by mechanical trituration it constitutes *Fulton's decor'ticated pepper*.

Piper Odoratum Jamaicense, see Myrtus pimenta—p. Tabascum, see Myrtus pimenta—p. Turcicum, Capsicum annuum.

PIPERI'NA, *Piperi'num*, *Pip'erine*, *Piperin*, (from *piper*.) A resinoid substance, obtained from the piper nigrum by M. Œrstädt, in which a part of the virtues of the pepper resides. It has been employed, like quinia, in intermittents, and successfully. Dose, gr. v—x.

PIP'EROID, *Piperoï'dum*, *Zingib'erin*, (*piper*, and *ειδος*, 'resemblance.') A yellow syrupy mass obtained by exhausting ginger root by ether. It is soluble in ether, alcohol, and oils, and may be given in tincture, sugar, lozenge, or syrup, in cases where ginger is indicated.

Piperoid of Ginger, Oleoresina zingiberis.

PIPEROPAS'TUS, (*piper*, and *στειν*, 'to strew.') Strewed with pepper,—socks, r example, where it is desirable to excite the surface of the feet.

PIPETTE. 'A small pipe.' In Pharmacy, a small tube terminating in a perforated point, which is passed into a liquid to be removed,—from the surface of a precipitate, for example. The liquid is drawn into the tube by applying the mouth to the free extremity.

PIPIN'NA, *Men'tula par'va*. A small penis.

PIPPERIDGE BUSH, see Oxyacantha Galeni.

PIPSISSEWA, Pyrola umbellata—p. Spotted, Pyrola maculata—p. White, Pyrola maculata.

PIPTONYCHIA, (πιπτω, 'to fall,' and *ονυξ*, gen. *ονυχος*, 'the nail,') Onychoptosis.

PIPTOSTEGIA OPERCULATA, see Batata de purga—p. Pisonis, Convolvulus mechoacan.

PIQUETÉ, (from *piquer*, 'to prick, to lard,') see *Sablé*.

PIQÛRE, Puncture, Wound, punctured.

PIQUEURS MÉDECINS, 'Puncture doctors.' A name at one time given in derision, in the Parisian hospitals, to those physicians who employed acupuncturation in almost all diseases.

PIRIFORMIS, Pyramidalis.

PIROGOFF'S OPERA'TION. A mode of amputating at the ankle, proposed by Pirogoff, of Russia, which consists in retaining a portion of the calcaneum to impart greater length and rotundity to the stump.

PIRTLING, (old E.) Slavering.

PIRUS, see Pyrus malus.

PI'SA, CLI'MATE OF. Pisa has long been celebrated as one of the most favourable climates in Italy, for the consumptive. It is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

PISCIARELLI, MIN'ERAL WA'TERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fah.), sulphureous, and carbonated; and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCID'IA ERYTHRI'NA, (*piscis*, 'a fish,' and *cædere*, 'to kill,') *Jama'ica Dog'wood*. *Ord.* Leguminosæ. A small branching tree, common in most of the West India Islands; Diadelphia Decandria of Linnæus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic, and has been used in the form of a tincture of the bark of the root in toothache.

PISCINA, 'a fish pond,' *Baignoire*.

PISCIV'OROUS, *Piscivorus*, *Ichthyoph'agous*, *Ichthyoph'agus*, (*piscis*, 'a fish,' and *voro*, 'I eat.') Feeding or subsisting on fish.

PIS'IFORM, *Pi'siform'is*, (*pisum*, 'a pea,' and *forma*, 'shape.') Pealike, pea-shaped.

Pisiform'ē, Os, *Os lenticula're* seu *orbicula'rē* seu *ex'tra or'dinem car'pi*, (F.) *Os hors du rang*, is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

PISO, Mortar.

PISSA, (πισσα,) Pitch, see Pinus sylvestris.

PISSASPHAL'TUS, *Pissasphal'tum*, *Min'eral Pitch*, (*pissa*, and *ασφαλτος*, 'bitumen.') (F.) *Poix minérale*. A thicker kind of *Petro'leum* or *Rock oil*; formerly employed as a vulnerary. It is synonymous with *Glu'tinous bitu'men*, *Mal'ta bitu'men*, and *Min'eral tar*.

PISSELÆ'UM, *O'leum Pic'inum*, (*pissa*, and *ελαιον*, 'oil.') An oily matter obtained from boiling pitch, and used for the same purposes as tar.

Pisselæum Indicum, Petroleum.

PISSEMENT, Micturition—*p. de Pus*, Pyuria—*p. de Sang*, Hæmaturia.

PISSENLIT, 'piss a-bed,' Leontodon taraxacum.

PISSE-SANG, 'piss blood.' Fumaria.

PISSE'ROS, (πισσηρος, 'made of pitch.') Ancient name of a cerate, prepared of *olive oil, oil of roses*, and *dried pitch*. It was, also, called *Cera'tum pica'tum*, and *C. tetrapharmacum*.

PISSI'TES, (πισσιτης,) *Vi'num pica'tum*. A wine prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSOSIS, (from πισσα, 'pitch,') see Depilatory.

PISSWEED, Anthemis cotula.

PISTACHIO NUTS, (πιστακια,) see Arachis hypogea, Pistacia vera.

PISTACIA CHIA, P. lentiscus.

PISTA'CIA LENTIS'CUS, *P. Chi'a, Terebin'thus lentis'cus, Lentis'cus vulga'ris, Schi'nos*; the *Mas'tich Tree*. *Ord.* Terebinthaceæ. The wood of this tree abounds with the resinous principles of mastich; and a tincture made from it has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mas'tich, Mas'tic, Resi'na Lentis'cina, Men'frigē, Mas'tichē* (Ph. U. S.), *Mas'tix, Pista'ciæ Lentis'ci Resi'na*. This resin has an agreeable smell when heated: is almost insipid; in globular, irregular, yellowish, semitransparent masses; soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed to stop holes in carious teeth.

Oil of Mas'tich, Mastichelæ'on, O'leum Mastichi'num, is mentioned by Dioscorides.

PISTACIA NARBONENSIS, P. lentiscus — p. Reticulata, P. lentiscus.

PISTACIA TEREBIN'THUS, *P. Narbonen'sis* seu *reticula'ta* seu *ve'ra, Tur'pentine Tree, Hab-el-Kalimbat, Terebin'thus vulga'ris, Termin'thus*. The tree which affords the *Cy'prus Tur'pentine, Resi'na Terebin'thi, Terebin'thina ve'ra* seu *Chi'a* seu *Cy'pria*, (F.) *Térébinthine de Chio*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles in virtues the other turpentines.

PISTACIA VE'RA, (πιστακη.) Name of the tree which affords the *Nux Pista'cia*. *Pista'chio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

PISTATION, Epistation.

PISTILLUM, (*pistare*, 'to pound,') Pilum.

PISTOLOCHIA, (πιστος, 'faithful,' and λοχεια, 'parturition,') Aristolochia pistolochia.

PISTORIENSIS GLADIUS, (from *Pistorium*, now *Pistoia*, in Tuscany,) *Bistouri*.

PI'SUM, (πισον,) *P. sati'vum, Pea, Gar'den pea*, (F.) *Pois, P. cultivé*. The seeds of the pea. *Ord.* Leguminosæ, *Sex. Syst.* Diadelphia Decandria, are much employed as an aliment, both in the fresh and dried state. They are farinaceous, and, when dried, not easy of digestion.

PIT, ([Sax.] pyt or pit,) Pock mark — p. of the Stomach, *Fossette du cœur*.

PITA'YA BARK, of South America. The bark of *Cincho'na pita'ya, Ord.* Cinchonaceæ, is preferred in Colombia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

PITAYINE, see Pitaya bark.

PITCAITHLEY, MIN'ERAL WA'TERS OF. These saline springs, at Pitcaithley, about four miles from Perth, Scotland, contain chlorides of sodium and calcium.

PITCH, (from [L.] *pix*,) Colophonia, Pissa—p. Black, see Pinus sylvestris — p. Burgundy, see Pinus abies—p. Canada, see Pinus Canadensis.

PITCH CAP, see Depilatory.

PITCH, COMMON, see Pinus sylvestris—p. Hemlock, see Pinus Canadensis—p. Jews', Asphaltum —p. Mineral, Pissasphaltum.

PITCH PLASTER, see Depilatory, Emplastrum picis.

PITCH, STONE, see Pinus sylvestris — p. White, see Pinus abies.

PITCHER PLANT, Sarracenia purpurea.

PITHYRINUS, (from *pityron*, 'bran,') Acerosus, Furfuraceous.

PITTA'CIUM. A pitch plaster, (from πιττα 'pitch.')

PITTING, Pock mark.

PITTOSIS, (from πιττα, 'pitch,') see Depilatory

PITTO'TA. Medicines in which pitch is the chief ingredient.

PITTS'BURG, MIN'ERAL WA'TERS OF. A chalybeate mineral spring, situate about four miles south-west of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

PITUITA, Mucus, Phlegm—p. Narium, Nasal mucus.

PITUITAIRE, Pituitary, Pituitary membrane.

PITU'ITARY, *Pituita'rius*, (F.) *Pituitaire*, (from *pituita*.) Concerned in the secretion of mucus or phlegm. A name given to several parts.

PITUITARY BODY, P. Gland — p. Fossa, Sella turcica.

PITUITARY GLAND, *Glan'dula Pituito'sa* seu *pituita'ria* seu *basila'ris, Lacu'na* seu *Appendic'ula cer'ebri, Scutti'na, Hypoph'ysis* seu *Appen'dix cer'ebri, Glans pitui'tam excip'iens, Cor'pus pituita'rē, Pitu'itary bod'y*; — (F.) *Glande* ou *Corps pituitaire, Appendice sus-sphénoïdale du cerveau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. It occupies the sella turcica of the sphenoid bone. Its functions are unknown.

PITUITARY MEM'BRANE, *Schneide'rian Mem'brane, Membra'na pituita'ria* seu *olfacto'ria*, (F.) *Membrane nasale* ou *olfactive* ou *pituitaire* ou *de Schneider, Pituitaire*. The mucous membrane which lines the nasal fossæ, and extends to the different cavities communicating with the nose. In the nasal fossæ, the membrane appears formed of two layers, intimately united; — the one in contact with the bone is fibrous; — the other is free at one surface. The latter is a mucous membrane, in which papillæ are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of odours by means of the expansion of the olfactory nerves upon it. It is the seat of smell.

PITUITE, Mucus.

PITU'ITOUS, *Pituito'sus*, (F.) *Pituiteux*, (from *pituita*.) Consisting of, or resembling, or full of mucus or phlegm.

PITYRENUS, (πιτυρηνος,) Acerosus, Furfuraceous.

PITYRI'ASIS, (πιτυρον, 'bran,') *Lepido'sis Pityri'asis, Pityris'ma, Her'pes furfura'ceus* seu *farino'sus, Porri'go* (of some), *Tin'ea furfura'cea* seu *porrigino'sa, Furfura'tio, Furfuris'cu, Dan'driff, Dan'druff, Dander*, (Sc.) *Luss*, (Prov.) *Room, Rum'met*, (F.) *Teigne, Dartre, D. furfuracée volante*;—a very superficial affection; characterized by irregular patches of thin scales, which repeat-

edly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.

PITYRIASIS, Porrigo — p. Nigra, Melasma — p. Versicolor, Chloasma.

PITYRISMA, gen. *Pityrism'atis*, (πιτυρισμα,) Pityriasis.

PITYROIDES, (πιτυροειδης, from πιτυρον, 'bran,' and ειδος, 'resemblance,') Furfuraceus.

PITYRON, (πιτυρον, 'bran,') Furfur.

PIVOINE, Pæonia.

PIV'OTING. In dentistry, an operation which consists in fastening a new crown upon the root of a tooth by means of a piece of gold wire, called 'a *pivot*.'

PIX, gen. *Pi'cis*, (πισσα, 'pitch,') see Pinus sylvestris, Sperm — p. Abietina, see Pinus abies—p. Abietis, see Pinus abies—p. Alba, see Pinus abies — p. Arida, see Pinus abies, and Pinus sylvestris —p. Atra, see Pinus sylvestris—p. Brutia, Brutia —p. Burgundica, see Pinus abies—p. Canadensis, see Pinus Canadensis — p. Cedria, see Pinus sylvestris — p. Græca, Colophonia — p. Liquida, see Pinus sylvestris—p. Navalis, see Pinus sylvestris — p. Nigra, see Pinus sylvestris — p. Sicca, see Pinus sylvestris.

PLACE'BO, 'I will please,' (from *placeo*.) A medicine, prescribed rather to satisfy the patient than with any expectation of its effecting a cure.

PLACEN'TA, (πλακους, gen. πλακουντος, 'a cake,') *P. u'teri* seu *uteri'na* seu *uteri car'nea*, *He'par* seu *Je'cur uteri'num*, *Ca'ro* seu *Affu'sio orbicularis*, *Ma'za*. A soft, spongy, vascular body, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences perhaps with the arrival of the embryo in the uterus. It is generally considered to have two portions, one *fœtal*, and the other *maternal*. The fœtal consists of highly vascular villi and tufts, which contain the inosculating loops of the umbilical arteries and umbilical vein of the fœtus. The maternal portion is considered by Dr. Reid to consist, essentially, of a large sac formed by the inner coat of the vascular system of the mother, into which the maternal blood is poured by the curling arteries of the uterus, and from which it is returned by the uteroplacental veins. The tufts and villi of the fœtal placenta are ensheathed by this inner coat of the maternal vascular system; and, according to Prof. Goodsir, two distinct sets of nucleated cells—one maternal and the other fœtal—separate the maternal and fœtal portions where they come in contact, one set of which are probably, he thinks, concerned in the separation of nutritive matter from the maternal blood, and the other destined to convey it into the vessels of the fœtus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but towards the fœtal surface are confounded into one mass. It is composed of the umbilical vessels, areolar tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus.

The umbilical cord usually arises from the centre of the placenta; but occasionally from its edge, when it is called *bat'tledore placenta*.

The main function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fœtus being shown to that of the mother, and undergoing requisite changes. It may, also, be an organ for nutritive absorption, as observed above.

Animals, which have no placenta—as the Marsupialia—are called *implacental* and *nonplacental*.

PLACEN'TA, BATTLEDORE, see Placenta—p. Cruoris, see Blood—p. Febrilis, Ague cake—p. Oblata, P. prævia—p. Obvia, P. Prævia.

PLACENTA PRÆ'VIA, (*præ*, 'before,' and *via*, 'way,') *P. ob'via* seu *oblu'ta*. Presentation of the placenta; a condition which gives rise to *unavoidable hemorrhage* from the uterus. The safety of the female depends upon speedy delivery.

PLACENTA SANGUINIS, see Blood—p. Uteri Succenturiata, Decidua.

PLACEN'TAL, *Placenta'lis*, (F.) *Placentaire*. Relating or appertaining to the placenta. Possessed of a placenta, — as 'a *placental* mammal.'

PLACENTI'TIS, *Placoniti'tis*, *Placoï'tis*, *Inflamma'tio placen'tæ*, (*placenta*, and *itis*.) Inflammation of the placenta.

PLACEN'TULA, 'a little cake,' (dim. of *placenta*, 'a cake.') A rudimental placenta. The placenta of an abortion.

PLACOITIS, (πλακους, 'placenta,' and *itis*,) Placentitis.

PLACOUNTITIS, (πλακους, gen. πλακουντος, 'placenta,' and *itis*,) Placentitis.

PLADAROMA, gen. *Pladaro'matis*, (πλαδαρωμα,) Pladarosis.

PLADARO'SIS, *Pladaro'ma*, *Pladar'otes*, (from πλαδαρος, 'soft,' and *osis*.) A soft tumour on the eyelid, unaccompanied with redness or pain. Trachoma.

PLADAROTES, (πλαδαροτης,) Pladarosis.

PLAFOND DES VENTRICULES DU CERVEAU, ([F.] *plafond*, 'a ceiling,' from *plat*, 'flat,' and *fond*, 'ground,') Corpus callosum.

PLAGA, (πληγη,) Ictus, Wound. Formerly, any kind of wound or disease from violence.

PLAGIOBOL'IA, *Planobol'ia*, (πλαγιος, 'to one side,' and βαλλειν, 'to throw.') Imperfect emission of sperm into the vagina. Emission to one side; sometimes practised to render impregnation less probable.

PLAGUE, (from πληγη, *plaga*, 'a stroke.') *Pestis*, *P. Orienta'lis* seu *bubona'ria orientalis* seu *inguina'ria* seu *contagio'sa* seu *acutiss'ima* seu *sep'tica* seu *glandulo'sa* seu *ad'eno-sep'tica* seu *inguina'ria*, *Pestil'itas*, *Ephem'era pestilentia'lis*, *E. mortif'era*, *Ta'bum*, *Lu'es inguina'ria*, *Cla'des glandula'ria*, *Phtho'ra*, *Pestilen'tia*, *Lu'es*, *Loi'mos*, *Fe'bris a'denonervo'sa*, *Lœ'mos*, *Lœ'mē*, *Lœ'mia*, *Lœmop'yra*, *Chaos'da*, *Anthra'cia Pes'tis*, *An'thracoty'phus*, *Fe'bris pes'tilens*, *Syn'ochus pestilentia'lis*, *Ty'phus pestis* seu *pestilentia'lis* seu *gravis'simus* seu *anthra'cicus* seu *bubon'icus*, *Exanthe'ma pestis*, *Pest*, *Levant' plague*, *Sep'tic* or *glan'dular pes'tilence*, *The sick'ness*, (F.) *Peste*, *Typhus d'Orient*, *Fièvre du Lévant*, *F. adéno-nerveuse*. An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least twothirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groins or axillæ, and carbuncles. Its miasmata — it has been conceived — adhere to different organic textures, to woollen goods, clothing, and furniture; and may thus be transported to a considerable distance; but this is disputed. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded little light with respect to it. Various means have been used for arresting it, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the suppuration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the *Quarantine Laws* were instituted; and when the disease has actually appeared, a *cordon sanitaire*

has been drawn round the infected district, so as to prevent all communication.

Plague of Antoni'nus, *Pes'tis Antoninia'na*, (F.) *Peste Antonine.* A severe febrile disease, which prevailed in the Roman empire, during the reign of Antoninus. It began in Asia, and passed westward. It resembled the Plague of Athens.

Plague of Ath'ens, (F.) *Peste d'Athènes.* A febrile disease, which raged at Athens during the Peloponnesian war, in the 5th century before the Christian era; and a description of which is given in Thucydides. It was characterized by a cutaneous eruption, accompanied by small ulcerations, vomiting, affection of the respiratory organs, and diarrhœa. It began in the far East, and, before reaching Athens, ravaged Egypt, and the greater part of the Persian Empire.

Plague, Black, Death, Black.

Plague, Cold. A severe form of congestive fever, seen in the Southern States. Bilious pneumonia, in which there is no reaction, has been, also, so called.

Plague Cross. A cross formerly affixed by the authorities to the door of a house in which there was plague.

Plague, Pa'li. A malignant fever, greatly resembling plague, which prevailed in Rajpootana after July, 1836.

Plague Spot, Plague token.

Plague To'ken, *Plague mark, Plague spot.* A mark by which one struck with the plague was known. Perhaps the early stage of carbuncle in unfavourable cases. It is described as a small tubercle — *Bos'sa* — somewhat resembling a wart, callous, and more or less deficient in sensibility, varying in size from that of a millet-seed to that of a bean.

PLAGULA, (dim. of *plaga,*) Compress, Pledget, Splint.

PLAIE, (from *plaga,*) Wound—*p. d'Arme à feu,* Wound, gunshot—*p. d'Arquebusade,* Wound, gunshot — *p. Contuse,* Wound, contused — *p. Envenimée,* Wound, poisoned — *p. par Arrachement,* Wound, lacerated—*p. à Lambeaux,* see Flap.

PLAINTIVE, (from [F.] *plaindre,* 'to complain,') (F.) *Luctueux.*

PLANANTHUS FASTIGATUS, Lycopodium selago — p. Selago, Lycopodium selago.

PLANARIA LATIUSCULA, (from *planus,* 'flat,') Distoma hepaticum.

PLANARTHRAGRA, (πλανη, 'a wandering,' αρθρον, 'a joint,' and αγρα, 'a seizure,') Gout (wandering).

PLANCHER (F.), 'floor.' In anatomy, the inferior wall or boundary of a cavity.

PLANCHER DU CERVEAU, Tentorium.

PLANCUS, (*planca,* 'a plane, a table,') Leiopus.

PLANE, (πλανη, 'a wandering,') Plexus.

Plane, Mesial, see Mesial.

PLANETSTRUCK, see Sideratio.

PLANE'TES, (πλανητης,) *Plane'ticus, Pla'nicus, Errabun'dus, Errat'ic,* (from πλανη, 'a wandering.') An epithet given to diseases whose returns are irregular — especially to intermittent fever; *Plane'tes Fe'bris, F. Errat'ica, F. Erro'nea, F. Vaga.*

PLANETICA ARTHRITIS, Gout, wandering.

PLANICUS, Planetes.

PLANIPEDES, (*planus,* 'flat,' and *pes,* gen. *pedis,* 'foot,') Steganopodes.

PLANITIES PEDIS, (from *planus,* 'flat,') Sole.

PLANOBOLIA, (πλανη, 'a wandering,' and βαλλειν, 'to throw,') Plagiobolia.

PLANODIA, (πλανη, 'a wandering,' and ὁδος, 'a way.') A false passage, — as occasionally results from introducing the catheter.

PLANTA, Sole—p. Noctis, Hydroa, Sudamina —p. Pedis, Sole—p. Prima pedis, Tarsus.

PLANTA'GO, gen. *Plantag''inis,* (*planta,* 'sole;' — from resemblance of the leaves,) *P. Ma'jor, Centiner'via, Arnoglos'sum, Septiner'via, Polyneu'ron, Heptapleu'ron, Planta'go lati'folia* seu *ma'jor* seu *vulga'ris, Great plan'tain, Way'bread,* (Sc.) *Wa'bran leaves,* (F.) *Plantain commun. Ord.* Plantaginaceæ. *Sex. Syst.* Tetrandria Monogynia. The leaves have been said to be refrigerant, attenuant, substyptic, and diuretic.

Plantago Aquatica, Alisma plantago.

Plantago Corda'ta, *Heartleaved plan'tain,* P. Lanceola'ta, *Ribgrass;* and P. Virgin'ica, *White plan'tain,* or *Rib'wort,* indigenous, have properties like Plantago major.

Planta'go Coron'opus, *Coronopod'ium, Cor'nu cervi'num, Stel'la ter'ræ, Planta'go, Buckshorn Plan'tain.* Properties like the last.

Plantago Nitida, P. psyllium.

Plantago Psyl'lium, *P. nit'ida, Psyl'lium, P. erec'tum, Pulica'ris her'ba, Crystal'lion, Cynomoi'a, Branch'ing Plan'tain, Flea'wort,* (F.) *Herbe aux puces commune.* The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

Plantago Vulgaris, Plantago.

PLANTAIN DES ALPES, Arnica montana—*p. Arbre,* Musa paradisiaca—p. Branching, Plantago psyllium — p. Buckshorn, Plantago coronopus — *p. Common,* Plantago — *p. d'Eau,* Alisma plantago — p. Great, Plantago major — p. Heartleaved, Plantago cordata.

Plantain Meal, see Musa paradisiaca.

Plantain, Rattlesnake, Goodyera pubescens — p. Robin's, Erigeron bellidifolium.

Plantain Tree, Musa paradisiaca.

Plantain, Water, Alisma plantago, Unisema deltifolia — p. White, Plantago Virginica.

PLANTAIRE, Plantar muscle—*p. Grêle,* Plantar muscle.

PLAN'TAR, (from *planta,*) *Planta'ris,* (F.) *Plantaire.* That which relates or belongs to the sole of the foot. This epithet has been given to several parts.

Plantar Aponeuro'sis, *P. fas'cia.* A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

Plantar Arch, see Plantar arteries.

Plantar Ar'teries. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—The *inter'nal plan'tar ar'tery,* situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe.—The *exter'nal plan'tar ar'tery* is larger than the preceding, and ought to be considered as the termination of the posterior tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi.* In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plan'tar Arch* or *Cross.* It gives branches in all directions. The inferior and posterior have received no name. The superior—three in number—are the *poste'rior per'forating ar'teries.* The anterior branches are larger, and there are commonly four. They furnish the *ante'rior per'forating,* and the *collat'erals* of the last four toes.

Plantar Cross, see Plantar arteries — p. Fascia, P. aponeurosis.

Plantar Lig'aments. A name given to the

inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

Plantar Mus'cle, *Planta'ris, P. grac''ilis, Tibia'lis grac''ilis, Exten'sor tar'si mi'nor*, (F.) *Plantaire, P. Grêle, Jambier grêle, Petit fémoro-calcanien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the os femoris: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and, conversely. It can, also, assist in the flexion of the leg on the thigh.

Plantar Nerves. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into —1. The *inter'nal plan'tar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *exter'nal plan'tar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches; — the one—*profun'da*—is distributed to the short flexor of the great toe: the interosseus and abductor pollicis pedis: the other —*superficia'lis* — sends filaments to the short flexor of the little toe, the two sides of that toe, the outer side of the 4th, and the last lumbricalis.

Plantar Re'gions or Sur'faces are different regions or surfaces of the sole of the foot. Three are generally reckoned, — the *internal, middle*, and *external*.

Plantar Veins follow an arrangement similar to that of the arteries.

PLANTARIA, Dengue.

PLANTARIS, Plantar, P. muscle—p. Superficies pedis, Sole — p. Verus, see Flexor longus digitorum pedis profundus perforans (accessorius.)

PLANTARIUM, ('a nursery ground,' from *planta*, 'a plant,') Pubes.

PLANTE DU PIED, Sole.

PLANTI-SOUS-PHALANGIENS, Lumbricales pedis—*p. Tendino-phalangiens*, Lumbricales pedis.

PLANUM APONEUROTICUM DIAPHRAGMATIS, (*planus*, 'flat, level, smooth.') The tendinous expansion of the diaphragm.

Planum Orbitale, see Maxillary bone (superior.)

Planum Os. The papyraceous or orbitar plate of the ethmoid bone—*Lam'ina papyra'cea, Lamell'a pla'na*—was formerly so called.

Planum Pedis, Sole.

Planum Supe'rius Lin'guæ. The upper surface of the tongue.

PLANU'RIA, (πλανη, 'a wandering,' and ουρον, 'urine.') Discharge of urine through unwonted ways.

PLAQUEMINIER D'EUROPE, Diospyros lotus.

PLAQUES GAUFRÉES, 'honeycomb patches,' see Peyeri glandulæ — *p. Laiteuses*, see *Taches laiteuses* — *p. de Peyer*, see Peyeri glandulæ.

PLASMA, gen. *Plasm'atis*, (πλασμα, 'a thing formed,' from πλασσειν, 'to form,') Liquor sanguinis. In antiquity, a gargle or mouthwash to clear the voice. Also, a pharmaceutical preparation from *glycerin* and *starch* heated together in the proportion of a fluidounce of the former and seventy grains of the latter in powder, gradually raised to the temperature of about 240°, constantly stirring. It constitutes the basis of different ointments, and keeps better than they do as usually made. Called also *Gly'camil*.

PLASMAT'IC, *Plasma'ticus*, (πλασσειν, 'to form.') Having the power to give form, plastic.

PLASMEXHIDRO'SIS, (*plasma*, εξ, 'out of,' and 'ιδρωσις 'perspiration.') Exudation of the plasma of the blood from the vessels.

PLAS'TER, (εμπλαστρον, from πλασσειν, 'to smear, to cover over,') Emplastrum — p. Adhesive, Emplastrum resinæ, Sparadrapum adhesivum — p. Adhesive, Baynton's, see Emplastrum resinæ—p. Adhesive, of pitch and resins, Emplastrum de pice et resinis glutinans — p. Ammoniacum, Emplastrum ammoniaci—p. PLASTIC, *Plas'ticus, Formati'vus, Form'ative*, (F.) *Plastique*, (πλαστικος, from πλασσειν, 'to form.') That which forms, or serves to form.

Plastic El'ement. One which bears within it the germs of a higher form.—(Gerber.) *Plas'tic* or *histogenet'ic* or *organolep'tic el'ements of nutrit''ion* are those elements of food which go to the formation of organized tissue.—See Aliment.

Plastic Force. The generative or formative power in organized bodies. It is also called *Nisus formati'vus, Vis* seu *Vir'tus plas'tica* seu *formati'va* seu *essentia'lis* seu *reproducti'va, Fac'ultas forma'trix* seu *nu'trix* seu *auc'trix* seu *vegetati'va; Blas alterati'vum. Mo'tus assimilatio'nis, An'ima vegetati'va, Plasticism'us, Vir'tus forma'trix, Plastic''itas, Plastic''ity, Force of Nutrit''ion, F. of assimila'tion, F. of Forma'tion, F. of vegeta'tion, Puissance du moule intérieur* (Buffon), Bildungstrieb, *Germ force*, of the Germans.

Plastic Lymph, Liquor Sanguinis—p. Surgery, Morioplastice.

PLASTICISMUS, (πλασσειν, 'to form,') Plastic Force.

PLASTICITAS, Plastic Force.

PLASTICITY, Plastic Force.

PLASTILYTIC, (πλασσειν, 'to form,' and λυω, 'to loose,') Antiplastic.

PLASTILYTICUM (HÆMATOLYTICUM), Spanæmic.

PLASTIQUE, Plastic.

PLASTODYNA'MIA, (πλασσειν, 'to form,' and δυναμις, 'force.') The manifestation of nutritive activity or power.

PLATA, (πλατη, from πλατυς, 'broad,') Scapula.

PLATANO, (*platanus*,) Musa Sapientum.

PLATANIER, (*platanus*,) Musa paradisiaca.

PLATANTHE'RA ORBICULA'TA, (πλατυς, 'wide,' and ανηρ, for 'anther,') *Large roundleaved Or'chis*; indigenous. *Order*, Orchidaceæ; flowering in July. The leaves are large, soft and fleshy, and are used, in certain places, for dressing blisters.

PLATANUS, (πλατανος, from πλατυς, 'broad,') Musa paradisiaca.

PLATEA, (πλατυς, 'broad,') Bothriocephalus latus.

PLATEBONE, Scapula.

PLATEIASMA, Platiasmus.

PLATES, MANSFORD'S, see Galvanism.

PLATIAS'MUS, *Plateias'ma*, (from πλατυς, 'broad.') Excessive development of the lips, causing the articulation to be imperfect.

PLATINA, Platinum.

PLAT'INUM, *Plat'ina*, (from [S.] *plata*, 'silver.') (F.) *Platine, Or blanc, Petit argent.* The preparations of platinum resemble in their therapeutical properties those of gold. The BICHLO'RIDE, *Plat'ini Bichlo'ridum*, made by dissolving *platinum* in *aqua regia*, and the DOUBLE CHLO'RIDE of PLAT'INUM and SO'DIUM, *So'dii chloroplat'inas*, *Chloroplat'inate of So'dium*, prepared by dissolving *bichloride of platinum* and pure *chloride of sodium*, in proper proportions, in water, evaporating and crystallizing, — are the preparations used. They are not much prescribed.

PLATULA, (πλατυς, 'broad,') see Pediculus.

PLATY, (πλατυς, 'broad,') in composition, broad.

PLATYBREGMATE, (*platy*, and *bregma*,) see Cranium.

PLATYCEPHAL'IC, *Platycephal'icus*, (from *platy*, and κεφαλη, 'head.') Having a broad skull.

PLATYCORIA, (πλατυκορια, from *platy*, and κορη, 'pupil,') Mydriasis.

PLATYCORIASIS, Mydriasis.

PLATYELMINS, (*platy*, and ελμινς, 'worm,') Bothriocephalus.

PLATYNO'SIS, (from πλατυς, 'broad,' and *osis*,) *Amplifica'tio.* Morbid extension of parts.

PLATYOPHTHAL'MUS, (πλατυοφθαλμος, from *platy*, and οφθαλμος, 'eye.') One who has broad eyes. Antimony was of old called *Platyophthalmon*, under the idea, that it improved the appearance of the eyes.

PLATYPODIA, (*platy*, and πους, gen. ποδος, 'a foot,') see Kyllosis.

PLATYPUS, (πλατυπους,) see Kyllosis.

PLATYS'MA, gen. *Platysm'atis*, (πλατυσμα, from πλατυς, 'broad.') Anything broadly extended. A spread plaster.

PLATYSMA MYOÏ'DES, *P. Myo'des*, *Mus'culus cuta'neus* seu *subcuta'neus* (Winslow), *Quadra'tus ge'næ* seu *latis'simus col'li*, *Expan'sio muscalo'sa*, *Tetrago'nus*, *Stomoman'icon*, (F.) *Thoraco-maxillo facial*, *Thoraco-facial* (Ch.), *Peaucier.* A muscle situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely upwards, and from without inwards. They arise from the areolar tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Mus'culus Riso'rius Santori'ni.* The platysma myoides depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

PLATYSTER'NUS, (*platy*, and στερνον, 'the sternum.') One who has a broad, well developed chest.

PLATYS'TOMUS, (*platy*, and στομα, 'mouth.') One who has a broad mouth.

PLAUTUS, Leiopus.

PLECHAS, (πληχας,) Perinæum.

PLECTANÆ, Cornua uteri.

PLEC'TANE, *Plica*, *Plegma*, *Plexus*, (πλεκτανη, from πλεκω, 'I twine.') A fold; a plexus. Also, a cornu of the uterus.

PLEC'TRUM, (πλεκτρον.) The styloid process of the temporal bone. Also, the uvula, and the tongue.

PLED'GET, ([D.] Plagghe,) *Plumace'olus*, *Linteo'men*, *Plag'ula*, (F.) *Plumaceau*, *Plumasseau.* A small compress or *gâteau* of lint — the filaments arranged parallel to each other — flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, and to absorb the discharges.

PLEGE, (πληγη,) Blow, Ictus.

PLEGMA, (πλημμα,) Plectane, Plege, Plexus.

PLEGOMETER, (πληγη, 'a stroke,' and μετρον, 'measure.') Pleximeter.

PLEIN (F.), (from *plenus*, 'full.') The middle part of a roller. See Bandage or Roller.

PLEIOMASTHUS, (πλειων, 'more,' and μασθος, 'a breast,') Polymasthus.

PLEIOMAZIA, (πλειων, 'more,' and μαζος, 'a breast,') see Polymasthus.

PLENA MULIER, 'a full woman,' Pregnant.

PLENCK'S DEPILATORY, see Depilatory, Colley's.

PLENITUDE, (*plenus*, 'full,') Fulness.

PLENITUDO, Plethora.

PLEOMAZIA, (πλειων, 'more,' and μαζος, 'a breast,') see Polymasthus.

PLEONEC'TICUS, (πλεονεκτικος, from πλεων, 'more,' and εχειν, 'to have.') Covetous. Desirous to acquire: hence *mu'nia pleonectica.*

PLEONECTICA ATHYM'IA seu MELANCHOL'IA. *Pleonex'ia.* A form of insanity characteried by a desire for gain or by covetousness.

PLERO'SIS, (πληρωσις, from πληρης, 'full,' and *osis*,) *Reple'tio*, *Refec'tio*, *Reple'tion*, (F.) *Plérose.* Restoration of flesh after sickness. Plethora.

PLEROTICUS, (πλερωτικος, from πληροω, 'to fill up,') Incarnans.

PLÉROTIQUE, Incarnans.

PLES'MONÉ, (πλησμονη,) *Plenitu'do*, *Sati'etas*, *Sati'ety.* Intemperance. A condition the opposite to that of hunger.

PLESSER, (πλεσσω, 'I strike,') Plexor.

PLESSIMETER, Pleximeter,

PLESSIMÈTRE, Pleximeter.

PLETHOMER'IA, (πληθος, 'a great number,' and μερος, 'a part.') Superabundance of parts, as in the case of six fingers to one hand.

PLETHO'RA, (πληθωρα,) *Polyæ'mia*, *Polyhyperhæ'mia*, *Panhyperæ'mia*, *Polychym'ia sanguin'ea*, *Angeioplero'sis*, *Angioplero'sis*, *Erythræ'-*

mia, Erythro'sis, Hæmatopletho'ra, Hæmopletho'ra, Plenitu'do, Multitu'do, Redundan'tia, Reple'tio, Eu'chyma, Comple'tio, Pleth'ory, Reple'tion, (Old Eng.) *Plur'isy, Sanguineness, Ful'ness,* (F.) *Abondance, Rédondance.* The word *plethora*, which means repletion, *Plero'sis*, expresses a superabundance of blood in the system, or in some part of it:—hence the division of plethora into *general* and *local;* the latter being called, according to its seat, *cerebral, pulmonary, uterine,* &c. The principal symptoms of plethora exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The blood of plethoric persons differs from healthy blood in the smaller ratio of water which it contains, and especially in the augmentation of the red corpuscles.

The tendency to plethora, or its actual existence, must be obviated by purgatives, proper diet, exercise, &c.; and, if the danger from it be pressing, by bloodletting. This is, however, a doubtful remedy for general plethora, as it increases hæmatosis.

PLETHORA ARTERIO'SA is the form in which the blood is rich in fibrin and red corpuscles—the *arte'rial constitu'tion.*

PLETHORA, LOCAL, Hyperæmia—p. Partialis, Hyperæmia.

PLETHOR'IC, (πληθωρικος,) *Pletho'ricus, Polyæ'micus, Polyæ'matus, San'guine, Sanguin'eous,* (F.) *Pléthorique.* Full of blood. Relating to or affected with plethora.

PLETHORICUS, Plethoric.

PLETHORY, Plethora.

PLETHOS, (πληθος,) Satiety.

PLEUMON, (πλευμων,) Pulmo.

PLEUMONIA, Pneumonia.

PLEU'RA, (πλευρα,) *Pleu'rum, Pleuro'ma. Membra'na pleurit'ica succin'gens* seu *cos'tas succin'gens, M.* seu *Tu'nica costa'lis* seu *subcosta'lis, Hypopleu'rios, Hypezo'cus,* (F.) *Plèvre* ou *Pleure.* The pleuræ are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like other serous membranes—to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costa'lis* seu *parieta'lis;* the portion that covers the lungs, *Pleura Pulmona'lis.* The arteries of the pleuræ are from the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

Pleura is also used for *Cavity of the Pleura, Sac'cus Pleu'ræ.*

PLEU'RÆ, (pl. of *pleura.*) The sides of the chest.

PLEU'RAL, *Pleura'lis, Pleu'ricus, Pleuri'tes.* That which concerns the pleura;—as a *pleural* fistula, *pleural* cavity, *pleural* friction, *pleural* hemorrhage, &c.

PLEURALGIA, (πλευρα, 'side,' and αλγος, 'pain,') Pleurodyne.

PLEURAPOPHYSES, (πλευρα, 'side,' and *apophyses,* 'processes,') Costæ veræ, see Costa.

PLEURAPOSTEMA, (*pleura,* and *apostema,* 'abscess,') Empyema.

PLEURARTHROC'ACE, (πλευρα, 'a rib,' αρθρον, 'a joint,' and κακος, 'bad.') Caries of the ribs.

PLEURE, Pleura.

PLEURESIA, (from *pleura,* Pleuritis.

PLEURÉSIE, Pleurisy—*p. Fausse,* Pleurodynia.

PLEURESIS, (from *pleura,*) Pleuritis.

PLEURÉTIQUE, Pleuritic.

PLEURICUS, Pleural.

PLEURISY, Pleuritis.

PLEURISY, BIL'IOUS, *Pleuri'tis bilio'sa.* Pleurisy accompanied with bilious symptoms;—the effect of duodenitis or duodenohepatitis.

PLEURISY, FALSE, Pleurodynia.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the Southern States especially, for bilious pneumonia before the pneumonitic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, Hæmatothorax—p. Rheumatic, Pleurodynia—p. Root, Asclepias tuberosa.

PLEURISY, TY'PHOID, *Pleuri'tis typhoï'des* seu *typho'des* seu *typho'sa.* Pleurisy accompanied by adynamic symptoms.

PLEURITES, (πλευριτης,) Pleural.

PLEURIT'IC, (πλευριτικος,) *Pleurit'icus, Pleurit'ical,* (F.) *Pleurétique;* (same etymon as *pleuritis.*) Relating or appertaining to pleuritis,—as '*pleuritic* pain.'

PLEURI'TIS, gen. *Pleuri'tidis,* (πλευριτις, from *pleura,* and *itis,* or from πλευριτης, (νοσος, 'a disease,' understood,) *Mor'bus latera'lis* seu *pleurit'icus* seu *costa'lis, Empres'ma* seu *Cau'ma Pleuritis, Pleure'sis, Pleure'sia, Pleuritis costa'lis* seu *ve'ra, Pleurit'ica Fe'bris, Pas'sio pleurit'ica, Inflamma'tio Pleuræ, Pleu'risy, Inflamma'tion of the Pleu'ra,* (F.) *Pleurésie, Fièvre pleurétique, Inflammation de la Plèvre,* may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure, dyspnœa, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side; symptoms, attending the phlegmasiæ in general, strongly marked.

Physical Signs. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dulness of sound on percussion, the dulness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura: a *mediastinal pleurisy,* one situated in the anterior mediastinum; and *false pleurisy* or *rheumatism'al pleurisy,* that which occupies the intercostal muscles. The last has received the name *Pleurodyn'ia;* that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has also been distinguished into *dry* and *humid,* according as it is or is not accompanied by expectoration. *Hu'mid* or *moist pleurisy* is now properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catar'rhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

Chron'ic Pleu'risy, which has been particularly described by recent pathologists, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

Physical Signs. The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes œdematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recommended by Dr. Thomas Davies, would of course settle the question.

On *dissection* of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes it seems cartilaginous and ossified. Its cavity frequently contains serous or seropurulent effusions.

The acute form of the disease requires most active treatment. General bloodletting, to such an extent as to make a very decided impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counterirritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

Sauvages has given the name Pleuri'tis Vento'sa, and Pringle that of Pleurodyn'ia Vento'sa, to a pain behind the false ribs, attributed to the presence of air in the intestines.

Pleuritis Biliosa, Pleurisy, bilious—p. Bronchialis, Bronchitis—p. Costalis, Pleuritis—p. Diaphragmatica, Diaphragmitis—p. Humida, Bronchitis—p. Muscularis, Pleurodynia—p. Notha, Pleurodynia—p. Pericardii, Pericarditis—p. Pulmonis, Pleuropneumonia—p. Rheumatica, Pleurodynia—p. Spuria, Pleurodynia—p. Spuria simulata, Pleurodynia—p. Typhoides, Pleurisy, typhoid—p. Vera, Pleuritis.

PLEUROCE'LE, (*pleura*, and *κηλη*, 'a tumour.') *Her'nia of the pleu'ra, Her'nia pleu'rica et pulmona'lis.* This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

PLEUROCOLLE'SIS, (*pleura*, and *κολλαω*, 'I glue.') An adhesion between the pleura costalis and pleura pulmonalis.

PLEURODYNE, Pleurodynia.

PLEURODYN'IA, *Pleural'gia, Pscudopleuri'tis, Pseudopleu'risy, Pleurod'ynē, Autal'gia cholero'sa, Parapleuri'tis, Stethorrheum'a, Rheumatis'mus pec'toris, Pleuri'tis rheumat'ica* seu *muscula'ris* seu *no'tha* seu *spu'ria* seu *spu'ria simula'ta, Pneumo'nia exter'na, Lagonop'onos, Thoracod'ynē, Thoracodyn'ia, Thoracomyodyn'ia, Do'lor Pec'toris exter'nus, Pain in the side, Stitch in the side, False, rheumat'ic* or *rheumatism'al pleur'isy,* (Old Eng.) *Shott,* (Sc.) *Caik,* (F.) *Point de côté, Douleur de côté, Pleurésie fausse;* (*πλευρα*, 'side,' and *οδυνη*, 'pain.') A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes even the corresponding arm. It is unaccompanied by fever, cough, or dyspnœa, excepting under the form of a *stitch*, when dyspnœa exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resists, a blister will, almost always, remove it.

Pleurodynia Ventosa, Pleuritis ventosa.

PLEURODYN'IC, *Pleurodyn'ical, Pleurodyn'icus,* (F.) *Pleurodynique.* Relating or belonging to pleurodynia.

PLEUROMA, gen. *Pleuro'matis,* (*πλευρωμα*, from *pleura*, and *oma*,) Costa, Pleura.

PLEUROPATHI'A, (*pleura*, and *παθος*, 'a disease.') A disease of the pleura.

PLEUROPERIPNEUM'ONY, *Pleuroperipneumo'nia, Pleuropneumo'nia, Pneumonopleure'sis, Pneumonopleuri'tis, Pleuri'tis pulmo'nis, Pneumo'nia pleuri'tis,* (*pleura*, and *peripneumonia.*) Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical signs.* A dull sound is yielded by percussion for a variable extent over the more dependent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up, the crepitation or bronchial respiration of pneumonia may be detected; round the root of the lung, and near the inferior angle of the scapula, egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

PLEUROPNEUMA, gen. *Pleuropneum'atis,* (*pleura*, and *πνευμα*, 'wind,') Pneumathorax.

PLEUROPNEUMONIA, Pleuroperipneumony.

PLEUROPNEUMONITIS, Pleuroperipneumony.

PLEUROPYESIS, (*pleura*, and *πυησις*, 'suppuration,') Empyema.

PLEURORRHAGIA, (*pleura*, and *ῥαγη*, 'a breaking forth,') Hæmatothorax.

PLEURORRHŒ'A, (*pleura*, and *ῥεω*, 'I flow.') Accumulation of fluid in the pleura.

Pleurorrhœa Chylosa, Chylothorax—p. Lymphatica, Hydrothorax—p. Purulenta, Empyema—p. Sanguinea, Hæmatothorax—p. Serosa, Hydrothorax.

PLEURORTHOPNŒ'A, (*pleura*, *ορθος*, 'erect,' and *πνεω*, 'I respire.') Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

PLEUROSO'MUS, (*pleura*, and *σωμα*, 'body.') A malformation in which the fissure is somewhat lateral, with eventration extending chiefly upon the upper part of the abdomen and upon the chest; the upper extremity of the fissured side being more or less atrophied.

PLEUROSTO'SIS, (*pleura*, *οστεον*, 'a bone,' and *osis.*) Ossification of the pleura, or in the cavity of the pleura. *Osteopleu'ria.*

PLEUROTETANUS, (*πλευρα*, 'a side,' and *tetanus,*) Pleurothotonus.

PLEUROTHOT'ONUS, *Pleurot'onus, Pleurotet'anus, Tet'anus latera'lis,* from *πλευροθεν*, 'laterally,' and *τονος*, 'tension.') A variety of tetanus, in which the body is curved laterally by the stronger contraction of the muscles of one side of the body.

PLEUROTONUS, (*πλευρα*, 'a side,' and *τεινειν*, 'to stretch,') Pleurothotonos.

PLEURUM, (*πλευρον*,) Costa, Pleura.

PLÈVRE, Pleura.

PLEXIM'ETER, *Plexom'eter*, *Plegom'eter*, *Plessim'eter*, *Anticoposcop'ium*, *Anticop'oscope*, (F.) *Plessimètre*, (πλησσω, 'I strike,' and μετρον, 'measure,' 'a measure of percussion.') An ivory plate of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage.—See Percussion, mediate.

PLEXOMETER, Pleximeter.

PLEX'OR, (πλησσω, 'I strike.') *Ples'ser*. Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor*; as the finger of the left is, perhaps, the best *pleximeter*.

PLEX'US, gen. *Plexûs*, *Pleg'ma*, *Plec'tanē*, *Pla'nē*, *Ile'tē*, (πλεκω, *plecto*, *plexum*, 'to interlace,' 'to entwine.') (F.) *Lacis*. A network of blood-vessels or of nerves. The nervous plexuses, *Implicatio'nes reticula'res* seu *Tex'tus nervo'rum* belong—*some* to the system of encephalic nerves—*others* to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less loose meshes, formed by the numerous and diversified anastomoses of the nervous filament; from which proceed other branches, that are distributed to organs or to other plexuses.

PLEXUS BRACHIALIS, Brachial plexus—p. Cardiac, Cardiac plexus—p. Carotid, see Carotid nerve—p. Cavernosus, Bulbus vestibuli—p. Choroides, see Choroid—p. Choroideus Medius, Choroidea tela—p. Ciliaris, Ciliary ligament—*p. Cœliaque*, Cœliac plexus—p. Coronarius ventriculi, Gastric plexus—p. Coronary, see Cardiac plexus, and Coronary plexus—p. Gangliformis semilunaris, Cœliac plexus—p. Ganglioformes, Ganglions, nervous—p. Glandiformes, Ganglions, nervous—p. Glandulosi Peyeri, Peyeri glandulæ—p. Hederaceus, Corpus pampiniforme—p. Hepaticus, Hepatic plexus—*p. Hypogastrique*, Hypogastric plexus—p. Infrathyroideal, see Thyroideal veins—*p. Lombo-abdominal*, Lumbar plexus—p. Median, Cœliac plexus—p. Mesenterii proprius et maximus, Cœliac plexus—p. Nervorum anserinus, Facial nerve—*p. Opistogastrique*, Cœliac plexus—p. Pampiniformis, Corpus pampiniforme—p. Pharyngeal, see Pharyngeal nerve—p. Pneumogastricus, see Pneumogastric nerve—p. PLI (F.), ([L.] *plica*, 'a fold,')—*p. du Coude*, 'fold of the elbow,' see Elbow—*p. de Douglas*, 'fold of Douglas,' see Uterus—*p. de Vater*, 'fold of Vater,' Plica longitudinalis Vateri.

PLICA, (*plico*, πλεκω, 'to fold,') *Tricho'sis pli'ca*, *Tricho'ma*, *Trichono'sis pli'ca*, *Tri'cæ*, *T. Incubo'rum* seu *Scrofo'rum*, *Plica Polon'ica* seu *Polon'ica Juda'ica* seu *Cachec'tica* seu *Saxon'ica* seu *ca'put Medu'sæ* seu *longicau'da latera'lis*, *Affectio Sarmat'ica*, *Ln'es Sarmat'ica* seu *Polon'ica* seu *Trichomat'ica*, *Helo'sis*, *Helo'tis*, *Cir'ragra*, *Cir'rhagra*, *C. Polono'rum*, *Ecphy'ma tricho'ma*, *Mor'bus Cirrho'rum*, *Co'ma Cæsare'a*, *Kol'to*, *Rhopalo'sis*, *Plica'tio*, *Plicatu'ra*, *Mat'ted hair*, *Plait'ed hair*, *Trichom'atose hair*, (F.) *Plique*, *P. Polonaise*. A disease endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some it has been regarded as a real disease; by others, as the want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but sometimes on that of other parts, as the beard, the hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. *Plica multiform'is*, or *Plica ca'put Medu'sæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. lacinia'ta*, [F.] *Plique en lanières*), or much twisted ([F.] *P. en vrilles*). 2. *Plica longicaud'a*, (F.) *Plique solitaire* ou *à queue*; when the hair is united into a single long mass, and 3. *Plica cespito'sa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasiæ*; but it is far from demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection—*sui generis*—of the dermoid system. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable. It has been supposed to be produced by a fungous growth—a *mycoder'ma*, *tri'chomaphyte* or *tri'chophyte*.

PLICA, 'a fold,' Plectane—p. Cachectica, Plica—p. Caput Medusæ, Plica—p. Centralis retinæ, see Optic nerve—p. Longicauda lateralis, Plica—p. Lunata, Valvula semilunaris—p. Polonica, Plica—p. Polonica Judaica, Plica—p. Saxonica, Plica—p. Semilunaris, Valvula semilunaris.

PLICÆ CONNIVENTES, (pl. of *plica*,) Valvulæ conniventes.

PLICA LONGITUDINA'LIS VATERI, *Divertic'ulum Vateri*, (F.) *Pli de Vater*. A vertical projection, about an inch in length, formed at the posterior part of the duodenum by the mucous membrane raised up by the common choledoch duct before it opens into the intestine.

PLICÆ SEMILUNARES, see Urinary bladder, and Uterus.

PLICATIO, Plica.

PLICATURA, Plica.

PLICATURÆ CEREBRI, Gyri cerebri.

PLICIOS, (πλιγος,) Perinæum.

PLIN'THIUM, (πλινθιον.) A machine invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armamentarium Chirurgicum*.

PLIQUE, Plica—*p. Polonaise*, Plica.

PLOCARIA CANDIDA, Fucus amylaceus—p. Helminthochorton, Corallina Corsicana.

PLOESSLEA FLORIBUNDA, (after Ploessl, an optician of Vienna,) see Juniperus lycia.

PLOMB, Plumbum. Also, the sulphuretted gas disengaged from privies, which proves fatal at times to the nightmen, (F.) *Vidangeurs*, engaged in emptying them.

PLOMB, ACÉTATE ACIDE DE, Plumbi superacetas—*p. Blanc*, Plumbi subcarbonas—*p. Blanc de*, Plumbi subcarbonas—*p. Carbonate de*, Plumbi subcarbonas—*p. Chlorure de*, Plumbi chloridum—*p. Iodure de*, Plumbi iodidum—*p. Nitrate de*, Plumbi nitras—*p. Oxide de, fondu*, Plumbi oxydum semivitreum—*p. Oxide rouge de*, Plumbi oxydum rubrum—*p. Oxide, semi-vitreux de*, Plumbi oxydum semivitreum.

PLOMBAGE DES DENTS, (from *plomb*, 'lead,') Plugging.

PLOMBAGINE, (*plomb*, 'lead,') Graphites.

PLOMBIÈRES, MIN'ERAL WA'TERS OF. *Fon'tes medica'ti Plumba'rii*, *Ther'mæ Plumba'riæ*. Plombières is a town in the department of the Vosges, 17 leagues from Nancy, and two from

Remiremont. Here are several sources of thermal water. That which is called *Sapona'ceous*, (F.) *Savonneuse*, is formed of the subcarbonate and sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegeto-animal matter. This last component, (F.) *Plombiérine*, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous character. This is the origin of its name. The waters of Plombières are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin. Season, from the 15th of May to the 15th of October.

PLOMBIÉRINE, see Plombières.

PLORATIO, (*plorare, ploratum*, 'to weep,') Lacrymatio.

PLORATUS, Lacrymatio.

PLOTUS, 'flat,' Leiopus.

PLOUK, (Gael. *plucan*,) Papula.

PLUG'GING, (from [D.] *plug*,) (F.) *Tamponnement*. The act of stopping a hole. The introduction of a plug or dossil of lint or rag—(F.) *Tampon*—into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache, (F.) *Plombage* ou *Obturation des dents*. See Filling.

PLUKE, (Gael. *plucan*,) Papula.

PLUM, (Sax. plume,) Prunum, Prunus domestica—p. Assyrian, Sebestina.

PLUMA, 'down,' Lanugo.

PLUMACEAU, (from *pluma*,) Pledget.

PLUMACEOLUS, (from *pluma*,) Pad, Pledget.

PLUMASSEAU, Pledget.

PLUMBAGO, (from *plumbum*, the leaves having lead-coloured spots,) Graphites, Persicaria.

PLUMBA'GO EUROPÆ'A, *P. lapathifo'lia* seu *undula'ta, Denta'ria, Orepanel'la, Squama'ria, Dentela'ria, Lead'wort*, (F.) *Dentelaire, Herbe au Cancer, Malherbe*. *Ord.* Plumbaginaceæ. *Sex. Syst.* Pentandria Monogynia. The root was formerly much esteemed as a cure for toothache, like the *Pel'litory of Spain*, which, also, is called *Dentaria*.

PLUMBI ACETAS, P. superacetas—p. Acetas dilutum alcoholicum, Liquor plumbi subacetatis dilutus—p. Acidulus siccus, Plumbi superacetas—p. Azotas, P. nitras—p. Carbonas, P. subcarbonas.

PLUM'BI CHLO'RIDUM, *Chlo'ride of Lead*, (F.) *Chlorure de Plomb*. This salt of lead has been used in the form of lotion and ointment in cancerous ulcerations.

PLUMBI DEUTOXYDUM RUBRUM, P. Oxydum rubrum—p. Hydriodas, P. Iodidum—p. Iodhydras, P. Iodidum.

PLUM'BI IO'DIDUM, *P. Iodure'tum* seu *Hydri'odas* seu *Hydroï'odas* seu *Iodhy'dras, Plum'bum ioda'tum* seu *Hydroïod'icum, Iodide* or *Iod'uret of Lead*, (F.) *Iodure de Plomb, I. plombique*. (This salt is formed by the double decomposition of *iodide of potassium* and *nitrate of lead*.) It is used in scrofulous affections internally and externally; and is officinal in the Pharmacopœia U. S. Dose, gr. ss. to gr. iij or iv.

PLUMBI IODURETUM, P. Iodidum.

PLUMBI NI'TRAS, *P. Azo'tas, Plumbum ni'tricum, Ni'tras plumb'icus, Ni'trum saturni'num, Ni'trate of lead*, (F.) *Nitrate* ou *Azotate de Plomb*. (A salt formed by the action of *diluted nitric acid* on *litharge*.) Nitrate of lead has the same medical action as the other soluble salts of lead, and is a valuable antibromic. It has been used, also, as an excitant antiseptic to wounds, ulcers, &c., and is the basis of Ledoyen's disinfecting liquid.

PLUMBI NITROSAC'CHARAS, *Nitrosac'charate of lead*. (*Sacchar.* p. j; *Acid. nitric.* p. ij; *Aquæ* p. x. Beat together in a porcelain dish as long as chemical action continues: dilute the liquor with water; neutralize with chalk, and to the filtered solution add acetate of lead so long as a precipitate is formed. Collect, wash, and dry the precipitate, which is saccharate of lead. Dissolve in dilute nitric acid, (one part acid to nineteen of water,) filter and evaporate to form crystals, which are transparent, of an amber colour, and in regular hexagonal plates or prisms.)

Advised as a solvent of phosphatic calculi.

PLUMBI OXYDUM seu OXYDUM ALBUM, Plumbi subcarbonas—p. Oxydum carbonatum per acidum acetosum, Plumbi subcarbonas—p. Oxydum fusum, Plumbi oxydum semivitreum.

PLUMBI OX'YDUM RU'BRUM, *Min'ium, Mil'us, Deutox'ydum plum'bi ru'brum, Superox'ydum Plumbo'sum, Plum'bum oxyda'tum ru'brum* seu *superoxyda'tum, San'dix, San'dyx, Red lead*, (F.) *Oxide de plomb rouge*. It is sometimes used to kill vermin.

PLUMBI OXYDUM SEMIVIT'REUM, *P. Ox'idum* (Ph. U. S. 1863), *Plum'bum oxyda'tum, Lithar'gyrus, Lithar'gyrum, Litharayr'um, Ox'ydum plum'bi fu'sum, Spu'ma argent'i, Semivit'rified ox'yd of lead or lith'arge, Calciteo'sa, Cath'mia*, (F.) *Oxide de plomb fondu, Oxide de plomb semivitreux*, (a yellow protoxyd of lead, prepared by heat, combined with carbonic acid.) It occurs in scales of a whitish red colour, and semivitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis, Emplastrum plumbi*, &c. Formerly, the *Litharge of gold, Chrysi'tis, Mas'sicot*, and *Litharge of silver, Almariab*, were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBCARBO'NAS, *Carbo'nas plum'bi* seu *plum'bicus, Plumbi Carbo'nas* (Ph. U.S.), *Plumbum carbo'nicum, P. oxyda'tum carbo'nicum, Magiste'rium plumbi, Oxydum plumbi al'bum, Cerus'sa, Æru'go plumbi, Simmit'ium, Psimy'thion, Psimy'thus, Blan'ca, Ger'sa, If'fides, Subcar'bonate of lead, Cerusse, White lead, Flake white*, (F.) *Carbonate de plomb, Blanc de plomb, Plomb blanc, Céruse, Blanc d'Argent, Blanc de Céruse, Blanc de Krems, B. de Crems, B. de Kremnitz, Craie de plomb*, (prepared by exposing spiral rolls of *lead* to the fumes of *vinegar*, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is also used in the formation of ointments and plasters.

PLUMBI SUPERACE'TAS, *Cerus'sa aceta'ta, Plumbi acid'ulus sic'cus P. ace'tas* (Ph. U. S.), *Sal* seu *Sac'charum Satur'ni, Plum'bum ace'ticum, Dulce'do Satur'ni, Ace'tas plum'bicum crystallisa'tum, Sal plumbi, Sugar of lead, Superac''etate of lead, Protoac''etate of lead*, (F.) *Acétate acide de plomb, Sel* ou *sucre de Saturne*. (*Plumb. carb.* ℔j, *Acid acetic. cong.* 1½. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle that crystals may be formed. Wash the crystals and dry on blotting-paper. Ph. L. In the Ph. B. (1864), it is directed to be prepared by the action of dilute *acetic acid* on *litharge*; filtering, evaporating, and crystallizing.) Acetate of lead has a sweet, styptic taste; a very white colour, and silky lustre. It is astringent; and, in *weak* solution, cooling and sedative; in *strong*, stimulant. It is given internally, in visceral and other hemorrhages, combined with opium, and is used externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

PLUMBI TANNAS, see Tannin.

PLUMBICUM ACETAS CRYSTALLISATUM, Plumbi superacetas.

PLUMBOSUM SUPEROXYDUM, Plumbi oxydum rubrum.

PLUMB'UM, *Molyb'dos, Molib'dus, Saturn'us, Capricor'nus*, (F.) *Plomb*. Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxydizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. S. g. 11.352.

Its use is to form oxides and salts. In its metallic state, it has no action upon the body; but when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ACETICUM, Plumbi superacetas—p. Album, Tin—p. Candidum, Tin—p. Carbonicum, Plumbi subcarbonas—p. Cinereum, Bismuth, subnitrate of—p. Hydroiodicum, Plumbi Iodidum—p. Iodatum, Plumbi Iodidum—p. Nigrum, Graphites—p. Nitricum, Plumbi nitras—p. Oxydatum, Plumbi oxydum semivitreum—p. Oxydatum carbonicum, Plumbi subcarbonas—p. Oxydatum rubrum, Plumbi oxydum rubrum—p. Superoxydatum, Plumbi oxydum semivitreum.

PLUMIE'RA AL'BA, (after Plumier, a French botanist;) *Order*, Apocynaceæ; a native of tropical America, has a milky juice which is cathartic.

PLUMIERA DRAS'TICA, is given in Brazil in jaundice, and chronic obstructions, mixed with milk of almonds.

PLUMIERA PHAGEDÆ'NICA, is in repute in Brazil as an anthelmintic.

PLUMS, SEEDED, see Diospyros Virginiana—p. Winter, see Diospyros Virginiana—p. Yellow, see Diospyros Virginiana.

PLUNGE BATH, see Bath.

PLUNGING SIPHON, see Siphon.

PLUNK'ETT'S CAUSTIC FOR CANCERS, Plunkett's Ointment.

PLUNKETT'S OINT'MENT, *Plun'kett's Caus'tic for Can'cers*. This empirical cancer remedy consists of *Arsenious acid, Sulphur*, and the powdered flowers of the *Ranunculus flammula* and *Cotula fœtida*;—levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLURAL BIRTH, see Multiparous.

PLURIMAMME, (*plures*, 'many,' and *mammæ*, 'breasts,') Polymasthus.

PLURISY, (from *plus*, gen. *pluris*, 'more,') Plethora.

PLUTEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Falx cerebri*.

PLUTONIUM, (after *Pluto*,) Barium.

PNEOBIOMANTIA, (*πνεω*, 'to breathe,' *βιος*, 'life,' and *μαντεια*, 'divination,') Docimasia pulmonum.

PNEOBIOMANTICA, Docimasia pulmonum.

PNEOMETER, (*πνεω*, 'to breathe,' and *μετρον*, 'measure,') Spirometer.

PNEUMA, gen. *Pneu'matis*, (*πνευμα*, gen. *πνευματος*,) Air, Life. See Pneumatic Physicians.

PNEUMAPOSTE'MA, gen. *Pneumaposte'matis, Pneumonaposte'ma, Absces'sus pulmo'num*, (*pneumon*, and *αποστημα*, 'abscess.') Abscess of the lung.

PNEUMARTHRO'SIS, (*pneuma*, *αρθρον*, 'articulation,' and *osis*.) Secretion of air into an articular cavity. Seen at times, it is said, after acute rheumatism, but soon disappearing [?].

PNEUMATELECTASIS, (*pneumon*, and *atelectasis*,) Atelectasis pulmonum.

PNEUMATHÆ'MIA, *Pneumatæ'mia*, (*pneuma*, and *αιμα*, 'blood.') A morbid condition in which air is developed in the bloodvessels.

PNEUMATHORAX, Pneumothorax.

PNEUMAT'IC, (*πνευματικος*,) *Pneumat'icus, Pneumät'ical*, (F.) *Pneumatique*. Relating to air or life.

PNEUMATIC MEDICINE, Atmiatria.

PNEUMATIC PHYSIC''IANS, *Pneumat'ici, Pneumatis'ta*. Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element—which they called *Pneuma*, (*πνευμα*)—to those of the other elementary principles. This *πνευμα* was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire;—the sole elementary principles previously admitted. The doctrine was called *Pneu'matism*. At the present day, the epithet *pneumatic* is sometimes applied to those who treat diseases chiefly by the inhalation of gases.

PNEUMAT'ICA, (from *pneuma*.) Appertaining to the breathing. Diseases of the respiratory function;—the second class in Good's system of nosology. Agents that act on the respiratory organs.

PNEUMATICAL, Pneumatic.

PNEUMATOCELE, (*πνευματοκηλη*, from *pneuma*, and, *κηλη*, 'a tumour,') Physocele.

PNEUMATO'DES, (*πνευματωδης*, from *pneuma*, and *odes*.) One distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

PNEUMATOMETER, (*pneuma*, and *μετρον*, 'measure,') Spirometer.

PNEUMATOMPHALOCELE, Pneumatomphalus.

PNEUMATOM'PHALUS, *Pneumatomphaloce'lē*, (*pneuma*, and *ομφαλος*, 'umbilicus.') Umbilical intestinal hernia, containing a considerable quantity of flatus.

PNEUMATOR'RHACHIS, gen. *Pneumatorrha'chidis*, (*pneuma*, and *ραχις*, 'spine.') Accumulation of air in the vertebral canal.

PNEUMATOSE, Pneumatosis—*p. Péritonéale*, Tympanites.

PNEUMATO'SIS, *Aëro'sis*, (from *pneuma*, and *osis*,) *Fla'tus*, (F.) *Maladie venteuse, Pneumatose*. Flatulence. Flatulent distension of the stomach or bowels, or both. Sauvages uses the word synonymously with emphysema. It is now generally employed for every abnormous collection of gaseous matters in any part of the body.

PNEUMATOSIS, Emphysema—p. Abdominis, Tympanites—p. Enterica, Colica flatulenta—p. Pericardii, Pneumopericardium—p. Pulmonum, Emphysema of the lungs—p. Ventriculi et Pneumatosis enterica, Flatulence.

PNEUMATOTHORAX, Pneumothorax.

PNEUMECTASIS, (*pneumon*, and *εκτασις*, 'dilatation,') Emphysema of the Lungs.

PNEUMIC ACID, see Acid, pneumic.

PNEUMOCACE, (*pneumon*, and *κακος*, 'evil,') Necropneumonia.

PNEUMOCE'LĒ, *Her'nia pulmo'nis*, (F.) *Hernie du poumon*, (*pneumon*, and *κηλη*, 'rupture.') Hernia of the lung through one of the intercostal spaces.

PNEUMOCHOLOSIS, (*pneumon*, and *cholosis*, (*χολη*, 'bile,') 'a biliary disease,') Pneumonia (bilious).

PNEUMOCHYSIS, (*pneumon*, and *χυω* 'to pour out,') Œdema of the lungs.

PNEUMOËCTASIE, (*pneumon*, and *εκτασις*, 'dilatation,') Emphysema of the lungs.

PNEUMOGAS'TRIC, *Pneumogas'tricus*, (F.) *Pneumogastrique*, (*pneumon*, and *γαστηρ*, 'the stomach.') Belonging to the lungs and stomach.

PNEUMOGASTRIC NERVES, *Eighth pair of nerves* (*Tenth pair*, of some,) *Par va'gum, Pars va'ga, Va'gus, Nervus vagus* seu *ambulato'rius* seu *pneumogas'tricus* seu *dec''imus* seu *sympath'icus me'dius, Mid'dle sympathet'ic*, (F.) *Nerfs pneumogastriques* ou *vagues*; so called because distributed especially to the organs contained in the chest

and abdomen. This nerve arises from behind the eminentiæ olivariæ and near the corpora restiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacerum posterius; behind the glossopharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus—*Plex'us gangliform'is, Gan'glion of the supe'rior laryngeal branch*, of Sir Astley Cooper. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck, it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypoglossal, and great sympathetic nerves; and furnishes, 1, a *pharynge'al branch*, 2. a *supe'rior laryngeal*, 3, *car'diac branches*. In the chest, it gives off, 1, the *infe'rior laryngeal* or *recur'rent*, 2. the *pul'monary plex'us*, and 3, the *œsophage'al branches*. On entering the abdomen, the œsophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, cœliac, gastroëpiploic, and solar plexuses. Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

PNEUMOG'RAPHY, *Pneumogra'phia*, (*pneumon*, and γραφη, 'a description.') The part of anatomy that describes the lungs.

PNEUMO-HEMORRHAGIE, see Hæmoptysis.

PNEUMOLITHI'ASIS, (*pneumon*, and λιθιασις, 'formation of stone.') A morbid state in which calculi form in the lungs.

PNEUMOL'OGY, *Pneumolog''ia*, (*pneumon*, and λογος, 'a discourse.') An anatomical treatise on the lungs. An anatomical description of the lungs.

PNEUMOMETER, (*pneumon*, and μετρον, 'measure,') Spirometer.

PNEUMOM'ETRY, *Pneumomet'ria*. Measurement of the capacity of the lungs for air. See Spirometer.

PNEUMON, (πνευμων,) Pulmo.

PNEUMONALGIA, (*pneumon*, and αλγος, 'pain,') Angina pectoris.

PNEUMONATELECTASIS, (*pneumon*, and *atelectasis*,) Atelectasis pulmonum.

PNEUMONÉCROSIE, (*pneumon*, and νεκρωσις, 'death,') Necropneumonia.

PNEUMONECTASIS, (*pneumon*, and εκτασις, 'dilatation,') Emphysema pulmonum.

PNEUMONEMPHRAX'IS, (*pneumon*, and εμφραξις, 'obstruction.') Congestion and infarction of the lungs.

PNEUMO'NIA, (πνευμονια, of old, meant a disease of the lungs,) *Peripneumo'nia, Empres'ma pneumoni'tis, Pleumo'nia, Peripneumo'nia, Pneumoni'tis, Pulmoni'tis, Pulmo'nia, Pulmona'ria, Inflamma'tio pneumon'ica, I. pec'toris acu'ta* seu *pulmo'num, Pneumos'tasis, Fe'bris pneumon'ica, Pneu'mony, Peripneu'mony, Inflamma'tion of the Lungs, Lung-fever* (vulgarly), (F.) *Inflammation des poumons, Fièvre pneumonique* ou *péripneumonique, Fluxion de poitrine, Inflammation du parenchyme pulmonaire*. (From *pneumon*.) The chief symptoms of pneumonia are:—pyrexia, accompanied by pain, sometimes obtuse, at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain, aggravated by the cough, which, with dyspnœa, exists throughout the disease. At first, the expectoration is difficult and painful; but, in the course of a few days, it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt in one of the pleuræ. Pneumonia may, also, terminate by gangrene—but this rarely happens,—by induration and by hepatization.

Physical Signs. First Stage, (F.) *Engouement.* Diminution of the sound is generally observed over the affected part on percussion: auscultation exhibits an equal, dry, crepitating *râle*, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant *râle*, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual. Second Stage, (F.) *Hépatisation rouge.* When *hepatization* has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct. Third Stage, (F.) *Hépatisation grise.* When suppuration supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse, mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopnœa, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local bloodletting; nauseating doses of antimonials; purgatives; and when the violence of the inflammation has been got under,—counterirritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counterirritants of all kinds are indicated.

Pneumonia Biliosa, P. bilious.

Pneumonia, Bil'ious, *P. bilio'sa, Pneumochlo'sis*. Inflammation of the lungs, accompanied by gastric fever, and not uncommonly by typhoid symptoms;—*Pneumoty'phus, Pneumo'nia typhoï'des* seu *typho'des* seu *typho'sa, Pu'trid, ty'phoid, adynam'ic*, or *erysipel'atous pneumo'nia*.

Pneumonia, Erysipelatous, P. bilious—p. Gangrænosa, Necropneumonia—p. Hypostatica, Pneumonypostasis—p. Intermittens, Pneumotyposis—p. Lobular, see Lobular—p. Notha, Peripneumonia notha—p. Pleuritis, Pleuropneumonia—p. Putrid, P. bilious—p. Typhodes, P. bilious—p. Typhoid, P. bilious—p. Typhosa, P. bilious, Necropneumonia—p. Vesicular, Bronchitis, vesicular.

PNEUMONIC, (πνευμονικος,) Pulmonic.

PNEUMON'ICA, (from *pneumon*.) Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class Pneumatica of Good.

PNEUMON'ICI (*morbi*,) in the classification of Dr. Wm. Farre, means lung diseases.

PNEUMONIC'ULA, (dim. of *pneumonia.*) A slight inflammation of the lung.

PNEUMONICUS, (πνευμονικος,) Pulmonic.

PNEUMONIE, Pneumonia.

PNEUMONIE DES AGONISANTS, ('pneumonia of the dying.') *Pneumonie hypostatique.* The hyperæmic engorgement, which takes place in the lungs during the last moments of life, has been so termed. It would seem to be hyperæmia rather than inflammation.

PNEUMONIE DISSÉMINÉE, see Lobular—*p. Lobulaire*, see Lobular—*p. Mamelonnée*, see Lobular.

PNEUMONIT'IC, *Pneumonit'icus.* Of, or belonging to pneumonitis, or inflammation of the lungs.

PNEUMONITIS, (*pneumon*, and *itis*,) Pneumonia.

PNEUMONOCARCINO'MA, gen. *Pneumonocarcino'matis*, (*pneumon*, and καρκινωμα, 'cancer.') Cancer of the lungs.

PNEUMONOCELĒ, (*pneumon*, and κηλη, 'rupture.') Hernia of the lung.

PNEUMONOCE'LE DIAPHRAGMAT'ICA INTER'NA. Hernia of the lung through the diaphragm.

PNEUMONOCELE EXTER'NA seu THORAC''ICA. Hernia through the parietes of the chest.

PNEUMONOCELE THORACICA, P. externa.

PNEUMONŒDEMA, gen. *Pneumonœde'matis*, Œdema of the lungs.

PNEUMONOMELANOSIS, see Melanosis.

PNEUMONOMETER, (*pneumon*, and μετρον, 'measure,') Spirometer.

PNEUMONOMYCO'SIS, (*pneumon*, μυκης, 'a fungus,' and *osis.*) A vegetable parasitic growth in the lungs.

PNEUMONOPHTHISIS, Phthisis pulmonalis.

PNEUMONOPHTHOE, (*pneumon*, and φθοη, 'a wasting away,') Phthisis pulmonalis.

PNEUMONOPLEURESIS, Pleuroperipneumony.

PNEUMONOPLEURITIS, Pleuroperipneumony.

PNEUMONORRHAGIA, (*pneumon*, and ῥαγη, 'a breaking forth,') Hæmoptysis.

PNEUMONORRHŒA, (*pneumon*, and ῥεω, 'to flow,') Hæmoptysis.

PNEUM'ONOSCIR'RHUS, (*pneumon*, and σκιρρος, 'induration.') Induration of the lungs.

PNEUMONOSES, (from *pneumon*, and *osis*,') *Pneumoses.*

PNEUMONY, Pneumonia.

PNEUMONYPOS'TASIS, (*pneumon*, and ὑποστασις, 'a settling down,') *Pneumo'nia hypostat'ica.* Pneumonia in a depending portion of the lung, caused by lying on the back.

PNEUMOPÉRICARDE, Pneumopericardium.

PNEUMOPERICARD'IUM, *Pneumoperi-carditis, Pneumato'sis pericard'ii*, (F.) *Pneumopéricarde*, (*pneumon*, and *pericardium.*) Laënnec designates, under this name, the effusion of air into the cavity of the pericardium.

PNEUMOPHTHISIS, Phthisis pulmonalis.

PNEUMOPHYMATA, (*pneumon*, and φυμα, 'a swelling,') Tubercles of the lungs.

PNEUMOPLEURESIS, Pleuroperipneumony.

PNEUMOPTHOE, (*pneumon*, and φθοη, 'a wasting away,') Phthisis pulmonalis.

PNEUMOPYOTHORAX, see Pneumothorax.

PNEUMORRHAGIA, (*pneumon*, and ῥαγη, 'a breaking forth,') Hæmoptysis—p. Interna, Hæmatothorax.

PNEUMORRHŒA, (*pneumon*, and ῥεω, 'to flow,') Bronchorrhœa.

PNEUMOSEPSIS, (*pneumon*, and σηψις, 'putrefaction,') Necropneumonia.

PNEUMOSES, (from *pneumon*, and *osis.*) A term under which Alibert comprises every morbid affection of the lungs.

PNEUMOTHO'RAX, *Pneumatho'rax, Pneumatotho'rax, Emphyse'ma pec'toris, Asth'ma aëri-um* seu *emphysemat'icum, Dyspnœ'a pneumat'ica* seu *physothorac''ica, Physotho'rax, Aërotho'rax, Aëropleurie*, (*pneuma*, and *thorax.*) An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air, a liquid is effused, consisting of a serous fluid—*Hy'dropneum'otho'rax*, or of one that is purulent—*Pneum'opy'otho'rax.* The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow, tympanitic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no *râle* of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound will be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonance are heard; and if there be both gaseous and liquid effusion, with a fistulous communication, in addition to these signs there is the *tintement métallique.* The presence of liquid may be ascertained by succussion. See Emphysema of the lungs.

PNEUMOT'OMY, *Pneumotom'ia*, (*pneumon*, and τεμνω, 'I cut.') Dissection of the lungs.

PNEUMOTYPHUS, Pneumonia, typhoid.

PNEUMOTYPO'SIS, *Pneumo'nia intermit'tens*, (*pneumon*, τυπος, 'a stamp, a type,' and *osis.*) Pneumonia characterized by periodicity.

PNEUOBIOMANTIA, (πνεω, 'to breathe,' βιος, 'life,' and μαντεια, 'divination,') Docimasia pulmonum.

PNEUSIOBIOGNOSIS, (*pneusis*, βιος, 'life,' and γνωσις, 'knowledge,') Docimasia pulmonum.

PNEUSIOBIOSCOPE, (*pneusis*, βιος, 'life,' and σκοπεω, 'to examine,') Docimasia pulmonum.

PNEUSIS, (πνευσις,) Respiration—p. Pertussis, Pertussis—p. Singultus, Singultus—p. Tussis, Tussis.

PNEUSOMETER, (*pneusis*, and μετρον, 'measure,') Spirometer.

PNIGALION, (πνιγαλιων, from πνιγω, 'to suffocate,') Incubus.

PNIGMA, (πνιγμα,) Orthopnœa, Strangulation.

PNIGOPHOBIA, (*pniyos*, and φοβος, 'dread,') Angina pectoris, Suffocation.

PNIGOS, (πνιγος,) Orthopnœa, Strangulation.

PNIX, gen. *Pni'gis*, (πνιξ, gen. πνιγος,) Orthopnœa, Strangulation.

PNIXIS, (πνιξις,) Orthopnœa, Strangulation.

PNOE, (πνοη,) Aura, Breath.

PNŒA, (πνοια,) Aura, Breath.

PNŒ'UM. A nostrum of Dr. Samuel Hahnemann, the founder of the 'Homœopathic System,' which consisted—it is said—of borax only!

PNOOCOLYTICUS, (πνοος, 'breath,' and κωλυειν, 'to hinder,') Asthmatic.

PNOUS, (πνοος,) Aura, Breath.

POADMILK, Colostrum.

POCHE DES EAUX, 'bag of waters,' see Liquor amnii, and Parturition.

POCK, (Teut. p o c c a, 'a *pock* or little pouch.') A pustule of smallpox.

POCKARR, Pockmark, see Cicatrix.

POCKBROKEN, see Pockmark.

POCK, KINE, Vaccina.

POCKFRETTEN, see Pockmark.

POCKHOLE, Pockmark.

POCK'MARK, *Pock'hole*, (Prov.) *Pockarr*, *Scrobic'ulus* seu *Cica'trix Vari'olæ*. The mark or *pit* or *pitting* left from a smallpox pustule. One pitted with smallpox is said to be *pockmarked*, *pockbroken*, *pockfretten* or *pockfredden*, (Prov.) *Pockarred*.

POCKY. Infected with, or appertaining to, or resembling, smallpox or syphilis.

POC'ULUM ('a cup') ABSINTHIA'TUM. This was regarded, in remote ages, as a wholesome beverage; the *absinthium*, or 'wormwood,' being supposed to act as an antidote to drunkenness.

Poculum Amatorium, Philter — p. Diogenis, Palm—p. Emeticum, Goblet, emetic—p. Vomitorium, Goblet, emetic.

POD'AGRA, *Podarthri'tis*, *Podorrheu'ma*, *Podal'gia*, (*podo*, and *αγρα*, 'seizure.') Pain which attacks the feet. Gout, situate in the articulations of the foot. It has, also, been used in a more extensive signification synonymously with *gout*.

Podagra Aberrans, Gout, (wandering) — p. Arthritis, Gout — p. Retrograda, Gout, (retrograde.)

PODAGRARIA, Ligusticum podagraria — p. Ægopodium, Ligusticum podagraria.

PODAG'RIC, *Podag'rical*, (ποδαγρικος,) *Podag'ricus*, *Arthrit'icus*, *Arthrit'ic*, *Gout'y*, (F.) *Goutteux*. Relating or belonging to gout. Affected with, or liable to gout.

PODAGRISM, see Diathesis.

PODALGIA, (ποδαλγια, from *podo*, and *αλγος*, 'pain.') Pain in the foot. Gout, Podagra.

PODALIC, Pedal—p. Version, see Turning.

PODALIRIA TINCTORIA, (after Podalirius, son of Æsculapius,) Sophora tinctoria.

PODANENCEPHALIA, see Podencephalus.

PODARTHRITIS, Podagra.

PODARTHROC'ACE, (*podo*, *αρθρον*, 'an articulation,' and *κακος*, 'bad.') Caries of the articulation of the foot.

PODELCO'MA, *Podelko'ma*, (*podo*, and *ἑλκωμα*, 'an ulcer.') A peculiar ulcerous affection of the foot, described by Prof. Miller, of Edinburgh, which is but little amenable to treatment; and which has been likewise called *Mor'bus tuberculo'sus pe'dis*.

PODENCEPHALIA, see Podencephalus.

PODENCEPH'ALUS, *Podanenceph'alus*, (*podo*, and *κεφαλη*, 'the head.') A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull. This state of monstrosity is termed *Podanencepha'lia*, or more properly, *Podencepha'lia*.

PODEX, (gen. *Po'dicis*,) Anus, Nates.

PODO, (πους, gen. ποδος, 'a foot,) in composition, foot.

PODODYN'IA, (*podo*, and *οδυνη*, 'pain.') Pain in the soles of the feet induced by long standing, as in cutters of garments, &c.

PODŒDE'MA, gen. *Podœde'matis*, (*podo*, and *οιδημα*, 'a swelling.') Œdema of the foot.

PODOL'OGY, *Podolog''ia*, (*podo*, and *λογος*, 'a discourse.') A description of the foot. A treatise on the foot.

PODOPHYL'LUM MONTA'NUM, *Moun'tain May'apple*, *Man'drake*, *Wild Lem'on*, *Ducks'foot*, *Raccoon' Ber'ry*, *Yel'low Ber'ry*, *Ground Lem'on*, *Ord.* Berberidaceæ, *Sex. Syst.* Polyandria Monogynia, (*podo*, and *φυλλον*, 'a leaf,' in reference to the shape of the leaf,) has the same properties as

Podophyllum Pelta'tum, *Podophyl'lum*, *Anapodophyl'lum Canadense*, *Mayapple*, *Mandrake*. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum* (Ph. U. S.), is purgative in the dose of 20 grains. It has, also, been used as an anthelmintic. *Podophyll'lin*, obtained by evaporating an alcoholic solution of the root, or by displacement by alcohol, throwing down the precipitate by water, and drying — *Resi'na Podophyl'li* — is an excellent purgative in the dose of 10 grains, and a laxative in the dose of a grain or more. See Resina Podophylli.

PODORRHEUMA, (*podo*, and *ῥευμα*, 'a defluxion,') Podagra.

PODOTHE'CA, (*podo*, and *θηκη*, 'a receptacle, a sheath.') The cuticle of the foot. An anatomical preparation. *Chirothe'ca* has been used for the cuticle of the hand.

PŒCILIA, (ποικιλια, 'a variegated appearance,') see Achroma.

POÊLETTE, Cup, *Palette*.

POE'PHAGUS, (*ποη* or *ποα*, 'a plant, an herb,' and *φαγω*, 'I eat.') One who subsists on herbs or vegetables. The act of subsisting or feeding on herbs or vegetables is called *Poëphag''ia*. Hence Strabo calls the Irish ποηφαγοι.

POGON, (πωγων,) Beard.

POGONI'ASIS, *Pogo'nia*, (from *pogon*.) A female beard. Also, great strength or quantity of beard. A female having a beard — *Vira'go*.

POGO'NIUM, (πωγωνιον, dim. of *pogon*.) A weak or small beard.

POGONOL'OGY, *Pogonolog''ia*, (*pogon*, and *λογος*, 'a description.') A description of, or treatise on, the beard.

POGOSTEMON INTERMEDIUS, (*pogon*, and *στημων*, 'a stamen,') P. Patchouli.

Pogoste'mon Patchouli, *P. Sua'vis* seu *interme'dius*, *Pucha-Pat*, *Patchouli*. *Nat. Ord.* Labiatæ. Native of Penang and the Malayan peninsula. The herb is used as a perfume. The distilled oil is used for the same purpose.

Pogostemon Suavis, P. Patchouli.

POHON ANTIAR, Upas — p. Upas, Upas.

POI. A favorite aliment in the Sandwich Islands. It is a sort of paste made from the root of the Kalo — *Arum esculen'tum*.

POIDS ET MÉSURES, (from [L.] *pondus*, 'a weight,') Weights and measures.

POIGNÉE, (from [L.] *pugnus*, 'the fist,') Manipulus.

POIGNET, Carpus.

POIL, [L.] (*pilus*, 'a hair,') Galactoccle, Hair.

POILETTE, Cup.

POILS, (pl. of *poil*,) see Typha latifolia.

POING, [L.] (*pugnus*,) Fist.

POINT, (from *pungere*, *punctum*, 'to prick,') Puncta, Stitch

Point, Blis'tering. A name given by Dr. Rush to an indeterminate period in the course of a continued fever, intermediate between the stages of high excitement and collapse, in which blisters will — he thought — usually produce unequivocally good effects.

POINT DE COTÉ, 'stitch of the side,' Pleurodynia.

POINT, VITAL, see Centrum vitale.

POINTING OF AN ABSCESS, see Suppuration.

POINTS LACRYMAUX, Lacrymalia puncta.

POIRE, see Pyrus communis.

POIRÉ, see Cider.

POIREAU, (*porrum*, 'a leek,') Allium porrum, Verruca.

POIRIER, ([L.] *pyrus*,) Pyrus communis.

POIS, Pisum—*p. à Cautère*, see Fonticulus—*p. Chiche*, Cicer arietinum—*p. Cultivé*, Pisum—*p. à Gratter*, Dolichos pruriens—*p. Patate*, Dolichos tuberosus.

POI'SON, *Phar'macon*, *Phar'macum*, *Tox'icum*, *Vene'num*, *Vi'rus*, *Delete'rium*, *Venena'tion*, (F.) *Poison*. A generic name for all substances which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of organs. Hence we speak of *fever poison*, *cholera poison*, &c. Poisons exist in the three kingdoms of nature; but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c.; whilst those that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. ACRID, IR'RITATING, CORRO'SIVE, or ESCHAROT'IC, as the concentrated acids and alkalies; mercurial, arsenical, cupreous, and antimonial compounds, cantharides, &c. 2. NARCOT'IC, those that act particularly upon the brain; as hyoscyamus, opium, &c., but without inflaming the organ with which they come in contact. 3. NARCOT'ICOÂCRID or ACRONARCOT'IC; those that act on the brain, or spinal marrow or both, but, at the same time, irritate the parts to which they are applied; as aconite, belladonna, &c. 4. SEP'TIC or PUTRES'CENT; those furnished by the animal kingdom. See Venom and Virus. Various classifications, of a similar character, have been recommended by different toxicologists; but they are liable to the objection, that they throw substances together whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them in all such arrangements.

The classification of Dr. A. S. Taylor is as follows:

IRRITANTS	MINERAL	Non-metallic	Acids, Alkalies, and their Salts.
			Metalloids.
		Metallic	(Arsenic).
	VEGETABLE		(Savin).
	ANIMAL		(Cantharides).
NEUROTICS	CEREBEAL		(Morphia).
	SPINAL		(Strychnia).
	CEREBRO-SPINAL		(Conia, Aconitia).

The accurate investigations of modern chemistry, by separating the active alkaloids of different vegetables, have furnished numerous agents for poisoning; and, hence, deaths from morphia and strychnia have repeatedly become subjects of medicolegal inquiry in courts of justice. Like investigations have facilitated the discovery of many toxical substances after death in the contents of the alimentary canal and elsewhere; although the failure of such discovery may not be a positive evidence that no such poison was administered, as it may have been rejected by vomiting; or, if sufficient time has elapsed, may have been eliminated in some other manner.

One of the most astonishing of tests is that by spectrum analysis, which, in certain cases, is capable of detecting the most inconceivably minute portions of a metal,—in one instance the 195,000,000 part of a grain. See Spectrum analysis.

The following table, which exhibits a *coup d'œil* of the chief poisons, with many of the circumstances of importance connected with them, is not free from the objections above stated

TABLE OF THE CHIEF POISONS.

N.B. In all cases the Stomach Pump should be used as soon as possible.

I. INORGANIC POISONS.

Poisons.	Symptoms.	Treatment.	Tests.
ACIDS. *Acetic Acid.* *Citric Acid.* *Muriatic Acid.* *Nitric Acid.* *Sulphuric Acid.* *Tartaric Acid.* *Oxalic Acid.*	The acids, generally, are strong corrosive poisons. Sour, acrid taste, burning in the throat, which is increased by pressure, swallowing, or coughing; eructation, and excruciating pain in the stomach; more or less corrugation of the lining membranes of the mouth and primæ viæ; excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black.	The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions: for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk, on account of the great heat which is produced by their mixture. Subsequent inflammation to be treated by ordinary means. The carbonates of the alkalies and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach. Ammonia is an antidote; but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold *douche* to the head has been recommended.	*Sulphuric acid* is known by a white precipitate with any salt of baryta, insoluble in nitric acid. *Muriatic acid* is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light. *Nitric acid* gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid. *Acetic acid* exhales the odour of vinegar. *Citric acid* blackens when heated. *Tartaric acid* precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water. *Oxalic acid* gives a white precipitate with lime-water, which, when heated, is converted into carbonate of lime.
Prussic Acid. *Oil of Bitter Almonds.* *Laurel Water.*	Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contractile pupil; convulsions, death.		*Prussic acid* exhales the odour of peach kernels; forms a white precipitate with nitrate of silver neutralized with an alkali, gives a blue precipitate with the persalts of iron.
ALKALIES and their SALTS. Ammonia, *Strong Liquor* or *Water of.* *Muriate of Ammonia* or *Sal Ammoniac.* Potassa. *Caustic Potassa*, and *Liquor Potassæ.*	Violent, caustic, acrid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hiccough; violent colic pains, with purging of bloody stools and membranous flakes; death.	The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalies and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalies, and therefore destroy their caustic effects.	The alkalies are known by their action on turmeric paper: restoring the colour of litmus, which has been reddened by an acid. Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper. Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime.
Carbonate of Potassa, or *Pearl Ash*, and *Salt of Tartar.* *Nitrate of Potassa* or *Saltpetre.* *Sulphuret of Potassium* or *Liver of Sulphur.* Soda.	The nitrate of potassa will not manifest the effect with turmeric paper. The carbonates, when vomited, will effervesce with acids; and the liver of sulphur will give rise to eructations of sulphuretted hydrogen.	Poisoning by nitrate of potassa to be treated on general antiphlogistic principles; mucilaginous drinks. Liver of sulphur is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.	Nitrate of potassa decrepitates and deflagrates when thrown on hot coals. Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.
EARTHS and COMPOUNDS. Baryta. *Carbonate of Baryta.* *Chloride of Barium.* *Nitrate of Baryta.* Lime.	Analogous to those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhœa; excessive muscular debility, headache, convulsions, death. Lime differs from baryta in being a pure irritant.	The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid, in soda-water, effervescing draught or yeast, it is supposed, would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state.	Baryta and its salts invariably give a white precipitate, insoluble in acid, with a soluble sulphate. Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid or a soluble carbonate. The same of baryta.

Poisons.	Symptoms.	Treatment.	Tests.
ALCOHOL. *Brandy, Wines, and all Spirituous Liquors.*	Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.	A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water; and large and active glysters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.	
VOLATILE OILS. *Creasote.* *Dippel's Animal Oil.* *Oil of Tar.* *Oil of Tobacco.* *Oil of Turpentine.* *Fusel Oil.*	General action, that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.	Creasote is immediately coagulated by albumen Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.	No better mode of recognizing these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creasote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known; and fusel oil has a peculiar, offensive, suffocating odour.
GASES. *Carbonic Acid, or Fixed Air.* *Carbonic Oxide.* *Fumes of Burning Charcoal.* *Chlorine.* *Sulphuretted Hydrogen.*	Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons, in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy, or narcotic poisoning.	The antidotes to chlorine are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration. In poisoning by chlorine, ether may be cautiously inhaled.	Chlorine is recognized by its peculiar odour and bleaching properties. Sulphuretted hydrogen, by its fetid smell, and the rapid blackening of lead. Carbonic acid, by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.
IODINE. *Iodide of Potassium.*	Irritant symptoms; burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.	Iodine combines with starch, and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment.	Iodine is known by its odour, and the formation of a blue precipitate, when brought in contact with a cold solution of starch Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.
METALS. ANTIMONY. *Tartar Emetic.* *Chlorides, or Butter of Antimony.* *Oxids of Antimony.*	Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.	If vomiting have not been produced, it should be brought about by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly; powdered yellow bark may be used, until the infusion is prepared.	Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalies produce white precipitates. The chloride is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which redden litmus. It may also be converted into chloride, and then precipitated by adding water.

Poisons.	Symptoms.	Treatment.	Tests.
Arsenic. *Arsenious Acid*, or *White Arsenic.* *Orpiment*, or *Yellow Sulphuret of Arsenic.* *King's Yellow.* *Realgar*, or *Red Sulphuret of Arsenic.* *Fly Powder.* *Fowler's Solution.* *Arsenical Paste.* *Arsenical Soap.* *Arsenite of Copper, Scheele's Green.*	Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching: vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited, greenish or yellowish, sometimes streaked with blood; diarrhœa; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.	The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the *white arsenic* has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water, in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated. Magnesia, freshly precipitated or not too highly calcined has been used with advantage in arsenious acid poisoning.	If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with, 1st. Ammoniaco-sulphate of copper. 2d. Ammoniaconitrate of silver. (*Hume's Test*) 3d. Sulphuretted hydrogen gas The first will produce a *green* precipitate; second, a *pale yellow* precipitate; third, a *bright yellow* precipitate, if arsenic be present. A portion of the powder, or one of these precipitates, carefully and thoroughly dried, is then to be mixed with charcoal and exsiccated carbonate of soda, to be placed in a small glass tube, closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube, forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre. If organic matter be present, it must be entirely destroyed, by heating the substance with nitro-muriatic acid. After this has been done, and a clear, transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is deoxidized, and the metallic arsenic, thereby obtained, combining with hydrogen, forms arseniuretted hydrogen gas. (*Marsh's Test.*) Add to a suspected solution a few drops of pure chlorohydric acid, and place in it a slip of bright copper; no change occurs until the liquid is brought to the boiling point, when, if arsenic be present, even in small quantity, the copper acquires an irongray coating, from the deposit of that metal. Remove the slip of copper; wash it in water, dry it and gradually heat it in a reduction tube, when arsenious acid will be sublimed in minute octohedral crystals. The test succeeds with powdered arsenic, the arsenites, arsenic acid, the arseniates, and orpiment. It will even separate the arsenic from arsenite of copper, and from common lead shot. *Reinsch's Test.*
Bismuth. *Nitrate of Bismuth.* *Pearl Powder.* *Oxide of Bismuth.*	Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hiccough, disagreeable metallic taste; vomiting; cramps; delirium: death.	Milk, and sweet mucilaginous drinks are recommended. Leeches, general bleeding; glysters; fomentations to be employed on the general principles of treatment for inflammatory symptoms.	Bismuth is known by the formation of a white precipitate, when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.
Copper. *Sulphate of Copper Blue Vitriol.* *Acetate of Copper, Verdigris.* *Carbonate of Copper, Blue Verditer.* *Arsenite of Copper Scheele's Green.* *Food cooked in dirty copper vessels*, or *pickles made green by copper.*	Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility.	Albumen to be administered in either of its forms which can be most readily obtained, as milk or whites of eggs. Vinegar should *not* be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.	The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron. A more delicate test than the ammonia is the ferrocyanide of potassium, which gives a brown precipitate with copper salts.

Poisons.	Symptoms.	Treatment.	Tests.
Gold. *Chloride of Gold.* *Fulminating Gold.*	Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.	The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.	Chloride of gold is very readily decomposed, and the gold separated in a metallic state. Protosulphate of iron, nitrate of silver and protochloride of tin, all answer this purpose. The precipitated powder will be found insoluble, except in nitromuriatic acid.
Iron. *Sulphate of Iron, Copperas, Green Vitriol.* *Chloride of Iron.*	Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin, and feebleness of the pulse.	Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.	Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with ferrocyanide of potassium; and a greenish or reddish precipitate, with the free alkalies or their carbonates.
Lead. *Acetate of Lead, Sugar of Lead.* *Carbonate of Lead, White Lead.* *Red Oxide, or Red Lead.* *Litharge.* *Wines sweetened by Lead.* *Water which has been kept in Leaden vessels.* *Acid food, cooked, or left standing in vessels glazed with Lead.*	Irritation of the alimentary canal; spasm; nervous symptoms; paralysis, either partial or complete. When taken for some time, in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities.	Sulphate of magnesia and phosphate of Soda are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form, or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis, and iodide of potassium for the chronic form generally.	Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and iodide of potassium occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid and the dilute solution be tested as above.
Mercury. *Corrosive Sublimate.* *Cyanide of Mercury.* *Nitrate of Mercury.* *White Precipitate.* *Red Oxide, or Red Precipitate.* *Sulphate, or Turbith Mineral.* *Vermilion, or Red Sulphuret.*	Violent symptoms of irritant poisoning; harsh metallic astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs, and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze; stupor, convulsions and death.	Albumen, in some form, must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold, finely mixed in dust, with fine iron filings. The iron in filings or in powder—*ferri pulvis*—has been given enclosed in gold leaf. In the chronic form iodide of potassium has been given.	The free alkalies differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. If a drop of the solution be placed on a piece of gold, and touched with a knife or key, the mercury will be reduced, which amalgamates with the gold, producing a white spot. Protochloride of tin is the best liquid test. It gives a grayish precipitate. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda, when the metallic mercury will sublime, and may be collected in a globule.
Silver. *Nitrate of Silver, or Lunar Caustic.*	Those of other irritant poisons.	Chloride of sodium, or common salt, immediately decomposes this substance, and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.	Nitrate of silver is distinguished by the formation of a white precipitate, insoluble in nitric acid, with chloride of sodium; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding chloride of sodium to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.
Tin. *Chloride of Tin Solution of Tin, used by Dyers.* *Oxide of Tin, or Putty Powder.*	The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.	Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.	The chloride precipitates vegetable colouring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalies; with sulphuretted hydrogen gas, a brown precipitate.
Zinc. *Sulphate of Zinc, White Vitriol.* *Acetate of Zinc.*	Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.	The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.	A white precipitate is thrown down by the free alkalies from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate, but only in neutral or alkaline solutions. Sulphohydrate of ammonia is better.

Poisons.	Symptoms.	Treatment.	Tests.
PHOSPHORUS.	Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhœa, tenderness and tension of the abdomen.	An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms.	Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour.
GLASS or ENAMEL.	If taken in very coarse powder, it produces irritation and inflammation of the bowels.	Large quantities of crumb of bread should be eaten, to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.	

II. ORGANIC POISONS.

1. VEGETABLE POISONS.

Poisons.	Symptoms.	Treatment.
IRRITANT. Anemone *pulsatilla*. Wind Flower. Arum *maculatum*. Wake Robin. Bryonia *dioica*. Bryony. Caladium *seguinium*. Dumbcane. Calla *palustris*. Water Arum. Caltha *palustris*. Marsh Marigold. Chelidonium *majus*. Celandine. Clematis *vitalba*. Virgin Bower. Convolvulus *jalapa*. Jalap. Convolvulus *scammonia*. Scammony. Croton *tiglium*. Purging Croton. Cucumis *colocynthis*. Colocynth. Cyclamen *Europæum*. Sow Bread. Daphne *gnidium*. Spurge Flax. Daphne *mezereum*. Mezereon. Delphinium *staphisagria*. Stavesacre. Dioica *palustris*. Swamp leather-wood. Equisetum *hyemale*. Scourgrass. Euphorbia *officinarum*. Euphorbium. Spurge. Gratiola *officinalis*. Hedge Hyssop. Hippomane *mancinella*. Manchineel. Hura *crepitans*. Sand Box. Hydrocotyle *vulgaris*. Marsh Pennywort. Jatropha *curcas*. Indian Nut. Jatropha *manihot*. Cassada. Juniperus *sabina*. Savin (oil of). Juniperus *Virginiana*. Red Cedar (oil of.) Momordica *elaterium*. Squirting Cucumber. Narcissus *pseudo-narcissus*. Daffodil. Pastinax *sativa*. Common Parsnep. Pedicularis *palustris*. Marsh Lousewort. Phytolacca *decandra*. Poke. Piper *cubeba*. Cubebs. Plumbago *Europæa*. Toothwort. Ranunculus *acris*, and other species. Crowfoot. Rhododendron *chrysanthemum*. Oleander. Ricinus *communis*. Castor Oil Plant. Sambucus *ebulus*. Elder. Sedum *acre*. Stone Crop. Stalagmitis *cambogioides*. Gamboge. Tanacetum *vulgare*. Tansy (oil of.) ACRO-NARCOTIC. Æthusa *cynapium*. Common Fool's Parsley. Aconitum *napellus*. Monkshood. Agaricus, five species. Mushrooms (poisonous). Amanita *muscaria*. Truffles (poisonous). Anagallis *arvensis*. Meadow Pimpernel. Anda *Gomesii*. Apocynum *androsæmifolium*. Dogsbane. Aristolochia *clematitis*. Birthwort. Arnica *montana*. Leopard's bane. Asclepias *Syriaca*. Swallowwort. Atropa *belladonna*. Deadly Night Shade. Æsculus *Ohioensis*. Buckeye. Brucea *antidysenterica*. False Angustura Bark. Cerbera, three species. Cerbera. Chærophyllum *sylvestre*. Bastard Hemlock.	The general effects of this class of vegetable poisons are; — an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death; the pulse becomes slow and loses its force, and death closes the scene. If applied externally, many of them produce violent inflammation of the skin, with vesications or eruptions of pustules.	If vomiting have been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is got rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters, may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated upon general principles. The fruit of Fevillea Cordifolia has been recommended as a powerful antidote against vegetable poisons; (?) it is to be used in as recent a state as possible. N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally, and so are tannic acid and animal charcoal.

Irritant Poisons.	Symptoms.	Treatment.
Chaillotia *toxicana*. Ratbane. Chenopodium *murale*. Wormseed. Cicuta *maculata*. American Hemlock. Cicuta *virosa*. Water Hemlock. Cissus. Cissus. Cocculus *Indicus*. Fish berries. Colchicum *autumnale*. Meadow saffron. Conium *maculatum*. Hemlock. Coriaria *myrtifolia*. Myrtle-leaved Sumach. Curare. Indian War Poison. Cynanchum *erectum*. Cynanchum. Cytisus *laburnum*. Laburnum. Datura *stramonium*. Thorn Apple. Digitalis *purpurea*. Foxglove. Ergot. See *Secale*. Ervum *ervilia*. Bitter Vetch. Gaultheria *procumbens*. Wintergreen (oil of). Hæmanthus *toxicarius*. Helleborus *niger*. Black Hellebore. Hypophyllum *sanguinaria*. Paddock Stool. Ipecacuanha. Ipecacuanha. Lathyrus *cicera*. Lathyrus. Laurus *camphora*. Camphor. Lobelia *inflata*. Indian Tobacco. Lolium *temulentum*. Darnel. Melia *azederach*. Pride of China. Mercurialis *perennis*. Mountain Mercury. Nerum *oleander*. Common Oleander. Nicotiana *tabacum*. Tobacco. Œnanthe *crocata*. Hemlock Dropwort. Passiflora *quadrangularis*. Barbadine. Physostigma *venenosum*, Calabar bean. Piscidia *erythrina*. Jamaica Dogwood. Polygala *venenosa* (of Java). Rhus *radicans*. Poison Vine. Rhus *toxicodendron*. Poison Oak. Robinia *pseudo-acacia*. Locust Tree. Ruta *graveolens*. Rue. Sanguinaria *Canadensis*. Blood Root. Scilla *maritima*. Squill. Sea Onion. Secale *cornutum*. Ergot. Spurred Rye. Sium *latifolium*. Procumbent Water Parsnep. Spigelia *Marilandica*. Pink Root. Strychnos *Ignatii*. St. Ignatius's Bean. Strychnos *nux vomica*. Nux vomica. Symplocarpus *fœtida*. Skunk Cabbage. Ticunas. Extract of various plants—South America. Tieuté. *Upas Tieuté*. Tree of Java. Triticum *Hybernum*. Wheat (diseased.) Upas *antiar*. Tree in Java. Veratrum *album*. White Hellebore. Veratrum *viride*. American Hellebore. Woorara. War Poison of Guiana. Zea *mays*. Maize (diseased).	The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.	The stomach to be effectually evacuated by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison; and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given *before* the poison is expelled, and it is desirable that but little fluid of any kind should be administered. N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally. Electromagnetism has been found efficacious in the drowsiness and sleep of narcotic poisoning. Where myositic narcotic poisons, as opium, have been taken, mydriatics, as belladonna and stramonium, have been recommended; and conversely.
NARCOTIC. Actæa *spicata*. Baneberry. Amygdalus *communis*. Bitter Almond. Amygdalus *Persica*. Peach. Gelseminum *nitidum*. Yellow Jessamine. Helonias *erythrosperma*. Fly Poison. Hyoscyamus *albus*. White Henbane. Hyoscyamus *niger*. Black Henbane. Kalmia *latifolia*. Mountain Ivy. Lactuca *virosa*. Strong-scented Lettuce. Opium, and its proximate principles. Papaver *somniferum*. Poppy. Paris *quadrifolia*. Herb Paris. Prunus *Caroliniana*. Wild Orange. Prunus *lauro-cerasus*. Cherry Laurel. Prunus *nigra*. Black Cherry. Prunus *padus*. Cluster Cherry. Prunus *Virginiana*. Wild Cherry. Solanum *dulcamara*. Bitter-sweet. Sorbus *acuparia*. Mountain Ash. Taxus *baccata*. Yew.		
POISONOUS MUSHROOMS. Agaricus *muscarius*. Fly Agaric. Agaricus *piperatus*. Pepper Agaric. Agaricus *necator*. Deadly Agaric. Agaricus *bulbosus*. Bulbous Agaric. Agaricus *chantarellus*. Champignon.	Nausea, heat, and pain in the stomach and bowels, with vomiting and purging, thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated	The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glysters. After the poison is evacuated, ether may be administered, with small

Poisons.	Symptoms.	Treatment.
	pupil, and stupor; cold sweats, and death. Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour, or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly.	quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to.

2. ANIMAL POISONS.

	Symptoms.	Treatment.
POISONOUS FISH. Balistes *monoceros*. Old wife. Cancer *astacus*. Crawfish. Cancer *ruricolus*. Land Crab. Clupea *thryssa*. Yellow-billed Sprat. Coracinus *fuscus major*. Gray Snapper. Coracinus *minor*. Hyne. Coryphæna *splendens*. Dolphin. Mormyra. Blue Parrot Fish. Muræna *major*. Conger Eel. Mytilus *edulis*. Mussel. Ostracion *globellum*. Smooth Bottle Fish. Perca *major*. Barracuda. Perca *venenosa*. Grooper. Perca *venenata*. Rock Fish. Physalia. Portuguese Man of War. Scomber *cæruleus*. Spanish Mackerel. Scomber *maximus*. King Fish. Scomber *thynnus*. Bonetta. Sparus *chrysops*. Porgee. Tetrodon *scleratus*. Tunny. Tetrodon *ocellatus*. Blower.	In an hour or two, or often in a much shorter time, after the fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria), and in many cases death.	An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasm ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.
POISONOUS SERPENTS. Boa *crotaloides*. Copperhead. Cenchris *mockeson*. Mockeson. Cerastes *nasicornis*. Horned Viper of Western Africa. Coluber *berus*. Viper. Coluber *prester*. Black Viper. Crotalus. (5 species) Rattle Snake. Scytale *piscivorus*. Water Viper.	A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintings, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death.	A cupping-glass to be applied over the wound, or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn, to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tanjore Pill, has been strongly recommended, and, also, Bibron's antidote.
CANTHARIS VESICATORIA. Spanish, or Blistering Fly. Lytta *vittata*. Potato Fly.	Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody, with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death.	Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment. Camphor dissolved in oil may be rubbed over the belly and the thighs.
VENOMOUS INSECTS Tarantula. Scorpio. Scorpion. Vespa *crabro*. Hornet. Vespa *vulgaris*. Wasp. Apis *mellifica*. Bee. Culex *pipiens*. Gnat. Œstrus *bovis*. Gad-fly.	In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.	Hartshorn and oil may be rubbed on the affected part, and a piece of rag, moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key.

	Symptoms.	Treatment.
SALIVA OF THE RABID DOG.	At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.	Hydrophobia is more easily prevented than cured; indeed, it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success. The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or be washed with it as long as it will bleed, and, after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulation. No milder discipline can ensure safety.

The most energetic poisons are used therapeutically, and often with considerable advantage. They have, of course, to be administered in extremely small doses, to avoid producing true poisoning.

POIS'ONING, *Venefic''ium, Toxica'tio, Intoxica'tio, Entoxis'mus, Entoxicis'mus, Pharmacei'a, Malefic''ium, Venena'tion*, (F.) *Empoisonnement, Intoxication*. The art of applying a poisonous substance to any of the textures in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned the patient. The term is, however, generally restricted to poisoning by design.

Poisoning has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follow the use of substances that are generally innoxious. Overloading the stomach with indigestible food, has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed *poisoning*.

Secret poisoning was, at one time, practised as an art. It consisted in administering medicines, which should act as *slow poisons*, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

POISONING, CROWD, Ochlesis.

POLITOBIOTHERAPIA, (*πολιτη*, 'a citizen,' *βιος*, 'life,' and *θεραπεια*, 'medical treatment,') Police, medical.

POLIUM CAPITATUM, (*πολιος*, 'gray, whitish,') Teucrium capitatum—p. Creticum, Teucrium Creticum—p. Montanum, Teucrium capitatum.

POLL, ([D.] Bol,) Head.

POL'LEN, gen. *Pol'linis, Pol'lis,* (*παλη*, 'dust.') The fecundating dust contained in the anthers of flowers, which is dispersed on the stigma. It is conveyed to the ovary through the stigma by the *Pollen tube, Tu'bus pollin'icus,* (F.) *Boyau Pollinique.*

POL'LEX, gen. *Pol'licis, An'ticheir, Prom'anus, Dig''itus pri'mus* seu *mag'nus, Al'lus pollex, Thumb,* (Prov.) *Thame,* (from *pollere,* 'to have much strength.') (F.) *Pouce.* The first of the fingers in size and strength. It is asserted that the term *poltroon* is derived from *pol'licĕ trunca'to;*—the Romans who were desirous of being exempted from military service being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

POLLEX, see Digitus.

POLLEX PE'DIS, *Hallus, Hallux.* The great toe. (Prov.) Tomtoe.

POLLINC'TOR, *Pollinc'ter,* (*pollingere, pollinctum,* 'to lay out a corpse.') In antiquity, an anointer, dresser, or embalmer of the dead.

POLLINCTURA, Embalming.

POLLIS, Pollen.

POLLOCK, see Oleum jecoris aselli.

POLLOD'IC, *Pollod'icus,* (*πολυς*, 'many,' and *'οδος*, 'a way.') An epithet proposed by Dr. Marshall Hall for a course of nervous action proceeding from one point, in many directions, to every other.

POLLOM, LITTLE, Polygala paucifolia.

POLLU'TION, *Pollu'tio,* (*polluo, pollutum,* 'to profane.') The excretion of the seminal liquor or sperm, or the production of orgasm in male or female, at other times than during coition. When occasioned by a voluntary act, it is called simply *Pollution* or *Masturba'tion,* (F.) *Souillure;* when excited during sleep, by lascivious dreams, it takes the name *Noctur'nal pollution, Exoneiro'sis, Oneirog'mos, Oneirog'onos, Oneirogonorrhœ'a, Exoneirog'mus, Spermatoclem'ma, Spermatoclep'sis, Spermatolep'sis, Spermatolip'sis, Gonorrhœ'a dormien'tium* seu *oneirog'onos* seu *ve'ra* seu *libidino'sa, Proflu'vium sem'inis, Spermatorrha'a, Paronir'ia sa'lax, Night pollution,* (F.) *Pollution involontaire.*

POLLUTION INVOLONTAIRE, Pollution—p. Nocturnal, Pollution—p. Self, Masturbation—p. Voluntary, Masturbation.

POLONYCH'IA, *Polyonych'ia,* (*poly,* and *ονυξ*, gen. *ονυχος*, 'a nail.') The condition of having supernumerary nails,—a rare congenital monstrosity.

POLTFOOT, see Kyllosis.

POLY, *Polys,* (*πολυς*,) 'many, much, full,' in composition:

POLYACTIUM TRISTE, Pelargonium triste.

POLYÆMATUS, (*πολυαιματος*,) Plethoric.

POLYÆMIA, (*πολυαιμια*, from *poly,* and *αιμα*, 'blood,') Plethora.

POLYÆMIC, Plethoric.

POLYÆMICUS, Plethoric.

POLYANHÆMIA, Anæmia.

POLYANHÉMIE, Anæmia.

POLYBLEN'NIA, (*poly,* and *βλεννα*, 'mucus.') Excessive secretion of mucus.

POLYBRA'CHIA, (*poly,* and *βραχιων*, 'an arm.') A monstrosity characterized by one or more supernumerary arms.

POLYBREPHIA, (*poly,* and *βρεφος*, 'a fœtus, a child,') Pregnancy, compound.

POLYCARP'Æ, (*poly,* and *καρπος*, 'fruit.') A division of cutaneous diseases of the family Eczematosen, of Fuchs, including Psoriasis, Lichen, Herpes, and Impetigo.

POLY'CERAS, (*poly,* and *κερας*, 'horn.') A monstrous animal having many horns.

POLYCHOL'IA, *Perichol'ia, Hyperchol'ia,* (*poly,* and *χολη*, 'bile.') Superabundance of bile; such as is supposed to exist in bilious fevers.

POLYCHREST'US, (*poly,* and *χρηστος*, 'useful.') Having many virtues. An ancient name for certain medicines considered to be useful in many diseases.

POLYCHRONIUS, (*poly,* and *χρονος*, 'time,') Chronic.

POLYCHY'LIA, (*poly,* and *χυλος*, 'juice,') *Polychy'mia.* Fulness of juices.

POLYCHYMIA, Polychylia—p. Sanguinea, Plethora.

POLYCLIN'ICA, (*poly,* and *κλινη*, 'bed.') Provided with many beds;—as an hospital.

POLYCOR'IA, (*poly,* and *κορη*, 'pupil.') The state in which there is more than one pupil.

POLYCRINOSES, (*poly, κρινω*, 'to separate,' and *osis,*) see Profluvium.

POLYCYE'SIA, *Polycye'sis,* (*poly,* and *κυησις*, 'pregnancy.') Frequent or quickly recurring pregnancies: also, compound pregnancy.

POLYCYTHÆ'MIA, (*poly, κυτος*, 'a cell,' and *αιμα*, 'blood.') A condition of the blood in which there is an increase of the red corpuscles.

POLYDAC'TYLUS, *Perissodac'tylus,* (*πολυδακτυλος*, from *poly,* and *δακτυλος*, 'a finger.') One who has a supernumerary finger or fingers, or toes.

POLYDIP'SIA, (*poly,* and *διψη*, 'thirst;') *Si'tis morbo'sa* seu *inten'sa, Polypo'sia, Dipso'sis a'vens, Excessive thirst,* (F.) *Soif excessive.* A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c., and is so much a part of diabetes, that it has been called Polydipsia.

POLYG'ALA, (*πολυγαλον*, from *poly,* and *γαλα*, 'milk;') *P. vulga'ris, Com'mon Milk'wort. Ord.* Polygalaceæ. *Sex. Syst.* Diadelphia Octandria. The leaves are bitter, and are used in the same cases as the Polygala amara.

POLYGALA AMA'RA, *P. amarel'la* seu *vulga'ris, Bit'ter Milk'wort.* A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubel'la,* or *Bit'ter Polyg'ala* of the United States, has the same virtues.

POLYGALA AMARELLA, P. amara—p. Bitter, see P. amara—p. Grandiflora, P. senega.

POLYGALA PAUCIFO'LIA, *Triclisper'ma grandiflo'ra, Dwarf Milk'wort, Little Pol'lom, Ev'ergreen Snake'root,* (F.) *Polygale naine,* possesses the same properties as P. Senega.

POLYGALA RUBELLA, see Polygala amara.

POLYGALA SEN'EGA, *P. Virginia'na* seu *grandiflo'ra. Sen'eka, Rat'tlesnake Milk'wort, Sen'ega,* or *Rattlesnake root,* (F.) *Polygale de Virginie* ou

de Seneka. The bark is the active part of the root, *Senega* (Ph. U. S.). Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake, and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Peschier, it contains three principles, *Pol'ygalin* or *Sen'egin*, *Isol'usin*, and *Pol'ygalic Acid*. Dose, gr. 30 to 40 of the powder.

Polygala Serpenta'ria. A shrub of Caffraria, the root of which is considered by the natives as a sure antidote against the bites of venomous serpents.

Polygala Virginiana, P. senega—p. Vulgaris, P. amara.

POLYGALAC'TIA, *Polyga'lia*, (*poly*, and γαλα, gen. γαλακτος, 'milk.') Superabundant secretion of milk; galactia.

POLYGALE NAINE, Polygala paucifolia—*p. de Virginie*, Polygala Virginiana.

POLYGALIA, Polygalactia.

POLYGALIN, see Polygala senega.

POLYGONATUM, (πολυγονατον, from *poly*, and γονυ, 'a knee or joint,') Convallaria polygonatum—p. Anceps, Convallaria polygonatum—p. Caniculatum, Convallaria canaliculata—p. Latifolium, Convallaria canaliculata—p. Multiflorum, Convallaria multiflora—p. Pubescens, Convallaria pubescens—p. Uniflorum, Convallaria polygonatum—p. Vulgare, Convallaria polygonatum.

POLYGONIA, (πολυγονια, from *poly*, and γενναω, 'to produce,') Fecundity.

POLYGONIUS, (πολυγωνιος,) Polygonus.

POLYG'ONUM, (πολυγονον,) *P. avicula're*, (from *poly*, and γονυ, 'a knee or joint,') *P. centino'dium* seu *erec'tum*, *Centino'dia*, *Centumno'dia*, *Sanguina'lis Corig'iola*, *Sanguina'ria*, *Knot'grass*, *Knot'weed*, *Bind'weed*, *Door'weed*, (F.) *Renouée*, *Trainasse*, *Centinode*. *Ord.* Polygonaceæ. *Sex. Syst.* Octandria Trigynia. This grass is said to be a feeble astringent.

Polygonum Acre, P. hydropiper.

Polygonum Amphib'ium, *P. coccin'eum*, *Wa'ter Persica'ria*, of Europe and this country. The roots have been used like sarsaparilla, especially in diseases of the skin.

Polygonum Bistor'ta, *P. bistortoï'des*, *Bistor'ta*, *Colubri'na*, *Offic''inal Bis'tort*, *Great Bis'tort* or *Snake'weed*, (F.) *Bistorte*, *Couleuvrine*, *Serpentaire rouge*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhœa, ague, &c. Dose, gr. xv to ʒj.

Polygonum Bistortoides, P. bistorta—p. Centinodium, P. aviculare.

Polygonum Coccineum, P. amphibium.

Polygonum Divarica'tum; *East'ern Buck'wheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

Polygonum Erectum, P. aviculare.

Polygonum Fagop'yrum, *Fagop'yrum*, *F. esculent'um*, *Trit'icum Fagi'num*, *Buck'wheat*, (F.) *Sar'rasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

Polygonum Hydrop'iper, *P. a'crē* seu *hydropiperoïdes* (Pursh) seu *puncta'tum*, *Hydrop'iper*, *Persica'ria u'rens*, *Mercu'rius terres'tris*, *Poor Man's Pep'per*, *Bi'ting Arse'smart*, *Smart'weed*, *Lake'weed*, *Wa'terpep'per*, (F.) *Poivre d'eau*, *Persicaire poivrée* ou *brûlante* ou *âcre*, *Piment d'eau*, *Ourage*, *Renouée âcre*. The leaves of this plant have an acrid, burning taste, and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally as a stimulating cataplasm.

Polygonum Hydropiperoï'des, P. Hydropiper, P. punctatum. *Polygonum hydropiperoï'des* of Michaux, *mild wa'terpep'per*; indigenous; has no acrid properties.

Polygonum Persica'ria, *Persicaria*, *P. mi'nor* seu *mi'tis*, *Plumba'go*, *La'dy's Thumb*, *Heart's ease*, (Prov.) *Red'shanks*, (F.) *Persicaire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

Polygonum Puncta'tum, *P. hydropiperoï'des*, *Wa'ter pep'per* of America, *Smart'weed*, possesses similar properties to Polygonum hydropiper, and is occasionally used internally in gravel, and externally in chronic ulcers. A fluidrachm of the saturated tincture has been extolled in amenorrhœa. See Polygonum hydropiper.

Polygonum Virginia'num, *Wand-spiked Persica'ria*, *Virgin'ia Bis'tort*; indigenous; is astringent, diuretic, and tonic.

POLYGO'NUS, *Polygo'nius*, (*poly*, and γωνια, 'an angle.') Polygonal; multangular,—hence Os polygonum.

POLYGROMA, gen. *Polygro'matis*, (*poly*, and *hygroma*,) Staphyloma.

POLYHI'DRIA, *Polyhi'dria*, *Polyhidro'sis*, (*poly*, and ἱδρως, 'sweat.') Excessive sweating.

POLYHYDRIA, (πολυὑδρια, from *poly*, and ὑδωρ, 'water,') Hydrops.

POLYHYPERHÆMIA, Plethora.

POLYIDRIA, Polyhidria.

POLYIDROSIS, Polyhidria.

POLYLEUCOCYTHÆMIA, Leucocythæmia.

POLYLYMPHIA, Anasarca.

POLYMASTH'US, *Pleiomas'thus*, (*poly*, and μαστος, 'breast.') (F.) *Plurimamme*. A monster having several breasts. The condition has been called *Polyma'zia*, *Pleioma'zia*, and *Pleoma'zia*.

POLYMAZIA, (*poly*, and μαζος, 'a breast,') see Polymasthus.

POLYMEL'IAN, (F.) *Polymélien*, (*poly*, and μελος, 'a limb.') An epithet given to monsters characterized by the insertion, in a well formed subject, of one or more accessory limbs, accompanied, at times, by the rudiments of certain other parts.

POLYMERIA, Polymerismus—p. Promiscua translativa, Transposition of the Viscera.

POLYMERIS'MUS, *Polymer'ia*, (*poly*, and μερος, 'a part.') A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

POLYNEURON, Plantago.

POLYONYCHIA, Polonychia.

POLYOP'SIA, *Polyop'sy*, *Polyop'ia*, *Pol'yopy*, (*poly*, and οψις, sight.') Vision is so called, when multiple or manifold.

POLYOPY, Polyopsia.

POLYOR'CHIS, *Multites'tis*, (*poly*, and ορχις, 'a testicle.') One who has more than two testicles.

POLYOREX'IA, (*poly*, and ορεξις, 'appetite.') Excessive appetite or hunger. A genus in the Gastroses of M. Alibert.

POLYPE'RIA, (*poly*, and πηρος, 'mutilated.') Congenital misconstruction of various parts or organs.

POLYPHA'GIA, *Multivoran'tia*, (πολυφαγια, from *poly*, and φαγω, 'I eat.') Voracity. Faculty of eating or subsisting on many kinds of food. See Boulimia.

POLYPH'AGOUS, (πολυφαγος,) *Polyph'agus*, *Multiv'orous*, (F.) *Polyphage*. Relating or appertaining to polyphagia.

POLYPHARMACI'A, *Polypharm'acy*, (*poly*, and φαρμακον, 'a medicine.') The prescribing of too many medicines. A prescription, consisting of a number of medicines; hence the name *Poly*

phar'macus, (F.) *Polypharmaque*, given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

POLYPHARMAQUE, see Polypharmacia.

POLYPHYSIA, (*poly*, and *φυσα*, 'wind,') Flatulence.

POLYPIFORM CONCRETIONS, (*polypus*, and *forma*, 'form,') see Polypus.

POLYPIONIA, (*poly*, and *πιον*, 'fat,') see Polysarcia—p. Infantum, see Polysarcia.

POLYPIOSIS, (*poly*, *πιον*, 'fat,' and *osis*,) see Polysarcia.

POLYPLAS'TIC, *Polyplas'ticus*, (*poly*, and *πλασσω*, 'I form.') That which has many shapes.

POLYPLASTIC EL'EMENT, in histology, is one which does not retain its primary shape; but undergoes transformation into others.

POLYPOD'IA, (*poly*, and *πους*, gen. *ποδος*, 'a foot.') A monstrosity in which there are more than two feet.

POLYPODI'TES, (*πολυποδιτης*.) Wine impregnated with polypody.

POLYPO'DIUM, (*πολυποδιον*,) *P. Vulga'rē* seu *Virgin'ia'num* seu *pinnatif'idum*, *Filic'ula dul'cis*, *Com'mon Pol'ypody*, *Fern root*, *Rock Brake* or *Brae'ken*, *Brake* or *Bracken root*, (F.) *Fougère douce*. *Ord.* Filices. (From *poly*, and *πους*, gen. *ποδος*, 'a foot,' owing to its many roots.) This fern grows in the clefts of rocks, walls, &c., in both hemispheres. It was formerly regarded as a cholagogue, and was given in head diseases. It is not used now.

POLYPODIUM ADIANTIFORME, see Calagualæ radix—p. Ammifolium, see Calagualæ radix—p. Argenteum, see Calagualæ radix—p. Calaguala, Calagualæ radix—p. Cetaræcinum, P. incanum—p. Coriaceum, see Calagualæ radix—p. Dentatum, Asplenium filix fœmina—p. Filix fœmina, Asplenium filix fœmina.

POLYPODIUM FI'LIX MAS, *Aspid'ium* seu *Athyr'ium* seu *Nephro'dium* seu *Polys'ticum Fi'lix Mas*, *A. depas'tum* seu *ero'sum*, *Fi'lix pinna'ta*, *Pter'is*, *Blech'non*, *Polyrrhi'zon*, *Blanc'non Oriba'sii*, *Lonchi'tis*, *Filic'ula*, *Fi'lix Mas*, *F. non ramo'sa dent. ta*, *Nephro'dium crena'tum*, *Polys'ticum callip'teris*, *Male Pol'ypody* or *Fern*, (F.) *Fougère mâle*. The rhizoma of this plant, *Filix Mas*, Ph. U. S., *Filix*, Ph. B. (1864,) has been much extolled as an anthelmintic, and in cases of tænia, and has, by many, been placed above all tæniafuges. It was the basis of a once celebrated remedy—*Madame Nouffer's*. Dose, ʒij to ʒiij of the powdered solid part of the root; followed in the morning by a strong cathartic of camboge or jalap. An ethereal extract has been proposed by Dr. Peschier, of Geneva,—*Extrac'tum fi'licis æthe'reum*, or *O'leum fi'licis*, the dose of which is from 12 to 24 grains. *Extrac'tum fi'licis liq'uidum* is officinal in the Ph. B. (1864). Dose, ♏xxx to fʒj.

POLYPODIUM INCA'NUM, *P. cetaræ'cinum*, *Acros'tichum polypodioïdes*, *Pol'ypody*, *Rock Brake* or *Bracken*; indigenous; has been considered demulcent, cathartic and anthelmintic.

POLYPODIUM INCISUM, Asplenium filix fœmina—p. Molle, Asplenium filix fœmina—p. Pennatifidum, P. vulgare—p. Politum, see Calagualæ radix—p. Trifidum, Asplenium filix fœmina—p. Virginianum, P. vulgare—p. Vulgare, Polypodium.

POLYPODY, Polypodium, P. incanum—p. Common, Polypodium—p. Male, Polypodium filix mas.

POL'YPOID, *Polypoï'des*, (*polypus*, and *ειδος*, 'resemblance.') Having the shape of, or resembling, a polypus.

POLYPORE DU MÉLÈZE, Boletus laricis.

POLYPORUS IGNIARIUS, (*poly*, and *πορος*, 'a pore,') Boletus igniarius—p. Officinalis, Boletus laricis.

POLYPO'SIA, (*πολυποσια*, from *poly*, and *ποσις*, 'drink.') Great thirst; desire for drink. Polydipsia.

POL'YPOTOME, *Polypot'omus*, *Pol'yptome*, *Polyp'tomus*, *Pol'ypus knife*, (*polypus*, and *τεμνειν*, 'to cut.') An instrument for the removal of polypus by excision.

POL'YPOUS, *Polypo'sus*. Relating, or belonging to, or resembling polypus.

POLYPTOME, Polypotome.

POL'YPUS, (*πολυπους*,) *Pseudometamorpho'sis polypo'sa*, (from *poly*, and *πους*, gen. *ποδος*, 'a foot.') A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. Polypi may form on every mucous membrane. They are most commonly observed in the nasal fossæ, *Rhinopol'ypi*, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous*, *soft*, *vesic'ular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fi'brous* or *flesh'y*, and into *scir'rhous* or *can'cerous*. *Fi'brous polypi*, *Pol'ypi fibro'si*, *Inopol'ypi*, are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scir'rhous* or *carcinom'atous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Cauterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put around them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term POL'YPI,—*Pseudopol'ypi*, *Cardi'tis polypo'sa*, *Pol'ypiform Concre'tions*, (F.) *Concrétions polypeuses* ou *polypiformes* ou *sanguines du Cœur*, *Hémocardioplastie*, (Piorry,)—has likewise been applied to collections of blood—fibrinous concretions—found in the heart—*Heart clots*—or great vessels after dissolution. The presence of these concretions during life may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs—the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

POLYPUS BRONCHIA'LIS, *Bronchlemmi'tis*, *Bronchi'tis membrana'cea* seu *exsudati'va* seu *croupo'sa*, *B. plas'tic*, *Bron'chial Croup*, *Chron'ic Croup* [?], *Pseudomem'branous Bronchitis*, (F.) *Bronchite pseudo-membraneuse*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when expectorated, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

POLYPUS CARNOSUS, Sarcoma—p. Fibrosus, see Polypus—p. Uteri, Metropolypus.

POLYRRHIZON, (*πολυρριζον*, from *poly*, and *ριζα*, 'a root,') Polypodium filix mas.

POLYRRHŒA, (*poly*, and *ρεω*, 'to flow,') Profluvium.

POLYSAR'CIA, *Polysarco'sis*, (πολυσαρκια, from *poly*, and σαρξ, gen. σαρκος, 'flesh.') *Carnos'itas*, *Polysoma'tia*, *Adelipa'ria*, *Corpulen'tia*, *Steati'tes*. Excessive corpulency. Authors have distinguished two varieties of this: — POLYSAR'CIA CARNO'SA, *Cor'pulency*, and P. ADIPO'SA, *Polypio'nia*, *Polypio'sis*, *Pimelo'sis nim'ia*, *Pachys'mus*, *Pachyn'sis*. *Obes'itas*, *Hyperpim'elē*, *Lipa'ria*, *Adipo'sis*, *Polysar'cia fagino'sa*, *Empyme'lium polysar'cia*, *Baryso'mia*, *Barysomat'ica*, *Lipo'sis*, *Lipar'otes*, *Lipas'ma*, *Pinguitu'do*, *Pin'guitude*, *Obes'ity*, (F.) *Obésité*, *Embonpoint excessif*. A severe regimen and exercise are the best preventives. Children are occasionally met with of unusual fatness, in spite of every care. This morbid disposition has been termed *Polypio'nia infan'tum* and *Chloro'sis gigante'a*.

POLYSARCIA VISCERUM, Physconia adiposa.

POLYSARCOSIS, Polysarcia.

POLYSCEL'IA, (*poly*, and σκελος, 'a leg.') A monstrosity, characterized by the presence of one or more supernumerary legs.

POLYSIA'LIA, (*poly*, and σιαλον, 'saliva.') Excessive discharge of saliva.

POLYSOMA'TIA, (*poly*, and σωμα, 'body,') Polysarcia.

POLYSO'MIA, (*poly*, and σωμα, 'body,') A monstrosity characterized by the existence of more bodies than one.

POLYSPAS'TON, (*poly*, and σπαω, 'I draw.') A powerful instrument for reducing luxations.

POLYSPER'MIA, (πολυσπερμια, from *poly*, and σπερμα, 'sperm.') Richness or fulness of sperm or seed.

POLYSTHEN'IC, *Polysthen'icus*, (πολυσθενης, from *poly*, and σθενος, 'strength.') Having much strength.

POLYSTICUM CALLIPTERIS, Polypodium filix mas—p. Filix mas, Polypodium filix mas.

POLYSTOMA PINGUICOLA, (*poly*, and στομα, 'a mouth,') see Worms—p. Venarum, see Worms.

POLYTOCIA, (πολυτοκια, from *poly*, and τοκος, 'a child,') Fecundity.

POLYTRIC, Asplenium trichomanoides.

POLYTRICHIA, see Polytrichus.

POLYT'RICHUM, (πολυτριχον, from *poly*, and θριξ, gen. τριχος, 'hair,') *P. vulga'rē*, *Polyt'richon*, *Adian'tum au'reum*, *Gold'en Maid'enhair*, (F.) *Perce-mousse*. *Ord.* Musci. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

POLYTRICHUM COMMUNE, Asplenium trichomanoides.

POLYTRICHUM JUNIPERI'NUM, *Hair'cap moss*, *Rob'bin's Rye*, common in New England, is said to possess powerful diuretic properties.

POLYT'RICHUS, (πολυτριχος.) Very hairy. One that has much hair. The condition is termed *Polytrich'ia*; although this term is, at times, employed for the growth of hair on parts not usually having it.

POLYTROPH'IA, (*poly*, and τροφη, 'nourishment.') Abundant or excessive nutrition.

POLYURESIS, (*poly*, and ουρησις, 'urination,') Diabetes.

POLYURIA, (*poly*, and ουρον, 'urine,') Diabetes.

POLYU'RICUS. Sauvages calls *Ischu'ria polyu'rica* a kind of ischuria, caused by accumulation of urine in the bladder.

POMA, gen. *Po'matis*, (πομα,) Drink—p. Chinensia, (pl. of *pomum*, 'an apple,') see Citrus aurantium.

POMACEUM, (*pomum*, 'an apple,') Cider.

POMA'TUM, *Pomma'tum*, (from *poma*, 'apples,' which formerly entered into its composition.) (F.) *Pommade*, *Liparolé*, *Stéarolé*. A pharmaceutical preparation, employed only externally, which differs but little from an ointment, except in having generally less consistence. It is usually scented and coloured to render it more agreeable.

Common Pomatum is made of *lard*, 12lbs; *suet*, 4lbs; *essence of lemon*, ℥viij.

POMATUM AMMONIACALE GONDRETI, *Pommade de Gondret*—p. ad Labia Demulcenda, Cerate for the lips — p. Epispasticum flavum, Unguentum lyttæ medicatum aliud — p. Epispasticum viride, &c., Unguentum lyttæ medicatum — p. for the Lips, Cerate for the lips—p. Nitricum seu oxygenatum, Unguentum acidi nitrosi—p. Saturni, Unguentum plumbi superacetatis.

POMBALEA IPECACUANHA, (after the Marquis de Pombal, a celebrated Portuguese statesman and *savant*,) see Ipecacuanha.

POMEGRANATE, Punica granatum.

POMMADE, ([F.] *pomme*, [L.] *pomum*, 'an apple,') Pomatum—*p. d'Alyon*, Unguentum acidi nitrosi—*p. Antipsorique de Helmerich*, Unguentum sulphuratum alkalinum ad scabiem—*p. Antipsorique de Jasser*, Unguentum sulphuris compositum—*p. d'Autenrieth*, Unguentum antimonii tartarizati — *p. de Cyrillo*, Unguentum muriatis hydrargyri oxygenato medicatum — *p. Épispastique jaune*, Unguentum lyttæ medicatum aliud — *p. Épispastique verte*, Unguentum lyttæ medicatum —*p. de Garon*, Unguentum epispasticum de daphne gnidio.

POMMADE DE GONDRET, *P. ammoniacale de Gondret*, *Caustique ammoniacale*, *Poma'tum* seu *Unguentum ammoniaca'lē Gondreti*, *Gondret's Counterir'ritant*, *Gondret's ammoni'acal Caus'tic*. (*Liq. ammon.* p. ij; *Sevi*, p. j; *Ol. amygdal.* p. j; M.) Used to excite a speedy revulsion in cases of chronic affections of the brain, incipient cataract, amaurosis, &c., as well as to cauterize the integuments deeply.

The above formula is that of the French Codex, but, according to M. Trousseau, it is much too hard for use, unless the weather is warm. He proposes *two formulæ*, one for summer, the other for winter. In the *former*, he directs three parts of *lard*, one of *suet*, and four of *liquor ammoniæ*; in the *latter*, equal parts of *lard* and *liquor ammoniæ*.

POMMADE DE HELMERICH, Unguentum sulphuratum alkalinum ad scabiem—*p. Pour les Lèvres*, Cerate for the lips—*p. Ophthalmique* (Regent's,) Unguentum ophthalmicum—*p. Oxygénée*, Unguentum acidi nitrosi—*p. Stibiée*, Unguentum antimonii tartarizati.

POMME, ([L.] *pomum*, 'an apple,') see Pyrus malus—*p. d'Adam*, Pomum Adami—*p. d'Amour*, Solanum lycopersicum—*p. Blanche*, Camassia esculenta, Psoralea esculenta—*p. de Prairie*, Camassia esculenta, Psoralea esculenta—*p. Épineuse*, Datura stramonium—*p. de Merveille*, Momordica balsamica — *p. Mousseuse*, Bedegar — *p. de Terre*, Solanum tuberosum.

POMMEL FOOT, 'knobfoot,' Kyllosis.

POMMERASSE, Aristolochia clematitis.

POMMES HÉMORRHOÏDALES, see Viscum album.

POMMETTE, ([F.] *pomme*, 'an apple,') see Malæ os.

POMMIER, Pyrus malus.

POMPE POUR L'ESTOMAC, Stomach pump.

POMPHOLYGE'RON, (πομφολυγηρον, from πομφολυγοω, 'I raise blisters.') The name of a plaster employed by the ancients.

POMPH'OLYX, gen. *Pomphol'ygis*, (πομφολυξ, from πομφος, 'a blister.') A small vesicle on the skin. An eruption of *bullæ* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Ecphlysis Pompholyx* of Good. See Pemphigus.

POMPHOLYX, Tutia, Zinci oxydum.

POMPHUS, (πομφος,) Vesicula, Wheal.

POMPION, Cucurbita pepo.

POMUM, see Pyrus malus.

PO'MUM ADA'MI, *Eminen'tia thyreoïdea*, (F.) *Pomme d'Adam, Ad'am's Ap'ple.* The projection formed by the thyroid cartilage in the neck — of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

POMUM AMORIS, 'apple of love,' Testicle — p. Hierosolymitanum, Momordica balsamina — p. Melongena, see Solanum melongena—p. Mirabile, Momordica Balsamina — p. Spinosum, Datura stramonium.

PONCTION, Puncturing,

POND SHOVEL, Unisema deltifolia.

PONDERA ET MENSURÆ, Weights and measures.

PON'DUS PHARMACEUTICUM, see Weights and measures.

PONGITIF, Pungent.

PONS, gen. *Pon'tis*, (F.) *Pont*, 'a bridge.' A name given in anatomy to a part which connects others,—by a bridge, as it were.

PONS CEREBELLI, Pons Varolii—p. Hepatis, see Lobulus anonymus—p. Sylvii, Quadrigemina Tubercula—p. Tarini, Tarini pons.

PONS VARO'LII, *P. Cerebel'li, Cor'pus* seu *Tu'ber annula'rē, Proces'sus annula'ris, Prominen'tia annula'ris cer'ebri, Eminen'tia annula'ris, No'dus encepha'li* seu *cer'ebri, Protuberan'tia basila'ris, Protuberan'tia annula'ris Willis'ii, Varo'li's bridge, Cer'ebral protu'berance*, (F.) *Protubérance cérébrale* ou *annulaire, Mésencéphale, Mésocéphale, Pont de Varole, Annular protuberance.* An eminence at the upper part of the medulla oblongata, first described by Varoli. It is formed by the union of the crura cerebri and crura cerebelli.

PONS ZYGOMATICUS, Zygomatic arch.

PONT, Pons—*p. de Tarin*, Tarini pons—*p. de Varole*, Pons Varolii.

PONTE, (from *pondre*, 'to lay an egg,') see Parturition—*p. Périodique*, see Parturition.

PONTEDERIA CORDATA, (from Guilio Pontedera, Professor of Botany at Padua,) Unisema deltifolia.

PONTICUM ABSINTHIUM, Artemisia Pontica.

POOK, Abdomen.

POPLAR, AMERICAN, ([F.] *Peuplier*, [L.] *Populus*,) Liriodendron—p. Balm of Gilead, Populus Candicans—p. Black, Populus—p. Tree, Liriodendron—p. Tulipbearing, Liriodendron.

POP'LES, gen. *Pop'litis, Gare'tum, Garre'tum, Ig'nys, Ig'nyē, Suffra'go, Fos'sa ge'nu, Fos'sa poplitæ'a*, the *Ham, Hough, Hoff, Hock*, (F.) *Jarret*, (from [L.] *post*, 'behind,' and *plico*, 'I fold.') The posterior part of the knee joint. The ham forms what is called the *popliteal region* or *space.*

POPLESY, Apoplexy.

POPLITÆUS, (from *poples*,) Popliteal muscle.

POPLITÉ, Poplitæus muscle.

POPLITEAD, see Popliteal aspect.

POPLITE'AL, *Poplitæ'us, Popliti'ic*, (F.) *Poplité*, (from *poples*.) That which relates to the ham. A name given to various parts.

POPLITEAL AR'TERY—*Popliteal por'tion of the cru'ral*,—(Ch.), is really a continuation of the femoral, which changes its name on passing through the abductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries*; and, at the top of the leg, the arteries of the gemelli or gemini muscles, *gemini branches*, (F.) *branches jumelles*, the *two inferior articular arteries*, and the *tibialis antica.*

POPLITEAL AS'PECT. An aspect towards the side on which the *poples* or hum is situated. (Barclay.) *Poplite'ad* is used by the same writer adverbially, and signifies 'towards the popliteal aspect.'

POPLITEAL FOSSA, Poples.

POPLITEAL GLANDS, *Glan'dulæ poplitæ'æ.* Lymphatic glands, four in number, seated in the popliteal region or space.

POPLITEAL MUS'CLE, *Poplitæ'us Mus'cle, Subpoplitæ'us*, (F.) *Muscle poplité, Muscle Jarretier, Fémoro-popliti-tibial.* (Ch.), is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

POPLITEAL NERVES. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *exter'nal poplite'al, Perone'al nerve, Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculocuta'neous branch, nerf prétibio-digital*, (Ch.) and the *ante'rior tib'ial, nerf prétibio-susphalangétaire*, (Ch.) 2. The *inter'nal poplite'al nerve, Branche tibiale* (Ch.), which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name *tib'ial nerve.* It furnishes the *extern'al saphe'na nerve*, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plan'tar nerves.*

POPLITEAL REGION, Poples—p. Space, Poples.

POPLITEAL VEIN has the same arrangement as the artery behind which it is situate.

POPLITIC, Popliteal.

POPONAX, see Pastinaca opoponax.

POPPY, ([Sax.] popiʒ,) see Papaver — p. Celandine, Stylophorum diphyllum — p. Corn, red, Papaver rhœas.

POPPY HEADS, see Papaver.

POPPY, HORN, Stylophorum diphyllum.

POPPY JUICE, Meconium—p. Pill, Opium.

POPPY, PRICKLY, Argemone Mexicana — p. Spatling, Cucubalus Behen — p. Thorn, Argemone Mexicana — p. White, Papaver — p. White, capsule, see Papaver.

POP'ULUS, *P. ni'gra, Ægei'ros, Achero'is, Black pop'lar*, (F.) *Peuplier, P. noir* ou *franc.* The young buds, oculi or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an officinal ointment — the *unguen'tum popule'um.* It was, also, recommended in chronic affections of the lungs.

The bark of *Pop'ulus Tremulōi'des, American as'pen*; of P. TREM'ULA seu *pen'dula, Europe'an as'pen*; and of POPULUS CAN'DICANS, *Balm of Gil'ead Pop'lar*, is antiperiodic, and furnishes *sal'icin* and *pop'ulin*, in which the properties probably reside.

POPULUS BALSAMIFERA, see Fagara octandra—p. Candicans, see Populus—p. Pendula, P. tremula — p. Tacamahaca, see Fagara octandra — p. Tremula, see Populus—p. Tremuloides, see Populus.

PORCELAINE, Essera, Urticaria.

PORCELET, Hyoscyamus.

PORCELIA TRILOBA, (after A. Porcel, of Spain, a promoter of botany,) see Carica papaya.

PORCELLIO, (dim. of *porcus*, 'a hog,') Oniscus.

PORCELLUS, Oniscus.

PORCULUS, Oniscus.

PORCUPINE DISEASE, Ichthyosis.

PORC'UPINE MEN, *Echinoder'mi.* Persons have been so called in whom the cuticle is produced in the form of pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

PORCUS, (πορκος,) Vulva.

PORDE, (πορδη,) Crepitation, Fart.

PORE, *Po'rus*, (πορος, 'a passage,') *In'terstice.* Pores are the excessively minute spaces or interstices which separate the integrant molecules of bodies, and render these bodies permeable. Anatomists formerly gave this name to supposititious openings at the extremities of vessels at the surface of different membranes. Thus EXHALANT PORES have been supposed to exist in the exhalants, to transmit the fluids exhaled.—ABSORBENT PORES to be employed in taking up parts that have to enter the circulation. Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. These pores have also been called *spira'cula.*

A body that is possessed of pores is said to be *po'rous, poro'sus*, (F.) *Poreux.*

POREBLIND, (*peerblind* [?],) Myopic.

PORED MILK, Colostrum.

POREUX, Porous.

PO'RI (pl. of *porus*, 'a passage,') BILIA'RII, *Duc'tus bilia'rii* seu *bilif'eri, Canalic'uli bilif'eri, Sur'culi fell'ei.* Ducts which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

PORI CUTA'NEI, *P. Exhalan'tes* seu *Sudorif'eri* seu *Resorben'tes, Mea'tus cuticula'res.* The pores of the skin.

PORI EXHALANTES, P. cutanei—p. Pulmonum, Cellulæ, bronchiæ—p. Resorbentes, P. cutanei—p. Sudoriferi, P. cutanei.

PORILLON, Narcissus pseudonarcissus.

PORNIA, (πορνεια,) Prostitution.

PORNOG'RAPHY, *Pornograph'ia*, (πορνεια, 'prostitution,' and γραφω, 'I describe.') A description of prostitutes or of prostitution, as a matter of public hygiene.

POROCE'LE, (πωρος, 'callus,' and κηλη, 'a tumour.') A hard tumour of the testicles or its envelopes.

POROMA, gen. *Poro'matis*, (πωρωμα,) Induration.

POROMPHALOCELE, Poromphalon.

POROM'PHALON, *Poromph'alus, Poromphaloce'lē*, (πωρος, 'callus,' and ομφαλος, 'navel.') Umbilical hernia with hard and thickened parietes.

POROS, (πορος,) Canal, Meatus; (πωρος,) Callosity.

POROSIS, (πωρωσις,) Chalaza, Induration.

POROSUS, (from πορος, 'pore,') Porous.

POROT'IC, *Porot'icus*, (F.) *Porotique*, (from πωρος, 'callus.') A remedy believed to be capable of assisting the formation of callus.

PORPHYRA, πορφυρα, 'purple,') Purpura—p. Græcorum, Petechiæ—p. Hæmorrhagica, Purpura hæmorrhagica—p. Laciniata, Ulva umbilicalis—p. Umbilicalis, Ulva umbilicalis.

PORPHYRISMA, (from πορφυρα, 'purple,') Scarlatina.

PORPHYRISMUS, Scarlatina.

PORPHYRIZATION, Levigation.

PORPHYROTYPHUS, see Typhus.

PORPHYRU'RIA, *Porphyru'ria*, (πορφυρα, 'purple,' and ουρον, 'urine.') A state of the urine—*pur'puric u'rine*—in which it deposits the remarkable colouring matter—*Pur'purin, Urro'sacin* or *Uro'sacin, Rosac''ic acid, Uroër'ythrin, Uro'rhodin, U'rrhodin*—in association with urate of ammonia. It is considered to be a modification of Urohematin, hæmaphæin.

POR'PHYRY, *Porphyri'tes*, (from πορφυρα, 'purple.') A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

PORPHYRY, BLACK, Ophites.

PORPHYURIA, Porphyruria.

PORRACÉ, Porraceous.

PORRA'CEOUS, *Porra'ceus, Pra'sinus*, (from *porrum*, 'a leek.') (F.) *Porracé.* Having the green colour of the leek. An epithet given to certain excreted matters,—the sputa, bile and fæces particularly.

PORREAU, Allium porrum.

PORRECTUM, (*porrigo, porrectum*, 'to stretch,') Lever.

PORRET, Allium porrum.

PORRIDGE, ATHOL, see Mahogany.

PORRIGINE, Porrigo favosa.

PORRIGINEUX, Porriginous.

PORRIGINOSUS, Porriginous.

PORRIG''INOUS, *Porrigino'sus*, (F.) *Porrigineux.* Appertaining to porrigo.

PORRI'GO, gen. *Porrig''inis*, 'scurf or scall in the head,' *Tin'ea, T. Cap'itis, Fa'vus, Furfura'tio, Fur'fures, Ecpye'sis* seu *Phly'sis porrigo, Trichono'sis, Scal'led head* in general, *Scal'lard;* from *porrigere*, 'to spread,' or from *porrum*, 'a leek,' from the odour of the discharge. [?]) (F.) *Teigne, Rache.* Some of the varieties are communicable. With the ancients a scurfy affection of the head; dandriff. Since often used like tinea for scalled head in general; and by Willan and Bateman for a class of diseases of the hairy scalp, principally characterized by an eruption of the pustules, called favi and achores, unaccompanied by fever.

PORRIGO CONFERTA, P. scutulata.

PORRIGO DECAL'VANS, *Tricho'sis a'rea, A'rea, Alope'cia area'ta* seu *partia'lis* seu *circumscrip'ta, Phytoalope'cia, Trichono'sis furfura'cea, Tyr'ia, Tyro'ma, Ophi'asis, Tin'ea ton'dens, Her'pes* seu *Tin'ea tonsu'rans, Vitili'go, Squar'ra ton'dens, Lim'itcd* or *par'tial Bald'ness* (F.) *Teigne tondante* ou *pelade, Pelade achromateuse, P. décalvante, Dartre tonsurante*, consists of patches of baldness without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. To a vegetable growth, forming a tube around the roots of the hair in Tinea tondens, Gruby gave the name *Micros'poron* seu *Micros'porum Audouï'ni.* It is, also, called *Trichoph'yton* seu *Trichom'yces decal'vans.* Another vegetable parasite, called *Trichoph'yton* seu *Trychom'yces tonsu'rans*, (F.) *Teigne tonsurante*, is developed in the root of the hair. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

PORRIGO FAVO'SA, *Ce'rion, Fa'vus, Ecpye'sis porri'go favo'sa, Tin'ea favo'sa* seu *ve'ra, Scu'bies cap'itis favo'sa, Melice'ra, Melice'rum, Melice'ria, Mellifa'vium, Porrigoph'yta, Honeycomb Scall* or *Tet'ter*, (F.) *Teigne faveuse, Porrigine.* This consists in an eruption of pustules common to the head, trunk, and extremities, peasized, flattened at the top, in clusters, often uniting; discharge, fetid; scabs, honeycombed; the cells filled with fluid. It occurs both in early and adult life. Modern researches have satisfied most observers, that the crusts of favus are of vegetable nature, and formed of a parasitic plant, *Fungus porrig''inis*, belonging, according to Gruby, to the obsolete genus *mycoderm'a.* MM. J. Müller and Lebert refer it to the genus *Oïdium*, and call it *Oïd'ium Schönlein'i*, whilst Remak assigns it to a new genus under the name *Acho'rion Schönlei'nii.* The point is not, however, settled. The treatment of this variety must consist in the exhibition of laxatives and the mildest stimulating ointments,

such as the *Ung. zinci*, *Ung. hydrargyri præcipitat. alb.*, &c. Eczema of the hairy scalp is often confounded with Porrigo.

Porrigo Fur'furans, *Ecpye'sis porrigo furfura'cea*, *Tin'ea* seu *Tricho'sis furfuracea* seu *porrigino'sa*, *Pityri'asis*, *Teigne furfuracée* of Alibert, commences with an eruption of small achores, the fluid of which soon concretes and separates in innumerable thin, laminated scabs, or scalelike exfoliations. It is attended with a good deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*; — one made with the *Cocculus indicus*; — the *Sulphur ointment*; — *Citrine ointment*; *Ung. hydrargyri nitricoöxydi*; *Tar ointment*, and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

Porrigo Larvalis, P. lupinosa.

Porrigo Larva'lis, *Crus'ta lac'tea*, *Ecpye'sis Porri'go crusta'cea*, *Menti'go*, *A'chor*, *Tin'ea lac'tea* seu *Fa'ciei*, *Lactu'men*, *Lacti'go*, *Milk'y scall* or *Tet'ter*, *Milkblotch*, (F.) *Croûte de lait* ou *laiteuse*, *Feux volages*. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish achores on a red surface. These break and discharge a viscid fluid, which becomes incrusted in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask; hence the epithet *larvalis*. The disease is rather a variety of Eczema. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablution, and the application of gently stimulating ointments, as the unguentum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

Porrigo Lupino'sa, *Tin'ea lupi'na*, *Fa'vus disper'sus*, *Sca'bies cap'itis*, *Ecpye'sis porrigo lupino'sa*, *Porri'go larva'lis*, *Impeti'go figura'ta*, *Tin'ea granula'ta* seu *muco'sa*, *Crus'ta lac'tea* (of some), *Ment'agra infan'tum*, (F.) *Teigne*, *Dartre crustacée flavescente*, *Favus disséminé*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminate in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

Porrigo Scutula'ta, *P. confer'ta*, *Tin'ea granula'ta* seu *fico'sa*, *Ecpye'sis porri'go galea'ta*, *Acho'res* seu *Sca'bies cap'itis*, *Fa'vus confer'tus*, *Ring'worm of the Scalp*, *Scall'ed head*, (F.) *Teigne annulaire*, *T. en anneau*, *T. nummulaire*, *Favus en groupes*. It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children three or four years of age, and is very unmanageable. The rules laid down under *Porrigo furfurans* must be here still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem* of Banyer sometimes cures, when others fail.

Porrigoph'yta, (*porrigo*, and φυτον, 'a vegetable,') *Porri'go favo'sa*. *Porrigophyte* means the plant of favus or of porrigo favosa.

Porrum, Allium porrum, Thymion.

Porrus, Thymion.

Por'ta, *Py'lē*, (F.) *Porte*, 'a gate.' The part of the liver or other organ—*hilus*—where its vessels enter as by a gate. See Liver. Also, the Vulva.

Porta Hepatis, see Liver — p. Jecoris, see Liver—p. Lienis, see Spleen.

Porta Ve'na, *Ve'na por'tæ*, *V. porta'rum* seu *ad por'tas* seu *porta'lis* seu *mag'na* seu *quæ ad por'tas est* seu *stelechiæ'a* seu *lac'tea* seu *ostia'ria* seu *arterio'sa* seu *arteria'lis*, *Rama'lis ve'na*, *Jan'itrix*, *Ma'nus jec'oris* seu *he'patis*.

The *Sys'tem of the ve'na por'ta* or the *Abdom'inal ve'nous sys'tem* or *Por'tal sys'tem*, (F.) *Veine porte*, *Porte veine*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdomina'lis*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and, in the female, the uterus. The *Abdom'inal ve'na por'ta* has two principal roots, the *splenic vein* and the *superior mesenteric*, which have their ramifications in all the digestive organs. 2. The other trunk, distributed solely to the liver, has been called the *Hepat'ic ve'na por'ta*. It appears to be a continuation of the abdominal vena porta, and proceeds towards the inferior surface of the liver. Opposite the transverse fissure of that organ, it divides, like an artery, into two branches, which, at their union, seem to form a canal or duct, called by some the *Si'nus of the ve'na por'ta* or *of the portal vein*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ,—the capsule of Glisson. The different branches of the vena porta are devoid of valves. See Liver.

Por'tal, (from *porta*.) Relating to the porta of the liver,—as the *portal* system, or system of the vena porta. By extension, the term has been applied to an analogous system of vessels in the kidney. See Kidney.

Portal Fissure, see Liver—p. Fossa, see Liver—p. System, see Porta Vena — p. System of the kidney, see Kidney — p. Vein, Porta Vena — p. Veins of the kidney, see Kidney.

PORTE-AIGUILLE, *Acutenac'ulum*, *Acuduc'tor*, *Rhaphidago'gus*, *Needlecarrier*, *Needlebearer*, ([F.] *porter*, 'to carry,' and *aiguille*, 'a needle.') An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument was devised by Dr. Physick for taking up deep-seated arteries beyond the reach of a tenaculum or common needle. It consists of a forceps so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

PORTE-BOUGIE (F.) A silver canula similar to that of a trochar, except that it is longer. It is used for conducting bougies into the urethra.

PORTE-CAUSTIQUE, Porte-pierre—*p. Feuille*, Subscapularis.

PORTE-LAQ. An instrument for carrying the laq or fillet over the limb of the fœtus, whilst in utero, when turning is necessary.

PORTE-LIGATURE, (*porter*, 'to carry,' and *ligature*.) An instrument for conveying a ligature to deepseated parts.

PORTE-MÈCHE (F.), (from *porter*, 'to carry,' and *mèche*, 'a tent.') An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

PORTE-MOXA (F.). A small instrument for keeping the moxa applied to a part to be cauterized. It consists of a metallic ring—separated from the skin by three supports of ebony—to which a handle is adapted.

PORTE-NŒUD (F.), (from *porter*, 'to carry,' and *nœud*, 'a knot.') An instrument for carrying a ligature round the base or pedicle of a tumour.

PORTE-PIERRE (F.), (*porter*, 'to carry,' and *pierre*, 'a stone,') *Porte-caustique, Causticoph'orum, Caustic bearer*. An instrument similar to a *porte-crayon* for carrying lunar caustic.

PORTE-SONDE (F.). An instrument resembling a porte-crayon, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lacrymalis.

PORTE VEINE, Porta vena.

PORTENTUM, Monster.

PORTER, (from beign drunk by *porters*,) Cerevisia.

PORTIO DURA, 'hard portion,' Facial nerve—p. Inter duram et mollem, Portio Wrisbergii—p. Intermedia Wrisbergii, Portio Wrisbergii—p. Media inter portionem duram et portionem mollem, Portio Wrisbergii.

PORTIO MOLLIS, 'soft portion,' Auditory nerve.

POR'TIO WHISBER'GII, *P. interme'dia Wrisber'gii* seu *me'dia inter portionem du'ram et portio'nem mol'lem* seu *inter du'ram et mol'lem*, (F.) *Faisceau intermédiare de Wrisberg, Intermédiaire de Wrisberg*. A small, white fasciculus, intermediate between the portio mollis and portio dura of the seventh pair of nerves, which was first described by Wrisberg. The Chorda Tympani is supposed by some to emanate from this nerve.

PORTION COSTO-TRACHÉLIENNE DU SACRO-SPINAL, Longissimus dorsi—*p. Écailleuse* ou *squamense du temporal*, Squamous portion of the temporal.

PORTION GODRONNÉE ('plaited') *DE LA CORNE D'AMMON.* A name given by Vicq d'Azyr to a small, denticulated cord, of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

PORTION LOMBAIRE DU PLEXUS CRURAL, Lumbar plexus.

PORTONARIUM, (from *porta*, 'a gate,') Pylorus, Duodenum.

PORTULA'CA, *P. olera'cea, Andrach'nē, Al'lium Gal'licum, Pur'slane, Pur'slain*, (F.) *Pourpier cultivé*. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

PORUS, (πωρος,) Callosity; (πορος,) Canal, Meatus—p. Acusticus, Auditory canal, internal—p. Acusticus externus, Auditory canal, external.

PO'RUS OP'TICUS. An opening in the centre of the cribriform lamella of the sclerotic, through which the central artery of the retina enters the eyeball.

POSCA, Oxycrate.

POSE, ([Sax.] ȝepoꝛe,) Coryza.

POSIMOS, (ποσιμος,) Potable.

POSITION, FALSE, False position.

POSOL'OGY, *Posology''ia, Dosiology''ia*, (ποσος, 'quantity,' and λογος, 'a discourse.') Indication of the doses in which the different articles of the materia medica ought to be exhibited. (F.) *Dosage*.

POSOQUERIA DUMETORUM, Randia Dumetorum.

POSSÉDÉ, Possessed.

POSSESS'ED, *Dæmoni'acus*, (F.) *Possédé*. One affected with epilepsy, or other strange neurotic affection, was formerly supposed to be 'possessed' by a demon. Hence, exoreism and various religious ceremonies, at one time employed to drive off the intruder.

POSS'ET, *Posse'tum*, (from *posca*, 'sour wine and water' [?].) Milk curdled with wine, or any acid, or treacle. A preparation of beer and milk; *Zythog'ala*.

POSSET, SACK, see Sack—p. Sago, see Sago.

POSSETTING, Regurgitation (of Infants).

POSTBRACHIALE, (*post*, 'after,' and *brachium*, 'arm,') Metacarpus.

POSTCARPIUM, (*post*, 'after,' and *carpus*, 'wrist,') Metacarpus.

POSTE'RIOR ANNULA'RIS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ringfinger and little finger, and is inserted into the inside of the tendon on the back of the ringfinger. Its use is to draw the ringfinger inwards.

POSTERIOR AURIS, Retrahens auris.

POSTERIOR IN'DICIS MA'NŪS. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the forefinger, and is inserted into the inside of the tendon on the back of the forefinger. Its use is to draw the forefinger inwards.

POSTERIOR INDICIS PE'DIS, *Abduc'tor In'dicis Pe'dis*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore-toe, and second of the small toes, and is inserted into the outside of the root of the first bone of the foretoe. Its *use* is to pull the foretoe outwards.

POSTERIOR ME'DII DIG''ITI MA'NŪS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ringfingers: and is inserted into the inside of the tendon on the back of the middle finger. Its *use* is to draw the middle finger inwards.

POSTERIOR ME'DII DIG''ITI PE'DIS. *Abduc'tor me'dii dig''iti pe'dis*. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its *use* is to pull the toe outwards.

POSTERIOR TER'TII DIG''ITI, *Adduc'tor ter'tii dig''iti*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the third and fourth of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its *use* is to pull the toe outwards.

POSTHE, (ποσθη,) Penis, Prepuce.

POSTHET'OMIST, *Posthet'omus*, (ποσθη, 'prepuce,' and τομη, 'incision.') One who performs the operation of circumcision.

POSTHETOMY, Circumcision.

POSTHIA, (ποσθια,) Hordeolum.

POSTHIOPLASTIC, *Posthioplas'ticus, Posthoplas'tic, Posthoplas'ticus*, (*posthium*, and πλασσω, 'I

form.') An epithet applied to the operation for restoring the prepuce.

POSTHI'TIS, *Acrobysti'tis, Acroposthi'tis, Epagogii'tis,* (from *ποσθη,* 'prepuce,' and *itis.*) Inflammation of the prepuce.

POSTHIUM, (*ποσθιον,*) Penis, Prepuce.

POSTHOÇALYPTRON, (*ποσθη,* 'penis,' and *καλυπτρα,* 'a covering,') Condom.

POSTHONCUS, (*posthe,* and *ογκος,* 'a tumour.') Swelling of the prepuce or penis.

POSTHOPLASTIC, Posthioplastic.

POST'HUMOUS, (*post,* 'after,' and *humus,* 'the ground.') Occurring after death.

Posthumous Child. One born after the death of its father, or taken from the dead body of its mother, as by the Cæsarean section.

POSTIME, (imposthume,) Abscess.

POSTMORTEM, 'after death;' as 'a *postmortem* or necroscopic examination.'

POSTNA'TUS. 'Born after.' In the old law writers, the second son.

POSTPART'UM. 'After delivery.' As '*postpartum* hemorrhage.'

POSTPOSIT''IO, (*post,* 'after,' and *ponere, positum,* 'to place,') 'a postponement.') Delay in the return of a paroxysm. It is opposed to *anticipatio,* which means the return of a paroxysm earlier than its accustomed hour.

In this sense, we speak of an *antic''ipating,* and a *postpo'ning,* intermittent (*Febris hysteret'ica*).

POS'TURAL, *Postura'lis,* (from *ponere, positum,* 'to place.') Relating or appertaining to posture or position—as '*postural* treatment,' the treatment by position,—of a fractured limb for example.

POSTURAL RESPIRATION, see Ready method.

PO'TABLE, *Potab'ilis,* (*potare,* 'to drink,' and *habilis,* 'able,') *Pot'imos, Po'tos, Pos'imos,* drinkable. Water is said to be potable, when it contains atmospheric air; is not brackish; and has no mineral impregnation of consequence.

POTAGE, (from (L.) *potus,* 'drink,') see Broth.

POTAGER, Lachanon.

POTAMOPYRA, (*ποταμος,* 'a river,' and *πυρ,* 'fever,') Elodes (febris).

POT'ASH. So called from the pots or vessels in which it was made;—*Veg''etable al'kali, Gastri'num.* Also, Potass, (F.) *Potasse.*

Potash of Com'merce, *Potas'sa impu'ra, Impure' potas'sa, Alu'men cati'num, Cin'eres Rus'sici, Subcarbo'nas potas'sæ impu'rus, Potas'sæ carbo'nas impu'rus* seu *impu'ra, Lixi'vus ci'nis,* the *Pearlash* of commerce, is prepared from the ashes of land-plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potassa, sulphate of potassa, chloride of potassium, silex, oxide of iron, &c.

From the ashes of lees of wine, and from vine-twigs, a much purer alkali is obtained. It is called *Ci'nis infecto'rius* seu *fæ'cum, Cin'eres clavella'ti* seu *gravella'ti, Alu'men fæ'cum,* (F.) *Cendres gravelées* ou *de sarment.*

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering, and evaporating. It is called *Salt of Tar'tar, Sal Tar'tari, Ka'li præpara'tum e tar'taro, K. e tar'taro, Subcarbo'nas potas'sæ puris'simus, Potas'sæ subcarbo'nas e tar'taro.* Lastly, when wormwood is burnt to ashes, dissolved in water, filtered, and evaporated to dryness, it affords another variety of vegetable alkali, the *Sal absin'thii* or *Salt of wormwood.*

Impure potash is used for preparing the subcarbonate for medical use.

POTASS, Potassa, Potassa fusa, Potash. The protoxide of potassium.

POTASSA, Potass—p. Acetate of, Potassæ acetas—p. Azotate of, Potassæ nitras—p. Bichromate of, Potassæ bichromas—p. Bisulphate of, Potassæ supersulphas—p. Bitartrate of, Potassæ supertartras—p. Carbazotate of, Potassæ picras—p. Carbonate of, Potassæ carbonas—p. Carbonate of, pure, see Potassæ subcarbonas—p. Caustica cum calce, Potassa cum calce—p. Chlorate of, Potassæ murias hyperoxygenatus—p. Chromate of, Potassæ chromas—p. Chromate of, neutral, Potassæ chromas—p. Chromate of, yellow, Potassæ chromas.

Potas'sa cum Cal'cē, *P. o'pē cal'cis para'ta et ig'nē fu'sa, Potassa caust'ica cum cal'cē, Pot'ass with lime, Calx cum ka'li pu'ro, Caus'ticum commu'nē for'tius, La'pis inferna'lis* sive *sep'ticus, Ka'li caus'ticum cum cal'cē, La'pis caus'ticus,* (F.) *Potasse préparée avec la chaux, P. à la chaux, Pierre a cautère.* (*Potassæ, Calcis,* āā ℥j. Rub together, and keep in a wellstopped bottle.—Ph. U. S.) Used for the same purposes as the next, but more manageable; being less deliquescent.

Potassa, Euchlorate of, Potassæ murias hyperoxygenatus—p. Ferrocyanate of, Potassii ferrocyanuretum—p. Ferroprussiate of, Potassæ cyanuretum.

Potassa fu'sa, *Potas'sa, P. Caus'tica, Ka'li caus'ticum* seu *pu'rum, Fu'sed pot'ass, Al'kali vegetab'ilē fix'um caus'ticum, Caus'ticum commu'nē acer'rimum, C. alkali'num* seu *commu'nē* seu *potentia'lē* seu *Sali'num, Hy'dras ka'licum, H. potas'sæ pu'ræ fu'sæ, Potas'sæ hy'dras, La'pis caus'ticus* seu *causticus chirurgo'rum* seu *inferna'lis alcali'nus* seu *sep'ticus, Rupto'rium commu'nē, Fix'ed veg''etable al'kali, Hy'drate of Potassa, Caus'tic Pot'ash,* (F.) *Potasse caustique.* (Prepared by evaporating solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in wellcorked bottles. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

Potassa, Fused, Potassa fusa—p. Hydriodate of, Potassæ hydriodas—p. Hydrobromate of, see Bromine—p. Hydrocyanate of, Potassii cyanuretum—p. Hypermanganate of, Potassæ hypermanganas—p. Hyperoxalas, Potass, oxalate of—p. Hypertartras, P. supertartras—p. Hyposphosphite of, see Calcis hypophosphis—p. Impura, Potash of commerce—p. and Iron, tartrate of, Ferrum tartarizatum—p. with Lime, Potassa cum calce—p. Liquida, Liquor potassæ—p. Mephite of, Potassæ subcarbonas—p. Monochromate of, Potassæ chromas—p. Muriate of, Potassæ murias—p. Nitrate of, Potassæ nitras—p. Ope calcis parata et igne fusa, Potassa cum calce—p. Oxymuriate of, Potassæ murias hyperoxygenatus—p. Permanganate of, Potassæ permanganas—p. Prussiate of, Potassii ferrocyanuretum—p. and Soda, tartrate of, Soda, tartrate of—p. Subcarbonate of, Potassæ subcarbonas—p. Sulphate of, Potassæ sulphas—p. Sulphate of, acid, Potassæ supersulphas—p. Sulphurata, Potassii sulphuretum—p. Sulphuret of, Potassii sulphuretum—p. Supercarbonate of, Potassæ carbonas—p. Supersulphate of, Potassæ supersulphas—p. Supertartrate of, Potassæ supertartras—p. Tartrate of, Potassæ tartras.

POTAS'SÆ ACE'TAS, *Oxytar'tarus, Ace'tas ka'li* seu *lixiv'iæ* seu *ka'licum, Al'kali tar'tari ace'to satura'tum, A. vegetab'ilē cum ace'to, Magiste'rium tar'tari pur'gans, Ter'ra foliа'ta Tar'tari, Ka'li aceta'tum, Sal diuret'icus* seu *Sennert'i, Arca'num tar'tari, Ac''etate of pot'ass,* (F.) *Acétate de potasse.* (*Acid. acetic.* Oj, *Potassæ bicarbon.* q. s. Mix and add, by degrees, enough acetic acid to saturate the alkali; then filter and evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water-bath, and, removing the pellicles, dry.—Ph. U. S.)

It is cathartic and diuretic. Dose, ℥j to ℥ij, or more.

Potassæ et Aluminæ Sulphas, Alumen—p.

Azotas, Potassæ nitras—p. Biantimonias, Antimonium diaphoreticum—p. Bicarbonas, Potassæ carbonas.

Potassæ Bichro'mas, *Ka'li chro'micum ru'brum* seu *ac''idum* seu *bichro'micum, Bichro'mate of potas'sa.* (Procured by adding *sulphuric, nitric,* or *acetic acid* to a solution of the *neutral chromate,* and setting it aside to crystallize.) It is a violent irritant poison; and has been used as a caustic in cases of morbid growths, in the proportion of from half a drachm to a drachm of the salt to from an ounce to an ounce and a half of water.

Potassæ Bisulphas, P. supersulphas—p. Bitartras, P. supertartras.

Potassæ Carbo'nas, *Kali aëra'tum, Bicarbo'nas potas'sæ, Potas'sæ bicarbo'nas* (Ph. U. S., L., E., D. and B.), *Deutocarbo'nas potas'sii, Car'bonate, bicar'bonate* or *supercar'bonate of potassa.* This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (*Potass. carbon.* ℔iv, *Aquæ destillat.* Ox. Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble by the addition of dilute sulphuric acid.—Ph. U. S.) Dose, gr. x to ʒss. It is used in forming the soda powders, as well as for its antacid properties.

Distillers and brewers prepare this salt with great facility by suspending a solution of the *pu'rified car'bonate of potas'sa* in the fermenting tun. The alkaline salt is thus surrounded by an atmosphere of carbonic acid; and by absorbing it, it crystallizes into bicarbonate. The salt in powder is called *sal aëra'tus.* Its composition is between that of a carbonate and of a bicarbonate.

Potassæ Carbonas, P. subcarbonas—p. Carbonas e Lixivo Cinere, P. subcarbonas—p. Carbonas impurus, P. subcarbonas—p. Carbonas purus, Pure carbonate of potassa, see P. subcarbonas—p. Chloras, P. murias hyperoxygenatus—p. Chloruretum oxydatum, P. murias hyperoxygenatus.

Potassæ Chro'mas, *Ka'li chro'micum fla'vum* seu *neutra'lē, Neu'tral yel'low Chro'mate* or *Monochro'mate of potassa.* (Prepared by igniting a mixture of four parts of native *chromite of iron* (chrome iron ore) and one part of *nitre;* dissolving out the chromate of potassa by *water,* and crystallizing.) It has been used as an emetic, expectorant and diaphoretic. Dose, as an emetic, from two to four grains; as an expectorant, from ¼th to ½ grain. In the proportion of one drachm to 32 ounces of water, it has been used as an antiseptic wash—called by Jacobson *Li'quor conserva'trix.*

Potassæ Ci'tras, *Cit'rate of potas'sa.* (*Acid. citric.* ʒx, *Potass. bicarb.* ʒxiv, *Aquæ* q. s. Dissolve the acid in the water; and after effervescence has ceased, strain and evaporate to dryness. The salt is deliquescent, and must be kept in wellstopped bottles. Ph. U. S.) It possesses the refrigerant properties of the neutral salts, and may be given in fever, when to do little or nothing is the most advisable course. Dose, gr. x to ʒss.

Potassæ et Ferri Tartras, Ferri tartarizatum—p. Hydras, Potassa fusa.

Potassæ Hydri'odas, *Potas'sæ Protohydri'odas, Potas'sii protox'idi hydri'odas, Ka'li Hydriodin'icum* seu *Hydriod'icum, Hydri'odas Ka'licus, Hydri'odate of pot'ass,* (F.) *Hydriodate de potasse.* If a solution of potass be poured on iodine, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate, or rather the *Iodide of Potas'sium, Ka'lium Ioda'tum, Potassii Iodure'tum* seu *Io'didum,* (F.) *Iodure de potassium,* may be obtained by evaporation. When the *Iodide of potassium* is dissolved in water, it becomes the *Hydri'odate of Potas'sa.* (The following is the formula in the Ph. U. S. *Potass.* ʒvj; *Iodin.* in pulv. ʒxvj; *Carbon. ligni* in pulv. subtiliss. ʒij; *Aq. bullient.* Oiij. Dissolve the potassa in the water: add the iodine gradually, stirring until the solution becomes colourless, and continue the additions until the liquid remains slightly coloured from excess of iodine. Evaporate to dryness, stirring in the charcoal towards the close. Rub to powder, and heat to dull redness in an iron crucible, keeping up the temperature for 15 minutes. When cool, dissolve out the saline matter with pure water, filter the solution, evaporate and set aside to crystallize. By evaporating and crystallizing as before, an additional quantity of crystals may be obtained.) Virtues,—those of iodine.

Potassæ Mu'rias, *Potas'sii chlo'ridum, Sal Digesti'vus* seu *febrif'ugus Syl'vii, Spir'itus sa'lis mari'ni coagula'tus, Mu'riate of Potass, Chloride of potas'sium.* Bitter and refrigerant.

Potassæ Mu'rias Hyperoxygena'tus, *Potas'sæ Chlo'ras* seu *oxymu'rias, Oxymu'riate, Hyperoxymu'riate, Chlo'rate* or *Euchlo'rate of pot'ass, Protochlo'rate of potas'sium, Al'cali vegetab'ilē sali'to-dephlogistica'tum, Chlorure'tum potas'sæ oxyda'tum, Halōi'dum oxygena'tum, Oxyg''enochlorure'tum potas'sii, Ka'li chlo'ricum, Chlo'ras Ka'licus depura'tus,* (F.) *Chlorate de potasse.* (It may be prepared by passing *chlorine gas* into a solution of *potassa* or *carbonate of potassa,* evaporating and crystallizing. Chloride of potassium is less soluble and remains in the mother water. A more complex form for its preparation is given in Ph. B. 1864.) It has been regarded as antineuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose, 3 to 6 grains or more.

Potassæ Nitras, *P. Azo'tas, Ni'trate* or *Az'otate of Pot'ass, Ni'trum, N. prismat'icum, Sal ni'trum, Ni'tre, Saltpe'tre, Sal petra, Salse'do mu'crum, Sanguin'ea, Berenic''ium, Halini'trum, Protoni'trate of Potas'sium, Ni'trate of protox'ide of Potas'sium, Ka'li ni'tricum, Ni'tras ka'licus* seu *lixiv'iæ, Azo'tas potas'sicus,* (F.) *Nitrate* ou *Azotate de potasse.* (Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixiviation; adding, if necessary, woodashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.)

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ʒj. In large doses it is an acrid poison.

Potassæ Ni'tras Fu'sus Sulpha'tis Paucil'lo Mix'tus, *Sal prunel'læ, Crystal'lus minera'lis, Ni'tras potas'sæ cum sul'phurē fu'sus, Ni'trum tabula'tum, La'pis Prunel'læ, Anod'ynum minera'lē, Sorethroat salt, Min'eral crys'tol,* (F.) *Sel de Prunelle.* Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

Potassæ Ox'alas, *Ox'alas Acid'ulum Potas'sæ* seu *Potas'sæ acid'ulus* seu *ba'sicus, Superox'alas ka'licum* seu *Potas'sæ, Hyperox'alas Potas'sæ, Sal Acetosel'læ, Oxa'lium, Ka'li oxal'icum acid'ulum, Ox'alas subpotas'sicus, Superox'alate of Protox'ide of Potas'sium, Ox'alate of Pot'ass, Salt of Sor'rel,* (F.) *Sel d'oseille, Sel à détacher.* Prepared from the juice of wood sorrel. It is refrigerant, and is used to make lemonade, &c.

Potassæ Oxalas Acidulum, Potass, oxalate of—p. Oxymurias, P. murias hyperoxygenatus.

Potassæ Perman'ganas, *Kali Hypermangan'icum, Permanganate'tum potassæ, Perman'ganate of potas'sa, Hyperman'ganate of potassa.* (May be made by mixing equal parts of *deutoxide of manganese* and *chlorate of potassa* with rather more than an equal part of *caustic potassa,* dissolving in a little *water,* evaporating to dryness and ex-

posing to a temperature just short of redness. By hot water a solution is obtained, which on evaporation crystallizes. A form for its preparation is contained in Ph. B. 1864.) This salt has been given in cases of diabetes. Dose, from gr. ij to gr. v, three times a day. It has been prescribed, also, in obstinate dyspepsia; and has been highly recommended as a caustic, less painful and of more intense action than others; for this purpose, the powder is made into a paste with water. As an antibromic and escharotic combined, in the quantity of 20 grains to the pint of water, it, as well as manganic acid, has been used as a wash to cancerous and other ulcers.

Liquor Potas'sæ Permangana'tis, Solu'tion of Perman'ganate of Pot'ash, four grains of the *permanganate* to one fluidounce of *water*, is officinal in the British Pharmacopœia of 1864. See Condy's Disinfecting Fluid, which is double the strength of this.

Potassæ Pi'cras, *P. Carbazo'tas, Pi'crate* or *Carbaz'otate of Potas'sa:* (obtained by neutralizing *picric acid* with *potassa*.) It has been used as an antiperiodic. Dose two to five grains.

Potassæ Protohydriodas, P. hydriodas—p. Puræ fusæ hydras, Potassa fusa—p. et Sodæ tartras, Soda, tartrate of.

Potassæ Subcarbo'nas, *P. Carbo'nas* (Ph. U. S.), *P. carbo'nas e Lixi'vo Cin'erē, Subcarbo'nas Ka'li, Carbo'nas Potas'sæ, Ka'li præpara'tum, Sal Herba'rum* seu *Planta'rum* seu *Tar'tari* seu *Absin'thii, Calca'reous Tar'tar, Subcarbonate* or *Meph'ite of Pot'ass*, &c. (See Potash.) (A filtered solution of the *impure subcarbonate, Potas'sæ carbo'nas impu'ra* (Ph. U. S.), *Pearlash* (see Potash), evaporated to dryness.) This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian Codex has a *Subcarbo'nas Potas'sæ ex tar'taro combus'to*, vulgo *Sal Tar'tari* or *Salt of Tar'tar*;—(it is the *Potas'sæ carbo'nas pu'rus* seu *pura, Pure Carbonate of Potassa*, Ph. U. S.); a *Subcarbo'nas Potas'sæ ex deflagran'tibus si'mul tartra'tē acid'ulo et Nitra'tē Potas'sæ para'tus*, vulgo *Ni'trum ex tar'taro fix'um;* and a *Subcarbo'nas potas'sæ ex deflagran'tē cum Carbo'nibus Nitra'tē Potassæ paratus*, vulgo *Ni'trum fix'um*. They are all used like the preceding.

Potassæ Subcarbonas Impurus, Potash of commerce.

Potassæ Sul'phas, *Ka'li vitriola'tum* seu *sulphu'ricum, Sul'phas Ka'li, Lixiv'ia vitriola'ta, Ni'trum vitriola'tum Schroederi, Sal Sapien'tiæ* seu *Tar'tari sulphura'tum* seu *Polychres'tus, Speci'ficum Paracel'si, Spi'ritus vitri'oli coagula'tus Mynsich'ti, Al'kali vegeta'bilē vitriola'tum, Sal de duo'bus, Arca'num duplica'tum, Tar'tarum vitriola'tum, Panace'a Du'cis Holsa'tiæ* seu *duplica'ta, Sul'phate of Potass*, (F.) *Sulfate de potasse*. (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose, ʒss to ʒj as a laxative. In a large dose it has proved an irritant poison.

Potassæ Sul'phas cum Sul'phurē, *Sal Polychres'tus Glaseri, Lixiv'ia Vitriola'ta Sulphu'rea*. (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

Potassæ Sulphuretum, Potassii sulphuretum—p. Superoxalas, Potassæ oxalas.

Potassæ Supersul'phas, *P. Bisul'phas, Sal enix'um* seu *febrif'ugus of Lem'ery, Supersulphate of Pot'ass, Ac''id Sul'phate* or *Bisul'phate of Pot'ass, Superprotosul'phate of Potas'sium*, (F.) *Bisulfate de Potasse*. (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose, ʒss to ʒij.

Potassæ Supertar'tras, *P. hypertar'tras, P. Bitar'tras* (Ph. U. S.) seu *tar'tras ac''ida, Crystal'li Tar'tari, Tar'tras Acid'ulus Potas'sæ pu'rus, T. superpotas'sicus, T. subpotas'sicus, Supertar'trate of Protox'ide of Potas'sium, Bitar'trate* or *Supertar'trate of Pot'ass, Crys'tals of Tar'tar, Cre'mor Tar'tari, Cream of Tar'tar* (when in powder), *Supertar'trate of Pot'ass*, (F.) *Tartrate acide de potasse, Crème de Tartre*. (The tartar of wine purified.) It requires 60 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon-peel, it forms an agreeable beverage in febrile diseases, under the name of *Impe'rial*. Dose, as a diuretic, ʒj to ʒij; as a purgative, ʒss to ʒj.

Potassæ Supertar'tras Impu'rus, *Tar'tarus cru'dus, Tar'tarum, La'pis vi'ni, Magneti'nus, Pedagra, Tar'tar*, (F.) *Tartre cru* ou *brut*. It is called, also, *Tar'tarum ru'brum* and *Red Ar'gol*, when obtained from red wines; *Tar'tarum al'bum* or *White Ar'gol*, when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles in which they are kept. It consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumen, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

Potassæ Tar'tras. *Ka'li tartariza'tum, Al'cali fix'um tartarisa'tum, Tar'tarum solu'bilē, Tar'tarus tartariza'tus, Lixiv'ia Tartarisa'ta, Sal Panchres'tum, Tar'tras Kali'nus* seu *lixiv'iæ, Sal vegetab'ilis, Al'kali vegetab'ilē tartariza'tum, Tar'trate of Pot'ass, Sol'uble Tar'tar*, (F.) *Tartrate de Potasse*. (*Potassæ carbon.* ʒxvj; *Potassæ Bitartrat.* in pulv. subtiliss. ℔ij, vel q. s., *Aquæ bullientis*, cong. Dissolve the carbonate of potassa in the water, add the bitartrate to saturation, and boil; filter, evaporate till a pellicle forms, and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closelystopped bottles.—Ph. U. S.) A saline cathartic in the dose of ʒij to ʒj.

Potassæ Tartras Acida, P. supertartras—p. Tartras acidulus purus, P. supertartras—p. Tartras stibialis seu stibiosus, Antimonium tartarizatum.

POTASSE, Potash—*p. Acétate de*, Potassæ acetas—*p. Bisulphate de*, Potassæ supersulphas—*p. Caustique*, Potassa fusa—*p. à la Chaux*, Potassa cum calce—*p. Chlorate de*, Potassæ murias hyperoxygenatus—*p. Hydriodate de*, Potassæ hydriodas—*p. Liquide*, Liquor potassæ—*p. Nitrate de*, Potassæ nitras—*p. Préparée avec la chaux*, Potassa cum calce—*p. et de Soude, tartrate de*, Soda, tartrate of—*p. Sulfate de*, Potassæ sulphas—*p. Sulfure de*, Potassii sulphuretum—*p. Tartrate de*, Potassæ tartras—*p. Tartrate acide de*, Potassæ supertartras.

POTAS'SII BRO'MIDUM, *Potas'sæ hydrobro'mas, Bro'mide of potas'sium*, (F.) *Bromure de Potassium*. (*Bromin.* ʒij; *Ferri fili*, ʒj; *Potass. carbon*, ʒij and ʒj, vel. q. s.; *Aq. destillat.*, Oiv. Add the iron filings and bromine to a pint and a half of the water; stirring for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potassa, dissolved in Oiss of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the precipitate with the remaining water boiling hot, and filter. Mix the liquors and crystallize by evaporation.—Ph. U. S.) Virtues:—those of iodide of iron. Dose, gr. v to gr. x. It has been used, also, in the treatment of insomnia and restlessness, accompanied by, and dependent upon, nervous excitement. Large doses are said to occasion drowsiness, and to be antaphrodisiac. See Bromine.

Potassii Chloridum, Potassæ murias—p. Cyanidum, P. Cyanuretum.

Potassii Cyanure'tum, *P. Cyan'idum* (Ph. U. S., 1863), *Cyan'uret of Potas'sium, Hydrocyanate of Potas'sa.* (*Potassii ferrocyanur.*, in pulv., ℥viij; *Potass. carbonat.* exsiccat., ℥iij. Mix intimately, and throw into a deep iron crucible, heated to redness; keep up the heat till effervescence ceases, and the fused mass concretes, of a pure white colour, upon a warm glass rod dipped into it; then pour out the liquid carefully into a shallow dish to solidify, stopping before the salt becomes contaminated with the precipitated iron. Break up the mass whilst warm, and preserve in well-stopped bottles. — Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.

Potassii Deutocarbonas, Potassæ carbonas.

Potassii Ferrocyanure'tum, *P. Ferrocyan'idum, Ferrocy'anide* or *Ferrocyan'uret of Potas'sium, Ferrocy'anate* or *Ferroprus'siate* or *Prus'siate of Potas'sa*, (F.) *Protocyanure jaune de fer et de potassium, Cyanure de fer et de potassium.* The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the colliquative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.

Potassii Hydrar'gyroio'dïdum, *Potas'sæ Iodohydrar'gyras, Hydrar'gyrum bïoda'tum cum ka'lio ioda'to, Ka'lium ioda'tum hydrargyra'tum, Iodhydrar'gyrate* or *Hydrargyroï'odide of Potas'sium.* (This salt is made by the combination of *iodide of potassium* with *red iodide of mercury.*) Its properties are similar to those of the iodides of mercury, but in a less degree.

Potassii Iodidum, Potassæ hydriodas — p. Iduretum, Potassæ hydriodas — p. Oxygenochloruretum, Potassæ murias hyperoxygenatus — p. Protoxidi hydriodas, Potassæ hydriodas.

Potassii Sulphocyanure'tum, *Sulphocyan'uret of Potas'sium.* This salt has been prepared as a substitute for hydrocyanic acid, and cyanuret of potassium, on the ground of its possessing their advantages without their inconveniences.

Potassii Sulphure'tum, *Potas'sæ Sulphure'tum* seu *tersulphure'tum, Potas'sa sulphura'ta, Ka'li sulphure'tum, He'par Sul'phuris* seu *Kali'num, H. sul'phuris sali'num* seu *sulphuris vulga'rē, Sulphure'tum lixiv'iæ* seu *ka'licum, Liv'er of Sul'phur, Sul'phuret of Potass, Sulph'urated potas'sa* or *pot'ash*, (F.) *Sulfure de potasse, Sulfure de potassium sulfaté, Foie de Soufre.* (*Sulphur.* ℥j, *Potassæ carb.* ℥ij. Rub them together, and place the mixture in a covered crucible upon the fire until they unite.) It has been employed in affections of the chest, as an expectorant, in the dose of from ℥ss to ℥j, largely diluted; but is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.)

Potassii Tersulphuretum, Potassii sulphuretum.

POTASS'IUM. Same etymon as potash. The metallic base of potassa.

POTASSIUM BROMURE DE, see Bromine.

Potassium, Chloride of, Potassæ murias—p. Cyanuret of, Potassii cyanuretum — p. Ferrocyanide of, Potassii ferrocyanuretum — p. Ferrocyanuret of, Potassii ferrocyanuretum—p. POTATO, ([S.] *batata*,) Solanum tuberosum—p. Carolina, Convolvulus batatas.

Potato Fly, Lytta vittata.

Potato, Hog, Convolvulus panduratus.

Pota'to Oil, see Oil, fusel. By distilling potato oil with anhydrous phosphoric acid, a volatile colourless oily liquid is procured, which is lighter than water, and boils at 102°. This is *Am'ylene* or *Am'ylen*, (F.) *Amylène.* It is best prepared from fusel oil by the action of chloride of zinc. The vapour has been employed as an anæsthetic.

Potato, Spanish, Convolvulus batatas — p. Sweet, Convolvulus batatas.

Potato Vine, Wild, Convolvulus panduratus.

Potato, Wild, Convolvulus panduratus.

POTBELLY, Physconia.

POTECARY, Apothecary.

POTELÉE, Hyoscyamus.

POTENCY, (*potens*, 'able,') Faculty.

POTENTIA, (*potens*, 'able,') Force.

Poten'tia seu Potes'tas Coëun'di, Capability of copulation.

Potentia Generan'di. The power of procreation.

Potentia Irritans, Stimulus.

POTEN'TIAL, *Potentia'lis*, (F.) *Potentiel*; (from *potentia.*) An epithet for remedies which, although energetic, do not act till some time after their application. The caustic alkalies, for instance, are called *Potential cauteries* in contradistinction to the hot iron, which is termed *ac'tual.*

POTENTILLA, (from *potentia*,) P. reptans.

Potentil'la Anseri'na, *P. argenti'na* seu *impo'lita* seu *neglec'ta, Argenti'na vulga'ris, Fraga'ria anseri'na, Ar'gentine, Chenobos'con, Argenta'ria, Anseri'na, Sil'verweed, Wild tansy, Moor'grass*, (F.) *Argentine, Potentille, Herbe aux oies. Ord.* Rosaceæ. The leaves are mildly astringent and tonic.

Potentilla Argentina, P. anserina — p. Impolita, P. anserina — p. Neglecta, P. anserina.

Potentilla Norveg''ica, *Norway Cinquefoil*, an indigenous plant, is possessed of similar properties.

Potentilla Palustris, Comarum palustre.

Potentilla Rep'tans, *Pentaphyl'lum, Fraga'ria pentaphyl'lum, Potentil'la, Quinquefo'lium, Q. ma'jus, Com'mon cinquefoil*, (F.) *Potentille rampante, Quintefeuille.* The roots are possessed of astringent properties.

Potentilla Tormentilla, Tormentilla.

POTENTILLE, Potentilla anserina—*p. Rampante*, Potentilla reptans.

POTENTIZING, (from *potentia*,) see Dynamic.

POTERIUM SANGUISORBA, (ποτηριον,) Pimpinella saxifraga.

POTESTAS COEUNDI, ('power of copulating,') Potentia coeundi — p. Generandi, Potentia generandi.

POTEX, gen. *Po'ticis*, (*podex*,) Anus.

POTHOMOR'PHA PELTA'TA, *Pothomor'phē pelta'ta*, (*pothos*, and μορφη, 'shape.') *Caapeba* [?]. A Brazilian plant, *Order*, Piperaceæ, which is possessed of diuretic properties, and has been given in strangury.

Pothomorpha Umbella'ta, also called *Caapeba* [?], is given in Brazil to modify nutrition, as in glandular affections, in which it is also used externally, in the form of decoction.

POTHOPATRIDAL'GIA, (ποθος, 'a longing,' πατρις, 'one's country,' and αλγος, 'pain,') Nostalgia.

POTHOS FŒTIDA, Dracontium fœtidum—p. Putorii, Dracontium fœtidum.

POTIMOS, (ποτιμος,) Potable.

POTIO, Drink, Haustus, Potion—p. Caleis carbonatis, Mistura cretæ—p. Effervescens antiemetica, Potion of Riverius—p. Leniens, Looch ex ovo—p. Oleosa, Looch ex ovo—p. Picea, see Pinus sylvestris—p. Riverii citrata, Potion of Riverius.

POTION (F.), *Potio; Hydrolé, Hydrolite.* A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English *Mixture.* See Mistura.

POTION PECTORALE, Looch ex ovo.

Po'tion of Rive'rius. A mixture of *Lemon Juice* and *Subcarbonate of Potass,*—generally given in a state of effervescence. It is the *Potio efferves'cens antiëmet'ica die'ta Rive'rii* of the Parisian codex, *Potio Rive'rii citra'ta.* The name in the Codex indicates one of its uses.

POTIONIS DESIDERIUM, 'desire for drink,' Thirst.

POTIRON, Cucurbita pepo.

POTIUNCULA, (dim. of *potio,*) Haustus.

POTOMANIA, (ποτος, 'drink,' and *mania,*) Delirium tremens.

POTOPARANŒA, (ποτος, 'drink,' and *paranœa,*) Delirium tremens.

POTOS, (ποτος,) Potable.

POTOTROMOPARANŒA, (ποτος, 'drink,' τρομος, 'trembling,' and *parunœa,*) Delirium tremens.

POTTINGAR, Apothecary.

POTT'S CURVATURE, Vertebral disease.

POTT'S DISEASE, Vertebral disease.

POTUS, (ποτος,) Drink—p. Hippocraticus, Claret.

POU, Pediculus.

POUCE, Pollex, see Digitus.

POUCHED, (from [Sax.] pocca, [F.] *poche,* 'a bag,') Encysted.

POUCHES, LARYNGEAL, see Laryngeal pouches.

POUDRE, Powder, Pulvis—*p. Absorbante et anti-acide,* Pulvis de magnesiâ compositus—*p. d'Alun composée,* Pulvis sulphatis aluminæ compositus—*p. Antiarthritique amère,* Pulvis de amaris compositus—*p. Antiasthmatique,* Pulvis de sulphure et scillâ—*p. Antimoniale composée* ou *de James,* Antimonial powder—*p. Aromatique,* Pulvis cinnamomi compositus—*p. d'Asarum composée dite sternutatoire,* Pulvis asari compositus—*p. Balsamique,* Pulvis myrrhæ compositus—*p. de Birckmann,* Pulvis de aro compositus—*p. de Blanchement,* Calcis chloridum—*p. de Cannelle composée* ou *aromatique,* Pulvis cinnamomi compositus—*p. Castillon,* see Powders, Castillon—*p. Cathartique,* Pulvis scammoneæ compositus—*p. Caustique du frère Cosme,* Powder, arsenical, of Côme—*p. de Chypre,* see Cladonia rangiferrina—*p. du Compte de Palme,* Magnesiæ carbonas—*p. Cornachine,* Pulvis cornachini—*p. de Corne brulée avec opium,* Pulvis cornu usti cum opio—*p. Coton,* see Collodion—*p. de Craie composée,* Pulvis cretæ compositus—*p. de Craie composée avec opium,* see Pulvis cretæ compositus cum opio—*p. de Dover,* Pulvis ipecacuanhæ compositus—*p. du Duc de Portland,* Pulvis Ducis Portlandiæ—*p. de Dupuytren,* Powder of Dupuytren—*p. pour Eau de Vichy,* see Vichy, mineral waters of—*p. Nutrimentive,* see Pepsin—*p. de Pérard,* Pulvis de sennâ, scammoneâ et lignis—*p. de Quercetanus,* Pulvis e gummi guttâ—*p. de Rousselot,* Powder, arsenical, of Côme—*p. de Saint Ange,* Pulvis asari compositus—*p. de Savon végétale,* Pulvis gummosus alkalinus—*p. de Scammonée composée,* Pulvis scammoneæ compositus—*p. de Sedlitz,* Powders, Seidlitz—*P. de Séné composée,* Pulvis sennæ comp.—*p. de Sentinelli,* Magnesiæ carbonas—*p. Styptique,* Pulvis sulphatis aluminæ compositus.

POUDRE SUBTIL DE DELCROIX. A fashionable depilatory "for removing superfluous hair in less than ten minutes." It is said to consist of *Quicklime* and *Sulphuret of Arsenic,* with some vegetable powder.

POUDRE TEMPÉRANTE DE STAHL, Pulvis de sulphate potassæ compositus—*p. de Temant,* Calcis chloridum—*p. de Volentini,* Magnesiæ carbonas—*p. Vermifuge mercurielle,* Pulvis e sulphureto hydrargyri nigro et scammonio—*p. Vermifuge sans mercure,* Pulvis ex helminthocorto compositus.

POUDRE DE ZWINGER, Magnesiæ carbonas.

POUGUES, MIN'ERAL WA'TERS OF. These alkaline waters are in the department of Nièvre, France. They contain carbonic acid, carbonates of soda, lime, and magnesia; chloride of sodium; alumina, and silica, with protoxide of iron. Season from the 15th of May to the 1st of October.

POUKE, Papula.

POULAIN, Bubo.

POULET, VIN DE (F.) *Pullet Wine.* A disgusting preparation, made by infusing the excrement of the pullet in white wine. According to Nysten, it is employed by the vulgar in France in a number of diseases, and especially in falls, contusions, &c.

POULIOT, (from *pulegium,*) Mentha pulegium.

POULS, Pulse—*p. Abdominal,* Pulsus inferior—*p. des Adultes,* Pulse, natural—*p. Agité,* Pulsus fortis—*p. Bas,* Pulse, low—*p. Capital,* Pulse, nasal—*p. Combiné,* Pulse, complex—*p. Vif,* Pulse, sharp—*p. Vite,* Pulse, sharp.

POULTICE, (πολτος; *puls,* gen. *pultis,* 'porridge, pottage, pap,') Cataplasm. For different poultices, see Cataplasm and Cataplasma.

POUNCE, (F.) *Ponce,* Sandarac.

POUND, *Li'bra, Li'tra, As, Pon'do, Bage'dia* (of twelve oz.), *Barda'dia*, (F.) *Livre*, (from *pondere*, 'to weigh.') A weight, consisting of twelve ounces Troy,—sixteen ounces avoirdupois. See Weights and Measures.

POUPART'S LIGAMENT, Crural arch.

POURD MILK, Colostrum.

POURPIER CULTIVÉ, Portulaca.

POURPRE, Purpura—*p. Blanc*, Miliary fever —*p. de Cassius*, Purple of Cassius.

POURRITURE, (from [L.] *putrere*, 'to rot,') Putrefaction—*p. d'Hôpital*, Hospital gangrene.

POUS, (πους,) Pes.

POUSSE, Pursiness.

POUSSÉE, Lichen.

POUSSIÈRE TUBERCULEUSE (F.), 'tuberculous dust.' A name given by MM. Rilliet and Barthez to fine white or yellow minute points of tuberculous matter occurring in myriads, so as to be likened to dust.

POUSSIF, see Pursiness.

POW, (*poll*,) Head.

POWDER, ([F.] *poudre*,) Pulvis.

Pow'der of Æthio'pia, Guy's. A once celebrated anthelmintic, which consisted of pure *rasped tin*, *mercury*, and *sulphur*, triturated together.

Powder of Aloes, Compound, Pulvis aloes compositus, Pulvis sulphatis aluminæ compositus —p. of Aloes with canella, Pulvis aloes cum canellâ—p. Alum, compound, Pulvis sulphatis aluminæ compositus — p. Antimonial, Chenevix's, Antimonial powder — p. Aromatic, Pulvis cinnamomi compositus—p. Aromatic of chalk, see Confectio Aromatica.

Powder, Arsen'ical, of Côme, *Côme's pow'der, Pul'vis Cos'mi*,(F.)*Poudre caustique du frère Cosme* ou *du Rousselot*—a caustic—is formed of *Arsenious acid*, gr. x; *Red sulphuret of mercury*, gr. xl; powdered *Animal charcoal*, gr. x. It is made into a paste with mucilage.

Powder, Arsen'ical, of Jus'tamond, is made by melting *sulphuret of antimony* 16 parts; *arsenious acid* 1 part, in a crucible. When the mass is cold it must be reduced to powder, and five parts of *extract of opium* be added.

Powder of Arum, Compound, Pulvis de aro compositus—p. of Asarabacca, compound, Pulvis asari compositus — p. of Bladder-wrack, yellow, Pulvis quercûs marinæ — p. Bleaching, Calcis chloridum — p. Botanical, Chinese, see Falsifications, table of—p. Camboge, Pulvis e gummi guttâ —p. Cardinal del Lugo's, Cinchona—p. Castillon, see Powders, Castillon—p. of Catechu, compound, Pulvis Catechu compositus — p. of Chalk, compound, Pulvis cretæ compositus — p. of Chalk with opium, compound, Pulvis cretæ compositus cum opio — p. of Cinnamon, compound, Pulvis cinnamomi compositus—p. Côme's, Powder, arsenical of Côme — p. of Contrayerva, compound, Pulvis contrayervæ compositus — p. Countess's, Cinchona—p. Countess of Kent's, Cantianus pulvis — p. Cyprus, Hibiscus abelmoschus — p. Dover's, Pulvis ipecacuanhæ compositus.

Powder, Do'sia. A celebrated secret remedy in Japan, which, for a thousand years, has caused divine honors to be paid to Kobodaisi, its discoverer.

Powder of Dupuytren, Caustic; (F.) *Poudre de Dupuytren*, formed of 1 part of *Arsenious acid* and 200 parts of *Mild chloride of mercury*. A mild and manageable caustic for causing an eschar on exposed surfaces, and in lupus, &c.

Powder, Earl of Warwick's, Pulvis cornachini—p. of Ethiopia, Powder of Æthiopia.

Powder of Faynard. A celebrated powder for arresting hemorrhage, said to be nothing more than the charcoal of beech wood finely pulverized.

Powder, Fever, Schwanberg's, Antimonial powder.

Powder Folder. In Pharmacy, an apparatus by which papers containing powders are folded of the desired length.

Powder, Gout, Duke of Portland's, Pulvis Ducis Portlandiæ — p. Gray, Hydrargyrum cum cretâ—p. of burnt Hartshorn with opium, Pulvis cornu cervi cum opio — p. of Ipecacuanha, compound, Pulvis ipecacuanhæ compositus — p. of Jalap, compound, Pulvis jalapæ compositus — p. James's, see Antimonial powder—p. James's factitious, Antimonial powder—p. Jesuit's, Cinchona —p. of Kino and opium, Pulvis kino compositus —p. of Kino, compound, Pulvis kino compositus.

Powder, Knox's. A disinfecting preparation, composed of eight parts of *Chloride of sodium*, and three parts of *Chlorinated lime*. An ounce, dissolved in a tumblerful of water, forms a solution of proper strength.

Powder of Lemonade, see Lemonade — p. of Magnesia, compound, Pulvis de magnesiâ compositus — p. of the Marquis, Marchionis pulvis— p. Mead's, against the bite of a Mad dog, Pulvis antilyssus—p. Myrrh, compound, Pulvis myrrhæ compositus—p. Portland, Pulvis Ducis Portlandiæ —p. of Rhubarb, compound, Pulvis rhei compositus —p. Saline, compound, Pulvis salinus compositus — p. of the three Sanders, see Diatrium — p. Scammony and aloes, Pulvis scammonii cum aloe — p. Scammony, compound, Pulvis scammoneæ compositus—p. of Senna, compound, Pulvis sennæ compositus—p. Sneezing, see Veratrum album —p. Spruce beer, see Spruce beer—p. of Sympathy, Sympathetic powder — p. Talbor's, Cinchona — — p. Tennant's, Calcis chloridum — p. Tonquin, Pulvis cobbii — p. Tooth, Dentifrice — p. Tragacanth, compound, Pulvis tragacanthæ compositus — p. Vichy water, see Vichy, mineral waters of.

Powder, Vien'na, *Pulvis caus'ticus Vindobonen'sis ;* (composed of equal parts of *Quicklime* and *Potassa cum calce*.) In using it, it is made into a paste— *Vien'na paste, Pas'ta caus'tica Vienuen'sis*, (F.) *Caustique de Vienne, Pâte Caustique de Vienne*—with spirits of wine, and is applied on the diseased part, previously circumscribed by a hole cut in sticking plaster.

To be left on from 10 to 20 minutes, according to the depth of the eschar required. Used in cases of lupous ulceration.

By fusing the potass and lime, and raising the heat so as so cause ebullition, the caustic may be run into cylinders:—when it is called *Caustique-Filhos, Caus'ticum Viennen'sē fu'sum Fil'hos*, from the name of the author of the process.

Powders, Castillon or Castilhon, so called from the name of the physician who first proposed them. They are formed of *Sago*, in powder; *Salep*, in powder; *Tragacanth*, in powder, each, four parts; *Prepared oystershells*, one part, *Cochineal*, half a part, divided into powders of one drachm each; one of which is boiled in a pint of milk, and the decoction used *ad libitum*, as a demulcent in diarrhœa and dysentery. Dorvault makes *poudre de Castilhon* synonymous with arrow root.

Powders, Effervescing, Powders, Soda.

Powders, Effervescing, Aperient, Powders, Sedlitz—p. Ginger-beer, see Amomum zingiber.

Powders, Rochelle, see Powders, soda; and Sedlitz, mineral waters of.

Powders, So'da, *Pul'veres effervescen'tes*, (Ph. U. S. 1863,) seu *aëroph'ori, Efferves'cing powders*, (F.) *Poudres gazifères simples*. (*Sodæ bicarb.* ℥vj, in *tartaric acid*, ℥v. Divide each powder into twelve equal parts; and keep part of the bicarbonate and acid in a paper of different

colours. A pleasant, cooling drink; taken during effervescence.

Sedlitz Powders, Rochelle powders, Aperient effervescing powders, Pul'veres aperien'tes effervescen'tes (Ph. U. S. 1863,) (F.) *Poudres gazifères laxatives* ou *Poudres de Sedlitz*, (*Sodæ bicarb.* in pulv. ℥j; *Potass et Sodæ tartrat.* in pulv. ℥iij; *Acid Tartar.* in pulv. ℈vij. Mix the bicarbonate with the tartrate, and divide into 12 parts. Divide, also, the tartaric acid into 12 parts. Keep the parts of the mixture and of the acid in separate papers of different colours. See Sedlitz, mineral waters of.

POWER, ([F.] *Pouvoir*, from *posse*, 'to be able,') Faculty—p. Inherent, Irritability—p. Sensoria, see Sensorial—p. Tonic, Irritability.

POX, (from *pocks*,) Syphilis, Variola — p. Chicken, Varicella.

Pox Doctor, Syphilidiater.

Pox, French, Syphilis — p. Grease, see Grease —p. Horn, see Varicella — p. Noddle, Syphilomania — p. Small, Variola — p. Swine, see Varicella —p. Water, see Varicella.

POZZUO'LI, MIN'ERAL WA'TERS OF. Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Acqua della pietra*, Temp. 91° Fah. 2. *Acqua di Cavalcanti*, Temp. 100°. *A. di subveni homini*, Temp. 102°; *A. del cantarello*, Temp. 86 to 89°; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107°. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

PRACTICE OF PHYSIC, Therapeutics.

PRACTITIONER, GENERAL, Surgeon apothecary—p. Irregular, see Irregular—p. Regular, see Regular—p. Routine, Routinist.

PRÆ. In composition, 'before.'

PRÆBIUM, (from *præbeo*, contracted from *præhibeo*, 'to offer, allow,') Dose.

PRÆCAUTIO, (*præ*, and *caveo*, *cautum*, 'to guard against,') Prophylaxis.

PRÆCIPITANS, (*præcipitare*, 'to throw down,') Absorbent—p. Magnum, Sepia.

PRÆCIPITATUM ALBUM, 'white precipitate,' Hydrargyrum præcipitatum—p. Rubrum, 'red precipitate,' Hydrargyri nitricoöxydum.

PRÆCISIO PRÆPUTII, (*præcidere*, *præcisum*, 'to cut off,') Circumcision.

PRÆCOCIA, (*præcox*, 'ripening early,') Prunus Armeniaca.

PRÆCOCITY, Precocity.

PRÆCOGNITIO, (*præ*, and *cognitio*, 'knowledge,') Prognosis.

PRÆCOR'DIA, (*præ*, and *cor*, gen. *cordis*, 'the heart.') The diaphragm; also, the thoracic viscera, and the epigastrium.

Præcor'dial or Precor'dial Re'gion, *Re'gio præcordi'aca* seu *præcordia'lis*, is the epigastric region. Also, and more properly, the region of the heart. A line drawn from the inferior margins of the third ribs across the sternum, passes over the valves of the pulmonary artery a little to the left of the mesial line, and those of the aorta are behind them, but about half an inch lower down. A vertical line, coinciding with the left margin of the sternum, has about one-third of the heart, comprising the upper portion of the right ventricle, on the right, — and two-thirds, comprising the lower portion of the right ventricle and the whole of the left, on the left. This is the præcordial region.

PRÆCORDIUM, *Fossette du cœur* — p. Pedis, Metatarsus.

PRÆCOX MATURITAS, Precocity.

PRÆCUSTODIA, (*præ*, and *custodio*, 'to watch,') Prophylaxis.

PRÆDIASTOLICUS, Prediastolic.

PRÆDICTIO, (*præ*, and *dicere*, *dictum*, 'to say,') Prognosis.

PRÆDISPOSITIO Predisposition.

PRÆDIVINATIO, (*præ*, and *divinare*, *divinatum*, 'to divine,') Mantia.

PRÆDOMIN'IUM, (*præ*, and *domo*, *domitum*, 'I subdue.') Predominance of one thing over another.

Prædominium A'quæ. A predominance of watery fluid,—*Tenu'itas aquo'sa*.

Prædominium San'guinis Arterio'si. A predominance of arterial blood, *Arterios'itas san'guinis*.

Prædominium San'guinis Veno'si, *Venos'itas San'guinis*. Predominance of venous blood.

PRÆFOCATIO, (*præfocare*, *præfocatum*, 'to strangle,') Orthopnœa, Suffocation—p. Faucium, Angone — p. Matricis, Angone — p. Uterina, Angone.

PRÆFOCATION, Strangulation — p. Uterine, Angone.

PRÆFORMATIO, Preformation.

PRÆGNANS, Pregnant.

PRÆGNAS, Pregnant.

PRÆGNATIO, Fecundation, Pregnancy.

PRÆGNATUS, Fecundation, Pregnancy.

PRÆGNAX, Pregnant.

PRÆGUSTATIO, (*præ*, and *gustare*, *gustatum*, 'to taste,') *Avant-gout*.

PRÆHENSIO, Prehensio.

PRÆLIN'GUA. The anterior part or tip of the tongue.

PRÆLIUM, ('a contest,') Coition.

PRÆLUM, Press, Tourniquet — p. Arteriale, Tourniquet.

PRÆLUMBARIS, Prelumbar.

PRÆMORPHISMUS, Premorphism.

PRÆNOTIO, (*præ*, and *noscere*, *notum*, 'to know,') Prognosis.

PRÆNUNTIATIO, (*præ*, and *nuntiare*, *nuntiatum*, 'to announce,') Prognosis.

PRÆPARANTES ARTERIÆ, (from being presumed to prepare the sperm.) Spermatic arteries.

PRÆPARATIO, (*præ*, and *parare*, *paratum*, 'to prepare,') Preparation — p. Chyli, Chylification.

PRÆPARATA VENA, see Facial Vein.

PRÆPARATUM, Preparation.

PRÆPOTEN'TIA, (*præ*, and *potens*, 'powerful.') Great power or strength.

Præpoten'tia Viri'lis. Great, or too great, procreative power on the part of the male.

PRÆPOTIO, (*præ*, and *potio*, 'a drink,') Propotismus.

PRÆPUTIALIS, Preputial.

PRÆPUTII DUCTIO, Masturbation.

PRÆPUTIUM, Prepuce.

PRÆRECTALIS, *Prérectal*.

PRÆSAGIUM, (*præ*, and, *sagio*, 'to perceive quickly,') Mantia.

PRÆSCIENTIA, (*præ*, and *scire*, 'to know,') Prognosis.

PRÆSCITIO, (*præ*, and *scire*, 'to know,') Prognosis.

PRÆSCRIPTIO, Prescription.

PRÆSCRIPTUM, Prescription.

PRÆSEPIOLUM, (dim. of *præsepium*,) Alveolus.

PRÆSEPIUM, (*præ*, and *sepes*, 'an enclosure.') Alveolus.

PRÆSERVATIO, (*præ*, and *servare*, 'to save,') Prophylaxis.

PRÆSERVATIVUM, Amuletum.

PRÆSERVATO'RIA INDICA'TIO. A preservative indication; one proper for preventing the development of disease.

PRÆSERVATORIUS, Prophylactic.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRAIRIE BUSH, STINKING, Ptelea trifoliata—p. Pines, Liatris scabiosa.

PRASINUM VIRIDE, ('leek green,') Cupri subacetas.

PRASINUS, (πρασινος, 'green as a leek,') Porraceous.

PRASI'TES, (πρασιτης, from *prasium*.) Wine in which the leaves of horehound have been infused.

PRASIUM, (πρασιον,) Marrubium.

PRASUM, (πρασον,) Allium prasum.

PRAXIS, (πραξις,) Action.

PRAXIS MED'ICA. The practical exercise of the healing art.

PREASER, Rennet.

PRECIPITATE, see Precipitation — p. Red, Hydrargyri nitricoöxydum — p. White, Hydrargyrum præcipitatum.

PRECIPITA'TION, *Præcipita'tio*, (F.) *Précipité*, (*præcipitare*, *præcipitatum*, (*præ*, and *caput*, 'the head,') 'to throw *headlong*.') The action by which a body abandons a liquid in which it is dissolved, and becomes deposited at the bottom of the vessel. The matter, so thrown down or precipitated, is called a *precip'itate*.

PRÉCIPITATION DE LA MATRICE, Procidentia uteri.

PRÉCIPITÉ BLANC, 'white precipitate,' Hydrargyrum præcipitatum — *p. Noir*, see Hydrargyri oxydum cinereum — *p. per se*, Hydrargyri nitricoöxydum — *p. Rouge*, Hydrargyri nitricoöxydum.

PRECOC''ITY, *Præco'ciousness*, *Præ'cox matu'ritas*, *Matu'rity præco'cious*, (F.) *Précocité*, (*præcox*, gen. *præ'cocis*, from *præ*, and *coquere*, 'to ripen.') Rapid development before the usual time. See Præotia.

PRECORDIAL, Præcordial.

PRECUR'SORY, *Præcurso'rius*, *Premon'itory*, *Præmonito'rius*, (F.) *Prémonitoire*, *Précurseur*, (*præ*, and *curro*, *cursum*, 'I run.') That which precedes or foretels.

PRECUR'SORY or PREMON'ITORY SIGNS or SYMPTOMS, (F.) *Signes précurseurs* ou *prémonitoires*, *S. avant-coureurs*, are those which indicate an approaching disease.

PREDIASTOL'IC or PREDIAS'TOLIC, *Prædiastol'icus*, (*præ*, and *diastole*.) That which precedes the diastole of the heart,—as '*prediastolic* friction sound.'

PREDISPONENT or PREDISPOSING CAUSES, see Causes, predisponent.

PREDISPOSIT''ION, *Prædisposit''io*, *Semin'ia morbo'rum* (Gaubius); (*præ*, and *disponere*, *dispositum*, 'to dispose.') (F.) *Prédisposition*, *Imminence morbide*. That constitution or condition of the body, which disposes it to the action of disease under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises solely from the predisposition, or under the additional influence of an extremely slight exciting cause, it is, by some, termed a *disposition*.

PREDOR'SAL, *Prædorsa'lis*, (*præ*, and *dorsum*, 'the back.') That which is in front of the back.

PREDORSAL REGION of the vertebral column is the anterior surface of the dorsal region.

PRÉ-DORSO-ATLOÏDIEN, Longus colli.

PRÉ-DORSO-CERVICAL, Longus colli.

PREËXISTENCE OF GERMS, see Preformation.

PREFORMA'TION, *Præforma'tio*, (*præ*, 'before,' and *formatio*, 'forming.') An ancient theory of generation, which maintained that the germs of every part exist, but not visibly, before fecundation, and that fecundation occasions their development. It was the doctrine of *præexistence of germs*.

PREG'NANCY, *Prægna'tio*, *Prægna'tus*, *Imprægna'tio*, (from *prægena'tio*, *præ*, and *genere*, 'to beget.') *Ingravida'tio*, *Hysterocye'sis*, *Gravid'itas*, *G. uteri'na*, *Em'cymon*, *Cye'sis*, *Encye'sis*, *Em'cysis*, *Encymo'sia*, *Cyopho'ria*, *Gesta'tion*, *Fœta'tion*, *Ingravida'tion*, *Utero-gesta'tion*; (F.) *Grossesse*. The state of a female who has within her a fecundated germ, which gradually becomes developed in or out of the uterus. When placed in the cavity of the uterus, — by virtue of the vital force by which it is animated, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment necessary for its gradual development, during the space of ten lunar months or two hundred and eighty days — the ordinary *term* or *duration of gestation*, although the period may be protracted to 300 days or upwards, — at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus: at times, the uterus contains two or three.—See Reproduction. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natu'ral* or *u'terine*, when the fœtus is carried in the cavity of the womb: and, 2. *Preternat'ural* or *ex'traüt'erine*, *Exfœta'tion*, *Concep'tio vitio'sa*, *Paracye'sis* seu *Eccye'sis*, *Ecthysterocye'sis*, *Echthysterocye'sis*, *Dysto'cia* seu *Dyscye'sis* seu *Gravid'itas extraüteri'na*, (F.) *Grossesse contre-nature*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture. The usual *signs of pregnancy* are, — suppression of the catamenia; the abdomen gradually enlarging, and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker, and the follicles more developed; kyestein in the urine from an early period; a bluish tint of the vagina after the fourth week; about the fifth month, the evidence by *ballottement*, the placental *souffle*, and by the sound of the fœtal heart heard on auscultation; the motion of the fœtus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

PREGNANCY, ABDOM'INAL, *Eccye'sis abdomina'lis*, *Cœliocye'sis*, *Gravid'itas abdomina'lis*, (F.) *Grossesse abdominale*. That in which the ovum has escaped into the cavity of the abdomen.

PREGNANCY, AFŒ'TAL, *Preg'nancy without a fœ'tus*, (F.) *Grossesse afœtale* ou *sans fœtus*. Pregnancy produced by a false or degenerate conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *sarcohysteric*, *hydrohysteric*, *gazohysteric*, and *hematohysteric pregnancies*.

PREGNANCY, BIGEM'INAL, (F.) *Grossesse bigéminale* ou *gémellaire*, *Double pregnancy*. Pregnancy in which there are twins in utero. — Madame Boivin.

PREGNANCY, COM'PLEX, (F.) *Grossesse complexe*, *G. inter-extra-utérine*, is when the womb, besides a fœtus, contains much water, hydatids, a mole, &c.

PREGNANCY, COM'POUND, *Polybreph'ia*, *Polycye'sia*, *Polycye'sis*, (F.) *Grossesse composée*, is when there are two or three fœtuses in the cavity of the uterus.

PREGNANCY, DOUBLE, Pregnancy, bigeminal—.

p. Duration of, see Pregnancy — p. Extraüterine, see Pregnancy.

Pregnancy, False, *Gravid'itas spu'ria*, (F.) *Grossesse fausse* ou *apparente, Pseudocye'sis*. Authors have thus called different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best informed practitioners. These diseases may be seated in the uterus or its dependencies, in the intestines or some other part of the abdomen. They may be;—a mole, hydatids, water, blood, or polypus distending the parietes of the uterus;—chronic enlargement of the uterus; development of tumours, &c., in its substance;—scirrhus; dropsy of the ovaria; ascites; tympanites, &c.

Pregnancy, Fœ'tal, (F.) *Grossesse fœtale*. Pregnancy in which there is a fœtus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary, bigeminal, trigeminal*, and *sarcofœtal* pregnancies, which form the first order; and the *tubal, ovarial*, and *abdominal*, which constitutes the second.

Pregnancy, Gazohyster'ic, (F.) *Grossesse Gazo-hystérique*. Afœtal pregnancy, caused by development of air or gas in the cavity of the womb.—Madame Boivin.

Pregnancy, Hæ'matohyster'ic, (F.) *Grossesse hémato-hystérique*. Afœtal pregnancy, caused by accumulation of blood in the uterus. — Madame Boivin.

Pregnancy, Hydrohyster'ic, (F.) *Grossesse hydro-hystérique*. Afœtal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

Pregnancy, Interstit''ial, *Gravid'itas in u'teri substan'tia* seu *interstitia'lis*. The development of the embryo in the proper substance of the uterus. The case generally terminates fatally at an early period of gestation; the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

Pregnancy, Mor'bid, *Paracye'sis, Dysto'cia, Dysœye'sis*. The progress of pregnancy disturbed or endangered by the supervention of general or local disorder.

Pregnancy, Ova'rian, *Eccye'sis ova'ria, Oäriocye'sis, Oëcye'sis, Gravid'itas u'teri* seu *extraüteri'na in ova'rio*, (F.) *Grossesse ovarienne* ou *de l'ovaire*. Pregnancy in which the fœtus is developed in the interior of the ovary.

Pregnancy, Plea of. A plea, which a woman, capitally convicted, may set up in arrest of execution until she is delivered. See Jury of Matrons, and De ventre inspiciendo.

Pregnancy, Pretend'ed. The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.) *Supposition de part*. This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.

Pregnancy, Sar'cofœ'tal, (F.) *Grossesse sarco-fœtale*. Pregnancy in which there are one or more fœtuses, and one or more moles. — Madame Boivin.

Pregnancy, Sarcohyster'ic, (F.) *Grossesse sarco-hystérique*. Afœtal pregnancy formed by moles, hydatids, or a false conception. — Madame Boivin.

Pregnancy, Sol'itary, (F.) *Grossesse solitaire* ou *simple*. Pregnancy in which there is a single fœtus.—Madame Boivin.

Pregnancy, Trigem'inal, (F.) *Grossesse trigéminale* ou *triple*. Pregnancy in which there are three fœtuses in the cavity of the uterus.—Madame Boivin.

Pregnancy, Tu'bal, (F.) *Grossesse tubaire; Eccye'sis tuba'lis, Gravid'itas tuba'ria*. Pregnancy where the fœtus remains and is developed in the Fallopian tube.

Pregnancy, Uterine, see Pregnancy.

Pregnancy, Uteroäbdominal, (F.) *Grossesse utero-abdominale*. Pregnancy consisting of two fœtuses; one in the uterus — the other in the abdominal cavity.—Madame Boivin.

Pregnancy, Uteroöva'rial, (F.) *Grossesse utéro-ovarienne*. Pregnancy with two fœtuses, one in the womb, the other in the ovary.

Pregnancy, Uterotu'bal, (F.) *Grossesse utéro-tubaire*. Pregnancy in which there is at thy same time a fœtus in the womb and another in the Fallopian tube.

Preg'nant, *Præg'nans, Præg'nas, Præg'nax Fe'tus, Fœ'tus, Encar'pus, Grav'ida, Ple'na mu'lier, Incinc'ta, Grav'id, Breed'ing*, (Old Eng.) *Beal'ing*, (F.) *Enceinte*. One in a state of pregnancy;—one with child.

Prehensio, (*prehendere, prehensum*, 'to lay hold of,') Prehension, Catalepsy, Epilepsy.

Prehen'sion, *Prehensio*. The act of laying hold of.

Prehension of Food is the act of seizing and carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assümp'tio, Proslep'sis, Pros'phora*.

PRÊLE, ([I.] *asparello*, 'rough,'—the stalk,) Hippuris vulgaris.

PRÉLOMBAIRE, Prelumbar.

PRÉLOMBO-PUBIEN, Psoas parvus — *p Trochantin*, Psoas magnus.

Prelum, Press—p. Arteriale, Tourniquet.

Prelum'bar, *Prælumba'ris*, (F.) *Prélombaire*, (*præ*, and *lumbi*, 'the loins.') That which is placed before the loins. The prelumbar surface of the spinal column is the anterior surface of the lumbar portion.

PREMIÈRES VOIES, 'first passages,' Primæ viæ.

Premolar, (*præ*, and *molares*,) see Molar teeth.

Premonitory, (*præ*, and *moneo*, 'to admonish,') see Precursory.

Premorph'ism, *Præmorphism'us*, (*præ*, and μορφοω, 'I shape.') The aggregate of laws by which a new formation is developed from the primordial cell.

Prenan'thes, (πρηνης, 'bending downward,' and ανθος, 'a flower,') *Gall of the Earth, Dewitt Snake'root. Lion's Foot*. There are many species of this indigenous plant, whose root and milky juice are very bitter. They are used in popular practice in dysentery; and in the form of cataplasm to bites of serpents.

Prenanthes Alba, Nabalus albus—p. Serpentaria, Nabalus albus.

PRENDRE INSCRIPTION, 'to take inscription,' see Matriculate.

PRÉPARATE (VEINE), see Facial vein.

Prepara'tion, *Præpara'tio*, (*præ*, and *parare, paratum*, 'to get ready.') The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmacentical operation;—*Præpara'tum*.

Any part of a body, preserved for the use of the anatomist, or others, is so called.

Prep'uce, *Præpu'tium, Epago'gium, Pos'thē, Pel'la, Pos'thium, Pu'tium, Acropos'thia, Acrobys'tia, Fore'skin*, (said to be from *præ*, and *puto*, 'to cut off,' or from *putea*, 'to smell,' or from *præ*, and *pudendum*; but, most probably, from προ, or *præ*, and ποσθιον, 'penis.') The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by areolar membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the

corona, a small *cul-de-sac*, above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Præpu'tium clitor'idis*.

PREPU'TIAL, *Præputia'lis*. Belonging or relating to the prepuce;—as the 'preputial secretion,'—or that which takes place from the lining of the prepuce covering the glans.

PRÉRECTAL, Prærecta'lis, (*præ*, and *rectum*,) applied to that which is in front of the rectum.

PRÉROTULIEN, see *Bourse*.

PRESBYODOCHIUM, (πρεσβυς, 'old,' and δεχομαι, 'to receive,') Gerocomium.

PRESBYON'OSI, (πρεσβυς, 'old,' and νοσος, 'disease.') Diseases of old age.

PRES'BYOPE, *Presby'tes*, (F.) *Presbyte*, (πρεσβυς, 'old,' and ωψ, 'the eye.') One who is long-sighted or affected with presbyopia.

PRESBYOPIA, Presbytia.

PRESBYOP'IC, *Presbyo'picus, Presbyt'ic, Presby'ticus*, (F.) *Presbytique*. Relating or belonging to presbyopia or longsightedness.

PRESBYSPHACELUS, (πρεσβυς, 'old,' and *sphacelus*,) Gangrene of old people.

PRESBY'TIA, *Presbyo'pia, Telora'sis, Amblyo'pia proximo'rum, Vi'sus seni'lis, Hypermetrop'ia, Pres'byopy*, (F.) *Vue longue*; (from πρεσβυτης, 'an old person.') A very high degree is termed *Hyperpresby'tia*. A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long'sightedness, Far'sightedness, Parop'sis longin'qua, Dyso'pia proximo'rum*.

PRESBYTIC, Presbyopic.

PRESCRIP'TION, *Præscrip'tio*, (*præ*, and *scribere, scriptum*, 'to write,') *Anag'raphē, For'mula, F. med'ica, Sched'ula, Impe'rium, Præscrip'tum, Præscrip'tio med'ica, Recep'tum, Recep'ta, Rec''ipē, Receipt*, (F.) *Formule, Ordonnance, Recette*. The formulæ which the physician writes for the composition of medicines adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A compound prescription has been divided into four parts:—the *basis* or principal ingredient of the prescription; the *adjuvans*, or that which is designed to promote the action of the former; the *corrigens*, or that intended to correct its operation, or obviate any unpleasant symptom which it may be apt to produce; and the *constituens, excipiens* or *vehic'ulum, constitu'ent, excip'ient* or *ve'hicle*, the substance which gives to the other ingredients consistence or form. All these are seen in the following formula for cathartic pills:

℞—Aloës.....	ʒj	*Basis.*
Hydrarg. Chlorid. Mit..	gr. x ..	*Adjuvans.*
Olei Carui.....	gtt. v...	*Corrigens.*
Syrupi.....	q. s. ...	*Constituens.*

M. et fiant pilulæ xx. See Symbol.

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

The doctrine of medicinal combination is termed *Iamatotaxiolog''ia, Iamatosyntaxiolog''ia, Ars form'ulas med'icas concinnan'di*.

The vocabulary in the author's "Medical Student," second edition, Philad., 1844, will aid not only in translating, but in writing, prescriptions *more solito*. See, also, Pereira, Selecta è Præscriptis, 14th edition, London, 1864.

PRESENTATION, from (Lat.) *præsens*, (*præ*, 'before,' and *ens, entis*, 'being.') The part of a fœtus which is felt *presenting*, on examination *per vaginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*; when any other part, *preternatural*; and the labour is styled *perverse* or *preternatural, Parodyn'ia* seu *Dysto'cia perver'sa, Cross-birth*, (F.) *Accouchement contre nature*. When any part besides the head, feet, knees, or breech presents, the operation of *turning* becomes necessary.

When a portion of the presenting mass of the fœtus becomes changed for another, in complicated presentations, the case has been termed one of *sub'stituted presenta'tion*.

PRESERVATIVE, (*præ*, and *servare*, 'to save,') Prophylactic.

PRESIS, (πρησις,) Swelling.

PRÈSLE, (*Prêle*,) Hippurus vulgaris.

PRESMA, (πρησμα,) Swelling.

PRESPI'NAL, *Præspina'lis*, (*præ*, and *spina*, 'the spine.') That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

PRESS, *Præ'lum, Præ'lum, Presso'rium, Pi-ès'ter, Piesté'rion*, (F.) *Pressoir, Presse*, (*premere, pressum*, 'to squeeze.') An instrument for subjecting matters to considerable pressure, for the purpose of separating the liquid from the solid portion.

PRESS OF HEROPHILUS, Torcular Herophili.

PRESSE-ARTÈRE, Serre-nœud de Deschamps, Serre-Artère. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate six or seven lines long, and three broad, and of a rod or stem two inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

PRESSE-URÈTHRE, Jugum Pe'nis. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

PRESSIO, (*premere, pressum*, 'to press,') Pressure.

PRESSION ABDOMINALE, Pressure, abdominal.

PRESSOIR, Press—*p. d'Hérophile*, Torcular Herophili.

PRESSORIUM, Press.

PRESSURE, *Pres'sio*. The action of pressing.

PRESS'URE, ABDOM'INAL, (F.) *Pression Abdominale*. A mode of examination by means of which the sensibility, size, suppleness, or hardness of

any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was affected by this action. No great information can of course be derived from it.

PRÉSURE, Rennet.

PRESYSTOL'IC or PRESYSYS'TOLIC, *Præsystol'icus* (*præ*, and *systole*.) That which precedes the contraction of the heart—as "*presystolic* friction sound."

PRETENDED DISEASES, Feigned diseases.

PRETIB'IAL, *Prætibia'lis*, (*præ*, and *tibia*, 'the tibia.') That which is situate before the tibia; as the *iliopretibial* and *ischiopretibial* muscles.

PREVENTIVE, (*prævenire*, *præventum*, (*præ*, and *venire*,) 'to come before.') Prophylactic.

PREVEN'TIVE, ROY'AL. An empirical preparation, used as a prophylactic against the venereal virus. It is a solution of *acetate of lead*,—the Liquor Plumbi Subacetatis dilutus.

PREVERTEBRAL APONEURO'SIS. The aponcurosis which covers the muscles of the prevertebral region.

PREVERTEBRAL AR'TERY, (F.) *Artère prévertébrale* ou *méningienne postérieure*. A ramus of the meningeal branch, and sometimes even of the trunk, of the pharyngeal artery, which is distributed to the prevertebral region.

PREVERTEBRAL MUSCLES, see Cervical region, anterior—p. Region, Cervical region, anterior.

PRIAPEIA, (after Priapus.) Nicotiana rustica.

PRIAPIS'CUS, (πριαπισκος.) Name of a piece of wood which forms part of the *scamnum Hippocraticum*, and is like the male organ of generation. Paulus, of Ægina, calls thus a tent of linen shaped like a penis.

PRIAPISM'US, (πριαπισμος,) *Tenti'go*, *T. Pe'nis*, *Pri'apism*, *Horncolic* (vulg.), *Enta'sia Priapis'mus*, *Rhopalis'mus*, *Sty'ma*, *Sty'sis*, (after *Priapus*.) Constant and distressing erection, with or without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbific causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor, are the means usually had recourse to for its removal.

PRIAPITIS, (*priapus*, 'penis,' and *itis*,) Phallitis.

PRIA'PUS, (Πριαπος,) *Mutun'nus*. In ancient mythology the deity who presided over gardens and the parts of generation, so called *propter deformitatem et membri virilis magnitudinem*.

PRIAPUS, Penis—p. Cervi, see Cervus—p. Ceti, Leviathan penis.

PRICKET, Sedum acre.

PRICKING, (from [Sax.] prician, 'to prick,) (F.) *Picotement*. A variety of pain, compared to that which pointed bodies would occasion.

PRIDE OF CHINA, Melia azedarach—p. of India, Melia azedarach—p. Tree, Melia azedarach.

PRIDEWEED, Erigeron Canadense.

PRIEST PHYSICIANS, see Asclepiadæ.

PRIEST'S PINTLE, Arum maculatum.

PRIM, Ligustrum vulgare.

PRIMA CELLA COLI, 'first cell of the colon,' Cæcum.

PRI'MÆ VI'Æ, (F.) *Premières voies*. 'The *first passages*.' The stomach and intestinal canal: —the lacteals being the *secun'dæ vi'æ* or '*second passages*.' See Ways, digestive.

PRIMAIRE, Primary.

PRI'MARY, *Prima'rius*, *Primiti'vus*, (F.) *Primitif*, *Primaire*, (from *primus*, 'first.') First in place, time or character; as *primary* symptoms, in contradistinction to *secondary*.

PRIMARY CELL, see Cell.

PRIMEVÈRE, (from *primum ver* 'first spring.') Primula veris.

PRIMIP'ARA, *Primipartu'riens*, (F.) *Primipare*, (*primus*, 'first,' and *parere*, 'to bring forth.') A female who brings forth for the first time.

PRIMIPARTURIENS, (*primus*, 'first,' and *parturio*, 'to bring forth,') Primipara.

PRIMISTERNAL, *Primisterna'lis*, (*primus*, 'the first,' and *sternum*, 'the sternum.') M. Béclard has called *os primisternal* ou *clavisternal*, the bony portion of the sternum.

PRIMIT''IÆ, (from *primus*, 'first.') The *first waters* or *the waters* discharged before the extrusion of the fœtus.

PRIMITIVE, Primary—p. Band, see Nerve fibres—p. Streak, Groove, primitive.

PRIMORDIAL CELL, see Cell.

PRIMORDIUM, (*primus*, and *ordior*, *orsus*, 'to begin,') Arche.

PRIMROSE, EVENING, Œnothera biennis—p. Tree, Œnothera biennis.

PRIMULA OFFICINALIS, (*prim'ulus*, 'first,' so called, because it flowers in the beginning of the spring,) P. veris—p. Variabilis, P. veris.

PRIM'ULA VE'RIS, *P. officina'lis* seu *variab'ilis*, *Verbas'culum*, *Paral'ysis*, *Her'ba paralys'eos* seu *paralyt'ica*, the *Cow'slip*, *Pai'gil* or *Pea'gle*, *Herb Pe'ter*, *Pal'sywort*, (Prov.) *Cow'striplings*, *Cow'stropple*, *Crew'el*, (F.) *Primevère*, *Herbe à la paralysie*, *Fleur de coucou*, *Oreille d'ours*, *Brairète*; *Ord.* Primulaceæ. *Sex. Syst.* Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

PRIMULA VULGA'RIS. The leaves and roots of this plant have been used as sternutatories.

PRINCE ARTHUR'S FARINACEOUS FOOD, see Farinaceous.

PRINCEPS, gen. *Prin'cipis*, Rectum.

PRIN'CEPS CERVI'CIS (*Arteria*), *Cer'vical Art'ery*. A branch of the occipital artery, which descends between the splenius and complexus muscles, and may be followed down to the lower part of the neck.

PRINCEPS POL'LICIS (*Arteria*), *Arte'ria mag'na pol'licis*. When the two collateral arteries of the thumb take origin from a common trunk—the trunk is the *Princeps pollicis*.

PRINCIPE CRYSTALLIZABLE DE DÉROSNE, (from *principium*,) Narcotine—*p. de la Mélanose*, see Choroïdea tunica.

PRINCIPES IMMÉDIATS, Principles, immediate.

PRINCIPIUM, 'a beginning,' (from *princeps*, 'the first,') Arche, Element, Principle—p. Acidificans, Oxygen—p. Adstringens, Tannin—p. Byrsodepsicum, Tannin—p. Coriaceum, Tannin—p. Hydrogeneticum, Hydrogen—p. Hydroticum, Hydrogen—p. Oxygenans, Oxygen—p. Salivale, see Saliva—p. Scytodepsicum, Tannin—p. Urinosum, Urea.

PRINCIPLE, (*princeps*, 'the first,') Element, Principium.

PRINCIPLE, COLOURING, OF THE BLOOD. See Hæmaphæin, and Hæmatin. P. Digestive, Pepsin—p. Vital, see Vital principle.

PRIN'CIPLES, IMME'DIATE, (F.) *Principes immédiats*, *Matériaux immédiats*. A name given to a considerable number of substances, composed of at least three elements, and which are obtained from animals and vegetables without alteration, by simple processes, and, in some measure, *immediately*.

PRINCIPLES, IMMEDIATE, OF AN'IMALS, *Prox'imate principles*, *Organ'ic El'ements*, *Com'pounds of Organization*. These are divided into acid

principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric, rosacic, purpuric, allantoic, caseic, butyric*, &c. The fatty principles are:—*stearin, elain, cholesterin*, &c.; and the last division includes the most important compounds of organization:—*fibrin, gelatin, albumen, casein, osmazome*, &c.

PRINCIPLES, PROXIMATE, P. immediate.

PRINOS (of the ancients), (πρινος,) Ilex aquifolium.

PRI'NOS, *P. verticilla'tus, Alcan'na ma'jor latifo'lia denta'ta, Aquifo'lium fo'liis decid'uis, Pri'nos Grono'vii* seu *padifo'lius, Black Alder, Virgin'ia* or *Whorl'ed Win'terberry, Fe'verbush*, (F.) *Apalachine à feuilles de Prunier. Ord.* Aquifoliaceæ. *Sex. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States —*Prinos*, (Ph. U. S.)—is astringent, bitter, and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona in intermittents, and as a tonic.

PRINOS GLABER, see P. lævigatus—p. Gronovii, Prinos.

PRINOS LÆVIGA'TUS, *Smooth Win'terberry*, and PRINOS GLA'BER, *Ink'berry*; indigenous; have the same properties as Prinos.

PRINOS PADIFOLIUS, Prinos.

PRION, (πριων,) Saw.

PRIONO'DES, (*prion*, and *odes*,) *Ser'rated.* Applied to the sutures of the head.

PRI'OR, 'first, foremost,' as

PRIOR ANNULA'RIS, *Interos'seus quar'tus* of Winslow. An internal interosseous muscle which arises from the outside of the metacarpal bone of the ringfinger, and is inserted into the outside of the tendon on the back of the ringfinger. Its use is to draw the ringfinger outwards.

PRIOR IN'DICIS, *Exten'sor ter'tii interno'dii in'dicis*, (F.) *Sous-métacarpo-latéri-phalangien.* It arises from the outer or radial side of the metacarpal bone of the forefinger, and is inserted into the outside of the tendon on the back of the forefinger. *Action:*—to draw the finger outwards, towards the thumb.

PRIOR INDICIS PE'DIS, *Abduc'tor In'dicis pe'dis.* An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the foretoe. *Action:*—to pull the foretoe inwards.

PRIOR MEDII, Prior medii digiti.

PRIOR ME'DII DIG''ITI, *Prior Me'dii, Sec'ond interos'seous* of Douglas. An external interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action:*—to draw the middle finger outwards.

PRIOR ME'DII DIG''ITI PE'DIS, *Adduc'tor me'dii dig''iti pe'dis.* An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use:*—to pull the middle toe inwards, or towards the inner side of the foot.

PRIOR MIN'IMI DIG''ITI, *Adduc'tor min'imi dig''iti.* An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe, and is inserted into the inside of the root of the first bone of the little toe. *Action:*—to pull the little toe inwards.

PRIOR TER'TII DIG''ITI PE'DIS, *Adduc'tor ter'tii dig''iti pe'dis.* An internal, interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the side of the root of the first bone of the third of the small toes. *Action:*—to pull the third of the small toes inwards.

PRISE, Dose.

PRISIS, (πρισις,) Brygmus, Trepanning.

PRISMA, gen. *Prism'atis*, (πρισμα,) Scobs.

PRISMUS, (πριω, 'to saw, to grind,') Brygmus, Trepanning.

PRIVATE PARTS, Genital organs.

PRIVET, Ligustrum vulgare.

PRIVITIES, Genital organs.

PRIVY, Ligustrum vulgare—p. Members, Genital organs—p. Parts, Genital organs.

PRO, προ, 'for, before.' A common prefix to words.

PROAGOREUSIS, (προαγορευσις, from *pro*, and *αγορευω*, 'to announce,') Prognosis.

PRO'BANG, *Sponge probang, Detruso'rium ex bale'na.* (Allied to *probe.*) A long slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repoussoir d'arêtes.*

PROBARBIUM, (*pro*, and *barba*, 'beard,') Geneias.

PROBASCANIUM, (προβασκανιον, from *pro*, and *βασκαινειν*, 'to cast a spell upon,') Amuletum.

PROBASCANTIUM, Amuletum.

PROBE, (*probo*, 'to try,') Catheterize, Specillum—p. Eyed, see Specillum.

PROBING, see Melosis.

PROBOLE, (προβολη, from *pro*, and *βαλλω*, 'to throw,') Processus.

PROCARDIUM, (*pro, and καρδια*, 'heart,') Sorobiculus cordis.

PROCÉDÉ, Process.

PROCEDURE, Process.

PROCEPHALI, (προκεφαλοι, from *pro*, and *κεφαλη*, 'head,') Capitones.

PROCERUS ('tall') NASI, Pyramidalis nasi.

PROCÈS, Process—*p. Ciliaires*, Ciliary processes.

PROCESS, (*procedere, processum*, 'to go forwards.') Apophysis, Processus.

PROC''ESS, *Ra'tio*, (F.) *Procédé.* Procedure,—method of performing any operation, chemical, pharmaceutical, or surgical.

PROCESS, CUNEIFORM, Basilary process—p. Modelling, see Modelling Process—p. of Rau, see Malleus—p. Vertical superior longitudinal, Falx cerebri.

PROCES'SUS. *Aproc''ess. Projectu'ra, Prob'olē*, (F.) *Procès.* An apophysis or eminence of a bone; see Apophysis. Also, any part which seems prolonged beyond others with which it is in connexion; as the *Ciliary processes.*

PROCESSUS ANCONEUS, Olecranon—p. Annularis, Pons Varolii—p. Ascendens, see Maxillary, bone, (superior)—p. Bclenoides, see Bclenoid—p. Blumenbachii, Unciform process—p. Caudatus, Lobulus caudatus—p. Cerebelli ad pontem, Peduncles of the cerebellum—p. Cerebelli ad testes, Peduncles of the cerebellum—p. à Cerebello ad medullam oblongatam, Corpora restiformia—p. Cerebri lateralis, Cornu ammonis—p. Ciliares, Ciliary processes—p. Clavatus, see Funiculi graciles—p. Cochleariformis, see Tympanum—p. Cuneiformis ossis occipitis, Basilary process—p. Dentatus, see Axis—p. Ensiformis, see Sphenoid bone—p. Enteroidei cerebri, Convolutions (cerebral)—p. Falciformis cerebelli, Falx cerebelli—p. Falciformis duræ matris, Falx cerebri—p. Frontalis, see Maxillary bone, (superior)—p. Gracilis of Rau, see Malleus—p. Laterales uteri, Tubæ Fallopianæ—p. Mamillares, Papillæ of the kidney, Olfactory nerves—p. Mamillares cerebri, Mamillary tubercles—p. Mastoïdeus, Mastoid process—p. Nasalis, see Maxillary bone (superior)—p. Odontoideus, see Axis—p. Olivaris, Olivary Process—p. Orbicu-

laris cerebri, Infundibulum of the brain — p. Papillares, Olfactory nerves — p. Papillarum, Olfactory nerves — p. Rachidianus, Medulla spinalis— p. Sterni xiphoideus, Xiphoid.

Proces'sus Ter'etes, *Eminen'tiæ* seu *Fascic'uli ter'etes.* Two slightly convex bodies forming the anterior wall or floor of the fourth ventricle of the brain. They are separated by a longitudinal groove, which is continuous, inferiorly, with the sulcus longitudinalis posterior of the spinal cord. They are crossed transversely by several white and gray fasciculi—*lineæ transver'sæ, stri'æ medulla're*s — the origin of the auditory nerves.

Processus ad Testes, see Valvula Vieussenii — p. Transversus duræ matris, Tentorium — p. Uncinatus, Olecranon, Unciform process, see Coracoid process — p. Uvifer, Uvula—p. Ventriculi, Duodenum — p. Xiphoides, Xiphoid cartilage — p. Xiphosternalis, Xiphoid cartilage — p. Zygomaticus, Zygomatic process.

PROCHEILA, (pl. of *procheilon,*) Antelabia.

PROCHEILIDION, (*προχειλιδιον,*) Procheilon.

PROCHEI'LON, (*προχειλον,*) *Procheilid'ion, Prola'bium, Antela'bium,* (*pro,* and *χειλος,* 'a lip.') The extreme projecting part or margin of the lips.

PROCHEUMA, (*pro,* and *χεω,* 'to pour,') Parenchyma.

PROCIDENCE DE L'ŒIL, (*procidere,* from *pro,* and *cadere,* 'to fall,') Exophthalmia.

PROCIDENTIA, Prolapsus — p. Ani, Proctocele—p. Intestini recti, Proctocele—p. Iridis, Ptosis iridis—p. Oculi, Exophthalmia—p. Sedis, Proctocele—p. Uteri, Prolapsus uteri.

PROCNEMIUM, (*προκνημιον,* from *pro,* and *κνημη,* 'leg.') Tibia.

PROCŒ'LIUS, (*προκοιλιος,*) *Procœ'lus,* (*pro,* and *κοιλια,* 'belly.') One who has a large pendulous abdomen.

PROCŒLUS, Procœlius.

PROCON'DYLUS, (*pro,* and *κονδυλος,* 'a condyle.') The first joint of the fingers; the second being called *κυνδυλος*; the third *μετακονδυλος.*

PROCREATIO, (*pro.* and *creare, creatum,* 'to beget,') Fecundation, Generation — p. Sanguinis, Hæmatosis.

PROCREATION, Fecundation, Generation.

PROC'TAGRA, (*πρωκτος,* 'anus,' and *αγρα,* 'seizure.') Gout in the rectum. Proctalgia.

PROCTAL'GIA, *Proc'tica sim'plex, Proc'tagra, Do'lor a'ni, Proctodyn'ia,* (*proctus,* and *αλγος,* 'pain.') Pain in the anus: generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

Proctalgia, Clunesia — p. Hæmorrhoidalis, Hæmorrhois—p. Inflammatoria, Rectitis—p. Intertriginosa, Chafing — p. Rheumatica, Proctorrheuma.

PROCTATRE'SIA, *Imperfora'tio a'ni,* (*proctus,* and *ατρησια,* 'imperforation.') Imperforate state of the anus.

PROC'TICA, (from *proctus.*) Pain or derangement about the anus, without primary inflammation. A genus in the class *Cœliaca,* order *Enterica,* of Good.

Proctica Exania, Proctocele — p. Marisca, Hæmorrhois—p. Simplex, Proctalgia — p. Tenesmus, Tenesmus.

PROCTISIS, (from *proctus,*) Proctitis.

PROCTI'TIS, *Proc'tisis, Archi'tis, Clune'sia, Cysso'tis,* (*proctus,* and *itis.*) Inflammation of the anus and rectum. Rectitis.

Proctitis Gangrænosa, Proctocace.

PROCTOC'ACĒ, *Procti'tis grangræno'sa* (*proctus,* and *κακος,* 'evil.') A disease of the rectum, so called by Fuchs, which, according to him, is common in Peru, in the neighborhood of Quito and Lima, on the Honduras and Mosquito coasts, in Brazil, and on the Gold coast, &c. It is called by the Portuguese, *Bicho,* and *Bicho di Culo;* by the people of Quito, *Mal del Valle,* from its prevalence in the valleys; and in Africa, *Bitios de Kis.* It is an adynamic, inflammatory condition, frequently ending in gangrene. It has been attributed to bad food, and the use of spices.

PROCTOCE'LE, (*proctus,* and *κηλη,* 'hernia.') *Prolap'sus A'ni* seu *Intesti'ni rec'ti, Proctopto'ma, Proctopto'sis, Hedroce'lē, Archeopto'ma, Archecpto'ma, Archopto'ma, Archeoce'lē, Archopto'sis, Exa'nia, Hæmor'rhois proce'dens* seu *ab exa'niâ, Procide'ntia A'ni* seu *intesti'ni rec'ti* seu *se'dis, Ecto'pia A'ni, Se'des procid'ua, Falling down of the Fun'dament, Com'ing down of the Body,* (F.) *Chute du rectum, C. du fondement, Renversement du rectum.* Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter, with more or less swelling. In the treatment, the application of cold water and astringent lotions must be recommended; and if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA, (*proctus, κυστη,* 'bladder,' and *τομη,* 'section,') see Lithotomy.

PROCTODYNIA, (*proctus,* and *οδυνη,* 'pain,') Proctalgia.

PROCTON'CUS, (*proctus,* and *ογκος,* 'swelling,') Swelling of the anus.

PROCTOPARAL'YSIS, *Proctople'gia, Paral'ysis Intesti'ni Rec'ti,* (*proctus,* and *paralysis.*) Paralysis of the muscles of the rectum.

PROCTOPLEGIA, (*proctus,* and *πληγη,* 'a stroke,') Proctoparalysis.

PROCTOPTOMA, gen. *Proctopto'matis,* (*proctus,* and *πτωμα,* 'a fall,') Proctocele.

PROCTOPTOSIS, (*proctus,* and *πτωσις,* 'a falling,) Proctocele.

PROCTORRHAGIA, (*proctus,* and *ῥαγη,* 'a breaking forth,') Hæmorrhoidal flux.

PROCTORRHEU'MA, gen. *Proctorrheu'matis,* (*proctus,* and *ῥευμα,* 'defluxion.') Rheumatism of the anus.

PROCTORRHŒA, (F.) *Proctorrhée,* (*proctus,* and *ῥεω,* 'I flow.') A discharge of mucus from the anus.

PROCTORRHOIS, (*proctus,* and *ῥεω,* 'to flow.') See Hæmorrhois.

PROCTOS, (*πρωκτος,*) Anus.

PROCTOSCIR'RHUS, (*proctus,* and *σκιῤῥος,* 'hard.') Scirrhus of the anus.

PROCTOSPASMUS, Tenesmus.

PROCTOSTENOSIS ORGANICA, (*proctus,* and *στενος,* 'narrow.') Stricture of the rectum.

PROCTOTOREU'SIS, (*proctus,* and *τορυειν,* 'to perforate.') Perforation of a closed anus.

PROCTUS, (*πρωκτος,*) Anus.

PROCURATIO ABORTÛS. The promotion of abortion.

PRODIAGNO'SIS, (*pro,* and *diagnosis,*) Prognostication of a disease to come, — a diagnosis by anticipation.

PRODROM'IC or PROD'ROMIC, *Prodrom'icus,* (F.) *Prodromique.* Relating, or belonging, to the prodromus of a disease.

PROD'ROMUS, (*προδρομος, pro,* and *δρομος,* 'course,') *Propathi'a,* (F.) *Prodrome. Sta'dium opportunita'tis* seu *prodromo'rum:* in contagious diseases, *Sta'dium laten'tis conta''gii.* The period immediately preceding an attack of disease; in which the *precur'sory signs* occur.

PROD'UCT, (*producere, productum,* (*pro,* and *ducere,* 'to lead,') 'to bring forth,') *Productum,* (F.) *Produit.* The result sought to be attained by any pharmaceutical or other operation.

PRODUCTIO, Prolapsus—p. Uvulæ à pituitâ, Staphylœdema.

PRODUCTION, *Produc'tio.* The act of producing; the thing produced. Also used, especially by the French, synonymously with *prolongation.* The mesentery is, in this sense, a production of the peritoneum.

PRODUCTION ACCIDENTELLE. An accidental or adventitious structure.

PRODUCTIVITAS, Fecundity.

PRODUIT, Product.

PRODUCTUM, Product.

PROËGUMENÆ CAUSÆ, (*προηγουμενος,* from *pro,* and *ηγεομαι,* 'to lead.') Causes, predisponent.

PRŒLUM, Press, Tourniquet.

PROËM'INENT, *Proëm'inens,* (*pro,* and *eminere,* 'to project.') Some anatomists call the 7th cervical vertebra the *proëminent ver'tebra,* on account of the length of its spinous process, which passes the level of that of the neighbouring vertebræ.

PROENCEPH'ALUS, (F.) *Proencéphale,* (*pro,* and *εγκεφαλος,* 'encephalon.') A monster, whose encephalon is situated, in a great measure, out of, and in advance of, the cranium, which is open in the frontal region.

PRŒOT'IA, *Proï'otes,* (*πρωιοτης* or *πρωοτης,* from *πρωι,* 'early.') 'Precocity.' *Præcox matu'ritas, Preco'cious matu'rity.* Premature development of sexual organization or power.

PROFLUVII CORTEX, Nerium antidysentericum.

PROFLU'VIUM, *Discharge', Flux'us, Polyrhœ'a, Flux;* (*profluo,* (*pro,* and *fluo,*) 'I flow forth.') A term under which—in the plural, *Profluvia, Polycrino'ses*—some nosologists have comprised all morbid discharges or fluxes:—others, increased excretions attended by fever.

PROFLUVIUM ALVI, Diarrhœa—p. Genitale muliebre, Menses—p. Mucosum urethræ, Gonorrhœa—p. Muliebre, Leucorrhœa, Menses—p. Sanguinis, Hæmorrhagia—p. Sanguinis è renibus, Nephrorrhagia—p. Sanguinis ex ore, Stomatorrhagia—p. Sanguinis ex utero, Metrorrhagia—p. Seminis, Pollution—p. Ventris, Diarrhœa.

PROFOND, Profundus.

PROFUNDA, fem. of Profundus.

PROFUNDA ARTE'RIA FEM'ORIS, *A. vas'ta poste'rior* seu *muscula'ris fem'oris, Artère-grande musculaire de la cuisse.* (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex:* 2. The *internal circumflex:* and 3. The three *perforantes.*

PROFUNDA ARTE'RIA HU'MERI, *P. supe'rior, Arte'ria spira'lis,* (F.) *Artère humérale profonde, A. collatérale externe, Grand musculaire du bras,* (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

PROFUNDA AR'TERIA INFE'RIOR seu MI'NOR is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c., about the inner side of the os humeri. It is, also, called *large communicating ulnar* or *profundo-ulnar.*

PROFUNDA AR'TERIA PE'NIS. Chaussier has given this name to the *cav'ernous ar'tery,* which arises from the artery of the penis, furnished by the internal pudic.

PROFUNDA ARTERIA SUPERIOR, Profunda humeri.

Certain muscles are distinguished by the names *profound* or *deepseated,* and *superficial.* Thus, we speak of the *superficial* and *deepseated* muscles of the neck, &c.; the *Flexor profundus perforans,* &c.

PROFUNDUS, (*pro,* and *fundus,* 'bottom,' 'having a deep base.') *Al'tus,* (F.) *Profond.* A name given to different parts, which are seated profoundly as regards others.

PROFUSIO, (*pro,* and *fundere, fusum,* 'to pour.') A pouring out, a shedding; see Hæmorrhagia.

PROFU'SIO A'QUÆ. The discharge or breaking of the waters at birth.

PROFUSIO SANGUINIS, Hæmorrhagia—p. Seminis, Ejaculation—p. Subcutanea, Purpura simplex.

PROGAS'TOR, (*pro,* and *γαστηρ,* 'belly.') One who has a pendulous belly.

PROGENIES, (*pro,* and *gigno,* 'to bring forth,') Epigone.

PROGENY, Epigone.

PROGLOS'SIS, (*προγλωσσις,* from *pro,* and *γλωσσα,* 'the tongue;') *A'pex lin'guæ.* The extremity or tip of the tongue.

PROG'NATHOUS, *Progna'thus,* (*pro,* and *γναθος,* 'the jaw.') Having a projecting jaw. A term applied to the form of the head in which there is a prolongation or forward extension of the jaws, as in the negro.

PROGNO'SIS, (*προγνωσις,*) *Proägoren'sis, Prorrhe'sis, Præcognit''io, Prognos'ticē, Præno'tio, Præmuntia'tio, Præscien'tia, Præscit''io, Pronœ'a, Proph'asis, Prædic'tio,* (F.) *Prognostic, Pronostic,* (*pro,* and *γνωσις,* 'knowledge.') A judgment formed by the physician regarding the future progress and termination of any disease.

PROGNOSIS, GEN'ERAL. The opinion formed of a disease in the abstract. Thus, the *General prognosis* of *Cynanche tonsillaris* is favourable;—of *Phthisis pulmonalis,* unfavourable.

PROGNOSIS, PARTIC'ULAR. The opinion formed of any particular case of disease. The *particular* or *special prognosis* of one case of typhus may be favourable, whilst that of another may be unfavourable.

PROGNOSIS EX LINGUÂ, Glossomantia.

PROGNOS'TIC, *Prognos'ticus,* (F.) *Prognostique, Pronostique.* Relating or appertaining to prognosis,—as '*prognostic* signs.'

PROGNOSTIC, Prognosis.

PROGNOSTICE, (*προγνωστικη*) (*τεχνη,*) Prognosis.

PROGNOSTIQUE, Prognostic.

PROGRESSIO, (*pro,* and *gradior, gressus,* 'to step,') Augmentation.

PROGRESSION, Walking,

PROGRESSUS, Augmentation.

PROIOTES, (*πρωιοτης,* or *πρωοτης,*) Præotia.

PROJECTURA, (*pro,* and *jacio, jactum,* 'to throw,') Process.

PROLABIUM, (*pro,* and *labium,* 'lip,') Procheilon.

PROLAP'SUS, (*prolabor, prolapsus,* (*pro,* and *labor, lapsus,* 'to slide,') 'to slip down.') *Procidentia, Delap'sio, Delap'sus, Hypor'rhysis, Propto'ma, Propto'sis, Produc'tio, Propenden'tia, Prominen'tia, Pto'sis, Ca'sus, a protrusion; a falling down;* (F.) *Chute.* A genus of diseases in the class *Locales* and order *Ectopiæ* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

PROLAPSUS ANI, Proctocele—p. Bulbi oculi, Exophthalmia—p. Corneæ, Staphyloma of the cornea—p. Iridis, Ptosis iridis—p. Linguæ, Glos-

socele, Paraglossa — p. Œsophagi, Pharyngocele —p. Palpebræ, Blepharoptosis — p. Pharyngis, Pharyngocele—p. Umbilici, Exomphalus.

PROLAPSUS U'TERI, *Exome'tra, Metropto'sis, Metropropto'sis, Ædopto'sis* seu *Procident'ia u'teri, Hysteropto'sis, Hysteroce'lē nu'da, Falling down of the womb,* (F.) *Abaissement* ou *Chute* ou *Descente* ou *Précipitation de la matrice.* Some use the term 'Procidentia Uteri' for a less degree of the affection than prolapsus;—*Relaxatio uteri* expressing the slightest state of all. A falling down of the uterus, owing to relaxation of the parts about the uterovaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary may be employed as a palliative, or the operation of *Episiorraphy* be performed.

Prolapsus uteri without inversion has been termed *Orthysteropto'ma,* and *Orthysteropto'sis.*

PROLAPSUS UVULÆ, Staphylœdema.

PROLAPSUS VAGI'NÆ, *Hysteropto'sis* seu *Ædopto'sis Vagi'næ, Colcopto'sis, Colpopto'sis, Elytropto'sis.* Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation, procidentia, prolapsus,* or complete *inversion.*

PROLAPSUS VESICÆ, Exocyste.

PROLECTA'TIO; (*prolectare, prolectatum,* 'to entice.') Action of separating the finer parts of a body from the grosser.

PROLEPTICS, *Prolep'ticē,* (προληψις, 'anticipation,' from *pro,* and λαμβανω, 'I seize hold of.') A term proposed by Dr. Laycock to signify the art and science of predicting in medicine.

PROLEPTICUS, (προληπτικος,) Anticipating.

PROLES, (*pro,* and *olescere,* 'to grow,') Epigone.

PROL'ICIDE, *Prolicid'ium,* (*proles,* 'offspring,' and *cædere,* 'to kill.') Destruction of offspring: a term which includes fœticide as well as infanticide.

PROLIFERATION OF CELLS, (*proles,* 'offspring,' and *fero,* 'I carry,') see Cytogeny.

PROLIF'IC, *Prolif'icus,* (F.) *Prolifique,* (*proles,* 'offspring,' and *facere,* 'to make.') That which has the faculty of engendering. Applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening the genital organs, increase the secretion of sperm.

PROLIG''EROUS, *Pro'liger, Prolig''erus,* (F.) *Proligère,* (*proles,* 'offspring,' and *gero,* 'I carry.') That which is connected with carrying the offspring.

PROLIGEROUS DISC OR LAY'ER, *Dis'cus prolig''erus* seu *vitell'inus, Stra'tum prolig''erum, Gonostro'ma,* (F.) *Disque proligère.* A granular layer, situate generally towards the most prominent part of the ovarian vesicle, in the centre of which the true ovum or ovule exists.

PROLONGEMENT RACHIDIEN, (*pro,* and *longus,* 'long,') Medulla spinalis—*p. Sous-occipital,* Basilary process.

PROMALACTE'RIUM, (*pro,* and μαλασσω, 'I soften.') The room, in the ancient gymnasium, in which the body was softened and anointed. One of the operations in bathing.

PROMANUS, (*pro,* and *manus,* 'hand,') see Digitus, Pollex.

PROMETOPIDIA, (προμετωπιδια,) Frontal bandages.

PROMETO'PIS, *Prometopid'ion,* (*pro,* and μετωπον, 'the forehead.') The skin of the forehead, in which wrinkles are.

PROMINENTIA, (*pro,* and *mineo,* 'to jut,') Prolapsus, Protuberance — p. Annularis cerebri, Pons Varolii — p. Corneæ, Ceratocele — p. Ossis continua, Apophysis.

PROMINENTIÆ ALBICANTES, Mammillary tubercles — p. Semiövales Medullæ Oblongatæ, Corpora olivaria.

PROMONTOIRE, Promontorium.

PROMONTORIUM, Promontory — p. Faciei, Nasus—p. Ossis sacri, see Sacrum.

PROM'ONTORY, *Promonto'rium,* (F.) *Promontoire,* (*pro,* and *mons,* gen. *montis,* 'a mountain,') *Tu'ber* seu *Tuberos'itas Tym'pani.* A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

PROMONTORY OF THE SACRUM, see Sacrum.

PRONATEUR, Pronator—*p. Carré,* Pronator radii quadratus — *p. Grand* ou *rond,* Pronator radii teres—*p. Petit,* Pronator radii quadratus.

PRONA'TION, *Prona'tio,* (*pronus,* 'inclined forwards.') Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

PRONA'TOR. That which produces the motion of pronation. (F.) *Pronateur.* This name has been given to two of the muscles of the forearm.

PRONATOR OBLIQUUS, P. radii teres — p. Quadratus, P. radii quadratus.

PRONATOR RA'DII QUADRA'TUS, *P. quadra'tus* seu *transvers'us* (Winslow) seu *ra'dii bre'vis* seu *ra'dii quadra'tus* (Cowper), *Quadratus ra'dii,* (F.) *Cubito-radial* (Ch.), *Petit* ou *carré pronateur.* This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

PRONATOR RA'DII TE'RES, *P. te'res* sive *obli'quus* (Winslow), (F.) *Épitrochlo-radial* (Ch.), *Grand* ou *rond pronateur.* A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and to the coronoid process of the ulna. Thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and conversely.

PRONATOR TERES, P. radii teres.

PRONAUS, (*pro,* and ναος, 'a temple,') Vestibulum.

PRONERVATIO, (*pro,* and *nervus,* 'a tendon,') Aponeurosis, Tendon.

PRONŒA, (προνοια, from *pro,* and νοεω, 'to know,') Prognosis.

PRONONCIATION, Pronunciation.

PRONOSTIC, Prognosis.

PRONOSTIQUE, Prognostic.

PRONUNCIA'TION, *Pronuncia'tio,* (F.) *Prononciation,* (*pro,* and *nunciare,* 'to tell.') The mode of articulating or giving accent or utterance to words.

PROPATHIA, (προπαθεια, from *pro,* and παθος, 'affection,') Prodromus.

PROPENDENTIA, (*pro,* and *pendere,* 'to hang,') Prolapsus.

PROP'ERTIES, PHYS'ICAL, OF THE TIS'SUES. These are *flexibility, extensibility, elasticity, racornissement, imbibition* and *osmose.*

PROPERTIES, VI'TAL. Those which depend upon the vital force, as *contractil'ity.*

PROP'ERTY, *Propri'etas, Virtus,* (F.) *Propriété,* (*proprius,* 'proper.') That which belongs distinctively to a thing.

PROPHASIS, (προφασις, from προφαινω, 'to an-

nounce.') A cause, especially a remote cause. Also, Prognosis.

PROPHYLAC'TIC, *Prophylac'ticus, Diaphylac'tic, Diasos'tic, Syntere'ticus, Præservato'rius,* (F.) *Prophylactique, Preservatif,* (*pro,* and *φυλασσω,* 'I defend.') A preservative or preventive.

PROPHYLACTIC MEDICINE, Hygiene.

PROPHYLAX'IS, *Prophyl'acē, Prophylac'ticē, Syntere'sis, Præserva'tio, Præcau'tio, Præcusto'dia.* Preservative or preventive treatment.

PROP'OLIS, (*προπολις,* from *pro,* and *πολις,* 'city;' literally, 'that which is before the city.') *Cerau'themus, Commo'sis, Beebread.* A red, resinous matter, with which the bees cover the bottom of the hive. Its fume has been esteemed antiasthmatic.

PROP'OMA, gen. *Propom'atis,* (*προπομα,* from *pro,* and *πομα,* 'a drink.') Ancient name of a medicine composed of seven parts of *honey* and four of *wine.* It was taken before a meal.

PROPORTIO, (*pro,* and *portio,*) Symmetry.

PROPOSITUM, (*pro,* and *ponere, positum,* 'to place,') Intention.

PROPOTISMA, gen. *Propotism'atis,* (*προποτισμα,*) Mistura.

PROPOTIS'MUS, (*προποτισμος,* from *pro,* and *ποτιζω,* 'to give to drink,') *Præpo'tio.* An ancient name for medicines which were given to the patients before purging them, and, in some sort, to prepare them.

PROPRIETAS, Property.

PROPRIÉTÉ, Property.

PROPRIUS AURIS EXTERNÆ, Retrahens auris.

PROPTOMA, gen. *Propto'matis,* (*pro,* and *πιπτω,* 'to fall,') Prolapsus.

PROPTO'MA AURICULA'RUM, *Paræsthe'sis auditûs flac'ca, Flap Ear.* Lobe of the ear broad, loose, and pendent from birth.

PROPTOMA SCROTI, Rachosis.

PROPTOSIS, (*προπτωσις, pro,* and *πτωσις,* 'a falling down,') Prolapsus—p. Palpebræ, Blepharoptosis—p. Uvulæ, Staphylœdema.

PROPTYSIS, (*pro,* and *πτυω,* 'to spit,') Expectoration.

PROP'YLAMIN, *Propylami'num,* occurs in *chenopodium vulva'ria,* in the flowers of *cratæ'gus oxyacan'tha;* the fruit of *sorbus aucuparia;* in *secа'le cornu'tum,* herring pickle, codliver oil, urine, &c. (It may be prepared from herring pickle, by distillation with caustic *potassa,* neutralizing the distillate with *muriatic acid;* purifying the salt by dissolving it in strong *alcohol* or *alcoholic ether,* and again distilling with *potassa.*) It has been used in acute and chronic rheumatism, 25 drops being added to six ounces of mint water sweetened; and a tablespoonful given every two hours. Its virtues have been greatly exaggerated. The *chloride* and *iodide* have been given in like cases.

PRORA, Occiput.

PRORRHESIS, (*προρρησις,*) Prognosis.

PRORUPTIO SANGUINIS, (*pro,* and *rumpere, ruptum,* 'to break,') Hæmorrhagia.

PROS, (*προς,*) in composition, generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, (*pros,* and *αρθρωω,* 'to attach by joints,' and *osis.*) Diarthrosis.

PROSBOLE, (*pros,* and *βαλλω,* 'to strike,') Impression.

PROSCHYSIS, (*pros,* and *χυω,* 'to pour,') Affusion.

PROSCOLLESIS, (*προσκολλησις,* from *pros,* and *κολλα,* 'glue,') Adherence, Agglutination.

PROSECTEUR, Dissector.

PROSECTIO, (*pros,* and *secare, sectum,* 'to cut,') Anatomy.

PROSECTOR, Dissector.

PROSLEPSIS, (*προσληψις,* from *pros,* and *λαμβανω,* 'to seize hold of,') Prehension.

PROSODOS, (*προσοδος,* from *pros,* and *οδος,* 'a way,') Aditus.

PROSOPALGIA, (*prosopon,* and *αλγος,* 'pain,') Neuralgia, facial.

PROSOPANTRA, (*prosopon,* and *αντρον,* 'a cavity,') Frontal sinuses.

PROSOPANTRI'TIS, (*prosopantra,* and *itis.*) Inflammation of the frontal sinuses.

PROSO'PIS DUL'CIS, *Ord.* Leguminosæ. A tree of rather large size, native of Peru. The fruit —*Pacay*—is a pod, from 20 to 24 inches long, containing black seeds imbedded in a white, soft, flaky substance; which last is eaten by the Limenos with pleasure.

PROSOPODYNIA, (*prosopon,* and *οδυνη,* 'pain,') Neuralgia, facial.

PROSOPODYSMOR'PHIA, (*prosopon, δυς,* 'with difficulty,' and *μορφη,* 'shape.') Malformation or atrophy of the face,—as where the process of nutrition suffers from diminished nervous influence.

PROSOPOLOGIA, (*prosopon,* and *λογος,* 'a discourse,') Physiognomy.

PROSOPOMANTIA, (*prosopon,* and *μαντεια,* 'divination,') Physiognomy.

PROSOPON, (*προσωπον,*) Face.

PROSOPOPARALYSIS, (*prosopon,* and *paralysis,*) Palsy, Bell's.

PROSOPORRHEUM'A, gen. *Prosoporrheum'atis, Rheumatis'mus fa'ciei,* (*prosopon,* and *ῥευμα,* 'defluxion,' 'rheumatism.') Rheumatism affecting the face.

PROSOPOSIS, (from *prosopon,*) Physiognomy.

PROSOPOSPASMUS, (*prosopon,* and *spasmus,*) Canine laugh.

PROSOPOSTERNODYMIA, (*prosopon, στερνον,* 'the sternum,' and *δυειν,* 'to mingle,') see Cephalosomatodymia.

PROSPERITAS VALETUDINIS, (*prosper,* 'favourable,') Sanitas.

PROSPHORA, (*προσφορα,* from *pros,* and *φερω,* 'to bring,') Prehension.

PROS'PHYSIS, (*προσφυσις,*) *Adnascen'tia, Coalit''io,* 'adhesion, adherence, connexion,' (from *pros,* and *φυω,* 'I grow.') In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye; *Ankylobleph'aron.*

PROS'TASIS, *προστασις,* from *pro,* and *στασις,* 'station,' 'superiority,' 'preponderance.') A predominance or abundance—as of excrementitious humours.

PROSTATA, Prostate—p. Adenoides, Prostate —p. Bartholini, Cowper's glands in the female—p. Glandula, Prostate—p. Muliebris, Cowper's glands in the female.

PROSTATÆ, Prostate—p. Adenoides, Prostate —p. Glandulosæ, Prostate.

PROSTATAL, Prostatic.

PROSTATAL'GIA, (*prostate,* and *αλγος,* 'pain.') Pain in the prostate.

PROSTATAUXE, (*prostate,* and *αυξη,* 'increase,') Prostatoparectasis.

PROS'TATĒ, (*pro,* and *ιστημι,* 'I stand.') *Pros'tata, P. gland'ula, Pros'tatæ, P. glandulo'sæ* seu *adenoï'des, Paras'tata adenoï'des* seu *glandulo'sa, Ad'stans, Paras'tatæ, P. gland'ulæ, Tes'tis mi'nor, Cor'pus glandulo'sum* seu *glando'sum* seu *adeniform'ē* seu *glandiformē* seu *glandulo'sum* seu *adenoï'des, Assisten'tes glandulæ, Ads'tites glandulo'si;* the *Prostate gland.* A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish viscid humour—*Liquor*

prostat'icus—intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATE, ANTERIOR, see Cowper's glands.

PROSTATELCO'SIS, *Prostathelco'sis*, (*prostate*, and 'ελκος, 'an ulcer.') Ulceration of the prostate.

PROSTATES INFÉRIEURES, Cowper's glands—*p. Petites*, Cowper's glands.

PROSTATHELCOSIS, (*prostate*, and 'ελκος, 'an ulcer,') Prostatelcosis.

PROSTAT'IC, *Prostat'icus*, *Pros'tatal*, (F.) *Prostatique*. That which belongs or relates to the prostate. Winslow has named—*Superior Prostatic Muscles*—ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls—*Inferior prostatic muscles*—the fleshy fibres, which, from the lateral parts of the urethra, near its membranous portion, pass to be inserted into the pubis.

PROSTATIC BISEC'TOR. An instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, cutting edges at the sides parallel to its longest axis, and with a straight handle.

PROSTATIC LIQ'UOR, *Li'quor prostat'icus*. The fluid secreted by the prostate, which mixes with sperm during emission.

PROSTATIC POR'TION OF THE URE'THRA. The part of the canal of the urethra included by the prostate: it is about 15 lines long.

PROSTATIC SINUS, see Sinus, prostatic.

PROSTATICUS SUPERIOR, Compressor prostatæ.

PROSTATIQUE, Prostatic.

PROSTATI'TIS, *Inflamma'tio Pros'tatæ*, (*prostate*, and *itis*.) Inflammation of the prostate; when accompanying gonorrhœa, it is the *gonorrhoprostati'tis*.

PROSTATOCELE, (*prostate*, and κηλη, 'tumor,') Prostatoncus.

PROSTATOLITHI, (*prostate*, and λιθος, 'a stone,') see Calculi, urethral.

PROSTATON'CUS, *Prostatoce'lē*, *Tumor prostatæ*, (*prostate*, and ογκος, 'a tumour.') Swelling of the prostate.

PROSTATOPAREC'TASIS, (*prostate*, and παρεκτεινειν, 'to extend.') Enlargement of the prostate; also, induration of the same, *Prostatoscir'rhus*, *Prostataux'ē*.

PROSTATORRHŒ'A, (F.) *Prostatorrhée*, (*prostate*, and ῥεω, 'I flow.') A morbidly increased discharge from the prostate.

PROSTATOSCIRRHUS, see Prostatoparectasis.

PROSTERNID'IUM, (προστερνιδιον, from *pro*, and στερνον, 'the sternum.') Any agent applied to the anterior part of the chest; a plaster to the breast.

PROSTHESIS, (προσθεσις,) *Adjunc'tio*, *Adjec'tio*, *Appusi'tio*, 'addition, application;' (from *pros*, and τιθημι, 'to put.') That part of surgery, whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c. Sometimes written *Prothesis*, (F.) *Prothèse*.

PROSTHETA, (προσθετα,) Subdita.

PROSTHIUM, (προσθιον,) Penis.

PROSTITU'TION, *Prostitu'tio*, *Porni'a*, (from *prosto*, (*pro*, 'before,' and *sto*, 'I stand,') 'I stand to be hired.') The condition and practice of a prostitute, (F.) *Fille publique*, *F. de Joie*. In many countries of Europe, prostitution is a matter of public hygiene—the prostitutes being regularly examined medically and licensed. In Great Britain, and in this country, it is not subjected to any regulation.

PROSTOM'IA, *Commissu'ra labio'rum*; (*pro*, and στομα, 'mouth.') The commissure of the lips.

PROSTRA'TION, *Prostra'tio vi'rium*, (*pro*, and *sternere*, *stratum*, 'to throw down.') (F.) *Prostration des forces*, *Abattement*. Great depression of strength. Almost total loss of power over the muscles of locomotion.

PRO'TEA MELLIF'ERA, (after Proteus.) A South African plant, *Nat. Ord.* Proteaceæ, whose involucra and flowers, at the time of inflorescence, are filled with a sweet watery liquid, which contains a great deal of honey. By inspissation it forms a delicious syrup—*Syrupus Pro'teæ*, which is much used in pulmonary affections.

PROTEA LEPIDOCARPON, and some other Proteæ, supply the same kind of juice.

PRO'TEAN or PROTE'AN, *Pro'teiform*, *Proteiform'is*, (from *Proteus*, who could assume various shapes.) Assuming different shades.

PROTEIC, Proteinous.

PROTEIFORMIS, Protean.

PROTEIFORM'IS MORBUS. A disease which assumes various characters.

PRO'TEÏN, *Pro'teine*, *Protei'na*, (from πρωτευω, 'I take first rank.') A product of the decomposition of albumen, &c., by potassa. When, according to Mulder, animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate which has exactly the same characters and composition. This is protein. The existence of any such radical free from sulphur is denied.

Protein having been regarded as the basis of animal and vegetable fibrin, albumen, casein, and gluten, they have been classed under the "proteinaceous alimentary principle," by Dr. Pereira.

PROTEINACEOUS, Proteinous.

PRO'TEINOUS, *Proteina'ceous*, *Proteino'sus*, *Pro'teic*, (F.) *Protéineux*, *Protéique*. Of, or belonging to protein;—as "a proteinous alimentary principle." For proteinous, *albuminous* is now generally substituted.

PROTÉINEUX, Proteinous.

PROTÉIQUE, Proteinous.

PROTENSIONES GLANDULARES, (*pro*, and *tendere*, *tensum*, 'to stretch,') Mammillary eminences.

PROTHÈSE, Prosthesis.

PROTHESIS, Prosthesis.

PROTMESIS, (προτμησις, from *pro*, and τεμνω, 'to cut,') Umbilicus.

PROTO, (πρωτος, 'first,') in composition, first.

PROTOAZOTATE DE MERCURE, Hydrargyri nitras.

PROTOGALA, (*proto*, and γαλα, 'milk.') Colostrum.

PROTOIATROS, (*proto*, and ιατρος, 'physician,') Archiater.

PROTOMEDICUS, Archiater.

PROTOMUS, (*pro*, and τεμνω, 'to cut,') Dissector.

PROTONEPHRIUM, (*proto*, and νεφρος, 'a kidney,') Corpus Wolffianum.

PROTOÖRGANISM, *Protoörganism'us*. A being, whose animal or vegetable nature is so difficult of determination, that it might be referred to either one or the other division of organized bodies. See Zoophyte.

PROTOPATHIA, (*proto*, and παθος, 'affection,') Idiopathia.

PRO'TOPHYTE, *Protoph'yton*, (*proto*, and φυτον, 'a plant.') A vegetable production at the foot of the scale; as a cryptogamous plant,—a fungus.

PRO'TOPLASM, *Protoplas'ma*, (*proto*, and πλασσω, 'to form.') The blastema in the sense of cytoblastema. Also, according to Robin, the liquid contained in the cavities of vegetable cells,

or in the embryonic cells, when the embryo has as yet no blood; which liquid is capable, like the liquor sanguinis, of furnishing materials for the origin of other anatomical elements.

PRO'TOPLAST, (*proto,* and πλασσω, 'to form.') A primary formation. A first formed organized body—the parent of all others.

PROTOSPOROS, (*proto,* and σπειρω, 'to sow,') Os uteri.

PROTOZOIDS, (*proto,* ζωον, 'an animal,' and εἰδος, 'resemblance,') Spermatozoa.

PROTOZO'ON, (F.) *Protozoaire,* (*proto,* and ζωον, 'an animal.') An animal lowest in the scale; —as a monad..

PROTRAHENS LENTIS, (*pro,* and *trahere,* 'to draw,') Ciliary muscle.

PROTRUSION, (*pro,* and *trudere, trusum,* 'to thrust,') Prolapsus.

PROTRUSOR, Detrusor urinæ.

PROTU'BERANCE, *Protuberan'tia, Extubera'tio, Prominen'tia, Excrescen'tia, Extuberan'tia,* (*pro,* 'before,' and *tuber,* 'a projection,') *Boss,* (F.) *Bosse.* A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances, occipital protuberances, annular protuberances,* &c.

PROTUBERANCE, ANNULAR, Pons Varolii — p. Cerebral, Medulla oblongata, Pons Varolii — *p. Cylindroïde,* Cornu ammonis.

PROTUBERANTIA, Eminence, Protuberance —p. Annularis Willisii, Pons Varolii—p. Basilaris, Pons Varolii—p. Cylindrica, Cornu ammonis.

PROUD FLESH, Fungosity.

PROUNE, Prunus domestica.

PROVENTRIC'ULUS, *Bul'bus glandulo'sus, Infundib'ulum, Sec'ond stom'ach,* (*pro,* and *ventriculus,* 'the stomach.') A bulbous expansion at the termination of the œsophagus, immediately above the gizzard of birds, the walls of which are thickly studded with a layer of glands or follicles which secrete a digestive fluid.

PROV'ERB, MED'ICAL, *Prover'bium med'icum.* A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the School of Salernum,* composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we frequently meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu' après la soupe un coupe d'excellent vin*
   Tire un écu de la poche du médecin.

2. *Surge quintâ, prande nonâ, cœna quintâ, dormi nonâ, nec est morti vita prona.*

3. *Nunquam recte corpus exerceri sine animo, neque animum sine corpore posse.*

4. *Viande bien machée est à demi digérée.*

5. *Optimum condimentum fames.*
   Appetite is the best sauce.

6. *Plures occidit gula quam gladius.*

7. Early to bed and early to rise,
   Makes a man healthy, wealthy, and wise.

8. One man's meat's another man's poison.

9. An ounce of prevention is better than a pound of cure.

PROVERSIO, (*pro,* and *vertere, versum,* 'to turn,') Anteversion.

PROVINS, MIN'ERAL WA'TERS OF. Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

PROVOCATORIUS, (*pro,* and *vocare, vocatum,* 'to call,') Intercalary.

PROX'IMAD, see Proximal aspect.

PROX'IMAL, (*proximus,* 'next.') Proximate; nearest; next.

PROXIMAL AS'PECT. An aspect towards the trunk, in the course of an extremity.—Barclay. *Prox'imad* is used by the same writer adverbially to signify 'towards the trunk.'

PRUNA, Anthrax.

PRUNE, Prunum.

PRUNE JUICE EXPECTORA'TION OF SPU'TA. The sputa resembling prune juice, which occur in the third or purulent stage of pneumonia.

PRUNEAU, Prunum.

PRUNELLA, (dim. of *prunum,*) Angina pectoris, Aphthæ, Cynanche, (all from [G.] Braune, 'sorethroat,') Pupil.

PRUNEL'LA, *P. vulga'ris* seu *officina'lis, Brunel'la, Consol'ida mi'nor, Sym'phytum mi'nus, Self'heal, Healall, Bu'gle,* (F.) *Prunelle, Brunelle; Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This plant has been recommended as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ, and in inflammation of the fauces; hence its name from ([G.] Braune, 'sorethroat.)

PRUNELLÆ SAL, Potassæ nitras fusus sulphatis paucillo mixtus.

PRUNELLE, Prunella, Pupil.

PRUNELLIER, (dim. of *prunus,*) Prunus spinosa.

PRUNELLOE, Prunum Brignolense.

PRUNEOLA SYLVESTRIS, Prunus spinosa.

PRUNES, see Prunum — p. Pulp of, Pruni Pulpa.

PRU'NI PUL'PA, *Pulp of prunes.* (Take of *prunes* a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar and press through a hair-sieve.—Ph. U. S.)

PRUNIER, Prunus domestica—*p. Sauvage,* Prunus spinosa.

PRU'NUM, *Coccyme'lon.* A dried *Plum,* a *Prune.* (F.) *Pruneau.* Three sorts of Prunes have been usually ranked amongst the articles of the materia medica. 1. The *Prunum Brignolen'sē; Brignole plum* or *Prunelloe;* from Brignole in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2 The *Prunum Gal'licum, Pru'num* (Ph. U. S.), the *French Prune;* and 3. The *Prunum Damasce'num, Dam'son,* formerly *Dam'ascene, Brab'ylon.* All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

PRUNUM STELLATUM, Averrhoa carambola.

PRUNUS ACACIA, (προυνη,) Prunus padus.

PRU'NUS ARMENI'ACA, *Armeni'aca vulga'ris* seu *epiro'tica.* The *A'pricot, A'pricock. Bericoc'cē, Præcoc'ia,* (F.) *Abricotier. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Monogynia. The apricot, *Me'lum Armeni'acum,* (F.) *Abricot,* when ripe, is easily digested, and considered as a great delicacy.

PRUNUS A'VIUM, *P. cer'asus* seu *sylvest'ris* seu *macrophyl'la, Cer'asus A'vium* seu *ni'gra* seu *dul'cis, Black Cher'ry Tree,* (F.) *Merisier.* The fruit is eaten; and a gum exudes from the tree, the properties of which are similar to those of gum Arabic.

PRUNUS CAPULIN, *Capuli,* grows in the open fields of Peru; and is cultivated in gardens in the towns. The fruit is acid, and not often eaten; but on account of its agreeable odour it is used in making *Pucheros de flores;* or with odoriferous flowers to perfume linen.

PRUNUS CER'ASUS, *Cer'asus ac''ida* seu *horten'sis* seu *vulga'ris* seu *ru'bra.* The *Red Cherry Tree;* (F.) *Cerisier.* The fruit *Cer'asum, Cera'sion,* has a pleasant, acidulous sweet flavour. It is wholesome. See Prunus avium.

PRUNUS DOMES'TICA. The *Plum* or *Dam'son tree, Coccyme'lea, Proune,* (F.) *Prunier ordinaire.* The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See Prunum.

PRUNUS HORTENSIS, P. cerasus.

PRUNUS INSIT''IA. The *Bul'lace Plum Tree.* The fruit of this tree is used like the damson.

PRUNUS LAUROCER'ASUS, *Cer'asus laurocerasus, Pa'dus laurocerasus, Poi'son Lau'rel, Cher'ry Laurel, Common Laurel, Laurocerasus,* (F.) *Laurier-cerise, L. amandier, L. de Trébisonde.* The leaves, *Laurocer'asus,* (Ph. E., D., and B.,) have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the prussic acid. The distilled water, called *Laurelwater,* is poisonous. (See Poisons, Table of.) An AQUA LAUROCER'ASI, *Cherrylaurel water,* is officinal in the Edinburgh, Dublin and British (1864) Pharmacopœias. Dose, ♏ xxx to f℥j.

PRUNUS MACROPHYLLA, P. avium.

PRU'NUS PA'DUS, *Pa'dus, P. a'vium, Cer'asus Pa'dus* seu *racemo'sa sylves'tris, Wild clus'ter or Bird Cher'ry Tree,* (Sc.) *Hag'berry, Hack'berry,* (Prov.) *Heck'berry,* (F.) *Cerisier à grappes, Bois puant.* The bark of the tree has a fragrant smell and a bitter, subastringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c., in the form of decoction. The berries have been used in dysentery.

PRUNUS SEBESTENA, Sebestena.

PRUNUS SPINO'SA. The *Sloe Tree, P. Sylves'tris* seu *Aca'cia, Agriococcime'lea, Agru'na, Agrune'la,* (F.) *Prunellier, Prunier sauvage.* The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to its astringent properties. The *Aca'cia nostras* seu *German'ica* seu *vulga'ris, Prune'ola sylves'tris, Succus acaciæ nostra'tis, S. Acaciæ Germanicæ inspissa'tus,* is obtained from this.

PRUNUS SYLVESTRIS, P. Avium, P. Spinosa.

PRUNUS VIRGINIA'NA, *Cer'asus sero'tina* seu *Virginia'na, Choke Cher'ry, Wild Cher'ry Tree,* (F.) *Cerisier de Virginie.* The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and likewise a sedative quality. It is stimulant and tonic. The leaves contain prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almond. A strong decoction of the bark is anthelmintic.

PRUNUS VULGARIS, P. Padus.

PRURIG''INOUS, *Prurigino'sus,* (F.) *Prurigineux,* (from *prurigo.*) Relating, or belonging to, or resembling prurigo.

PRURI'GO, gen. *Prurig''inis, Pruri'tus, Chris'ma,* (*prurio, pruritum,* 'to itch.') The word is often used synonymously with *itching.* Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are a severe itching, accompanied by an eruption of papulæ of nearly the same colour as the adjoining cuticle; *Cnes'mos, Sca'bies papuliform'is, Exor'mia pruri'go.* It affects the whole surface of the skin, under three varieties of form—the *P. mi'tis, P. formi'cans, P. seni'lis,* &c., as well as some parts of the body, as the *P. pod'icis,* and *P. puden'di muli'ebris, Puden'dagra pru'riens, Pruri'tus vul'væ,* (F.) *Prurit de la vulve.*

PRURIGO. Heat—p. Pedicularis, Phtheiriasis.

PRURIT, Itching—*p. de la Vulve,* see Prurigo.

PRURITUS, (*prurio,* 'to itch,') Gargalus, Heat, Itching, Prurigo—p. Vulvæ, see Prurigo.

PRUS'SIAN BLUE, *Fer'rum Zoöt'icum* seu *Borus'sicum* seu *Cyanogena'tum* seu *oxydula'tum hydrocyan'icum, Fer'ri Ferrocy'anas* seu *Ferrocyanure'tum* seu *Ferrocyan'idum* (Ph. U. S. 1863) seu *Cyanure'tum* seu *Ferrocyan'idum, Borus'sias* seu *Prus'sias* seu *Hydrocy'anas Fer'ri, Cæru'leum Borus'sicum* seu *Berolinen'sē, Tritohydroferrocy'anate, Ferrocy'anide, Ferrocyannret* or *Ferroprus'siate of iron,* (F.) *Bleu de Prusse, B. de Berlin. Ferri Ferrocyan'idum, F. Ferrocyanure'tum, Pure Prussian Blue,* is directed, in the Ph. U. S., to be made by adding a solution of *ferrocyanide of potassium* to a solution of *tersulphate of iron,* filtering the liquid, and washing the precipitate until the washings pass nearly tasteless, and drying it. This salt is chiefly used in the preparation of the hydrocyanic acid and the cyanide of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (℥j to ℥j of cerate.) Dose, four to six grains.

PSALIDIUM, (ψαλιδιον, dim. of *psalis,*) Fornix.

PSALIS, (ψαλις,) Fornix, Scissors.

PSALTERIUM, (ψαλτηριον, dim. of ψαλτηρ, 'a psaltery,') Lyra, Omasum.

PSAMMA, (ψαμμη,) see Gravel.

PSAMMIS'MUS, (ψαμμισμος,) *Ammis'mus, Gammis'mus,* (from ψαμμος, 'sand,') *Arena'tio.* The application of sand to any part of the body for the cure of disease.

PSAMMODES, (ψαμμωδης, from ψαμμος, and *odes,*) Sabulous.

PSAMMUS, (ψαμμος,) see Gravel.

PSAUTIER, (from (L.) *psalterium,*) Omasum.

PSELLIS'MUS, (ψελλισμος,) *Psel'lotes,* (from ψελλιζω, 'I stutter.') Imperfect or depraved state of the articulation. A genus in the class *Pneumatica,* order *Phonica,* of Good.

PSELLISMUS NASITAS, Rhinophonia—p. Rhotacismus, Rotacism.

PSELLOTES, (ψελλοτης,) Balbuties, Psellismus.

PSEUDACACIA ODORATA, (*pseudo,* and *acacia,*) Robinia pseudacacia.

PSEUDAC'OË, *Pseudacoïa, Pseudecoïa,* (*pseudo,* and ακοη, 'audition,') *Pseudacu'sis.* False hearing.

PSEUDACORUS, (*pseudo,* and *acorus,*) Iris pseudacorus.

PSEUDÆSTHE'SIA, *Sen'sus perver'sus,* (*pseudo,* and αισθανομαι, 'I feel,' αισθησις, 'feeling.') *Parapsis illuso'ria, Pseud'aphē, Pseudaph'ia,* (F.) *Pseudesthésie.* Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation, and to hypochondriacs and the insane.

PSEUDALEI MORBI, (ψευδαλεοι, 'counterfeit,' from ψευδης, 'false,') Feigned diseases.

PSEUDALEUS TRICHINA, Trichina spiralis.

PSEUDANGUSTURINUM, (*pseudo,* and *angustura,* 'false angustura,') Brucine.

PSEUDAPHE, (*pseudo,* and ἁφη, 'touch, feeling,') Pseudæsthesia.

PSEUDARTHRO'SIS, *Pseudarticula'tio, Pseudartic'ulus, Articula'tio notha* seu *artificia'lis,* (*pseudo,* and αρθρον, 'a joint.') A false joint or articulation; *Artic'ulus no'vus* seu *spu'rius* seu *præternatura'lis,* (F.) *Articulation surnuméraire.*

PSEUDARTICULATIO, Pseudarthrosis.

PSEUDECOIA, Pseudacoe.

PSEUDENCEPH'ALUS, *Paracepk'alus,* (*pseudo,* and εγκεφαλος, 'the encephalon.') A monster, whose cranium is open in its whole extent, from before to behind, its base supporting a vascular tumour.

PSEUDESTHÉSIE, Pesudæsthesia.

PSEUDINOMA, (*pseudo*, ις, ινος, 'fibre,' and ωμα,) Scirrhus.

PSEUDO, (ψευδης,) False—p. Asthma, Dyspnœa.

PSEUDOBLEP'SIA, *Pseudoblep'sis*, *Pseudora'sis*, *Suffu'sio oc'uli*, (*pseudo*, and βλεψις, 'sight.') *Pseudopsi'a*, *Parop'sis illuso'ria*, *Suffu'sio*, *Phantas'ma*, *False sight*. A generic name, used by Cullen for perversion of vision. See Metamorphopsia.

PSEUDOBLEPSIS, Paropsis.

PSEUDOCARCINOMA LABII, Cancer aquaticus.

PSEUDOCATARACTA, see Cataract.

PSEUDOCHROMIA, (*pseudo*, and χρωμα, 'color.') Achromatopsia.

PSEUDOCROUP, Asthma thymicum.

PSEUDOCYESIS, (*pseudo*, and κυησις, 'pregnancy,') Pregnancy, false—p. Molaris, Mole.

PSEUDOENCEPHALITIS, (*pseudencephalus*, and *itis*,) Hydrencephaloid disease.

PSEUDOFEVER, Irritation, morbid.

PSEUDOGEU'SIA, *Pseudogeu'sis*, *Pseudogeus'tia*, (*pseudo*, and γευσις, 'taste.') *Hallucina'tio gustûs*. False taste.

PSEUDOGEUSTIA, Pseudogeusia.

PSEUDOHELMINTHES, (*pseudo*, and ἑλμις, gen. ἑλμινθος, 'a worm,') Ectozoa.

PSEUDOLI'EN, *Pseu'doeplen*, (*pseudo*, and *lien*, 'spleen.') Glands situate in the neighbourhood of the spleen; probably, lymphatic glands.

PSEUDOMECHOACANA, Convolvulus panduratus.

PSEUDOMEDICUS, (*pseudo*, and *medicus*, 'a physician,') Charlatan.

PSEUDOMELANOTIC FORMATION, (*pseudo*, and *melanosis*,) see Anthracosis—p. Meninx, Membrane, false—p. Metamorphosis polyposa, Polypus.

PSEUDOMEMBRANA, (*pseudo*, and *membrana*,) Membrane, false.

PSEUDOMEMBRANE, Membrane, false.

PSEUDOMEM'BRANOUS, *Pseudomembrano'sus*. (F.) *Pseudomembraneux*. Relating or appertaining to false membranes.

PSEUDONARCISSUS, Narcissus pseudonarcissus.

PSEUDONOMA'NIA, (*pseudo*, and *mania*,) A form of insanity, which is characterized by a morbid propensity for lying.

PSEUDOPARASITES, Ectozoa.

PSEUDOPERIPNEUMONIA, Peripneumonia notha.

PSEUDOPHLOGOSIS VENTRICULI RESOLUTIVA ET COLLIQUATIVA, (*pseudo*, and φλογωσις, 'inflammation,') Gastromalacia.

PSEUDOPHTHI'SIS. 'False phthisis.' Emaciation occasioned by other cause than organic lesion of the lungs.

PSEUDOPLAS'MATA, (*pseudo*, and πλασσω, 'I form.') A term applied to malignant heterologous tumours.

PSEUDOPLEURITIS, Pleurodynia—p. Polypi, see Polypi—p. Pyrethrum, Achillea ptarmica—p. Spleen, Pseudolien.

PSEUDOPNEUMONIA, Peripneumonia notha.

PSEUDOPNEUMONITIS, Peripneumonia notha.

PSEUDOPSIA, (*pseudo*, and οψις, 'vision,') Pseudoblepsia.

PSEUDORASIS, (*pseudo*, and οραω, 'to see,') Pseudoblepsia.

PSEUDOREX'IA, *Pseudorex'is*, (*pseudo*, and ορεξις, 'appetite.') False appetite.

PSEUDORHON'CHUS, (*pseudo*, and βογχος, 'rattle.') A sound heard during respiration, which appears to be produced, like the ordinary rhonchi, in the air-tubes, but is exterior to them—as in the case of *pleural pseudorhonchi*. See Rattle and *Râle*.

PSEUDOSCOP'IC, *Pseudoscop'icus*, (*pseudo*, and σκοπεω, 'I view.') Conveying false impressions to the eye; as where projecting surfaces are seen depressed, and conversely.

PSEUDOS'MIA, *Pseudosphre'sia*, *Pseudosphre'sis*, (*pseudo*, and οσμη, 'smell.') False sense of smell.

PSEUDOSPHRESIA, (*pseudo*, and οσφρησις, 'smell,') Pseudosmia.

PSEUDOSYPHILIS, Syphilis pseudosyphilis.

PSEUDOTHANATUS, (*pseudo*, and θανατος, 'death,') Asphyxia.

PSEUDOVARIOLÆ, Varicella.

PSEUDYMEN, (*pseudo*, and ὑμην, 'a membrane,') Membrane, false.

PSID'IUM POMIF'ERUM. The *Ap'ple Gua'va*, *Gua'va*, *Guayava*. *Ord.* Myrtaceæ. This plant and *P. Pyrif'erum* bear fruits; those of the former like apples—of the latter like pears. The apple kind has an acid flavour; the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies, and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent: this quality, indeed, exists in every part of the tree, and abundantly in the leaf-buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch and most cutaneous eruptions.

PSILOSIS, (ψιλωσις, from ψιλοω, 'to remove the hair,') Depilation.

PSILOTHRUM, (ψιλωθρον, from ψιλοω, 'to remove the hair,') Bryonia alba, Depilatory.

PSIMYTHION, (ψιμυθιον,) Plumbi subcarbonas.

PSIMYTHUS, (ψιμυθος,) Plumbi subcarbonas.

PSOA, (ψοα,) Dysodia.

PSO'Æ, (ψοαι,) *Psoi'æ*. *Psy'æ*, see *Lumbi*, 'the loins.' The psoæ muscles; *Alop'eces*, *Neurome'træ*.

PSO'AS MAG'NUS, (ψοαι, 'the loins,') *Pso'as* seu *lumba'ris inter'nus*, *Fe'mur noven'tium sex'tus*, *Pré-lombo-trochantin*, *Pré-lombo-trochantinien* (Ch.). A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long, fusiform, and attached, above, to the body and transverse processes of the first four lumbar vertebræ and last dorsal. Below, it terminates by a very thick tendon, common to it and the iliacus muscle,—which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

PSOAS PAR'VUS, *Pré-lombo-pubien* (Ch.). A muscle situate anteriorly to the last. It is long, thin, flat, and narrow, and is attached, above, to the body of the last dorsal vertebræ, and below, to the linea ileopectinea, by means of a slender tendon, which furnishes two expansions—one to the *iliac aponeurosis*, and the other to the *pelvis*. This muscle bends the vertebral column on the pelvis, and, reciprocally, the pelvis on the vertebral column.

PSODYMUS, (ψοαι, 'the loins,' and δνω, 'to mingle,') Gastrodidymus.

PSOIÆ, Psoæ.

PSOÏTE, Psoitis.

PSOÏ'TIS, *Inflamma'tio mus'culi Pso'as*, *Lumba'go inflammato'ria spasmod'ica*, (F.) *Psoïte*, *Inflammation du muscle Psoas*, (ψοαι, 'the loins,' 'the psoæ muscles,' and *itis*.) Inflammation of the psoas muscles and of the parts situate before the lumbar vertebræ; accompanied, from its

commencement, by considerable fever, violent pains in the part affected, and in the thigh of the same side, which remains commonly half bent. Psoitis may terminate by suppuration, and form a lumbar abscess.

PSO'LĒ, (ψωλη,) Penis. Also, the glans when uncovered.

PSOLON, (ψωλων,) Membrosus.

PSOLON'CUS, (*psole*, and *ογκος*, 'a tumour.') Swelling of the glans, or of the penis generally.

PSO'LUS, (ψωλος, from *psole*.) One who has the glans uncovered. One who has been circumcised.

PSOPHOMETER, (*psophus*, and *μετρον*, 'a measure,) Stethoscope.

PSOPHUS, (ψοφος,) a noise; a sound.

PSORA, (ψωρα, from ψαω, 'to scratch,') *Sca'bies, Phly'sis* seu *Ecpye'sis Sca'bies, Scabi'ola, Itch, Scratch, Scotch fiddle*, (Prov.) *Ichet, Scrat, Yeeke*, (Sc.) *Reif, Youk, Yuke, Yecke*, (F.) *Gale, Mal Saint-Main, Rogne*. A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed, and alternating, itching intolerably and terminating in scabs. It is found to be connected with an insect of the genus *Acarus*;—the *Ac'arus* seu *Sarcop'tes* seu *Sarcop'tus* seu *Sarcocop'tes* seu *Phthi'rium* seu *Cheyle'tes Sca'biei, Ac'arus Ci'ro, Itch insect, Itch animal'cule, Itch mite*, (F.) *Ciron*. The itch occupies, particularly, the spaces between the fingers, the back of the hands, wrists, elbows, axillæ, groins, hams, &c., and rarely affects the face. The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore, Potass in deliquescence, Muriate of Ammonia, Sulphuric Acid*, &c. The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

Psora Agria, Psoriasis inveterata.

Psora Ebrio'rum, *Drunk'ard's Itch*. An eruption, attended by afflicting itching, to which elderly people, who have been much addicted to drinking alcoholic liquors, are liable.

Psora Leprosa, Psoriasis—p. Squamosa, Psoriasis.

PSORALEA, Psoralea pentaphylla.

Psora'lea Esculen'ta, *Breadroot, Indian turnip, Pomme blanche* ou *de Prairie*, (ψωραλεος, 'scurfy or scaly,' in reference to its scurfy glands or dots.) *Ord.* Leguminosæ. A plant, resembling the beet in shape, which is found near the Rocky Mountains. It contains a white pulpy substance, which is sweet and palatable.

Psora'lea Glandulo'sa, *Alvaquil'la*. A shrub, used in Chili as a vulnerary. The Paraguay tea is referred to it by M. Lenoble, of Montevideo. See Ilex Paraguensis.

Psoralea Pentaphyl'la, *Psora'lea, Contrayer'va no'va, Mex'ican Contrayer'va*. The root is little, if at all, inferior to the contrayerva in its medical properties; which, by the by, are unimportant.

PSORENTERIA, (*psora*, and *εντερον*, 'intestine,') Cholera.

PSORI'ASIS, or PSORIA'SIS, (ψωριασις,) formerly, the state of ψωρα. *Lepidoso'si psori'asis, Serpe'do, Serpi'go, Impeti'go* (of some), *Sca'bies sic'ca* seu *feri'na, Pso'ra lepro'sa* seu *squamo'sa, Sca'ly Tet'ter, Dry Scale, Dry Scall*, (F.) *Dartre squameuse lichenoïde, D. écailleuse, Grattelle, Gale miliaire, G. canine* ou *sèche*. A cutaneous affection, consisting of patches of rough, amorphous scales; continuous, or of indeterminate outline; skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some respects, resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psori'asis gutta'ta, P. diffu'sa*, one form of which is the *Ba'ker's Itch, Psori'asis pisto'rum*, and *Grocer's Itch*; and another, the *Washer'woman's Scall*, the *P. gyra'ta*, and *P. invetera'ta* seu *Pso'ra a'gria*. The treatment of irritable psoriasis must be antiphlogistic, with the internal use of the fixed alkalies, sulphur, &c. They do better without any local application. The more local and less inflammatory are ameliorated by emollient and soothing applications; or by slightly stimulating means, seabathing, the *Ung. hydrarg. nitrico-oxyd., Ung. oxidi zinci*, &c.

PSOR'IC, (ψωρικος,) *Pso'ricus* (F.) *Psorique, Galeux*; (from *psora*.) That which has the nature of itch. A medicine for curing the itch.

PSOROCOMI'UM, (*psora*, and *κομεω*, 'I take care of.') An hospital for those affected with itch.

PSORODES, (ψωρωδης), Psorous.

PSO'ROID, *Psoröi'des*; (from *psora*, and *ειδος*, 'resemblance.') Resembling psora.

PSOROPHTHALMIA, (ψωροφθαλμια,) see Ophthalmia tarsi—p. Neonatorum, see Ophthalmia (purulenta infantum).

PSO'ROUS, *Psoro'sus, Psoro'des*, (from *psora*,) Appertaining or relating to itch.

PSYÆ, (ψυαι,) Psoæ.

PSYCHAGOGA, Psychagogica.

PSYCHAGO'GICA, (ψυχαγωγικα,) *Psychago'ga*, (*psycha*, and *αγω*, 'I lead.') Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

PSYCHAL, Psychical.

PSYCHE, (ψυχη,) Anima, Thymus.

PSYCHEISM, (from *psyche*,) Magnetism, animal.

PSYCHIA'TER, *A'lienist*. One who treats diseases of the mind—a *Mad-doctor, A'lienist physic''ian*, (F.) *Médecin de fous, Aliéniste*.

PSYCHIATRI'A, (*psycho*, and *ιατρεια*, 'healing.') Treatment of diseases of the mind.

PSY'CHICAL, *Psy'chicus*, (ψυχικος, from *psyche*,) *Psy'chal*. That which relates to the mind or mental endowments. *Psycholog''ical* is not unfrequently used with the like signification.

PSYCHICAL or PSYCHOLOGICAL MEDICINE includes the history, pathology, treatment, &c., of mental affections.

PSYCHO, (from ψυχη, *anima*, 'the mind, the soul,') in composition the same.

PSYCHOLOGICAL, see Psychical.

PSYCHOL'OGY, *Psycholog''ia*, (*psycho*, and *λογος*, 'discourse.') A treatise on the intellectual and moral faculties. Also, the intellectual and moral faculties or sphere.

PSYCHONOSEMA, (*psycho*, and *νοσημα*, 'disease,') see Psychoses.

PSYCHONOSOL'OGY, *Psychonosolog''ia* (*psycho, νοσος*, 'disease,' and *λογος*, 'a description.') The doctrine of, or a treatise on, diseases of the mind.

PSYCHOPATHIA, (*psycho*, and *παθος*, 'affection,) see Psychoses.

PSYCHOPATHIES, Psychoses.

PSYCHOP'ATHIST, *Psychopathis'ta*. One versed in diseases or affections of the mind.

PSYCHOR'AGES, (ψυχοραγης,) *Agoni'zans, Moribun'dus, Mor'ibund, Fey, Fee, Fie*, (*psycho*, and *ραγη*, 'rupture.') Dying; *in Articulo Mortis*, "in the article of death;" *in extre'mis. Moribund* means, also, one who is dying.

PSYCHORAGIA, (ψυχορραγια,) Agony, Death.

PSYCHORRHAGIA, (ψυχορραγια,) Agony, Death.

PSYCHO'SIS, (*psyche* and *osis*.) Neurosis of the intellect. Disease of the mind; *Psychop'athy, Psychonose'ma, Psychopathi'a*.

PSYCHOTHERAPEI'A, (*psyche*, and *θεραπευω*, 'I attend upon the sick.') Treatment of disease through the mind.

PSYCHOTICA, (from ψυχω, 'to animate,) Analeptica.

PSYCHOTRIA CROCEA, Palicourea crocea—p. Emetica, Ipecacuanha.

PSYCHOTROPHUM, (*psycho*, and τρεφειν, 'to nourish.') Betonica officinalis.

PSYCHROLU'SIA, *Psychrolu'tron*, (ψυχρολουσια, from ψυχρος, 'cold,' and λουω, 'I wash.') A cold bath.

PSYCHROPHOB'IA, (ψυχρος, 'cold,' and φοβος, 'fear.') Dread of cold, especially of cold water. Impressibility to cold.

PSYCHTICA, (ψυκτικος, 'cooling,') Refrigerants.

PSYCHUS, (ψυχος,) Cold.

PSYDRA'CIA, *quasi* ψυκρα 'υδρακια, 'cold drops,' (ψυδρακια, from ψυδραξ, gen. ψυδρακος, 'a small blister or pimple.') The ancients sometimes used this term for *pimples*; at others, for *vesicles*. Willan and Bateman define *Psydra'cium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the psydracia usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and is not contagious;—perhaps the lichen. Authors have differed regarding its acceptation.

PSYDRACIA ACNE, Acne.

PSYDRACIUM, sing. of Psydracia.

PSYLLIUM, (from ψυλλιον, ψυλλα, or ψυλλος, 'a flea,' from the likeness of the seeds,) Plantago psyllium—p. Erectum, Plantago psyllium.

PTARMICA, (πταρμικη; from πταιφειν, 'to sneeze,') Achillea ptarmica—p. Montana, Arnica montana.

PTARMICUM, (πταρμικον,) Errhine, Sternutatory.

PTARMUS, (πταρμος,) Sneezing.

PTELEA, (πτελεα,) Ulmus.

PTE'LEA TRIFOLIA'TA, *Shrubby tref'oil, Swamp dog'wood, Stink'ing ash, Stink'ing pra'irie bush, Wingseed, Wafer ash, Hop tree*; indigenous. *Order*, Xanthoxylaceæ. Flowering in June. Is said to be possessed of antiperiodic virtues, and to be anthelmintic.

PTERIS, (πτερυξ, 'a wing,' from the shape of its leaves.) Polypodium filix mas.

PTE'RIS AQUILI'NA, *Pter'ia, Thelyp'teris, Fi'lix Nymphæ'a* seu *fœmin'ea, Asple'nium aquili'num, Com'mon Brake* or *Bracken, Fe'male Fern; E'agle Fern, Brack'en* (F.) *Fougère femelle, La grande Fougère. Nat. Ord.* Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tapeworm.

PTERIS PALUSTRIS, Asplenium filix fœmina.

PTERNA, (πτερνα and πτερνη,) Calcaneum.

PTERNIUM, (πτερνιον, dim. of *pterna*,) Calcaneum.

PTERNOBATES, (πτερνοβατης, from *pterna*, and βαινω, 'to walk,) Calcigradus.

PTEROCARPUS ERINACEA, see Kino—p. Marsupium, see Kino—p. Sandalinus, P. Santalinus.

PTEROCAR'PUS SANTALI'NUS, *P. Sandali'nus*, (πτερον, 'a wing,' and καρπος, 'fruit,') *San'talum* seu *San'dalum Ru'brum, Red San'ders* or *Saun'ders Tree*, (F.) *Santal rouge. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. Red Saunders wood, *San'talum*, (Ph. U. S.,) *Pterocar'pus*, (Ph. B. 1864,) *Lignum sandali'num*, is used only as a colouring matter: it gives to rectified spirit a fine deep red. The juice of this tree, like that of *P. Dra'co*, affords a species of *Drag'on's Blood*.

PTEROCAULON PYCNOSTACH'YUM, (πτερον, 'a wing,' and καυλος, 'a stalk;' and πυκνος, 'thick,' and σταχυς, 'an ear or spike,') *Cony'za pycnostach'ya, Blackroot*; indigenous. *Order*, Compositæ. The root is used as an alterative in the form of decoction. It is said to be possessed of cathartic properties.

PTEROS'PORA ANDROMEDE'A, (πτερον, 'a wing,' and σπυρα, 'sced,' in allusion to the singular wing borne by the seeds,) *Sca'ly Drag'onclaw, Drag'onroot, Fe'verroot, Al'bany beech'drop*. An indigenous plant, *Nat. Ord.* Monotropeæ, *Sex. Syst.* Decandria Monogynia:—found in the State of New York, which blossoms in July. The root has been regarded as an anthelmintic, diuretic, emmenagogue, &c.: but is not used.

PTERYG'ION, *Pterygʻium*, (πτερυγιον, dim. of *pteryx*, 'a wing,') *A'la, Web* [?], *Web eye* [?], *Pin and web* [?], *O'nyx, Pyo'sis, Un'guis*, (F.) *Drapeau, Onglet*. A varicose excrescence of the conjunctiva, of a triangular shape, and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to Scarpa, the ancients gave the name *Pannic'ulus* to this last complication. If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

PTERYGIUM, Pterygion, Scapula—p. Digiti, Paronychia—p. Lardaceum, Pinguecula—p. Pingue, Pinguecula.

PTER'YGO, in the composition of anatomical terms, means relating, or appertaining, to the pterygoid processes.

PTERYGO-ANGULI-MAXILLAIRE, Pterygoideus internus—*p. Colli-maxillaire*, Pterygoideus externus—*p. Maxillaire, grand*, Pterygoideus internus—*p. Maxillaire, petit*, Pterygoideus externus—p. Palatine canal, Pterygoid canal.

PTERYGOPAL'ATINE, *Pterygopalati'nus*. That which belongs to the pterygoid process and palate.

PTERYGOPALATINE AR'TERY or *Supe'rior pharynge'al* is a very small artery, and is given off by the internal maxillary at the bottom of the zygomatic fossa: after having passed through the pterygopalatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

PTERYGOPALATINE CANAL'. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

PTERYGOPHARYNGEUS, Constrictor pharyngis—p. Staphylinus, Circumflexus.

PTERYGOSTAPHYLINUS INTERNUS, Levator palati—*p. Syndesmo-staphyli-pharyngien*, Constrictor pharyngis.

PTERYGODES, (πτερυγωδης, from *pteryx*, and *odes*,) Alatus.

PTER'YGOID, *Pterygoï'des, Pterygoïde'us, Alifor'mis*, (*pteryx*, and ειδος, 'form.') A name given to two *processes* at the inferior surface of the sphenoid bone; the two laminæ which form them having been compared to wings. These *alæ* or *wings* or *processes*,—*Proces'sus aliform'es*,—have been distinguished, according to their position, into *internal* (*entopterygoid*) and *external*.

PTERYGOID AR'TERY, *Vid'ian Ar'tery, Ram'ulus Duc'tûs Pterygoïde'i, Arte'ria pharynge'a supre'ma*, arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *pterygoid arteries*, is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningea media, and posterior temporalis profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

PTERYGOID BONE, Sphenoid.

PTERYGOID CANAL', *Vid'ian canal', Duc'tus pte-*

rygoïdeus, Ca'na'lis Vidia'nus, (F.) *Conduit ptérygoïdien* ou *Vidien, Pterygopalatine canal*, is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, have the same epithets applied to them.

Pterygoid Fos'sa, *Fos'sa Pterygoïde'a*, (F.) *Fosse ptérygoïdienne* ou *ptérygoïde*, is the depression which separates the two laminæ or alæ of the pterygoid process.

Pterygoid Mus'cles, *Ala'res mus'culi, Aliform'es mus'culi*, are two in number. 1. The *Pterygoïde'us exter'nus* seu *mi'nor*, (F.) *Ptérygocolli-maxillaire, Petit Ptérygo-maxillaire* (Ch.) *Petit ptérygoïdien, Ptérygoïdien externe*, is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted at the anterior part of the neck of the lower jawbone, and the corresponding part of the interarticular fibrocartilage. This muscle draws the condyle of the lower jaw and the interarticular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoïdeus internus* seu *ma'jor, Masse'ter intern'us, La'tens in O'rē*, (F.) *Grand Ptérygo-maxillaire, Ptérygo-angulimaxillaire, Grand Ptérygoïdien* ou *Ptérygoïdien interne*. A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

Pterygoid Nerves. These are two in number. 1. The *Pter'ygoid* or *Vid'ian Nerve*. It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *supe'rior* or *cra'nial, Ner'vus Superficia'lis* sive *petro'sus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *infe'rior* or *caro'id, Ner'vus profun'dus* seu *ma'jor*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic. The *Pterygoid Nerve*, properly so called, *Nervus musculi pterygoïdei*, is given off by the inferior maxillary branch of the 5th pair.

Pterygoid Processes, see Pterygoid.

PTERYGOIDEUS, Pterygoid.

PTÉRYGOIDIEN EXTERNE, Pterygoideus externus—*p. grand* ou *interne*, Pterygoideus internus—*p. Petit*, Pterygoideus externus.

PTERYGO'MA, gen. *Pterygo'matis*, (πτερυγωμα, from *pteryx* and *oma*, 'a projecting or pendulous body.') A swelling of the vulva, which prevents coition.

PTERYX, gen. *Pter'ygis*, (πτερυξ, gen. πτερυγος,) Ala.

PTILOS, (πτιλος,) Deplumatio, Madarosis.

PTILOSIS, (πτιλωσις,) Deplumatio, Madarosis.

PTISANA, (πτισανη, 'peeled barley, and a decoction of the same.') Tisane—p. Communis, Decoctum hordei compositum—p. Hippocratica, Decoctum hordei.

PTISSANA, (πτισσανη,) Tisane.

PTOCHIA'TER, *Ptochia'tres*, (πτωχος, 'poor,' and ιατρος, 'a physician.') A physician to the poor, or to an establishment for the poor.

PTOCHIATRI'A. Practice amongst the poor. Also, an institution for the treatment of the diseases of the poor.

PTOCHOCOMI'UM, (πτωχος, 'poor,' and κομεω, 'I take care of;') *Ptochodochi'um, Ptocheï'um, Ptochotrophe'um*. An almshouse. An hospital for the poor.

PTOCHODOCHIUM, (πτωχος, 'poor,' and δεχομαι, 'to receive,') Ptochocomium.

PTOCHOTROPHEUM, (πτωχοτροφειον, from πτωχος, 'poor,' and τρεφειν, 'to nourish,') Ptochocomium.

PTOMA, gen. *Pto'matis*, (πτωμα,) Cadaver.

PTOSIS, (πτωσις,) Prolapsus — p. Bulbi oculi, Exophthalmia.

Pto'sis I'ridis, *Iridoce'lē, Her'nia* seu *Procide'ntia* seu *Prolap'sus* seu *Staphylo'ma I'ridis, Iridopto'sis*. A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms, and which, owing to its supposed resemblance to the head of a fly, has been called *Myoceph'alon*, and *Myoceph'alon*, (μυια, 'a fly,' and κεφαλη, 'head,')

Ptosis Palpebræ, Blepharoptosis.

PTYALAGOGUE, (*ptyalum*, and *αγω*, 'to lead,') Sialogogue.

PTYALIN, (from *ptyalum*,) see Saliva.

PTYALISED, Salivated.

PTYALISM, Salivation.

PTYALISME, (πτυαλισμος,) Salivation—*p. Mercuriel*, Salivation, mercurial.

PTYALISMUS, Salivation — p. Acutus mellitus, see Salivation—p. Acutus sympatheticus, see Salivation—p. Hydrargyratus, Salivation, mercurial—p. Iners, Slavering—p. Mellitus, Melitoptyalismus — p. Mercurialis, Salivation, mercurial — p. Pyrosicus, Pyrosis.

PTYALOGOGUE, (*ptyalum*, and *αγω*, 'to drive,') Sialogogue.

PTYALUM, (πτυαλον,) Saliva.

PTYELUM, (πτυελον,) Saliva, Sputum.

PTYSIS, (πτυσις,) Exspuition.

PTYSMA, gen. *Ptysm'atis*, (πτυσμα,) Saliva, Sputum.

PTYSMAGOGUE, (*ptysma*, and *αγω*, 'to drive,') Sialogogue.

PTYSMATIS'CHESIS, *Ptysmatos'chesis*, (*ptysma*, and *ισχειν*, 'to retain.') Suppression of pulmonary expectoration.

PTYSMATOSCHESIS, Ptysmatischesis.

PUANTEUR, (from *putere*, 'to smell badly,') Dysodia.

PUBENS, 'at the age of puberty,' Ephebus.

PUBER, Ephebus.

PU'BERAL, *Pubera'lis, Puber'ic* or *Pu'beric, Puber'icus*. Relating or appertaining to the age of puberty—as 'a *puberal* disease.'

PUBÈRE, Ephebus.

PUBERIC, Puberal.

PUBERTAS, Ephebia, Puberty.

PU'BERTY, *Pu'bertas, He'bē, Pu'bes, Aphrodis'ia, Ephebi'a, Ephe'bia, Ephe'botes, Ephebo'synē, Pubes'cence*, (F.) *Puberté*, (from *pubescere*, 'to begin to have hair on the chin and sexual organs.') The period of life at which young people of both sexes are *pubes'cent* or nubile. According to the civil law, puberty occurs at 12 years in females, and 14 in males. The period varies somewhat in different climates, and in different individuals of the same climate.

PU'BES, *Pu'bis, Epis'chion, Cteis, Pec'ten*; the *Pu'bic re'gion*. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the period of puberty. The hair is also called *Pu'bes, Lanu'go* seu *Pi'li Pudendo'rum, Planta'rium, Fem'inal*; and, of old, *Epicten'ion* and *pubertas* signified the same. See Tressoria.

Pubes, Puberty.

PUBESCENCE, Puberty.

PUBESCENT, see Puberty.

PUBIÆUS, Pubic.

PU'BIC, *Pu'bian, Pu'bicus, Pubiæ'us*, (F.)

Pubien. That which belongs to or concerns the pubis.

Pubic Arch, *Arch of the Pu'bis,* (F.) *Arcade pubienne.* The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male, to correspond with the additional functions which she has to execute.

Pubic Articula'tion, *Sym'physis Pu'bis,* results from the junction of the ossa pubis. The medium of union is cartilage.

Pubic Lig'aments are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament;* the other the *inferior* or *subpubic.*

Pubic Re'gion, *Re'gio Pu'bis.* The region of the pubes.

PUBIEN, Pubic.

PUBIO-COCCYGIEN-ANNULAIRE, Pubio-coccyge'us annula'ris. Dumas gave this name to the levator ani and ischio-coccygeus, which he considers a single muscle. See Levator Ani.

PUBIO FÉMORAL, Pectinalis—p. Femoralis, Adductor longus femoris — *p. Ombilical,* Pyramidalis abdominis — p. Prostaticus, Compressor prostatæ — *p. Sous-ombilical,* Pyramidalis abdominis — *p. Sternal,* Rectus abdominis — p. Urethral, see Compressor Urethræ.

PUBIS, Pubes, Pubis os.

Pu'bis Os, *Os Pec'tinis, Episei'on, Episi'on, Epis'chion, Sharebone, Barbone,* (Sc.) *Arkbein.* The anterior part of the os innominatum; so called because it corresponds to the genital organs and pubic region. The *angle of the pubis* is formed by the union of the body and rami of each side.

PUB'LICÆ PAR'TES, 'public parts.' Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

PUCCINIA FAVI, (after Th. Puccini, Professor of Anatomy in Florence,) see Fungus.

PUCCOON, Sanguinaria Canadensis — p. Red, Sanguinaria Canadensis — p. Yellow, Hydrastis Canadensis.

PUCE, (from *pulex,* gen. *pu'licis,*) Pulex irritans — *p. de Bourgogne,* see Anthrax — *p. Maligne,* see Anthrax—*p. Pénétrante, Chique.*

PUCELAGE, (from [L.] *puella,* 'a young girl,') Virginity.

PUCELLE, Virgin.

PUCHA-PAT, Pogostemon patchouli.

PUCHURY, see Pichurim beans.

PUCHYRY, see Pichurim beans.

PUCKLE, Papula.

PUDDINGGRASS, Mentha pulegium.

PUDDINGPIPE TREE, Cassia fistula.

PUDENDA, pl. of *pudendum,* (from *pudere,* 'to be ashamed,') Genital organs — p. Muliebria, Vulva—p. Virorum, Pudibilia.

PUDEND'AGRA, (*pudenda,* and *ἀγρα,* 'a seizure.') According to some, this term means pain in the genital parts; *Do'lor pudendo'rum, Men'tulagra, Ædœodyn'ia:* according to others, it is synonymous with syphilis.

Pudendagra Pruriens, Prurigo pudendi muliebris.

PUDEN'DAL, *Pudenda'lis.* Relating or appertaining to the pudenda.

Pudendal Her'nia. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis as far as the os uteri.

PUDENDALIS, Pudendal.

Pudendalis Longus Inferior, see Sciatic nerve, lesser.

PUDENDUM, FEMALE, Vulva—p. Muliebre, Vulva.

PUDENDUS, Pudic.

PUDIBIL'IA. The male genital organs; *Genita'lia Vi'ri, Virili'a, Pensil'ia, Instrumen'ta, Puden'da viro'rum, Vi'lia membra, Andrædœ'a.*

PU'DIC, *Pudi'cus, Puden'dus,* (F.) *Honteux,* (from *pudere,* 'to be ashamed.') That which causes shame. A name given to the genital organs as well as to different other parts.

Pudic Ar'teries are distributed to the organs of generation. They are,—1. The *inter'nal Pu'dic, Arte'ria Pudi'ca, A. puden'da commu'nis,* (F.) *Artère honteuse interne, A. Sous-pubienne* (Ch.), *Gen'ital Ar'tery.* It is furnished by the hypogastric, and divides into two branches; the one — the *inferior* or *perineal* — which gives off the inferior hemorrhoidal and the artery of the septum; the other — the *superior,* (F.) *Ischiopénienne* — which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus cavernosum,* and the *dorsalis penis.* This latter, in the female, has the name *Dorsa'lis Clitor'idis.* 2. The *external Pu'dic Arteries,* (F.) *Artères scrotales* ou *vulvaires* (Ch.), *A. honteuses externes,* which are two in number. The one is *superficial* or *subcutaneous,* and the other *deep-seated* or *subaponeurotic.* They are given off from the femoral artery, or some one of its branches; and are distributed to the external parts of generation.

Pudic Nerve, (F.) *Nerf honteux* ou *ischio-pénien* ou *Ischio-clitorien,* is a branch furnished by the sacral plexus, which is distributed to the genital organs; and, especially, to the penis in man, and the clitoris in woman.

PUELLA, Girl.

PUELLUS, (contracted from *puerulus,*) A little boy.

PUER, Boy, Child, Infans.

PUERA, Girl.

PU'ERILE, *Pueri'lis,* (from *puer,* 'a child,') (F.) *Puéril.* Appertaining or relating to childhood.

Respiration puérile ou *exagérée* ou *supplémentaire* ou *hypervésiculaire:*—a term applied to the respiration when it is heard loud through the stethoscope, as in healthy children.

PUERIL'ITAS, Dementia of the aged.

PUERITIA, see Age.

PUER'PERA, (*puer,* and *parere,* 'to bring forth.') *To'kas, Lo'chos, Enix'a, Le'cho,* a *Lying-in woman,* (F.) *Femme en Couche, Accouchée.* A female in child-bed. One recently delivered. The condition of a woman, recently delivered, is termed, in France, *Puerpéralité.*

PUER'PERAL, *Puerpera'lis.* Relating to parturition and its consequences.

Puerperal Convulsions, Eclampsia gravidarum et parturientium.

Puerperal Fe'ver. Any fever occurring during the puerperal state- *Febris puerpera'rum, Lechop'yra, Lochiocœlii'tis, Lochiop'yra, Lochop'yra, Me'tria, Child-bed fever.* Most commonly restricted to a malignant variety of peritonitis.

PUERPÉRALITÉ. see Puerpera.

PUERPERIUM, Child-bed state.

PUERPEROUS, Parturient.

PUFF, ([D.] *puffen,* 'to blow,') Lycoperdon.

PUFFBALL, Lycoperdon, Leontodon taraxacum.

PUFF, VEILED, see Cavernous respiration.

PUF'FINESS, *Infla'tio, Suffla'tio, Tumefac'tio mol'lis,* (F.) *Bouffissure, Bourouflure.* A soft intumescence, without redness, which may be partial or general, and be produced by accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous arcolar tissue, &c. Puffiness is most frequently seen in the face and legs; and sometimes appears around a wound.

PUGIL'LUS, (dim. of *pugnus,* 'the fist.') *Drax, Dra'chion, Drag'ma, Drag'mis,* (F.) *Pincée.*

The quantity of any substance, which may be taken with the ends of two or three fingers. The eighth part of a handful.

PUGNUS, Manipulus.

PUGTEETH, Canine teeth.

PUISSANCE DU MOULE INTÉRIEUR, 'power of the internal mould,' Plastic force.

PUKE, Emetic.

PUKEWEED, Lobelia inflata.

PUKING, Vomiting, Regurgitation.

PULEGIUM, (from *pulex*, 'a flea,' to which the odour is disagreeable,) Mentha pulegium — p. Cervinum, Mentha cervina.

PULEX, gen. *Pu'licis*, *P. Irritans*, *P. Vulga'ris*. The *common flea*, (F.) *Puce*. A parasitic insect found on the bodies of man and animals.

PULEX PENETRANS, *Chique*—p. Vulgaris, P. Irritans.

PULICARIA DYSENTERICA, (from *pulex*, 'a flea,' to which the odour is disagreeable,) Inula dysenterica.

PULICA'RIS, *Pulicula'ris*, (F.) *Pulicaire*. An epithet given to cutaneous eruptions resembling flea-bites;—and, also, to diseases in which such eruptions occur.

PULICARIS HERBA, Plantago psyllium.

PULLEY, Trochlea.

PÜLL'NA, PIL'NA OR BIL'NA, MIN'ERAL WA'TERS OF. These well known Bohemian bitter springs contain sulphates of soda and magnesia, and chloride of magnesium.

PULLULA'TION, *Pullula'tio*, (from *pullulare*, *pullulatum*, 'to bud,' 'budding.') A morbid production, which buds, as it were,—condyloma, for example.

PUL'MO, gen. *Pulmo'nis*; (by transposition of the letter *l* from *pleumon*,) *Pneu'mon*, *Pleu'mon*, *Spiramen'tum an'imæ*, *Ergaste'rion spir'itûs*, *Flabel'lum et ventila'brum cor'dis*, *Lights*. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatable structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes, *Lobi* seu *Alæ pulmo'num*. The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs*, (F.) *Racine des Poumons*. Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, areolar tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opake septa, constituting lozengeshaped spaces, which are called *lob'ules*—*lob'uli* seu *in'sulæ pulmona'les* — and which are separated by interlobular areolar tissue. These lobules do not communicate with each other. The vesicles are called *Aircells*, *Air* or *Lung Ves'icles*, *Spiramen'ta* seu *Spiram'ina* seu *Cell'ulæ Pulmo'num*. See Cellules, bronchic. They, who regard the bronchial tubes as terminating in elongated cavities, have termed those cavities *Airsacs*, *Infundib'ula*, *Malpig'hian ves'icles*, *Ter'minal cav'ities*, &c., and the cuplike cavities, observed in these, have been called *alve'oli*. They are the aircells.

Along the partitions or septa is deposited, in greater or less quantity, *black pulmonary matter*, (F.) *Matière pulmonaire noire*, as it has been called, which seems to be normal. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart by the pulmonary artery; and when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs are the *bronchial* arteries. The pulmonary lymphatics are very numerous. Some are superficial; others, deepseated. They pass, for the most part, into the *bronchial ganglions* or *glands*. The nerves are furnished by the pulmonary plexus.

PULMOMETER, (*pulmo*, and μετρον, 'a measure,') Spirometer.

PULMOMETRY, see Spirometer.

PULMONAIRE, Pulmonaria, Pulmonary—*p. en Arbre*, Lichen pulmonaria—*p. de Chêne*, Lichen pulmonaria—*p. des Français*, Hieracium murorum.

PULMONAL, see Pulmonary.

PULMONA'RIA, *P. Officina'lis* seu *Macula'ta* seu *Maculo'sa*, *Lung'wort*, *Spot'ted Lung'wort*, *Jeru'salem Cow'slip*, *Jeru'salem Sage*, *Spot'ted Com'frey*, (F.) *Pulmonaire*, *Sauge de Jerusalem*. *Ord.* Boraginaceæ. *Sex. Syst.* Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs—hence the name, from *pulmo*, gen. *pulmonis*, 'the lung'—and partly because they have a slightly mucilaginous taste. The plant is not worthy of notice.

PULMONARIA, Pneumonia — p. Arborea, Lichen pulmonarius—p. Gallica, Hieracium murorum—p. Officinalis, Pulmonaria—p. Virginica, Mertensia Virginica.

PUL'MONARY, *Pulmona'ris*, *Pulmona'lis*, (F.) *Pulmonaire*, (from *pulmo*.) That which relates or belongs to the lungs.

Son pulmonal (F.), 'pulmonal or pulmonary sound,' is the sound rendered by the lung on percussion. It means, also, a similar sound rendered on percussing other parts.

PULMONARY AR'TERY, *Arte'ria pulmona'ris*, *Ve'na arterio'sa*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

PULMONARY MATTER, BLACK, see Pulmo.

PULMONARY PLEX'US, *Plex'us pulmona'ris*. A considerable nervous network, situate behind the bronchia, which is formed by the filaments of the pneumogastric nerve or par vagum, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much areolar tissue. The plexus sends filaments to the bronchia, which they accompany to their extremities.

PULMONARY VEINS, *Ve'næ pulmona'res*, *Arte'riæveno'sæ*. These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in conveying arterial blood, as the pulmonary artery differs

from the others in conveying venous blood. They carry the blood back to the heart after aeration.

PULMONES TARTARIZATI, Lithiasis pulmonum.

PULMONIA, (from *pulmo,*) Phthisis pulmonalis, Pneumonia.

PULMON'IC, *Pulmon'icus, Pneumon'icus, Pulmona'rius, Pneumon'ic,* (F.) *Pulmonique, Pneumonique.* One affected with phthisis—one labouring under disease of the lungs. Any thing relating to or belonging to the lungs. A medicine for the lungs.

PULMONITIS, (*pulmo,* and *itis,*) Pneumonia.

PULP, *Pul'pa, Pulpa'men, Sarx,* (F.) *Pulpe, Pulpolite.* The soft and parenchymatous parts of vegetables reduced to a paste by the operation of pulping. Applied, also, to parts of the human body, which have the characters of, or resemble, a pulp.

PULP OF THE FINGERS, (F.) *Pulpe des doigts.* The fleshy extremity of the fingers.

PULP OF THE TOOTH, Dental pulp.

PULPA, Pulp—p. Cassiæ, see Cassia fistula—p. Dentis, Dental pulp—p. Pili, see Hair—p. Pruni, see Pruni pulpa—p. Prunorum sylvestrium condita, Conserva pruni sylvestris—p. Tamarindi, see Tamarindi pulpa.

PULPA TES'TIS, *Paren'chyma testis.* The parenchyma of the testis.

PULPAMEN, Pulp.

PULPATION, Pulping.

PULPE, Pulp—*p. Cérébrale,* see Cerebrum—*p. Dentaire,* Dental pulp—*p. des Doigts,* Pulp of the fingers.

PULPEUX, Pulpy.

PULPEZIA, Apoplexy.

PULP'ING, *Pulpa'tion, Pulpa'tio,* (from *pulp.*) An operation, the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper,* (F.) *Pulpoire.*

PULPOIRE, see Pulping.

PULPOLITE, Pulp.

PULP'Y, *Pulpo'sus,* (from *pulpa,*) (F.) *Pulpeux.* Full of pulp.

PULQUE, see Agave Americana.

PULS EX OVIS et LACTE, 'pap of eggs and milk,' Oogala.

PULSATIF, (from *pulsare,* 'to beat,') Throbbing.

PULSATILLA NIGRICANS, Anemone pratensis—p. Patens, Anemone patens—p. Pratensis, Anemone pratensis—p. Vulgaris, Anemone pulsatilla.

PULSATILLA NOIRE, Anemone pratensis—*p. des Prés,* Anemone pratensis.

PULSATIO, (*pulsare, pulsatum,* 'to agitate,') Pulsation—p. Cordis, Palpitation.

PULSA'TION, *Pulsa'tio, Sphyg'mus, Sphyx'is, Pede'sis, Pedeth'mos,* (from *pulsare, pulsatum,* 'to beat,') (F.) *Battement.* The beating of the heart and arteries. Also, the beating felt in an inflamed part.

PULSATIVUS, Throbbing.

PULSATORY, Throbbing.

PULSE, *Pul'sus, Pulsa'tio, Pul'sus* seu *Ic'tus cor'dis et arteria'rum, Incur'sus arteria'rum, Sphyg'mus, Sphyg'ma, Diasphyx'is,* (F.) *Pouls,* (from *pellere, pulsum,* 'to beat.') Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a given time; to their degrees of quickness; hardness and strength; to the equality or inequality either of the pulsations themselves or of their intervals; to the development or fulness of the artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

AGES.	NUMBER OF PULSATIONS PER MINUTE.		
	HEBERDEN.	SÖMMERING.	MÜLLER.
In the embryo	.....	....	150
At birth	130 to 140	.....	Do.
One month	120		
One year	120 to 108	120	115 to 130
Two years	108 to 90	110	100 to 115
Three years	90 to 80	90	90 to 100
Seven years	72	.....	85 to 90
Twelve years	70		
Puberty	.....	80	80 to 85
Adult age	.....	70	70 to 75
Old age	.....	60	50 to 65

It does not appear that the pulse of the aged is less frequent, but the contrary. In general it is more frequent in females and in irritable persons than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In disease it wanders, more or less, from these physiological conditions. The different characters of the pulse that have been recorded are remarkably numerous. In a dictionary, it is necessary to detail them, although many of them are not now regarded, and some are ridiculous.

PULSE, AR'DENT, *Pul'sus ar'dens,* (F.) *Pouls ardens, Pouls élevé.* One which seems to raise itself to a point in order to strike the finger.

PULSE BREATH, see Breath, pulse.

PULSE, CAP'RIZANT, *Pul'sus Capri'zans* seu *dorcadis'sans* seu *gazel'lans* seu *fusa'lis, Goatleap pulse,* (F.) *Pouls caprisant.* One which seems to leap, like a goat, as it were; an imperfect dilatation of the artery being succeeded by a fuller and a stronger one.

PULSE, COM'PLEX, (F.) *Pouls combiné* ou *composé, P. compliqué.* A pulse which has the character of several critical pulses united.

PULSE, CONTRACT'ED, (F.) *Pouls serré* ou *concentré.* One whose pulsations are narrow, deep, and slightly hard. See Concentration.

PULSE, CONVUL'SIVE, *Pul'sus convulsi'vus.* (F.) *Pouls convulsif.* That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

PULSE, CRIT'ICAL, *Pulsus crit'icus.* A pulse,

which, after having possessed the characters of irritation, becomes free, open, soft, &c.

Pulse, Decurtate, Pulsus myurus: see, also, Myurus.

Pulse, Deep, *Pulsus profun'dus*, (F.) *Pouls profond.* One which cannot be felt without difficulty, and without strong pressure by the finger.

Pulse, Defic''ient, *Pulsus defic''iens* seu *an'nuens et circum'nuens, P. Flick'ering*, (F.) *Pouls défaillant, P. insensible.* One which seems, every instant, about to cease.

Pulse, Depres'sed, *Pul'sus depres'sus*, (F.) *Pouls déprimé.* That which is deep and weak.

Pulse, Devel'oped, (F.) *Pouls développé.* That which is broad, full, strong, and frequent.

Pulse, Dicrot'ic, *Pul'sus Di'crotus* seu *bi'crotus* seu *intestina'lis* seu *bife'riens* seu *mallea'ris* seu *intercu'sus* seu *du'plex*, (F.) *Pouls dicrote* ou *rebondissant* ou *redoublé.* That in which the finger is struck twice at each pulsation; once lightly, the other time more strongly.

Pulse, E'qual, *Pul'sus æqua'lis.* That in which the pulsations resemble each other, and return at equal intervals.

Pulse, Fe'brile, *Pul'sus febri'lis.* One very frequent.

Pulse, Feeble, *P. Weak, Pul'sus deb'ilis*, (F.) *Pouls faible.* One which strikes the finger feebly.

Pulse, Fil'iform, *P. thread'y.* One which resembles a thread slightly vibrating.

Pulse, Flickering, Pulse, deficient.

Pulse, Form'icant, *Pul'sus formi'cans*, (F.) *Pouls formicant.* One which resembles, by being small and scarcely perceptible, the motion of an ant.

Pulse, Fre'quent, (F.) *Pouls agité* ou *précipité*, One which strikes more frequently than usual in a given time.

Pulse, Full, *Pul'sus ple'nus*, (F.) *Pouls plein.* One which gives the notion of great repletion in the vessel.

Pulse, Goatleap, P. Caprizant.

Pulse, Gut'tural, *Pul'sus guttura'lis*, (F.) *Pouls guttural.* A pulse which has been supposed to indicate the termination of affections of the throat.

Pulse, Hard, *Pul'sus du'rus*, (F.) *Puls dur.* That in which the pulp of the finger seems to yield to the pulsation.

Pulse, Hec'tic, *Pulsus hec'ticus.* The weak, frequent pulse observed in hectic fever.

Pulse, Hemorrhoid'al, (F.) *Pouls des Hémorrhoïdes.* A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

Pulse, Hepat'ic, (F.) *Pouls du Foie.* A pulse imagined to indicate affections of the liver. It is not worthy of description.

Pulse, Infe'rior, (F.) *Pouls inférieur* ou *abdominal* ou *ventral.* One supposed to announce evacuations below the diaphragm.

Pulse, Intercur'rent, *Pul'sus intercur'rens* seu *inter'cidens.* One in which a superfluous pulsation seems to occur from time to time.

Pulse, Intermit'tent, (F.) *Pouls intercadent.* One in which the pulsations fail from time to time.

Pulse, Intes'tinal, (F.) *Pouls des intestins, P. de la diarrhée.* A critical pulse, presumed to announce an evacuation by the intestines.

Pulse, In'tricate, *Pul'sus intrica'tus*, (F.) *Pouls embarrassé.* That which is but little developed and unequally slow.

Pulse, Irreg'ular, *Pul'sus anorma'lis.* One whose pulsations are unequal, and return at unequal intervals.

Pulse of Irrita'tion, *Pul'sus ab irritatio'nē* seu *nervi'nus* seu *acrit'icus.* One which is frequent, hard, and contracted.

Pulse, Jarring, P. Vibrating—p. Jerking, Pulse, sharp.

Pulse, Lan'guid, (F.) *Pouls languissant.* A slow and feeble pulse.

Pulse, Large, *Pul'sus cras'sus* seu *mag'nus*, (F.) *Pouls grand, P. large.* That which is large and full.

Pulse, Long. One which strikes the finger to a great extent in length.

Pulse, Low, *Pul'sus hu'milis*, (F.) *Pouls bas.* One in which the pulsations are scarcely perceptible.

Pulse, Na'sal, (F.) *Pouls nasal* ou *capital* ou *du Nez.* One supposed to announce the end of an irritation in the nasal fossæ.

Pulse, Nat'ural, (F.) *Pouls naturel des adultes* ou *parfait* ou *des adultes* ou *modéré.* One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

Pulse, Organ'ic, (F.) *Pouls organique.* One which indicates the affected organ, or the organ by which an evacuation will take place.

Pulse, Pec'toral, (F.) *Pouls de l'expectoration.* A critical pulse, announcing the termination of some pulmonary irritation.

Pulse, Quick. One which strikes sharply, but not forcibly, against the finger.

Pulse, Reg'ular, *Pul'sus norma'lis* seu *regula'ris.* One whose pulsations are equal, and succeed each other at equal intervals.

Pulse, Resist'ing, (F.) *Pouls résistant.* One a little tense, a little hard.

Pulse, Sharp, (F.) *Pouls prompt* ou *vite* ou *vif.* One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerk'ing pulse.*

Pulse, Sharptailed, Pulsus myurus: see Myurus.

Pulse, Sim'ple, *Pul'sus sim'plex.* A critical pulse, indicating an evacuation by one organ only.

Pulse, Slow, *Pul'sus tar'dus* seu *ra'rus*, (F.) *Pouls lent* ou *tardif* ou *rare.* One which strikes the finger slowly.

Pulse, Small, *Pul'sus par'vus*, (F.) *Pouls petit.* One whose pulsations are slender and weak.

Pulse, Soft, *Pul'sus mol'lis*, (F.) *Pouls mou.* One which yields under the finger.

Pulse, Stom'achal, (F.) *Pouls stomacal* ou *de l'estomac.* One supposed to announce an evacuation by the stomach.

Pulse, Strong, *Pul'sus for'tis*, (F.) *Pouls fort, P. véhément.* One which strikes the finger strongly.

Pulse, Supe'rior, *Pul'sus Supe'rior*, (F.) *Pouls supérieur.* A critical pulse, supervening on irritation of organs situate above the diaphragm.

Pulse, Sup'ple, *Pulsus elas'ticus*, (F.) *Pouls souple.* One in which the pulsations have strength without hardness.

Pulse of Sweat, *Pul'sus Sudora'lis*, (F.) *Pouls Sudoral* ou *de la sueur.* A critical pulse, indicating an approaching perspiration.

Pulse, Tense, *P. Cor'dy, Pul'sus ten'sus*, (F.) *Pouls tendu, P. roide.* One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry.*

Pulse, Thready, P. filiform.

Pulse, Trem'ulous, *Pul'sus trem'ulus*, (F.) *Pouls tremblant* ou *palpitant.* One in which each pulsation oscillates.

Pulse, Un'dulating, *Pul'sus fluctuo'sus* seu *flu'ens* seu *in'cidens Sola'ni*, (F.) *Pouls ondulant* ou *ondoyant.* One which resembles, in its movements, those of the waves.

Pulse, Une'qual, *Pul'sus inæqua'lis*, (F.) *Pouls inégal.* One whose pulsations are not alike, or return at unequal intervals.

Pulse, U'rinal, *Pul'sus urina'lis*, (F.) *Pouls*

de l'Urine. A critical pulse, fancied to denote an approaching evacuation of urine.

PULSE, U'TERINE, *Pul'sus uteri'nus,* (F.) *Pouls Utérine* ou *de la Matrice* ou *des Réyles.* One which indicates the flow of the menses, or the occurrence of metrorrhagia.

PULSE, VAG''INAL, *Pul'sus vagina'lis.* The pulsation of the arteria vaginalis, which is increased in pregnancy, during abortion, labour, &c.

PULSE, VENOUS, Pulsus venarum.

PULSE, VERMIC'ULAR. That which imitates the movement of a worm.

PULSE, VI'BRATING, *Jar'ring Pulse.* One in which the artery seems to vibrate like a musical string.

PULSE, WIRY, see Pulse, tense.

PULSELESS, *Asphyc'tus,* Devoid of pulsation.

PULSELESSNESS, Asphyxia.

PULSEY, Cataplasm.

PULSIF'IC, *Pulsif'icus,* (*pulsus,* 'pulse,' and *facere,* 'to make.') That which causes or excites pulsation.

PULSILE'GIUM, *Pulsilo'gium, Pulsim'eter,* (*pulsus,* and *lego,* 'I read.') *Sphygmole'gium, Sphygmom'eter, Sphygmoscop'ium, Sphyg'moscope.* Any instrument for measuring the quickness or force of the pulse.

PULSIMANTI'A, (*pulsus,* and *μαντεια,* 'divination.') The art of predicting or prognosticating by the pulse.

PULSIMETER, (*pulsus,* and *μετρον,* 'measure,') Pulsilegium.

PULSUS, Pulse — p. Acriticus, Pulse of irritation — p. Æqualis, Pulse, equal — p. Annuens et circumnuens, Pulse, deficient — p. Anormalis, Pulse, irregular—p. Bicrotus, Pulse, dicrotic — p. Biferiens, P. dicrotic — p. Caprizans, Pulse, caprizant—p. Cordis, see Heart—p. Crassus, Pulse, large — p. Debilis, Pulse, feeble — p. Deficiens, Pulse, deficient—p. Dicrotus, Pulse, dicrotic — p. Dorcadissans, Pulse, caprizant—p. Duplex, Pulse, dicrotic — p. Durus, Pulse, hard — p. Elasticus, Pulse, supple—p. Fluctuosus, Pulse, undulating—p. Fluens, Pulse, undulating—p. Formicans, Formicant, and Pulse, formicant — p. Fortis, Pulse, strong — p. Fusalis, Pulse, caprizant — p. Gazellans, Pulse, caprizant — p. Heterochronicus, see Heterochronicus—p. Humilis, Pulse, low — p. Incidens Solani, Pulse, undulating—p. Intercidens, Pulse, intercurrent—p. Intercisus, Pulse, dicrotic — p. Intercurrens, Pulse, intercurrent — p. Intestinalis, Pulse, dicrotic — p. Intricatus, Pulse, intricate — p. Magnus, Pulse, large — p. Mallearis, Pulse, dicrotic — p. Mollis, Pulse, soft.

PULSUS MYU'RUS, *Pulse decurtate* or *sharp-tailed,* (F.) *Pouls myure.* One which goes on diminishing. See Myurus.

PULSUS NERVINUS, Pulse of irritation—p. Normalis, Pulse, regular — p. Parvus, Pulse, small — p. Plenus, Pulse, full—p. Rarus, Pulse, slow.

PULSUS SERRI'NUS, (F.) *Pouls serrin* ou *serratile.* One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

PULSUS STRIA'TUS, (F.) *Pouls étroit.* One that strikes the finger to a small extent in breadth.

PULSUS SUDORALIS, Pulse of sweat—p. Tardus, Pulse, slow—p. Urinalis, Pulse, urinal—p. Uterinus, Pulse, uterine.

PULSUS VAC'UUS, (F.) *Pouls vide.* One which gives the idea of emptiness of the artery.

PULSUS VAGINALIS, Pulse, vaginal.

PULSUS VENA'RUM, *Ve'nous Pulse, Phlebopa'lia.* A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle, and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

PULTA'CEOUS, *Pulta'ceus,* (F.) *Pultacé,* (*puls,* gen *pultis,* 'pap.') Resembling pap. Having a softened, semifluid appearance.

PULTATIO, (*puls,* gen. *pultis,* 'pap.') Atheroma.

PULTISE, Cataplasm.

PULTICULA, (dim. of *puls,* gen. *pultis,* 'pap,') *Bouillie.*

PULVERES AEROPHORI, Powders, soda — p. Effervescentes, Powders, soda.

PULVERI'ZABLE, *Pul'verable.* (From *pulvis,* gen. *pulveris,* 'powder,' and *habilis,* 'able.') Capable of being reduced to powder.

PULVERIZA'TION, *Pulverisa'tio, Pulvera'tio, Coniosto'sis,* (F.) *Pulvérisation.* The operation of dividing substances, so as to reduce them to powder.

Most drugs are reduced to powder by persons who make it a special business, and who are called *drug grinders.* This is done on a large scale in *drug mills;* and the implements used are the *grinding mill* and the *stamping mill.* In the shop of the apothecary, pulverization is effected by the pestle and mortar, and the sieve.

Where substances require the addition of other bodies to facilitate their reduction to powder, — as where camphor needs a few drops of alcohol— the process is called *pulverization by mediation.*

PULVERMACHER'S CHAIN BATTERY, see Galvanism.

PULVÉROLÉS, see Pulvis.

PULVER'ULENT, *Pulverulen'tus,* (from *pulvis.*) Reduced to the state of a fine powder. Covered, as it were, with dust. An epithet applied to the eyes when they appear dirty, and, as it were, sprinkled with dust, by reason of granulations or grayish striæ, resulting from thickening of the mucous fluid of the conjunctiva.

PULVILLUS, Pad, *Bourdonnet* — p. e Linamentis confectus, *Bourdonnet* - - p. Rotundus, *Bourdonnet.*

PULVI'NAR, *Pulvina'rium.* A pillow.

PULVINAR HUMULI, see Humulus lupulus.

PULVINAR MEDICA'TUM seu MEDICINA'LE, *Sacculus medicina'lis.* A medicated pillow; as of hops.

PULVINAR PARVUM, Pad — p. Ventriculi, Pancreas.

PUL'VIS, gen. *Pul'veris, Co'nis, Pow'der,* (F.) *Poudre.* A substance reduced into small particles by pulverization. *Sim'ple pow'ders* are those of a single substance; *com'pound,* those which result from a mixture of several different powders. An *impal'pable powder* is one which is so fine that it can scarcely be felt under the finger. Compound powders have been called *Spe'cies,* (F.) *Espèces, E. pulvérulentes, Pulvérolés.*

PULVIS ABSORBENS, P. de magnesiâ compos. — p. Adspersorius, Catapasma — p. Aerophorus, Powders, soda — p. Alexiterius, P. contrayervæ comp.—p. Alexiterius, P. ipecacuanhæ compositus — p. Algarothi, Algaroth.

PULVIS AL'OËS COMPOS'ITUS, *P. Aloës cum Guai'aco, P. Aloët'icus cum Guaiaco, Com'pound pow'der of Al'oes.* (*Aloës,* ℥iss, *Guaiac. res.* ℥j, *Pulv. cinnam. comp.* ℥ss. Rub the aloes and guaiacum separately, then mix the whole. *Ph. L.*) Cathartic, stomachic, and sudorific. Dose, gr. x to ℈j.

PULVIS ALOËS CUM CANEL'LÂ, *P. aloës et canellæ,* (Ph. U. S.), *P. Aloët'icus, Pow'der of Al'oes with Canel'la, Spe'cies Hi'eræ pi'cræ, Hi'era pi'cra,* vulg. *Hi'kry pi'kry, Hik'ry pik'ry, Pi'cra,* and *Pi'kry.* (*Aloës* ℔j, *Canell.* ℥iij. Rub separately into a powder, and mix. *Ph. U. S.*) A warm cathartic. Dose, gr. x to ℈j.

PULVIS ALOËS CUM GUAIACO, P. A. compositus —p. Aloeticus, P. aloes cum canellâ—p. Aloeticus, Hiera picra — p. Aluminis compositus, P. sulphatis aluminæ compositus — p. Aluminis kinosatus, see P. sulphatis aluminæ compositus — p. Aluminosus, P. sulphatis aluminæ compositus.

Pulvis de Ama'ris Compos'itus, *P. antiarthrit'icus ama'rus*, (F.) *Poudre antiarthritique amère*. (*Gentian., Aristoloch. rotund.*, āā p. 3, *Flor. centaur. min.* p. 4. *Fol. chamædr., Chamæpith.* manipul.—f. pulvis, *Ph. P.*) In gouty affections, dyspepsia, &c. Dose, gr. xx.

Pulvis Amygdalæ Compositus, Confectio amygdalarum—p. Angelicus, Algaroth—p. Anodynus, P. ipecacuanhæ compositus—p. Antiacidus, P. cretæ compositus—p. Antiacidus, P. de magnesiâ compositus—p. Antiarthriticus amarus, P. de amaris compositus—p. Antiarthriticus purgans, P. de sennâ, scammoneâ et lignis—p. Antiasthmaticus, P. de sulphure et scillâ.

Pulvis Antilys'sus, *Mead's powder against the bite of a mad dog.* It consisted of *ash-coloured liverwort* in powder, with an equal quantity of *black pepper;* a drachm and a half of the two forming a dose for an adult.

Pulvis Antimonialis, Antimonial powder—p. Antimonii compositus, Antimonial powder.

Pulvis de A'ro Compos'itus, *Com'pound Pow'der of A'rum*, (F.) *Poudre de Birckmann*, (*Rad. ari, Acori veri, Pimpinell. saxifrag.* āā 40 p., *Ocul. cancror. ppt.* 12 p., *Cinnam.* 7 p., *Potassæ sulph.* 6 p., *Ammoniæ muriat.* 2 p.—f. pulv. *Ph. P.*) Sternutatory.

Pulvis Aromaticus, P. cinnamomi compositus.

Pulvis As'ari Compos'itus, *P. sternutato'rius* seu *errhi'nus* seu *capita'lis Sanc'ti An'geli* seu *cephal'icus, Cephal'ic snuff, Com'pound pow'der of Asarabac'ca*, (F.) *Poudre d'asarum composée* dite *sternutatoire, P. de Saint-Ange.* (*Asar. Europ.* p. 3, *Origan. majoranæ, Lavand.*, sing. p. 1. Rub into powder. *Ph. L.*) Sternutatory.

Pulvis Auri, see Gold—p. e Bolo compositus cum opio, P. cretæ compositus cum opio—p. e Bolo compositus sine opio, see P. Cretæ compositus—p. Cambogiæ compositus, P. e. gummi guttâ—p. Capitalis Sancti Angeli, Pulvis asari compositus—p. Carbonatis calcis compositus, P. cretæ compositus—p. Cardiacus, P. Contrayervæ comp.—p. Carthusianorum, Antimonii sulphuretum rubrum.

Pulvis Cat'echu Compos'itus, *Compound Powder of Catechu.* (*Catechu, kino*, āā ℥ij; *Cinnam., Myrist.*, āā ℥ss.) Dose, as an astringent, gr. xv to xxx.

Pulvis Catharticus, P. Scammoneæ compositus—p. Causticus, Vindobonensis, Powder, Vienna—p. Cephalicus, P. asari compositus.

Pulvis Cinnamo'mi Compos'itus, *Com'pound Pow'der of Cin'namon, Pul'vis* seu *Spe'cies Imperato'ris, Pul'vis aromat'icus* (Ph. U. S.), *P. vi'næ Imperato'ris* seu *Diaro'maton, Spe'cies diacinnamo'mi* seu *lætifican'tes Rha'zis* seu *Diam'bræ si'nē odora'tis* seu *aromat'icæ, Tra'gea aromat'ica, Aromat'ic pow'der*, (F.) *Poudre de canelle composée* ou *aromatique.* (*Cinnam., Zingib.* āā ℥ij, *Cardam., Myrist.* āā ℥j. Rub to a fine powder. *Ph. U. S.*) Stimulant and carminative. Dose, gr. x to ℈j.

Pulvis Cob'bii seu Tunquinen'sis. The famous *Ton'quin pow'der*, introduced into England by a Mr. Cobb. It was composed of 16 grains of *musk*, and 48 grains of *cinnabar;* and was mixed in a gill of *arrack.* It was formerly regarded as a specific in hydrophobia.

Pulvis Comitis Warwicensis, P. Cornachini—p. Comitissæ, Cinchona.

Pulvis Contrayer'væ Compos'itus, *P. cardi'acus* seu *alexite'rius* seu *Mantua'nus, La'pis contrayervæ, Contrayerva balls, Com'pound Pow'der of Contrayer'va.* (*Contrayerv. contrit.* ℥v, *Test. præp.* ℔iss. Mix. *Ph. L.*) Stimulant and sudorific. Dose, gr. xv to ℥ss.

Pulvis Cornachi'ni, *P. Ox'ydi Stib'ii compos'itus* seu *Com'itis Warwicen'sis* seu *de Tri'bus* seu *Scammo'nii antimonia'lis, Diaceltates'son Paracel'si, Earl of War'wick's Pow'der, Cer'berus Tri'ceps*, (F.) *Poudre Cornachine.* (*Scammon., Potass. supertart., Antim. diaph.* āā p. æ. f. pulvis, *Ph. P.*) Cathartic. Used chiefly in cutaneous diseases. Dose, ℥ss to ℥j.

Pulvis Cor'nu Us'ti Cum O'pio, *P. opia'tus, Powder of burnt Hartshorn with o'pium*, (F.) *Poudre de corne brulée avec l'opium.* (*Opii duri* cont. ℥j, *Corn. ust. præp.* ℥j, *Coccor.* cont. ℥j. Mix. *Ph. L.*) Ten grains contain one of opium. Anodyne.

Pulvis Cosmi, Powder, arsenical, of Côme—p. Cretaceus, P. cretæ compositus.

Pulvis Cretæ aromaticus, see Confectio aromatica.

Pulvis Cre'tæ Compos'itus, *P. Carbona'tis Cal'cis compos'itus* seu *creta'ceus* seu *antac''idus* seu *terres'tris, Spe'cies e Scor'dio si'nē o'pio, S. Diacre'tæ, Compound Pow'der of Chalk, Dioscord'ium;* (with Bole Armeniac in place of chalk—the *Pulvis e Bolo compositus sine opio;*) (F.) *Poudre de craie composée.* (*Cretæ ppt.* ℔ss, *Cinnam.* ℥iv, *Tormentill., Acaciæ*, sing. ℥iij, *Pip. long.* ℥iv. Reduce separately to a fine powder, and mix. *Ph. L.*) Antacid, stomachic, absorbent. Dose, gr. xx to ℈ij.

Pulvis Cre'tæ Compos'itus cum O'pio, *Com'pound Powder of Chalk with o'pium, P. e Cre'tâ compos'itus cum o'pio;* (with Bole Armeniac instead of chalk—*P. e Bo'lo compos'itus cum o'pio;*) *Spe'cies e Scor'dio cum o'pio*, (F.) *Poudre de craie composée avec l'opium.* (*Pulv. cret. comp.* ℥vjss, *Opii duri* cont. ℈iv. Mix. *Ph. L.*) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ℈j to ℈ij.

The British Pharmacopœia (1864) has a *Pulvis Cre'tæ aromat'icus cum o'pio, Aromat'ic pow'der of chalk and o'pium*, which is composed of *aromatic powder of chalk* ℥ix½, *opium*, in powder, ℥i. Mix and pass through a fine sieve. Dose, ℥ss to ℥j.

Pulvis Diaphoreticus, P. ipecacuanhæ comp.—p. Diapnoicus, P. ipecacuanhæ comp.—p. Diaromaton, P. cinnamomi compositus—p. Diasenæ, P. sennæ compos.—p. Diaturpethi compositus, P. jalapæ compositus.

Pulvis Du'cis Portland'iæ, *Duke of Portland's Gout Pow'der*, (F.) *Poudre de Duc de Portland* ou *de la Mirandole.* (*Rad. aristoloch., Gentianæ, Summit. chamædr., Centaur. min.* āā p. æ.) Dose, ℥ss to ℥j.

Pulvis Emmenagogus, P. myrrhæ compositus—p. Epilepticus Marchionum, P. de magnesiâ compositus—p. Errhinus, P. asari compositus—p. Febrifugus Jacobi, Antimonial powder—p. Galactopœus, P. de magnesiâ compositus.

Pulvis e Gum'mi Gut'tâ, *P. Cambo'giæ compos'itus* seu *hydrago'gus, Camboge' Pow'der*, (F.) *Poudre hydragogue* ou *de gomme gutte* ou *de Quercetan'nus.* (*Rad. jolap*, 24 p., *Rad. mechoacan.*, 12 p., *Cinnam., Rhei*, āā 8 p., *Gum. Cambog.* 3 p., *Fol. soldanellæ* sicc. 6 p., *Semin. anisi* 12 p., fiat pulvis. *Ph. P.*) A drastic cathartic. In anasarca and in worms. Dose, gr. xv to xxx.

Pulvis Gummo'sus Alkali'nus, *Sa'po vegeta'bilis*, (F.) *Poudre de savon végétal.* (*Guaiac. pulv.* 32 p. *Potass. carb.* 4 p. Make into a powder. *Ph. P.*) Antacid.

Pulvis ex Helminthocort'o Compos'itus, *P. vermif'ugus ab'sque mercu'rio*, (F.) *Poudre vermifuge sans mercure.* (*Fuc. helminthocort., Sem. contra., Summitat., absinth., Tanaceti, Fol. scordii, Sennæ, Rhei.* āā p. æ, fiat pulvis. *Ph. P.*) Dose, ℈j to ℥j.

Pulvis Hydragogus, P. e gummi guttâ—p. Hydrargyri cinereus, see Hydrargyri oxydum cinereum—p. Hypnoticus, Hydrargyri sulphuretum nigrum—p. Imperatoris, P. cinnamomi compositus—p. Incisivus, P. de sulphure et scillâ—p. Pro Infantibus, P. de magnesiâ compositus—p. Infantum, P. de magnesiâ compos.—p. Infantum antacidus, P. de magnesiâ compositus.

Pulvis Ipecacuan'hæ Compos'itus, *P. alexite'rius* seu *anod'ynus* seu *diaphoret'icus* seu *diapno'icus* seu *sudorif'icus Doveri* seu *Ipecacuan'hæ et O'pii, Com'pound Powder of Ipecacuan'ha, Do'ver's Pow'der*, (F.) *Poudre de Dover* ou *d'ipecacuanha et d'opium* ou *de Dower*. (*Ipecacuanhæ pulv., O'pii pulv.* sing ℥j, *Potassæ sulphat.* ℥j. Mix. Diaphoretic. Dose, gr. v to gr. xij.

Pulvis Ipecacuanhæ et Opii, P. ipecacuanhæ compositus—p. Jacobi, Antimonial powder.

Pulvis Jalap'æ Compos'itus, *P. Diaturpe'thi compos'itus* seu *lax'ans* seu *pur'gans* seu *laxati'vus vegetab'ilis* seu *lax'ans cum sa'lē* seu *Jalap'æ sali'nus* seu *Jalap'æ tartar'icus, Spe'cies Diajalap'æ, Com'pound Pow'der of Jal'ap*, (F.) *Poudre de jalap composé*. (*Pulv. jalap.* ℥j, *Potass. bitart.* ℥ij. Mix.) Cathartic. Dose, ℈j to ℥ij.

Pulvis Jalapæ Salinus, P. jalapæ compositus—p. Jalapæ tartaricus, P. jalapæ compositus—p. de Jalapâ et scammonio compositus, P. scammoneæ comp.—p. Jamesii, Antimonial powder—p. Jesuiticus, Cinchona—p. Joannis de Vigo, Hydrargyri nitricooxydum.

Pulvis Ki'no Compos'itus, *P. Ki'no cum o'pio* (Ph. B. 1864,) *Com'pound Pow'der of ki'no*, (F.) *Poudre de kino composée*, (*Kino* ʒxv, *Cinnam.* ʒiv, *Opii duri* ʒj. Rub each to powder, and mix. *Ph. L.*) Astringent. Dose, gr. v to xx.

Pulvis Laxans, P. jalapæ compositus—p. Laxans cum sale, P. jalapæ compositus—p. Laxativus vegetabilis, P. jalapæ compositus.

Pulvis de Magne'siâ Compos'itus, *P. Galactopœ'us* seu *Nutri'cum* seu *Infan'tum* seu *Infantum antac''idus* seu *pro Infan'tibus* seu *antiac''idus* seu *absor'bens* seu *epilep'ticus Marchio'num, Com'pound Pow'der of Magne'sia*, (F.) *Poudre absorbante et anti-acide*. (*Magnesiæ, Sacchar.* āā p. æ. Mix. *Ph. P.*)

Pulvis Mantuanus, P. contrayervæ comp.—p. Marchionis, Marchionis Pulvis—p. Mercurialis cinereus, Hydrargyri oxidum cinereum—p. ad Mucum pulmonalem liberius ciendum, P. de sulphure et scillâ.

Pulvis Myr'rhæ Compos'itus, *P. e Myr'rhâ compos'itus* seu *ad ul'cera tend'inum* seu *emmenago'gus, Com'pound Myrrh Pow'der*, (F.) *Poudre Balsamique*. (*Myrrhæ, Sabinæ, Rutæ, Castor. Russ.*, āā ʒj.) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to xl.

Pulvis Nutricum, P. de magnesiâ compositus—p. Opiatus, P. cornu usti cum opio—p. Oxydi stibii compositus, P. cornachini—p. ad Partum, Ergot—p. Parturiens, Ergot—p. de Phosphate calcis et stibii compositus, Antimonial powder—p. Principis Hydrargyri nitricooxydum—p. Purgans, P. jalapæ compositus—p. Quercetanus, Hydrargyri submurias.

Pulvis Quer'cus Mari'næ, *Pow'der of Yel'low Blad'derwrack*. (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible with a perforated lid, and then reduced to powder. *Ph. D.*) Virtues dependent on iodine: used, consequently, in bronchocele, &c. Dose, gr. x to xl. See Fucus vesiculosus.

Pulvis Rhe'i Compos'itus (Ph. U. S. 1863,) *Com'pound Pow'der of Rhu'barb*. (*Magnes.* ℔j, *Zingib. pulv.* ʒij, *Rhei pulv.* ʒiv. M.) An antacid and laxative. Dose, ℈j to ℈ij.

Pulvis Sali'nus Compos'itus, *Com'pound Saline' Pow'der*. (*Sodii chlorid., Magnesiæ sulphat.*, āā ʒiv, *Potas. sulphat.* ʒiij. *Ph. E.*) Dose, as an aperient, two or three drachms dissolved in water.

Pulvis Scammo'neæ Compos'itus, *P. e Scammonio compos'itus* seu *Scammo'nii* seu *de Jalap'â et Scammo'nio compos'itus* dictus *Cathar'ticus, Com'pound Pow'der of Scam'mony*, (F.) *Poudre cathartique* ou *Poudre de Scammonée composée*. (*Scammon., Ext. jalap. dur.*, sing., ʒij, *Zingib.* ʒss. Rub separately to powder, and mix. *Ph. L.*) Cathartic. Dose, gr. viij to gr. xv.

Pulvis Scammo'nii cum Al'oë, *P. e Scammo'nio cum Al'oë, Scam'mony and Al'oes Pow'der*. (*Scammon.* ʒvj, *Ext. jalap. dur., Aloës Socotr.* āā ʒiss, *Zing.* ʒss.) Cathartic. Dose, gr. x to xv.

Pulvis Scammonii Antimonialis, P. cornachini.

Pulvis Sen'næ Compos'itus, *P. e Sen'nâ compos'itus* seu *e Se'nâ compos'itus* seu *Diase'næ, Com'pound Powder of Sen'na*, (F.) *Poudre de séné composée*. (*Sennæ, Potas. supertart.*, sing., ʒij, *Scammon.* ʒss, *Zingib.* ʒij. *Ph. L.*) Cathartic, hydragogue. Dose, ℈j to ʒj.

Pulvis de Sennâ, Scammo'neâ et Lig'nis Compos'itus *dictus* Antiarthrit'icus Pur'gans, (F.) *Poudre de Pérard*. (*Gum Arab., Potass. supertart., Fol. sennæ, Chinæ*, āā 4 p., *Scammon., rad. Sarsapar., Chinæ, Guaiac. lign.* āā 2 p.: fiat pulvis. *Ph. P.*) Purgative. Used to obviate gout. Dose, ʒj.

Pulvis Stanni, see Tin—p. Sternutatorius, P. asari compositus—p. Stibiatus, Antimonial powder—p. Stypticus, P. Sulphatis aluminæ compositus—p. Sudorificus, P. ipecacuanhæ compositus—p. Sudorificus Doveri, P. ipecacuanhæ compositus.

Pulvis de Sulpha'tē Potas'sæ Compos'itus, *P. tem'perans Stah'lii*, (F.) *Poudre tempérante de Stahl*. (*Potass. sulph., P. nitrat.* āā 9 p., *Hydrarg. sulph. rubr.* 2 p. Mix. *Ph. P.*) As an antiphlogistic, and in acidity of the first passages. Dose, ℈j to ℈ij.

Pulvis Sulpha'tis Alu'minæ Compos'itus, *P. alumino'sus* seu *alu'minis kinosa'tus* seu *styp'ticus* seu *alu'minis compos'itus, Alu'men kinosa'tum, Com'pound Al'um Pow'der*, (F.) *Poudre styptique* ou *d'alun composée*. (*Sulphatis aluminæ*, p. iv, *Kino*, p. 1. *Ph. E.*) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

Pulvis de Sul'phurē et Scil'lâ, *P. antiasthmat'icus* seu *incisi'vus* seu *ad mu'cum pulmona'lem libe'rius cien'dum*, (F.) *Poudre incisive* ou *antiasthmatique*. (*Sacchar.*, p. 3, *Sulphur. lot.* p. 2, *Scillæ.* siccat. p. j. *Ph. P.*) Dose, gr. v to ʒss.

Pulvis e Sulphure'to Hydrar'gyri Ni'gro et Scammo'nio, *dictus* Vermif'ugus Mercuria'lis, (F.) *Poudre vermifuge mercurielle*. (*Pulv. cornachin., Hydrarg. sulphuret. nigr.* recent. præp., āā p. æ. Mix. *Ph. P.*) Dose, ℈j to ℈ss.

Pulvis Sympatheticus, Sympathetic powder—p. Temperans Stahlii, P. de sulphate potassæ compositus—p. Terrestris, P. cretæ compositus—p. Tonquinensis, P. Cobbii.

Pulvis Tragacan'thæ Compos'itus, *P. e Tragacan'thâ compos'itus, Spe'cies Diatragacan'thæ frig''idæ, Com'pound Pow'der of Trag'acanth*, (F.) *Poudre de gomme adragant composée*. (*Tragacanth.* contus., *Acaciæ* cont., *Amyli*, sing., ʒiss, *Sacch. purif.* ʒiij. *Ph. L.*) Demulcent. In coughs, &c. Dose, ʒss to ʒiij.

Pulvis de Tribus, P. cornachini—p. ad Ulcera tendinum, P. myrrhæ compositus—p. Vermifugus absque mercurio, Pulvis ex helminthocorto comp.—p. Vermifugus mercurialis, P. e sulphureto hydrargyri nigro et scammonio—p. Vitæ Imperatoris, P. cinnamomi compositus.

Pu'MEX, *La'pis pu'micis, Pum'ice*, (F.) *Pierre Ponce*. This was formerly employed as a desiccative and as a dentifrice.

PUMICE, Pumex.

PUMILIO, Nanus.

PUMILUS, see Nanus.

PUMMELFOOT, (Knobfoot,) Kyllosis.

PUMP, BREAST, Antlia lactea—p. Stomach, Stomach pump.

PUMPKIN, (pompion,) Cucurbita pepo.

PUNA, (S.) *Veta, Sorocco, Soroche, Sorrouche, Mareo, Hypson'osus, Oron'osus, Dyspnœ'a monta'na, Moun'tain Sick'ness*, (F.) *Mal de Montagne*. A sickness common in the elevated districts of South America and elsewhere, which attacks those

unaccustomed to breathe the rarified atmosphere. It strongly resembles sea-sickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration greatly.

PUNAIS, (perhaps from *puer*, 'to stink,' and *nez*, 'the nose,') see Ozæna.

PUNAISE, Cimex.

PUNAISIE, Ozæna.

PUNCH, *Rhi'zagra*, (*pungere*, *punctum*, 'to prick.') *Repulso'rium*, (F.) *Repaussoir*. A surgical instrument used for extracting the stumps of teeth. See Lever.

Also, an agreeable alcoholic drink, made of spirit, wine, sugar, lemon juice, and water. Milk is sometimes substituted wholly or in part for the water; the lemon juice being left out and nutmeg added: it then forms *Milk Punch*. Punch, as a drink, is said to be of oriental origin, and to be derived from Persian *punji* or Sanscrit *pancha*, 'five,' from the number of ingredients that entered into its composition [?].

PUNCTA, *Punctum*, *Punctus*, (*pungere*, *punctum*, 'to prick, to dot,') a point, a prick, a puncture.

PUNCTA OSSIFICATIO'NIS, Ossification, points of.

PUNCTÆ MUCOSÆ, see Acne.

PUNCTICULA, (dim. of *puncta*, 'a point,') Petechiæ.

PUNCTIO, (from *pungere*, *punctum*, 'to puncture,') Paracentesis, Puncture—p. Nervi, Neuronygme.

PUNCTUM, ('a point,') Puncta, Puncture, see Stitch.

PUNCT'UM AU'REUM, *Punctu'ra aur'ea*. Formerly, when an intestinal hernia was reduced by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of anything down the tunica vaginalis. Hence the term. See, also, Foramen centrale retinæ.

PUNCTUM CÆCUM, 'blind spot,' see Optic nerve—p. Lacrymale, Lachrymal punctum.

PUNCTUM SA'LIENS, 'leaping point,' *P. sanguin'eum sa'liens*, *Glob'ulus sanguin'eus*, *Punct'us ru'ber sa'liens*. The first moving *point* which makes its appearance after the fecundation of the germ. It has been generally, but erroneously, applied to the heart of the embryo.

PUNCTURA, Paracentesis, Puncture—p. Aurea, Punctum aureum.

PUNCTURE, *Punctu'ra*, *Punc'tio*, *Cente'sis*, *Paracente'sis*, *Nyx'is*, *Tre'sis Punctu'ra*, (F.) *Piqure*. A wound made by a pointed instrument, as a sword, bayonet, needle, thorn, &c. A puncture is, generally, of trifling consequence; but, sometimes, it becomes important from the parts implicated, and the after consequences.

PUNCTURE DOCTORS, *Piqueurs médecins*.

PUNCT'URING, *Compunc'tio*, *Paracente'sis*, (F.) *Ponction*. The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity, with the view of evacuating any fluid, effused or accumulated therein. *Paracentesis* is a sort of puncturing.

PUNCTUS, 'a point,' Puncta—p. Ruber Saliens, Punctum saliens.

PUN'GENT, (F.) *Pungitif*. Pain is said to be pungent, when it seems as if a pointed instrument was forced into the suffering part.

PU'NICA GRANA'TUM, (*Punica*, 'Punic, Carthaginian,' whose colors were a deep red, φοινιξ.) The *Pomegran'ate*, *Rho'a*, *Rhœ'a*, *Grana'tum*, (F.) *Grenadier: Ord.* Myrtaceæ. *Sex. Syst.* Icosandria Monogynia. The rind of the fruit, called *Malicho'rium*, *Malico'rium*, *Grana'ti Fruc'tûs Cor'tex* (Ph. U. S.); and the flowers—called *Balaus'tine flow'ers*—are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes*. The portion, however, of the plant, that has attained most celebrity, is the bark of the root, *Grana'ti Radi'cis Cor'tex* (Ph. U. S.), which appears to be very efficacious in tænia. It is given in decoction, (*Granat. rad. cort.* ℥ij; *Aquæ* Oij, boiled to Oiss.) Dose, f℥ij, every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin*.

PUNK, Boletus igniarius.

PUOGENIA, Pyogenia.

PU'PIL, *Pupil'la*, *Pu'pula*, *Pupil'io*, *Vis'io*, *Op'sis*, *Co'rē*, *Co'ra*, *Rhax*, *Fenes'tra* seu *Ni'grum* seu *Fora'men Oc'uli*, *Prunel'la*, *Lu'men*, *Gle'nē*, *Sight* or *Ap'ple* or *Ball of the eye*, (Sc.) *Blak of the Eie*, (Prov.) *Candle*, (F.) *Pupille*, *Prunelle*, (from *pupa*, 'a babe,' *pupilla*, 'a little babe;' so called from the image seen in the eye.) The aperture of the iris, through which the rays of light pass that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first six months of gestation, it is closed by the pupillary membrane.

PUPIL, CLOSURE OF THE, Synezizis.

PUPIL, PIN'HOLE. A condition of the pupil in typhus, in which it is so contracted as to resemble a pinhole. It indicates a dangerous form of brain affection.

PUPILLÆ VELUM, 'curtain of the pupil,' Pupillary membrane.

PUPILLARIS HERBA, Lapsana.

PU'PILLARY, *Pupilla'ris*, (F.) *Pupillaire*. That which belongs to the pupil.

PUPILLARY MEM'BRANE, *Membra'na Pupilla'ris*, *Pupil'læ Ve'lum*, *Mem'brana Wachendorfia'na*. The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPPET ROOT, Veratrum viride.

PUPPIS OS, 'stern bone,' Frontal bone.

PUPULA, Pupil.

PU'PULÆ, *A'pices digito'rum*. The pulps or extremities of the fingers.

PURBLIND, (peerblind [?],) Myopic.

PURBLINDNESS, Myopia.

PURGAMENT, (from *purgare*, 'to cleanse,') Purgative.

PURGAMENTA, Excrement — p. Alba, Leucorrhœa — p. Infantis, Meconium — p. Puerperii, Lochia—p. Uteri, Lochia.

PURGANS MEDICAMENTUM, 'a purging medicine,' Cathartic.

PURGATIO, (from *purgare*, *purgatum*, 'to cleanse,') Catharsis—p. Alvi, Catharsis—p. Muliebris alba, Leucorrhœa—p. Puerperii, Lochia.

PURGATION, Catharsis.

PURGATIONES, (pl. of *purgatio*, 'cleansing,') Menses—p. Menstruæ, Menses.

PURGATIONS, Menses.

PUR'GATIVE, *Purgati'vus*, *Pur'gans*, *Moch'licus*, *Cathareti'cus*, *Catater'icus*, *Cathar'tic*, *Pur'gament*, *Purge*, (F.) *Purgatif*. A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular, and exciting increased secretion from the mucous, coat.

PURGE, Purgative — p. Root, Euphorbia corollata.

PURGING, Diarrhœa.

PURIF'ICANS, *Purif'icus*, (*purus*, 'pure,' and *facere*, 'to make,') Purifying; hence:—

PURIFICANTIA, Medicines that cleanse or purify the blood.

PURIFICUS, Purificans.

PU'RIFORM, *Puriform'is*, (*pus*, gen. *puris*, and *forma*, 'form.') Having the appearance of pus.

PURL. A medicated malt liquor, in which wormwood and aromatics are infused. Also, boiled beer having gin, sugar and spice mixed with it.

PUROHEPATITIS, (*pus*, gen. *puris*, and *hepatitis*,) see Hepatitis.

PU'ROMU'COUS, *Puromuco'sus*, (*pus*, gen. *puris*, and *mucus*.) Having the character or appearance of pus and mucus.

PUR'PLE OF CAS'SIUS, *Pur'pura Minero'lis Cas'sii*, (F.) *Pourpre de Cassius*. A precipitate, obtained by adding the protochloride of tin to a dilute solution of gold; or by dipping rods of tin in a solution of gold in diluted chlorohydric acid. Used in syphilis.

PURPLES, Purpura hæmorrhagica.

PUR'PURA, *Porph'yra*, 'a purple colour.' This word has been employed in many senses. It generally means livid spots on the skin from extravasated blood, with languor and loss of muscular strength, and pains in the limbs.—(F.) *Pourpre*.

In Purpura Simplex, *Porph'yra sim'plex*, *Petechiæ si'nē fe'brē*, *Pelio'sis*, *Phœnig'mus Petechia'lis*, *Profu'sio subcuta'nea*, *Pete'chial Scur'vy*, the spots are numerous, small and fleabite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance. At times, the affection is accompanied by severe pains in the extremities, constituting *Pelio'sis rheumat'ica*.

In Purpura Hæmorrhag''ica, *Porph'yra hæmorrhag''ica*, *Stomac'ace universa'lis*, *Hæmorrhagia universa'lis*, *Petechiano'sis*, *Mor'bus maculo'sus hæmorrhag''icus Werlhof'ii*, *Pelio'sis hæmorrhag''ica*, *Scorbu'tus*, *Hæmorrhœ'a petechia'lis*, *Hæmatospi'lia*, *Land Scur'vy*, *Pur'ples*, (F.) *Scorbut*, *S. de Terre*, *Maladie de Werlhof*, *Hémacélinose*, *Péliose hémorrhagique*—the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In Purpura Nau'tica, *Por'phyra nau'tica*, *Scorbu'tus*, *Pechytyr'bē*, *Gingibra'chium*, *Gingipe'dium*, *Scelotyr'bē*, *Stomac'acē*, *Scorbu'tus nau'ticus*, *Sea scur'vy*, (Sc.) *Scrubie*, (F.) *Scorbut*, there are spots of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of one kind of food and of stagnant water.

All these varieties of purpura considerably resemble each other. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbu'tic Cachex'ia*, *Lues Scorbu'tica*, and *Cacochym'ia Scorbu'tica*. Generally speaking, the use of the mineral acids will be indicated; and, in sea scurvy, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be united with cinchona or turpentine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry climate, with sufficiency and change of food, and especially the use of green vegetables.

The general principles of management are the same in sea, as in land scurvy.

Purpura, Scarlatina—p. Alba benigna et maligna, Miliary fever—p. Maligna, Petechiæ—p. Miliaris, Miliary fever—p. Mineralis Cassii, Purple of Cassius—p. Puerperarum, Miliary fever—p. Urticata, Urticaria.

PURPURIC URINE, see Porphyruria.

PURPURINE, see Porphyruria.

PURPURISSUM, Hydrargyri sulphuretum rubrum.

PURRING TREMOR, *Frémissement cataire*.

PURSE, ([L.] *bursa*, [F.] *bourse*,) Scrotum—p Shepherd's, Thlaspi bursa.

PUR'SINESS, *Dyspnœ'a pinguedino'sa*, (F.) *Pousse*. Dyspnœa accompanied with oppressive fatness. The word is, also, applied to dyspnœa of every kind. One so affected is said to be *pursy*, or *shortwinded*, (Prov.) *Short-of-puff*, *Thicklisted*, (F.) *Poussif*, old (F.) *Pourcif*.

PURSLAIN, ([L.] *portulaca*, [I.] *porcellana*, old [F.] *pourcelaine*,) Purslane.

PURSLANE, Portulaca—p. Milk, Euphorbia corollata and E. maculata—p. Speedwell, Veronica peregrina—p. Water, Ludwigia palustris, Veronica beccabunga.

PURSY, see Pursiness.

PURULENCE, (from *pus*, gen. *puris*,) Pus, Suppuration.

PURULENCY, Pus, Suppuration.

PU'RULENT, *Purulen'tus*, *Em'pyus*, *Pyo'des*, *Py'icus*. That which has the character of pus or consists of pus; as *purulent matter*, *a purulent collection*, &c.

Purulent Deposit, Pus.

PURULENTIA, Suppuration.

PURVAIN, Verbena officinalis.

PUS, gen. *Pu'ris*, (πυος and πυον,) *Hu'mor purulen'tus*, *Py'on*, *Py'os*, *Mat'ter*, *Pu'rulent depos'it*, *Pu'rulence*, *Pu'rulency*, (Sc.) *Woursum*, *Worsum*. A secretion from inflamed textures, and especially from the areolar membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality,—*laud'able pus*, *Pus bo'num* seu *laudab'ilē* seu *nutriti'vum* seu *ve'rum*, (F.) *Pus louable*,—is of a yellowish-white colour, opake, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts. Normal pus consists essentially of two distinct parts, *pus cor'puscles* or *pus glob'ules*, *Cy'toid cor'puscles* of Henle—and a colourless, aqueous fluid, *li'quor pu'ris*, in which the corpuscles are suspended. A variety of the pus corpuscles is described by M. Lebert under the name *py'oid*. Fully formed pus is aplastic.

Pus Bonum, see Pus—p. Corpuscles, see Pus—p. Corrosivum, Sanies—p. Globules, see Pus—p. Laudable, see Pus—*p. Louable*, see Pus—p. Malignum, Ichor, Sanies—p. Nutritivum, see Pus—p. Verum, see Pus.

PUSA, Girl.

PUSH, Pustule.

PUSILLA, (dim. of *pusa*,) Girl.

PUSILLA'TUM, *Pusula'tum*, (from *pusillus*, 'small' [?].) A coarse powder,

PUSILLUS, 'small,' Nanus.

PUSKILE, Pustule.

PUSTULA, (from *pus*,) Pustule—p. Ardens, Eczema—p. Gangrænosa, see Anthrax—p. Oris, Aphthæ—p. Livida Esthoniæ, see Anthrax—p. Maligna, see Anthrax.

Pustulæ Siccæ, 'dry pustules,' Lichen.

PUS'TULAR, *Pus'tulous*, *Pustula'ris*, *Pustulo'sus*, (F.) *Pustuleux*. Of or belonging to pustules. Affected with pustules.

PUSTULA'TION, *Pustula'tio*, (*pustulare*, *pustulatum*, 'to cause pustules.') The formation of pustules.

PUS'TULE, *Pus'kile*, *Push*, *Pus'tula*, *Ecpye'sis*, *Ec'thyma*, *Benath*, *Bubē*, *Epanas'tasis*. An elevation of the cuticle, with an inflamed base,

Willan and Bateman reckon four varieties of pustules, *Phlyza'cium*, *Psydra'cium*, *Achor*, and *Favus*. The variolous pustule is often called, by the French, *Grain*; English, *Pock*.

PUSTULE MALIGNE, see Anthrax.

PUSTULOUS, Pustular.

PUSULATUM, Pusillatum.

PUSUS, Boy.

PUT TO BED, Deliver.

PUTAMEN OVI, ('shell of an egg,' from *putare*, 'to cast off,') see Membrana putaminis.

PUTIUM, (ποσθιον,) Prepuce.

PUTREDO, gen. *Putred'inis*, 'rottenness,' Hospital Gangrene, Putrefaction.

PUTREFAC'TION, *Putrefac'tio*, *Putrescen'tia*, *Sep'sis*, *Sap'rotes*, *Se'pedon*, *Pu'trid* or *Putrefact'ive fermenta'tion*, *Pu'tror*, (*putris*, 'rotten,' and *facere*, 'to make.') A decomposition, experienced by animal substances, when deprived of life, and placed under special circumstances. The presence of water is indispensable; the temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are, water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized, and has an infected odour. It has been supposed that something like putrefaction may occur in the living body, as in case of putrid fever. To this condition, Piorry has given the name *Typhohæ'mia*, conceiving it to be owing to alteration of the blood by putrid animal matters. *Putrefaction* or *Putrescence* properly signifies the state of becoming putrid: whilst *Putrid'ity*, *Putre'do*, *Putrid'itas*, *Pu'tridness*, (F.) *Putridité*, *Pourriture*, is the state of rotteness.

PUTRESCENT, (from *putrescere*, 'to grow rotten,') Hyposaprus—p. Poison, see Poison.

PUTRESCENTIA, Putrefaction — p. Uteri gravidi, Hysteromalacia.

PU'TRID, *Pu'tridus*, *Sap'ros*, *Sepedono'des*, (F.) *Putride*, (*putreo*, 'to rot.') An epithet for affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, see Putrefaction.

PUTRIDITY, see Putrefaction.

PUTRILA'GO, gen. *Putrilag''inis*, (*puter*, 'rotten,') (F.) *Putrilage*. The pultaceous matter or *slough*, which forms in certain gangrenous and other ulcers, and is thrown off.

PUTROR, Putrefaction.

PUTZOCHILL, see Myroxylon Peruiferum.

PUXIRI, see Pichurim beans.

PYÆMIA, Pyohæmia.

PYAR, (πυαρ,) Colostrum.

PYARTHRO'SIS, (*pyo*, αρθρον, 'a joint,' and *osis*.) Suppuration of a joint.

PYAR'THRUM, (*pyo*, and αρθρον, 'joint.') A suppurated joint.

PYCNAN'THEMUM INCA'NUM, (πυχνος, 'dense,' and ανθεμον, 'a blossom.') *Clinopod'ium inca'num*, *Com'mon Mount'ain Mint*, *Wild Bas'il*. An indigenous plant of the mint *family* — *Ord.* Labiatæ—which flowers in August. It has the aromatic properties of the mints.

PYCNAN'THEMUM LINIFO'LIUM, *Virginia Thyme*, has like virtues.

PYCNICMA'SIA, *Pycnic'masis*, (πυκνος, 'thick,' and ικμας, and ικμασια, 'moisture.') A thickening of the juices.

PYCNICMASTICA, Incrassantia.

PYCNOMETER, (πυκνος, 'thick,' and μετρον, 'measure,') Areometer.

PYCNOSIS, (πυκνωσις, from πυκνος, 'thick,' and *osis*,) Inspissatio.

PYCNOTICA, (πυκνωτικα,) Incrassantia.

PYEC'CHYSIS, (πυον, 'pus,' and εκχυσις, 'effusion.') An effusion of pus.

PYELI'TIS, (F.) *Pyélite*, (*pyelus*, and *itis*.) Inflammation of the pelvis and calices of the kidney.

PYELOMETER, (*pyelus*, and μετρον, 'measure,') Pelvimeter.

PYELONEPHRI'TIS, (*pyelus*, νεφρος, 'kidney,' and *itis*.) Inflammation of the kidney, and of the pelvis and calices.

PYELUS, (πυελος,) Pelvis.

PYEMESIS, Pyoemesis.

PYESIS, (πυησις,) Suppuration.

PYETIA, (πυετια,) Colostrum, Rennet.

PYGE, (πυγη,) Nates.

PYGMÆUS, (πυγμαιος, from πυγμη, 'pygme,') Pygmy.

PYGME. (πυγμη,) Fist, Forearm.

PYGMÉE, Pygmy.

PYG'MY, *Pig'my*, *Pygmæ'us*, (F.) *Pygmée*, (from *pygme*, as big as the fist or forearm.) A dwarf. The Pygmæi were a fabulous nation of dwarfs in the extreme parts of India; or, according to others, in Ethiopia.

PYGODID'YMUS, *Did'ymus*, *symphyoperinæ'us*, *Pygopa'gus*, (*pyge*, and διδυμος, 'a twin.') A monstrosity, in which twins are united by the sacrum and coccyx.

PYGOM'ELES, (F.) *Pygomèle*, (*pyge*, and μελεος, 'unprofitable.') A monster with excessive growth on the nates or rump.

PYGOPAGES, (*pyge*, and παγω, 'to fix,') Pygodidymus.

PYICUS, (from πυον, 'pus,') Purulent.

PYLE, (πυλη, 'a gate,') Porta.

PYLEMPHRAX'IS, (*pyle*, 'a gate,' and εμφραξις, 'obstruction.') Obstruction of the vena porta.

PYLEPHLEBI'TIS, (*pyle*, φλεψ, gen. φλεβος, 'a vein,' and *itis*.) Inflammation of the vena porta.

PYLOR'IC, *Pylor'icus*, (F.) *Pylorique*, (from *pylorus*.) That which relates to the pylorus. An epithet given to different parts.

PYLORIC ARTERY, *Arte'ria Corona'ria dex'tra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach, anastomosing, particularly, with the A. coronaria ventriculi and A. gastroëpiploica dextra.

PYLORIC VEIN follows the same distribution as the artery.

PYLORIQUE, Pyloric.

PYLO'RUS, (πυλωρος,), *Jan'itor*, *Portona'rium*, (πυλη, 'a gate,' and ουρος, 'a guardian.') *Os'tium ventric'uli duodena'lē* seu *pylo'ricum* seu *dex'trum* seu *infe'rius*, *Orific''ium dex'trum* seu *infe'rius* seu *Egres'sus* seu *Os infe'rius* seu *An'nulus* seu *Sphinc'ter ventric'uli*, *Ostia'rius*, (F.) *Pylore*. The lower or right orifice of the stomach—*Orifice intestinal* (Ch.) — is called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Valve of the Pylo'rus*, *Sphinc'ter Pylo'ri*, *Pylo'rus pro'prie sic dic'tus*, (F.) *Valvule du pylore*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYÖ, in composition, means pus, (from πυον, 'pus.')

PYOBLENNICUS, (*pyo*, and βλεννα, 'mucus,') Mucopurulent.

PYOBLENNORRHŒ'A, (*pyo*, βλεννα, 'mucus,' and ῥεω, 'I flow.') A discharge of puriform mucus.

PYOCENO'SIS, (*pyo*, and κενωσις, 'evacuation.') Evacuation of pus.

PYOCHEZ'IA, *Diarrhœ'a purulen'ta*, (*pyo*, and χεζω, 'I go to stool.') Discharge of pus by stool. Purulent diarrhœa.

PYOCŒ'LIA. *Asci'tes purulen'tus*, (*pyo*, and κοιλια, 'the belly.') Pus in the abdominal cavity.

PYOCYSTIS, (*pyo*, and κυστις, 'a sac,') Vomica.

PYODES, (πυωδης,) Purulent.

PYŒDE'MA, gen. *Pyœde'matis*, (*pyo*, and οιδημα, 'swelling.') Tumefaction of the surface owing to effusion of pus.

PYOËM'ESIS, *Pyem'esis*, *Vom'itus purulent'us*, (*pyo*, and εμεσις, 'the act of vomiting.') Vomiting of pus.

PYOÉMIE, (*pyo*, and αἱμα, 'blood,') Pyohæmia.

PYOGENESIS, Pyogenia.

PYOGENETIC, Pyogenic.

PYOGEN'IA, *Puogen'ia*, *Pyogen'esis*, *Pyopoë'sis*, (*pyo*, and γενναω, 'to generate.') Generation of pus. The theory or mechanism of the formation of pus. Some have believed that pus is formed by the arterial system, and is deposited, by way of excretion, in the inflamed parts; others, that it is formed by the destruction of solid parts. It seems to be owing to a degeneration of the liquor sanguinis and exudation corpuscles.

Pyogenia Corrosiva, Ulceration—p. Simplex, Suppuration.

PYOGEN'IC, *Pyogen'icus*, *Pyogenet'ic*, *Pyogenet'icus*, (F.) *Pyogénique*, *Pyogénétique*. Having relation to the formation of pus.

PYOHÆ'MIA, *Pyæ'mia*, (F.) *Pyohémie*, *Pyhémie*, *Pyöémie*, (*pyo*, and αἱμα, 'blood.') Alteration of the blood by pus, giving occasion to the *Diath'esis* seu *Infec'tio purulen'ta*.

PY'OID, (πυοειδης, from *pyo*, and ειδος, 'resemblance,') Resembling pus.

Pyoid Corpuscles or Globules, see Pus.

PYOMA, gen. *Pyo'matis*, Pyonoma.

PYOMĒ'TRA, *P. purulen'ta*, (*pyo*, and *metra*.) A collection of pus in the uterus.

Pyometra Purulenta, Pyometra.

PYON, (πυον,) Pus.

PYONÉPHRITE, (*pyo*, and *nephritis*,) see Nephritis.

PYONO'MA, gen. *Pyono'matis*, *Pyo'ma*, (from *pyon*, and *oma*.) A suppurating sore.

PYOOTORRHŒA, (*pyo*, and *otorrhœa*,) Otirrhœa.

PYOPERICAR'DIA, (*pyo*, and *pericardium*,) *Pyopericar'dium*. A collection of pus in the pericardium.

PYOPHTHALMIA, (*pyo*, and *ophthalmia*,) Hypopyon—p. Neonatorum, see Ophthalmia (purulenta infantum).

PYOPLA'NIA, (*pyo*, and πλανος, 'wandering.') An extension of pus to other parts; purulent infiltration.

PYOPLEURITE, (*pyo*, and *pleuritis*,) Empyema.

PYOPOËSIS, (*pyo*, and ποιεω, 'to make,') Pyogenia.

PYOPOËTIC, Suppurative.

PYOP'TYSIS, (*pyo*, and πτυω, 'I spit.') Spitting of pus.

PYORRHAG''IA, (*pyo*, and ῥαγη, 'violent rupture.') A sudden discharge of a large collection of matter.

PYORRHŒ'A, (πυορροια, from *pyo*, and ῥεω, 'I flow.') A discharge of pus.

Pyorrhœa Alvina, Pyochezia—p. Aurium, Otirrhœa—p. Nasalis, Ozæna—p. Palpebræ, Blepharopyorrhœa—p. Urinalis, Pyuria—p. Viarum lacrymalium, Dacryopyorrhœa.

PYOS, (πυος,) Pus. Also, first milk, colostrum.

PYOSIS, (πυωσις,) Hypopyon, Pterygion, Suppuration—p. Pectoris, Empyema.

PYOTHORAX VERUS, (*pyo*, and *thorax*,) Empyema.

PYOTORRHÉE, (*pyo*, and *otirrhœa*,) Otirrhœa.

PYOTURIA, (*pyo*, and ουρον, 'urine,') Pyuria.

PYR, (πυρ,) Fever.

PYRA, (πυρα, from πυρ, 'fire,') Anthrax—p. Crustumerina, Crustuminatum—p. Crustumina, Crustuminatum.

PYR'AMID, *Pyr'amis*, *Eminen'tia pyramida'lis tym'pani*, (πυραμις, gen. πυραμιδος, from πυρ, 'flame,' which has a conical shape.) A small bony projection in the cavity of the tympanum, which is excavated, to lodge the muscles of the stapes. The *Centrepin* of the trephine. A small, obtusely pointed eminence of the inferior vermiform process of the cerebellum.

Pyramid, see Calumba—p. of Malacarne, Vermiform process, inferior.

PYRAMIDAL DE L'ABDOMEN, Pyramidalis abdominis—*p. de la Cuisse*, Pyramidalis—*p. du Nez*, Pyramidalis nasi—*p. Stapédien*, Stapedius.

PYRAMIDALE (OS), Cuneiform, (bone.)

PYRAMIDA'LIS, *P. Fem'oris*, *Ili'acus exter'nus*, *Pyriform'is*, *Piriform'is*, *Pri'mus et supe'rior quadrigem'inus*, (F.) *Sacro-trochantérien* (Ch.), *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacrosciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

Pyramida'lis Abdom'inis, *Mus'culus Fallo'pii* seu *succenturia'tus* seu *auxilia'rius*, (F.) *Pubio-ombilical*, *Tubio-sous-ombilical* (Ch.), *Pyramidal de l'abdomen*. A small, fleshy, pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts, it stretches the linea alba.

Pyramidalis Femoris, Pyramidalis.

Pyramidalis Na'si, *Proc''erus na'si*, *Na'sum dila'tans*, (F.) *Fronto-nasal* (Ch.), *Pyramidal du nez*. A thin, triangular muscle, which has its summit upwards. Above, it is continuous with the occipitofrontalis. It descends vertically before the root of the nose, on which it terminates, becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

PYRAMIDES, (pl. of *pyramis*,) Corpora pyramidalia.

PYRAMIDES ANTÉRIEURES, Corpora pyramidalia—p. Ferreini, Ferrein, pyramids of—p. Malpighianæ, Papillæ of the kidney—*p. Postérieures du cervelet*, Corpora restiformia.

PYRAMIDS OF FERREIN, see Ferrein—p. of Malpighi, Papillæ of the kidney—p. Posterior, Corpora restiformia—p. of Wistar, Sphenoidal cornua.

PYRAMIS, gen. *Pyram'idis*, (πυραμις, gen. πυραμιδος,) Penis, Pyramid—p. Cochleæ, Modiolus—p. Trigona, see Temporal bone.

PYRCÆA, (πυρκαια, 'a conflagration,' from πυρ, 'fire,' and καιω, 'to kindle,') Incendium.

PYREC'TICA, 'febrile,' (*pyretus*, and εχω, 'I have.') Fevers: the first order in the class *Hæmatica* of Good.

PYRÉLAINES, (πυρ, 'fire,' and ελαιον, 'oil,') Olea empyreumatica.

PYRENOIDES, (πυρηνοειδης, from πυρην, 'the kernel, the stone of a fruit,' and ειδος, 'resemblance,') Odontoid.

PYRÈTHRE, Anthemis pyrethrum.

PYRETHRUM, (πυρεθρον, from πυρ, 'fire,') Anthemis pyrethrum, Urticaria—p. Parthenium, Matricaria parthenium—p. Sylvestre, Achillea ptarmica.

PYRETICO'SIS, (from *pyretus*,) *Morbus febri'lis.* A febrile affection.

PYRETICUS, (from *pyretus*,) Febrifuge, Febrile.

PYRETOGEN'ESIS, *Pyretogen'ia*, (*pyretus*, and γενεσις, 'generation.') The origin and formation of fever.

PYRETOGENET'IC, (same etymon,) Stimulant.

PYRETOGRAPH'IA, (*pyretus*, and γραφη, 'a description.') A description of fever.

PYRETOL'OGY, *Pyretolog''ia*, (*pyretus*, and λογος, 'a discourse.') *Pyrol'ogy.* A treatise on fevers. A title sometimes given to a monograph on fever.

PYRETOTYPOSIS, (*pyretus*, τυπος, 'type, order,' and *osis*,) Intermittent.

PYRETUS, (πυρετος,) Fever.

PYREX'IA, *Pyrex'is*, (πυρεξις, from *pyr*,) Fever. The febrile condition. Also, a paroxysm of fever —*Paroxysm'us febri'lis.*

PYREX'IÆ, *Fe'brile diseases.* The first class of Cullen's Nosology.

PYRI MARTIALES, (pl. of *pyrus*, 'a pile, or pear,') Ferrum tartarizatum.

PYRIA, (πυρια,) Fomentation, see Stove.

PYRIATERIUM, (πυριατηριον,) see Stove.

PYRICAUSTUM, (πυρικαυστος, from πυρ, 'fire,' and καιω, 'to kindle,') Burn.

PYRIFORMIS, (*pyrus*, 'a pear,' and *forma*, 'shape,') Pyramidalis.

PYRIPH'LEGES, (πυριφλεγης,) *Pyriphlec'tus*, (πυριφλεκτος, from *pyr*, and φλεγω, 'I burn.') One who has a burning fever.

PYRITES, IRON, (from πυρ, 'fire,') Ferri sulphuretum.

PYR'MONT, MIN'ERAL WA'TERS OF. A celebrated mineral spring on the Weser, in Westphalia, four leagues from Hamelet. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous [?] principle. It is a highly carbonated chalybeate. Season, from the 10th of June to the 1st of September.

ARTIFIC''IAL PYR'MONT WA'TER may be formed of *Epsom salt*, gr. xv; *Common salt*, gr. v; *Magnesia*, gr. x; *Iron filings*, gr. v; *Water*, Oiij; impregnated with the gas from *Marble-powder* and *Sulphuric acid*, āā ℥vij.

PYRŒNUS, (πυρ, 'fire,' and οινος, 'wine,') Spiritus rectificatus.

PY'ROLA, *P. rotundifo'lia, Roundleaved Pyrola* or *Win'tergreen; Shinleaf. Ord.* Ericaceæ. (Dim. of *pyrus*, 'a pear tree,' from a fancied resemblance of the foliage.) This plant was once used as a gentle astringent and tonic.

PYROLA MACULA'TA, *Chimaph'ila Macula'ta, Spot'ted Pipsis'sewa, Spot'ted Win'tergreen, White'leaf, White Pipsis'sewa, King'cure, Ground hol'ly, Rheu'matism weed*, &c., has similar properties.

PYROLA, ROUNDLEAVED, Pyrola.

PYROLA UMBELLA'TA, *Chimaph'ila* seu *Chimoph'ila umbella'ta, C. Corymbo'sa, Ground holly, Pipsis'sewa, Win'tergreen, Rheu'matism-weed, Prince's pine, Herbe a pisser* (Canada). This common American plant is allied to the uva ursi in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin. From the decoction or infusion an agreeable beverage may be formed, by adding sugar, ginger to flavour it, and yeast to produce fermentation. Under the name *Pipsis'sewa Beer* it has been used in scrofulous affections.

PYROLEUM OSSIUM RECTIFICATUM, (πυρ, 'fire,' and *oleum*, 'oil,') Oleum animale Dippelii.

PYROLIG'NEOUS AC''ID, (πυρ, 'fire,' and *lignum*, 'wood,') *Ac''idum pyroace'ticum* seu *pyrolig'neum* seu *pyroligno'sum* seu *pyroxyl'icum* seu *lig'ni pyroöleo'sum* seu *ace'ticum empyreumat'icum* seu *lig'neum* seu *ligno'rum empyreumat'icum, Pyrolig'nic ac''id*, (F.) *Acide pyroacétique* ou *pyroligneux, Vinaigre de bois.* An acid, obtained by distillation from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for *Acetum distillatum, Acetic acid of commerce, Ac''idum ace'ticum e Ligno vena'lē.* It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever indeed creasote is indicated.—The dose of the impure pyroligneous acid internally is from five to thirty drops, three or four times a day.

PYROMA'NIA, *Empresmoma'nia, Incen'diary monoma'nia*, (πυρ, 'fire,' and *mania*.) Insanity, with an irresistible desire to destroy by fire.

PYROPH'AGUS, *Igniv'orous*, (πυρ, 'fire,' and φαγω, 'I eat.') One who eats fire. A juggler, who eats substances in a state of ignition.

PYRUS, (πυρος,) Triticum.

PYRO'SIS, (from πυρω, 'to burn,') *Ptyalis'mus pyrosis'cus, Limo'sis cardial'gia sputato'ria, Ar'dor* seu *Ebullit''io stom'achi* seu *ventric'uli, Cardial'gia sputato'ria, Pyro'sis Suec''ica, Apoceno'sis vom'itus pyro'sis, Dyspep'sia pyro'sis, Cuismoreg'mia, Orex'is* (of some), *So'da, Wa'terbrash, Wa'terqualm, Wa'terpang, Blackwater*, (F.) *Ardeur de l'estomac, Fer chaud, Fer rouge, Cremason, Gorgosset.* This affection consists of a hot sensation in the stomach, with eructations of an acrid, burning liquid, that causes a distressing sensation in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it is symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, gangrene, and a burn.

PYROSIS SUECICA, Pyrosis.

PYROSOPHIA, (πυρ, 'fire,' and σοφια, 'wisdom,') Chymistry.

PYROTECHNIA, (πυρ, 'fire,' and τεχνη, 'art,') Chymistry.

PY'ROTECHNY, *Pyrotech'nē, Pyrotech'nia.* Art of making fire-works, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in surgery.

PYROTHONIDE, (πυρ, 'fire,' and οθονη, 'linen.') *Li'quor pyroöleo'sus e lin'teo para'tus.* A kind of pyrogenous or empyreumatic oil, produced by the combustion of textures of hemp, linen, or cotton in a copper vessel. The brown product is acid. Its medical properties probably resemble those of creasote. Diluted with three or four times its weight of water, it has been used as a gargle in cynanche tonsillaris, but is not now employed.

It is said, also, to be a popular remedy for toothache and skin diseases. When prepared from rags, it is called *Rag oil;* when from paper, *Paper oil.* (F.) *Huile de Papier.*

PYROTICUS, (πυρωτικος, from πυρω, 'to burn,') Caustic.

PYROXYLIN, (πυρ, 'fire,' and ξυλον, 'wood,') Gun cotton, see Collodion.

PYRUS, (from πυρ, 'fire,' because flame is shaped like the pear,) see Pyrus malus—p. Americana, Sorbus Americana.

PYRUS CYDO'NIA. *Cydo'nia malifor'mis* seu *vulga'ris, Sor'bus Cydo'nia, Cydo'nia, Coto'nia, Quince Tree*, (F.) *Coignassier, Cognassier. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The fruit is termed *Cydo'nium ma'lum, Ma'lum ca'num* seu

coto'neum, Me'lum cydo'nium, Quince, (F.) *Coign.* Quinceseed — *Cydo'nium* (Ph. U. S.) — are sometimes used in decoction as a demulcent. The fruit makes a pleasant preserve.

PYRUS DOMESTICA, Sorbus domestica.

PYRUS MA'LUS, *Ma'lus, M. dasyphyl'la* seu *commu'nis* seu *sylves'tris, Sor'bus ma'lus, Me'lea,* the *Ap'ple Tree,* (F.) *Pommier.* The *apple*—*Po'mum, Ma'lum,* (F.) *Pomme*—is an agrecable fruit when ripe. When unripe, it disagrees, especially with those of weak digestive powers. The same may be said of the *pear,* (F.) *Poire;* the fruit of *Py'rus commu'nis, P. Sor'bus* seu *Sati'va, Pi'rus, A'pios,* (F.) *Poirier.*

Ap'ple Brau'dy is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

PYTHOGENIC FEVER, (πυθω, 'to putrefy,' and γενναω, 'to generate.') Typhoid fever.

PYTIA, (πυτια,) Colostrum, Rennet.

PYTISMA, (πυτισμα,) Sputum.

PYUL'CON, *Pyul'cum,* (πυουλκον, from *pyo,* and ἑλκω, 'I extract.') (F.) *Tire-pus.* A surgical instrument for extracting pus from any cavity. Many pyulca have been employed, all of which act as exhausting syringes.

PYU'RIA, *Pyotu'ria, Pyorrhœ'a urina'lis,* (F.) *Pyurie, Pissement de Pus,* (*pyo,* and *ουρον,* 'urine.') Discharge of purulent urine: a symptom which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder. It receives various epithets, according to the part whence the pus proceeds:—as *Pyuria urethra'lis, P. rena'lis,* and *P. vesica'lis.*

PYURIA CHYLOSA, Chyluria — p. Lactea, Chyluria—p. Mucosa, Cystirrhœa—p. Serosa, Cystirrhœa — p. Viscida, Cystirrhœa.

PYXIS, gen. *Pyx'idis,* (πυξις, gen. πυξιδος, made of box-wood, πυξος, *Pyxus.*) A box; a pill-box. Also, an emollient ointment.

PYXIS, *Boîte,* see Cotyloid.

Q.

Q, see Abbreviation.

QUABEBE, Piper cubeba.

QUACK, Charlatan.

QUACK MEDICINE, Arcanum.

QUACKSALVER, ([G.] Quacksalber, from quaken, 'to quack,' and Salbe, 'salve,') Charlatan.

QUADRANS, *Quar'ta pars li'bræ.* A quarter of a pound. Three ounces (Troy.)

QUADRA'TUS, (F.) *Carré,* (*quadrus,* 'square.') A name for muscles whose figure approaches a square. Depressor Labii inferioris, Quadratus femoris.

QUADRATUS DORSI, Q. lumborum.

QUADRATUS FEM'ORIS, *Quadra'tus, Quar'tus quadrigem'inus quadra'tus,* (F.) *Tuber-ischio-trochantérien,* (Ch.) *Ischio-sous-trochantérien, Carré de la Cuisse.* A muscle situate at the posterior and upper part of the thigh. It is thin, flat, and, quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

QUADRATUS GENÆ, Platysma myoides—q. Radii, Pronator radii quadratus.

QUADRATUS LUMBO'RUM, *Quadra'tus* seu *Lumba'ris exter'nus, Q. dor'si, Flec'tens par lumbo'rum,* (F.) *Ilio-costal,* (Ch.) *Ilio-lombi-costal, Carré des lombes.* A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ilii and ilio-lumbar ligament; and above, to the inferior margin of the last rib; and besides, to the base of the transverse processes of the last four lumbar vertebræ. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of respiration. It can also raise the hip.

QUADRATUS MENTI, Depressor labii inferioris.

QUADRIGA, (*quatuor,* 'four,' and *jugum,* 'a yoke,') Cataphracta.

QUADRIGEM'INA TUBER'CULA, (*quatuor,* 'four,' and *gemi'nus,* 'double,') *Eminen'tiæ Quadrigem'inæ* seu *Bigem'inæ, Op'tic Lobes, Op'tic Gan'glia, Pons Syl'vii, Car'pora quadrigem'ina* seu *bigem'ina, Na'tes et Tes'tes,* (F.) *Tubercules quadrijumeaux* ou *bijumeaux. Éminences bigéminées, Lobes optiques* ou *bijumeaux.* Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded; connected by pairs, and separated by two grooves, which divide them crucially. Of these tubercles—the superior called *Nates, Na'tulæ, Tuber'culu anterio'ra, Glu'tia,* are larger and more prominent than the lower, called *Tes'tes, Tuber'cula posterio'ra.* The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

They give origin to the optic nerves.

QUADRIGEMINUS PRIMUS ET SUPERIOR, Pyramidalis—q. Quartus quadratus, Quadratus femoris—q. Secundus et tertius, Ischiotrochanterianus.

QUADRIJUMEAUX (TUBERCULES), Quadrigemina Tubercula.

QUADRIMAMMA'TUS, *Tetramas'thus,* (*quatuor,* 'four,' and *mamma,* 'a breast.') Four breasted.

QUADROON, (from [L.] *quatuor,* 'four,' a fourth part,) see Mulatto—q. Black, see Mulatto.

QUÆ EX QUI'BUS, (*οσα εξ οιων.*) A Hippocratic phrase, which comprised the vicissitude, succession, and transmutation of diseases, of which mutation and succession four species were chiefly enumerated,—*epigenesis, metaptosis, metastasis,* and *apostasis* or abscess. Stephanus Rodericus a Castro wrote a small work under the title *"Quæ ex quibus," de Morborum Vicissitudinibus.*

QUAFADIL, Melanthium Virginicum.

QUAHOIL, Cacao.

QUAIL, (low L. *qualea,* [F.] *Caille,*) Tetrao coturnix.

QUAMASH, Camassia esculenta — q. Eastern, Scilla esculenta.

QUAN'DROS. Ancient name for a precious stone, believed to exist in the brain of the vulture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

QUAR'ANTINE, *Quar'entine, Quarentaine,* ([L.] *Quaranti'na,* itself from *quaranta,* 'forty,') *Quarantaine.* The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said *'to perform quarantine,*

and '*to b: quar'antined.*' Quarantine is sometimes extended beyond forty days, whilst its duration is generally much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced when there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce legislators to maintain these laws in perhaps an unnecessary degree of rigour.

QUAR'TAN, *Quarta'nus*, (from *quartus*, 'the fourth.') *Quarta'na Fe'bris*, *An'etus Quarta'nus*, *Tetartæ'us*, *Quar'tan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every fourth day, leaving between them two days' interval. We speak also of the *Quar'tan Type*. A *Double Quar'tan*, (F.) *Double quarte*, is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession;—the paroxysms of every fourth day resembling each other. A *Triple Quar'tan* is one in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling* or *repeat'ing quar'tan*, (F.) *Fièvre quarte doublée*, is one in which there are two paroxysms every fourth day. See Intermittent.

QUARTANUS, Quartan—q. Remittens, Tetartophia.

QUARTA'RIUS. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

QUARTE, ([L.] *quarta*, 'a fourth,') Quartan.

QUARTERON, (from [L.] *quatuor*, 'four,' a fourth part,) see Mulatto—q. Black, Mulatto.

QUARTISTERNAL, *Quadristerna'lis*. The fourth osseous portion of the sternum, corresponding to the fourth intercostal space.

QUARTIO, (*quatuor*, 'four, being foursided,') Astragalus.

QUASSATIO, (from *quassare*, *quassatum*, 'to shake,') Conquassation.

QUASSATURA, Conquassation.

QUAS'SIA, (Ph. U. S.), *Lignum Quassiæ*, *Febrif'ugum lignum*, *Quassy*, (F.) *Quassie*, *Bois amer*. The wood of *Quassia ama'ra*—and of *Q. excel'sa*, *Picræ'na excel'sa*, *Bittera febrif'uga*, *Lofty Bitterwood Tree*, *Bitter ash*, *Simaru'ba excel'sa*, *Ord.* Simarubaceæ; West India trees. The former is the *Jamaica Quassia*—the one in common use; the latter the *Surinam' Quassia*. Quassia, called after Quassi, a Surinam negro, who first employed it in the fevers of the country. It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is generally given in the form of infusion. The bitter principle is called *Quassin*, *Quassiin*, *Quassit* and *Bitterin*.

QUASSIA SIMAROU'BA, *Simarou'ba*, *Simaru'ba*, *S. officina'lis*, *Euon'ymus*, *Bit'ter Simaruba*, *Moun'tain Damson*. The bark of the root, *Simaru'ba*, (Ph. U. S.), is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited wherever a simple tonic is required.

QUASSIN, see Quassia.

QUASSIT, see Quassia.

QUATERNIO, (from *quatuor*, 'four,' having four sides,) Astragalus.

QUATRE ÉPICES, 'four spices,' see Myrtus pimenta.

QUATRIO, (from *quatuor*, 'four,' having four sides,) Astragalus.

QUEASINESS, Nausea.

QUEEN OF THE MEADOW, Spiræa lobata—q. of the Prairie, Spiræa ulmaria.

QUEEN'S DELIGHT, Stillingia—q. Root, Stillingia.

QUELLES, Elixir.

QUENOUILLE D'EAU, Typha latifolia.

QUERCERA, (from καρκαίρειν, 'to tremble,') Epialos.

QUERCINI HERBA, Lichen plicatus.

QUERCULA MINOR, (dim. of *quercus*,) Teucrium chamædrys.

QUER'CUS AL'BA, *White Oak*; QUER'CUS RO'BUR, *Com'mon Oak*; Q. TINCTO'RIA, *Black Oak*; Q. RU'BRA MONTA'NA, *Red Oak* or *Span'ish Oak*; Q. PEDUNCULA'TA, *Common British Oak*. *Ord.* Cupuliferæ. *Sex. Syst.* Monœcia Polyandria; (F.) *Chêne*. The bark of all these varieties—*Quer'cus*—is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used internally in intermittents, and externally in decoction, as an astringent wash, where such is indicated.

The *A'corn*, (Prov.) *Ackerns*, *Nux Quer'cûs*, (F.) *Gland*, was at one time much used as food; and a decoction was once recommended in dysentery and diarrhœa, in glandular obstructions, &c. A pessary made of it has been advised in immoderate flow of the menses. It is not much used. *Roasted acorns*, (F. *Glands torréfiés*, have been used in the same cases as the decoction.

QUERCUS COCCIFERA, see Kermes.

QUERCUS INFECTO'RIA. A tree of Asia Minor, which affords *Tur'key* or *Nut Galls*, *Gall'æ Tur'cicæ* seu *Querci'næ* seu *Tincto'riæ*, *Nux Gal'læ*, *Galla max'ima orbicula'ta*, *Cc'cis*, *Gal'læ*, *Galls*, *Gallnut*, (F.) *Noix de Galle*, *Galle de chêne*, *Cassenoles*. The *nut-gall*—*Gal'la* (Ph. U. S.)—is a morbid protuberance or tubercle, produced by the puncture of the *Diplo'lepis* seu *Cy'nips Gal'læ Tincto'riæ*, *Cy'nips Quer'cûs fo'lii*. It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but is chiefly used, externally, in gargles, and injections. The powder, made into an ointment with lard, is used in piles. The ordinary nutgalls of the shops, are procured from the Levant. The large *Mec'ca* or *Bus'orah galls*, at times called *Dead Sea ap'ples*, *Mad ap'ples*, and *ap'ples of Sod'om*, are produced on Quercus infectoria.

There are upwards of thirty species of oak in the United States, all of which are probably more or less astringent and tonic.

QUERCUS MARINA, Fucus vesiculosus—q. Suber, see Suber.

QUERQUERA, (from καρκαίρειν, 'to tremble,') Epialos.

QUEUE DE CHEVAL, 'horse's tail,' (from [L.] *cauda*, 'a tail,'), Hippuris vulgaris, Cauda equina, see Medulla spinalis—*q. de la Moëlle épinière*, Cauda equina—*q. de Pourceau*, Peucedanum—*q. de Rat*, Sium lunare.

QUICK-IN-THE-HAND, Impatiens.

QUICKEN TREE, Sorbus aucuparia.

QUICK'ENING, (Sax. cþiccan, 'to make alive.') The period of gestation when the motion of the fœtus first becomes perceptible. This usually occurs about the eighteenth week, and was at one time erroneously believed to mark the time at which the fœtus becomes alive—*Anima'tio fœtûs*. It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes at a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKENS, Triticum repens.

QUICKLIME, Calx viva.

QUICKSILVER, Hydrargyrum.

QUIES, 'rest,' Acinesia.

QUINA, (from *quinquina*,) Quinine — *q. do Campo*, Strychnos pseudoquina — q. Quina, Cinchona.

QUINÆ ACETAS, SULPHAS, &c., see Quiniæ Acetas, &c.

QUINCE, (from *quinsy* [?],) Scrofula; see Pyrus cydonia, ([F.] *Coing*)—q. Tree, Pyrus cydonia.

QUINIA, (from *quinquina*,) Quinine — q. Acetate of, Quiniæ acetas—q. Amorphous, see Quinia, extract of, and Chinioidine — q. Arseniate of, Quiniæ arsenias — q. Arsenite of, Quiniæ arsenis — q. Citrate of, Quiniæ citras.

QUINIA, EX'TRACT OF, *Qui'niæ sul'phas impu'rus*. A preparation which consists in evaporating the liquor poured off the crystals of sulphate of quinia, to the consistence of a pilular mass.

It has the properties of sulphate of quinia, and its active principle appears to be amorphous quinia or chinioidine. Twenty-four grains will generally arrest ague.

QUINIA, FERROCYANATE OF, Quiniæ ferrocyanas — q. Hydriodate of, Quiniæ hydriodas — q. Hypophosphite of, see Calcis hypophosphis — q. Impure sulphate of, Quinia, extract of — q. Iodhydrate of, Quiniæ hydriodas—q. Iodide of, Quiniæ hydriodas—q. Iodide of iodhydrate of, see Quiniæ hydriodas—q. Ioduret of, Quiniæ hydriodas — q. and Iron, Hydriodate of, see Quiniæ hydriodas—q. Lactate of, Quiniæ lactas — q. and Mercury, protochloride of, Hydrargyri et Quiniæ Protochloridum — q. Muriate of, Quiniæ murias — q. Nitrate of, Quiniæ nitras — q. Phosphate of, Quiniæ phosphas — q. Sulphate of, Quinine, sulphate of.

QUINIA AND CINCHONIA, Tannate of, Quiniæ et Cinchoniæ tannas.

QUI'NIÆ ACE'TAS, *Chi'nium ace'ticum, Ace'tas Chi'nii* seu *Chini'ni* seu *Chi'nicus* seu *Qui'niæ* seu *Qui'næ* seu *Quini'ni* seu *Kini'ni, Qui'na ace'tica, Ac''etate of Qui'nia* or of *Quinine'*. (Prepared by saturating *Quinia* with diluted *Acetic acid*.) Has the properties of the other salts of Quinia.

QUINIÆ ARSEN'IAS, *Quini'næ* seu *Qui'næ Arsen'ias, Chini'num Arsenico'sum* seu *Arsenic''icum, Arse'niate of Qui'nia* or *of Qui'na* or *of Quinine'*, (F.) *Arséniate de quinine*. (Formed by the union of *arsenic acid* and *quinia*.) Employed as an antiperiodic in the dose of from three quarters of a grain to a grain and a half in the twenty-four hours.

QUINIÆ AR'SENIS, *Q. Diar'senis, Ar'scnite of Qui'nia*. (A salt resulting from the double decomposition of *arsenite of potassa* and *sulphate of quinia*.) It has been used in chronic cutaneous diseases; and as an antiperiodic in ague, neuralgia, &c. Dose, onethird of a grain, three times a day.

QUINIÆ CI'TRAS, *Qui'næ* seu *Chini'ni ci'tras, Ci'tras chi'nicus* seu *qui'nicus, Chi'nium* seu *Chini'num Cit'ricum, Cit'rate of Qui'nia* or *Qui'na* or *Quinine'*. (Formed from the union of *citric acid* and *quinia*.) It has the same properties as the sulphate.

QUINIÆ DIARSENIS, Quiniæ Arsenis.

QUINIÆ FERROCY'ANAS, *Chi'nium ferrocyanoge'na'tum* seu *fer'rohydrocyan'icum, Ferrocy'anate* or *hydrocyanofer'rate of Qui'nia* or of *Quinine'*. (This salt is obtained by the decomposition of *sulphate of quinia* by means of a solution of *ferrocyanuret of potassium*.) It has all the properties of sulphate of quinia, and, according to some, in a superior degree.

QUINIÆ HYDRI'ODAS, *Chini'num hydriod'icum, Hydri'odate* or *Iodhy'drate of Qui'nia;* called, also, *Iodure'tum* seu *Io'didum Qui'niæ, Iod'uret* or *Iodide of Qui'nia*, (F.) *Hydriodate* ou *Iodhydrate* ou *Iodure de Quinine*. (This is formed by precipitating *sulphate of quinia* by means of *iodide of potassium*.) Given in scrofulous affections; half a grain to a grain, three times a day, to a child.

An *iodide* and a *biniodide* have been formed; the latter made by mixing double the quantity of iodide of potassium with sulphate of quinia.

An IODIDE OF IODHY'DRATE OF QUINIA, (F.) *Iodure d'Iodhydrate de Quinine*, is prepared by pouring into an acid solution of *quinia* a solution of *iodide of iron*, containing a slight excess of iodine. The precipitate is treated with boiling alcohol: the liquor filtered, and crystals suffered to form. The salt possesses all the properties of the other salts of quinia. Under the name, *Hydri'odate of i'ron and Qui'nia*, a preparation was introduced by Mr. Battley. It is possessed of tonic and antiperiodic virtues.

QUINIÆ IODIDUM, Quiniæ hydriodas—q. Ioduretum, Quiniæ hydriodas.

QUINIÆ LAC'TAS, *Qui'næ lac'tas, Chini'num lacticum, Lac'tate of Qui'nia* or of *Quinine'*, (F.) *Lactate de quinine*. (Made by the action of *lactic acid* on *quinia*.) Used in the same cases as the other salts of quinia.

QUINIÆ MU'RIAS, *Chi'nium muriat'icum* seu *sali'tum* seu *hydrochlo'ricum, Murias chi'nicus, Mu'riate of Qui'nia* or of *Quinine'*. (May be prepared by dissolving *quinia* in dilute *muriatic acid*.) Given as an antiperiodic. Dose, half a grain to a grain.

QUINIÆ NI'TRAS, *Chi'nium* seu *Chini'num ni'tricum, Ni'trate of Qui'nia* or of *Quinine'*, (F.) *Nitrate* ou *Azotate de quinine*. (May be formed by the addition of *nitric acid* to *quinia*.) Its properties are those of the sulphate of quinia.

QUINIÆ PHOS'PHAS, *Chi'nium* seu *Chini'num phosphor'icum, Phos'phate of Qui'nia* or of *Quinine'*; (may be prepared by the addition of dilute *phosphoric acid* to *quinia*.) It is thought by many to be next to the sulphate of quinia in its remedial powers.

QUINIÆ SULPHAS, Quinine, sulphate of.

QUINIÆ VALERIA'NAS, *Chini'num* seu *Chi'nium Valerian'icum, Vale'rianate of Qui'nia*, of *Qui'na*, or of *Quinine'*: (may be formed by the union of *valerianic acid* with *quinia*.) It has the properties of the salts of quinia. Dose, gr. j to gr. v.

QUINIÆ ET CINCHO'NIÆ TAN'NAS, *Chini'num* seu *Chi'nium tan'nicum, Tan'nate of Qui'nia* and *Cincho'nia*. This salt has the same properties as the salts of quinia in general.

QUI'NICINE, *Quinici'na, Quinic''ia*. When a salt of quinia is exposed to heat with certain precautions, the alkaloid is changed into another isomeric with it, to which this name has been given.

Quinicine, and its sulphate, possess the same medical properties as quinia and its salts. Dose, gr. v to gr. xv.

QUINICUS, Cinchonic.

QUINID'IA, *Quinidi'na, Qui'nidine, Chi'nidine, Cin'chotin*. An alkaloid of the cinchonas—of many of the genuine at least—obtained from them by the same process as that by which quinia is obtained from the barks that yield it. Its sulphate is more soluble however than the sulphate of quinia, and it is left, therefore, in the mother waters.

The salts of quinidia are markedly antiperiodic. From gr. x to gr. xxx will usually arrest a paroxysm.

QUININE', or QUI'NINE, (from *quinquina*,) *Qui'nia, Qui'na, Kini'num, Ki'nium, Sal essentia'lĕ cor'ticis Peruvia'ni, Chini'num, Quini'na*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

QUININE, ACETATE OF, Quiniæ acetas—q. Arseniate of, Quiniæ arsenias—q. Arsenite of, Quiniæ

arsenis—q. Azotate of, Quiniæ nitras—q. Citrate of, Quiniæ citras—q. Ferrocyanate of, Quiniæ ferrocyanas—*q. Hydriodate de*, Quiniæ hydriodas—*q. Iodhydrate de*, Quiniæ hydriodas—q. Iodide of, Quiniæ hydriodas—*q. Iodure de*, Quiniæ hydriodas—*q. Iodure d'iodhydrate de*, Quinia, iodide of iodhydrate of—q. Lactate of, Quiniæ lactas—q. Muriate of, Quiniæ murias—q. Nitrate of, Quiniæ nitras—q. Phosphate of, Quiniæ phosphas.

QUININE', QUI'NA or QUI'NIA, SUL'PHATE OF, *Qui'niæ* seu *Qui'næ* seu *Quini'næ Sul'phas*, *Qui'næ Disul'phas*, *Chi'ninum* seu *Chini'num Sulphu'ricum*, (F.) *Sulfate de Quinine*—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed with great success in the treatment of intermittents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, as a tonic, from 3 to 10 grains in the 24 hours. As an antiperiodic it may be carried much farther. Its action, in a large dose, is decidedly sedative. (It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States,—*Cinchon. flav.* in pulv. crass. ℔iv; *Acid. muriat.* f℥iij; *Calcis*, in pulv. ℥v; *Aquæ*, cong. v; *Acid. Sulphur., Alcohol., Carbon animal.*, āā q. s. Boil the bark in one-third of the water mixed with one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of acid and water as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of water, stirring constantly, until the quinia is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown viscid mass remains. Upon this substance, removed from the vessel, pour about half a gallon of distilled water, and having heated the mixture to the boiling point, add as much sulphuric acid as may be necessary to dissolve the impure alkali. Then add an ounce and a half of animal charcoal; boil for two minutes; filter the liquor while hot, and set it aside to crystallize. Should the liquor, before filtration, be entirely neutral, acidulate it very slightly with sulphuric acid. Should it, on the contrary, change the colour of litmus paper to a bright red, add more animal charcoal. Separate the crystals from the liquor, dissolve them in boiling water slightly acidulated with sulphuric acid; add a little animal charcoal, filter and set aside to crystallize. Wrap the crystals in bibulous paper, and dry with a gentle heat. The motherwaters may be made to yield an additional quantity of sulphate of quinia by precipitating the quinia with solution of ammonia, and treating the precipitated alkali with water, sulphuric acid, and animal charcoal, as before.)

QUININE, TANNATE OF, Quiniæ et cinchoniæ tannas—q. Valerianate of, Quiniæ valerianas.

QUI'NINISM or QUINI'NISM, *Quininis'mus*, *Qui'nism*, *Cin'chonism*, (F.) *Inébriation* ou *Ivresse quinique*. The aggregate of encephalic or neuropathic phenomena induced by overdoses of quinia.

QUINOIDINE, Chinioidine.

QUINIQUE, Cinchonic.

QUI'NIUM. An alcoholic extract, made from cinchona barks the composition of which is known, and which are mixed together in such proportions that the quinia and the cinchonia exist in the relation of two of the former to one of the latter. It is used in pills or in wine, and is said to represent, faithfully, all the useful principles of cinchona. To a similar preparation containing quinia and cinchonia, in the proportion of 91 of the former to 25 of the latter, M. Labarraque has given the name *Panchres'tum Chi'næ*.

QUINOLIN, (*quina*, and ἔλαιον, 'oil,') Leukoleinum.

QUINOL'OGY, *Quinolog''ia*, *Cinchonol'ogy*, *Cinchonolog''ia*, (*quina*, and λογος, 'a discourse.') A treatise on the cinchonas, or on quinia.

QUINQUEFOLIUM, (*quinque*, 'five,' and *folium*, 'a leaf,') Potentilla reptans—Quinquefolium majus, Potentilla reptans.

QUINQUINA, (Peruvian *kina kina*,) Cinchona—*q. Aromatique*, Croton cascarilla—q. Bicolor, Cinchonæ Caribææ cortex—*q. Faux de Virginie*, Cusparia febrifuga—*q. Gris de Loxa*, Cinchonæ lancifoliæ cortex—*q. Jaune*, Cinchonæ cordifoliæ cortex—*q. Piton*, Cinchonæ Caribææ cortex—*q. Rouge*, Cinchonæ oblongifoliæ cortex.

QUINQUINO, Myroxylon peruiferum.

QUINSY, Cynanche, C. tonsillaris—q. Nervous, Angone—q. Wolf, Lycanche.

QUINT'AN, *Febris quinta'na* seu *pemptæ'a* seu *quin'ta*; (from *quintus*, 'a fifth.') A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

QUINTE (F.), (formed, like *kink*, by onomatopœia [?]). This word is used synonymously with *paroxysm* or *fit*, when speaking of cough,—as *une Quinte de Toux*—'a fit of coughing,' (Sc.) *Kink*. Also, the influenza.

QUINTEFEUILLE, ([F.] *quinte*, 'a fifth,' and *feuille*, 'a leaf,') Potentilla reptans.

QUINTERON, (from *quintus*, 'fifth,') see Mulatto—q. black, see Mulatto.

QUINTES, see *Quinte*, and Pertussis.

QUINTES'SENCE, *Quin'ta Essen'tia*, 'fifth essence.' A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcohol'ic tincture*. The most volatile principles of bodies were, also, called *Quintes'sences*.

QUINTISTERN'AL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUINUA, Chenopodium quinoa.

QUIZ'ZER, *Grinder*. One who examines and prepares students in medical colleges on the subjects taught in them.

QUOTID'IAN, *Quotidia'nus*, *Ephem'erus*, (F.) *Quotidien*—itself from *quotidiè*, 'daily,' (*quot*, 'every,' and *dies*, 'day.') That which takes place every day.

QUOTIDIAN FE'VER, *Q. a'gue*, *Fe'bris quotidia'na* seu *hemere'sia* seu *hemer'ina* seu *ephem'era* seu *methemer'ina* seu *methemer'ia*, *An'etus quotidia'nus*, *Cathem'erus*, *Cathemer'inus*, *Methemer'inos*, *Amphemer'inos*, *Amphimer'inus*, *Amphem'erus*, *Quotidia'nus*, (F.) *Fièvre quotidienne*, is an intermittent, the paroxysms of which recur every day.

A *sim'ple*, *doub'le*, or *trip'le quotid'ian*, is a quotidian, which has one, two, or three paroxysms in the 24 hours.

R.

R or ℞ is placed at the commencement of a prescription as a contraction of *Rec''ipē.* (See Abbreviation.) Originally, it was the sign ♃ of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favourably.

RABDOIDES, (SUTURA,) (ραβδοειδης, from ῥαβδος, 'a rod,' and εἰδος, 'resemblance,') Sagittal suture.

RAB'ID, *Rab'idus,* (F.) *Rabique, Rabiéique,* (from *rabies,* (*rabo,* 'I am mad or furious,') 'canine madness.') That which belongs to hydrophobia; as *rabid virus,* &c. Rabid also means affected with hydrophobia, (F.) *Enragé.*

RABIÉIQUE, Rabid.

RABIES CANINA, Hydrophobia.

RABIQUE, Rabid.

RACAHOUT, *Am'ylum quer'neum.* A name given by the Arabs to the starch prepared from an edible acorn obtained from *Quer'cus I'lex,* but, according to Plagge, the so called *Racahout* of the Arabs, sold in Paris, is a compound of potatoe, starch, chocolate, and aromatics, — as vanilla.

RACCOON BERRY, Podophyllum montanum.

RACE, (from *radice,* ablative of *radix,* 'root,') *Breed.* The union or aggregate of individuals whose conformation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See Homo.

RACÉMEUX, Racemosus.

RACEMO'SUS, *Rac''emous, Rac''emose,* (F.) *Racémeux,* (from *racemus.*) In clusters, like grapes.

RACE'MUS. A cluster—as of grapes.

RACHAMEL'CA, (Hebr. רחם (*rechem*), 'the womb,' and מלך (*molech*), 'a king:') *Rechamal'ca.* A peculiar formative principle, supposed, by Dolæus, to exist in the uterus.

RACHE, Porrigo.

RACHIÆI, (ῥαχις, 'the spine,') Rhachitæ.

RACHIALGIA, (*rachis,* and αλγος, 'pain,') Colic, metallic, Rhachialgia, Rhachiodynia, Vertebral disease—r. Mesenterica, Tabes mesenterica —r. Pictoniensium, Colic, metallic—r. Pictonum, Colic, metallic.

RACHIALGIE MÉSENTÉRIQUE, Tabes mesenterica.

RACHIALGITIS, Rachialgitis.

RACHIDIAN, (from *rachis,*) Spinal — r. Arteries, Spinal arteries—r. Bulb, see Medulla oblongata—r. Canal, Vertebral canal.

RACHIDIEN, Spinal.

RACHIOPHYMA, Rachiphyma.

RACHIPHY'MA, gen. *Rachiphy'matis, Rhachiphy'ma, Rachiophy'ma, Tu'mor Dor'si,* (*rachis,* and φυμα, 'a tumour.') A tumour on the spine or on the back.

RACHIS, gen. *Rach'idis,* (ραχις, gen. ραχιδος,) Vertebral column.

RACHIS'AGRA, *Rhachis'agra, Rhachi'agra, Rhache'agra, Rhachid'agra, Rhachi'tis spina'lis,* (*rachis,* and αγρα, 'a seizure.') A gouty or rheumatic affection of the spine.

RACHITÆ, Rhachitæ.

RACHIT'IC. (ῥαχιτης,) *Rachit'icus, Rhachit'icus,* (F.) *Rachitique.* Relating or appertaining to, or affected with rachitis or rickets. Weak, feeble in the joints; defective in development.

RACHI'TIS, *I'nchi'tis.* Inflammation of the spine. Also, *Cyrto'sis Ra'chia, Cyrton'osus, Morbus Ang'licus, Osteomala'cia Infan'tum, Ta'bes pector'ea; Innutrit''io os'sium, Spi'na nodo'sa, Rachitis'mus, Eng'lish disease', Rick'ets,* (from ῥαχις, 'the spine,' ῥαχιτης νοσος, 'spine disease,') (F.) *Rachitisme, Nouure.* A disease not known in England before the first quarter of the seventeenth century, and then termed Rickets, (probably from the Sax. ριȝ or hριc, (Sc. and Prov.,) *Rig,* all of which signify the back. Glisson first gave it the scientific name, from *Rachis,* which, in Greek, also means the spine.) It is characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indigestion; and frequently induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly *hygienic.* Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

RACHITIS ADULTORUM, Mollities ossium.

RACHITISME, Rachitis.

RACHITOME, (*rachis* and τεμνειν, 'to cut.') An anatomical instrument for opening the medulla spinalis without injuring the medulla.

RACHO'SIS, *Rhacho'sis, Raco'sis* (from ῥαχοω, or ῥακοω, 'I wrinkle,' and *osis.*) A relaxation of the scrotum. *Propto'ma* seu *Lax'itas Scro'ti, Scrotum pen'dulum.* An excoriation of the relaxed pendulum.

RACINE, Radix — *r. à Becquet,* Geranium moschatum—*r. de Bengal,* Cassumuniar—*r. Brésilienne,* Ipecacuanha — *r. de Charcis,* Dorstenia contrayerva — *r. de Chine,* Smilax china — *r. de Dracke,* Dorstenia contrayerva — *r. des Philippines,* Dorstenia contrayerva—*r. de Safran,* Curcuma longa — *r. de Saint Esprit,* Angelica — *r. Salivaire,* Anthemis pyrethrum — *r. de Turbith,* Convolvulus turpethum.

RACINES DU CERVELET, (pl. of *racine,*) Corpora restiformia.

RACK, Arack.

RACLURES DES BOYAUX, (from *racler,* 'to scrape,') see Abrasion. Ramenta intestinorum.

RACORNISSEMENT (F.), (*racornir,* ([L.] *cornu,* 'horn,') 'to make hard as horn.') *Cor'nification.* A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RACOSIS, (ῥακωσις,) Rachosis.

RADCLIFFE'S ELIXIR, see Tinctura aloes composita.

RADESYGE, Radzyge.

RADEZYGE, Radzyge.

RADIAD, see Radial aspect.

RA'DIAL, *Radia'lis,* (from *radius.*) That which relates to the radius.

RADIAL ANTÉRIEUR, Palmaris magnus.

RADIAL ART'ERY, *A. extern'a Cu'biti.* It arises from the brachial, at the upper and anterior part of the forearm; descends on the onter side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space which separates the first

two metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profound* or *radial* palmar arch. The radial artery gives off the *recurrent radial*, several *radiomuscular* branches, the *transverse palmar radiocarpal artery*, the *external superficial artery of the palm of the hand*, the *external dorsal of the thumb*, the *dorsalis carpi, dorsal interosseous artery of the index*, &c.

RADIAL AS'PECT. An aspect towards the side on which the radius is situated.—(Barclay.) *Radiad* is used by the same writer, adverbially, to signify 'towards the radial aspect.'

RADIAL EXTERNE PREMIER, see Radialis—*r. Externe second*, see Radialis—*r. Grand*, see Radialis.

RADIAL NERVE, *Radio-digital* (Ch.), *Spi'ral Nerve, Spi'ral mus'cular N., Mus'culospi'ral nerve*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, as far as opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite to the upper extremity of the radius it divides into two branches;—the one *posterior*, which turns backwards into the substance of the supinator brevis, and when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior:* it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outside of the ring-finger, and to the first interosseous muscle of the back of the hand.

RADIAL PETIT, see Radialis.

RADIAL VEINS, DEEPSEATED. These follow the same course as the radial artery.

RADIALIS EXTENSOR LONGIOR, R. externus longior.

RADIA'LIS EXTER'NUS BRE'VIOR, *Exten'sor Car'pi Radialis Bre'vior, Radialis secun'dus*, (F.) *Second radial externe, Petit radial, Épicondylo-sus-métacarpien*, (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates, below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

RADIALIS EXTER'NUS LON'GIOR, *Extensor Car'pi Radia'lis Lon'gior, Radialis exter'nus pri'mus*, (F.) *Premier radial externe, Grand radial, Huméro sus-métacarpien*, (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and to the corresponding tuberosity of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

RADIALIS EXTERNUS PRIMUS, R. Externus longior—r. Internus, Palmaris magnus—r. Secundus, R. Externus longior.

RAD'IATED, *Radia'tus*, (from *radius*, 'a ray,') (F.) *Rayonné*. That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c.; as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

RADIATED SUBSTANCE OF THE KIDNEY, see Kidney.

RAD'ICAL, *Radica'lis*, (from *radix.*) A *rad'ical cure, cu'ra radica'lis*, is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *pal'liative cure.*

RADICAL MOISTURE, Humidum radicale.

RADICAL VES'SELS, *Vas'cular Rad'icles*, (F.) *Radicules vasculaires*, are the small vessels that take their origin in the tissues, and by their union form larger vessels.

RADICAL VINEGAR, Aceticum acidum.

RADICES HYOIDEI OSSIS, (pl. of *radix*,) Cornua hyoidei ossis.

RADICIS'ECA, *Rhizot'omus, Rhizot'omist*, (*radix* and *secare*, 'to cut.') One employed in collecting and preparing roots was formerly so called.

RADICLE, Radicula.

RADICULA, *Rad'icle*, (F.) *Radicule*, (dim. of *radix*, 'a root.') A small root or rootlet; also, Raphanus hortensis.

RADICULES VASCULAIRES, Radical vessels.

RADII CILIARES, (*radius*, 'a ray,' pl. *radii*,) Ciliary processes.

RADII FRONTIS. The folds or wrinkles of the forehead.

RA'DIO, (from *radius.*) In composition the radius.

RA'DIOCAR'PAL, *Radiocarpia'nus.* That which relates to the radius and carpus.

RADIOCARPAL ARTICULA'TION is the *wrist joint*, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

RADIOCARPAL TRANS'VERSE PAL'MAR AR'TERY, (F.) *Artère Radio-carpienne-transversale-palmaire.* A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

RADIO-CUTANÉ (*NERF*,) see Cutaneous—*r. Phalangettien du pouce*, Flexor longus pollicis manus.

RADIOLUS, (dim. of *radius*, 'a rod or spoke.') Sound.

RA'DIOMUS'CULAR, *Radiomuscula'ris.* A name given to the branches sent off from the radial artery to the muscles of the forearm in the first part of its course; as well as to the nervous filaments which the radial nerve sends to the same muscles.

RADIS, (*radix*,) Raphanus hortensis—*r. de Cheval*, Cochlearia armoracia.

RADISH, Raphanus hortensis—r. Water, Nasturtium amphibium.

RA'DIUS, 'a staff,' 'a rod,' 'a spoke:'—so called from its shape. *Cer'cis, Foc''ile mi'nus* seu *supe'rius, Cu'bi mi'nor, Os ad cubita'lē, Additamen'tum ul'næ, Manu'brium ma'nûs, Parape'chyon, Arun'do bra'chii mi'nor*, (F.) *Os du Rayon.* A long, prismatic bone, the upper and lesser extremity of which is called the *head.* This is supported by a *cer'vix* or *neck.* At the part where the neck is confounded with the *body* of the bone is the *tu'bercle* or *bicip'ital tubero'sity* or eminence for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than

the superior, is flattened before and behind; is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

RADIUS, COL DU, Collum radii.

RA'DIX, gen. *Radi'cis, Rhi'za,* (F.) *Racine.* A root: also, the male organ.

Radix, Root or *fang* of a tooth, is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin. Surgeons give the name to prolongations, sent by scirrhous, cancerous, or other tumors into the neighboring parts.

Five Aperient Roots, Quinque radi'ces aperien'tes, were, of old, asparagus, butchers' broom, fennel, parsley, and smallage.

Five Lesser Aperient Roots, Quinque radi'ces aperien'tes mino'res, were caper, dandelion, eryngo, madder, and restharrow.

RADIX ASCLEPIADIS CRISPA, see Gomphocarpus crispus—r. Braziliensis, Ipecacuanha.

RADIX COR'DIS, *Ba'sis Cordis.* The base of the heart.

RADIX GINSENG, see Panax quinquefolium — r. Indica Lopeziana, Lopez radix — r. Linguæ, see Tongue — r. Lopeziana, Lopez radix — r. Ninsi, Panax schinseng, Sium ninsi—r. Rubra, Rubia—r. Serpentum, see Ophiorrhiza mungos — r. Unguis, Nail, root of—r. Ursina, Æthusa meum—r. Ventris, Umbilicus.

RADULA, (from *radere,* 'to scrape,') Raspatorium.

RADZY'GĒ, *Radzygin, Radesyge, Radezyge,* (from obsolete Da. word *rada,* 'malignant,' and *syge,* 'disease,') *Thæ'ria,* (properly *The'ria,* from θηριον (ἑλκος), 'a malignant ulcer.') *Le'pra borea'lis* seu *Norveg''ica, Norwe'gian Lep'rosy.* A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis, and others a syphiloid affection.

Another form — the *Spedalske,* or *Spedalskhed* —of Norway, appears to be a variety of tubercular lepra. Under the epithelial scales, numerous acari have been found; and the affection has been called *Sca'bies crusto'sa,* and *Sca'bies Norveg''ica Boeck'ii,* after Boeck, who well described a case of it.

RAFFLE'SIA ARNOLD'I, (after Sir Stamford Raffles.) A plant of Java. *Order,* Rafflesiaceæ, a decoction of which is employed there as an astringent in relaxed conditions of the genito-urinary apparatus.

RAFRAÎCHISSANT, (*re,* and *fraîche,* 'cool,' from [L.] *refrigerescere,* 'to become cool again.') Refrigerant.

RAGE, *Ira, Fu'ror bre'vis, Or'gē, Thy'mos,* (F.) *Colère, Rage.* Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and, generally, redness and swelling of the face.

RAGE, (*ραγη,*) Rhage.

RAGE, (from [L.] *rabies,*) Hydrophobia, Rage.

RAGE DE TÊTE. An epidemic and fatal malady, which prevailed in France in 1481. It was presumed to be epidemic meningitis.

RAGLE (F.), (said to be derived from an Arabic word, which signifies 'to traverse the desert.') A kind of hallucination observed in travellers in the deserts, which resembles the effect of intoxicating liquors, opium, &c.

RAGWEED, Ambrosia clatior — r. Golden, Senecio aureus—r. Great, Ambrosia trifida.

RAGWORT, Senecio Jacobæa.

RAIA BATIS, and R. CLAVATA, see Oleum jecoris aselli.

RAIDEUR, (from *rigidus,* 'stiff,') Rigidity—*r. Cadavérique,* Rigor mortis.

RAIFORT, (from *raphanus,* or from *radix fortis,* or from *rapum forte,* [?]) Raphanus hortensis — *r. Sauvage,* Cochlearia armoracia.

RAINBOW WORM, Herpes iris.

RAINURE, Groove — *r. Digastrique,* Mastoid groove.

RAISIN, 'a grape,' (from *racemus,* [?]) see Vitis vinifera — *r. d'Amérique,* Phytolacca decandra—*r. de Bois,* Vaccinium myrtillus—*r. d'Ours,* Arbutus uva ursi — *r. de Renard,* Paris.

RAISING, Expectoration.

RAISINIÈRE, (F.) (from *raisin.*) A name given to a small granular, brownish or blackish tumour, which forms occasionally at the surface of the cornea, in consequence of ulcers or accidental wounds of that membrane.

RAISINS, Uvæ passæ, see Vitus vinifera — *r. de Corinthe,* see Vitus Corinthiaca.

RAISON, ([L.] *ratio,*) Reason.

RAKASI'RA. An American balsam; of a brownish or brownished colour; semitransparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

RAKETEETH. A term, used in the north of England for teeth which are wide apart, and similar to those of a rake.

RAKIA, see Spirit.

RÂLE, (F.) *Rat'tle, Rhon'chus, Rhen'chus, Rhenx'is,* (from [D.] Ratel,) *Cerch'nus, Rhog'mus* (probably an example of onomatopœia). Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition, *Râle trachéal,* is chiefly observed at the approach of death, and is commonly called "the *rattles.*"

The term *Râle* has been given to different sounds during respiration, caused by the air in connection with fluid contained in the bronchi or areolæ of the pulmonary tissue; which are perceived by the stethoscope. *Râle* has generally been used for a 'moist' sound, heard on auscultation of the chest, whilst *rhonchus* has meant a 'dry' sound.

RÂLE BRONCHIQUE HUMIDE, R. muqueux — r. Caverneux, Gurgling — *r. Bronchique sec, Râle Sonore—r. Cavernuleux,* see Gurgling—*r. Crépitant,* Rhonchus crepitans, see Crepitant—*r. des Mourans,* see *Râle—r. c. Redux,* see Crepitant.

RÂLE MUQUEUX, R. bronchique humide, Rhon'chus muco'sus, Hygrobronchiorrhon'chus, Mu'cous Rat'tle. The sound produced by the passage of air through mucus accumulated in the larger bronchi or trachea, or through softened tubercular matter. This *râle* occurs in catarrh, and in softened tubercle. When carried to a very high degree, it constitutes *gurg'ling,* (F.) *Gargouillement.* The *subcrep'itant rhon'chus,* (F.) *Râle sous-crépitant,* is produced by the bubbling of air through liquid of variable consistence in the minute bronchial tubes. When heard at the base of both lungs, it is a sign of capillary bronchitis. When heard at the base of one only, it is generally connected with tubercles higher up.

RÂLE SIBILANT, Rhon'chus sib'ilus seu *sib'ilans, Sib'ilant Rat'tle.* A slight, though prolonged, whistling sound, occurring either at the commencement of inspiration or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications

It is seated in the small tubes, and occurs in the first stage of bronchitis. The *click'ing* and *whist'ling* varieties differ, in the former being short, the latter prolonged. The former is a quick, sharp sibilus or whistle, which ceases almost instantaneously; the latter a prolonged sibilus, of less sharpness, lasting almost the whole time of the movement which it accompanies. To these may be added the *hissing* variety, the name sufficiently indicating its character.

RÂLE SONORE, R. bronchique sec ou *ronflant, Rhon'chus sono'rus, Sono'rous Rat'tle.* A sound resembling at times the snoring—(F.) *Ronflement*—of a person asleep; at others the sound of the bass string of an instrument when rubbed with the finger; and not unfrequently the cooing—(F.) *Roucoulement*—of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

RÂLE SOUS-CRÉPITANT, see *Râle muqueux—r. Trachéal,* see *Râle—r. Vésiculaire,* see Crepitation.

RAMEAU, Ramus.

RAMBERGE, Mercurialis.

RAMEN'TA INTESTINO'RUM, (pl. of *ramentum,*) *Scra'pings of the Intes'tines,* (F.) *Raclures des Boyaux.* The shreds or scrapings, as it were, of the mucous membrane of the bowels, often discharged in malignant dysentery. The evacuation in which these are contained has been termed *Diachore'ma xysmato'des.*

RAMENTUM, (contracted from *radimentum,* from *radere,* 'to scrape,') Fragment, Scobs.

RAMEX, gen. *Ra'micis,* Hernia—r. Varicosus, Varicocele.

RAMIFICA'TION, *Ramifica'tio, (ramus,* and *facere,* 'to make.') A division of arteries, veins, or nerves into branches. Also, a branch itself.

RAMILLE, (from *ramus,*) Ramusculus.

RAMOLLISSEMENT, (*re,* and *mollir,* (from [L.] *mollis,* 'soft,') 'to soften,') Mollities—*r. du Cerveau,* Mollities cerebri—*r. du Cœur,* Cardiomalacia—*r. de l'Estomac,* Gastromalacia—*r. du Foie,* Hepatomalacia—*r. Gris,* see Hepatization—*r. de l'Intestin,* Enteromalacia—*r. de la Moelle épinière,* Mollities medullæ spinalis—*r. des Os,* Mollities ossium—*r. Rouge,* see Hepatization.

RAMPANT, (F.) (*ramper,* 'to climb,' from [L.] *repere,* 'to creep,') *Re'pens, Rep'tans.* That which creeps or crawls. The French *Bandage rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

RAMPE, Scala.

RAMPES DU LIMAÇON, Scalæ of the cochlea.

RAMPHOS, (ῥαμφος, 'a beak,') Rostrum.

RAMULUS, (dim. of *ramus,*) Ramusculus.

RA'MUS, *Cla'dus, Branch,* (F.) *Rameau.* A division of an artery, vein, or nerve. Also, the male organ.

RAMUS DURIOR SEPTIMÆ CONJUGATIONIS, Facial nerve.

RAMUS'CULUS, (dim. of *ramus,*) *Ra'mulus, Ramun'culus, Sur'culus, Cladis'cus.* A division of a ramus. (F.) *Ramuscule, Ramille.*

RANA, Ranula.

RA'NA ESCULEN'TA, 'esculent frog,' (F.) *Grenouille.* This frog and the bull-frog, *Rana Tauri'na,* are eaten as delicacies. They are nutritious, and easily digested.

RANCE, Rancid.

RAN'CID, *Ran'cidus, Sa'pros,* (F.) *Rance, (rancere,* 'to be stale.') An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may thus become very irritating, and unfit for the purposes for which they were originally intended.

RAN'DIA DUMETO'RUM, 'R. of thickets,' (after J. Rand, a botanist of London,) *R. Spino'sa, Can'thium Corona'tum, Garden'ia* seu *Posoque'ria Dumeto'rum* seu *Spino'sa.* A Coromandel shrub; *Ord.* Cinchonaceæ; the fruit of which, bruised and thrown on the water, intoxicates, or even kills fish. In the form of powder it is a powerful emetic.

RANDIA SPINOSA, R. dumetorum.

RA'NINE, *Rani'na,* (from *rana,* 'a frog,' 'shaped like a frog.') The portion of the lingual artery which advances horizontally between the genioglossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

RANTREE, Sorbus aucuparia.

RA'NULA, (dim. of *rana,* 'a frog,' so called from its resemblance,) *Dyspha'gia Ra'nula, Emphrag'ma saliva'rē, Ba'trachos, Batra'chium, Hydroglos'sa, Hypoglos'sis, Hypoglos'sum, Hypoglot'tis, Hypoglos'sium, Ra'na, Frogtongue,* (F.) *Grenouillette.* A small, soft, fluctuating, and semitransparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes the salivary duct is found plugged by a small calculus.

RANULA LAPIDEA, see Calculi, salivary.

RANUN'CULUS, *Crowfoot,* (F.) *Renoncule,* (Sc.) *Yel'low gow'an, Ord.* Ranunculaceæ; *Sex. Syst.* Polyandria Polygynia, (dim. of *rana,* 'a frog,' because found in marshy places where frogs abound.) A genus of plants, most of the species of which, when taken internally, act as acrid poisons. They are, also, acrid and vesicant when applied to the skin, and have accordingly been often used as counter-irritants. In the Pharmacopœia of the United States, *Ranunculus* is the cormus and herb of *Ranunculus bulbosus.* The following species answer to the above description.

RANUNCULUS ABORTI'VUS, *Smallflowered Crow'foot, Chick'enpepper.*

RANUNCULUS A'CRIS, *R. praten'sis* seu *Steven'ii* seu *ru'fulus* seu *sylvat'icus* seu *Sic'ulus, Up'right Mead'ow* or *Tall Crow'foot, But'ter Cups,* (Prov.) *Cra'sey, Guilt'y Cups, Yel'lowweed, Blis'terweed, Pile'wort, Bur'wort, Mead'owbloom, Yel'lows,* (F.) *Bouton d'or.*

RANUNCULUS ALBUS, Anemone nemorosa—r. Aquaticus, R. sceleratus.

RANUNCULUS BULBO'SUS, *R. læ'tus, Bul'bous* or *Bulbousrooted Crow'foot, But'ter Cups,* (F.) *Renoncule bulbeuse, Bassinet.*

RANUNCULUS DIGITATUS, R. sceleratus—r. Declinatus, R. flammula.

RANUNCULUS FICA'RIA, *R. ver'nus* seu *præ'cox, Chelido'nium mi'nus, Scrophula'ria mi'nor, Ficu'ria ranunculoï'des* seu *ver'na* seu *commu'nis, Chelido'nia rotundifo'lia mi'nor, Cursu'ma hæmorrhoida'lis her'ba, Ægole'thron, Les'ser cel'andine, Pile'wort,* (F.) *Petite Chélidoine, Petite Éclaire, Ficaire, Herbe aux hémorrhoïdes.* The leaves and root have been used medicinally; the leaves as an antiscorbutic; the root as a cataplasm in piles.

RANUNCULUS FLAM'MULA, *R. declina'tus, Flam'mula, Surrec'ta al'ba, Smal'ler Wa'ter Crow'foot, Less'er Spear'wort,* (F.) *Petite Douve.*

RANUNCULUS ILLYRICUS.

RANUNCULUS LINGUA.

RANUNCULUS LÆTUS, R. bulbosus—r. Nemorosus, Anemone nemorosa—r. Palustris, R sceleratus.

RANUNCULUS PENNSYLVANICUS, *Bristly Crowfoot.*

RANUNCULUS PRÆCOX, R. ficaria—r. Pratensis, R. acris.

RANUNCULUS PUBES'CENS. Grows in ditches and marshes in South Africa. The expressed juice is used by the Cape Colonists in cancerous ulcers.

RANUNCULUS REPENS, *Creeping Crowfoot.*

RANUNCULUS RUFULUS, R. acris.

RANUNCULUS SCELERA'TUS, *R. Palus'tris* seu *umbella'tus* seu *digita'tus* seu *aquat'icus, Ri'sus A'pium, Her'ba Sardo'nia, Her'ba Scelera'ta, Hecato'nia palus'tris, Marsh* or *Crush'ed* or *Cel'ery-leaved Crow'foot.*

RANUNCULUS SICULUS, R. acris—r. Stevenii, R. acris—r. Umbellatus, R. sceleratus—r. Vernus, R. ficaria—r. Virginianus, Lobelia syphilitica.

RAPA, *Rapum, Rapus, Rapys, Raphis, Raphus, Raph'anus, Raphys, Rhaphis, Rhaphus, Rhaph'anus, Rhapys,* and *Rhaphys.* These terms were applied, of old, to the cabbage or turnip kind.

RAPA NAPUS, (*ραπυς,*) Brassica rapa—r. Rotunda, Brassica rapa.

RAPE, (*rapa,*) Brassica napus: also, Stuprum, (from *rapio,* 'to ravish.')

RAPHANE'DON, (*ῥαφανηδον,* from *ῥαφανις,* 'a radish, like a radish,') *Rhaphanedon.* A transverse fracture of a long bone, leaving no splinters; what has been called, in France, *Fracture en rave.*

RAPHA'NIA, *Convul'sio Raphania, Rhapha'nia, Mor'bus spasmod'icus malig'nus* seu *popula'ris* seu *Silesi'acus, Eclamp'sia typho'des, Synclonus Rapha'nia.* Linnæus gives this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raph'anus Raphanis'trum* seu *sylves'tris, Raphanis'trum sec''etum* seu *arven'sē, Rapis'trum,* being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See Convulsio cerealis.

RAPHANIA MAÏZTICA, Pellagra.

RAPHANIS, (*ῥαφανις,*) Raphanus hortensis—r. Magna, Cochlearia armoracia.

RAPHANISTRUM ARVENSE, see Raphania.

RAPHANUS, Rapa, R. hortensis.

RAPH'ANUS HORTEN'SIS, *Raph'anus, R. sati''vus* seu *ni'ger, Raph'anis, Rhaph'anus, Radic'ula, Rha'phys, Ra'phys, Rhaps, Ra'pys, Rad'ish,* (F.) *Raifort, Radis. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as antiscorbutics.

RAPHANUS MARINUS, Cochlearia armoracia—r. Raphanistrum, see Raphania—r. Rusticanus, Cochlearia armoracia—r. Sylvestris, see Raphania.

RA'PHĒ, *Rha'phē,* (*ῥαφη,* 'a suture.') A name given to prominent lines resembling a raised stitch. Such is the raphe or *tramis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Ra'phē* seu *Ra'phē supe'rior* seu *Lin'ea Media'na* seu *Sutu'ra cor'poris callo'si exter'na* seu *chor'da longitudina'lis Lancis'ii* is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHEX, Chenopodium vulvaria.

RAPHIANKIS'TRON, (*ῥαφιον,* 'a needle,' and *αγκιστρον,* 'a hook.') An instrument employed in the formation of artificial pupil.

RAPHION, (*ῥαφιον,* dim. of *ῥαφις,* 'a needle,') Needle.

RAPHIS, (*ῥαφις,*) Needle, see Rapa.

RAPHUS, Rapa.

RAPHYS, Rapa. Raphanus hortensis.

RAPISTRUM, (from *rapa,*) see Raphania.

RAPONTIC, Rheum rhaponticum.

RAPPORT (F.), (*re,* and *portare,* 'to bring,') *Rela'tio, Renuncia'tio,* 'a report.' A deposition made by a physician or surgeon, to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c. Formerly, there were the *Rapports dénonciatifs,* made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanor,—the *Rapports provisoires,* the object of which was to obtain *provisions* for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution,—and *Rapports mixtes,* or those which were both *dénonciatifs* and *provisoires.* At present, reports or depositions are generally divided into *judiciary,* or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative,* which afford information on subjects relating to any branch of the public administration, as on the nuisance, or otherwise, of certain establishments, the character of any epidemic, &c.

RAPPORT, Eructation, Regurgitation.

RAP'TUS, (*rapio, raptum,* 'to seize violently and suddenly.') A violent and sudden attack or seizure.

RAPTUS HÆMORRHAG''ICUS. A hemorrhagic attack or seizure.

RAPTUS NERVO'RUM. A sudden and violent nervous seizure. A spasm or cramp.

RAPTUS POSTTERGANEUS, (*raptus, post,* 'behind,' and *tergum,* 'the back,') Opisthotonos.

RAPUM, Rapa—r. Majus, Brassica rapa.

RAPUNTIUM SYPHILITICUM, (from *rapum,*) Lobelia syphilitica.

RĀPURE, Rasura.

RAPUS, Rapa.

RAPYS, Rapa, Raphanus hortensis.

RAQUETTE, Cactus opuntia.

RARE (F.), *Rarus,* 'rare.' An epithet for the respiration and pulse, when less frequent than in health.

RAREFA'CIENS, *Rarifa'ciens, Arœol'icus,* (F.) *Raréfiant,* (*rarus,* 'rare, thin,' and *facere,* 'to make.') Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

RARÉFIANT, Rarefaciens.

RARIFACIENS, Rarefaciens.

RA'RITAS, (F.) *Rareté.* Rarity; scantiness; fewness.

RARITAS DEN'TIUM. A large space between the teeth, which appear to be, and may be, too few.

RASCATIO, Excreation.

RASCETA, Carpus, Malleolus—r. Pedis, Tarsus.

RASCHA, Carpus, Malleolus.

RASETA, Carpus, Malleolus.

RASETTA, Carpus, Malleolus.

RASH, Exanthem—r. Canker, see Cynanche maligna—r. Fever, Scarlatina—r. Lichenous, Lichen—r. Mercurial, Eczema mercuriale—r. Mulberry, see Typhus—r. Nettle, Urticaria—r. Rose, Roseola—r. Summer, Lichen tropicus—r. Tooth, Strophulus—r. Wildfire, Ignis sylvaticus.

RASION (F.), *Ra'sio,* (from *radere, rasum,* 'to shave, scrape.') In pharmacy, the division of substances by the rasp or file.

RASOIR, Razor.

RASO'RIAN, see Controstimulus.

RASO'RISM. The Italian medical doctrine of contro-stimulus, of which Rasori was the founder.

RASORIUM, (*radere, rasum,* 'to scrape,') Raspatorium.

RASPATO'RIUM, (from *râper,* [old F.] *rasper,* 'to rasp,') *Raso'rium, Rat'ula, Scal'prum raso'rium, Xys'ter, Xyste'rium, Xys'trum, Rad'ula, Runci'na, Runcin'ula, Scal'prum, Ras'patory,* (F.) *Rugine, Grattoir.* An instrument used for rasping bones, to detach the periosteum, — either in certain surgical operations, or for anatomical purposes.

RASPBERRY, Rubus idæus — r. Black, see Rubus strigosus—r. Ground, Hydrastis Canadensis—r. Wild, Rubus strigosus.

RASPING, Eructation.

RASPS, Rubus idæus.

RASSETA PEDIS, Tarsus.

RASTETA, Carpus, Malleolus.

RASU'RA, *Xys'ma, Xys'mus,* (F.) *Râpure,* (*radere, rasum,* 'to scrape.') A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasu'ræ Cor'nu Cer'vi, Harts'horn sha'vings.*

RASURA, Scobs.

RATAFIA, (pron. *Ratafe'a,* and *Rat'afee,*) (F.) *Alcoolé sucré, Saccharo-alcoolé.* A liquor prepared by imparting to ardent spirits the flavor of various kinds of fruits, adding sugar.

RATANHY, Krameria ratanhia—r. of the Antilles, Krameria ixina.

RATE, Spleen.

RATELEUX, Spleneticus.

RÂTELIER, (from *rateau,* 'a rack,') see *Dentier.*

RA'TIO, *Rationa'litas,* (*reor, ratus,* 'to think.') A reason, a cause, an explanation, a mode or manner; as *Ratio symptom'atum,* an explanation of the symptoms, — *Ratio medeni'di, Ge'nus curatio'nis, Vi'a curan'di;* the reason, mode or manner of cure.

RATIO MEDENDI, see Ratio — r. Symptomatum, see Ratio.

RA'TION, (from *ratio,* 'a proportion,') *Dia'rium.* The daily allowance of necessaries, especially of food, to a soldier or sailor.

Diet rations are founded on principles laid down under Dietary; and in all civilized countries they are, in essential respects, the same. The following table is given by Professor Horsford of the rations of the more important armies in active service.

	American.	Austrian.	Bavarian.	British in Crimea.	British in India.	French.	Prussian.	Russian in Crimea.
Flour	22 oz. or		1.65 oz.					
Cornmeal	20 oz. or							
White Bread	22 oz. or		2.30 oz.	24 oz. or	16 oz. or			
Hard Bread	16 oz. or			16 oz.	16 oz.	22.83 oz. and or 3.52 oz. 26.43 oz.	16 oz. or 32 oz.	16 oz.
Black Rye Bread		32 oz.	17.16 oz.					
Fresh Beef	20 oz. or	4 oz.	3.10 oz.	16 oz. or	16 oz. or	10.78 oz. or	8 oz. or	16 oz. or
Salt Beef	20 oz. or			16 oz. or	16 oz. or			16 oz. or
Salt Pork	12 oz			16 oz.	16 oz.	8.47 oz	4 oz.	16 oz.
Potatoes	16 oz. 3 times weekly						20 oz. or	
Rice	1.6 oz.			2 oz. or	4 oz. other vegetables.	2.11 oz. or	2.66 or	
Barley				2 oz.			4 oz. or	
Peas							8 oz. or	
Beans	0.64 gill					2.11 oz. or	8 oz. or	
Oatmeal					16 oz.		5.3 oz.	
Desiccated Vegetables	or 1 oz. 2 times weekly			2 oz.				
Cabbage or Sauerkraut				1 oz.				3.5 gills.
Coffee, green	1.6 oz. or			1 oz.		0.9 oz.		
Coffee, roasted and ground	1.28, or			0.25 oz.	1.43 or .43 oz.			
Tea	2.4 oz.			0.5 gill.				
Brandy						0.43 gill, or	2 gills	1.5 gill.
Rum								
Wine						1.75 gill.		
Beer								1.1 qt.
Tobacco						½oz.		
Sugar	2.4 oz.			2 oz				
Vinegar	0.32 gill							1.75 gill.
Lime Juice				1 oz				quantity unkno'n
Mustard								3.86 gr.
Horseradish								3,86 gr.
Pepper	0.4 oz		0.05 oz.	0.31 oz.				3,86 gr.
Salt	0.6 oz		0.10 oz.	0.62 oz.	1 oz.	0.9 oz.	Supply	0.75 oz.
Candles	16 oz. to 100 rations.							
Soap	64 oz.							
Wood					48 oz.			

The reduction of the 'marching ration' in bulk and weight, without impairing its nutritive power, has received much attention. Professor Horsford has proposed one consisting of roasted and ground wheat or self-raising flour,—prepared by intimately incorporating bicarbonate of soda and pulverulent acid phosphate of lime with flour, and forming a dough with water,—and boiled or roasted whole beef, sausaged, dried and compressed, which, he says, is very palatable, imperishable, less expensive, of greatly reduced weight and bulk; requiring, therefore, less transportation, and "will subsist an army in health indefinitely long.

RAT''IONAL, *Rationa'lis*, (F.) *Rationnel*. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment*. The French, also, say *Signes rationels*, in opposition to *Signes sensibles*. See Organic.

RATIONALITAS, Ratio.

RATSBANE, Arsenious acid.

RATTLE, ([G.] Rattel,) *Râle*.

RATTLES, THE, see *Râle*.

RATTLEBUSH, Sophora tinctoria.

RATTLESNAKE, Crotalus horridus—r. Leaf, Goodyera pubescens — r. Plantain, Goodyera pubescens — r. Root, Nabulus albus, Polygala senega, Trillium latifolium — r. Weed, Hieracium venosum.

RATTLESNAKE'S MASTER, Agave Virginica, Liatris scariosa, Nabalus albus.

RATTLEWEED, Actæa racemosa.

RATULA, Raspatorium.

RAUCE'DO, gen. *Rauce'dinis, Rau'citas, Paraphо'nia rau'ca, Asper'itas Arte'riæ as'peræ, Vox rau'ca, Bran'chus, Hoarseness*, (Sc.) *Roup*, (Prov.) *Rawp*, (F.) *Enrouement, Raucité*, (*raucus*, 'hoarse.') A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in discases of the larynx and trachea.

RAUCEDO CATARRHA'LIS. Hoarseness from cold.

RAUCITAS, Raucedo.

RAUCITÉ, Raucedo.

RAU'COUS, *Rau'cus*, (F.) *Rauque*, 'hoarse;' as a raucous voice—*Vox rauca* seu *raucis'ona*.

RAUQUE, Raucous.

RAVE, (from *rapa*,) Brassica rapa.

RAVERY, Delirium.

RAWP, Raucedo.

RAY, Diarrhœa.

RAYONNÉ, (from [F.] *rayon*, [L.] *radius*, 'a ray,') Radiated.

RAYONS SOUS-IRIENS, Ciliary processes.

RA'ZOR, *Cul'ter tonso'rius, Machæ'ris, Novac'ula, Xy'rum, Xy'rus*, (F.) *Rasoir*, (*radere, rasum*, 'to shave.') An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

RE (L.), in composition, 'back, in return, again.' Before vowels, at times; and before *h* and *d*, it becomes *red*.

REACHING, (from [Sax.] pæcan, 'to reach,') Vomiturition.

REAC'TION, *Reäc'tio*, (*re*, 'again,' and *agere, actum*, 'to act.') An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix naturæ*. It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbific influences.

READ, Rennet.

READY METHOD, *Marshall Hall's Method*. A mode of restoring respiration in cases of apnœa, proposed by Dr. Marshall Hall. It consists in placing the body in the prone position, making gentle pressure on the back; then removing the pressure, and turning the body on its side and a little beyond, executing these movements sixteen times in the minute. It is also termed the method of *prone and pos'tural respira'tion* in apnœa.

REAL'GAR, *Realgal, Arlada, Arladar, Auripigmen'tum ru'brum, Arsen'icum ru'brum facti''tium, Abessi, Sandar'acha Græco'rum, Red Sul'phuret of Mer'cury*. A violent poison. See Poison.

REAM, Cream.

REASON, *Ra'tio, Lo'gos*, (F.) *Raison*. The faculty or property of the mind by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

REBOLEA, Mummy.

REBONA, Mummy. Also, dried fæces, *Ster'cus adust'um*.

REBOUTEUR, (*re*, and *bouter*, 'to put,') *Renoueur*.

RECEIV'ER, *Ampul'la*, (F.) *Ballon, Recip'ient*, (*recipere, receptum*, (*re*, and *capere*, 'to take,') 'to take, to receive.') In pharmacy, a wide-necked globular vessel, the neck of which widens gradually outwards, to receive the tapering beak of the retort, in distillation. Like the retort, the receiver may be *plain* or *tu'bulated*.

A *quilled receiver* is one that has a tapering tube from its lower surface, which is inserted into a graduated bottle through a cork joint, when it is desirable to know accurately the amount of fluid that has passed over.

RECEPTA, Prescription.

RECEPTACULA DURÆ MATRIS, (from *receptare, receptatum*, 'to receive,') Sinuses of the dura mater.

RECEPTAC'ULUM CHYLI, 'receptacle of the chylo;' *R. Pecquet'i* seu *Pecquetia'num, Diverso'rium* seu *Stag'num chy'li, Sac'culus chy'lifer* seu *ro'rifer* seu *lac'teus, Al'veus ampullo'sus* seu *ampulles'cens, Utric'ulus lac'teus, Vesic'ula chy'li, Ampul'la chylif'era* seu *chy'li, Cister'na lumba'ris* seu *Chy'li, Chylocys'tis, Chylodochi'um, Lat'ices lac'tei, Lum'bar cis'tern, Res'ervoir of Pec'quet*, (F.) *Réservoir du chyle, R. de Pecquet, Citerne lombaire*. A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

RECEPTACULUM COTUN'NII. A triangular space, formed by a separation of the two laminæ of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno*.

RECEPTACULUM PECQUETI, R. Chyli — r. Sellæ equinæ lateribus appositum, Cavernous sinus.

RECEPTA'RII MED'ICI, (from *receptum*.) Physicians, according to Langius, who, without any reason, collect from pharmacopœias and chemical works masses of receipts (*receepta*) sufficient to load wagons, ("*quibus plaustra onerare possent*.")

RECEPTIV'ITY, *Receptiv'itas*, (F.) *Réceptivité*, (*recipere, receptum*, 'to receive.') A word used by Tissot to express the susceptibility of certain organs to receive morbific impressions.

RECEPTUM, Prescription.

RECESSUS, 'a retreat,' Abscess, see Lingula, Sinus—r. Sulciformis, see Fovea vestibuli.

RECETTE, Prescription.

RECHAMELCA, Rachamelca.

RECHUTE, (*re*, and *chute*, 'a fall,') see Relapse.

RECIDIVA MORBI, (*recidere*, (*re*, and *cadere*,) 'to fall back,') Relapse.

RÉCIDIVE, see Relapse.

REC''IPĒ, (L.) (*re*, and *capere*, 'to take.') A Latin word which signifies 'take,' (F.) *Prenez*, and with which prescriptions are commenced. It is, often, represented by R, ℞, and was formerly by ♃, the symbol of Jove. See Abbreviation, and R. Substantively, *Recipe* means a prescription or receipt.

RÉCIPIENT, Receiver.

RECIPROCATION, VIBRATIONS OF, see Sound.

RECLINATIO, Reclination — r. Palpebrarum, Ectropion.

RECLINA'TION, *Reclina'tio*, (*reclinare*, *reclinatum*, (*re*, and *clinare*, 'to bend,') 'to bend back.') A mode of operating for the cataract, which consists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way that the front surface of the cataract is the upper, and its back surface the lower one.

RECLUSOR PALPEBRARUM, (from *recludere*, *reclusum*, 'to open,') Levator palpebræ superioris.

RECOMPOSITION, Metasynchrisis.

RECONVALESCENTIA, (*re*, and *convalescere*, 'to get well,') Convalescence.

RECORDATIO, (from *recordari*, *recordatus*, 'to remember,') Memory.

RECORDATUS, Memory.

RECORPORATIVUS, (*re*, and *corporare*, 'to form into a body,' Metasyncritic.

RECOVERY, (from *recuperare*, (*re*, and *capio*, 'to take,') 'to regain,') Restauratio.

RECREATIO, (*re*, and *creare*, 'to create,') Restauratio.

REC'REMENT, *Recremen'tum*, (*re*, and *cernere*, *cretum*, 'to sift.') Of old, dross, excrement. With the moderns, a humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluids are said to be *recrementit''ial*, (F.) *Récrémenteux*, *Récrémentitiel*, *Humo'res inquili'ni*.

RECREMENTA (pl. of *recrementum*) VESICÆ, Urine.

RÉCREMENTEUX, see Recrement.

RECREMENTITIAL FLUIDS, see Recrement.

RECREMEN'TOĒXCREMENTIT''IAL. Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

RECREMENTUM, Recrement.

RECRUDESCEN'TIA, *Palincote'sis*, *Recrudes'cence*, (*re*, and *crudus*, 'raw.') An increase of a disease after a temporary remission.

REC'TAL, *Recta'lis*. Appertaining, or relating, to the rectum, — as '*rectal* tube.' See Tube, rectal.

RECTIFICA'TION, *Rectifica'tio*, (*rectum*, 'right,' and *facere*, 'to make.') An operation by which certain liquids are purified by distilling them, either singly or after admixture with other substances.

RECTI'TIS, (*rectum*, and *itis*,) properly *architis* or *proctitis*. Inflammation of the rectum. *Proctal'gia inflammato'ria*.

REC'TO, in composition, relating or belonging to the rectum.

RECTOCELE, (*recto*, and κηλη, 'rupture,') Cystocele.

RECTOSTENOSIS, (*recto*, and στενος, 'contracted,') Stricture of the rectum.

RECTOÜ'TERINE, *Rectoüteri'nus*, (*recto*, and *uterus*.) Appertaining, or relating, to the rectum and uterus.

RECTOÜTERINE CUL-DE-SAC, see Uterus — r. Folds, see Uterus — r. Pouch, see Uterus.

RECTOVAG''INAL, (*recto*, and *vagina*,) *Rectovagina'lis*. That which relates or belongs to the rectum and vagina.

RECTOVAGINAL CUL-DE-SAC or POUCH is formed by the reflection of the peritoneum from the upper third of the vagina to the rectum.

RECTOVAGINAL FIS'TULA is owing to a preternatural communication between the rectum and vagina through the above septum.

RECTOVAGINAL SEP'TUM, (F.) *Cloison rectovaginale*, is formed by the junction—back to back —(or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

RECTOVES'ICAL, (*recto*, and *vesica*, 'the bladder,') *Rectovesica'lis*. Having relation to the rectum and bladder; as the '*rectovesical fold* or *pouch* or *cul-de-sac*' of the peritoneum, between the rectum and bladder. See Urinary Bladder.

REC'TUM, from *rectus*, 'straight,' so called from a notion that it is straight, which it is not. *Intesti'num Rec'tum*, *Apenthys'menos*, *Euthyen'teron*, *Lon'gaon*, *Lon'gas*, *Lon'ganon*, *Ar'chos*, *Cyssaros*, *Prin'ceps*, *Monoco'lon* [?], *Bumgut*, (Prov.) *Jotgut*. The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus*. It is cylindrical, but *saccated*, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum. Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Col'umnæ*, *Colum'næ car'neæ of the Rec'tum* or *of Morgagni*, (F.) *Colonnes du rectum* ou *de Morgagni*. They are merely folds of the mucous membrane, between which is a number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal*. The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fæcal matters, as they pass from the colon, which serves as a reservoir for them.

REC'TUS, 'straight.' (F.) *Droit*. A term, used in anatomy for parts that pursue a straight course; — as

RECTUS ABDOM'INIS, (F.) *Pubio-sternal*, *Sterno-pubien* (Ch.), *Droit de l'abdomen*. A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the linea alba. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the fascia transversalis. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic intersections. It bends the chest on the pelvis, and conversely.

RECTUS ANTERIOR BREVIS, Rectus capitis internus minor — r. Anterior longus, R. capitis internus major — r. Capitis anticus longus, R. c. internus major.

RECTUS CAPITIS INTERNUS MA'JOR, *R. inter'nus ma'jor* seu *ante'rior lon'gus* seu *cap'itis anti'cus lon'gus*, (F.) *Trachélo-basilaire*, *Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth, flat, and broader above than below. It is situate at the anterior and lateral

part of the neck, and arises from the transverse processes of the third, fourth, fifth, and sixth cervical vertebræ. It is inserted into the basilary process of the occipital bone.

Rectus Cap'itis Inter'nus Mi'nor, *R. inter'nus mi'nor* seu *ante'rior bre'vis, Ren'uens, An'nuens*, (F.) *Petit trachélo-basilaire, Petit droit antérieur de la tête.* This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basilary process.

Rectus Cap'itis Latera'lis, *R. latera'lis* seu *latera'lis Fallo'pii, Transversa'lis anti'cus pri'mus*, (F.) *Trachélo-atloïdo-basilaire, Atloïdo-sous-occipital* (Ch.), *Droit latéral de la tête.* There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

Rectus Cap'itis Posti'cus Ma'jor, *R. Ma'jor Cap'itis posti'cus mi'nor* (Albinus), *Spini'axoïdo-occipita'lis*, (F.) *Axoïdo-occipitale* (Ch.), *Grand droit postérieur de la tête.* A flat, triangular muscle, situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head, inclines it to one side, and causes it to experience a rotary motion, which directs the face to its side.

Rectus Cap'itis Posti'cus Mi'nor, *R. mi'nor*, (F.) *Tuber-atloïdo-occipital, Atloïdo-occipital* (Ch.), *Petit droit postérieur de la tête.* A flat, triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

Rectus Capitis Posticus Minor, R. c. p. major — r. Cruris, R. femoris.

Rectus Exter'nus Oc'uli, *Abduc'tor oc'uli, Indignabun'dus, Indignato'rius, Iracun'dus, Oc'ulum mo'vens secun'dus*, (F.) *Droit externe, Irascible* ou *Abducteur, Orbito-extus-sclératicien.* All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus* is divided, at its posterior extremity, into two portions, one of which is attached to the outer part of the foramen opticum, and the other to the sphenoid bone.

Rectus Fem'oris, *Rec'tus* seu *Grac''ilis ante'rior* seu *cru'ris*, (F.) *Ilio-rotulien, Droit antérieur de la cuisse.* A straight muscle, seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

Rectus Inferior Femoris, Gracilis.

Rectus Infe'rior Oc'uli, *Depres'sor oculi, Tim'idus, Dep'rimens, Hu'milis, Oc'ulum mo'vens quar'tus*, (F.) *Sous-optico-sphéno-sclératicien, Droit inférieur* ou *abaisseur de l'œil, Muscle humble*, arises below the optic foramen from the sphenoid bone. It depresses the eye.

Rectus Internus Major, R. capitis internus major — r. Internus minor, R. capitis internus minor.

Rectus Internus Oc'uli, *Addu'cens* seu *Adduc'tor oc'uli, Bibito'rius, Oc'uli ad'ductor, Oc'ulum mo'vens pri'mus*,(F.) *Orbito-intus-sclératicien, Droit interne de l'œil* ou *adducteur* ou *buveur.* It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

Rectus Lateralis, R. capitis lateralis—r. Lateralis Fallopii, R. capitis lateralis — r. Major, R. capitis posticus major—r. Minor, R. capitis posticus minor.

Rectus Supe'rior Oc'uli, *Attol'lens oc'uli* seu *oc'ulum, Leva'tor* seu *Eleva'tor oc'uli, Super'bus, Oc'ulum mo'vens ter'tius*, (F.) *Superbe, Sus-optico-sphéno-sclératicien, Droit supérieur* ou *Élévateur de l'œil, Dédaigneux*, is attached to the circumference of the foramen opticum.

All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary.

RECUBITORIUM, (*recumbere, recubitum*, 'to recline,') Anaclinterium.

RECUPERATIO, Restauratio.

RECUPERA'TION, (from *recuperare, recuperatum*, 'to recover,') Restauratio.

RECU'PERATIVE, *Recu'peratory.* Restorative. Recovering. Belonging to recovery.

RECUR'RENT, *Recur'rens*, (from *recurrere*, (*re*, and *currere*), 'to run back.') A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanate; also, to a disease that relapses.

Recurrent Ar'teries. This name has been given to several arteries of the forearm, and to one of the leg. In the *forearm*, there are, 1. The *Ra'dial recur'rent, Artère récurrente de l'épicondyle* (Ch.), which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *ante'rior cu'bital recur'rent, A. récurrente de l'épitrochlée* (Ch.), which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *poste'rior cu'bital recur'rent*, which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *poste'rior ra'dial recur'rent, A. récurrente olécranienne* (Ch.). It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles. In *the leg*, the *Ar'teria recur'rens tibia'lis, A. récurrente du genou* (Ch.), is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

Recurrent Bandages are formed by convolutions of bandages, which make a kind of cap for the part—as the head—to which they are applied.

Recurrent Fever, see Relapse.

RECURVATIO, (*re*, and *curvus*, 'crooked,') see Hump.

RECUTITUS, (*re*, 'back,' and *cutis*, 'skin,') Apella.

REDBEAN, Abrus precatorius.

REDBERRY, Arbutus uva ursi, Gaultheria, Panax quinquefolium — r. Bitter, Cornus Florida — r. Swamp, Vaccinium oxycoccos.

REDGOWN, see Strophulus.

REDGUM, see Strophulus.

RED HEAD, Asclepias Curassavica.

REDMAILKES, Papaver rhœas.

REDROD, Cornus sericea.

RED ROOT, Celastrus, Lachnanthes tinctoria, Sanguinaria Canadensis.

REDSHANKS, Polygonum persicaria.

RED WATER TREE, see Sassy Bark.

RED WEED, Phytolacca decandra.

REDIBIA, Paronychia.

REDIMICULUM, ('a chaplet,') Diadema.

REDINGOTES ANGLAISES, 'English riding coats, frock coats,' see Condom.

REDINTEGRATIO, (*re*, and *integer*, 'entire,') Regeneration, Restauratio.

RÉDONDANCE, (*re*, and *unda*, 'a wave,') Plethora.

REDOUBLEMENT, (*re*, and *doubler*, 'to double,') Exacerbation, Paroxysm.

REDRESSEUR UTÉRIN, (*re*, and *dresser*, 'to make straight,') Pessary, intrauterine.

REDS, (from the colour,) Menses.

REDUCTIO, (*reducere, reductum,* (*re.* and *ducere, ductum,* 'to lead,') 'to bring back,') Reduction, Taxis—r. Præputii impedita, Phimosis.

REDUC'TION, *Reduc'tio, Reposit''io, Restitu'tio, Diap'lasis, Diaplas'mus, Syntax'is.* A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction or *setting* of a fracture, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis.*

In pharmacy, the process of restoring oxides, chlorides, sulphurets, &c., to the metallic state.

REDUNDANTIA, (*re,* and *unda,* 'a wave,') Plethora.

REDUVIA, Paronychia.

REED MACE, Typha latifolia.

REFECTIO, (*reficere, refectum,* 'to restore,' from *re,* and *facere,* 'to make,') Restauratio.

REFECTIVA, Analeptica.

REFECTUS, Restauratio.

REFICIENTIA, Analeptica.

RÉFLECTIF, Reflex.

REFLECTION, (*re,* and *flexere, flexum,* 'to bend,') *Reflex'io,* (F.) *Reflexion.* A bending or turning back. Duplicature. The act of turning the mind back on its actions; so as to constitute contemplation, deliberation.

REFLEC'TOR EPIGLOT'TIDIS. A muscle, which arises from the arytenoid cartilage and inner part of the thyroid, and is inserted into the lateral edges of the epiglottis.

RE'FLEX, *Reflex'us,* (F.) *Réflexe, Réflectif,* (same etymon as *Reflection.*) A term applied to an action, which consists in the reflection by an efferent nerve of an impression conveyed to a nervous centre by an afferent nerve; hence reflex movement, reflex paralysis, reflex epilepsy, &c.

A *reflex action* is generally regarded to be one executed without consciousness; like the 'reflex or excito-motory movements' of Dr. Marshall Hall.

REFLEX MOVEMENTS, see Motion—r. System of nerves, see Excitomotory, and Nerves.

REFLEXIO, Reflection—r. Palpebrarum, Ectropion.

RÉFLEXION, Reflection.

RÉFORME, Invaliding.

REFRAC'TION, *Refrac'tio, Photocamp'sis, Dia'clasis,* (*re,* and *frangere, fractum,* 'to break.') The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

RÉFRIGÉRANT, see Alembic.

REFRIG''ERANTS, *Refrigeran'tia, Psyc'tica, Antither'ma, Frigefacien'tia,* (F.) *Rafraîchissants, Réfrigératifs, Desaltérants,* (*re,* and *frigere,* 'to cool.') Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the Potassæ Nitras [?], the Sodæ Boras [?], but chiefly the abstraction of caloric by ice and icedrinks, cold water, cold lemonades, sodawater, and effervescing draughts internally; and externally, cool air, cold water, evaporating lotions, and frigorific mixtures.

RÉFRIGÉRATIFS, Refrigerants.

REFRIGERATOR, see Alembic.

REGENERATIO, (*re,* and *generare, generatum,* 'to beget,') Regeneration, Reproduction.

REGENERA'TION, *Regenera'tio, Palingen'esis, Palingene'sia, Redintegra'tio.* Reproduction of a part of the body, which has been destroyed.

REG''IMEN, gen. *Regim'inis,* (F.) *Régime,* (*regere,* 'to govern.') The rational and methodical use of food, and of everything essential to life; both in a state of health and disease. It is often restricted, in its meaning, to *Diet.* It is sometimes used synonymously with hygiene.

Régime Sanitaire and *Système Sanitaire,* mean the measures and regulations adopted to prevent the development and propagation of diseases reputed to be pestilential,—especially plague, yellow fever, and cholera.

REGIM'INAL, *Regimina'lis,* (from *regimen,* gen. *regim'inis.*) Relating or appertaining to regimen,—as '*reginiinal* treatment,' or treatment by regimen.

REGINA PRATI, 'queen of the meadow,' Spiræa ulmaria.

REGIO, Region.

Regio Auricula'ris. The region of the ear.

Regio Bucca'lis. The region of the cheek.

Regio Cardi'aca, Epigastric region.

Regio Cervica'lis. The region of the neck. The cervical region.

Regio Epigastrica, Epigastrium.

Regio Facia'lis. The facial region.

Regio Fronta'lis. The frontal region.

Regio Gastrica, Umbilical region—r. Hypochondriaca, Hypochondre—r. Hypogastrica, see Hypogastrium—r. Iliaca, Iliac region—r. Inguinalis, Inguinal region—r. Ischiadica, Ischiadic region—r. Jugalis, Jugal region—r. Lumbalis, Lumbi—r. Mentalis, Mental region—r. Mesogastrica, Umbilical region—r. Nasalis, Nasal region—r. Nuchæ, Nuchal region—r. Nuchalis, Nuchal region—r. Occipitalis, Occiput—r. Occipitalis inferior, Nucbal region—r. Perinæi, Perinæum—r. Præcordiaca, Præcordial region—r. Pubis, Pubic region—r. Stomachalis, Epigastric region—r. Stomachica, Epigastric region—r. Temporalis, Temple—r. Umbilicalis, Umbilical region.

RE'GION, *Re'gio,* (*regere,* 'to direct.') Anatomists have called *regions* determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

RÉGION OMBILICALE, Umbilical region.

REGIONAL ANATOMY, see Anatomy.

RÈGLES, (from *regula,* 'a rule,') Menses—*r. Déviés,* Menstruation, vicarious—*r. Difficiles,* Dysmenorrhœa.

RÉGLISSE, Glycyrrhiza.

RÈGNE ANIMAL, (from *regnum,* 'a kingdom,') see Animal.

REG'ULAR, *Regula'ris,* (F.) *Régulier,* (from *regula,* (*regere,* 'to govern,') 'a rule.') According to rule. Applied to the types of a disease, and to the pulse, when according to rule.

Regular Practit''ioner. One who practises his profession according to the rules established by law or professional custom.

REG'ULUS, (dim. of *rex,* gen. *regis,* 'a king.') A pure metal. One reduced from its ore.

Regulus Antimonii, Antimonium.

REGURGITA'TION, *Regurgita'tio,* (*re,* and *gurges,* gen. *gur'gitis,* 'a gulf.') The act by which a canal or reservoir throws back substances accumulated in it. *Mitral regurgitation,* for example, means the reflux of blood through the left auriculoventricular opening, during the contraction of the left ventricle. Regurgitation is also applied to the *pu'king* or *poss'etting* of infants; and to the *rising* of solids or fluids into the mouth in the adult,—from *re,* and *gorge,* (*gurges*), 'the throat.' (F.) *Rapport.* What is called "vomiting at pleasure" is regurgitation.

The substances brought into the mouth by regurgitation, the French call *Renvois.*

REIF, (from Sax. hꝛeoꝼ,) Psora.

REIN, (from [L.] *ren,* gen. *renis,*) Kidney.

REINE DES PRÉS, 'queen of the meadows,' Spiræa ulmaria.

REINERZ, MIN'ERAL WA'TERS OF. Reinerz is a small town in Silesia, three German miles from Glatz. The waters are acidulous chalybeates. The principal springs are the tepid drinking spring, the cold spring, and three bathing springs.

REÏNFORCE'MENT, FASCIC'ULUS OF, *F. Cuneat'us.* A band of fibres from the *corpus innominatum* or lateral part of the anterolateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. This band has received the name owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which it seems to derive new fibres.

REINS, (from [L.] *ren,* pl. *renes,*) Kidneys, Lumbi.

REINS SUCCENTURIÉS ou *SUCCENTURIAUX,* Capsules, renal.

REJEC'TIO, *Anago'gē,* (*rejicere, rejectum,* (*re,* and *jacere,* 'to cast,') 'to cast back.') Every excretion by the mouth,—spitting, expectoration, regurgitation, or vomiting.

Rejectio Sanguinis e Pulmonibus, Hæmoptysis.

REJUVENES'CENCE, *Rejuvenescen'tia,* (*re,* and *juvenescens,* 'growing young:' [*juvenis,* 'a youth.']) A renewal of youth. The state of being young again. The assumption of the characteristics of youth by the aged.

RELÂCHANT, Relaxant.

RELÂCHEMENT, Relaxation.

RELAPSE', *Hypot'ropē, Epis'trophē, Hypost'trophē, Mor'bi Recidi'va, Hypotropias'mus,* (*re,* and *labor, lapsus,* 'to fall down.') The return of a disease during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive* (*Morbus recidi'vus*) for the return of a complaint, at a greater or less period after the complete recovery of health.

The terms *Relap'sing* or *Recur'rent fe'ver, Short fever, Five-day fever, Seven-day fever, Bil'ious Remit'tent fe'ver, Remitting Icter'ic fe'ver,* and *Mild Yel'low fe'ver, Typhus* seu *Febris recurrens,* (F.) *Fièvre à rechute,* have been given to a form of continued fever, which has occasionally appeared epidemically, as in Edinburgh, in 1843 and 1847, and was generally attended with icteric symptoms. The main phenomena disappeared at about the end of a week; but in many cases a relapse occurred about the end of a fortnight. Few died of the affection.

RELAPSING FEVER, see Relapse.

RELATIO, (*re,* and *ferre, latum,* 'to carry,') *Rapport.*

RELATION, FUNCTIONS OF, see Function.

RELAX'ANT, *Lax'ans, Malact'icum, Chalas'ticum, Paret'icum,* (F.) *Relâchant,* (*re,* and *laxare,* 'to loosen.') A medicine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATIO, Relaxation—r. Cordis et arteriarum, Diastole.

RELAXA'TION, *Relaxa'tio. Chala'sis, Chalas'mus,* (F.) *Relâchement.* In *Physiology,* relaxation is opposed to contraction. In *Pathology,* it means great looseness of a part.

RELÈVE PAUPIÈRE, ([L.] *re,* and *levare,* 'to raise.') An instrument for raising the eyelid.

RELEVEUR DE L'ANUS, Levator ani—*r. de la Lèvre inférieure,* Levator labii inferioris—*r. du Menton,* Levator labii inferioris—*r. de l'Omoplate,* Levator scapulæ—*r. de la Prostate,* Levator prostatæ—*r. de l'Urèthre,* Levator urethræ.

RELIG''IOUS DISEASES, (F.) *Maladies religieuses.* Diseases affecting the nervous system, and arising from the excitement of religious emotions. See *Convulsionnaire.*

RELIQUAT (F.), (from [L.] *relinquere, relictum,* 'to leave.') The *remnant* or remains of a disease.

REMAK FIBRES, (after Remak, the German physiologist,) see Fibres, Remak.

REMANSIO MENSIUM, (*re,* and *maneo, mansum,* 'to stay,') Amenorrhœa.

REMÈDE, ([L.] *remedium,*) Clyster, Medicament—*r. du Capuchin,* Liquor hydrargyri nitrici—*r. du Duc d'Antin,* Liquor hydrargyri nitrici—*r. de Durande,* Liquor anodynus terebinthinatus.

REMEDIAL, Medicinal.

REMEDIATE, Medicinal.

REMEDILESS, Incurable.

REMEDIUM, (*re,* and *mederi,* 'to heal,') Juvans, Medicament—r. Dentifricium, Dentifrice.

REMEDY, Medicament—r. English, Cinchona.

REMETIC, Medicament.

REMISSIO, (*re,* and *mittere, missum,* 'to send,') Decline, Remission—r. Cordis et Arteriarum, Diastole—r. Morbi, Remission—r. Virium, Atony.

REMIS'SION, *Remis'sio, Epan'esis, An'esis, Submis'sio, Aph'esis, Eu'dosis, Meio'sis.* In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic, *Remis'sio mor'bi.* Diminution in the febrile symptoms, such as occurs in a remittent fever between the exacerbations.

REMITTENS, Remittent- r. Icterodes, Fever, yellow.

REMIT'TENT, *Remit'tens, Remit'ting.* Any disease which presents *remissions.*

Remittent of Children, Fever, infantile, remittent.

Remittent Fe'ver, *Fe'bris remit'tens, Epan'etus, Exac''erbating, paroxys'mal, subcontin'ual, endem'ic, endem'ial* or *endem'ical fever,* (F.) *Fièvre rémittente,* is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent—*Epan'etus mi'tis,* (F.) *Fièvre rémittente simple.*

Remittent Fever, Bilious, Remittent fever, see Relapse.

Remitting Icteric Fever, see Relapse.

REM'ORA, (*re,* and *mora,* 'delay.') Stoppage, stagnation.—as of blood. Also, the name of two surgical instruments, intended to retain parts *in situ.* The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring: the other, called *Remora Hilda'ni,* (F.) *Arrêt d'Hildan, Echene'is,* was employed to maintain fractures and luxations reduced. It is not now used.

Remora Aratri, Ononis spinosa—r. Hildani, see Remora.

REN, Kidney.

RE'NAL, *Rena'lis,* (from *ren.*) That which relates to the kidney.

Renal Alteratives, see Alteratives.

Renal Ar'teries, *Emulg''ent ar'teries,* are very large and short, and commonly two in number—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short

course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

RENAL CAPSULE, Capsule, renal—r. Nerve, see Splanchnic nerves.

RENAL PLEX'USES, *Emulg''ent Plex'uses.* These are two:—one on each side. They proceed from fasciculi of the solar and cœliac plexuses; from the outer side of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

RENAL VEINS, *Emulg''ent Veins.* These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

RENCHUS, (*βεγχος,*) Snoring, Stertor.

REN'CULUS, *Renic'ulus, Ren'ulus,* (dim. of *ren.*) A small kidney. A lobe of the kidney.

RENDERING, (as lard,) see Adeps præparatus.

RENDLES, Rennet.

RENEAL'MIA EXALTA'TA, (after P. and M. L. Rénéaulme, botanical writers of France,) *Alpin'ia exalta'ta* seu *tubula'ta,* (F.) *Rénéaulme.* A plant of British Guiana, which is possessed of diaphoretic and diuretic properties; and, in large doses, is emetic. It is much used there in dropsy, rheumatism, dysentery, &c. The bruised rhizoma is the part employed.

RENES SUCCENTURIATI, (*succenturio,* 'a subcenturion,') Capsules, renal.

RENICULUS, (dim. of *ren,*) Renculus.

RENIFORM, (*ren,* and *forma,* 'shape,') Nephroid.

RENNES, MIN'ERAL WA'TERS OF. Thermal salines in the department of Aube, France, containing carbonic acid and chloride of magnesium. Temperature, 103° to 121° of Fah. Season, from the 1st of May to October.

REN'NET, *Run'net, Coäg'ulum, Py'tia, Pyet'ia,* (from [G.] gerinnen, 'to coagulate' [?],) (F.) *Présure, Caille-lait.* When the fourth stomach or *Abomasus* of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion—*Ren'net, Ren'dles, Ron'ning,* (Prov.) *Heslop, Cheeselope, Yernin, Earn'ing, Preaser, Read, Run'ning, Steep*—is added to milk. *Liquid rennet* or *Rennet wine* may be made, according to Mr. Wm. Procter, Jr., of fresh *rennets,* (about three,) ℥xxiv; *chloride of sodium,* three troyounces; *alcohol,* f℥vj; *white wine,* f℥xvj; *water,* q. s.) A tablespoonful of this solution coagulates a quart of milk to a firm curd.

RENNET WHEY, see Serum lactis.

RENONCULE, Ranuneulus—*r. Bulbeuse,* Ranunculus bulbosus.

RENOUÉE, (*re,* and *nouer,* 'to knot,') Polygonum aviculare—*r. Âcre,* Polygonum hydropiper.

RENOUEUR, (F.) *Rebouteur, Rhabilleur,* (*re,* and *nouer,* (*nodus,* 'a knot,') 'to tie or knot.') A *bonedoctor:*—a *bonesetter.* One who makes a *trade* of reducing fractures and dislocations.

RENOVATIO, (*re,* and *novare, novatum,* 'to make new,') Ananeosis.

RENSSELAERIA VIRGINICA, (after General Van Rensselaer, of Albany,) Peltandra Virginica.

RENUENS, (*renuo,* 'to deny by a motion of the head,') Rectus capitis internus minor.

RENULUS, (dim. of *ren,*) Renculus.

RENUM ATONIA, 'atony of the kidneys,' Nephratonia—r. Paralysis, Nephratonia.

RENUNCIATIO, (*re,* and *nunciare, nunciatum,* 'to tell,') *Rapport.*

RENVERSEMENT DE LA LANGUE, (*re,* and *vertere, versum,* 'to turn,') Paraglossa—*r. de la Matrice,* Uterus, inversion of the—*r. des Paupières,* Ectropion—*r. du Rectum,* Proctocele—*r. de la Vessie,* Exocyste, Exstrophia of the bladder.

RENVOIS, (*re,* and *envoyer,* 'to send,') see Regurgitation.

RÉOPHORE, (*ῥοη,* 'a current,' and *φερω,* 'to carry,') Electrode.

REPANDATIO, (*repandus,* (*re,* and *pandere,* 'to spread,') 'spread backwards,') Lordosis.

REPARATION, (*re,* and *parare, paratum,* 'to set in order,') Restauratio.

REPAR'ATIVE, *Repar'atory.* Having the power of restoring or repairing.

REPELLENTIA, Repellents.

REPEL'LENTS, *Repellen'tia, Repercutien'tia, Apocrus'tica, Stal'tica, Repercus'sives,* (F.) *Répercussifs,* (*re,* and *pellere,* 'to drive.') Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

RÉPERCUSSIFS, (*re,* and *percutio, percussum,* (*per,* and *quatere,* 'to shake or batter,') 'I strike back.') Repellents.

REPERCUSSIO, Contra-fissura, Repercussion.

REPERCUS'SION, *Repercus'sio, Anac'lasis.* Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence, Delitescen'tia,* for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect delitescence differs from metastasis. *Délitescence* of an inflammation or 'sudden disappearance' is distinguished by certain French pathologists from *Resolution.* Repercussion also means *Ballottement.*

REPERCUSSIVES, Repellents.

REPERCUTIENTIA, Repellents.

REPLETIO, (*re,* 'again,' and *pleo,* 'to fill,') Fulness, Plethora.

REPLI LONGITUDINAL DE LA MÉNINGE, (*repli,* 'a fold,' from [L.] *re, and plicare,* 'to fold,') Falx cerebri.

REPOSITIO, (*re,* and *ponere, positum,* 'to place,') Anaplasis, Reduction, Taxis.

REPOUSSOIR, (*re,* and *pellere, pulsum,* 'to drive,') Punch—*r. d'Arêtes,* Probang.

REPRIMENS, (*re,* and *premere,* 'to press,') Epischeticus.

REPRODUC'TION, *Reproduc'tio, Regenera'tio,* (*re,* and *producere, productum,* (*pro,* and *ducere,* 'to lead,') 'to bring forth.') The function by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous; and the smaller, which are more exposed to destruction, multiparous.

REPRODUCTION MÉRISMATIQUE, see Generation.

REPRODUCTIV'ITAS, (F.) *Reproductivité,* Capability of reproducing.

REPULSORIUM, (*re,* and *pellere, pulsum,* 'to drive,') Punch.

REPURGA'TIO, *Anacathar'sis,* (*re,* and *purgare, purgatum,* 'to cleanse.') According to Castelli, purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgan'tia.*

REQUIES, gen. *Requie'tis,* (*re,* and *quies,* 'rest,') Acinesia.

REQUIETIO, (*re*, and *quiescere*, *quietum*, 'to become at rest,') Acinesia.

RES CON'TRA NATU'RAM, ('Things against nature,') (F.) *Choses contre-nature*, are those things which tend to destroy man;—as disease, and every thing connected with it.

Res Culinaria, Culinary art—r. Medica, Medicina.

Res Natura'les, 'natural things,' (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

Res non Natura'les, 'things not natural,' (?) (F.) *Choses non-naturelles*. Those things which, anciently, formed the matter of hygiene. See Nonnaturals.

Res Venerea, Coition—r. Vestiaria, Vestitus.

RESCISION, (*re*, and *scindere*, *scissum*, 'to cut asunder,') see Amputation.

RÉSEAU, (from *reticellum*, dim. of *rete*, 'a net,') Rete, Reticulum—*r. Admirable*, Rete mirabile—*r. Intermédiare*, see Corpus spongiosum urethræ—*r. Merveilleux*, Rete mirabile.

RESECTIO, Resection—r. Articulorum, see Resection.

RESEC'TION, *Resec'tio*, (*resecare*, *resectum*, (*re*, and *secare*,) 'to cut off.') Act of cutting or paring off. A name, given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw.—*Resec'tio articulo'rum*, *Decapita'tio articulo'rum*.

RESEDA CRISPATA, (from *resedo*, (*re*, and *sedare*, 'to settle,') 'to calm or assuage,') R. Luteola—r. Lanceolata, R. Luteola.

Rese'da Lute'ola, *R. lanceola'ta* seu *crispa'ta*, *Lute'ola*, *Weld*, *Dy'er's Weed*. A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

RESERANS, (from *resero*, 'to open,') Aperient.

RESERVE AIR, see Respiration.

RÉSERVOIR DE LA BILE, ([L.] *re*, and *servare*, 'to keep,') Gallbladder—*r. du Chyle*, Receptaculum chyli—*r. des Larmes*, Lachrymal sac—r. of Pecquet, Receptaculum chyli—*r. de Pecquet*, Receptaculum chyli—r. of the Thymus, see Thymus.

RESIDENTIA, (*resido*, 'to settle or sink down,') Sediment.

RESIDUAL AIR, see Respiration.

RESIMUS, 'turned up, bent back,' Camus.

RES'IN, *Resi'na*, *Rheti'nē*, (F.) *Résine*, (from *ῥεω*, 'to flow.') A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons. See Pinus sylvestris.

Resin, Acaroid, see Xanthorrhœa—r. Botany Bay, see Xanthorrhœa—r. Cayenne, Caoutchouc—r. of New Holland, see Xanthorrhœa—r. of the Spruce fir, see Pinus abies—r. of Jalap, Extractum Jalapæ resinosum—r. of Mayapple, Resina Podophylli—r. of Xanthorrhœa, see Xanthorrhœa.

RESINA, Resin, see Pinus sylvestris—r. Abietis, see Pinus abies, Pinus picea—r. Abietis humida, see Pinus abies—r. Abietis sicca, see Pinus abies—r. Acaroides, see Xanthorrhœa—r. Alba, see Pinus sylvestris—r. Alba humida, see Pinus Abies—r. Benzoes, Benjamin—r. Cayennensis, Caoutchouc—r. Copal, Copal—r. Elastica, Caoutchouc—r. Flava, see Pinus sylvestris—r. Fluida Canadensis, see Pinus balsamea—r. Jalapæ, Extractum jalapæ resinosum—r. Juniperi, Sandarac—r. Laricis, see Pinus larix—r. Lentiscina, see Pistachia lentiscus—r. Liquida pini balsameæ, see Pinus balsamea—r. Liquida pini laricis, see Pinus larix—r. Lutea Novi Belgii, see Xanthorrhœa—r. Nigra, Colophonia—r. Pini, see Pinus sylvestris—r. Pini empyreumatica liquida, see Pinus sylvestris—r. Pini abietis sponte concreta, see Pinus abies.

Resina Podophyl'li, *Resin of May Apple*, (Ph. U. S. 1863,) *Podophyl'lin*. (Prepared from the powdered rhizoma of Podophyllum in the same manner as the Resina Jalapæ from Jalap root.) See Podophyllum peltatum. Dose, gr. j or gr. ij.

Resina Scammonii, Extractum scammonii.

Resina Strobil na, see Pinus balsamea, and Pinus mughos—r. Terebinthi, see Pistacia terebinthus.

RESINA'TUM, *Rhetini'tes*. Wine impregnated with resin, used by the ancients as a stomachic.

RÉSINE, Resin—*r. de Cayenne*, Caoutchouc—*r. Élastique*, Caoutchouc—*r. de Gaïac*, see Guaiacum—*r. Gomart*, see Bursera gummifera—*r. de Lierre*, see Hedera helix.

RÉSINÉINE, *Résinone*, *Résinéone*, (from *resin.*) A solid or liquid product obtained by the distillation of rosin and lime or an alkali.

RESINOCE'RUM, *Rhetinoce'ron*, (*ῥητινη*, 'resin,' and *κηρος*, 'wax.') A mixture of resin and wax.

RÉSINONE, *Résinéine*.

RESINO'SA, in Pharmacy, resinous substances.

RÉSOLUTIFS, (*resolvere*, (*re*, and *solvere*, *solutum*,) 'to loosen.') Discutients.

RESOLUTIO, Resolution—r. et Diabrosis Ventriculi, Gastromalacia—r Membrorum, Paralysis.

Resolutio Mor'bi. The resolution or disappearance of a disease; especially when without any critical evacuation.

Resolutio Nervorum, Paralysis—r. Ventriculi autopeptica, Gastromalacia—r. Virium, Dialysis.

RESOLU'TION, *Resolu'tio*, *Discus'sio*. Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition. Also, looseness, weakness.

RÉSOLUTION DES MEMBRES, Paralysis.

RESOLVENTIA, (from *resolvere*, 'to loosen, to dissipate,') Discutients.

RES'ONANCE, (F.) *Retentissement*, *Résonnance*, *Résonnement*, (*re*, and *sono*, "I sound;") a return of sound; a resounding; a reverberation of sounds. A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health,—as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchoph'ony*, (*bronchus*, and *φωνη*, 'voice;') (F.) *Voix bronchique*, *Voix tubaire*, *V. bourdonnante*.

Resonance is also used in the sense of resounding; as when the chest is said to be resonant on percussion.

Resonance, Vesic'ulotympanit'ic, see Vesiculotympanitis—r. Vibrations of, see Sound.

RES'ONANT, *Res'onans*, *Res'onus*, (F.) *Retentissant*, *Résonnant*. Resounding. See Resonance.

RESONITUS, Contrafissura.

RÉSONNANCE, Resonance.

RÉSONNEMENT, Resonance.

RESORBENS, (*re*, and *sorbere*, *sorptum*, 'to suck up.') Absorbent.

RESORPTIO, Absorption, Resorption — r. Cutanea, see Absorption—r. Cutis, see Absorption.

RESORP'TION, *Resorp'tio*. Absorption of a fluid which has been previously deposited in a part, as of pus, blood, serum, &c.

RES'PIRABLE, *Respirab'ilis*, (*respiratio*, and *habilis*, 'fit.') Capable of being breathed. Adapted for respiration.

RESPIRAMEN, (*respiro*, (*re*, and *spiro*, 'I take breath,') Respiration.

RESPIRAMENTUM, Respiration.

RESPIRATEUR, Respirator, Respiratory.

RESPIRATIO, Respiration — r. Abolita, Apnœa—r. Brevis, Dyspnœa—r. Difficilis, Dyspnœa—r. Stertens, Stertor—r. Sterterosa, see Stertor—r. Stertuosa, Stertor.

RESPIRA'TION, *Respira'tio*, *Anap'noē*, *Anapneu'sis*, *Pneu'sis spira'tio*, *Respira'men*, *Respiramen't'um*, *Respira'tus*, *Respir'itus*, *Spir'itus*. A function proper to animals, the object of which is, to place the materials of the blood — the mixture of the venous blood with lymph and chyle — in contact with atmospheric air, in order that it may acquire the vivifying qualities which belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the *lungs*. In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* and *Expiration*. The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and the disengagement of a quantity of water in the state of vapour. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

The air of respiration has been divided into *first*, the *residual air*, or that which cannot be expelled from the lungs, but remains after a full and forcible expiration, estimated at 120 cubic inches: *secondly*, the *supplementary* or *reserve* air, or that which can be expelled by a forcible expiration, after an ordinary outbreathing, valued at 130 cubic inches: *thirdly*, the *breath*, *tidal* or *breathing* air, valued at 26 cubic inches: and *fourthly*, the *complementary* or *complemental* air, or that which can be inhaled after an ordinary inspiration, which amounts to 100 cubic inches. This estimate gives 250 cubic inches as the average volume of air which the chest contains after an ordinary expiration.

RESPIRATION BRONCHIQUE, see Murmur, respiratory.

RESPIRATION, BRONCHOVESIC'ULAR. A morbid modification of the respiratory murmur, having more or less of the characters of the bronchial and vesicular respiration combined.—(Flint.) It denotes incomplete solidification of the lung, as from the presence of tubercle.

RESPIRATION OF THE CELLS, Murmur, respiratory — r. Coggedwheel, Respiration, jerking — r. *Entrecoupée*, Respiration, jerking — r. *Empêchée*, Respiration, jerking—r. *Exagérée*, see puerile—r. *Hypervésiculaire*, see Puerile.

RESPIRATION, JERK'ING, *Coggedwheel*, or *Wavy respiration*, (F.) *R. Saccadée* ou *Entrecoupée* ou *Empêchée*. When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tuberculosis of the lung with corresponding pleuritic adhesion.

RESPIRATION, LUCTUEUSE, see *Luctueux*—r. Metallic, *Tintement métallique*—r. *Nulle*, see Murmur, respiratory.

RESPIRATION, POSTURAL, see Ready method—r. Prone, see Ready method.

RESPIRATION PROOF, Docimasia pulmonum.

RESPIRATION, PUÉRILE, see Puerile—*r. Râpeuse*, see Murmur, respiratory — *r. Rude*, see Murmur, respiratory—*r. Saccadée*, R. jerking—*r. Sileucieuse*, see Murmur, respiratory — *r. Soufflante*, Murmur, respiratory—*r. Supplémentaire*, see Puerile—r. Tubal, see Murmur, respiratory—r. Wavy, Respiration, jerking.

RESPIRATOIRE, Respiratory.

RESPIRA'TOR, (F.) *Respirateur*. Various instruments, under this name, have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue.

RESPIRATORIUM VENTRIS, Diaphragm.

RES'PIRATORY, *Respirato'rius*, (F.) *Respirateur*, *Respiratoire*. Appertaining to respiration. An epithet applied to the *murmur* heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

RESPIRATORY, EXTERNAL, NERVE, see Thoracic nerves.

RESPIRATORY GANGLIA, see Encephalon.

RESPIRATORY, INTERNAL, NERVES, Diaphragmatic Nerves—r. Nerve of the face, Facial Nerve—r. Nerve, Superior, Spinal Nerve.

RESPIRATORY PE'RIOD. The time from the commencement of one inspiration to the occurrence of the next. If this period be regarded as four seconds; a half second, it has been considered, may be occupied in health by inspiration; a half second in expiration, and two seconds in repose.

RESPIRATORY TRACT, *Trac'tus respirato'rius*. A middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

RESPIRATUS, Respiration.

RESPIRITUS, Respiration.

RESSERRANT, (*re*, and *serrer*, 'to lock up,') Constipating.

RESSERRÉ VENTRE, Constipation.

RESTA BOVIS, Ononis spinosa.

RESTAGNATIO, (*re*, and *stagnare*, *stagnatum*, 'to overflow,') Eructation.

RESTAURANS, Analeptic, Corroborant.

RESTAURA'TIO, *Refec'tio*, *Refec'tus*, *Analep'sis*, *Anatrep'sis*, *Anacom'idē*, *Anacte'sis*, *Apocatas'tasis*, *Recupera'tio*, (*restaurare*, *restauratum*, 'to repair.') Restoration of strength, after disease or great fatigue; *Epanortho'sis*, *Recrea'tio*, *Redintegra'tio*, *Restaura'tio virium*. Return of the organs to their normal condition. *Recov'ery*, *Recuperation*, *Repara'tion*.

RESTAURATIO VIRIUM, see Restauratio.

RESTHARROW, Ononis spinosa.

RES'TIFORM, *Restiform'is*, (*restis*, 'a rope,' and *forma*, 'shape.') Shaped like a rope, as the 'corpora *restiformia*,' restiform bodies.

RESTIFORMIS PROCESSUS, Coracoid.

RESTITUTIO, (*restituo*, *restitutum*, (*re*, and *statuo*, 'to set up,') 'to set up again,') Reduction — r. Organica, Morioplastice — r. Partium deperditarum, Morioplastice.

RESTLESSNESS, Agitation.

RESTORATION, Restauratio.

RESTORATIVE, Analeptic, Corroborant.

RESTRICTIO INTESTINI RECTI seu ANI, (*re*, and *stringere*, *strictum*, 'to tighten,') Stricture of the rectum.

RESUMPTI'VUS, *Resumpto'rius*, (*re* and *sumere*, *sumptum*, 'to take.') Causing to resume.

Resumpti'vum. Any agent calculated to restore flesh and strength to one who has been reduced.

RESUMPTORIUS. Resumptivus.

RESURRECTION MAN, Resurrectionist.

RESURREC'TIONIST, *Resurrec'tion man, Body snatcher,* (*re,* and *surgere, surrectum,* 'to arise.') An individual who violates the sanctuary of the grave to obtain subjects for dissection.

RESUSCITA'TION, *Resuscita'tio, (resuscita're,* (*re,* and *suscitare* [*sursum citare* seu *ciere*].) 'to move up,' 'to stir up anew.') *Revivifica'tion.* The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

RETCHING, ([Sax.] *præcan,* 'to retch,') Vomiturition.

RE'TE, 'a net,' *Dict'yon,* (F.) *Réseau.* A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves when they form a kind of network. Plexus.

Rete has also been applied to the *epiploon.*

Rete Majus, Epiploon, gastrocolic.

Rete Malpighii, Corpus mucosum.

Rete Mirab'ile, (F.) *Réseau admirable, R. merveilleux.* A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain.

Rete Mirabile seu Rete Vasculo'sum Malpig'hii is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

Rete Mucosum, Corpus mucosum.

Rete Tes'tis, *Re'te Vasculo'sum Tes'tis* seu *Halleri.* An irregular plexus or network, formed by the communication of the *Vasa recta, Tu'buli* seu *Duc'tuli recti, Tu'buli seminif'eri recti,* (F.) *Vaisseaux droits,* at the upper and back part of the testicle. These Vasa recta are sent out at the back part of the testicle, from the convoluted seminal tubes. The Rete Vasculosum Testis sends out from twelve to eighteen straight tubes, called *Vasa efferen'tia,* which convey the semen from the testis to the epididymus.

RETENTIO, Retention—r. Aerea, Dyspnœa—r. Alvina, Constipation—r. Bilis, Ischocholia.

Retentio Flux'us Hæmorrhoïda'lis. Suppression of the hæmorrhoidal flux.

Retentio Fœtûs, Dystocia—r. Lactis, Ischogalactia—r. Lochiorum, Ischiolochia—r. Mensium, see Amenorrhœa—r. Spermatis, Ischospermia—r. Sudoris, Hydroschesis.

RETEN'TION, *Reten'tio, Apolep'sia, Apolep'sis,* (*retinere, retentum,* (*re,* and *tenere,* 'to hold,) 'to hold back.') Accumulation of a solid or liquid substance in canals intended for its excretion, or in a reservoir intended to contain it for a short period.

Retention of U'rine, *Paru'ria Retentio'nis vesica'lis, Ischu'ria vesica'lis, Reten'tio Uri'næ,* (F.) *Rétention d'urine.* A disease in which the urine accumulated in the bladder cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete;* in the latter, *incomplete.* Many writers have distinguished three degrees of this affection, to which they have given the names *Dys'ury, Stran'gury,* and *Is'chury.* Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

RETENTISSANT, (*re,* and *tinnire,* 'to tinkle,' to ring,') Resonant.

RETENTISSEMENT, Resonance—*r. Autophonique,* see Autophonia.

RETIA UTERI, (pl. of rete.) see Uterus.

RETIC'ULAR, *Re'tiform, Reticula'ris, Ret'inus, Amphiblestroï'des, Dictoï'des, Retifor'mis,* (from *reticulum,*) (F.) *Réticulaire.* That which resembles a net. An epithet applied to many structures in the body.

Reticular Body, Corpus mucosum—r. Substance, Cellular tissue.

RETICULARIA OFFICINALIS, Lichen pulmonarius.

RETIC'ULUM, (dim. of *rete.*) The *Bonnet* or *Honeycomb bag* or *stomach,* (Sc.) *Kingshood,* (F.) *Bonnet, Réseau*—the second stomach of the ruminant animal. See also, Epiploon, and Rete.

Reticulum Cutaneum, Rete mucosum—r. Mucosum, Rete mucosum.

RETIFORM, (*rete,* and *forma,* 'shape,') Reticular.

RET'INA, (from *rete,*) *Tu'nica ret'ina* seu *reticula'ris* seu *retifor'mis* seu *in'tima* seu *ner'vea oc'uli, Involu'crum re'ti compara'tum, Verricula'ris membra'na, Amphiblestroï'des membra'na,* (F.) *Rétine.* A soft, pulpy, grayish, semitransparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It terminates by a defined edge—*mar'go denta'tus*—at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears to be formed of several laminæ; so joined together, that it is difficult to discriminate them. One—the inner—is medullary, and pulpy; another—the outer—is stronger, and fibrovascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

RETINACULA, see Retinaculum—r. Morgagnii, see Frœna of the valve of Bauhin.

RETINAC'ULUM, (*retinere,* (*re,* and *tenere,* 'to hold,') 'to hold back.') A surgical instrument, formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum. *Retinac'ula* are also band-like extensions of a cellulomembranous structure, which seem to suspend the ovum in the Follicle of De Graaf. They appear to correspond to the chalazæ of the egg of the bird. See also *Bride.*

Retinac'ulum Ten'dinum Peroneo'rum, *Vagi'na malleola'ris extern'a.* The ligamentous sheaths that retain in situ at the outer ankle the tendons of the peroneal muscles.

RET'INAL, *Retina'lis.* Relating or appertaining to the retina.

RÉTINE, Retina.

RETINI'TIS, *Inflamma'tio Ret'inæ, Amphiblestroidi'tis, Dictyi'tis,* (F.) *Rétinite,* (*retina* and *itis.*) Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia

RÉTINOÏDÉ, see *Rhétinolé.*

RÉTINOLÉ, see *Rhétinolé.*

RET'INOSCOPY, *Retinoscop'ia,* (*retina,* and σκοπεω, 'I view.') Examination of the retina.

RETINUS, (from *rete,*) Reticular.

RETOMBET, GROS, Passerina tartonraira.

RETORT', *Retor'ta, Ba'ua, Cor'nu, Cornu'tu, Cornes'ta, Cornumu'sa,* (F.) *Cornue,* (*retorqueo,* (*re,* and *torqueo, tortum.*) 'I bend back.') A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain,* or have a *tubulure* for admitting substances whilst the distillation is

going on. In the latter case, it is said to be *tu'bulated*, (F.) *Cornue tubulée.*

RETRAC'TION, *Retrac'tio*, (*retrahere*, (*re*, and *trahere*, *tractum*,) 'to draw back,') State of a part, when drawn towards the centre of the body or backwards:—as retraction of the testicles. Sometimes it is used synonymously with *shortening* or *drawing up*; as in *retraction* of the thigh.

RÉTRACTION DE LA MATRICE, Retroversio uteri.

RETRACTOR ANGULI ORIS, Buccinator.

RET'RAHENS AU'RIS, (from *retrahere*, 'to draw back,') *Poste'rior* seu *Tri'ceps Au'ris*, *Tricauda'lis*, *Ret'rahens Auric'ulæ* seu *Auric'ulam*, *Secun'dus proprio'rum Auric'ulæ*, *Bicauda'lis*, *Dep'rimens Auric'ulæ*, *Pro'prius Au'ris exter'nus*, (F.) *Mastoïdo-conchinien*, *Mastoïdo-oriculaire* (Ch.), *Auriculaire postérieur*. It consists of one or more small fasciculi, or fleshy, thin, somewhat irregular fibres, situated behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

RETRAIT VENTRICULAIRE, Heart, hypertrophy of the.

RÉTRÉCISSEMENT, (*re*, and *étrécir*, [old F.] *estrécir*, (from [L.] *stringere*, *strictum*,) 'to make narrow.') Arctatio, Stricture — *r. de l'Urèthre*, Urethrostenosis.

RETRIMENTA VESICÆ, Urine.

RETRIMENTUM, ('dregs,' from *re*, and *terere*, 'to cleanse as by rubbing.') Excrement.

RETRO (L.), in composition, behind, backwards.

RETROCES'SION, *Retroces'sio*, *Retroces'sus*, *Retrogres'sus*, (*retrocedere*, *retrocessum*, (*retro*, and *cedere*, 'to give place.') The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

RETROCESSUS, Retrocession.

RETROFLEXIO UTERI, (*retro*, and *flectere*, *flexum*, 'to bend,') see Retroversio uteri.

RETROGRESSUS, (*retro*, and *gradior*, *gressus*, 'to step,') Retrocession.

RETROPHARYNGE'AL, *Retropharynge'us*, (*retro*, and *pharynx*, gen. *pharyngis*, 'the pharynx.') Relating to parts behind the pharynx,—as '*retropharyngeal* abscess,—an abscess behind the pharynx.

RÉTROPULSION DE LA MATRICE, (*retro*, and *pellere*, *pulsum*, 'to drive,') Retroversio uteri.

RETROÜ'TERINE, *Retroüteri'nus*, (F.) *Rétro-utérin*, (*retro*, and *uterus*.) Behind the uterus, as *retroüterine abscess*, (F.) *Abcès rétro-utérin*;—an abscess seated behind the uterus.

RETROVACCINA'TION, (*retro*, and *vaccination*.) Vaccination with matter obtained from the cow, after inoculating the animal with vaccine matter from the human subject.

RETROVER'SIO U'TERI, (*retro*, and *vertere*, *versum*, 'to turn.') *Retrover'sion of the Uterus*, *Ædopto'sis Uteri retrover'sa*, *Anapod'isis* seu *Anapodis'mus Uteri*, (F.) *Rétroversion*, *Rétraction*, *Obliquité* ou *Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

A simple inclination, or bending of the uterus, backwards, is termed *Retroflex'ion of the Uterus*, *Retroflex'io Uteri*: not unfrequently, however, this is used synonymously with Retroversion of the Uterus.

RÉTROVERSION DE LA MATRICE, Retroversio uteri.

REUNIO, (*re*, and *unire*, 'to unite,') Synthesis —r. Partium separatarum, see Synthesis—r. per Primam intentionem, see Intention—r. per Secundam intentionem, see Intention — r. Vasorum, Anastomosis.

RÉUNION PRIMITIVE, see Intention — *r. Secondaire*, see Intention,

REVACCINATION, see Vaccina.

REVALENTA ARABICA, see Ervum.

RÊVASSERIE, (from *rêve*,) Incoherence; see Somnium.

RÊVE, Somnium.

RÉVEIL, (*re*, and *éveiller*, 'to awaken,') see Sleep—*r. en Sursaut*, see Sleep.

REVELLENT, (*re*, and *vellere*, 'to pluck,') Derivative.

RÊVERIE, Aphelxia.

REVERY, Aphelxia.

REVIVIFICATION, (*re*, *vivere*, 'to live,' and *facere*, 'to make,') Resuscitation.

RÉVULSIF, (*re*, and *vellere*, *vulsum*, 'to pluck,') Derivative.

REVUL'SION, *Revul'sio*, *Antis'pasis*. The act of turning the principle of a disease from the part in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose. See Derivation.

REVULSIVE, Derivative — r. Bleeding, see Bloodletting.

REVULSORIUS, Derivative.

REX AMARORUM, 'king of bitters,' Soulamen amara—r. Metallorum, Aurum.

REYNOLDS'S SPECIFIC, see Vinum colchici.

REZZLE, Wheeze.

RHA, (*ῥα*, and *ῥη*, called, however, after the Rha or Wolga in Pontus,) Rheum.

RHABARBARUM, (*ῥα*, and *βαρβαρος*, 'foreign,') Rheum — r. Album, Convolvulus mechoacan — r. Antiquorum, Rheum Rhaponticum—r. Dioscoridis, Rheum Rhaponticum — r. Monachorum, Rumex patientia — r. Nigrum, Convolvulus jalapa — r. Pauperum, Thalictron—r. Plebeiorum, see Rhamnus frangula — r. Sibericum, Rheum—r. Tartaricum, Rheum—r. Turcicum, Rheum.

RHABARBE, Rheum — *r. Blanche*, Convolvulus mechoacan — *r. Fausse*, Thalictron — *r. des Indes*, Convolvulus mechoacan — *r. des Moines*, Rumex Alpinus—*r. Sauvage*, Rumex patientia.

RHABDOIDES (SUTURA), (*ῥαβδοειδης*, from *ῥαβδος*, 'a rod or staff,' and *εἰδος*, 'resemblance,') Sagittal suture.

RHABILLEUR, (*re*, and *habiller*, 'to dress,') *Renoueur*.

RHACHETÆ, Rhachitæ.

RHACHI'ETRUM, (*ῥαχιτρον*, from *rhachis*.) The middle of the spine.

RHACHIÆI, Rhachitæ.

RHACHIAGRA, Rachisagra.

RHACHIALGIA, Rachialgia, Rhachiodynia, Spinal irritation.

RHACHIALGITIS, (*rhachis*, *αλγος*, 'pain,' and *itis*.) Spinal irritation, Myelitis.

RHACHIDAGRA, Rachisagra, Rachialgia, Rhachiodynia.

RHACHIOCYPHOSIS, Gibbositas, Hump.

RHACHIODYN'IA, (*rhachis*, and *οδυνη*, 'pain;') *Rhachial'gia*. Pain in the vertebral column.

RHACHIOMYELITIS, (*rhachis*, and *myelitis*,) Myelitis.

RHACHIOMYELOPHTHISIS, (*rhachis*, *μυελος*, 'marrow,' and *phthisis*,) Tabes dorsalis.

RHACHIOPARALYSIS, (*rhachis*, and *paralysis*.) Paraplegia.

RHACHIOPLEGIA, (*rhachis*, and *πληγη*, 'a stroke,') Paraplegia.

RHACHIOSCOLIOMA, (*rhachis*, and *scolioma*,) Scoliosis.

RHACHIOSCOLIOSIS, (*rhachis*, and *scoliosis*,) Scoliosis.

RHACHIOSTROPHO'SIS, (*rhachis*, and *στρεφω*, 'I turn;') *Contor'tio colum'næ vertebra'lis*. Deviation of the vertebral column.

RHACHIOT'OMUS, *Rhachiot'omum*, (*rhachis*, and *τομη*, 'incision.') An instrument for opening the vertebral column.

RHACHIPA'GIA, *Rachipa'gia*, (*rhachis*, and *παγω*, 'I fasten.') A monstrous union of two fœtuses, in which they are connected at the spine.

RHACHIPARALYSIS, (*rhachis*, and *paralysis*,) Paraplegia.

RHACHIPHYMA, Rachiphyma.

RHACHIRRHEUMA, gen. *Rhachirrheum'atis*, (*rhachis*, and *ρευμα*, 'a defluxion, rheumatism,') Lumbago.

RHACHIS, gen. *Rha'chidis*, (*ραχις*, gen. *ραχιδος*.) Vertebral column—r. Nasi, see Nasus.

RHACHISAGRA, Rachisagra.

RHACHI'TÆ, (from *rhachis*,) *Rhachiæ'i*, *Rachi'tæ*, *Rhache'tæ*, or *Rachiæ'i*. The muscles of the spine.

RHACHITES, Spinal; Medullaspinalis, (*ραχιτης μυελος*,) see also Rachitis, (*ραχιτης νοσος*).

RHACHITICUS, Rachiticus.

RHACHITIS, Rachitis—r. Adultorum, Mollities ossium—r. Spinalis, Rachisagra.

RHACHITISMUS, (from *rhachis*,) Rachitis.

RHACHOSIS, Rachosis.

RHA'CHUS, (*ραχος*,) *Rha'cus*, *Rha'gus*, (from *ραγω*, or *ρηγνυμι*, 'to break.') A wrinkle. A laceration of the skin. A lacerated ulcer—*ul'cus lac''erum*.

RHACUS, (*ραχος*,) Rhachus, Wrinkle.

RHÆBAUCHEN, (*ραιβος*, 'crooked,' and *αυχην*, 'neck,') Torticollis.

RHÆBOCRANIA, (*ραιβος*, 'crooked,' and *κρανον*, 'skull,') Torticollis.

RHÆBODERE, (*ραιβος*, 'crooked,' and *δερη*, 'neck,') Torticollis.

RHÆBOSCELIA, (*ραιβος*, 'crooked,' and *σκελος*, 'leg,') see Rhæbosis.

RHÆBO'SIS, (from *ραιβος*, 'crooked,' and *osis*.) Crookedness, as of the legs,—*Rhæbosceli'a*, *Scelocambo'sis*.

RHAG'ADES, (*ραγαδες*,) pl. of *rhagas*, (*ραγας*, gen. *ραγαδος*,) *Rhaga'dia*, (from *ραγω*, or *ρηγνυμι*, 'to break or rend,') *Scissu'ræ*, *Fissu'ræ*, *Fi'mæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES, see Fissure.

RHAGE, *Rhag''ia*, *Ra'gē*, (*ραγη*.) Suffixes denoting violent rupture or discharge, as in Hemorr*hage*, Menorr*hagia*, &c. Also, a fissure.

RHAGES, (from *ραξ*, gen. *ραγος*, 'a grape,') Uvæ passæ.

RHAGICUS, (*ραγικος*,) Rhagoides.

RHAGOIDEITIS, (*rhagoides* (*tunica*,) and *itis*, Uveitis.

RHAGOÏ'DES, *Rhago'des*, *Rhagoïdeus*, *Rha'gicus*, (*ραγοειδης*, from *ραξ*, gen. *ραγος*, 'a berry,' 'a grape.') Grape-like; as *Tunica Rhagoides*: the uvea. Also, the choroid coat of the eye.

RHAGUS, (*ραγος*,) Rhachus, Wrinkle.

RHAMNI BACCÆ, see Rhamnus—r. Succus, see Rhamnus.

RHAM'NUS, (*ραμνος*,) *R. cathar'ticus*, *Spi'na cervi'na* seu *domes'tica* seu *infecto'ria*, *Rham'nus soluti'vus*, *Cervispi'na*, *Buck'thorn*, *Purg''ing buck'thorn*, (F.) *Nerprun purgatif*, *Bourguépine*, *Épine de cerf*. *Family*, Rhamnaceæ. *Sex. Syst.* Pentandria Monogynia. The berries—*Rhamni Baccæ*—have a faint and disagreeable odour; and bitterish, nauseous taste. Their juice—*Rhamni Succus*—is cathartic, and apt to excite griping, which must be obviated by the use of diluents.

RHAMNUS ALATER'NUS, *R. Hispan'icus*, *Alater'nus latifo'lius*, *Com'mon alater'nus*, (F.) *Alaterne*. The leaves have been used as detergents and astringents, in the form of gargle especially.

RHAMNUS FRAN'GULA, *Black Al'der*, *Fran'gula Al'nus*, *Al'nus Ni'gra*, (F.) *Aune noir*, *Bourdane*, *Bourgène*. All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root, once called *Rhabar'barum plebeio'rum*, acts as a cathartic. It has also been employed as an anthelmintic.

RHAMNUS HISPANICUS, R. alaternus—r. Jujuba, see Jujube—r. Lotus, see Jujube—r. Ziziphus, see Jujube.

RHANTER, (*ραντηρ*, from *ραινω*, 'to besprinkle.') Canthus, (greater.)

RHAPHANEDON, Raphanedon.

RHAPHANIA, Raphania.

RHAPHANIS, Raphanus hortensis.

RHAPHANUS, Rapa, Raphanus hortensis.

RHAPHE, Raphe, Suture.

RHAPHIDAGOGUS, (*ραφις*, gen. *ραφιδος*, 'a needle,' and *αγω*, 'to lead.') *Porte-aiguille*.

RHAPHION, (*ραφιον*, dim. of *ραφις*,) Needle.

RHAPHIS, (*ραφις*,) Needle. Also, Rapa.

RHAPHOSYMPH'YSIS, (*ραφη*, 'suture,' and *συμφυσις*, 'union.') Union by suture,—as of the bones of the cranium.

RHAPHUS, (*ραφος*,) Rapa.

RHAPHYS, (*ραφυς*,) Rapa, Raphanus hortensis.

RHAPONTICUM, (*rha*, or rhubarb, of Pontus,) Rheum Rhaponticum—r. Vulgare, Centaurea centaurium.

RHAPONTIQUE, Rheum rhaponticum.

RHAPS, (*ραπυς*,) Raphanus hortensis.

RHAPYS, (*ραπυς*,) Raphanus hortensis.

RHATANIA, Krameria ratanhia.

RHAX, (*ραξ*, gen. *ραγος*,) see Vitis vinifera.

RHEGE, (*ρηγη*,) Cramp, Contusion, Laceration.

RHEGMA, gen. *Rheg'matis*, (*ρηγμα*,) Cramp, Contusion, Laceration, Rhexis—r. Ligamentare, Apospasma.

RHEGMUS, (*ρηγμος*,) Cramp, Contusion, Laceration.

RHEMBASMUS, (*ρεμβασμος*, from *ρεμβω*, 'I wander about,') Somnambulism.

RHEM'BĒ, *Rhem'bus*, (*ρεμβη*, 'a wandering about,' from *ρεμβειν*, 'to wander about.') Irregularity in the return of febrile paroxysms.

RHEMBUS, (*ρεμβος*,) Rhembe.

RHENCHUS, (*ρεγχος*,) Rattle, Snoring.

RHENXIS, (*ρεγξις*,) Rattle, Snoring.

RHEON, Rheum.

RHÉOPHORE, (*ροη*, 'a current,') and *φερειν*, 'to carry,') Electrode.

RHETINE, (*ρητινη*, from *ρεω*, 'to flow,') Resin.

RHETINI'TES, (*ρητινιτης*,) Resinatum.

RHETINOCERON, (*rhetine*, and *κηρος*, 'wax,') Resinatum.

RHETINOÏDES, see *Rhétinolé*.

RHÉTINOLE, (from *rhetine*.) A name given by M. Béral to a medicine, which results from the

union of a resin with other medicinal substances. The *Rhétinolés* of Béral differ from the *Rhétinoïdes* in containing but one resin, whilst in the latter there are several.

RHETINOTON, (from *rhetine,*) Resination.

RHETORANCHE, (*ῥητωρ,* 'a public speaker,' and *αγχω,* 'to strangle,') see Pharyngitis, follicular.

RHEUM, (pronounced *room,*) *Rheu'ma,* (F.) *Rhume ;* (*ῥευμα,* from *ῥεω,* 'to flow.') Any thin watery discharge from mucous membranes or skin ; as the thin discharge from the air passages arising from cold.

RHEUM, SALT. A popular name in the United States, like 'tetter,' for various cutaneous affections of the eczematous and herpetic forms more especially. It is at times applied to a kind of chronic psoriasis; and likewise to cutaneous affections in those who immerse the hands in metallic or acid solutions. It has been defined "a vague and indefinite popular name, applied to almost all the non-febrile cutaneous eruptions which are common among adults, except ringworm and itch."

RHE'ÜM, *Rhabar'barum, Rhe'on, Rha, Rhœ'um, Lap'athum orienta'lē* seu *Chinen'sē, Rhabar'barum ve'rum* seu *Tartar'icum* seu *Siber'icum* seu *Tur'cicum, Rhu'barb,* (F.) *Rhabarbe, Rhubarbe.* From *Rha,* (Ῥῆ, Ῥᾶ,) now called Wolga, a river in Russia from which it was first brought. *Ord.* Polygonaceæ. *Sex. Syst.* Enneandria Trigynia. The root—*Rhe'ïm*—is the part used in medicine. Its odour is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, subacrid, bitterish, and astringent. It colours the saliva and the urine yellow. It is easily pulverized, and forms a powder of a bright buff-yellow colour. Both water and spirit extract its virtues. Rhubarb root is purgative, stomachic and astringent. [?] It is chiefly used for the properties first mentioned. Externally, the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ℈j to ʒss of the powder. In a smaller dose, it is stomachic. Numerous species of Rheum, *Rh. palmatum, Rh. undulatum,* and *Rh. compactum,* yield the rhubarb-root.

The rhubarbs most used in the United States are the *Chinese'* or *In'dia Rhu'barb—Rhe'um Sinen'sē* seu *In'dicum ;* the *Rus'sian, Tur'key* or *Bucha'rian Rhu'barb—Rhe'um Rus'sicum* seu *Tur'cicum ;* and *Europe'an Rhu'barb.*

RHEUM COMPACTUM, Rheum — r. Indicum, see Rheum—r. Palmatum, Rheum.

RHEUM RHAPON'TICUM, *Rhapon'tic Rhu'barb ; Rhapon'ticum, Rhabar'barum Dioscor'idis* seu *Antiquo'rum,* (F.) *Rhapontique, Rhapontic, Rapontic.* The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose. *French, Rhapontic,* or *Krimea Rhubarb,* is obtained from this species, as well as from *Rh. undulatum,* and *Rh. compactum.*

Rheum rhaponticum is the *Pie rhubarb* or *Pie plant* cultivated for its fleshy esculent leafstalks.

RHEUM RUSSICUM, see Rheum — r. Sinense, see Rheum—r. Turcicum, see Rheum—r. Undulatum, see Rheum.

RHEU'MA, gen. *Rheu'matis,* (*ῥευμα,* gen. *ῥευματος,* from *ῥεω,* 'to flow,') Catarrh, Diarrhœa, Rheum, Rheumatism. Also, inflammation of a fibrous tissue, as in rheumatism and gout. In composition, a flow, a defluxion; also, rheumatism.

RHEUMA CATARRHALE, Bronchitis, (chronic) —r. Epidemicum, Bronchitis, chronic, Catarrh, epidemic — r. Pectoris, Catarrh — r. Uteri, Leucorrhœa.

RHEUMAPYRA, (*rheuma,* and *πυρ,* 'fever,') Rheumatism, acute.

RHEUMARTHRITIS, (*rheuma,* and *arthritis,*) see Rheumatism, acute.

RHEUMARTHROSIS, (*rheuma,* and *arthrosis,* 'an affection of the joints,') see Rheumatism, acute.

RHEUMATALGIA, (*rheuma,* and *αλγος,* 'pain,') Rheumatism, chronic—r. Arthritica, see Rheumatism, acute.

RHEUMAT'IC, (*ῥευματικος,*) *Rheumat'icus, Rheumatis'mal,* (F.) *Rhumatismal, Rhumatique.* Belonging to rheumatism; as rheumatic fever. Also, applied to one affected with rheumatism; (F.) *Rhumatisant.*

RHEUMAT'IC DIATH'ESIS, *Diath'esis rheumat'icu.* The special condition of the body that gives occasion to rheumatism. It may exist without presenting the usual phenomena in the joints; whilst the heart may be seriously affected.

RHEUMATICS, Rheumatism.

RHEU'MATISM, *Catarrhœ'a,* (from *rheuma,*) *Do'lor Rheumat'icus et arthrit'icus,* (Hoffman,) *Rheumato'sis, Myoso'tis, Rheu'ma, Myodyn'ia,* (vulg.) *Rheu'matiz, Rheumat'ics,* (F.) *Rhumatisme.* A kind of shifting phlegmasia or neuralgia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the names *Muscular, Articular,* and *Synovial,* which have been applied to it. The disease may be *acute,* or *chronic.*

RHEUMATISM OF THE ABDOMEN, Cœliorrheuma.

RHEUMATISM, ACUTE', *Rheumatis'mus acu'tus* seu *articulo'rum acu'tus* seu *universa'lis febri'lis* seu *inflammato'rius* seu *hypersthen'icus, Arthro'sia acu'ta, Rheumatop'yra, Rheumap'yra, Fe'bris rheumat'ica inflammato'ria, Syn'ocha rheumat'ica, Myoso'tis, Myi'tis, Cau'ma* seu *Arthri'tis rheumatis'mus, Ar'throrheumatis'mus, Synovi'tis rheumatisma'lis, Hæmoarthri'tis, Rheumat'ic Fe'ver,* (F.) *Rhumatisme aigu, Rh. articulaire aigu, Fièvre rhumatismale,* usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and, what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease—*metastat'ic rheu'matism*—to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute* rheumatism seldom terminates in *chronic ;* they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Bloodletting may be employed, if the vigour of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement, and will be found proper in almost all cases. Rheumatic inflammation is very different from other

varieties, and this may account for the anomaly. After a few weeks the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet. At times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gout'y* or *Arthrit'ic rheumatism* or *Rheumat'ic gout, Rheumatal'gia arthrit'ica, Rheumarthro'sis, Rheumarthri'tis, Arthri'tis rheumat'ica* seu *juveni'lis.*

Rheumatism of the Arm, Brachiorrheuma — r. Arthritic, see Rheumatism, acute — r. of the Bladder, Cystorrheuma — r. of the Bowels, Enterorrheuma.

Rheumatism, Cap'sular, *Rheumatis'mus capsula'ris.* Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognized by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

Rheumatism of the Chest, Pleurodynia.

Rheumatism, Chron'ic, *Arthro'sia chron'ica, Rheumatismus chron'icus* seu *nonfebri'lis* seu *vulga'ris* seu *invetera'tus* seu *habitua'lis* seu *frig''idus, Rheumatal'gia, Rhumatal'gia, Rheumatodyn''ia, Arthrodyn'ia, Arthri'tis arthrodyn'ia,* (F.) *Rhumatisme chronique, Rhumatalgie,* is attended with pains in the hips, shoulders, knees, and other large joints. These are at times confined to one joint; at others, shift from one to another, without occasioning inflammation or fever. In this manner the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is, perhaps, the most successful remedy of all.

Rheumatism of the Extremities, Aerorrheuma — r. of the Face, Prosoporrheuma — r. Gouty, see Rheumatism, acute—r. of the Heart, Cardiorrheuma — r. of the Hip, see Neuralgia femoropoplitæa — r. Lead, see Lead rheumatism — r. of the Leg, Scelorrheuma—r. of a Limb, Merorrheuma — r. Local, Merorrheuma — r. of the Loins, Lumbago — r. Metastatic, see Rh. acute—r. of the Neck, Torticollis — r. Partial, Merorrheuma.

Rheumatism, Preäbdom'inal, (F.) *Rhumatisme pré-abdominal.* Rheumatism of the muscles of the anterior and lateral portions of the abdomen; supposed by MM. Génest and Requin to be the same as the *nervous affection of the peritoneum* of Gooch.

Rheumatism Root, Jeffersonia Bartoni.

Rheumatism of the Skin, see Dermalgia — r. Topical, Merorrheuma — r. of the Uterus, Metrorrheuma.

Rheumatism, Vis'ceral. Rheumatism affecting the muscular or fibrous tissues of the viscera.

Rheumatism Weed, Pyrola maculata, P. umbellata.

RHEUMATISMAL, Rheumatic.

RHEUMATISM'OID, *Rheumatismoï'des, Rheu'matoid, Rheumatoï'des,* (*rheumatism,* and *εἶδος,* 'resemblance.') Resembling rheumatism.

RHEUMATISMUS, Rheumatism—r. Abdominis, Coeliorrheuma—r. Acutus, Rheumatism, acute —r. Articulorum acutus, Rheumatism, acute — r. Brachii, Brachiorrheuma — r. Cancrosus, Neuralgia faciei—r. Cervicis, Torticollis—r. Colli, Torticollis—r. Cordis, Cardiorrheuma—r. Cruris, Scelorrheuma — r. Dorsalis, Lumbago — r. Extremitatum, Aerorrheuma — r. Faciei, Prosoporrheuma — r. Febrilis, Dengue — r. Inflammatorius seu hypersthenicus, Rheumatismus acutus — r. Intestinorum, Enterorrheuma — r. Intestinorum cum ulcere, Dysentery — r. Larvatus, Neuralgia faciei — r. Localis, Merorrheuma — r. Membrorum singulorum, Merorrheuma — r. Non febrilis, Rheumatism, acute — r. Partialis, Merorrheuma — r. Pectoris, Pleurodynia — r. Phlegmonodes, Myositis — r. Spurius nervosus, Neuralgia — r. Universalis febrilis, Rheumatism, acute — r. Uteri, Metrorrheuma — r. Vesicæ urinariæ, Cystorrheuma — r. Vulgaris seu inveteratus seu habitualis seu frigidus, Rheumatism, chronic.

RHEUMATIZ, Rheumatism.

RHEUMATODYNIA, (*rheuma,* and *ὀδυνη,* 'pain,') Rheumatism, chronic.

RHEUMATOID, Rheumatismoid.

RHEUMATOPHTHAL'MIA, *Rheumophthal'mia,* (*rheuma,* and *ophthalmia.*) Rheumatic ophthalmia.

RHEUMATOPYRA, (*rheuma,* and *πυρ,* 'fever,') Rheumatism, acute.

RHEUMATOSIS, (from *rheuma,* and *osis,*) Rheumatism.

RHEUMOPHTHALMIA, (*rheuma,* and *ophthalmia,*) Rheumatophthalmia, Sclerotitis.

RHEX'IS, *ῥῆξις,* from *ῥηγνυμι,* 'to break.') *Rhegma, Dirup'tio, Rup'tio, Ruptu'ra, Rup'ture.* Rupture of a vessel or organ. Spontaneous opening of an abscess.

Rhexis Oc'uli. Bursting of the eye from any cause; spontaneous or excited.

RHICNO'SIS, (*ῥικνωσις,* from *ῥικνοομαι,* 'to become wrinkled,') *Cu'tis corruga'tio.* Wrinkling of the skin from extenuation of the body; opposed to *ἔτκασις,* or distension from repletion.

RHIGOS, (*ῥιγος,*) Rigor.

RHIN, gen. *Rhi'nis,* (*ῥις,* gen. *ῥινος,*) Nasus.

RHINAL'GIA, *Rhinodyn'ia,* (*rhin,* and *ἀλγος,* 'pain.') Pain in the nose.

Rhinal'gia ab Intru'sis. Pain in the nose from foreign bodies.

Rhinal'gia Vermino'sa. Pain in the nose from worms.

RHINAN'CHONĒ, *Rhinan'gia, Rhinostegno'sis,* (*rhin,* and *ἀγχονη,* 'narrowness.') Contraction of the nose. Snuffles.

RHINANGIA, Rhinanchone, Snuffles.

RHINENCEPHALIA, (*rhin, ἐν,* 'in,' and *κεφαλη,* 'head,') Cyclopia.

RHINEN'CHYSIS, *Rhinenchys'ia,* (*rhin, ἐν,* 'in,' and *χυω,* 'I pour.') An infusion or injection, made into the nostrils, with a syringe called *Rhinen'chites.*

RHINES, (pl. of *rhin,*) Nares.

RHINI'TIS, *Nasi'tis,* (*rhin,* and *itis.*) Inflammation of the nose. Coryza.

Rhinitis Ulcerosa, Ozæna.

RHINOBLENNORRHŒA, Rhinorrhœa.

RHINOC'ACĒ, *Cory'za scarlatino'sa,* (*rhin,* and *κακος,* 'evil.') The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane, that accompany the worst forms of scarlatina.

RHINOCATARRHUS, Coryza.

RHINOCNES'MUS, (*rhin,* and *κνησμος,* 'itching.') Itching of the nose.

RHINODACRYOLITHUS, (*rhin, δακρυον,* 'a tear,' and *λιθος,* 'a stone,') see Dacryolite.

RHINODYNIA, (*rhin,* and *ὀδυνη,* 'pain,') Rhinalgia.

RHINOLITE, (*rhin,* and *λιθος,* 'a stone,') see Dacryolite.

RHINOPHO'NIA, (*rhin,* and *φωνη,* 'the voice.') A nasal voice, called, also, *Dysphoni'a immodula'ta nasa'lis, Porapho'nia nas'alis* seu *res'onans,*

Psellis'mus na'sitas, Mycteropho'nia, Na'sitas, Vox seu *Parala'lia nasa'lis.* Speaking through the nose.

RHI'NOPLASTY, *Rhinoplas'tia, Rhinoplas'tica* (ars), (F.) *Rhinoplastie*, (*rhin*, and πλασσω, 'I form.') The operation for forming a new nose, which dates far back. Three chief methods have been described: 1. The *method of Celsus*, which consists in bringing forward the skin of the cheeks, and forming a septum, if necessary, from the upper lip. 2. The *Italian* or *Taliacotian method* or *operation*, called, also, the *German method*, on account of the application made of it by Von Gräfe, which consists in paring the edges of the nostrils, and uniting them to a graft taken from the arm, but left attached to it, until union has taken place; and 3. The *Indian method*—practised for ages in the East Indies, where cutting off the nose has been a common punishment for criminals—now generally adopted, in which the graft is taken from the forehead.

RHINOPOLYPUS, (*rhin*, and *polypus*,) Polypus of the nose.

RHINOP'TIA, (*rhin*, and οπτομαι, 'I see.') The act of seeing over the nose. Squinting over the nose.

RHINORRHAGIA, (*rhin*, and ῥαγη, 'a breaking forth,') Epistaxis.

RHINOR'RHAPHY, *Rhinorrhaph'ia*, (*rhin*, and ῥαφη, 'a suture.') An operation for the removal of epicanthis, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, removing it, and bringing together the edges of the wound by harelip suture.

RHINORRHŒ'A, *Rhinoblennorrhœ'a*, (*rhin*, and ῥεω, 'I flow.') A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.

RHI'NOSCOPE, *Rhinoscop'ium*, (*rhin*, and σκοπεω, 'I view.') An instrument of the speculum kind for inspecting the nasal passages. The operation is termed *Rhi'noscopy, Rhinoscop'ia.*

RHINOSCOPY, see Rhinoscope.

RHINO'SIS, (ῥινος, 'a skin, leather,'—or from ῥικνος 'rugous.') The state of looseness and excess of skin observed in phthisis.

RHINOSTEGNOSIS, (*rhin*, and στεγνωσις, 'a constriction or obstruction,') Rhinanchone.

RHIPTASMUS, (ῥιπτασμος, from ῥιπτω, 'to throw,') Jactation.

RHIPTOLUSIA, (ῥιπτω, 'to throw,' and λουω, 'to wash,') Affusion.

RHIS, gen. *Rhi'nis*, (ῥις, gen. ῥινος,) Nasus.

RHIZA, ῥιζα,) Radix.

RHIZAGRA, (ῥιζαγρα, from *rhiza*, and αγρα, 'seizure,') Punch.

RHIZODON'TRYPY, *Rhizodontot'rypy*, (*rhiza*, οδους, gen. οδοντος, 'a tooth,' and τρυπαω, 'I perforate.') Perforation of the root of a tooth for the discharge of fluid.

RHIZO'MA, *Rhi'zoma*, (from *rhiza*.) The part of the root of a plant, which consists of wood or flesh, as in the carrot.

RHIZONYCHIA, (*rhiza*, and ονυξ, gen. ονυχος, 'a nail,') see Nail.

RHIZOPH'AGUS, (ῥιζοφαγος, from *rhiza*, and φαγω, 'I eat.') One who lives on roots.

RHIZOTOMIST, (ῥιζοτομος, from *rhiza*, and τεμνειν, 'to cut,') Radisecа.

RHIZOTOMUS, Apothecary.

RHOA, (ῥοα,) Punica granatum.

RHODELÆ'ON, *Oleum rosa'rum*, (*rhodon*, and ελαιον, 'oil.') Oil of roses, or oil impregnated with roses.

RHO'DIA, *Rhodi'ola ro'sea, Ro'sea, Rose'wort*, (F.) *Rhodiole*, (*rhodon*, owing to its odour.) *Sex. Syst.* Dicœcia Octandria. The root, *Roseroot*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.

RHO'DINUS, (ῥοδινος,) *Rho'dine, Rosa'ceus, Ro'seus, Rosa'tus*, (F.) *Rosat*, Rosy. Formed of, or containing, roses.

RHODIOLA ROSEA, (dim. of *rhodia*,) Rhodia.

RHODIOLE, Rhodia.

RHODI'TES VINUM, (ῥοδιτης οινος.) Wine in which roses have been macerated.

RHO'DIUM LIG'NUM, *Rho'dium* or *Rose'wood*, (from *rhodon*.) The wood or root of a tree supposed to be *Genis'ta Canarien'sis* of Linnæus. (F.) *Bois de rose, Bois de Chypre. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.

RHODIUS, Rhodinus.

RHODODAPHNE, (ῥοδιδαφνη,) Nerium oleander.

RHODODAPHNIS, Nerium oleander.

RHODODEN'DRON CHRYSAN'THEMUM, *R. chrysan'thum* seu *au'reum* seu *officina'lē, Olean'der, Rosebay, Yel'low rhododen'dron, Moun'tain Lau'rel*, (F.) *Rosage, R. chrysanthe, Rose de Sibérie*, (ῥοδοδενδρον, from *rhodon*, and δενδρον, 'a tree.') *Nat. Ord.* Ericaceæ. *Sex. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose it produces acronarcotic symptoms.

RHODODENDRON MAX'IMUM, *Great Lau'rel, Amer'ican Rosebay.* An indigenous shrub, *Ord.* Ericaceæ, which flowers in July. It is stimulant and astringent, and has been used by the Indians in gout and rheumatism.

RHODODENDRON PUNCTA'TUM. Indigenous; has similar properties.

RHODOME'LA PALMA'TA, *Dulse, Sac'charine Fu'cus.* One of the Algæ, eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.

RHODOMELI, (*rhodon*, and μελι, 'honey,') Mel rosæ.

RHODON, (ῥοδον,) Rosa, Rosa centifolia.

RHODOSACCHARUM, (*rhodon*, and σακχαρον, 'sugar,') Confectio rosæ gallicæ.

RHODOSTACTON, (ῥοδοστακτον,) Mel rosæ.

RHODOSTAGMA, (*rhodon*, and σταγμα, 'that which has been dropped,') Aqua rosæ.

RHŒA, (ῥοια,) Punica granatum.

RHŒAS, gen. *Rhœ'adis*, see Papaver rhœas.

RHŒBDESIS, (ῥοιβδησις, from ῥοιβδεω, 'to sup up,') Absorption.

RHŒUM, Rheum.

RHOGMUS, (ῥωγμος,) Râle.

RHOÏ'TES, (ῥοιτης,) a wine impregnated with the pomegranate, (from ῥοα, the *pomegranate.*) A confection, made by boiling the juice of the pomegranate in honey.

RHOMBOÏDE'US, (ῥομβος, 'a rhombus, whose sides are equal, with two obtuse and two acute angles.) *Rhomboïdeus major* and *minor, Rhomboï'des, Cervici-dorso-scapulaire.* A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebræ, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboideus major* and *Rh. minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotatory motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

RHOMBOS, (ῥομβος.) A bandage mentioned

by Galen; so called on account of its rhomboidal shape.

RHON'CHAL, *Rhoncha'lis*, (*rhonchus*, 'rattle.') Relating or appertaining to rhonchus;—as '*rhonchal* fluctuation;' the fremitus that occurs through the influence of respiration as an attendant on cavernous rhonchi.

RHONCHUS, (*ῥογχος*,) Rale, Snoring, Stertor—r. Cavernous, see Gurgling—r. Cavernulous, see Gurgling.

RHON'CHUS, CLICK'ING. A rhonchus which has been considered positively indicative of the existence of tubercles in the lungs. [?]

RHONCHUS, CREPITANS, *Râle crépitant*—r. Crepitans redux, see Crepitant—r. Mucous, see *Râle muqueux*—r. Sibilans, see *Râle crépitant*—r. Sibilus, *Râle sibilant*—r. Sonorus, *Râle sonore*—r. Subcrepitant, see *Râle muqueux*.

RHOPALISMUS, (*ῥοπαλισμος*,) Priapismus.

RHOPALOSIS, (*ῥοπαλον*, 'a club,'—the hair being matted like a club, and *osis*,') Plica.

RHOPALUM, (*ῥοπαλον*,) Penis.

RHOPE, (*ῥοπη*, 'a moving forwards or downwards,') Congestion.

RHOTACISMUS, (*ῥοτακισμος*,) Rotacism.

RHOX, (*ῥωξ*, gen. *ῥωγος*, 'a fissure,') Pupil, Uvea.

RHUBARB, Rheum—r. Chinese, see Rheum—r. French, Rheum Rhapontioum—r. India, see Rheum—r. Krimea, Rheum Rhapontieum—r. Monk's, Rumex Alpinus, Rumex patientia—r. Pie, Rheum Rhaponticum—r. Poor Man's, Thalictron—r. Rhapontic, Rheum Rhaponticum—r. Russia, see Rheum—r. Turkey, see Rheum—r. Wild, Convolvulus panduratus.

RHUBARBE, Rheum—*r. Fausse*, Thalictron—*r. des Indes*, Convolvulus mechoacan—*r. des Pauvres*, Thalictron—*r. Sauvage*, Rumex patientia.

RHUE, Ruta.

RHUM, Rum.

RHUMA, in composition, see Rheuma.

RHUMAPYRA, Rheumatism, acute.

RHUMATALGIA, Rheumatism, chronic.

RHUMATALGIE, Rheumatism, chronic.

RHUMATIQUE, Rheumatic.

RHUMATISANT, Rheumatic.

RHUMATISMAL, Rheumatic.

RHUMATISME, Rheumatism—*r. Aigu*, Rheumatism, acute—*r. Articulaire aigu*, Rheumatism, acute—*r. Chronique*, Rheumatism, chronic—*r. Préabdominale*, Rheumatism, præabdominal—*r. d. l'Utérus*, Metrorrheuma.

RHUME, Rheum—*r. de Cerveau*, Coryza—*r. de Poitrine*, Catarrh.

RHUS BELGICA, (gen. *Rhois*, *ῥους*,) Myrica gale—r. Copallina, see Rhus typhina.

RHUS CORIA'RIA, *Adu'rion*, *Sumach*, *Shumach*, *Elmleaved Sumach*, (F.) *Sumac*, *Sumac des Corroyeurs*, *Roure* ou *Rouvre*. *Ord.* Anacardiaceæ. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus rhus that is innocent. Both the leaves and berries have been used as astringents and tonics.

RHUS GLABRA, '*Smooth Sumach*.' Indigenous and officinal in the Pharmacopœia of the United States. An infusion of the fruit—*Rhus glabrum* [?] Ph. U. S.—which is acid and astringent, has been used as a cooling drink, and as a gargle. An infusion of the inner bark of the root has been recommended in mercurial ptyalism.

RHUS RADI'CANS, *R. ver'nix*, *Poison vine* (*America*). This plant is poisonous (see Poisons, Table of), and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like Rh. toxicodendron, in paralysis, and other nervous affections.

RHUS SUCCEDANEA, see Wax, Japan.

RHUS SYLVESTRIS, Myrica gale.

RHUS TOXICODEN'DRON, *Toxicoden'dron*, *Poison Oak* (*America*), (F.) *Sumac vénéneux*. The leaves—*Toxicodendron* (Ph. U. S.)—have been used in paralytic affections and eruptions. It is poisonous, like Rh. radicans. Dose, gr. ss. to gr. iv.

RHUS TYPHI'NA, *Stag's horn Sumach*, and RHUS COPALLI'NA, *Mountain Sumach*, have similar properties with Rhus glabra.

RHUS VENENA'TA, *Poison Sumach*, and RHUS PU'MILA, have similar properties with Rhus toxicodendron.

RHUS VERNIX, Rh. radicans.

RHYAS, (*ῥυας*, from *ῥεω*, 'I flow,') *Rhy'sis*. An ulceration of the lachrymal caruncle with a constant flow of tears.

RHYMA, (*ῥυμα*,) Medicament.

RHYPARIA, (*ῥυπαρια*, from *ῥυπος*, 'dirt,') Rupia, Sordes primarum viarum.

RHYPIA, (*ῥυπια*,) Rupia.

RHYPUS, (*ῥυπος*,) Sordes.

RHYPTICA, (from *ῥυπτικος*,) Detergents.

RHYPTICUS, Abstergent.

RHYSIS, (*ῥυσις*,) Flux, Rhyas.

RHYSSE'MA, gen. *Rhysse'matis*, (*ῥυσσημα*,) Wrinkle.

RHYTHM, *Rhyth'mus*, (*ῥυθμος*,) (F.) *Rhythme*, 'measured movement.' The order of proportion, as regards time, which reigns between the different movements of an organ, or of the organism in health and disease. Thus, rhythm is applied to the diurnal variations of the pulse; and to the paroxysmal movements of an intermittent.

RHYTHMICAL, (*ῥυθμικος*,) Periodical.

RHYTH'MICAL CONTRAC'TIONS OF MUSCLES are those that succeed one another after regular intervals.

RHYTHMUS, (*ῥυθμος*,) Rhythm.

RHYTIDOSIS, (*ῥυτιδωσις*,) Rutidosis.

RHYTIS, (*ῥυτις*,) Wrinkle.

RIB, ([Sax.] *rib*,) Costa—r. False, see Costa—r. Floating, see Costa—r. Sternal, see Costa—r. True, see Costa.

RIBES (of Arab. origin) GLOSSULARIA, R. uva crispa.

RI'BES NI'GRUM, *R. ol'idum*, *Grossula'ria ni'gra*, *Cas'sis*, *Black Cur'rant*, *Gazel*, (F.) *Groseillier noir*. *Ord.* Grossulaceæ. *Sex. Syst.* Pentandria Monogynia. The berries—*Black currants*—have been recommended in sore-throat, and as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES OFFICINALE, R. rubrum—r. Olidum, R. nigrum.

RIBES RU'BRUM, *R. officina'lē* seu *vulga'rē*, *Grossula'ria non spino'sa* seu *ru'bra*, *Red cur'rant*, (F.) *Groseillier rouge*; of which the *White* is only a variety. It is cultivated, and affords an agreeable fruit—*Red cur'rants*, (F.) *Groseilles*. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RIBES UVA CRISPA, *R. grossula'ria*, *Common gooseberry*. The fruit—*Grossula'ria*, (F.) *Groseille à maquereau*, *Gooseberry*, *Feaberry*—is agreeable, and makes a good preserve.

RIBES VULGARE, R. rubrum.

RIBGRASS, Plantago lanceolata.

RIBS, NECK OF THE, Collum costarum—r. Short, see Costa.

RIBWORT, Plantago Virginica.

RICE, Oryza—r. Canada, Zizania aquatica.

RICE DISEASE, Cholera.

RICE, GROUND, see Oryza.

RICE JELLY, see Oryza.

RICE WATER, see Oryza. The evacuations of cholera have been termed—from their resemblance to ricewater—'*ricewater* discharges;' and in India, '*congee* discharges;'—*congee*, in Hindoostanee, meaning 'ricewater.'

RICE, WILD, Zizania aquatica.

RICHARDSONIA, (after Richardson, an early English botanist,) see Ipecacuanha.

RICHLEAF, Collinsonia Canadensis.

RICHWEED, Actæa racemosa, Ambrosia trifida, Collinsonia Canadensis, Pilea pumila.

RICIN, Ricinus communis.

RICINOIDES, (*ricinus*, and εἶδος, 'resemblance,') Jatropha curcas.

RIC''INUS COMMU'NIS, (from *ricinus*, 'a tick,' which its seed resembles,') *Ricinus vulga'ris* seu *vir'idis*, *Palma Christi*, *Catapu'tia major*, *Faba purga'trix*, *Cerva*, *Kerva*, *Cici*, *Castor oil plant*, (F.) *Ricin*, *Fève purgatif*. *Ord.* Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphia. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds — *Sem'ina Çatapu'tiæ majo'ris* seu *Ric''ini vulga'ris*—will act as a cathartic; but the oil is alone used. It is obtained by bruising the castor-seeds, previously decorticated, and then expressing the oil without the application of heat. Recently-drawn castor oil, *Oleum de kerva* seu *kervi'num*, *Alker'va*, *O. Ric''ini* seu *Cic''inum* seu *Palmæ liq'uidum* seu *de Palmâ Christi*, *Carapat*, *Karapat*, — in the United States often called simply *Oil*, (F.) *Huile de Ricin*—is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where powerfully stimulating purgatives would be injurious. Dose, f℥j to f℥iss. Hufeland recommends that a drop of croton oil shall be added to an ounce of the oil of poppy, and that the mixture shall be called *O'leum Ric''ini Officina'lē*.

At the Cape of Good Hope, the oil is obtained from *Ricinus liv'idus*.

A variety of Ricinus at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves to the mammæ, or of a strong decoction, with which the mammæ and the external parts of generation are washed.

RICINUS LIVIDUS, see Ricinus communis — r. Major, Jatropha curcas—r. Minor, Jatropha manihot — r. Viride, R. communis — r. Vulgaris, R. communis.

RICK, Malleolus.

RICKETS, (see *Rig*,) Rachitis.

RICKETY, Rachiticus.

RICTUS, (from *ringor*, *rictus*, 'to open the mouth wide.') Yawning — r. Lupinus, (*lupus*, 'a wolf,') see Harelip.

RIDE, Wrinkle.

RIDÉ, Wrinkled.

RI'DING (of Bones). *Os'sium superposit''io*, (F.) *Chevauchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities *riding* over each other instead of being end to end.

RIDING HAG, Incubus.

RIEUR DE SANTORINI, Risorius novus.

RIFE, ([Sax. ryfe,), (Prov.) *Brief*. Prevailing; as applied to diseases.

RIFT, (from *rive*, *rived*,) Eructation.

RIG, ([Sax.] hrycg or hryc,) Dorsum.

RIGIDITAS, Rigidity.

RIGID'ITAS ARTICULO'RUM, *Ancylo'sis spu'ria*. Stiffness of the joints. False ancylosis.

RIGIDITÉ, Rigidity—*r. Cadavérique*, see Rigidity.

RIGID'ITY, *Rigid'itas*, *Ri'gor*, (*rigere*, ῥιγεω, 'to stiffen,') (F.) *Rigidité*, *Roideur*, *Raideur*. Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, *Cadav'eric rigid'ity*, (F.) *Roideur* ou *Rigidité cadavérique*, is one of the signs of the cessation of life. It may be removed, however, for a time, by the injection into the arteries of oxygenated defibrinated blood. See Rigor mortis.

RI'GOR, *Rhi'gus*, *Al'gor*, *Cold'ness*, *Cheim'ia*, (F.) *Frisson*, (from ῥιγεω, *rigeo*, 'to stiffen,' especially from cold.') Rigidity. Sensation of cold, with involuntary *shivering* or *shaking* of the whole body: — a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill*, (Prov.) *cream*, *fri'gus ten'uē*, *perfrigera'tio*.

RIGOR ARTUUM, Contractura — r. Cadaverosus, Rigor mortis—r. Corporis mortui, Rigor mortis—r. Emortualis, Rigor mortis—r. Maxillæ inferioris, Trismus.

RIGOR MOR'TIS, *R. cor'poris mor'tui* seu *cadavero'sus* seu *emortua'lis*, *Necronarce'ma*, (F.) *Roideur* ou *Raideur* ou *Rigidité cadavérique*. 'Stiffness of death.' Death stiffening. The rigidity of limbs that occurs on dissolution. See Rigidity.

RIGOR NERVORUM, Tetanus — r. Nervosus, Tetanus.

RI'MA, *Schis'ma*, *Schi'za*; 'a fissure, a cleft;' as *Ri'ma* seu *Ri'mula Glot'tidis* seu *Laryn'gis*, the opening of the glottis. *Ri'ma* seu *R. mag'na vul'væ*, *Intro'itus vagi'næ*, *Si'nus vul'væ*, *Sca'pha*, *Sca'phus* seu *Fissu'ra mag'na* seu *Scissu'ra* seu *Schi'za vul'væ*; the opening of the vulva. See Vulva. *Ri'ma o'ris*, the opening of the mouth.

RIMA CANALIS ORBITARII, Suborbitar fissure — r. Clunium, see Nates—r. Glottidis, see Rima—r. ad Infundibulum, Vulva cerebri — r. Laryngis, Rima glottidis — r. Magna vulvæ, see Rima — r. Oris, see Rima — r. Transversa magna cerebri, Fissure, transverse, of the brain — r. Vulvæ, see Rima.

RIMÆ, (pl. of *rima*,) Rhagades.

RIMULA, (dim. of *rima*.) A small fissure or cleft.

RIMULA GLOTTIDIS, see Rima — r. Laryngis, Rima glottidis.

RINÆUS, (from *rhin*,) Compressor naris.

RING, ([Sax.] hring, ring,) *Cri'cos*, (F.) *Anneau*. A name given to natural circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or part: — as the *umbilical ring*, *inguinal ring*, &c.

RINGS, CRAMP, see Cramp rings—r. Festooned, Annuli fibrocartilaginei — r. Fibrocartilaginous, Annuli fibrocartilaginei.

RINGFINGER, Annular finger.

RINGMAN, Annular finger.

RINGWORM, Herpes circinatus — r. of the Scalp, Porrigo scutulata — r. Ulcerative, Herpes exedens — r. Vesicular, Herpes præputii.

RIO VINAIGRO, *Passambio*. A stream of some size in New Granada, which is strongly impregnated with sulphuric acid.

RIRE ou *RIS*, Risus—*r. Canin*, Canine laugh — *r. Moqueur*, Canine laugh — *r. Sardonien*, Canine laugh, Risus sardonicus — *r. Sardonique*, Canine laugh.

RISAGON, Cassumuniar.

RISIGALLUM, Orpiment.

RISING, Abscess, see Regurgitation—r. of the Lights, Cynanche trachealis.

RI'SING OF ELEVA'TION OF THE PULSE, *Pul'sûs eleva'tio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISO'RIUS NO'VUS, (from *ridere*, *risum*, 'to laugh.') *R. Santorini*, (F.) *Rieur de Santorini*. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISSIGALLUM, Orpiment.

RI'SUS, (*ridere*, *risum*, 'to laugh.') *Ge'lus*, *Laugh'ing*, *Laugh'ter*, *Laugh*, (F.) *Rire* ou *Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted expiration, commonly indicating mirth and satisfaction.

RISUS APIUM, Ranunculus sceleratus—r. Caninus, Canine laugh — r. Involuntarius, Canine

laugh — r. Sardonius, Canine laugh—r. Sardonicus, Canine laugh—r. Spasticus, Canine laugh.

RITA-CRISTINA. A celebrated double monster, born in Sardinia, in 1829. It lived to be nearly nine months old. Two distinct bodies were united at the pelvis. Below, the monster was single.

RIVER WEED, Conferva rivalis.

RIVING, (from *rive, rived,*) Eructation.

RIVINUS, DUCT OF, see Sublingual gland.

RIVUS LACRYMALIS, (*rivus,* 'a small stream,') see Palpebra.

RIZ, Oryza.

ROAN TREE, Sorbus aucuparia.

ROB, *Ro'ob, Rob'ub, Ro'hob, Ro'hab,* (F.) *Extrait des fruits.* This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sa'pa,* and, when not quite so thick, *Defru'tum.*

Rob Cynosbatos, Confectio rosæ caninæ—r. ex Moris, Diamorion—r. Nucum, Diacaryon.

ROBIN-RUN-AWAY, Glechoma hederacea.

ROBIN-RUN-THE-HEDGE, Galium aparine.

ROBIN'IA AMA'RA, (after the *Robins,* French botanists.) *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The roots of the *Robinia amara* of Cochin China are bitter, and have been recommended, especially in that country, in diarrhœa and dyspepsia.

Robinia Pseudoaca'cia, *Pseudaca'cia odora'ta, False Aca'cia, Black Lo'cust, Lo'cust tree;* native of America. The flowers are said to possess antispasmodic properties, and the bark of the root to be emetic and cathartic.

ROBORANS, (from *roborare,* 'to make strong,') Corroborant.

ROBORANTIA, Tonics.

ROBUB, Rob.

ROCCELLA, (dim. of [S.] *roca,* 'a rock or stone,') Lichen roccella—r. Tinctoria, Lichen roccella.

ROCHE'S EMBROCA'TION FOR HOOP'ING COUGH. An empirical preparation, composed of *ol. oliv.* ℥xvj, *ol. succin.* ℥viij, *ol. caryoph.*, q. s. to scent it strongly.

ROCHELLE POWDERS, see Powders, soda, and Sedlitz, mineral waters of.

ROCHER, ('a rock,') see Temporal bone.

ROCHETTA ALEXANDRINA, Soda.

ROCKBRIDGE ALUM SPRINGS, see Virginia, mineral waters of.

ROCK ROSE, Helianthemum Canadense, H. Corymbosum.

ROCKETT, GARDEN, Brassica eruca — r. Roman, Brassica eruca.

ROCOU, Terra Orleana.

RODDIKIN, Abomasus.

RODENS, see Sorbus aucuparia.

RODENTREE, Sorbus aucuparia.

RODENT, (from *rodere,* 'to gnaw,') Phagedenic.

RODSCHIEDIA BURSA PASTORIS, (after Dr. D. Rodschied, of Hanau,) Thlaspi bursa.

ROGNE, (from Celt, *rong,* 'itch,') Psora.

ROHAB, Rob.

ROHENA BARK, Swictenia.

ROHOB, Rob.

ROHUN, see Strychnos nux vomica.

ROIDEUR, (from [L.] *rigidus,*) Rigidity — r. *Cadavérique,* Rigor mortis.

ROISDORFF, MIN'ERAL WA'TERS OF. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

ROLLER, Bandage, Fascia.

ROMARIN, Rosmarinus—r. *des Marais,* Statice limonium—r. *Sauvage,* Ledum sylvestre.

ROME, CLIMATE OF. The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed favourable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

ROMPEURE, (from *rumpere, ruptum,* 'to break or burst.') Hernia.

ROMPT-PIERRE, 'breakstone,' Pimpinella saxifraga.

RONCE, Rubus idæus—r. *Bleue,* Rubus cæsius —r. *de Montagne,* Rubus chamæmorus—r. *Noire,* Rubus fruticosus.

RONCHUS, (ῥογχος,) Snoring, Stertor.

ROND, Round — r. *Grand,* Teres major — r. *Petit,* Teres minor.

RONE, Sorbus aucuparia.

RONFLEMENT, (formed by onomatopœia,) Snoring, Stertor; see Rattle—r. *de Diable, Bruit de Diable.*

RONNACHS, Triticum repens.

RONNING, Rennet.

ROOB, Rob.

ROOF OF THE MOUTH, Palate.

ROOM, Pityriasis.

ROOT, (Dan. *rod,*) Radix — r. Ague, Aletris farinosa — r. Bitter, Apocynum androsæmifolium —r. Canada, Asclepias tuberosa—r. Colic, Aletris

Root Doctor, Herb doctor.

Root, Red, Celastrus, Lachnanthes tinctoria—r. Rough, Liatris.

Root of Scarcity, Beta hybrida.

Root, Squaw, Actæa racemosa—r. Sweet, Acorus calamus — r. Unicorn, Aletris farinosa — r. White, Ligusticum actæofolium—r. Yellow, Jeffersonia Bartoni, Xanthoriza apiifolia.

ROPE, Nanus.

Rope Bark, Direa palustris.

ROQUETTE, (from *eruca* [?]), Brassica eruca, Soda.

RORELLA, (dim. of *ros,* gen. *roris,* 'dew,') Drosera rotundifolia.

RORIF'EROUS, *Ror'ifer,* (F.) *Rorifère,* (*ros,* 'dew,' and *ferre,* 'to carry.') An epithet given to vessels which pour exhaled fluids on the surface of organs.

Roriferous Duct, Thoracic duct.

ROS, gen. *Ro'ris,* 'dew,' Sperm—r. Calabrinus, Fraxinus ornus —r. Solis, Drosera rotundifolia.

ROSA, 'rose,' R. centifolia — r. Afzeliana, R. canina.

Ro'sa Al'ba, *R. usitatis'sima* seu *leucan'tha.* The *White Rose,* (F.) *Rosier blanc. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The flowers of this species possess similar but inferior qualities to the damask.

Rosa Armata, R. canina—r. Asturica, see Pellagra — r. Austriaca, R. Gallica — r. Calycina, R. canina.

Rosa Cani'na, *R. sylves'tris* seu *sentico'sa* seu *Swartzia'na* seu *Afzelia'na* seu *arma'ta* seu *calyci'na* seu *ru'bra vulga'ris, Cynor'rhodon, Canirubus, Cani'nus Sen'tis, Cynocyti'sus, Cynospas'tum, Cynos'batos, Dogrose,' Wild Bri'ar, Hip Tree,* (F.) *Rose du chien, Eglantier de chien, E. sauvage.* The fruit of this variety, called *Heps* or *Hips, Hops,* (Sc.) *Doghip,* has a sourish taste, and is formed into a conserve. See Confectio cynosbati. It is seldom employed, except to give form to more active remedies; as to pills, boluses, linctuses, &c.

Rosa Centifo'lia, *Ro'sa, R. Damasce'na* seu *Pal'lida, Hecatophyl'la, Dam'ask, Pale, Hun'dred leaved* or *Cab'bage rose,* (F.) *Rosier à cent feuilles, Rhodon.* The petals of this rose have an extremely fragrant odour, and sub-acidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose water.

Oil of Roses, Oleum Rosæ, Attar, Otto or *Essence of Roses*, and the formation of a syrup.

Rosa Damascena, R. centifolia.

Rosa Gal'lica, *R. Austri'aca* seu *ru'bra, Red Rose*, (F.) *Rosier de Provins*. The petals of this variety are astringent; and are used in infusion, conserve, &c.

Rosa Leucantha, R. alba—r. Pallida, R. centifolia—r. Rubra, R. Gallica—r. Rubra vulgaris, R. canina—r. Saltans, Essera—r. Senticosa, R. canina—r. Swartziana, R. canina—r. Sylvestris, R. canina—r. Usitatissima, R. alba.

ROSACE, Roseola.

ROSACEUS, (from *rosa*,) Rhodinus.

ROSAGE, Nerium oleander, Rhododendron chrysanthemum.

ROSAGO, gen. *Rosag''inis*, Nerium oleander.

ROSALIA, (from *rosa*, 'the rose,' from its colour,) Scarlatina.

ROSALIÆ, Scarlatina.

ROSAT, (from *rosa*, 'the rose,' from its colour,) Rhodinus.

ROSATUS, Rhodinus.

ROSE, Erysipelas, (from its colour,) Rosa—r. Cabbage, Rosa centifolia—r. Campion, Lychnis githago—r. Christmas, Helleborus niger—r. Copper, Papaver rhœas—r. Corn, Papaver rhœas—r. Damask, Rosa centifolia—r. Dog, Rosa canina—r. Dog, conserve or confection of, Confectio rosæ caninæ.

Rose Drop, Gutta rosea—*r. Du Chien*, Rosa canina.

Rose, Hundredleaved, Rosa centifolia—*r. Marine*, Rosmarinus—r. Pale, Rosa centifolia.

Rose Rash, Roseola.

Rose, Red, Rosa Gallica—r. Rock, Helianthemum Corymbosum.

ROSE DE SIBÉRIE, Rhododendron crysanthemum.

Rose Spots, Spots, red.

Rose, White, Rosa alba.

ROSEA, Rhodia.

ROSEBALM, SCARLET, Monarda coccinea.

ROSEBAY, AMERICAN, Rhododendron maximum.

ROSÉE DU SOLEIL, 'sundew,' Drosera rotundifolia.

ROSELLINA, (from *rosa*, 'the rose,' on account of its colour,) Roseolæ.

ROSEMARY, Rosmarinus—r. Marsh, Statice limonium, and S. Caroliniana—r. Wild, Eriocephalus umbellulatus.

RO'SENHEIM, MIN'ERAL WA'TERS OF. Rosenheim is 34 miles S. E. from Münich, in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.

ROSENMÜLLER, ORGAN OF, Parovarium.

ROSE'OLA, *Exanthe'sis Rose'ola, Rose Rash*, (F.) *Roséole, Éruption anomale, Rosace, Fièvre rouge, Efflorescence érysipélateuse*, (from *rosa*, 'the rose,' on account of the colour.) An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, rheumatism, &c., and is of no consequence. See Roseolæ, Rubeola, and Scarlatina.

Roseola Acnosa, Gutta rosea.

Roseola Æsti'va. The affection which prevails in summer. The eruption is of a darker colour, and is attended with more itching.

Roseola Annula'ta. Characterized by patches in the form of rosecoloured rays, with central areas of the colour of the skin.

Roseola Ficosa, Sycosis—r. Typhosa, Spots, red—r. Variolosa, Roseolæ.

ROSE'OLÆ, *Rose'ola, Roselli'na, Rube'ola spu'ria, False* or *French measles*, (F.) *Roséole, Fausse rougeole*. This name is given by some to an acute exanthem, midway between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rube'olæ* by some, and *Rube'oloid*, a term, which is applicable to any eruption resembling rubeola. An eruption which often precedes that of smallpox is termed *Roseola Variolo'sa*.

ROSÉOLE, Roseola, Roseolæ.

ROSEPINK, Chironia angularis.

RO'SES, MILK OF. A cosmetic wash, formed, according to one method, of *Subcarbonate of potass*, gr. vj; *Oil of almonds*, ℥j; *Essence of bergamot*, ℥ij; *Rose water*, ℥iij; *Orange flower water*, ʒij. Mix.

ROSEUS, (from *rosa*,) Rhodinus.

ROSEWOOD, Rhodium lignum.

ROSEWORT, Rhodia.

ROSIER BLANC, Rosa alba—*r. à Cent Feuilles*, R. centifolia—*r. de Provins*, Rosa Gallica.

ROSIN, BLACK, (from *resina*,) Colophonia—r. Brown, Colophonia.

Rosin Weed, Silphium laciniatum.

Rosin, White, see Pinus sylvestris—r. Yellow, see Pinus sylvestris.

ROSIO STOMACHI, (from *rodere, rosum*, 'to corrode,') Cardialgia—r. Ventriculi, Cardialgia.

ROSMARINUM, Rosmarinus.

ROSMARI'NUS, (*ros*, 'dew,' and *marinus*, 'marine,') *R. officina'lis* seu *latifo'lius* seu *hortensis, Alchachil, Libano'tis corona'ria, Dendrolibanus, Rose'mary*, (F.) *Romarin, Rose marine, Encensier; Ord.* Labiatæ. *Sex. Syst.* Diandria Monogynia. The tops of this plant, *Rosmari'nus* (Ph. U. S.), *Herba Anthos*, have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos*, ἄνθος. Its oil—*O'leum Rosmari'ni*—is officinal. From two to six or ten drops are given in nervous complaints, rubbed up with sugar.

Rosmarinus Hortensis, Rosmarinus—r. Latifolius, Rosmarinus—r. Officinalis, Rosmarinus—r. Stœchadis facie, Teucrium creticum—r. Sylvestris, Ledum sylvestre.

ROSSALIA, (from *rosa*, 'the rose,' from its colour.) Scarlatina—r. Squamosa, Scarlatina.

ROSSIGNOL, (pron. *Rossiniol.*) A name given, in France, to an affection to which pressmen are subject. It is a sprain, followed by tumefaction of the radiocarpal joint.

ROSSOLIO, see Spirit.

ROS'TRUM, *Ram'phos*, 'a beak.' (F.) *Bec*. A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corvi'num, anati'num, psittaci'num, vulturi'num, cyg'neum* seu *olori'num, grui'num, lacerti'num*, &c.

Rostrum Externum, Olecranon—r. Porcinum, Acromion—r. Posterius, Olecranon—r. Sphenoidale, Azyges processus.

ROSY BETTY, Erigeron bellidifolium—r. Bush, Spiræa tomentosa—r. Drop, Gutta rosea—r. Whelk, Gutta rosea.

ROT, (from [L.] *ructus*,) Eructation.

ROT, GRINDERS', Asthma, grinders'.

ROT'ACISM, *Rotacism'us, Rottacism'us*, properly *Rhotacis'mus, Psellis'mus rhotacis'mus*, (F.) *Grasseyement*. A vicious pronunciation of the Greek, P, *Rau*, common in the northern parts of England; especially near Newcastle. Called, there, the *Burr* or *Burrh*.

ROTACISMUS, (ῥωτακισμος,) *Grasseyement*, Rotacism.

ROTATIO, (*rotare, rotatum*, 'to turn round,') Diarthrosis.

ROTA'TOR, (*rotare, rotatum*, (*rota*, 'a wheel,') 'to turn round.') (F.) *Rotateur.* A name given to several muscles that turn the parts to which they are attached upon their axes; — such as the oblique muscles of the eyes, the pronators, supinators, &c.

ROTATOR, Trochanter.

ROTATO'RES DOR'SI. Eleven small muscles on each side of the dorsal vertebræ, which arise from the point or upper edge of each transverse process, and pass to the lower edge of the arch of the vertebra above, as far as the base of the transverse process. Their action is to rotate the individual vertebræ on each other.

ROTATORES FEMORIS, Obturatores — r. Oculi, Oblique muscles of the eye.

ROTCOLL, Cochlearia armoracia.

ROTTACISMUS, Rotacism.

ROTTLE'RA SCHIMPERI, (after Dr. Rottler, a Danish missionary.) A large tree of Abyssinia, *Nat. Ord.* Euphorbiaceæ, the bark of which, called *Cortex muse'næ*, and formerly known as *Cortex Brayeræ anthelmin'ticæ*, mixed with koosso, is used in that country against tapeworm.

ROTTLE'RA TINCTO'RIA. A euphorbiaceous plant of India. A powder is attached to the fruit capsule of this plant, which is brushed off and collected when the fruit is dry. It is called *Kameyla, Rottle'ra*, (Ph. U. S., 1863,) or *Kameela, Kame'la* (Ph. B. 1864); is used in Northern India as a vermifuge for dogs; and has proved effectual against tapeworm in man. The dose is two or three drachms, which purges.

ROTULA, (dim. of *rota*, 'a wheel,') Patella, Trochiscus—r. Genu, Patella.

ROTULAD, see Rotular aspect.

ROT'ULAR, (from *rotula.*) Relating or appertaining to the patella.

ROTULAR AS'PECT. An aspect towards the side on which the rotula is situated.—(Barclay.) *Rot'ulad* is used by the same writer, adverbially, to signify 'towards the rotular aspect.'

ROTULE, Patella.

ROTU'LIAN, *Rotulia'nus*, (F.) *Rotulien.* Relating or belonging to the rotula or patella.

ROTUNDUS, (from *rota*, 'a wheel,') Round.

ROUCOU, Terra Orleana.

ROU'EN, MIN'ERAL WA'TERS OF. This water, known under the name, *Eau des fontaines de la Maréguerie*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

ROUGE, 'red,' (from [L.] *rubeo*, 'to be red,') see Colcothar — *r. d'Angleterre*, Colcothar — *r. de Prusse*, Colcothar—*r. du Sang*, Hæmatin.

ROUGEOLE, (from [F.] *rouge*, 'red,') Rubeola—*r. Fausse*, Roscolæ.

ROUGEURS, (from [F.] *rouge*, 'red,') Flush.

ROUGH ROOT, Liatris.

ROUILLÉ, (originally from *rubigo*, 'rust,') Rubiginous.

ROULEMENT DU LAMBEAU, 'rolling of the flap,' see Flap.

ROUND, *Te're, Rotun'dus*, (F.) *Rond*, (from [L.] *rotundus.*) Anatomists have given this name to many organs whose fibres are collected in round fasciculi. See Teres.

ROUND FORA'MEN, *Fora'men rotund'um.* A foramen of the sphenoid bone, a little behind the *foramen lacerum superius*, which gives passage to the second branch of the fifth pair of nerves, called *superior maxillary.*

ROUND HEART, Thaspium atropurpureum.

ROUND LIG'AMENTS OF THE U'TERUS, *Ligamen'ta rotund'a U'teri*, (F.) *Cordons sus-pubiens* (Ch.), *Cordons vasculaires, Ligaments ronds de l'utérus.* Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the areolar tissue of the groins, mons veneris, and labia majora. These cords are whitish, flattened, and narrower in the middle than at the extremities. According to Mr. Rainey, they are composed chiefly of the striped muscular fibre.

ROUNTREE, Sorbus aucuparia.

ROUP, (like croup, by onomatopœia [?]), Cynanche trachealis, Raucedo.

ROURE, Rhus coriaria.

ROUTINE PRACTITIONER, Routinist.

ROUTINIST, pronounced *routeen'ist*; (F.) *Routinier*; ([F.] *routine*, 'a regular habit or practice, unvaried by circumstances,' from *route*, 'a road.') One who practises in such an unvaried manner:—a *routine practitioner.*

ROUVRE, Rhus coriaria.

ROVE, (from *rive*,) Scab.

ROVING, 'wandering,' Delirium.

ROWANTREE, Sorbus aucuparia.

ROWLAND'S SPRINGS, see Georgia, mineral waters of.

ROWTING, (from [Sax.] hputan, 'to snore,') Snoring.

RUBBER, INDIAN, Caoutchouc.

RUBBING, ([G.] reiben, 'to rub,') Friction —r. Dry, see Friction—r. Moist, see Friction.

RUBBING SOUND, *Bruit de Frottement.*

RUBE'DO, gen. *Rube'dinis, Ru'bor*, 'redness;' (from *rubere*, 'to be red.') A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

RUBEFA'CIENT, *Erethis'ma, Erethis'ticum, Rubefa'ciens, (ruber*, 'red,' and *facio*, 'I make.') (F.) *Rubéfiant.* That which produces redness. A medicine which causes redness of the skin. The action is called *Rubefaction.*

RUBÉFIANT, Rubefacient.

RUBE'OLA, *Rubeola vulga'ris*, (from *rubeo*, 'I am red.') *Rose'olæ, Exanthe'sis, Rube'olæ, Vetera'na, Blac'ciæ, Fer'sæ, Blac'tiæ, Bovil'læ, Morbil'li, Scarlati'na pustulo'sa* seu *milia'ris, Fe'bris morbillo'sa, Ty'phus morbillo'sus, Phœnicis'mus, Ecphy'mata, Measles,* (Sc.) *Mirles,* (Prov.) *Creas, Crewds, Malls, Maules, Meas'lings,* (F.) *Rougeole, Fièvre morbilleuse.* One of the major exanthemata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the fourth, but sometimes on the third, fifth, or sixth day of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from ten to fourteen days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary areolæ of flea-bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single, circular dots and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous of itself; but it is liable to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of RUBEOLA SPU'RIA, which he calls RUBEOLA *sine* CATAR'RHO. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the

common or regular disease. He also gives the name, Rubeola Ni'gra or Black Measles, to an unusual appearance of the measles about the seventh or eighth day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids and tonics.

Epidemic measles has occasionally prevailed largely in the military service, and has been called *Camp Measles*.

Rubeola Spuria, Roseolæ.

RUBEOLÆ, Roseolæ.

RUBEOLOID, (*rubeola*, and *oid*,) see Roseola.

RU'BIA, (from *ruber*, 'red.') *R. tincto'rum* seu *peregri'na* seu *sylves'tris* seu *ma'jor*, *Erythrod'anum*, *Ra'dix ru'bra*, *Dyer's Mad'der*, *Mad'der*, (F.) *Garance*. *Family*, Rubiaceæ. *Sex. Syst.* Tetrandria Monogynia. The root—*Ru'bia*, (Ph. U. S.) —has a bitterish, somewhat austere, taste, and a slight, not agreeable, smell. It was formerly considered deobstruent, detergent, and diuretic.

RUBIG''INOUS, *Rubigino'sus*, (from *rubigo*, gen. *rubig''inis*, 'rust,') (F.) *Rouillé*, Rusty. Having the colour of rust. An epithet given to the sputa in certain cases of pneumonia.

RUBINUS VERUS, (from *ruber*, 'red,') Anthrax.

RUBOR, 'redness,' Rubedo.

RUBRI'CA FABRI'LIS, (from *ruber*, 'red.') A red, heavy, earthy matter, formerly employed for making drying plasters; *Hard Ruddle*, *Red Chalk*.

Rubrica Sinop'ica. A heavy, compact, reddish earth from Sinope: formerly used in diarrhœa.

RUBRIN, (from *ruber*, 'red,') Hæmatin.

RU'BUS, (from *ruber*, 'red.') The pharmacopœial name (Ph. U. S. 1863) of the root of *Rubus Canadensis* and *Rubus villosus*.

RUBUS AFFINIS, R. fruticosus.

Rubus Arc'ticus, *Shrub'by Straw'berry*, *Bac'cæ Norland'icæ*. *Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The fruit is recommended by Linnæus as possessing antiseptic, refrigerant, and antiscorbutic qualities.

Rubus Batus, R. cæsius.

Rubus Cæ'sius, *R. Ba'tus*, *Dew'berry plant*, (F.) *Ronce bleue*. The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. Trivia'lis* seu *Canaden'sis* seu *procum'bens* seu *flagella'ris*, *American Dewberry*, *Low Blackberry*, is astringent.

Rubus Canadensis, see R. cæsius.

Rubus Chamæmo'rus, *Cloud'berry Tree*, *Chamæmo'rus*, *C. Norwe'gica*, *Chamæ'drys*, *Cloud'berries*, *Knotberries*, (F.) *Ronce de Montagne*. The ripe fruit is sometimes prepared as a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

Rubus Flagellaris, see R. cæsius—r. Frambœsianus, R. idæus — r. Frondosus, R. fruticosus.

Rubus Frutico'sus, *R. affi'nis* seu *panicula'tus* seu *ni'ger* seu *frondo'sus* seu *vulga'ris*, *Com'mon Bram'ble*, which affords *Black'berries*, *Bram'bleberries*, (Prov.) *Bum'blekites*, (F.) *Ronce noire*. The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villo'sus*, *American Blackberry*, *High* or *standing Blackberry*, *Hairy American Bramble*, is astringent, and has been used in the last stages of dysentery, and in cholera infantum.

Rubus Idæ'us, *R. frambœsia'nus*, *Ba'tos*; *Rasp'berry*, (F.) *Framboise*, *Ronce*. The fruit of the best varieties — *Rasps*, (Prov.) *Hindberries*— is extremely agreeable; and is much used. It was, formerly, called *Batinon moron*, (βατινον μορον).

Rubus Niger, R. fruticosus — r. Occidentalis, see R. strigosus—r. Paniculatus, R. fruticosus—r. Procumbens, see R. cæsius.

Rubus Strigo'sus, *Wild red rasp'berry*, of the United States. The leaves are often used as a mild astringent, as well as those of *Ru'bus occidenta'lis*, *Black Rasp'berry*.

Rubus Trivialis, see Rubus cæsius—r. Villosus, see Rubus fruticosus—r. Vulgaris, R. fruticosus.

RUCKING (from *ructus*,) Eructation.

RUCTAMEN, (from *ructare*, *ructatum*, 'to belch.') Eructation.

RUCTATIO, Eructation.

RUCTUATIO, Eructation.

RUCTUOSITAS, see Eructation.

RUCTUS, Eructation—r. Acidus, Oxyregmia—r. Nidorosus, Cnissoregmia.

RUDBECK'IA LACINIA'TA, (after the Rudbecks, of Upsal,) *Coneflower*, *Thimbleweed*; indigenous: *Order*, Compositæ; is diuretic, and has been given in nephritic affections.

RUDDLE, HARD, Rubrica fabrilis.

RUDIMEN'TAL, *Rudimenta'lis*, (F.) *Rudimentaire*, (*rudimentum*, (from *rudis*, 'rude,') 'the first beginning.') That which is but slightly developed.

RUDOLPHIA FRONDOSA, (after C. A. Rudolphi, a botanist of Jena,) Butea frondosa.

RUE, Ruta—r. *de Chèvre*, Galega officinalis—r. Common, Ruta—r. Goat's, Galega officinalis—r. Goat's, Virginia, Galega Virginiana — r. Meadow, Thalictron—r. *des Murailles*, Asplenium ruta muraria — r. *des Prés*, Thalictron — r. *Sauvage*, Ruta.

RUELLES, Wrinkles.

RUFT, (from *rive*, *rived*,) Eructation.

RUGA, pl. *Rugæ*, Wrinkle.

RUGINE, (from *Runcina*,) Raspatorium.

RUGISSEMENT, Rugitus.

RUGI'TUS, *Brycheth'mus*, (*rugire*, *rugitum*, 'to roar.') (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

RUGOSE, (from *ruga*,) Wrinkled.

RUGOUS, Wrinkled.

RUM, *Taf'ia*, *Spir'itus Jamaicen'sis*, *Molas'ses Spirit*, (F.) *Rhum*. A spirit distilled from sugar, or molasses. See Spirit.

RUMA, Mamma.

RUM, BAY, Spiritus myrciæ.

RUM BUDS, Gutta rosea.

RU'MEX ACETOSELLA, gen. *Ru'micis*, (from *rumo*, 'to suck,' in allusion to the Romans sucking it to allay thirst [?]), *Sheep Sor'rel*, *Field Sorrel*; indigenous; has similar virtues with

Rumex Aceto'sus, *R. tubero'sus* seu *interme'dius*, *Lap'athum praten'sē*, *Ox'alis Aceto'sa*, *Aceto'sa vulga'ris* seu *praten'sis* seu *nos'tras*, *Anax'yris*, *A. arven'sis*, *Sour dock*, *Sor'rel*, *Com'mon Sor'rel*, (Sc.) *Docken*, (F.) *Oseille*, *Vinette*, *Aigrette*, *Surelle*. *Ord.* Polygonaceæ. *Sex. Syst.* Hexandria Trigynia. The leaves are sour, and are used in cookery, and also as a refrigerant.

Rumex Acu'tus, *Sharp-pointed Wild dock*, *Oxylap'athum*, *Lap'athum*, *L. sylves'trē* seu *acu'tum*, *Ru'mex*, *R. paludo'sus* seu *pusil'lus*, *Lop'athus*, (F.) *Patience sauvage*. A decoction of the root has long been used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

Rumex Ætnensis, R. scutatus.

Rumex Alpi'nus, *Aceto'sa Alpi'na*. The systematic name of the plant that affords *Monk's Rhubarb*, (F.) *Rhabarbe des Moines*. See Rumex patientia.

Rumex Aquaticus, Rumex hydrolapathum—r. Britannica, Rumex hydrolapathum—r. Confertus, R. patientia — r. Digynus, Oxyria reniformis — r. Glaucus, R. scutatus — r. Hastatus, R. scutatus—r. Hastifolius, R. scutatus.

Rumex Hydrolap'athum, *Water Dock*, (Old Eng.) *Brokeleak, Hydrolapathum, Ru'mex aquat'icus* seu *Britan'nica, Her'ba Britan'nica, Lap'athum aquat'icum*, (F.) *Parelle, Patience d'eau*. The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

Rumex Intermedius, R. acetosus.

Rumex Obtusifo'lius, *Lap'athum sylves'trē, Blunt-leaved Dock, Bit'ter dock*. The root of this, as well as of R. Crisʼpus, *Curl'ed*, or *Sour*, or *Yel'low Dock—Rumex*, (Ph. U. S.,)—has similar virtues to those of the other species. Both have been used in decoction in the same cases as sarsaparilla.

Rumex Oxyotus, R. scutatus—r. Paludosus, R. acutus.

Rumex Patien'tia, *R. confer'tus, Lap'athum horten'sē, Rhabar'barum monacho'rum, Hippolap'athum, Patien'tia, Gar'den Pa'tience, Monk's Rhu'barb*, (F.) *Patience, Rhubarbe sauvage, Parelle*. This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree, is, according to Linnæus, obtained from the *Rumex patientia*; acrording to Murray, from the *Rumex alpi'nus*.

Rumex Pusillus, R. acutus.

Rumex Sanguin'eus. The root of the *blood'y dock* or *bloody vein'ed Dock*, has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lap'athum sanguin'eum*, (F.) *Oseille* ou *Patience Rouge, Sangdragon*.

Rumex Scuta'tus, *R. glan'cus* seu *hastifo'lius* seu *Ætnen'sis* seu *oxyo'tus* seu *hasta'tus, Aceto'sa rotundifo'lia* seu *Roma'na* seu *Rotundifolia horten'sis* seu *scuta'ta, Lap'athum scuta'tum* seu *rotundifo'lia, Ro'man* or *Gar'den Sor'rel, Green Sauce, French Sor'rel*, (F.) *Oseille boucher, Oseille ronde, Petite Oscille*. Virtues the same as those of the common sorrel.

Rumex Tuberosus, R. acetosus.

RUMINA'TION, *Rumina'tio*, (*ruminare*, 'to chew again,' from *ruma* or *rumen*, 'the ingluvies.') *Merycis'mus*. A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man. One who ruminates is termed, in French, *mérycole*.

RUMIS, Mamma.

RUMMET, Pityriasis.

RUMP, ([D. Romp, [G.] Rumpf,) *Croupon*—r. Bone, Coccyx.

RUNCHES, Sinapis arvensis.

RUNCINA, 'a plane,' Raspatorium.

RUNCINULA, (dim. of *runcina*,) Raspatorium.

RUNKILL, Wrinkle.

RUNKLE, Wrinkle.

RUNNET, Rennet.

RUN'NING, *Cur'sus*, (F.) *Course*. A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.

Running, Rennet.

RUN ROUND, see Paronychia.

RUNSH, Sinapis arvensis.

RUPES, 'cliffs,' Lips of the Vulva. See Lip.

RU'PIA, *Rhy'pia, Ul'cus aton'icum, Ec'phlysis Rhy'pia, Rhypa'ria*, (from ῥυπος, 'filth.') An eruption of large flattish blebs, which contain a fluid—at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.

It requires the use of tonics internally, and of stimulating ointments externally.

Rupia Escharot'ica, *Pem'phigus infan'tilis* seu *gangræno'sus*; known in Ireland under the names—*white blis'ters, eat'ing hive*, and *burnt holes*. An affection which bears a close similarity to pemphigus, particularly in the absence of a thick rugous crust, whilst in its chief feature, that of ulceration, it evidently belongs to Rupia.

RU'PIAL, *Rupia'lis*. Appertaining or relating to rupia.

RUPTIBILITAS, (*ruptio* and *habilis*, 'able,') Fragilitas.

RUPTILITAS, Fragilitas.

RUPTIO, (from *rumpere, ruptum*, 'to break,') Rhexis.

RUPTORIUM, (from *rumpere, ruptum*, 'to break,') Cautèrium—r. Commune, Potassa fusa.

RUPTURA, (from *rumpere, ruptum*, 'to break,') Ecrexis, Hernia, Laceration, Rhexis—r. Corneæ, Ceratorrhexis — r. Herniosa, Hernia — r. Ovarii, Oariorrhexis—r. Uteri, Uterus, rupture of the—r. Vaginæ, Colporrhexis.

RUPTURE, (from *rumpere, ruptum*, 'to break or burst,') Hernia, Rhexis—*r. du Cœur*, Cardiorrhexis—r. of the Groin, Bubonocele—*r. de la Matrice*, Uterus, rupture of the—r. Wort, Herniaria glabra.

RUPTURED, see Hernial.

RUS'CUS, *R. aculea'tus, Brus'cus, Oxymyr'rhinē, Oxymyr'sinē, Myrtacan'tha, Catan'gelus, Myacan'tha, Sco'pia re'gia, Wild Myr'tle, Centromyr'inē, But'cher's Broom*, (Prov.) *Knecholly*, (F.) *Petit houx, Fragon. Ord.* Smilaceæ. *Sex. Syst.* Dicœcia Monadelphia. The root has been recommended as an aperient and diuretic.

Ruscus Aculeatus, Ruscus.

Ruscus Hypoglos'sum, *Uvula'ria, Hypoglos'sum, Hippogloss'um* [?], *Bislin'gua, Bonifa'cia, Lau'rus Alexandri'na angustifo'lia*, (F.) *Laurier Alexandrin, Langue de cheval*. Formerly used against relaxed uvula.

RUSH, SWEET, ([Sax.] rirc, rurc, 'a reed.') Acorus calamus, Juncus odoratus.

Rush, Uterine, ([D.] *ruischen*, 'to murmur,') *Bruit placentaire*.

RUSMA, see Orpiment.

RUSPINI'S STYPTIC, (pron. *Ruspeen'i*'s,) see Styptic, Ruspini's.

Ruspi'ni's Tincture for the Teeth. An empirical preparation, composed of *Florentine orris* ℥viij, *Cloves* ℥j, *Rectified spirit* Oij, *Ambergris* ℈j.

RUT, (from *rugitus*, 'the exclamation of animals in heat,') Heat.

RU'TA, (ῥυτη,) *R. grave'olens* seu *horten'sis* seu *al'tera, Peg'anum, Beso'sa, Com'mon Rue*, (F.) *Rue, Rhue, Rue sauvage, Herbe de grace; Ord.* Rutaceæ. *Sex. Syst.* Decandria Monogynia. The plant has a strong, ungrateful odour, and bitter pungent taste. It is so acrid as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to ℈ij. The leaves are officinal—*Ru'ta*. (Ph. U. S.)

O'leum Ru'tæ, distil'led Oil of Rue, is antispasmodic; and, externally, rubefacient. Dose, gtt. ij to vj.

Ruta Altera, Ruta—r. Capraria, Galega officinalis—r. Graveolens, Ruta—r. Hortensis, Ruta—r. Muraria, Asplenium ruta muraria.

RUTABULUM, Penis.

RUTA'CEUM, (from *ruta*.) Vinegar of rue.

RUTIDOMA, gen. *Rutido'matis*, see Rutidosis.

RUTIDO'SIS, *Rytido'sis, Rhytido'sis*, (ῥυτιδωσις, from ῥυτιδοω, 'I wrinkle,' and *osis*.) The act of wrinkling; as *Rutido'ma* means a shrivelled or

wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIA'NA TU'NICA, (F.) *Lame* ou *Membrane Ruyschienne.* According to Ruysch, (pron. *Rīsch,*) the Dutch anatomist, and the greater part of his disciples, the choroid coat of the eye is formed of two laminæ. His son gave to the inner the name *Tu'nica Ruyschia'na* or *Membra'na Ruyschia'na* seu *Ruysch'ii.*

Tu'nica Cellulo'sa Ruyschia'na is the areolar substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE, ([Sax.] ryge,) Secale—r. Horned, Ergot—r. Robbin's, Polytrichum juniperinum—r. Spurred, Ergot,

RYTIDOSIS, Rutidosis.

RYTIS, (ῥυτις,) Wrinkle.

S.

S, S. A. &c., see Abbreviation.

S. Romanum, Sigmoid flexure of the Colon.

SAAG, Urine.

SABADILLA, ([S.] *Cebadilla,*) Veratrum sabadilla, see Veratrina.

SABADILLIN, see Veratrina.

SABATILLA, Veratrum sabadilla.

SABBATIA, (after *Sabbati,* an Italian botanist,) Chironia angularis—s. Angularis, Chironia angularis.

SABINA, Juniperus sabina.

SABINE, Juniperus sabina.

SABLÉ, 'sanded,' (from *sabulum,* 'sand.') Having the appearance as if strewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewed with red sand. Such is the case in cerebral hyperæmia.

SABOT DE VÉNUS JAUNE, 'yellow sabot of Venus,' Cypripedium luteum.

SABUCUS, Sambucus.

SAB'ULOUS, *Sabulo'sus, Areno'sus, Psammo'des,* (*sabulum,* 'sand.') The sandy deposit often seen in the urine.

SABULUM CONARII, see Pineal gland.

SABURA, Saburra.

SABUR'RA, *Sabu'ra, Sor'des,* (F.) *Saburre.* This word signifies, by derivation, 'coarse sand, or ballast,' *sabulum.* In its common acceptation, it means *foulness of the stomach,* as it is sometimes called;—vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly digested. The *Sabur'ral state, Collu'vies gas'trica, Crudita'tes ventric'uli, Gastris'mus,* (F.) *Embarras gastrique, État saburral,* is an accumulation of saburræ in the stomach, (F.) *Saburres gastriques,* which the Humorists considered to be the cause of a number of diseases.

Saburra Verminosa, Helminthiasis.

SABUR'RAL, *Saburra'lis.* Relating or appertaining to saburræ,—as the '*saburral* state.'

SABURRATIO, Arenatio.

SABURRE, Saburra.

SABURRES GASTRIQUES, see Saburra.

SAC, see Sack—*s. Herniaire,* Hernial sac—s. Lachrymal, see Lachrymal puncta—s. of the Omentum, see Epiploon, gastrohepatic.

SACCADÉ, see Respiration, jerking.

SACCA'TED, *Sacca'tus,* (from *saccus,* 'a sac,') Encysted. Also, ponched, as the Colon. *Sac'culated, Saccula'tus,* are diminutives of Saccated, and Saccatus.

SACCHAR, (σακχαρ,) Saccharum.

SACCHARHYDROLÉ, Syrup.

SACCHARI FÆX, 'dregs of sugar,' Melasses.

SACCHARINA, *Saccharolés.*

SAC'CHARINE, *Sacchari'nus,* (F.) *Saccharin, Glucosique, Glycosique,* (from *saccharum,* 'sugar.') Having the nature of, or containing, sugar.

SACCHARO-ALCOOLÉ, Ratafia.

SACCHAROGUMMITA, (*saccharum,* and *gummi,*) see Glycyrrhiza.

SACCHAROLÉ LIQUIDE, Mellitum, Syrup—*s. Mou,* Conserva, Electuarium—*s. Solide,* see Pastel, and Tabella.

SACCHAROLÉS (F.), *Sacchari'na,* (from *saccharum.*) A name given by MM. Henry and Guibourt to medicines which have sugar or honey for excipient, or for predominant principle. M. Béral so calls an exact mixture of pulverized sugar with other substances also in powder, but in less quantity.

SACCHAROM'ETER, (F.) *Saccharomètre, Pèse-sirop,* (*saccharum,* and μετρον, 'measure.') A hydrometer adapted for determining the density of syrups. See Areometer.

SACCHAROMYCES, (*saccharum,* and μυκης, 'fungus,') Torula cerevisiæ.

SACCHARORRHŒA, (*saccharum,* and ῥεω, 'to flow,') Glycyrrhœa—s. Cutanea, Sudor dulcis.

Saccharorrhœ'a Lac'tea, *Galactorrhœ'a saccharo'ta.* A secretion of unusually sweet milk.

Saccharorrhœa Pulmona'lis, *Spu'tum dul'cē* seu *saccharo'tum.* The copious expectoration of unusually sweet matter from the lungs.

Saccharorrhœa Urinosa, Diabetes mellitus.

SAC'CHARUM, (σακχαρον,) *Sac'char,* (σακχαρ, from Arabic, or rather Sanscrit, *Sakar,* 'white earth;') *Su'char, Suc'char, Sut'ter, Zu'char, Zu'caro, As'sakur, Ti'gala, Zac'charum, Zo'zar, Zu'charum, Zuc'carum, Zu'chra, Mel arundina'ceum, Sugar,* (F.) *Sucre.* The produce of the juice of *Sac'charum officina'rum* seu *officina'lē* of Linnæus, *Cal'amus Indicus* seu *Sacchari'nus, Arundo saccharif'era* of Sloane; *Sugar Cane,* (F.) *Canne à Sucre, Cannamelle. Ord.* Graminеæ; *Sex. Syst.* Triandria Digynia; and also of the beet, maple, *Chinese sugarcane,* (*Sorg'hum sacchara'tum,*) &c.

True Sugars are those with which alcoholic fermentation *may be* effected, by the addition of yeast and water. They are:—

Species.	*Varieties.*
1.....	Hard sugar of the cane, maple, beet, chestnut, &c.
2.....	Liquid sugar, sugar of malt, of the sweet potato, melasses, honey, &c.
3.....	Hard sugar of the grape, ripe fruits, starch, diabetes, &c.
4.....	Hard sugar of the mushroom.

Imper'fect sugars are those in which alcoholic fermentation *cannot be* effected by means of yeast and water.

Species.	*Varieties.*
1	Manna.
2	Sugar of Milk.
3	Sugar of jelly or glue.
4	Liquorice.
5	Picromel.

Sugar is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is nutritious, and is employed as an aliment, and as a eutrophic demulcent and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

Liv'er or *Hepat'ic Sugar*, (F.) *Sucre du Foie*, has been found to be a normal formation by the liver. It is more readily assimilated than other varieties of sugar. See Glucose.

Saccharum Acer'num, *S. Canaden'sē*, *Ma'ple Sugar*, is often used as a demulcent.

Sac'charum Album, *S. purifica'tum*, *Sac'charum* (Ph. U. S.), *Sal In'dus*, *White Sugar*, *Refined' Sugar*, is the *Loaf Sugar*. *Doublerefined Sugar* has been called *Tabar'zet*.

Saccharum Alumina'tum. Equal parts of *white sugar* and *alum*, powdered. Used as a styptic.

Saccharum Can'didum, *S. can'dum* seu *can'tum* seu *can'thum*, *Al'phenic*, *Na'bot*, *Sugarcan'dy*, *Sugar can'died*, (F.) *Sucre Candi*, is the crystallized juice of the cane.

Saccharum Candum, S. Candidum — s. Canthum, S. Candidum—s. Cantum, S. Candidum—s. Commune, Saccharum nonpurificatum.

Saccharum Hordea'tum, *Bar'ley Sugar*, (Prov.) *Sugar bar'ley*, *Pen'ides*, *Penid'ium*, *Sac'charum penid'ium*, is a variety of sugar candy.

Saccharum Lactis, Sugar of milk.

Saccharum Nonpurifica'tum, *Muscova'do*, *raw*, *brown*, or *moist sugar*, is the *S. commu'nē*, *S. ru'brum*, *Mel can'næ*, or *coarse sugar*.

Saccharum Officinarum, see Saccharum — s. Penidium, S. hordeatum—s. Rosaceum, Confectio rosæ gallicæ—s. Saturni, Plumbi superacetas.

Saccharure, (from *saccharum*.) A medicine resulting from the intimate union of sugar with the medicinal principles of alcohol or ethereal tinctures.

Sacculated, Encysted, see Saccated.

Sacculatus, Encysted, see Saccated.

Sacculi Adiposi, (pl. of *Sacculus*,) Fatty vesicles—s. Chalicophori, see Lacunæ of Bone—s. Laryngei, Ventricles of the larynx.

Sac'culi Medicina'les. Bags containing medicinal substances.

Sacculi Medullares, see Medullary membrane.

Sac'culus, (dim. of *saccus*, 'a sac.') This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithi* and *otoconia*: one of these is termed the *sacculus vestib'uli*; the other *sacculus*. See Semicircular canals.

Sacculus, Marsupion — s. Cephalicus, Cucupha — s. Chylifer seu rorifer, Receptaculum chyli —s. Cordis, Pericardium—s. Ellipticus, see Semicircular canals — s. Lactiferus, see Lactiferous vessels.

Sac'culus Laryn'gis. A cæcal pouch, of variable size, formed by the mucous membrane in the ventricles of the larynx.

Sacculus Medicinalis, Pulvinar medicatum —s. Sphæricus, see Semicircular canals—s. Vesical, see Bladder, sacculated — s. Vestibuli, Semicircular canals, see Sacculus.

Saccus, (σακκος,) Sac — s. Cæcus coli, Cæcum — s. Coli, Cæcum — s. Cordis, Pericardium — s. Epiploicus, Epiploon — s. Herniosus, Hernial sac — s. Intestini crassi, Cæcum — s. Lacrumalis, Lachrymal sac — s. Lacrymalis, Lachrymal sac — s. Lacteus, Receptaculum chyli — s. Mucosus, see Bursæ mucosæ — s. Peritonæi retroventricularis, see Epiploon, gastrohepatic — s. Pleuræ, Pleura — s. Venarum cavarum, Sinus dexter cordis — s. Venarum pulmonalium, Sinus pulmonalis—s. Ventriculi, see Stomach.

Sacer, 'sacred, holy,' Sacral — s. Ignis, Herpes zoster—s. Morbus, Epilepsy—s. Musculus, Transversalis dorsi.

Sacerdotis Penis, (gen. of *sacerdos*, 'a priest,') Arum maculatum.

Sachet (F.), (from *sac*,), *Sac'culus*. A small bag containing perfumes to be placed among clothes, to communicate to them an agreeable odour. The following is a formula for the powder they contain. *Powdered cloves* and *powdered cassia*, each one ounce; *powdered orris root*, an ounce and a half; *powdered yellow sandal wood*, one drachm; *otto of roses*, twentyfour drops; *oil of lavender*, *oil of bergamot*, each one drachm; *musk*, six grains. A scentbag.

Sack, (F.) *Sec*, 'dry.' A dry wine used by our ancestors; *Vin sec*. Probably, *Sherry*.

Sack, *Sac'cus*, *Secluso'rium*; (Sax. ꝑac.) A bag or pouch.

Sack, Her'nial, *Sac'cus hernio'sus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cervix* or *neck*, (F.) *Collet*, the narrow portion on the ontside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round, prominent part; and the *fundus* or *bottom*,—the part opposite to the orifice.

Sack Pos'set, (from *sack*, and *posset*.) A posset made of sack, milk, and other ingredients.

Sack, Se'rous. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

Sack Whey, Wine whey.

Sacra Fistula, Vertebral column.

Sacrad, see Sacral aspect.

Sa'cral, *Sa'cer*, *Sacra'lis*, (F.) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

Sacral Ar'teries are distinguished into, 1. The *ante'rior* or *mid'dle sa'cral*, *Me'dian Ar'tery of the Sa'crum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacrovertebral articulation, and on the anterior surface of the sacrum it furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *lateral sacral arteries*, which are two in number: one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off *external* and *posterior branches*, which enter the sacral foramina; and *internal branches*, which are distributed to the pyramidalis, sacrum, &c.

Sacral As'pect. An aspect towards the region where the sacrum is situated.—(Barclay.) *Sacrad* is used by the same writer adverbially to signify 'towards the sacral aspect.'

Sacral Extremities. The lower limbs.

Sacral Grooves, (F.) *Gouttières sacrées*. Two longitudinal excavations, slightly marked, at the

posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

Sacral Nerves, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, form the hypogastric plexus. The fifth and sixth (*coccygeʹal nerve*) are distributed to the ischiococcygeus muscle, and to the sphincter and levator ani.

Sacral Plexʹus, *Sciatʹic plexʹus*—the *saʹcral porʹtion of the cruʹral plexʹus* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *pudic*, (F.) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

SACRÉ, Sacral.

SAʹCRO, in composition, relating or belonging to the sacrum.

SACROCOCCYGEʹAL, *Sacrococcygeʹus*. Relating to the sacrum and coccyx.

Sacrococcygeal Articulaʹtion is that of the lower extremity of the sacrum with the superior *facette* of the coccyx. It is closed by two ligaments,—an *anterior* and a *posterior sacrococcygeal*.

SACROCOSTALIS, (*costa*, 'a rib,') Sacrolumbalis—*s. Fémoral*, Glutæus major.

SACROCOXALʹGIA, (*sacro*, *coxa*, 'the hip,' and *ἀλγος*, 'pain.') Some authors have called thus a rheumatic affection of the sacroïliac symphysis.

SACROÏLʹIAC, *Sacroïliʹacus*. That which relates to the sacrum and ilium.

Sacroïliac Articulaʹtion, Symʹphysis or Synchondroʹsis, *Ilʹiosaʹcral articulaʹtion*, *symʹphysis* or *synchondroʹsis*, is the union of two surfaces,—two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are incrusted by an articular cartilage. The bands which strengthen them are the two *sacrosciatic ligaments*, the *sacrospinal*, a *sacroïliac* ligament, and some irregular fibres. The *sacroïliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacroïliac articulation, *anterior sacroïliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacroïliac*.

SACROISCHIATICUS, Sacrosciatic.

SACROLOMBAIRE, Sacrolumbalis.

SACROLUMBALIS, Sacrolumbar.

SACROLUMʹBAR, *Sacrolumbaʹlis*, *Sacro-lombaire*. That which belongs to the sacrum and loins.

Sacrolumbar, *Sacrolumbaʹlis*, *Sacrolumbaʹris Musʹcle*, *Sacrocostaʹlis*, *Dorsotracheʹlian portion of the Sacrospinal*, of Chaussier, (F.) *Lombocosto-trachélien*, *Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ilii; to the extremities of the transverse processes of the lumbar vertebræ; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the posterior tubercle of the transverse processes of the last five cervical vertebræ. The sacrolumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Musʹculi Accessorʹii* seu *Additamenʹtum ad Sacrolumbaʹlem*, (F.) *Accessoires du Sacro-lombaire*.

From the upper part of the sacrolumbalis a fleshy slip, called *Cervicaʹlis descenʹdens*, *Cervicalis descendens Diemerbroeckʹii*, *Transversaʹlis collateraʹlis colʹli*, *Accessoʹrius ad Saʹcrolumbaʹlem*, (F.) *Transversaire grêle*, runs up, to be fixed to the transverse processes of the fourth, fifth, and sixth cervical vertebræ, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacrolumbalis.

SACROSCIATʹIC, *Sacroïschiatʹicus*. That which belongs to the sacrum and ischium.

Sacrosciatic Ligaments are two ligaments which assist in securing the sacroïliac articulation. The *great* or *posterior sacrosciatic ligament* extends from the crista ilii and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacrosciatic ligament* arises from the same point, and terminates in the spine of the ischium.

SACROSPINAL, Dorsotrachelian portion of the sacrolumbalis.

SACROSPINAʹLIS. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacrolumbalis, longissimus dorsi, transversalis, transversospinalis, and intertransversalis muscles. He divides it into three portions. It is the *Erecʹtor spiʹnæ*, *Extenʹsor dorsi commuʹnis*, *Lumʹbocostaʹlis*.

SACROTROCHANTÉRIEN, Pyramidalis.

SACROVERʹTEBRAL, *Sacrovertebraʹlis*. That which relates to the sacrum and the vertebræ.

Sacrovertebral Articulaʹtion is the junction of the last vertebræ of the loins with the sacrum. The angle, which these two bones form at the anterior part, has been called the *Promʹontory of the Saʹcrum*, or the *Sacroverʹtebral Anʹgle*.

Sacrovertebral Ligʹament is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its *use* is to maintain the articulation of those two bones *in situ*.

SAʹCRUM, (neuter of *sacer*,) *Os sacrum* seu *basilaʹrē* seu *Alʹugas* seu *laʹtum* seu *cluʹnium*, *Verʹtebra magʹna*, *Albugiaʹzi*, *Hiʹeron ostʹeon*, *Cluʹnis*, *Subverʹtebra*, *Subverʹtebrum*, *Vetʹula*, (from *sacer*, 'sacred;' because it contributes to protect the genital organs, which were considered sacred; or because it was offered in sacrifice.) The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and concave anteriorly. It has: 1. A *pelʹvic* or *anteʹrior surʹface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease in size from above downwards. Through them pass the anterior branches of the sacral nerves. 2. A *spiʹnal* or *posteʹrior surʹface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a continuation of the spinous processes of the vertebræ; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral*,

which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *ver'tebral sur'face* or *base*. Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it is seen the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection, formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Prom'ontory, Promonto'rium Os'sis Sa'cri, Great An'gle of the Sa'crum* or *Sa'crover'tebral An'gle*. 4. A *coccyge'al face* or *a'pex*, (F.) *Face coccygienne* ou *Sommet*, which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins*, which have, above, a broad, oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

SADDLE, TURKISH, Sella Turcica.

SÆPES, Sepes.

SAFFLOW, Carthamus tinctorius.

SAFFLOWER, Carthamus tinctorius.

SAFFRON, (Arab. *zafaran*, 'yellow,' [?]) Crocus —s. Bastard, Carthamus tinctorius—s. Dyers', Carthamus tinctorius.

SAFFRON FLOWER, Carthamus tinctorius.

SAFFRON, MEADOW, Colchicum autumnale.

SAFRAN, Crocus—*s. Bâtard*, Carthamus tinctorius, Colchicum autumnale—*s. des Indes*, Cureuma longa—*s. de Mars apéritif*, Ferri subcarbonas—*s. de Mars astringent*, Colcothar—*s. des Prés*, Colchicum autumnale—*s. Racine de*, Cureuma longa.

SAFRANUM, Carthamus tinctorius.

SAFRE, Smalt.

SAGA, Midwife. In ancient Rome, the Sagæ exercised, also, the calling of magicians, procuresses, and perfumers; and were more especially called upon to induce abortion. Also, Sago.

SAGABAN, Apios tuberosa.

SAGAPE'NUM, (σαγαπηνον,) *Sag'apin, Serapi'non*, (F.) *Gomme séraphique*. A gumresin, supposed to be obtained from the *Fer'ula Per'sica*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. Its odour is fetid and alliaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ʒss.

SAGAPIN, Sagapenum.

SAGE, Salvia—s. Indian, Eupatorium perfoliatum—s. Jerusalem, Pulmonaria.

SAGE TEA, Infusum salviæ.

SAGE TREE, Lantana.

SAGE, WILD, Salvia Africana, S. Lyrata.

SAGE-FEMME, 'sage or wise woman,' Midwife.

SAGENA, (σαγηνη, 'a seine,') Epiploon.

SAGESSE DES CHIRURGIENS, 'wisdom of the surgeons,' Sisymbrium Sophia.

SAGIMEN VITRI, Soda, subcarbonate of.

SAGIT'TAL, *Sagitta'lis, Sagitta'tus*, (from *sagitta*, 'an arrow.')

SAGITTAL FUR'ROW, *Sagit'tal Groove*, (F.) *Gouttière sagittale*, is a channel on the median line of the inner surface of the skullcap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

SAGITTAL SU'TURE, *Obelæ'a sutu'ra* seu *Ra'phē, Sutu'ra Virgu'ta* seu *Jugu'lis* seu *Rabdoï'des, Rhabdoï'des, Rhabdo'des, Rhabdoï'deus* seu *Biparieta'lis* seu *Interparieta'lis*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

SAGITTA'RIA VARIAB'ILIS, (from *sagitta*, 'an arrow,' owing to the prevalent form of the leaves.) *Ar'rowhead, Ar'rowleaf, Ar'rowweed, Wapata* of Oregon; *Nat. Ord.* Alismaceæ. Eseulent, yielding feeula like arrow-root. The roots are cooling and subastringent, and are at times applied to the feet in eases of yaws and dropsical swellings of the legs. The leaves are applied to the breasts to dispel milk.

SAGITTA'RIUM ALEXIPHAR'MACUM, *Malac'cæ ra'dix, Can'na In'dica, Arun'do In'dica*. A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

SAGITTATUS, Sagittal.

SA'GO, *Sa'gus, Sa'ga, Sa'gu, Se'gu, Am'ylum palma'ceum*, (F.) *Sagou, Sague:* (*saga* is the Malay name for various palms.) A feeula, obtained from the pith of the *Sa'gus Rumph'ii, Cy'cas circina'lis, C. revolu'ta*, &c., growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substanee is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemonjuiee, or wine, where the last is not contraïndieated.

To make sago into a proper mucilage for the siek, a tablespoonful of it should be maeerated in a pint of water for two hours, and then boiled for fifteen minutes, stirring assiduously. Care must be taken, that the grains are perfectly dissolved by long boiling and constant stirring.

Sago posset is made by putting *sago*, ʒij, into *water*, Oij; boiling until the mucilage is formed; then rubbing *sugar*, ʒss, on the rind of a lemon, and putting it with *tincture of ginger*, fʒj, into *sherry*, Oss; adding this mixture to the mucilage, and boiling for five minutes.—It is a good restorative.

SAGO, FRENCH, see Solanum tuberosum, and Arrow-root, common—s. Portland Island, see Arum maculatum.

SAGOU, Sago.

SAGU, Sago.

SAGUE, Sago—*s. Petit*, see Solanum tuberosum.

SAGUERUS GOMATO, see Toddy—s. Rumphii, see Toddy—s. Saccharifer, see Toddy.

SAGUS, Sago—s. Rumphii, see Sago.

SAHARA, Insomnia.

SAIDSCHÜTZ WATER, Seidschütz water.

SAIGNÉE, (from *saigner*, ([L.] *sanguis*, 'blood,') 'to bleed,') Bloodletting—*s. Spoliative*, Spoliativa phlebotomia.

SAIGNEMENT DU NEZ, 'bleeding of the nose,' Epistaxis.

SAIL'ORS, DISEASES, &c., OF. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be warded off by proper attention to cleanliness and ventilation.

SAIN BOIS, 'health wood,' Daphne gnidium—*s. Doux*, (from *sagina*, 'fatness,'), Adeps præparatus.

SAINT AMAND, MIN'ERAL WA'TERS OF. Sulphuretted waters, in the department of Du Nord, France. They contain carbonic and sulphohydric acids. The *Bone* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82° Fahrenheit. Season, from the 1st of June to the 1st of September.

SAINT ANTHONY'S FIRE, Erysipelas.

SAINT AUGUSTINE', CLI'MATE OF. This sea-port of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent northeast storms. There are only a few days, however, in winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida, and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

SAINT CATHERINE'S SPRINGS, see Canada, Mineral waters of.

SAINT CHARLES'S ROOT, Carlo Sancto (Radix).

SAINT CROIX, Santa Cruz.

SAINT JAMES'S WORT, Senecio Jacobæa, Thlaspi bursa.

SAINT JOHN'S DANCE, see Mania, dancing.—St. John's Wort, Hypericum perforatum.

SAINT KITTS, see West Indies.

SAINT LEON'ARD'S. CLI'MATE OF. This place, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than it, and is therefore a less favourable retreat, during the winter months, for the phthisical valetudinarian.

SAINT MYON, MIN'ERAL WA'TERS OF. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de-dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

SAINT NECTAIRE, MIN'ERAL WA'TERS OF. Springs in the department of Puy-de-Dôme, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103° Fah. Season, from June 15th to September 15th.

SAINT PARDAUX, MIN'ERAL WA'TERS OF. Chalybeate springs in the department of Allier. France. They contain carbonic acid and iron.

SAINT SAUVEUR, MIN'ERAL WA'TERS OF. Sulphurous waters in the department of Hautes-Pyrénées, France. Temperature, 76° to 93° Fah. The springs are frequented from May to October.

SAINT VINCENT'S, see West Indies.

SAINT VITUS'S DANCE, Chorea, see Mania, dancing — s. Vitus's Dance of the Voice Balbuties.

SAIR, (sore,) Ulcer.

SAIRE, Essera.

SAISON, Season.

SAKI, see Spirit.

SAL, gen. *Sal'is*, (ἅλς,) Salt—s. Absinthii, Potassæ subcarbonas, see Potash—s. Acetosellæ, Potass, oxalate of—s. Acetosus ammoniacalis, Liquor ammoniæ acetatis—s. Acidum benzoes, Benjamin — s. SALAAM or SALAM CONVULSION, see Convulsion, Salaam.

SALAB, Salep.

SALACITAS, Salacity, Satyriasis — s. Vulvæ, Nymphomania.

SALAC''ITY, *Sala'ciousness*, *Salac''itas*, (F.) *Salacité*, (*salax*, *sala'cis*, 'lustful, lecherous.') Lecherousness; strong desire for venery.

SALAD, (from [L.] *sal*, salt, [F.] *salé*, 'salted,') *Sallet*, (F.) *Salade*. Fresh herbs — as lettuce, dressed with salt, oil, vinegar, &c.

SALAD, CORN, Valeriana dentata.

SALAP, Salep.

SALCOMBE, CLIMATE OF. A small place—the Montpellier of Huxham—which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

SALEP', *Salop'*, *Saloop'* (usually so pronounced.) *Salab'*, *Salap'*. The prepared bulb of the *Or'chis mas'cula* and other species of Orchis. The salep of Cachmere is from a species of *Euloph'ia*. Salep is in small, irregular, hard masses. In its composition in relation to water, it is closely

analogous to tragacanth. It is possessed of similar virtue with sago, tapioca, &c. The mucilage is prepared by dissolving the powdered salep in hot water, with assiduous stirring, and adding to the solution sugar and milk. An indigenous salep has been made in France from *Orchis macula'ta, O. bifo'lia, O. mas'cula, O. milita'ris,* and *O. latifo'lia.* See Saloop.

Salep, Otaheite. Arrowroot (Tahiti).

SALER'NUM, SCHOOL OF. An ancient school of medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century, and, on its account, Salerno was selfstyled *Civ'itas Hippocra'tica.* The work on hygiene, *"De Conservandâ Valetudine,"* which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

SALICARIA, (from *salix,*) Lythrum salicaria.

SALICIN, see Salix.

SALICORNIA ARABICA, &c., (*sal,* 'salt,' from its abounding in salt,) see Soda.

SALINE', *Sali'nus, Salina'cius, Salinac''idus, Sali'tus, Sal'sus, Hali'nus, Hal'myrus, Halico'des, Sali'nous,* (from *sal.*) That which contains a salt, or has the properties of a salt.

Saline Draught or Mix'ture. This may be made as follows:—*Potass. carbon.* ℈j, *Acid. citric.* seu *tartar.* gr. xv seu *Succ. limon. recent.* ℥ss, *Aquæ,* f℥viij, *Syrup. cujusvis,* ℥j. M. Given in divided doses as a febrifuge.

Saline Efferves'cing Draught or Mix'ture is made by adding a due proportion of either of the acids above mentioned, or of lemon-juice, to the proper proportion of the carbonate of soda or of potassa. About 25 grains of the acid saturate 30 grains of the carbonate. See Powders, soda.

SALINES, see Kentucky, mineral waters of.

SALINOUS, Saline.

SALIS AMMONIACI FLORES, Ammoniæ carbonas.

SALITIO, (*salio,* 'to leap,') Leap.

SALITUS, (from *sal,*) Saline.

SALIUM, Saliva.

SALIUNCA, Valeriana Celtica.

SALI'VA, (probably from σιαλος,) *Si'alon, Si'alos, Si'elon, Ptys'ma, Pty'alum, Pty'elum, Sa'linm, Sputa'men, Sputamen'tum, Spu'tum, Spit'tle,* (Old Eng.) *Spaul,* (Prov.) *Spoat.* An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton, and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992·2 parts of water, 2·9 of a particular animal matter, soluble in water, and insoluble in alcohol, (*pty'alin, princip'ium saliva'lē, mate'ria siali'na, Ca'sein of the sali'va, Sal'ivary albu'men,*) of 1·4 of mucus, 1·7 of chlorides of potassium and sodium, 0·9 of lactate of soda and animal matter, and 0·2 of soda.

SALIVÆ FLUXUS CIBO VISO, 'flow of saliva at the sight of food,' see Salivation.

SALIVAIRE, Anthemis pyrethrum, Salivary.

SALIVAL, Salivary.

SALIVANS, Sialagogue.

SALIVANT, Sialagogue.

SALIVARIS, Salivary — s. Herba, Anthemis pyrethrum.

SAL'IVARY, *Saliva'rius, Saliva'ris, Salivo'sus, Sali'val* or *Sal'ival, Sali'vous,* (F.) *Salivaire.* That which belongs to the saliva.

Salivary Albumen, see Saliva—s. Calculi, see Calculi, salivary.

Salivary Fis'tulæ, *Si'alosyrin'ges,* are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Fistulæ are most commonly met with in the duct of Steno.

Salivary Glands, *Secre'ting or'gans of the sali'va, Sali'val glands,* are situate symmetrically, to the number of four, on each side of the face. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts— *Ductus Saliva'rii,* (F.) *Canaux* ou *Conduits salivaires*—carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. The *parot'id;* 2. The *submax'illary;* 3. The *sublin'gual;* and 4. The *in'tralingual* or *lin'gual,* seated at the inferior surface of the tongue, where the mucous membrane forms a fringed fold.

SAL'IVATED, *Saliva'tus, Pty'alised, Sial'ochous,* (from *saliva,*) Affected with salivation.

SALIVATIO, Salivation—s. Mercurialis, Salivation, mercurial.

SALIVA'TION, *Saliva'tio, S. cal'ida, Epiph'ora ptyalis'mus, Sialis'mus, Spu'tum O'ris, Sial'achus, Sielis'mus, Sialorrhœ'a, Sialoze'mia, Ptyalis'mus, Pty'alism, Flux'us sali'væ,* (F.) *Flux de Bouche, Flux salivaire, Ptyalisme.* A superabundant secretion of saliva; occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

Ptyalismus acu'tus sympathet'icus, Sali'væ flux'us ci'bo vi'so, Mouth wa'tering, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acu'tus melli'tus, Apoceno'sis ptyalis'mus melli'tus, Dulce'do Sputato'rum, or Sweet spittle.* In this, the saliva has a sweet or mucilaginous taste.

Salivation, Mercu'rial, *Saliva'tio mercuria'lis, Sialoze'mia* seu *Ptyalis'mus mercuria'lis, P. hydrargyra'tus,* (F.) *Ptyalisme mercuriel, Salivation mercurielle.* Salivation produced by mercury. The stomatitis that accompanies it is termed *mercu'rial, Hydrar'gyrostomati'tis,* (F.) *Stomatite mercurielle.*

SALIVATION MERCURIELLE, Salivation, mercurial.

SALIVATUM, (from *saliva,*) Sialagogue.

SALIVATUS, Salivated.

SALIVOSUS, Salivary.

SALIVOUS, Salivary.

SA'LIX, gen. *Sal'icis.* The *Wil'low, Ptea,* (Prov.) *Sal'ly, Sal'lywith'y,* (Sc.) *Sauch, Saugh, Wil'lan,* (F.) *Saule.* A genus of plants in the Linnæan system. *Ord.* Salicaceæ.

Salix Ægyptiaca, Calaf.

Salix Fraq''ilis, *S. pen'dula* seu *decip'iens* seu *amygdali'na* seu *persicifo'lia* seu *Russelia'na* seu *Trevira'ni, Crack* or *Bedford wil'low* (Ph. D.) Sa'lix Al'ba, *S. cærw'leà* seu *vitelli'na, White wil'low* (Ph. U. S.), (F.) *Osier.* Salix Latifo'lia, *Broadleaved wil'low.* Salix Ca'prea, *S. Sphacela'ta* seu *tomento'sa,* or *Great roundleaved willow* (Ph. L.) Salix Pentan'dria seu Hermaphrodit'ica. Salix Hu'milis, *Low bush willow, Speckled willow.* Salix Erioceph'ala. The bark of these and other willows has a slightly aromatic odour, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active neutral principle has been separated, and called *Sal'icin* or *Sal'icine, Salici'na, Salici'num.* It has been found in about fourteen species of salix and eight species of Populus; is

like the quinia in medicinal efficacy. Dose, ℈i to ℈j of the powder. Dose of *Salicin* from 4 to 6 grains.

SALLENDERS, Malandria.

SALLIS, Adeps.

SALLOW, (from [F.] *sale*, 'dirty,') Lurid.

SALLY, Salix.

SALLYWITHY, Salix.

SALMIAC, (contraction of *sal ammoniac*,) Ammoniæ murias.

SALOOP, Salep. Also, sassafras tea flavored with milk and sugar. Under this name a tea is sold in the streets of London which consists of an infusion of the wood of *Laurus Sassafras* with the addition of milk and sugar—*Sas'safras Tea.* Sassafras tea has been long drunk as ordinary tea in different parts of the United States, where it is sometimes called *Sass tea.*

SALOP, Salep.

SALPETRA, (*sal*, and *petra*, 'rock,') Potassæ nitras. Soda, nitrate of.

SALPINGEMPHRAX'IS, (*salpingo*, and *εμφραξις*, 'obstruction.') Obstruction of the Eustachian tube,—a cause of deafness.

SALPINGI'TIS, (*salpingo*, and *itis.*) Inflammation of the Eustachian tube.

SALPINGO, (from *salpinx*,) in composition, the Eustachian, or the Fallopian, tube.

SALPINGOCATHETERISMUS, (*salpingo*, and *catheterismus.*) Catheterism of the Eustachian tube.

SALPINGOCYE'SIS, *Paracye'sis tuba'ria, Gravid'itas tuba'ria*, (*salpingo*, and *κυησις*, 'pregnancy.') Tubal pregnancy. — See Pregnancy, tubal.

SALPINGOMALLÉEN, Tensor tympani.

SALPINGOPHARYNGÆ'US, (*salpingo*, and *φαρυγξ*, 'the pharynx.') Valsalva and Douglas have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

SALPINGOSTAPHYLINUS, Circumflex muscle—s. Staphylinus internus, Levator palati.

SALPINGOSTENOCHO'RIA, (*salpingo*, *στενος*, 'narrow,' and *χωρα*, 'space.') Narrowness or stricture of the Eustachian tube.

SALPINX, gen. *Salpin'gis*, (*σαλπιγξ*, gen. *σαλπιγγος*,) Tuba.

SALSAFY, Tragopogon porrifolium.

SALSAMENTUM CRUDUM, ('salted fish,' from *salsus*, 'salted,') Omotarichos.

SALSAPARILLA GERMANICA, Sarsaparilla Germanica.

SALSEDO, gen. *Salse'dinis*, (from *salsus*, 'salt,') Muria — s. Mucrum, Potassæ nitras.

SALSEPAREILLE, Smilax sarsaparilla — *s. d'Allemagne*, Sarsaparilla Germanica—*s. du Brésil, s. Caraque, s. de Honduras, s. de Pérou*, and *s. de Portugal*, see Smilax sarsaparilla.

SALSIFI, Tragopogon porrifolium.

SALSILAGO, (from *salsus*, 'salt,') Muria.

SALSITUDO, gen. *Salsitu'dinis*, (from *salsus*, 'salt,') Muria.

SALSOLA DECUMBENS, S. Kali.

SALSO'LA KA'LI, *S. Decum'bens, Ka'li so'da* seu *spino'sum cochlea'tum, Tra'gus* sive *Tra'gum Matthi'oli, Prick'ly Salt'wort. Ord.* Chenopodiaceæ; (from *salsus*, owing to its saline properties.) This plant, as well as *Salsola sati'va* and *Salsola soda* seu *longifo'lia, Kali iner'mis, Her'ba vi'tri*, produces the alkaline salt, commonly called *Barilla, Soda*, or *Kelp.*

SALSOLA LONGIFOLIA, S. Kali — s. Sativa, &c., see S. Kali, and Soda—s. Soda, see S. Kali.

SALSUGINOSUS, 'briny,' (from *salsus*,) Halmyrodes.

SALSUGO, gen. *Salsu'ginis*, (from *salsus*, 'salt,') Muria.

SALSUS, Saline.

SALT, *Sul, Hal, Hals*, (*'αλς*,) (F.) *Sel.* A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term *Salts* generally, to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciproeally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those in which the acid predominates over the base, and the prefixes *bi* and *ter* indicate the proportion of acid. *Alkaline salts* or *subsalts*, (F.) *Sous-sels*, those in which the base is predominant, when the prefixes *di* and *tre* indicate the proportion of base. The different denominations of the salts are compounded, 1. Of the name of the acid: the termination of which is changed into *ite*, when the name of the acid is in *ous*; — *ate*, when it is in *ic*. Thus the salts formed by the *sulphurous* acid are *sulphites*; those by the *sulphuric*, *sulphates*. 2. This name is followed up by that of the oxyd, which enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto, deuto, trito*, &c., put before the acid:—as *protosulphate of iron. Simple salts* are those resulting from the combination of an acid with a single base; *double salts* with two different bases: *triple* with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *saltradical*, as chlorine, iodine, &c. An *oxysalt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

SALT, APERIENT, OF FREDERICK, Soda, sulphate of—s. Baker's, Ammoniæ carbonas—s. of Barilla, Soda, subcarbonate of — s. Bay, Soda, muriate of —s. Bitter purging, Magnesiæ sulphas — s. Common, Soda, muriate of—s. Epsom, Magnesiæ sulphas — s. Glauber's, Soda, sulphate of — s. Glauber's, Lymington, see Soda, sulphate of—s. Preston, see Ammoniæ carbonas — s. Rochelle, Soda, tartrate of — s. Rock, Soda, muriate of — s. Sea, Soda, muriate of—s. Secondary, Neutral salt—s. Seignette's, Soda, tartrate of—s. Smelling, Ammoniæ carbonas—s. of Soda, Soda, subcarbonate of — s. Sorethroat, Potassæ nitras fusus sulphatis paucillo mixtus.

SALT OF TARTAR, see Potassæ subcarbonas, and Potash.

SALT, TASTELESS PURGING, Soda, phosphate of.

SALT OF URINE, Ammoniæ carbonas.

SALT, WHITE, Soda, muriate of.

SALT OF WOODSOOT, Ammoniæ carbonas — s. of Wormwood, see Potash.

SALTANS ROSA, Urticaria.

SALTATIO, (*saltare, saltatum*, 'to dance,') Dancing—s. Sancti Viti, Chorea.

SALT'ERTON. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the seashore, and is well protected from winds, particularly the northerly.

SALTISH, Halmyrodes.

SALTPETRE, (*sal*, and *petra*, 'a rock,') Potassæ nitras.

SALTUS, gen. *Saltûs*, (*salire, saltum*, 'to leap,') Leap, Vulva—s. Tendinum, Subsultus tendinum.

SALTWORT, PRICKLY, Salsola kali.

SALUBRIOUS, (from *salubris*,) Salutary.

SALUBRIOUSNESS, Salubrity.

SALUBRIS, (from *salus*,) Salutary.

SALU'BRITY, *Salu'britas, Salu'briousness*, (F.) *Salubrité*, (from *salubris.*) Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUS, gen. *Salu'tis*, Sanitas.

SALUTAIRE, Salutary.

SAL'UTARY, *Saluta'ris, Salu'ber, Salu'bris, Hygiei'nus, Hygias'ticus, Hygie'rus, Salu'brius,* (F.) *Salutaire, Salubre,* (from *salus.*) Healthy. That which is favourable to health. Some diseases have been considered salutary; but this is doubtful.

SALUTIF'EROUS, *Salu'tifer,* (*salus,* and *fero,* 'I bear.') Bringing health; health-bearing.

SALVATEL'LA, *Vena salvatel'la,* is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed by a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name —*posterior cubital.* The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name, (from *salvere,* 'to be well.')

SALVE ([Sax.] ȝealf, [G.] Salbe,) Unguentum — s. Blistering, Unguentum lyttæ — s. Desh-ler's, Ceratum resinæ compositum — s. Eye, Unguentum oxidi zinci impuri — s. Eye, Singleton's, Unguentum hydrargyri nitricoöxydi—s. Healing, Cerate of calamine.

SAL'VIA, (from *salveo,* 'to be well,' owing to its reputed healing qualities;) *S. officina'lis* seu *horten'sis* seu *vulga'ris* seu *mi'nor, Elelis'phacus, Sage, Save,* (F.) *Sauge, Petite Sauge, Thé d'Europe* ou *de France. Ord.* Labiatæ. *Sex. Syst.* Diandria Monogynia. Sage leaves, *Salvia* (Ph. U. S.), have a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Their virtues depend upon an essential oil. They are tonic, stimulant, and carminative. In the form of a weak infusion, Sage is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

SALVIA AFRICA'NA, *Wild Sage,* a South African species, has the same medical properties as Salvia.

SALVIA COLORATA, Salvia.

SALVIA HORMI'NUM, *S. colora'ta, Hormi'num, H. colora'tum* seu *sati'vum,* (F.) *Sauge-hormin,* of the Pharmacopœias, is used in similar cases.

SALVIA HORTENSIS, Salvia.

SALVIA LYRA'TA, *Wild Sage, Cancerweed;* indigenous. The fresh leaves, bruised, are used to destroy warts. It has been supposed to be of use in cancer.

SALVIA MINOR, Salvia—s. Officinalis, Salvia.

SALVIA SCLA'REA, *Scla'rea, Gallit'richum, Æthi'opis, Biser'mas, Co'lus Jo'vis, Com'mon Cla'ry,* (F.) *Sauge sclarée, Grand sauge, Orvale* ou *Toutebonne.* The leaves have been recommended as corroborants and antispasmodics.

SALVIA VITÆ, Asplenium ruta muraria — s. Vulgaris, Salvia.

SAMADE'RA IN'DICA, *Ord.* Simarubeæ, furnishes the *Niepa bark,* which is possessed of antiperiodic properties.

SAMBO, see Mulatto.

Sambo, and *Zambo,* also signify the offspring of the Indian and Negro.

SAMBU'CUS, (from σαμβυκη, an ancient musical instrument, said to have been made of its wood.) *Sabu'cus, Sambucus ni'gra* seu *vulga'ris* seu *arbo'rea, Ac'tē, Infe'lix lig'num; El'der, El'norne, El'lentree, El'larne,* (Sc.) *Boar'tree, Bore'tree, Boun'tree,* (Prov.) *Bot'try tree, Bur'tree, El'let, El'ren, Scaw,* (F.) *Sureau commun, Supier. Ord.* Caprifoliaceæ. *Sex. Syst.* Pentandria Digynia — (the flower and bark were formerly called *Cano'pum).* The flowers, *Sambucus,* (Ph. U. S.), berries, and bark of the elder have been used in medicine. The *flowers* have been reputed diaphoretic and diseutient; the *berries,* aperient and sudorific; the *bark,* purgative, and in small doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

SAMBUCUS ARBOREA, Sambucus — s. Chamæacte, S. ebulus.

SAMBUCUS EB'ULUS, *S. Chamæac'tē* seu *he'lion* seu *hu'milis* seu *herba'cea, Eb'ulus, Chamæac'tē, Od'ocos, Dwarf elder, Danewort,* (F.) *Hièble, Yèble.* The root, interior bark, leaves, flowers, berries, (*Baccæ* seu *Grana Actes,*) and seeds, have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues.

The berries of *Sambucus Canaden'sis,* the *Common Elder* of America, are made officinal in the Pharmacopœia of the United States—*Sambucus.* A distilled water of the flowers, *Aqua Sambu'ci, Elder Water,* is officinal in the London and Edinburgh Pharmacopœias.

SAMBUCUS HELION, Sambucus ebulus — s. Herbacea, S. ebulus—s. Humilis, S. ebulus—s. Nigra, Sambucus.

SAMBUCUS PU'BENS, *S. pubes'cens* seu *racemo'sa, Redber'ried El'der;* indigenous. The bark, in decoction, is said to be a valuable hydragogue cathartic.

SAMBUCUS RACEMOSA, S. pubens—s. Vulgaris, Sambucus.

SA'MI TER'RA, *Sa'mian Earth.* An argillaceous earth, found in the island of Samos, to which were ascribed virtues similar to those of the Terra Lemnii.

SA'MIUS LA'PIS, *Sa'mian stone.* A stone found in the Isle of Samos, which the ancients believed to be astringent and refrigerant.

SAMPHIRE, Crithmum maritimum.

SAMPSON, BLACK, Echinacea purpurea.

SAMPSUCHON, (σαμψυχον,) Origanum majorana.

SAMPSY'CHI'NON, (σαμψυχινον,) *Sampsu'chinum.* An ointment composed of σαμψυχον, which was perhaps marjoram.

SAMPSYCHUM, (σαμψυχον,) Origanum majorana.

SAN GIULIA'NO, MIN'ERAL WA'TERS OF. At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fah.

The spring, *Pozzetto,* contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides of sodium and magnesium; carbonates of lime and magnesia; argil and silica.

SANABILIS, (*sanare,* 'to heal,' and *habilis,* 'able,') Curable.

SANABLE, Curable.

SANAMUNDA, Geum urbanum.

SANATIO, (*sanare, sanatum,* 'to cure,') Curation, Cure.

SANATIVE, Curative.

SANATORIUM, Sanitarium.

SANATORY, Curative.

SAND, ([Sax.] ȝanꝺ,) see Gravel.

SANDBLIND, nearly blind. A defect of vision, in which small particles seem to fly before the eyes. See Metamorphopsia.

SAND, BRAIN, see Pineal gland — s. Pineal, see Pineal gland.

SANDALUM CÆRULEUM, Guilandina moringa—s. Rubrum, Pterocarpus santalinus.

SAN'DARAC, *Sanda'racha, Gum Ju'niper* or *San'darach, Pounce, Gum'mi Junip'eri, Sanda'raca, Ver'nix sic'ca, Resi'na Junip'eri,* (F.) *Sandaraque, Gomme de Genévrier.* A name given, by the Arabs, to an odorous resin, that flows from the *Thuya aphyl'la. Ord.* Coniferæ. *Sex. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins; but is very little used.

SANDARACHA GRÆCORUM, (σανδαραχη,) Realgar.

SANDERS, see Saunders.

SANDIVER, (*saint-de-verre,* 'dross of glass,' [?]) see Vitrum.

SANDIX, Plumbi oxydum rubrum.

SANDYX, (σανδυξ,) Plumbi oxydum rubrum.

SANG, (from [L.] *sanguis*,) Blood, Panax quinquefolium—*s. Artériel*, Arterial blood—*s. Dragon*, Rumex sanguineus, see Calamus rotang—*s. Globules du*, Globules of the blood—*s. Perte de*, Hæmorrhagia.

SANGAREE'. Wine and water, sweetened and spiced. First used in the West Indies.

SANGLOT, (from *singultus*,) Sob.

SANGRA'DO, ([S.] *sangrador*, 'a bleeder.') A doctor, in Gil Blas, who was a heroic bleeder; and hence, popularly applied to such a one.

SANGSUE, (from *sanguisuga*,) Hirudo.

SANGUIDUCTUS DURÆ MATRIS, (*sanguis*, 'blood,' and *ducere*, *ductum*, 'to lead,') Sinuses of the dura mater.

SANGUIFICATIO, (*sanguis*, 'blood,' and *facere*, 'to make,') Hæmatosis—s. Debilior, Hyphæmatosis.

SANGUIFLUXUS, gen. *Sanguifluxûs*, (*sanguis*, 'blood,' and *fluere*, *fluxum*, 'to flow,') Hæmorrhagia—s. Uterinus, Metrorrhagia.

SANGUIMOTION, (*sanguis*, 'blood,' and *movere*, *motum*, 'to move,') Circulation.

SANGUIMOTORY, Circulatory.

SANGUIN (*Vaisseau*), Bloodvessel.

SANGUINALIS CORRIGIOLA, (from *sanguis*, because used to stop blood,) Polygonum aviculare.

SANGUINA'RIA, (from *sanguis*, 'blood,' owing to the colour of its juice.) *S. Canaden'sis* seu *acau'lis*, *Blood'root*, *Blood'wort*, *Puccoon'*, *Red Puccoon'*, *Red Root*, *In'dian Paint*, *Tur'meric*. *Nat. Ord.* Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. A North American plant, the rhizoma—*Sanguinaria* (Ph. U. S.)—and seeds of which are used in medicine. They are emetic. Dose of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like digitalis.

SANGUINARIA, Polygonum aviculare.

SANG'UINE, *Sanguin'eus*, *Sanguino'sus*, *Hæmat'icus*, *Hæmato'des*, *Hæmate'rus*, *Hæmati'nus*, *Hæmo'des*, *Hæmoï'des*, *Sanguin'eous*, *Hæmat'ic*, (F.) *Sanguin*, (from *sanguis*.) Bloody, bloodlike; having the colour of blood, as 'a *sanguine* countenance.' Relating to, or containing blood—as 'sanguine temperament.' Plethoric.

SANGUINEA, Potassæ nitras.

SANGUINENESS, Plethora.

SANGUINEOUS, Plethoric, Sanguine.

SANGUINEUS, Sanguine.

SANGUINIS ABSORPTIO, Hæmorrhophesis—s. Congestio, Congestion—s. Dissolutio, Hæmateclysis—s. Fluor, Hæmoptysis—s. Fluor vesicæ, Cystorrhagia—s. Ictus, Apoplexy—s. Missio, Bloodletting—s. Profluvium copiosum, Hæmorrhagia—s. Profluvium ex ore, Stomatorrhagia—s. Stagnatio, Hæmostasis.

SAN'GUINOLENT, *Sanguinolen'tus*, (from *sanguis*.) Tinged with blood. An epithet applied, particularly, to the sputa when so tinged. Bloody.

SANGUINOSUS, Sanguine.

SANGUIPUR'GIUM, (*sanguis*, and *purgare*, 'to cleanse.') Purgation of the blood. A name given by some authors to mild fevers, from an idea that they purged the blood of noxious matters.

SANGUIS, gen. *Sang'uinis*, Blood, Sperm—s. Concretus, Coagulum—s. Draconis, see Calamus rotang—s. Hirci siccatus, see Blood—s. Menstruus, see Menses—s. in Urinâ, Hæmaturia—s. Virginis primum menstruatæ, see Menses.

SANGUISOR'BA CANADEN'SIS, *Can'ada Burnett*, (*sanguis*, 'blood,' and *sorbere*, 'to absorb,' so called from its astringency.) A tall indigenous plant—*Ord.* Rosaceæ—with white, sometimes purple, flowers, which appear from August to October. It has the same virtues as

SANGUISOR'BA OFFICINA'LIS, *S. car'nea* seu *ru'bra*, *Ital'ian Pim'pinel*, *Pimpinel'la Ital'ica* seu *officina'lis*, (F.) *Pimprenelle noire*. It was formerly used as an astringent and tonic, in hemorrhages, dysentery, &c.

SANGUISUGA, (*sanguis*, 'blood,' and *sugere*, 'to suck,') Hirudo.

SANGUISU'GUM. A barbarous term, to denote too great an accumulation of blood in the heart.

SANICLE, Sanicula, S. Marilandica—s. American, Heuchera cortusa—*s. de Mariland*, Sanicula Marilandica—s. Yorkshire, Pinguicola vulgaris.

SANICULA, (from *sano*, 'I heal,') Saxifraga granulata.

SANIC'ULA, *S. Europæ'a* seu *officina'rum* seu *mas*, *Astran'tia diapen'sia*, *Cauca'lis Sanic'ula*, *Cuculla'ta*, *Dodeca'theon*, *Sym'phytum petræ'um*. *Diapen'sia*, *D. cortu'sa*, *San'icle*, *Wood March*, (F.) *Toute-saine*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA EBORACENSIS, Pinguicola vulgaris—s. Europæa, Sanicula.

SANICULA MARILAN'DICA, *San'icle*, *Ma'ryland San'icle*, *Black Snake'root*, (F.) *Sanicle de Mariland*. This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues; and the powdered root is employed in popular practice as a favourite remedy in intermittent fever. It has been recommended, also, in chorea.

SANICULA MONTANA, Pinguicola vulgaris—s. Officinarum, Sanicula.

SANIDO'DES, (σανιδωδης, 'resembling a board,' from σανις, gen. σανιδος, 'a board,' and *odes*.) One whose thorax is flat, like a board.

SANIE, Sanies.

SA'NIES, *Ichor*, *Ta'bum*, *Vi'rus*, *Pus malig'num* seu *corrosi'vum*, (F.) *Sanie*, (corr. from *sanguis*, 'blood.') A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIEUX, Ichorous.

SANIOSUS, Ichorous.

SANIOUS, Ichorous.

SANITAIRE, Sanitary.

SANITA'RIUM, *Sanato'rium*, (*sanitas*, 'health.') A retreat selected for valetudinarians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SAN'ITARY, *San'atory*, (F.) *Sanitaire*. That which relates to health, and especially to public health; as '*Sanitary commission*.'

SAN'ITAS, (*sanus*, 'healthy,') *Hygiē'a*, *Hyge'a*, *Hygian'sis*, *Hygi'asis*, *Integ'ritas*, *Prosper'itas Valetu'dinis*, *Sa'lus*, *Hygieï'a*, *Valetu'do*, *Valitu'do*, *Valetu'do bona* seu *secun'da* seu *com'moda*, *Hygeï'a*, *Euzoödyna'mia*, *Health*, (Sc.) *Heil*, *Heyle*, *Heal*, (F.) *Santé*, (from *sanus*, 'sound.') Health has been defined,—a state in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity. *Sanity* is often used for soundness of mind.

SANITAS, Cure.

SANITY, Sanitas.

SANKIRA, Smilax China.

SANS PAIRE, 'pairless,' (*Veine*,) Azygos vein.

SAN'TA CRUZ, CLI'MATE OF. This West India island is frequently selected as a winter retreat for the physical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, whilst its general salubrity is said to be less than that of many.

SANTAL BLANC. Santalum album—s. *Rouge,* Pterocarpus santalinus.

SANTALUM, see Pterocarpus santalinus.

SAN'TALUM AL'BUM, *S. cit'rinum* seu *pal'lidum* seu *myrtifo'lium, Sir'ium myrtifo'lium, Yel'low Saun'ders,* (F.) *Santal blanc. Ord.* Santalaceæ. *Sex. Syst.* Tetrandria Monogynia. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but is not now employed. The saunders woods are called, collectively, in French, *Santaux.*

SANTALUM MYRTIFOLIUM, S. album—s. Rubrum, Pterocarpus santalinus.

SANTÉ, Sanitas.

SANTONICA, see Artemisia santonica.

SANTONICUM, (from *Santonia,* its native place.) Artemisia santonica.

SAN'TONINE, *Santoni'num, San'tonin, Ci'nin.* A peculiar crystalline substance obtained from Artemisia Santonica. It is directed, in the Ph. U. S. for 1863, to be prepared by digesting *santonica, lime* and *alcohol* together, and expressing; distilling off the *alcohol* and evaporating; adding *acetic acid* until in slight excess; washing the resulting crystalline mass, and drying it; boiling the dry residue with alcohol; and, having digested the tincture for several hours with animal charcoal, filtering, and setting aside to crystallize. Santonine possesses the anthelmintic properties of the plant. Dose, five or six grains.

SANTORI'NI, FIS'SURES OF, (F.) *Incisures* ou *Scissures de Santorini,* (after the Italian anatomist.) Clefts at the upper and back of the fibro-cartilaginous portion of the external ear.

SANTORINI, TU'BERCLES OF. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See Corniculum Laryngis.

SANVÉ, Sinapis.

SAO'RIA, *Sanar'ja, Sana'ri,* (a Guiana name.) The ripe and dried fruit of *Mae'sa* seu *Bæob'otrys pic'ta,* an Abyssinian tree, which is administered in its native country, in powder, in doses of from 32 to 44 grammes, as a tæniafuge.

SAP, ([Sax.] ꝛæp, [G.] Saft,) *Ar'borum Suc'cus* seu *Lymph'a,* (F.) *Sève.* The circulating fluid of the vegetable, which corresponds to the blood of the animal.

SAPA, see Rob.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHÆNA, Saphena.

SAPHATUM, Asaphatum.

SAPHE'NA, *Saphæ'na,* (σαφης, 'manifest,' 'evident.') (F.) *Saphène.* A name given to two subcutaneous veins of the lower limb. These are: 1. The GREAT SAPHE'NA VEIN, *S. inter'na, Tibiomalle'olar* (Ch.), (F.) *Grande Veine Saphène* ou *Saphène interne.* Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches, coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus, and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The LES'SER VE'NA SAPHE'NA or *Saphe'na exter'na, Perone'omalle'olar Vein* of Chaussier, (F.) *Petite Veine Saphène* ou *Saphène externe,* commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

SAPHÈNE, Saphena.

SAPHE'NOUS, *Sapheno'sus;* (from *saphena.*) Of or belonging to the saphena.

SAPHENOUS NERVES are two in number, and are branches of the crural or femoral nerve. They are the *short saphenous — ner'vus cuta'neus internus;* and the *long saphenous—ner'vus cuta'neus inter'nus lon'gus.*

The *external saphenous,* formed by the union of the communicans poplitei and communicans peronei, passes down the leg by the side of the external saphenous vein of the foot.

SAPHENOUS O'PENING. An oval, and somewhat oblique, opening in the fascia lata, a little below Poupart's ligament, for the transmission of the principal superficial vessels. Here, likewise, femoral hernia descends.

SAP'ID, *Sa'porous, Sap'idus,* (F.) *Savoureux,* (*sapere,* 'to taste.') Possessed of sapidity. Having the power of affecting the organs of taste.

SAPID'ITY, *Sap'idness, Saporos'ity, Sa'por,* (F.) *Sapidité.* The quality of bodies that gives them taste.

SAPIN COMMUN, ([L.] *Sapinus,*) Pinus picea.

SAPIN'DUS, (*sapo,* and *Indus,* 'Indian soap,') *S. Sapona'ria, Sapona'ria, Soaptree,* (F.) *Savonnier commun. Ord.* Sapindaceæ. The name of the plant that affords the *Soapnuts, Sapona'riæ Nu'culæ, Bac'cæ Bermuden'ses, Soapberries.* A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

SA'PO, gen. *Sapo'nis,* (σαπων, [Sax.] ꝛape,) *Smegma,* (F.) *Savon.* A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil. See Sapo medicinalis.

YEL'LOW SOAP is formed of turpentine, oil, and alkali. A soap of *subcarbonate of potassa* and *oil of turpentine — Sapo terebin'thinæ —* was formerly used for indolent swellings, under the name of *Starkey's soap.*

Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases of poisoning by acids. It is mostly applied externally to bruises and sprains. In *Pharmacy,* it is used to favour the solution of resins.

SAPO AC''IDUS, *Ac''id Soap,* is a combination of a fixed oil with an acid.

SAPO AMMONIACALIS, Linimentum ammoniæ fortius — s. Ammoniæ oleaceus, Linimentum ammoniæ fortius — s. Amygdalinus, Sapo medicinalis — s. Cacaotinus, Sapo coconeus — s. Calcarius, Linimentum aquæ calcis—s. Castiliensis, see Sapo medicinalis.

SAPO COCO'NEUS, *Sapo cacaöti'nus, Soap of Cocoanut Oil,* (F.) *Savon de cacoa,* has been much used in Germany in herpetic affections.

Sapo Duuus, S. medicinalis—s. Hispanicus, see S. medicinalis—s. Kalicus, S. Mollis.

Sapo Liq'uidus, *Liq'uid Soap, Lo'tio sapona'cea*, is a cosmetic, which is composed of *Olive oil* ℥iv, *Ol. tartari per deliquium* ℥ss. Rub together, and add *Aq. rosarum*, ℥xij.

Sapo Medicina'lis, *Sa'po amygdali'nus, Medic''inal Soap*, (F.) *Savon médicinal*, is made of oil of sweet almonds and half its weight of caustic alkali, or, like the *Sapo Hispani'cus* seu *Castilien'sis, Spanish* or *Castile soap, Sapo durus, Sapo* (Ph. U. S.), (F.) *Savon dur*, of olive oil and soda.

Sapo Mol'lis, *S. vir'idis* seu *ni'ger* seu *ka'licus, Com'mon* or *Soft Soap*, (F.) *Savon mou* ou *noir*, is made of potass and oil or tallow. The *Sapo vulga'ris* or 'common soap' of the Pharm. U. S. is made with soda and animal oil.

Sapo Ni'ger, *Black Soap, Melanosmeg'ma*, is a composition of train oil and an alkali: and Green Soap, *Sapo vir'idis*, of hempseed, linseed, or rape oil, with an alkali. See Sapo mollis.

Sapo Terebinthinæ, see Sapo—s. Vegetabilis, Pulvis gummosus alkalinus—s. Viridis, Sapo mollis—s. Vulgaris, see Sapo mollis.

SAPONA'CEOUS, *Sapona'ceus*, (F.) *Saponacé*, (from *sapo*.) Soapy. Containing soap, as *Linimentum saponaceum*, Soap liniment.

SAPONAIRE, Saponaria.

SAPONA'RIA, (from *sapo*,—the juice forming a lather with water.) *Soapwort, Bruiseswort, Bounc''ing Bet, Stru'thium, Lana'ria, Lych'nis officina'lis* seu *sylres'tris, Ibix'uma, Boot'ia vulga'ris*, (F.) *Saponaire, Savonnière*. *Ord.* Caryophyllaceæ. *Sex. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

Saponaria, Sapindus saponaria.

SAPONARIÆ NUCULÆ, see Sapindus saponaria.

SAPONÉ. Soap, to which are added substances capable of communicating to it new properties, without affecting its own.

SAPO'NEA. A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

SAPONULÉ. A tincture (*alcoolé*), sufficiently charged with soap to cause it to assume a gelatinous shape.

SAP'ONULES, *Sapon'uli*, (F.) *Savonules*. Imperfect soaps formed by combinations of volatile or essential oils with different bases. See Opodeldoch.

Acid Saponules are combinations of such oils with different acids.

SAPONURE. A medicine, formed of soap, in powder, and of resinous or extractive matters.

SAPOR. Sapidity, Savour.

SAPOROSITY, Sapidity.

SAPOROUS, Sapid.

SAPO'TA, *S. A'chras, Ac'hras Sapo'ta* seu *austra'lis* seu *Zapo'ta, El mispero, Ovalfruited Sapota*, (F.) *Sapotier, Sapotillier, Sapotilla*. *Fam.* Sapotaceæ. *Sex. Syst.* Hexandria Digynia. A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

Sapota Achras, Sapota.

SAPOTIER, Sapota.

SAPOTILLA, Sapota.

SAPOTILLIER, Sapota.

SAPROPYRA, (σαπρος, 'putrid,' and πυρ, 'fever,') Typhus gravior.

SAPROS, (σαπρος,) Putrid, Rancid.

SAPROS'TOMUS, (*sapros*, and στομα, 'mouth.') One who has an offensive breath.

SAPROTES, (σαπροτης,) Putrefaction.

SAR'APUS, *Sarapous*, ('σαιρω, 'I grin,' and πους, 'the foot.') One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking. See Kyllosis.

SARATO'GA, MIN'ERAL WA'TERS OF. The Saratoga Springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every part of the United States. The following analysis has been given of the *Congress spring*. In a wine gallon—*gaseous contents:*—carbonic acid, 311 cubic inches; atmospheric air, 7. *Solid contents:* chloride of sodium, gr. 385; iodide of sodium, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, gr. 95.788; carbonate of lime, gr. 98.098; carbonate of iron, gr. 5.075; silica, gr. 1.5; bromide of potassium, a trace. Total, gr. 597.943.

The *Wal'ton* or *Iodine spring* contains chloride of sodium, carbonate of magnesia, and iodide of sodium.

SARCEPIPLOCELE, Sarcoëpiplocele.

SARCEPIPLOMPHALOCELE, Sarcoëpiplomphalocele.

SARCEPIPLOMPHALUS, Sarcoëpiplomphalus.

SARCEUX, Sarcous.

SARCIDIUM, (σαρκιδιον, dim. of σαρξ, 'flesh,') Caruncle.

SARCINA, 'a pack, a burthen,' Fœtus.

Sar'cina Ventric'uli, *S. Goodsir'ii, Merismopœ'dia ventriculi*, (Robin). A microscopic cryptogamous plant found in the fluid of waterbrash.

SARCION, (σαρκιον,) Caruncle.

SARCITES, (from σαρξ, 'flesh,') Anasarca—s. Flatuosus, Emphysema.

SARCITIS, (σαρξ, 'flesh,' and *itis*,) Myositis.

SARCO, (σαρξ, gen. σαρκος, 'flesh,') in composition, flesh.

SARCOCE'LE, *Her'nia carno'sa, Scir'rhus Testic'uli*, (*sarco*, and κηλη, 'a tumour;') *Sarco'ma scro'ti*, (F.) *Hernie charnue*. Scirrhus or cancer of the testicle. This disease affects adults particularly; and appears most commonly after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin; the spermatic cord is swollen, and participates in the affection; very painful shootings occur; the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life, is the extirpation of the testicle.

SARCOCOL'LA, (F.) *Colle-chair*, (σαρκοκολλα, from *sarco*, and κολλα, 'glue.') A resinous matter, obtained from *Penæ'a Sarcocol'la, P. mucrona'ta*, and other species of Penæa, an African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish hue, and smells like aniseed. It was once employed as an astringent and detergent.

SARCOCOPTES, (*sarco*, and κοπτω, 'to wound,') see Psora.

SARCODES, (from σαρξ, 'flesh,' and *odes*,) Carneous.

SARCOËPIPLOCE'LĒ, *Sarcepiploce'lē*, (*sarco*, επιπλοον, 'the epiploon,' and κηλη, 'a tumour.') Epiplocele, complicated with sarcoma or sarcocele.

SARCOËPIPLOM'PHALUS, *Sarcepiplom'phalus*, *Sarcepiplomphaloce'lē*, (*sarco*, επιπλοον, 'the epiploon,' and ομφαλος, 'the navel.') Umbilical hernia, formed by scirrhous epiploon or complicated with sarcoma.

SARCOHYDROCELE, Hydrosarcocele.

SAR'COID, *Sarcoï'des*, (σαρκοειδης, from *sarco*, and ειδος, 'resemblance.') Resembling flesh.

SARCOLEM'MA, gen. *Sarcolem'matis*, *Sarcole'ma*, (*sarco*, and λεμμα, 'a coat.') The sheath which surrounds the fibrils of muscle that form a fibre. It is quite distinct from the areolar membrane that binds the fibres into fasciculi. See Perymisium.

SARCOLOGIA, (*sarco*, and λογος, 'a discourse,') Myology, Sarcology.

SARCOL'OGY, *Sarcolog''ia*. The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

SARCO'MA, gen. *Sarco'matis*, (σαρκωμα,) *Emphy'ma Sarco'ma*, *Sarcom'atous tu'mour*, *Sarco'sis*, *Sarcophy'ïä*, *Ecsarco'ma*, *Exsarco'ma*, *Tu'mor car'neus*, *Excrescen'tia carno'sa*, *Pol'ypus carno'sus*, (σαρξ, 'flesh,' and *oma*.) Any species of excrescence having a fleshy consistence.

SARCOMA, CARCINOMATOUS, Scirrhus—s. Cerecosis, see Cerecosis—s. Epulis, Epulis—s. Gelatinous, see Tumour, fibrocellular—s. Mastoid, Mammary sarcoma—s. Medullare, see Encephaloid—s. Medullary, see Encephaloid, Hæmatodes fungus—s. Pulpy, Hæmatodes fungus—s. Seroti, Sarcocele.

SARCOMA, COM'MON VAS'CULAR or OR'GANIZED of Abernethy, *Emphy'ma Sarco'ma Vasculo'sum*, is vascular throughout: texture simple: when bulky, napped on the surface with arborescent veins. Found over the body and limbs generally.

SARCOMATEUX, Sarcomatous.

SARCOMATODES, Sarcomatous.

SARCOMATOSUS, Sarcomatous.

SARCOM'ATOUS, *Sarcomato'sus*, *Sarcomato'des*, (F.) *Sarcomateux*. Belonging to, or having the characters of sarcoma.

SARCOMPHALUM, (σαρκομφαλον,) Sarcomphalus.

SARCOM'PHALUS, *Sarcom'phalum*, (*sarco*, and ομφαλος, 'navel.') A scirrhous or fleshy tumour, developed at the navel.

SARCOMYCES, (*sarco*, and μυκης, 'fungus,') Sarcospongus.

SARCOPHAGUS, (σαρκοφαγος, from *sarco*, and φαγω, 'to eat,') Carnivorous, Catheretic.

SARCOPHYIA, (*sarco*, and φυω, 'to grow,') Excrescence, Sarcoma.

SARCOPSYLLA PENETRANS, (*sarco*, and ψυλλα, 'a flea,') *Chique*.

SARCOPTE, Acarus.

SARCOPTES SCABIEI, (*sarco*, and κοπτω, 'to wound,') see Psora.

SARCOPYO'DES, (*sarco*, πυον, 'pus,' and *odes*.) Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

SARCO'SIS, (σαρκωσις, from σαρξ, gen. σαρκος, 'flesh,' and *osis*.) The formation of flesh. Also, sarcoma.

SARCOSIS BUL'BI, *Exophthal'mia fungo'sa* seu *sarcomat'ica*. A fleshy growth from the globe of the eye.

SARCOSIS UTERI, Metrauxe.

SARCOSPONG'US, *Sarcom'yces*, (*sarco*, and σπογγος, 'fungus.') A fleshy fungus.

SARCOSTOSIS, (*sarco*, and *ostosis*, 'formation of bone,') Osteosarcoma.

SARCOTHLA'SIS, *Sarcothlas'ma*, (*sarco*, and θλαω, 'I bruise.') *Cu'ro contu'sa*. A bruise of the flesh.

SARCOTIC, (σαρκωτικος,) Incarnans.

SARCOTRIPTEUR, (*sarco*, and τριβω, 'to rub down,') *Écraseur*.

SARCOTRIPSIE, see *Écraseur*.

SAR'COUS, (F.) *Sarceux*, (from σαρξ, gen. σαρκος, 'flesh.') Of, or belonging to, flesh or muscle—as '*sarcous tissue*.'

SARCOUS EL'EMENTS, *Prim'itive par'ticles*. The elementary particles, which, by their union, form the mass of muscular fibre.

SARDIASIS, (from Σαρδω, *Sardinia*, because the *Sardonia herba*, which grew there, was said to produce it,) Canine laugh, Risus sardonicus.

SARDONIA HERBA, Ranunculus sceleratus.

SARDONIASIS, (same etymon as Sardiasis,) Canine laugh, Risus sardonicus.

SARDONIUS RISUS, Canine laugh.

SARE, Essera.

SAROTHAMNUS SCOPARIUS, (σαρος, 'a broom, and Σαμνος, 'a shrub.') Spartium scoparium.

SARRACE'NIA, (after Dr. Sarrazin, of Quebec,) *Sidesaddle plant*, *Fly'trap*. The root of *Sarracenia fla'va* and *S. variola'ris* is bitter and astringent, and has been used in South Carolina, as a domestic remedy in dyspepsia. The root of *Sarracenia purpu'rea* or *pitcher plant*, *Indian* or *Huntsman's cap*, is used, in infusion, by the Indians of the North, as a remedy for smallpox; both in the way of prevention and cure.

SARRASIN, (after the Saracens,) Polygonum fagopyrum.

SARRETE, Trismus infantum.

SARRIETTE, Satureia hortensis—*s. de Crète*, Satureia capitata.

SARSA, Smilax sarsaparilla.

SARSAPARILLA, ([S.] *Zarza*, 'a briar,' and *parilla*, 'a little vine,' or, according to some, from *Parillo*, a physician who first employed it.) Menispermum Canadense, Smilax S.

SARSAPARILLA, FALSE, Aralia nudicaulis.

SARSAPARIL'LA GERMAN'ICA, *Gra'men ma'jor* seu *ru'brum*, *Salsaparil'la German'ica*, *Cu'rex Arena'ria*, (F.) *Laiche*, *L. des Sables*, *Salsepareille d'Allemagne*, *Chiendent rouge*. *Ord.* Cyperaceæ. *Sex. Syst.* Monœcia Triandria. A plant, which grows plentifully on the seacoasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

SARSAPARILLA, INDIAN, Hemidesmus Indicus—s. Wild, Aralia nudicaulis.

SARTAPARILLA, Smilax sarsaparilla.

SARTO'RIUS, (*sartor*, 'a tailor,' because used in crossing the legs.) *Suto'rius*, *Longis'simus Fem'oris*, *Fascia'lis*, *F. Lon'gus* seu *suto'rius*, (F.) *Ilio-cresti-tibial*, *Ilio-prétibial* (Ch.), *Couturier*. A muscle situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

SARX, (σαρξ, gen. σαρκος,) Flesh, Pulp.

SARZA, ([S.] *sarza*, 'a briar,') Smilax sarsaparilla.

SAS'SA GUM. A gum, occasionally carried into the European markets from the East, and answering exactly to Bruce's description of the product of a tree, which he calls *Sassa*. It has considerable resemblance to Gum Tragacanth.

SASSAFRAS, Laurus sassafras, Nectandra cymbarum—s. Medulla, see Laurus sassafras—s. Nut, see Pichurim beans—s. Radicis cortex, see Laurus sassafras.

SASSAFRAS, SWAMP, Magnolia glauca.

SASSAFRAS TEA, Saloop.

SAS'SY BARK. A poisonous bark of a large tree—Genus, *Erythrophle'um*, *E. Guineen'sē*; *Nat. Ord.* Fabaceæ; *Redwater tree* of Sierra Leone—

growing in Western and Central Africa, used in an ordeal to which persons, suspected of witchcraft, secret murder, and other crimes, are subjected, to test their innocence or guilt. Hence it is called, in Congo, *ordeal bark*, and in Ashantee and Liberia, *doom bark*.

SAT'ELLITE, *Satel'les*, gen. *Satel'litis*. That which guards. That which is placed near.

SATELLITE VEINS are those that accompany arteries.

SATHE, (σαθη,) Penis.

SATIAS, Satiety.

SATIES, Satiety.

SATIETAS, Plesmone, Satiety,

SATI'ETY, *Sati'etas, Satu'ritas, Sa'tias, Sa'ties, Satura'tio, Asē, Ple'thos, Ples'monē*, (*satiare*, from *satis*, 'enough,' 'to give enough.') Disgust for food; commonly produced by repletion.

SATIN, Lunaria rediviva.

SATURANS, (*saturare, saturatum*, (*satis*, 'enough,') 'to satiate,') Absorbent (medicine.)

SATURATIO, Satiety, Saturation.

SATURA'TION, *Satura'tio*. The state of a compound in which its elements are combined in such proportion that a fresh quantity of either cannot be added without producing excess. When an acid or an alkali is directed to be saturated, the saturation is determined by litmus and turmeric.

SATURE'IA CAPITA'TA, (from Σατυροι, 'the Satyrs;' owing to its presumed power of exciting to venery.) *Cil'iated Sa'vory, Thy'mus, T. sylves'tris* seu *capita'tus* seu *Cre'ticus, Cuni'la*, (F.) *Sarriette de Crète*. *Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. Possesses similar properties to thyme.

SATURE'IA HORTEN'SIS, *Satureia, S. sati'va, Cuni'la sati'va Plin'ii, Thym'bra, Sum'mer Sa'vory*, (F.) *Sarriette*. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

SATUREIA ORIGANOIDES, Cunila mariana — s. Sativa, S. hortensis.

SATURITAS, (*saturare*, 'to satiate,') Satiety.

SATURNI DULCEDO, Plumbi superacetas.

SAT'URNINE, *Saturni'nus*, (from *saturnus*,) Containing, or caused by, lead.

SAT'URNINE BREATH. The peculiar odour of the breath in one labouring under Saturnismus.

SATURNISM'US, *Intoxica'tio* seu *Cachex'ia* seu *Dyscra'sia saturni'na, Molybdocachex'ia*, (F.) *Maladie de plomb*, (from *saturnus*.) Poisoning by lead; lead-poisoning; saturnine cachexy.

SATURNUS, Plumbum.

SATYRI'ASIS, (σατυριασις, from Σατυρος, 'a Satyr;' because the Satyrs were greatly addicted to venery.) *S. fu'rens, Satyria'mus, Satyris'mus, Œstroma'nia, Tenti'go vene'rea, Salac''itas, Brachu'na, Lagne'sis Salac''itas, L. fu'ror masculi'nus, Lagne'a, Lagni'a, Lagno'sis, Lasciv'ia, Lasciv'itas, Tenti'go vere'tri*. An irresistible desire, in man, to have frequent connexion with the female, accompanied by the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are:—almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

SATYRIASIS FURENS, Satyriasis.

SATYRIASMUS, Satyriasis.

SATYRION, (σατυριον,) Orchis mascula.

SATYRISMUS, (σατυρισμος,) Satyriasis.

SATYRIUM, Goodyera pubescens.

SAUARJA, Saoria.

SAUCE ALONE, Alliaria.

SAUCE, GREEN, Rumex scutatus.

SAUCH, ([Sax.] ȝalh,) Salix.

SAUERKRAUT (G.), 'sour cabbage,' *Sour crout*, (F.) *Chou-croûte*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.

SAUGE, Salvia — *s. des Bois*, Teucrium scordium — *s. Grande*, Salvia sclarea — *s. Hormin*, Salvia horminum—*s. de Jérusalem*, Pulmonaria—*s. Petite*, Salvia—*s. Sclarée*, Salvia sclarea.

SAUGH, ([Sax.] ȝalh,) Salix.

SAULE, Salix.

SAUMURE, (from *sal*, and *muria*,) Muria.

SAUNDERS, RED, Pterocarpus santalinus — s. Tree, Pterocarpus santalinus — s. Yellow, Santalum album.

SAURA, (σαυρα,) Lizard.

SAURU'RUS CER'NUUS, (*saura*, 'lizard,' and ουρα, 'a tail.') *Liz'ard's Tail, Breast weed*. Indigenous; *Order*, Saururaceæ; flowering in June. It has been used in lumbago. The bruised root is emollient, and is a popular application to inflamed breasts.

SAUSAGE POISON, Allantotoxicum.

SAUT, ([L.] *saltus*,) Leap.

SAUTEUSES, 'leapers,' see *Convulsionnaire*.

SAUVE-VIE, 'save life,' Asplenium ruta muraria.

SAVE, Salvia.

SAVEUR, Savour.

SAVINE, Juniperus sabina.

SAVINIER, Juniperus sabina.

SAVON, Sapo — *s. Ammoniacal*, Linimentum ammoniæ fortius — *s. Cacao*, Sapo coconeus — *s. Calcaire*, Linimentum aquæ calcis — *s. Dur*, Sapo durus — *s. Médicinal*, Sapo medicinalis — *s. Mou*, Sapo mollis—*s. Noir*, Sapo mollis.

SAVONNIER COMMUN, (from *savon*,) Sapindus saponaria.

SAVONNIÈRE, Saponaria.

SAVONULE, Saponulus.

SAVONULUS, Saponulus.

SA'VOR, *Sa'por, Taste*, (F.) *Saveur*. Quality of bodies, by which they act upon the sense of taste. Chymists, at times, avail themselves of this quality to analyse an unknown substance.

SA'VORY, *Sap'idus*, (F.) *Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.

SAVORY, CILIATED, Saturcia capitata—s. Summer, Satureia hortensis.

SAVOREUX, Savory.

SAVOYAN, Galium verum.

SAW, *Pri'on, Ser'ra*, ([Da.] Sawe, [Sax.] ȝaga,) (F.) *Scie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.

SAW, AMPUTA'TION, *Ser'ra amputato'ria*. The saw used in amputation.

SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.

SAW PALMETTO, Chamærops serratula — s. Wort, Liatris.

SAXIF'RAGA, (*saxum*, 'a stone,' and *frango*, 'I break.') Pimpinella saxifraga — s. Anglica, Peucedanum silaus. See Calcifraga.

SAXIFRAGA CRASSIFO'LIA. *Ord.* Saxifragaceæ. *Sex. Syst.* Decandria Digynia. The root of this

species of saxifrage has been extolled by Pallas, as preëminently antiseptic.

Saxifraga Granula'ta, *S. alba, Sanicula, Sedum, White saxifrage,* (F.) *Saxifrage granulée.* Recommended as diuretic and lithontriptic; but not used.

Saxifraga Rubra, Spiræa filipendula — s. Vulgaris, Peucedanum silaus.

SAXIFRAGE, BURNET, Pimpinella saxifraga — *s. Granulée,* Saxifraga granulata—s. Meadow, Peucedanum silaus — s. White, Saxifraga granulata.

SAXIFRAGUS, (*saxum,* 'a stone,' and *frango,* 'I break,') Lithontriptic.

SAXON'ICUS PUL'VIS. A powder, prepared with the roots of the wild and the cultivated angelica; the aselepias vincetoxicum, &c. It was considered formerly as an antidote.

SCAB, *Sca'bies, Crus'ta, Scall,* (Prov.) *Rove,* (F.) *Croûte.* An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.

SCAB'BY or SCAB'BED. Covered or diseased with scabs.

SCABIES, (*scabere,* 'to scratch,') Psora — s. Agria, Lichen—s. Capitis, Porrigo lupinosa, Porrigo scutulata — s. Capitis favosa, Porrigo favosa —s. Crustosa, Radzyge—s. Fera, Ecthyma.

Sca'bies Feri'na, *Itch of animals, Mange,* (pronounced *Mănge.*) A cutaneous disease, which affects almost all domestic animals, but especially the horse, sheep, dog, and cow. It is said to have been transmitted to man; but this is questionable.

Scabies Ferina, Psoriasis — s. Norwegica Boeckii, Radzyge—s. Papuliformis, Prurigo — s. Sicca, Lichen, Psoriasis — s. Venerea contagiosa, Scherlievo.

SCABIEUSE ORDINAIRE, Scabiosa.

SCABIOLA, Scabies.

SCABIO'SA, (*scaber,* 'rough,' owing to its rough hairy surface,) *S. arven'sis, Triche'ra arven'sis, Field Scabious,* (Sc.) *Eastningwort,* (F.) *Scabieuse ordinaire. Ord.* Dipsaceæ. *Sex. Syst.* Tetrandria Monogynia. The plant is bitter and subastringent, and was formely used in the cure of leprous affections and diseased lungs.

Scabiosa Arvensis, Scabiosa — s. Carduifolia, Echinops.

Scabiosa Succi'sa, *Succi'sa, S. praten'sis, Asteroceph'alus succi'sa, Mor'sus Diab'oli, Devil's bit,* (F.) *Mors du Diable,* has similar properties.

SCABIOUS, Erigeron Philadelphicum — s. Field, Scabiosa — s. Sweet, Erigeron heterophyllum.

SCABISH, Œnothera biennis.

SCABRITIES, (*scaber,* 'rough,') Lichen, Trachoma.

SCÆVOLA, see Bela-modagam.

SCA'LA, (F.) *Rampe,* 'a ladder.' A machine formerly used for reducing dislocations of the humerus.

Scalæ of the Cochlea, *Gyri* seu *Ductus spirales* seu *Canales cochleæ,* (F.) *Rampes* ou *Échelles du Limaçon* — are the cavities in the cochlea, separated from each other by the spiral septum. The one—*Scala interna* seu *posterior* seu *inferior cochleæ, S. tympani* — would communicate with the cavitas tympani by the fenestra rotunda, were it not for the membrane that closes it. The other — *Scala externa* seu *anterior* seu *superior cochleæ, S. vestibuli* — opens into the cavity of the vestibule. The scalæ communicate with each other by an opening at the top of the partition.

Scala Anterior Cochleæ, see Scala — s. Clausa, see Scala — s. Externa cochleæ, see Scala —s. Inferior cochleæ, see Scala—s. Interior cochleæ, see Scala — s. Posterior cochleæ, see Scala — s. Superior cochleæ, see Scala — s. Tympani, see Cochlea, and Scala — s. Vestibuli, see Cochlea, and Scala.

SCALDRICKS, Sinapis arvensis.

SCALE, ([Sax. ꝛcale, from ꝛcẏlan, 'to divide, separate;' [G.] Schale, 'shell, peel;') *Squama, Lepis,* (F.) *Écaille, Écaille.* An opake and thickened lamina of cuticle, commonly produced by some degree of inflammation of the true skin, over which it is formed.

Scale, Dry, Psoriasis.

SCALÈNE ANTÉRIEUR, Scalenus anticus —*s. Postérieur,* Scalenus posticus.

SCALE'NUS, (σκαληνος, 'irregular or unequal.') Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles. 1. Scale'nus Anti'cus, *Portion of the Costotrachelian* (Ch.), (F.) *Scalène antérieur,* is situate at the internal and inferior part of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebræ. This muscle bends the neck, and draws it to its side. It can also raise the first rib. 2. Scale'nus Posti'cus, (F.) *Scalène postérieur, Portion of the Costotrachelien* (Ch.), is situate behind the last. It is, also, long and triangular; but more bulky than the *S. anticus.* It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebræ of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmering, have described five scaleni muscles on each side, and have called them *Scalenus prior, S. minimus, S. lateralis, S. medius, S. posticus.* Riolan and Chaussier only deseribe one scalenus muscle on each side. Cowper and Douglas, and the generality of the English anatomists, admit three, *S. anticus, S. medius,* and *S. posticus;* or, *primus, secundus,* and *tertius;* Winslow, Boyer, and many of the French anatomists,—two, as above described.

SCA'LING—same etymon as Scale—in dentistry, is an operation which consists in removing the tartar from the teeth.

SCALL, (*Scale* [?],) ([Sc.] *Skaw,*) Impetigo, Scab—s. Asbestos, see Eczema of the hairy scalp — s. Crusted, Impetigo — s. Dry, Psoriasis — s. Honeycomb, Porrigo favosa — s. Humid, Eczema — s. Milky, Porrigo larvalis — s. Papulous, Ecthyma—s. Running, Eczema, Impetigo—s. Vesicular, Eczema capitis — s. Washerwoman's, Psoriasis diffusa.

SCALLARD, (from *scall,*) Porrigo.

SCALLED HEAD, Porrigo, P. scutulata.

SCALP, ([D.] *Schelp,* 'a shell.') (Old Eng.) *Scop.* The integuments covering the head. The *hair'y scalp* is called, also, *Capillit'ium, Trichoton, Cæsa'ries,* (F.) *Chevelure, Cuir chevelu.*

SCAL'PEL, *Scalpel'lum, Scalpel'lus, Cul'ter, Inciso'rium, Smi'lion;* (from *scalpo,* 'to cut.') A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

SCALPELLUM, Scalpel — s. Lenticulare, Phacopis.

SCALPELLUS, *Bistouri,* Scalpol.

SCALPEUM, *Bistouri.*

SCALPRUM, (*scalpo,* 'to cut, to scrape,') Raspatorium—s. Chirurgicum, Lancet.

Scalprum Denta'rium, *Li'ma dentaria.* A tooth file. A dental file, or file used by the dentist.

Scalprum Rasorium, Raspatorium.

SCALY, (from *scale,*) Squamous.

Sca'ly Diseases or Squa'mæ. *Lepido'ses*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCAMMA, (σκαμμα,) Fossa.

SCAMMONÉE D'ALEP, Convolvulus scammonia.

SCAMMONIA, see Convolvulus Scammonia.

SCAMMONIÆ RADIX, see Convolvulus Scammonia—s. Resina, Extractum Scammonii.

SCAMMONIUM, (σκαμωνια, σκαμμωνιον,) see Convolvulus scammonia — s. Syriacum, Convolvulus scammonia.

SCAMMONY, Convolvulus scammonia.

Scam'mony, Bour'bon. The concrete juice of *Perip'loca Mauritia'na*.

Scammony, German, see Convolvulus sepium.

Scammony of Montpellier, Cynanchum Monspeliacum

SCAM'NUM HIPPOCRAT'ICUM, (*scamnum*, 'a bench.') *Ba'thron Hippocrati'on* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long, on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counterextension were effected by a winch. It is described by Galen, Oribasius, Scultetus, &c. See Bathron.

SCANDIX, gen. *Scan'dicis*, (σκανδιξ,) S. Cerefolium.

Scandix Bulbocastanum, Bunium bulbocastanum.

Scandix Cerefo'lium, *Scan'dix*, *Scan'dyx*, *Pec'ten Ven'eris*, *Cerefo'lium*, *Dau'cus Sepriu'ius*, *Chærophyl'lum*, *Ch. Sati'vum* seu *Cerefo'lium*, *Anthris'cus cerefo'lium*, *Chærefo'lium*, *Cher'vil*, (F.) *Cerfeuil*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

Scandix Odora'ta, *Sweet Cic''ely*. Properties the same as the other. Also, Chærophyllum odoratum.

SCANDULARIUS MUSCULUS, (*scandere*, 'to climb,') Parathenar, Transversus pedis.

SCANDYX, (σκανδυξ,) Scandix cerefolium.

SCA'PHA, (σκαφη,) *Scaphus*, (σκαφος, from σκαπτω, 'I make hollow.') The excavation or cavity of the external ear, between the helix and anthelix. The meatus auditorius externus. The rima vulvæ. Also the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tho'lus Diocle'us*.

SCAPHION, (σκαφιον, dim. of σκαφη, 'a trough,') Cranium, Papaver (Capsule).

SCA'PHIUM OCULA'RE, *Pel'vis Ocula'ris*, *Eyeglass*. (F.) *Bassin* ou *Gondole oculaire*, *Œillière*. A small porcelain, glass, or metallic vessel, used for applying lotions to the eye.

SCAPHOCARPOSUPERPHALANGEUS POLLICIS, Abductor pollicis brevis.

SCA'PHOID, *Scaphoï'des*, (σκαφη, 'a skiff,' and ειδος, 'form.') A name given to several parts.

Scaphoid Bone of the Foot, *Os Scaphoï'des Pe'dis* seu *navicula're* seu *cymbifor'mē*, *Boatlike bone*, (F.) *Scaphoïde du Pied*. This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the ossa cuneiformia. Between the os naviculare and astragalus, the foot has its principal lateral and rotary motions; although each of the other joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

Scaphoid Bone of the Hand, *Os Scaphoï'des Ma'nûs* seu *navicula're* seu *cymbifor'mē*, *Boatlike bone*, (F.) *Scaphoïde de la main*. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex, — to be articulated with the trapezium and trapezoides. Between the upper and under cartilaginous surfaces there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity*, where it is articulated with the os magnum, which gives name to the bone. There is a *process* on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

Scaphoid Fos'sa, *Fos'sa Scaphoï'des*, (F.) *Enfoncement Scaphoïde*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

SCAPHOÏDE DE LA MAIN, Os scaphoides manûs—s. *du Pied*, Os scaphoides pedis.

SCAPHOÏDOÄSTRAG'ALAN, *Scaphoïdoästragala'nus*. That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphoïdoüstragalan ligament*.

SCAPHOÏDOCU'BOID, *Scaphoïdocuboïdæ'us*. That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, (dim. of *scapha*,) Navicularis fossa.

SCAPHUS, (σκαφος, 'a skiff, a trough,') Auditory canal, external, Rima vulvæ, Scapha.

SCAP'ULA, *Scap'ulum*, *Pla'ta*, *Omo'plata*, *Homo'pluta*, *Scop'tula*, *Epino'tion*, *Latitu'do hu'meri*, *Omop'latē*, *Os la'tum hu'meri*, *Scu'tum thora'cis* seu *cor'dis*, *Spa'tha*, *Spath'ula*, *Pteryg'ium*, *Chélo'nium*, *Spat'ula*; *Bladebone*, *Shoulderblade*, (Prov.) *Shieldbone*, *Platebone*, *Spadebone*, (F.) *Omoplate*. An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *poste'rior* or *dor'sal sur'face* or *Dor'sum*, *Testu'do scap'ulæ*, divided transversely into two parts by a triangular process, called *Spine of the Scapula*; which terminates by a considerable eminence, called *Acromion*. Above the spine, is the *Fos'sa supraspina'ta*; below it, the *F. in'fraspina'ta*. 2. An *ante'rior* or *cos'tal sur'face* or *ven'ter*, forming the *Fos'sa subscapula'ris*. 3. A *supe'rior* or *cer'vical edge*, which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process*. 4. A *poste'rior* or *ver'tebral edge*, called, also, the *base*. 5. An *outer* or *ax'illary* or *infe'rior edge*, having a thick, truncated angle, in which is the *glenoid cavity*. With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrow part called the *cervix* or *neck*. The edges or margins are, also, called *costæ*. The scapula has three angles — an *inferior*, *superior*, and *anterior*.

Scapula, Humerus.

Scap'ulæ Na'si, *Par'tes latera'les na'si*. The lateral parts of the nose.

SCAPULAIRE, Scapular.

SCAPULAL'GIA, (*scapula*, 'the shoulderblade,' and αλγος, 'pain.') Arthralgia of the scapula.

SCAP'ULAR, *Scap'ulary*, *Scapula'ris*, (F.) *Scapulaire*, (from *scapula*.) That which relates or belongs to the scapula.

Scapular Aponeuro'sis. A broad, thin aponeurosis, with decussating fibres; which is attached, *above*, to the spine of the scapula; *below*, to a crest between the teres major and infraspi-

natus; *within*, to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

Scap'ular Ar'teries. These are several. 1. The *Supe'rior scap'ular, Superfic''ial scap'ular* of Sömmering, *Dorsa'lis scap'ulæ supe'rior, Transversa'lis scap'ulæ, T. Hu'meri.* This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical.* It passes behind the clavicle, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. 2. The *infe'rior scap'ular* or *com'mon scap'ular* or *internal scap'ular* or *subscap'ular ar'tery, A. Thorac''ica axilla'ris* seu *ala'ris,* is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus — gives off several branches to the armpit, and divides into two branches: — the one, *Scapula'ris interna,* and the smaller of the two, is distributed, almost entirely, to the serratus major anticus, and latissimus dorsi; the other, the larger of the two, *Dorsa'lis Scap'ulæ infe'rior* seu *Circumflex'a Scapula'ris,* which distributes its branches to the subscapular, supraspinal and infraspinal regions.

Scapular Notch, see Notch, scapular.

Scapular Veins follow the same course as the arteries, which they accompany.

SCAPULARE, Scapulary.

SCAP'ULARY, *Scapula'rē, Fas'cia Scapula'ris.* A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; the tails passing over the shoulders; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAPULO, in composition, the scapula.

SCAPULODYN'IA, (*scapula*, and *ὀδυνη*, 'pain.') Pain or rheumatism of the shoulder.

SCAP'ULOHU'MERAL. An epithet given to the *shoulderjoint.* It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connection, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibrocartilaginous ring,* called the glenoid ligament, and a synovial capsule.

SCAPULO-HUMÉRAL, Teres major—*s. Huméro-olécranien,* Triceps extensor cubiti — *s. Hyoïdien,* Omohyoideus — *s. Radial,* Biceps flexor cubiti — *s. Trochitérien, grand,* Infraspinatus.

SCAPUS, (*σκαπος*, 'a shaft, a stalk,') Penis, see Hair.

SCAR, (*εσχαρα*, [F.] *escarre,*) Cicatrix.

Scar, *Seam.* To mark with a cicatrix or seam; — as *scarred,* (Sc.) *arred,* means marked with a cicatrix or seam.

SCARABÆOLUS HEMISPHÆRICUS, (dim. *of scarabæus,*) Coccus cacti.

SCAR'BOROUGH, MIN'ERAL WA'TERS OF. *Scarborough Spa.* A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge: the other has an admixture of purging salt. Scarborough, having the additional advantage of seabathing, is much frequented by invalids.

SCARCHT, ([Sax.] *ρcpitta,*) Hermaphrodite.

SCARDAMYG'MUS, (*σκαρδαμυγμος,*) *Scardamyx'is,* (F.) *Clignement,* (from *σκαρδαμυσσειν*, 'to wink.') Winking. Closure of the eyelids.

SCARFSKIN, Epidermis.

SCARIFICATEUR, Scarificator.

SCARIFICA'TION, *Scarifica'tio, Amyx'is, Scha'sis, Catacas'mus, Amyg'mus, Schas'mus, Encharax'is,* (*scarificare, scarificatum, σκαριφασθαι*, 'to make a slight scratch.') The act of scarifying. Also, a small incision, *Am'ychē,* made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes, — as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed by the French. *Mouchetures.*

SCARIFICA'TOR, *Scarificato'rium, Schaste'rium,* (F.) *Scarificateur.* An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIFICATORIUM, Scarificator.

SCARIOLA, Cichorium endivia, Lactuca scariola.

SCARIOLE, Cichorium endivia.

SCARLATA, Scarlatina.

SCARLATI'NA, ([I.] *scarlatte,* 'a deep red.') *Scarla'tia, Enanthe'sis Rosa'lia, Rosa'lia, Rossa'lia, R. Squamo'sa, Rosa'liæ, Rubeo'læ,* of some, *Morbil'li ig'nei* seu *confluen'tes, Mor'bus scarlatino'sus, Fe'bris scarlatino'sa* seu *ru'bra, Gut'turis mor'bus epidem'icus Forest'i, Pur'pura, Ty'phus scarlati'nus, Porphyris'mus, Porphyris'ma, Scar'let* or *Rushfever,* (F.) *Fièvre rouge, F. pourprée.* The characteristic symptoms of scarlatina are:— a scarlet flush, appearing about the second day of fever on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned:—the *S. simplex* seu *febris* seu *benig'na* seu *sine angi'nâ,* in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifling;—and the *S. Angino'sa* seu *Paristhmit'ica* seu *Cynanch'ica* seu *mit''ior,* in which the fever is severe; the throat ulcerated; the eruption later in its appearance, and less extensive; often changing to a livid hue. *Scarlati'na malig'na* seu *gra'vior,* has been reckoned a variety of this, in its worst degree. It agrees with the Cynanche maligna of Cullen.

Scarlatina belongs to the *major exanthemata,* and is a disease, chiefly, of children. The eruption differs from that of measles, in being an efflorescence not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cynanche.

The disease is generally regarded as eminently contagious, but doubt may and does exist on this point. To the zymotic principle, the name *Scar'latinin* has been given.

The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles, and counterirritants must be employed; and if the affection becomes manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention. Purgatives are here demanded as well as the use of sorbefacients, such as mercury and squill, &c.

Scarlatina Anginosa, see Scarlatina — s. Benigna, see Scarlatina — s. Cynanchica, see Scarlatina — s. Febris, see Scarlatina — s. Gravior, see Scarlatina — s. Miliaris, Rubeola — s. Mitior, see Scarlatina — s. Paristhmitica, see Scarlatina — s. Pustulosa, Rubeola — s. Rheumatica, Dengue — s. Sine anginâ, see Scarlatina — s. Urticata, Urticaria.

SCARLATININ, see Scarlatina.

SCAR'LATINOID, *Scarlatinoï'des,* (*scarlatina,* and *εἰδος*, 'resemblance.') Resembling scarlatina.

SCARLATI'NOUS or SCARLAT'INOUS, *Scarlati'nal, Scarlatino'sus.* Relating or appertaining to scarlatina.

SCARLET BERRY, Solanum dulcamara — s. Fever, Scarlatina.

SCARRED, see Scar.

SCATACRASIA, (σκωρ, gen. σκατος, 'excrement,' and κρασις, 'mixture,') Scoracrasia.

SCATACRATIA, (σκωρ, gen. σκατος, 'excrement,' and *acratia*, 'want of power,') see Scoracrasia.

SCAW, Sambucus.

SCEAU DE SALOMON, 'seal of Solomon,' Convallaria polygonatum.

SCELAL'GIA, (*scelos*, and αλγος, 'pain.') Pain of the leg.

SCELALGIA ANTICA, Neuralgia femoropretibialis —s. Postica, Neuralgia femoropoplitea — s. Puerperarum, Phlegmatia dolens.

SCELETEUMA, *Skeleteuma*, (σκελετευμα,) Mummy.

SCELETEU'SIS, *Skeleteu'sis*, (σκελετευω, 'to desiccate, to pickle.') Mummification. Also, the mode of making a skeleton, *Skeletopœ'ia, Syntax'is.*

SCELETOGRAPHY, Skeletography.

SCELETOLOGIA, Skeletology.

SCELETON, Skeleton.

SCELETOPŒA, Sceleteusis, Skeletopœia.

SCELETUM, Skeleton—s. Artificiale, see Skeleton — s. Naturale, see Skeleton.

SCELONCUS, (*scelos*, and ογκος, 'a tumour.') A tumour of the leg. Phlegmatia dolens.

SCELORRHEU'MA, *Rheumatis'mus cru'ris*, (*scelos*, and ρευμα, 'defluxion, rheumatism.') Rheumatism of the leg.

SCELOS, (σκελος,) Leg.

SCELOSCAMBOSIS, (*scelos*, and σκαμβος, 'crooked,') see Rhæbosis.

SCELOTYRBE, (σκελοτυρβη, from *scelos*, and τυρβη, 'tumult,') Chorea, Porphyra nautica — s. Febrilis, see Subsultus tendinum — s. Festinans, Paralysis agitans—s. Tarantismus, Chorea.

SCENOMENINX, (σκηνος, 'a hut,' and μηνιγξ, 'a membrane,') see Cell.

SCENOTHEORIA, (σκηνος, 'a hut,' and θεωρια, 'theory,') Cell doctrine.

SCEPARNON, (σκεπαρνον,) Amnios, Ascia.

SCEPASTERIUM, (from σκεπαζω, 'to enwrap,') *Couvrechef.*

SCEPASTRUM, *Couvrechef.*

SCEPTRUM, (σκεπτρον,) Penis.

SCHASIS, (σχασις,) Scarification.

SCHASMUS, (σχασμος,) Scarification.

SCHASTERION, (σχαστηριον,) Fleam, Lancet, Scarificator.

SCHEBA ARABUM, Artemisia santonica.

SCHEDULA, (dim. of *schedα*, 'a leaf of paper,') Prescription.

SCHERBET', *Sherbet', Serbet', Tscherbet', Sorbe'thum, Sorbet'tum, Sorbe'tum, Sorbet.* A drink prepared by the Turks, Persians, Egyptians, &c., with sugar and the juice of acid fruits.

SCHERLIE'VO, *Skerljevo, Male di Scherlievo, Male di Breno, Male di Fiume, Male di Scarlievo, Male scabioso venereo, Margaretizza, Mor'bus Croa'tus* seu *fluminien'sis, Frambœ'sia Illyr'ica, Sca'bies vene'rea contagio'sa, Vene'real Itch.* A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and that its principal symptoms are: — pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

Affections, known by this name, as well as by those of *Male di Breno, Falcali'na, Boala* and *Frengα*, have prevailed in the frontier countries of the Austrian empire, and were generally regarded as contagious, of syphilitic origin, and as having been introduced from a surrounding country. The terms appear, however, in the course of time, to have been applied to a variety of ulcers, eruptions, and other morbid conditions in no way connected with syphilis, so that they lost their former signification.

SCHERO'MA, gen. *Schero'matis*, (from σχερος, 'a shore, dry land.') A dryness of the eye from the want of lachrymal secretion.

SCHIAS, Ischias, Neuralgia femoropoplitea.

SCHIATICUS, Sciatic.

SCHIDAKE'DON, (σχιδακηδον,) *Schidace'dum, Schindace'dum, Schindal'amus, Schindal'mus*, (from σχιζω, 'I cleave.') A longitudinal fracture of a bone.

SCHINDACEDUM, Schidakedon.

SCHINDALAMUS, (σχινδαλαμος,) Schidakedon, Schindylesis.

SCHINDALESIS, Schindylesis.

SCHINDALMUS, (σχινδαλμυς,) Schidakedon, Schindylesis.

SCHINDYLE'SIS, (σχινδυλησις,) *Schindale'sis, Schindal'amus, Schindal'mus*, (from σχινδυλεω, 'I split into small pieces.') An articulation of bones — by furrowing, as it were, as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces.

SCHINELÆ'ON, (σχινελαιον, from σχινος, 'the mastic tree,' and ελαιον, 'oil;') *Oleum lentis'cinum.* Oil of mastic.

SCHINOCEPHALUS, (*schinos*, 'the squill,' and κεφαλη, 'head,') Scillocephalus.

SCHINOS, (σχινος,) Pistacia Lentiscus, Scilla.

SCHINZ'NACH or HAPS'BURG, MIN'ERAL WA'TERS OF. These springs are situate three leagues from Baden, and are amongst the most celebrated bathing-places in Switzerland. The waters are of a saline sulphureous kind; and have a high reputation in cutaneous and rheumatic affections, visceral obstructions, and glandular enlargements. They contain sulphate of lime, sulphate of soda, chloride of sodium, chloride of magnesium, sulphate of magnesia, sulphate of lime, carbonate of magnesia, and oxide of iron; sulphohydric acid, and carbonic acid gases. The season is from the 15th of May to the 15th of September.

SCHISMA, gen. *Schism'atis*, (σχισμα,) Fissure, Rima.

SCHISTOCEPH'ALUS, (σχιστος, 'cleft,' and κεφαλη, 'head.') A monster having some part of the head cleft or fissured.

SCHISTOCOR'MUS, (σχιστος, 'cleft,' and κορμος, 'trunk,') *Schistotho'rax.* A monster having part or the whole of the trunk cleft or fissured.

SCHISTOM'ELUS, (σχιστος, 'cleft,' and μελος, 'a limb.') A monster whose limbs are fissured.

SCHISTORRHACHIS, (σχιστος, 'cleft,' and ραχις, 'spine,') Hydrorachis.

SCHISTOSO'MUS, (σχιστος, 'cleft,' and σωμα, 'body.') A malformation of the abdomen, in which the fissure and eventration extend over the entire length of the abdomen; the lower extremities being absent, or very little developed, so that the body appears as if truncated inferiorly.

SCHISTOTHORAX, (σχιστος, 'cleft,' and *thorax*,) Schistocormus.

SCHIZA, (σχιζα,) Rima—s. Vulvæ, Rima vulvæ.

SCHIZATRICH'IA, *Trichos'chisis, Schizotrich'ia* (σχιζω, 'I split,' and θριξ, gen. τριχος, 'a hair.') The splitting of the hairs at their extremities.

SCHLANGENBAD or SCHLAGENBACH, MIN'ERAL WA'TERS OF. Schlangenbad is a muchfrequented wateringplace in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° of Fahrenheit.

SCHNAPPS, SCHIEDAM, see Gin.

SCHNEIDERIAN MEMBRANE, Pituitary membrane.

SCHŒNANTHUS, (σχοινος, 'the common rush,' and ανθος, 'a flower,') Juncus odoratus.

SCHOLA, (σχολη,) School.

SCHOLLERA OXYCOCCOS, Vaccinium oxycoccos.

SCHOOL, *Scho'la*, (F.) *École*. A place of education. In Europe, the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London University — University College and King's College. Excellent schools are now connected with the hospitals there, and in the larger towns in the provinces. The medical schools of Europe which have been most celebrated, are those of Edinburgh, Leyden, Berlin, Halle, Tubingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are very numerous. Those of Philadelphia and New York are the most largely attended.

SCHOOL'EY'S MOUN'TAIN, MIN'ERAL WA'TERS OF. The waters of this New Jersey Spring are a carbonated chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, silex, and carbonate, and oxide of iron.

SCHOUSBŒA COCCINEA, (after P. K. A. Schousboe, a Danish botanist,) Cacoucia coccinea.

SCHUBERTIA DISTICHA, (after G. H. von Schubert, Professor of Natural History at Munich,) Taxodium distichum.

SCHWAL'BACH or LANGENSCHWAL'BACH, MIN'ERAL WA'TERS OF. Schwalbach is a town of Germany, seated on the Aa, 32 miles west of Frankfort. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, oxygen, &c. Employed as a tonic.

SCHWANN, WHITE SUBSTANCE OF, see Substance, white, of Schwann.

SCHWEN'DECK, MIN'ERAL WA'TERS OF. These waters are about 5 leagues from Münich, in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and oxide of iron, and are much used for cutaneous affections.

SCIAT'IC, *Sciat'icus*, *Ischiat'ic*, *Ischiat'icus*, *Schiat'icus*, (F.) *Sciatique*, (from ισχιον, 'the haunch.') Formed by contraction from *ischiatic*, which latter is still used. See Ischiatic. Used substantively for sciatica.

SCIATIC NERVE, GREAT, *Ner'vus ischiad'icus*, *Great fem'oro-poplite'al* (Ch.), (F.) *Grand nerf sciatique*, ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semimembranosus, semitendinosus, biceps and third abductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other, the *internal*.

SCIATIC NERVE, LES'SER, *Infe'rior glute'al branch of the sa'cral plex'us*, *Les'ser fem'oro-poplite'al nerve* (Ch.), (F.) *Nerf petit sciatique*, which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches — *nervi cuta'nei clu'nium inferio'res* — to the glutæus maximus; a *scia'tic branch* or *in'frapel'vic cuta'neous* or *perine'al cuta'neous*, *Pudenda'lis lon'gus infe'rior*, which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c.; and *a posterior femoral cutaneous branch—middle posterior cutaneous nerve* — the filaments of which traverse the femoral aponeurosis, to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

SCIATIC NOTCH, GREAT, *Sciatic Fora'men*, *Incisu'ra ischiad'ica ma'jor*, (F.) *Grande échancrure sciatique* ou *grand trou sciatique*, is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacrosciatic ligaments. The *les'ser sciatic notch*, *Incisu'ra ischiad'ica mi'nor*, *Lu'na Albi'ni*, (F.) *Petite échancrure ischiatique*, is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

SCIATIC REGION, Ischiadic region.

SCIATIC SPINE, *Spine of the Is'chium*, *Spi'nous Proc''ess of the Is'chium*, is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacrosciatic ligament.

SCIATICA, Neuralgia femoropoplitea.

SCIATIQUE, Neuralgia femoropoplitea, Sciatic.

SCIE, (from *secare*, 'to cut,') Saw.

SCIENTIA HERMETICA, 'Hermetic science,' Alchymy — s. Medendi, Medicina — s. Medica, Medicina.

SCIERO'PIA, (σκιερος, 'shady,' and ωψ, 'the eye.') A defect of vision, in which all objects have a darker hue than natural.

SCIL'LA, (σκιλλα, from σχιζω, 'I cleave, I split,' or from σκελλω, 'I dry,') *Sci'lla* seu *Squil'la marit'ima*, *Scyl'la*, *As'chil*, *Schi'nos*, *Oc'ulus Typho'nis*, *Ornithog'alum marit'imum* seu *squil'la*, *Stella'ris* seu *Urgin'ea scilla*, *Ce'pa mari'na*, *Squilla*, *Squill* or *sea onion*, *Eye of Typhon*, (F.) *Scille*, *Ognon marin*. *Ord.* Liliaceæ. *Sex. Syst.* Hexandria Monogynia. Native of Spain, Austria, &c. The bulb or root of the squill, *Scilla* (Ph. U. S.), has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scil'litin*. Dose, gr. j to v of the dried root, united or not with mercury.

SCILLA ESCULEN'TA, *Phalan'gium esculen'tum*, *East'ern Quamash'*, *Wild Hy'acinth*; indigenous; flowering in May. An article of diet amongst the Western Indians. It is made into bread and poultices for inflamed breasts.

SCILLIT'IC, *Scillit'icus*, (F.) *Scillitique*, (from *scilla*.) Containing squill.

SCILLITIN, see Scilla.

SCILLOCEPH'ALUS, *Schinoceph'alus*, (σκιλλα, 'the squill,' and κεφαλη, 'head.') One who has a large bulbiform head.

SCIN'CUS, (σκιγκος or σκιγγος.) A species of *Sau'rus* or *Lacer'ta*, common in Egypt, and much extolled by the ancients as alexipharmic and aphrodisiac.

SCINTIL'LA VEN'ERIS, 'a spark, a relic of Venus.' A name given, by Paracelsus, to the impotence and loss of power in the limbs produced by syphilis.

SCINTILLEMENT DE L'ŒIL, (from *scintilla*, 'a spark,') 'sparkling of the eye,' Confusio.

SCIOM'ACHY, (σκιομαχια,) *Skioma'chia*, *Skiama'chia*, (σκια, 'a shade,' and μαχη, 'a fight.') A gymnastic exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

SCIRHUS, (σκιρος,) Scirrhus.

SCIRPUS PALUSTRIS, (*scirpus*, 'a rush,') Eleocharis palustris.

SCIRRHE, Scirrhus.

SCIRRHOBLEPHARONCUS, (*scirrhus*, βλεφαρον, 'eyelid,' and ογκος, 'swelling,') see Scleriasis.

SCIRRHOCELE, (*scirrhus*, and κηλη, 'rupture,') Orchocele scirrhosa.

SCIRRHODES, (σκιρρωδης, from *scirrhus*, and *odes*,) Scirrhous.

SCIRRHOGAS'TRIA, *Scirrhus ventric'uli*, (F.) *Squirrogastrie*; (*scirrhus*, and γαστηρ, 'stomach.') Scirrhus of the stomach.

SCIR'RHOID, *Scirrhoï'des*, *Scirrho'des*, (*scirrhus*, and ειδος, 'resemblance.') Resembling scirrhus.

SCIRRHOMA, gen. *Scirrho'matis*, (σκιρρωμα,) Scirrhus.

SCIRRHOPHTHAL'MIA, *Sclerophthal'mia*, (*scirrhus*, and οφθαλμος 'eye.') *Can'cer oc'uli*. Cancer of the eye.

SCIRRHOPHTHALMIA PALPEBRARUM, see Scleriasis.

SCIRRHOSARCA NEONATORUM, (*scirrhus*, and σαρξ, gen. σαρκος, 'flesh,') Induration of the cellular tissue.

SCIRRHOSIS, (from *scirrhus*,) Scirrhus.

SCIRRHOUS, *Scirrho'sus*, *Scirrho'des*, (F.) *Squirrheux*, (from *scirrhus*.) Of or belonging to scirrhus.

SCIRRHOUS SARCO'MA OF AB'ERNETHY, *Emphy'ma sarco'ma scirrho'sum*. Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIR'RHUS, *Sci'rhus*, *Squir'rhus*, *Skir'rhus*, *Scirrho'ma*, *Scirrho'sis*, *Can'cer scirrho'sus*, *Carcino'ma sim'plex* seu *fibro'sum*, *Indura'tio malig'ma*, *Scle'rus*, *Pseudino'ma*, *Ino'ma*, *Carcinom'atous sarco'ma*, *Hard* or *Fi'brous can'cer*; (from σκιρρος, 'hard, indurated,') (F.) *Squirrhe*, *Squirre*, *Schirre*, *Skirre*, *Cancer dur* ou *squirrheux* ou *fibreux*. A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent shooting pains. It is also irregular on its surface; and when cut into has a bluish or grayish white colour. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage.

Galen uses the term *Scirrho'sis* for a livid excrescence caused by inflammation.

SCIRRHUS ET CARCINOMA VENTRICULI, see Gastrostenosis cardiaca et pylorica — s. Hepatis, Hepatoscirrhus—s. Intestinorum, Enteropathia cancerosa — s. Palpebrarum, see Scleriasis — s. Testiculi, Sarcocele—s. Uteri, Metroscirrhus—s. Ventriculi, Gastroscirrhus.

SCISSION, (from *scindere*, *scissum*, 'to split,') see Generation.

SCISSIPARITÉ, (*scindere*, *scissum*, 'to split,' and *pario*, 'to bring forth,') see Generation.

SCISS'ORS, *Scis'sor*, 'a carver,' (*scindere*, *scissum*, 'to cut.') *For'fex*, *For'pex*, *Pso'lis*, *To'mis*, (F.) *Ciseaux*. A wellknown instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are *straight* or *curved*. Sometimes the curve is on the flat side, when they are called, in France, *Ciseaux à cuiller*; at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles, are also much used. They are called in France *Ciseaux coudés*. Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSORS, SMELLIE'S, see Perforator.

SCISSURA, (from *scindere*, *scissum*, 'to split,') Fissure—s. Vulvæ, see Rima.

SCISSURÆ, Rhagades.

SCISSURE, Fissure—*s. De Glaser*, Fissure—*s. Grand médiane du Cervelet*, Valley—*s. Grande du foie*, see Liver, Fissure, glenoid—*s. de Santorini*, Santorini, fissure of.

SCITTA, see Dysentery.

SCLAREA, Salvia sclarea.

SCLEREMA, gen. *Scle're'matis*, (from *scleros*,) Induration of the cellular tissue.

SCLÉRÈME, Induration of the cellular tissue.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERENCEPHA'LIA, *Indura'tio cer'ebri*, (*scleros*, and εγκεφαλος, 'the brain.') (F.) *Endurcissement du cervcau*. Induration of the brain.

SCLERIA, (σκληρια, from *scleros*,) Scleriasis.

SCLERI'ASIS, (σκληριασις, from *scleros*,) *Sclero'ma*, *Sclero'sis*, *Scle'ria*, *Sclerya'mus*, *Seph'irus*. Any kind of hardness or induration. Sometimes, hardness of the eyelids, *Callo'sitas* seu *Scirrhophthal'mia* seu *Scirrhus palpebra'rum*, *Scirrhoblepharon'cus*; at others, hardness of the genital organs of the female; probably synonymous with scirrhus. Hardness of the bones, *Fragil'itas Os'sium*.

SCLERITIS, Sclerotitis.

SCLEROCATARACTA, see Cataract.

SCLERODERMA, gen. *Scleroderm'atis*, (*scleros*, and δερμα, 'skin,') Induration of the areolar tissue.

SCLERODES, (σληρωδης, 'hard,' and *odes*,) Sclerotic.

SCLEROIRITIS. Inflammation of the sclerotic and iris.

SCLEROMA, (from *scleros*,) Induration of the areolar tissue, Scleriasis.

SCLEROMENINX, gen. *Scleromenin'gis*, (*scleros*, and μηνιγξ, 'membrane,') Dura mater.

SCLERONYXIS, Scleroticonyxis.

SCLEROPHTHALMIA, (σκληροφθαλμια,) Hordeolum, Schirrophthalmia.

SCLEROS, (σκληρος,) Hard.

SCLEROSARCO'MA, gen. *Sclerosarco'matis*, (*scleros*, and σαρκωμα, 'a fleshy tumour.') A hard, fleshy tumour seated on the gums, and resembling a cock's comb.

SCLEROSIS, (from *scleros*,) see Induration of the areolar tissue, and Scleriasis. With Virchow, thickening with condensation.

SCLEROSTENOSIS CUTANEA, (*scleros*, and στενος, 'contracted,') Induration of the areolar tissue.

SCLEROT'IC, *Sclerot'ica*, *Sclero'des*, (from *scleros*,) *Cor'nea opa'ca*, *Tu'nica du'ra* seu *albugin'ea* seu *du'rior et crass'ior* seu *ex'tima* seu *al'ba* seu *can'dida* seu *immomia'ta oc'uli*, *Sclero'tis*, (F.) *Sclérotique*. A hard, resisting, opake membrane, of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths

of the globe of the eye, and has the form of a sphere truncated before. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tu'nica albugin'ea*. The subconjunctival sclerotic, (F.) *Blanc de l'œil*, forms the *white of the eye*, *Albu'men* seu *Album* seu *Albu'go oc'uli*, *Lon'chades*, *Log'ades*, *Len'cades*. The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels proceeding to the interior of the eye. Its inner surface is of a light brown colour, owing to a delicate areolar tissue containing brown pigment cells; and hence called *Membra'na* seu *Lam'ina fus'ca*. In the fœtus, the sclerotic may be separated into two very distinct laminæ.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICECTOM'IA, *Sclerectom'ia*, (*sclerotic*, and εκτομη, 'excision.') The operation for forming an artificial pupil by excision of a portion of the sclerotica.

SCLEROTICITIS, Sclerotitis.

SCLEROTICONYX'IS, *Scleronyx'is*, *Sclerotonyx'is*, (*sclerotica*, and νυξις, 'puncturing.') Perforation of the sclerotica in the operation for cataract by depression.

SCLEROTICOTOM'IA, (*sclerotic*, and τομη, 'incision.') The operation for cataract by cutting through the sclerotic.

SCLEROTICUS, (from *scleros*,) Indurans.

SCLÉROTIQUE, Sclerotic.

SCLEROTIS, (from *scleros*,) Sclerotic.

SCLEROTI'TIS, *Inflamma'tio Sclerot'icæ*, *Leuci'tis*, *Lonchadi'tis*, *Logadi'tis*, *Scleri'tis*, *Scleroci'tis*, *Rheumat'ic ophthal'mia*, *Ophthal'mia arthrit'ica*, (*sclerotis*, and *itis*.) Inflammation of the sclerotic coat of the eye.

SCLEROTIUM CLAVUS, (from *scleros*,) see Ergot—s. Giganteum, see Lycoperdon tuber.

SCLEROTOMIA, Scleroticectomia.

SCLERUNTICUS, (σκληρυντικος,) Indurans.

SCLERUS, (σκληρος,) Induration, Scirrhus.

SCLERYMEN, Sclerotic.

SCLERYMENI'TIS, (*sclerymen*, and *itis*.) Inflammation of the sclerotic coat of the eye.

SCLERYNTICUS, (σκληρυντικος,) Indurans.

SCLERYS'MA, (σκληρυσμα, from *Scleros*.) Induration; also, induration of the liver.

SCLERYSMUS, (σκληρυσμος,) Scleriasis.

SCLOPETA'RIUS, *Sclopet'icus*, (from *sclopetum*, 'a gun.') Relating to a gun. Hence, *A'qua sclopeta'ria* seu *sclopet'ica*, a water for gunshot wounds. *Vul'nera sclopeta'ria* seu *sclopet'ica*, gunshot wounds, &c.

SCLOPETOPLAGÆ, (*sclopetum*, 'a gun,' and *plaga*, 'a wound,') Wounds, gunshot.

SCOBS, gen. *Scob'is*, *Pris'ma*, *Xys'ma*, *Ramen'tum*, *Rasu'ra*. A shaving; also, an alkali; and the scoria of any metal.

SCOLECESIS, (σκωληκησις,) Helminthiasis.

SCOLECIASIS, (σκωληκιασις,) Helminthiasis.

SCOLECOLOGIA, (σκωληξ, 'a worm,' and λογος, 'a discourse,') Helminthology.

SCOLEX, (σκωληξ,) Ascaris lumbricoides. Scolex was used by Müller, generically, for some imperfectly developed forms of Tænia. The head of these being the most characteristic part, it was generally applied to the heads of all forms of cystic and tape worms. It has now no generic meaning, as the beings to which it was applied were immature forms of other genera. (Lankester.)

SCOLIOMA, (σκολιωμα,) Scoliosis.

SCOLIO'SIS, gen. *Scolio'sis*, *Scolio'ma*, *Skolio'sis*, *Rhachioscolio'ma*, (σκολιωσις, from σκολιος, 'crooked,' and *osis*.) A distortion of the spine to one side. See Gibbositas and Hump.

SCOLOPENDRA, (σκολοπενδρα,) Asplenium scolopendrium.

SCOLOPENDRIA, Asplenium ceterach, and A. scolopendrium.

SCOLOPENDRIUM LINGUA, Asplenium scolopendrium—s. Officinarum, Asplenium scolopendrium—s. Phyllitis, Asplenium scolopendrium—s. Ruta muraria, Asplenium ruta muraria—s. Vulgare, Asplenium scolopendrium.

SCOLOPOMACHÆ'RION, (σκολοπαξ, 'the woodcock,' and μαχαιρα, 'a knife;' so called because it is bent a little at the extremity like a woodcook's bill.) A sort of bluntpointed bistoury.

SCOLYMUS SATIVUS, (σκολυμος,) Cynara scolymus.

SCOOP, (Teut. Schoepe,) *Cochlea'rē*, (F.) *Curette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is sometimes used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.

SCOP, (scalp,) Head, Scalp.

SCOPA REGIA, (*scopa*, 'a broom,') Ruscus.

SCOPARIN, see Spartum scoparium.

SCOPARIUS, (*scopa*, 'a broom,') see Spartium scoparium.

SCOPE, σκοπη, *Scop'y*, *Scop'ia*, *Scop'ium*, *Scopos*, (from σκοπεω, 'I look around.') A common suffix to words meaning 'view, inspection,' as stethoscope, stethoscopy, &c.

SCOPOLINA ATROPOIDES, (after J. A. Scopoli, Prof. at Pavia,) Hyoscyamus scopolia

SCOPTULA, Scapula.

SCOPULA, (dim. of *scopa*, 'a broom,') Brush.

SCOR, (σκωρ, gen. σκατος,) Excrement.

SCORACRATI'A, *Scoracra'sia*, *Scataera'sia*, *Scatacrati'a*, *Copracrati'a*, *Copracra'sia*, *Incontinen'tia Al'vi*, (*scor*, and ακρατια, 'want of control.') Want of power to retain the fæces. Involuntary evacuation of the fæces.

Scoracrasia, *Scatacrasia*, and *Copracrasia*, although used in the same sense as scoracratia, really mean undue admixture of the excrement. See Scataerasia.

SCORBUT, Porphyra nautica, Purpura hæmorrhagica—*s. des Alpes*, Pellagra—*s. de Terre*, Purpura hæmorrhagica.

SCORBU'TIC, *Scorbu'ticus*, (F.) *Scorbutique*, (from *scorbutus*, 'scurvy.') That which belongs to scurvy. One affected with scurvy.

SCORBUTUS, ([G.] Scharbock,) see Purpura—s. Alpinus, Pellagra—s. Nauticus, Porphyra nautica—s. Oris, Cancer aquaticus.

SCORDINEMA, (σκορδινημα,) Carebaria, Pandiculation.

SCORDINISMUS, (σκορδινισμος,) Carebaria, Pandiculation.

SCORDIUM, (σκορδιον, perhaps from *scordon*, 'garlic,' from similarity of smell,) Teucrium scordium.

SCORDON, (σκορδον,) Allium.

SCORITH, Sulphur.

SCORIUM, Scrotum.

SCORODON, (σκοροδον,) Allium.

SCORODOSMINE, (*scorodon*, and οσμη, 'odour,') Oxyd, cystic.

SCORPIODEX'IS, (σκορπιος, 'scorpion,' and δηξις, 'bite:'—more properly, SCORPIOSTIG'MA; (from σκορπιος, and στιγμα, 'puncture.') The sting of the scorpion.

SCOR'PION, *Scor'pio*, *Scor'pius*, (σκορπιον and σκορπιος, from σκορπιαω, 'I enrage.') A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds.

An *Oil of Scorpion* was once made from them, which is not now used.

SCORPIOSTIGMA, (*scorpius*, and στιγμη, 'a puncture,') Scorpiodexis.

SCORPIUS, (σκορπιος,) Scorpion.

SCORTUM, 'a skin, leather,' Scrotum.

SCORZONE'RA, *S. hu'milis* seu *lana'ta* seu *nervo'sa*, *Escorzone'ra*, (from *scurza*, old Spanish for a viper,) *Vipera'ria*, *Serpenta'ria Hispan'ica*, *Offic''inal vi'per's grass*, *Vi'per's grass*, *Goat's grass*. *Family*, Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzonera Hispan'ica* is esculent, but inefficacious as a drug.

SCOTAS'MA, gen. *Scotasm'atis*, *Scoto'ma*, *Scoto'dia*, *Scota'sis*, *Scotos*; (from σκοτος, 'darkness.') Obscurity of vision, darkness, *Suffu'sio ra'dians*. Also Scotodinia.

SCOTCH FIDDLE, Psora.

SCOTODIA, (σκοτοδια,) Scotasma, Scotodinia.

SCOTODIN'IA, *Scoto'ma*, *Di'nus Scoto'ma*, *Scatodi'nē*, *Tenebrico'sa verti'go*, *Sco'tos*, *Scotas'ma*, *Scato'sis*, *Scot'omy*, (σκοτοδινια, from σκοτος, 'darkness,' and δινεω, 'I turn round.') Giddiness, with impaired sight, often succeeded by headache. See Vertigo.

SCOTOMA, gen. *Scoto'matis*, (σκοτωμα,) Scotasma, Scotodinia.

SCOTOS, (σκοτος,) Scotasma, Scotodinia.

SCOTOSIS, (σκοτωσις,) Scotodinia.

SCOTT'S ACID BATH, *Nitromuriat'ic ac''id bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.

SCOUR, ([Sax.] ſcur,) Diarrhœa.

SCOURGING, Mastigosis—s. Mania, see Mastigosis.

SCOURING, Diarrhœa.

SCRAT, ([Sax.] ſcritta,) Hermaphrodite; ([G.] kratzen, 'to scratch,') Psora.

SCRATCH, Psora.

SCREATUS, (*screare*, *screatum*, 'to hawk,') Excreation.

SCRIBE PALSY, Cramp, writers'.

SCRIPLUM, Sruple.

SCRIPTIUM, Scruple.

SCRIPTULUM, Scruple.

SCRIPULUM, Scruple.

SCRIPULUS, Scruple.

SCRIVENER'S CRAMP, Cramp, writers'.

SCROBIC'ULUS, (dim. of *scrobs*, 'a ditch,') *Scrobic'ulum*, (F.) *Scrobicule*, *Fossette*. A little ditch or furrow.

SCROBIC'ULUS COR'DIS, *Anticar'dium*, *Procar'dium*, (F.) *Fossette du cœur*, *Avant-cœur*, *Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.

SCROBICULUS VARIOLÆ, Pockmark.

SCROFFÆ, Scrofula.

SCROF'ULA, *Scroph'ula*, *Scroph'ulæ*, (from *scrofa*, 'a sow;' as Chœras is from χοιρος, 'a hog,' because swine were presumed to be subject to a similar complaint.) *Scrofulo'sis*, *Mor'bus scrophulo'sus*, *Vit''ium scrophulo'sum*, *Pædatroph'ia glandulo'sa*, *Stru'ma*, *Chœ'ras*, *Coi'ras*, *Ta'bes Glandula'ris*, *Adeno'sis scrofulo'sa*, *Scrof'fæ*, *King's e'vil*, *The E'vil*, *Quince*, *Cruels*, and *Crevels* (Scottice), (F.) *Scrophules*, *Scrofules*, *Strumes*, *Écrouelles*, *Humeurs froides*, *Tubercules des glandes lymphatiques*, *Mal du Roi*. A morbid state of the system usually characterized by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is:—to strengthen the system by animal diet; pure air, and exercise, cold bathing, or seawater bathing, &c.

SCROFULA ABDOMINALIS INTERNA, Physconia strumosa.

SCROFULAIRE, Scrophularia nodosa—*s. Aquatique*, Scrophularia aquatica.

SCROFULARIA, Scrophularia.

SCROFULES, Scrofula.

SCROFULEUX, Scrofulous.

SCROFULIDE, *Scrophulide*. An affection of the skin or mucous membranes, dependent on scrofulosis.

SCROFULISM, see Diathesis.

SCROFULO'SIS, *Scrophulo'sis*, *Cacochym'ia* seu *Cachex'ia* seu *Dyscra'sia scrofulo'sa*, and *Scrofulous cachex'ia*, are used to signify the cachectic state of the system, which characterizes scrofula. See Diathesis.

SCROF'ULOUS, *Scrophulo'sus*, *Scrophula'rius*, *Stru'mous*, *Strumo'sus*, (F.) *Scrofuleux*, *Strumeux*. Suffering from, or relating to, scrofula,—as *scrofulous cachex'ia*, see Scrofula.

SCROGLEGGED, Cnemoscoliosis.

SCROOBYGRASS, Cochlearia officinalis.

SCROOF, Scurf.

SCROPHULA, Scrofula—s. Mesenterica, Tabes mesenterica—s. Moluccana, Frambœsia.

SCROPHULÆ, Scrofula—s. Gonorrhoicæ, Gonorrhœa impura.

SCROPHULA'RIA, (from *scrofula*, against which it has been employed.) S. Nodosa.

SCROPHULA'RIA AQUAT'ICA, *Beton'ica aquat'ica*, *Fica'ria*, *Ferra'ria*, *Castran'gula*, *Great'er Wa'ter Fig'wort*, *Wa'ter Bet'ony*, (F.) *Scrofulaire aquatique*. *Ord.* Scrophulariaceæ. The leaves are celebrated as correctors of the bad flavour of senna. They were at one time regarded as eminently antiscrofulous, stomachic, and carminative.

SCROPHULARIA FŒTIDA, Scrophularia nodosa—s. Lanceolata, S. Nodosa—s. Marilandica, S. Nodosa—s. Minor, Ranunculus ficaria.

SCROPHULA'RIA NODO'SA, *S. fœ'tida* seu *vulga'ris* seu *lanceola'ta* seu *Marilan'dica*, *Millemor'bia*, *Scrophula'ria*, *Fig'wort*, *Ken'nelwort*, *Holmes'weed*, *Heal'all*, (F.) *Scrofulaire*, *Herbe aux écrouelles*. The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumours, ulcers, &c.

SCROPHULARIA VULGARIS, Scrophularia nodosa.

SCROPHULARIUS, Scrofulous.

SCROPHULES, Scrofula—*s. Mésentériques*, Tabes mesenterica.

SCROPHULIDE, *Scrofulide*.

SCROPHULOSIS, see Diathesis.

SCROPHULOSUS, Scrofulous.

SCRO'TAL, *Scrota'lis*, (from *scrotum*.) Relating to the scrotum; as *Hernia scrota'lis*, scrotal hernia.

SCROTAL NERVE, see Genitocrural Nerve.

SCROTOCE'LĒ, Oschecele, Oschocele, (*scrotum*, and κηλη, 'a tumour.') *Her'nia Scrota'lis*, *Scro'tal her'nia*. Inguinal hernia, descending into the scrotum.

SCRO'TUM, (*scortum*, 'a skin, leather.') *Sco'rium*, *Os'chē*, *Os'cheus*, *Os'chus*, *Os'cus*, *Os'cheon*, *Och'eus*, *Pe'rin*, *Scor'tum*, *Co'leus*, *Cu'leus*, *Marsu'pium*, *Bur'sula*, *Bur'sa* seu *Bur'sa tes'tium* seu

viri'lis, Or'chas, Follic'ulus genita'lis, Her'nia, the Purse, the Cod, Cods, (F.) *Les bourses.* The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown colour, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

SCROTUM CORDIS, Pericardium — s. Pendulum, Rachosis.

SCRUBIE, (*scurvy,*) Purpura nautica.

SCRUBIE GRASS, Cochlearia officinalis.

SCRU'PLE, *Diob'olon, Gramma'rium, Scru'pulus, Scru'pulum, Scrip'tulus, Scrip'tulum, Scrip'tium, Scrip'ulum, Scrip'lum, Scrip'ulus.* A weight of twenty grains, Troy; twentyfour grains, Poids de marc.

SCUDAMORE'S MIXTURE, see Mixture, Scudamore's.

SCULL, (Dan. *skal,* or from *scutella,* 'a cup,' [?]) Cranium — s. Cap, Calvaria.

SCURF, ([Sax.] ꝛcuꝛꝼ,) (Prov.) *Scroof; Fur'fura.* Small exfoliations of the cuticle are so called.

SCURFY, Furfuraceous.

SCURVY, (from *scurf,* or from [G.] Scharbock,) see Purpura — s. of the Alps, Pellagra — s. Button, see Button scurvy — s. Land, Purpura hæmorrhagica — s. Petechial, Purpura simplex — s. Sea, Porphyra nautica.

SCURVY GRASS, Sisyrinchium Bermudianum — s. Grass, common, Cochlearia officinalis — s. Grass, lemon, Cochlearia officinalis — s. Grass, wild, Cochlearia coronopus.

SCUTELLA, (dim. of *scutra,* 'a dish,') Cup.

SCUTELLARIA CAROLINIANA, (from *scutella,* 'a cup,' in allusion to the form of the calyx,) S. integrifolia.

SCUTELLA'RIA GALERICULA'TA, *Cassi'da galericula'ta, Tertiana'ria, Skull'cap,* (F.) *Casside bleue, Toque. Ord.* Labiatæ. *Sex. Syst.* Didynamia Angiospermia. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

SCUTELLARIA HYSSOPIFOLIA, S. integrifolia.

SCUTELLARIA INTEGRIFO'LIA, *S. hyssopifo'lia* seu *Carolinia'na,*—another indigenous variety,—is an intense bitter.

SCUTELLARIA LATERIFLO'RA, *Skull'cap, Maddog skull'cap, Mad'weed, Hood'wort, Blue Pimpernel.* An indigenous plant, *Scutellaria,* (Ph. U. S.) which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind. By some, however, it is regarded as a good nervine.

SCUTICULA DIGITORUM MANÛS, Phalanges of the fingers.

SCUTTER, Diarrhœa.

SCUTULÆ DIGITORUM MANÛS, (pl. of *scutula,* 'a cylinder,') Phalanges of the fingers.

SCUTUM, 'a shield,' Thyroid cartilage — s. Cordis, Scapula, Sternum — s. Genu, Patella — s. Pectoris, Sternum, Thorax.

SCUTUM STOMACHI'CUM. A large plaster, applied to the breast or stomach.

SCUTUM THORACIS, Scapula.

SCYB'ALA, (pl. of σκυβαλον, 'dung.') *Enterol'ithus Scyb'alum, Excrementa Al'vi siccio'ra, Fæ'ces indura'tæ,* (F.) *Scybales.* Hard fecal matters discharged in round lumps.

SCYLLA, Scilla.

SCYPHOPHORUS PYXIDATUS, (σκυφος, 'a cup,' and φερω, 'to bear,') Lichen pyxidatus.

SCYPHUS AUDITORIUS, (σκυφος, 'a cup,') Infundibulum of the cochlea—s. Cerebri, Infundibulum of the brain—s. Vieussenii, Infundibulum of the cochlea.

SCYROS, (σκυρος,) Callosity.

SCYTALIDES DIGITORUM MANÛS, (σκυταλις, gen. σκυταλιδις, 'a staff,') Phalanges of the fingers.

SCYTHICA (RADIX,) (from *Scythia,*) Glycyrrhiza.

SCYTHROPASMUS, (from σκυθρος, 'gloomy;' σκυθρωπαζειν, 'to look gloomy,') *Vultus tet'ricus et mœs'tus.* A gloomy, depressed countenance, of bad augury in serious diseases.

SCYTITIS, (σκυτος, 'a skin,' and *itis,*) Cytitis.

SCYTODEPSIUM, (σκυτοδεψεω, 'to curry leather,') Tannin.

SEA AIR. The air in the neighbourhood of the sea contains saline particles commingled with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and seacoast are usually, also, more equable in their temperature than places inland.

SEA SICKNESS, Nausea marina — s. Tangle, Laminaria digitata—s. Ware, see Pila marina—s. Water, see Water, sea—s. Wrack, Pila marina.

SEAL, GOLDEN, ([Sax.] ꝛigel, [L.] *sigillum,*) Hydrastis Canadensis — s. Medicine, *Cachet* — s. Solomon's, Convallaria polygonatum — s. Solomon's, great, Convallaria canaliculata — s. Solomon's, smaller, Convallaria pubescens.

SEAM (Sax.), Cicatrix.

SEARCHER, Body searcher.

SEARCHING, ([F.] *chercher,* 'to seek.') Probing. Also, the operation of ascertaining, by the introduction of a metallic instrument, whether there is a stone in the bladder;—*Sound'ing.*

SEARCLOTH, ([Sax.] ꝛar, 'a sore.') A cloth to cover a sore; a plaster.

SEAS'ON, *Tempes'tas,* (F.) *Saison,* (from *statio,* 'station.' [?]) One of the four great divisions of the year, reckoned by the return of the sun in its annual course, — Spring, Summer, Autumn, and Winter. It is to the seasons that we are indebted for the organic changes in the vegetable kingdom; and their mutation exerts a powerful influence on man.

SEASONING, (from [F.] *saison,* season,') Acclimation — s. Fever, Fever, stranger.s.

SEAT, (from [L.] *sedeo,* 'to sit,') Anus, Nates—s. Bone, Ischion.

SÉBACÉ, Sebaceous.

SEBACEOFOLLICULAR, see Sebaceous.

SEBA'CEOUS, *Seba'ceus,* (F.) *Sébacé,* (from *sebum.*) That which has the nature of suet,— as *sebaceous* or *sebaceofollicular tumours.*

SEBACEOUS FLUX, Stearrhœa.

SEBACEOUS, SEBIP'AROUS or SEBIF'EROUS GLANDS, *Sebaceous Fol'licles* or *Crypts, Follic'uli seba'cei, Cryp'tæ seba'ceæ, Oil* or *Mil'iary glands,* are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, *Smeg'ma cuta'neum, Se'bum cuta'neum,* having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of the female. They secrete a sebaceous matter, which emits a peculiar odour; and hence, after the name of one who described them, have been called *Gland'ulæ odorif'eræ Tyso'ni, G. Tyso'ni, Ty'son's glands,* and, also, *Gland'ulæ odorif'eræ* seu *seba'ceæ glan'dis, G. cor'onæ pe'nis, Follic'uli seba'cei cor'onæ glan'dis, Gland'ulæ odorif'eræ præpu'tii, Cryp'tæ præputia'les.*

SEBASTOMA'NIA, (σεβαστος, 'worshipped,' and *mania*.) Religious insanity, Demonomania.

SEBESTE'NA, *Cor'dia myx'a* seu *sebeste'na* seu *Africa'na* seu *domes'tica* seu *obli'qua*, *Sebeste'na officina'lis*, *Seb'esten*, *Sebsten*, *Myx'a*, *Cor'nus sanguin'ea*, *Pru'nus sebeste'na*, *Smoothleaved Cor'dia*, *Assyr'ian plum*, (F.) *Sebestier myxa*. *Ord.* Cordiaceæ. The dark, black fruit of the *Sebeste'na* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

SEBESTIER MYXA, Sebestena.

SEBIFEROUS, (*sebum*, 'suet, fat,' and *ferre*, 'to carry,') see Sebaceous.

SEBIPAROUS, (*sebum*, 'suet, fat,' and *pario*, 'to bring forth,') see Sebaceous.

SEBORRHAGIA, (*sebum*, 'suet, fat,' and ῥαγη, 'a breaking forth,') Stearrhœa.

SEBORRHŒA, (*sebum*, 'suet, fat,' and ῥεω, 'to flow,') Stearrhœa.

SEBSTEN, Sebestina.

SEBUM, Pinguedo, Sevum — s. Cutaneum, see Sebaceous glands — s. Palpebrale, *Chassie* — s. Præputiale, Smegma præputii.

SECA'LE, (*secare*, 'to cut,' [?]) *S. cerea'lē* seu *barba'tum*. The *Rye plant*. (F.) *Seigle*. *Ord.* Gramineæ. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acescency; and hence its internal use at first generally produces a laxative effect.

Secale Barbatum, Secale — s. Cornutum, Ergot—s. Luxurians, Ergot—s. Maternum turgidum seu temulentum, Ergot.

SECALIS MATER, Ergot.

SÉCATEUR DES AMYGDALES, (from *secare*, 'to cut,') *Amygdalatome* — *s. par Écrasement*, *Écraseur*.

SECERNENT, (*secernere*, 'to separate,') Secreting.

SECERNING, Secreting — s. Substance of the kidney, see Kidney.

SECESSIO FÆCUM, (*secedere*, *secessum*, 'to secede,') Defecation.

SECESSUS, Vulva — s. Niger, Melæna.

SÈCHE, Sepia.

SECLUSORIUM, (*secludere*, *seclusum*, 'to shut up,') Sac.

SEC'ONDARY, (*secundus*, 'the second,') (F.) *Secondaire*. Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the *primary*. A *secondary amputation* is one performed after the constitutional effects of an injury have mainly passed away. See Fever, secondary, and Hæmorrhagia, for Secondary Hemorrhage.

SECONDINES, Secundines.

SECRETA, (pl. of *secretum*.) Same etymon as Secretion. Things or matters secreted or separated from the blood.

SÉCRÉTEUR, Secreting.

SECRE'TING, *Secreto'rius*, *Secer'ning*, *Se'cer'nent*, *Secre'tory* or *Se'cretory*, *Excer'nent*, (F.) *Sécréteur*, *Sécrétoire*. That which secretes,—as a secreting organ.

SECRETIO, Secretion—s. Lactis, Galactosis—s. Lotii, Uropoesis — s. Urinæ, Uropoesis — s. Vicaria, see Vicarious.

SECRE'TION, *Secre'tio*, *Apoc'risis*, (*secernere*, *secretum*, 'to separate.') An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs in each organ according to its particular structure; hence the formation of different fluids—bile, saliva, urine, milk, &c. The term is, also, applied to the thing secreted,—*Secre'tum*. The secretions are of three kinds,—*exhalant*, *follicular*, and *glandular*. Simple secretions are those which exist ready formed in the blood, and pass out of the vessels by an act of exosmose, whilst the more complicated are formed from the liquor sanguinis by cell agency. The latter alone are, by some, called *Secretions*.

SÉCRÉTOIRE, Secreting.

SECRE'TOMO'TORY, *Secretomoto'rius*. An epithet applied to nerves which influence secretion in the manner of excitomotory nerves

SECRETORIUS, Secreting.

SECRETORY, Secreting.

SECRETUM, see Secretion.

SECT, METHODICAL, (*secta*, from *secare*, *sectum*, 'to cut,') Methodists.

SEC'TIO, gen. *Sectio'nis*, *Sec'tion*. The act of cutting. A division.

Sectio Alta, see Lithotomy — s. Anatomica, Dissection — s. Cadaveris, Autopsia cadaverica — s. Cadaveris legalis, Autopsia cadaverica—s. Cæsarea, Cæsarean section — s. Franconiana, see Lithotomy — s. Hypogastrica, see Lithotomy — s. Lateralis, see Lithotomy — s. Legalis, Autopsia cadaverica legalis — s. Mariana, see Lithotomy — s. Nympharum, Nymphotomy — s. Perinæalis, Perineal section — s. Rectovesicalis, see Lithotomy — s. Renalis, Nephrotomy — s. Tendinum, Tenotomy — s. Vaginovesicalis, Colpocystotomia — s. Vesicalis, Lithotomy.

SECTION, Sectio — s. Sigaultian, Symphyseotomy.

SECUNDÆ, (*secundus*, 'the second,') Secundines.

SECUNDINÆ, Secundines.

SEC'UNDINES, *Hys'tera*, *Deuter'ion*, *Me'træ*, *Secun'dæ*, *Secundi'næ*, *Af'terbirth*, *Af'terburthen*, (F.) *Arrière-faix*, *Secondines*, *Délivre*, (from *secundus*, 'second.') All that remains in the uterus after the birth of the child, — viz., the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fœtus; hence their name. See *Délivrance*.

SECUNDUS PROPRIORUM AURICULÆ, Retrahens auris.

SECUS, Sex.

SEDANTIA, Sedatives.

SEDA'TION, *Seda'tio*, (*sedare*, *sedatum*, 'to settle or assuage,') *Pau'sis*, *Catapau'sis*. The effect induced by sedatives.

SED'ATIVES, *Sedati'va*, *Pauon'ta*, *Sedan'tia*, *Adec'ta*, *Catastal'tica*, *Deprimen'tia*, *Depress'ants*, (F.) *Sédatifs*, *Calmants*, *Tempérants*. Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are Acidum Hydrocyanicum, Acidum Hydrosulphuricum, Tabacum, Missio Sanguinis, and certain gases by inhalation, as azote, carbonic acid, [?] carburetted and sulphuretted hydrogen.

SEDEM ATTOLLENS, 'raising the seat,' Levator ani.

SEDES, (*sedeo*, 'to sit,') Anus, Excrement — s. Cruentæ, Dysentery, Hæmatochezia — s. Lactescentes, Cœliac flux — s. Procidua, Proctocele.

SEDHEE, Bangue.

SED'IMENT, *Sedimen'tum*, *Lem'ma*, *Residen'tia*, (from *sedeo*, 'to sink down,') (F.) *Dépôt*. A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypostasis*, *Hyposte'ma*, *Residen'tia*, *Subsiden'tia*, (F.) *Dépôt de l'urine*. This sediment or deposit varies in different states of the system. In calculous affections it is one of the most important objects of attention.

SEDIMENTUM, Sediment—s. Urinæ lateri-cium, see Lateritious—s. Urinæ pityroïdes, see Furfuraceous.

SEDILIA, (*sedere*, 'to sit,') Nates.

SED'LITZ, MIN'ERAL WA'TERS OF, *Seidlitz water*. Springs in Bohemia, near Prague, which are simple salines. They contain sulphate and carbonate of magnesia, chloride of magnesium, sulphates of potassa, soda, and lime, carbonic acid and carbonate of lime. They are employed as purgatives in a multitude of diseases.

ARTIFIC''IAL SED'LITZ POW'DERS, in no respect, however, resembling the natural ingredients, are formed of *Sodæ et Potassæ tartras* ℥ij, *Sodæ carbon.* ℈ij, in one paper; *Acid. tartaric.* gr. xxxv, in another. For half a pint of water. They are called, also, *Rochelle powders*.

SÉDON BRÛLANT, Sedum—s. *Reprise*, Sedum telephium.

SE'DUM, *S. a'crē* seu *glacia'lē* seu *mi'nus* seu *vermicula'rē*, (*sedeo*, 'I sit,' owing to its attachment to rocks and walls.') *Illec''ebra*, *Hellec''ebra*, *Illec''ebrum*, *Vermicula'rē*, *Vermicula'ris*, *Pi'per mura'lē*, *Sempervi'vum a'crē*, *Aei'chryson*, *Æo'nion*, *Wall pepper*, *Jack of the Bu''tery*, *Prick'et*, *Bird's bread*, *Stonecrop*, *Bi'ting Stonecrop*, *Small House'leek*, (F.) *Joubarbe âcre*, *Orpin brûlant*, *Vermiculaire brûlante*, *Sédon brûlant*. *Ord.* Crassulaceæ. *Sex. Syst.* Decandria Pentagynia. In its recent state it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

SEDUM RHODI'OLA and S. AL'BUM, (F.) *Triquemadame*, have similar properties.

SEDUM, Saxifraga granulata—s. Album, see Sedum—s. Glaciale, Sedum—s. Majus, Sempervivum tectorum—s. Minus, Sedum—s. Rhodiola, see Sedum.

SEDUM TELE'PHIUM, *S. telephoï'des*, *Fa'ba cras'sa*, *Cras'sula*, *C. Ma'jor*, *Illec''ebra ma'jor*, *Tele'phium*, *Faba'ria cras'sula*, *Fa'ba cras'sa*, *Anacamp'seros*, *A. al'bicans* seu *triphyl'la* seu *vul'garis*, *Orpine*, (F.) *Sédon reprise*, *Grand orpin*, *Fève épaisse*, *Joubarbe des vignes*, *Herbe à la coupure*, *H. aux Charpentiers*. Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

SEDUM TELEPHOÏDES, S. Telephium—s. Vermiculare, Sedum.

SEED, ([Sax.] sæd,) Semen, Sperm.

SEGMENTA CARTILAGINEA, (pl. of *segmentum*, 'a segment,') see Trachea.

SEGMENTA'TION, *Segmenta'tio*, (*segmentum*, 'a segment,' itself from *seco*, 'to cut.') The act of being divided into segments or portions. (F.) *Segmentation*, *Fractionnement*, *Sillonnement*. A term applied to the division of the vitellus or yolk into 'segments;' each containing a transparent vesicle, which may be a descendant of the primordial or germ cell.

SEGNIT''IA, *Segnit''ies*, (from *segnis*, 'sluggish.') Sluggishness or torpor in the exercise of a function:—as SEGNITIES AL'VI, Torpor of the bowels; SEGNITIES VIR'IUM, Languor.

SEGNITIES, Segnitia.

SEGRAY, MIN'ERAL WA'TERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

SEGU, Sago.

SEIDLITZ, Sedlitz.

SEIDSCHÜTZ, SEYDSCHÜTZ or SAIDSCHÜTZ, MIN'ERAL WA'TERS OF. Bitter springs, in the neighbourhood of those of Püllna and Sedlitz, in Bohemia, which contain chiefly sulphate, nitrate, muriate, and carbonate of magnesia, sulphates of potassa, soda, and lime; carbonate of lime, iron and manganese. The water is an excellent cathartic, and is well known in Europe.

SEIGLE, Secale—*s. Cornu*, Ergot—*s. Corrompu*, Ergot—*s. à Éperon*, Ergot—*s. Ergotée*, Ergot—*s. Ergotisé*, Ergot—*s. Faux*, Ergot.

SEIN, (from *sinus*,) Uterus, see Mamma.

SEIRIASIS, (σειριασις,) *Coup de Soleil*.

SEIZURE, Attack, see Raptus.

SEIZURES, HIDDEN, see Hidden seizures.

SEKISKAYAVODKA, see Spirit.

SEL, (from *sal*,) Salt—*s. Admirable de Lémery*, Magnesiæ sulphas—*s. Admirable perlé*, Soda, phosphate of—*s. Ammoniac*, Ammoniæ murias—*s. Arméniac*, Ammoniæ murias—*s. Arsénical de Macquer*, Arseniate of protoxide of potassium—*s. de Boutigny*, Mercury, iodide of chloride of—*s. de Cuisine*, Soda, muriate of—*s. de Dérosne*, Narcotine—*s. à détacher*, Potassæ oxalas—*s. d Égra*, Magnesiæ sulphas—*s. d'Étain*, Tin, muriate of—*s. de Lait*, Sugar of Milk—*s. Marin*, Soda, muriate of—*s. d'Opium*, Narcotine—*s. d'Oseille*, Potassæ oxalas—*s. de Prunelle*, Potassæ nitras fusus sulphatis paucillo mixtus—*s. de Saturne*, Plumbi superacetas—*s. de Verre*, see Vitrum—*s. Volatil d'Angleterre*, Ammoniæ carbonas.

SELAGO, gen. *Sela'ginis*, Camphorosma Monspeliaca, Lycopodium selago.

SELENE, (σελήνη,) Moon, see Nail.

SELENIACI, (σεληνιακοι, from *selene*,) see Lunatic.

SELENIASIS, (from *selene*,) Somnambulism.

SELENIASMUS, Somnambulism.

SELENOBLETUS, (σεληνοβλητος, from *selene*, and βαλλω, 'to strike,') Lunatic.

SELENOGAMIA, (*selene*, and γαμος, 'marriage,') Somnambulism.

SELENOPLEGE, (*selene*, and πληγη, 'a stroke,') see *Coup de soleil*.

SELENOPLEXIA, see *Coup de soleil*.

SELFABUSE, Masturbation.

SELFHEAL, Prunella.

SELFLIM'ITED. An epithet applied to diseases which appear to run a definite course, but little modified by treatment,—small-pox, for example.

SELFPOLLUTION, Masturbation.

SELI'BRA, for *Semili'bra*, *Sembel'la*, 'half a pound.' Six ounces, Troy; eight Avoirdupois.

SELINI'TES, (σελινιτης.) Wine impregnated with the seeds of the σελινον or parsley.

SELINUM, (σελινον,) Apium petroselinum—s. Angelica, Angelica Sylvestris—s. Galbanum, Bubon galbanum—s. Imperatoria, Imperatoria—s. Lactescens, Peucedanum palustre—s. Marsh, Peucedanum palustre—s. Opoponax, Pastinaca opoponax—s. Oreoselinum, Athamanta aureoselinum—s. Ostruthium, Imperatoria—s. Palustre, Peucedanum palustre—s. Pastinaca, Pastinaca sativa—s. Peucedanum, Peucedanum—s. Pubescens, Angelica sylvestris—s. Sylvestre, Angelica sylvestris, Peucedanum palustre—s. Thysselinum, Peucedanum palustre.

SELLA, 'a seat,' S. Turcica—s. Equina, S. Turcica—s. Familiarica, Lasanum—s. Obstetricia, Diphrus—s. Sphenoidalis, S. Turcica.

SEL'LA TUR'CICA, *Ephip'pium*, *Fos'sa Pituita'ria*, *Sel'la*, *S. equi'na* seu *sphenoida'lis*, *Pitu'itary fossa*, *Turk'ish Sad'dle*, (F.) *Selle Turcique* ou *du Turc*. A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes, and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle*. The broad rough plate, behind, and somewhat overhanging the Sella Turcica, is the *Dor'sum Ephip'pii*.

SELLE TURCIQUE, Sella Turcica—*s. du Turc*, Sella Turcica.

SELS NEUTRES, Neutral salts.

SELTZ or SELTZ'ER, MIN'ERAL WA'TERS OF. Cold, acidulous springs, the source of which

is at Seltz, nine leagues from Strasburg, and in the Department of the Bas-Rhin. They contain carbonates of lime, magnesia, and soda, chloride of sodium, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient. They are not frequented.

Artific''ial Seltz'er Wa'ter may be made from *muriatic acid* gr. xxxv, *water* Oj, *white marble* gr. iij. Stop up till dissolved. Add *carbonate of Magnesia*, gr. v, and, after some time, *subcarbonate of soda*, gr. xxxij. Close it till used.

SEMBELLA, Selibra.

SEMECARPUS ANACARDIUM, (σημειον, 'a mark,' and καρπος, 'fruit,') Avicennia tomentosa.

SEMEIOG'RAPHY, (σημειογραφια,) *Semeiogra'phia, Semiography, Semiogra'phia, Symptomatog'raphy,* (σημειον, 'a symptom,' and γραφη, 'a description.') A description of symptoms or signs of disease.

SEMEIOL'OGY, *Semeiot'icē, Semiol'ogy, Semiot'icē, Phænomenolog''ia,* (σημειον, 'a symptom,' and λογος, 'a discourse.') (F.) *Séméiotique.* The branch of pathology whose object is the doctrine of the symptom or signs of disease.

SEMEION, (σημειον,) Sign, Symptom—s. Boethematicum, Indication.

SEMEIOSIS, (σημειωσις,) Semeiology.

SEMEIOTICE, (σημειωτικη,) Semeiology.

SÉMÉIOTIQUE, Semeiology.

SEMEN, gen. *Sem'inis,* (*sero,* 'to sow.') That which is sown. *Seed* of plants and animals.

Semen, Sperm—s. Badian, Illicium anisatum—s. Cinæ, see Artemisia santonica — s. Contra, see Artemisia santonica—s. *Contra d'Alep,* Artemisia santonica—s. Contra vermes, Artemisia santonica —s. Masculinum seu virile seu genitale, Sperm—s. Muliebre, Sperm (of the female)—s. Sanctum, see Artemisia santonica — s. Santonici, see Artemisia santonica—s. Zedoariæ, see Artemisia santonica.

SEMENCE, (from *semen,*) Seed, Sperm.

SEM'I, (from ἡμισυ, 'half.') *Semi* or *demi,* in composition, universally signifies 'half;' both in French and English.

SEMIAN'IMIS, *Semimor'tuus, Sem'inex, Semivi'vus,* (*semi,* and *animus,* 'life.') Half-living. Half-dead.

SEMIBULB OF THE FEMALE, Bulbus vestibuli.

SEMICANALICULUS, (*semi,* and *canaliculus,* 'a small channel,') Sulcus.

SEMICANALIS, (*semi,* and *canalis,* 'a channel,') Sulcus.

SEMICEPHALUS, Hemicephalus.

SEMICIRCULI OSSEI, Semicircular canals.

SEMICIR'CULAR, *Semicircula'ris,* (*semi,* and *circulus,* 'a circle.') (F.) *Demicirculaire.* That which represents the half of a circle.

Semicircular Canals', *Cana'les* seu *Duc'tus semicircula'res* seu *tubæform'es* seu *circula'res, Semicir'culi os'sei, Fu'nes* seu *Canalic'uli semiannula'res labyrin'thi,* (F.) *Canaux demicirculaires,* are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is *superior* or *vertical,—cana'lis semicircula'ris vertica'lis supe'rior;* another *posterior* or *oblique,—cana'lis semicircula'ris vertica'lis poste'rior,* and the third *exterior* or *horizontal,—canalis semicircula'ris horizonta'lis.* Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampull'æ;* and by both extremities they open into the vestibule, in the sac at its superior part—the *Sac'culus Ellip'ticus, Al'veus* seu *Utric'ulus* seu *Si'nus commu'nis, Sinus* seu *Alveus utriculo'sus, Sacculus vestibuli* or *Median sinus, U'tricle.* In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sac'culus sphæ'ricus,* or *Sacculus.*

SEMICIRCULUS EXSCULPTUS, 'semicircle cut out,' Hiatus diaphragmatis aorticus.

SEMICON'GIUS. Half a gallon, or four pints.

SEMICU'BIUM, *Semicu'pium, Insessio, Insessus, Encathis'ma, Excathis'ma,* (F.) *Demibain,* (*semi,* and *cubare,* 'to lie down.') A half-bath, or such as receives only the hips or extremities.

SEMICUPIUM, Bath, half, Semicubium.

SEMIFIBULÆUS, Peronæus brevis.

SEMIHOMO, (*semi,* 'half,' and *homo,* 'man,') Atropa mandragora.

SEMIINTEROSSEUS INDICIS, Abductor indicis.

Semiinterosseus Pollicis, Opponens pollicis.

SEMILIBRA, Selibra.

SEMILLA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomach of the young Guacharo, a sort of nocturnal bird. The fruits are a celebrated South American remedy in Ague.

SEMILU'NAR, *Semiluna'ris,* (F.) *Demilunaire* ou *Semilunaire,* (*semi,* and *luna,* 'the moon.') Having the shape of a halfmoon.

Semilunar Car'tilages, *Semilu'nar fi'brocar'tilages, Sig'moid car'tilages, Cartilag''ines sigmoïdeæ* seu *semiluna'res,* are two fibrocartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia by means of fibrous fasciæ.

Semilunar Gang'lion,—*Gang'lion abdomina'lē* seu *splanch'nicum* seu *transver'sum* seu *sola'rē, G. surrénal,* (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the suprarenal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. From their periphery numerous filaments proceed, which go to the formation of the solar plexus.

Semilunar Notch of the Sternum, *Fourchette* —s. Valves, Sigmoid valves.

SEMILUNARE OS, Lunare os.

SEMILUNULA UNGUIUM, (*semi,* and *lunula,* dim. of *luna,* 'moon,') see Nail.

SEMIMAS, (*semi,* and *mas,* 'a male,') Eunuch.

SEMIMASCULATUS, Eunuch.

SEMIMASCULUS, (*semi,* and *masculus,* 'male,') Eunuch.

SEMIMEMBRANEOUS, Semimembranosus.

SEMIMEMBRANO'SUS, (*semi,* and *membrana,* 'membrane,') *Semimembra'neus,* (F.) *Ischio-popliti-fémoral, Ischio-popliti-tibial,* (Ch.) *Demimembraneux.* A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below —by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

SEMIMORTUUS, (*semi,* and *mortuus,* 'dead,') Semianimis.

SEMINA (pl. of *semen,* 'seed') CATAPUTIÆ MAJORIS, see Ricinus communis.

Sem'ina Frig''ida Majo'ra. The *greater cold seeds.* The ancients gave this name to the emul-

sive seeds of the cucumber, melon, gourd, and watermelon.

Semina Frigida Mino'ra. The *les'ser cold seeds*. The ancients gave this name to the seeds of the lettuce, purslane, endive, and cichory.

Semina Ricini Vulgaris, see Ricinus communis.

SEMINAL, (from *semen*,) Spermatic — s. Filaments, Spermatozoa — s. Fluid, Sperm — s. Granules, see Granule.

SEMINALE MEMBRUM, 'seminal member,' Penis.

SEMINALIS, Spermatic.

SEMINERVOSUS, (*semi*, and *nervus*, 'a sinew,') Semitendinosus.

SEMINEX, (*semi*, and *nex*, 'death,') Semianimis.

SEMINIA MORBORUM, (*seminium*, 'a seed store,') Predisposition.

SEMINIF'EROUS, (*semen*, and *fero*, 'I carry.') *Spermatoph'orous*. An epithet given to the vessels which secrete and convey the seminal fluid.

SEM'INIST, (from *semen*,) Animalculist. The term was, also, used for one, who believed, that the new being was formed by an admixture of the seed of the male with the supposititious seed of the female.

SEMINIUM, 'a seed store,' Sperm.

SEMEOGRAPHY, Semeiography.

SEMEOLOGY, Semeiology.

SEMION, (σημειον,) Sign.

SEMIORBICULARIS, see Orbicular muscles.

SEMIOTICE, Semeiotice — s. Faciei, Physiognomy.

SEMIPESTIS, Typhus.

SEMIPLEGIA, (*semi*, and πληγη, 'a stroke,') Hemiplegia.

SEMISEXTUM, Hemiecton.

SEMISICIL'ICUS. A weight of one drachm or three scruples.

SEMISIDERATIO, (*semi*, and *sideratus*, 'planet struck,') Hemiplegia.

SEMISIDERATUS, see Hemiplegia.

SEMISOMNIS, (*semi*, and *somnus*, 'sleep,') Coma.

SEMISOPITUS, (*semi*, and *sopio*, *sopitum*, 'to put to sleep,') Coma.

SEMISOPORUS, (*semi*, and *sopor*, 'sleep,') Coma.

SEMISPEC'ULUM, (*semi*, and *speculum*, 'a mirror.') An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.

SEMISPINA'LIS COL'LI, *Semispina'tus* seu *transver'sospina'lis* seu *spina'lis* seu *transversa'lis col'li*, *Artic'ulospina'lis*, *Spina'lis cervi'cis*, *Transverso-spinal*, (F.) *Demi-épineux* ou *transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebræ, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted into the spinous processes of all the cervical vertebræ, except the first and last. Its *action* is, to extend the neck obliquely backwards and to one side.

Semispinalis Dor'si, *Semispina'lis exter'nus*, *Transver'sospinalis dor'si*, *Semispina'tus* (Riolan,) *Transversospinal*, (F.) *Demi-épineux du dos*, *Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebræ, by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebræ, by as many tendons. Its *action* is, to extend the spine obliquely backwards.

Semispinalis Externus, Semispinalis dorsi—s. Internus, Transversalis dorsi — s. Spinatus, Longissimus dorsi, Semispinalis dorsi.

SEMISPINATUS COLLI, Semispinalis colli.

SEMIS'SIS, *Se'mis*. The half of a pound, ounce, drachm, &c.

SEMITENDINO'SUS, *Seminervo'sus*, (F.) *Ischio-crêti-tibial*, *Ischio-prétibial*, (Ch.), *Demi-tendineux*, *Demi-nerveux*. This muscle is situate at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium — to which it is attached by a flat tendon, common to it and the biceps — as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its *uses* are the same as those of the semimembranosus.

SEMITERTIANA, (*semi*, and *tertiana*, 'tertian,') Hemitritæa.

SEMIUNCIA, (*semi*, and *uncia*, 'an ounce,') Hemiuncion.

SEMIVIR, (*semi*, and *vir*, 'a man,') Eunuch.

SEMIVIVUS, (*semi*, and *vivus*, 'alive,') Semianimis.

SEM'OLA, BUL'LOCK'S; a farinaceous article of diet, which is recommended as highly nutritious and easily digestible, consequently well adapted for infants and invalids, is said to consist of the gluten of wheat, with a small proportion of starch. Semola and Semolina resemble each other greatly. They appear, indeed, to be identical.

SEMOLI'NA, *Man'na croup*. This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland, it is called *Cra'cow groats*.

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels. A recent analysis makes it consist of the gluten of wheat with a certain proportion of the starch, part of the latter having been removed.

SEMPERVIVUM ACRE, (*semper*, 'always,' and *vivus*, 'alive,' because always green,) Sedum.

Sempervi'vum Tecto'rum, *S. majus* seu *tecto'rum Aïzoön*, *Beiahalalen*, *Buphthalmus*, *Bar'ba Jo'vis*, *Agriosin'ara*, *Andrachahara*, *Chrysosper'mum*, *Houseleek*, *Sen'green*, *Fews*, *Fouets*, (Prov.) *Cyphel*, *Jupiter's Beard*, (F.) *Joubarbe des toits*. The leaves have a mild, subacid austerity, and are often applied to bruises and old ulcers.

SEMPTRESSES' PALSY, see Palsy, semptresses.'

SEMUDA, (σημυδα,) Betula.

SEMUNCIA, Hemiuncion.

SENA, Cassia senna.

SÉNÉ, Cassia senna — *s. d'Amérique*, Cassia Marilandica—*s. Faux*, Colutea—*s. Indigène*, Colutea—*s. des Prés*, Gratiola officinalis.

SENEBIERA CORONOPUS, (after J. Sénébier, the naturalist, of Geneva,) Cochlearia coronopus.

SENECA OIL, (after the Seneca Indians,) Petroleum, (New York.)

SENE'CIO, *S. vulga'ris*, (*senex*, 'an old man,' in allusion to the grayish down on many species;) *Erig''erum*, *Cor'tulon*, *Erig''eron*, *Ground'sel*, *Fire'weed*, (Sc.) *Groundie Swallow*, (F.) *Seneçon commun*. *Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as a refrigerant and antiscorbutic.

Senecio Au'reus, *Gold'en rag'weed*, *Wild vale'rian*, *Life root*, *Squaw root*; indigenous, is an

excitant, diaphoretic, and diuretic. The dried plant is used in decoction ;—℥ss to Oj of water.

Senecio Hieracifolius, Erechthites hieracifolius.

Senecio Jacobæ'a, *Jacobæ'a, St. James's Wort, Rag'wort,* (Sc.) *Bunwede, Weebo,* (F.) *Jacobée.* The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has often been employed in cases of wounds and bruises.

SENEÇON COMMUN, Senecio.

SENECTA, Senectus.

Senec'ta An'guium. The cast skin of a serpent. A decoction of it is said to cure deafness!

Senecta Decrepita, Decrepitude — s. Extrema, Decrepitude—s. Summa, Decrepitude—s. Ultima, Decrepitude.

SENEC'TUS, *Senec'ta,* (from *senex,* 'an old person;') *Ge'ras, Se'nium, Æ''tas seni'lis* seu *provec'ta* seu *ma'la, Old age, Senil'ity,* (F.) *Vieillesse.* The last period of life, commencing, according to some, at 60 years of age, — according to M. Flourens, at 70,—but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and moral faculties.

Senectus Ultima, Decrepitude.

SENEGA, Polygala senega.

SEN'EGAL', GUM, *Gum'mi Senegalen'sē* seu *Sen'ega* seu *Sen'ica.* The exudation from *Aca'cia* seu *Mimo'sa Sen'egal.*—*Ord.* Leguminosæ. *Sex. Syst.* Polygamia Monœcia—growing in the country of Africa through which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGIN, see Polygala senega.

SÉNÉGRAIN. Trigonella fœnum.

SENEKA, Polygala senega.

SÉNEVÉ, Sinapis.

SENGREEN, Sempervivum tectorum.

SE'NILE, *Seni'lis,* (F.) *Sénile,* (from *senex,* an old person.') Relating or belonging to old age :—as '*senile* delirium ;' dotage.

SENILITY, Senectus.

SENNA, Cassia senna—s. Alexandrina, Cassia senna—s. American, Cassia Marilandica—s. Bladder, Colutea arborescens—s. Essence of, prepared, Selway's see Infusum sennæ compositum—s. Germanica, Colutea—s. Italica, Cassia senna—s. Prairie, Cassia chamæcrista—s. Wild, Cassia chamæcrista, Cassia Marilandica.

SENS, Sense,—*s. Génital,* Appetite, venereal.

SENSA'TION, *Sensa'tio,* (*sentire, sensum,* 'to feel;') *Æsthe'ma.* The consciousness or cognisance by the brain of an impression caused by an external body on the organs of the senses. (F.) *Sentiment.* It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external, internal,* and *morbid.* The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external. *Objec'tive sensations* are produced by impressions on the peripheral nerves; as in vision, audition, &c. *Subjec'tive sensations,* are such as originate centrically or in the encephalon, — as tinnitus aurium.

SENSATIONAL, Sentient.

SENSE, *Sen'sus, Sen'sio, Æsthe'sis,* (F.) *Sens.* A faculty, possessed by animals, of appreciating impressions from external objects. The senses are five in number; sight, hearing, smell, taste, and touch. Of these, the first two and the last administer more to the intellect; and, hence, have been called, by some, the *intellectual senses ;* the other two seem more connected with the nutrition of the body: and, hence, have been termed *corporeal* or *nutritive senses.* Other senses have been suggested—as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or cœnæsthesis, &c.

Senses, Nervous System of the, Medulla oblongata.

SENSIBILITAS, Sensibility—s. Anomala, see Irritable—s. Aucta, see Irritable—s. Morbosa, see Irritable.

SENSIBIL'ITY, *Sensibil'itas,* (*sentire, sensum,* 'to feel,' and *habilis,* 'able,') *Æsthe'ma.* The faculty of receiving and transmitting impressions, and having the consciousness of them. It thus includes three secondary properties, *Impressibil'ity,* ([F.] *Impressionabilité, Impressibilité,*) *Transmissibil'ity,* and *Perceptibil'ity.* Bichat defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility *animal:* in the latter, where not, he terms it *organic.* This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, which are not sensible — if not in health — in disease. The free extremities of the hair and nails, and the epidermis, are not so. See Insensibility.

SENSIFEROUS, (*sensus,* and *ferre,* 'to carry,') Sentient.

SENSIO, Sense.

SEN'SITIVE, *Sensiti'vus,* (F.) *Sensitif.* Having the faculty of feeling. Relating or appertaining to the senses, or to sensation.

SENSITORIUM, Sensorium.

SENSO'RIVOLIT''IONAL. A term applied to nervous fibres which pass to and from the cerebro-spinal axis, and are respectively concerned in sensation and volition.

SENSO'RIAL, Sentient.

Senso'rial Pow'er, according to Dr. Wilson Philip, is composed of the two functions of sensation and volition. Dr. Darwin included in it the power of muscular contraction; but it ought not to be extended to acts in which there is not consciousness.

SENSO'RIUM, *S. commu'nē, Or'ganon senso'rium inter'num, Sensito'rium, Empo'rium spirituum, Æsthete'rion, Sen'sory.* The common centre of sensations.

SENSORY, Sensorium, Sentient.

Sen'sory Gang'lia. A name given by Dr. Carpenter to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation—as the *olfactory, optic, auditory,* and *gustatory.*

Sensory Nerves, *Nerves of sensa'tion,* are so called in contradistinction to *Motor* nerves. There are *general sensory nerves* — as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory,* as those of the senses.

SENSUS ÆGRITUDINIS, 'a feeling of sickness,' Indisposition — s. Osmometricus, Olfaction —s. Perversus, Pseudæsthesia.

SEN'TIENT, *Sen'tiens,* (from *sentire,* 'to feel,') *Sen'sory, Ideäg''enous, Senso'rial, Senso'tional. Sensif''erous.* Feeling; causing feeling.

Sentient Extremities of Nerves are their minute terminations in the organs.

SENTIMENT, see Sensation.

SENTINA, Pituitary gland.

SEPARATO'RIUM, (*separare, separatum*, 'to separate.') A surgical instrument, for separating the pericranium from the skull.

A *Sep'aratory, Vi'trum Hypoclep'ticum*, is a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, Sepedonogenesis.

SEPEDON, (σηπεδων,) Putrefaction.

SEPEDONODES, (σηπεδονωδης,) Putrid.

SEPEDONOGEN'ESIS, *Sepedogen'esis*, (*sepedon*, and γενεσις, 'generation.') A septic disposition or tendency; such as is met with in typhus gravior.

SE'PES, *Sæ'pes*, 'a hedge,' 'a row;' as *Se'pes* seu *Se'ries* seu *Pec'ten den'tium*:—a row of teeth.

Sepes Dentium, see Sepes.

SEPHIRUS, Seleriasis.

SE'PIA, (σηπια,) *S. officina'lis, Se'pium, Cuttle-fish*, (Sc.) *Hosefish, Slievefish*, (F.) *Sèche. Class*, Cephalopoda. The osseous part of the cuttle-fish; (F.) *Os de Sèche—Præcip'itans mag'num*—has been used as an absorbent, and is often added to toothpowders.

SEPLASIA'RIUS. A name formerly given to one who sold perfumes, ointments, &c. (It is derived from *Seplasia*, the name of a public place at Capua, where such preparations were frequently sold.) A druggist.

SEPSICHYMIA, Septochymia.

SEPSIS, (σηψις,) Putrefaction.

SEPTÆ'MIA, *Septhæ'mia, Septicæ'mia*, (σηπτος, 'putrid,' and αιμα, 'blood;') *Putrid infec'tion*. A morbid condition of the blood produced by septic or putrid matters.

SEPTAL, *Septa'lis*, (from *Septum*.) Relating, or appertaining to, a septum: as 'septal walls of the heart'—those that separate the cavities from each other.

SEPTANA FEBRIS, (*septem*, 'seven,') Fever, septan.

SEP'TENARY, *Septena'rius*, (F.) *Septénaire*, (*septem*, 'seven.') 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had wellfounded expectations that his life might be protracted to 90.

SEPTENNIAD, (*septem*, 'seven,') Climacteric, (years.)

SEPTERIUS, (σηπτηριος,) Septic.

SEPTFOIL, UPRIGHT, (*septem*, 'seven,' and *folium*, 'a leaf,') Tormentilla.

SEPTHÆMIA, Septæmia.

SEP'TIC, *Sep'ticus, Sep'tus, Septe'rius*, (F.) *Septique*, (σηπτος, 'putrid.') That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

Septic Poison, see Poison.

SEPTICÆMIA, Septæmia.

SEPTIMESTRIS FŒTUS, (*septem*, 'seven,' and *mensis*, 'a month,') see Fœtus septimestris.

SEPTINERVIA, (*septem*, 'seven,' and *nervus*, 'a nerve,') Plantago.

SEPTOCHYM'IA, *Sepsichym'ia*, (σηπτος, 'putrid,' and χυμος, 'juice.') Putrefaction or putrescency of the humours.

SEPTON, (from σηπτος, 'putrid,') Azote.

SEPTOPYRA, (σηπτος, 'putrid,' and πυρ, 'fever,') Typhus gravior.

SEPT'ULUM, (dim. of *septum*.) A division between small spaces or cavities—as the *septula* or fibrous cords given off by the mediastinum testis to be inserted into the inner surface of the tunica albuginea.

SEP'TUM, (F.) *Cloison*, 'a partition,' (from *sepio, septum*, 'I fence in.') A part destined to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

Septum Atrio'rum, *S. Auricula'rum*. The septum or partition between the auricles of the heart.

Septum Auricularum, S. Atriorum—s. Cerebelli, Falx cerebelli—s. Cerebri, Falx cerebri—s. Cochleæ auditoriæ, Lamina spiralis.

Septum Cor'dis, *Septum me'dium cordis*. The partition which separates the two ventricles of the heart.

Septum Crurale, see Crural canal—s. Encephali, Tentorium.

Septum Lu'cidum seu *pellu'cidum* seu *ten'uē et pellucidum* seu *me'dium, Spec'ulum, S. lu'cidum, La'pis specula'ris, Mediasti'num* seu *Diaphrag'ma ventriculo'rum latera'lium cer'ebri*, (F.) *Septum médian* (Ch.), *Cloison transparente*. The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other, This septum is composed of two laminæ; between which a small cavity exists, filled by a serous fluid, *ventric'ulus septi pellu'cidi*: see Ventricles of the Brain. The brothers Wenzel are of opinion that this cavity is lined by a peculiar membrane.

SEPTUM MÉDIAN, S. lucidum—*s. Médian du cervelet*, Falx cerebelli—s. Medium cerebri, S. lucidum.

Septum Na'rium, *Intersep'tum* seu *Dissepimen'tum* seu *Interfi'nium* seu *Discri'men* seu *Im'brex* seu *Diaphrag'ma na'rium*, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

Septum Nasi, see Nares.

Septum Parvum Occipitale, Falx cerebelli—s. Pectiniforme, see Cavernous bodies—s. Pellucidum, S. Lucidum—s. Scalæ, Lamina spiralis—*s. Staphylin*, Velum pendulum palati—s. Tenue et pellucidum, S. lucidum—s. Thoracis, Mediastinum—*s. Transverse*, Tentorium—s. Transversum, Diaphragm—s. Vestibuli nervosomembranaceum, see Labyrinth.

SEPTUS, (σηπτος,) Septicus.

SEPUM, Sevum.

SEQUES'TRUM, (*sequestrare*, 'to separate from,') (F.) *Séquestre*. The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequestrum is superficial and small, it is called *Exfolia'tion*. The portion of bone surrounding it is the *Cap'sula sequestra'lis*.

SERAPEUM, Syrup.

SERAPINON, Sagapenum.

SERAPIUM, Syrup.

SERBET, Scherbet.

SÉREUX, Serous.

SE'RICOCAR'PUS TORTIFO'LIUS, (σηρικος, 'silken,' and καρπος, 'fruit,') *Cony'za bifolia'ta, Aster tortifo'lius*; indigenous; *Order*, Compositæ: is said to be diuretic.

SE'RICUM, (σηρικον,) *Silk*; from *Seres*—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bom'byx Mo'ri* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

Sericum Anglicum, see Sparadrapum adhæsivum.

SERIDION, Seriola.

SERIES DENTIUM, 'a row of teeth' see Sepes.

SERIEUX, Serious.

SERINGUE, Syringe.

SERIOLA, (σειρις, gen. σειριδος,) Cichorium intybus.

SE'RIOUS, *Se'rius*, (F.) *Sérieux*, *Grave*. A term applied to a disease, *Dyspathi'a*, *Morbus gra'vis*, and to a symptom that is attended with danger.

SERIS, (σειρις,) Cichorium intybus.

SERMOUNTAIN, Laserpitium album.

SERO, in composition, Serous membrane.

SEROCOLITIS, see Colitis.

SEROCYST'IC, *Serocyst'icus*. An epithet for tumours of the female breast, which consist, in the first stage, of one or more membranous cysts, produced perhaps by dilatation of portions of the lactiferous tubes.

SEROËNTERITIS, see Enteritis.

SEROHEPATITIS, see Hepatitis.

SER'OLIN, *Seroli'na*, (*serum*, and *oleum*.) A peculiar fatty matter, found by Boudet, in the blood. According to Dr. Austin Flint, jr., normal fæces contain serolin or *ster'corin* produced by a transformation of the cholesterin of the bile during the digestive act.

SÉROSITÉ, Serum.

SEROSITY, Serum.

SE'ROUS, *Sero'sus*, (F.) *Séreux*, (from *serum*.) Thin; watery. Relating to the most watery portion of animal fluids, or to membranes that secrete them. See Serum.

SEROUS LAYER, see *Tache embryonnaire*—s. Membranes, Membranes, serous.

SERPEDO, (*serpere*, 'to creep,') Psoriasis.

SERPENS, Serpent.

SERPENT, *Ser'pens*, *An'guis*, *O'phis*, (from *serpere*, 'to creep.') A snake.

SNAKE BROTH was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See Poisons, table of.

SERPENT À LUNETTES, 'spectacled snake,' *Cobra di Capello*—*s. à Sonnettes*, Crotalus horridus.

SERPENTAIRE NOIRE, Actæa racemosa—*s. Rouge*, Polygonum bistorta.

SERPENTARIA, (from *serpens*, gen. *serpentis*, 'a snake,') 'snake root,' Aristolochia serpentaria—s. Gallorum, Arum dracunculus—s. Hispanica, Scorzonera—s. Minor, Arum maculatum—s. Nigra, Actæa racemosa.

SERPENTARIÆ BRAZILIENSIS RADIX, Caincæ radix.

SERPENTARIN, see Aristolochia serpentaria.

SERPENTIN, 'winding as a serpent,' see Alembic.

SERPENTINE, (from *serpens*, 'a serpent,') Ophites.

SERPENTINUS, Ophites.

SERPES, (*serpere*, 'to creep,') Herpes.

SERPIG"INOUS, (from *serpere*, 'to creep,') (F.) *Serpigineux*. An epithet given to certain affections, which creep, as it were, from one part to another,—'*Serpiginous* erysipelas,' (F.) *Érysipèle serpigineux*.

SERPIGO, gen. *Serpi'ginis*, (from *serpere*, 'to creep,') Herpes circinatus, Lichen psoriasis.

SERPILLUM, (from *serpere*, 'to creep,') Thymus serpyllum.

SERPOLET, Thymus serpyllum.

SERPULLUM, (ἑρπυλλον,) Thymus serpyllum.

SERPYLLUM, (ἑρπυλλον, from ἑρπειν, *serpere*, 'to creep,') Thymus serpyllum—s. Citratum, see Thymus serpyllum.

SERRA, Saw—s. Amputatoria, Saw, amputation—s. Versatilis, Trepan.

SER'RATED, *Serra'tus*, (from *serra*, 'a saw,') Dentate, Sawshaped.

SERRAT'ULA AMA'RA, dim. of *serratus*, sawshaped:' applied to the leaves owing to their serrated shape. *Family*, Cynarocephalæ. *Sex. Syst.* Syngenesia Polygamia æqualis. A species of *Sawwort*, recommended in ague.

SERRATULA BEHEN, Centaurea behen.

SERRATUS, (from *serra*, 'a saw,') Dentate.

SERRATUS, ANTICUS MINOR, Pectoralis minor.

SERRA'TUS MAG'NUS. So called from its serrated appearance; (from *serra*, 'a saw.') *Serratus ma'jor anti'cus*, *S. ma'jor*, (F.) *Costo-basi-scapulaire*, *Costo-scapulaire* (Ch.), *Grand dentelé*. A very broad (especially anteriorly), thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

SERRATUS MAJOR, Serratus magnus—s. Major anticus, Serratus magnus.

SERRATUS POSTI'CUS INFE'RIOR, (F.) *Dorso-lombo-costal*, *Lombo-costal* (Ch.), *Petit dentelé postérieur et inférieur*. A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebræ, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

SERRATUS POSTI'CUS SUPE'RIOR, (F.) *Cervicidorso-costal*, *Dorso-costal*, (Ch.), *Petit dentelé supérieur*. A flat, thin, quadrilateral muscle; situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebræ; from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERRE-ARTÈRE, (*serrer*, 'to press,' and *artère*, 'artery,') *Presse-artère*.

SERRE-COU (F.) (*serrer*, 'to press,' and *cou*, 'the neck.') An instrument, invented by Chabert, for compressing the jugular vein, in bleeding from that vessel. It surrounds the neck like a collar, and, by means of a pad, exerts the necessary pressure.

SERRE-FINE (F.), (*serrer*, 'to press,' and *fin*, 'fine.') A small spring forceps, invented by M. Vidal. It is formed of a wire of metal, turned in the middle into two spirals, one in front of the other. This constitutes the spring. Each branch describes nearly the letter S; and one extremity forms the spiral, the other lays hold of the parts to be united.

SERRE-NŒUD (F.) (*serrer*, 'to press,' and *nœud*, 'a knot.') This name has been given to various instruments, employed by the surgeon for tightening a ligature passed round a pediculated tumour, or any part which has to be destroyed by ligature slowly and gradually. Thus, there is the *serre-nœud* of Roderic, the *constricteur* of Herbinaux, the *serre-nœud* of Desault, &c.

SERRE NŒUD DE DESCHAMPS, *Presse-artère*.

SERTULA CAMPANA, (dim. of *serta*, 'a garland,') Trifolium melilotus.

SE'RUM, 'whey,' (probably from *serus*, 'late;' because it remains after the butter and cheese have been separated from milk,) see Serum Lactis.

Or'rhos, O'ros, Seros'ity. (F.) *Sérosité.* The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c. Also, Sperm.

Serum of the Blood, *Hæ'mydor, Or'rhos, Se'rum* seu *l'chor sanguinis,* (F.) *Sérum du Sang,* is the liquid which separates from the blood, when coagulated at rest. It is of a greenish-yellow colour; viscid, slightly coagulable by heat, acids, and alcohol. It is composed of water; chloride of sodium; certain phosphates; and albumen, constantly united to soda, almost in a saponaceous combination.

The fluid which exudes from the albumen of the serum of the blood, when coagulated by heat, is by some called *seros'ity.*

Serum Lac'tis, *A'qua Lac'tis; Serum of Milk, Whey,* (Prov.) *Whig,* (F.) *Sérum du lait, Petit lait.* That part of milk from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrigerant. The French have magistral formulæ, the basis of which is whey. They are called *Petits-laits,* or 'wheys.'

Serum Lac'tis Hoffman'ni, (F.) *Petit-lait d'Hoffmann,* is a name given to the liquid resulting from treating with boiling water milk which has been evaporated to an almost solid consistence, It is not much used.

Ren'net Whey is made thus: *milk* 2 pints; *rennet* ℥ss, infused in a little hot water; mix and keep in a gentle heat for some hours, then strain.

SERUM DU SANG, S. of the blood.

Serum Sanguinis, Serum of the blood.

Serum of Se'rous Mem'branes, *Se'rum membrana'rum serosa'rum, Wa'ter of Drop'sy,* (F.) *Sérum des membranes séreuses, Eau des hydropiques.* It resembles the serum of the blood,—especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen:—sometimes enough to coagulate on the application of heat: at others, not.

Service, Mountain, Sorbus aucuparia.

Service Tree, Sorbus domestica.

SERVIETTE EN CARRÉ, 'a napkin in square,' *Couvrechef.*

SÉSAME, Sesamum orientale.

Ses'amoid, *Sesamoï'des, Sesamo'des, Sesamoïdeus,* (σησαμη, 'a grain of sesamum,' and εἰδος, 'resemblance.')

Sesamoid Bones, *Os'sa* seu *Ossic'ula sesamoï'dea,* are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarsophalangal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpophalangal joint of the thumb. At times, they are met with in the other metacarpophalangal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoideum is also met with in the tendon of the peronæus longus. These bones are commonly round, and flattened only on one surface, which is incrusted with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification: and are, like the patella (which is a true sesamoid bone), composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and thus enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoïdea* to two bony points sometimes met with;—the one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

SESAMUM, (σησαμον, σησαμη,) see Sesasum orientale.

Ses'amum Orienta'lē, *S. edu'lē* seu *oleif'erum* seu *Indicum* [?], *Ben'nē, Oil'y Grain,* (F.) *Sésame, Jugeoline. Ord.* Bignoniaccæ. The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

Beu'ne oil, O'leum Ses'ami, the oil of the seed, is used in the Southern States as a laxative. The leaves—*Sesami folium,*(Ph. U. S. 1863)—which are referred to *Sesamum orientale* and *S. Indicum,* afford, by infusion, an excellent mucilage.

SESCUN'CIA, *Sesquim'cia, Hemiol'ion.* An ounce and a half. See Sesqui.

SESELI, (σεσελι,) Laserpitium siler—s. Ægopodium, Ligusticum podagraria—s. Annuum, S. tortuosum—s. Carum, Carum—s. Carvi, Carum—s. Creticum, Tordylium officinale—s. Fœniculifolium, Sison ammi—s. Graveolens, Apium graveolens—s. Meum, Æthusa meum—s. Patens, S. tortuosum—s. Pratense, Peucedanum silaus—*s. des Prés,* Peucedanum silaus.

Ses'eli Tortuo'sum, *S. Massilien'sē* seu *an'nuum* seu *pa'tens, Œnan'thē stria'ta rig'ida, Hartwort of Marseilles.* The seeds have a warm taste; and a greater degree of pungency than those of Laserpitium siler, which is the *Seseli* of the Pharmacopœias.

SESELIS, Laserpitium siler.

SES'QUI. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum,* 'a grain and a half.'

SESQUIUNCIA, Sescuncia.

SE'TA EQUI'NA, 'horsehair.' *Hair'worm, Helmin'thus Gor'dii.* A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions; colour pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Col'ica Lappon'ica,* in which the gripings are, at times, exceedingly severe.

SETA'CEUM, *Se'ton,* (F.) *Séton,* (from *seta,* 'a bristle.') A long strip of fine linen or cotton twist, passed through the skin and areolar membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton-needle through it, with the thread attached. Every day a fresh portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmia, cephalalgia; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

SETARIA ROCCELLA, (from *seta,* 'a bristle,') Lichen roccella.

SETFAST, see Furunculus.

SETON, Setaceum.

SETTERWORT, Helleborus fœtidus.

SEVADILLA, ([S.] *Sebadilla,*) Veratrum sabadilla.

SEVATIO, (from *sevum,*) Steatoma.

SĒVE, ([Sax.] sæp, [G.] Saft, 'juice,) Sap.

SEVENBARK, Hydrangea arborescens.

SEVENDAYS' DISEASE, see Trismus.

SÉVRAGE, (from [L.] *separare*, 'to separate,') Weaning.

SEVUM, *Se'bum, Se'pum, Ste'ar, A'deps ovil'li, Se'vum verveci'num.* Suet, mutton suet; Pinguedo.

SEVUM CETI, (*cetus*, 'whale,') Cetaceum.

SEVUM PRÆPARA'TUM, *Se'vum*, (Ph. U. S.),—*Ovil'li se'vum præpara'tum, Prepa'red Su'et*, (F.) *Graisse de Mouton, Suif*, is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient, and is sometimes boiled in milk (℥ij to Oj), and is used in diarrhœa and dysentery. Its principal employment is in the formation of plasters.

SEVUM VERVECINUM, Sevum.

SEX, *Sex'us, Se'cus.* The physical difference betwen male and female in animals and vegetables:—as the *Male sex, Sex'us po'tior* seu *for'tior* seu *viri'lis*; and the *Fe'male sex, Sexus seq'uior, S. muli'ebris, Al'ter Sex'us*, '*The Sex.*'

SEXTANS, (from *sextus*, 'the sixth;') *Sex'ta pars li'bræ.* The sixth part of a pound.

SEXTA'RIUS, (from *sextus*, 'the sixth.') An ancient measure for liquid and solid substances; the sixth part of a congius. See Weights and Measures.

SEX'TULA, (from *sextus*, 'the sixth.') *Hexa'gium*, '*ἑξαγιον*. The sixth part of an ounce.

SEX'UAL, *Sexua'lis*, (F.) *Sexuel*, (*sexus*, 'sex.') That which relates to the sex; which characterizes the sex.

SEXUAL DISEASES, *Mor'bi sexua'les*, are the diseases of the genital organs; as SEXUAL FUNCTIONS are the genital functions.

SEXUAL INTERCOURSE, Coition — s. Organs, Genital organs.

SEXUS, gen. *Sexûs*, Sex—s. Alter, see Sex—s. Fortior, see Sex — s. Muliebris, see Sex — s. Potior, see Sex—s. Sequior, see Sex — s. Virilis, see Sex.

SEYDSCHÜTZ WATER, Seidschütz water.

SHACKLE, Carpus.

SHACKLEHAMMED, see Cnemoscoliosis.

SHAD'DOCK, *S. Or'ange.* The fruit of *Citrus decuma'na*, called after the captain of a vessel who first took it to the West Indies from China. It is large; but inferior to the orange in flavour. It keeps, however, longer; and, hence, is useful on long voyages.

SHAGBARK, see Hickory.

SHAKERS, see *Convulsionnaire.*

SHAKES, Intermittent.

SHAKING, Intermittent, see Rigor.

SHALLOT, Echalotte.

SHAM ABRAHAM, see Abraham man.

SHAMPOO'ING, *Cham'pooing, Mass'ing*, (F.) *Massage, Massement.* A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction. A variety of this was employed by the ancients in their baths. With the Romans, the operators were called *Fricato'res* and *Tractato'res.*

'Kneading' consists in pressing alternately upon a part of the body to arouse the museles to more energetic action. It is employed at times in dyspepsia.

SHAMROCK, INDIAN, (Ir. *Seamrog* or *shamrog*,) Trillium latifolium — s. Water, Menyanthes verna.

SHANKER, *Chancre.*

SHAN'NONDALE SALINE' SPRINGS. These are within a few miles of Charlestown, Jefferson County, Virginia. They are mildly aperient and diuretic.

SHAPE, Vulva.

SHA'RON SPRINGS, NEW YORK. These springs, which are situate about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. They contain, according to the analysis of Dr. Chilton, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of soda, sulphohydrate of lime, vegetable extractive matter, and free sulphohydric acid gas. Their temperature is 48° Fah.

SHEATH, ([Sax.] ꝛcæðe,) Vagina.

SHEDDING OF THE TEETH, see Dentition.

SHEEP POISON, Kalmia latifolia.

SHELLBARK, see Hickory.

SHELL FLOWER, Trillium latifolium — s. Liquid, see Calcis murias — s. Membrane, Membrana testæ.

SHEPHERD'S PURSE, Thlaspi bursa — s. Sun dial, Anagallis arvensis.

SHERBET, Scherbet — s. Orange, see Syrupus aurantii.

SHERMAN'S WORM LOZENGES, See Worm lozenges, Sherman's.

SHERRY, (after *Xeres*, in Spain,) Sack, see Wine.

SHIELDBONE, Scapula.

SHIELD, WATER, Nelumbium luteum.

SHILDER, (*shoulder*,) Humerus.

SHIN, Sax. ꝛcina, *O'crea, Cris'ta tib'iæ.* The *spine*, or anterior part of the tibia or leg. It is, also, called *Anticne'mion*, and *Cre'a.*

SHINBONE, Tibia.

SHINGLES, (*cingulum*, 'a girdle,') Herpes zoster.

SHINLEAF, Pyrola.

SHINLOCK, Brassica eruca.

SHIP FEVER, see Typhus.

SHITABED, Leontodon taraxacum.

SHIVERING, (from [G.] Schauer,) see Rigor.

SHOCK, (from [Sax.] ꝛcacan, ꝛceacan, 'to shake,') (F.) *Choc*, see Concussion.

SHOCK, NER'VOUS, *Vi'tal Shock, Vi'tal Depres'sion, Ner'vous Depres'sion, Fa'tal Sink'ing.* Sudden or instantaneous depression of organic, nervous, or vital power, often with more or less perturbation of body and mind, passing either into reaction, or into fatal sinking, occasioned by the nature, severity or extent of an injury, or by an overwhelming moral calamity.—(Copland.)

SHOCK, VITAL, Shock, nervous.

SHOOT, see Crick-in-the-neck, and Pain.

SHORT, ([Sax.] ꝛceoꝛt, from ꝛcinan, 'to cut, to *shear*,' *shored, shor'd, short*,) (F.) *Court.* A word used, by anatomists, in opposition to *long*; and to distinguish parts from each other that have otherwise the same name.

SHORT BONES, for example, are those in which the three dimensions—length, breadth, and thickness — are nearly alike; such are the vertebræ, bones of the carpus, tarsus, &c.

SHORT-OF-PUFF, Shortwinded — s. Ribs, see Costa.

SHORTSIGHTED, Myopic.

SHORTSIGHTEDNESS, Myopia.

SHORTWINDED, Pursy.

SHOTBUSH, Aralia spinosa.

SHOTT, (*shoot*,) Pleurodynia.

SHOULDER, ([Sax.] ꝛculdꝛe,) Humerus — s. Blade, Scapula—s. Bone, Humerus.

SHOUP, Haunch.

SHOVEL PICKEREL WEED, Unisema deltifolia—s. Pond, Unisema deltifolia.

SHOW, see Parturition.

SHOWCHOO, see Spirit.

SHOWERBATH, see Bath.

SHRUB, (perhaps, from Arabic, *sharab*, 'syrup, or corr. from *syrup.*) A compound of spirits, lemonjuice, and sugar.

SHRUB, SWEET, Calycanthus — s. Sweetscented, Calycanthus.

SHRUMPSHOULDERED, see Hump.

SHUD'DERING, *Frem'itus*, (from [G.] Schauder, Schauer,) (F.) *Frémissement, Tressaillement.* A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

SHULLBANE, Humerus.

SHUMAC, Rhus coriaria.

SIAGANTRI'TIS, (*siagon, αντρον*, 'a cavity,' and *itis.*) Inflammation of the lining membrane of the antrum of Highmore.

SIAGON, (*σιαγων,*) Maxillary bone.

SIAGO'NAGRA, (*siagon*, and *αγρα*, 'a seizure.') *Arthri'tis maxilla'ris.* A gouty or rheumatic affection of the joint of the lower jaw.

SIALACHUS, (from *sialon,*) Salivation.

SIALADENI'TIS, (*sialon, αδην*, 'a gland,' and *itis.*) Inflammation of a salivary gland. At times, improperly written *Syaladenitis.*

SIAL'AGOGUE, *Sialago'gus, Sial'ogogue, Ptyal'agogue, Ptys'magogue, Sali'vans, Saliva'tum, Sialoeinet'icus, Apophlegmat'isans per os*, (F.) *Salivant;* (*sialon*, and *αγω*, 'I drive.') That which provokes the secretion of saliva. Pyrethrum and mercury are sialogogues. Sialagogues may be of two kinds, those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former, — pyrethrum to the latter class. The chief sialagogues are armoracia, calamus, mezereum, pyrethrum, tabacum, and zingiber.

SIAL'ICA, (from *sialon.*) Medicines, which affect the salivary glands.

SIALISMUS, (*σιαλισμος,*) Salivation.

SIALOCHOUS, (*σιαλοχους*, from *sialon*, and *χυω*, 'to pour,') Salivated.

SIALOCINETICUS, (*sialon*, and *κινεω*, 'to move,') Sialagogue.

SIALOLITHI, (*sialon*, and *λιθος*, 'a stone,') Calculi, salivary.

SIALOLOG''IA, (*sialon*, and *λογος*, 'a discourse.') A treatise on saliva.

SIALON, (*σιαλον,*) Saliva.

SIALORRHŒA, (*sialon*, and *ῥεω*, 'to flow,') Salivation.

SIALOS, (*σιαλος,*) Saliva.

SIALOS'CHESIS, (*sialon*, and *σχεσις*, 'retention.') Retention or suppression of the saliva.

SIALOSYRINGES, (*sialon*, and *συριγξ*, 'a pipe.') Salivary fistulæ.

SIALOZEMIA, (*sialon*, and *ζημια*, 'loss,') Salivation—s. Mercurialis, Salivation, mercurial.

SIAMESE TWINS, see Twins, Siamese.

SIBARE, Phrenitis.

SIB'BENS, *Siv'vens, Frambœ'sia Sco'tica.* An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Sivin*, in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sivin*, the inhabitants have made *sievin, sibben, sibbens*, and *sivvens.* By some, this affection is regarded as a complication of the venereal and itch. In the Orkneys, *sibbens* means itch.

SIB'ILANT, *Sib'ilus, Sib'ilans*, (*sibilo*, 'I hiss, I whistle.') Making a hissing or whistling sound. See *Râle sibilant.*

SIBILISMUS AURIUM, 'hissing or whistling of the ears,' see Tinnitus aurium.

SIBILUS AURIUM, see Tinnitus aurium.

SICCAN'TIA, (*siccare, siccatum*, 'to dry.') *Xeran'tica*, (F.) *Siccatifs.* Drying medicines. See Desiccativa.

SICCATIFS, Siccantia.

SICCATIO, Drying.

SICCHA'SIA, (*σικχασια*, 'disgust.') A distressing disgust for food; such as is experienced by women with child.

SICIL'ICUM, *Sic'lium.* A Roman weight of about two drachms.

SICK, ([Sax.] ꝛeoc,) *Æ'ger, Ægro'tus, Nos'erus, Noso'des, Ja'cens, Laborio'sus, Labo'rans*, (F.) *Malade.* Labouring under disease: *Diseased', Distem'pered, Ill, Ail'ing, Disor'dered.* Such is its acceptation in old English, and generally in the United States. In most parts of the United States, if a patient is affected with a slight indisposition, he is said to be *sick;* if with one more severe, he is said to be *ill;* (Prov.) *bad, badly.* In England, it most commonly means,—affected with disorder of the stomach, or nausea.

A sick person, *Æ'ger, Ægro'tus*, (F.) *Malade*, who is under the charge of a physician, is said to be a *pa'tient*, or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract, (from *patiens*, 'suffering.')

SICK STOMACH, Milk sickness, Nausea.

SICK'LY, *Morbo'sus, Valetudina'rius, Adyn'atus, Nosac'erus, Noso'des, Mor'bose, Mor'bulent, Unhealth'y*, (Sc.) *Hough*, (F.) *Maladif.* Subject to be sick, or in feeble health. Ailing.

SICKNESS, Disease, Plague—s. Falling, Epilepsy — s. Mountain, Puna — s. River, Milk sickness—s. Sea, Nausea marina—s. of the Stomach, Vomiting—s. Swamp, Milk sickness.

SICLIUM, Sicilicum.

SICUA, (*σικυα,*) Cuppingglass.

SICULA, (dim. of *sica*, 'a dagger,') Beta, Penis.

SICYEDON, (*σικυηδον,*) Cauledon.

SICYOS, (*σικυος,*) Cucumis sativus.

SIDA ABUTILON, Abutilon Avicennæ.

SIDE, PAIN IN THE, Pleurodynia.

SIDERA'TIO, *Sydera'tio, Sidera'tion*, (*sidus*, gen. *si'deris*, 'a star;' because the condition was thought to be produced by the influence of the stars.) The state of one struck suddenly, without apparent cause, and as if by the influence of the stars or planets — *Plan'etstruck.* The ancients comprised under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

SIDERATIO, Apoplexy, Asphyxia, Phrenitis — s. Ossis, Spina ventosa.

SIDERATION, Astrobolismus, Sideratio.

SIDERION, (*σιδηριον*, 'an iron tool,') Ferramentum.

SIDERITES, (*σιδηριτης*, from *sideros,*) Magnet.

SIDERITIS, Magnet, Teucrium chamæpitys.

SIDEROKRENÆ, (*sideros*, and *κρηνη*, 'a spring,') Water, mineral, (chalybeate.)

SIDEROPEGÆ, (*sideros*, and *πηγη*, 'a spring,') Water, mineral (chalybeate.)

SIDEROS, (*σιδηρος,*) Ferrum.

SIDEROXYLON, (*sideros*, and *ξυλον*, 'wood,') Chrysophyllum cainito.

SIDESADDLEPLANT, Sarracenia.

SIDHEE, see Gunjah.

SID'MOUTH, CLI'MATE OF. Sidmouth is in Devonshire, England, on the seabéach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to seafogs.

SIÉGE, (originally from *sedes*, 'seat,') Anus, nates.

SIELISMUS, (*σιελισμος,*) Salivation.

SIELON, (*σιελον,*) Saliva.

SIEVE, ([Sax.] ꝛipe, ꝛýꝛe,) see Cribration—s. Drum, see Cribration.

SIFFLEMENT (F.), ([L.] *sibilare*, from *sifler*, 'to whistle.') Whistling.

SIFFLEMENT MODULÉ, Chant des artères, Bruit musical, 'modulated whistling, or music of the arteries.' *Musical sound.* A kind of sound heard on auscultation, resembling, at times, the

humming of certain insects. Various musical sounds, (F.) *Bruits musicaux*, are described from fancied resemblances: — as *Bruit de piaulement*, resembling the clucking of the hen; — *Bruit de jappement*, resembling the barking or yelping of a young dog, *Bruit de rouet*, resembling the noise of a spinning wheel, &c.

The sound is chiefly met with in those labouring under chlorosis.

SIGAULTIAN SECTION, (after Dr. J. R. Sigault, a French physician,) Symphyseotomy.

SIGE, (σιγη,) Taciturnity.

SIGH, ([Sax.] ȝican, 'to sigh,') Suspirium.

SIGHT, ([Sax.] ȝeſihꝺ,) Vision — s. Askew, Dysopia lateralis — s. False, Metamorphopsia, Pseudoblepsia—s. Feebleness of, Amblyopia.

SIGILLA'TION, *Sigilla'tio*, (from *sigillum*, 'a seal.') The mark of a cicatrix.

SIGILLUM SALAMONIS, (dim. of *signum*, 'a mark,' 'Solomon's seal,') Convallaria polygonatum—s. Virginititas, Hymen.

SIGMATOID, Sigmoid.

SIG'MOID, *Sigmoid'al*, *Sig'matoid*, *Sigmoï'des*, *Sigmo'des*, *Sigmoï'deus*; (*sigma*, and εἰδος, 'resemblance.') That which has the form of the Greek Σ, or of C, an old form of the sigma.

SIGMOID CARTILAGES, Semilunar cartilages.

SIGMOID CAV'ITIES OF FOS'SÆ OF THE UL'NA, (F.) *Cavités ou Fosses sigmoïdes*, are two notches at the upper part of that bone,—one for the reception of the humerus; the other for that of the radius.

SIGMOID FLEX'URE OF THE CO'LON, *Flexu'ra sigmoï'des* seu *ili'aca*, *S. Roma'num*, is a turn the colon takes immediately before its termination in the rectum. See Colon.

SIGMOID FOSSA (of the temporal bone), Fossa sigmoidea.

SIGMOID OR SEMILU'NAR VALVES, *Val'vulæ Sigmoïdeæ* seu *semiluna'res*, *Proces'sus Sigmoï'des*, (F.) *Valvules sigmoïdes ou semilunaires*, are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpus'culum* seu *Glob'ulus Aran'tii*, which completely closes up the passage. It is, also, called *Corpusculum Morgagn'ii* and *C. Sesamoïdeum*, (F.) *Globule d'Arantius*.

SIGN, *Sig'num*, *Semi'on*, (F.) *Signe*. Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anamnes'tic* or *commem'orative signs*; — those which accompany it are termed *diagnos'tic*, if they reveal the nature or seat of the disease, — *prognos'tic*, when they indicate its probable duration and termination. See Symptom.

SIGNA ASSIDENTIA, see Assidens.

SIG'NATURE, *Signatu'ra*, *Signa'tio*, (*signum*, 'a sign.') This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

SIGNATURES OF PLANTS meant certain peculiarities in their external formation or colour, which indicated that they were adapted for particular diseases;—as in the case of the *Lungwort*, *Liverwort*, &c.

SIGNE, Nævus—*s. Avant-coureurs*, Precursory signs—*s. Précurseurs*, Precursory signs.

SIGNUM, Sign, see Parturition—s. Character isticum, see Pathognomonic — s. Conjunctum, see Pathognomonic — s. Diacriticum, see Diacritica signa—s. Morbi essentiale, see Pathognomonic.

SI'LACH, *Silac*. An Arabic word, used to designate thickening of the eyelids, *Crassit'ies Palpebra'rum*; and, also, *Alopecia*.

SILENCE, see Murmur, Respiratory.

SILENE CRASSIFOLIA, Cucubalus behen—s. Inflata, Cucubalus behen—s. Pennsylvanica, see Silene Virginica—s. Thorei, Cucubalus behen.

SILE'NE VIRGIN'ICA, *Ground Pink*, *Wild Pink*, *Catch Fly*. *Ord.* Caryophyllaceæ. The root has been employed in decoction, as an efficacious anthelmintic.

Silene Pennsylva'nica probably has the same properties.

SILER LANCIFOLIUM, Laserpitium siler—s. Montanum, Laserpitium siler.

SIL'IQUA, *Cera'tion*; the carat. A weight of about four grains. A pod.

SILIQUA ARABICA, Tamarindus — s. Araci aromatici, see Vanilla — s. Banillæ, see Vanilla — s. Dulcis, Ceratonium siliqua—s. Vaniglіæ, see Vanilla—s. Vanilliæ, see Vanilla.

SILIQUASTRUM PLINII, (from *siliqua*, 'a pod,') Capsicum annuum.

SILK, ([Sax.] ȝeolc,) Sericum.

SILK GRASS, Yucca filamentosa—s. Weed, Asclepias Sullivantii, Asclepias tuberosa — s. Weed, common, Asclepias Syriaca — s. Weed, flesh-coloured, Asclepias incarnata—s. Weed, swamp, Asclepias incarnata—s. Worm, see Sericum.

SILLON, Sulcus—*s. Horizontal de la veine ombilicale*, see Liver—*s. Transversale*, see Liver—*s. de la Veine cave inférieur*, see Liver — *s. de la Veine porte*, see Liver.

SILLONNEMENT, Segmentation.

SILLUS, (σιλλος,) Camus.

SILO, (σιλλος,) Camus.

SILPHIUM, (σιλφιον,) Laserpitium.

SILPH'IUM LACINIA'TUM, *Rosinweed*, *Compass plant*, *Polar plant*;

SILPHIUM PERFOLIA'TUM, *Cup Plant*, *Turpentine Sun Flower*, and

SILPHIUM TEREBINTHINA'CEUM, *Pra'irie Burdock*; *Nat. Order*, Compositæ; indigenous in Ohio and Michigan, and flowering from July to September; yield a fragrant gum which is esteemed stimulant and antispasmodic.

SILURUS GLANIS, (σιλουρος,) see Ichthyocolla.

SILUS, (σιλλος,) Camus.

SILVER, ([Sax.] ȝeolpeꝛ, [G.] Silber,) Argentum—s. Ammoniochloride of, see Argentum—s. Chloride of, see Argentum—s. Chloruret of, see Argentum—s. Cyanide of, see Argentum—s. Cyanuret of, see Argentum—s. Iodide of, see Argentum—s. Ioduret of, see Argentum.

SILVER LEAF, Magnolia macrophylla.

SILVER, MURIATE OF, see Argentum—s. Nitrate of, Argenti nitras—s. Oxide of, see Argentum.

SILVER AND AMMONIA, CHLORIDE OF, see Argentum — s. and Ammonia, chloruret of, see Argentum — s. and Soda, hyposulphite of, Sodæ et argenti hyposulphis.

SILVESTER'S, (DR. H. R.,) METHOD FOR RESTORING SUSPENDED ANIMATION. This consists in placing the patient on his back, pulling the tongue forward, and, then, drawing the arms slowly over the head, by which means the ribs are elevated by the pectoral muscles, and the chest is enlarged. The arms are now to be brought down to the side of the chest, which they must be made to compress slightly. These movements must be repeated so as to simulate respiration.

SILYBUM, Carduus marianus—s. Maculatum, Carduus marianus—s. Marianum, Carduus marianus.

SIMA'BA CE'DRON. *Nat. Fam.* Simarubaceæ. A South American tree, the seeds of which — *cedron seeds* — have been used as an antidote for snake-bites. They have, also, been proposed in mental diseases and in epilepsy. The scrapings of the wood have been used as a substitute for sulphate of quinia.

SIMABA QUASSIOIDES, Nima quassioides.

SEMAROUBA, Quassia simarouba — s. Bitter, Quassia simarouba—*s. Faux*, Malpighia mourella.

SIMARUBA, Quassia simarouba — s. Excelsa, see Quassia—s. Officinalis, Quassia simarouba.

SIMILATEUR, Malingerer.

SIMILATIO, (*similis*, 'like,') Assimilation.

SIMILIA SIMILIBUS, 'like by like,' see Homœopathy.

SIMITIUM, Plumbi subcarbonas.

SIMO, (σιμος,), Camus.

SIMONEA FOLLICULORUM, (after Simon, a German dermatologist,) Acarus folliculorum.

SIMOTRACHELUS, (σιμος, 'bent short,' and τραχηλος, 'neck,') Bysauchen.

SIMPLE, (opposite to compound.) A medicinal herb. One skilled in simples, is called a *Sim'plist* or *Simpler*. '*To sim'ple*,' and '*to cull simples*,' signify to gather medicinal herbs.

SIMPLER, see Simple.

SIMPLER'S JOY, Verbena hastata.

SIMPLIST, see Simple.

SIMULATED DISEASES, Feigned diseases.

SIMULATI MORBI, Feigned diseases.

SIMUS, (σιμος,) Camus.

SINA LEVANTICA, Artemisia santonica.

SINAPELÆ'ON, (σιναπελαιον,) from *sinapis*, and ελαιον, 'oil.') Oil impregnated with mustard.

SINAPI, (σιναπι,) Sinapis.

SINA'PIS, *S. ni'gra*, seu *cer'nua* seu *Oliveria'na*, *Bras'sica ni'gra*, *Na'pus*, *Eru'ca*, *Sina'pē*, *Sina'pi*, *Sine'pi*, *Napi'um*, *Na'py*, *Com'mon Black Mus'tard*, (F.) *Moûtarde noire* ou *grise*, *Sénevé*, *Sanvé*. *Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. The seeds are inodorous, when entire: but, when bruised, the odour is very pungent; taste bitterish and acrid. They yield their virtues to water, and afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See Sinapism.

SINAPIS AL'BA, *S. folio'sa*, *Bonan'nia officina'lis*, *Na'pus Leucosina'pis*, *White Mustard*, also, is used medicinally. It is somewhat less pungent than the black. The distilled oil—*O'leum Sina'pis*—is a powerful stimulant and rubefacient. In the pharmacopœias of the United States and London, *Sinapis* is the seeds of Sinapis nigra and Sinapis alba.

White'head's Es'sence of Mus'tard consists of *oil of turpentine*, *camphor*, and a portion of *spirit of Rosemary*: to which is added a small quantity of *flour of mustard*. It is a celebrated embrocation for rheumatism, &c.

White'head's Es'sence of Mus'tard Pills consist of *yellow resin* and *balsam of tolu* enough to make into pills.

Mus'tard Whey is made by taking bruised *mustard seeds*, ℥ss, and *milk*, Oj. Boil together until the milk is curdled, and strain.

This whey is used in dropsy.

SINAPIS ARVEN'SIS, *S. Timoria'na*, *Char'lock*, *Wild Mus'tard*, *Gar'lock*, *Chad'lock*, *Runsh*, (Sc.) *Runch'es*, *Scald'ricks*, *Skel'loch*, *Skel'lie*. The seeds are sometimes substituted for black mustard.

SINAPIS CER'NUA, Sinapis — s. Eruca, Brassica eruca—s. Foliosa, S. alba—s. Nigra, see Sinapis—s. Oliveriana, Sinapis — s. Tamoriana, S. arvensis —s. Tuberosa, Brassica rapa.

SIN'APISM, *Sinapis'mus*, (from *sinapis*.) A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counterirritant. It is prepared by mixing flour of mustard and vinegar together for the due consistence. See Cataplasma sinapis.

SIN'CIPUT, gen. *Syncip'itis*, (from *semi*, 'half,' and *caput*, 'head,' or *summum caput*, 'top of the head,') *Sincip'ital Re'gion*, *Syn'ciput*, *Hemicephal'ium*. The French use it synonymously with *Vertex*, *Mesocra'nium*, *Mesocra'num*. By some, it is applied to the frontal region or forepart or forehalf of the cranium, *Hemicephal'ium*, *Hemiceph'alum*. The parietal bones have been called *sincip'ital bones*, *Ossa sincip'itis*, (F.) *Os du sinciput*.

SINDON, (σινδων, 'fine linen.') A small piece of rag, or round pledget, supported by a thread at the middle, and introduced into the opening in the cranium made by the trephine.

SINEPI, (σινηπι,) Sinapis.

SINEW, ([Sax.] ſinep,) Tendon.

SINGLETON'S GOLDEN OINTMENT is formed of *sulphuret of arsenic* (realgar,) and *lard* or *spermaceti ointment*.

SINGULT'OUS, *Lygmo'des*, *Lygo'des*, *Lyngo'des*, (F.) *Singultueux*, (from *singultus*.) Relating to or affected with hiccough.

SINGUL'TUS, *Lynx*, *Lyg'mus*, *Spasmolyg'mus*, *Clo'nus* seu *Pneu'sis singul'tus*, *Hic'cough*, *Hic'cup*, (old E.) *Hicket* or *Hickot*, *Hicquet*, (Prov.) *Heuks*, *Yex*, *Yux*, *Yoke*, (Sc.) *Ees'kin*, *Ees'kin*, (F.) *Hoquet*. A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrest the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health. Also, a sob.

SIN'ISTRAD, (*sinister*, 'to the left hand.') A termed used by Dr. Barclay, adverbially, to signify 'towards the sinistral aspect.' See Mesial.

SINISTRAL ASPECT, see Mesial.

SINKING, FATAL, Shock, nervous.

SINUEUX, Sinuous.

SINUOSITAS, Sinus.

SIN'UOUS, *Sinuo'sus*, (F.) *Sinueux*, (*sinuare*, 'to bow, to curve.') An epithet given to certain ulcers, and especially to certain fistulæ, which are tortuous.

SI'NUS, gen. *Sinûs*, 'a bay or curve,' *Sinuo'sitas*, *Abscon'sio*, *Eurycho'ria*, *Reces'sus*, (F.) *Golfe*. Any cavity, the interior of which is more expanded than the entrance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.;—and to the bosom, and the vulva.

In *surgery*, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c., (F.) *Clapier*.

Sinuses of bones form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

SINUS ACUSTICUS, Auditory canal, internal — s. Ampullaceus, Cavitas elliptica — s. Aortici, Sinuses of Valsalva—s. Arteriosus, S. pulmonalis — s. Basilar, Sinus transversus—*s. Caverneux*, Cavernous sinus — s. Cavernosi uteri, Sinus uterini—s. Cavernosus, Cavernous sinus — s. Cerebri, Ventricles of the brain—*s. Choroïdien*, S. quartus — s. Circular, of Ridley, Sinus coronarius — s. Circularis, S. coronarius — s. Communis, see Semicircular canals — *s. Coronaire du cœur*, see Cardiac veins.

SINUS CORONA'RIUS, *S. circula'ris* seu *circula'ris Ridleyi*, *Cir'cular si'nus of Rid'ley*, *Cor'-*

onary si'nus. A venous canal, which surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

Sinus, Coronary, Sinus coronarius — s. Coranary of the heart, Sinus coronary, venous.

Sinus Cor'onary, Ve'nous, *Cor'onary sinus of the heart.* A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculoventricular furrow.

Sinus Coxæ, see Cotyloid.

Sinus Dex'ter Cor'dis, *S. vena'rum cava'rum* seu *veno'sus, Sac'cus vena'rum cava'rum.* The right auricle of the heart: —*A'trium cordis dextrum.* See Auricula.

SINUS DROIT, S. quartus.

Si'nuses of the Du'ra Ma'ter, *S.* seu *Fis'tulæ* seu *Cavita'tes* seu *Ventric'uli* seu *Tu'buli* seu *Sanguidu'ctus* seu *Receptac'ula Du'ræ ma'tris,* are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies; — the *two lateral sinuses,* the *straight sinus,* and the *longitudinal sinus.* To the lateral sinuses belong, — the *petrous sinuses,* superior and inferior; the *transverse sinus;* the *cavernous sinuses;* the *coronary sinus,* and the *occipital sinuses.* To the straight sinus belongs the *inferior longitudinal.* The longitudinal sinus, properly so called, has no sinus under its dependence.

Sinus Falciformis Inferior, S. longitudinal, inferior—s. Falciformis superior, S. longitudinal, superior—s. Fourth, Torcular Herophili—s. Genæ pituitarius, Antrum of Highmore—s. of the Jugular vein, see Jugular veins — s. Lacrymalis, Lachrymal sac — s. Lactiferus, see Lactiferous vessels.

Sinuses of the Larynx, Ventricles of the larynx.

Sinuses, Lat'eral, *Si'nus transver'si, S. mag'ni, S. latera'les,* (F.) *Sinus latéraux.* Each of these sinuses, distinguished into right and left, begins at the torcular Herophili or confluence of the sinuses, and terminates at the sinus of the jugular vein.

SINUS LATÉRAUX, Sinuses, lateral.

Sinuses, Longitu'dinal, *S. Longitudina'les.* These are two in number. 1. Supe'rior Longitu'dinal Si'nus, *S. falcifor'mis supe'rior* seu *triangula'ris, Sinus médian,* (Ch.) A long, triangular canal; convex above, concave below; which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac,* at the crista galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. Infe'rior Longitu'dinal Si'nus, *S. falcifor'mis infe'rior, Ve'na fal'cis cer'ebri.* This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

Sinus Magni, Sinuses, lateral — s. Maxillary, Antrum of Highmore — *s. Médian,* Sinus longitudinal superior — s. Median, see Semicircular canals—s. Muliebris, Vagina.

Sinus, Occip'ital, *Sinus occipita'lis.* These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend — becoming broader and nearer each other — into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmering have given them the name of *posterior occipital sinuses,* to distinguish them from the transverse sinus, which they have called *anterior occipital sinus.*

Sinus Occipitalis Anterior, Sinus transversus—s. Ophthalmic, see Cavernous sinus—s. Ovatus, see Crista vestibuli — s. Perpendicularis, S. quartus—s. Pituitarii frontis, Frontal sinuses—s. Pocularis, see Ejaculatory ducts—s. Polymorphus, Cavernous sinus — s. Portarum, see Liver — s. Prostatæ, see Ejaculatory Ducts — s. Pudendi, Vagina — s. Pudoris, Vagina, Vulva — s. Pulmonales, Sinuses of Valsalva.

Sinus Pulmona'lis, *S. sinis'ter cor'dis* seu *vena'rum pulmona'lium* seu *arterio'sus, Sac'cus vena'rum pulmona'lium, A'trium cor'dis sinis'trum.* The left auricle of the heart. See Auricula.

Sinus of the Pulmonary Veins, Auricle, left.

Sinus Quar'tus, *S. perpendicula'ris, Straight si'nus,* (F.) *Sinus choroïdien* (Ch.), *Sinus droit.* This sinus — triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards — passes along the base of the falx cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *venæ Galeni,* the superior cerebellous veins, &c.

Sinus Renum, Pelvis of the kidney—s. Rhomboideus, see Ventricles of the brain—s. Rotundus, see Crista vestibuli—s. of Santorini, Bulbus vestibuli, and Cavernous body of the vagina — s. of the Septum lucidum, Ventricle, fifth — s. Sinister cordis, S. pulmonalis—s. Sphenoidalis, Cavernous sinus, see Sphenoid bone—s. Straight, S. quartus —s. Superciliares, Frontal sinuses—s. Terminalis, Circulus venosus—s. Transversi, Sinuses, lateral.

Sinus Transver'sus, *S. occipita'lis ante'rior, Bas'ilar si'nus.* This sinus lies transversely at the anterior part of the basilary process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side, and those of the other. Its breadth is commonly very great. It is situate between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

Sinus Triangularis, S. longitudinal, superior —s. Urogenitalis, Urogenital sinus.

Sinus Uteri'ni, *S. caverno'si U'teri, U'terine sinuses.* A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

Sinus Utriculosus, see Semicircular canals — *s. des Vaisseaux séminif ères,* Corpus Highmori.

Si'nuses of Valsal'va, *Sinus Valsal'væ,* are three depressions in the aorta—*Si'nus aor'tici,*— and pulmonary artery—*Si'nus pulmona'les*—immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the refluent blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large si'nus of Valsal'va.*

Sinus of the Vena Cava, Auricle, right — s. Venarum cavarum, S. dexter cordis—s. Venarum pulmonalium, S. pulmonalis—s. Venosus, S. dexter cordis.

Sinuses, Ver'tebral, (F.) *Sinus vertébraux.* Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebræ, before the dura mater, and at the sides of the posterior vertebral ligament. At their in-

ner side they communicate with each other by means of branches, which form true *transverse sinuses*. They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebræ. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

SINUS VULVÆ. Rima vulvæ.

SIPEERI, Bebeeru.

SIPEERINE, see Bebeeru.

SIPHAC, Peritoneum.

SIPHILIS, Syphilis.

SIPHITA, Somnambulism—s. Prava, Chorea.

SIPHO, Siphon—s. Auricularis, Otenchytes—s. Urinæ, Diabetes.

SI'PHON, *Si'pho*, (σιφων, 'a tube.') A bent tube, whose limbs are of unequal length, employed in pharmacy for transferring liquids from one vessel to another. With this view, the shorter limb is plunged into the liquid; and air is sucked from the extremity of the longer limb. The pressure of the atmosphere forces the fluid through the tube; and the flow will continue as long as the extremity of the longer limb is below the level of the fluid in which the shorter limb is immersed.

An exhausting syringe is, at times, attached to the longer extremity of the siphon, by means of which the air can be drawn from it.

SIPHON, PLUNG''ING. An instrument used in pharmacy for obtaining a specimen,—at times, a measured specimen,—of any liquid. With this view, the instrument is immersed into the liquid, and allowed to remain there until full. The opening at the top is then closed with the thumb; and the contents, thus removed, are allowed to flow out by removing the thumb and permitting the entrance of air. It is a form of the *pipette*.

SIPHONIA CAHUCHU, (from σιφων, 'a tube,' from the use made of it,) see Caoutchouc — s. Elastica, see Caoutchouc.

SIPHONO'MA, *Syphono'ma*, (F.) *Tumeur tubuleuse*, (from σιφων, 'a tube.') A tumor of fibrous appearance and composed of parallel or intersecting tubes.—(Henle.)

SIPHUNCULUS, (dim. of σιφων, 'a tube,') Syringe.

SIRA, Orpiment.

SIRENS, Symmeles.

SIRIASIS, (σιριασις, a disease supposed to be produced by *Sirius*,, 'the dog star' or by the sun.) *Coup de Soleil*, Insolation, Phrenitis — s. Ægyptiaca, *Coup de Soleil*.

SIRIUM MYRTIFOLIUM, Santalum album.

SIRIUS, (σειριος,) Canicula.

SIROP, Syrop.

SIRUP, Syrup.

SI'SON AM'MI, (σισων,) *Æthu'sa am'mi, Cnid'ium tenuifo'lium, Pimpinella laterifo'lia, Ses'eli fœniculifo'lium*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The plant that affords the *Am'mi vc'rum* of the shops; (F.) *Ammi des Boutiques*. The seeds—*Semen Am'mios cret'ici* seu *ve'ri*—were once used as a carminative.

SISON AMO'MUM, (F.) *Amome faux*, is considered to be excitant and diuretic. It is the *field honewort*.

SISON ANISUM, Pimpinella anisum — s. Podagraria, Ligusticum podagraria.

SISTENS, (*sistere*, 'to still,') Epischetieus.

SISYMBRIUM ALLIARIA, (σισυμβριον,) Alliaria—s. Barbarea, Erysimum barbarea—s. Erucastrum, Brassica eruca — s. Menthastrum, Mentha aquatica.

SISYM'BRIUM NASTUR'TIUM, *Nastur'tium aquat'icum* seu *officina'lē*, *La'ver odora'tum*, *Cratevæ'sium*, *Cres'si*, *Cardam'inē fonta'na* seu *nastur'tium*, *Wa'tercress*, (F.) *Cresson de fontaine*. *Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. Watercresses are commonly used in salad. They have obtained a place in the materia medica for their antiscorbutic qualities.

SISYMBRIUM OFFICINALE, Erysimum — s. Parviflorum, S. sophia.

SISYMBRIUM SO'PHIA, *S. parviflo'rum, Herb So'phia, So'phia Chirurgo'rum, Flix* or *Flux-weed*, (F.) *Sagesse des Chirurgiens*. It was once reputed to be anthelmintic, and valuable in hysterical affections. It is not used.

Other species of *Nasturtium*, as N. PALUS'TRĒ, *Marsh watercress*; and N. AMPHIB'IUM, *Water-radish*, possess similar virtues with Nasturtium officinale.

SISYRIN'CHIUM BERMUDIA'NUM, (σισυρυγχιον,) *Blue'eyed Lil'y, Phys'ic* or *Sear'vy grass*; indigenous; *Order*, Iridaceæ; flowering from June to August. Used as a cathartic by the Thomsonians. A decoction of the root is acrid and cathartic.

SITFAST, see Furunculus.

SITHE, 'sigh,' Suspirium.

SITICULOSUS, (from *sitis*,) Dipsodes, see Alterative.

SITIENS, (*sitio*, 'to thirst,') Dipsodes.

SITIS, Thirst—s. Intensa, Polydipsia—s. Morbosa, Polydipsia.

SITKA, MIN'ERAL WA'TERS OF. See Archangel, New, mineral waters of.

SITOPHO'BIA, (σιτος, 'food,' and φοβος, 'dread,') Intense dread of food.

SITOS, (σιτος,) Aliment.

SITUS ALIENUS, 'a foreign position,' Ectopia—s. Anomalus seu perversus intestinorum, Splanchnectopia — s. Mutatus, Ectopia, see Monster — s. Perversus, Ectopia.

SITZBATH, 'a seat bath,' see Bath, half.

SI'UM, (σιον,) *S. nodiflo'rum* seu *angustifo'lium* seu *Ber'ula* seu *erec'tum* seu. *inci'sum*, *A'pium si'um*, *Helioscia'dium nodiflo'rum*, *Ber'ula angustifo'lia*, *Ber'ula*, *Creep'ing Wa'terparsnep*, (F.) *Berle nodiflore*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

SIUM ANGUSTIFOLIUM, S. nodiflorum—s. Apium, Apium graveolens — s. Berula, S. nodiflorum — s. Bulbocastanum, Bunium bulbocastanum—s. Carvi, Carum—s. Erectum, S. nodiflorum—s. Graveolens, Apium graveolens—s. Incisum, S. nodiflorum.

SIUM LATIFO'LIUM is the common *Water parsnep* of the United States. It is said to be poisonous.

SIUM LUNA'RĒ. The root is eaten by the Chepewyans. It has an agreeable nutty flavour. By the Canadians, it is called *Queue de Rat*. The poisonous roots of Cicuta virosa, C. maculata, and C. bulbifera, according to Sir J. Richardson, are often mistaken for it.

SIUM NIN'SI. The plant whose root is called *Ru'dix Nin'si, Nin'zin, Nind'sin*. This root was long supposed to be the same as ginseng, and it possesses similar, though weaker, properties. See Panax schinseng.

SIUM NODIFLORUM, Sium — s. Silaus, Peucedanum silaus.

SIUM SIS'ARUM, *Skir'ret*, (F.) *Chervi, Girole*, is used as a salad in Europe; and has been thought a useful diet in chest affections.

SIUM VULGARE, Ligusticum podagraria.

SIVVEN, (Gael.) Rubus idæus.

SIVVENS, Sibbens.

SIZY,(W. *Syth*, 'glue,')see Corium phlogisticum.

SKAW, Scall.

SKEELY, (from [G.] s c h e e l e n, 'to squint,') Strabismus.

SKELETEUMA, Sceleteuma.

SKELETEUSIS, Mummification, Sceleteusis.

SKELETIA, (σκελετεια,) Emaciation.

SKELETOG'RAPHY, *Skeletograph'ia, Sceletog'raphy, Sceletograph'ia,* (*skeleton,* and γραφη, 'a description.') A description of the skeleton.

SKELETOL'OGY, *Skeletolog''ia, Sceletol'ogy, Sceletolog''ia,* (F.) *Squelettologie,* (*skeleton,* and λογος, 'a discourse.') A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology,* and *Syndesmology.*

SKEL'ETON, *Scel'etum, Scel'eton, Cada'ver exsicca'tum;* (Old Eng. and Prov.) *At'omy, Anat'omy,* (Sc.) *Spuig,* (F.) *Squelette, Charpente osseuse:* (σκελετος, 'dried up,' from σκελλω, 'I dry.') A dried body. The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not always be formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external, Ex'oskeleton, Derm'oskeleton.* In others, as in birds, the mammalia, &c., it is *internal, En'doskeleton, Neur'oskeleton,* (F.) *Endo-squelette.* It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural, Scel'etum natura'lē;* when articulated by means of wires, *artificial* or *articulated, Scel'etum artificia'lē.*

SKELETOPŒ'IÀ, *Sceletopœ'a, Sceleteu'sis,* (*skeleton,* and ποιεω, 'I make.') The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes; the different cavities formed by their union; and to demonstrate their connexions, relations, modes of union, &c.

SKELLIE, Sinapis arvensis, Strabismus.

SKELLOCH, Sinapis arvensis.

SKERLJEVO, Scherlievo.

SKEVISCH, (from *Scabious,* [?]) Erigeron Philadelphicum.

SKEVISH, FLEABANE, Erigeron Philadelphicum.

SKEWSIGHT, 'oblique sight,' Dysopia lateralis.

SKIN, ([Sax.] ꝛcin,) Cutis.

SKINBIND, Induration of the cellular tissue.

SKINBOUND DISEASE, Induration of the cellular tissue.

SKIN, BRONZED, see Capsule, renal—s. Scarf, Epidermis.

SKINTIGHT, Induration of the cellular tissue.

SKIOMACHIA, Sciomachy.

SKIRRE, Scirrhus.

SKIRRET, Sium sisarum.

SKIRRHUS, Scirrhus.

SKITTER, (from [Sax.] ꝛcitan, 'to throw out,') Diarrhœa.

SKOKE, Phytolacca decandra.

SKOLEMORA FERNAMBUCENSIS, (σκωληξ, 'a worm,' and μωρωω, 'to stupefy,') Geoffræa vermifuga.

SKOLIOSIS, Scoliosis.

SKUESIGHT, 'oblique sight,' Dysopia lateralis.

SKULL, (Dan. *skal,*) Cranium.

SKULLCAP, Calva, Calvaria, Scutellaria galericulata—s. Cap, maddog, Scutellaria laterifolia.

SKUNKCABBAGE, (from having a strong and offensive odour like that of the skunk,) Dracontium fœtidum.

SKUNKWEED, Dracontium fœtidum.

SLAB, Torticollis.

SLABBERING, Slavering.

SLATE, IRISH, Hibernicus lapis

SLATERS, Onisci aselli.

SLATKAIA TRAVA, see Spirit.

SLAV'ERING, *Slab'bering, Slob'bering, Driv'elling,* (Old E.) *Pirt'ling,* (from *saliva.*) *Ptyalis'mus in'ers,* (F.) *Bave.* Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, (Sax. ꝛlep,) *Som'nus, Somp'nus, So'por, Dormit''io, Hyp'nos,* (F.) *Sommeil.* Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *Awa'king,* (F.) *Évigilation, Réveil.* Sometimes this is progressive and natural; at others, sudden and starting; (F.) *Réveil en sursaut,*—as in nightmare, affections of the heart, hypochondriasis, &c.

SLEEP, MAGNET'IC, *Hypno'sis biomagnet'ica,* is the sleep induced by the so-called animal magnetism. See Magnetism, animal.

SLEEP, NERVOUS, see Magnetism, animal.

SLEEP, WINTER, Hibernation.

SLEEPLESSNESS, Insomnia.

SLEEPWALKING, Somnambulism.

SLIACS, MIN'ERAL WA'TERS OF. Sliacs is a favourite bathing-place in Hungary, a few miles from Neusohl. Some of the waters are cold; others, thermal: the former are carbonated chalybeates; the latter are much used in the same cases as thermal springs in general.

SLIDING OF THE FLAP, see Flap.

SLIEVEFISH, Sepia.

SLING, ([G.] Schlinge,) *Mitel'la, Mit'rium,* (F.) *Écharpe.* A bandage employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes* or *Slings;* as the *Grande écharpe, Écharpe moyenne, Petite écharpe, Écharpe de* J. L. Petit, &c.

SLIPPERS, Impatiens.

SLIT AND TAIL BANDAGE, Invaginated bandage.

SLOBBERING, Slavering.

SLOE, ([Sax.] ꝛla,) Viburnum prunifolium.

SLOETREE, Prunus spinosa.

SLOKE, GREEN, Ulva latissima.

SLOPS, *Slop diet.* (Slop is, probably, the past participle of *slip.*) Liquid food, which is largely watery, and contains little that is nutritious.

SLOUGH, ([Sax.] ꝛloȝ,) Eschar.

SLOVEN WOOD, Artemisia abrotanum.

SLOWS, Milksickness.

SLUG, (D. *slak,*) Limax—s. Sea. *Biche de Mer.*

SLUMBER, ([Sax.], ꝛlumerian, 'to slumber,') Somnolency.

SMALLAGE, Apium graveolens.

SMALLPOX, Variola—s. Modified, Varioloid.

SMALT, ([G.] Schmalte,) *Protoxide of Cobalt, Smal'tum, Safre, Zaffre, A'zur, Blue Starch.* This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

SMARAG'DUS, (σμαραγδος,) (F.) *Émeraude.* The emerald. It was formerly regarded as a tonic.

SMARTWEED, Polygonum hydropiper, P. punctatum.

SMEARCASE, see Cheese.

SMECTICA, (σμηκτικος, 'cleansing,') Detergents.

SMECTIS, (σμηκτις,) Cimolia terra.

SMECTRIS, (σμηκτριs,) Cimolia terra.

SMEGMA, gen. *Smeg'matis,* (σμηγμα, gen. σμηγματος, from σμηχειν, 'to wipe, to cleanse.') Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.

Smegma Articulare, Synovia — s. Cutaneum, see Sebaceous glands.

Smegma Præpu'tii, *Se'bum præputia'lē*. The fatty secretion from the sebaceous follicles of the glans penis.

SMEGMATORRHŒA, (*smegma*, and *ῥεω*, 'to flow,') Stearrhœa.

SMEGMORRHŒA, Stearrhœa.

SMELL, SENSE OF, Olfaction.

SMELLING, Olfaction.

SMELLOME'S OINTMENT FOR THE EYES, Ceratum resinæ.

SMILACI'NA RACEMO'SA, (from *smilax*,) *False Spikenard*; indigenous; *Ord.* Liliaceæ; is said to be alterative, diuretic and diaphoretic.

SMILAX, gen. *Smi'lacis*, (*σμιλαξ*,) Taxus baccata—s. Aspera Chinensis, Smilax China—s. Aspera Peruviana, Smilax sarsaparilla—s. Canellæfolia, S. pseudochina.

Smilax Chi'na, *S. as'pera Chinen'sis*. *Ord.* Smilaceæ. *Sex. Syst.* Dioecia Hexandria. The root; *China*, *Ch. orienta'lis* seu *pondero'sa* seu *ve'ra*, *Sankira*, *Ganquava*, *Chi'na root*, (F.) *Squine*, *Esquine*, *Racine de Chine*. Formerly much used in cutaneous and venereal affections.

Smilax Glauca; indigenous; has similar virtues to those of Sarsaparilla.

Smilax Hederæfolia, S. pseudochina — s. Indica Spinosa, Smilax pseudochina—s. Officinalis, Smilax sarsaparilla.

Smilax Pseudochi'na, *S. In'dica spino'sa* seu *canellæfo'lia* seu *hederæfo'lia*, *Chi'na occidenta'lis* seu *spu'ria nodo'sa*, *Amer'ican* or *West India China*. In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

Smilax Sarsaparil'la, *S. officina'lis*, *Sarsaparil'la*, *Sartaparil'la*, *Smi'lax as'pera Peruvia'na*, *Sar'za*, *Sar'sa*, *Carivillan'di*, *Fva Pecan'ga*, *Mucaput'li*, *Zar'za*, *Zarzoparil'la*, (F.) *Salsepareille*. The root of this and other species of Smilax, *Sarsaparilla*, (Ph. U. S.), is inodorous; taste bitterish, feculaceous, and fibrous; of a dark colour externally; white within. It is possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulcerations, &c., continue. It has, also, been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of it, a matter of doubt. Dose, ℈j to ℥j of the powder.

It is obtained from Honduras, Brazil, and Peru —the varieties being called respectively, *Honduras*, (F.) *Salsepareille de Honduras*; *Brazil*, (F.) *S. de Brésil* ou *de Portugal*, and *Peruvian Sarsaparilla*, (F.) *S. de Pérou* ou *caraque*.

Smilax Tamnoïdes; indigenous; has similar properties.

SMILE, (*σμιλη.*) A curved, two-edged bistoury. A knife.

SMILION, (*σμιλιον*, dim. of *smile*,) Scalpel.

SMIT, (participle of *smite*,) Contagion.

SMITTLE, see Contagious.

SMYRNA, (*σμυρνα*,) Myrrha.

SMYRNISMUS, (from *smyrna*,) Embalming.

SMYR'NIUM OLUSA'TRUM, *Smyr'nium*, (from *smyrna*; the odour of the seeds resembling that of myrrh;) *Hipposeli'num*, *Macero'na*, *Macedonis'ium*, *Her'ba Alexandri'na*, *Gri'elum*, *Agrioseli'num*, *Alexan'ders*. *Alsan'ders*. A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

SNAG. A tooth standing alone or projecting beyond the others.

SNAGGLETEETH, Odontoparallaxis.

SNAGREL, Aristolochia serpentaria.

SNAIL, ([Sax.] ꝑnæġl,) Limax — s. Shell, Cochlea.

SNAKEHEAD, Chelone glabra.

SNAKE, HOODED, *Cobra di Capello* — s. Spectacled, *Cobra di Capello*.

SNAKEROOT, Garuleum bipinnatum—s Birthwort, Aristolochia serpentaria — s. Black, Actæa racemosa, Sanicula Marilandica—s. Button, Eryngium aquaticum, Liatris spicata—s. Canada, Asarum Canadense—s. Dewitt, Prenanthes—s. Evergreen, Polygala paucifolia — s. Heart, Asarum Canadense—s. Virginiana, Aristolochia serpentaria—s. White, Eupatorium ageratoides.

SNAKEWEED, Aristolochia serpentaria, Helenium autumnale, Polygonum bistorta—s. American, Cicuta maculata.

SNAPS, Phaseolus.

SNEEZEWORT, Achillea ptarmica, Helenium autumnale.

SNEEZ'ING, (Sax. nieꝛan, [G.] niesen, 'to sneeze,' an example of onomatopœia,) *Clo'nus Sternuta'tio*, *Sternuta'tio*, *Sternutamen'tum*, *Sternumen'tum*, *Ptar'mus*, (Sc.) *Nees'ing*, (F.) *Éternuement*. A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies which adhere to the pituitary membrane, and have occasioned the movement.

SNIRRELS, Nares.

SNOB, Nasal mucus.

SNO'RING, *Snore*, ([Sax.] ꝑnoꝛa,) *Rhen'chus*, *Ren'chus*, *Rhenx'is*, *Ron'chus*, *Rhon'chus*, *Ster'tor*, (Sc.) *Rowt'ing*, (F.) *Ronflement*. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest — in some cases of pulmonary catarrh — a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.

SNOT, Nasal mucus.

SNOTH, Nasal mucus.

SNOUT, ([D.] *snuit*,) Nasus.

SNOW, (Sax. ꝑnaꝑ,) *Nix*, *Chi'on*, (F.) *Neige*. Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.

SNOWBALL, Cephalanthus occidentalis.

SNOWBERRY, Symphoricarpus racemosus.

SNOW BLINDNESS, *Niphablep'sia*. Blindness produced by the reflection of the solar light from snow. As a preventive, *Snow Eyes* are used by the Esquimaux. These are made of extremely light wood, with a bridge resting on the nose like spectacles, and a narrow slit for the passage of the light.

SNOWDROP TREE, Chionanthus Virginica.

SNOW EYES, see Snow blindness.

SNUFF, CEPHALIC, ([D.] *snuif*,) Pulvis asari compositus.

SNUF'FLES, ([D.] *snuffelen*, 'to breathe hard through the nose,' probably an example of onomatopœia,) *Grave'do neonato'rum*, *Rhinan'gia*, *Rhinanch'onē*. Breathing hard through the nose, often owing to accumulation of the mucous secretions, — an affection to which infants are liable, and which is relieved by oiling the interior of the nostrils.

SNURLE, Coryza.

SNURLES, Nares.

SOAP, ([Sax.] ꝑape,) Sapo—s. Acid, see Sapo.

Soap Berries, Sapindus saponaria.

Soap, Black, see Sapo—s. Castile, Sapo durus.

Soap of the Cocoa-nut Oil, see Sapo.

Soap, Common or Soft, see Sapo — s. Liquid, see Sapo — s. Medicinal, see Sapo — s. Spanish, Sapo durus—s. Starkey's, see Sapo—s. Yellow, see Sapo.

SOAPWORT, Saponaria.

SOB, *Singult'us*, ([Sax.] seopian, 'to grieve,' probably an example of onomatopœia;) (F.) *Sanglot.* A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBBY, Corpulent.

SOBOLES, 'offspring,' Epigone.

SOBRIETAS, Temperance.

SOCIA PAROTIDIS, 'companion of the parotid,' see Parotid.

SOCI'ETY, *Soci'etas*, (F.) *Société*, (*socius*, 'a companion.') An association for the promotion of some common object.

Soci'eties, Med'ical. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the States, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the States, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations that have issued from time to time useful transactions or publications are the following: In America,—The *Massachusetts Medical Society*; the *Physico-medical*, and *Medical Societies of the State of New York*; the *College of Physicians* and the *Pathological Society of Philadelphia*, and the *American Medical Association*. In Europe,—The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland*; the *Medicochirurgical* and *Phrenological Societies of Edinburgh*; the *College of Physicians*, the *Medicochirurgical*, the *Medical*, the *Sydenham*, *New Sydenham*, the *Pathological*, the *Epidemiological*, and *Obstetrical Societies* of London; the *Associated Apothecaries* and *Surgeon Apothecaries of England and Wales*, and the *Provincial Medical and Surgical Association*; the *Royal Academy of Surgery*, the *Royal Society of Medicine*, the *Société Médicale d'Emulation*, the *Société de Médecine*, the *Royal Academy of Medicine*, the *Société Médicale d'Observation*, and the *Société de Biologie*, of Paris; the *Medicochirurgical Academy of Vienna*; the *Medical Societies of Berlin and Copenhagen*, &c., &c. In Asia,—The *Medical and Physical Society of Calcutta*.

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society*; the *Royal Societies of London, Edinburgh, Göttingen*, &c.; the *Imperial Academy of Sciences of Paris*; the *Imperial Society of Sciences of St. Petersburg and Vienna*; the *Royal Academy of Sciences of Turin*; the *Academia Imperialis Leopoldina Naturæ Curiosorum*, &c.

SOCORDIA, (*socors*, gen. *socordis*, from *se*, 'separation,' and *cor*, gen. *cordis*, 'heart,') 'without intellect,' Hallucination.

SO'DA. (An Arabic word,) (F.) *Soude, Protox'ide of sodium*, is obtained by adding *caustic lime* to a solution of *carbonate of soda*. The soda in solution may be obtained by evaporation as hydrate of soda. Its action is like that of potassa; but it is not officinal.

Soda impu'ra, Baril'la, Barig'lia, Baril'lor, So'da Hispan'ica, Ana'tron, Na'tron, Ana'ton, Ni'trum Antiquo'rum, Kelp, Aphroni'trum, Sal alkali'nus fix'us fos'silis, Carbo'nas So'dæ impu'rus, Subcarbo'nas So'dæim pu'ra, Ana'chron; the *mineral alkali* is obtained from several sources:—naturally, in Egypt; artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast;—as the *Sal'sola sati'va, S. soda, S. tragus, Salicor'nia herba'cea, Salicornia Arab'ica*, &c. The *Barilla ashes* are from the ashes of the *Salicor'nia Europæ'a*;—the *Kelp, Soude de Varecq*, from the *Fucus vesiculo'sus* and other varieties;—the *Turkey Barilla, Roquette, Cendre du Levant, Rochet'ta Alexandri'na*, from the *Mesembryan'themum Cop'ticum*;—the *Al'icant Barilla, Soda Alicanti'na* seu *Alonen'sis*, from the *Mesembryan'themum nodiflo'rum*;—and the *Carthage'na Barilla*, from the *Salicor'nia and Sal'sola*.

Impure subcarbonate of soda, (F.) *Soude du commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

Soda, Cardialgia, Cephalalgia, Pyrosis.

Soda Aceta'ta, *Sodæ Ace'tas, Ac''etate of Soda, Terra foliata minera'lis*, (F.) *Acétate de soude*. This salt is used in similar cases with the acetate of potass.

Soda Aërata, Sodæ carbonas — s. Alonensis, Soda — s. Biborate of, Borax — s. Bicarbonate of, Sodæ carbonas—s. Bilate of, Picromel—s. Borate of, Borax—s. Boraxata, Borax.

Soda, Car'bonate of, *Sodæ Carbo'nas* seu *Bicarbo'nas, Carbo'nas Na'tricum, So'da Aëra'ta, Carbonate* or *Bicarbonate of Soda, Carbonate of protox'ide of So'dium*, (F.) *Carbonate de Soude, S. effervescente* ou *aérée* ou *crayeuse*. (*Sodæ subcarb.* ℔j, *Aquæ destill.* Oiij. Dissolve the subcarbonato of soda, and pass carbonic acid through the solution; set it aside to crystallize.) Its use is the same as the subcarbonate, than which it is less caustic, and better adapted for effervescing draughts.

Soda Caus'tica, *Protox'ide of So'dium, Caus'tic Soda*, (F.) *Soude caustique, S. à la Chaux, Soude pure*. (The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid.) It may be used as a caustic like the *Potassa fusa*, and is even preferable to it, as it does not deliquesce and run.

Soda, Chlo'ride of, *S. Chlorina'ta, So'dæ Chlo'ridum* seu *Chlorure'tum, Chlo'rinated Soda, Natrum Oxymuriat'icum, Oxymu'riate of Soda*, (F.) *Chlorure de Soude, Chlorure d'oxide de Sodium*. This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See Liquor Sodæ Chlorinatæ.

Soda, Chlorinated, Soda, chloride of—s. Hispanica, see Soda — s. Hydrochlorate of, Soda, muriate of — s. Hypophosphite of, see Calcis hypophosphis.

Soda, Hyposul'phite of, *Sodæ hyposul'phis*, (F.) *Hyposulfite de Soude*. This salt has been absurdly over extolled in chronic cutaneous, and scrofulous affections, and especially in tuberculosis of the lungs. Dose, gr. x and more. It is given in syrup.

Soda Impura, see Soda.

Soda, Lithate of, Urate of Soda — s. Mephite of, Soda, subcarbonate of.

Soda, Mu'riate of, *S. muria'ta* seu *muriat'ica, Al'kali minera'lē sali'num, So'dæ mu'rias, Sal commu'nis* seu *culina'ris* seu *fon'tium* seu *gem'mæ* seu *mari'nus* seu *al'bus* seu *fos'silis* seu *lu'cidum, Mu'ria, Na'tron muria'tum, Na'trum muriat'icum, Hydrochlo'rinas Na'tricus, Chlorure'tum So'dii, So'dii Chlo'ridum, Com'mon salt, Seasalt, Rock salt, Baysalt, White salt, Quadrichlo'ruret of So'dium, Hydrochlo'rate of protox'ide of So'dium, Hydrochlo'rate of Soda, Chlo'ride of So'dium*, (F.) *Chlorure de Sodium, Sel marin, Sel de Cuisine*. In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anthelmintic. Externally, stimulant. It is a well-known and useful

culinary substance. It has been greatly recommended as an antiperiodic in the dose of ℥ss or ʒi.

Sodæ, Ni'trate of, *So'dæ Ni'tras* seu *Azo'tas, Na'tron* seu *Na'trum ni'tricum, Ni'tras na'tricus, Al'kali minera'lē nitra'tum, Ni'trum Rhomboïda'lē* seu *cu'bicum, Ni'tras Na'tricum, Salpe'tra, Ni'trate of protox'ide of So'dium, Protoni'trate of Sodium, Cu'bic Ni'tre.* Occurs, native, in Peru; but may be made by neutralizing *carbonate of soda* by *nitric acid*, evaporating and crystallizing.

Its virtues are similar to those of the nitrate of potassa, for which it has been substituted.

Sodæ, Ni'trite of. (Made by heating a mixture of *nitrate of soda* and *charcoal* in a crucible to dull redness. When the salt has become white, raise the heat to melt it; pour it on a clean flag stone; break it into fragments, and preserve in a stoppered bottle.)

Used in the preparation of the Spiritus Ætheris Nitrosi of the British Pharmacopœia, (1864.)

Sodæ, Oxymuriate of, Soda, chloride of.

Sodæ, Phosphate of, *S. Phosphora'ta, Sodæ phos'phas, Phosphas Na'tricum, Natrum Oxphosphoro'des, Sal mirab'ilē perla'tum, Alkali minera'lē phosphora'tum, Subphos'phate of protox'ide of So'dium, Subprotophosphate of So'dium, Subphos'phate of Soda, Tribu'sic phosphate of Soda, Taste'less purg'ing salt,* (F.) *Phosphate de Soude, Sel admirable perlé.* (*Bone* burnt to whiteness and powdered, ℔x; *Sulphuric acid*, ℔vj; *Carbonate of soda*, q. s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gallon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized; then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle.—Ph. U. S.) Cathartic, in the dose of from ℥ss to ʒj.

Sodæ, Phosphate of, tribasic, S. Phosphate of.

Sodæ Powders, see Powders, Soda—s. Springs, see Water. Mineral (gaseous).

Sodæ, Subcarb'onate of, *Sodæ Subcarbo'nas, S. Carbo'nas* (Ph. U. S.), *Na'tron præpara'tum, Sal Sodæ, S. al'kali, Flos Salis, Sagi'men Vi'tri, Salt of Soda* or *of Baril'la, Subcar'bonate of protox'ide of So'dium, Mephi'te of Soda,* (F.) *Sous-carbonate de Soude.* The impure carbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and also as a 'deobstruent' in scrofulous and other affections. Dose, gr. x to ℥ss.

The *dried Subcar'bonate of Soda, Sodæ Subcarbo'nas exsicca'ta, Sodæ carbo'nas exsicca'ta, Carbo'nas Sodæ sicca'tum,* (F.) *Sous-carbonate de Soude desséché,* is employed as an antacid and lithontriptic. Dose, gr. x to xv.

Sodæ, Subphosphate of, S. phosphate of.

Sodæ, Sul'phate of, *Sodæ Sul'phas, Na'tron vitriola'tum, Sal cathar'ticus* seu *mirab'ilis Glauberi, Al'cali minera'lē sulphu'ricum, Na'trum sulphu'ricum, Soda vitriola'ta, Sul'phas na'tricus, Ape'rient Salt of Fred'erick, Glau'ber's Salt,* (F.) *Sulfate de Soude.* (Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda.) It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose, ʒvj to ʒx.

The *Lym'ington Glau'ber's Salts* is a *Sulphate of Magnesia and Soda*, and is obtained from the mother liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

Sodæ, Tartrate of, *Tar'trate of pot'ass and Soda, Tar'tarised Soda, Rochelle'* or *Seignette's Salt, Soda Tartariza'ta, Sal Rupellen'sis* seu *Seignet'ti* seu *Polychres'tum Seignetti, Na'tron tartariza'tum, Tar'tris potas'sæ et Sodæ, Sodæ et Potas'sæ Tar'tras* (Ph. U. S. 1851,) *Potassæ et Sodæ tartras,* (Ph. U. S. 1863), *Sodæ potas'siotartras, Tartras Potas'sæ et Sodæ,* (F.) *Tartrate de potasse et de Soude.* (*Sodæ carb.* ℔i; *Potass. bitart.* in pulv. ℥xvj, *Aq. bullient.* Ov. Dissolve the carbonate in water; and add, gradually, the bitartrate. Filter the solution and crystallize.—Ph. U. S.) It is a gentle cathartic. Dose, ℥ss to ʒj.

Sodæ, Urate of, Urate of Soda—s. Valerianate of, Sodæ valerianas—s. Vitriolata, S. sulphate of.

Soda Water, Acidulous water, simple.

Soda and Silver, Hyposulphite of, Sodæ et Argenti Hyposulphis.

Sodæ Acetas, Soda, acetate of—s. Arsenias, Arseniate of soda—s. Azotas, Soda, nitrate of—s. Biboras, Borax—s. Bicarbonas, Soda, carbonate of—s. Boras, Borax—s. Boras alcalescens, Borax—s. Boras supersaturus, Borax—s. Carbonas, Soda, subcarbonate of—s. Carbonas exsiccatus, see Soda, subcarbonate of—s. Carbonas impurus, Soda—s. Chloras, Soda, chlorate of—s. Hyposulphis, Hyposulphite of soda—s. Murias, Soda, muriate of—s. Nitras, Soda, nitrate of—s. Phosphas, Soda, phosphate of—s. Potassiotartras, Soda, tartrate of—s. Subboras, Borax—s. Subcarbonas impura, Soda.

Sodæ Sul'phis, *Sul'phite of soda,* may be made by passing a stream of *sulphurous acid gas* into a strong solution of *carbonate of soda*, digesting the solution with *sulphur* at a gentle heat for several days, evaporating, and crystallizing.

Sodæ Valeria'nas, *Vale'rianate of soda,* is admitted into the Pharmacopœia of the United States for 1863. It is chiefly employed for obtaining the other valerianates.

Sodæ et Argenti Hyposul'phis, *Hyposul'phite of so'da and sil'ver,* (F.) *Hyposulphite de Soude et d'Argent.* (This salt is formed by pouring a solution of *hyposulphite of soda* over *oxide of silver* recently precipitated by *potassa*, until the oxide is entirely dissolved. Crystals are afforded by evaporation.) A solution of it is used in the same cases as one of the nitrate of silver.

Sodæ et Potassæ tartras, Soda, tartrate of.

Sodii Auroterchloridum, see Gold—s. Chloridum, Soda, muriate of—s. Chloruretum. Soda, muriate of.

Sodii Io'didum, *Iodide of sodium.* This salt has been prescribed in the same cases as the iodide of potassium.

So'dium, *Na'trium, Natro'nium,* (from *soda.*) The metallic basis of soda.

Sodium, Carbonate of Protoxide of, Sodæ carbonas—s. Chloride of, Soda, muriate of—*s. Chlorure de*, Soda, muriate of—*s. Chlorure d'oxide de*, Soda, chloride of—s. Protonitrate of, Soda, nitrate of—s. Protoxide of, Soda—s. Protoxide of, hydrochlorate of, Soda, muriate of—s. Protoxide of, nitrate of, Soda, nitrate of—s. Protoxide of, phosphate of, Soda, phosphate of—s. Protoxide of, subcarbonate of, Soda, subcarbonate of—s. Quadrichloruret of, Soda, muriate of—s. Subborate of protoxide of, Borax—s. Subprotoborate of, Borax—s. Subprotophosphate of, Soda, phosphate of.

SODOMA GALLORUM, (*Sodom*, and Galli, 'the French,') Syphilis.

SODOMIA, (from *Sodom*, 'the sin of Sodom,') Buggery.

SODOMY, Buggery.

SOFTENING, (from [Sax.] ȝopc,) Mollities.

SOI-POUR-SOI, 'self for self,' Homœozygy.

SOIE, (originally from [L.] *seta*, 'a bristle,' [?]), Sericum.

SOIF, (from [L.] *sitis*,) Thirst—*s. Excessive*, Polydipsia.

SOL, 'the sun,' Gold.

SOLAIRE, Solar.

SOLLU'NAR, *Solluna'ris*; (*sol*, 'the sun,' and *luna*, 'the moon.') An epithet applied to a fancied influence exerted by the sun and moon on man in a state of health and disease.

SOLAMEN INTESTINORUM, (from *solor*, 'to comfort,') Pimpinella anisum—s. Scabiosorum, Fumaria.

SOL'ANOID, *Solanoï'des*, (*solanum*, 'the potato,' and *εἶδος*, 'resemblance.') Resembling a potato; potato-like. An epithet applied to a form of cancer, which appears to be intermediate between scirrhus and encephaloid, increasing more rapidly than the former, yet approaching it in firmness.

SOLA'NUM, (from *solor*, 'to soothe,' [?]) *S. ni'grum* seu *vulga'rē* seu *vulga'tum*, *Com'mon* or *Gar'den Night'shade*, (F.) *Morelle à fruit noir. Family*, Solanaceæ. *Sex. Syst.* Pentandria Monogynia. A narcotic poison. The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

SOLANUM CAROLINEN'SĒ, *Horse nettle*; indigenous. The juice of the berries is said to have been employed successfully in idiopathic tetanus. [?]

SOLANUM DULCAMA'RA, *S. scan'dens* seu *ligno'sum*, *Dulcama'ra*, *D. flexuo'sa*, *Glycipi'cros*, *Ama'ra dul'cis*, Στρυχνος of Theophrastus, *Bit'tersweet*, *Wood'y Night'shade*, *Bit'tersweet Night'shade*, *Bit'tersweet Vine*, *Night'shade Vine*, *Vi'olet bloom*, (F.) *Douce-amère*, *Morelle grimpante*, *Vigne de Judée*. The taste of the stalks—*Dulcamora* (Ph. U. S.)—is bitter, followed by sweetness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice; but is of doubtful efficacy. Dose, in powder, ℈j to ʒj.

SOLANUM ESCULENTUM, S. tuberosum—s. Fœtidum, Datura stramonium—s. Furiosum, Atropa belladonna—s. Hortense nigrum, Atropa belladonna—s. Humboldtii, S. Lycopersicum—s. Lethale, Atropa belladonna—s. Lignosum, S. dulcamara.

SOLANUM LYCOPER'SICUM; *Lycoper'sicum esculent'um*, *L. po'mum amo'ris* seu *Humbold'tii* seu *pseudolycoper'sicum*, *Ma'lum lycoper'sicum*, *Love'-apple plant*. The fruit of this, called *Toma'ta*, *Toma'to* or *Loveapple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and, with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, Phytolacca decandra—s. Maniacum, Atropa belladonna, Datura stramonium—s. Melanocerasus, Atropa belladonna.

SOLANUM MELON'GENA, *Melon'gena*, *Egg-plant*, *Mad-Apple plant*; (F.) *Aubergine*. A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Pomum Melon'genæ*, *Ma'lum insa'num*, is prepared in soups and sauces, in those countries, like the tomata.

SOLANUM NIGRUM, Solanum.

SOLANUM NI'VEUM. A South African plant, the leaves of which, applied to foul ulcers, cleanse them. The fresh juice of the berries and leaves, made into an ointment with lard or fat, is used by the farmers for the same purpose.

SOLANUM PARMENTERII, S. tuberosum—s. Pseudolycopersicum, S. Lycopersicum—s. Quadrifolium, Paris—s. Racemosum Americanum, Phytolacca decandra.

SOLANUM SANC'TUM; *Pal'estine Night'shade*. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM SCANDENS, S. Dulcamara.

SOLANUM TUBERO'SUM, *S. esculen'tum* seu *Parmente'rii*, *Lycoper'sicum tubero'sum*, *Pa'pas Americа'nus*, *Pap'pus Americа'nus*, *Americа'num Tubero'sum*, *Batta'ta Virginia'na*, *Bata'tas*; the *Pota'to*, (F.) *Pomme de Terre*, *Parmentière*. A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Pota'to Flour*, *P. Starch*, *French Sa'go*, *Petit Sague*, *Com'mon Ar'row-root*, &c.

SOLANUM URENS, Capsicum annuum—s. Vesicarium, Physalis.

SOLANUM VIRGINIA'NUM; indigenous; is said to resemble Solanum nigrum in its properties.

SOLANUM VULGARE, Solanum.

SOLAR, *Sola'ris*, (F.) *Solaire*, (*sol*, gen. *solis*, 'the sun.') Relating to the sun; having rays like the sun.

SOLAR PLEX'US, *Plex'us sola'ris*, *Cen'trum commu'nē*, *Cer'ebrum abdomina'lē*. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastrics. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infradiaphragmatic*, *cœliac*, *superior mesenteric*, *inferior mesenterie*, *renal* or *emulgent*, *spermatic*, &c.

SOLDANELLA, (from *solidare*, 'to make firm,') Convolvulus soldanella.

SOLDIER'S WEED, Matico.

SOLE, ([Sax.] ȝol,) *So'lum*, *S. pe'dis*, *So'lea*, (from *solum*, 'the ground,') *Ba'sis cor'poris*, *Ich'nus*, *Superfic''ies planta'ris pe'dis*, *Peti'na*, *Vestig''ium*, *Pe'dion*, *Pe'za*, *Pel'ma*, *Planta*, *Planta'ris superfic''ies pe'dis*, *Fa'cies concа'va* seu *infe'rior* seu *Pla'num* seu *Concа'vum* seu *Pars infe'rior* seu *Planit''ies* seu *Plan'ta* seu *Vo'la pe'dis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEA, Sole—s. Ipecacuanha, see Ipecacuanha.

SOLÉAIRE, Soleus.

SOLEN, Canal, Cradle; see Solenarium, and Vertebral column.

SOLENA'RIUM, (*σωληναριον*, from *σωλην*, 'a canal, a pipe.') An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle*. The word *Solen* itself—*σωλην*, *Cana'lis*—was used, in antiquity, for a grooved channel or cradle, in which a fractured limb was placed.

SOLENOSTEMMA ARGEL, Cynanchum oleæfolium.

SOLE'US, *Gastrocne'mius inter'nus*, *Tibiocalcanien* (Ch.), (F.) *Soléaire*, (from *solea*, 'a sole of a shoe,' owing to its shape.) A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the gastrocnemius ex-

ternus, to form the tendo Achillis. This muscle extends the foot on the leg, and conversely.

SOLICATIO, (from *sol*, gen. *solis*, 'the sun,') Insolation.

SOLID, *Sol'idus*, *Ste'reos*, (from *solum*, 'the ground.') A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereol'ogy*, from στερεος, 'solid,' and λογος, 'a discourse.'

SOLIDA'GO, gen. *Solidag''inis*, (from *solidare*, 'to make firm,' in allusion to its properties as a vulnerary.) See Solidago virgaurea.

Solidago Rig''ida, *Rig''id Gold'enrod, Bones' styp'tic;* indigenous; of the Composite *family*, flowering in August and September; is astringent and tonic.

Solidago Saracenica, S. virgaurea.

Solidago Virgau'rea, *S. vulga'ris* seu *Saracen'ica, Vir'ga au'rea, Her'ba do'rea, Cony'za co'ma au'rea, Sym'phytum Petræ'um, Eli'chrysum, Consol'ida Saracen'ica, Gold'en rod*, (F.) *Verge d'or, Herbe des juifs.* The leaves of *Solida'go odo'ra*—Solida'go (Ph. U. S.)—*Fra'grant* or *Sweetscented Goldenrod*—and the flowers, have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

Solidago Vulgaris, S. virgaurea.

SOL'IDISM, (from *solidus*, 'solid,') *Patholog''ia solida'ris.* The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Sol'idists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbific agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, 'a bathing tub,' *Baignoire;* also, Tænia solium, (from *solus*, because considered to be found *solitary* or alone.)

SOLUBIL'ITY, *Solubil'itas*, (*solvere, solutum*, 'to dissolve,' and *habilis*, 'able.') That property of a body by virtue of which it can be dissolved in a menstruum; when it is said to be soluble.

SOLU'BLE, *Solu'bilis.* Relaxing. Applied to the bowels when gently relaxed. See Solubility.

SOLUM, Sole—s. Pedis, Metatarsus, Sole.

SOLUTÉ, (from *solvere, solutum*, 'to dissolve,') Solution.

SOLUTIO, Solution—s. Alexiteria Gaubiana, see Disinfection—s. Ammoniæ subcarbonatis, Liquor ammoniæ subcarbonatis—s. Arsenicalis, Liquor arsenicalis—s. Arsenicata, Liquor arsenicalis—s. Arsenitis kalicæ, Liquor arsenicalis—s. Calcis, Liquor calcis—s. Camphoræ ætherea, Tinctura ætherea camphorata—s. Camphoræ oleosa, Linimentum camphoræ—s. Continui, Solution of continuity—s. Cupri ammoniati, Liquor Cupri ammoniati—s. Ferri nitratis, Liquor Ferri nitratis—s. Guaiaci gummosa, Mistura guaiaci—s. Muriatis barytæ, Baryta, muriate of—s. Muriatis calcis, see Calcis murias—s. Muriatis ferrici ætherea, Tinctura seu alcohol sulfuricoætherеus ferri—s. Muriatis hydrargyri oxygenati, Liquor hydrargyri oxymuriatis—s. Potassii iodidi iodureta, Liquor iodinii compositus—s. Resinæ guaiaci aquosa, Mistura guaiaci—s. Solventis mineralis, Liquor Arsenici chloridi—s. Subcarbonatis ammoniaci spirituosa, Spiritus ammoniæ.

Solutio Sulpha'tis Cu'pri Compos'ita, *A'qua vitriol'ica cæru'lea, Syd'enham's Stypt'ic Wa'ter*, (*Sulph. cupri, Alum.* āā ℥iij, *Acid. sulph.* āā ℥iss, *Aquæ*, Oij: dissolve, and filter.) A styptic, and, largely diluted, an astringent collyrium.

SOLU'TION, *Solu'tio, Ly'sis*, (F.) *Dis'solution.* An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation—*Solu'tum*, (F.) *Soluté.* It means, also, with many, the termination of a disease:—with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

Solution of Acetate of Ammonia, Liquor ammoniæ acetatis—s. of Ammonia, benzinated, see Ammoniæ sulphas—s. Alkaline, see Fuligokali—s. of Alkaline iron, Liquor ferri alkalini—s. of Alum, compound, Liquor aluminis compositus—s. of subcarbonate of Ammonia, Liquor ammoniæ subcarbonatis—s. of Ammoniated copper, Liquor cupri ammoniati—s. of Arseniate of Soda, see Arseniate of soda—s. Arsenical, Liquor arsenicalis—s. Arsenical, De Valangin's, Liquor Arsenici chloridi—s. of Atropia, Liquor Atropiæ—s. of Carbonate of Soda, Liquor sodæ carbonatis—s. of Charcoal, concentrated, see Tinctura catechu—s. of Chloride of Arsenic, Liquor Arsenici chloridi—s. of Chloride of zinc, see Burnett's disinfecting liquid—s. of Chlorinated soda, Liquor sodæ chlorinatæ—s. of Chlorine, see Chlorine—s. of Citrate of Ammonia, Liquor ammoniæ citratis—s. of Citrate of Magnesia, see Magnesiæ citras—s. of Citrate of Potassa, Liquor Potassæ citratis—s. of Continuity, see Continuity—s. of Corrosive sublimate, Liquor hydrargyri oxymuriatis—s. De Valangin's, Liquor arsenici chloridi—s. Donovan's, see Arsenic and Mercury, Iodide of—s. Fowler's, Liquor arsenicalis—s. Gannal's, see Aluminæ acetas.

Solution, Goadby's, called after the proposer, Dr. Goadby, is made of *bay salt* ℥iv, *corrosive sublimate* gr. iv, *alum* ℥ij, and *boiling water* Oiv. It is employed to preserve animal substances. For most purposes it may be diluted with an equal bulk of water.

Solution of Gutta Percha in Chloroform, see Gutta percha—s. Heinecke's, see Arseniate of Soda.

SOLUTION PAR LES HUILES, Olea medicinalia.

Solution of Hydriodate of Potassa, Liquor potassæ hydriodatis—s. of Iodide of Iron, Liquor ferri iodidi—s. of Iodine, compound, Liquor iodinii compositus—s. of Iron, nitrated, Liquor ferri nitratis—s. Labarraque's, *Eau de Javelle*—s. of Lime, Liquor calcis—s. of Lime, saccharated, Liquor calcis saccharatus—s. Lugol's, Liquor iodinii compositus—s. of Magnesia, condensed, Magnesia, fluid—s. Monsel's, see Ferri sulphas—s. of Monro, Liquor of Monro—s. of Acetate of Morphia, Liquor morphiæ acetatis—s. of Hydrochlorate of Morphia, Liquor morphiæ muriatis—s. of Muriate of Morphia, Liquor morphiæ muriatis—s. of Sulphate of Morphia, Liquor morphiæ sulphatis—s. of Nitrate of iron, Liquor ferri nitratis—s. of Nitrate of mercury, see Hydrargyri nitras—s. of Oxymuriate of mercury, Liquor hydrargyri oxymuriatis—s. Pearson's, see Arseniate of soda—s. of Permanganate of Potassa, Liquor Potassæ Permanganatis—s. of Persulphate of iron, see Ferri sulphas—s. Plenck's, see Hydrargyri oxydum cinereum—s. of Potassa, Liquor potassæ—*s. de Potasse*, Liquor potassæ—s. of Sesquinitrate of iron, Liquor ferri nitratis—s. of Soda, Liquor sodæ—s. of Strychnia, see Strychniæ murias—s. of Subacetate of lead, Liquor plumbi subacetatis—s. of Subacetate of lead, diluted, Liquor plumbi subacetatis dilutus—s. of Subcarbonate of potass, Liquor potassæ subcarbonatis—s. of Subsulphate of iron, see Ferri sulphas—s. of Tartarized Antimony, Vinum antimonii tartarizati—s. of Terchloride of Antimony, see Antimonium muriatum—s. of Ternitrate of sesquioxide of iron, Liquor ferri nitratis—s. of Van Swieten, Liquor hydrargyri oxymuriatis.

SOLUTIVUS, Laxative.

SOLUTUM, Solution.

SOLVENS, (from *solvere*, 'to dissolve,') Solvent—s. Minerale, Liquor arsenicalis.

SOL'VENT, *Sol'vens.* (F.) *Fondant.* A medicine supposed to possess the property of dissolving or removing obstructions and extraneous substances. Thus we have *solvents* of the stone in the bladder, &c. See Dissolventia.

SOLVENT, MINERAL, Liquor arsenicalis.

SOMA, (σωμα, gen. σωματος,) Body, Corpus.

SOMASCETICS, (*soma*, and ασκησις, 'exercise,') Gymnastics.

SOMASCÉTIQUE, Gymnastics.

SOMAT'IC OR SO'MATIC, (σωματικος,) *Somat'icus*, (F.) *Somatique*, (from *soma*.) That which concerns the body;—as *somatic* death, or death of the body, in contradistiction to *molecular* death or the death of a part.

SOMATODYM'IA, (*soma*, and δυω, 'I enter into.') A double monstrosity in which the trunks are united. Of this, there are several varieties: —*Vertebrodym'ia*, where the union is by the vertebræ; *Ischiodym'ia*, by the ossa ischii; *Sternodym'ia*, by the sternum; *Supraëmphalodym'ia*, (F.) *Sus-omphalodymie*, by the superumbilical regions; *Su'pra et in'fra-omphalodymia*, by the superior and inferior umbilical regions; and *Sternoomphalodymia*, where the union is by both the sternal and the umbilical regions.

SOMATOL'OGY, *Somatolog''ia*, (*soma*, and λογος, 'a discourse.') A treatise on the human body. Anatomy.

SOMATOTOMY, (*soma*, and τεμνειν, 'to cut,') Anatomy.

SOMMEIL, (from [L.] *somnus*,) Sleep — *s. Hibernal*, Hibernation.

SOMMET, (from (L.) *summus*, 'highest,') Vertex.

SOMNAMBULATION, Somnambulism.

SOMNAM'BULISM, *Somnambula'tio, Hypnobate'sis, Hypnobata'sis, Hypnoba'tia, Hypnol'ysis, Hypnob'asis, Rhembas'mus, Lunatis'mus, Hyponeurgi'a, Selenoga'mia, Nyctobate'sis, Autonyctoba'tia, Seleni'asis, Selenias'mus, Somnambulis'mus, Nyctob'asis, Noctambula'tio, Noctambulis'mus, Nyctoba'dia, Nyctoba'tia, Siph'ita, Syph'ita, Paroni'ria am'bulans, Noctisur'gium, Oneirodyn'ia acti'va, Cenospu'dia, Som'novig''il, Somnambula'tion, Sleepwalking*, (*somnus*, and *ambulare, ambulatum*, 'to walk.') A condition of the brain which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined that the somnambulist is guided solely by his subjective sensations; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is, — so to arrange the bedchamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

SOMNAMBULISM, MAGNET'IC, MESMER'IC, or ARTIFIC''IAL, *Somnambulis'mus artificia'lis, Cataph'ora magneti'ca, Somnip'athy*, is that peculiar condition, into which individuals are thrown by the *Animal Magnetizer*. It occurs only in those of weak nervous temperament; in hysterical females, &c. See Magnetism, animal.

SOMNAMBULISMUS, Somnambulism — s. Artificialis, Somnambulism, magnetic.

SOMNAM'BULIST, *Somnam'bulus, Hybnob'ates, Hypnob'ates, Noctam'bulus, Lunat'icus, Noctam'bulo, Somnam'bulo.* A sleep-walker.

SOMNAMBULIS'TIC, *Somnam'bulous.* Relating or appertaining to somnambulism,—as the '*somnambulis'tic state.*'

SOMNAMBULO, Somnambulist.

SOMNAMBULOUS, Somnambulistic.

SOMNIA'TIO, (*somnium*, 'a dream.') The act of dreaming.

SOMNIATIO MORBOSA, Oneironosus — s. in Statu vigili, Hallucination.

SOMNIF'EROUS, *Som'nifer, Sopor'ifer, Hypnot'icus, Hypnopœ'us, Soporati'vus, Soporif'ic, Soporif'erous*, (F.) *Hypnotique, Somnifère, Assoupissant, Soporatif, Soporifère, Soporifique*; an epithet for a medicine which causes sleep, (from *somnus*, and *fero*, 'I carry.')

SOMNIL'OQUIST, *Somniloq'uus*, (F.) *Somniloque*, (from *somnus*, 'sleep,' and *loquor*, 'I speak.') One who talks in his sleep.

SOMNILO'QUIUM, *Somniloquis'mus, Somnil''oquism.* Talking in the sleep.

SOMNILOQUUS, Somniloquist.

SOM'NIUM, (from *somnus*,) *Enyp'nion, Insom'nium, Oneir'os, Oneir'on, Onar, Oneiropol'ia, a Dream*, (Sc.) *Sweuin, Sweving, Swevnyng, Swevnyng*, (F.) *Rêve, Songe.* A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchill, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see Hallucination.

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Rêvasseries.*

SOM'NOLENCY, *Somnolen'tia, Hypnæsthe'sis, Hypno'dia, Dormita'tio, Ca'rus Lethar'gus Cataph'ora, Cataph'ora, Co'ma, Somnolen'tum, Slum'ber, Heaviness*, (F.) *Assoupissement*; (from *somnus*.) Sleepiness. Also a state intermediate between sleeping and waking. It is often a symptom of disease.

SOMNOPATHY, (*somnus*, and παθος, 'affection,') Somnambulism, magnetic.

SOMNOVIGIL, (*somnus*, and *vigil*, 'awake,') Somnambulism.

SOMNUS, Sleep.

SOMPNUS, Sleep.

SON, Furfur, (from *summus*, the last;—that which remains last in the sieve.) Also, Sound, (from *sonus.*)

SON HYDATIQUE, Hydat'ic sound, Hydat'id frem'itus. A sound, heard on percussion over tumours containing hydatids. The sensation experienced by the finger, is like that given by a watch struck on the surface opposite the glass.

SON'CHUS, (σογχος,) *S. Olera'ceus, Hiera'cium olera'ceum, Sowthistle, Swinethistle*, (F.) *Laiteron doux. Ord.* Cichoraceæ. Most of the species of Sonchus abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

SONCHUS FLORIDANUS, Mulgedium Floridanum.

SONDE, Sound, Specillum — *s. Cannelée*, Director.

SONDE D'ANEL. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lachrymale.

SONDE DE BELLOC. An instrument invented by Belloc for plugging the nasal fossæ, in cases of hemorrhage. It consists of a curved silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

SONDE BRISÉE (F.), *Eyed probe.* A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

SONDE À CONDUCTEUR (F.). A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half

longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

SONDE À DARD, (*dard*, 'a dart,') see Lithotomy (high operation).

SONDE DE LAFOREST. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing injections into it.

SONDE ou *PINCE DE HUNTER*. A cylindrical silver canula; of the size of a common catheter; open at both extremities, and containing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

SONDE UTÉRINE, Sound, uterine—s. *de Varecq*, Soda.

SONGE, Somnium.

SONITUS AURIUM, 'sound of the ears,' Tinnitus aurium — s. Cardiacus, see Heart, (sounds) —s. Cordis, see Heart, (sounds) — s. Fluidi, Hygrechema — s. Hepaticus, Hepatechema — s. Intestinalis, Enterechema — s. Stomachicus, Gasterechema.

SONOROUS RHONCHUS, *Râle sonore*.

SONUS, Sound—s. Vocis, Accent.

SOOJA, see Dolichos.

SOO'JIE, BASTER'S, a farinaceous article of diet, is said to consist of wheat flour sweetened with sugar.

SOOL, Gastroperiodynia.

SOOT, ([Sax.] ꝑoot, ꝑot,) Fuligo — s. Tea, see Fuligokali — s. Wart, Cancer, chimneysweeper's.

SOPHIA, (*σοφια*, 'wisdom,' from its virtues,) Sisymbrium sophia—s. Chirurgorum, Sisymbrium sophia.

SOPHISTICATION, (from *σοφιστικος*, after the manner of the Sophists, 'captious, deceitful,') Falsification.

SOPHO'RA HEPTAPHYL'LA, *Anticholer'ica*. *Ord.* Leguminosæ. *Sex. Syst.* Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

SOPHORA TINCTO'RIA, *Baptis'ia* seu *Podalir'ia Tinctor'ia*, *Indigofe'ra*, *Wild Ind'igo*, *Ind'igo Weed*, *Broom*, *Ind'igo Broom*, *Horse'fly Weed*, *Yel'low Broom*, *Clo'ver Broom*, *Rat'tle Bush*, *Yel'low Ind'igo*. An American plant, the taste of whose root is unpleasant, subacrid, and nauseous —very similar to that of ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the *cortical part* of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

Baptis'ia Leucan'tha, *Tall white false Ind'igo*, an indigenous plant, has the same properties.

SOPHRONISTÆ DENTES, (from *σωφρονεω*, 'to act wisely,') see Dentition.

SOPHRONISTERES DENTES, see Dentition.

SOPHROSYNE, (*σωφροσυνη*,) Temperance.

SOPIENS, (*sopio*, 'to put to sleep,') Paregoric.

SOPIO, Opium.

SO'POR, Sleep, and especially, a profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

SOPOR CAROTICUS, Carus.

SOPORARIÆ ARTERIÆ, Carotids.

SOPORATIVUS, (from *sopor*,) Somniferous.

SOPORIFEROUS, (*sopor*, and *ferre*, 'to carry,') Somniferous.

SOPORIFIC, (*sopor*, and *facere*, 'to make,') Somniferous.

SO'POROUS, *So'porus*, (F.) *Soporeux*, (from *sopor*.) Sleepy: causing sleep.

SORA, Essera.

SORB TREE, Sorbus domestica.

SORBASTRELLA, Pimpinella saxifraga.

SORBEFA'CIENT, *Sorbefa'ciens*, (*sorbere*, 'to suck in,' and *facere*, 'to make.') A remedy that promotes absorption.

The following are the chief sorbefacients or modifiers of nutritive action — *eutrophics*:— Acida Vegetabilia; Alkalia; Ammoniacum; Brominium; Galbanum; Hydrargyri Præparata; Iodinium; Liquor Calcii chloridi; Spongia usta; Compression, (methodical;) Friction; Mental Sorbefacients, (Imagination, Emotions.)

SORBET, Scherbet.

SORBETHUM, Scherbet.

SORBETTUM, Scherbet.

SORBETUM Scherbet.

SORBIER DES OISELEURS, Sorbus aucuparia.

SORBIN, see Sorbus domestica.

SORBITIO, (*sorbere*, 'to drink,') Jus.

SORBIT''IO CARNIS seu EX CAR'NE. Broth or soup made of meat.

SORBITIUM, Jus.

SORBUM, see Sorbus domestica.

SORBUS, Cratægus aria, S. domestica—s. Alpina, Cratægus aria.

SORBUS AMERICA'NA, *Py'rus America'na*, *Amer'ican Moun'tain Ash*. The bark resembles that of the Wild Cherry, and might be used in the same cases.

SORBUS ARIA, Cratægus aria.

SORBUS AUCUPARIA, *Mes'pilus*, *M. aucupa'ria*, *Moun'tain Ser'vice*, *Sorbus of the birdcatchers*, *Moun'tain Ash*, *Quick'en tree*, *Roan tree*, *Wit'chen*, *Witch ha'zel*, *Witchwood*, (Sc.) *Ro'den tree*, *Roun tree*, *Rowan tree*, *Rone*, (Prov.) *Keer*, *Rantre*, (F.) *Sorbier des Oiseleurs*, *Frêne sauvage*. *Ord.* Rosaceæ. The berries—(Sc.) *Rodens*—of this tree are employed for similar purposes as those of Sorbus domestica.

SORBUS OF THE BIRDCATCHERS, S. Aucuparia.

SORBUS CYDONIA, Pyrus cydonia.

SORBUS DOMES'TICA, *Sor'bus*, *Py'rus domes'tica*, *Mes'pilus domes'tica*, *Oie*, *Ser'vice* or *Sorb Tree*, (F.) *Cormier*. *Family*, Rosaceæ. *Sex. Syst.* Icosandria Trigynia. The fruit of this tree, *Sorbum*, is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy. A saccharine matter extracted from the fruit has been called *Sor'bin*.

SORBUS MALUS, Pyrus malus.

SOR'DES, 'Filth,' *Rhy'pus*. A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth, on the teeth in adynamic fevers more especially, and of foul matters in the stomach — *Sordes prima'rum via'rum*, *Rhypa'ria*. The French call an ulcer, exhibiting such an appearance, *sordide*. Also dirt of any kind.

SORDES, Acatharsia, Ichor, Saburra—s. Acidæ, Acidities — s. Aurium, Cerumen — s. Primarum viarum, *Embarras gastrique*, see Sordes—s. Ventris, Excrement.

SORDICULÆ AURIUM, (dim. of *sordes*, 'filth,') Cerumen.

SORE, ([Sax.] ꝑaꝛ,) Ulcer.

SORE, BAY. A disease which Moseley considers to be a true cancer. It is endemic in the Bay of Honduras.

SORE MOUTH, Stomatitis — s. m. Gangrenous, Cancer aquaticus — s. Swanalley, see Phagedenic

chaneer — s. Throat, Cynanche — s. Throat, Clergyman's, Pharyngitis, follicular — s. Throat, inflammatory, Cynanche tonsillaris—s. Throat, putrid, Cynanche maligna — s. Throat, tubercular, Pharyngitis, follicular — s. Throat, ulcerous, Cynanche maligna.

SORE'NESS, *Parap'sis a'cris teneritu'do.* Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

SORGHUM, Panicum Italicum — s. Saccharatum, see Saccharum.

SOROCCO, Puna.

SOROCHE, Puna.

SORORIA'TIO, (from *sorores*, 'sisters,' *sororio*, 'to grow up or swell together.') The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammæ begin to show, —*sororian'tes mam'mæ*—was formerly called *soro'rians vir'go.*

SORREL, COMMON, ([F.] *Surelle*, from (Sax.) ȳrn, 'sour,') Rumex acetosus — s. Field, Rumex acetosella—s. French, Rumex scutatus — s. Garden, Rumex scutatus—s. Mountain, Oxalis acetosella, Oxyria reniformis—s. Roman, Rumex scutatus—s. Salt of, Potass, oxalate of—s. Sheep, Rumex acetosella.

SORREL TREE, Andromeda arborea, A. mariana.

SORREL, WELSH, Oxyria reniformis — s. White, Oxalis acetosella—s. Wood, yellow, Oxalis stricta.

SORROCHE, Puna.

SOS'TRUM, *So'trum*, (σωστρον, from σωζειν, 'to save,' and σωτηρ, 'a preserver.') A reward given to one who saves the life of another. A physician's *fee* or *honora'rium*, (F.) *Honoraire.*

SOTERIA DOCTRINA, (σωτηριος, 'preservative,') Medicina.

SOTERIÆ AQUÆ, Waters, mineral.

SOTERIOLOGY, *Soteriolog''ia*, (σωτηριος, 'preservative,' and λογος, 'a discourse,') Hygeology.

SOTIREL'LA. Ancient name of a medicine composed of *opium* and other *narcotics*, *nutmeg*, *saffron*, *camphor*, and *soot*. It was used in certain diseases of the teeth.

SOTRUM, (σωτρον,) Sostrum.

SOUBRELANGUE, Ankyloglossia.

SOUBRESAUT DES TENDONS, Subsultus tendinum.

SOUCHERLOON, Bit noben.

SOUCHET DES INDES, Curcuma longa — *s. Odorant*, Cyperus longus — *s. Rond*, Cyperus rotundus.

SOUCI (old F.), *Soulcie*, (from [L.] *solsequium*, like *heliotrope*, 'a follower of the sun,') Calendula officinalis, Panophobia—*s. des Alpes*, Arnica montana—*s. des Champs*, Calendula arvensis—*s. Ordinaire*, Calendula officinalis.

SOUDE, Soda — *s. Acétate de*, Soda, acetate of—*s. Aéré*, Sodæ carbonas—*s. Borate de*, Borax —*s. Borate sursaturé de*, Borax—*s. Carbonate de*, Sodæ carbonas — *s. Caustique*, Soda caustica — *s. à la Chaux*, Soda caustica — *s. Chlorure de*, Soda, chloride of — *s. du Commerce*, Soda — *s. Crayeuse*, Sodæ carbonas — *s. Effervescente*, Sodæ carbonas — *s. Hyposulfite de*, Soda, hyposulphite of—*s. Phosphate de*, Soda, phosphate of—*s. et de Potasse, tartrate de*, Soda, tartrate of — *s. Pure*, Soda caustica—*s. Sousborate de*, Borax—*s. Soussarbonate de*, Soda, subcarbonate of — *s. Sulfate de*, Soda, sulphate of.

SOUFFLE, (from *sufflare*, (*sub*, and *flare*,) 'to blow,') see Murmur, respiratory — *s. Amphorique*, see Cavernous respiration — *s. Bronchique*, see Murmur, respiratory — *s. Funic*, Bellows' sound, funic—*s. Métallique*, see Cavernous respiration—*s. Placentaire, Bruit placentaire*—*s. Trachéal*, see Murmur, respiratory — *s. Tubaire*, see Murmur, respiratory—*s. Utérin, Bruit placentaire*—*s. Voilé* see Cavernous respiration.

SOUFFLE, WHISP'ERING. A bellows' sound heard over solidified lung and excavations when the patient whispers.

SOUFFRANCE, Suffering.

SOUFRE, Sulphur — *s. Carburé*, Carbonis sulphuretum — *s. Iodure de*, Sulphuris iodidum — *s. Sublimé*, Sulphur sublimatum — *s. Végétal*, Lycopodium.

SOUILLURE ([F.], *souiller, salir*, ([Sax.] ȳlhan, 'to soil,') Pollution.

SOULA'MEA AMA'RA, *Rex amaro'rum.* A shrub of the Moluccas; *Order*, Polygalaceæ; all the parts of which have great bitterness—"*horrenda amarities.*" It is employed by the Malays, and, it is said, with success, in cholera and pleurisy; and as a febrifuge.

SOUND, *Specill'um, Sty'lus, Explorato'rium, Radi'olus*, (F.) *Sonde.* An instrument used by surgeons to discover whether there be a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter. The operation is termed *sounding.*

The French *Sonde* has, however, a more extensive signification. It means different instruments introduced into cavities of certain organs, or into wounds, fistulas, &c., to probe their condition, or to fulfil some therapeutical indication. See *Sonde.*

SOUND, *So'nus*, ([Sax.] ȳon,) *E'chos, Noise*, (F.) *Son, Bruit.* The sensation produced on the auditory nerve by the vibrations of a sonorous body. Sounds may be propagated in three modes. 1. By *reciproca'tion* or *con'sonance*, as when a sounding body, of a definite pitch, produces a musical tone when another body of the same pitch is sounded near it. 2. By *res'onance*, as when a sounding body is placed in connection with another, one or more of whose parts may be thrown into reciprocal vibration; and 3. By *conduc'tion*, as where the vibrations are transmitted through fluid, liquid, or solid media.

SOUND, ([L.] *sanus*, [Sax.] ȳunb,) Healthy.

SOUND, Catheterize, Syncope — s. Auricular, Apyromele—s. Bellows', friction, rasp, saw, lancet, &c., see *Bruit* — s. Cracked pot, *Bruit de pot fêlé* — s. Crumpling, pulmonary, *Froissement pulmonaire*—s. Hydatic, *Son hydatique*—s. Laryngeal, Laryngeche — s. Musical, *Sifflement modulé.*

SOUND, U'TERINE, *U'terine bougie*, (F.) *Sonde utérine.* An instrument somewhat similar to a small male catheter, to be introduced into the cavity of the uterus, in the diagnosis of diseases of that viscus. When notched on the stem, it enables the size of the uterine cavity to be appreciated, and becomes a good *hysterom'eter*, (F.) *Hystéromètre.*

SOUNDING, Searching, see Sound — s. the Chest, see Auscultation.

SOUNDNESS OF MIND, Sanity.

SOUP, ([G.] Suppe,) see Broth.

SOUPIR, (from [L.] *suspirium*,) Sigh.

SOUR BERRY, see Oxyacantha Galeni, Vaccinium oxycoccos—s. Crout, Sauer Kraut- -s. Dock, boreal, Oxyria reniformis — s. Leaf, An lromeda arborea — s. Milk, Buttermilk — s. Sop, Bromelia ananas — s. Tree, Andromeda arborea — s. Wood, Andromeda arborea, Andromeda mariana.

SOURCIL, Supercilium.

SOURCILIER, Corrugator supercilii, Superciliary.

SOURD, (from [L.] *surdus*,) Deaf.

SOURDS-MUETS, 'deaf dumb,' see Mutitas surdorum.

SOURIS, Nystagmus.

SOURMILK, Buttermilk.

SOURSOP, Bromelia ananas.

SOUS (F.), in compound words, *Sub.*

SOUS-ACROMIO CLAVI-HUMÉRAL, Deltoid — *s. Atloïdien*, Subatloidæus — *s. Axoïdien*, Subaxoidæus — *s. Azotate de Bismuth*, Bismuth, subnitrate of—*s. Clavier*, Subclavian—*s. Costaux*, see Intercostal muscles—*s. Cutané*, Subcutaneous — *s. Diaphragmatique*, Infradiaphragmatic — *s. Épineux*, Infraspinatus — *s. Lingual*, Sublingual — *s. Mammaire*, Submammary — *s. Maxillaire*, Submaxillary — *s. Maxillo-Labial*, Depressor anguli oris — *s. Mental*, Submental — *s. Métacarpo-latéri-phalangien*, Prior annularis — *s. Occipital*, Suboccipital—*s. Optico-sphéno-scléroticien*, Rectus inferior oculi—*s. Orbitaire*, Suborbitar—*s. Pubien*, Infrapubian — *s. Pubio-coccygien*, Levator ani — *s. Pubio-crêti-tibial*, Gracilis — *s. Pubio-prétibial*, Gracilis — *s. Pubio-trochantérien-externe*, Obturator externus — *s. Pubio-trochantérien-interne*, Obturator internus—*s. Scapulaire*, Subscapularis—*s. Scapulo-trochinien*, Subscapularis — *s. Sels*, see Salt.

SOUTH CAROLI'NA, MIN'ERAL WA'TERS OF. *Glenn's Springs*, in Spartanburg District, are highly charged with salts of lime, and, not far from them, is a chalybeate. *West's Spring*, and *Chick's Springs*, a few miles from Greenville, resemble Glenn's Springs.

SOUTHERNWOOD, Artemisia abrotanum — s. Field, Artemisia campestris — s. Maritime, Artemisia maritima—s. Tartarian, Artemisia santonica.

SOWBREAD, Arthanita, Cyclamen.

SOWENS, ([Sax.] ꝑeaꝑe, 'paste,') Flummery.

SOY, see Dolichos soja.

SOYMIDA FEBRIFUGA, Swietenia febrifuga.

SPA, MIN'ERAL WA'TERS OF. A town seven leagues southeast of Liége, where there are several springs, possessing a sharp acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; carbonate of soda, and chloride of sodium. The water is much used as a tonic. Season, from the 1st of June to the 15th of October.

SPA WA'TER, ARTIFIC''IAL. (*Sodæ subcarb.*, gr. vij; *Magnesiæ carbon.*, ℈j; *Limat. ferri.*, gr. iij; *Sodii chlorid.*, gr. j; *Aquæ*, Oiij. Impregnate with gas from *Marble powder* and *Sulph. acid.*, āā ℈x.)

SPACE, INTERPEDUNCULAR, see Interpeduncular — s. Perforated, anterior, Locus perforatus anticus — s. Perforated, posterior, see Tarini pons.

SPADEBONE, Scapula.

SPADO, (σπαδων,) Castratus, Spasm.

SPADON, (σπαδων,) Castratus, Spasm.

SPAGYRIA, Chymistry.

SPAG''YRISTS, (σπαω, 'I separate,' and αγειρω, 'I assemble;' because they reduced compounds into elements, and formed the latter into compounds [?].) A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists of their day explained those of the inorganic kingdom. *Medici'na Paracelcis'tica* seu *Spagyr'ica*, was likewise called *Hermet'ica*, because it was believed that the means of cure adopted in it had been found in the books of Hermes.

SPAIG, Skeleton.

SPANÆ'MIA, (σπανος, 'poor,' and αιμα, 'blood.') Poverty of the blood. Diminution in the quantity of red corpuscles of the blood, — as where bleeding has been carried beyond certain limits.

SPANÆ'MIC, *Spanæ'mienm* (remedium), *Dysplas'ticum*, *Plastilyt'icum et erethilyt'icum*, *Hæmatolyt'icum*, *Dyscrasi'acum*. Relating to spanæmia.

A medicine whose protracted use is said to impoverish the blood,—as iodine, bromine, &c.

SPANDARAPUM, Sparadrapum.

SPANING, ([G.] spänen, 'to wean,') Weaning—s. Brash, Brash, weaning.

SPANISH FLY, Cantharis — s. Juice, Extractum glycyrrhizæ.

SPANNADRAPUM, Sparadrapum.

SPANAPO'GON, (σπανος, 'rare,' and πωγων, 'beard.') One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogo'nes*.

SPARADRAPA, Sparadrapum.

SPARADRAPIER. The name of a machine for spreading sparadraps. A *Plaster machine*. It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

SPARADRA'PUM, *Sparadra'pa*, *Sparadrapus*, *Spar'adrap*, *Tela emplas'tica* seu *emplas'trica*, *Spandara'pum*, *Spannadra'pum*, (F.) *Sparadrap*. Any adhesive plaster spread upon linen or paper, (F.) *Papier médicamenté*. The chief sparadraps are the following:—

SPARADRAPUM ADHÆSI'VUM, *Adhe'sive Plaster*. A spread plaster of the *Emplas'trum adhæsi'vum*. It is also called *Strap'ping*.

English Courtplaster is a Sparadrap, (F.) *Taffetas agglutinatif*, *T. gommé*, *Taffetas d'Angleterre*, *Ser'icum An'glicum*, *Emplas'trum Anglicum*, *E. Anglica'num*, *E. Adhæsi'vum Woodstock'ii*, *E. Icothyocol'læ te'læ induc'tum*, *E. Glutino'sum*, *Te'la Ichthyocol'læ glu'tinans*, *Isinglass Plas'ter*. (It is made by stretching black silk, and brushing it over with a solution of *isinglass* ℥ì, in *proof spirit* ℥xij, to which *tinc. benzoin.* ℥ij, are added. When dry, this is repeated five times; after which two coats are given it of a solution of *tereb. Chiæ* ℥iv, in *tinc. benz.* ℥vj, which render it less liable to crack.)

Lis'ton's Isinglass Plas'ter is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

SPARADRAPUM PRO FONTIC'ULIS, *Is'sue Plas'ter*, is sometimes made of *simple diachylon*, ℔ij; *Burgundy pitch* and *sarcocolla*, each ℥iv; *common turpentine*, ℥j. Spread upon linen and polished with a moistened calendering glass rubber.

SPARADRAPUM seu TE'LA GALTERI, *Defen'sive Plas'ter*, (F.) *Toile de Gautier*. (This is made of *Olive oil*, ℔ss; *Suet*, ℥iv; *Wax*, ℥x; *Litharge*, *Common turpentine*, *Thus*, and *Mastich*, āā, ℥ij; *Bole armeniac*, *Flour*, āā ℥j. Pour it, while liquid, upon cloth, and spread.) Used for issues and to keep on dressings.

SPARADRA'PUM VESICATO'RIUM. Several substances have been introduced as substitutes for blistering plaster, (see Emplastrum Lyttæ,) under the names, *Te'la vesicato'ria*, *Blist'ering Tis'sue*, &c., and other forms of which are the *Taffetas vésicant* ou *épispastique*, *Papier épispastique*, ou *vésicant*, *Charta vesicato'ria*. They are made of an *ethereal* or *alcoholic extract of cantharides*, or of *cantharidin*, mixed with *wax*, and spread, in a very fine layer, on silk or paper previously oiled or waxed. They are efficient agents.

SPARADRAPUM VIR'IDE, *Cornplaster*. (This may be made of *Yellow wax*, ℔ij; *Burgundy pitch*, ℥xij; *Common turpentine*, ℥vj; *Verdigris*, ℥iij; spread on cloth and polished.)

Kennedy's Cornplaster is made of *Yellow wax*, ℔j; *Venice turpentine*, ℥ij; *Verdigris*, ℥j.

SPARADRAPUS, Sparadrapum.

SPARAGMA, gen. *Sparag'matis*, (σπαραασω, 'to tear,') Laceration.

SPARAGMUS, (σπαραγμος, 'tearing,') Spasm.

SPARAGRASS, Asparagus.

SPARAGUS, Asparagus.

SPARAL'LIUM, *Clys'ter uteri'nus.* An injection into the vagina.

SPAREDIA. A bandage covered with the white of egg.

SPARGA'NIUM RAMO'SUM, (σπαργανιον.) *Great Burreed,* (from *sparganon,* owing to the band-like leaves.) Indigenous; *Order,* Typhaceæ; flowering in July and August. The roots are subastringent, but esculent; yielding a fine fecula, similar to salep. They are sometimes made into a poultice for inflamed mammæ.

SPAR'GANON, *Spar'ganum,* (σπαργανον, from σπαργω, 'I swathe,' 'I wrap.') 'Swathing clothes;' a kind of bandage, with which children were formerly surrounded. Also, a fascia or band.

SPARGANO'SIS, *Spargo'sis,* (σπαργανωσις, from σπαργαω, 'I am full to bursting.') Extreme distension, as of the breasts by milk; *Intumescen'tia lac'tea mamma'rum, Mastodyn'ia polyg'ala.* Sparganosis also means the wrapping of a child in swathing clothes.

SPARGANOSIS PUERPERARUM, Phlegmatia dolens.

SPARGANUM, Sparganon.

SPARGOSIS, (σπαργωσις,) Sparganosis.

SPARROWGRASS, Asparagus.

SPARSUS, (*spargere, sparsum,* 'to throw here and there,') Sporadic.

SPARTEIN, see Spartium scoparium.

SPAR'TIUM JUN'CEUM, (σπαρτον, 'a rope,'—the ancients using its branches or bark to form a rope.) *Span'ish broom. Ord.* Leguminosæ. A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy—10 or 15 grains three times a day.

SPARTIUM SCOPA'RIUM, *Saratham'nus scopa'rius, Cyt'isus scopa'rius, Genis'ta, G. scopa'ria* seu *hirsu'ta, Cytisogenis'ta, Broom,* (F.) *Génêt à balai. Broom Tops, Spar'tii Cacu'mina, Scopa'rius,* (Ph. U. S.,) have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder, ℈j to ʒj. All the genistæ have similar virtues. A decoction of genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia. An organic liquid base—*Spar'teïn*—has been separated from it, which has narcotic properties; and a yellow crystallized substance, *Sco'parin,* which is diuretic.

SPARTIUM TINCTORIUM, Genista tinctoria.

SPASIS, (σπασις,) Spasm.

SPASM, *Spas'mus, Spas'ma, Spa'sis, Sparag'mus, Synol'cē, Spa'do, Spadon,* (F.) *Spasme,* (σπασμος, from σπαω, 'I draw.') The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions; and these, again, have been divided into *tonic* spasm, *Paraton'ia,* which consists in permanent rigidity and immobility of the muscles that are the seat of it (see Tetanus); and *clonic* spasm, which consists in alternate contractions and relaxations (see Convulsion).

Cullen has a class, *Spas'mi*—the *neurospas'mi* of Fuchs.

SPASM, CLONIC, Convulsion—s. Cynic, see Canine laugh.

SPASM OF THE GLOTTIS, Asthma thymicum—s. Histrionic, of the Face, see Tic—s. of the Larynx, Asthma thymicum—s. Masticatory, of the Face, Trismus—s. with Rigidity, Tetanus.

SPASM, WRI'TERS'. Involuntary spasms of the muscles of the thumb, or thumb and index finger, observed, at times, in those who are much accustomed to writing. See Cramp, writers'.

SPASMA, Spasm.

SPASMATIC, see Spasmoticus. Dr. Marshall Hall used the word *spasmat'ic* for one, in a convulsive disease, in the state of excitement. *Spas'matode* he employs for one unexcited.

SPASMATICUS, (from *spasma,*) Spasmoticus.

SPASMATODES, (σπασματωδης, from *spasmus,* and *odes,*) Spasmoticus.

SPASME, Spasm—*s. de la Glotte et du Thorax,* Asthma thymicum—*s. de la Vessie,* Cystospasmus.

SPASMI, see Spasm.

SPASMODES, (σπασμωδης,) Convulsive.

SPASMODIC, Spasmoticus.

SPASMOL'OGY, *Spasmolog''ia,* (*spasmus,* and λογος, 'a treatise.') A treatise on spasm.

SPASMOLYGMUS, (*spasmus,* and λυγμος, 'hiccough,') Singultus.

SPASMOPHIL'LIA, *Convulsibil'itas, Convulsibil'ity,* (F.) *Convulsibilité: (spasmus,* and φιλεω, 'I love.') Tendency to convulsions from unusual excitability of the motor nervous system.

SPASMOT'ICUS, *Spasmat'icus, Spasmato'des, Spas'ticus, Spas'tic, Spasmod'ic, Spasmat'ic, Spasmot'ic,* (F.) *Spasmodique, Spastique,* (from *spasmus.*) Anything relating to spasm. Also, an antispasmodic.

Morbi constricto'rii, M. spasmot'ici, &c., are diseases accompanied with spasm.

SPASMUS, (σπασμος,) Convulsion, Spasm—s. Aurium, Otalgia—s. Bronchialis, Asthma—s. Caninus, see Canine laugh—s. Clonicus, Convulsion—f. Cynicus, see Canine laugh—s. Facialis, Tic—s. Glottidis, Asthma thymicum—s. Linguæ, Glossospasmus—s. Maxillæ inferioris, Trismus—s. Muscularis, Cramp—s. Musculorum Faciei, Canine laugh—s. Nutans, Convulsion, salaam—s. Pepherícus, Horrida cutis—s. Universalis, Synclonus—s. Ventriculi, see Cardialgia—s. Vesicæ, Cystospasmus.

SPAS'NIA, (same etymon as Spasm.[?]) A term used by Mercurialis to designate the lancinating pain produced, at times, in the chest by violent fits of coughing.

SPASTIC, (σπαστικος,) Spasmoticus, Tonic spasm.

SPASTICUM, Tetanic.

SPATHA, (σπαθη, a broad, flat instrument for stirring liquids, spreading plasters, &c.,) Hypaleiptron scapula.

SPATHES'TER, (from σπαω, 'to draw.') A surgical instrument, used by P. Amman for drawing the prepuce over the glans, when too short.

SPATHOMELE, (*spatha,* and μηλη, 'a probe,') Spatula.

SPATHULA, Scapula, Spatula—s. Fœtida, Iris fœtidissima.

SPATHYEMA FŒTIDA, Dracontium fœtidum.

SPATIA INTERLOBULARES, (pl. of *spatium,* 'a space,') Interlobular fissures.

SPAT'ILE, (σπατιλη, 'human excrement.') A liquid fœcal evacuation. Excrement.

SPATIUM ORIS, 'space of the mouth,' Mouth—s. Trigonum, Lyra.

SPATTERDOCK, Nuphar advena.

SPAT'ULA, *Spath'ula,* (dim. of *Spatha,*) *Spathome'lē, Specill'um latum.* A flat instrument used for spreading plasters, stirring ointments, holding down the tongue, &c. Also, the scapula.

SPATULA PRO ORE, Glossospatha.

SPAUD, Humerus.

SPAUL, Saliva.

SPAUTBONE, Humerus.

SPAWBONE, Humerus.

SPAYING, (from σπαω, 'to draw;' [L.] *spado,* 'a castrated person,') see Castration.

SPEARWORT, Ranunculus flammula.

SPEAUTER, Zinc.

SPECIAL, see Specific.

SPEC''IALIST, (F.) *Spécialiste,* (from *species,*

'a peculiar sort.') One who devotes himself to a specialty; as to diseases of particular parts, as of the eye, ear, chest, &c.

SPE'CIES, (F.) *Espèces, Spéciolés.* Officinal mixtures of substances cut or bruised. Sometimes used for compound powders, as it always appears to have been formerly. See Pulvis.

From *species* comes *spice,* (F.) *Épice.*

Species Aromaticæ, Pulvis cinnamomi compositus — s. Diacinnamomi, Pulvis cinnamomi compositus—s. Diacretæ, Pulvis cretæ compos.—s. Diajalapæ, Pulvis jalapæ compositus—s. Diambræ sine odoratis, Pulvis cinnamomi compositus—s. Diatragacanthæ frigidæ, Pulvis tragacanthæ compositus — s. Hieræ picræ, Pulvis aloes cum canellâ — s. Lætificantes Rhazis, Pulvis cinnamomi compositus — s. e Scordio cum opio, Pulvis cretæ compositus cum opio — s. e Scordio sine opio, Pulvis cretæ compositus.

SPECIF'IC, *Specif'icus, Nosocrat'ic,* (F.) *Spécifique* (*species,* 'a peculiar sort,' and *facere,* 'to make.') A substance to which is attributed the special property of removing some particular disease. Probably no such remedy exists. *Mercury* in syphilis, and *sulphur* in the itch, have been regarded as the strongest examples. The word is also used adjectively in the sense of *special;* as "mercury has a *specific* or *special* action on the salivary glands." See Specificity, morbid.

Specific of Herrenschwand. A once celebrated German vermifuge. It is said to have consisted of 10 grains of *Gamboge,* with 20 of *Carbonate of Potassa.* It is affirmed, that mercury and arsenic have also been found in it.

SPÉCIFICITÉ MORBIDE, Specificity, morbid.

SPECIFIC''ITY, MOR'BID, (F.) *Spécificité morbide,* is the occult quality of a disease which gives occasion to peculiarity in its nature, evolution and treatment. Such is said to be a *specific* disease.

SPECIFICUM PARACELSI, Potassæ sulphas.

SPECIL'LUM, *Me'lē, Sty'lus, Explorato'rium,* (from *specio,* 'I examine,') *Specla'rion, a Probe,* (F.) *Stilet, Stylet, Sonde.* A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

The perforator of the Trocar is called a *Stylet';* as well as the wire or metallic rod of the flexible catheter, which gives it shape and firmness.

Specillum, Everriculum, Hypaleiptron, Sound — s. Auricularium, Apyromele — s. Cereum, *Bougie*—s. Excavatum, Stylus excavatus — s. Latum, Spatula — s. Minus, Melotis — s. Sulcatum, see Grooved.

SPÉCIOLÉ, Species.

SPECKS OF THE CORNEA, see Caligo.

SPECLARION, (σπεκλαριον,) Specillum.

SPEC'TACLES, (*spectare,* 'to behold;') *Conspicil'la,* (Sc.) *Breels,* (F.) *Besicles, Lunettes ordinaires, Conserves.* Glasses to assist the sight; arranged so as to be adapted to both eyes. These glasses are more or less *concave* or *convex,* according as the sight is more or less short, (*myopic,*) or long, (*presbyopic.*) When the glass is adapted to one eye, it is called an *Eyeglass, Conspicil'lum, Perspicil'lum, Vi'trum ocula'rē.*

SPEC'TRUM, *Spectre,* (F.) *Spectre,* (from *specio, spectum,* 'to see.') An appearance real or imaginary.

Spec'trum Anal'ysis, *Prismat'ic anal'ysis.* A most delicate method of analysis, which consists in decomposing, by means of a prism, the coloured light given by the salts of metals to the colourless flames of alcohol or coal gas. It is a useful aid to quantitative analysis, as the coloured flame of each metal, even in the minutest quantities, is found to give a well marked and characteristic spectrum. Bunsen estimated, that the amount of sodium which admitted of detection by prismatic analysis was the 195,000,000th part of a grain; of lithium the 70,000,000th; of potassium, the 60,000th; of barium the same; of strontian, the 1,000,000th; and of calcium the 100,000,000th of a grain. See Poisons.

Spectrum, Oc'ular, *Spec'trum ocula'rē,* (F.) *Spectre oculaire.* A disturbance of vision, which consists in the appearance of objects after the objects themselves have been withdrawn. See Colours, accidental.

Spectrum, So'lar, *Spec'trum Sola'rē,* (F.) *Spectre solaire.* The coloured image produced by white light, which has been decomposed by passing through a prism. It consists of seven different coloured fringes, arranged in the following order—red, orange, yellow, blue, green, indigo, and violet. Three of these — blue, red, and yellow—are simple; the others being mixtures of them.

SPECULA'RIS LA'PIS. A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass.

SPEC'ULUM, *Catop'ter, Catop'tron, Diop'tron.* (In Latin, 'a mirror;' from *specio,* 'to behold.') In *surgery,* it means different instruments for dilating cavities, and facilitating their examination. See Dilator. There are various instruments of this kind,—the *S. Ani, S. Auris, S. Vaginæ,* (*Colpeuryn'ter, Elytreurynter,*) *S. Matri'cis, S. Oculi, S. Oris* ([F.] *Bâillon, Pas d'Âne,*) *S. Gutturis, S. Vesicæ.*

Speculum Citrinum, Orpiment — s. Indicum, Ferri limatura—s. Larynx, Laryngoscope—s. Lucidum, Septum lucidum — s. Oculi, see Ophthalmoscopia — s. Oris, Glossocatochus — s. Veneris, Achillea millefolium.

SPECUS, gen. *Specûs,* 'a cave,' Vulva—s. Cordis, Ventricle of the Heart — s. Pro medullâ spinali, see Vertebral column — s. Vertebralis, see Vertebral column.

SPEDALSKE, see Radzyge.

SPEDALSKHED, see Radzyge.

SPEECH, ([Sax.] ꝑpæc,) Voice, articulated.

SPEECHLESSNESS, Mutitas.

SPEEDIMAN'S PILLS, see Pilulæ aloes et myrrhæ.

SPEEDWELL, BROOKLIME, Veronica beccabunga—s. Female, Antirhinum elatine—s. Officinal, Veronica — s. Purslain, Veronica peregrina — s. Water, Veronica beccabunga.

SPELLBONE, Fibula.

SPELTRUM, Zincum.

SPERAGE, Asparagus.

SPERAGUS, Asparagus.

SPERM, gen. *Sperm'atis, Sperma,* (σπερμα, gen. σπερματος, from σπειρω, 'I sow.') *Spermat'ic flu'id* or *liq'uor, Sem'inal flu'id, Seed, Se'men, S. viri'lē* seu *masculi'num* seu *genita'lē, Semin'ium, Genita'lē, Medul'læ, Ros, San'guis, Se'rum, Hu'mor genita'lis* seu *semina'lis* seu *vene'reus, Uri'na genita'lis, Genitu'ra, Sper'ma viri'lē, Spermi'um, Tho'rus, Lac ma'ris, Lagne'a, Lagni'a, Lagneu'ma, Ger'men, Vita'lē vi'rus, Male's milk, Prop'agatory* or *gen'ital liq'uor, Vi'tal* or *quick'ening ven'om,* (F.) *Semence, Fluide séminal.* A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculæ seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Aura semi'nis, Gonaur'a,* is incapable of effecting fecundation. The semen, at the time of emission, is composed of two differen-

fluids; the one liquid and transparent, which is considered to be the secretion of the prostate, — the other, white, and as thick as mucilage; the product of the testicular secretion. The sperm contains, according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous phosphate. The animal matter is peculiar, and by some termed *sper'matin*.

Microscopic observations show that it contains *spermatozo'a*, or more properly *spermatozo'ids*; for their animalcular nature is not demonstrated. They are produced in cells — *spermcells* — and have probably no more title to be considered animalcular, than the cilia of the ciliated epithelium. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *sem'inal gran'ules, gran'ula sem'inis*. Pure sperm, in its most perfect state, consists principally of spermatozoids and seminal granules; both of which are enveloped in a small quantity of fluid, *li'quor sem'inis, spermat'ic liquor*.

It has been imagined, but erroneously, that during coition there is a secretion of female sperm — *Semen muli'ebrē, Thelyg'onum*. The increased secretion that takes place is chiefly from the glands of Duverney.

Sperm also means spermaceti.

Sperm Cell, see Sperm.

SPERMA, Sperm — s. Mercurii, Hydrargyrus acetatus.

Sperma Rana'rum, *Sperni'ola* seu *Sperni'olum* seu *Spermi'ola* seu *Spermi'olum rana'rum*. Frog's spawn. Once used in medicine.

SPERMACETI, (*sperma*, and *cetus*, 'a whale,') Cetaceum—s. Whale, see Cetaceum.

SPERMACRASIA, (*sperma*, *a*, priv. and κρασις, 'mixture.') Spermatorrhœa.

SPERMATACRASIA, Spermatorrhœa.

SPERMATACRATIA, (*sperma*, *a*, priv. κρατος, 'power,') Spermatorrhœa.

SPERMAT'IC, *Spermat'icus, Semina'lis, Sem'inal*, (F.) *Spermatique*, (σπερματικος, from *sperma*.) That which relates to the sperm. A name given to different parts connected with the organs of generation.

Spermatic Ar'teries, *Arte'riæ Spermat'icæ* seu *præparan'tes*, (F.) *Artères testiculaires, A. de l'ovaire* (Ch.), are two in number — one on each side—and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic cord, and divides into fasciculi of branches, one of which goes to the testicle, — the other to the epididymis. In the female, the spermatic artery, *ova'rian* or *uterovarian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

Spermatic Cord or Chord, *Testic'ular Cord, Funic'ulus Spermat'icus, Spermatochord'a*, (F.) *Cordon spermatique* ou *testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibrocellular cord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which encysted hydrocele of the spermatic cord occurs. All these parts are united together by a very lax, areolar tissue, and surrounded by coats, which, reckoning from without, are: — 1. The skin and areolar membrane. 2. A fibrocellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the cord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic cord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends almost vertically, from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other: — the vas deferens descending into the pelvis to pass behind the bladder;—the bloodvessels and lymphatics ascending towards the lumbar region, &c.

Spermatic Filaments, Spermatozoa—s. Fluid, Sperm.

Spermatic Gang'lion. A large ganglion, formed by branches from the hypogastric ganglion, and from the spermatic plexus. It supplies the fundus uteri. Besides these ganglia, Dr. Robt. Lee describes *ves'ical* and *vag''inal ganglia*, and anterior and posterior *subperitone'al ganglia* and *plexuses*, which communicate with the preceding, and constitute an extensive nervous rete over the entire uterus.

Spermatic Liquor, Liquor seminis, see Sperm.

Spermatic Pas'sages or Ways, *Vi'æ Spermat'icæ*, are the canals concerned in the excretion of semen. See Testicle.

Spermatic Plex'uses of nerves, *Plex'us testicula'res*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female,—*ova'rian nerves*. They cannot be traced into the substance of these organs.

Spermatic Veins — *ve'næ spermat'icæ*—are two or three in number on each side. They accompany the spermatic artery, and open—those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermat'ic plex'us* and *corpus varico'sum*; and another plexus before the psoas muscles, called the *Cor'pus pampiniformē*.

SPERMATIN, see Sperm.

SPERMATIQUE, Spermatic.

SPERMATIS'MUS, *Emis'sio sem'inis, Spermob'olē*, (from *sperma*.) The emission of sperm.

Sperm'atism or *Animal'culism* is the doctrine which maintains that the embryo is produced by the so called spermatic animalcules.

SPERMATIST, Animalculist.

SPERMATOCE'LE, *Hernia semina'lis scro'ti, Oscheocel'ē semina'lis, Gonocel'ē*, (*sperma*, and κηλη, 'a tumour.') The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, varicocele.

SPERMATOCHORDA, (*sperma*, and *chorda*,) Spermatic chord.

SPERMATOCLEMMA, (*sperma*, and κλεπτω, 'to steal,') see Pollution.

SPERMATOCLEPSIS, see Pollution.

SPERMATOCYSTIDES, (*sperma*, and κυστις, 'a bladder,') Vesiculæ seminales.

SPERMATOCYSTI'TIS, (*spermatocystis*, and *itis*.) Inflammation of a vesicula seminalis.

SPERMATOCYSTIDORRHAG''IA, *Caulorrhag''ia ejaculato'ria, Hæmatu'ria ejaculato'ria* seu *semina'lis*, (*spermatocystides*, and ῥαγη, 'a

breaking forth.') A discharge of blood from the urethra in the act of ejaculation of sperm.

SPERMATODES, (σπερματωδης, from *sperma*, and *odes*,) Gonoides.

SPERMATOGON'IA, *Spermogon'ia*, *Spermatopœi'a*, *Spermatopoë'sis*, *Spermi'um*, (*sperma*, and γενναω, 'to beget.') The preparation or secretion of sperm.

SPERMATOID, (*sperma*, and ειδος, 'resemblance,') Gonoides.

SPERMATOLEPSIS, (*sperma*, and ληψις, 'a taking away.') see Pollution.

SPERMATOLIPSIS, see Pollution.

SPERMATOL'OGY, *Spermatolog''ia*, (*sperma*, and λογος, 'a discourse.') A treatise on sperm.

SPERMATOPH'OROUS, *Seminif'erous*, (*sperma*, and φερω, 'I carry.') Sperm bearing. The cells or granules in the sperm have been so called.

SPERMATOPŒIA, (*sperma*, and ποιεω, 'to make,') Spermatogonia.

SPERMATOPOESIS, Spermatogonia.

SPERMATOPOETIC, Spermatopœus.

SPERMATOPŒ'US, *Spermatopoët'icus*, *Spermatopoët'ic*, *Gonepœ'us*, *Gonepoet'icus*, *Gonopoet'icus*. Food to which has been attributed the property of augmenting the secretion of semen; and, consequently, of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHŒ'A, *Spermorrhœ'a*, *Spermacra'sia*, *Spermatoze'mia*, *Spermatacra'sia*, *Gonacra'sia*, *Gonacrati'a*, *Gonoze'mia*, *Spermatacrati'a*, *Gonorrhœ'a ve're*, (F.) *Flux de Sperme*, *Pollutions*, *Pertes séminales*, (*sperma*, and ῥεω, 'I flow.') An emission of sperm, without copulation. See Gonorrhœa, and Pollution.

SPERMATORRHŒA ATONICA, Gonorrhœa laxorum.

SPERMATOS'CHESIS, (*sperma*, and σχεσις, 'retention.') Retention or suppression of the spermatic secretion.

SPERMATOZEMIA, (*sperma*, and ζημια, 'loss,') Spermatorrhœa.

SPERMATOZO'A, pl. of *Spermatozo'on*, *Zoosperm'ata*, *Spermozo'a*, (*sperma*, and ζωον, 'animal.') *Animal'cula semina'lia* seu *spermat'ica*, *Fi'la spermat'ica*, *Corpus'cula sem'inis*, *Vermic'uli spermat'ici*, *Spermatozo'ïds*, *Protozö'ïde*, *Sem'inal* or *spermat'ic fil'aments*, *Spermat'ic* or *sem'inal animal'cules*, (F.) *Zoöspermes*, *Spermatozoäires*. Reputed animalcules seen in the sperm; by physiologists considered to be the formative agents furnished by the male in generation. See Sperm.

SPERMATOZOAIRES, Spermatozoa.

SPERMATOZOIDS, (*sperma*, ζωον, 'animal,' and ειδος, 'resemblance,') Spermatozoa.

SPERMIDUCT, (*sperma*, and *ductus*, 'a duct,') Deferens, vas.

SPERMIOLUM RANARUM, Sperma ranarum.

SPERMIUM, Sperm, Spermatogonia.

SPERMOBOLE, (*sperma*, and βαλλω, 'to throw,') see Ejaculation, Spermatismus.

SPERMOEDIA CLAVUS, (*sperma*, and οιδεω, 'to swell.'—the diseased seeds,') Ergot.

SPERMOGONIA, Spermatogonia.

SPERM'OLITH, *Spermol'ithus*, (*sperma*, and λιθος, 'a stone.') A calculus in the spermatic duct or vesicula seminalis.

SPERMONEURALGIA, (*sperma*, and *neuralgia*.) Neuralgia of the spermatic cord.

SPERMOPHLEBECTASIA, (*sperma*, φλεψ, 'a vein,' and εκτασις, 'dilatation.') A varicose condition of the spermatic veins.

SPERMORRHŒA, Spermatorrhœa.

SPERMOZOA, (*sperma*, and ζωον, 'animal,') Spermatozoa.

SPERNIOLUM RANARUM, Sperma ranarum.

SPEWING, (Sax. ꝑpipan; (Gr.) πτυω; (L.) *ptuo*, 'to spit,') Vomiting.

SPHAC''ELATED, *Sphacela'tus*, (F.) *Sphacélé*. Struck with sphacelus.

SPHACELATION, (from *sphacelus*,) Mortification.

SPHACÈLE, Sphacelus—*s. de la Bouche*, Cancer aquaticus.

SPHACELIA SEGETUM, (from *sphacelus*,) see Ergot.

SPHACELISMUS, Sphacelus — s. Cerebri, Phrenitis.

SPHAC''ELUS, (σφακελος,) *Gangræ'na Sphacelus*, *Sphacelis'mus*, *Cold mortifica'tion*, (F.) *Sphacèle*, *Gangrène froide*, (from σφαζω, 'I slay.') This word is used, by some, synonymously with gangrene; by others, with gangrene, when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthraconecro'sis*, which must be thrown off, — or is, in other words, totally dead. The foul disorganized portion of an ulcer—called the *slough* — must be considered a kind of sphacelus.

Sphacelus was formerly used to denote excessive pain; and also agitation from excessive pain, or violent emotion.

SPHACELUS CEREALIS, Ergotism — s. Nosocomialis, Hospital gangrene.

SPHÆRA, (σφαιρα, 'a ball,') Pila — s. Marina, Pila marina—s. Thalassia, Pila marina.

SPHÆRANTHUS INDICUS, (*sphæra*, and ανθος, 'a flower,') Adaca.

SPHÆ'RIA SINEN'SIS, (σφαιρα, 'a globe,') *Hia Tsao Tom Tchom*, *Hia Tsao Tong Tchong*, *Totsu Kaso*, *Sum'mer plant win'ter worm*, *Veg''etable cat'erpillar*. A fungus which projects from the neck of a lepidopterous insect. It is highly esteemed by the Chinese as a tonic, like ginseng.

SPHÆRIDION, (dim. of *sphæra*,) Globule, Pilula.

SPHÆRION, Globule, Pilula.

SPHÆROCEPHALA ELATIOR, (*sphæra*, and κεφαλη, 'head,') Echinops.

SPHÆROCOCCUS CRISPUS, (*sphæra*, and κοκκος, 'a berry,') Fucus crispus—s. Helminthochortus, Corallina Corsicana — s. Lichenoides, Fucus amylaceus.

SPHÆRULA GALENI, (dim. of *sphæra*,) Pilula.

SPHÆRULÆ SANGUINIS, Globules of the blood.

SPHAGE, (σφαγη,) Throat.

SPHENDONE, (σφενδονη, 'a sling,') Funda.

SPHENO, in the composition of anatomical terms, the sphenoid bone.

SPHENOCEPHA'LIA, (σφην, 'a wedge,' and κεφαλη, 'head.') Monstrosity, in which the head is wedge-shaped, owing to the projection of the anterior fontanel region.

SPHÉNO-ÉPINEUSE, 'sphenospinous,' (*Artère*,) Meningeal artery, middle.

SPHE'NOID, (σφηνοειδης,) *Sphenoï'des*, *Spheno'des*, *Sphenoïdeus*, *Sphenoïda'lis*, (F.) *Sphénoïde*, (σφην, 'a wedge,' and εἰος, 'resemblance.') Wedge-shaped. Hence,

SPHENOID BONE, *Sphenoïdes os*, *Os basila'rē* seu *cuneifor'mē* seu *cu'neo compara'tum* seu *sphenoida'lē* seu *multifor'mē* seu *az'ygos* seu *papilla'rē* seu *polymor'phon* seu *paxilla'rē* seu *baxilla'rē* seu *alæfor'mē* seu *sphecoï'deum* seu *vespifor'mē* seu *inconjuga'tum* seu *pterygoïdeum* seu *ala'tum* seu *colato'rii*, *Pter'ygoid bone*. An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An *infe'rior* or *gut'tural surface*, on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygopalatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid

canal; the foramina — ovale, spinale, &c. 2. A *supe'rior* or *cer'ebral sur'face*, on which are:—the clinoid processes; the pituitary fossa; the *fora'mina* (*ovale, rotundum*, and *spinale*); the *Apophysis of Ingrassias* or *lesser wing*; the foramen opticum, &c. 3. An *occip'ital* or *poste'rior sur'face*, which is articulated with the basilary process of the occipital bone. 4. An *ante'rior* or *or'bitar na'sal sur'face;* having, anteriorly, a *crista* to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses* or cells. 5. Two *zygo'matotem'poral* or *exter'nal sur'faces*, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion;* and *alæ*, which are four in number, and are subdivided into *great* (*Temporal Plates* or *Wings, A'læ mag'næ*) and *little* (*Apophyses of Ingrassias, A'læ mino'res, Processus ensiform'es*).

The *Sphenoid suture* surrounds the bone.

Sphenoid, Spinous Process of the, Sphenoid spine.

SPHENOID'AL, *Sphenoïda'lis*. That which belongs or relates to the sphenoid bone.

Sphenoidal Cells, see Sphenoid bone.

Sphenoidal Cor'nua, *Cor'nua Sphenoïda'lia, Ossic'ula Berti'ni, Ossa triangula'ria, Pyr'amids of Wis'tar*, (F.) *Cornets sphénoïdaux* ou *de Bertin, Osselets de Bertin*. Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards, and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

Sphenoidal or Supe'rior Or'bitary Fis'sure, *Fora'men lac''erum supe'rius*, (F.) *Fente sphénoïdale*, is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit, between which and the cranium it is a means of communication, and transmits the third, fourth, and sixth pair of nerves, and the first branch of the fifth pair, to the eye and its appendages.

Sphenoidal Sinuses, see Sphenoid.

Sphenoidal Spine, *Spi'na* seu *Cris'ta sphenoïda'lis*, (F.) *Épine sphénoïdale, Spi'nous Proc''ess of the Sphenoid;* — 1. A projecting crista at the inferior surface of the sphenoid bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale* (Ch.), met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

SPHENOIDES, (σφηνοειδης,) Cuneiform, Sphenoid—s. Os, Sphenoid bone.

SPHENOMAX'ILLARY, *Sphenomaxilla'ris*. That which relates to the sphenoid and maxillary bones.

Sphenomaxillary Fis'sure, *Infe'rior or'bitar Fis'sure*, (F.) *Fente sphéno-maxillaire* ou *orbitaire inférieure;* called, also, *Fora'men lac''erum infe'rius* seu *sphenomaxilla'rē*, is situate at the posterior part of the angle formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbitar cavity and the zygomatic fossa.

Sphenomaxillary Fos'sa is a name given by some anatomists to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

SPHENOÖR'BITAR. A name given by Béclard to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

SPHENOPAL'ATINE, *Sphenopalati'nus*. That which relates to the sphenoid and palate bones.

Sphenopalatine Ar'tery, *Large lat'eral na'sal A.*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the sphenopalatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

Sphenopalatine Fora'men is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

Sphenopalatine Gan'glion, *Gan'glion of Mec'kel, Sphenoïdal G.* (Ch.). A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphænopalatinum, in the pterygomaxillary fissure. It seems suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off *internal* or *sphenopalatine filaments, inferior* or *palatine filaments*, and a *posterior filament*, which is the *Vidian* or *pterygoid nerve*.

Sphenopalatine Nerves, *Lat'eral nasal nerves*, arise from the ganglion — just described — at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are five or six in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*.

SPHENOPALATINUS, Levator palati.

SPHENOPARI'ETAL, *Sphenoparieta'lis*. That which belongs or relates to the sphenoid and parietal bones.

Sphenoparietal Su'ture is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENOPTERYGOPALATINUS, Circumflexus — *s. Salpingo-malléen*, Laxator tympani — s. Salpingostaphylinus, Circumflexus.

SPHENOSIS, (σφηνωσις,) see Wedged.

SPHENOSTAPHYLINUS, Levator palati.

SPHENOTEMP'ORAL, *Sphenotempora'lis*. That which belongs to the sphenoid and temporal bones.

Sphenotemporal Su'ture is the suture at the articulation of the great alæ of the sphenoid bone with the squamous portion of the temporal. Béclard gave the name *sphenotemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHEX, (σφηξ,) Wasp.

SPHINC'TER, gen. *Sphincte'ris*, (σφιγκτηρ,) *Constric'tor, Mus'culus constricto'rius*, (from σφιγγω, 'I constrict.') A name given to several annular muscles, which constrict or close certain natural openings.

Sphincter A'ni, *Annula'ris A'ni*. Many anatomists have described two sphincter muscles of the anus:—1. The *S. exter'nus* seu *cuta'neus, Aspidis'cus, Coccygio-cutané-sphincter, Orbicula'ris Rec'ti, Constric'tor A'ni, Coccygio-anal*, (Ch.) It is situate around the anus; is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, arcolar substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversi perinæi muscles. This muscle contracts and closes the anus. 2. The *in'ner* or *inter'nal Sphinc'ter A'ni, Sphinc'ter intestina'lis* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the infe-

roir extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

Sphincter Gulæ, Constrictores pharyngis — s. Ilei, Bauhin, valve of — s. Intestinalis, Sphincter ani internus—s. Labiorum, Orbicularis oris — s. Oculi, Orbicularis palpebrarum — s. Palpebrarum, Orbicularis palpebrarum — s. Pylori, see Pylorus — s. Vaginæ, Constrictores cunni — s. Ventriculi, Pylorus.

Sphincter Vesi'cæ, *Sphinc'ter of the blad'der.* Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name Pseudosphincter to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening. See Compressor urethræ.

SPHONDYLIUM, (*σφονδυλιον,*) Heracleum spondylium.

SPHONGUS, (*σφογγος,*) Fungus, Spongia.

SPHRAGIDONYCHARGOCOME'TA, (*σφραγις,* 'a seal,' *ονυξ,* gen. *ονυχος,* 'a nail,' *αργος,* 'white,' or perhaps *αργυρος,* 'silver,' and *κομεω,* 'I adorn.') A charlatan who adorned his fingers to the very nails with rings.

SPHYGMA, (*σφυγμη,*) Pulse.

SPHYG'MIC, *Sphyg'micus,* (F.) *Sphygmique,* (from *sphygma.*) Relating to the pulse; pulsatory.

Sphygmic Art, Sphygmologia.

SPHYGMICA DOCTRINA, Sphygmologia.

SPHYGMICUS, (*σφυγμικος,*) Throbbing.

SPHYGMOCEPHALUS, (*σφυγμος,* 'pulse,' and *κεφαλη,* 'head,') Crotaphe.

SPHYGMODES, (*σφυγμωδης,* from *sphygmus,* and *odes,*) Throbbing.

SPHYG'MOGRAPH, (*sphygmus,* and *γραφω,* 'I describe.') An instrument which, when applied over an artery, idicates the character of the pulse as to force and extent of undulations.

SPHYGMOLEGIUM, (*sphygmus,* and *lego,* 'I read,') Pulsilegium.

SPHYGMOLOGE, (F.) *Sphygmolog''ium,* (*sphygmus,* and *λεγειν,* 'to indicate.') An instrument for showing the quickness or other qualities of the pulse.

SPHYGMOLOG''IA, *Sphygmol'ogy, Sphyg'mica Doctri'na, Ars Sphyg'mica,* (*sphygmus,* and *λογος,* 'a description.' The doctrine of the pulse.

SPHYGMOMETER, Pulsilegium.

SPHYGMOSCOPE, (*sphygmos,* and *σκοπεω,* 'to examine,') Pulsilegium.

SPHYGMOSCOPIUM, Pulsilegium.

SPHYGMUS, (*σφυγμος,*) Pulsation, Pulse.

SPHYRA, (*σφυρα,*) Malleolus.

SPHYRON, (*σφυρον,*) Malleolus.

SPHYXIS, (*σφυξις,*) Pulsation.

SPIC, Lavandula Spica.

SPI'CA, *Fas'cia re'pens, Spi'ca ban'dage,* (F.) *Épi.* A bandage so called in consequence of its somewhat resembling a *spike* of barley. The turns of the bandage cross like the letter V;—each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending.* It may be applied over various parts of the body, and in a different manner in each case: thus, there is the *Spica* seu *Fas'cia inguina'lis, Spica inguina'lis duplex,* the spica for the shoulder, and another for the thumb.

Spica, Lavandula Spica — s. Alpina, Valeriana Celtica—s. Celtica, Valeriana Celtica — s. Indica, Nardus Indica—s. Nardi, Nardus Indica.

SPICE, see Species.

SPICEBERRY, Gaultheria, Laurus Benzoin.

SPICEBUSH, Laurus Benzoin.

SPICES, FOUR, see Myrtus pimenta.

SPICEWOOD, Laurus Benzoin.

SPICILLUM, Specillum.

SPIDER, (from *spin* [?]), see Aranceæ tela.

SPIDER'S WEB, Araneæ tela.

SPIDERWORT, Liliago, Tradescantia Virginica.

SPIGELIA, (after Adrian Spigelius, the anatomist,) S. Marilandica.

Spige'lia Anthel'mia, *Demera'ra Pink'root,* (F.) *Spigélie anthelmintique, Brinvilliers, Brinvillière,* a native of South America and the West India Islands, has properties like the

Spigelia Marilan'dica, *S. Lonice'ra, Anthel'mia, Lonice'ra Marilan'dica,* (F.) *Spigélie du Maryland; Peren'nial Wormgrass* or *In'dian Pink, Caroli'na Pink, Star'bloom, Worm'root. Nat. Ord.* Gentianaceæ. *Class,* Pentandria. *Order,* Monogynia. Indigenous. The root — *Spigelia* (Ph. U. S.), *Pinkroot*—is celebrated as an anthelmintic, particularly in cases of lumbrici.

It is, also, asserted to have been found serviceable in remittent fever. It is a narcoticoäcrid. Dose, gr. x to ʒss.

SPIGNEL, Æthusa meum.

SPIKENARD, (*spica,* 'a spike,' and *nardus,* 'nard,') Conyza squarrosa, Nardus Indica — s. American, Aralia racemosa — s. False, Smilacina racemosa — s. Small, Aralia nudicaulis — s. Tree, Aralia spinosa.

SPILANTHES, Spilanthus.

SPILAN'THUS ACMEL'LA, *S. cilia'ta* seu *fimbria'ta, Spilan'thes acmel'la,* (*σπιλος,* 'a spot,' and *ανθος,* 'a flower,' owing to its dotted or speckled flower,) *Bi'dens acmel'la, Achmel'la, Acmel'la, A. Mauritiu'na, Verbesi'na acmella, Balm'-leaved Spilan'thus. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia æqualis. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diurotic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.

Spilanthus, Balm-leaved, Spilanthus acmella — s. Ciliata, S. acmella — s. Fimbriata, S. acmella.

Spilanth'us Olera'ceus, *Spearleaved Spilan'thus, Bidens fer'vida,* (F.) *Cresson de Para.* A tincture of the plant has been recommended in toothache, (F.) *Paraguay-roux.*

SPILI, (*σπιλος,* 'a spot or stain,') see Nævus.

SPILOMA, (*σπιλωμα,*) see Nævus.

SPILOPLAXIE, (*σπιλος,* 'a spot,' and *πλαξ,* 'a plate,') Elephantiasis of India.

SPILOSIS, (from *σπιλος,* 'a spot,' and *osis,*') Epichrosis — s. Ephelis, Ephelides — s. Poliosis, Poliosis.

SPILS'BURY'S ANTISCORBU'TIC DROPS. An empirical preparation, formed of *hydrarg. oxymur., rad. gentian., cort. aurant.* sicc. ää ʒij; *antimon. crud., santal. rubr.* ää ʒj; *spiritus vini rectif., aquæ,* ää ʒviij.

SPI'NA, 'a thorn;' *Spine,* (F.) *Épine,* old [F.] *Espine.* A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name are:—the *nasal spine,* the *spine of the scapula,* the *spine of the ischium,* the *four iliac spines,* the *palatine spine,* the *maxillary,* the *sphenoid,* &c. The *spine of the back* is the collection of vertebræ constituting the *vertebral column.*

Spina, Penis—s. Acida, Oxyacantha Galeni—s. Ægyptiaca, see Acaciæ gummi — s. Alba, Carduus marianus, Mespilus oxyacantha, Onopordon acanthium — s. Bifida, see Hydrorachis — s. Cervina, Rhamnus—s. Domestica, Rhamnus—s. Dorsi, Vertebral column—s. Dorsi introrsum flexa, Lordosis—s. Ferrea, Pin—s. Helmontii, *Aignillon*—s. Hirci, Astragalus verus — s. Infectoria, Rhamnus — s. Nasi, see Nasus — s. Nodosa, Rachitis — s. Sphenoidalis, Sphenoidal spine.

Spina Vento'sa, *Spi'næ ventos'itas, Tere'do,*

Ostarthroc'acē, Fun'gus seu *Tu'mor fungo'sus artic'uli, Lu'pia junctu'ræ, Hyperspon'gia, Fla'tus spi'næ, Arthroc'acē, Pædarthroc'acē, Sidera'tio Os'sis, Can'cer* seu *Gangræ'na Os'sis, Exosto'sis, White Swel'ling* (of some). A term of no definite meaning; as is obvious from these various words having been considered its synonymes. By some, it is defined to be—a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteosarcoma. By others, it is considered to be a tumour arising from an internal caries of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes. See, also, Hydrarthrus, and Mollities Ossium.

Spina Vertebralis, Vertebral column.

SPINACH, Spinacia.

SPINACHIA, Spinacia.

SPINA'CIA, *Spina'chia, Spina'cia olera'cea, Spin'age, Spin'ach,* (from *spina,* 'a thorn or prickle,') (F.) *Epinard. Ord.* Chenopodiaceæ. *Sex. Syst.* Dœcia Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

Spinacia Oleracea, Spinacea.

SPINÆ, (pl. of *spina,*) Spinous processes — s. Ventositas, Spina ventosa.

SPINAGE, Spinacia.

SPI'NAL, *Spina'lis, Spino'sus, Spina'tus, Rhachi'tes, Rachid'ian,* (F.) *Épinière, Rachidien,* (from *spina,* 'spine.') That which relates to the vertebral column.

Spinal Accessory, Spinal nerve.

Spinal Ar'teries, *Arte'riæ spina'les,* are two in number, viz.: 1. The *poste'rior spi'nal, Artère médiane postérieure du Rachis,* (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The *ante'rior spi'nal ar'tery, A. médiane antérieure,* (Ch.,) is larger than the last, and rises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spi'nal Ar'teries* or *Rachid'ian Ar'teries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

Spinal Cord, Medulla spinalis.

Spinal Foram'ina, (F.) *Trous rachidiens,* in the abstract, are the foramina formed by every two contiguous vertebræ, through which the spinal nerves issue. See Vertebral. The term *Fora'men Spina'lē* seu *spino'sum* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Fora'men sphenospino'sum,* (F.) *Trou Sphéno-épineux* ou *petit rond, Trou épineux.*

Spinal Ganglion, see Encephalon.

Spinal Irrita'tion, *Rhachialgi'tis, Rhachial'gia, Neural'gia spina'lis, Notal'gia.* A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebræ or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counterirritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revelent impression on a very sensible portion of the cutaneous surface.

Spinal Marrow, Medulla spinalis.

Spinal Nerve, *Ac'cessory of the Par va'gum* or *8th pair, Ac'cessory nerve of Wil'lis. Spi'nal Ac'cessory, Supe'rior res'piratory N., Elev'enth pair of encephal'ic nerves,* (F.) *Spino-cranio-trapézien, Trachélo-dorsal* (Ch.), arises from the medulla spinalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves, at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleidomastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle. The pneumogastric and spinal accessory nerves together—*nervus vagus cum accesso'rio*—resemble the spinal nerves; the former, with its ganglion, being the posterior root; the latter the anterior.

The spinal accessory appears to be the nerve of voice—*vocal nerve.*

Spinal Nerves, Vertebral nerves — s. Prolongation, Medulla spinalis.

Spinal System of Nerves, see Nerves.

SPINALES COLLI MINORES, Interspinales colli — s. et Transversales lumborum, Transversalis dorsi.

SPINALIS CERVICIS, Semispinalis colli—s. Colli, Semispinalis colli.

Spina'lis Dor'si, *Spina'lis dor'si ma'jor,* (F.) *Grand épineux du dos.* Winslow calls thus some fleshy fasciculi, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transversospinalis of most authors. The same anatomist calls — *Spina'lis Dor'si mi'nor, Petit épineux du dos* — some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to another. Like the preceding, they form part of the transversospinalis. All these fleshy fasciculi strengthen the vertebral column.

SPINATI, Interspinales colli.

SPINATUS, Spinal.

SPINDLE TREE, Euonymus Americanus.

SPINE, Spina, Vertebral column — s. Curvature of the, Gibbositas—s. Hæmal, Sternum — s. Neural, Spinous process.

SPINGEL, Anethum.

SPINIÄXOIDOÖCCIPITALIS, Rectus capitis posticus major — *s. Axoïdo-trachéli-atloïdien.* Obliquus inferior capitis.

SPINITIS, (*spina,* 'the spine,' and *itis,*) Myelitis.

SPINNICK, Nanus.

SPINODORSITIS, (*spina, dorsum,* 'the back,' and *itis,*) Myelitis.

SPINOLA, (from *spina,* 'the spine,') see Hydrorachis.

SPINOSUS, (from *spina,* 'the spine,') Spinal.

SPI'NOUS, *Spino'sus,* (F.) *Épineux,* (from *spina,* 'a thorn.') Having the shape of a spine or thorn.

Spinous Proc''esses or Apoph'yses *of the Ver'tebræ, Acan'thæ, Spi'næ, Cynol'uphoi, Neu'ral Spines* of Owen, (F.) *Apophyses épineuses,* are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See Vertebra.

SPINTHEROPIA, (σπινθηρ, 'a spark, and ὀψις, 'vision,') Confusio.

SPINULA, (dim. of *spina*, 'a thorn,') Pin.

SPIRAC'ULA, (pl. of *spiraculum*,) (F.) *Spiracules*, (from *spiro*, 'to breathe,') 'breathing holes.' Respiratory pores of the skin.

SPIRÆ CEREBRI, (σπειρα, *spira*, 'a fold, a winding,') Convolutions, cerebral.

SPIRÆA DENUDATA, (from *spira*, 'a spire,') S. ulmaria.

SPIRÆA FILIPEN'DULA, *Filipendula*, *Saxif'raga ru'bra*, *Drop'wort*, (F.) *Filipendule*. *Ord.* Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

SPIRÆA LOBA'TA, *S. Palma'ta*, *Queen of the Pra'irie*, *Amer'ican Mead'ow-sweet*. An oil, resembling oleum gaultheriæ, is obtained from the roots and stems.

SPIRÆA OPULIFO'LIA, *Opulus-leaved Spiræa*, *Nine Bark*, has similar properties.

SPIRÆA PALMATA, S. lobata.

SPIRÆA TOMENTO'SA, *Hard'hack*, *Red mead'ow-sweet*, *Stee'plebush*, *Ro'sy bush*, *Whiteleaf*. The root of this indigenous species, *Spiræ'a* (Ph. U. S.), which is abundant in the northern States of the Union, is tonic and astringent; and is usually administered either in the form of extract or decoction, (*Spiræ*, ℥ss; *Aquæ*, Oj.)

SPIRÆA TRIFOLIATA, Gillenia trifoliata.

SPIRÆA ULMA'RIA, *S. denuda'ta*, *Ulma'ria*, *U. palus'tris*, *Regi'na Pra'ti*, *Bar'ba ca'præ*, *Bar'bula capri'na*, *Mead'ow Sweet*, *Queen of the Mead'ows*, (F.) *Ulmaire*, *Spirée ulmaire*, *Reine des Prés*, *Vignette*, *Herbe aux Abeilles*. The leaves have been recommended as mild astringents and diuretics—the flowers as antispasmodics and diaphoretics.

SPIRAMENTA PULMONUM, 'airholes of the lungs,' (from *spirare*, 'to breathe,') see Pulmo.

SPIRAMENTUM ANIMÆ, 'airhole of the breath,' Pulmo.

SPIRAMINA PALPEBRARUM, 'pores of the eyelids,' Lachrymal puncta—s. Pulmonum, see Pulmo.

SPIRATIO, (*spirare*, *spiratum*, 'to breathe,') Respiration.

SPIRÉE ULMAIRE, Spiræa ulmaria.

SPIR'IT, *Spir'itus*, (*spirare*, 'to breathe, to exhale;') (F.) *Esprit*, *Alcoolat*. A name given to every liquid product of distillation. Spirits were formerly distinguished into—*inflammable*, *acid*, and *alkaline*; and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief:

Arrack'. Distilled from coarse palm sugar, named *jaggery*; fermented with the bark of the *Mimo'sa leucophle'a*; also from rice and the fermented juice of the Palm; made in India. Its varieties are:—

1. *Mah'wah Arrack'*. Made in India from the flowers of the Madhuca tree, *Bas'sia butyra'cea*.

2. *Tuba*. Made from palm wine, in the Philippine Islands. See Arack.

Araka. Distilled, by the Tartars, from koumis, fermented mares' milk.

Araki. Distilled from dates, by the Egyptians.

Arika. A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

Bran'dy. Distilled from wine, figs, peaches, persimmon, apple, mulberries, and sometimes other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. *Aguardiente*, (S.) In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco*, so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavour, is made from Muscatel grapes, and is called *Aguardiente de Italia*. It is sometimes seen in the United States.

2. *Lau*. Made from rice, in Siam.

3. *Rakia*. Made in Dalmatia from the husks of grapes mixed with aromatics.

4. *Rossolio*. Made at Dantzic, from a compound of brandy, rossolis, and other plants.

5. *Troster*. Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. *Sekiskayavodka*. Made from the lees of wine and fruit at Scio.

Gene'va, *Hol'lands*, (*genièvre*, French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

Gin. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

Goldwasser. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

Kirschwasser. Distilled from the Malacheb cherry, in Switzerland.

Maraschino, *Marasqui'no*. Distilled from the Macarska or Marasca cherry, at Zara, the capital of Dalmatia.

Rum, (supposed to be derived from the terminal syllable of the word *saccharum*: but this is questionable Distilled, in the West Indies and South America, from canesugar and molasses, and in North America from maplesugar. Its variety is—

Sakee, *Saki*. A Japanese beverage, distilled from rice.

Slatkaia trava. Made in Kamtschatka, from a sweet grass.

Showchoo. Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

Whis'ky, (supposed to be derived from *usque*, the first two syllables of *usquebaugh*, the original name in Ireland,—itself from Irish *uisge* and *beatha*, 'life,' *Uisge beatha*, *Aqua vitæ*, 'Water of life.' (Distilled, in Scotland and Ireland, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes.) In Ireland it was called *builceaun*, or madness of the head. The best Scotch whisky is *Glenliv'et*, the best Irish, *Enniskow'en*.

Whisky, *Spir'itus Frumen'ti*, is officinal in the Pharmacopœia of the United States. It is the spirit obtained from fermented grain by distillation, and contains from 48 to 56 per cent. of absolute alcohol.

Y-wer-a. Distilled, in the Sandwich Islands, from the root of the Teeroot, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Affghanistans, from ewes' milk; and that made in Kamtschatka, from a species of mushroom, named *muchumer*.

SPIRIT OF AMMONIA. FETID, Spiritus ammoniæ fœtidus—s. of Ammonia, succinated, Spiritus ammoniæ succinatus—s. of Aniseed, Spiritus anisi.

SPIRIT, BATHING, FREEMAN'S, see Linimentum, saponis compos.—s. Bathing, Jackson's, see Linimentum saponis compos. — s. Bezoardic of Bussius, see Bussii spiritus Bezoarticus—s. Bone, Liquor volatilis cornu cervi.

SPIRIT OF BURRHUS, Burrhi spiritus matricalis — s. of Cajeput, see Caieput oil — s. of Camphor, Spiritus Camphoræ—s. of Carraway, Spiritus carui — s. of Chloroform, Spiritus chloroformi — s. of Colchicum, ammoniated, Spiritus colchici ammoniatus — s. of Cinnamon, Spiritus cinnamomi — s. of Ether, Spiritus ætheris sulphurici—s. of Ether, aromatic, Spiritus ætheris aromaticus.

Spirit, Fuming, of Beguin, Ammoniæ sulphuretum—s. Fuming, of Boyle, Ammoniæ sulphuretum.

Spirit of Hartshorn, Liquor volatilis cornu cervi—s. of Horseradish, compound, Spiritus armoraciæ compositus — s. of Juniper, compound, Spiritus juniperi compositus—s. of Lavender, Spiritus lavandulæ—s. of Lavender, compound, Spiritus lavandulæ compositus—s. of Lemon, Spiritus Limonis — s. of Mindererus, Liquor ammoniæ acetatus — s. of Myrcia, Spiritus myrciæ — s. of Nitre, sweet, Spiritus ætheris nitrici—s. of Nitric ether, Spiritus ætheris nitrici—s. of Pennyroyal, Spiritus pulegii—s. of Peppermint, Spiritus menthæ piperitæ—s. of Pimento, Spiritus pimentæ.

Spirit, Proof, Spiritus tenuior — s. Pyroxylic, Spiritus Pyroxylicus.

Spirit of Rosemary, Spiritus rosmarini—s. of Salt, Muriaticum acidum — s. of Scurvygrass, golden, see Spiritus armoraciæ compositus—s. of Spearmint, Spiritus menthæ viridis—s. of Sulphuric ether, Spiritus ætheris sulphurici — s. of Sulphuric ether, compound, Spiritus ætheris sulphurici compositus—s. of Turpentine, Oleum terebinthinæ rectificatum.

Spirit, Verdigris, Aceticum acidum.

Spirit of Vitriol, Sulphuric acid—s. of Wine, Spiritus rectificatus — s. of Wine and camphor, Spiritus camphoræ.

Spirit, Wood, Spiritus Pyroxylicus.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUOUS, (from *spiritus*,) Alcoholic.

SPIRITUS, (*spirare*, 'to breathe,') Breath, Life, Respiration, Spirit—s. Ætherеus nitrosus, Spiritus ætheris nitrici — s. Ætherеus vitriolicus, Spiritus ætheris sulphurici.

Spir'itus Æ'theris Aromat'icus, *Æ'ther Sulphu'ricus cum alcoho'lē aromat'icus, Elix'ir vitri'oli dul'cē, Sweet Elix'ir of Vit'riol, Viga'ni's Elix'ir of Vit'riol, Aromat'ic Spir'it of E'ther.* (*Cinnam. cort.* contus. ʒij, *Cardam. sem.* contus. ʒiss, *Piperis longi fruct.* cont., *Zingib. rad.* concis. sing. ʒj, *Spiritûs ætheris sulphuric.* Oj. Macerate, for 14 days, in a stopped glass vessel, and strain. *Ph. L.*) It is used as a stimulant in nervous affections. Dose, fʒss to fʒj.

Spiritus Ætheris Chlorati, Spiritus ætheris muriatici—s. Ætheris compositus, Spiritus Ætheris sulphurici compositus — s. Ætheris hydrochlorici, Spiritus Ætheris muriatici.

Spiritus Æ'theris Muriat'ici, *Sp. Æ. Hydrochlo'rici, Sp. Æ. chlora'ti, Sp. Æ. Muriat'icus, Sp. Muriat'icus æthe'reus, Sp. Sa'lis dul'cis, Æ'ther Muriat'icus alcohol'icus* seu *chlora'tus alcohol'icus, Spir'it of hydrochlo'ric* or *muriat'ic e'ther, Dulcified marine ac'id.* An old preparation, made by adding one part of *Muriatic acid* to three parts of *Rectified spirit*, and distilling. Its action is like that of the spiritus ætheris nitrici.

Spiritus Æ'theris Ni'trici, (Ph. U. S. 1851,) *Sp. Æ'theris nitro'si* (Ph. U. S. 1863 and Ph. B. 1864) seu *ni'tri dul'cis* seu *Æthe'reus nitro'sus, Æ'ther ni'tricus alcoolisa'tus,* seu *nitricoälcoholicus, Ac'idum Ni'tri dulcifica'tum, Sweet Spir'it of Ni'tre, Ni'tre drops, Spir'it of Ni'tric E'ther,* (F.) *Éther azoteux alcoolisé, Liqueur anodine nitreuse.* (*Nitrate of Potassa*, in coarse powder, ℔ij, *Sulphuric acid*, ℔iss; *Alcohol*, Oixss; *Diluted Alcohol*, Oj; *Carbonate of Potassa*, ʒj. Mix the nitrate of potassa and the alcohol in a largo glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours: then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of potassa, and again distil a gallon. — Ph. U. S.) A modified form is given in the Ph. U. S. for 1863, s. g. 0·837, Ph. B. (1864), 0·843. In the latter it is distilled from a mixture of *Sulphuric acid* and *Rectified spirit* poured on *Nitrite of soda*. It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, gtt. xxv to fʒj. Specific gravity, 0·834.

Spiritus Ætheris Oleosus, Spiritus Ætheris sulphurici compositus, Oleum æthereum.

Spiritus Ætheris Sulphu'rici, *Sp. Æ'theris, Æ'ther Sulphu'ricus cum Alcoho'lē, Li'quor Æthe'reus Sulphu'ricus, Spir'itus Vitri'oli dul'cis, S. Æ'theris vitriol'ici, Li'quor Sulphu'ricus alcoolisa'tus, Spir'it of Sulph'uric Ether.* (*Æther. sulphuric.* Oss; *Sp. rect.* Oj. Mix. Ph. L.) Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, fʒss to fʒiij.

Spiritus Æ'theris Sulphu'rici Compos'itus, (Ph. U. S. 1842), *S. æ'theris vitriol'ici compos'itus Éther hydrique alcoolisé, Éther sulfurique alcoolisé,* seu *Æ'theris compos'itus* (Ph. U. S., 1863) seu *Spir'itus æthe'reus oleo'sus, Li'quor anod'ynus* seu *anod'ynus minera'lis Hoffman'ni, Com'pound Spir'it of Sulph'uric Ether, Hoff'mann's Anodyne Li'quor,* (F.) *Esprit d'Éther sulfurique, Liqueur anodine d'Hoffmann.* (*Æther.* Oss; *Alcohol*, Oj; *Æther.* fʒiij. Mix.) A stimulant and antispasmodic. Specific gravity, 0·816.

Spiritus Ætheris Vitriolici Compositus, Spiritus ætheris sulphuric. comp.

Spiritus Ammo'niæ, *Al'kali ammoni'acum spirituo'sum, Al'cohol ammonia'tum, Sp. sa'lis ammoni'aci, Sp. sa'lis ammoni'aci vino'sus* seu *dul'cis* seu *dulcifica'tus, Ammoni'aca alcoholisa'ta, Li'quor ammo'nii vino'sus, L. ammo'niæ spirituo'sus, Lixiv'ium ammoniaca'lē vino'sum, Solu'tio subcarbona'tis ammoni'aci spirituo'sa,* (F.) *Esprit d'ammoniaque.* (*Ammon. muriat.* in pulv. subtilissim., *Calcis*, āā ℔j; *Alcohol*, fʒxx; *Aquæ*, Ovj. The water is employed to slake the lime; the muriate of ammonia is then well mixed with it, and by means of heat the ammonia is made to pass into the distilled water contained in a quart bottle. Ph. U. S.) Stimulant and antispasmodic. Dose, fʒss to fʒj.

Spiritus Ammo'niæ Aromat'icus, *Al'cohol ammonia'tum aromat'icum, Spir'itus sa'lis volat'ilis oleo'sus* seu *volat'ilis aromat'icus* seu *ammo'niæ compos'itus* seu *oleo'soäromat'icus Syl'vii, Sal volat'ilē oleo'sum Syl'vii, Tinctu'ra aromat'ica ammonia'ta, Li'quor oleo'sus Syl'vii, L. Ammo'nii aromat'icus* seu *æthe'reus* seu *oleo'soäromat'icus, Lixiv'ium ammoniaca'lē aromat'icum, Aromat'ic ammonia'ted Al'cohol, Sal volat'ilē Drops.* (*Ammon. muriat.* ʒv; *Potass. carb.* ʒviij; *Cinnam.* cont., *Caryophyll.* cont. āā ʒij; *Limon. cort.* ʒiv; *Alcohol., Aquæ.* āā, Ov. M. Distil Ovijss. In the Ph. U. S. for 1863, it is directed to be made of *Ammon. carb.* ʒi; *Aq. ammon.* fʒiij; *Ol. Limon.* fʒiiss; *Ol. myrist.* ♏xl: *Ol. Lavandul.* ♏xv; *Alcohol*, Oiss; *Aquæ*, q. s. Dissolve the carbonate in the water of ammonia, mixed with fʒiv of water. Dissolve the oils in the alcohol; mix the two solutions, and add *water* sufficient to make the whole two pints.) Stimulant. Dose, fʒss to fʒj.

Spiritus Ammoniæ Compositus, Spiritus aromaticus.

Spiritus Ammo'niæ Fœ'tidus, *Sp. volat'ilis fœ'tidus, Al'cohol ammonia'tum fœ'tidum, Tinctu'ra assafœ'tidæ ammonia'ta, Fet'id Spir'it of Ammo'nia, Fit Drops.* (*Ammon. muriat.* ʒx, *Potass. carb.* ʒxvj, *Sp. rectificat., Aquæ*, āā Oiij, (Imp. meas.), *Assafœtid.* ʒv. Distil. Oiij, (Imp. meas.) *Ph. L.*) Stimulant and antispasmodic. Dose, fʒss to ʒj.

Spiritus Ammo'niæ Succina'tus, *Sp. Ammo'niæ cum Suc'cino, Sp. Cornu cervi succina'tus, Sp. Sa'lis Ammoni'aci lactes'cens* seu *lac'teus, Tinctu'ra ammo'niæ compos'ita, Ammoni'acum succina'tum, A'qua Lu'ciæ, Li'quor ammo'nii succin'ici* seu *ex Ammo'niâ et O'leo Suc'cini, L. ex'citans, Ammo'-*

nium succin'icum liq'nidum, Suc'cinated Spir'it of Ammo'nia, Com'mon Eau de Luce. (*Mastich.* ℥iij, *Sp. rect.* f℥ix; *Ol. Lavand.* gtt. xiv; *Ol. succin.* gtt. iv; *Liq. ammon.* f℥x. Macerate the mastich in the alcohol, and pour off the clear tincture: add the rest and shake. *Ph. L.*) Stimulant and antispasmodic. Dose, gtt. x to f℥ss or f℥j.

Spiritus Animales, see Nervous fluid.

Spiritus Ani'si, *Sp. Ani'si compos'itus, Aqua ani'si for'tis, A. Sem'inum Ani'si compos'ita, Spir'it of An'iseed,* (F.) *Esprit d'anis.* (*Ol. Anis.* f℥j; *Alcohol. fort.* f℥xv. Dissolve. Ph. U. S.) Carminative. Dose, f℥ss to f℥ss. In the compound spirit, angelica is usually an ingredient.

Spiritus Anthos, Spiritus rosmarini.

Spiritus Armora'ciæ Compos'itus, *Sp. Raph'ani compos'itus, A'qua Raph'ani compos'ita, Com'pound Spirit of Horse'radish,* (F.) *Esprit de raifort composé.* (*Armorac. rad.* recent. concis., *Aurant. cort.* exsicc., sing. ℔j, *Myrist. nuc.* contus. ℥ss, *Spirit. ten.* cong., *Aquæ*, q. s. ad prohibendum empyreuma. *Ph. L.*) Stimulant and antiscorbutic. [?] Dose, f℥j to f℥iv.

The *Gold'en Spir'it of Scur'vygrass*—an empirical preparation — is formed by adding *Gamboge*, ℥viij, to one gallon of the *Sp. armoraciæ compositus.*

Green'ough's Tinc'ture for the teeth is formed of *Amygd. amar.* ℥ij, *Lig. Bresil., Cassiæ bacc.* ää ℥iv, *Irid. Florent.* ℥ij, *Coccinell., Sal. acetosellæ, Alum.* ää ℥j, *Sp. vin. rect.* Oij, *Sp. armoraciæ comp.* f℥ss.

Spiritus Beguinis, Ammoniæ sulphuretum—s. Bellidis, see Osmitopsis asteriscoides—s. Cajuputi, see Caieput oil.

Spiritus Cam'phoræ, (Ph. U. S. 1863,) *Sp. Camphora'tus* seu *vino'sus camphora'tus, Tinctu'ra Cam'phoræ* (Ph. U. S. 1851), *Spir'it of Wine and Cam'phor, Spirit of Cam'phor,* (F.) *Esprit de Camphre, Alcool camphré, Eau de Vie camphrée.* (*Camphor.* ℥iv, *Alcohol.* Oij. Dissolve.) Stimulant, anodyne and discutient. Used only externally.

Spiritus Car'ui, *Sp. Cu'ri Car'ui, A'qua Sem'inum Car'ui for'tis* seu *Sem'inum Car'ui, Spirit of Car'raway, Strong Car'ui Wa'ters,* (F.) *Esprit de Carvi.* (*Carui sem.* cont. ℔iss, *Sp. tenuior.* cong., *Aquæ* q. s. Distil a gallon. *Ph. L.*) Carminative. Dose, f℥j to f℥ss.

Spiritus Chloroform'i, *Spirit of Chlo'roform.* (*Chloroform. purif.* ℥j, *Alcohol. fort.* f℥vj. Dissolve. Ph. U. S., 1863.) See Ether, chloric.

Spiritus Cinnamo'mi, *Sp. Lau'ri Cinnamo'mi, A'qua Cinnamo'mi for'tis* seu *Cinnam. spirituo'sa, Spir'it of Cin'namon, Strong Cin'namon Wa'ter,* (F.) *Esprit de Cannelle.* (*Ol. cinnam.* f℥j, *Alcohol. fort.* f℥xv.) Stimulant and carminative. Dose, f℥j to f℥ss.

Spiritus Col'chici Ammonia'tus, *Tinctu'ra Col'chici Compos'ita, Ammo'niated Spir'it of Col'chicum, Com'pound Tinc'ture of Col'chicum.* (*Sem. colchic.* cont. ℥ij, *Sp. ammon. aromat.* Oj. *Ph. L.*) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from gtt. xxx to f℥j.

Spiritus Cornu Cervi, Liquor volatilis C. C.—s. Cornu Cervi succinatus, Spiritus ammoniæ succinatus—s. Fortior, see Alcohol—s. Fumans Beguini, Ammoniæ sulphuretum—s. Genitalis, Aura seminis—s. Jamaicensis, Rum.

Spiritus Junip'eri Compos'itus, *A'qua Junip'eri compos'ita, Com'pound Spir'it of Ju'niper,* (F.) *Esprit de genièvre composé.* (*Ol. junip.* ℥is, *Ol. carui, Ol. fœniculi* ää ♏x, *Alcohol dilut.* cong. Solve. Ph. U. S.) Stimulant and diuretic. Dose, f℥j to f℥ss.

Spiritus Lauri Cinnamomi, Spiritus Cinnamomi.

Spiritus Lavan'dulæ, *Sp. Lavan'dulæ spi'cæ* seu *Lavand. sim'plex, Lav'ender Water,* (F.) *Esprit de Lavande.* (*Lavand.* recent. ℔ij, *Alcohol.* cong., *Aquæ* Oij. Distil a gallon. Ph. U. S.) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

Spiritus Lavan'dulæ Compos'itus, *Tinctu'ra Lavandulæ compos'ita, Red Harts'horn, Lav'ender drops, Com'pound Spir'it of Lav'ender.* (F.) *Esprit de Lavande composé.* (*Sp. Lavand.* Oiij, *Sp. rosmarin,* Oj, *Cinnam.* contus. ℥j, *Myristic.* cont. ℥ss, *Caryophyll.* cont. ℥ij, *Santali* concis. ℥iij. Macerate for 14 days, and filter through paper. Ph. U. S.) A modified form is given in the Ph. U. S. for 1863. Stimulant. Dose, gtt. xl to f℥ij.

Spiritus Lethalis, Carbonic acid.

Spiritus Limo'nis, *Spirit of Lem'on, Es'sence of Lem'on,* (*Ol. Limon.* f℥ij, *Cort. Lim.* recente rasp. ℥j, *Alcohol. fort.* Oij. Dissolve the oil in the alcohol; add the lemon peel; macerate for 24 hours, and filter through paper. Ph. U. S., 1863.) To give odour and flavour.

Spiritus Lumbricorum, Liquor volatilis cornu cervi.

Spiritus Men'thæ Piperi'tæ, *Tinctu'ra O'lei Menthæ Piperi'tæ, Sp. Men'thæ piperit'idis, A'qua Men'thæ piperit'idis spirituo'sa, Spir'it of Pepper'mint, Tincture of Oil of Peppermint, Essence of Mint,* (F.) *Esprit de Menthe poivrée.* (*Olei menth. pip.* ♐viss, *Alcohol. fort.* Oivss, *Aquæ* q. s. Distil a gallon; — or, *Ol. menth. piperit.* f℥ij, *Alcohol.* Oj. Dissolve. Ph. U. S., 1851.)

The *Spiritus Menthæ Piperitæ* (Ph. U. S., 1863) is a slightly modified form. (*Ol. menth. pip.* f℥j, *Menthæ piperit.* in pulv. crass. gr. cxx, *Alcohol. fort.* ℥xv. Dissolve the foil in the alcohol; add the peppermint; macerate for 24 hours, and filter. Dose, gtt. v—xx, as a carminative.

Spiritus Menthæ Sativæ, Spiritus menthæ viridis.

Spiritus Men'thæ Vir'idis, *Tinctu'ra O'lei Menthæ vir'idis, Spir'itus men'thæ sati'væ, A'qua Men'thæ vulga'ris spirituo'sa, Spir'it of Spear'mint, Tincture of Oil of Spearmint, Essence of Spearmint,* (F.) *Esprit de Menthe vert.*

The *Spiritus Menthæ Viridis* (Ph. U. S., 1863) is made like the Spiritus menthæ piperitæ, and has the same properties and dose.

Spiritus Millepedarum, Liquor cornu cervi—s. Mindereri, Liquor Ammoniæ acetatis—s. Muriaticus æthereus, Spiritus Ætheris muriatici.

Spiritus Myr'ciæ, *Spirit of Myr'cia, Bay rum.* A spirit obtained by distilling rum with the leaves of *Myr'cia acris, Euge'nia* seu *Myrtus acris, M. Caryophylla'ta, Bay'berry Tree. Order,* Myrtaceæ, of the West Indies. Used externally like Cologne water, and in cases where whisky would be applied.

Spiritus Myris'ticæ, *Sp. Myris'ticæ Moscha'tæ* seu *Nu'cis Moscha'tæ, A'qua Nu'cis Moschatæ* seu *Nephrit'ica, Nut'meg Wa'ter,* (F.) *Esprit de Muscade.* (*Myrist.* cont. ℥ij, *Alcohol. dil.* cong., *Aquæ* Oj. Distil a gallon.) Cordial and carminative. Dose, f℥j to f℥iv.

Spiritus Myrti Pimentæ, Spiritus pimentæ—s. Nitri acidus, Nitric acid—s. Nitri dulcis, Spiritus ætheris nitrici—s. Nitri duplex, Nitric acid—s. Nitri fumans, Nitric acid—s. Nitri Glauberi, Nitric acid—s. Nitri simplex, see Nitric acid—s. Nitri vulgaris, see Nitric acid—s. Nucis moschatæ, Spiritus myristicæ — s. Oleosäromaticus Sylvii, Spiritus ammoniæ aromaticus — s. Ophthalmicus Mindereri, Liquor ammoniæ acetatis.

Spiritus Pimen'tæ, *Sp. Myr'ti Pimen'tæ* seu *Pimen'to, A'qua Mirab'ilis, Spir'it of Pimen'to.* (*Ol. Piment.* f℥ij, *Alcohol. dilut.* cong. Solve. Ph. U. S.) Cordial and carminative. Dose, f℥j, and more.

Spiritus Pule'gii, *A'qua Pule'gii spirituo'sa, Spir'it of Pen'nyroyal, Spir'ituous Pen'nyroyal Wa'ter,* (F.) *Esprit de Pouliot.* (*Olei pulegii* ♐vij, *Sp. rect.* Oivss, *Aquæ* q. s. Distil a gallon.

Ph. L.) Same as spirit of spearmint in properties and dose.

Spiritus Pyroaceticus, Acetone.

Spiritus Pyroxyl'icus, *Pyroxyl'ic spir'it, Wood spirit, Wood al'cohol, Pyroxyl'ic al'cohol, Methyl'ic al'cohol, Hy'drated ox'ide of meth'yle, Bihydrate of Meth'ylene,* (F.) *Esprit pyroxylique, Esprit de bois.* This substance is by some supposed to have been the article given in phthisis by Dr. Hastings, under the names *Naphtha* and *Wood Naphtha.* It was probably, however, the *Pyroäcetic spirit.* See Acetone. When wood is subjected to destructive distillation, about one per cent. of an inflammable volatile liquid, along with other products, passes over, which, when separated and purified, constitutes pyroxylic spirit. It is given in the same cases and doses as Acetone.

Spiritus Raphani Compositus, Spiritus armoraciæ compositus.

Spiritus Rectifica'tus, *Sp. Vi'ni rectifica'tus* seu *vino'sus rectifica'tus. Œnostag'ma, Œnelæ'um, Pyrœ'nus, Al'cohol, A. Vi'ni, Spirit of Wine,* (F.) *Esprit de Vin rectifié.* Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally, although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient.—S. g., according to the British Pharmacopœia, 0·838; according to that of Dublin, 0·840; of Edinburgh and United States, 0·835 (see Alcohol), and of Paris, 0·819 to 0·827.

Spiritus Rector, Aroma — s. Roriferus, Gaz sanguinis.

Spiritus Rosmari'ni, *Sp. Rosmari'ni officina'lis, Sp. An'thos, Aqua Hungar'ica* seu *Regi'næ Hunga'riæ, Spir'it of Rose'mary, Hun'gary Wa'ter,* (F.) *Esprit de Romarin.* (*Ol. rosmarini* f℥iv, *Alcohol.* cong. Solve. Ph. U. S.) Stimulant. Dose, f℥j to f℥iv.

Spiritus Salis Acidus seu Fumans, Muriaticum acidum—s. Salis ammoniaci, Spiritus ammoniæ—s. Salis ammoniaci aquosus, Liquor ammoniæ—s. Salis ammoniaci lactescens seu lacteus, Spiritus ammoniæ succinatus—s. Salis ammoniaci sulphuratus, Ammoniæ sulphuretum—s. Salis dulcis, Spiritus ætheris muriatici—s. Salis Glauberi, Muriaticum acidum—s. Salis marini, Muriaticum acidum—s. Salis marini coagulatus, Potassæ murias — s. Salis volatilis oleosus, Spiritus ammoniæ aromaticus — s. Sulphuricoæthereus camphoratus, Tinctura ætherea composita — s. Sulphuricoæthereus martialis, Tinctura seu Alcohol sulphuricoæthereus ferri—s. Sulphuris, Sulphuric acid, Sulphurous acid—s. Sulphuris per campanam, Sulphurous acid—s. Sulphuris volatilis, Ammoniæ sulphuretum—s. Sulphurosus volatilis, Sulphurous acid.

Spiritus Tenu'ior, *Al'cohol dilu'tum, Spir'itus vino'sus tenu'ior, Proof Spirit,* (F.) *Esprit de vin délayé.* (Generally made for pharmaceutical purposes by mixing equal parts of *rectified spirit* and *distilled water.*) S. g. Ph. B., 0·920; Edinb., 0·935; U. S., 0·941. It is employed in the same cases as those in which alcohol is used:—chiefly, as a solvent of vegetable matters, in the form of tinctures.

Spiritus Veneris, Aceticum acidum—s. Vini Gallici, Brandy—s. Vini rectificatus, Spiritus rectificatus—s. Vinosus camphoratus, Spiritus camphoræ—s. Vinosus tenuior, Spiritus tenuior—s. Vitalis, Nervous fluid—s. Vitrioli, Sulphuric acid—s. Vitrioli acidus Vogleri, Sulphuricum acidum dilutum — s. Vitrioli coagulatus Mynsichti, Potassæ sulphas—s. Vitrioli dulcis, Spiritus ætheris sulphurici—s. Vitrioli phlogisticatus, Sulphurous acid—s. Volatilis aromaticus, Spiritus ammoniæ aromaticus—s. Volatilis fœtidus, Spiritus ammoniæ fœtidus.

Spirocolon, *Spyrocolon, Or'chida, Franzo.* A syphiloid affection, first known in Greece, during the war of freedom from 1820 to 1825.

Spiroid canal, (σπειρα, 'a winding,' and εἰδος, 'resemblance.') Aquæductus Fallopii.

Spirom'eter, *Pulmom'eter,* (*spiro,* 'I breathe,' and μετρον, 'a measure;') properly *Anapnom'eter, Pneom'eter, Pneusom'eter, Pneumom'eter, Pneumatom'eter, Pneumonom'eter.* Any instrument for measuring the quantity of air concerned in respiration, and consequently the capacity of the lungs. This mode of measurement has been called *Spirom'etry* and *Pneom'etry,* as it was formerly called *Pulmom'etry.* The term spirometer is now usually applied to a kind of gasometer introduced by Dr. Hutchinson to estimate the quantity of air contained in, or, rather, expelled from the lungs under different circumstances.

Spiroptera hominis, (σπειρα, 'a spire,' and πτερον, 'a wing,') see Worms.

Spissantia, (*spissare,* 'to thicken.') Incrassantia.

Spit, ([Sax.] ꝑpætan, ꝑpittan, 'to spit.') Sputum.

Spital, Hospital.

Spit'al, Min'eral Wa'ters of. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

Spith'ama, (σπιθαμη,) *Do'drans.* A measure of twelve fingers' breadth, or about nine inches.

Spitting, (see Spit,) Exspuition.

Spittle, Hospital; Saliva, ([Sax.] ꝑpatl,)—s. Sweet, see Salivation.

Splanchna, (σπλαγχνα, pl. of σπλαγχνον,) Entrails.

Splanchnectop'ia, *Splanchnodias'tasis, Situs perver'sus* seu *anom'alus intestino'rum,* (*splanchna,* εκ, 'out of,' and τοπος, 'place.') Misplacement or ectopia of the intestines.

Splanchnelmintha, (*splanchna,* and ἑλμις, gen. ἑλμινθος, 'a worm.') Worms.

Splanchneurys'ma, (*splanchna,* and ευρυνω, 'I dilate.') Morbid dilatation of the intestines.

Splanch'nic, *Splanch'nicus,* (σπλαγχνικος.) *Vis'ceral,* (F.) *Splanchnique,* (from *splanchna.*) Relating or belonging to the viscera.

Splanchnic Cav'ities are the three great cavities of the body;—those of the cranium, chest, and abdomen.

Splanchnic Nerves belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The *great splanchnic nerve,* (F.) *Grand surrénal,* (Ch.) Its roots—four or five in number—come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *les'ser splanch'nic nerve, Re'nal nerve,* (F.) *Splanchnique accessoire* of Walther, *Petit surrénal* (Ch.), is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglia, which unite on the 12th dorsal vertebra into a cord that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

Splanch'nica. Medicines adapted to diseases of the bowels. Also, the 2d order of the class

Cœliaca of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNODIASTASIS, (*splanchna*, and διαστασις, 'displacement.') Splanchnectopia.

SPLANCHNOD'YNĒ, (*splanchna*, and οδυνη, 'pain.') Pain in the bowels.

SPLANCHNOGRAPHIA, Splanchnography.

SPLANCHNOG'RAPHY, *Splanchnogra'phia*, (*splanchna*, and γραφη, 'a description.') The part of anatomy which treats of the viscera.

SPLANCHNOLITHI'ASIS, (*splanchna*, and λιθος, 'a stone.') The formation of a calculous concretion in any viscus.

SPLANCHNOL'OGY, *Splanchnolog''ia*, (*splanchna*, and λογος, 'a discourse.') A treatise on the viscera; also, Splanchnography.

SPLANCHNON, (σπλαγχνον,) sing. of Splanchna.

SPLANCHNOPATHI'A, (*splanchna*, and παθος, 'suffering.') A disease of the intestines.

SPLANCHNOSCLERO'SIS, (*splanchnon*, and σκληρος, 'hard.') Induration of a viscus.

SPLANCHNOT'OMY, *Splanchnotom'ia*, *Splanchnot'omē*, (*splanchna*, and τεμνω, 'I cut.') Dissection or anatomy of the viscera.

SPLATFOOT, see Kyllosis.

SPLAYFOOT, (from *splay*, 'spread.') See Kyllosis.

SPLEEN, (σπλην,) *Lien*, *He'par sinis'trum* seu *adulteri'num*, *Fo'mes ventric'uli*, *Milt*, (Sc.) *Melt*, (F.) *Rate*. A soft, spongy, parenchymatous organ, of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is 4½ inches; its thickness 2½; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi transparent granulations —*splen'ic cor'puscles* or *Malpig'hian bod'ies of the spleen*. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations—*trabec'ulæ*. At its inner edge is a fissure—*Hi'lus* seu *Por'ta lie'nis*, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. The best opinion is, that it appertains to hæmatosis, and acts, also, as a diverticulum to the vascular system.

SPLEEN, Hypochondriasis—s. Malpighian, bodies of the, see Spleen—s. Supernumerary, Lienculus.

SPLEENWORT, Asplenium, A. filix fœmina, Asplenium scolopendrium—s. Bush, Comptonia asplenifolia.

SPLEN, gen. *Sple'nis*, (σπλην,) Spleen.

SPLENAL'GIA, *Neural'gia lie'nis*, *Sple'nica*, *Splenodyn'ia*, (*splen*, and αλγος, 'pain.') Pain in the spleen.

SPLENALGIA BENGALENSIS, see Cachexia, splenic—s. Phlegmonodea, Splenitis—s. Subinflammatoria chronica, Splenoncus.

SPLENATROPHI'IA, *Atroph'ia Lie'nis*, (*splen*, and *atrophia*, 'atrophy.') Wasting or atrophy of the spleen.

SPLENAUXE, (*splen*, and αυξη, 'increase.') Splenoncus.

SPLENECTAMA, gen. *Splenectam'atis*, Splenoparectama.

SPLENECTASIS, (*splen*, and εκτασις, 'dilatation.') Splenoparectama.

SPLENECTOM'IA, *Splenec'tomē*, (*splen*, εκ, 'out of,' and τεμνω, 'I cut.') Extirpation of the spleen.

SPLENECTOP'IA, *Disloca'tio* seu *Ectop'ia lie'nis* seu *sple'nis*, *Anomosplénotopie*, (*splen*, and εκτοπος, (εκ, and τοπος,) 'out of place.') Dislocation of the spleen. Not a common occurrence.

SPLENEMPHRAX'IS, *Splenophrax'ia*, (*splen*, and εμφρασσω, 'I obstruct.') Obstruction of the spleen. See Splenoncus.

SPLENES. (pl. of *splen*,) Hypochondriasis.

SPLENET'ICUS, *Sple'nicus*, *Splenit'icus*, *Lieno'sus*, (F.) *Ratelenx*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

SPLE'NIC, *Sple'nicus*, *Sple'nius*, (F.) *Splénique*, (from *splen*.) That which relates to the spleen.

SPLENIC AR'TERY. It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

SPLENIC CACHEXIA, see Cachexia splenica—s. Corpuscles, see Spleen.

SPLENIC PLEX'US is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

SPLENIC VEIN, *Vena sple'nica*, *V. liena'lis*, arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the vasa brevia, the right and left gastroëpiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

SPLENICA, Splenalgia. Also, medicines which affect the spleen.

SPLENICUS, (σπληνικος,) Spleneticus, Splenic.

SPLENIFICATION, (*splen*, and *fio*, 'to become,') Splenization.

SPLENIOLA, (dim. of *splen*,) Compress.

SPLÉNIQUE, Splenic.

SPLENIS TUMOR, 'tumor of the spleen,' Ague cake.

SPLÉNISATION, Splenization.

SPLENISCUS, (σπληνισκος,) Compress.

SPLENISIS, (from *splen*,) Splenization.

SPLENITICUS, Splenic.

SPLENI'TIS, (*splen*, and *itis*.) Inflammation of the spleen. *Empres'ma splenitis*, *Inflamma'tio lie'nis*, *I. sple'nis*, *Splenal'gia phlegmono'dea*, *Lieni'tis*, (F.) *Splénite*, *Inflammation de la Rate*. A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It generally affects the capsule—*Epispleni'tis*, *Perispleni'tis*—and must be treated like other inflammations.

SPLENIUM, (σπληνιον,) Compress—s. Corporis callosi, see Corpus callosum—s. Cruciatum, *Croix de Malte*.

SPLE'NIUS, *S. Cap'itis* seu *Col'li*, (F.) *Cervicodorso-mastoïdien et dorso-trachélien*, *Cervico-mastoïdien* (Ch.), *Posterior mastoid muscle*. So called from its resemblance to the *spleen* of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebræ; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebræ, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli*, and *Splenius capitis*. The splenius extends the head, inclines it, and

rotates it. If the splenii of each side act together, they extend the head.

SPLENIZA'TION, *Spleniza'tio*, *Splenifica'tion*, *Splenifica'tio*, (F.) *Splénisation*, (from *splen*.) A term applied to the state of the lung in the first or second stage of pneumonia, in which its tissue resembles that of the spleen. To a conversion of the lung into a spleen-like substance in the yellow fever of Gibraltar, the term *splenisis*, (F.) *Splénisie*, was given by Louis and others.

SPLENOCE'LĒ, *Her'nia liena'lis*, (*splen*, and κηλη, 'a tumour.') Hernia formed by the spleen.

SPLENODES, (*splen*, and *odes*,) Splenoid.

SPLENODYNIA, (*splen*, and οδυνη, 'pain,') Splenalgia.

SPLENOG'RAPHY, *Splenograph'ia*, (*splen*, and γραφη, 'a description.') A description of the spleen.

SPLENOHÆ'MIA, (F.) *Splénohémié*, (*splen*, and αιμα, 'blood.') Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

SPLE'NOID, *Splenoï'des*, *Spleno'des*, (σπληνοειδης, from *splen*, and ειδος, 'resemblance.') Spleenlike. Having the appearance of the spleen.

SPLENOL'OGY, *Splenolog''ia*, (*splen*, and λογος, 'a discourse.') A treatise on the spleen.

SPLENOMALA'CIA, *Lienomala'cia*, (*splen*, and μαλακος, 'soft.') Morbid softening of the spleen.

SPLÉNONCIE, Splenoncus.

SPLENON'CUS, *Megalosple'nia*, *Hypertroph'ia* seu *Supernutrit''io sple'nis* seu *lie'nis*, *Intumescen'tia* seu *Infarc'tus* seu *Physco'nia lie'nis*, *Splenal'gia subinflammato'ria chron'ica*, *Splenemphrax'is*, *Splenauxe'sē*, *Hypersplenotroph'ia*, *Li'en in'gens*, (F.) *Splénoncie*, *Hypertrophie de la Rate*, (*splen*, and ογκος, 'a tumour.') Tumefaction of the spleen. See Ague cake.

SPLENOPAREC'TAMA, gen. *Sple'noparectam'atis*, *Splenec'tama*, *Splenopare'tasis*, *Splenec'tasis*, (*splen*, and παρεκταμα, 'excessive volume.') Excessive enlargement of the spleen.

SPLENOPARECTASIS, Splenoparectama.

SPLENOPHRAXIA, (*splen*, and φρασσω, 'to shut up,') Splenemphraxis.

SPLENORRHAG''IA, (*splen*, and ῥαγη, 'a bursting forth.') Hemorrhage from the spleen.

SPLENOSCIR'RHUS, (*splen*, and σκιρρος, 'hardness.') Scirrhus or cancer of the spleen.

SPLENOT'OMY, *Splenotom'ia*, *Splenot'omē*, (*splen*, and τεμνω, 'I cut.') Dissection of the spleen.

SPLINT, ([D.] Splinter, from splijten, 'to split;') *Hastel'la*, *Ass'ula*, *Asser'culum*, *Pla'gula*, *Nar'thex*, *Fer'ula*, (F.) *Attelle*, *Éclisse*. A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, gutta percha, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

SPLINTER, (F.) *Esquille*, (same etymon.) This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation, until it is removed,—*Acu'leus lig'neus*, (F.) *Écharde*.

It is also applied to fragments that separate from a fractured or diseased bone.

SPLIT'CLOTH, *Lin'teum scis'sum*. A bandage for the head, consisting of a central part, and six or eight tails The *single split cloth* has four tails. It is regarded as the most convenient bandage for the head, face, and jaws.

SPLITROCK, Heuchera cortusa.

SPOAT, (like *spit*.) Saliva.

SPODIUM GRÆCORUM, (σποδιον, 'dross,') Album græcum.

SPOLIARUM, (*spolio*, 'to deprive of covering,') Apodyterium.

SPO'LIATIVE, *Spoliati'va*, (*spoliare*, *spoliatum*, 'to take away.') (F.) *Spoliatif*.

Phlebotom'ia spoliati'va, (F.) *Saignée spoliative*. Bloodletting, used for the purpose of diminishing the mass of blood.

SPOLIATORIUM, (*spolio*, 'to deprive of covering,') Apodyterium.

SPONDLES, (from *spondylus*,) Vertebræ.

SPONDYLAL'GIA, *Spondylodyn'ia*, (*spondylus*, and αλγος, 'pain.') Pain in the vertebræ. Cacorrhachitis. See Vertebral Disease.

SPONDYLARTHI'TIS, (*spondylus*, αρθρον, 'a joint,' and *itis*.) Gouty or rheumatic inflammation of the spinal column.

SPONDYLARTHROCACE, (*spondylus*, αρθρον, 'a joint,' and κακος, 'evil,') Vertebral disease.

SPONDYLI, (σπονδυλοι,) Vertebræ.

SPONDYLISTHE'SIS, (*spondylus*, and ολισθησις, 'a slipping or sliding.') Dislocation of the vertebræ, as of the last lumbar vertebræ forwards on the sacrum.

SPONDYLI'TIS, *Inflamma'tio ver'tebræ*, (*spondylus*, and *itis*.) Inflammation of the vertebræ.

SPONDYLIUM, (σπονδυλιον,) Heracleum spondylium.

SPONDYLOCACE, (*spondylus*, and κακος, 'evil,') Vertebral disease.

SPONDYLODYNIA, (*spondylus*, and οδυνη, 'pain,') Spondylalgia.

SPONDYLOPATHI'A, (*spondylus*, and παθος, 'a disease.') A disease of the vertebral column.

SPONDYLOPYOSIS, (*spondylus*, and πυωσις, 'suppuration,') Vertebral disease.

SPOND'YLUS, (σπονδυλος.) A *vertebra*. Also, the vertex.

SPONGE, Spongia—s. Bastard, Alcyonium—s. Prepared, see Spongia—s. Tent, see Spongia.

SPONGI, (from σπογγος.) The tumefied glands of the neck.

SPON'GIA, (σπογγια,) *S. officina'lis* seu *mari'na*, *Spon'gus*, *Sphon'gus*, *Sponge*, (F.) *Éponge*. An organized marine substance, of the *Class* Porifera, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed and of thus increasing in size. It is employed in surgery for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Spongia cera'ta*, *Waxed*, *Cerated* or *Prepared Sponge* or *Sponge Tent*.

SPONGIA ASSA, S. Usta—s. Cerata, see Spongia—s. Cynosbati, Bedegar.

SPONGIA US'TA, *S. As'sa*, *Car'bo spon'giæ*, *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. (It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.—Ph. U. S.) Dose, ʒj to ʒiij.

SPON'GIÆ LA'PIS. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

SPONGIEUX, see Spongoid.

SPONGIFORM, (*spongia*, and *forma*, 'form,') Spongoid.

SPONGIODES, Spongoid.

SPONGIOLE (F.), *Spongi'olum*, *Spongi'ola*, *Spongelet*, (from σπογγιον, 'a small sponge.') The soft succulent extremity of the fibrils or true roots

of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

SPON'GION, (σπογγιον.) Ancient name of an epithem made of goats' dung: and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.

SPON'GIOPI'LIN, *Spon'giopile*, (*spongia*, 'sponge,' and *pilus*, 'a hair.') A fabric, composed of sponge and wool, felted together in three layers, and coated, on one of its surfaces, with caoutchouc, which renders it impermeable. It is of great service as a cataplasm, fomentation, vehicle for lotions, liniments, &c.

SPONGIOSUM (OS), Ethmoid bone.

SPONGIOSUS, Spongoid.

SPONGODES, (*spongia*, and *odes*,) Spongoid.

SPONGOID, *Spongoï'des*, *Spongo'des*, (F.) *Spongoïde*, (σπογγοειδης, σπογγωδης, from *spongia*, and ειδος, 'resemblance.') Resembling sponge. Of the nature of sponge, *spongy*, *spongio'sus*, (F.) *Spongieux*.

SPONGOID INFLAMMATION, Hæmatodes fungus.

SPONGOID TISSUE, (F.) *Tissu Spongoïde*. An adventitious spongy tissue found in cases of rickets.

SPONGOS, (σπογγος,) Tonsil.

SPONGY, Spongoid—s. Tissue, see Bone.

SPONSA SOLIS, 'spouse of the sun,' Calendula officinalis.

SPONTA'NEOUS, *Sponta'neus*, (F.) *Spontanée*, (from *sponte*, 'voluntarily.') That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Sponta'neous las'situde* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Sponta'neous Amputa'tion* is the separation of a limb from the fœtus in utero.

SPONTANEOUS EVOLUTION, see Evolution—s. Version, Evolution, spontaneous.

SPONTÉPARITÉ, (*sponte*, 'voluntarily,' and *pario*, 'to bring forth,') Generation, spontaneous.

SPOON, (from its hollowness,) Umbilicus.

SPOONWOOD, Kalmia latifolia, Tilia Americana.

SPORAD'IC, *Sporad'icus*, (F.) *Sporadique*, (σποραδικος, 'scattered,' from σπειρω, 'I sow.') An epithet for diseases, *Spor'ades*, *Morbi sporad'ici*, *disper'si* seu *sparsi*, (F.) *Maladies sporadiques*, which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

SPORE, *Spor'ule*, *Spo'rum*, *Spor'ulum*, *Sporus*, (σπορος, from σπειρω, 'I sow.') The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

SPORID'IUM, (from *sporus*.) The reproductive body in algaceous plants, which resembles the spore of other plants.

SPORULE, Spore.

SPORUM, Spore.

SPORUS, Spore.

SPOT OF SÖMMERING, see Foramen centrale, &c.

SPOTS, CEREBRAL, see *Tache cérébrale*—s. Germinal, see Molecule—s. Meningitic, see *Tache cérébrale*.

SPOTS, RED, (F.) *Taches rouges*, *Rose spots*, *Rose'olæ* seu *Pap'ulæ typho'sæ*. Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

SPOTS, ROSE, Spots, red.

SPRAIN, (corrupted from *strain* [?],) *Subluxa'tio*, *Distor'tio*, *Dias'trophē*, *Diastrem'ma*, *Luxa'tio imperfec'ta*, *Strem'ma*, *Thlas'ma Strem'ma*, *Wrench*, (Sc.) *Wramp*, (Prov.) *Wrick*, *Kench*, *Keak*, (F.) *Détorse*, *Entorse*, *Foulure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured.

This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints;—as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support until the parts affected recover their due tone.

SPRAT, YELLOWBILLED, Clupea thryssa.

SPRAYCURE. A variety of the *douche*, which consists in the application of water in the form of spray.

SPRUCE, (from Prussia [?].) see Pinus abies.

SPRUCE BEER, *White Spruce Beer*. A beer made as follows: To 10 gallons of *water*, add 6 pounds of *sugar*, and 4 oz. of *essence of spruce*. Add yeast; and bottle, when ready. It is grateful and antiscorbutic.

SPRUCE BEER POW'DERS may be formed of *white sugar*, ℥j, and ℈ij; *sodæ subcarb.*, gr. xxvj; *essence of spruce*, gr. x, in each blue paper; and *acid of tartar*, ℥ss in each white paper. For half a pint of water.

SPUITIO, (*spuere*, *sputum*, 'to spit,') Exspuition.

SPUMA ARGENTI, 'froth of silver,' Plumbi oxydum semivitreum—s. Cerevisiæ, Yest—s. Trium draconum, Antimonium muriatum.

SPUMEUX, Frothy.

SPUMOSUS, (from *spuma*,) Frothy.

SPUNK, (Gael. *spong*, 'tinder,') Boletus igniarius.

SPUR, (Sax. ꝑpuꝛ,) (F.) *Éperon des Artères*. The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURBLIND, (Purblind,) Myopic.

SPURGE, CAPER, (*Épurge*, [old F.] *Espurge*, from *e*, and *purgare*, 'to purge,') Euphorbia lathyris—s. Cypress, Euphorbia Cyparissias—s. Flax, Daphne gnidium—s. Flowering, large, Euphorbia corollata—s. Garden, Euphorbia lathyris—s. Greater, Euphorbia palustris—s. Ipecacuanha, Euphorbia ipecacuanha.

SPURGE LAUREL, Daphne laureola.

SPURGE, MARSH, Euphorbia palustris.

SPURGE OLIVE, Cneorum tricoccum, Daphne mezereum.

SPURGE, PETTY, Euphorbia peplus—s. Sea, Euphorbia paralias—s. Spotted, Euphorbia maculata—s. Sun, Euphorbia helioscopia—s. Wartwort, Euphorbia helioscopia.

SPUTA, PRUNE JUICE, (pl. of *sputum*,) see Prune Juice.

SPUTAMEN, (*sputare*, *sputatum*, 'to spit,') Saliva, Sputum.

SPUTAMENTUM, Saliva, Sputum.

SPUTATIO, Exspuition.

SPUTATION, Exspuition.

SPUTATORIUS, Expectorant.

SPU'TUM, *Apochrem'ma*, *Anachremp'tum*, *Chrem'ma*, *Emptys'ma*, *Sputa'men*, *Pty'elon*, *Pytis'ma*, *Ptys'ma*, *Spit*, (*spuere*, *sputum*, 'to spit.') (F.) *Crachat*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and

often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eru'ginous*, when of a greenishyellow colour; *gummy*, when they resemble a thick solution of gum; *froth'y*, (F.) *mousseux*, when covered with froth; *rubig''inous*, (F.) *rubigineux* ou *rouillés*, when of a reddishyellow; and *streaked*, (F.) *striés*, when mixed with lines of blood. Also, saliva.

Sputum Cruentum, Hæmoptysis — s. Dulce, Saccharorrhœa pulmonalis—s. Oris, Salivation—s. Saccharatum, Saccharorrhœa pulmonalis — s. Sanguinis, Hæmoptysis.

SQUALLING, ([Sax.] ȝiellan or ȝýllan, 'to yell,') Vagitus.

SQUAMA, Scale, Squamous portion, Table.

SQUAMÆ, (pl. of *squama*,) Scaly diseases.

SQUAMARIA, Plumbago Europæa.

SQUAMEUX, Squamous.

SQUAMIFORMIS, (*squama*, 'a scale,' and *forma*, 'shape,') Squamous.

SQUA'MOUS, *Squamo'sus*, *Lepidoï'des*, *Lepido'des*, *Squamifor'mis*, *Squa'miform*, (F.) *Squameux*, *Lépidoïde*, *Sca'ly*, (from *squama*, 'a scale.') That which relates to or resembles a scale.

Squamous Por'tion of the temporal bone, (F.) *Portion squameuse* ou *écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale. See Temporal Bone.

Squamous Su'ture, *Sutu'ra squamo'sa* seu *mendo'sa* seu *lepidoï'des* seu *lepido'des* seu *cra'nii squamo'sa*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain *scaly* cutaneous affections are also called *squa'mous*, (F.) *squameux*. See Scale.

SQUARE STALK, Monarda coccinea.

SQUARRA TONDENS, (*squarra*, 'scurfiness,' and *tondere*, 'to shave,') Porrigo decalvans.

SQUASH, ROUND or PATTYPAN, see Cucurbita pepo — s. Warted or Longnecked, see Cucurbita pepo.

SQUATTING PILLS, (from [Prov.] *squat*, (from *quietus*, [?]) 'quiet,') Pilulæ opiatæ.

SQUAWMINT, Hedeoma.

SQUAWROOT, Actæa racemosa, Caulophyllum thalictroïdes, Senecio aureus.

SQUAWWEED, Erigeron Philadelphicum.

SQUEAMISHNESS, Fastidium cibi.

SQUEASINESS, Nausea.

SQUELETTE, Skeleton.

SQUELETTOLOGIE, Skeletology.

SQUILL, Scillâ — s. Vinegar of, Acetum scillæ.

SQUILLA, Scilla.

SQUINANCIE, Cynanche, Cynanche tonsillaris.

SQUINANCY, COMMON, Cynanche tonsillaris.

SQUINANTHIA, Cynanche tonsillaris.

SQUINANTHUS, (corr. from *schœnanthus* [?],) Juncus odoratus.

SQUINE, Smilax China.

SQUINSY, Cynanche tonsillaris.

SQUINT, ([D.] *Schuinte*, 'a slope,') Strabismus.

SQUINTEYED, see Strabismus.

SQUINTER, see Strabismus.

SQUINTING, Strabismus.

SQUINZEY, Cynanche tonsillaris.

SQUIRRE, Scirrhus — *s. en Cuirasse*, see Ligneous.

SQUIRREL CORN, Dicentra Canadensis.

SQUIRRHEUX, Scirrhous.

SQUIRRHE, Scirrhus.

SQUIRROGASTRIE, Scirrhogastria.

SQUIRROSARQUE, Induration of the areolar or cellular tissue.

SQUIRRUS, Scirrhus.

SQUIRT, Syringe.

STACHELBERG, MIN'ERAL WA'TERS OF. Stachelberg Springs are far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS, (σταχυς, gen. σταχυος, 'a spike.') A surgical bandage to the lower belly. The Hypogastrium [?].

STACHYS FŒTIDA, (σταχυς,) Galeopsis.

STACTE, (στακτη,) Myrrha.

STADE, (from *stadium*,) Stage — *s. de la Chaleur*, see Intermittent fever — *s. de Froid*, see Intermittent fever — *s. de Sueur*, see Intermittent fever.

STADIUM, (σταδιον,) Period, Stage.

Sta'dium Ac'mes seu Sta'seos. The period of the height of a disease.

Stadium Annihilatio'nis seu Convalescen'tiæ seu Reconvalescen'tiæ. The period of recovery from disease.

Stadium Augmen'ti seu Incremen'ti Mor'bi. The period or stage of increase of a disease.

Stadium Caloris, Stage, (hot) — s. Convalescentiæ, S. annihilationis.

Stadium Decremen'ti. The period or stage of decrease of a disease.

Stadium Frigoris, Stage, (cold), see Intermittent fever — s. Incrementi Morbi, S. Augmenti morbi — s. Latentis contagii, Prodromus — s. Opportunitatis, Prodromus — s. Prodromorum, Prodromus—s. Reconvalescentiæ, S. Annihilationis.

STAFF, ([Sax.] ȝtæf, ȝtaf.) An instrument of great importance in lithotomy, — being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFF TREE, CLIMBING, Celastrus scandens.

STAFFA, Stapes.

STAG'S PIZZLE, see Cervus.

STAGE, *Sta'dium*, (F.) *Estage*, *Étage*, *Stade*. The period or degree of a disease; especially the period of an intermittent: — as the *cold stage*, *sta'dium fri'goris* — *hot stage*, &c.

STAGGERBUSH, Andromeda mariana.

STAGGERWEED, Delphinium.

STA'GIUM. The sixth part of an ounce.

STAG'MA, gen. *Stag'matis*, (σταγμα, from σταζω, 'I distil;') *Stalag'ma*. Any distilled liquid or liquor.

Stagma, Gutta.

STAGNA'TION, *Stagna'tio*, (*stagnare*, *stagnatum*, 'to form a pond,' *stagnum*.) Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, 'pond of the chyle,' Receptaculum chyli.

STAHL'IAN. One who follows the doctrine of Stahl.

STAHLIANISM, see Animist.

STALAGMA, gen. *Stalag'matis*, (σταλαγμα,) Stagma.

STALAGMI'TIS CAMBOGIOÏ'DES, *S. Cambo'gia*, (from σταλαγμος, 'a drop'—the gum exuding by drops.) Gamboge was long ascribed to this fancied Ceylonese plant. It is now known, that the name was given by Murray to specimens of two distinct trees of different genera. See Cambogia.

STALAGMUS, (σταλαγμος,) Distillation.

STALE, Urine.

STALTICA, (σταλτικα,) Repellents.

STAMMERING, (from [Sax.] ȝtamep, 'to stammer,') Balbuties — s. of the Fingers, Cramp, writers'.

STAMP, ([F.] *estampe*,) *Cachet* — s. Medicine, *Cachet* — s. Oculist, *Cachet*.

STAMPING MILL, see Pulverization.

STANG, ([Sax.] ȝtinȝan, 'to sting,') see Throbbing.

STANNI CHLORIDUM, Tin, muriate of — s. Murias, Tin, muriate of—s. Oxyduli murias, Tin, muriate of — s. Pulvis, see Tin.

STANNIOLUM, (from *stannum.*) Tinfoil.

STANNUM, Tin — s. Chloratum, Tin, muriate of — s. Cinereum, Bismuth — s. Foliatum, Tinfoil — s. Glaciale, Bismuth — s. Granulatum, see Tin — s. Indicum, Zincum—s. Muriaticum, Tin, muriate of.

STAPÉDIEN, Stapedius.

STAPE'DIUS, *Sta'pes*, (F.) *Stapédien*, *Pyramidal-stapédien*, (from *stapes.*) A muscle of the middle ear, which draws the stapes obliquely upwards.

STA'PES, gen. *Sta'pedis*, (*sto*, and *pes*,) 'a stirrup,' *Sta'pha*, *Staf'fa*, (F.) *Étrier*. The innermost of the small bones of the ear, so called because it resembles a *stirrup*. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrane of which it is united. Its *branches* are one *anterior*, and the other *posterior*. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankle.

STAPHA, Stapes.

STAPHIS, 'a grape or vine,' Delphinium staphisagria.

STAPHISAGRIA, (σταφις, 'a grape or vine,' and αγριος, 'wild,') Delphinium staphisagria.

STAPHISAIGRE, Delphinium staphisagria.

STAPHYLÆMATO'MA, gen. *Staphylæmato'matis*, (*staphyle*, and *hæmatoma.*) A tumour formed by effusion of blood beneath the mucous membrane of the uvula.

STAPHYLAGRA, (*staphyle*, and αγρα, 'a seizure,') Staphylepartes.

STAPHYLE, (σταφυλη, 'a grape,') Uvula, see Vitis vinifera.

STAPHYLEPAR'TES, (σταφυλεπαρτης, from *staphyle*, and επαιρω, 'I lift up.') *Staph'ylagra*. An instrument for laying hold of, and removing the uvula.

STAPHYLETOMIA, (σταφυλητομια,) Staphylotomy.

STAPHYLINI, (from *staphyle*,) see Azygos muscle—s. Medii, see Azygos muscle.

STAPHYLINOPHARYNGEUS, Palatopharyngeus.

STAPHYLINUS EXTERNUS, Circumflexus.

STAPHYLIS, (from σταφυλη, 'a grape,') Nipple.

STAPHYLITIS, (*staphyle*, and *itis*,) Uvulitis.

STAPHYLIUM, (σταφυλιον, dim. of σταφυλη,) Nipple.

STAPHYLODIALYSIS, (*staphyle*, and *dialysis*,) Cionis, Staphylœdema.

STAPHYLŒDE'MA, gen. *Staphylœde'matis*, (*staphyle*, and *œdema.*) *Angi'na uvula'ris*, *Dysphagia uvulo'sa*, *Hypostaph'ylē*, *Hypostaphyli'tis*, *Staphylodial'ysis*, *Prolap'sus* seu *Propto'sis* seu *Ca'sus* seu *Œde'ma u'vulæ*, *Hi'mas*, *Himanto'ma*, *Himanto'sis*, *Staphylon'cus*, *Staphylon'cia*, *Produc'tio u'vulæ à pituí'tâ*, *U'vula decid'ua* seu *relaxa'ta*, *Cras'pedon.* Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

STAPHYLO'MA, gen. *Staphylo'matis*, (σταφυλωμα, from *staphyle*,) *Uva'tio*, *Parop'sis Staphylo'ma*, *Staphylo'sis*, *Polygro'ma.* A name given to different protrusions of the anterior surface of the eye.

STAPHYLOMA CONICUM, Staphyloma of the cornea—s. Pellucidum Conicum, Staphyloma of the cornea.

STAPHYLOMA OF THE COR'NEA, *Sugarloaf Cor'nea* or *Con'ical Cor'nea*, *Con'ical hydrophthal'mia*, *Staphylo'ma con'icum* seu *pellu'cidum con'icum*, *Conophthal'mia*, *Prolap'sus cor'neæ*, *Ceraton'cus*, *Hypercerato'sis*, *Hypercer'asis*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

STAPHYLOMA IRIDIS, Ptosis iridis, Iridauxesis.

STAPHYLOMA OF THE SCLEROT'IC, *Staphyloma sclerot'icæ*, differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner.

STAPHYLOMA UVEÆ, Iridauxesis.

STAPHYLONCIA, (*staphyle*, and ογκος, 'a swelling,') Staphylœdema.

STAPHYLONCUS, Staphylœdema.

STAPHYLOPLAS'TIC, *Staphyloplas'ticus*, (*staphyle*, and πλασσω, 'I form.') An epithet applied to the operation for replacing the soft palate, when it has been lost. *Staph'yloplasty*, *Uranoplas'ty*, *Pal'atoplasty*, a word of hybrid formation, is the operation for closing the palatine vault.

STAPHYLOR'RAPHY, *Staphylor'aphy*, *Velosynth'esis*, *Staphylorrha'phia*, *Kionorrha'phia*, *Cionorrhaph'ia*, *Uranor'rhaphē*, *Uranorrha'phia*, *Uraniscorrha'phia*, *Uraniscor'rhaphē*, (*staphyle*, and ραφη, 'a suture.') The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, (from *staphyle*,) Staphyloma.

STAPHYLOT'OMY, *Staphylotom'ia*, *Staphyletom'ia*, (*staphyle*, and τομη, 'incision.') Amputation of the uvula.

STAR APPLE, BROADLEAVED, Chrysophyllum cainito—s. Blazing, Aletris farinosa—s. Bloom, Spigelia Marilandica — s. Grass, Aletris farinosa, Hypoxys erecta.

STAR KNAPWEED, Centaurea calcitrapa—s. of the North, Geum urbanum.

STAR STROKE, see *Coup-de-soleil*—s. Wort, Aletris farinosa—s. Wort, golden, Bubonium—s. Wort, water, Callitriche verna.

STAR'BECK SPA. A chalybeate spring at Harrowgate.

STARCH, (Sax, ꝑeapc, 'rigid, stiff,') Amylum.

STARCH, ANIMAL, Corpora amylacea — s. Blue, Smalt — s. Canna, *Tous-les-mois* — s. Corn, see Zea mays.

STARCH CORPUSCLES, Corpora amylacea.

STARCH, I'ODIDE OF, *Io'didum* seu *Iodure tum Am'yli*, *Am'ylum ioda'tum*, (F.) *Iodure d'Amidon*, prepared by triturating iodine and starch, is said to have the eutrophic effects of iodine; but, by some, is esteemed inert. Dose, four to six grains.

STARCH, LIVER, Glycogenic matter — s. Potato, see Solanum tuberosum.

STARCH SUGAR, Glucose.

STARCH, TACCA, Arrowroot, Tahiti.

STARKEY'S PILLS, see Pilulæ ex helleboro et myrrhâ—s. Soap, see Sapo.

STARVA'TION, ([Sax.] ꝑeapplan, (G.) sterben, 'to die,' and the Romanic termination *tion.*) Death from hunger or from cold.

STASE, Stasis.

STA'SIS, (στασις, from σταω, 'I stop,') (F.) *Stase*. This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids, — Stasis never. Also, station.

STATE MEDICINE, Medicine, state.

STAT'IC, *Stat'ical*, *Stat'icus*, (F.) *Statique*. (στατικος.) Relating to *Statics*, or the branch of mechanics which shows the properties of bodies as respects their weight, equilibrium, &c. An epithet applied to the physical phenomena presented

by organized bodies in contradistinction to the organic or vital. Also, of old, a restraining or astringent remedy.

STAT'ICA MEDICI'NA. That part of medica-observation, which consists in the daily weighing the human body, and the various ingesta and egesta. A title to Essays of Sanctorius and Keill.

STATICA SEP'TI NA'RIUM, *Appendix cuta'nea septi na'rium.* The cutaneous appendage to the septum narium.

STATICAL, Static.

STAT'ICĒ CAROLINIA'NA, of the United States, (στατικη, from στατικος, 'restraining,' owing to its astringency.) *Amer'ican* or *Sea'side Thrift, Marsh Rose'mary, Marshroot, Inkroot, Sea Lav'ender, Ord.* Plumbaginaceæ, is considered to be a mere variety of the Statice limonium. The root is *Statice,* of the Ph. U. S.

STAT'ICĒ LIMO'NIUM, *S. Marit'imum, Be'hen ru'brum, Limo'nium, L. ma'jus* seu *vulga'rē, Be'hen, Sea Lav'ender, Red Be'hen, Marsh Rose'mary, Lav'ender Thrift,* (F.) *Behen rouge, Rosmarin des marais, Lavande triste* ou *de mer.* The roots have been esteemed astringent, tonic, and eminently antiseptic.

STATICE MARITIMUM, S. limonium—s. Vulgare, S. limonium.

STATICS, see Static.

STA'TION, *Sta'tio, Sta'sis, Sta'tus,* (*stare, statum,* 'to stand.') The act of standing.

STA'TIONARY, *Stationa'rius,* (F.) *Stationnaire.* A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATIS'TICS, MED'ICAL, *Vi'tal Statis'tics, Biostatist'ics,* (*status,* 'a state,') (F.) *Statistique médicale.* That part of medicine which relates to details—*med'icostatis'tical*—connected with the mortality, salubrity, &c., of different states, countries and situations.

It has, also, been used in a wider sense to signify the same as *Numer'ical meth'od,* (F.) *Méthode numérique;* which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

STATISTICS, VITAL, Statistics, medical.

STAT'URE, *Statu'ra, Meg'ethos, Magnitu'do cor'poris,* (F.) *Taille,* (from *stare, statum,* 'to stand.') The height of the human figure. The following table exhibits the mean height, in feet and decimals, of 1800 men, taken as they were entered upon the lists of recruits filed in the office of the Adjutant-General of the United States. The results are given for 100 men from each State; and no recruit under five feet five inches was received.

	Mean height. Feet.	Six feet and over.	Greatest height.
Indiana	5·7604	18	6·4¼
Kentucky	5·7729	18	6·3¾
Ohio	5·7537	15	6·3½
Tennessee	5·7779	18	6·3
Maine	5·7314	11	6·2
Vermont & New Hampshire	5·6951	6	6·1
Massachusetts and Connecticut	5·6821	5	6·3
North Carolina	5·7814	24	6·3¾
Georgia	5·8272	30	6·6½
South Carolina	5·7729	15	6·4½
Alabama	5·7647	17	6·4
Virginia	5·7488	15	6·2
New York	5·6505	4	6·1½
Pennsylvania	5·6756	5	6·1
New Jersey and Delaware	5·6509	6	6·1
Maryland	5·7130	9	6·2
Illinois	5·7696	17	6·3
Missouri	5·7162	8	6·1½

The minimum height for the American soldier is now five feet three inches; whilst the British standard is five feet five inches, and the French five feet one inch and a half.

It would seem, from the researches of Professor S. H. Dickson, that the stature of Americans is decidedly superior to that of Europeans, and that the same applies, but to a less degree, to the weight.

The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

	STATURE. Feet.	In.
An Englishman	6 to 5	4½ 00
An Englishwoman	5 to 5	4 00
European male skeleton	5	8
Do.	5	5
A Negro at the Lunatic Hospital, Liverpool	5	10½
Another from Virginia	5	5½
Another from the Gold Coast	5	8
Another	5	00
Negro skeleton	4	11
Another	5	7½
A Lascar	5	4
Venus de Medici	5	00
Tyson's Chimpanzé (*Simia Troglodytes*)	2	2
Mr. Abel's Orang Otang	2	7
Camper's Do.	less than	30
Mr. White's Monkey	2	2

STATUS, (*stare, statum,* 'to stand,) Acme — s. Cruditatis, Crudity—s. Erethiticus, Nervous diathesis—s. Gastricus, *Embarras gastrique*—s. Nervosus, Nervous diathesis—s. Parturiendi, Parturition — s. Sthenicus, Sthenia — s. Verminosus, Helminthiasis.

STAVESACRE, Delphinium staphisagria.

STAXIS, (from σταζω, 'to drop,') *Apostax'is.* A slight epistaxis or nasal hemorrhage.

STEAMDOCTOR. A term applied to one who treats all, or most, diseases by steam.

STEAR, (στεαρ, gen. στεατος,) see Fat, Sevum.

STÉARATÉ, Emplastrum.

STEARIN, see Fat.

STEARINUM CETACEUM, Cetaceum.

STÉAROLÉ, (from *stear,*) Pomatum — s. *Solide,* Emplastrum.

STEAROSIS, (from *stear,* and *osis,*) Steatosis.

STEARRHŒ'A, *Steatorrhœ'a, Seborrhœ'a, Seborrhag''ia, Smegmatorrhœ'a, Smegmorrhœ'a, Flux'us seba'ceus, Seba'ceous Flux,* (*stear,* and ῥεω, 'I flow.') Augmentation of secretion from the sebaceous follicles of the skin.

STEARRHŒA NI'GRICANS. A term used by Dr. Neligan, of Dublin, for a black discoloration of the face, observed in young females affected with derangement of the catamenia, and which, in his opinion, is owing to a dark secretion from the cutaneous sebaceous glands.

STEATITES, (from *stear,*) Polysarcia.

STEATOCE'LĒ, (*stear,* and κηλη, 'a tumour.') A tumour formed by a collection of steatomatous matter in the scrotum.

STEATO'MA, gen. *Steato'matis, Tu'mor lar'deus,* (*stear,* and *oma.*) *Seva'tio, Emphy'ma encys'tis steato'ma.* An encysted tumour, whose contents are similar to fat.

STEATOP'YGA, (*stear,* and πυγη, 'buttocks.') *Buttock-hump.* Fat buttocks; such as exist in the Hottentot female.

STEATORRHŒA, Stearrhœa.

STEATO'SIS, *Steato'sis,* (from *stear* and *osis.*) Fatty degeneration of a part, or unusual deposition and accumulation of fat in its adipose tissue.

STEATO'SIS COR'DIS, *Degenera'tio adipo'sa cor'dis, Cardiethmolipo'sis* and *Cardiomyolipo'sis* (Pi orry), *Fat'ty heart.* Unusual deposition of fat on the heart: by some presumed to be occasionally

a true adipose degeneration of the substance of the heart.

STEATOSIS HEPATICA, Adiposis hepatica.

STEATOZOON FOLLICULORUM, (*stear*, and ζωον, 'an animal,') Acarus Folliculorum.

STEEL, ([Sax.] ꝛtẏle,) Chalybs.

STEEP, Rennet.

STEEPLEBUSH, Spiræa tomentosa.

STEER'S OPODELDOCH, see Opodeldoch, Steer's.

STEGANOP'ODES, (στεγανοποδες,) *Planip'edes.* They who have flat feet, or are webfooted, (from στεγανος, 'covered,' and πους, 'foot.')

STEGANUS, (στεγανος,) Constipated.

STEGMONTH, see Parturient.

STEGNO'SIS, *Steno'sis, Constipa'tio, Stipa'tio, Condensa'tio, Obstruc'tio,* (στεγνωσις, from στεγνοω, 'I constrict.') Constriction or narrowness of the pores and vessels. Stricture. Constipation. Suppression or stopping or stoppage of the evacuations. See Arctatio.

STEGNOTICA, (στεγνωτικα,) Astringents.

STEIROSIS, (στειρωσις,) Sterilitas.

STEL'LA, 'a star,' *Fas'cia stella'ta,* (F.) *Étoile.* A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple;* in the second, *double.* It was employed in fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERRÆ, Plantago coronopus.

STELLARIA MEDIA, (*stella,* 'a star,') Alsine media—s. Scilla, Scilla.

STELLATA RUPINA, (from *stella,*) Centaurea calcitrapa.

STELL'ULÆ VERHEYEN'II, (*stella,* 'a star,' *stel'lula,* 'a little star.') *Substan'tia stella'ta serpenti'na* seu *radia'ta, Ellych'nia.* A stelliform plexus of veins at the surface of the kidney, which gives origin to the interlobular veins.

STELOCHITIS, Osteocolla.

STEMA, (στημα,) Penis, (especially the glans.)

STENAGMUS, (στεναγμυς,) Suspirium.

STENAGMA, (στεναγμα,) Suspirium.

STENO, (from στενος,) in composition, Narrow.

STENO, DUCT OF, see Parotid.

STENOBREGMATE, (*steno,* and βρεγμα, 'the top of the head,') see Cranium.

STENOCARDIA, (*steno,* and καρδια, 'heart,') Angina pectoris, Cardiostenosis.

STENOCHO'RIA, *Stenochori'asis,* (*steno,* and χωρα, 'space.') Angustia, Narrowness, Stricture. Employed by some for contraction of the vagina especially.

STENOCHORIA INTESTINI RECTI, Stricture of the rectum—s. Œsophagi, Dysphagia constricta.

STENOMYCTE'RIA, (*steno* and μυκτηρ, 'nose.') Contraction of the nasal passages.

STENON or STENO, DUCT OF, see Parotid.

STENOSIS, (στενωσις, *stenos* and *osis,*) Stegnosis.

STENOSTEGNOSIS, (*steno,* and *stegnosis,*) Stenostenosis.

STENOSTENO'SIS, *Stenostegno'sis,* (*steno,* and στενωσις, 'contraction.') *Obstruc'tio duc'tûs Steno'ni.* Narrowness or contraction of the duct of Steno.

STENOSTOM'IA, (*steno,* and στομα, 'mouth.') Contraction of the mouth.

STENOTHO'RAX, gen. *Stenothora'cis,* (στενοθωραξ, from *steno,* and θωρᾰξ, gen. θωρακος, 'the chest.') One who has a narrow chest.

STENTOROPHO'NUS, (Στεντωρ, *Stentor,* a Greek of powerful voice in the army before Troy; and φωνη, 'voice.') One who has a strong voice.

STEP, ([Sax.] ꝛtæp,) *Pas'sus,* (F.) *Pas.* The step is produced by the separation of the two lower limbs, and includes that space plus the length of the foot.

STEPHANE, (στεφανη,) Crown.

STE'PHEN'S, MRS., REM'EDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000—about $25,000.

STEPHENSIA ELONGATA, Matico.

STEPMOTHER'S BLESSING, Hangnail.

STERCOLIN, (from *stercus,*) Serolin.

STERCORA'CEOUS, *Stercora'rius, Diachoret'icus, Ster'coral,* (from *stercus,*) *Fe'cal, Fæ'cal,* (F.) *Stercoraire, Stercoral.*

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercora'ceous matter.* The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: *à posteriori* has been similarly used.

STERCORAIRE, Stercoraceous.

STERCUS, gen. *Ster'coris,* Excrement, Fimus —s. Anseris, Fimus anseris — s. Caninum album, Album Græcum — s. Diaboli, Asafœtida — s. Equi non castrati, Fimus.

STERCUS HUMA'NUM, Homerda. Human excrement.

STERCUS LACERTÆ, Crocodilia.

STEREOCYST'IS, (*stereus,* and κυστις, 'cyst.') A hard encysted tumour.

STE'REOSCOPE, *Stereoscop'ium,* (*stereus,* and σκοπεω, 'I view.') A physical instrument by means of which plane pictures of an object are made on each retina, and so blended as to appear as one in relief. Also, an instrument for detecting a calculus in the bladder, and foreign bodies in the soft parts. It resembles a common catheter, having an expanded free extremity.

STEREOT'ICA, (from *stereus.*) Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

STEREUS, (στερεος,) Solid.

STER'ILE, *Ster'ilis, A'gonos, Aph'orus, Aphor'icus, Ablast'es, Infecun'dus,* Barren, (F.) *Stérile,* (from στερρος, 'barren.') Not producing fruit; infecund.

STERILIS, Sterile.

STERIL'ITAS, *Agon'ia, Steiro'sis, Stiro'sis, Agenne'sia, Agenne'sis, Infecun'ditas, Steril'ity, Aeye'sis, Bar'renness, Infecun'dity, Apho'ria, Atec'nia, Atoc'ia,* (F.) *Stérilité.* Quality of that which is barren. Sterility may be *absolute* or *relative.* The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

STERNAD, see Sternal.

STER'NAL, *Sterna'lis,* (from *sternum.*) Relating or appertaining to the sternum or breast bone.

STERNAL ASPECT. The aspect of the body where the sternum is situate.—(Barclay.) *Sternad* is used by the same writer adverbially to signify towards the sternal aspect.

STERNALGIA, *Sternodyn'ia,* (*sterno,* and αλγος, 'pain.') Pain referred to the sternum. Angina pectoris.

STERNO, in composition, the sternum.

STERNOCLAVIC'ULAR, *Sternoclavicula'ris.* That which relates to the sternum and clavicle.

STERNOCLAVIC'ULAR ARTICULA'TION is the union of the inner extremity of the clavicle with a round

facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two *radiated sternoclavicular*, (F.) *Sterno-claviculaires rayonnées; one* anterior, and *one* posterior—an *interclavicular ligament* extending between the two clavicles, and two synovial capsules, separated by an *interarticular fibrocartilage*. The costoclavicular ligament may also be considered to belong to this articulation.

STERNOCLAVIOMASTOÏDIEN, Sternocleidomastoideus—s. Cleidobrachialis, Pectoralis major—s. Cleidohyoideus, Sternohyoideus.

STER'NOCLEI'DOMASTOÏDE'US, *Sternomastoïde'us, Clei'domastoïde'us, Mastoïde'us, M. ante'rior, Nuta'tor cap'itis;* (F.) *Sternoclaviomastoïdien, Sternomastoïdien;* (*sterno*, κλεις, 'the clavicle,' and *μαστος*, 'the mastoid process.') A muscle situate at the anterior and lateral part of the neck. It is long and flattened; simple, above; and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighbouring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

STERNOCOSTAL, Triangularis sterni — *s. Costo-clavio-huméral*, Pectoralis major — *s. Huméral*, Pectoralis major.

STERNOHYOÏDE'US, *Sternocleidohyoïdeus, Sternohyoïdes pri'mus;* (from *στερνον*, 'the sternum,' and *υοειδης*, 'the os hyoides.') A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum;—at the posterior part of the sternoclavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

STERNOMASTOÏDIEN, Sternocleidomastoïdeus—*s. Pubien*, Rectus abdominis.

STERNOTHYROÏDE'US, *Sternothyroïdes, Bron'chius*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides by the medium of the thyrohyoid membrane.

STERNODYNIA, (*sterno*, and *οδυνη*, 'pain,') Sternalgia — s. Syncopalis, Angina pectoris — s. Syncoptica et Palpitans, Angina pectoris.

STERNOÖMPHALODYMIA, (*sterno*, *ομφαλος*, 'navel, and *δυω*, 'to mingle,') see Somatodymia.

STERNOPA'GIA, (*sterno*, and *παγω*, 'I fasten.') A monstrous union of fœtuses, in which they are attached at the sternum.

STERN'UM, *Ster'non*, (*στερνον*, from *στερρος*, 'solid;') *Pec'tus, Os as'ser* seu *pec'toris* seu *xiphoïdes* seu *gladi'oli* seu *ensifor'mē, Scu'tum cor'dis* seu *pec'toris, Breastbone, Hæ'mal Spine* of Owen. An azygous symmetrical bone, situate at the forepart of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage — the xiphoid. It has an *anterior* or *cutaneous surface*, a *posterior* or *mediastinal*—a *superior* or *clavicular extremity*, and an *inferior* or *abdominal*. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Béclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal:* 2. *Duo-sternal:* 3. *Tri-sternal:* 4. *Quarti-sternal:* 5. *Quinti-sternal:* 6. *Ultimi-sternal* or *Ensi-sternal*.

STERNUMENTUM, (*sternuo, sternutum*, 'to sneeze.') Sneezing.

STERNUTAMENTORIA, (*sternuto, sternutatum*, 'to sneeze,') Achillea ptarmica.

STERNUTAMENTUM, Sneezing.

STERNUTATIO, Sneezing.

STERNUTATOIRE, Sternutatory.

STER'NUTATORY, *Sternutato'rius, Ster'nutory, Sternutamen'tum, Errhi'num, Ptar'micum, Anarrhi'num*, (F.) *Sternutatoire*. A substance which provokes sneezing; as tobacco, &c.—See Errhine.

STERNUTORY, Sternutatory.

STERTEUR, Stertor.

STER'TOR, *Ron'chus, Rhon'chus, Ren'chus, Rhen'chus*, (F.) *Sterteur, Ronflement*, (*stertere*, 'to snore.') The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *ster'torous*, (F.) *Stertoreux; Respira'tio stertuo'sa* seu *stertens* seu *stertoro'sa*.

STERTOROUS, see Stertor.

STETHÆ'MIA, *Hyperæ'mia Pulmo'num* seu *Pec'toris, Conges'tio Pulmo'num* seu *Pec'toris*, (F.) *Hypérémie* ou *Congestion des Poumons;* (from *stetho*, and *αιμα*, 'blood.') Hyperæmia of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

STETHO, (from *στηθος*, 'chest,') in composition, 'the chest.'

STETHOCATHARSIS, (*stetho*, and *καθαρσις*, 'a purging,') Expectoration.

STETHOCHYSIS, (*stetho*, and *χυω*, 'to pour out,') Hydrothorax.

STETHODESMIS, (*stetho*, and *δεσμις*, 'a bandage,') Corset.

STETHODESMIUM, Corset.

STETHODESMUS, Corset.

STETHOM'ETER, (*stetho*, and *μετρον*, 'measure.') An instrument, proposed by Dr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1-200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax.

Under the name *Thoracom'eter*, Dr. Sibson has described an instrument of his invention, which is employed with a similar view as the stethometer of Dr. Quain.

STETHOPARAL'YSIS, *Paral'ysis nervo'rum thora'cis, phrenicorum*, &c.; (*stetho*, and *παραλυσις*, 'paralysis.') Palsy of the muscles of the chest.

STETHORRHEUMA, (*stetho*, and *ῥευμα*, 'defluxion, rheumatism,') Pleurodynia.

STETH'OSCOPE, *Stethoscop'ium, Stethos'copum, Echoscop'ium, Psophom'eter, Thoracoscop'ium*, (*stetho*, and *σκοπεω*, 'I examine.') An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the

physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are now made in the plainest and lightest manner and without any plug. Double stethoscopes have, likewise, been invented to enable both ears to be used at the same time.

Stethoscopes are sometimes flexible, like the flexible eartrumpet.

This mode of examining affections of the chest, *Steth'oscopy, Stethoscop'ia*, &c., is what Laënnec terms *Auscultation médiate, Me'diate Ausculta'tion.*

STETHOSCOPIA, see Auscultation, and Stethoscope.

STETHOSCOP'IC, *Stethoscop'icus*, (F.) *Stéthoscopique*. Furnished by stethoscopy or auscultation,—as a '*stethoscopic* sign.'

STETHOSCOPY, see Stethoscope.

STETHUS, (στηθος,) Thorax.

STEW, ([old F.] *estuve*, [Sax.] ϸτeϸa,) Stove.

STHENI'A, *Sthen'ia, Diath'esis sthen'ica, Sta'tus sthen'icus, Vis auc'ta*, (σθενος, 'strength,' 'power.') Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians; as well as *Asthenia*, its antitheton. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, (from σθενος, 'strength,') Active.

STHÉNIQUE, see Active.

STHENOPYRA, (from σθενος, 'strength,' and πυρ, 'fever,') see Synocha.

STIAN, ([Sax.] ϸτiȝenᵹ, from ϸτiȝan, 'to ascend, to rise,') Hordeolum.

STIBI, (στιβι,) Antimonium.

STIBIALIS, Antimonial.

STIB'IALISM, *Stibialis'mus*, (from *stibium*, 'antimony.') The aggregate phenomena produced by antimonials, when given in large quantities:—antimonial intoxication or poisoning.

STIBIATUS TARTRIS LIXIVIÆ, Antimonium tartarizatum.

STIBII BUTYRUM, Antimonium muriatum—s. Deutomurias sublimatus, Antimonium muriatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum—s. Oxidum præcipitando paratum, Algaroth—s. Oxodes album, Antimonium diaphoreticum—s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydi sulphurati hydrosulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreum, Antimonii vitrum—s. Oxydum sulphuratum, Oxydum stibii sulphuratum—s. Subhydrosulphas, Antimonii sulphuretum rubrum—s. Submurias præcipitando paratum, Algaroth—s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum—s. et Potassæ deutotartras, Antimonium tartarizatum.

STIBIODERMIC, see Unguentum antimonii.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STICHAS (Stœchas) ARABICA, Lavandula stœchas.

STICKWORT, Agrimony.

STICTA PULMONACEA, (from στικτος, 'spotted,') Lichen pulmonarius.

STIFF JOINT, MUSCULAR, Contractura

STIFF JOINTS, Milk sickness.

STIFFNECK, Torticollis.

STIGMA, (στιγμα, 'a small puncture,') Cicatricula.

STIG'MATA (pl. of *stigma*,) see Nævus. The breathing pores of insects are so called.

STIG'MATA OVARIO'RUM, *Cicatri'ces Ovario'rum*. The cicatrices left in the ovary after the escape of ova.

STILBOMA, gen. *Stilbo'matis*, (στιλβωμα, from στιλβω, 'to make shining,') Cosmetic.

STILL, (from *stilla*,) Alembic.

STILET, (dim. of *stilus*,) Specillum.

STILLA, Gutta.

STILLATIO SANGUINIS E NARIBUS, (*stillare, stillatum*, 'to drop,') Epistaxis.

STILL'BORN, *Na'tus Mor'tuus*, (F.) *Mort-né*. Born still or lifeless,—dead born; a stillborn child,—*Necrotoc'ion.*

STILLICID'IUM, *Substil'lum*, (*stilla*, 'a drop,' and *cadere*, 'to fall.') This term is often used synonymously with *Strangury*. It means the flow of any fluid—particularly the urine—drop by drop. Also a kind of embrocation, *Stillicid'ium su'pra par'tem*, effected by dropping a liquid upon a part.

STILLICIDIUM LACRYMARUM, Epiphora—s. Narium, Coryza—s. Sanguinis e naribus, Epistaxis—s. Supra partem, see Stillicidium.

STILLIN'GIA, (after Dr. Benj. Stillingfleet, an English botanist.) *S. sylvat'ica, Queen's Root, Queen's delight, Yaw root, Mar'cory, Cockup hat.* An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sex. Syst.* Monœcia Monadelphia. *Nat. Ord.* Euphorbiaceæ. The root—*Stillingia*, Ph. U. S.—is said to be used in syphilis, obstinate cutaneous affections, &c., like sarsaparilla.

STILUS, Stylus.

STIMATO'SIS, *Stymato'sis, Hæmorrhag''ia Pe'nis, Stymatorrhag''ia, Phallorrhag''ia, Caulorrhag''ia*, (from στυμα, 'priapism,' itself from στυειν, 'to erect,' and *osis*.) Hemorrhage from the male organ, accompanied or not with priapism.

STIMMI, (στιμμι,) Antimonium.

STIM'ULANT, *Stim'ulans, Ex'citans, In'citans, Incenti'vum, Irri'tans, Exci'tant, Inci'tant, Hypersthen'ic, Pyretogenet'ic*, (from *stimulare*, 'to goad.') A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible*,—that is, have a prompt but temporary action; others are *permanent* or *persistent*. The action of stimulants is called *Stimula'tion, Stimula'tio, Incita'tio.*

The chief stimulants are the following: Æther Sulphuricus, Ammonia, Asafœtida, Brucia, Camphora, Capsicum, Castoreum, Cinnamomum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinium, Nux Vomica, Olea Essentialia, Opium (in small dose), Piper, Sinapis, Strychnia, Zingiber,—Alcohol, Caloric, Electricity, Mental Emotions, (the Impetuous.)

STIM'ULUS, 'a goad.' *Incitamen'tum, Irrita'men, Irritamen'tum, Poten'tia Irri'tans.* Any thing which excites the animal economy.

STINE, Hordeolum.

STINK POKE, Dracontium fœtidum—s. Weed, Chenopodium anthelminticum, Datura stramonium, Polanisia graveolens.

STIPATIO, (*stipare, stipatum*, 'to stop up,') Stegnosis.

STIPATIO TELÆ CELLULO'SÆ INFANT'UM. Induration of the cellular tissue of children.

STIROSIS, (στειρωσις, from στειρος, 'sterile,' and *osis*,) Sterilitas.

STITCH, (same root as *stick*, Sax. ϸτiᵹan, 'to pierce,') (Sc.) *Stound*, (Prov.) *Day*, (F.) *Point*

(L.) *Punc'tum.* An acute lancinating pain, like that produced by the puncture of a sharp needle.

STITCH, COMMON, Suture, common — s. Royal, see Suture—s. in the Side, Pleurodynia.

STIZOLOBIUM, (*στιζω*, 'to prick,' and *λοβιον*, 'a small pod,') Dolichos pruriens.

STLENGIS, (*στλεγγις*,) Strigil.

STOBÆ'A RUBRICAUL'IS, (after D. Stobæus, of Sweden, a patron of Linnæus.) A South African plant, *Nat. Ord.* Compositæ. A tincture of the bruised roots is diuretic, and of great service in gravel.

STOCK'ING, LA'CED, (F.) *Bas lassé.* A bandage used by surgeons, which consists of a stocking made of firm cloth or dogskin, admitting of being tightly laced anteriorly. It is made, also, of elastic gum cloth. It is employed in varices and ulcers of the legs.

STOCK'PORT, MIN'ERAL WA'TERS OF, See New York, mineral waters of.

STŒCHAS ARABICA, (*στοιχας*,) Lavandula stœchas.

STŒCHIOL'OGY, *Stœchiolog''ia*, (F.) *Stœchiologie*; (*στοιχειον*, 'element,' and *λογος*, 'a discourse.') A treatise, or the theory, of elements; hence of the elementary parts of organized substances.

STOICHEION, (*στοιχειον*,) Element.

STOMA, gen. *Stom'atis*, (*στομα*, gen. *στοματος*,) Mouth.

STOMAC'ACĒ, (*στομακακη*,) *Stomatoc'acē, Stomal'gia, Labrisul'cium, Cheiloc'acē, Uloc'acē, Cheilomala'cia, Stomaton'oma, Stomatonecro'sis, Can'cer O'ris, Can'ker*, (*stoma*, and *κακος*, 'evil.') Fœtor of the mouth with a bloody discharge from the gums. (F.) *Cancer aquatique*; see Cancer Aquaticus. Also, Scurvy.

STOMACACE, Porphyra nautica — s. Gangrænosum, Cancer aquaticus — s. Universale, Purpura hæmorrhagica.

STOMACAL, Stomachal.

STOM'ACH, (*στομαχος*,) *Stom'achus, Ventric'ulus, Ne'dys, Anocœ'lia, Gas'ter, Gluttu'patens, Maw*, (of animals,) (Sc.) *Kyte, Pechan*, (F.) *Estomac*, (from *stoma*.) One of the principal organs of digestion. It is a musculomembranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is formed into chyme. When viewed externally, the stomach has, 1. An *ante'rior face*, which looks a little upwards. 2. An *infe'rior face*, directed downwards. 3. An *inferior* or *colic margin*, which is convex and extensive, and is called the *greater curvature, curvatu're ma'jor*, (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A *supe'rior* or *diaphragmat'ic mar'gin*, which is shorter, concave, and is called the *lesser curvature, curvatu're mi'nor*, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A *left* or *œsophage'al or'ifice*, called, also, the *car'dia, Os rentric'uli* or *up'per or'ifice*. 6. A *right* or *intes'tinal* or *infe'rior or'ifice*, called the *pylo'rus*. 7. A considerable dilatation, situate to the left of the cardia and greater curvature—the *great tuberos'ity* or *great cul-de-sac* or *fun'dus of the stomach*; *fundus* seu *succus ventric'uli*, and, 8. A less extensive dilatation, situate to the right of the greater curvature,—*the les'ser tuberos'ity* or *les'ser cul-de-sac, An'trum pylo'ri* seu *pylo'ricum, Pars pylo'rica*. The inner surface of the stomach is of a reddishwhite colour, and has a marbled appearance. It is constantly covered by thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The parietes of the stomach consist of three membranes in superposition. The outermost is serous, and is an extension of the peritoneum. The middle coat is *muscular*,—some of its fibres running longitudinally; others, transversely, and others obliquely. The innermost membrane is of a mucous nature, *Crus'ta villo'sa ventric'uli, Gastromycod'eris*, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pylor'ic valve*. These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brun'ner*. The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastroëpiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the cœliac plexus.

STOMACH CELL, see Favulus — s. Disease, Limosis.

STOMACH, FIRST, Ingluvies.

STOMACH PUMP, *Gastren'chyta, Antli'a gas'trica*, (F.) *Pompe pour l'estomac*. A useful instrument for conveying fluids to the stomach when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach tube must be attached to the nozzle, and passed down the throat, — the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach pump was first employed in America by Dr. Physick, in the year 1812.

STOMACH, SECOND, Proventriculus—s. Sick, Milk sickness—s. Third, Ventriculus callosus.

STOMACH TUBE, see Tube, œsophageal.

STOM'ACHAL, *Stomach'ic, Stomach'ical, Cardi'acus*, (*στομαχικος*,) *Stomach'icus, Stomacha'lis, Viscera'lis*, (F.) *Stomacal, Stomachique*. That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHALGIA, (*stomach*, and *αλγος*, 'pain.') Cardialgia.

STOMACHI RESOLUTIO, 'weakness of stomach,' Dyspepsia.

STOMACHIC, Stomachal.

STOMACHICAL, Stomachal.

STOMACHIQUE, Stomachal.

STOM'ACHUS, (*στομαχος*, from *stoma*.) This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach (see Cardia), and for the stomach itself. Hippocrates calls the neck of the bladder *στομαχος κυστεως*; and the neck of the uterus *της μητρας στομαχος*.

STOMAL'GIA, *Stomatal'gia, Stomatodyn'ia*, (*stoma*, and *αλγος*, 'pain.') Pain in the mouth.

STOMAPYRA, (*stoma*, and *πυρ*, 'fire, fever.') Aphthæ—s. Aphtha, Aphthæ.

STOMATALGIA, (*stoma*, and *αλγος*, 'pain.') Stomalgia.

STOMATEL'CIA, *Stomatelco'sis*, (*stoma*, and *ἑλκος*, 'an ulcer.') Ulceration of the mouth.

STOMAT'IA, *Stomatopathi'a*, (from *stoma*.) Disease of the mouth.

STOMAT'IC, (στοματικος,) *Stomat'icus*, (F.) *Stomatique*. A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

STOMATITE APHTHEUSE, Stomatitis, aphthous—*s. Chorbonneuse*, Cancer aquaticus—*s. Couenneuse*, Stomatitis, pseudomembranous—*s. Crèmeuse pultacée*, Aphthæ—*s. Folliculeuse*, Stomatitis, aphthous—*s. Gangréneuse*, Cancer aquaticus—*s. Mercurielle*, see Salivation, mercurial—*s. Ulcéreuse*, Stomatitis, aphthous.

STOMATI'TIS, (*stoma*, and *itis*.) (F.) *Inflammation de la Bouche*. Inflammation of the mouth.

Stomatitis, Aph'thous, *S. follic'ular* or *ul'cerous*, *Emphlysis Aph'tha*, *A. Adulto'rum*, (F.) *Stomatite, S. aphtheuse* ou *folliculeuse* ou *ulcéreuse*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

Stomatitis, Erythem'atous. Simple inflammation of the mouth.

Stomatitis, Exsudativa, Aphthæ—s. Follicular, S. aphthous—s. Gangrenous, Cancer aquaticus—s. Materna, Stomatitis of nursing women.

Stomatitis, Mercu'rial, *S. mercuria'lis*, *Hydrargyrostom'atis*, *Hydrargyrostomati'tis*. Inflammation of the mouth induced by mercury.

Stomatitis of Nur'sing Women, *S. Nutri'cum* seu *Mater'na*, appears to be a variety of S. aphthous.

Stomatitis Nutricum, Stomatitis of nursing women.

Stomatitis Pseudomem'branous, (F.) *Stomatite couenneuse*, *Diphthérite buccale*, *Pseudomembranous inflamma'tion of the mouth*;—in its worst form, *Sto'maty'phus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease which is rarely seen extensively except in large foundling establishments.

Stomatitis, Ulcerous, S. aphthous—s. Vesiculosa infantum, Aphthæ.

STOMATOCACE, (*stoma*, and κακος, 'evil.') Stomacace.

STOMATODYNIA, (*stoma*, and οδυνη, 'pain.') Stomalgia.

STOM'ATOGAS'TRIC, *Stom'atogas'tricus*, *Stomogas'tric*, *Stomogas'tricus*, (*stoma*, and γαστηρ, 'the stomach.') Appertaining to the mouth and stomach—as the *stomatoyastric* ganglia of the lower animals. See Encephalon.

STOMATOMALACIA PUTRIDA, (*stoma*, and μαλακια, 'softness.') Cancer aquaticus.

STOMATONECROSIS, (*stoma*, and νεκρωσις, 'death.') Cancer aquaticus, Stomacace.

STOMATONOMA, (*stoma*, and νομη, 'an eating ulcer.') Stomacace.

STOMATOPA'NUS, (*stoma*, and πανος, 'a glandular tumour.') *Stomatophy'ma glandulo'sum*, *Panus Fau'cium*. Tumefaction of the glands of the mouth.

STOMATOPHY'MA, gen. *Stomatophy'matis*, (*stoma*, and φυμα, 'a swelling.') A swelling of the mouth.

Stomatophyma Glandulosum, Stomatopanus.

STOMATOPLAS'TIC, *Stomatoplas'ticus*, (*stoma*, and πλασσω, 'I form.') An epithet for the operation of forming a mouth where the aperture has been contracted from any cause; *Stomatoplas'ty*.

STOMATORRHAG''IA, *Stomatorrhœ'a*, *Hæmorrhag''ia o'ris* seu *fau'cium*, *Sau'guinis profu'vium ex O'rē*, *Hæmorrhoïdes O'ris*, *Stomato'sis*, *Stomorrhag''ia*, (F.) *Hémorrhogie buccale*, (*stoma*, and ῥηγνυμι, 'I break out.') Hemorrhage from the mouth.

Stomatorrhagia Alveolorum, Phatnorrhagia—s. Gingivarum, Ulorrhagia.

STOMATORRHŒA, (*stoma*, and ῥεω, 'to flow.') Stomatorrhagia.

STOMATOSCOPE, (*stoma*, and σκοπεω, 'I view.') Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Spec'ulum o'ris*.

STOMATOSEPSIS, (*stoma*, and σηψις, 'putrefaction.') Cancer aquaticus.

STOMATOSIS, (from *stoma*,) Stomatorrhagia.

STOMATOSPASMUS, (*stoma*, and *spasmus*,) Trismus.

STOMATYPHUS, (*stoma*, and *typhus*.) Stomatitis, pseudomembranous.

STOMENCEPHALUS, Stomocephalus.

STOMOCEPH'ALUS, *Stomencephalus*, (F.) *Stomocéphale*, *Stomencéphale*, (*stoma*, and κεφαλη, 'head.') A genus of monsters having two contiguous eyes, or a double eye occupying the median line; the nasal apparatus atrophied and forming a tube (*trompe*); the jaws rudimental; and the mouth imperfect or wanting.—(I. G. St. Hilaire.)

STOMOMANICON, (*stoma*, 'face,' and μανος, 'thin' [?].) Platysma myoides.

STOMORRHAGIA, Stomatorrhagia.

STONE BINDER, Osteocolla—s. In the Bladder, Calculi vesical—s. Crop, Sedum—s. Crop, biting, Sedum—s. Mint, Cunila mariana—s. Moss, *Tripe de roche*—s. Pock, Acne—s. Root, Collinsonia Canadensis—s. Sweat, see Hyraceum.

STONES, THE, Testes.

STOOL, ([Sax.] ϸtol,) Dejection.

Stools, Calomel, see Calomel.

STOPPAGE, Stegnosis.

STOPPING, Filling, Stegnosis—s. of the Belly, Bowels, Guts, or Stomach; Constipation.

STORAX, Styrax—s. Liquida, Liquidambar styraciflua.

STO'REY'S WORM CAKES. An empirical preparation formed of *Calomel* ℈j, *Jalap* ʒj, *Zingib.* ℈ij, *Sacch.* ʒj, *Cinnab. antim.* q. s. to colour them; *Syrup. simpl.* q. s. to make into cakes.

STORKBILL, Geranium maculatum.

STOUND, ([Icel.] *stunde*, 'to be in pain,') Stitch.

STOVE, *Æstua'rium*, *Stu'pha*, Old French, *Estuve*; a *Stew*, (F.) *Étuve*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case the *vieu* or *stove* is said to be *wet* or *humid*; in the opposite case it is said to be *dry*, (F.) *sèche*. The latter, which is used by the Turks, is the *Py'ria*, *Pyriate'rium*, *Lacon'icum*, *Calida'rium* or *Calda'rium*, *Suda'tio concamera'ta*, *Turkish*, *Eastern*, or *Roman bath*. In the true Turkish bath, however, the air of the bathing apartment is densely charged with vapor, which the so-called Turkish bath, of recent introduction into England, is generally not. The former is their *Tepida'rium* or *Vapora'rium*, which see. These kinds of baths greatly excite the cutaneous transpiration, and are valuable agents in rheumatic and other affections.

STOY'S MEDICINE FOR HYDROPHOBIA, see Anagallis.

STRABI, (στραβοι,) see Strabismus.

STRABILISMUS, Strabismus.

STRABISM'US, (στραβισμος,) *Strabilis'mus*, *Parop'sis Strabismus*, (from στραβος, 'twisted; one who squints,') *Strabos'itas*, *Loxophthal'mus*, *Distor'sio Lus'citas*, *Il'los*, *Illo'sis*, *Ilo'sis*, *Helo'sis*, *Squint'ing*, *Squint*, *Crosseye*, (Prov.) *Doyle*, *Glee'ing*, (Sc.) *Skel'lie*, *Skee'ly*, (F.) *Strabisme*, *Vue louche*, *Louchement*. Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; on a convulsive state of one of

those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seems to depend upon an excess of strength in one of the motor muscles, we must endeavour to give tone to that which is too weak by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses provided with a piece of looking-glass on the side to which the eye is vitiously turned, so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If, owing to weakness, the organ must be strengthened by being exerted alone, and leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Strabismus may be *single*, or affect one eye only, or *double*, affecting both eyes, and it may be *conver'gent* or *diver'gent*, that is, with the ball drawn towards the nose, or away from it.

Those affected with Strabismus are called *Stra'bi*, *Strabo'nes*, *Strabo'ni*, *Streb'li*, *Il'li*, *Ill'ides*, *Squint'ers*, *Squint'eyed*, (Sc.) *Gle'yed*, (F.) *Louches*, *Bigles*. A slight deviation is generally called a *Cast in the Eye*, and, sometimes, a *Cock-eye*.

Strabismus, Convergent, see Strabismus—s. Divergent, see Strabismus—s. Double, see Strabismus—s. Single, see Strabismus.

STRABONES, (στραβωνες,) see Strabismus.

STRABONI, see Strabismus.

STRABOSITAS, Strabismus.

STRABOT'OMY, *Strabotom'ia*, (στραβος, 'one who squints,' and τομη, 'incision.') The operation for the removal of squinting by the division of the muscle or muscles that distort the eyeball. A *Strabotomist* is one who practises strabotomy.

STRAEDEATH, see Death.

STRAIN, (στραγγειν, [L.] *stringere*, (F.) *estreindre*, 'to constrict or squeeze,') Sprain.

Strain, *Colare*, (F.) *couler*. To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, Nisus.

STRAITS OF THE PELVIS, see Pelvis.

STRAMOINE, Datura stramonium.

STRAMONIA, Datura stramonium.

STRAMONIUM, (compounded from *strychnos* and μανικος, 'maniacal,') Datura stramonium—s. Fœtidum, Datura stramonium—s. Majus album, Datura stramonium—s. Spinosum, Datura stramonium—s. Vulgatum, Datura stramonium.

STRAMONY, Datura stramonium.

STRANGAL'IDES, (στραγγαλιδες,) pl. of *strangalis*, (from στραγγω, 'I compress.') Small, hard tumours, which form as in the breast when the milk does not find issue.

STRANGALION, (στραγγαλιον,) Tubercle.

STRANGALIS, (στραγγαλις,) Tubercle.

STRANGALISMUS, (στραγγαλισμος,) Strangulation.

STRANGERS' FEVER, see Fever, strangers'.

STRANGULATIO, (στραγγω, 'I compress,') Orthopnœa, Strangulation—s. Uterina, Angone—s. Vulvæ, Hysteria.

STRANGULA'TION, *Strangula'tio*, *Pnix*, *Pnix'is*, *Pnif'gos*, *Pnig'ma*, *Strangalis'mus*, (F.) *Étranglement*, *Strangulation*. State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine seriously intercepts the continuity of the digestive canal. In *Legal Medicine* it means the forcible obstruction of the air passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

STRANGULATOR, see Lycoides.

STRANGULLION, Strangury.

STRANGURIA, Strangury—s. Cruenta, Cystorrhagia.

STRANGURIE, Strangury — *s. Menstruelle*, Dysmenorrhœa.

STRANGU'RIOUS. Affected with, or of the nature of, strangury.

STRAN'GURY, (στραγγουρια,) *Strangu'ria*, *Paru'ria stillati'tia*, *Dysu'ria*, *Uri'næ Stillicid'ium* seu *Substil'lum*, *Strangull'ion*, *Strongull'ion*, (F.) *Strangurie*, (στραγγεω, 'to squeeze,' and ουρον, 'urine.') Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRANX, (στραγξ,) Gutta.

STRAP'PING, ([Sax.] ꝑꝛoppe, 'a strap.') The dressing of ulcers by means of straps or strips of adhesive plaster, linen, &c. Also, the plaster thus applied.

Strapping, Water, see Waterdressing—s. Wet, see Waterdressing.

STRATHPEF'FER, MIN'ERAL WA'TERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Rossshire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulphohydric acid.

STRATIOTES, (στρατιωτης,) Achillea millefolium.

STRATUM BACILLATUM seu *bacillosum*, 'bacillary layer,' (from *sternere*, *stratum*, 'to spread out,') see Tunica Jacobi—s. Corneum, Epidermis—s. Germinativum, Proligerous disc, *Tache embryonnaire* — s. Malpighii, Corpus mucosum — s. Pigmenti, see Choroid—s. Proligerum, Proligerous disc.

STRAWBERRY, (strewberry,) Fragraria — s. Bush, Euonymus Americanus — s. Shrubby, Rubus arcticus—s. Tree, Euonymus Americanus—s. Wild, Fragaria Virginiana.

STREAK, PRIMITIVE, (from [Sax.] ꝑꝛice, 'a line,') Groove, primitive.

STREAT'HAM, MIN'ERAL WA'TERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, (στρεβλοι,) see Strabismus.

STREBLOSIS, (στρεβλος, 'twisted,') Luxation.

STREMMA, (στρεμμα,) Luxation, Sprain.

STREPITO'SUS MOR'BUS seu AFFEC'TUS, (F.) *Maladie bruyante*, 'noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretion of gas by the mouth and anus.

STREPITUS, (from *strepere*, *strepitum*, 'to make a noise,') *Bruit*—s. Aurium, 'noise of the ears,' Tinnitus aurium.

STRETCHING, ([Sax.] ꝑꝛeccan, 'to stretch,') Pandiculation.

STRIÆ, (pl. of *stria*, 'a furrow,') see Vibices —s. Ciliares, Ciliary processes—s. Corneæ, Tænia semicircularis — s. Longitudinales Lancisii, see Corpus callosum — s. Medullares, see Processes teretes — s. Retinæ subjectæ ligamento ciliari, Halo signatus—s. Semilunares, Tænia semicircularis — s. Terminales, Tænia semicircularis — s. Transversales Willisii, see Corpus callosum.

STRI'ATED, *Stria'tus*, (F.) *Strié*, (from *stria*, 'a channel or groove.') Marked with small channels or grooves, or with lines of another colour.

STRIATED MUSCULAR FIBRE, see Muscular fibre.

STRIATUS, (*striare, striatum,* 'to make grooves or furrows,') *Cannelé,* Grooved, Striated; see Corpora striata.

STRIBILIGO, gen. *Stribili'ginis.* Efflorescence.

STRICTURA, Stricture — s. Ani, Strieture of the rectum — s. Intestini recti, Stricture of the rectum — s. Intestini recti spasmodica, Stricture of the rectum, spasmodic — s. Œsophagi callosa, Dysphagia conscricta — s. Œsophagi spasmodica, Œsophagismus—s. Pharyngis seu œsophagi vera, Dysphagia constricta — s. Præputii, Phimosis — s. Urethræ, Urethrostenosis—s. Ventriculi, Stricture of the stomach.

STRIC'TURE, *Strictu'ra,* (*stringere, strictum,* 'to draw tight.') *Coarctu'tio, Stegno'sis,* (F.) *Rétrécissement.* A diminution or contracted condition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, Dysphagia constricta — s. of the Pharynx, Dysphagia constricta.

STRICTURE OF THE RECTUM, *Strictu'ra A'ni* seu *Intesti'ni Rec'ti, Archosteguo'ma, Rectosteno'sis, Euthyenterosteno'ma, Archostegno'sis, Archosteno'sis, Proctoënceli'sis, Angusta'tio* et *Restric'tio intesti'ni rec'ti* seu *a'ni, Stenocho'ria intesti'ni rec'ti, Proctostcno'sis organ'ica,* occurs organically, and is a very serious affection; being generally dependent upon scirrhus.

STRICTURE OF THE REC'TUM, SPASMOD'IC, *Strictu'ra Intesti'ni Rec'ti spasmod'ica, Obstruc'tio Rec'ti spas'tica.* An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

STRICTURE OF THE STOM'ACH, *Gastrosteno'sis, Coarcta'tio* seu *Strictu'ra ventric'uli.* See Gastrostenosis cardiaca, &c.

STRICTURE OF THE URETHRA, Urethrostenosis -s. of the Urinary bladder, Cystostenochoria — s. Vesicæ urinariæ, Cystostenochoria.

STRICTUROTOMY, Urethrotomy.

STRIDOR DENTIUM, 'grinding of the teeth,' Brygma.

STRIÉ, Striated.

STRIGA ('a furrow') CARTILAGINOSA CORDIS, Isthmus of the fossa ovalis.

STRI'GIS, *Strig''ilis,* (from *stringere,* 'to touch lightly,') *Stlen'gis, Stelen'gis.* A fleshbrush. Also, an instrument, anciently used in the baths, for scraping off the sweat. The process was called *Strigilla'tio, Strigilla'tion.*

STRIPED MUSCULAR FIBRE, see Muscular fibre.

STROBILI'TES, (στροβιλιτης, from στροβιλος, *strobilus,* 'a cone of the pine.') Wine impregnated with the cones of the pine.

STROEMIA, (after H. Stroem, a Norwegian naturalist,) Cadaba.

STROKE, APOPLEC'TIC, (from [Sax.] ᵹᵴᵲᵱᵢᵴᵴᵴ

gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours: then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors, and distil off the alcohol by means of a waterbath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S. 1851. A somewhat modified form is in Ph. U. S. 1863.) The action—therapeutical and toxical—of strychnia on man and animals is exactly like that of the alcoholic extract of nux vomica. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like nux vomica. Dose, one-sixteenth to one-twelfth of a grain.

STRYCHNIA, ACETATE OF, Strychniæ acetas — s. Hydriodate of, Strychniæ hydriodas — s. Iodate of, Strychniæ iodas—s. Iodide of, Strychniæ hydriodas.

STRYCHNIA, I'ODIDE of IODHY'DRATE OF, (F.) *Iodure d'Iodhydrate de Strychnine*, is made by pouring a solution of *iodureted iodide of potassium* into a solution of a *salt of strychnia*; treating the precipitate with *boiling alcohol*, and crystallizing. Used in the same cases as strychnia. Dose, a tenth to a sixth of a grain.

STRYCHNIA, MURIATE OF, Strychniæ murias — s. Nitrate of, Strychniæ nitras — s. Sulphate of, Strychniæ sulphas.

STRYCHNIA and ZINC, DOUBLE IODIDE OF, Zinc and Strychnia, double iodide of.

STRYCH'NIÆ ACE'TAS, *Strych'nium* seu *Strychni'num ace'ticum*, *Ace'tas strych'nii* seu *strych'nicus*, *Ac''etate* of *Strych'nia* or *Strych'nine*. (This salt is formed by the direct combination of *strychnia* with *acetic acid*.) It is given in the same cases as pure strychnia.

STRYCHNIÆ HYDRI'ODAS, *S. Iodhy'dras*, *Strych'nium hydroïod'icum*, *Hydri'odas* seu *Iodhy'dras strych'nicus*, *Hydri'odate* or *I'odide of Strych'nia*, is prepared by mixing a solution of *iodide of potassium* with a concentrated solution of *acetate of strychnia*.

STRYCHNIÆ I'ODAS, *Strychni'næ I'odas*, *Strychni'na Ioda'ta*, *Strych'nium* seu *Strychni'num Iod'icum*, *I'odas Strych'nii* seu *Strych'nicus*, *I'odate of Strych'nia* or *Strych'nine*. (This salt may be formed by adding a concentrated solution of *iodic acid* to *strychnia*; treating with *boiling alcohol*; filtering, and leaving it to spontaneous evaporation.)

STRYCHNIÆ MU'RIAS, *Mu'riate of Strych'nia*. (The product of the union of *muriatic acid* and *strychnia*.) Used in the same cases as strychnia.

Li'quor Strych'niæ, *Solu'tion of Strych'nia* (Ph. B. 1864), is composed of *Strychnia*, gr. iv; *Acid. hydrochlor.* dil. ℥vj; *Sp. rectif.* ʒij; *Aq. destillat.* fʒvj. Dose, gtt iv—viij.

STRYCHNIÆ NI'TRAS, *Strych'nium ni'tricum*, *Nitrate of Strych'nia* or *Strych'nine*, (F.) *Nitrate* ou *Azotate de Strychnine*. (The product of the union of nitric acid and strychnia.) Used in the same cases as strychnia.

STRYCHNIÆ SUL'PHAS, *Strych'nium sulphu'ricum*, *Sul'phate of Strych'nia* or *Strych'nine*. (The product of the union of *strychnia* and *sulphuric acid* is admitted into the Ph. U. S. for 1863.) Has the same properties.

STRYCHNINA, Strychnia.

STRYCHNINE, Strychnia — s. Azotate of, Strychniæ nitras.

STRYCHNINUM, Strychnia.

STRYCHNISM, see Strychnos nux vomica.

STRYCHNIUM, Strychnia — s. Aceticum, Strychniæ acetas — s. Nitricum, Strychniæ nitras —s. Sulphuricum, Strychniæ sulphas.

STRYCHNOMA'NIA. With the ancients, the delirium caused by the Strychnos or Atropa belladonna.

STRYCHNOS, (στρυχνος,) Atropa belladonna, Solanum duleamara—s. Colubrina, see Strychnia, and S. Nux vomica—s. Guianensis, see Curare—s. Ignatii, Ignatia amara.

STRYCHNOS NUX VOM'ICA, *Nux Vom'ica*, *Metel'la*, *Canirum*, *Kooch'la tree*. *Nat. Ord.* Loganiaceæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Vomiquier*. A tree of the family *Strychnoïdes*, which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vom'ica*, *Vom'ic* or *Poi'son nut*, *Buch'elor's buttons*, &c., (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but subsequently an alcoholic extract was prepared from them, which was administered in paralytic affections, in small doses. The dose of the ALCOHOL'IC EX'TRACT, *Extrac'tum nu'cis vom'icæ spirituo'sum* seu *nucis vomicæ resino'sum* seu *nu'cis vom'icæ alcohol'icum* (Ph. U. S. 1863), (F.) *Extrait alcoholique de noix vomique*, is one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diarrhœa and dysentery. When taken to such an extent as to induce toxical phenomena — *Strychnism* — it causes, at first, or when given in a smaller dose, greatly augmented excitability of the spinal nervous system, with slight transient paroxysms or spasms of the limbs, and hurried respiration. In larger doses, the excitability is still more developed, with paroxysms of prolonged general tetanic convulsions, laryngismus or contraction of the glottis, violent efforts of respiration, and asphyxia.

The following is the formula for the preparation of the EXTRAC'TUM NU'CIS VOM'ICÆ ALCOHOL'ICUM of the Pharm. U. S. Take of *Nux vomica*, ℔j; *Alcohol*, a sufficient quantity. Expose the Nux Vomica to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The bark is the *false angustura* or false *cusparia bark*; *Rohun*. See Brucea antidysenterica.

The wood of STRYCH'NOS COLUBRI'NA, *Modira caniram*, an Indian tree, which contains strychnia, was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave in intermittents. It is the *Lig'num Colubri'num*, (F.) *Bois de Couleuvre*.

Under the names στρυχνη, and στρυχνος, different kinds of nightshade are described by Dioscorides.

STRYCHNOS POTATO'RUM, 'strychnos of drinkers,' *Clear'ing nut*. The fruit of a large tree of Silhet, which, when ripe, is sold in the markets of India, and has been introduced into those of London, under the name *Nirmullees* or *Nirmillies*. One of them is well rubbed for a minute or two around the inside of a vessel containing water, which it purifies by causing the impurities, which

the fluid contains, to be deposited, it is supposed, by its albumen and casein.

STRYCHNOS PSEUDOQUI'NA, *Quina do Campo*, of Brazil, is used by the natives as a substitute for cinchona.

STRYCHNOS TIEUTÉ, see Strychnia, and Upas—s. Toxicaria seu Toxifera, see Curare.

STRYPHNA, Astringents.

STRYPHNOS, (στρυφνος, 'sour, harsh,') Acerb.

STUDIOSUS MEDICINÆ, ('fond of medicine,') Philiatros.

STUDIUM INANE, 'empty study,' Aphelxia otiosa.

STUDY, BROWN, Aphelxia otiosa.

STUFF, ([D.] *stoffe*, [F.] *estoffe*, *étoffe*,) see Medicament, and Falsifications, table of.

STUFFING, Cynanche trachealis, Filling.

STULTITIA, Fatuitas.

STUMP, ([G.] Stumpf, [D.] *Stomp*,) (F.) *Moignon*. The part remaining from which a limb or other part has been amputated or removed in any manner. Also, the portion of a tooth remaining in the alveolus, after the corona has been removed, (F.) *Chicot*.

STUMPFOOT, Kyllosis.

STUN'NED. (Old French, *Estonné*, *Étonné*, [L.] *attonitus*, 'astonished,' [Sax.] ϸtunian, 'to stun.') An epithet applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STU'PA, (στυπη,) *Stupha*, *Stuppa*, *Stupei'on*. Tow, used in certain surgical apparatuses and dressings, (F.) *Étoupe*. Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe*. The act of applying such stupe is called *stu'ping*.

STUPE. Stupa.

STUPEFACIENTIA, (*stupere*, 'to be benumbed,' and *facere*, 'to make,') Narcotics.

STUPÉFACTIFS, Narcotics.

STUPEFACTIO, Narcosis.

STUPÉFIANTS, Narcotics.

STUPEION, (στυπειον,) Stupa.

STUPEUR, Stupor.

STUPHA, Stove, Stupa.

STUPIA, Tin.

STUPIDITAS, (from *stupere*, 'to be benumbed,') Idiotism, Imbecility.

STUPING, see Stupe.

STU'POR, (*stupere*, 'to be benumbed,') *Ecplex'is*, *Ecplex'ia*, *Consterna'tio*, (Sc.) *Swarff*, *Swerf*, (F.) *Stupeur*. Diminished activity of the intellectual faculties, often amounting to lethargy. It occurs in many affections, especially in the neuroses.

STUPOR, Narcosis—s. Artuum, Obdormitio—s. Dentium, Hæmodia—s. Formicans, Formication—s. Mentis, Fatuitas—s. Vigilans, Catalepsy.

STUPPA, (στυππη,) Stupa.

STUPRATION, Stuprum.

STU'PRUM, *Rape*, *Stupra'tion*, (F.) *Défloration*, *Viol*. Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Deflora'tion*, *Deflora'tio*, *Devirgina'tio*, *Vitia'tio*, *Apanthis'mus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine,—if signs of virginity no longer exist,—whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily distinguished than that which has taken place some time.

STUTTERING, ([D.] *stotteren*, 'to stutter,' formed by onomatopœia,) Balbutics.

STYAN, ([Sax.] ϸtiȝenᵹ, from ϸtiȝan, 'to ascend, to rise,') Hordeolum.

STYE, Hordeolum.

STYGMATES. M. J. Cloquet has proposed this word, or *Stigmates*, (from στιγμα, pl. στιγματα, 'a mark,') to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of a hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibrocartilaginous nature.

STYLET, (from *stylus*,) see Specillum.

STYLI, (pl. of *stylus*,) Styloid process.

STYLIENS (*MUSCLES*), see *Bouquet anatomique de Riolan*.

STYLIFORM, (*stylus*, and *forma*, 'shape,') Styloid.

STYLO, (from στυλος, 'a style,') in composition, the styloid process of the temporal bone.

STYLOCERATOHYOÏDEUS, Stylohyoideus—s. Ceratoides, Stylohyoideus.

STYLOCHONDROHYOÏDE'US. A name given by Douglas and Albinus, to a fleshy fasciculus which the stylohyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylohyoï'des no'vus*, *Stylohyoïdeus al'ter*.

STYLOGLOSSUS. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before; is attached to the styloid process of the temporal bone, and to the stylomaxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLOHYOÏDE'US, *Stylocer'atohyoïdeus*, *Styloceratoï'des*, *Stylohyoïdes mu'jor*, (F.) *Stylohyoïdien*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly: anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

STYLOHYOID LIG'AMENT is a fibrous flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

STYLOHYOID NERVE is the second branch given off by the facial.

STYLOMAS'TOID, *Stylomastoïde'us*. That which relates to the styloid and mastoid processes.

STYLOMASTOID AR'TERY arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylomastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells and semicircular canals; and terminates by anastomosing with a branch of the *Arteria meningæa media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylomastoid*—to the posterior auricular artery itself.

STYLOMASTOID FORA'MEN, *Foramen Stylomastoïdeum* seu *Aquæduc'tûs Fallo'pii*, (F.) *Trou anonyme*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

STYLOMAX'ILLARY, *Stylomaxilla'ris*. That which relates to the styloid processes and the jaw.

The STYLOMAXILLARY LIG'AMENT is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

STYLOPHARYNGE'US, (F.) *Stylo-thyro-*

pharyngien. A muscle situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylopharyngeus, and palatopharyngeus.

STY'LOID, *Sty'liform*, (στυλοειδης.) *Styloï'des, Graphioï'des, Graphoï'des, Graphio'des, Graphidoï'des, Belono'des*, (from στυλος, 'a style,' 'a peg,' 'a pin,' and ειδος, 'shape.') Shaped like a peg or pin.

STYLOID CORNUA, see Hyoides os.

STYLOID PROC''ESSES, *Pencil-like Proc''esses, Proces'sus Beloïdes* seu *Belemnoïdes* seu *Belonoïdes* seu *Graphioïdes* seu *Graphoï'des, Sty'li*, are, 1. A long and slender process of the temporal bone, to which are atttached the styloglossus, stylopharyngeus, and stylohyoideus muscles, and the stylohyoid and stylomaxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

STYLO-THYRO-PHARYNGIEN, Stylopharyngeus.

STYLOPH'ORUM DIPHYL'LUM, (στυλος, 'a style,' and φερω, 'to bear,') *Meconop'sis diphyl'la, Chelido'nium diphyl'lum, Cel'andine* or *Hornpop'py, Bruiseroot.* An indigenous plant, of the *family* Papaveraceæ, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel; and has been applied externally to contusions, &c.

STYLOSTIXIS, (*stylus*, 'a style,' and στιξις, 'the act of puncturing,') Acupuncture.

STYLUS, (στυλος, 'a stake, a style,') *Stilus*, Sound.

STYLUS EXCAVA'TUS, *Specil'lum excava'tum.* A hollow sound.

STYMA, gen. *Sty'matis*, (στυμα, from στυειν, 'to stiffen,') Erection, Priapismus.

STYMATOSIS, (from *styma*, and *osis*,) Stimatosis.

STYM'MATA, (στυμμα, gen. στυμματος, 'that which constricts or thickens.') The most solid ointments. Also, the ingredients proper for increasing their consistence.

STYPSIS, (στυψις,) Astriction, Constipation.

STYPTERIA, (στυπτηρια,) Alumen, Styptics.

STYPTIC, (στυπτικος,) see Styptics.

STYPTIC, BINELLI'S, Aqua Binellii — s. Brocchieri's, Aqua Brocchierii.

STYP'TIC, E'ATON'S. A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of *calcined green vitriol*, ʒj; *proof spirit*, tinged with a little oak bark, Oij.

STYPTIC, HELVETIUS'S, see Ferrum tartarizatum, and Styptic, Eaton's.

STYPTIC, PAGLIARI'S, Hæmostatic, Pagliari's.

STYPTIC, RUSPI'NI'S, *Li'quor Styp'ticus Ruspi'ni.* A nostrum, said to consist of *Gallic acid*, a small quantity of *Sulphate of zinc* and *Opium*, dissolved in a mixture of *Alcohol* and *Rosewater*, which has had much reputation as an internal and external astringent.

STYPTICS, *Contrahen'tia, Constricti'va Medicamen'ta, Constringen'tia, Anastal'tica, Catastal'tica, Stypte'ria*, (F.) *Styptiques*, (στυπτικα, from στυφω, 'I constringe.') Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage,—*Enæ'mon.* A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessels, or by inducing a coagulum, *mechanically*, in it. A *chymical styptic* is one which coagulates, *chymically*, the blood around a bleeding orifice.

STYRAC''INUM O'LEUM. Oil obtained by boiling storax in good olive oil.

STY'RAX, gen. *Sty'racis*, (στυραξ, gen. στυρακος.) A resin obtained from *Styrax officina'lis*, and *S. calami'ta.* It is the *solid storax*; — *offic''inal storax.* There are two kinds of storax met with: 1. *Red Sto'rax, Gum Storax, Thus Judæo'rum, Styrax ru'bra, Sty'racis bal'samum, Bal'samum sty'racis officina'lis*, which is obtained by incision from the *Styrax officina'lis*, and perhaps from the *Liquidam'bar Orienta'lis.* The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax, Styrax calami'ta.* That which has been received in reeds or vessels, and has had sawdust added immediately to thicken it. The odour of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

PU'RIFIED STORAX, *S. cola'ta* seu *purifica'ta, S. præpara'ta, Extrac'tum sty'racis*, is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence.—Ph. U. S. Dose, gr. x. to xxx.

STYRAX ALBA, see Myroxylon Peruiferum—s. Benzoin, see Benjamin — s. Calamita, see Styrax —s. Liquida, Liquidambar styraciflua — s. Officinalis, see Styrax.

STYSIS, (στυσις,) Erection, Priapismus.

SUAVEOLENS, (*suavis*, 'sweet,' and *olens*, 'smelling,') Benedolens.

SUB (L.), in composition, 'beneath,' or 'a lower degree.' Before *c* it becomes *suc*; before *f*, *suf*; before *g*, *sug*; before *p*, *sup*; before *r*, *sur*; and before *s*, *sus.* In some words, however, it is *su*, as in *suspiro.* The French *sous*, as a prefix, has the same signification.

SUBACIDUS, Acidulous.

SUBAC'TIO, *Chiro'sis, Cheiro'sis*, (*subigo, subactum* (*sub*, and *ago*), 'to subject, to prepare.') The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

SUBAFFECTIO, Hydropathia.

SUBAGITATRIX, (*sub*, and *agitare*, 'to agitate.') *Tribade.*

SUBATLOÏDE'US, *Infraatloïdeus*, (F.) *Sousatloïdien.* That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

SUBAXOÏDE'US, *Infraäxoïdeus*, (F.) *Sous-axoïdien.* That which is below the *axis* or *vertebra dentata.* Chaussier has given this name to the third pair of cervical nerves.

SUBAZOTAS BISMUTHICUS, Bismuth, subnitrate of.

SUBBORAS NATRICUM, Borax.

SUBCARTILAGINEUM, (*sub*, and *cartilago*, 'cartilage,') Hypochondre.

SUBCHLORIS CALCICUS, Calcis chloridum.

SUBCLA'VIAN, *Subcla'vius, Subclaviculu'ris*, (F.) *Sousclavier*, (*sub*, and *clavis*, 'clavicle.') That which is under the clavicle.

SUBCLAVIAN AR'TERIES, (F.) *Artères sousclavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachiocephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scaleni muscles, beyond which they take the name *axillary arteries.* The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards*, the *vertebral* and *inferior thyroideal.* 2. *Downwards*, the *internal mammary* and *superior intercostal.* 3. *Out-*

wards, the *transverse cervical* or *posterior scapular*, the *superior scapular*, and the *posterior cervical* or *profunda*.

Subclavian or Subcla'vius Mus'cle, *Subclavia'nus*, (F.) *Costo-claviculaire* (Ch.), *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

Subclavian Veins, (F.) *Veines sous-clavières*, are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short; the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

SUBCLAVIC'ULA, (*sub*, and *clavicula*, 'clavicle.') The first rib.

SUBCLAVICULARIS, Subclavian.

SUBCLAVIUS, Subclavian muscle.

SUBCREPITANT, (*sub*, and *crepitant*,) see *Râle muqueux*.

SUBCRUEN'TUS, 'somewhat bloody;' (*sub*, and *cruentus*, 'bloody;') *Hyphæ'mos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

SUBCRURÆI, see Cruræus.

SUBCUTA'NEOUS, *Subcuta'neus*, (*sub*, and *cutis*, 'the skin;') *Intercuta'neus*, (F.) *Sous-cutané*. That which is placed immediately under the skin. See Hypodermic.

Subcutaneous Section, Hypodermatomy.

Subcutaneus Colli, Superficialis colli—s. Malæ (Nervus), Orbitar nerve.

SUBDELIRIUM, Typhomania.

SUB'DITA, *Subditit''ia*, (*subdere*, (*sub*, and *dare*, 'to give,') 'to put under;') *Pros'theta*. Medicines introduced into some one of the natural apertures;—as suppositories, pessaries, &c.

SUBDITITIA, Subdita.

SUBDUCTIO, (*sub*, and *ducere*, *ductum*, 'to lead,') Dejection.

SU'BER, gen. *Su'beris*, *Cork*;—the bark of *Quer'cus Su'ber* or *Corktree*, (F.) *Liége*. *Family*, Amentaceæ. *Sex. Syst.* Monœcia Polyandria, Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

SUBETII, Coma.

SUBFRONTA'LIS SUTU'RA, (*sub*, and *frons*, gen. *frontis*, 'the forehead.') A suture resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

SUBGRONDATION, Depression.

SUBHUMERATIO, (*sub*, and *humerus*, 'the shoulder,') Catomismus.

SUBIGITATRIX, (*sub*, and *agitare*, 'to agitate,') Tribas.

SUBINFLAMMATIO, Subinflammation—s. Hepatis, Hepatitis, chronic.

SUBINFLAMMA'TION, *Subinflamma'tio*, (*sub*, and *inflammatio*,) *Inflammatiun'cula*, *Hypophlegma'sia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. There are, however, no such vessels. Lymphatic engorgements, scrofula, herpes, and cancer he considered subinflammations.

SUBINTRAN'TES FE'BRES, (*sub*, and *intrare*, 'to enter.') *Communican'tes fe'bres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.

SUBJECT, (*subjicere*, *subjectum*, (*sub*, and *jacere*,) 'to place under,') Cadaver.

SUBJECTIVE SENSATIONS, see Sensation.

SUBJEE, Bangue.

SUBLIGACULUM, (*sub*, and *ligare*, *ligatum*, 'to bind,') Truss.

SUBLIGATURA, Truss.

SUBLIMATE, CORROSIVE, Hydrargyri oxymurias.

SUBLIMATIO, Enæorema, Sublimation.

SUBLIMA'TION, *Sublima'tio*, *Meteoris'mus*, *Hypso'sis*, (*sublimare*, *sublimatum*, 'to raise on high.') An operation by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c., are commonly obtained by sublimation. The product of sublimation is a *Sub'limate*, *Sublima'tum*, (F.) *Sublimé*.

SUBLIMATUM CORROSIVUM, Hydrargyri oxymurias.

SUBLIMATUS CORROSIVUS, Hydrargyri oxymurias.

SUBLIME, Enæorema.

SUBLIME, Sublimis.

SUBLIMÉ, see Sublimation—s. *Corrosif*, Hydrargyri oxymurias.

SUBLI'MIS, (F.) *Sublime*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term *respiration sublime* for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the alæ nasi at the time of inspiration.

SUBLINGUA, (*sub*, 'a lower degree,' and *lingua*, 'tongue,') Uvula.

SUBLIN'GUAL, *Sublingua'lis*, (F.) *Sous-lingual*, (*sub*, and *lingua*, 'the tongue.') That which is seated under the tongue.

Sublingual Ar'tery, with some, is the *Lin'gual*. With others, it is a branch given off by the lingual opposite the genioglossus muscle, which is distributed particularly to the sublingual gland, to the mylohyoid, and genioglossus muscles, &c.

Sublingual Gland, *Glan'dula sublingua'lis* seu *Bartholinia'na* seu *Rivinia'na*, is seated in the substance of the inferior paries of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts — *Ductus Rivinia'ni* seu *Waltheria'ni*—some of which open beneath the frænum linguæ, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

SUBLINGUIUM, Uvula.

SUBLINGUUM, Epiglottis.

SUBLOB'ULAR, *Sublobula'ris*, (*sub*, and *lobulus*, 'a little lobe.') That which is placed under a lobe.

Sublobular Veins of the Liv'er. The veins in which the intralobular veins terminate. By

their union, the sublobular veins form the hepatic veins.

SUBLUXATIO, (*sub*, and *luxare*, 'to dislocate,') *Subluxa'tion*. An imperfect luxation of a bone, see Luxation. Not unfrequently, used for a sprain.

SUBMAM'MARY, *Submamma'rius*, (F.) *Sous-mammaire*, (*sub*, and *mamma*, 'the breast.') Under the mamma or breast:—hence, '*submammary* inflammation,' inflammation of the areolar tissue beneath the mamma.

SUBMAX'ILLARY, *Submaxilla'ris*, *Inframaxilla'ris*, (F.) *Sous-maxillaire*, (*sub*, and *maxilla*, 'the jaw.') That which is seated beneath the jaw.

Submaxillary Gang'lion is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

Submaxillary Gland, *Max'illary Gland*, *Hypognath'aden*, *Hyposial'aden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum linguæ, by a very small orifice. It is also called *Duc'tus infe'rior*.

SUBMEN'TAL, *Submenta'lis*, (F.) *Sousmental*, (*sub*, and *mentum*, 'the chin.') Situate under the chin.

Submental Ar'tery is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylohyoideus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infrahyoid region.

Submental Vein, which accompanies the artery, opens into the labial.

SUBMER'SION, *Submer'sio*, (*sub*, and *mergere*, *mersum*, 'to plunge.') The act of plunging, or being entirely plunged, in a liquid.

Asphyxia by submersion, *A. Immerso'rum*, *Drowning*, is not owing to a certain quantity of liquid being introduced into the alimentary or airpassages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

SUBMISSIO, (*sub*, and *mittere*, *missum*, 'to send.') Remission—s. Cordis, Systole.

SUBMU'COUS, *Submuco'sus*, (*sub*, and *mucus*.) Under a mucous membrane,—as the '*submucous* areolar tissue.'

SUBMURIAS AMMONIACOHYDRARGYRICUS. Hydrargyrum præcipitatum.

SUBMUS'CULAR, *Submuscula'ris*, (*sub*, and *musculus*, 'a muscle.') Seated beneath muscles or a muscular layer.

SUBOCCIP'ITAL, *Suboccipita'lis*, (F.) *Sous-occipital*, (*sub*, and *occiput*.) That which is situated under the occiput.

Suboccipital Nerve, Occipital nerve.

SUBOR'BITAR, *Suborbita'rius*, *Infraör'bitar*, *Infraörbita'lis*, *Infraörbita'rius*, (F.) *Sous-orbitaire*, (*sub*, and *orbita*, 'the orbit.') That which is seated beneath the orbitar cavity.

Suborbitar Artery, *Infraör'bitar A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infraorbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infraorbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infraörbitar vein follows the same course.

Suborbitar Canal', *Infraörbitar Canal*, (F.) *Canal* ou *Conduit' sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Fora'men infraörbita'rium*, (F.) *Trou sous-orbitaire*. The infraörbitar artery and nerve pass along it.

Suborbitar Fis'sure, *Infraör'bitar Fis'sure*, *Fissu'ra infraörbita'lis*, *Ri'ma cana'lis orbita'rii*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

Suborbitar Fossa, Canine fossa.

Suborbitar Nerves, *Infraör'bitar Nerves*, seem to terminate the superior maxillary. They issue from the infraörbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior* or *palpebral filaments*, *inferior* or *labial*, *internal* or *nasal*, and *external* or *buccal*.

SUBPERITONE'AL, *Subperitonea'lis*, (*sub*, and *peritoneum*.) That which lies under the peritoneum.

Subperitoneal Aponeurosis, Fascia, subperitoneal—s. Ganglia, see Spermatic ganglion.

SUBPLACENTA, Decidua membrana.

SUBPLEUR'AL, *Subpleura'lis*, (*sub*, and *pleura*.) Situate under the pleura.

SUBPOPLITÆUS, Poplitæus muscle.

SUBPU'BIC ARCH, *Ar'cus subpu'bicus*, (*sub*, and *pubis*.) A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

Subpubic Membrane, Obturator membrane.

SUBPUBIOFEMORALIS, Abductor brevis—s. Prostaticus, Compressor prostatæ.

SUBPUTRIS, (*sub*, and *putris*, 'putrid,') Hyposaprus.

SUBSCAP'ULAR, *Subscapula'ris*, (F.) *Sous-scapulaire*, (*sub*, *and scapula*.) That which is beneath the scapula.

Subscapular Fos'sa, *Fos'sa subscapula'ris*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

Subscapular Mus'cle, *Subscapula'ris Mus'cle*, *Immer'sus*, *Infrascapula'ris*, (F.) *Sous-scapulo-trochinien* (Ch.), *Porte-feuille*, *Muscle-sous-scapulaire*. A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapulary fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

Subscapular Nerves are two in number. One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subscapularis muscle.

SUBSE'ROUS, *Subsero'sus*, (*sub*, and *serous*.) Under a serous membrane,—as the '*subserous* areolar tissue.'

SUBSIDENTIA, (*sub*, and *sedere*, 'to settle,') Sediment.

SUBSTANCE ÉMAILLÉE DES DENTS, Enamel of the teeth—s. Horny, see Tooth.

SUBSTANCE, HYALINE, Cytoblastema—s. Intercellular, Cytoblastema—*s. Vitrée des dents*, Enamel of the teeth.

Substance, White, of Schwann. A hollow cylinder within the tubular nervous fibre, which

differs in composition and refracting power from the matter that occupies the centre of the tube.

SUBSTANTIA ADAMANTINA DENTIUM, 'adamantine substance of the teeth,' Enamel.

SUBSTANTIA COMPACTA, see Bone.

SUBSTANTIA FERRUGIN'EA, *Lo'cus cine'reus*. An ashcoloured substance produced by the existence of well-marked pigmentary matter in the floor of the fourth ventricle or *rhomboid fossa*.

SUBSTANTIA FILAMENTOSA DENTIUM, Enamel—s. Grisea centralis, see Medulla spinalis—s. Hyalina, Cytoblastema—s. Nigra pedunculi, see Peduncles of the brain—s. Ossea dentium, see Tooth—s. Ostoidea, see Tooth—s. Perforata anterior, Locus perforatus anticus.

SUBSTANTIA PERFORA'TA ME'DIA. When the pia mater has been removed from the space between the crura cerebri, termed the *intercru'ral* or *interpedunc'ular*, the surface appears cribriform, from the perforations of the numerous minute vessels which penetrate it. This is the *substan'tia perfora'ta me'dia* of Vicq d'Azyr.

SUBSTANTIA PERFORATA POSTERIOR, see Tarini pons—s. Pulposa dentis, Dental pulp—s. Radiata, Stellulæ Verheyenii—s. Rhomboidea, Corpus dentatum—s. Spongiosa, see Bone—s. Spongiosa urethræ, Corpus spongiosum urethræ—s. Stellata serpentina, Stellulæ Verheyenii—s. Vitrea, Cytoblastema—s. Vitrea dentium, Enamel.

SUB'STANTIVE, *Substanti'vus*, (*substare*, (*sub*, and *stare*,) 'to stand under or subsist.') An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment; the condiment, as mustard, eaten with it, an *adjective* aliment.

SUBSTILLUM, (*sub*, and *stilla*, 'a drop,') Stillicidium.

SUBSTITUTED PRESENTATION, see Presentation.

SUB'STITUTIVE, *Substituti'vus*, (*sub*, and *statuere*, 'to place.') That may be substituted or put in place of another. An agent is said to be 'substitutive,' which—as in the case of nitrate of silver applied to inflammation of a mucous membrane—substitutes a temporary irritation for one tending to be more permanent. Such a mode of treatment is termed *sub'stitutive medica'tion*, (F.) *Médication substitutive*.

SUBSULTIO, (*subsilio*, *subsultum*, (*sub*, and *salio*,) 'to make short leaps,') Palpitation.

SUBSUL'TUS TEN'DINUM, *Sal'tus ten'dinum*, *Clo'nus subsul'tus*, *Subsul'tus*, *Carpholog''ia spasmod'ica*, *Myopal'mus*, *Twitch'ing of the Tendons*, (F.) *Soubresaut des tendons*. Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere, and is an evidence of great cerebral irritability and debility when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibil'itas*, *Sclerotyr'bē febri'lis*, and *Irritabil'itas morbo'sa*.

SUBSURDITAS, (*sub*, and *surdus*, 'deaf,') Deafness.

SUBU'BERES, (*sub*, and *ubera*, 'the breasts.') *Infan'tes sugen'tes*, *Suck'ing chil'dren*. Infants at the breast, in contradistinction to *Exu'beres*, *απογαλακτοι*, or those which have been weaned.

SUBUN'GUIAL, *Subun'gual*, *Subun'guical*, (F.) *Sous-ungéale*, (*sub*, and *unguis*, 'a nail.') Belonging to parts under the nail—as *subungual exostosis*, (F.) *Exostose sous-ungéale*, an exostosis under the nail of the great toe especially.

SUBVERSIO STOMACHI, (*sub*, and *vertere*, *versum*, 'to turn,') Vomiturition.

SUBVERTEBRA, (*sub*, and *vertebra*,) Sacrum.

SUBVERTEBRUM, Sacrum.

SUBVOLA, (*sub*, and *vola*, 'the palm of the hand,') Hypothenar.

SUC, Succus—*s. de Citron*, see Citrus medica—*s. Gastrique*, Gastric juice—*s. de Kino*, Kino—*s. du Limon*, see Citrus medica—*s. Médullaire*, Marrow—*s. Nourricier*, Liquor sanguinis—*s. Pancréatique*, see Pancreas.

SUC, as a prefix, Sub.

SUCCA'GO, gen. *Succag''inis*, (from *succus*, 'juice.') The inspissated juice of plants, robs, jellies, &c.

SUCCĒDANÉ, Succedaneum.

SUCCEDA'NEUM, *Succida'neum*, *Substitu'tum*, *Antiballom'enum*, *Surroga'tum*, *Antemballom'enum*, *Quid pro quo*, (*succedere*, (*suc*, and *cedere*,) 'to go under, to come in place of another,' (F.) *Succédané*. An epithet for medicines that may be substituted for others possessing similar properties. Also, used, in dentistry, for an amalgam for filling teeth.

SUCCENTURIA'TUS, (*succenturiare*, (*suc*, and *centuria*,) 'to supply a soldier to fill a vacancy;' and hence, 'to substitute or put in the room of.') That which is a substitute for another—as Renes *succenturiati*, Ventriculus *succenturiatus*, &c.

SUCCHAR, Saccharum.

SUCCIDANEUM, Succedaneum.

SUCCIN, Succinum.

SUCCINCTURA, (*suc*, and *cingere*, *cinctum*, 'to gird,') Diaphragm.

SUCCINCTUS, Diaphragm.

SUCCINI RESINA, Musk, artificial.

SUCCIN'IC or SUC'CINIC ACID, *Ac''idum Suc'cini*, *A. Succin'icum*, *A'cor Succin'eus*, *Sal Suc'cini*, *Sal volat'ilē Suc'cini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUC'CINUM, *Su'cinum*, *Elec'trum*, *Am'bra*, *Am'bram*, *Am'par*, *Berew'cē*, *Am'ber*, *Yel'low Am'ber*, (F.) *Succin*, *Ambre jaune*, (from *succus*, 'juice,' because at one time supposed to exude from a tree.) This kind of fossil resin, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis*. It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden-yellow colour; transparent, and has a shining lustre. S. g. 1·08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil, obtained by destructive distillation, —the *O'leum* seu *Bal'samum Suc'cini*, (F.) *Huile de Succin*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *O'leum Suc'cini rectifica'tum*, *Rec'tified Oil of Am'ber*, is made as follows:—*Oil of Amber*, Oj; *water*, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in wellstopped bottles.—(Ph. U. S.)

The *White am'ber*, *Leucelec'trum*, (F.) *Ambre blanc*, is a variety.

SUCCINUM CINEREUM, Ambergris—s. Griseum, Ambergris.

SUCCION, Sucking.

SUCCISA, (from *succidere*, *succisum*, 'to cut,' from its indented appearance.) Scabiosa succisa—s. Pratensis, S. succisa.

SUCCOCOLLATA, Chocolate.

SUCCOLATA, Chocolate.

SUCCORY, WILD, Cichorium intybus, Chiro nia angularis.

SUC'COTASH, *Suck'atash*. A term of Indian derivation. A favorite dish in New England, formed of *green Indian corn* and *beans* boiled together.

SUCCUBA, see Succubus.

SUC'CUBUS, (*suc*, and *cubare*, 'to lie.') Some authors have used this word synonymously with nightmare. Others mean by it, and by *Suc'cuba*, a female phantom, with which a man in his sleep may believe he has intercourse—as *In'cubus* has been applied to the male phantom, with which a female may dream she is similarly situate. See Incubus.

SUC'CUS, *Su'cus, Chy'lus, O'pos, Opis'ma, Chylis'ma, Ecchylo'ma, Apothlim'ma, Juice*, (F.) *Suc, Jus*, (from *sugere, suctum*, 'to suck.') The fluid obtained by pressing plants, flesh, &c.; *Suc'cus expres'sus ; Opolé* (officinal), *Opolide* (magistral), according to Chéreau. It is also applied to certain animal fluids, as *S. Gastricus*, &c.

Succus Acaciæ Germanicæ Inspissatus, see Prunus spinosa—s. Acaciæ nostratis, see Prunus spinosa—s. Arborum, Sap—s. Aurantii, see Citrus aurantium—s. Cicutæ spissatus, Extractum conii—s. Cyrenaicus, Lascrpitium.

Succus Enter'icus, *S. Intestina'lis, Li'quor intestina'lis* seu *enter'icus, Intes'tinal Juice*. The fluid copiously secreted from the lining membrane of the small intestines.

Succus Expressus, Apothlimma—s. Gastricus, Gastric juice—s. Glycyrrhizæ, Extractum glycyrrhizæ—s. Hypocistidis, see Cytinus—s. Intestinalis, Succus entericus—s. Japonicus, Catechu—s. Limonis, see Citrus medica—s. Liquiritiæ, Extractum glycyrrhizæ—s. Nerveus, Nervous fluid—s. Nutritius, Chyle—s. Orni concretus, see Fraxinus ornus—s. Pancreaticus, see Pancreas—s. Spissatus aconiti napelli, Extractum aconiti—s. Spissatus atropæ belladonnæ, Extractum belladonnæ—s. Spissatus conii maculati, Extractum cicutæ—s. Spissatus hyoscyami nigri, Extractum hyoscyami—s. Spissatus lactucæ sativæ, Extractum lactucæ—s. Thebaicus, Opium.

SUCCUS'SION, *Succus'sio, Hippocrat'ic Succus'sion*, (*succutio, succussum*, (*suc*, and *quatio*,) 'I shake from beneath.') A mode of ascertaining the existence of a fluid in the thorax (*fluctuation by succussion*), by giving the body one or more slight shakes.

Succussion, *Ballottement*.

SUCHOR, Saccharum.

SUCINUM, Succinum.

SUCKATASH, Succotash.

SUCK'ING, *Suc'tio, Suc'tus, Bdal'sis, Myze'sis*, (F.) *Succion*, (from *sugere, suctum*, 'to suck.') The act of drawing liquid into the mouth by forming a vacuum with the tongue acting as a piston, during inspiration.

Sucking Bottle. A bottle so formed that, when filled with milk, it can be sucked from instead of the breast.

Sucking Child, *Lactens*. A suckling.

SUCK'LE, *Lacta're*, (F.) *Allaiter* ou *Alaiter*. To give suck. To nurse.

SUCKLING, Lactation, Lonicera periclymenum, Sucking child.

SUCRE, Saccharum—*s. Candi*, Saccharum candidum—*s. du Foie*, see Saccharum—*s. de Lait*, Sugar of milk—*s. de Saturne*, Plumbi superacetas—*s. Tors*, Penidium.

SUCTIO, (*sugere, suctum*, 'to suck,') Exsuctio, Sucking.

SUC'TION POW'ER. The force presumed to be exerted on the blood in the veins by the active dilatation of the heart. See Derivation.

SUCTO'RIA, (*sugere, suctum*, 'to suck.') Animals provided with mouths for sucking. Also, organs for sucking or adhesion;—hence termed *suctorial*—as *suctorial* oscula.

SUCTORIAL, see Suctoria.

SUCTUS, Sucking.

SUCUS, Succus.

SUDAM'INA, pl. of *Suda'men, Hydro'ata, Hidro'ta, Pap'ulæ sudora'les, Sufferu're, Alha'sef, Plan'ta noc'tis, Bo'a*, (from *sudor*.) Small vesicles which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating. It is a miliary eruption. See Miliary fever.

Sudamina, Desudatio, *Échauboulures*, Lichen tropicus.

SUDARIUM, Achicolum.

SUDATIO, Ephidrosis.

SUDATIUNCULA, (dim. of *sudatio*,) Ephidrosis.

SUDATOIRE, Sudatory.

SUDATORIA, Hidrosis—s. Maligna, see Sudor Anglicus.

SUDATORIUM, Achicolum.

SUDATORY, Achicolum. As an adjective, (F.) *Sudatoire*, any thing that excites, or is accompanied by, sweating.

SU'DOR, gen. *Sudo'ris, Hi'dros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

Sudor, Miliary fever.

Sudor An'glicus, *S. Anglica'nus, Hidron'osus, Hidrop'yra, Hidropyr'etus, Fe'bris* seu *Milia'ris sudato'ria, Sudor milia'ris, Mor'bus sudatorius, Ephem'era malig'na* seu *sudato'ria* seu *Britan'nica* seu *An'glica pes'tilens, Pes'tis Britan'nica, Sudato'ria malig'na, Sweat'ing Sick'ness, Sweat'ing Fe'ver*, (F.) *Suette, S. miliare, S. épidémique, Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486, and recurred at different times until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name Suette de Picardie, *Suette des Picards, Fièvre suante, Milia'ris sudato'ria, Su'dor Picard'icus*, to an epidemic disease, which has appeared several times in that province, the principal symptoms of which were profuse sweats and a miliary eruption. The disease recurred in 1821, and has been described at length by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues, and proposes to class it with variola, scarlatina, and measles.

A form of it in which the perspiration was of a black colour was called *Sudor An'glicus ni'ger, Melanephidro'sis, Black English Sweating sickness* or *fever*.

Sudor Colliquativus, S. Profusus.

Sudor Cruen'tus, *S. sanguin'eus, Hæmatidro'sis, Hæmathidro'sis, Ephidro'sis cruen'ta, Hæmorrhag''ia per Cu'tem*, (F.) *Hématidrose, Sueur de Sang ; Sweating of blood, Bloody sweat, Hem'orrhage from the skin*. Cutaneous perspiration intermixed with blood;—a very uncommon affection.

Sudor Dul'cis, *Saccharorrhœ'a cuta'nea, Ephidro'sis saccharra'ta*. A discharge of saccharine matter by perspiration.

Sudor Localis, Meridrosis—s. Miliaris, Miliary fever, Sudor Anglicus—s. Partialis, Meridrosis—s. Picardicus, see Sudor Anglicus.

Sudor Profu'sus, *S. Colliquati'vus*. A profuse or immoderate sweat.

Sudor Sanguineus, Sudor cruentus—s. Universalis, Panhidrosis.

SUDORIFER, Sudoriferous, Sudorific.

SUDORIF'EROUS, *Sudor'ifer, Hydroph'orus*,

(*sudor*, and *fero*, 'I carry.') That which carries sweat—as the *sudoriferous* ducts or glands.

SUDORIF'IC, *Hidrot'ic*, *Sudorif'icum*, *Sudor'ifer*, *Hidrot'icum*, *Hidrote'rium*, *Hidrotopœ'um*, *Hidropoët'icum*, (F.) *Sudorifique*, *Hidrotique*, (*sudor*, and *facio*, 'I make.') A medicine which provokes sweating. See Diaphoretic.

Four Sudorific Woods, *Quat'uor ligna sudorif'ica*, were, formerly, *guaiacum*, *perfumed cherry*, *sarsaparilla*, and *sassafras*.

SUDORIPAROUS, (*sudor*, and *pario*, 'to produce,') see Perspiration.

SUDORIS NULLITAS, 'nonexistence of sweat,' Anidrosis—s. Privatio, Anidrosis—s. Suppressio, Ischidrosis.

SUET, Sevum.

SUETTE, Sudor Anglicus—*s. Epidémique*, Sudor Anglicus—*s. Miliaire*, Sudor Anglicus—*s. de Picardie*, Sudor picardicus—*s. des Picards*, Sudor picardicus.

SUEUR, Sudor—*s. Anglaise*, Sudor Anglicus—*s. d'Expression*, Expression, sweat of—*s. de Sang*, Diapedesis, Sudor cruentus—*s. Urineuse*, Uridrosis.

SUF, as a prefix, Sub.

SUF'FERING, (F.) *Souffrance*, (*suf*, and *fero*, 'to bear.') Any painful feeling produced by a general or local pathological condition.

SUFFERSURÆ, (*suf*, and *fervere*, 'to be hot,') Sudamina.

SUFFIMEN, Suffimentum.

SUFFIMEN'TUM, *Hypocapnis'ma*, *Suffi'men*, *Thymia'ma*, *Suffi'tus*, *Suffumiga'tio*, *Suffumigation*, (F.) *Parfum*; (*suffio*, *suffitum*, 'I perfume.') A perfume; suffumige; fumigation.

SUFFITIO, Fumigation.

SUFFITUS, Fumigation, Suffimentum.

SUFFLATIO, (*suf*, and *flare*, *flatum*, 'to blow,') Puffiness.

SUFFOCATIO, Suffocation, Orthopnœa—*s.* Hypochondriaca, Hypochondriasis—*s.* Hysterica, Angone—*s.* Mulierum, Hysteria—*s.* Stridula, Cynanche trachealis—*s.* Uterina, Angone.

SUFFOCA'TION, *Suffoca'tio*, *Præfoca'tio*, *Apopnix'is*, *Asphyx'ia*, *Melanæ'ma*, (*suffocare*, *suffocatum*, 'to stop the breath,' from *suf*, and *fauces*, 'the jaws.' [?]) Death, or suspended animation from impeded respiration, whether caused by the *inhalation of noxious gases*, *drowning*, *hanging*, *strangling*, or *smothering*. The principal morbid appearances in such cases are:—the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

Treatment of suspended animation by suffocation in general. The patient must be conveyed into a room not too warm. Bloodletting must be used, if at all, with caution;—friction must be employed with salt, or warm flannels; stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

For the treatment suggested by Dr. Marshall Hall, and by Dr. Silvester, see Ready Method, and Silvester's method.

Suffocation, *Pnigopho'bia*, (F.) *Étouffement*, is used, as *strangling* is, for threatened suffocation. It means the state of dyspnœa and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

SUFFOCATION DE MATRICE, Hysteria—*s. Utérine*, Angone, Hysteria.

SUFFRAGO, Poples.

SUFFUMIGATION, (*suf*, and *fumigare*, 'to produce smoke,') Suffimentum.

SUFFUMIGE, Suffimentum.

SUFFUMIGIUM, Fumigation

SUFFUMINATIO Fumigation.

SUFFUSIO, (*suf*, and *fundere*, *fusum*, 'to pour,') Pseudoblepsia—s. Auriginosa, Icterus—s. Bilis, Icterus—s. Colorans, Chromopsia—s. Dimidians, Hemiopia—s. Exclarans, Oxyopia—s. Fellis, Icterus—s. Lentis crystallinæ, Cataract—s. Metamorphopsis, Metamorphopsia—s. Multiplicans, see Diplopia—s. Myodes, Metamorphopsia—s. Nigra, Amaurosis—s. Oculi, Cataract, Pseudoblepsia—s. Oculorum, Metamorphopsia—s. Radians, Scotasma—s. Sanguinis, Ecchymoma.

SUG, as a prefix, Sub.

SUGAR, Saccharum—s. Barley, Penidium, Saccharum hordeatum—s. Black, Extractum Glycyrrhizæ.

Sugar Candy, Saccharum candidum—s. Cane, see Saccharum—s. Cane, Chinese, see Saccharum.

Sugarcoated. Covered with a layer of refined sugar, generally mixed with starch. Sugarcoated pills are prepared like the sugarplums of the confectioners, and are much used in modern pharmacy, especially when they are composed of nauseous ingredients. See *Dragée*.

Sugar, Diabetic, Glucose—s. Fruit, Glucose—s. Grape, Glucose—s. Hepatic, see Saccharum—s. Honey, Glucose.

Sugar of Lead, Plumbi superacetas.

Sugar, Liver, see Saccharum.

Sugar, Magnet'ic, *Sac'charum Magnet'icum*. A quack preparation, said to be composed of sugar and cannabis. It is given in nervous cases.

Sugar, Maple, Saccharum acernum, see Acer saccharinum.

Sugar of Milk, *Sac'charum lac'tis*, *Galac'tosac'charum*, *Lac'tose*, *Lac'tine* or *Lac'tin*, (F.) *Sucre de Lait*, *Sel de Lait*, is obtained from whey by evaporation and crystallization, s. g. 1.500. It possesses the demulcent properties of the sugars.

Sugar, Muscle, Inosite.

Sugar Pine, see Arrowroot.

Sugar, Starch, Glucose—s. Urinary, Glucose.

Sugars, Various, see Saccharum.

SUGARBERRY, Celtis occidentalis.

SUGGILLA'TION, *Sugilla'tio*, *Li'vor*, *Œde'ma cruen'tum*, *Sugillation*, *Bruise*; (*sugillare*, *sugillatum*, 'to beat black and blue.') By most authors used synonymously with ecchymosis and ecchymoma. It is, also, applied to the spots, or ecchymoses which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction It is common in dead bodies; *Li'vor* seu *mac'ula emortua'lis*. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises:—Whether the appearance has been induced before death or afterwards? Whether it is a case of *ecchymosis* or of *suggillation?* In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

SUGGRUN'DIUM, (*sug.* and *gradior*, 'to go.') The eave of a house.

Suggrundium Oculi, Superciliary arch—s. Superciliorum, Frontal protuberance.

SUICIDA, Suicide.

SUICIDAL INSANITY, Suicide.

SU'ICIDE, *Suici'dium*, (*sui cædes*, 'murder of one's self.') The act of killing one's self. *Autochi'ria*, *Autocton'ia*, *Idiocton'ia*, *Autophon'ia*. Suicide is very frequently the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to selfdestruction;—*Melancho'lia Suicid'ium* seu *autochi'ria*, *Suici'dal In-*

san'ity. Also, one who commits selfmurder; *Suici'da, Autochir.*

SUIE, (Gael. *suithe*,) Fuligo.

SUIF, Sevum.

SUITES DE COUCHES, 'sequels of labour,' Lochia.

SULCATUS, (from *sulcus*,) *Cannelé*, Grooved.

SULCI, plural of Sulcus.

Sulci Ciliares, Halo signatus.

SULCULUS LABII SUPERIORIS, (dim. of *Sulcus*,) Lacuna Labii superioris.

SUL'CUS, (akin to ὅλκος, 'a furrow,') *Semicana'lis, Semicanalic'ulus*. A furrow. A groove. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs. See Anfractuosity.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.' Also, the vulva.

Sulcus Anteroposterior Jecoris, see Liver —s. Labii superioris, Lacuna Labii superioris.

Sulcus, Lat'eral, ante'rior, of the Spi'nal Mar'row. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

Sulcus, Lat'eral, poste'rior, of the Spi'nal Mar'row, corresponds with the attachment of the posterior roots of the spinal nerves.

Sulcus Retroglandularis, see Glans — s. Sinus lateralis, Fossa sigmoidea — s. Transversalis, see Liver — s. Umbilicalis, see Liver.

SULFATE, see Sulphuric Acid.

SULFIDUM CARBONII, Carbonis sulphuretum.

SULFITE, see Sulphurous acid.

SULFUR, Sulphur.

SULFURATION, see Vulcanite.

SULFURE, see Sulphur—*s. d'Antimoine*, see Antimonium — *s. de Carbon*, Carbonis sulphuretum.

SULFUREUX, Sulphureous.

SULPHAS, see Sulphuric acid—s. Aluminaris, Alumen—s. Ammoniacæ Cupratus, Cuprum ammoniatum—s. Cadmicus, Cadmii Sulphas—s. Kalicoäluminicus, Alumen — s. Natricus, Soda, sulphate of—s. Zincicum, Zinci sulphas.

SUL'PHUR, gen. *Sul'phuris, Sul'fur, Sco'rith, Thei'on, Thi'on, A'verich, Ter'ra folia'ta, Fu'mus cit'rinus, Aq'uila, Brim'stone*, (F.) *Soufre. Na'tive Sul'phur* is called *Rock* and *Black Sulphur, Sul'phur vi'vum* seu *ni'grum*. Sulphur, as we meet with it, is in *rolls, Sulphur in rot'ulis* seu *rotun'dum, Roll Brim'stone*. It is a volcanic production, and is obtained, in large quantities, from Solfatara, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly inodorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1·99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

When sulphur is combined with a simple body or a compound radical it forms a *sulphuret*, (F.) *Sulfure*.

Sulphur Antimoniatum, Antimonii sulphuretum præcipitatum — s. Caballinum, see Sulphur sublimatum — s. Carburet of, Carbonis sulphuretum — s. Chloratum, Sulphur, chloride of.

Sulphur, Chlo'ride of, *Sul'phuris Chlo'ridum* seu *Dichlo'ridum, Sulphur chlora'tum, Hypochlore'tum sulphuro'sum, Chlo'rum hypersulphura'tum, Dichlo'ride* or *Protochlo'ride* or *Hy'pochlo'ride* or *Subchlo'ride of Sulphur, Bisulph'uret of Chlo'rine*, is obtained by passing *dry chlorine gas* over washed and dried *flowers of sulphur*, until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

Sulphur, Dichloride of, Sulphur, chloride of — s. Hypochloride of, Sulphur, chloride of — s. Iodatum, Sulphuris iodidum — s. Iodide of, Sulphuris iodidum—s. Ioduret of, Sulphuris iodidum —s. Liver of, Potassæ sulphuretum.

Sulphur Lo'tum, *Sulphur sublima'tum lo'tum, Wash'ed Sulphur, Magiste'rium Sul'phuris, Sulphuris Flo'res lo'ti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

Sulphur Nigrum, Sulphur vivum, see Sulphur sublimatum.

Sulphur Præcipita'tum, *Lac Sul'phuris, Milk of Sulphur, Precip'itated Sulphur*, (F.) *Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

Sulphur, Protochloride of, Sulphur, chloride of—s. Subchloride of, Sulphur, chloride of.

Sulphur Sublima'tum, (Ph. U. S. 1863,) *Sulphur, Sublî'med Sulphur, Flow'ers of Sulphur*, (F.) *Soufre sublimé, Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific, and it is a valuable remedy in most cutaneous affections that are local. Dose, ʒss to ʒij.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brim'stone, Dregs of Sulphur vi'vum, Sulphur caballi'num* seu *vivum, Sul'phuris vi'vi recremen'ta*. They are very impure, and are only used externally.

Sulphur, Vegetable, Lycopodium — s. Wort, Peucedanum.

SULPHURATUS, Sulphureous, Sulphurated.

SULPHU'REOUS, *Sulphuro'sus, Sulphu'rius, Sulphura'tus, Sulph'uretted*, (F.) *Sulfureux*. Possessing the properties of, or relating to, or containing sulphur.

SULPHURET, see Sulphur.

SULPHURETTED, Sulphureous — s. Hydrogen, see Hydrogen, sulphuretted.

SULPHURETUM AMMONIACÆ, Ammoniæ sulphuretum—s. Ammoniæ hydrogenatum, Liquor fumans Boylii—s. Kalicum, Potassæ sulphuretum — s. Lixiviæ, Potassæ sulphuretum.

SULPHU'RIC or SULPHU'RIC ACID, *Ac''idum Sulphu'ricum* seu *Sulfu'ricum, O'leum Vitri'oli, Spir'itus Vitri'oli* seu *vitri'oli for'tis, Ac''idum vitriol'icum, A. Vitri'oli dephlogistica'tum, Oil of Vit'riol, Spir'it of Vit'riol, Vitriol'ic Ac''id, A'cor* seu *Spir'itus Sul'phuris*, (F.) *Acide Sulphurique* ou *Sulfurique*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1·843, (Ph. U. S.) It is escharotic, stimulant, and rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections. United with bases it forms *sulphates*, (F.) *Sulfates*.

Sulphuric Acid, Aromat'ic, *Ac''idum Sulphu'ricum Aromat'icum, A. vitriol'icum aromat'icum*, seu *vitriolicum alcoho'lē aromaticum, Elix'ir vitri'oli* seu *vitrioli aromaticum* seu *vitrioli Mynsich'tē* seu *vitrioli Edinburgen'sium* seu *vitrioli cum tinctu'râ aromaticâ* seu *vitrioli dulcē* seu *acidoaromat'icum, Al'cohol cum aromat'ibus sulphurica'tus, Tinctu'ra ac''idi sulphu'rici*, is formed of *Sulphuric acid*, f ʒiijss; *Ginger*, bruised, ʒj; *Cinnamon*, bruised, ʒiss; *Alcohol*, Oij. — (Ph. U. S. 1842.) In the last edition (1863), it is made of *Sulphuric acid*, ʒvj; *Ginger*, in coarse powder, ʒj; *Cinnamon*, in coarse powder, ʒiss; *Alcohol*, q. s. Mix the acid and alcohol, and allow them to cool. Mix the cinnamon and ginger and, in a percolator, pour alcohol gradually until a pint has passed. Then mix the diluted acid and the

tincture. Dose, gtt. x to xxx. Its properties are like those of the next preparation, than which it is more frequently employed, being more agreeable.

SULPHURIC ACID, DILU'TED, *Ac''idum Sulphu'ricum Dilu'tum, A. vitriol'icum dilutum, Elix'ir vitri'oli, Spir'itus vitrioli ac''idus Vogle'ri, Elix'ir of Vit'riol,* (F.) *Acide sulfurique délayé,* is formed, according to the Pharmacopœia of the United States, (1842,) by adding *Aq. destillat.* f℥xiij, to *Acid. sulph.* f℥j. According to the last edition (1863), it consists of *Acid. sulphur.* ℥ij; *Aquæ destillat.* q. s., to make together a pint. It is tonic, astringent, and refrigerant. Dose, gtt. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ℥vj of water.

Very dilute sulphuric acid was formerly termed *Phleg'ma vitri'oli.*

SULPHURIS CARBURETUM, Carbonis sulphuretum.

SULPHURIS CHLORIDUM, Sulphur, chloride of — s. Dichloridum, Sulphur, chloride of.

SUL'PHURIS IO'DIDUM, *S. Iodure'tum, Sul'phur Ioda'tum, Iod'uret* or *Iodide of Sulphur,* (F.) *Soufre Iodure, Iodure de Soufre.* It is thus directed to be prepared in the Pharmacopœia of the U. S. (*Iodin.* ℥iv; *Sulphur.* ℥j.) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool; break it, and put the iodide into bottles, which are to be well stopped.

SULPHURIUS, Sulphureous.

SULPHUROSUS, Sulphureous.

SULPHUROUS, Sulphureous.

SUL'PHUROUS AC''ID, *Ac''idum sulphuros'icum* seu *sul'phuris volat'ilĕ* seu *Sulphuro'sum* seu *Sulfuro'sum, Spir'itus sulphuris* seu *sulphuro'sus volat'ilis* seu *sulphuris per campa'nam* seu *vitri'oli phlogistica'tus, Gas sulphuris,* (F.) *Acide Sulfureux, Air Acide Vitriolique.* (Obtained by treating *mercury* with *concentrated sulphuric acid,* or by burning sulphur.) *Acidum sulphurosum, Sulphurous acid* prepared by treating *sulphuric acid* with *charcoal* by means of heat: receiving the acid into *distilled water,* has been admitted into the Pharmacopœia U. S. for 1863. It is sometimes used in the gaseous, — at others, in the liquid, state. Sulphurous acid gas is used to disinfect clothes, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

United with bases, it forms *sulphites,* (F.) *Sulfites.*

SULTZ'MALT, MIN'ERAL WA'TERS OF. Sultzmalt is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

SUMAC, Rhus coriaria — *s. des Corroyeurs,* Rhus coriaria—*s. Vénéneux,* Rhus toxicodendron.

SUMACH, Rhus coriaria — s. Chinese, Ailanthus glandulosa—s. Mountain, Rhus copallina—s. Poison, Rhus venenata — s. Stag's horn, Rhus typhina.

SUMBUL. The name of a root, *Sum'buli radix, Jataman'si, Muskroot,* presumed to belong to the Umbelliferæ family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk; and is regarded as an antispasmodic.

SUMBULI RADIX, Sumbul root.

SUMEN, (*sugimen,* from *sugere,* 'to suck:' formerly the breast,) Hypogastrium.

SUM'MER COMPLAINT'. A popular name in the United States for diarrhœa occurring in summer. It is often, also, made to include dysentery and cholera infantum. With some it means cholera infantum only.

SUMMER DISEASES, see Estival—s. Plant winter worm, Sphæria Sinensis—s. Rash, Lichen tropicus.

SUMMITAS CUTIS, (*summus,* for *supimus,* from *superus,* 'highest,') Epidermis.

SUMMUS HUMERUS, Acromion.

SUN BURN, Ephelides — s. Dew, Drosera rotundifolia—s. Flower, false, Helenium autumnale — s. Flower, swamp, Helenium autumnale — s. Flower, tickweed, Coreopsis trichosperma — s. Flower, turpentine, Silphium perfoliatum — s. Pain, see Hemierania—s. Rash, Lichen—s. Stroke, *Coup de Soleil* — s. Stroke, Egyptian, *Coup de Soleil.*

SUP, as a prefix, Sub.

SUPALE, see Valeriana.

SUPELLECTILE DIOGENIS, Palm.

SUPELLEX ANATOMICA, (*supellex, supellectilis,* 'household goods,') Museum anatomicum —s. Diogenis, Palm.

SUPER (L.), in composition, 'above.'

SUPERBE, ([L.] *superbus,* 'proud,') Rectus superior oculi.

SUPERBUS, 'proud,' Rectus superior oculi.

SUPERCHLORIDUM FORMYLICUM, Chloroform.

SUPERCILIARIS, Corrugator supercilii, Superciliary.

SUPERCIL'IARY, *Supercilia'ris,* (from *supercilium.*) That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier.*

SUPERCILIARY AR'CHES, *Superciliary Rid'ges, Ar'cus supercilia'res, Suggrun'dia oculo'rum,* (F.) *Arcades sourcilières,* are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits They are separated by the nasal *bosse,* and covered by the superciliaris muscle, to which they give attachment.

SUPERCILIARY RIDGES, Superciliary arches.

SUPERCIL'IUM, *Oph'rys, Oph'rya, Val'lum,* (F.) *Sourcil,* (*super,* and *cilium,* 'the tarsal cartilage.') The *eye'brows,* (Sc.) *Brees,* (Prov.) *Eyebreen,* are two arched eminences,—convex above, and more or less prominent, according to the individual, — which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail.* The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum,* the *frontalis,* and *superciliavis* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

SUPERCILIUM ACETAB'ULI. The edge of the cotyloid cavity of the os innominatum.

SUPERCONCEPTION, see Superfœtation.

SUPEREVACUATIO, Hypererisis.

SUPERFECUNDATION, see Superfœtation.

SUPERFÉTATION, Superfœtation.

SUPERFIBRINATION. Hyperinosis.

SUPERFICIA'LIS COL'LI, (from *superficies*, 'surface,') *Subcuta'neus Col'li*. A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.

SUPERFICIES ORBITALIS, (*super*, and *facies*, 'face,' 'the surface,') see Maxillary bone (superior)—s. Plantaris Pedis, Sole.

SUPERFŒCUNDATIO, Superfœtation.

SUPERFŒTATIO, Superfœtation.

SUPERFŒTA'TION, *Superfœta'tio, Epicye'sis, Hypercye'sis, Hypercye'ma, Superimprægna'tio, Epig'onē, Superfœcunda'tio, Superfecunda'tion, Superimpregna'tion*, (F.) *Superfétation*, (*super*, and *fœtare*, 'to breed.') Conception of a fœtus — *epicye'ma* — in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception*.

SUPERGEMINALIS, (*super*, and *gemini*, 'the testicles,') Epididymis.

SUPERGENUALIS, (*super*, and *genu*, 'the knee,') Patella.

SUPERHUMERALE, (*super*, and *humerus*, 'the shoulder,') Epomis.

SUPERIMPRÆGNATIO, Superfœtation.

SUPERIOR AURIS, Attollens aurem — s. Rotundus clitoridis, Ischiocavernosus.

SUPERLABIA, (*super*, and *labia*, 'the labia pudendi,') Clitoris.

SUPERLIGAMEN, (*super*, and *ligare*, 'to bind,') Epidesmus.

SUPERLIGULA, (*super*, and *ligula*, dim. of *lingua*, 'a tongue,') Epiglottis.

SUPERNUMERARY FINGER, (*super*, and *numerus*, 'a number,') Digitus supernumerarius.

SUPERNUTRITIO, (*super*, and *nutrire, nutritum*, 'to nourish,') Hypertrophy — s. Lienis, Splenoncus—s. Splenis, Splenoncus.

SUPERNUTRITION, Hypertrophy.

SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPOSITUS MEDICORUM, (*super*, and *positus*, 'placed,') Archiater.

SUPERPURGATIO, (*super*, and *purgare, purgatum*, 'to purge,') Hypercatharsis.

SUPERSCAPULARIS, (*super*, and *scapula*,) Supraspinatus — s. Inferior, Infraspinatus.

SUPERSE'DENT, *Super'sedens*, (*super*, and *sedere*, 'to sit.') A term used by Professor George B. Wood for a medicine whose operation on any part or organ is to displace or prevent diseased action in that part or organ. An antiperiodic is a supersedent.

SUPERVACUATIO, Hypercrisis.

SUPIER, Sambucus.

SUPINATEUR, Supinator — *s. Court* ou *petit*, Supinator radii brevis — *s. Grand* ou *long*, Supinator radii longus.

SUPINA'TION, *Supina'tio*, (from *supinus*, 'lying on the back.') The movement in which the forearm and hand are carried outwards, so that the *anterior* surface of the latter becomes *superior*.

In Pathology, *Supination, Supina'tio, Hyptias'ma, Hyptias'mus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINA'TOR, (F.) *Supinateur*. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu MINOR, Supinator radii brevis — s. Longus seu major, Supinator radii longus.

SUPINATOR RA'DII BRE'VIS, *S. bre'vis* seu *mi'nor*, (F.) *Épicondylo-radial*, (Ch.) *Supinateur court* ou *petit supinateur*. A muscle seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself in such a manner, that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPINATOR RADII LON'GUS, *S. longus* sive *ma'jor, Bra'chioradia'lis*, (F.) *Huméro-sus-radial*, (Ch.) *Long* ou *grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPEDANEA, (*sup*, and *pes*, gen *pedis*, 'foot,') Hypopodia.

SUPPLANTALIA, (*sup*, and *planta*, 'the sole of the foot,') Hypopodia

SUPPLEMENTA EPIPLOICA, (*sup*, and *pleo*, 'to fill,') Appendiculæ pinguedinosæ.

SUPPLEMENTARY AIR, see Respiration.

SUPPORTER, ABDOMINAL, (*sup*, and *portare*, 'to carry,') Belt, Russian — s. Uteroäbdominal, see Belt, Russian.

SUPPORTEUR ABDOMINAL, Belt, Russian.

SUPPOSITION DE PART, (*supponere, suppositum* (*sup*, and *ponere*, 'to put'), 'to counterfeit,') Pregnancy, pretended.

SUPPOSITOIRE, Suppositorium.

SUPPOSITORIUM, Suppository—s. Uterinum, Pessary.

SUPPOS'ITORY, *Supposito'rium, Hypoth'eton, Hypoth'ema, Bacil'lus, Bal'anus, Glans, G. subdidi''ia, Nod'ulus intestina'lis*, (*supponere, suppositum* (*sub*, and *ponere*, 'to put'), 'to put under.') (F.) *Suppositoire*. A solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum; — either for the purpose of favouring or of restraining evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

The vehicle commonly used for the active ingredients is cocoa-butter. It may require admixture with one eighth part of wax to give it the proper consistence. Tallow with the same proportion of wax is used at times.

Supposito'ria Ac''idi Tan'nici, Tan'nin Suppos'itaries, and *Supposito'ria Mor'phiæ, Mor'phia Suppos'itories*, are officinal (Ph. B., 1864). The application of a suppository is termed *Balanis'mus*.

SUPPRESSIO ALVI, (*sup*, and *premere, pressum*, 'to press,') Constipation — s. Lochiorum, Ischolochia—s. Lotii, Ischuria—s. Mensium, Amenorrhœa—s. Menstruationis, Amenorrhœa—s. Sudoris, Ischidrosis.

SUPPRESSION DU FLUX MENSTRUEL, Amenorrhœa — *s. de Part*, see Parturition — *s. d'Urine*, Ischuria.

SUPPURANS, Suppurative.

SUPPURARE, Suppurate.

SUP'PURATE, *Suppura'rē, Matter, Beal*, (F.) *Suppurer*. To form or secrete pus.

SUPPURATIF, Suppurative.

SUPPURA'TION, *Suppura'tio, Ecpye'ma, Puruleu'tia, Pyo'sis, Pye'sis, Diopye'ma, Diapye'sis, Pyogen'ia simplex, Pu'rulence, Pu'rulency, Gath'ering, Beal'ing*, (F.) *Suppuration, Aboutissement*. Formation or secretion of pus (see, also, *Pyogenia*), (from *sup*, and *pus*, gen. *puris*.). It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating,

becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When the collection of pus becomes prominent, the abscess is said to *point* or to *come to a head*. When pus is thus formed in the areolar membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUP'PURATIVE, *Suppu'rans, Suppurati'vus, Diapye'ticus, Ecpye'ticus, Sup'purant*, (F.) *Suppuratif, Pyopoétique*. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPPURER, Suppurate.

SUPRA (L.), in composition, above.

SUPRACOSTA'LES, *Levato'res Costa'rum*, (F.) *Surcostaux*, (from *supra*, and *costa*, 'a rib.') A name given to twelve small, fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others, consider them to form part of the intercostales externi.

SUPRAHEPATIC VEINS, see Hepatic veins.

SUPRAÖMPHALODYMIA, (*supra*, ὀμφαλος, 'navel,' and δύω, 'to mingle,') see Somatodymia.

SUPRA ET INFRAÖMPHALODYMIA, see Somatodymia.

SUPRAÖRBITAR, *Supraorbita'lis, Supraorbita'rius*, (F.) *Susorbitaire*, (*supra*, and *orbita*.) That which is situate above the orbit.

SUPRAÖRBITAR FORA'MEN, *F. Supraorbita'rium* seu *orbitarium supe'rius*, (F.) *Trou sus-orbitaire* ou *orbitaire supérieur*, is a foramen or notch completed by a ligament at the inner third of the orbitar arch. It gives passage to the *supraorbitar* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRAPU'BIAN, *Suprapu'bic, Suprapubia'nus*, (*supra*, and *pubes*.) That which is seated above the pubis.

SUPRAPU'BIAN NERVE, (F.) *Nerf suspubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genitocrural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

SUPRARE'NAL, *Suprarena'lis*, (F.) *Surrénal*, (*supra*, and *ren*, 'the kidney.') Seated above the kidney — as the *suprarenal* capsule.

SUPRASCAP'ULAR, *Suprascapula'ris*, (*supra*, and *scapula*.) Seated above the scapula; — as

SUPRASCAPULAR NERVE. This arises from the fifth cervical; passes through the suprascapular notch, and is distributed to the supraspinatus and infraspinatus muscles.

SUPRASCAPULARIS, Suprascapular, and Supraspinatus muscle.

SUPRASEMIORBICULARIS, Orbicularis oris.

SUPRASPINAL, Supraspinatus.

SUPRASPINA'TUS, *Supraspino'sus, Supraspina'lis, Supraspi'nal*, (F.) *Sur-épineux, Sus-épineux*, (*supra*, and *spina*.) That which is seated above a spine.

SUPRASPINATA FOS'SA, (F.) *Fosse sus-épineuse*, is a triangular depression above the spine of the scapula.

SUPRASPINA'TUS MUS'CLE, *Superscapula'ris, Suprascapularis*, (F.) *Sus-spino-scapulo-trochitérien, Petit sus-scapulo-trochitérien* (Ch.), is situated in the fossa supraspinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supraspinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

SUPRASPINO'SA LIGAMEN'TA, *Supraspinal ligaments*, are two in number. 1. The *Dorsolumbosupraspinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebræ from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical supraspinal ligament*, (F.) *Ligament sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

SUR (F.), (L.) *Supra*, in composition, 'above.'

SURA, *Gastrocne'mē, Gastrocne'mia, Gastrocne'mium; Calf of the leg*, (F.) *Mollet, Gras de Jambe*. The projection, formed at the posterior part of the leg by the gastrocnemii muscle. Also, the fibula.

SU'RAL, *Sura'lis*, (from *sura*.) Appertaining or relating to the calf of the leg.

SURCILIER, (*sur*, and *cil*, 'the tarsal cartilage, an eyelash,') Corrugator supercilii, Superciliary.

SURCOSTAUX, (*sur*, and *costal*, 'belonging to the rib' [*costa*]), Supracostales.

SURCULATION, (from *surculus*,) see Generation.

SURCULI FELLEI, (pl. of *Surculus*,) Pori biliarii.

SURCULUS, 'a young branch,' Ramusculus.

SURDENT (F.), (*sur*, and *dent*, 'a tooth.') When a milktooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent*.

SURDI-MUTITÉ, Mutitas surdorum.

SURDITAS, (from *surdus*,) Cophosis, Deafness.

SURDITÉ, Cophosis, Deafness.

SURDOMUTITAS, (*surdus*, and *mutus*, 'mute,') Mutitas surdorum.

SURDUS, Deaf.

SUREAU COMMUN, Sambucus.

SURELLE, ([Sax.] ꝑuꝛ, 'sour,') Oxalis acetosella, Rumex acetosa.

SUR-ÉPINEUX, (*sur*, and *épine*, 'a spine,') Supraspinatus.

SUR-EXCITATION, see Excitement, and Superexcitation.

SURFEIT, (*sur*, and *fait*, 'done,') Acrasia, Colica crapulosa.

SUR'GEON, *Chirur'geon; Chiro'nax, Chirur'gus, Vul'nerum med'icus, Cheiria'ter, Chiria'ter, Iā'trus*, (F.) *Chirurgien*, old French, *Surgieu*, (χειρ, 'the hand,' and ἐργον, 'work.') One who practises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous: he must use the right or left with equal facility: his sight must be clear and penetrating: his mind intrepid; and, although unmoved when he proceeds to operate, he must not be in haste, nor cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

In the middle ages, the Universities of Italy and Spain sent out educated surgeons, as well as physicians, under the name *chirurgi physici*.

SURGEONACCOUCHEUR, see Surgeon apothecary.

SURGEONAPOTH'ECARY. One who unites the practice of surgery with that of the apothecary. A *general practitioner*. He is the ordinary *medical man* or family medical attendant in Eng-

land, and when he combines, as he usually does, obstetrics with his practice, he is termed a *surgeon accoucheur*, in contradistinction to the *physician accoucheur*, who practises as a physician and an accoucheur. See Apothecary.

SURGEONDENTIST, Dentist.

SUR'GEONCY. The office of a surgeon.

SUR'GERY, *Chirur'gia, Chiriatri'a, Cheirix'is, Chi'risis, Chirix'is, Chiris'mus, Metacheirix'is, Metachi'risis, Metachiris'mus, Tracta'tio manua'ria, Medici'na operati'va* seu *ef'ficax*, (F.) *Chirurgie*. The part of the healing art which relates to external diseases; their treatment; and, especially, to the manual operations adapted for their cure. Also, a surgeon's office.

SURGERY, ANAPLASTIC, Morioplastice — s. Autoplastic, Morioplastice—s. Conservative, Surgery, salvation — s. Dental, Dentistry — s. Major, see Surgery, operative.

SURGERY, MIL'ITARY, *Chirur'gia milita'ris*, (F.) *Chirurgie militaire*, is that which relates to the operations to be performed on the field of battle, or subsequently;—with the attention to be paid to the wounded, &c.

SURGERY, MINOR, see Surgery, operative.

SURGERY, OP'ERATIVE, is termed *Aciur'gia, Acur'gia*, and *Acidur'gia*, (F.) *Médecine opératoire*. *Major Surgery* comprises the *capital* or more important operations,—*Mi'nor Surgery* the lesser, or those of every day occurrence.

SURGERY, PLASTIC, Morioplastice.

SURGERY, SALVA'TION, *Conser'vative Sur'gery*, (F.) *Chirurgie conservatrice*, is that which looks rather to the preservation of a part — a limb for example, than its removal. One, who is addicted to operating in almost all cases, is sometimes called a *knifesman*.

SUR'GICAL, *Chirur'gicus*, (F.) *Chirur'gical, Chirurgique*. That which relates to surgery; as *surgical* anatomy, *surgical* operations, *surgical* instruments, &c.

SURGIEN, Surgeon.

SURINAMINE, see Geoffrea Surinamensis.

SUR-IRRITATION, see Irritation.

SUR-NUMÉRAIRE, (*Doigt,*) (*sur*, and *numéro*, 'number,') Digitus supernumerarius.

SUROXYGÉNÈSES. From *sur* and *oxygen*. A name given by Baumes to diseases attributed by him to superabundance of oxygen.

SURPEAU, (*sur*, and *peau*, 'skin,') Epidermis.

SURRECTA ALBA, Ranunculus flammula.

SUR-RÉNAL, Suprarenal.

SURROGATUM, (*surrogare*, (*sur* for *sub*, and *rogare, rogatum*, 'to ask,' 'to substitute,') Succedaneum.

SURSELS, (*sur*, and *sel*, 'a salt',) Supersalts, see Salt.

SURTOUTS LIGAMENTEUX DE LA COLONNE VERTÉBRALE, (*sur*, and *tout*, 'all,') Vertebral ligaments.

SURUMPE (S.). A disease to which the traveller in the Cordilleras is liable. It consists of a violent inflammation of the eyes, caused by the reflection of the bright rays of the sun. The conjunctiva is highly inflamed, and the lids swell and bleed. The pain is intense, and frequently induces delirium.

SURVIE, (*sur*, and *vie*, 'life,') Survivorship.

SURVI'VORSHIP, (F.) *Survie*, (*supervivere*, (*super*, and *vivere*, 'to live,' 'to live above or longer.') In *legal medicine*, this word means the probability that any individual has survived others in an accident, which has been fatal to all. This is often an important question connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

SUS, same as *Sursum*, 'above.' A prefix, in certain Romanic words, signifying above.

SUS-CARPIEN (F.), (*sus*, and *carpe*, 'the wrist.') Above the wrist. An epithet given by Chaussier to the dorsal artery of the wrist—*Artère sus-carpienne*—a branch of the radial.

SUS-ÉPINEUX, Supraspinatus—*s. Hépatique*, see Hepatic veins—*s. Maxillo-labial*, Levator anguli oris—*s. Maxillo-labial, grand*, Levator labii superioris alæque nasi — *s. Maxillo-labial moyen*, Levator labii superioris proprius — *s. Maxillo-nasal*, Compressor naris — *s. Omphalodymie*, see Somatodymia—*s. Optico-sphéno-sclerotícien*, Rectus superior oculi—*s. Orbitaire*, Supraörbitar—*s. Phalangien du pouce*, Abductor pollicis brevis—*s. Pubio-fémoral*, Pectinalis—*s. Scapulo-trochitérien le plus petit*, Teres minor—*s. Scapulo-trochitérien petit*, Supra-spinatus — *s. Spino-scapulo-trochitérien*, Supra-spinatus.

SUSCEPTIBIL'ITY, (*facilè suscipiens*, (*sus*, and *capio*, 'I take,') 'easily taking, or undertaking.') Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous*, is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

SUSCEPTIO INTESTINORUM, Intussusception.

SUSPENDICULUM, (*sus*, and *pendere*, 'to hang,') Cremaster.

SUSPENSA, (*sus*, and *pendere, pensum*, 'to hang,') Enæorema.

SUSPENSEUR, Suspensory.

SUSPENSOIRE, Suspensory.

SUSPENSORIUM, Suspensory — s. Hepatis, Suspensory ligament of the liver—s. Testis, Cremaster.

SUSPEN'SORY, *Suspenso'rius*, (F.) *Suspenseur*. That which sustains or suspends.

SUSPENSORY BAND'AGE, *Suspenso'rium*, (F.) *Suspensoir* ou *Suspensoire*, is a bandage intended to support the scrotum, in cases of diseases of the testicles or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained below by strings passing between the thighs, and fixed to the cincture behind.

SUSPENSORY LIG'AMENT OF THE LIV'ER, *Ligamen'tum la'tum, Suspenso'rium he'patis, Perpendic'ulum he'patis*, is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falx of the umbilical vein.

SUSPENSORY LIGAMENT OF THE PE'NIS is a fibrocellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

SUSPENSUM, Enæorema — s. Urinæ, Enæorema.

SUSPIRATION, (*su* for *sub*, and *spirare, spiratum*, 'to breathe,') Suspirium.

SUSPIRATUS, Suspirium.

SUSPIRITUS, Suspirium.

SUSPIR'IUM, *Suspira'tio, Suspira'tus, Suspir'itus, Myg'mus, Mych'mus, Mychthis'mus, Stenag'mus, Stenax'is, Sigh, Suspira'tion*, (old E.) *Sithe, Sythe*, (F.) *Soupir*. A short, audible breathing. Also, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed, — a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the *sob*:—the latter being involuntary and spasmodic. Sighing, occuring in fevers to a great extent, indicates

considerable depression. If accompanied with a vocal sound, it constitutes a *groan*.

When the respiration, on auscultation, resembles sighing, it is called, by some, *Suspir'ious*, (F.) *Suspirieux*.

Suspirium Cardiacum, Angina pectoris.

SUSTENTACULUM, (*sus*, and *teneo, tentum*, 'to hold,') Aliment.

SUSTENTATOR CLITORIDIS, Erector clitoridis—s. Penis, Erector penis.

SUSURRATION, (*susurrare, susurratum*, 'to murmur, to whisper,') Whispering.

SUSURRUS, 'a murmur,' *Bourdonnement*—s. Aurium, Tinnitus aurium.

SUTELA, (*suere, sutum*, 'to sow,') Suture.

SUTERBERRY, Xanthoxylum fraxineum.

SUTORIUS, (*sutor*, 'a shoemaker,') Sartorius.

SUTTER, Saccharum.

SUTURA, gen. *Sutu'ræ*, Suture—s. Abdominalis, Gastroraphy — s. Arcualis, Coronal suture — s. Biparietalis, Sagittal suture — s. Clavata, Suture, quilled — s. Corporis callosi externa, see Raphe—s. Cranii squamosa, Squamous suture—s. Dentata, see Suture—s. Frontoparietalis, Coronal suture—s. Interparietalis, Sagittal suture—s. Jugalis, Sagittal suture — s. Lamboidalis, Lambdoid suture — s. Lepidoides, Squamous suture — s. Limbosa, see Suture — s. Mendosa, Squamous suture — s. Notha, see Suture — s. Obelæa, Sagittal suture — s. Ossium spuria, Harmony — s. Proræ, Lambdoid suture — s. Punctata, Suture, common — s. Puppis, Coronal suture — s. Rhabdoides, Sagittal suture—s. Serrata, see Suture, Sagittal suture—s. Spuria, see Suture — s. Squamosa, see Suture—s. Vera, see Suture.

SU'TURAL, *Sutura'lis;* (same etymon as the next.) Relating to a suture.

SU'TURE, *Sutu'ra, Sute'la, Ar'mē, Rha'phē*, (*suere, sutum*, 'to stitch;') *Dovetail joint*, (F.) *Engrenure*. A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dovetailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures, sutu'ræ ve'ræ*, the two temporal are called *false sutures, sutu'ræ no'thæ* seu *spu'riæ* seu *squamo'sæ*.

A *dentated suture — Sutu'ra denta'ta* — is one in which the processes are long and dentiform, as in the interparietal suture. In a *ser'rated suture — sutu'ra* seu *syntax'is serra'ta* — the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutu'ra limbo'sa* there is, along with the dentated margins, a degree of bevelling of one, so that one bone rests on the other, as in the occipitoparietal suture.

Suture, in *Surgery, Rha'phē*, is an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutu'ra sic'ca* or *dry su'ture*, in opposition to the *Sutu'ra cruen'ta*, (F.) *Suture Sanglante*, or *Suture* properly so called. The suture is generally formed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrup'ted suture*, the *quil'led suture*, the *glov'er's suture*, and the *twist'ed suture*. 1. The Interrup'ted Suture, (F.) *Suture à points séparés, Suture entrecoupée*, is formed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The Quil'led Suture, *Sutu'ra clava'ta*, (F.) *Suture enchevillée* ou *emplumée* ou *empennée, Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plasters, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. The Clamp Suture, used by Dr. Sims, of New York in the treatment of vesicovaginal fistulæ, is a modification of this. It is formed by two cylinders of silver or lead, perforated at several points for the passage of small pieces of fine silver wire, which are to supply the places of thread, and are prevented from slipping by perforated shot carried down upon them, pressed against the cylinders, and kept in place by being firmly pinched with pliers. 3. The Glover's Suture, *Contin'ued* or *Uninterrup'ted Suture*, (F.) *Suture de Pelletier*, ou *en surget*, is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura puncta'ta*, (F.) *Suture à points passés*, has been used in similar cases. 4. The Royal Stitch or Suture is the name of an old operation for the cure of bubonocele. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited. 5. The Sta'ple Suture consists of a piece of steel wire, shaped like a staple, the ends of which are ground to a triangular or glover's point. In using it, the points of the staple are to be brought through both margins of the wound, and then bent back. 6. The Twist'ed Suture, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately around the pin, from one side of the division to the other, in the form of the figure ∞. The number of pins and sutures must, of course, correspond with the extent of the wound. This is the suture used in cases of harelip. The Button Suture of Dr. Bozeman, of Alabama, employed in vesicovaginal fistula, is a modification of this. 7. The *SUTURE À ANSE*, of Le Dran, has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally. 8. The Implant'ed Suture, (F.) *Suture implantée*, is formed by pins arranged parallel to the edges of the wound, and *implanted* in their substance. By means of threads, the needles are approximated so as to bring the edges of the wound together. 9. The Plas'tic Suture, so called by Prof. Pancoast, of Philadelphia, its proposer, is a suture by tongue and groove. The groove is made by an incision in the part, which is to receive the flap. The tongue is made on the flap by bevelling off the two surfaces, cuticular and adipose. The suture is made by passing a loop of thread, by two punctures, deep through

the inner lip of the groove. The two needles are passed through the base of the tongue, and again through the outer lip of the groove. The two ends of the thread are then tied over a small roll of adhesive plaster, by which the tongue is, of necessity, forced deep into the groove. Four raw surfaces are thus firmly held in connection, making the union of parts, by this suture, a very certain process.

SUTURE, BUTTON, see Suture, (twisted) — s. Clamp, see Suture, (quilled) — s. Compound, Suture, quilled — s. Continued, Suture, glover's — *s. Écailleuse*, Squamous suture — *s. Empennée*, Suture, quilled — *s. Emplumée*, Suture, quilled — *s. Enchevillée*, Suture, quilled—*s. Entortillée*, Suture, twisted — *s. Entrecoupée*, Suture, interrupted — s. False, Harmony, see Suture — *s. Implantée*, see Suture, (implanted)—*s. Occipitale*, Lambdoid suture—s. Occipitoparietal, Lambdoid suture—*s. de Pelletier*, Suture, glover's—s. Perineal, Perinæorrhaphy—s. Plastic, see Suture—*s. à Points passés*, Suture, common — *s. à Points séparés*, Suture, interrupted—s. Sagittal, see Sagittal suture—*s. Sanglante*, see Suture — *s. Squameuse*, Squamous suture — s. Superficial, Harmony — *s. en Surget*, Suture, glover's—s. Twisted, see Suture—s. Uninterrupted, see Suture, glover's.

SWAB, ([Sax.] ꝑpebban, 'to clean with a mop.') A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to deepseated parts. The process is termed *Swab'bing*.

SWADDLING CLOTHES, Swathing clothes.

SWAGBELLY, Physconia.

SWALLOW, Hirundo—s. Wort, Asclepias vincetoxicum—s. Wort, orange, Asclepias tuberosa—s. Wort, tuberousrooted, Asclepias tuberosa — s. Wort, white, Asclepias vincetoxicum.

SWALLOW'S NEST, Nidus hirundinis.

SWALME, ([Sax.] ꝑpam, [G.] Schwamm,) Excrescence, Tumour.

SWAMP CABBAGE, Dracontium fœtidum—s. Dogwood, Petela trifoliata—s. Sickness, Milk sickness — s. Wood, Cephalanthus occidentalis, Dirca palustris.

SWAN ALLEY SORE, see Phagedenic chancre.

SWARFF, Stupor, Syncope.

SWA'THING CLOTHES, *Swad'dling Clothes, Incunab'ula, Fas'ciæ, Pan'ni*, ([Sax.] ꝑpeðan, 'to bind.') (F.) *Maillot*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

SWEAMISH, see Syncope.

SWEAT, ([Sax.] ꝑpat,) Sudor—s. Bloody, Sudor cruentus — s. Glands, see Perspiration — s. Root, Polemonium reptans—s. Scab, Crusta genu equinæ.

SWEATING, Ephidrosis — s. Bath, Achicolum —s. of Blood, see Diapedesis, and Sudor cruentus —s. House, Achicolum—s. Plant, Eupatorium perfoliatum—s. Room, Achicolum—s. Sickness, Sudor Anglicus.

SWEATING SICKNESS, MALWAH. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah, in India.

SWEBBING, Syncope.

SWEE, (sway,) Vertigo.

SWEEMING, Syncope.

SWEEMISH, see Syncope.

SWEET, BITTER, Solanum dulcamara.

SWEET BITTER, Triosteum — s. Bread, Pancreas, Thymus—s. Bush, Comptonia asplenifolia—s. Fern, Comptonia asplenifolia — s. Flag, Acorus calamus — s. Pod, Ceratonium siliqua — s. Root, Aralia nudicaulis.

SWELL'ING, *Epanaste'ma, Ea'ar'ma, Exœde'sis, Pre'sis, Pres'ma, On'cus, Extumefac'tio, Tu'mor, Tumefac'tio*, (Prov.) *Blaw'ing, Boist, Coul*, (Old Eng.) *Boche, Bol'lynge, Bol'ning*, (F.) *Enflure, Gonflement*, (from [Sax.] ꝑpellan, 'to swell.') Morbid increase of bulk in a part of the body. See Tumour.

SWELLING, WHITE, Hydrarthrus.

SWELTING, see Syncope.

SWENSIE, (quinsy,) Cynanche Tonsillaris.

SWENYNG, Somnium.

SWERF, Stupor, Syncope.

SWERTIA CHIRAYITA, (after Emanuel Swert, a Dutch botanist,) Gentiana chirayita — s. Difformis, see Calumba—s. Frasera, see Calumba —s. Lutea, Gentiana lutea.

SWEUIN, Somnium.

SWEVYNG, Somnium.

SWEVYNYNG, Somnium.

SWIETE'NIA FEBRIF'UGA, (after Van Swieten,) *S. Somi'da, Soymi'da* seu *Cedre'la febrif'uga, Feb'rifuge Swiete'nia*, (F.) *Mahogan fébrifuge. Ord.* Meliaceæ. *Sex. Syst.* Decaudria Monogynia. The bark of this tree, which is a native of the East Indies, called there *Rohena Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ℈j to ℈ij of the powder.

SWIETENIA MAHOG'ANI, *Ce'drus Mahog'ani, Mahog'oni, Maag'oni, Mahog'any Tree*, grows in the West Indies and tropical America, and is possessed of similar properties.

SWIETENIA SENEGALEN'SIS, *Khaya Senegalen'sis*. A common forest tree on the borders of the Gambia. The bark called *Cail-cedra*, and *Karson Khayi*, is bitter and antiperiodic.

SWIETENIA SOMIDA, S. Febrifuga.

SWIM, Air bladdor.

SWIMBLADDER, Air bladder.

SWIMMING, Natation—s. Bladder, Air bladder—s. of the Head, Vertigo.

SWINACIE, Cynanche tonsillaris.

SWINEPOX, see Varicella.

SWINESAME, Adeps.

SWINETHISTLE, Sonchus.

SWINNYING, Vertigo.

SWOON, (from [Sax.] aꝑpanan, 'to languish,') Syncope.

SWOONING, Syncope.

SWOUNDING, Syncope.

SY, in composition, 'with,' 'together,' see Sym.

SYALADENITIS, see Sialadenitis.

SYCAMINUS, (*συκαμινος*,) Morus nigra.

SYCAMINUM, (*συκαμινον*,) see Morus nigra.

SYCE, (*συκη*,) Ficus, Ficus carica.

SYCEA, (*συκεα*,) Ficus.

SYCEPH'ALUS, (*sy*, for *sym*, and *κεφαλη*, 'head.') A monster having two heads united together.

SY'CION, (*συκιον*, from *syce*.) A decoction of dried figs.

SY'CIOS ANGULA'TUS, (*σικυος*, 'a gourd.') *One-seeded star cu'cumber, Wild Bry'ony*. The roots and seeds of this indigenous plant, *Order* Cucurbitaceæ, are bitter, purgative and diuretic. It is used in dropsy in the same cases as bryony.

SYCI'TES, (*συκιτης*, from *συκη*, 'a fig.') Made of figs, see Catorchites.

SYCOMA, (*συκωμα*, from *syce*, and *oma*,) Ficus.

SYCO'SIS, (*συκωσις*.) A tumor of the shape of a fig. Also, a fungous ulcer. A horny excrescence about the eyelids. Dr. Bateman defines it: —an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches;—*Phy'ma Sycosis, Rose'ola fico'sa, Ac'nē men'tagra*. Of this he has given two species: 1. *Sycosis Men'ti, S. bar'bæ, Men'tagra, Menti'go, Va'rus Men'tagra,*

Mentagroph'yta, Chin'welk, Chin'whelk, Bar'ber's Itch. (F.) *Dartre pustuleuse mentagre:* and, 2. *Sycosis Capil'li, S. Capillit''ii.* The treatment, in both cases, resembles that for porrigo favosa. See Mentagraphyte.

SYCOSIS, Ficus.

SYCUM, (συκον,) Ficus.

SYDERATIO, Sideratio.

SYLLEPSIOLOG''IA. *Syllepsol'ogy, Syllepsiol''ogy,* (*syllepsis,* and λογος, 'a description.') The doctrine of conception.

SYLLEPSIS, (συλληψις,) Conception.

SYM, SYN, (συν, 'with, together,') like the *cum, con, col, cor,* &c., of the Latins. A common prefix. Before *b, p, ph, ps,* and *m* — *sym,* or *xyn,* is changed into *sym* or *xym,* (com;) before *c, ch, g, k,* and *x,* into *syn* or *xyn, συγ, ξυγ,* (con;) before *l* into *syl* or *xyl,* (col;) before *r* into *syr* or *xyr* (cor;) and before *s* into *sy* or *xy,* and *sys,* (co and cos.)

SYMBLEPHARON, (*sym,* and βλεφαρον,) Symblepharosis, see Ankyloblepharon.

SYMBLEPHARO'SIS, *Symbleph'aron,* (*sym,* and βλεφαρον, 'an eyelid,') *Concre'tio palpebrarum cum bulbo oc'uli.* A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYM'BOL, (συμβολον, 'a sign,') *Sym'bolum, Character,* (F.) *Caractère.* A sign or representation of something else.

The following are the symbols commonly used in prescriptions:

℞, Recipe. See R.
gr., *Granum,* a grain.
℈, *Scrupulus* seu *scrupulum,* a scruple.
ʒ, *Drachma,* a drachm.
℥, *Uncia,* an ounce.
℔, *Libra,* a pound.
lb, *Libræ,* pounds.
♏, *Minimum,* a minim.
fʒ, *Fluidrachma,* a fluidrachm.
f℥, *Fluiduncia,* a fluidounce.
O, *Octarius,* a pint.
C, *Congius,* a gallon. See Abbreviations, and Weights and Measures.

SYMBOLE, (συμβολη, 'a bringing together,' from *sym,* and βαλλω, 'to throw,') Commissure.

SYMBOLEUSIS, (from συμβολη, 'a bringing together,') Consultation.

SYMBOLISMUS, (from *symbolum,*) Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLOGICA, (συμβολον, 'a sign,' and λογος, 'a treatise,') Symptomatology.

SYMBOLOGY, (*symbolum,* and λογος, 'a description.') Symptomatology.

SYMBOLUM, (συμβολον,) Symbol, Sympathy.

SYMÉTRIE, Symmetry.

SYMÉTRIQUE, Symmetrical.

SYM'MELES, (*sym,* and μελος, 'a limb.') *Mon'opus.* A genus of monsters, with I. G. St. Hilaire, whose extremities are joined together: *Si'rens.*

SYMMETRIA, Symmetry.

SYMMET'RICAL, *Symmet'ricus,* (F.) *Symétrique.* An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like, halves; or which — if situate, the one to the right, the other to the left of this line—have a similar conformation, and a perfectly analogous arrangement.

SYMMETRICAL DISEASES, see Symmetry.

SYM'METRY, (συμμετρια, from *sym,* and μετρειν, 'to measure,') *Symmet'ria, Commen'sum, Membrorum Om'nium Competen'tia, Propor'tio,* (F.) *Symétrie.* The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side of the median line; *Bilat'eral Sym'metry.* Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed—and there is evidence in favour of the assertion—to be a law of the animal economy, that, owing to *symmetry of nutrition,* when uninfluenced by disturbing agents, all general or constitutional diseases affect equally and similarly the corresponding parts of the two sides of the body. This has been called the *Symmetry of Diseases;* and the resulting diseases are said to be *symmet'rical.*

SYMMETRY OF DISEASES, see Symmetry—s. of Nutrition, see Symmetry.

SYMPARATERESIS, (*sym,* and παρατηρησις, 'the act of observing,') Observation.

SYMPASMA, (συμπασμα, from *sym,* and πασσω, 'to sprinkle.') Catapasma.

SYMPATHESIS, (συμπαθησις,) Sympathy.

SYMPATHET'IC, *Sympath'icus, Sympathet'icus,* (F.) *Sympathique,* (from *sympathy.*) That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbific cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection,* produced by irritation in the intestinal canal.

The epithet *sympathetic* is, also, given to different nerves. See Trisplanchnic, Pneumogastric, and Facial.

SYMPATHETIC, GREAT, Trisplanchnic nerve—s. Middle, Pneumogastric — s. Nerve, Trisplanchnic nerve.

SYMPATHETIC POW'DER, *Pul'vis sympathet'icus* or *Pow'der of Sym'pathy* of Sir Kenelme Digby, was composed of *calcined sulphate of iron,* prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Sympathy, Consent of parts.

SYMPATHICUS, Sympathetic.

SYMPATHIQUE, Sympathetic—*s. Nerf,* Trisplanchnic nerve.

SYM'PATHY, (συμπαθεια, from *sym,* and παθος, 'suffering,') *Sympathi'a, Sympathe'sis, Compas'sio, Consen'sus, Sympathetis'mus, Xympathi'a, Conflux'io, Conspira'tio, Commer'cium, Consor'tium, Homoiopathi'a, Homoëth'nia, Adelphix'is, Symbolis'mus, Symboliza'tio, Sym'bolum.*

The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between different organs throw light on the etiology of diseases, their seat, and the particular organs towards which our therapeutical means should be directed. See Irritation.

Sympathy of Continuity is seen in the case of a membrane that is continuous, as in the action of demulcents in catarrh; *Sympathy of Contiguity* in the case of parts that are near, as in the action of aloes in amenorrhœa; and *Remote Sympathy* concerns organs that are at a distance from the part impressed, as in the case of tetanus from an injury.

SYMPATHY, CURE BY, *Medici'na sympathet'ica, M. Magnet'ica.* A mode of treatment, at one time prevalent, which was based on the idea, that a mysterious consent exists between parts of the body and agents, for which there was no real

foundation. See Sympathetic powder, and Trial by Bier-right.

SYMPEPSIS, (*sym*, and *πεψις*, 'coction, digestion,') Coction.

SYMPEXIONS, see Sympexis.

SYMPEXIS, (*συμπηξις*,) Concretion. M. Robin has applied the term *Sympexions* to solid concretions found in the vesicles of the thyroid gland, spleen, lymphatic ganglion, in the small cysts of the glands of the neck and body of the uterus, and, almost always, in the liquid of the vesiculæ seminales. Little is known of their composition.

SYMPHORA, (*συμφορα*, from *sym*, and *φερω*, 'to carry,') Congestion.

SYMPHOREMA, gen. *Symphore'matis*, (*συμφορημα*,) Congestion.

SYMPHORESIS, (*συμφορησις*,) Congestion.

SYMPHORICAR'PUS RACEMO'SUS, *Snowberry*, (*συμφορεω*, 'to bear together,' and *καρπος*, 'fruit,' owing to the clustered berries.) An indigenous plant, *Order*, Caprifoliaceæ, *Tribe*, Loniceræ, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague; and by the Indians in syphilis.

SYMPHYIA, (*συμφυια*,) Symphysis.

SYMPHYOCEPH'ALUS, *Metopa'ges*, *Cephalopa'ges*, (from *συμφυης*, (*sym*, and *φυω*, 'to grow,') 'united together,' and *κεφαλη*, 'head.') A monstrosity, in which twins are united by the head.

SYMPHYSE, Symphysis.

SYMPHYSEOT'OMY, *Symphysot'omy*, *Synchondrot'omy*, *Symphyseotom'ia*, *Symphyxiotom'ia*, (from *symphysis*, and *τεμνω*, 'I cut.') The *opera'tion* or *sec'tion of the Sym'physis*, *Sigault'ian opera'tion* or *sec'tion*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *désymphyser*, the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

SYMPHYS'IA, (from *συμφυω*, 'to grow together.') A malformation consisting in the union of parts that are usually divided.

SYMPHYSIEN, see Symphyseotomy.

SYMPHYSIOTOMIA, Symphyseotomy.

SYM'PHYSIS, *Symphy'ia*, *Coalescen'tia*, *Coal'itus*, *Coalit''io*, (F.) *Symphysie*, (*συμφυσις*, from *sym*, and *φυω*, 'I grow.') A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name symphysis, (F.) *Symphyse*, has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis*, *sacroïliac symphysis*, &c. See Monster.

SYMPHYSIS, Coalescence, Commissure, Insertion — s. Cartilaginea, Synchondrosis — s. Ligamentosa, Syndesmosis — s. Menti, see Maxillary bone, inferior — s. Ossium muscularis, Syssarcosis — s. Pubis, Pubic articulation.

SYMPHYSODACTYL'IA, (*symphysis*, and *δακτυλος*, 'a finger.') An abnormal union of the fingers.

SYMPHYSOP'SIA, (*symphysis*, and *ωψ*, 'the eye.') A monstrous fusion of the two eyes into one.

SYMPHYSOTOMY, Symphyseotomy.

SYMPHYTOS, (*συμφυτος*, 'grown or produced with,') Hereditary.

SYM'PHYTUM, (*συμφυτον*,) *Symphytum officina'lē* seu *album* seu *Bohe'micum*, *Consol'ida ma'jor*, *Com'frey*, *Al'um*, *Al'us*, (Prov.) *Knitback*, (F.) *Grande Consoude*, *Oreilles d'âne*. *Ord.* Boraginaceæ. *Sex. Syst.* Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhœa, &c.

SYMPHYTUM, Solidago vigaurea — s. Album, Symphytum — s. Bohemicum, Symphytum — s. Minimum, Bellis — s. Minus, Prunella — s. Officinale, Symphytum.

SYMPHYTUM PETRÆ'UM, *Co'ris Monspelien'sis*, *Montpel'lier Co'ris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, Sanicula.

SYMPLOCARPUS ANGUSTISPATHA, (from *συμπλοκη*, 'connection,' and *καρπος*, 'fruit,' from the coalescing ovaries,) Dracontium angustispatha — s. Fœtidus, Dracontium fœtidum.

SYMPOD'IA, *Monopod'ia*, (*sym*, and *πους*, gen. *ποδος*, 'a foot.') A monstrosity in which there is coalescence of the lower extremities.

SYMP'TOM, *Sympto'ma*, *Semei'on*, *Ac'cidens*, *Ca'sus*, (F.) *Symptôme*, (*συμπτωμα*, from *sym*, and *πτωμα*, 'a fall,' from *πιπτω*, 'I fall.') Any change, perceptible to the senses in any organ or function, which is connected with morbific influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *Symptoms of Symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. *Symptom*, at one time, was generally used in the same sense as *sign*; but with many, perhaps most, of the present day, the former signifies a functional or vital phenomenon of disease, whilst the latter is applied to that which is more directly physical; and hence the expressions *functional* or *vital phenomena* or *symptoms*, in contradistinction to the *physical signs* afforded by auscultation, percussion, &c. See Sign.

SYMPTOMA, gen. *Sympto'matis*, Symptom — s. Turpitudinis, Nymphomania.

SYMPTOMAT'IC, (*συμπτωματικος*,) *Symptomat'icus*, (F.) *Symptomatique*. That which is a symptom of some other affection. Thus, we speak of a symptomatic disease, in opposition to one that is idiopathic.

SYMPTOMATOGRAPHY, (*symptoma*, and *γραφη*, 'a description,') Semeiography.

SYMPTOMATOL'OGY, *Symptomatolog''ia*, *Symbol'ogy*, *Symbolog''ica*, (*symptoma*, and *λογος*, 'a treatise.') The branch of pathology, the object of which is the observation (*phænomenoscop'ia*) and knowlege of symptoms.

SYMPTO'SIS, (*συμπτωσις*, from *sym*, and *πιπτω*, 'I fall.') Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

SYN, as a prefix, Sym.

SYNÆREMA, gen. *Synærem'atis*, (*συναιρεμα*,) Corrugation.

SYNÆTION, (*συναιτια*, from *syn*, and *αιτια*, 'a cause,') Concausa.

SYNANCHE, Cynanche, Cynanche tonsillaris.

SYNANCIE, Cynanche.

SYNAPHYMENITIS, (*συναφη*, 'a conjunction,' *ὑμην*, 'a membrane,' and *itis*,) see Ophthalmia.

SYNAPTASE, (*syn*, and *απτειν*, 'to join;' with amygdalin it forms hydrocyanic acid,) see Amygdalin.

SYNARTHRODIA, Synarthrosis.

SYNARTHRO'DIAL, *Synarthrodia'lis*. That which belongs to synarthrosis; as *Synarthrodial articulation*.

SYNARTHRO'SIS, (*συναρθρωσις*, from *syn*, and *αρθωσις*, 'articulation,') *Synarthro'dia*, *Abartiula'tio*, *Coarticula'tio*. An immovable articulation. Synarthrosis includes three species: *Suture*, *Harmony*, and *Gomphosis*.

SYNATHROISIS, (συναθροισις, *syn*, and αθριζειν, 'to collect,') Congestion.

SYNATHROISMUS, (συναθροισμος,) Congestion.

SYNCAN'THUS, (*syn*, and καυθος, 'the corner of the eye.') A morbid adhesion between the globe of the eye and the orbit.

SYNCHITON, (*syn*, and χιτων, 'a coat,') Conjunctiva membrana.

SYNCHONDRO'SIS, *Sym'physis* seu *Cop'ula* seu *Connex'io cartilagin'ea*, *Chondrosyndesm'us*, (*syn*, χονδρος, 'a cartilage,' and *osis*.) Union or articulation of bones by means of cartilage; as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

SYNCHONDROTOMY, (*syn*, χονδρος, 'cartilage,' and τεμνειν, 'to cut,') Symphyseotomy.

SYNCHRONIUS, Synchronous.

SYN'CHRONOUS, *Syn'chronus*, *Synchron'ius*, *Isoch'ronous*, (συγχρονος, from *syn*, and χρονος, 'time.') That which occurs at the same time. Thus, the pulsations of an artery are said to be synchronous with those of the heart.

SYNCHRONUS, (συγχρονος,) Synchronous.

SYNCHYSIS, (συγχυσις, from *syn*, and χυω, 'to pour,') Confusio — s. Sparkling, Confusio.

SYNCIPUT, Sinciput.

SYNCLONESIS, (συγκλονησις,) Synclonus.

SYN'CLONUS, *Synclone'sis*, (συγκλονεω, (*syn*, and κλονεω, 'I shake,') 'I shake together.') Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will; *Clon'ici universa'les*, *Clo'nus*, (Young.) Also, general spasm, *spas'mus universa'lis*. See Tremor, Chorea, &c.

SYNCLONUS BALLISMUS, Paralysis agitans — s. Beriberia, Beriberi — s. Chorea, Chorea — s. Raphania, Raphania — s. Saltans, Chorea — s. Tremor, Tremor.

SYNCOMIS'TUS, (συγκομιστος, from συγκομιζω, (*syn*, and κομιζω, 'to bring,') 'to bring together.') *Autop'yros*, *Pa'nis domes'ticus*, *secunda'rius*, *ciba'rius*, *confusa'neus*. Bread of the whole wheat, or of the unsifted meal. *House'hold bread*. Also, a cataplasm made of the same.

SYN'COPAL, *Syncopa'lis*, *Syncop'ticus*, *Syncop'tus*, (from *syncope*.) Relating or appertaining to syncope; as *Syn'copal Fe'ver*, *Fe'bris Syncopa'lis*. A pernicious intermittent, characterized by repeated attacks of syncope.

SYN'COPE, (συγκοπη, from συγκοπτω, (*syn*, and κοπτω, 'to fall,') 'I fall down.') *An'imi defec'tio* seu *deli'quium*, *Leipopsych'ia*, *Lipopsych'ia*, *Apsych'ia*, *Apsyx'ia*, *Lip'sis An'imi*, *Asphyx'ia*, *Apopsych'ia*, *Lipothym'ia*, *Leipothym'ia*, *Liposphyx'ia*, *Eclips'is*, *Sub'itus an'imi ca'sus*, *Anencephalohæ'mia*, *Ap'sychy*, *Swoon*, *Swoon'ing*, *Swalt'ing*, *Faint'ing*, *Faint'ing fit*, *Faint'ness*, *Exolu'tion*, (Sc.) *Drow*, *Dualm*, *Swarff*, *Swerf*, *Swarth*, (Prov.) *Fower*, *Sweb'bing*, *Sweem'ing*, *Swound'ing*, *Sound*, (F.) *Évanouissement*, *Défaillance*, *Pâmoison*. Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are all that will be required during the fit. See Asphyxia, and Suffocation.

An approach to this condition is termed *faintishness*; and the person is said to be *faint*; (old E. and Prov.) *Sweemish* or *Sweamish*.

SYNCOPE ANGENS, Angina pectoris — s. Anginosa, Angina pectoris.

SYNCOPTICUS, (συγκοπτικος,) Syncopal.

SYNCOPTUS, Syncopal.

SYNCRITICA, (from συγκρινω, 'to put together.') Condensantia.

SYNDACTYLUS, (*syn*, and δακτυλος, 'a finger,') Aschistodactylus.

SYNDESMI'TIS, see Ophthalmia. Also, inflammation of articular ligaments; *Inflamma'tio ligamento'rum*, (from *syndesmus*, 'ligament,' and *itis*.)

SYNDESMOG'RAPHY, *Syndesmograph'ia*, (*syndesmus*, and γραφη, 'a description.') A description of the ligaments. The part of anatomy which describes the ligaments.

SYNDESMOL'OGY, *Syndesmolog''ia*, (*syndesmus*, and λογος, 'a treatise, discourse.') A treatise on the ligaments.

SYNDES'MOPHARYNGE'US. A fasciculus of the constrictor pharyngis superior.

SYNDESMO'SIS, *Synneuro'sis*, *Synymen'sis*, *Connex'io* seu *Sym'physis ligamento'sa*, *Commissu'ra ner'vea*, *Connerva'tio*, *Colliga'tio*, (F.) *Synévrose*, (from *syndesmus*, and *osis*.) The articulation of two or more bones by means of ligament; as of the radius with the ulna.

SYNDESMOT'OMY, *Syndesmotom'ia*, (*syndesmus*, and τεμνω, 'I cut or dissect.') Dissection of the ligaments.

SYNDESMUS, (συνδεσμος,) Bandage, Ligament.

SYN'DROMĒ, (συνδρομη, from *syn*, and δρομος, 'a course,') *Concur'sus*, *Con'course*. A name given by the Empirical Sect to the union of symptoms which takes place in diseases: *Syn'dromē pletho'rica*, for example, meant the aggregate of symptoms produced by plethora.

SYNDYASMUS, (συνδυασμος, from *syn*, and δυο, 'two,') Coition.

SYNECHES, (συνεχης, 'continuous,') see Continued fever.

SYNECHI'A, (συνεχεια, from *syn*, and εχειν, 'to have,' or 'to hold.') Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia ante'rior*; the latter, *S. poste'rior*.

SYNENERGIA, Synergy.

SYNERGIA, Synergy.

SYNERGIE, Synergy.

SYN'ERGY, (συνεργεια,) *Synergi'a*, *Synenergi'a*, (F.) *Synergie*, (from *syn*, and εργον, 'work.') A correlation or concourse of action between different organs in health; and, according to some, in disease.

SYNESIS, (συνεσις,) Intellect.

SYNEUROSIS, (συννευρωσις, from *syn*, and νευρον, 'a sinew,') see Syndesmosis.

SYNEZI'SIS, *Synize'sis*, *Considen'tia*, (from *syn*, and ζευγνυειν, 'to join,' or from συνιζω, 'to sit down together;' from *syn*, and ιζω, 'to sit.') A falling together.

SYNEZISIS PUPILL'Æ, *Parop'sis Synizesis*, *Cali'go à Synize'si*, *Cali'go* seu *Imperfora'tio* seu *Phthi'sis pupil'læ*, *Clo'sure* or *occlu'sion* or *obliterа'tion of the Pupil*. This disease is sometimes a faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezizis are completely blind: the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. The operation is called the *operation for artificial pupil*.

SYNGENES, (συγγενης, from *syn*, and γενναω, 'to beget,') Hereditary.

SYNGENICUS, (συγγενικος,) Congenital.

SYNHYMENSIS, Synymensis.

SYNIMENSIS, Synymensis.

SYNIZESIS, Considentia, see Synezisis.

SYNNEUROSIS (συννευρωσις, from *syn*, νευρον, 'a tendon,' and *osis*,) Syndesmosis.

SYNNÉVROSE, Syndesmosis.

SYN'OCHA, (from συνεχω, (*syn*, and εχω, 'I

have or hold,') 'I continue.') *Inflam'matory* or *Dynam'ic Fe'ver, Angiop'yra, Sthenop'yra, Fe'bris causo'des* seu *caumato'des* seu *deli'rens* seu *ar'dens* seu *contin'ua sanguin'ea* seu *contin'ua non pu'tris* seu *acmas'tica* seu *acu'ta* seu *acu'ta sanguin'ea* seu *con'tinens* seu *continens non pu'trida* seu *angioten'ica* seu *sthen'ica* seu *sanguin'ea* seu *inflammato'ria, Homot'onos, Syn'ochus* (Vogel), *S. imput'ris* (Galen), *Enet'eia cau'ma* seu *ton'ica, Phlogop'yra, Cau'ma, Calentu'ra contin'ua* (F.) *Fièvre ardente* ou *continente inflammatoire* ou *sanguine* ou *irritative* ou *angioténique* ou *inflammatoire, Gastro-entérite intense; General inflammation.* A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine highcoloured; disturbance of mind slight. It requires, of course, the most active treatment.

Synocha Rheumatica, Rheumatism, acute—s. Vaccina, Vaccina.

SYN'OCHAL, *Synocha'lis.* Relating to, or having the characters of, synocha.

SYN'OCHUS, (συνοχος, 'continued,') *Enet'eia syn'ochus, Fe'bris lent'a,* (Linnæus). Continued fever, compounded of synocha and typhus: — in its commencement often resembling the former; in its progress, the latter: *Mix'ed fe'ver, Com'mon contin'ued fe'ver, Syn'ochoid fe'ver.* See Acmasticus, Continued fever, Fever, and Typhus.

Synochus, Synocha—s. Biliosa, Fever, gastric, Fever, bilious—s. Catarrhalis, Influenza—s. Icterodes, Fever, yellow — s. Imputris, Synocha — s. Miliaria, Miliary fever — s. Varicella, Varicella.

SYNOLCE, (συνολκη, from *syn,* and ελκω, 'to draw,') Spasm.

SYNOSTEOG'RAPHY, *Synosteogra'phia,* (*syn,* οστεον, 'a bone,' and γραφω, 'I describe.') The part of anatomy which describes the joints.

SYNOSTEOL'OGY, *Synosteolog''ia,* (*syn,* οστεον, 'a bone,' and λογος, 'a treatise.') A treatise on the joints.

SYNOSTEO'SIS, *Synosto'sis,* (*syn,* οστεον, 'a bone,' and *osis.*) Union by means of bone.

SYNOSTEOT'OMY, *Synosteotom'ia,* (*syn,* οστεον, 'a bone,' and τεμνειν, 'to cut.') Dissection of the joints.

SYNOSTOSIS, Synosteosis.

SYNOTE, (*syn,* and ους, ωτος, 'an ear.') A genus of double monster of Is. G. St. Hilaire, the second face of which is represented only by two ears close together, or a double median ear.

SYNO'VIA, (*syn,* and ωον, 'ovum, an egg,') *Mucila'go, Un'guen* seu *Unguen'tum* seu *Smeg'ma articula're, Axun'gia articula'ris, Mucila'go articulo'rum* seu *junctura'rum, Hu'mor articula'ris, Hydrar'thrus, Hu'mor* seu *Hu'midum nati'vum* seu *Glu'ten articulo'rum, Arthrohydri'nē,* (F.) *Synovie.* A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, albumen, soda, chloride of sodium, phosphate of lime, and—Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNO'VIAL, *Synovia'lis.* That which relates to the synovia.

Synovial Capsules, see Membrane.

Synovial Glands, *Hav'ers's Glands, Gland'ulæ articula'res* seu *Synovia'les* seu *Haversia'næ,* are the secretory fringes, which float in the interior of the synovial capsules (see Capsules.) They do not seem to be glandular. They have been called *Syno'vial fim'briæ,* (F.) *Franges synoviales.*

Synovial Membranes, see Membrane.

SYNOVI'TIS, (*Synovia,* and *itis.*) A term, badly compounded, applied at times to inflammation of the synovial membrane, *arthrophlogo'sis synovia'lis.* When it affects the bursæ, it is sometimes called *Bursi'tis.*

Synovitis Rheumatismalis, Rheumatism, (acute).

SYN'TASIS, (συντασις, from συντεινω, (*syn,* and τεινω, 'I stretch,') 'I strain.') Tension of parts: hence συντατικα, are medicines which render parts tense. *Syntex'is,* on the other hand, means *Colliqua'tio,* or wasting of the body; from συντηκω, 'I melt together.'

SYNTAXIS, (συνταξις, from *syn,* and ταασειν, 'to put in order,') Articulation, Reduction, Taxis—s. Serrata, see Suture.

SYNTECOPYRA, (*syntexis,* and πυρ, 'fever,') Hectic fever.

SYNTECTYCOPYRA, Hectic fever.

SYNTENO'SIS, (*syn,* τενων, 'a tendon,' and *osis.*) A species of articulation in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

SYNTERESIS, (συντηρησις, from *syn,* and τερειν, 'to keep,') Prophylaxis.

SYNTERETICUS, (συντηρητικος,) Prophylactic.

SYNTEXIS, (συντηξις,) Colliquation, Consumption, see Syntasis.

SYNTHENA. A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia aud tormina.

SYN'THESIS, (συνθεσις,) *Reu'nio,* 'composition or putting together,' (from *syn,* and τιθημι, 'I place.') A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other. *Reu'nio par'tium separata'rum, Syn'thesis of contin'uity,* means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Synthesis of contigu'ity* is the reduction of displaced organs; as in cases of hernia und luxations.

Synthesis, Composition.

SYNTHETISM'US. The aggregate of operations and means for reducing a fracture, and maintaining it reduced: — comprising extension, counterextension, coaptation, and bandaging.

SYNTONIN, (*syn,* and τονος, 'a muscle,') see Fibrin.

SYNTRIMMA, gen. *Syntrimm'atis,* (συντριμμα, from *syn,* and τριβω, 'to rub,') Contritio.

SYNTRIPSIS, (συντριψις,) Contritio.

SYNTROPHUS, (συντροφος, from *syn,* and τρεφω, 'to nourish,') Connutritus.

SYNULOSIS, (συνουλωσις, from *syn,* ουλοω, 'to cicatrize,' and *osis,*) Cicatrization.

SYNULOTICA, (συνουλωτικα,) Cicatrisantia.

SYNUSIA, (συνουσια,) Coition.

SYNYMEN'SIS, *Synhymen'sis, Synimen'sis,* (*syn,* and υμην, 'a membrane.') Union of bones by membrane, as in the case of the bones of the head in the fœtus. Syndesmosis.

SYPHAC, Peritoneum.

SYPH'ILIDES, (F.) *Syphilides, Dermo-syphilides, Dermatosies véroleuses.* (From *syphilis.*) The cutaneous eruptions that appertain to constitutional syphilis are so denominated by the French writers.

SYPHILIDIA'TER, *Syphilidia'trus,* (*syphilis,* and ιατρος, 'a physician.') A pox doctor. One who occupies himself in treating syphilis.

SYPHILIDOGRAPHY, Syphilography.

SYPHILIDOLOGY, Syphilology.

SYPHILIDOMANIA, Syphilomania.

SYPHILIPHO'BIA, (*syphilis,* and φοβος, 'dread.') A morbid dread of syphilis, giving rise to fancied symptoms of the disease; a form of hypochondriasis.

SYPH'ILIS, gen. *Syphil'idis, S. vene'rea* seu *malig'na, Siphilis, Syphilis'mus, Cachex'ia Cacochym'ia Vene'rea, Ma'lum vene'reum, Pudendagra, Me'vium, Lu'es, L. vene'rea* seu *syphilis, Mor'bus Gal'licus* seu *Ital'icus* seu *Hispan'icus* seu *Neapolita'nus* seu *In'dicus* seu *aphrodis'ius,*

Patur'sa, Basilis'cus, Bo'æ, Sod'oma Gallo'rum; Vene'real, Vene'real Disease', Pox, French Pox, French Crust, French Distem'per, Foul Disease, old cant term *Grin'comes,* (Prov.) *Pip,* (Sc.) *Glengore, Glengour, Grandgore,* (F.) *Vérole* ou *Grosse Vérole, Maladie vénérienne, Mal de Naples, Mal Français, Maladie de Vénus.* (The etymology of syphilis is unknown. Some consider it to proceed from συς, 'a hog,' and φιλεω, 'I love;' others, from συν, 'with,' and φιλεω, 'I love;' and others, with more probability, from σφλος,—formed, by contraction, from σπαλος,—'a reproach,' &c.) It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a *primary* symptom, and there are other symptoms which are *secondary* or *constitutional.* These are: —ulcers in the throat; coppercoloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed *tertiary* phenomena. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century [?]. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisyphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sore throat, and other recent constitutionnl symptoms, eight or ten weeks may be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and tonics and eutrophics have been administered. The preparations of iodine have been much used in the revellent treatment of this disease.

Syphilis Indica, Framboesia.

Syphilis Pseudosyph'ilis, *Lu'es Syphiloï'des, Pseudosyphilis.* A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. *Sivvens, Radesyge,* &c., have been referred to this head.

Syphilis, Secondary, see Syphilis — s. Tertiary, see Syphilis.

SYPHILISATION, Syphilization.

SYPHILISMUS, Syphilis.

SYPHILIT'IC, *Syphilit'icus,* (F.) *Syphilitique, Vérolique, Vérolé.* Belonging, or relating to, or affected with, syphilis; (F.) *Syphilisé.*

SYPHILIZA'TION, *Syphilisa'tio,* (F.) *Syphilisation.* Saturation of the system by inoculation with the matter of syphilis. It has been used as a curative procedure in syphilis, as well as a preventive of that disease; and for the cure of other cachexiæ, as cancer.

SYPHILODERM'A, gen. *Syphiloderm'atis,* (*syphilis,* and δερμα, 'skin.') A cutaneous eruption of a syphilitic character.

SYPHILOG''ENY, *Syphilogen'ia,* (*syphilis,* and γενναω, 'to generate.') The origin or generation of syphilis.

SYPHILOG'RAPHER, (*syphilis,* and γραφω, 'I describe.') A writer on syphilis.

SYPHILOG'RAPHY, *Syphilograph'ia, Syphilidog'raphy, Syphilidograph'ia,* (*syphilis,* and γραφω, 'to describe.') A description of syphilis.

SYPH'ILOID, *Syphiloï'des,* (*syphilis,* and ειδος, 'resemblance.') Resembling syphilis, — as 'a *syphiloid* affection.'

SYPHILOL'OGY, *Syphilolog''ia, Syphilodol'ogy, Syphilodolog''ia,* (*syphilis,* and λογος, 'a discourse.') The doctrine of syphilis and its management. A treatise on syphilis.

SYPHILO'MA, (*syphilis,* and *oma.*) A term given by Wagner to what he regards as a specific syphilitic new formation, having a definite structure of cells and nuclei; like as there is a specific carcinomatous new formation in cancer.

SYPHILOMA'NIA, *Syphilidoma'nia,* — vulgarly, *Nod'dle Pox.* A mania, with which some persons are affected, so that they subject themselves to antivenereal treatment, under the erroneous impression that they are affected with syphilis.

SYPHITA, Somnambulism.

SYPHON, see Siphon.

SYRIGMOPHO'NIA, (συριγμος, 'piping,' and φωνη, 'voice.') A piping state of the voice.

SYRIGMUS, (συριγμος,) Tinnitus aurium.

SYRINGA, (from *syrinx,*) Eustachian Tube. Fistula, Syringe, Trachea—s. Clysmatica, Syringe (clyster.)

Syrin'ga Vulga'ris, *Li'lac vulga'ris, Com'mon Li'lac. Ord.* Oleaceæ. The leaves and fruit are bitter and somewhat acrid, and have been used as tonics and antiperiodics.

SYR'INGE, *Syr'inx, Syrin'ga, Si'pho, Siphun'culus, Squirt,* (F.) *Seringne,* (from συριγξ, gen. συριγγος, 'a pipe.') A familiar apparatus through which any liquor is injected.

Various forms of syringe are used in medicine and surgery.

Syringe, Clys'ter, *Syrin'ga clysmat'ica, Clysantli'um,* (F.) *Clysopompe.* A syringe for administering clysters.

Syringe, Cupping, Antlia sanguisuga.

SYRINGES AËRIFERI, 'air tubes,' see Bronchia.

SYRINGICUS, (from *syrinx,*) Fistulous.

SYRINGI'TIS EUSTA'CHII, (*syringa,* and *itis,*) Inflammation of the Eustachian tube.

SYRINGMUS, (συριγμος,) Tinnitus aurium.

SYRINGODES, (συριγγωδης,) Fistulous.

SYRINGOTOME, Syringot'omus, Syringot'omum, (*syrinx,* 'fistula,' and τεμνειν, 'to cut.') A surgical instrument, formerly used in the operation for *fistula in ano.* It is a bistouri, concave at is edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts.

SYRINGOT'OMY, *Syringotom'ia.* The operation for fistula in ano by incision.

SYRINX, gen. *Syring''is,* (συριγξ, gen. συριγγος,) Eustachian tube, Fistula, Syringe, Trachea — s. Hiera, Vertebral column.

SYRMAIS'MUS, (from συρμαιζω, 'I evacuate.') A gentle evacuation by vomiting or stool.

SYROP, Syrup — *s. d'Ail,* Syrupus allii — *s. d'Armoise composé,* Syrupus aromaticus — *s. de Capillaire,* see Adiantum Capillus veneris — *s. de Chicorée composé,* Syrupus de cichorio compositus — *s. des Cinq racines,* Syrupus e quinque radicibus — *s. de Coquelicot,* Syrupus rhœados — *s. de Coralline,* see Corallina Corsicana — *s. de Cuisinier,* Syrupus de sarsaparillâ et sennâ compositus — *s. d'Éther,* Syrupus cum æthere sulphurico paratus — *s. de Gingembre,* Syrupus zingiberis — *s. de Guimauve,* Syrupus althææ — *s. de Longue vie,* Mellitum de mercuriali compositum — *s. de Mercure,* Syrupus de mercurio mediante gummi — *s. de Mou de veau,* see Syrupus zingiberis — *s. de Mûres,* Syrupus mori — *s. de Nerprun,* Syrupus rhamni — *s. de Pavots blancs,* Syrupus papaveris — *s. de Pommes composé,* see Syrupus sennæ — *s.*

de Quinquina avec le Vin, Syrupus de kinâ kinâ cum vino—*s. de Roses pâles*, Syrupus rosæ—*s. de Roses rouges*, Syrupus rosæ—*s. Simple*, Mel despumatum—*s. Végétal de Velno*, Syrup, vegetable, of Velno—*s. de Vinaigre*, S. aceti.

SYR'UP, *Sir'up*, *Syru'pus* or *Syr'upus Serapi'um*, *Seraṗe'um*, (F.) *Syrop*, *Sirop*, *Saccharolé liquide*, *Saccharhydrolé*, (derived, according to some, from *σύρω*. 'I draw,' and *οπος*, 'juice;' but more probably, from the Arabic *Sirup*, *Sirab*, or *Scharab*, which signifies 'a potion.') A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it was directed, that syrups, whose density is not precisely determined by the process, should have the s. g. 1·261 when boiling, and about 1·319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See Syrupus simplex.

Syrup of Almonds, Syrupus amygdalæ.

Syrup, Antiscorbutic, Syrupus antiscorbuticus—s. Balsamic, Syrupus tolutanus.

Syrup of Blackberry Root, Syrupus Rubi—s. of Buckthorn, Syrupus rhamni—s. of Calf's lungs, see Syrupus zingiberis—s. of Capillaire, common, Syrupus simplex—s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino—s. of Cinchonia, Syrupus cinchoniæ—s. Citric acid, Syrupus acidi citrici—s. of Clove July flower, Syrupus caryophylli rubri—s. of Clove pinks, Syrupus caryophylli rubri—s. of Cochineal, Syrupus cocci—s. of Emetine, Syrupus emetinæ—s. of Ether, Syrupus cum æthere sulphurico paratus—s. of Five roots, Syrupus e quinque radicibus—s. of Garlic, Syrupus allii—s. of Ginger, Syrupus zingiberis—s. of Gum Arabic, Syrupus acaciæ.

Syrup, Hive, Syrupus scillæ compositus.

Syrup of Honey, Mellitum simplex—s. of Iodide of iron, Liquor Ferri iodidi—s. of Ipecacuanha, Syrupus ipecacuanhæ—s. of Jalap, Syrupus jalapæ—s. of Lactucarium, Syrupus Lactucarii—s. of Lemon, Syrupus limonis—s. of Marshmallow, Syrupus althææ—s. of Meadow saffron, Syrupus colchici autumnalis—s. of acetate of Morphia, Syrupus morphiæ acetatis—s. of muriate of Morphia, Syrupus morphiæ muriatis—s. of Mugwort, compound, Syrupus aromaticus—s. of Mulberries, Syrupus mori—s. of Orange flower, Syrupus Aurantii florum—s. of Orange juice, see Syrupus aurantii—s. of Orange peel, Syrupus aurantii—s. of Orgeat, Syrupus amygdalæ—s. of Phosphate of iron, see Ferri phosphas—s. of Poppies, Syrupus papaveris—s. of Poppy, red, Syrupus rhœados—s. of Quinia, Syrupus quiniæ—s. of Rhatany, Syrupus krameriæ—s. of Rhubarb, Syrupus rhei—s. of Rhubarb, aromatic, Syrupus rhei aromaticus—s. of Rhubarb, spiced, Syrupus rhei aromaticus—s. of Roses, Syrupus rosæ—s. of Roses, red, Syrupus rosæ gallicæ—s. of Saffron, Syrupus croci—s. of Sarsaparilla, Syrupus sarsaparillæ—s. of Sarsaparilla and senna, compound, Syrupus de sarsaparillâ et sennâ compositus—s. of Sarsaparilla, compound, see Syrupus de sarsaparillâ et sennâ compositus—s. of Sarsaparilla, Indian, Syrupus hemidesmi—s. of Scammony, Syrupus de scammonio—s. of Seneka, Syrupus senegæ—s. of Senna, Syrupus sennæ—s. Simple, Syrupus simplex—s. of Squill, Syrupus scillæ—s. of Squill, compound, Syrupus scillæ compositus—s. of Succory, compound, Syrupus de cichorio compositus—s. of Tolu, Syrupus tolutanus.

Syrup, Vegetable, of Velno, (F.) *Sirop végétal de Velno*. (Made of roots of *burdock* and *dandelion*, leaves of *spearmint*, *senna*, *coriander*, *liquorice*, *sugar*, and *water*.) It has been prescribed as a eutrophic, especially in syphilis; but, like the syrups of sarsaparilla, is, perhaps, mainly indebted for its efficacy to the sugar. The corrosive chloride of mercury is often added to it.

Syrup of Vinegar, Syrupus aceti—s. of Violets, Syrupus violæ—s. of Wild cherry bark, Syrupus Pruni Virginianæ.

SYRUPUS, S. simplex.

Syru'pus Aca'clæ, *Syr'up of Gum Ar'abic*, (*Acaciæ*, ℥ij, *Sacchar.* ℥xiv, *Aq.* f℥viij. Dissolve the gum in the water; add the sugar, and strain. Ph. U. S.) A good pectoral syrup. Dose, f℥j to f℥iij.

Syrupus Ace'ti, *S. Ac''idi Aceto'si*, *Syr'up of Vin'egar*, (F.) *Syrop de Vinaigre*. (*Aceti*, Oiiss, *Sacch. purif.* ℔iiiss. Boil to form a syrup. *Ph. E.*) It is refrigerant and antiseptic. Dose, f℥j to f℥ij.

Syrupus Acidi Acetosi, S. aceti.

Syrupus Ac''idi Cit'rici, *Syr'up of Cit'ric Ac''id*. (*Acid. citric.* pulv. ℥ij; *Ol. Limon.* ♏iv; *Syrup.* Oij. Rub the acid and oil with an ounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S.) Virtues the same as those of the Syrupus Limonis.

Syrupus cum Æ'there Sulphu'rico Para'tus, *Syr'up of E'ther*, (F.) *Syrup d'éther*. (Very *Pure sugar*, 1000 p.; *Distilled water*, 500 p.; dissolve in the cold, and strain; add *Sulphuric ether*, 48 p. Shake for five or six days, and draw off the limpid syrup. *Ph. L.*) Properties like those of ether.

Syrupus Al'lii, *Syrup of Gar'lic*, (F.) *Syrop d'ail*. (*Allii* recent. concis. ℥vj, *Acet. destillat*, Oj, *Sacchar.* ℔ij. Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) *Use*, same as that of garlic. Dose, f℥j to f℥iv.

Syrupus Althæ'æ, *S. ex Althæ'â* seu *de Althæâ* seu *Althæ'æ officina'lis*, *Syr'up of Marsh'mallow*, (F.) *Syrop de Guimauve*. (*Althææ rad. recent.* cont. ℔ss, *Sacch. pur.* ℔ij, *Aquæ*, Oiv. Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. *Ph. L.*) Emollient and demulcent. Dose, f℥j to f℥iij.

Syrupus Amomi Zingiberis, S. zingiberis.

Syrupus Amyg'dalæ, *Syrup of Al'monds*, *S. of Or'geat*, *Or'geat*. (*Amygdal. dulc.* ℔j, *Amygdal. amar.* ℥iv, *Aquæ*, Oiij, *Sacchar.* ℔vj. Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluidounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles, which must be well stopped, and kept in a cool place. Ph. U. S.) Demulcent.

Syrupus Anticausoticus, see Anticausodic.

Syrupus Antiscorbu'ticus, *S. de Armora'cîâ compos'itus*, *Antiscorbu'tic Syr'up*. (*Leaves of Cochlearia*, *Buckbean*, *Water-cresses*, *Horse-radish root* and *Bitter oranges*, each ℔j, *Cinnamon*, ℥iss. Cut, and pour on *White wine*, ℔iv. Macerate for two days; distil over Oj in a sand-bath; add to this *Sugar*, ℔ij, and form a syrup. Again, take what remains in the cucurbit: pass it through cloth; let it rest; decant, and add *Sugar*, ℔ij; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. *Ph. P.*) Antiscorbutic, alterative, tonic, stomachic, &c. Dose, f℥ij to f℥ij.

Syrupus de Armoraciâ Compositus, S. antiscorbuticus.

Syrupus Aromat'icus, *S. de Artemis'iâ compos'itus, Com'pound Syr'up of Mug'wort*, (F.) *Syrup d'armoise composé. (Tops of artemisia vulgaris*, in flower, ℥vj, *Inula root, Ligusticum levisticum*, and *Fennel*, each, ℥ss, *Pennyroyal, Catmint, Savine leaves*, each ℥vj, *Marjoram, Hyssop, Pyrethrum, Rue, Basil*, each ℥iij, *Aniseed* and *Cinnamon*, each ℥ix; bruise and macerate in *Hydromel*, ℔xviij; distil over Oss; add to this a pound of *sugar*. Again, take the liquid that remains in the cucurbit, strain it gently; and add *Sugar*, ℔iv. Then mix the two. *Ph. P.*) Tonic, emmenagogue, &c.

Syrupus de Artemisiâ Compositus, S. antiscorbuticus—s. Asparagi, see Asparagus.

Syrupus Auran'tii, *S. Aurantio'rum* seu *Ci'tri Auran'tii* seu *Cor'ticis Auran'tii* seu *Auran'tii Cor'ticis* (Ph. U. S.) seu *e Cortic''ibus Aurantio'rum* seu *de Cor'ticĕ Aurantio'rum, Syr'up of Or'ange peel. (Aurant. cort.* cont. ℥ij, *Aq. ferv.* Oj, *Sacch.* ℔ijss. Macerate the peel in the water for twelve hours. Add the sugar. Ph. U. S. A modified form is in Ph. U. S. 1863.) In the British Pharmacopœia, (1864,) it is made by mixing *Tincture of orange peel*, f℥j with *Syrup*, f℥vij. Stomachic. Dose, f℥j to f℥ij.

A Syrup of Or'ange Juice, Or'ange Sherbet', Syrupus e suc'co Aurantio'rum, may be made by adding *white sugar*, ℔ij to ℔j of the juice of oranges, strained and clarified.

Syrupus Auran'tii Flo'rum, *Syrup of Orange Flowers, S. Aurantii Flo'ris* (Ph. B. 1864). (*Aq. Aurant. flor.* f℥v; *Sacchar.* ℥xxxvj; *Aq. destillat.* f℥xv. Dissolve the sugar in the water and raise to the boiling point. When cold, mix with the orange flower water, and strain. Ph. U. S. 1863.)

Syrupus Balsamicus, S. tolutanus.

Syrupus Caryophyl'li Ru'bri, *S. Infusio'nis flo'rum caryophyllo'rum, S. Dian'thi Caryophyll'i, Syr'up of Clove July flower* or *of Clove Pinks.* (*Petalorum dianth., Caryoph. recent.*, unguibus resectis, ℔j, *Aquæ bull.* Oiv, *Sacch. purif.* ℔vij. *Ph. E.*) Aromatic.

Syrupus Cassiæ Sennæ, S. sennæ.

Syrupus de Cicho'rio Compos'itus, *S. de Rhe'o, Com'pound Syr'up of Suc'cory*, (F.) *Syrup de chicorée composé. (Root of succory*, ℥vj, *Leaves of succory*, ℥ix, *Leaves of fumitory* and *scolopendrium*, each ℥iij, *Alkekengi berries*, ℥ij. Boil in *Water* Oxiv to Oxij: pass through cloth, and dissolve in it *White sugar*, ℔v. Boil till it has the consistence of syrup. Again, take *Water*, Oviij, *Rhubarb*, ℥vj, *Yellow sanders* and *Cinnamon*, each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. *Ph. P.*) It is laxative and stomachic. Dose, f℥j to f℥ss.

Syrupus Cinchonæ cum Vino, S. de kinâ kinâ cum vino.

Syrupus Cincho'niæ, *Syr'up of Cincho'nia. (Simple syrup*, one pound; *Sulphate of cinchonia*, nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

Syrupus Citri Aurantii, S. aurantii—s. Citri medicæ, S. Limonum.

Syrupus Coc'ci, *Syrup of Cochineal'. (Cocc.* cont. ℈iv, *Aq. destillat. bullient.* Oj (Imp. meas.), *Sacchar.* ℔iij, vel q. s. *Sp. rectificat.* f℥iiss, vel q. s. *Ph. L.*) Chiefly used as a colouring agent.

Syrupus Col'chici Autumna'lis, *S. Colchici, Syr'up of Mead'ow Saf'fron. (Rad. colch. autumn. recent.* ℥j, *Acidi acetosi*, f℥xvi, *Sacch. pur.* ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain with gentle expression. To the strained fluid add the sugar, and boil to a syrup. *Ph. E.*) Diuretic, antiarthritic. Dose, f℥j to f℥ss, or more.

Syrupus Corticis Aurantii, S. aurantii—s. e Succo citronum, S. limonum.

Syrupus Cro'ci, *Syrup of Saf'fron. (Croci stigmat.* ℥j, *Aquæ fervent.* Oj, *Sacch. purif.* ℔iiss. *Ph. L.*) Cardiac. Chiefly used for colouring.

Syrupus Diacodion, Diacodium — s. Dianthi caryophylli, S. caryophylli rubri.

Syrupus Emeti'næ, *Syrup of Em'etine. (Simple syrup*, ℔j, *Emetine*, 16 gr.) In small doses, expectorant; and in large, emetic.

Syrupus Empyreumaticus, Melasses—s. Ferri iodidi, Liquor Ferri iodidi — s. Ferri phosphatis, see Ferri phosphas—s. Fuscus, Melasses.

Syrupus Hemides'mi, *Syrup of Ind'ian Sarsaparilla. (Hemidesm.* cont. ℥iv (avoirdup.), *Aq. destillat. bullient.* Oj (Imp. meas.), *Sacchar.* q. s. *Ph. D.*) A weak preparation of hemidesmus.

Syrupus Hydrargyri, Syrupus de mercurio mediante gummi — s. Infusionis florum caryophyllorum, Syrupus caryophylli rubri.

Syrupus Ipecacuan'hæ, *Syrup of Ipecacuan'ha. (Ipecac.* in pulv. crass. ℥j, *Alcohol. dilut.* Oj, *Sacchar.* ℔iiss, *Aquæ*, q. s. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to 6 fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence. In the Ph. U. S. 1863, it is directed to be made by mixing *Ext. Ipecac. fluid.* f℥ij with *Syrup*, f℥xxx.) It may also be made by displacement.

Syrupus de Jalap'â, *Syr'up of Jal'ap. (Pulv. Jalapæ*, ℥x, *Sem. coriandr., Fœnicul. dulc.* āā ℥ss; *Aquæ*, f℥xijss, *Sacch.* ℥xxv. *Ph. P.* Cathartic. Dose, f℥ij to f℥ss. for children.

Syrupus de Ki'nâ Ki'nâ cum Vi'no, *S. Cincho'næ cum vi'no, Syr'up of Cincho'na with wine*, (F.) *Syrop de quinquina avec le vin. (Cort. cinchonæ officinalis*, ℥ij, *Ext. cinchonæ*, ℥vj, *Vini albi* (*Vin. Lunel.* seu *cujusvis ei similis,*) Oj, *Alcohol* (s. g. ·985 to ·915.) f℥j, *Sacchar. alb.* ℔iss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. *Ph. P.*) Dose, f℥ss to f℥j.

Syrupus Krame'riæ, *Syrup of Rhat'any. (Ext. Kramer.* ℥ij, *Aquæ*, Oj, *Sacchar.* ℔ijss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. Ph. U. S. It may also be made by displacement from *Kramer.* in pulv. crass. ℔j, *Sacchar.* ℔iiss, *Aq.* q. s.) An adjunct to astringent mixtures; or given in diarrhœa, a teaspoonful to a child.

Syrupus Lactuca'rii, *Syr'up of Lactuca'rium. (Lactuc.* ℥j, *Syrup*, f℥xiv; *Alcohol. dil.* q. s. Rub the lactucarium with enough of diluted alcohol to give a syrupy consistence. Pass half a pint of tincture by percolation; evaporate, at a heat not above 160°, to f℥ij; mix with the syrup previously heated, and strain while hot. Ph. U. S. 1863.) Anodyne: but not of much efficacy.

Syrupus Limonis, S. Limonum—s. Succi limonis, S. Limonum.

Syrupus Limo'num, *S. Limo'nis*, (Ph. U. S.) seu *citri med'icæ* seu *e suc'co citro'num* seu *e suc'co limo'num* seu *suc'ci limo'nis, Syrup of Lem'on, Lemon Syrup. (Limon. succ.* colat. Oj, *Sacchar.* ℔iv, *Aq.* Oj.) Cooling and agreeable.

Syrupus e Meconio, S. papaveris—s. de Melle, Mellitum simplex.

Syrupus Mercu'rio Median'tē Gum'mi, *S. Hydrar'gyri, Mercu'rius gummo'sus Plenck'ii*, (F.) *Syrop de mercure, Mercure gommeux de Plenck. (Hydrargyri pur.* ℥j, *Gum. acaciæ*, ℥iij, *Syrup diacod.* ℥ss. Rub together till the mercury is extinguished. *Ph. P.*) Possesses the properties of blue pill. Dose, gr. ij to viij, or more.

Syrupus Mo'ri, *S. e suc'co moro'rum* seu *suc'ci mo'ri, Syr'up of Mul'berries*, (F.) *Syrop de mûres. (Mori succ.* colat. Oj, *Sacchar. purif.* ℔ij. *Ph. L.*) Gratefully refrigerant.

Syrupus e Succo Mororum, S. mori.

Syrupus Morph'iæ Aceta'tis, *Syrup of ac"etate of mor'phia.* (*Liq. morphiæ acet.* f℥j, *Syrup,* f℥xv. *Ph. D.*) Dose, f℥ss to f℥j, as an opiate.

Syrupus Morph'iæ Muria'tis, *Syr'up of mu'riate of mor'phia.* (*Liq. morph. muriat.* f℥j; *Syrup,* f℥xvij. M. *Ph. D.*) Dose, f℥ss to f℥j, as an opiate.

Syrupus Morphiæ Sulpha'tis may be made in the same way.

Syrupus Niger, Melasses.

Syrupus Papav'eris, *S. papaveris somnif'eri* seu *papaveris al'bi* seu *e meco'nio* seu *de meconio, Diaco'dium, Syr'up of pop'pies,* (F.) *Syrop de pavots blancs* ou *Diacode.* (*Papav. capsul.* exsiccat. et contus. exemptis seminibus, ℥xiv, *Sacch. pur.* ℔ij, *Aq. fervent.* cong. ijss. Macerate the capsules in water for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as to form a syrup. *Ph. L.*) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a Syrupus Opii, called *Common Syrup of Poppies,* which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties those of opium and syrup.

Syrupus de Papavere Erratico, S. rhœados —s. de Pomis compositus, see S. sennæ — s. Proteæ, see Protea mellifera.

Syrupus Pru'ni Virginia'næ, Syrup of *Wild cherry bark.* (*Pruni Virginian.* in pulv. crass. ℥v, *Sacchar.* xxviij, *Aquæ,* q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. Ph. U. S.) Dose, as a demulcent expectorant, f℥j to f℥iij.

Syrupus e Pulmonibus Vitulinis, see Syrupus Zingiberis.

Syrupus Qui'niæ, *Syrup of Qui'nia.* (*Simple syrup,* 2 pints, *Sulphate of quinia,* 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

Syrupus e Quin'quē Radi'cibus, *Syr'up of five roots,* (F.) *Syrop des cinq racines.* (*Rad. Apii, Fœniculi, Apii petroselini,* āā ℥v. Infuse for 24 hours in boiling water, Oiiss, and strain. *Rad. asparag., Rusci aculeati,* āā ℥v, *Aquæ,* Ovij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add *White sugar,* ℔vj. *Ph. P.*) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f℥ss to f℥j, or more.

Syrupus Rham'ni, *S. Rhamni cathar'tici* seu *de Spinâ cervi'nâ* seu *spi'næ cervi'næ, Syr'up of Buck'thorn,* (F.) *Syrop de nerprun.* (*Rhamn. baccar.* succ. recent. Oiv, *Zingib. rad.* concis., *Pimentæ bacc.* contrit., āā ℥ss, *Sacch. purif.* ℔iiiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours, and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. *Ph. L.*) Cathartic, but apt to gripe. Dose, f℥iv to f℥ij.

A factitious syrup has been made of aloes, dissolved in simple syrup.

Syrupus Rhe'i, *Syr'up of Rhu'barb.* (*Rhei,* in pulv. crass., ℥ij; *Alcohol,* Oss; *Aquæ,* Oiss; *Sacchar.* ℔ij. Mix the alcohol and water; pour f℥iv on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolator, and gradually pour on the alcohol and water. By means of a water-bath, evaporate to f℥xiij; add the sugar, and make a syrup. Ph. U. S. 1851.) In the Ph. U. S. for 1863, it is made by mixing *Ext. Rhei fluid.* f℥iij with *Syrup,* f℥xxix. Dose to a child, as a laxative, one or two teaspoonfuls.

Syrupus Rhei Aromat'icus, *Aromat'ic* or *Spi'ced Syr'up of Rhu'barb.* (*Rhei* cont. ℥iiss; *Caryophyl.* cont., *Cinnam.* cont. āā ℥ss; *Myrist.* cont. ℥ij; *Alcohol. dilut.* Oij; *Syrup.* Ovj. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water-bath, evaporate the liquor to a pint, and while still hot, mix with the syrup previously heated. Ph. U. S.) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, f℥j; to an adult, f℥j.

Syrupus de Rheo, Syrupus de Cichorio compositus.

Syrupus Rhœ'ados, *S. de papav'erē errat'ico* seu *papaveris erratici, Syr'up of Red Pop'py,* (F.) *Syrop de coquelicot.* (*Rhœad. petal.* recent. ℔j, *Aq. fervent.* f℥xviij, *Sacch. purif.* ℔iiss. To the water, heated in a water-bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate, and add sugar to form a syrup. *Ph. L.*) Chiefly used to give colour.

Syrupus Ro'sæ, *S. rosa'rum soluti'vus* seu *e ro'sis sic'cis* seu *ro'sæ centifo'liæ* seu *rosa'ceus soluti'vus, Syr'up of Ro'ses,* (F.) *Syrop de roses pâles.* (*Rosæ. centif. petal.* exsicc. ℥vij, *Sacch. purif.* ℔vj, *Aq. fervent.* Oiv. Macerate the petals for 12 hours. Evaporate the strained liquor to ℔iiss. Add the sugar. *Ph. L.*) Gently laxative. Dose, f℥ij to f℥iss, or more.

Syrupus Rosæ Gal'licæ, *Syr'up of Red Ro'ses,* (F.) *Syrop de roses rouges.* (*Rosæ Gallic. petal.* exsicc. ℥vij, *Aquæ bull.* Ov, *Sacch. purif.* ℔vj; prepared like the last. *Ph. E.*) In the Ph. U. S. for 1863, it is directed to be made by moistening *red rose,* in powder, with *diluted alcohol,* and, in a percolator, pouring on diluted alcohol until a certain portion of the tincture has passed; evaporating this to a certain point, and adding *water;* then, having added the sugar, dissolving it with a gentle heat. Mildly astringent. Added to stomachic infusions.

Syrupus Ru'bi, *Syrup of Blackberry Root.* (*Rubi,* in pulv. ℥viij, *Syrup.* Oiss, *Alcohol. dilut.* q. s. Moisten the powder with f℥iv of the alcohol; and, in a percolator, pour on the alcohol until a pint and a half of the tincture has passed. Evaporate this to half a pint, and mix, while hot, with the syrup previously heated, and strain. Ph. U. S., 1863.) Gently astringent, and used as an addition to prescriptions for diarrhœa of children.

Syrupus Sacchari, S. Simplex.

Syrupus Sarsæ, S. Sarsaparillæ.

Syrupus Sarsaparil'læ, *S. Sar'sæ, S. Sar'zæ, Syr'up of Sarsaparil'la.* (*Rad. Sarsap.* cont. ℔j, *Aquæ bullient.* cong., *Sacch. purif.* ℔j. Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. *Ph. L.*) Used in the same cases as the root. Dose, f℥j to f℥iv, and more.

Syrupus de Sarsaparil'lâ et Sen'nâ Compos'itus, *Com'pound Syr'up of Sarsaparil'la and Sen'na,* (F.) *Syrop de Cuisinier.* (*Rad. Sarsap.* concis. ℔ij. Infuse for 24 hours in *Warm water* Oxij; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with *Flowers of borage, White roses, Senna leaves,* and *Aniseed,* each ℥ij; reduce to half; pass, and add *Honey* ℔ij. Boil to a syrup. *Ph. P.*) It is considered to be alterant, depurative, and sudorific. Dose, f℥ss to f℥ij. Corrosive chloride of mercury is sometimes added to it.

A similar syrup, under the name Syrupus Sarsaparil'læ Compos'itus, *Com'pound Syr'up of Sarsaparil'la,* is directed in the Pharmacopœia

of the United States. (*Sarsaparill.* cont. ℔ij; *Lign. guaiac.* rasur. ℥iij; *Rosæ centifol., Semnæ, Glycyrrhiz.* cont. āā ℥ij; *Ol. Sassafras, Ol. Anisi.* āā ♏v; *Ol. Gaultheriæ* m. ij; *Alcohol. dilut.* Ox; *Sacchar.* ℔viij. Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter; add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. Ph. U. S.)

It may also be made by the process of displacement.

Syrupus Sarzæ, S. Sarsaparillæ.

Syrupus de Scammo'nio, *Syr'up of Scam'mony, 'Pulv. Scammon.* ℥ss, *Sacch. alb.* ℥iv, *Alcohol.* s. g. ·985 to ·915) f℥viij. Heat the mixture moderately: then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add *Syrup of Violets,* f℥iv. *Ph. P.*) ℥j contains 18 grains of scammony. Cathartic. Dose, f℥j to f℥ss.

Syrupus Scil'læ, *S. scillit'icus* seu *scil'læ marit'imæ, Syr'up of Squills.* (*Acet. scillæ.* Oj, *Sacch.* ℔ij. Ph. U. S.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

Syrupus Scil'læ Compos'itus, *Mel Scil'læ Compos'itum, Com'pound Hon'ey of Squill, Com'pound Syr'up of Squill, Hive Syrup.* (*Scillæ* cont.: *Senegæ* cont. āā ℥iv; *Antim. et Potassæ Tart.* gr. xlviij; *Aquæ* Oiv; *Sacchar.* ℔iiiss. Pour the water upon the squills and seneka, and, having boiled to one-half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassa. It may also be made by the process of displacement. Ph. U. S.)

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

Syrupus Sen'egæ, *Syrup of Sen'eka.* (*Senegæ* cont. ℥iv; *Aquæ* Oj; *Sacchar.* ℔j. Boil the water with the seneka to one half, and strain; then add the sugar, and form into syrup. Ph. U. S.)

It may also be formed by the process of displacement.

This is a favourite stimulant expectorant with many practitioners. Dose, f℥j or f℥ij.

Syrupus Sen'næ, *S. cas'siæ sen'næ, Syr'up of Sen'na.* (*Sennæ* ℥ij, *Sem. fœnicul.* cont. ℥j, *Sacch. pur.* ℥xv, *Aquæ bullient.* Oj. Macerate the senna leaves and fennel-seeds with a gentle heat for an hour. Strain: add the sugar, and make into a syrup. Ph. U. S.) Cathartic. Dose, f℥ij to f℥iss or more.

The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de po'mis compos'itus,* (F.) *Syrop de pommes composé.* It contains, also, borage, bugloss, &c. Dose, f℥ss to f℥ij.

Syrupus Sim'plex, *Syr'pus* (Ph. U. S.), *S. Sac'chari, Sac'charum clarifica'tum, Liqua'rium, Sim'ple Syr'up, Syr'up, Com'mon syrup of capillaire.* (*Sacch. purif.* ℔iiss, *Aquæ* Oj. Dissolve the sugar: set aside for 24 hours; remove the scum, and pour off the clear liquid. A modified form is given in the Ph. U. S. for 1863.) Used to cover nauseous tastes, &c.

Syrupus de Spinâ Cervinâ, Syrupus rhamni —s. de Stœchade communis, see Lavandula.

Syrupus Toluta'nus, *S. Tolutа'ni* seu *tolnif'eræ bal'sami* seu *balsam'icus, Balsam'ic syr'up, Syr'up of tolu'.* (*Tinct. Tolut.* f℥iss; *Aquæ* Oj; *Sacchar.* ℔iiss. Mix the tincture with the sugar in coarse powder; expose it on a shallow dish to a gentle heat, until the alcohol has evaporated; pour the water upon it; heat gradually until the sugar is dissolved, and strain. Ph. U. S.) Use—to give flavour.

Syrupus Vi'olæ, *S. violæ odora'tæ, S. viola'rum, S. e suc'co viola'rum, Syr'up of Vi'olets.* (*Flor. recent. Viol. odorat.* ℔ij, *Aq. bull.* Oviij, *Sacch. pur.* ℔xv. Macerate, in a covered vessel, for 24 hours: pass, without expression, through linen; add the sugar so as to form a syrup. *Ph. E.*) Very gently laxative. Dose, f℥j to f℥ij.

Syrupus e Succo Violarum, S. violæ.

Syrupus Zingib'eris, *S. amo'mi zingiberis, Syr'up of Gin'ger,* (F.) *Syrop de gingembre.* (*Tinct. Zingib.* f℥iv; *Aquæ* Oiv; *Sacchar.* ℔x. Mix the tincture with four pounds of the sugar in coarse powder; and expose it in a shallow dish to a gentle heat until the alcohol has evaporated. Add the rest of the sugar, and then the water in a covered vessel; heat gradually until the sugar is dissolved, and strain. To the strained liquor add the sugar, and form a syrup. Ph. U. S.) Excitant. Dose, f℥j to f℥ss. A modified form is contained in the Ph. U. S. (1863.)

N. B. The Parisian Codex contained a few other compound syrups besides those enumerated; amongst them was a *Syrup of calf's lungs, Syrupus e pulmon'ibus vitul'inis,* (F.) *Syrop de mou de veau,* as an expectorant!

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYS, as a prefix, like *Sym.*

SYSOMIENS, (*sys,* and *σωμα,* 'body.') A family of double monsters, of Is. G. St. Hilaire, characterized by the union or fusion of two bodies surmounted by heads completely separate.

SYSPA'SIA, (*συσπασις,* from *συσπαω* (*sys,* and *σπαω,* 'to draw'), 'to contract.') Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

Syspasia Convulsio, Convulsion—s. Epilepsia, Epilepsy—s. Hysteria, Hysteria

SYSSARCO'SIS, (*sys,* *σαρξ,* gen. *σαρκος,* 'flesh,' and *osis.*) *Commissu'ra os'sium cur'nea, Symph'ysis os'sium muscula'ris, Connex'io os'sium carno'sa, Carna'tio, Concarna'tio.* Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTALSIS, Systole.

SYSTAL'TIC, (*συσταλτικος,*) *Systal'ticus, Peristal'tic,* (*συστελλω* (*sys,* and *στελλω*), 'I contract.') (F.) *Systaltique.* A *systaltic motion* in a part is one in which there is alternate contraction and dilatation. See Systole.

SYSTAT'ICA, (from *συνιστημι* (*sys,* and *ιστημι,* 'to place'), 'to associate') Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind; —the 4th order, class *Neurotica,* of Good.

SYS'TEM, *Syste'ma,* (*συστημα,* from *sys,* and *ιστημι,* 'I place.') (F.) *Système.* This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of objects for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means—a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system, muscular system,* &c.

SYSTEMA, gen. *Syste'matis*, System—s. Vasorum, Vascular system.

SYS'TEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist.*

SYSTEMATIST, see Systematism.

SYSTEMATOL'OGY, *Systematolog''ia*, (*systema*, and λογος, 'a discourse.') The doctrine of, or a treatise on, systems.

SYSTÈME, System — *s. Vasculaire à sang noir*, see Vascular — *s. Vasculaire à sang rouge*, see Vascular.

SYSTEM'IC or SYS'TEMIC. Belonging to the general system — as '*systemic* circulation' in contradistinction to the '*pulmonic.*'

SYS'TOLĒ, (συστολη, from *sys*, and στελλω, 'to contract.') *Systal'sis*, *Constric'tio*, *Contrac'tio* seu *Angusta'tio* seu *Submis'sio* seu *Mica'tio cor'dis.* The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

SYSTOL'IC or SYS'TOLIC, *Systol'icus*, (F.) *Systolique.* Relating to the systole of the heart, — as 'systolic murmur.'

SYTHE, ([Sax.] ꝑican, 'to sigh,') Suspirium.

SYZYGIUM NERVORUM, (συζυγος, 'united,' from *sys*, and ζυγος, 'a yoke,') Par nervorum.

T.

T BANDAGE, *T fas'cia*, *Fas'cia T form'is* seu *Heliodo'ri*, *Cru'cial Ban'dage.* A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T.* This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

T FASCIA, T Bandage.

TABAC, 'tobacco,' Nicotiana tabacum — *t. des Montagnes*, Arnica montana—*t. des Savoyards*, Arnica montana—*t. des Vosges*, Arnica montana.

TABACUM, 'tobacco,' Nicotiana tabacum.

TAB'ANUS, 'the horsefly.' A troublesome fly in the Hudson's Bay territory, called, by the *voyageurs*, *Bulldog*, which makes a perforation like a leechbite, from which it sucks the blood.

TABARDILLO (S.). A kind of highly adynamic fever, common in South America.

TABARZET, Saccharum album.

TAB'ASHEER. *Tab'aschir*, *Tab'axir.* A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters; as well as for its slight refractive property. It has been used in obstruction of the bowels. The sweet juice of the bamboo stalks has also been called *Tabasheer.*

TABEFACTION, (*tabes*, and *facere*, 'to make,') Emaciation.

TABEFY, Emaciate.

TABEL'LA, *Tab'ula*, *Tabula'tum*, *Lozan'ga*, *Lozan'gia*, *Mor'sulus*, *Morsel'lus*, *Loz'enge*, *Tessel'la*, (F.) *Tablette*, *Losange.* A solid medicine, composed of a powder, sugar, and mucilage, *Electua'rium sol'idum;* and generally shaped like a disk. See Pastil, and Troch. The three comprise the *Saccharolés solides.*

TABELLA, (dim. of *tabula*, 'a table,') Table.

TABELLÆ ABSORBENTES, T. de Magnesiâ.

TABELLÆ AC''IDI OXAL'ICI, *T. ad si'tem*, *Loz'enges of Oxal'ic Ac''id.* (*Acid. oxalic.* ʒj, *Sacch. alb.* ʒss, *Ol. limonis*, gtt. xviij seu gtt. xij. Make into lozenges with *Mucilage of gum tragacanth. Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

TABELLÆ DE ALTHÆ'Â, *Loz'enges of Marshmallows.* (*Rad. althææ* pulv., ʒiss, *Sacchar. alb.* pulv. ʒivss; f. massa. *Ph. P.*) Demulcent; expectorant.

TABELLÆ ANTIMONIA'LES KUNCKE'LII, *T. de stib'ii sulphure'to*, *Loz'enges of Sulph'uret of Anti'mony*, *Mor'suli antimonia'les* seu *stib'ii* seu *stibia'ti*, *Trochis'ci stibiati.* (*Amygdal. dulc.* ʒj, *Sacch.* ℔ss, *Sem. cardam., cinnam. pulv., Sulph. antim. præpar.*, ää ʒj; fiant tabellæ. *Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

TABELLÆ AD ARDOREM VENTRICULI, Trochisci carbonatis calcis — t. Cardialgicæ, Trochisci carbonatis calcis.

TABELLÆ DE CAT'ECHU ET MAGNE'SIÂ, *Loz'enges of Cat'echu and Magne'sia*, (F.) *Tablettes de cachou et de magnésie.* (*P. catech.* ʒvj, *P. magnes.* ʒiv, *P. cinnam.* ʒiij, *Sacch. alb.* ℔ss, *G. tragac.* gr. xij, *Aq. cinnam.* q. s. ut f. massa. *Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

TABELLÆ CINCHO'NÆ, *T. de ki'nâ ki'nâ*, *Bark Loz'enges.* (*Ext. cinchon.* sicc. ʒss, *Sacch.* ʒiv, *Cinnam.* ʒss, *Mucilag. g. trag.* q. s. ut f. massa. *Ph. P.*) Tonic.

TABELLÆ DE CITRO ET DIACARTHAMO, T. de Scammonio et Sennâ.

TABELLÆ DE FER'RO, *Steel loz'enges*, *Tab'ulæ martia'les* seu *instauran'tes* seu *antichlorot'icæ.* (*Ferri limat. porphyriz.* ʒss, *P. cinnam.* ʒj, *P. sacch.* ʒv, *G. trag.* et *Aq. cinnam.* q. s., ut fiat massa. Each lozenge to weigh 12 gr. *Ph. P.*) Tonic, stomachic. Dose, v to x.

Aromat'ic loz'enges of steel. These consist of *sulphate of iron*, with a small proportion of the *Tincture of Cantharides.*

TABELLÆ DE KINÂ KINÂ, T. cinchonæ.

TABELLÆ DE MAGNE'SIA, *T. absorben'tes*, *Magne'sia loz'enges.* (*Magnes.* ʒj, *Sacchar. alb.* ʒiv, *Mucil. g. tragac.* q. s. *Ph. P.*) Absorbent and antacid.

TABELLÆ DE RHE'O, *Rhu'barb loz'enges.* (*P. rhej.* ʒss, *Sacch.* ʒv, *Mucilag. gum. tragac.* q. s.; f. massa. Each to contain 12 grains. *Ph. P.*) Stomachic and laxative.

TABELLÆ DE SCAMMO'NIO ET SEN'NÂ COMPOS'ITÆ, *T. de ci'tro et diacar'thamo*, *Com'pound loz'enges of scam'mony and sen'na.* (*Scammon.* ʒiij, *Sennæ* ʒivss, *rhej.* ʒiss, *Caryoph.* ʒj, *Corticis limon. confect.* ʒj, *Sacch.* ʒvj; f. massa. *Ph. P.*) Purgative. Dose, ʒij to ʒvj, or more.

TABELLÆ AD SITEM, T. acidi oxalici — t. ad Sodam, Trochisci carbonatis calcis — t. de Stibii sulphureto, T. antimoniales Kunckelii.

TABELLÆ DE SULPH'URE SIM'PLICES, *Simple*

sulph'ur loz'enges. (*Sulphur lot.* ℥ss, *Sacch.* ℥iv, *Muc. g. tragac.* cum aquâ rosâ præpar. q. s. *Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

TABELLÆ DE SULPH'URĒ COMPOS'ITÆ, *Com'pound sulph'ur loz'enges.* (*Sulph. lot.* ℥ij, *Acid. benzoic.* gr. xij, *Rad. irid. p.* ℥ss, *Ol. anisi,* gtt. viij, *Sacch.* ℥vss, *G. trag.* q. s. *Ph. P.*) Aperient, expectorant, and stimulant [?]. Dose, 4 a day.

TABERNA MEDICA, (*taberna,* 'a shop,') Pharmacopolium.

TABERNÆMONTA'NA U'TILIS, (after Tabernæmontanus, a German botanist.) A tree of British Guiana, of the *family* Apocynaceæ, called, by the natives, *Hya-Hya,* the bark and pith of which yield a milk, which is used by the savages as a refreshing drink.

TA'BES, gen. *Ta'bis, Maras'mus Ta'bes,* (*tabere,* 'to decay;') *Te'kedon, Apotex'is, Atroph'ia, Tab'idness, Decline', Consump'tion, Wust'ing.* Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

TABES, Atrophy, Phthisis — t. Coxaria, Ischiophthisis — t. Diabetica, Diabetes mellitus — t. Diuretica, Diabetes mellitus.

TABES DORSA'LIS, *T. Dorsua'lis, Maras'mus ta'bes dorsa'lis, Phthi'sis no'tias* seu *dorsa'lis* seu *sic'ca, Myelophthi'sis, Rhachiomyelophthi'sis, Myelatroph'ia, Myclanalo'sis, Ta'bes os'sis sa'cri.* A wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head,—caused, it has been conceived, by too early or too frequent addiction to venery.

TABES GLANDULARIS, T. mesenterica, Scrofula —t. Ischiadica, Ischiophthisis — t. Lactea, Atrophia lactantium, see Galactia.

TABES MESENTER'ICA, *T. glandula'ris* seu *scrofulo'sa, Atroph'ia mesenter'ica* seu *infant'um* seu *glandula'ris* seu *infan'tilis* seu *dor'si, Parabys'ma mesenter'icum, Ma'cies Infan'tum, Pædatroph'ia, Scrof'ula* seu *Rachial'gia* seu *Physco'nia mesenterica, Myelophthi'sis sic'ca, Fe'bris hec'tica infan'tum, Phthi'sis mesura'ica, Mesenterophthi'sis, Mesenter'ic Disease,* (F.) *Carreau, Chartre, Scrofules* ou *Écrouelles mésentériques, Étisie* ou *Rachialgie* ou *Atrophie* ou *Physconie mésentérique, Entéro-mésentérite, Tubercules des ganglions mésentériques, Phthisie mésentérique.* An engorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery,—as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in scrophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

TABES NUTRICUM, Atrophia lactantium, see Galactia — t. Ossis sacri, Tabes dorsalis — t. Pectorea, Rachitis — t. Pulmonalis, Phthisis pulmonalis — t. Scrofulosa, T. mesenterica — t. Senum, Marasmus senilis.

TABESCERE, (*tabere,* 'to decay,') Emaciate.

TAB'ID, *Tab'idus,* (F.) *Tabide.* Relating or appertaining to tabes. Wasted by disease.

TABIDNESS, Tabes.

TABIF'IC, *Tabif'icus,* (F.) *Tabifique,* (*tabes,* and *facere,* 'to make.') That which causes consumption or phthisis.

TA'BLE, *Tab'ula, Tabell'a, Tabula'tum, Lam'ina, Pa'ries, Squa'ma.* A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is *external;* the other *internal,* and called *Tab'ula vi'trea,* (F.) *Lame vitrée,* on account of its brittleness.

TABLES DE MORTALITÉ, Mortality, bills of.

TABLET, 'a small table,' Trochiscus—t. Votive, Tabula votiva.

TABLETTE, 'tablet,' Tabella.

TABLETTES DE CACHOU ET DE MAGNÉSIE, Tabellæ de catechu et magnesiâ.

TABLIER, 'an apron,' Ventrale cutaneum.

TABOURET, Thlaspi bursa.

TABULA, Tabella, Table — t. Vitrea, see Table.

TAB'ULA VOTI'VA, *Vo'tive tab'let.* A tablet, hung up as an offering — *anathe'ma* — in the ancient temples by the sick, descriptive of their diseases, and mode of cure; or by those who had been preserved from some calamity.

TABULÆ ANTICHLOROTICÆ, Tabellæ de ferro — t. Instaurantes, Tabellæ de ferro — t. Martiales, Tabellæ de ferro.

TABULATUM, (from *tabula,*) Tabella, Table.

TABUM, (allied to *tabes,*) Ichor, Sanies, Plague.

TAC, Influenza.

TACAMAHACA, Fagara octandra—t. Caragna, Caranna.

TACCA (Malay name) OCEANICA, see Arrowroot, (Tahiti.)

TACHE (F.), 'spot,' Macula, see *Taches.*

TACHE CÉRÉBRALE, Tache méningitique. A red mark or stain, observable, according to M. Trousseau, in a large number of hydrocephalic children, when pressure is made on the skin.

TACHE EMBRYONNAIRE, 'Embryonic spot;' *Cu'mulus, C. germinati'vus* seu *prolig''erus, A'rea germinati'va, Stratum germinati'vum, Blastostro'ma, Nu'cleus cicatric'ulæ* seu *blastoderm'atis, Ger'minal cu'mulus.* A name given by M. Coste to a spot seen on the blastoderma about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer, (F.) *Feuillet*— the upper one the *serous* or *animal;* the lower, the *mucous* or *vegetative;* and between these is afterwards formed the *vascular layer.*

TACHE GERMINATIVE, 'germinal spot,' see Molecule — *t. Jaune,* see Foramen centrale retinæ—*t. Mélanienne,* see Nævus—*t. Méningitique, Tache cérébrale—t. de Naissance,* Nævus—*t. Pigmentaire,* Nævus—*t. Sanguine,* see Nævus.

TACHES (pl. of *tache*) *HÉPATIQUES,* Chloasma.

TACHES LAITEUSES, Plaques laiteuses, 'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

TACHES ROUGES, 'red spots,' — *t. de Rousseur,* Ephelides.

TACHETÉ DE ROUSSEURS, ('spotted with freckles,') see Ephelides.

TACHYIA'TER, (ταχυς, 'quick,' and ιατρος, 'a physician,') *Tachyia'trus.* One who cures speedily.

TACHYIATRI'A, (*ταχυς*, 'quick,' and *ιατρεια*, 'healing.') The art of curing quickly.

TACH'YTOMY, *Tachytom'ia*, (*ταχυς*, 'quick,' and *τομη*, 'incision.') The art of cutting or operating rapidly.

TACITUR'NITY, *Tacitur'nitas*, *Si'gē*, (from *tacere*, *tacitum*, 'to be silent.') State of a person who does not speak. Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tac'tus*, (from *tangere*, *tactum*, 'to touch.') A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive; Touch, active.

TACT'ILE, *Tac'tilis*. Relating or appertaining to tact or touch.

TACTION, Touch.

TACTUS, Tact, Touch — t. Dolorificus, Haptodysphoria—t. Eruditus, see Palpation.

TAE, 'toe,' Digitus pedis.

TÆ'DA, *Te'da*, *Dæs*, 'a torch.' A term used for a medicine employed under the form of fumigation, pessary, or troch.

TÆ'NIA, *Te'nia*, *Fas'cia*, (*ταινια*, 'a band, a fillet, a riband.') See Bandage. Also a genus of intestinal worms,—*Tapeworms* — characterized by an elongated, flattened, and articulated body, with suctorial oscula on the head. Of this genus, two only inhabit the human body — the *Tænia lata*, (see Bothriocephalus latus,) and *Tænia solium*.

TÆNIA ACEPHALA, Bothriocephalus latus—*t. à Anneaux courts*, Bothriocephalus latus — *t. à Anneaux longs*, Tænia solium — t. Articulos demittens, Tænia solium—t. Cucurbitina, Tænia solium — t. Dentata, Bothriocephalus latus — t. Grisea, Bothriocephalus latus — t. Hippocampi, Corpora fimbriata — t. Humana armata, Tænia solium—t. Humana inermis, Bothriocephalus latus — t. Hydatigena, Hydatid — t. Lata, Bothriocephalus latus—*t. à Longues articulations*, Tænia solium — t. Membranacea, Bothriocephalus latus — t. Nervosa Halleri, Ganglion of Gasser — *t. Non armé*, Bothriocephalus latus — t. Osculis lateralibus geminis, Bothriocephalus latus — t. Osculis lateralibus solitariis, Bothriocephalus latus — t. Osculis marginalibus solitariis, Tænia solium — t. Osculis superficialibus, Bothriocephalus latus — t. Prima, Bothriocephalus latus — *t. Sans épine*, Tænia solium—t. Secunda, Tænia solium.

TÆNIA SEMICIRCULA'RIS, *T. stria'ta*, *Gem'inum cen'trum semicircula'rē*, *Lim'bus poste'rior cor'poris stria'ti*, *Stri'æ cor'neæ* seu *semilluna'res* seu *termina'les*, *Frœ'nulum no'vum*, *Fas'cia semicircula'ris*, (F.) *Bandelette des éminences pyriformes* (Ch.), *Bandelette*, *B. demicirculaire*, *Lame cornée*. A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

TÆNIA SO'LIUM, (from *solus*, 'alone,' because, at one time, supposed to be always alone.) *T. os'culis marginal'ibus solita'riis* seu *cucurbiti'na* seu *huma'na arma'ta* seu *artic'ulos demit'tens* seu *secun'da*, *Hal'ysis so'lium*, *Ver'mis cucurbiti'nus*, *Lumbri'cus la'tus*, *So'lium*, (*F.*) *Ténia sans épine* ou *à longues articulations* ou *à anneaux longs*, *Ver solitaire* ou *cucurbitin*, *Long Tapeworm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal foramina vaguely alternated. The tænia solium is commonly a few feet long: sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. Brayera anthelmintica ('kousso'), pumpkin seeds, male fern, pomegranate root, are amongst the best remedies.

TÆNIA STRIATA, T. semicircularis — t. Tarini, Lamina cornea—t. Tenella, Bothriocephalus latus —t. Vulgaris, Bothriocephalus latus.

TÆNIACIDE, (*tænia*, and *cædere*, 'to kill,') Tæniafuge.

TÆNIÆ COLI, (pl. of *tænia*, 'a band,') see Colon—t. Longitudinales, see Colon—t. Valsalvæ coli, see Colon.

TÆ'NIAFUGE, *Tæ'nifuge*, *Tæ'niacide*, *Tæ'nicide*, *Tæniaf'ugum*, (F.) *Ténifuge*, (*tænia*, and *fugo*, 'I drive off.') A remedy calculated to expel or destroy tænia.

TÆ'NICIDE, (*tænia*, and *cædere*, 'to kill.') A destroyer of tænia or tapeworm.

TÆNIFUGE, Tæniafuge.

TÆNIIN, see Hagenia Abyssinica.

TÆNI'OLA, *Bandelette*; (dim. of Tænia.) Used by Gerber for a simple, bandlike, or flat fibre, *Fi'lum tæniaform'ē*, seen under the microscope.

TAFFETAS AGGLUTINATIF, Sparadrapum adhæsivum — *t. d'Angleterre*, see Sparadrapum adhæsivum — *t. Épispatique*, Sparadrapum vesicatorium — *t. Gommé*, see Sparadrapum adhæsivum — *t. Vésicant*, Sparadrapum vesicatorium.

TAFIA, Rum.

TAGLIACOZZI, Opération de, (after G. Tagliacozzi, of Bologna, died 1599,) see Rhinoplasty.

TAIE, (from *tegere*, 'to cover,') see Caligo.

TAILLADE, (from *tailler*, 'to cut,') Incision, see *Entaille*.

TAILLE, (from *tailler*, 'to cut,') Lithotomy, Stature—*t. Hypogastrique*, Hypogastric operation of lithotomy, see Lithotomy — *t. Postérieure*, see Lithotomy — *t. Recto-vésicale*, see Lithotomy — *t. par le Rectum*, see Lithotomy — *t. Sus-pubiénne*, see Lithotomy.

TAKAMAHAKA, Fagara octandra.

TAKE, Attack.

TAKEN DOWN, see Attack.

TAKING, see Contagious.

TAL. A word formerly employed for alkali. It also meant the dung of the peacock.

TALC EARTH, Magnesia.

TALCUM NEPHRITICUM, Nephreticus lapis.

TALEN'TUM, (*ταλαντον*.) An ancient weight equal to 54 pounds, 2 oz., 5 dr., and 24 grains, *Poids de Marc*. See Weights and Measures.

TALEOLUS, (dim. of *talus*,) Malleolus.

TALIACOTIAN OPERATION, (after *Taliacotius* or *Tagliacozzi*, see Tagliacozzi,) Rhinoplasty.

TALINUM UMBELLATUM, see *Mistura*.

TALIPES, (*talipedo*, 'to be weak in the foot,') Kyllosis (Clubfoot)—t. Calcaneus, see Kyllosis—t. Equinus, see Kyllosis—t. Valgus, see Kyllosis —t. Varus, see Kyllosis.

TALLAHATTA SPRINGS, see Alabama, mineral waters of.

TALLOW. Bayberry, see Wax, myrtle.

TALON, (from *talus*,) see Calcaneum.

TAL'PA, 'a mole,' *Topina'ria*, *Tupina'ria*, *Talpa'ria*, *Testu'do*, (F.) *Taupe*. A tumour situate on the head, which has been supposed to burrow like a mole.

TALPARIA, Talpa.

TALUS, Astragalus, Malleolus, see Calcaneum. Pessary.

TAMARA CONGA, Averrhoa carambola.

TAMARÆA ZECLA, Tamarindus.

TAMARIN, Tamarindus.

TAMARIN'DI PUL'PA, *Pulp of Tam'arinds*. (*Tamarindi*, q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS, PULP OF, Tamarindi pulpa.

TAMARINDUS, (from [Arab.] *tamar hendi*,

'Indian date,) *T. In'dica, Thamarin'dus, Oxyphœ'nicon, Sil'iqua Arab'ica, Bulampul'li, Tamaræ'a zeo'la, Oxyphœni'cia, Aca'cia In'dica, Tam'arind tree,* (F.) *Tamarin. Ord.* Leguminosæ. *Sex. Syst.* Triandria Digynia. The pulp of the tamarind with the seeds connected by numerous tough strings, *Tamarindus* (Ph. U. S.), is exported from the West Indies, preserved in syrup. It is refrigerant and laxative. *Tamarind whey* is made by boiling ℥ij of the pulp with ℔iss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, (from *Tamaris*, now *Tambra*, on the borders of the Pyrenees.) Tamarix Gallica.

TAM'ARIX, gen. *Tamari'cis, T. Gal'lica* seu *Pentan'dra, Tamaris'cus.* The *Tam'arisk tree. Ord.* Tamariscineæ. *Sex. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally;—the former for its aperient and corroborant virtues in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

TAMBOUR, CAVITÉ DU, 'drum, cavity of the,' Tympanum.

TAMNUS COMMUNIS, Tamus communis.

TAMPA BAY, see Saint Augustine.

TAMPAN. An insect belonging to the group of Acaridæ or Ticks, well known in South Africa, and described by Dr. Livingstone as dreaded by the inhabitants for its bite and the consequences.

TAMPON, ([F.] 'a bung, a plug,') see Plugging.

TAMPONNEMENT, Plugging.

TA'MUS seu TAM'NUS COMMU'NIS, *Am'pelos melæ'na* (Dioscorides), *Chiro'nia, Gynæcan'thē* seu *Apro'nia* (Pliny), *Bryo'nia ni'gra, Com'mon Black Bry'ony.* The root is diuretic, and has been given as an antilithic. In the herbshops of Europe it is sold as a topical application for removing bruise marks, and in France is called *Herbe aux femmes battues,* 'herb for beaten or bruised women.'

TANACE'TUM, *T. vulga'rē, Tana'sia, Athana'sia, Partheni'um mas, Hindheel, Tan'sy,* (F.) *Tanaisie vulgaire, Herbe aux vers, Coq des Jardins. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy, and the whole herb—*Tanacetum* (Ph. U. S.)—have a peculiar, strong odour, and warm bitter taste. They are tonic, 'deobstruent' and anthelmintic. Dose, ʒss to ʒj. The infusion is usually drunk as tea.

Tanacetum Balsami'ta, *T. horten'sē, Balsami'ta mas* seu *vulga'ris* seu *suave'olens* seu *ma'jor, Cos'tus horta'rum, Men'tha Roma'na* seu *Saracen'ica, Cost'mary, A'lecost, Cockmint,* (F.) *Menthe coq, Herbe au coq, Grand Baume.* A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

Tanacetum Hortense, T. balsamita.

Tanace'tum Multiflo'rum. A South African plant, which is used as a tonic, antispasmodic, and anthelmintic. It is given in flatulency, gout, amenorrhœa, and dropsy; but is especially prescribed in cases of ascarides lumbricoïdes and other entozoa. It is administered in the form of powder or infusion; the latter acting also as a diaphoretic and diuretic. It is used likewise as a resolvent and anodyne fomentation.

TANAISIE VULGAIRE, Tanacetum.

TANASIA, Tanacetum.

TAN'GĒ, (ταγγη, 'rancidity.') A putrescent tumour.

TANGHINIA, (Madagascar tanghin,) Cerbera tanghin.

TANGLES, BIG, Pila marina—t. Blue, Gaylussacia dumosa.

TANINUM, Tanninum.

TANNE, see Acne.

TANNIC ACID, Tannin.

TANNICUM PURUM, Tannin.

TANN'IN, (F.) *tanner,* 'to tan,') *Tan'nicum pu'rum, Tanni'num, Tani'num, Princip'ium Astrin'gens* seu *Scytodep'sicum* seu *Byrsodep'sicum* seu *Coria'ceum, Scytodep'sium, Mate'ria Scytodeph'ica, Ac''idum Tan'nicum* seu *Scytodeph'icum* seu *Quercitan'nicum, Tan'nic acid,* (F.) *Acide tannique.* A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of *tanning.* Pure tannin, obtained from *galls,* by the action of *ether* (Ph. U. S.), has been employed as an excellent and powerful astringent. Dose, two grains, repeated several times a day.

TANSY, Tanacetum—t. Wild, Potentilla anserina.

TAPER, HIGH, Verbascum nigrum.

TAPES, (ταπης, 'a carpet,') Tapetum.

TAPE'TUM, *Ta'pes, Tupe'tē,* (F.) *Tapis,* 'tapestry, a carpet,' see Corpus Callosum.

Tapetum Choroïdeæ. A shining spot on the outside of the optic nerve in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

Tapetum Alve'oli, *Membra'na exter'na den'tium.* The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

TAPEWORM, Tænia—t. Broad, Bothriocephalus latus—t. Long, Tænia solium.

TAPIOCA, see Jatropha manihot—t. Pearl, see Jatropha manihot.

TAPIS, (from *tapes,* 'a carpet,') Tapetum.

TAPPING, (from [Sax.] tæppan, 'to broach,' as a cask,) Paracentesis.

TAPSARIA, Decoctum hordei.

TAPSUS BARBATUS, Verbascum nigrum.

TAR, ([Sax.] tare,) see Pinus sylvestris—t. Barbadoes, Petroleum.

Tar Beer, see Pinus sylvestris.

Tar, Mineral, Pissasphaltum.

Tar Water, see Pinus sylvestris—t. Wine, see Pinus sylvestris.

TARA. An epidemicocontagious disease seen by Gmelin in Siberia, in the town of Tara, which appears to have resembled somewhat the Button Scurvy of Ireland.

TAR'ACHĒ, (ταραχη,) *Tarax'is, Tarag'ma, Tarag'mus,* 'disorder.' A disorder of sight which arises from a blow, compression of the eye, or the action of dust, smoke, or other external cause. By some it is understood to signify mild or incipient ophthalmia.

Ταραχη της κοιλιας, 'disturbance of the belly,' Diarrhœa.

TARAGMA, gen. *Tarag'matis,* (ταραγμα,) Tarache.

TARAGMUS, (ταραγμος,) Tarache.

TARAGON, Artemisia dracunculus.

TARAHO, Peltandra Virginica.

TARANTISM'US, *Tarentis'mus, Tarantalis'mus, Dinoma'nia, Chore'a Sanc'ti Valenti'ni, Taren'tulism, Tar'antism,* (from *Tarentum* or *Taranto,* where it was observed.) A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed by the vulgar to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentism'us Tangita'nus, Janan-tarentisme.*

TARAN'TULA, (same etymon.) *Taren'tula,* (F.) *Tarentule.* A species of spider—the *Ara'nea Taren'tula* of Linnæus, *Lyco'sa Tarentula* of La-

treille—whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MIN'ERAL WA'TERS OF. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

TARAXACUM, (from *ταραττειν*, 'to disturb or disorder,') Leontodon taraxacum—t. Dens leonis, Leontodon taraxacum.

TARAXIS, (*ταραξις.*) Tarache, see Ophthalmia.

TARCHON SYLVESTRIS, Achillea ptarmica.

TARENTISMUS, Tarantismus—t. Tangitanus, Tarantismus.

TARENTULA, Tarantula.

TARENTULISM, Tarantismus.

TARGAR, Juniperus communis.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jagre*. It was once used as a tonic.

TARI'NI PONS, (after the anatomist Tarin,) (F.) *Pont de Tarin*. A cineritious substance, between the corpora albicantia, which unites the crura, and assists in forming the bottom of the third ventricle. The fossa, at the bottom of which it is placed, is called *Lo'cus perfora'tus posti'cus, Poste'rior per'forated space, Substan'tia* seu *Lam'ina perfora'ta poste'rior*.

TARO, Arum esculentum.

TAR'SAL, *Tarsa'lis, Tar'seus*, (from *tarsus*,) (F.) *Tarsien*. That which relates to the tarsus.

TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TARSAL CARTILAGES, see Tarsus.

TAR'SEA LA'TA (LIGAMENTA). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which he thought they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; whilst Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

TARSEUS, Tarsal.

TARSIEN, Tarsal.

TARSOMETATAR'SAL, *Tarsometatar'seus*. That which relates to tarsus and metatarsus.

TARSOMETATARSAL ARTICULA'TIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarsometatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal*, and others *plantar*.

TARSO-MÉTATARSI-PHALANGIEN DU POUCE, Adductor pollicis pedis—t. *Phalangien du pouce*, Flexor brevis pollicis pedis — t. *Sous-phalangien du petit orteil*, Flexor minimi digiti pedis — t. *Sous-phalangettien du premier orteil*, Flexor brevis pollicis pedis.

TARSOPHY'MA, gen. *Tarsophy'matis*, (*tarsus*, and *φυμα*, 'a tumour.') A swelling of the tarsus.

TARSOR'RHAPHY, *Tarsorraph'ia*, (*tarsus*, and *ῥαφη*, 'suture.') An operation for diminishing the size of the opening between the eyelids when it is enlarged by surrounding cicatrices.

TARSOT'OMY, *Tarsotom'ia*, (*tarsus*, and *τομη*, 'incision.') The section or removal of the tarsal cartilages.

TAR'SUS, (*ταρσος,*) *Plan'ta pri'ma* seu *Rasse'ta* seu *Rasce'ta pe'dis, Pe'dium, Clavic'ulæ pe'dis no'dus*. 1. The posterior part of the foot. The tarsus consists of 7 bones arranged transversely in two rows, between which amputation is sometimes performed. The *first* or *Tib'ial row*, (F.) *Première rangée, R. jambière*, consists of the astragalus and os calcis; the *second* or *metatar'sal*, (F.) *Seconde rangée, R. métatarsienne*, of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tar'si, Tar'sal car'tilages, Tar'sal fibrocartilages, Or'choi, Crepid'ines* seu *Coro'næ* seu *Che'læ* seu *Un'gulæ Palpebra'rum, Thar'si, Cil'ia*, are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, (from *tart*, 'acid,' [?]) Antimonium tartarizatum (improperly), Potassæ supertartras impurus—t. Calcareous, Potassæ subcarbonas—t. Crystals of, Potassæ supertartras.

TARTAR EMETIC, Antimonium tartarizatum.

TARTAR, SALT OF, see Potash, and Potassæ subcarbonas—t. Soluble, Potassæ tartras, see Potash.

TARTAR OF THE TEETH, Odontolithus.

TARTA'REI MOR'BI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, Potassæ supertartras.

TARTAR'IC ACID, *Ac''idum tartar'icum* seu *tartaro'sum* seu *tar'tari essentia'lē, A'cor tartar'icus, Sal tar'tari essentia'lē, Tarta'reous ac''id*, (F.) *Acide tartrique*. (*Potassæ bitart.* ℔iiss, *Aq. destillat. ferv.*, cong. iij, *Cretæ ppt.* ℔j, *Acidi sulph.* ℔j. Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid, and wash the tartrate of lime with distilled water until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter, and evaporate it to crystallize. *Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, Potassæ supertartras impurus — t. Solubile, Potassæ tartras — t. Vitriolatum, Potassæ sulphas.

TARTARUS AMMONIÆ, Ammoniæ tartras — t. Chalybeatus, Ferrum tartarizatum — t. Crudus, Potassæ supertartras impurus — t. Dentium, Odontolithus—t. Emeticus, Antimonium tartarizatum — t. Kalicoferricus, Ferrum tartarizatum—t. Kalinus, Potassæ tartras—t. Lixiviæ, Potassæ tartras — t. Martialis, Ferrum tartarizatum — t. Potassæ ferruginosus, Ferrum tartarizatum — t. Stibiatus, Antimonium tartarizatum — t. Subpotassicus, Potassæ supertartras—t. Superpotassicus, Potassæ supertartras — t. Tartarizatus, Potassæ tartras.

TARTON-RAIRE, Passerina tartonraira.

TARTRATE D'AMMONIAQUE, Ammoniæ tartras.

TARTRE BRUT, 'crude tartar,' Potassæ supertartras impurus—*t. Cru*, Potassæ supertartras impurus—*t. des Dents*, Odontolithus—*t. Émétique*, Antimonium tartarizatum—*t. Stibié*, Antimonium tartarizatum.

TASIS, (*τασις,*) Extension, Tension.

TASTE, (from [F.] *tâter*, [Old F.] *taster*, 'to taste, feel,' [G.] tasten, 'to feel,') *Gus'tus, Geu'sis, Geu'ma, Geuth'mos*, (F.) *Goût*. One of the five external senses which instructs us of the savours of bodies, and of which the tongue is the principal organ.

Gusta'tion, Gusta'tio, is the exercise of this faculty. In disease the taste frequently becomes variously vitiated. The nerves of taste are probably the glossopharyngeal, and, perhaps, also, the lingual branch of the fifth pair.

TASTE, Savour.

TATOUAGE, Tattooing.

TATTOO'ING, (F.) *Tatouage*. A practice with the South Sea Islanders of puncturing the skin, and forcing colouring matters into the punctures. Sailors in all countries are in the custom of practising it by rubbing or forcing gunpowder into the punctures. The figures thus formed remain through life.

TATZÉ. The fruit of *Myrsi'na Africa'na*, a native of Abyssinia, the Cape of Good Hope, the Azores, and Algeria, which is used as a tæniafuge.

TAUPE, Talpa.

TAUROCOL'LA, (ταυρος, 'a bull,' and κολλα, 'glue.') Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, (ταυρος,) Penis, Perineum. Of old, the lower part of the male organ with the rhaphe extending to the anus.

TAX'IS, (ταξις, 'arrangement;' from ταασω, 'I order,' 'I arrange;') *Reposit''io, Reduc'tio, Syntax'is.* A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizental posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by bloodletting *ad deliquium;* the warm bath; warm fomentations; tobacco; emollient glysters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXO'DIUM DIS'TICHUM, (*taxus*, and ειδος, 'resemblance,') *Cupres'sus dis'ticha, Schuber'tia dis'ticha, Cy'press, Amer'ican* or *Bald Cypress;* indigenous. *Nat. Ord.* Coniferæ. A balsam, obtained from it, is applied to cuts and wounds. The resin from the cones is diuretic and carminative.

TAXONOMY, (ταξις, 'order,' and νομος, 'law,') Biotaxy.

TAX'US BACCA'TA, (ταξος.) The *Yew tree, Smi'lax,* (F.) *If. Family,* Coniferæ. *Sex. Syst.* Dioecia Monadelphia. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir.*

TAXUS CANADEN'SIS, *Amer'ican Yew, Ground Hem'lock;* indigenous. The leaves are said to be sedative. [?]

TAXWAX, see Nucha.

TAYE, (from [L.] *tego*, 'to cover,') Caligo.

TAYLOR'S REMEDY FOR DEAFNESS, see Allium.

TEA, Thea—t. Apple, see Apple tea—t. Bahama, Lantana camara—t. Beef, see Beef tea—t. Berried, Gaultheria.

TEA BERRY, Gaultheria.

TEA, BLANKENHEIM, see Galeopsis grandiflora—t. Brazil, Lantana pseudothea—t. Bushman's, Methystophyllum glaucum—t. Caffre, Helichrysum nudifolium—t. Chicken, see Chicken tea—t. Flaxseed, Infusum Lini compositum—t. Ginger, Infusum Zingiberis—t. Hottentot's, Helichrysum serpyllifolium.

TEA IMPROVER, CHINESE, see Falsifications, table of.

TEA, LABRADOR, Ledum latifolium—t. Lemonpeel, see Citrus medica—t. Lie, see Falsifications, table of—t. Lye, Physick's, see Fuligokali—t. Marsh, Ledum palustre—t. Mexico, Chenopodium ambrosioides—t. Spanish, Chenopodium ambrosioides—t. Veal, see Veal tea.

TEAK, Paronychia.

TEAR, (Sax. τεαρ,) *Lac'ryma, Lach'ryma, Lac'rima, Lac'ruma, Da'cry, Dac'ryma, Dac'ryon, Hu'mor lacryma'lis, Eye'drop, Weepingtear,* (F.) *Larme.* An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye, and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base; phosphates of lime and soda, and albumen, and a special organic matter called *Lac'rymine* and *Thrænine.*

TEAR PUNCTA, Lachrymal puncta.

TEARS, DEERS', Bezoar of the deer.

TEASEL, CULTIVATED, Dipsacus sylvestris.

TEASICK, (*phthisic,*) Phthisis pulmonalis.

TEAT, (τιτθη, [Sax.] τιτ,) Nipple.

TEAZEL, ([Sax.] τæȝel,) Eupatorium perfoliatum.

TECEDON, (τηκεδων,) Phthisis.

TECNOCTONIA, (τεκνοκτονια, from τεκνον, 'a child,' and κτεινειν, 'to kill,') Infanticide.

TECNOL'OGY, *Tecol'ogy, Tecnolog''ia, Tecolog''ia,* (τεκνον, and τεκος, 'a child,' and λογος, 'a discourse.') A treatise on children.

TECOLITHOS, (τηκω, 'to dissolve,' and λιθος, 'a stone,') Judæus (lapis.)

TECOLOGY, (τεκος, 'a child,' and λογος, 'a discourse,') Tecnology.

TECO'MA RADI'CANS, *Bigno'nia radi'cans, Trum'pet flower, Trum'pet creep'er, Virgin'ia creep'er.* Indigenous; the orange and scarlet flowers appearing in July. *Order,* Bignoniaceæ. The leaves are acrid.

TECTARIA CALAHUALA, see Calagualæ radix—t. Ferruginea, see Galagualæ radix.

TEDA, Tæda.

TEETH, see Tooth—t. Artificial, see Artificial—t. Barred, *Barrées* (*Dents.*)

TEETH, BLOCK. In dentistry, two or more artificial teeth carved from a piece of ivory, or formed from porcelain paste, afterwards baked and finished.

TEETH, EYE, Canine teeth—t. Incorruptible, see Artificial—t. Jaw, Molar teeth—t. Milk, see Dentition—t. Mineral, see Artificial—t. Neck of the, Collum dentium—t. Plate, Porrigo decalvans—t. Porcelain, see Artificial—t. Shedding of the, see Dentition—t. Vitreous substance of the, Enamel of the teeth—t. Vitrescent, see Artificial—t. Wisdom, see Dentition—t. Wit, see Dentition.

TEETHING, Dentition.

TEGENERA MEDICINALIS, Cantharis.

TEGIMEN, (*tegere, tectum,* 'to cover,') Integument.

TEGMEN, Integument.

TEGULA HIBERNICA, 'a tile,' Hibernicus lapis.

TEGUMEN, gen. *Tegu'minis,* (*tegere, tectum,* 'to cover,') Integument.

TÉGUMENT, Integument.

TEGUMENT'ARY, *Tegumenta'rius,* (F.) *Tégumentaire.* Relating or appertaining to the integument.

TEGUMEN'TUM, Integument—t. Auris, see Tympanum—t. Ventriculorum cerebri, Centre, oval, of the brain.

TEIGNE, (*tinea,*) Pityriasis, Porrigo, Porrigo lupinosa—*t. Annulaire,* Porrigo scutulata—*t. en Anneau,* Porrigo scutulata—*t. Faveuse,* Porrigo favosa—*t. Furfuracée,* Porrigo furfurans—*t. Nummulaire,* Porrigo scutulata—*t. Pelade,* Porrigo decalvans—*t. Tondante,* Porrigo decalvans—*t. Tonsurante,* Porrigo decalvans.

TEINESMUS, (τεινεσμος,) Tenesmus.

TEINODYN'IA, (τεινειν, 'to extend, and ὀδυνη, 'pain.') Pain of the sinews or tendons.

TEINOPHLOGO'SIS, (τεινειν, 'to extend,' and φλογωσις, 'inflammation.') Inflammation of the sinews or tendons.

TEINTURE, Tincture—*t. Éthérée*, see Æthereal—*t. Rubéfiante*, Tinctura cantharidis.

TEKEDON, (τηκεδον,) Tabes.

TELA, 'a web,' Texture, Tissue—t. Accidentalis Medullaris, Encephaloid—t. Cavernosa, Cavernous texture—t. Cellulosa, Cellular tissue—t. Choroidea, Choroidea tela—t. Cornea, Corneous tissue—t. Emplastica, Sparadrapum—t. Erectilis, Erectile tissue—t. Fibrosa, see Fibrous—t. Galteri, Sparadrapum Galteri—t. Hippocratis cribrosa, Cellular tissue—t. Hymenochondrodes, Tissue, cartilaginous—t. Hymenochondroides, Tissue, cartilaginous—t. Ichthyocollæ glutinans, see Sparadrapum adhæsivum—t. Inodularis, Tissue, inodular—t. Mucosa, Cellular tissue—t. Organica, Histos—t. Vesicatoria, Sparadrapum vesicatorium.

TELAMON, (τελαμων,) Habena.

TELAMO'NES, (τελαμωνες, 'bandages.') Charpie, used for wounds; or linen employed for bandages.

TELANGECTASIS, Telangiectasia.

TELANGIECTA'SIA, *Telangice'tasis, Telangee'tasis, Angeiotelecta'sia, Hæmatotelangio'sis, Hæmotelangio'sis, Angiecta'sia, Anastomo'sis aneurysmat'ica*, (τηλε, 'far,' αγγεων, 'vessel,' and εκτασις, 'dilatation.') Dilatation of far or capillary vessels. Nævus maternus. Aneurism by anastomosis. According to some, fungus hæmatodes. See Hæmatodes fungus.

TELANGIECTASIA OCULI, Cirsophthalmus.

TELEORGANIC, (τελος, 'end or object,') see Organic.

TELEPHI'IUM, (after Τηλεφος, *Telephus*, son of Hercules,) *Ulcus telephium, Achille'um*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which Achilles inflicted on Telephus, degenerated into a similar ulcer.

TELEPHIUM, Sedum telephium.

TELLU'RIUM, (F.) *Tellure*, (from *tellus*, gen. *telluris*, 'the earth.') A metal first met with in the gold mines of Transylvania. It is of a bluish white colour, very volatilizable; specific gravity 6·115; and oxidizable in the air and by heat.

The salts of tellurium occasion the exhalation of so disagreeable an alliaceous odour from the body, that they have not been much experimented with as therapeutical agents.

TELORASIS, (τηλε, 'far,' and οραω, 'to view,') Presbytia.

TELUM, 'a dart,' Penis.

TEMPE, Temple.

TEM'PERAMENT, *Temperamen'tum, Temperatu'ra, Tempera'tio, Tempe'ries*, (from *temperare*, 'to moderate,' originally from *tempus*, gen. *temporis*, 'time,' the great *temperer*;) *Complex'io, Cra'sis, Euera'sia*. A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabilis, or black bile,—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine, lymphatic, choleric*, or *atrabilious* or *melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly, and still is, generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEM'PERANCE, *Temperan'tia, Sophros'ynē, Nephali'otes, Sobri'etas, Sobri'ety*. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPÉRANTS, (from *temperare*, 'to mitigate,') Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPESTAS, (from *tempus*, 'time,') Season.

TEM'PLE, *Tem'pus, Re'gio Tempora'lis, Crot'aphus*, (F.) *Tempe*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. (The word is said to be from the Latin *tempus*, 'time,' because in this part the hair first begins to turn white, and to indicate age.)

TEM'PORAL, *Tempora'lis*, (from *tempus*.) That which relates to the temples.

TEMPORAL APONEURO'SIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

TEMPORAL AR'TERIES, *Crot'aphite Ar'teries*, are several:—I. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior—*A. tempora'lis fronta'lis* seu *inter'na* seu *ante'rior*; the other posterior—the *A. temporalis occipita'lis* seu *exter'na* seu *superior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *trans'verse artery of the face*. 3. The *mid'dle tem'poral*, which arises beneath the cheekbones, and traverses the temporal aponeurosis immediately beneath that bone. II. The *Deepseated Tem'porals*—*A. tempora'les profun'dæ*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions to the temporal muscle.

TEMPORAL BONE, *Os tem'poris* seu *tempora'lē* seu *arcua'lē* seu *arma'lē* seu *parieta'lē infe'rius* seu *crot'aphum* seu *memen'to mo'ri* seu *mendo'sum* seu *crotaphit'icum* seu *lapido'sum*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions—1. The *squa'mous, Pars squamo'sa, Squa'ma, Lepis'ma, Os lepidoï'des* seu *squamo'sum* seu *squamifor'mē*, (F.) *Portion écailleuse* ou *squameuse*. 2. The *mas'toid por'tion*, and, 3. The *Pe'trous por'tion, Pe'trous Proc''ess, Pyr'amis trigo'na, Os lapide'um* seu *lapido'sum* seu *sax'eum* seu *petro'sum* seu *lithoï'des* seu *du'rum* seu *præcip'tæ ru'pi assimila'tum* seu *nerva'lē, Pars petro'sa, P. pyramida'lis os'sis tem'poris*, (F.) *Portion pierreuse, Rocher, Os pétreux, Apophyse pyramidale, A. pétrée*.

It has, 1. an *auric'ular* or *exter'nal face*, on which is a surface that makes part of the temporal fossa: the *zygomatic process*; the *glenoid cavity*; the *fissure of Glaser*; the *meatus audito-*

rius externus; the *mastoid process;* the *digastric groove;* the *canalis caroticus;* the *jugular fossa;* the *styloid process;* the *stylomastoid foramen,* &c. 2. A *cer'ebral* or *inter'nal sur'face,* which corresponds to the cavity of the cranium, and on which is the *Pars pétrosa,* the *hiatus Fallopii,* the *meatus auditorius internus,* the *fissure of the aquæductus vestibuli, a portion of the gutter for the lateral sinus,* &c. 3. A circumference, on which are observed the orifice of the *bony portion of the Eustachian tube,* the *aquæductus cochleæ,* &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

Temporal Fos'sa, *Fos'sa tempora'lis,* is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the zygomatic fossa; and completed, before, by the cheek-bone.

Temporal Muscle, *Tempora'lis, Crotaphi'tes,* (F.) *Arcadi-temporo maxillaire, Temporo-maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

Temporal Nerves. These are distinguished into the *superficial temporal,* furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw; and the *temporales profundi,—anterior* and *posterior*—furnished by the same nerve at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

Temporal Veins were formerly called *Aëtioi Phleb'es, Aq'uilæ Venæ.*

TEMPORALIS, Temporal.

TEMPORO, (*tempus,* gen. *tem'poris,* 'temple,') in composition, the temple.

TEMPOROÄURICULAIRE, Attollens aurem.

TEM'POROFA'CIAL, *Tem'porofacia'lis.* Belonging to the temple and face.

Temporofacial Nerve, *Nervus temporofacia'lis.* A branch of the facial nerve distributed to the face and temple.

TEMPOROMAXILLAIRE, Temporomaxillary, see Temporal muscle.

TEMPOROMAX'ILLARY, *Tem'poromaxilla're,* (F.) *Temporomaxillaire.* That which belongs to the temporal bone and lower jaw.

Temporomaxillary Articula'tion or joint of the lower jaw is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process, and the portion of the glenoid cavity anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an interarticular fibrocartilage, two synovial capsules, and two lateral ligaments:—the one internal, and the other external.

Temporomaxillary Nerves of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, gen. *Tem'poris,* 'time,' Temple—t. Intercalare. Apyrexia, Intermission.

TEM'ULENCE, *Ebri'etas, Ebrios'itas, Methys'mus, Meth'ysis, Temulen'tia. Tem'ulency, Inebria'tion, Intoxica'tion, Drunk'enness:*—from wine, *Œnophlyg''ia, Œnophlyx'is, Vinolen'tia, Vi'nolence;* (F.) *Ivresse;* (from *teme'tum,* 'wine, any intoxicating drink.') Plater gave this name to delirium; Ettmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplex'ia Temulen'ta* or dead drunkenness. Commonly *Temulentia* is used synonymously with drunkenness, *Me'thē;* and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e Temulentiâ* is the same as *Delirium Tremens.* The French use the term *Ivresse* for drunkenness, *Ivrognerie* for habitual drunkenness.

TEMULENTIA, Temulence.

TENACULA, (pl. of *Tenaculum,*) Bonenippers—t. Volsella, Forceps (lithotomy).

TENAC'ULUM, (*tenax, tena'cis,* 'holding fast,' from *teneo,* 'I hold.') A kind of fine hook attached to a handle which is thrust through the parietes of a bloodvessel to draw it out and enable it to be tied.

Tenaculum, Assali'ni's. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

TENAILLE INCISIVE, (from *tenacula,*) Bonenippers.

TÉNALGIE CRÉPITANTE, Aï.

TENASMUS, Tenesmus.

TENDINES CORONARIÆ, Coronary tendons.

TEN'DINOUS, *Tendino'sus, Tendin'eus, Sin'ewy,* (F.) *Tendineux, (tendo,* gen. *ten'dinis,* 'a tendon.') Relating or appertaining to, or having the nature of tendons.

TENDO, gen. *Ten'dinis,* Tendon—t. Achillis, Achillis tendo—t. Cordis venosus, Circulus callosus Halleri—t. Oculi, Ligament of Zinn.

TEN'DON, *Ten'do, Pronerva'tio, Ten'on,* (from τεινω, 'to stretch.') *Sin'ew, Thew, Leader,* (Prov.) *Guider.* A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends:—as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

TENDON D'ACHILLE, Achillis tendo.

Tendon, Cordiform, of the Diaphragm, Centre, phrenic—t. of Zinn, Ligament of Zinn.

TENDONS, TWITCHING OF THE, Subsultus tendinum.

TENEOTOMIA, Tenotomy.

TÉNESME, Tenesmus—*t. de l'Œsophage,* Œsophagismus—*t. Vésical,* Bradysuria.

TENES'MUS, *Teines'mus,* (τεινεσμος,) *Tenas'mus Tines'mus,* (from τεινω, 'I stretch.') *Proc'tica* seu *Obstipa'tio Tenesmus, Proctospas'mus, Tinag'mus,* (F.) *Ténesme, Épreintes.* Frequent, vain and painful desires to evacuate;—one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

Used at times, also, for forcing down pains of the uterus and bladder.

Tenesmus Vesicæ, Bradysuria—t. Vesicæ mucosus, Cystirrhœa.

TENETTE, (from (F.) *tenir,* [L.] *teneo,* 'to hold,') see Forceps.

TÉNIA, Tænia.

TÉNIFUGE, Tæniafuge.

TENNESSEE', MIN'ERAL WA'TERS OF. On the waters of the French Broad River, in this State, is a large, clear, thermal spring. The heat

is so great that, on first going into the water, it is almost insupportable.

TENON, (τενων, gen. τενοντος,) Tendon.

TENONT'AGRA, (*tenon*, and αγρα, 'seizure.') A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

TENONTOTOMIA, Tenotomy.

TENONTOTRO'TI, (*tenon*, and τιτρωσκω, 'I wound.') They who are wounded in the tendons.

TÉNOPHYTE, (*tenon*, and φυειν, 'to grow.') A growth of an osseous or cartilaginous nature on a tendon.

TENOR'RHAPHY, *Tenorrhaph'ia*, (τενων, 'a tendon,' and ῥαφη, 'a suture.') Union of a tendon by suture after it has been divided.

TENOSYNI'TIS, *Tenosynovi'tis* [?], (F.) *Ténosynite*. An imperfectly formed term, (*tenon*, *syn*, and *itis*.) Inflammation of the synovial sheath of a tendon. See *Ai*.

TÉNOTOME, *Tenot'omus*, (from *tenon*, and τομη, 'incision.') An instrument for dividing tendons, especially by the subcutaneous method.

TENOT'OMY, *Tenotom'ia*, *Teneotom'ia*, *Tenontotom'ia*, *Sec'tio* seu *Dissec'tio ten'dinum*, (F.) *Ténotomie*. The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints—as in club-foot.

TENSEUR, Tensor — *t. de l'Aponévrose fémorale*, Fascia lata muscle.

TEN'SION, *Ten'sio*, *Tensu'ra*, *Ta'sis*, *Diat'asis*, *Enton'ia*, (*Entonia* is, also used for overtension,) *Conten'sio*, *Disten'sio*, (from *tendere*, *tensum*, 'to stretch.') State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TEN'SIVE, *Tensi'vus*, *Tono'des*, (F.) *Tensif*. Accompanied by tension or by a feeling of tension —as a '*tensive* pain.'

TEN'SOR, (F.) *Tenseur*. That which stretches or renders tense.

TENSOR CHOROIDEÆ, Ciliary muscle—t. Palati, Circumflexus musculus.

TENSOR TAR'SI, *Loch'rymal Muscle*. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Mus'cle of Horner*. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be, to influence the position of the punctum lacrymale, and to regulate the course of the tears through the lachrymal ducts.

TENSOR TYM'PANI, *Inter'nus An'ris*, *Internus Mal'lei*, (F.) *Salpingo-malléen*. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleaformis, and is inserted into the apophysis of the handle of the malleus.

TENSOR VAGINÆ FEMORIS, Fascia lata muscle.

TENSURA, (*tendere*, *tensum*, 'to stretch,') Tension.

TENSUS, (*tendere*, *tensum*, 'to stretch,') Penis.

TENT, *Ten'ta*, *Turun'da*, and its dim. *Turun'dula*, *Penic'ulus*, *Penicil'lus*, *Penicil'lum*, *Mo'tos*, *Læmnis'cus*, *Licin'ium*, (F.) *Tente*, *Mèche*. (*tendere*, *tensum* or *tentum*, 'to stretch.') In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, slippery elm, &c., &c. They are not so much used as they formerly were.

TENT, SPONGE, see Spongia.

TENTACULARIA, Filaria hominis bronchialis.

TENTACULUM CEREBELLI, (from *tendere*, *tensum* or *tentum*, 'to stretch,') Tentorium.

TENTA'MEN MED'ICUM. 'A medical trial,' (from *tentare*, 'to try.') An examination in medicine, in the Prussian universities, which is conducted both in writing and *vivâ voce* before the Dean of the Medical Faculty.

TENTE, Tent—*t du Cervelet*, Tentorium.

TENTIGO, gen. *Tentig"inis*, (from *tendere*, *tensum* or *tentum*, 'to stretch,') Priapism—t. Venerea, Nymphomania—t. Veretri, Satyriasis.

TENTIPEL'LUM, (*tendere*, *tensum* or *tentum*, 'to stretch,' and *pellis*, 'the skin.') Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTO'RIUM, *T. cerebel'lo superexten'sum*, *T. cerebel'li*, *Tentac'ulum cerebel'li*, *Sep'tum enceph'ali*, *Diaphrag'ma cer'ebri*, *Intersep'ta horizonta'lia Pacchio'ni*, *Proces'sus transver'sus du'ræ ma'tris*. *Lat'eral Pro'cesses of the Du'ra ma'ter*, *Transverse septum*, (F.) *Tente du cervelet*, *Plancher du Cerveau*, *Septum transverse* (Ch.), (*tendere*, *tensum* or *tentum*, 'to stretch.') A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

TENTORIUM CEREBELLI, Tentorium.

TENTUM, (from *tendere*, *tensum* or *tentum*, 'to stretch,') Penis.

TENTWORT, Asplenium ruta muraria.

TENUIS MATER, Pia mater.

TENUITAS AQUOSA, 'watery thinness,' Prædominium aquæ.

TEPHRO'SIA APOLLINE'A, (τεφρος, 'ash coloured, gray,') *Gale'ga Apolline'a* of Egypt and Nubia. *Order*, Leguminosæ. The leaves are often mixed with senna.

TEPHROSIA PURPU'REA, *Gale'ga purpu'rea* of the coast of Coromandel. The root is bitter, and a decoction of it is prescribed by the native doctors in dysentery, lientery, and tympanites.

TEPHROSIA SENNA. The leaves are used for senna by the people of Popayan.

TEPHROSIA TOXICA'RIA, *Gale'ga toxica'ria* of Cayenne. The leaves are used for poisoning fish. It has been suggested as a substitute for digitalis.

TEPHROSIA VIRGINIANA, Galega Virginiana.

TEPIDARIUM, (*tepidus*, 'moderately warm,') see Stove.

TEPLITZ, Töplitz.

TERAS, gen. *Ter'atis*, (τερας, gen. τερατος,) Monster.

TERATOG"ENY, *Teratogen'ia*, (*teras*, and γενεσις, 'generation.') The formation of monsters.

TERATOLOG"ICAL, *Teratolog"icus*, (F.) *Tératologique*. Same etymon as the next. Relating or appertaining to Teratology.

TERATOL'OGY, *Teratolog"ia*, (τερατολογια, from *teras*, and λογος, 'a discourse.') A treatise on monsters.

TERATOSIS, see Monster.

TERCERON, (from [F.] *tierce*, [L.] *tertius*, 'third,') see Mulatto — t. Black, see Mulatto.

TEREBELLA, (from τερεω, 'to bore,') Trepan.

TEREBELLUM. A name given by Dugès to a perforator, *Perce-crâne*, of his invention.

TÉRÉBINTHINE, Terebinthina — *t. de Bordeaux*, see Pinus sylvestris - *t. de Chio*, see Pis-

tacia terebinthus — *t. Commune*, see Pinus sylvestris — *t. de Copahu*, Copaiba — *t. d'Égypte*, see Amyris opobalsamum — *t. de Gilèad*, see Amyris opobalsamum — *t. du Grand Cairc*, see Amyris opobalsamum — *t. de Judée*, see Amyris opobalsamum — *t. de Mélèze*, see Pinus larix — *t. de Vénise*, see Pinus larix.

TÉRÉBINTHINÉ, Terebinthinate.

TEREBIN'THINA, (from τερεβινθος, 'the turpentine tree.') *Tur'pentine, Bo'tin, Al'botim, Alril'ibat, Bruti'no*, (F.) *Térébinthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See Turpentine, Pinus palustris and Pinus sylvestris. All the turpentines are stimulant, diuretic, and cathartic. *Terebinthina*, (Ph. U. S.,) is the concrete juice of *Pinus palustris* and other species of *Pinus*.

TEREBINTHINA ARGENTORATENSIS, see Pinus picea—t. Balsamea, see Pinus balsamea—t. Canadensis, see Pinus balsamea — t. Chia, see Pistacia terebinthus—t. Communis, see Pinus sylvestris—t. Cypria, see Pistacia terebinthus — t. Empyreumatica, see Pinus sylvestris—t. Laricina, see Pinus larix—t. Veneta, see Pinus larix—t. Vera, see Pistacia terebinthus — t. Vulgaris, see Pinus sylvestris.

TEREBIN'THINATE, *Terebinthina'tus*, (F.) *Térébinthiné, Abiétique*. Having the qualities of or impregnated with turpentine.

TEREBINTHUS, (τερεβινθος,) Terminthus — t. Gummifera, Bursera gummifera — t. Lentiscus, Pistacia lentiscus — t. Vulgaris, Pistacia terebinthus.

TEREBRA, (τερεω, 'to bore,') 'a borer,' Trepan.

TÉRÉBRANT, see Terebratio.

TEREBRA'TIO, (from *terebrare, terebratum*, 'to bore,') Trepanning. The French use the term *Térébration* for the puncturing of a bone by any instrument, and a pain is said to be *térébrant*, when it seems as if the part was penetrated or bored.

TÉRÉBRATION, see Terebratio.

TEREDO OSSIUM, (τερεω, 'to bore,') Caries, Spina ventosa.

TE'RES, gen. *Ter'etis*, ('long and round,' from *tero*, 'to rub;' as if 'rubbed smooth or rounded,') *Stron'gylus, Cylindroi'des*. An epithet given to many organs, the fibres of which are collected into round fasciculi.

TERES LIGAMEN'TUM, (F.) *Ligament rond*. This name is given to the round ligament in the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tuberele of the radius.

TERES MA'JOR, (F.) *Anguli-scapulo-huméral, Scapulo-huméral*, (Ch.) *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

TERES MI'NOR, *No'mus hu'meri Placenti'ni*, (F.) *Le plus petit sus-scapulo-trochitérien* (Ch), *Petit rond, Marginl-sus-scapulo-trochitérien*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one hand, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, (τηρησις,) Observation.

TERETRIUM, (τερετριον, from τερεω, 'to bore,') Trepan.

TERETRON, (τερετρον,) Trepan.

TERGAL, (from *tergum*, 'the back,') Dorsal.

TERGEMINI, Trigemini.

TERGUM, Dorsum, Vertebral column.

TERMINAL CAVITIES, see Pulmo.

TERMINALIA, see Myrobalanus.

TERMINOLOGY, (*termen*, gen. *term'inis*, 'a term,' and λογος, 'a discourse,') Nomenclature.

TERMIN'THUS, *Terebin'thus*, (τερμινθος, 'the turpentine tree.') *Phy'ma An'thrax, Terminthus, Ber'ry* or *Fun'gous car'buncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMINTHUS, Pistacia terebinthus.

TERMINUS ('limit') SUPERIOR ASPERÆ ARTERIÆ, Larynx.

TERMONOLOGY, (*termo*, gen. *termo'nis*, 'a term,' and λογος, 'a discourse,') Nomenclature.

TERMS, (periods,) Menses.

TERRA ABSORBENS MINERALIS, 'absorbent mineral earth,' Magnesiæ carbonas — t. Aluminis, Argilla pura—t. Amara aërata, Magnesiæ carbonas — t. Amara sulphurica, Magnesiæ sulphas—t. Argillacea hydrata, Argilla pura — t. Argillacea pura, Argilla pura—t. Bolaris, Argilla pura — t. Foliata, Sulphur — t. Foliata mineralis, Soda acetata—t. Foliata tartari, Potassæ acetas—t. Fornacum, see Bricks — t. Fullonica, Cimolia purpurescens — t. Japonica, Catechu, Nauclea gambir.

TERRA LEM'NIA, *Lemp'nias, Argil'la bo'lus fla'va, Lem'nian Earth*. A name given by the ancients to a solid, reddish, astringent, substance, prepared with the pulp of the fruit of the Baobab, an Africa tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

TERRA LIVON'ICA. *A terra sigilla'ta* or *sealed earth* from Livonia, redder than that from Silesia, and very astringent.

TERRA MARITA, Cureuma longa.

TERRA NOCERIA'NA. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

TERRA ORLEA'NA, *Pigmen'tum uru'cu, Uru'cu*, (F.) *Rocou, Roucou, Bichet*. A pigmental matter obtained from the seeds of *Bix'a Orlea'na* seu *Orella'na* seu *America'na, Orella'na, Orlea'na*. In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag, Roll*, or *Egg Annotto*.

Span'ish Annot'to, Bix'a, is in small, oblong cakes. It is chiefly employed as a colouring matter.

TERRA OS'SEA, *Mate'ria os'sea*. Bony matter. The earthy portion of bones.

TERRA PONDEROSA, Baryta—t. Ponderosa muriata, Baryta, muriate of — t. Ponderosa salita, Baryta, muriate of.

TERRA PORTUGAL'LICA, *Bar'ros, Bucaros*. A reddish, astringent, styptic earth, obtained from Portugal.

TERRA SAPONARIA, Cimolia purpurescens.

TERRA SIGILLA'TA, (*sigillatus*, furnished with little figures — *sigilla*,) *Seal'ed Earth*. A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seignior. To these

belong the *Terra Silesi'aca, Terra Lem'nia, T. Tur'cica.* See Bole, and Bolus alba.

TERRA SILESIACA, see Terra sigillata — t. Talcosa oxyanthracodes, Magnesiæ carbonas — t. Turcica, see Terra sigillata.

TERRA URI'NÆ. The earthy deposit in the urine.

TERRA VITRIOLI DULCIS, Colcothar.

TERRAPIN, Emys palustris.

TERRE BOLAIRE, 'bolar earth,' Bolus — *t. Magnésienne,* Magnesiæ carbonas — *t. Noix,* Bunium bulbocastanum—*t. Pesante,* Baryta—*t. Sigillée,* see Bole.

TERRETTE, Glechoma hederacea.

TERRITORY, CELL, see Cell.

TER'TIAN FE'VER, *Fe'bris tertia'na, An'etus tertianus, Tritæ'us, Ter'tian* or *Third Day A'gue, Third Day Fe'ver,* (F.) *Fièvre tierce,* (from *tertius,* 'the third.') An intermittent, whose paroxysms recur every *third* day, or every 48 hours. The *mildest,* and the most *pernicious,* intermittents belong to this head. As a general rule, it is the most manageable form of ague.

A *double tertian,* (F.) *Double tierce* (*Fièvre*), has a paroxysm every day, — the paroxysms of alternate days being associated.

TERTIANARIA, (from its virtues in tertian fever,) Scutellaria galericulata.

TESSARA, (τεσσαρα, 'four.') Cuboid.

TESSELLA, (dim. of *tessera,* 'a small quadrangular stone for paving,' &c.,) Tabella.

TESS'ELLATED, *Tessella'tus,* ('furnished with small quadrangular stones.') Having a quadrangular arrangement, like a pavement. See Epithelium.

TESSERA, 'a quadrangular stone, wood,' &c. Cuboid.

TEST, DANIEL'S, (from *testis,* 'a witness,') see Docimasia pulmonum — t. Hydrostatic, see Docimasia pulmonum — t. Plouequet's, see Docimasia pulmonum — t. Static, see Docimasia pulmonum.

TESTA, 'a shell,' see Ostrea — t. Ovi, see Membrana putaminis.

TESTA PRÆPARA'TA, *Prepa'red Oys'tershell.* Oystershell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as Creta præparata.

TESTA'CEOUS, *Testa'ceus,* (F.) *Testacé,* (from *testa.*) A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See Creta.

TESTÆ FORNACEÆ, (*fornax,* gen. *forna'cis,* 'a furnace,') Bricks—t. Ostreæ, see Ostrea.

TES'TES, (pl. of *testis,* 'a witness.') The Testicles, see Testicle. Vulgarly, the *Stones, Bullocks.* A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates.*

TESTES CEREBRI, see Quadrigemina tubercula.

TES'TICLE, *Tes'tis, T. viri'lis, Testic'ulus, Or'chis, Po'mum amo'ris, Did'ymus, Androu'rium, Her'nia, Gem'ini* (pl.), *Gemelli* (pl.), *O'vum, Codling,* (F.) *Testicule,* (dim. of *testis,* because the testicles are 'witnesses' of virility.) The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. The substance of the testicle consists of numerous conical, flattened lobules — *lob'uli testis* — whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tu'buli* seu *Canalic'uli seminif'eri* seu *semina'les, Vasa semina'lia, Vas'cula serpenti'na,* folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opake white colour, and very tough, called *Tu'nica Albugin'ea,* or, simply, *Albugin'ea, Perites'tis,* (F.) *Pérididyme,* of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

TESTICLE, SWELLED, Hernia humoralis.

TESTICONDUS, (*testis,* and *condere,* 'to hide,') Crypsorchis.

TESTIC'ULAR, *Testicula'ris,* (F.) *Testiculaire.* Belonging or relating to the testicle.

TESTICULE, Testicle.

TESTICULUS, Testicle — t. Accessorius, Epididymis—t. Caninus, Orchis mascula.

TESTIMO'NIUM MATURITA'TIS. 'Evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

TESTIS, Testicle — t. Femineus, Ovary—t. Irritable, Orchidalgia—t. Minor, Prostate—t. Muliebris, Ovary — t. Virilis, Testicle.

TESTITIS, (from *testis,* and *itis,*) Hernia humoralis.

TESTUDINATIO CRANII, 'arched like the back of a tortoise,' (from *testudo,*) Camarosis.

TESTU'DO, gen. *Testu'dinis,* (from *testa,* 'a shell,') *Chelo'nē,* (F.) *Tortue.* A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a testudo; *Emphy'ma encys'tis gang'lion.* See Talpa.

TESTUDO CEREBRI, Fornix — t. Scapulæ, see Scapula.

TETE, (teat,) Nipple.

TETAN'IC, *Tetan'icum, Spas'ticum, Convulsi'vum, Convul'sive,* (F.) *Tétanique,* (from *tetanus.*) A remedy which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica, Strychnia, Brucia, Arnica,* and *Toxicodendron.*

Also, an epithet for a tonic convulsion.

TETANIN, Strychnia.

TETANIUM, Strychnia.

TETANIZA'TION, *Tetanisa'tio.* The production or condition of tetanic spasms, in which the patient is said to be *tet'anized.*

TETANOMATA, (τετανωματα,) Tetanothra.

TÉTANOS, Tetanus.

TETANO'THRA, (τετανωθρα,) *Tetanom'ata, Erugato'ria,* (from τετανος, 'stretched, free from wrinkles.') Medicines which remove wrinkles.

TET'ANUS, (τετανος, 'stretched,' from τεινω, 'to stretch.') *Spasm with rigid'ity, Convul'sio In'dica, Holoton'ia, Holoton'icus, Holotet'anus, Tet'anus universa'lis, Ri'gor nervo'sus* seu *nervo'rum, Exten'sio* seu *Disten'sio, Enta'sia tet'anus, Cat'ochus cervi'nus* seu *holoton'icus,* (F.) *Tétanos, Mal de cerf.* A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthot'onus*), sometimes backwards (*Opisthot'onus*), and sometimes to one side (*Pleurothot'onus*). When tetanus is confined to the muscles of the jaws, it is called *Tris'mus.* It is a most formidable affection. The means of treatment are: — copious and repeated blood-letting; bathing, cold and warm; powerful doses of opium, and anæsthetics. In *Traumat'ic Tetanus,* or that which supervenes on a wound, every extraneous matter must, of course,

be removed from the wound, and soothing applications be made to it.

Tetanus Anticus, Emprosthotonus — t. Dolorificus, Cramp — t. Dorsalis, Opisthotonus — t. Lateralis, Pleurothotonus — t. Maxillæ inferioris, Trismus—t. Posterganeus, Opisthotonus—t. Posticus, Opisthotonus—t. Universalis, see Tetanus.

TETARTÆUS, (τεταρταιος, 'occurring on the fourth day,' from τεταρτος, 'the fourth,') Quartan.

TETARTOPHU'ÏA, (τεταρτος, 'the fourth,' and φυω, 'I arise.') *Quarta'nus remit'tens.* A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, (from [L.] *testa*, 'the skull,') Caput, Head—*t. de Veau*, Elephantiasis of the Greeks.

TETRA, (τετρα, 'four,') in composition, four.

TETRADRACH'MON, (τετραδραχμον, from *tetra*, and δραχμη, 'a drachm.') A weight of four drachms or half an ounce.

TETRAGONUS, (τετραγωνος, from *tetra*, and γωνια, 'an angle,') Platysma myoides.

TETRAHIT LONGIFLORUM, Galeopsis grandiflora.

TETRAMASTHUS, (*tetra*, and μαστος, 'a breast,') Quadrimammatus.

TETRA'MYRON, (τετραμυρον, from *tetra*, and μυρον, 'an ointment.') An ointment of four ingredients.

TETRANGURIA, (*tetra*, and *anguria*,) Cucurbita citrullus.

TETRANTHERA PICHURIM, (*tetra*, and ανθηρα, 'anther,') Pichurim beans.

TET'RAO COTUR'NIX, (after τετραξ,) *Cotur'nix*, the *Quail*, (F.) *Caille: Class*, Aves; *Ord.* Gallinaceæ. The quail is an esteemed article of diet. The Greek name is ορτυξ, gen. ορτυγος; and the places, called *Ortyg'ia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHAR'MACUM, (*tetra*, and φαρμακον, 'a medicine.') A medicine consisting of four ingredients.

TETRAS'CELUS, (*tetra*, and σκελος, 'leg.') A monster having four legs.

TETROB'OLON, (τετρωβολον, from τετρα, and οβολος, *obolus*.) The weight of four oboli or two scruples.

TETROROS, (τετρωρος,) Astragalus.

TETTER, ([Sax.] τετεη,) Herpes—t. Crusted, Impetigo—t. Honeycomb, Porrigo favosa—t. Humid, Eczema impetigo—t. Milky, Porrigo larvalis—t. Pustular, Impetigo—t. Running, Impetigo—. Scaly, Psoriasis.

TETTERWORT, Chelidonium majus.

TEUCRIUM ÆGYPTIACUM, (τευκριον, after Teucer,) T. capitatum—t. Belium, T. capitatum.

Teu'crium Capita'tum, *T. Bel'ium* seu *Ægypti'acum*, *Po'lium Capita'tum*, *Po'ley Moun'tain of Montpel'lier*, *Ord.* Labiatæ, is, generally, substituted for T. chamædrys. The common *Poley Mountain* is the *Teucrium monta'num*; and the *Gold'en Po'ley Moun'tain*, the *Teu'crium Po'lium*, *Po'lion*.

Teucrium Chamæ'drys, *T. officina'lē*, *Chamædrys*, *C. mi'nor re'pens* seu *vulga'ris*, *Quer'cula mi'nor* seu *Calamandri'na*, *Trissa'go*, *Chamædrops*, *Trixa'go*, *Com'mon*, *Creeping* or *Small German'der*, *English Treacle*, (F.) *Petit chêne*, *Chênette*, *Germandrée officinale*. This is possessed of aromatic and bitter properties. The dose of the dried powder is from ℥ss to ℥j.

Teucrium Chamæ'pitys, *Chamæpitys*, *Arthet'ica*, *Arthret'ica*, *Aju'ga*, *A.* seu *Bu'gula Chamæpitys*, *Abi'ga*, *Chamæmo'rus*, *I'va arthrit'ica*, *Holoc'yron*, *Io'nia*, *Sideri'tis*, *Com'mon Ground'pine*, (F.) *Petite Ivette*. Properties like the last. The tops and leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

Teucrium Cret'icum, *T. hyssopifo'lium* seu *Rosmarinifo'lium*, *Rosmari'nus stœ'chadis fa'cie*, *Poley-mountain of Candy*, *Po'lium Cret'icum*. The tops and whole herb enter into the old compounds, *Mithridate* and *Theriaca*. It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

Teucrium Fla'vum has similar properties to T. chamædrys.

Teucrium Hyssopifolium, T. Creticum.

Teucrium I'va, *Chamæ'pitys moscha'ta*, *I'va*, *I. moscha'ta Monspelien'sium*, *Chamæpitys anthyl'lus*, *French Ground'pine*, (F.) *Ivette musquée*. It has similar virtues to T. Chamæpitys, but is weaker.

Teucrium Maritimum, T. Marum.

Teucrium Ma'rum, *T. mari'timum*, *Ma'rum Syri'acum* seu *Cret'icum* seu *ve'rum* seu *Cortu'si*, *Majora'na Syri'aca*. *Chamæ'drys.inca'na mari'tima* seu *ma'rum*, *Orig'anum Syri'acum*, *Ma'rum german'der*, *Syr'ian herb mas'tich*, *Cat thyme*, (F.) *Marum* ou *Germandrée maritime*, *Herbe aux chats*. A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

Teucrium Officinale, T. chamædrys — t. Palustre, T. scordium — t. Pyramidale, Ajuga — t. Rosmarinifolium, T. Creticum.

Teucrium Scor'dium, *T. palus'trē*, *Scor'dium*, *Trissa'go palus'tris*, *Chamæ'drys palus'tris* seu *scor'dium*, *Al'lium red'olens*, *Wa'ter German'der*, (F.) *Germandrée scorodone*, *Sauge des bois*, *Germandrée aquatique*. The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other Teucria.

TEXTUM INTERLOBULARE, (*texere*, *textum*, 'to weave,') Interlobular tissue.

TEXTURA, Texture—t. Organica, Histos.

TEX'TURAL, *Textura'lis*. Relating or appertaining to a texture.

TEX'TURE, *Textu'ra*, *Tex'tus*, (from *texere*, *textum*, 'to weave.') *Te'la*, *Hy'phа*, *Hy'phē*. The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue — t. Cellulosus, Cellular tissue — t. Desmosus, Desmoid tissue — t. Erectilis, Erectile texture — t. Nervorum, Plexus nervorum — t. Organicus, Cellular tissue — t. Papillaris, Corpus papillare—t. Parenchymalis, Cellular tissue.

THÆRIA (θηρ, 'a wild animal,') Radzyge.

THAL'AMUS, pl. *Thal'ami*, (θαλαμος,) (F.) *Couche*. 'A room or chamber; a bed.' The place in which a nerve originates, or has been considered to originate.

Thalami Nervo'rum Optico'rum seu Op'tici, *Eminen'tiæ mag'næ cer'ebri*, *Gan'glia cer'ebri posti'ca*, *Cru'ra medul'læ oblonga'tæ* (of some,) *Stria'ta cor'pora super'na posterio'ra*, *Collic'uli nervo'rum optico'rum*, *Op'tic thal'ami*, *Poste'rior cer'ebral gan'glion*, (F.) *Couches des nerfs oculaires* (Ch.), *C. des nerfs optiques*, *C. optiques*. Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly from the corpora quadrigemina or optic lobes; and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cérébral inférieur*. They are, also, called *Poste'rior gan'glion of the cer'ebrum*. From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of

the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissu'ra mollis*. The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus op'tici*.

THALAMUS REGALIS, Pericardium.

THALASSOLUTRUM, (θαλασσα, 'sea,' and λουτρον, 'a bath,') Bath, sea.

THALASSOM'ELI, (θαλασσα, 'sea,' and μελι, 'honey.') A cathartic medicine, composed of equal parts of sea water, honey, and rain water, exposed to the sun during the dog days in a pitched vessel.

THALIC'TRON, (θαλικτρον,) *Thalictrum, T. may'num* seu *fla'vum* seu *flaves'cens* seu *praten'sē* seu *ni'gricans* seu *rugo'sum* seu *vagina'tum, Rhabar'barum pau'perum, Mead'ow rue, Poor Man's Rhu'barb,* (F.) *Pigamon jaunâtre, Rue des prés, Fausse-Rhabarbe, Rhubarbe des pauvres. Ord.* Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. The root resembles rhubarb in its properties.

THALIC'TRUM ANEMONOI'DES, *Mead'ow Rue, Rueleaved Anem'ony;* an indigenous plant, flowering in April and May.

THALLIUM, (from θαλλος, [L.] *thallus*, 'a green bud or shoot.') A metal discovered in 1861 by spectrum analysis in which it gives a very brilliant green ray. It is found in certain seleniferous and telluriferous deposits, in the native sulphur of Lipari, &c., and resembles lead physically, in its aspect, colour, density, &c., as well as its toxical action on the economy.

The salts of thallium, especially the nitrate, are very soluble.

THAMARINDUS, Tamarindus.

THAME, (thumb,) Pollex.

THANASIMUS, (θανασιμος, from θανατος, 'death,') Mortal.

THANAT'ICUS, (from *thanatus.*) Relating or appertaining to death. *Thanat'ici* (morbi) of Dr. Wm. Farr are fatal affections from violence.

THANATODES, (θανατωδης,) Mortal.

THAN'ATOID, *Thanatoï'des*, (*thanatus*, and ειδος, 'resemblance.') Resembling death. Apparently dead.

THANATOL'OGY, *Thanatolog''ia, Thnesciolog''ia,* (*thanatus*, and λογος, 'a discourse.') A treatise on, or the doctrine of, death.

THANATUS, (θανατος,) Death.

THAP'SIA, (from the island Thapsus.) The *deadly car'rot, Thap'sia ascle'pias. Family,* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The bark of the root operates violently, both upwards and downwards. It is not used.

THAPSIA SILPH'IUM. A North African plant, has similar properties. Six to ten grains of the powder produce several alvine evacuations.

THAPSIUM ACTÆIFOLIUM, (after the isle of Thapsus,) Ligusticum actæifolium.

THAPSIUM ATROPURPU'REUM, *Th. corda'tum, Roundheart. Order,* Umbelliferæ. The flowers, which appear in June, are of a dark purple.

THAPSIUM BARDINO'DĒ, *Mead'ow Par'snep.* An indigenous plant, of the Northern and Western States, which flowers in June. Flowers, yellow.

Both these plants have been esteemed vulnerary, antisyphilitic, and diaphoretic; and as antidotes to the bite of a rattlesnake.

THAPSIUM CORDATUM, T. atropurpureum.

THAPSUS BARBATUS, Verbascum nigrum.

THARSI, see Tarsus.

THIE, Thigh.

THÉ, Thea—*t. des Apalaches*, Ilex vomitoria—*t. du Canada*, Gaultheria—*t. d'Europe*, Salvia veronica—*t. de France*, Salvia—*t de Jersey*, Celastrus—*t. de la Mer du Sud*, Ilex vomitoria—*t. du Mexique*, Chenopodium ambrosioides—*t. de Simon Pauli*, Myrica gale—*t. Suisse*, Falltrank.

THE'A, (Chinese tcha,) *Cha'a, Tea,* (F.) *Thé.* There are two principal varieties of teaplant; *Thea Sinen'sis*, the *Thea Bohe'a;* and *Thea viridis;* the *black tea*, and the *green. Ord.* Camelliceæ. *Sex. Syst.* Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Teadrinking was introduced into Europe about the year 1666; since which time its use has become almost universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncrasies, entirely harmless. It is not unfrequently adulterated. See Falsifications, table of.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea, Mint tea*, &c.

THEA GERMANICA, Veronica.

THEBE'SIUS, VEINS OF. A name given to supposititious branches of the coronary veins, which Cristopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foram'ina Thebe'sii.* No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Val'vula Thebe'sii, V. Guiffartia'na, V. ve'næ mag'næ.*

THECA, (θηκη,) Case, Vagina, Sheath—t. Cerebri, Cranium—t. Cordis, Pericardium—t. Folliculi, see Folliculi Graafiani—t. Vertebralis, see Vertebral canal.

THE'CAL, *Theca'lis*, (from *theca*, 'a sheath.') Relating or appertaining to a sheath,—as of a tendon.

THECI'TIS, (*theca*, and *itis.*) A term, of hybrid formation, signifying inflammation of the sheaths of tendons.

THEIN, (from *thea,*) see Coffea Arabica.

THEION, (θειον,) Sulphur.

THEIOPEGÆ, (*theion*, and πηγη, 'a spring,') Waters, mineral (sulphureous.)

THEIOTHERMÆ, (*theion*, and θερμη, 'heat,') Waters, mineral (sulphureous.)

THELASIS, (θελαζω, 'to give suck,') Lactation.

THELASMUS, (θηλασμος,) Lactation.

THELASTRIA, (θηλαστρια,) Nurse.

THELE, (θηλη,) Mamma, Nipple.

THELI'TIS, (F.) *Thélite*, (*thele*, and *itis.*) Inflammation of the nipple.

THELONCUS, (*thele*, and ογκος, 'a swelling,' Mastoncus.

THELORRHAG''IA, (*thele*, and ῥαγη, 'a rupture.') Hemorrhage from the nipple.

THELYGON'IA, (θηλυς, 'female,' and γονη 'generation.') The part taken by the female in the act of generation. The procreation of female children. Also, nymphomania.

THELYGONUM, (θηλυς, 'female,' and γονη, 'sperm,') Sperm (of the female.)

THELYPTERIS, (θηλυς, 'female,' and *pteris,*) Pteris aquilina.

THENAD, Thenal.

THE'NAL, *The'nar*, (from *thenar.*) Relating or appertaining to the thenar.

THENAL AS'PECT. An aspect towards the side on which the thenar is situated.—(Barclay.) *Thenad* is used adverbially, by the same writer, to signify 'towards the thenal aspect.'

THE'NAR, (θεναρ, from θενω, 'I strike,' 'I push.') The palm of the hand, or sole of the foot.

THENAR, Flexor brevis pollicis manus, Palm.

THENAR or THENAL EM'INENCE is the projection at the anterior and outer part of the hand formed by the abductor brevis, opponens, and flexor brevis pollicis.

THENAR or THENAL MUS'CLE. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the interior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenal muscle* to the abductor and flexor brevis pollicis pedis.

THEOBROMA CACAO, (Θεος, 'God,' and βρωμα, 'food,') Cacao.

THEOMANIA, (Θεομανια, from Θεος, 'God,' and *mania*.) Demonomania.

THEOPLEGIA, (Θεος, 'God,' and πληγη, 'a stroke,') Apoplexy.

THEOPLEXIA, (Θεος, 'God,' and πλησσω, 'to strike,') Apoplexy.

THEORET'ICAL, (Θεορητικος,) *Theoret'icus*, *Theo'ricus*, (Θεωρεω, 'I contemplate.') (F.) *Théorétique*, *Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THEORIA, (Θεωρια,) Theory.

THÉORIQUE, Theoretical.

THE'ORY, (Θεωρια,) *Theo'ria*, (F.) *Théorie*. The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. Theory regards nature as it is, and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

THEORY OF MED'ICINE, *In'stitutes of Med'icine*, *Theoret'ical Med'icine*, is that part of the science which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some they are considered to include General Pathology and General Therapeutics.

THERAPEIA, (Θεραπεια,) Curation, Therapeutics.

THERAPEUSIS, Therapeutics.

THERAPEUTA, (Θεραπευτης,) Therapeutist.

THERAPEUTER, (Θεραπευτηρ,) Therapeutist.

THERAPEUTES, (Θεραπευτης,) Therapeutist.

THERAPEU'TICAL, *Therapeu'ticus*. Relating or appertaining to Therapeutics.

THERAPEUTICE, (Θεναπευτικη, [τεχνη,]) Therapeutics.

THERAPEU'TICS, *Therapeu'ticē*, *Therapeu'sia*, *Therapeu'sis*, *Iatrotech'nicē*, *Therapei'a*, *Therapi'a*, *Curato'ria Meth'odus*, *Methodus Medend'i*, *Prac'tice of Phys'ic*, (F.) *Thérapeutique*, *Thérapie*, (from Θεραπευω, 'I wait upon, I alleviate, I attend upon the sick.') That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THERAPEUTICUS, Therapeutical.

THÉRAPEUTIQUE, Therapeutics.

THERAPEU'TIST, *Therapeu'ta*, *Therapeu'tes*, *Therapeu'ter*. One who practices therapeutics. A practitioner of medicine. To be a good therapeutist, a man must be well versed in every department of medicine, and capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practice well unless he is both. Hence, the comparatively small number of good therapeutists.

THERAPIA, (Θεραπεια,) Therapeutics.

THÉRAPIE. Therapeutics.

THERIA, (Θηρ, 'a wild animal,') Radzyge.

THERIAC, Theriaca — t. of Antipater, Antipatri theriaca.

THERI'ACA, (Θηριακα,) *The'riac*, (from Θηρ, 'a ferocious or venomous animal,') *Tre'acle*, *Melus'ses*, (F.) *Thériaque*. Also, a medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *The'riac* and *The'riacal* have been used adjectively for medicinal.

THERIACA ANDROM'ACHI, *Con'fice Trea'cle*, is an ancient *alexipharmic electuary*; consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, long held its place in their Codex, with even an additional number of ingredients. The *Electua'rium Opia'tum polypharmacum* of the Codex has contained *acid ingredients*, 5; *astringent*, 5; *bitter*, 22; *indigenous aromatics*, 10; *umbelliferous aromatics*, 7; *balsams and resinous substances*, 8; *fetid ingredients*, 6; *narcotics*, 1; *earthy substances*, 1; *gummy* or *amylaceous*, 4; *saccharine*, 3; total, 72! and one of these the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

THERIACA ARTICULORUM, Colchicum — t. Celestis, Tinctura opii — t. Communis, Melasses — t. Edinensis, Confectio opii.

THERIACA GERMANO'RUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINEN'SIS, *Cataplas'ma Cymi'ni*. A cataplasm of *cumin seed*, *bay berries*, *germander*, *snakeroot*, *clores*, *honey*, and sometimes *opium*, or *syrup of poppies*.

THERIACA RUSTICORUM, Allium.

THERIAKI. In Turkey, *opium-eaters*, or they who indulge largely in the use of opium, are so called.

THÉRIAQUE, Theriaca.

THERIATRICA, (Θηρ, 'an animal,' and ιατρεια, 'medicine.') Veterinary art.

THERIODES, (Θηριωδης, from Θηρ, 'a venomous animal,' and *odes*,) Ferine.

THERIO'MA, gen. *Therio'matis*, *The'rion*, (Θηριωμα, from Θηρ, 'a venomous animal,' and *oma*.) Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

THERION, (Θηριον,) Therioma.

THERIOTOMY, (Θηρ, 'an animal,' and τεμνειν, 'to cut,') Zootomy.

THERMA, (Θερμη,) Heat—t. Emphytum, Animal heat.

THERMÆ, pl. of *therma*, (Θερμαι.) Warm baths or springs. See Waters (mineral).

THERMÆ FABARIÆ, Pfeffers, Mineral Waters of — t. Piperinæ, Pfeffers, Mineral Waters of — t. Plumbariæ, Plombières, Mineral Waters of.

THER'MAL, *Therma'lis*, (from *therma*.) Relating or appertaining to heat. Hot, warm,—as 'a *thermal* mineral water.'

THERMANTICA, (Θερμαντικα,) Calefacients.

THERMASMA, gen. *Thermasm'atis*, (Θερμασμα,) Fomentation.

THERMOLUSIA, (*therma*, and λυω, 'to wash,') Bath, warm.

THERMOMETER, (*therma*, and μετρον, 'measure,') see Heat.

THERMOTHERAPEI'A, (*therma*, and *therapeia*, 'treatment of disease.') Treatment by means of heat, and especially of hot air.

THERMUM EMPHYTUM, (*therma*, and εμφυτος, 'innate.') Animal heat, Biolychnium.

THE'SIS, (θεσις, 'a proposition,' from τιθημι, 'to put.') 'A position or proposition.' *Disputa'tio inaugura'lis, Inaug'ural Disserta'tion.* The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these. In many universities, of Germany especially, the *Disputatio inauguralis* is the public dissertation; whilst the *Theses* are questions put to the candidate, and answered in writing, in the Latin language.

THEVE'TIA AHOUAI, (after Andrew Thevet, a French monk, who travelled in Brazil in the 16th century.) *Ahouai.* The kernels of the nut of this Brazilian tree are said to be a violent poison. In the Antilles its nuts are called *Noix de Serpent;* and they are used against the bites of serpents.

THEW, ([Sax.] θeop,) Tendon.

THEY, Thigh.

THICKLISTED, Pursy.

THIGH, ([Sax.] θeoh,) *Fe'mur, Fe'men, Crus, Me'rus, Me'rium,* (Sc.) *The, They,* (F.) *Cuisse.* (Of old, *Fe'mur* meant the thigh generally, and especially the outer part,—*Fe'men,* the inner.) The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part. and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above,* it is bounded, *anteriorly,* by the groin; *externally,* by the hip; *behind,* by the fold of the nates; and *within,* by the perineal region. *Below,* it is bounded, *anteriorly,* by the prominence of the knee; *posteriorly,* by the ham. It is formed of a considerable number of muscles, bloodvessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur—t. Neck of the, Collum femoris.

THIMBLEWEED, Rudbeckia laciniata.

THION, (θειον,) Sulphur.

THIRST, ([Sax.] θyrst,) *Si'tis, Dip'sa, Potio'nis deside'rium,* (F.) *Soif.* A simple desire for, or absolute want of liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the mouth and fauces from suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system,—a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation,*—an *instinctive want,*—arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia — t. Morbid, Dipsosis.

THIRSTY, Dipsodes.

THISTLE, BLESSED, ([Sax.] θistel,) Centaurea benedicta—t. Cotton, Onopordium acanthium — t. Globe, Echinops — t. Holy, Centaurea benedicta—t. Ladies', Carduus Marianus—t. Milk, common, Carduus Marianus—t. Pine, Atractylus gummifera — t. Sow, Sonchus oleraceus — t. Star, Centaurea calcitrapa — t. Yellow, Argemone Mexicana.

THLADIAS, (θλαδιας, from θλαω, 'to crush.') Eunuch.

THLASIAS, (θλασιας,) Eunuch.

THLASIS, (θλασις,) Contusion — t. Depressio, Depression.

THLASMA, gen. *Thlasm'atis,* (θλασμα,) Contusion — t. Concussio, Concussion — t. Stremma, Sprain.

THLAS'PI, (θλασπις.) *Pen'nycress. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliculosa. Two species of thlaspi are directed in some pharmacopœias for medical use:— *Thlaspi arven'sē* or *Tre'acle mus'tard;* and *Thlaspi campes'trē* seu *hirsu'tum* seu *vulga'tius, Lepid'ium campes'trē, Lep'ia* seu *Ibe'ris campes'tris, Mith'ridate mus'tard.* The pharmaceutical properties of both kinds resemble those of common mustard.

THLASPI BUR'SA, *Th. bursa'tum, Thlaspi* seu *Capsell'a* seu *Ibe'ris* seu *Nastur'tium* seu *Rodschied'ia bur'sa pasto'ris, Bur'sa pasto'ris, Shepherd's purse, Co'cowort, St. James's wort, Poor man's Parmaciti'y,* (F.) *Fleur de St. Jacques, Bourse à berger* ou *à pasteur, Tabouret.* A common European plant, introduced into this country. It is slightly astringent, but is little used.

THLASPI BURSATUM, Thlaspi bursa — t. Nasturtium, Lepidium sativum — t. Sativum, Lepidium sativum.

THLIBIAS, (θλιβιας, from θλιβω, 'to crush,') Eunuch.

THLIPSENCEPHALIA, see Derencephalia.

THLIPSENCEPH'ALUS, (θλιψις, 'compression,' and εγκεφαλος, 'the encephalon.') A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital, region, a distinct fontanelle not existing.

THLIP'SIS, (θλιψις,) *Compres'sio.* Compression, and especially constriction of vessels by an external cause. Oppression.

THNESCOLOGIA, (θνησκω, 'to die,' and λογος, 'a discourse,') Thanatology.

THNÉTOBLASTE, (θνητος, 'mortal,' and βλαστος, 'germ.') A term proposed by M. Robin for the heteromorphous and anatomical element of the different tumours called 'cancerous.'

THNÉTOBLASTIQUE, Cancerous.

THOLUS, (θολος, 'a vaulted chamber,') Achiculum—t. Diocleus, Scapha.

THOMSO'NIAN. One who practises or believes in Thomsonianism.

THOMSO'NIANISM, *Thom'sonism.* A fanciful doctrine, of which a person of the name of Thomson, of New England, is the founder. One of its leading principles is, that the human body is composed of four *elements* [?], earth, air, fire, and water; and one of its apothegms, that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thomsonians are Botanical Doctors. See Herb doctor.

THORACENTESIS, *Thoracocentesis.*

THORACHIQUE, Thoracic.

THORAC''IC, *Thorac''icus,* (from *thorax,*) (F.) *Thoracique* ou *Thorachique.* That which relates or belongs to the chest—as *Thoracic vis'cera,* &c.

THORACIC INFE'RIOR AR'TERY, *Arte'ria Thorac''ica Exter'na Infe'rior* seu *Lon'ga* seu *Mamma'ria externa* seu *Thorac''ica infe'rior,* (F.) *Deuxième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the latter part of the thorax, and the serratus major anticus. It afterwards bends inwards, becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

THORACIC SUPE'RIOR AR'TERY, *Arte'ria Thoracica Exter'na Supe'rior,* (F.) *Artère thoracique supérieure, Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial, and descends forwards between the Pectoralis major

and P. minor, to which it distributes itself by a great number of branches. In some subjects there are two or three *Arte'riæ thorac''icæ exter'næ superio'res.*

THORACIC DUCT, *Ductus thorac''icus* seu *thoracicus poste'rior* seu *vertebra'lis* seu *chy'lifer* seu *chy'li* seu *lac'teus* seu *ro'rifer* seu *Pecquet'i* seu *Pecquetia'nus, Ve'na al'ba thora'cis, Al'veus ampulles'cens, Distributo'ria lac'tea thorac''ica, Galax'ia, Duct of Pec'quet, Alimen'tary Duct,* (F.) *Canal* ou *Conduit Thoracique* ou *de Pecquet,* is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli,* which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

THORACIC LIMBS are the upper limbs; so called because they are articulated with the lateral and upper parts of the chest.

THORACIC, LONG OR INFERIOR, Mammary inferior external artery.

THORACIC NERVES. The *short* or *anterior thoracic nerves* are two in number. They arise from the brachial plexus, and divide into an anterior and a posterior branch; the former distributed to the pectoralis major muscle, the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thorac''ic nerve, Poste'rior thorac''ic, Exter'nal res'piratory* of Sir Charles Bell, is a long branch, which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downwards to be distributed upon the serratus magnus muscle.

THORACIC REGIONS are the different regions of the chest. Thus we say, *anterior, lateral,* and *superior thoracic,* &c.

THORACICA, (from *thorax,*) Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery.

THORACIQUE, Thoracic.

THO'RACO, (from *thorax.*) In composition, the thorax or chest.

THORACOCENTE'SIS, *Thoracente'sis, Thoracot'omy,* (*thoracо,* and κεντησις, 'puncture.') *Paracente'sis thora'cis.* Perforation of the chest to evacuate contained fluid—as in empyema.

THORACOCYSTIS, Thoracystis.

THORACODID'YMUS, (*thoracо,* and δίδυμος, 'a twin.') A monstrosity in which twins are united by the thorax.

THORACODYNE, (*thoracо,* and ὀδυνη, 'pain,') Pleurodynia.

THORACODYNIA, Pleurodynia.

THORACOFACIAL, Platysma myoides.

THOR'ACOGASTRODID'YMUS, *Did'ymus symphyothoracogas'trius, Xiphodid'ymus,* (*thoracо, γαστηρ,* 'the belly,' and δίδυμος, 'a twin.') A monstrosity in which twins are united by the chest and abdomen.

THORACO-MAXILLO-FACIAL, Platysma myoides.

THORACOMETER, (*thoracо,* and μετρον, 'measure,') Stethometer.

THORACOMYODYNIA, (*thoracо,* and *myodynia,*) Pleurodynia.

THORACOPATHI'A, (*thoracо,* and παθος, 'disease.') Disease or suffering in the chest.

THORACOSCOPIA, (*thoracо,* and σκοπεω, 'to inspect,') see Auscultation.

THORACOSCOPIUM, Stethoscope.

THORACOTOMY, (*thoracо,* and τεμνειν, 'to cut,') Thoracocentesis.

THORACYST'IS, *Thoracocyst'is,* (*thorax,* and κυστις, 'a bladder.') Encysted dropsy of the chest. Hydatids in the chest.

THO'RAX, gen. *Thora'cis,* (θωραξ, gen. θωρακος, 'a cuirass, a coat of mail,') *Cith'arus, Ven'ter me'dius, Pec'tus, Ste'thus, Scu'tum pec'toris, Bir, Che'lys, Cas'sa,* the *Breast,* the *Chest,* (F.) *Poitrine.* One of the splanchnic cavities, *Ca'vum thora'cis,* bounded, posteriorly, by the vertebræ; laterally, by the ribs and scapula; anteriorly, by the sternum; above, by the clavicle; and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation,—the lungs and the heart

THORAX, Corset.

THORE, (Θορη,) Sperm.

THORN APPLE, Datura stramonium—t. Red, Datura Sanguinea.

THOROUGHSTEM, Eupatorium perfoliatum.

THOROUGHWAX, Eupatorium perfoliatum.

THOROUGHWORT, Eupatorium perfoliatum.

THOROW-WAX, Bupleurum rotundifolium.

THORULUS STRAMINEUS, 'a straw pad,' *Fanon.*

THRÆNINE, ([G.] Thräne, 'a tear,') see Tears.

THREADWORM, Dracunculus—t. Long, Trichocephalus.

THREPSIS, (Θρεψις, from τρεφω, 'to nourish,') Assimilation, Nutrition.

THREPSOL'OGY, *Threpsolog''ia,* (*threpsis,* and λογος, 'a description.') The doctrine of, or a treatise on, the nutrition of organized bodies.

THRIDACE, (from *thridax,*) Lactucarium.

THRIDACINE, (Θριδακινη,) Lactuca.

THRIDAX, gen. *Thri'dacis,* (Θριδαξ, gen. Θριδακος,) Lactuca.

THRIFT, AMERICAN, Statice Caroliniana—t. Lavender, Statice limonium—t. Sea Side, Statice Caroliniana.

THRIX, (Θριξ, gen. τριχος,) Capillus, Hair.

THROAT, (θροτε, θροτα,) *Ju'gulum interstit''ium, Jugula'rē, Gut'ter, Spha'gē,* (Prov.) *Chokes, Droat, Hause, Hose,* (Sc.) *Halse, Hawse, Witter.* The anterior part of the neck. (F.) *Gorge.* Also, the pharynx.

THROATROOT, Geum Virginianum, Liatris.

THROATWORT, Campanula trachelium.

THROB'BING, *Pulsati'vus, Sphyg'micus, Sphygmo'des, Pul'satory,* (F.) *Pulsatif.* A *throb'bing pain,* (Prov.) *Stang,* (F.) *Douleur pulsative,* is a kind of pain which is, or seems to be, caused or augmented by the pulsation of arteries.

THROE, (from [Sax.] θρορian, 'to suffer,) Agony, Pains, labour.

THROMBI LACTEI, (pl. of *thrombus,*) Infarctus mammæ lacteus.

THROMBOCYST'IS, (*thrombus,* and κυστις, 'a cyst.') The cyst occasionally surrounding a clot of blood—as in encephalic hemorrhage.

THROMBOSIS, (Θρομβωσις, from *thrombus,* and *osis.*) Coagulation. Applied especially to coagulation of blood in a blood-vessel.

THROM'BUS, (Θρομβος, 'a clot,') *Hæmato'ma.* A small, hard, round, bluish tumour, formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of bloodletting. The thrombus is most commonly owing to the opening of the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Com-

presses, dipped in salt water, camphorated spirit, and slight compression, usually disperse it. See Blood.

THROMBUS NEONATORUM, Cephalæmatoma.

THROPILL, Trachea.

THROPPLE, Trachea.

THROTTLE, (dim. of *throat*,) Trachea.

THROW, (from [Sax.] θροῡian, 'to suffer,') Agony, Pains, labour.

THROWORT, Leonurus cardiaca.

THRUSH, Aphthæ — t. Milk, Aphthæ — t. White, Aphthæ.

THRUSTY, Dipsodes.

THRYPSIS, (θρυπτις, from θρυπτω, 'to break in pieces,') Comminution.

THUJA OCCIDENTALIS, Thuya occidentalis.

THUMB, ([Sax.] θuma,) Pollex.

THUREA, (from *thus*,) Juniperus lycia — t. Virga, Juniperus lycia.

THUS, gen. *Thu'ris*, (from θυω, 'to burn perfumes,') see Pinus abies—t. Fœminium, see Pinus abies — t. Judæorum, Croton cascarilla, Styrax, Thymiama — t. Libanotos, Juniperus lycia — t. Masculum, Juniperus lycia—t. Verum, Juniperus lycia—t. Vulgare, see Pinus abies.

THUYA APHYLLA, (θυος, 'incense,') see Sandarac.

THU'YA (θυια, from θυος, 'incense') seu THU'JA OCCIDENTA'LIS, *T. obtu'sa, Cupres'sus Ar'bor Vi'tæ, Amer'ican Ar'bor Vi'tæ, Tree of Life. Ord.* Coniferæ. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Ar'bor Vi'tæ*, is also called *Thuya*.

THYLACIŤTIS, (θυλακιον, 'a small sac,' and *itis*,) Gutta rosea.

THYM, Thymus.

THYMA, gen. *Thy'matis*, Ecthyma, Thymion.

THYMASTHMA, gen. *Thymasth'matis*, Asthma thymicum.

THYMBRA, (θυμβρα,) Satureia hortensis — t. Hispanica, Thymus mastichina.

THYME, Thymus—t. Cat, Teucrium Marum—t. Common, Thymus — t. Garden, Thymus — t. Lemon, see Thymus serpyllum — t. Mother of, Thymus serpyllum — t. Virginia, Pycnanthemum linifolium — t. Wild, Thymus serpyllum.

THYMELÆA, (θυμος, 'thyme,' and ελαια, 'the olive tree,') Daphne gnidium—t. Laureola, Daphne laureola — t. Mezereum, Daphne mezereum — t. Monspeliaca, Daphne gnidium.

THYMELCO'SIS, (*thymus*, and ἑλκος, 'an ulcer.') Ulceration of the thymus gland.

THYMIA'MA, gen. *Thymia'matis*, (θυμαμα, from θυω, 'to burn perfumes'), 'a perfume,') *Thus Judæo'rum, Muskwood*, (F.) *Narcaphthe*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax. See Lacaphthon, and Narcaphthon.

THYMIAMA, Fumigation, Suffimentum.

THYMIASIOTECHNIA, (*thymiasis*, and τεχνη, 'art,') Thymiatechny.

THYMIASIS, (θυμιασις,) Fumigation.

THYMIATECHI'NY, *Thymiatech'nia, Thymiasiotech'nia, Cu'ra fumigato'ria*, (θυμιαμα, 'a perfume,' and τεχνη, 'art.') The art of employing perfumes in medicine.

THY'MIC, *Thy'micus*, (F.) *Thymique*. Having relation to the thymus, as "*thymic* asthma."

THY'MION, (θυμιον,) *Thy'ma, Thy'mus, Por'rum, Por'rus, Verru'ca rhagoï'dea, Verru'ca mi'nor*, (from θυμος, 'thyme.') A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, (from *thymion*,) Frambœsia — t. Indica, Frambœsia.

THYMIQUE, Thymic.

THYMI'TES, (θυμιτης.) Wine impregnated with thyme.

THYMI'TIS, (θυμος, 'thymus,' and *itis*.) Inflammation of the thymus gland.

THYMOPATHI'A, *Psychopathi'a*, (θυμος, 'the mind,' and παθος, 'affection.') A disease of the mind.

THYMOS, (θυμος,) Rage, Thymus,

THYMOXAL'ME, (θυμος, 'thyme,' οξυς, 'acid,' and ἁλς, 'salt.') A compound of thyme, vinegar, and salt.

THYMUM, Thymus.

THY'MUS, (θυμος,) *Gland'ula Thy'mus, Cor'pus Thymia'num* seu *Thy'micum, Glan'dium, Thy'mus gland, Cor'pus incomprehensib'ile* of Joseph Frank, — *Sweet'bread* of the butcher. An organ, concerned in hæmatosis, which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains in a central cavity — *reservoir of the thymus* — a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thy'mic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

THYMUS, (θυμος,) *Thy'mum, T. vulga'ris* seu *tenuifo'lius* seu *horten'sis, Common* or *Garden Thyme*, (F.) *Thym, T. ordinaire, Farigoule. Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used. The volatile oil, *O'leum Thy'mi, Oil of Thyme*, is officinal in the Pharmacopœia of the United States.

THYMUS, (θυμος,) Psyche, Satureia capitata, Thymion — t. Calaminthus, Melissa calamintha — t. Capitatus, Saturcia capitata — t. Ciliatus, T. mastichina — t. Creticus, Satureia crepitata — t. Hortensis, Thymus—t. Ineludens, T. serpyllum.

THYMUS MASTICHI'NA, *T. Cilia'tus, Ma'rum vulga'rē, Clinopod'ia, Mastichi'na Gallo'rum, Thym'bra Hispan'ica, Ja'ca In'dica, Common herb Mas'tich*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*; but it is said to be less powerful.

THYMUS MULTIFLORUS, Melissa nepeta—t. Nepeta, Melissa nepeta.

THYMUS, RESERVOIR OF THE, see Thymus.

THYMUS SERPYL'LUM, *T. inclu'dens, Herpy'los, Herpyl'los, Serpyl'lum, Serpul'lum, Serpil'lum, Gila'rum, Serpyl'lum vulga'rē mi'nus, Moth'er of Thyme, Wild Thyme*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme; but has a milder and rather more grateful flavour. *Lem'on Thyme, Serpyl'lum citra'tum*, is merely a variety of *Thy'mus Serpyl'lum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVATICUS, Clinopodium vulgare — t. Sylvestris, Satureia capitata — t. Tenuifolius, Thymus — t. Vulgaris, Thymus.

THYREMPHRAXIS, (*thyreo*, and ενφραξις, 'obstruction,') Bronchocele.

THYREO, *Thyro*, (from θυρεος, 'a shield,') in composition, the thyroid cartilage or gland.

THYREOADENITIS, Thyreoitis.

THYREOÄRYT'ENOID, *Thyroärytenoïde'us*, or *Thyroärytenoïdes*. That which relates to the thyroid and arytenoid cartilages.

THYREOÄRYTENOID LIG'AMENTS, *Infe'rior Lig'aments of the Lar'ynx, Lips of the Glot'tis, Vocal*

Cards, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

Thyreoärytenoid Muscles, Thyreoärytenoïde'i, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyreoärytenoïdeus obliquus* to a portion of the *arytenoïdeus* muscle.

THYREOCELE, (*thyreo*, and κηλη, 'a tumor,') Bronchocele.

THYREOËPIGLOT'TIC, *Thyreoëpiglottide'us, Thyrepiglot'ticus*. Sabatier and Santorini have given this name to the outer portion of the thyroarytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THY'REOHY'OID, *Thyreohyoïde'us, Thyrohyoï'deus, Thyrohy'oid, Hyodeothyreo'deus*. That which belongs or relates to the thyroid cartilage and os hyoides.

Thyreohyoid, Thyrohyoid, or Hyothyroid Mem'brane is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached, above, to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage. The *lateral thyrohyoid ligaments* may be considered as the margins of the thyrohyoid membrane. They pass between the superior cornua of the thyroid cartilage to the extremities of the greater cornua of the os hyoides. A small cartilaginous or bony nodule —*cartila'go tritic''ea*—is sometimes found in each.

THYREOHYOÏDE'US or *Hyothyreoïde'us Mus'cle* is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx; or, it can depress the os hyoides.

THYREOID, Thyroid.

THYREOIDEUS, Thyroideal.

THYREOÏDIEN, Thyroideal.

THYREOI'TIS, *Thyreoïdeni'tis, Thyreoïdi'tis, Angi'na thyreoïde'a*, (*thyreo*, and *itis*.) Inflammation of the thyroid gland.

THYREONCUS, (*thyreo*, and ογκος, 'a tumor,') Bronchocele.

THYREOPHARYNGEUS, Thyropharyngeus.

THYREOPHRAXIA, (*thyreo*, and φρασσω, 'to obstruct,') Bronchocele.

THYREPIGLOTTICUS, Thyreoëpiglottic.

THYRO, in composition, see Thyreo.

THYROÄRYTENOID, Thyreoärytenoid.

THYROCELE, (*thyro*, and κηλη, 'a tumour,') Bronchocele.

THYROCRICOPHARYNGEUS, see Cricopharyngeal.

THYROHYOID, Thyreohyoid.

THYROPHARYNGOSTAPHYLINUS, Palatopharyngeus.

THY'ROID, *Thy'reoid, Thyroï'deus*, (θυρεοειδης, from θυρα, 'a gate or folding-door,' or from θυρεος, 'a shield,' and ειδος, 'form.') That which has the shape of a foldingdoor.

Thyroid Arteries, Thyroideal arteries — t. Artery of Neubauer, see Thyroidal arteries.

Thyroid Car'tilage, *Cartila'go Scutifor'mis* seu *Scuta'lis* seu *Clypea'lis, Coöperto'rium, C. Pelta'lis* seu *pelta'tus, Scu'tum, Ada'mi Mor'sus Os*, is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage, cornu supe'rius* seu *longum*; and, below, by a less prominent eminence, the *lesser cornu, Cornu infe'rius* seu *bre'vē*; which is articulated with the cricoid.

Thyroid Gland, *Cor'pus Thyreoïde'um, Glan'dula Thyreoïdea*, (F.) *Gland* ou *Corps Thyroïde*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus*. The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. They are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroidcal*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDE'AL or *Thyroid'eal, Thyroïde'us, Thyreoïde'us*, (F.) *Thyroïdien, Thyréoïdien*. That which concerns the thyroid gland or cartilage.

Thyroideal, or Thyroid Ar'teries are two on each side. 1. The *supe'rior Thyroideal, supe'rior laryngeal, superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *cricothyroid*. 2. The *inferior Thyroideal, infe'rior gut'tural*, much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens*. The inferior thyroideal artery is occasionally replaced by the *Thyroid artery of Neubauer, Artery of Neubauer*, which arises directly from the curvature of the aorta.

Thyroideal Veins are 1. A *supe'rior thyroideal*, and several *mid'dle thyroideal*, which open into the internal jugular vein. 2. An *infe'rior thyroideal*, much larger than the preceding, whose branches form — by anastomosing with those of the opposite side, in front of the trachea — a very remarkable venous plexus, which J. Cloquet calls the *infrathyroideal plexus*. The inferior thyroideal veins open, — the left into the corresponding subclavian, — the right, into the vena cava superior.

THYROÏDIEN, Thyroideal.

THYROPHARYNGE'US, *Thyreopharynge'us*. Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilages.

Thyropharyngeus, Constrictor pharyngis, see Cricopharyngeal.

THYROPHRAXIA, (*thyro*, and φρασσω, 'to obstruct,') Bronchocele.

THYRSUS, (θυρσος,) Penis.

THYSSELINUM, Peucedanum palustre — t. Palustre, Peucedanum palustre.

TIAREL'LA CORDIFO'LIA, (dim. of *τιαρα, tiara,* 'the turban of the Persian sovereigns;' from the form of the capsules,) *Coolwort.* A tonic and diuretic.

TIBI-PĒRONÉO-TARSIEN, Peronæus longus.

TIB'IA, 'a flute or pipe,' *Cne'mē, Procne'mium, Fo'cilē ma'jus, Arun'do* seu *Can'na ma'jor, Can'na ma'jor* seu *domes'tica cru'ris, Shin'bone.* The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Supe'rior* or *fem'oral extrem'ity,* which is very large, rounded, and has two eminences at the sides, called *Tuberos'ities of the Tib'ia,* or *Tib'ial tuberos'ities.* The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia,* which are articulated with the condyles of the *Os femoris.* 2. An *infe'rior* or *tar'sal extrem'ity,* having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine* or *cris'ta of the tib'ia* or *tib'ial spine.* It is the *shin.* The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

TIBIA MINIMA, Fibula.

TIBIAD, see Tibial aspect.

TIBIÆUS, Tibial.

TIB'IAL, *Tibia'lis, Tibiæ'us,* (F.) *Tib'ial, Jambier.* (From *tibia.*) That which relates to the tibia or to the leg.

TIBIAL APONEURO'SIS, (F.) *Aponévrose Jambière,* surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

TIBIAL AR'TERIES are two in number. 1. *Arte'ria Tibia'lis Anti'ca,* which arises from the popliteal, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsa'lis tar'si.* Amongst the numerous branches, given off by the tibialis antica, may be distinguished — the *Tibialis recur'rens, A. malleola'ris inter'na,* and *A. malleola'ris exter'na.* 2. *A. Tibia'lis posti'ca,* arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches—the *Plantar arteries.*

TIBIAL AS'PECT. An aspect towards the side on which the tibia is situated.—(Barclay.) *Tibiad* is used adverbially by the same writer, to signify, 'towards the tibial aspect.'

TIBIAL NERVES are two in number. 1. The *anterior tibial nerve, Prétibio-sus-plantaire,* (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve, Branche tibiale du nerf fémoro-poplitée* (Ch.), is the *internal popliteal.*

TIBIAL VEINS, ANTERIOR AND POSTERIOR, have the same arrangement as the arteries which they accompany.

TIBIA'LIS ANTI'CUS, *Cate'næ mus'culus,* (F.) *Tibio-sus-métatarsien, Tibio-sus-tarsien* (Ch.), *Jambier antérieur.* A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its points inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

TIBIALIS GRACILIS, Plantar muscle.

TIBIALIS POSTI'CUS, (F.) *Tibio-tarsien, Tibio-sous-tarsien* (Ch.), *Jambier postérieur.* This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time raising its inner edge. It, likewise, extends the leg on the foot.

TIBIO-CALCANIEN, Soleus — *t. Phalangettien,* Flexor longus digitorum pedis profundus perforans — *t. Sous-tarsien,* Tibialis anticus — *t. Sus-métatarsien,* Tibialis anticus — *t. Sus-tarsien,* Tibialis anticus.

TIB'IOTARSAL, *Tibiotar'seus,* (F.) *Tibio-tarsienne.* What relates to the tibia and tarsus.

TIBIOTARSAL ARTICULA'TION is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

TIBIO-TARSIEN, Tibialis posticus.

TIC, (from [Sax.] ꝺeozan, [G.] ziehen, 'to draw,') *Twitch'ing, Vellica'tion.* A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called *Tic convulsif* ou *Tic non douloureux, Histrion'ic Spasm of the Face, Spas'mus facia'lis,* to distinguish it from *Tic douloureux* or *neural'gia fa'ciei,* and has been termed a *par'tial chore'a* or form of *chron'ic chore'a, Chore'a fa'ciei.*

TIC DOULEUREUX, 'painful tic,' Neuralgia, facial—*t. non Douloureux,* see Tic.

TICK, ([F.] *Tique,* [G.] Zecke,) Ixodes ricinus—t. Wood, Ixodes ricinus.

TICKLE WEED, Veratrum viride.

TICK'LING, ([L.] *titillare,* [Sax.] ꝺinklan, 'to tickle,') (Sc.) *Kit'tling, Kit'illing,* (F.) *Chatouillement.* This word, sometimes, means the action of tickling (*titilla'tio, titilla'tion;*) at others, the sensation produced by this action (*pruri'tus*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypochondriac regions.

TICKSEED SUNFLOWER, Coreopsis trichosperma.

TICKWEED, Hedeoma — t. Sunflower, Coreopsis trichosperma.

TICO'REA FEBRIF'UGA; a Brazilian plant,

Order, Rutaceæ, the bark of which is intensely bitter, astringent and antiperiodic.

TICOREA JASMINIFLO'RA. A decoction of the leaves is said to be drunk by the Brazilians as a cure for frambœsia.

TIDAL AIR, (from *tide*,) see Respiration.

TIERCE, ([L.] *tertius*, 'third,') see Tertian.

TIGALA, Saccharum.

TIGE ('a stalk') *PITUITAIRE*, Infundibulum of the brain — *t. Sus-sphènoïdale*, Infundibulum of the brain.

TIGLIA SEU TIGLII GRANA, see Croton Tiglium.

TIGRETIER, see Mania, dancing.

TIKIMMA, Cacoucia coccinea.

TILBURY, MIN'ERAL WA'TERS OF. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

TIL'IA, *T. Europæ'a* seu *grandiflo'ra* seu *cordifo'lia* seu *pauciflo'ra* seu *platyphyll'a*, (akin to πτελεα, 'the elm tree,') *Phily'ra*. The *Lime*, *Lind*, or *Lin'den tree*, (F.) *Tilleul*. *Ord.* Tiliaceæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

TILIA AMERICA'NA. *T. gla'bra* seu *Canaden'sis*, *Lin'den*, *Linn*, *Bass'wood*, *White'wood*, *Spoon'wood*. A mucilage prepared by macerating the inner bark in cold water, has been applied to burns. It may be made into a cataplasm by thickening it with bran.

TILIA CANADENSIS, T. Americana — t. Glabra, T. Americana.

TILLEUL, Tilia.

TILLICHERRY CORTEX, Nerium antidysenthericum.

TILMA, gen. *Til'matis*, (τιλμα, from τιλλω, 'to pluck,') Linteum.

TILMUS, (τιλμος,) Carphologia, Evulsion.

TILY, OF THE INDIANS, Viburnum dentatum.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

TIMBRE (F.), 'the sound of a bell, (τυμπανον, from τυπτω, 'to strike' [?].) The quality of sound by which one voice, or one instrument, can be distinguished from another when producing the same note.

TIMIDUS, Rectus inferior oculi.

TIN, ([Sax.] τιν,) *Stan'num*, *Cassit'erus*, *Cattit'erus*, *Ju'piter*, *Stu'pia*, *La'os*, *Plum'bum al'bum* seu *can'didum*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7.291; giving a peculiar *tinkling* sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose, ʒj of the *Pulvis Stanni*, *Stannum granula'tum* or *Granular tin*, in molasses. (This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.)

TIN, BUTTER OF, Tin, muriate of — t. Chloruret of, Tin, muriate of—t. Deutohydrochlorate of, T. muriate of.

TINFOIL, *Stannum folia'tum*, *Stanni'olum*, is used for plugging carious teeth, &c.

TIN GLASS, Bismuth.

TIN, GRANULAR, see Tin — t. Muriate of, superoxygenated, T. muriate of.

TIN, MU'RIATE OF, *Fu'ming liq'uor of Liba'vius*, *Mu'rias Stan'ni* seu *Oxyd'uli Stan'ni*, *Stanni chlo'ridum*, *Stannum chlora'tum* seu *muriat'icum*, *Salt of Tin*, *Butter*, *Chloride* or *Deutohy'drochlo'rate* or *Superoxygena'ted Mu'riate of Tin*, (F.) *Sel d'Étain*. (This is formed of *tin*, one part; *concentrated muriatic acid*, three parts. To be crystallized by the aid of heat.) A violent cathartic. Dose, gr. ij or iij.

TIN, SALT OF, Tin, Muriate of.

TIN, SULPHURET OF, Aurum musivum.

TINAGMUS, (τιναγμος,) Concussion.

TINASMUS, Tenesmus.

TINCTU'RA, (from *tingere*, *tinctum*, 'to dye.') *Tinc'ture*, *Essen'tia*, (F.) *Teinture Alcoolique*, *Alcoolé*, *Alcohol*, *Alcoolature*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintessence*, in one of its old significations; and with the *Alcoola'tum* of the *Codex* of Paris. It is not unusual, however, to speak of *a'queous tinc'ture*, *ethe'real tinc'ture* (*Éthérolature*, Béral), &c. Tinctures are usually made either with pure alcohol or proof spirit. The former are precipitated by water; and, thefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.

TINCTURA ABSIN'THII COMPOS'ITA, *Essen'tia absin'thii compos'ita* seu *ama'ra*, *Com'pound Tinc'ture of worm'wood*. (*Absinth.*, *Artem. pontic.*, *Caryoph.* āā ʒss. *Sacch.* ʒij, *Alcohol.* Oss. Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and carminative. Dose, fʒij to fʒss.

TINCTURA ACACIÆ CATECHU, T. catechu — t. Acetatis ferri cum alcohole, see T. ferri acetatis —t. Acidi sulphurici, Sulphuricum acidum aromaticum.

TINCTURA ACONI'TI, (Ph. U. S. 1842.) *Tinctu'ra Aconi'ti folio'rum*, (Ph. U. S. 1851.) *T. A. Fo'lii*, (Ph. U. S. 1863.) *Tincture of Ac'onite*, (*Aconit. folior.* ʒiv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S.) Dose, gtt. xx or xxx. It is rubbed on the seat of neuralgia.

TINCTURA ACONI'TI RADI'CIS, *Tinc'ture of Aco'nite root*, (*Aconit. radicis* contus. ℔j, *Alcohol.* Oij. Macerate for 14 days; express and filter. It may also be prepared by displacement. Ph. U. S.) Uses same as the last.

TINCTURA ÆTHE'REA CAMPHORA'TA, *Solu'tio cam'phoræ æthe'rea*, *Li'quor nervi'nus Bang'ii*, *Spiritus sulphu'rico-æthereus camphora'tus*, *Naph'tha vitri'oli camphora'ta*. (*Camphor.* p. i. *Æther sulphuric.* p. ii.) Stimulant in atonic diseases, arthritic cardialgia, and spasm. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHEREA FERRI, Alcohol (seu Tinctura) sulphurico-æthereus ferri — t. Alcoholica Chinæ composita, T. cinchonæ composita—t. Alcoholica corticum aurantiorum Whyttii, Tinctura cinchonæ amara — t. Alexipharmaca Huxhami, Tinctura cinchonæ composita.

TINCTURA AL'OÉS, *T. Al'oës Socotori'næ*, *Essen'tia Aloes*, *Al'cohol cum Al'oë perfolia'tâ*, *Tinc'ture of Aloes*. (*Aloes*, pulv. ʒj, *Ext. glycyrrh.* ʒiij, *Aquæ* Oiss, *Alcohol.* Oss. Macerate for 14 days, and filter. Ph. U. S.) Properties, those of aloes. Dose, fʒss to fʒiss.

TINCTURA ALOËS ÆTHE'REA, *T. Aloës vitriola'ta*, *Æthe'real Tinc'ture of Al'oes*. (*Aloes Socot.*, *Myrrh.*, āā ʒiss, *Croci* ʒj, *Sp. ætheris sulph.* Oj. Digest the myrrh in the ether for 4 days; then

add the aloes and saffron. *Ph. E.*) Stimulant and cathartic. Dose, f℥j to f℥ij.

TINCTURA AL'OËS COMPOS'ITA, *Elix'ir Proprieta'tis* seu *Proprieta'tis Paracel'si* seu *aperitif'vum* seu *Al'oës*, *Tinctu'ra Al'oës cum Myr'rhâ* seu *Aloës et Myr'rhæ* (Ph. U. S.) seu *Al'oës et Myr'rhæ croca'ta*, *Elix'ir of long-life*, *Com'pound Tinc'ture of Al'oes*, (F.) *Elixir de longue vie*, *Baume de vie de Lelièvre*, (*Aloës*, in pulv., ℥iij, *Croci*, ℥j, *Tinct. Myrrhæ*, Oij. Macerate for 14 days, and filter.) Purgative and stomachic. Dose, f℥j to f℥ij.

Boer'haave's Elix'ir consisted of *aloes*, *myrrh*, *saffron*, and *tartrate of potassa*, digested in *alcohol* and *water*.

Rad'cliffe's Elix'ir is formed of *Aloes socotr.* ℥vj, *Cort. cinnam.*, *Rad. zedoar*, āā ℥ss, *Rad. rhei* ℥j, *coccinell.* ℥ss. *Syrup. rhamni* ℥ij, *Sp. tenuior.* Oj. *Aquæ puræ* f℥v.

TINCTURA ALOES ET MYRRHÆ, T. aloes composita — t. Aloes et myrrhæ crocata, T. A. composita — t. Aloes vitriolata, T. A. ætherea — t. Amara, T. gentianæ composita — t. Ammoniæ composita, Spiritus ammoniæ succinatus — t. Amomi repentis, T. cardamomi — t. Amomi zingiberis, T. zingiberis.

TINCTURA ANGUSTU'RÆ, *T. Cuspa'riæ*, *Tinc'ture of Angustu'ra.* (*Cort. cuspar.* in pulv. crass. redact. ℥ij, *Sp. vin. ten.* Oij. Digest. *Ph. D.*) Dose, f℥j to f℥ij.

TINCTURA ANTIFEBRILIS WARBURGI, see Bebeeru.

TINCTURA ANTIODONTAL'GICA, *Tooth'ach Tinc'ture.* (*Tannin.* ℈j, *Mastich.* gr. v, *Æther*, ℥ij. M.) To be applied on cotton wool to the tooth previously dried.

TINCTURA ARISTOLOCHIÆ SERPENTARIÆ, T. serpentariæ.

TINCTURA AR'NICÆ, *Tincture of Ar'nica.* (*Arnic.* ℥vj; *Alcohol.* Oiss; *Aq.* Oss; *Alcohol. dilut.* q. s. Mix the alcohol and water, and bruise the arnica, slightly moistened with the mixture, thoroughly in a mortar; pack it firmly in a percolator and pour on first the remainder of the mixture, and then sufficient Diluted Alcohol to measure two pints. Ph. U. S. 1863.) Dose, gtt. v to x. Applied, diluted with an equal proportion of water, by means of lint, as an excitant to bruises, and in cases of neuralgia. *Tinctura Arnicæ* of the British Pharmacopœia (1864), made by percolation, from the root — the U. S. preparation, being from the flowers—is much weaker.

TINCTURA AROMATICA, T. cinnamomi composita — t. Aromatica ammoniata, Spiritus ammoniæ aromaticus.

TINCTURA ASSAFŒ'TIDÆ, *T. Fer'ulæ Assafœtidæ*, *T. fœ'tida* seu *assafœtidæ*, *Tinc'ture of Assafet'ida.* (*Assafœtid.* ℥iv, *Alcohol.* Oij. Macerate for 14 days and filter. *Ph. D.*) Dose, gtt. xv to f℥j.

TINCTURA ASSAFŒTIDÆ AMMONIATA, Spiritus Ammoniæ fœtidus.

TINCTURA AURAN'TII, *T. Cor'ticis Aurantii*, *Tinc'ture of Or'ange Peel.* (*Aurant. cort.* recent. ℥iij, *Sp. rect.* Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f℥ss to f℥ij.

TINCTURA AUREA, Alcohol (sen tinctura) sulphuricoæthereus ferri.

TINCTURA BELLADON'NÆ, *Tinc'ture of Belladon'na.* (*Belladonnæ*, ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days; express, and filter through paper. It may, also, be prepared by displacement. Ph. U. S. Dose, gtt. xv to xxx.

Tinctura Belladonnæ of the British Pharmacopœia (1864), made by percolation, is half the strength of the above.

TINCTURA BENZO'INI COMPOS'ITA, *T. Ben'zoës composita*, *Bal'samum Cathol'icum* seu *Per'sicum* seu *traumat'icum*, *Elix'ir traumaticum*, *Bal'samum Commendato'ris*, *Com'pound Tinc'ture of Ben'zoin*, *Fri'ar's or Ver'vain's Bal'sam*, *Wade's* or *Jes'uit's drops*, *Commander's* or *Wound Balsam*, *Balsam for Cuts.* (*Benzoin.* ℥iij, *Styrac. purif.* ℥ij, *Balsam. tolut.* ℥j, *Aloes*, in pulv. ℥ss, *Alcohol.* Oij. Macerate for 14 days and filter. Ph. U. S.) Stimulant. Used chiefly to wounds and ulcers.

The basis of *Tur'lington's Bal'sam of Life*, *Tur'lington's Bal'sam*, is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy: — *Alcohol.* Oviij, *Benzoin.* ℥xij, *Styrac. liquid.* ℥iv, *Aloes Socotrin.* ℥j, *Balsam. Peruvian.* ℥ij, *Myrrhæ*, ℥j, *Rad. Angelic.* ℥ss, *Balsam. Tolut.*, *Ext. Glycyrrh.* āā ℥iv. Digest for 10 days, and strain.

The *Es'sence of Colts'foot* consists of equal parts of the *Compound Tincture of Benzoin* and *Balsam of Tolu*, to which is added double the quantity of *Rectified Spirit of Wine.* It is sold as a pectoral.

TINCTURA BUCH'U, *T. Bucku*, *T. Bucco*, *Tincture of Buchu.* (*Buch.* ℥v, *Alcohol dilut.* Oij. (Imp. meas.). Digest for seven days and filter. It may be made, also, by percolation. *Ph. E.*) Dose, f℥j to f℥iv. See Diosma.

TINCTURA BUCKU, Tinctura Buchu.

TINCTURA CALUM'BÆ, (Ph. U. S. 1863,) *T. Colum'bæ* seu *Colum'bæ* (Ph. U. S. 1851), *Tincture of Colum'bo*, *Colum'bo Bit'ters*, (*Calumb. rad.* cont. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. Ph. U. S.) Dose, f℥ss to f℥iv. It may, also, be made by displacement.

TINCTURA CAMPHORÆ, Spiritus camphoræ.

TINCTURA CAM'PHORÆ COMPOS'ITA, *T. O'pii Camphora'ta* (Ph. U. S.), *T. Cam'phoræ cum o'pio*, *Com'pound Tinc'ture* or *Camph'orated Tinc'ture of O'pium*, *Elix'ir Paregor'icum*, *Paregor'ic Elix'ir.* (*Opii.* in pulv., *Acid. Benzoic.* āā ℥j, *Ol. anisi*, f℥j, *Mellis despumat.* ℥ij, *Camphor.* ℈ij, *Alcohol. dilut.* Oij. Macerate for 14 days, and filter through paper. Ph. U. S.) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, f℥j to f℥iij.

Squire's Elix'ir, an empirical carminative preparation, is thus made, according to one formula. (*Opii.* ℥iv, *Camphor.* ℥j, *Coccinell.* ℥j, *Fœnicul. dulc.* ℥ij, *Tinct. serpent.* Oj, *Sp. anisi.* cong. ij, *Aquæ*, Oij, *Auri musivi*, ℥vj.

TINCTURA CAN'NABIS IN'DICÆ, *Tinc'ture of In'dian Hemp.* (*Ext. Cannab. purif.* ℥vj; *Alcohol.* Oj. Dissolve. Ph. U. S.) Dose, about 40 drops.

TINCTURA CANTHAR'IDIS, *T. C. Vesicato'riæ*, *T. Lyt'tæ* seu *Mel'oës vesicato'rii*, *Tinc'ture of Canthar'ides*, *Tincture of Blist'ering Flies*, *T. of Span'ish Flies*, (F.) *Teinture rubéfiante.* (*Cantharid.* pulv. ℥j, *Alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. It may also, be prepared by displacement. Ph. U. S.) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gtt. x—xx.

Matthews's Injec'tion, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute *Tincture of Cantharides.*

TINCTURA CAP'SICI, *Tincture of Cap'sicum* or *Cayenne' Pep'per.* (*Capsic.* ℥j, *Alcohol. dil.* Oij. Macerate for 14 days, and filter. It may, also, be prepared by displacement. Ph. U. S.) Stimulant. Dose, f℥ss to f℥j.

TINCTURA CARDAMO'MI, *T. Amo'mi repen'tis*, *Tincture of Car'damoms.* (*Cardam.* cont. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, strain, and filter. It may, also, be made by displacement. Ph. U. S.) Use, the same as the seeds. Dose, f℥j to f℥iv.

Sol'omon's Balm of Gil'ead, an empirical preparation, seems to be an aromatic tincture, — of which *Cardamoms* form a leading ingredient, — made with brandy. Some affirm that it contains *cantharides.*

TINCTURA CARDAMO'MI COMPOS'ITA, *Tinctu'ra Stomach'ica*, *Com'pound Tinc'ture of Card'amoms*,

Stom'ach Tinc'ture. (*Cardamom.* cont. ℥vj. *Carui.* cont. ℥ij, *Cinnam.* cont. ℥v, *Uvæ passæ* demptis acinis, ℥v, *Cocci.* cont. ℥j, *Alcohol. dilut.* Oiiss. Macerate for 14 days; express and filter. Ph. U. S. Prepared, also, by displacement.) Stomachic and carminative. Dose, f℥ij to f℥iv.

TINCTURA CARMINATI'VA SYL'VII, *Alcoola'tum Carminati'vum Sylvii, Carmin'ative Elix'ir of Syl'vius.* (*Rad. angelic.* 4 p., *Rad. imperator., Galang.* ää 6 p., *Fol. rosmarin., Majoran., Rutæ, Basilic.* ää 48 p., *Baccar. laur. nobil.* 12 p., *Sem. angelic., Ligust. levist., Anis.* ää 16 p., *Zingib., Nuc. moschat.* ää 6 p., *Cinnam.* 12 p., *Caryoph., Cort. limon.* ää 4 p. Add *Alcohol,* 1500 p. Macerate and distil, 1000 p. *Ph. P.*) A warm stomachic, carminative, &c. Dose, f℥ss to f℥ss.

TINCTURA CASCARIL'LÆ, *T. Croto'nis Eleuthe'riæ. Al'cohol cum Croto'nē Cascarillâ, Tincture of Cascarilla.* (*Cascarill. cort.* cont. ℥iv, *Sp. ten.* Oij. *Ph. L.*) Dose, f℥j to f℥iv.

TINCTURA CASTO'REI, *T. Castorei Ros'sici* seu *Castorei Canaden'sis, Essen'tia Castorei, Al'cohol castoria'tum, Tinc'ture of Cas'tor.* (*Castor.* cont. ℥ij, *Alcohol.* Oij. Macerate for 7 days, express, and filter. *Ph. U. S.*) Tonic and antispasmodic. Dose, gtt. xx to f℥ij, or more.

TINCTURA CASTO'REI COMPOS'ITA, *T. C. ammonia'ta, Com'pound Tinc'ture of Cas'tor.* (*Cast.* ℥j, *Asafœtid.* ℥ss, *Alcohol. ammoniat.* Oj. *Ph. E.*) Antispasmodic. Dose, f℥j to f℥iv. Called, also, *Elixir fœ'tidum, Tinctura castorei fœtida* seu *fœtida ammonia'ta.*

TINCTURA CAT'ECHU, *Tinctu'ra Japon'ica* seu *Mimo'sæ Cat'echu* seu *Acaciæ Cat'echu, Tinc'ture of Cat'echu.* (*Catech.* ℥iij, *Cinnam.* contus. ℥ij, *Alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.* Prepared also by displacement.) Astringent. Dose, f℥j to f℥ij.

The *Con'centrated Solution of Char'coal,* sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CHIRET'TÆ, *T. Chira'tæ* (Ph. B. 1864), *Tinc'ture of Chiret'ta.* (*Chirett.* cont. ℥v, (avoird.) *Alcohol. dilut.* Oij. (Imp. meas.) Macerate for 14 days. *Ph. D.*) Dose, f℥j, or f℥ij, as a tonic.

TINCTURA CICUTÆ, T. conii maculati.

TINCTURA CINCHO'NÆ, *T. Cor'ticis Peruvia'ni Sim'plex* seu *Cort. Peruvia'ni, Tinc'ture of Cincho'na* or *of Bark.* (*Cinchon. flav.* in pulv. ℥vj, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may, also, be made by displacement. *Ph. U. S.*) Dose, f℥j to f℥iv, or more.

TINCTURA CINCHO'NÆ ÆTHE'REA COMPOS'ITA, *T. Ki'næ Ki'næ æthe'rea compos'ita, Elixir'ium Antisep'ticum Docto'ris Chaussier, Chaussier's Antisep'tic Elix'ir.* (*Cinchon. officin.* ℥ij, *Cascarill.* ℥ss, *Cinnam.* ℥iij, *Croci,* ℥ss, *Sacch. alb.* ℥xxxviij. Put these bruised into a matrass, and add *Vin. alb. Hispanic.* vel *Vin. muscat., Alcohol.* ää Oj. Macerate for two days, and add *Sulphuric ether,* f℥iss. *Ph. P.*) Tonic, stimulant, and antiseptic. Dose, f℥ss to f℥j.

TINCTURA CINCHO'NÆ AMA'RA seu *alcohol'ica cor'ticum aurantio'rum Whyt'tii* seu *Kinki'næ ama'ra, Elix'ir antihypochondri'acum* seu *rob'orans Whyt'tii* seu *Whyt'tii* seu *stomach'icum spiritu'osum, Essen'tia Cor'ticis Peruvia'ni Compos'ita.* (*Cinch.* p. viij. *Gentian. Rad., Cort. Aurant.* p. iij, *Alcohol.* (·900) 96 p. Digest. Dose, one or two teaspoonfuls.

TINCTURA CINCHO'NÆ AMMONIA'TA, *T. Cor'ticis Peruvia'ni volat'ilis, Ammo'niated* or *Vol'atile Tinc'ture of Bark.* (*Cinchon. lancifol. cort.* cont. ℥iv, *Sp. ammon. aromat.* Oij. *Ph. L.*) In dyspepsia, combined with acidity and languor.

TINCTURA CINCHO'NÆ COMPOS'ITA, *T. Cor'ticis Peruvia'ni Compos'ita* seu *febrif'uga Docto'ris Huxha'mi* seu *Alexiphar'maca Huxha'mi* seu *Alcohol'ica Chi'næ Compos'ita, Essen'tia Chi'næ* seu *Cor'ticis Peruvia'ni Alexiphar'maca Huxha'mi* seu *antisep'tica Huxha'mi, Com'pound Tinc'ture of Cincho'na* or *Bark, Huxham's Tincture of Bark.* (*Cinchon. rubr.* pulv. ℥iv, *Aurant. amar. cort.* cont. ℥iij, *Serpent.* cont. ℥iij, *Croci, Santal.* ää ℥ij, *Alcohol. dilut.* f℥xx. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be made by displacement. More grateful than the simple tincture. Dose, f℥j to f℥iij.

TINCTURA CINNAMO'MI, *T. Lau'ri Cinnamo'mi, Essen'tia Cinnamo'mi, Tinc'ture of Cin'namon.* (*Cinnam.* cont. ℥iij, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Stomachic. Dose, f℥j to f℥ij.

TINCTURA CINNAMO'MI COMPOS'ITA, *T.* seu *Essen'tia Aromat'ica, Al'coöl cum Aromat'ibus Compos'itus, Com'pound Tinc'ture of Cin'namon,* (F.) *Eau de Bonferme* ou *d'Armagnac.* (*Cinnam.* cont. ℥j, *Cardam.* cont. ℥ss, *Zingib.* cont. ℥iij, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.* It may, also, be prepared by displacement.) Use, same as the last. Dose, f℥j to f℥iij.

TINCTURA COC'CI CAC'TI, *T. Coc'ci, Tinc'ture of Coch'ineal.* (*Cocci* pulv. ℥ij (avoird.), *Alcohol. dilut.* Oj. (Imp. meas.). *Ph. D.*) Chiefly a colouring ingredient. At times, given in nervous affections. Dose, gtt. xij to f℥j.

TINCTURA DE COCHLEA'RIIS, *Alcoola'tum de Cochlea'riis* seu *antiscorbu'ticum.* (*Fol. cochlear. recent.* 2500 p., *Rad. armoraciæ,* 230 p., *Alcohol.* (22° to 32° Beaumé) 3000 p., distil off 2000 p. *Ph. P.*) Antiscorbutic. Dose, f℥ij to f℥j.

TINCTURA COL'CHICI, (Ph. U. S. 1863,) *T. C. Sem'inis,* (Ph. U. S. 1851), *Tinc'ture of Col'chicum Seed.* (*Colchic. sem.* cont. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Dose, ten to sixty drops.

TINCTURA COLCHICI COMPOSITA, Spiritus colchici ammoniatus—t. Colchici seminis, T. colchici —t. Colombæ, T. Calumbæ.

TINCTURA CONI'I, *T. C. Macula'ti, T. Cicu'tæ, Tinc'ture of Hem'lock.* (*Conii fol.* ℥iv, *Alcohol. dil.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Use:—the same as that of the leaves. Dose ♏xx to f℥j. A *Tincture of Hemlock Fruit, Tinctura Coni'i fruc'tûs,* formed of *Hemlock fruit* or *seeds,* bruised, ℥iiss, to *Proof spirit,* Oj. made by percolation, is officinal in the British Pharmacopœia for 1864. Dose, gtt. xxx.

TINCTURA CONII MACULATI, T. conii — t. Convolvuli Jalapæ, T. jalapii—t. Corticis aurantii, T. aurantii—t. Corticis Peruviani composita, T. cinchonæ comp. — t. Corticis Peruviani simplex, T. cinchonæ — t. Corticis Peruviani volatilis, T. cinchonæ ammoniata.

TINCTURA CRO'CI SATI'VI, *T. Cro'ci, Tinc'ture of Saf'fron.* (*Croci Angl.* cont. ℥j, *Alcohol. dilut.* ℥xv. *Ph. E.*) Slightly stomachic [?]. Dose, f℥j to f℥iij.

TINCTURA DE CRO'CO COMPOS'ITA, *Elixir'ium de Ga'rus, Alcoola'tum de Cro'co Compos'itum, Com'pound Tinc'ture of Saf'fron, Elix'ir of Ga'rus.* (*Aloes Socotr.* 320 p., *Myrrh.* 64 p., *Croci,* 32 p., *Cinnam., Nuc. moschat., Caryoph.* ää, 16 p., *Alcohol.* 1000 p., *Aq. flor. aurant.* 5000 p. Digest for two days; distil 4000 p. and add *Syrup of capillaire,* 5000 p. *Ph. P.*) Aromatic, cordial, stomachic. It is also called *Elix'ir cordia'lē et stomach'icum,* and *E. anticol'icum croca'tum.*

TINCTURA CROTO'NIS, *Tinc'ture of Cro'ton.* Under this name Mr. E. Wilson recommends 'a most valuable cutaneous stimulant,' made by adding four fluidounces of *Alcohol* to one ounce of the bruised seeds of *Croton tiglium.*

TINCTURA CROTONIS ELEUTHERIÆ, T. cascarillæ.

Tinctura Cubeb'æ, *Tinc'ture of Cu'bebs.* (*Cubeb.* cont. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Dose, one or two fluidrachms.

Tinctura Cusparіæ, Tinctura Angusturæ.

Tinctura Digita'lis, *T. Digita'lis purpu'reæ, Tinc'ture of Digita'lis.* (*Digital.* ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may, also, be prepared by displacement. Ph. U. S.) Use, same as that of the leaves. Dose, gtt. x.

Tinctura Er'gotæ, *Tinc'ture of Er'got.* (*Ergot.* in pulv. crass. ℥viij (avoird.), *Sp. tenuior.* Oij, (Imp. meas.) Macerate for 14 days, express, and filter. *Ph. D.*) Dose, f℥j to f℥ij.

The formula for the Tincture of the British Pharmacopœia (1864), made by percolation, is *Ergot,* ℥v, to *Proof spirit,* Oj. Dose, ♏xv to xxx.

Tinctura Er'gotæ Æthe'rea. *Ethe'real Tinc'ture of Er'got.* (*Ergot.* contus. ℥xv, *Æther.* Oij, (Imp. meas.) Macerate for 7 days, express, and filter. *Ph. L.*) Dose, 60 to 90 minims.

Tinctura Febrifuga Doctoris Huxhami, T. cinchonæ composita.

Tinctura Fer'ri Aceta'tis, *Tinc'ture of Ac''etate of I'ron.* (*Potass. acetat.* ℥ij, *Sulph. ferri,* ℥j, *Sp. rectif.* Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. *Ph. D.*) Tonic and astringent. Dose, gtt. xx to f℥j. The Dublin college directs a *Tinctura Acetatis Ferri cum Alcoho'lē,* which differs from the other, in having half the quantity, only, of the *Acetate of Potassa.*

Tinctura Ferri Ammonia'ta, *T. Fer'ri Ammoniaca'lis* seu *Flo'rum martia'lium* seu *Mar'tis Mynsich'ti, Tinc'ture of Ammo'niated I'ron.* (*Ferri ammon.* ℥iv, *Sp. ten.* Oj. *Ph L.*) *Use*—same as that of the ammoniated iron. Dose, f℥ss to f℥ij.

Tinctura Ferri Ammo'niochlo'ridi, *Tinc'ture of Ammo'niochlo'ride of I'ron.* (*Ferri ammoniochlorid.* ℥iv, *Alcohol. dilut., Aquæ destillat.* āā Oj. (Imp. meas.) Dissolve and filter. *Ph. L.*) Dose, gtt. x to xx.

Tinctura Ferri Chloridi, T. ferri muriatis.

Tinctura Ferri Muria'tis, *T. Fer'ri chlo'ridi,* (*Ph. U. S.*) seu *sesquichlo'ridi* seu *Mar'tis in Spiritu Sa'lis* seu *Mar'tis cum Spi'ritu Sa'lis* seu *Fer'ri Muria'ti, Li'quor Fer'ri Muria'tis, Tinc'ture of Mu'riate of I'ron, Tinc'ture of Steel, Al'cohol ferra'tus.* (*Ferri subcarb.* ℔ss, *Acid. muriat.* Oj, *Alcohol.* Oiij. Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. Another form is given in the Ph. U. S., 1863, in which iron, in the form of wire, is used in place of the subcarbonate. S. g. 0990.) Tonic and styptic. It has been given, also, with advantage in erysipelas and scarlatina in the dose of ♏x to ♏xx every two or three hours.

Tinctura Ferri Perchlo'ridi, *Tinc'ture of Perchlo'ride of I'ron,* of the British Pharmacopœia, is made of *Solution of perchloride of iron* ℥v, and *rectified spirit* f℥xv. S. g. 0992.

Bestucheff's Tinc'ture or *Kla'proth's Tinc'ture* is an ethereal tincture of chloride of iron. It is composed of dry *perchloride of iron,* one part; *Hoffmann's anodyne liquor,* seven parts.

The *Antivene'real Drops,* at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

Tinctura Ferri Sesquichloridi, T. Ferri muriatis—t. Ferulæ Assafœtidæ, T. Assafœtidæ—t. Florum martialium, T. ferri ammoniata—t. Fœtida, T. assafœtidæ—t. Fœtida ammoniata, T. castorei composita—t. Fuliginis, see Fuligo.

Tinctura Gal'bani, *Tinc'ture of Gal'banum.* (*Galb.* ℥ij, *Sp. tenuior.* Oij. *Ph. D.*) Stimulant and antispasmodic. Dose, f℥j to f℥iij.

Tinctura Galla'rum, *T. Gal'læ,* (*Ph. U. S.*) *Tinc'ture of Galls.* (*Gall.* contus. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Astringent. Dose, f℥j to f℥iij.

Tinctura Gentia'næ Compos'ita, *Tinct. Ama'ra, Elix'ir Stomach'icum, Com'pound Tinc'ture of Gen'tian, Spir'it Bit'ters.* (*Gent.* concis. ℥ij, *Aurant. cort.* ℥j, *Cardam.* cont. ℥ss, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may likewise be prepared by displacement. *Ph. U. S.*) Tonic and stomachic. Dose, f℥j to f℥iij.

Bro'dum's Ner'vous Cor'diol consists of the *Tinctures of Gentian, Calumba, Cardamom,* and *Bark,* with the *Compound Spirit of Lavender* and *Wine of Iron.*

Stought'on's Elix'ir is a compound tincture of gentian. The *Elixir'ium Docto'ris Stought'on* seu *Tinctu'ra Ama'ra* of the Parisian Codex is prepared as follows:—*Absinth. summit.* exsiccat., *Teucri chamædryos, Rad. gentian., Cort. aurant.,* āā ℥vj, *Cascarillæ* ℥j, *Rhei* ℥ss, *Aloes socotr.* ℥j, *Alcohol.* Oij. Digest. Dose, f℥j to f℥iij.

The *Elixir Viscera'lē Hoffman'ni* does not differ essentially from these preparations.

Tinctura Guai'aci, *T. Guai'aci Officina'lis, Tinc'ture of Guai'acum.* (*Guaiac.* ℥vj, *Alcohol.* Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock.*

Tinctura Guai'aci Ammonia'ta, *T. Guaiaci'na Volat'ilis, T. Guai'aci, Elix'ir Guai'aci Volat'ilis, Al'cohol cum Guai'aco officina'lē ammoni'atus, A. ammo'niæ et Guai'aci, Ammo'niated Tinc'ture of Guai'acum, Vol'atile Tinc'ture of Guai'acum.* (*Guaiac.* pulv. ℥vj, *Sp. ammon. arom.* Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Properties same as the last. Dose, f℥j to f℥ij.

Hat'field's Tinc'ture—a nostrum—consists of *Guaiacum* and *Soap,* āā ℥ij, *rectified spirit,* Oiss.

Tinctura Helleb'ori, *T. Helleb'ori Ni'gri, T. Melampo'dii, Tinc'ture of Black Hel'lebore.* (*Helleb. nigr.* cont. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, f℥ss to f℥j.

Tinctura Hiera, Vinum aloes.

Tinctura Hu'muli, *T. Lu'puli, Tinc'ture of Hops.* (*Humuli* ℥v, *Alcohol. dilut.* Oij. Prepared also by displacement.) Tonic and sedative. Dose, f℥ss to f℥iij.

Tinctura Hyoscy'ami, *T. Hyoscy'ami ni'gri, Tinc'ture of Hen'bane.* (*Hyoscyam. fol.* ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Narcotic, anodyne. Dose, gtt. xx to f℥ij.

Tinctura Io'dini (*Ph. U. S.*, 1842), *T. Iodin'ii* (*Ph. U. S.* 1851), *Alcohol Io'dii, Tinc'ture of Io'dine.* (*Iodin.* ℥j, *Alcohol.* Oj. Dissolve. *Ph. U. S.*) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goitre, &c. Dose, ten drops three times a day.

Tinctura Io'di (Ph. B., 1864), is made of *Iodine* ℥ss, *Iodide of potassium* ℥ℓ, *Rectified spirit* Oj. Dose, ♏x to xxx.

An ethereal and a chloroform tincture of iodine have been used, to affect the system with iodine by inhalation.

Tinctura Io'dini Compos'ita (*Ph. U. S.*, 1842), *T. Iodin'ii Compos'ita* (*Ph. U. S.*, 1851), *Com'pound Tinc'ture of Io'dine.* (*Iodin.* ℥ss, *Potassii iodid.* ℥j, *Alcohol.* Oj. Dissolve. *Ph. U. S.*) Dose, 10 to 30 drops.

Tinctura Jala'pii, *T. Jala'pæ* (*Ph. U. S.*) seu *Convol'vuli Jalapæ, Vali'ya, Tinc'ture of Jal'ap.* (*Jalap.* pulv. ℥vi, *Alcohol. dilut.* Oij. Macerate

for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Cathartic. Dose, f℥j to f℥iv.

TINCTURA JALA'PII COMPOS'ITA, *Elix'ir Jalap'æ Compos'itum* seu *pur'gans* seu *anthelmin'ticum Sueco'rum, Essen'tia cathol'ica pur'gans Roth'ii,* (F.) *Eau de vie Allemande.* (*Jalap.* ℔ss, *Scammon.* ℥j, *Alcohol.* (22°) Ovj. Macerate for eight days. *Ph. P.*) Dose, 60 to 100 drops.

TINCTURA JAPONICA, Tinctura catechu—t. Kinæ kinæ ætherea composita, Tinctura cinchonæ ætherea composita—t. Kinkinæ amara, Tinctura cinchonæ amara.

TINCTURA KI'NO, *Tinc'ture of Ki'no.* (*Kino,* in pulv. ℥vj, *Alcohol. dilut.* q. s. Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on diluted alcohol until f℥viij of filtered liquor pass. The tincture should be renewed frequently, and kept in closely-stopped bottles. *Ph. U. S.*) Astringent. Dose, f℥j to f℥ij.

TINCTU'RA KRAME'RIÆ, *Tinc'ture of Rhat'any.* (*Kramer.* in pulv. ℥vj, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, f℥j to f℥ij.

TINCTURA LACTUCA'RII, *Tinc'ture of Lactuca'rium.* (*Lactucar.* in pulv. ℥iv, *Sp. tenuior.* Oij. (Imp. meas.) Best prepared by percolation. *Ph. E.*) Dose, 30 minims to f℥j.

TINCTURA LAURI CINNAMOMI, Tinctura cinnamomi—t. Lavandulæ composita, Spiritus lavand. comp.

TINCTURA LIMO'NIS, *Tinc'ture of Lem'on peel.* (*Limon. cort.* ℥iiiss, *Sp. tenuior.* Oij. (Imp. meas.) Macerate for 7 days, express, and filter. *Ph. D.*) Dose, f℥j to f℥ij.

TINCTU'RA LOBE'LIÆ, *Tinc'ture of Lobe'lia.* (*Lobel.* ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, f℥j to f℥ij.

TINCTURA LOBE'LIÆ ÆTHE'REA, *Ethe'real Tinc'ture of Lobe'lia.* (*Lobel.* pulv. ℥v, *Sp. æther. sulph.* Oij. (Imp. meas.) *Ph. E. L.* and *B.*) Dose, same as the last.

TINCTURA LUPULI, Tinctura Humuli, T. Lupulinæ.

TINCTU'RA LUPULI'NÆ, *T. Lu'puli,* (*Ph. E.*) *Tinc'ture of Lu'pulin.* (*Lupulin.* ℥iv, *Alcohol.* Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Dose, f℥j to f℥ij.

TINCTURA LYTTÆ, Tinctura cantharidis—t. Martis Glauberi, see Ferrum tartarizatum—t. Martis Mynsichti, Tinctura ferri ammoniata—t. Martis in Spiritû salis, Tinctura ferri muriatis—t. Martis vinosa, Vinum ferri.

TINCTURA MATI'CO, *Tinc'ture of Mati'co.* (*Matico* in pulv. crass. ℥viij (avoird.), *Sp. tenuior.* Oij. (Imp. meas.) Macerate for 14 days, express, and filter. *Ph. D.*) Dose, f℥j to f℥iij.

TINCTURA MELAMPODII, Tinctura hellebori nigri—t. Meloes vesicatorii, Tinctura cantharidis—t. Metallorum, Lilium Paracelsi—t. Mimosæ catechu, Tinctura catechu.

TINCTURA MOS'CHI, *Tinc'ture* or *Es'sence of Musk.* (*Mosch.* in pulv. redact. ℥ij, *Sp. vini rect.* Oj.) Dose, f℥j to f℥iv.

TINCTURA MYR'RHÆ, *Tinc'ture of Myrrh, Simple Tinc'ture of Myrrh.* (*Myrrhæ* contusæ ℥iij, *Alcohol* Oij. Macerate for 14 days, and filter. Prepared also by displacement. *Ph. U. S.*) Tonic, 'deobstruent,' antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

Hud'son's Preser'vative for the Teeth and Gums consists of *Tinct. myrrh., Tinct. cinch., Aq. cinnam.* āā ℥iij, *Eau d'arquebusade* ℥j, *Pulv. gum. Arab.* ℥ss. M.

TINCTURA NERVINA BESTUCHEFFII, Tinctura (seu alcohol) sulphuricoætherea ferri—t. Nervina Halensis, Tinctura (seu alcohol) sulphuricoætherea ferri—t. Nervinotonica, Lamotte's, Alcohol (seu Tinctura) sulphuricoæthereus ferri.

TINCTURA NUCIS VOM'ICÆ, *Tinc'ture of Nux Vom'ica.* (*Alcohol.* s. g. 837, f℥j, *Dry Extract of Nux Vomica,* 3 gr.) Dose, gtt. v to xxx, in cases where the nux vomica is indicated.

It is directed in the Ph. U. S. (1851), to be prepared as follows:—(*Nucis vomicæ* rasur. ℥viij, *Alcohol* Oij. Macerate for 14 days, express, and filter. It may also be prepared by the process of displacement.) Dose, gtt. v to xx.

TINCTURA OLEI MENTHÆ PIPERITÆ, Spiritus menthæ piperitæ.

TINCTURA OLEI MENTHÆ VIRIDIS, Spiritus menthæ viridis.

TINCTURA O'PII, *T. Theba'ica* seu *Sedati'va, Theri'aca cœles'tis, Al'cohol cum O'pio, Tinc'ture of O'pium, Liq'uid Lau'danum.* (*Opii* pulv. ℥ijss, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. Prepared also by displacement. *Ph. U. S.*) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gtt. xx to lx, and more. By macerating the dregs remaining after making the *Tinctura Opii* in a solution of *Tartaric Acid,* a solution is obtained which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Li'quor O'pii Sedati'vus.*

TINCTU'RA O'PII ACETA'TA, *Ac''etated Tinc'ture of O'pium.* (*Opii* ℥ij, *aceti* f℥xij, *Alcohol.* Oss. Rub the opium with the vinegar, add the alcohol, and having macerated for 14 days, express, and filter. *Ph. U. S.*) Twenty drops are equivalent to a grain of opium.

TINCTURA O'PII AMMONIA'TA, *Am.o'niated Tinc'ture of O'pium, Ed'inburgh Paregor'ic Elix'ir.* (*Flor. benz., croci,* āā ℥iij, *Opii* ℥ij, *Ol. anisi* ℥ss, *Alcohol. ammoniat.* f℥xvj. Digest. *Ph. E.*) f℥j contains one grain of opium. Used like the *Tinctura Camphoræ Composita.*

TINCTURA OPII CAMPHORATA, Tinctura camphoræ composita—t. Plumbosa, Liquor Plumbi subacetatis dilutus.

TINCTURA O'PII DEODORA'TA, *Deo'dorized Tinc'ture of O'pium.* (A solution of *opium,* ℥iiss, in *water,* shaken with *ether;* and, the ethereal solution having been poured off, evaporating until all traces of ether have disappeared; mixing with *water,* and filtering; and adding *water* through the filter sufficient to make the liquid a pint and a half; adding, lastly, half a pint of *alcohol,* and mixing. Ph. U. S., 1863.) By treating the opium with water in place of alcohol, the resinous and odorous principles are sparingly taken up. Its strength is that of Tinctura Opii.

TINCTURA QUAS'SIÆ, *T. Quas'siæ excel'sæ, Tinc'ture of Quas'sia.* (*Quassiæ rasur.* ℥ij, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Tonic. Dose, f℥j to f℥ij.

TINCTURA QUAS'SIÆ COMPOS'ITA, *Com'pound Tinc'ture of Quas'sia.* (*Cardam. sem.* contus., *Cocci* contus. āā ℥ss, *Cinnam., Quassiæ,* āā ℥vj, *Uvar. passar.* ℥vij, *Sp. tenuior.* Oij. (Imp. meas.) Digest for 7 days, express, and filter. May be prepared also by percolation. *Ph. E.*) Dose, as a tonic, f℥j or f℥ij.

TINCTURÆ QUI'NÆ COMPOS'ITA, *Com'pound Tinc'ture of Qui'na.* (*Quinæ sulph.* ℥v and ℈j, *Tinct. aurantii,* Oij, (Imp. meas.) Digest for 7 days, and filter. *Ph. L.*) f℥j contains a grain of the sulphate.

TINCTURA QUI'NÆ SULPHA'TIS, *Tinc'ture of Sul'phate of Qui'nia.* (*Sulphate of Quinia* gr. vj, *Alcohol* (847) f℥j. M.) Dose, f℥j to f℥iv, in the day.

Tinctura Cincho'niæ Sulpha'tis may be made in a similar manner.

Tinctura Rhabarbari, Tinctura rhei—t. Rhabarbari composita, Tinctura rhei composita—t. Rhabarbari vinosa, Vinum rhei palmati.

Tinctura Rhe'i, *T. Rhabarb'ari* seu *Rhabarbari spiritno'sa* seu *Rhœ'i* seu *Rhe'i palma'ti, Tinc'ture of Rhu'barb.* (*Rhei* contus. ℥iij, *Cardam.* cont. ℥ss, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Stomachic or purgative, according to the dose employed—f℥j to ℥ij as a stomachic; f℥iv to ℥j as a purgative.

Tinctura Rhe'i Compos'ita, *T. Rhabarb'ari compos'ita, Com'pound Tinc'ture of Rhu'barb.* (*Rhei rad.* concis. ℥ij, *Glycyrrhiz. rad.* cont. ℥ss, *Zingib. rad.* concis., *Croci stigmat.* āā ℥ij, *Aquæ* f℥xij, *Sp. ten.* Oj. *Ph. L.*) Properties same as the last.

Tinctura Rhe'i et Al'oës, *Elix'ir sa'crum, Tinc'ture of Rhu'barb and Al'oes.* (*Rhei* concis. ℥x, *Aloes* pulv. ℥vj, *Cardam.* cont. ℥ss, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Properties like the last.

Ry'mer's Car'diac Tinc'ture consists of an infusion of *Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes,* and *Castor* in *Proof Spirit,* with a very small quantity of *Sulphuric Acid.*

Tinctura Rhe'i et Gentia'næ, *Tinc'tura Rhe'i Ama'ra, Tinc'ture of Rhu'barb with Gen'tian.* (*Rhei* cont. ℥ij, *Gentian.* cont. ℥ss, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.* It may also be prepared by displacement.) Properties same as the last.

Tinctura Rhe'i et Sen'næ, *Tinc'ture of Rhu'barb and Sen'na, War'ner's Gout Cor'dial.* (*Rhei* cont. ℥j, *Sennæ* ℥j, *Coriandr.* cont., *Fœnicul.* cont. āā ℥j, *Santal.* rasur. ℥ij, *Croci, Ext. glycyrrhiz. rad.* āā ℥ss, *Uvar. passar.* acinis exemptis, ℔ss, *Alcohol. dilut.* Oiij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Dose, f℥ss to f℥ij.

Tinctura Rhœi, Tinctura rhei — t. Rhœi amara, Tinctura rhei et gentianæ—t. Sacra, Vinum aloes.

Tinctura Sabi'næ, *Tinc'ture of Sav'ine.* (*Sav'ine,* dried and bruised, ℥iiss, *Proof spirit* Oj. Made by percolation. Ph. B., 1864.) Dose, ♏xv to xxx.

Tinctura Sanguina'riæ, *Tinc'ture of Blood'root.* (*Sanguinar.* cont. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, 30 to 60 drops.

Tinctura Saponis Camphorata, Linimentum saponis camphoratum — t. Saponis et opii, Linimentum saponis et opii.

Tinctura Scil'læ, *Tinc'ture of Squill.* (*Scillæ* ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Dose, gtt xv to lx.

Tinctura Sedativa, Tinctura opii.

Tinctura Sen'næ, *T. Sen'næ Compos'ita, Elix'ir Salu'tis, Daf'fy's Elix'ir, Tinc'ture of Sen'na.* (*Sennæ fol.* ℥iij, *Carui sem.* cont. ℥iij, *Cardam. sem.* cont. ℥j, *Uvarum passarum* demptis acinis, ℥iv, *Sp. ten.* Oij. *Ph. L. & D.*) Stomachic, carminative and cathartic. Dose, f℥ij to f℥j.

Tinctura Sen'næ et Jala'pæ, *Tinc'ture of Sen'na and Jal'ap.* (*Sennæ* ℥iij, *Jalap.* pulv. ℥j, *Coriandr.* cont., *Carui* cont., āā ℥ss, *Cardam.* cont. ℥ij, *Sacch.* ℥iv, *Alcohol. dilut.* Oiij. Macerate for 14 days, express, and filter. *Ph. U. S.* It may also be prepared by displacement.) Dose, f℥ij to f℥j.

Tinctura Serpenta'riæ, *T. Serpenta'riæ* seu *Virginia'næ* seu *Aristolochi'æ Serpentariæ, Tinc'ture of Snake'root.* (*Rad. serpent.* ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Tonic. Dose, f℥ss to f℥ij.

Tinctura Stomachica, Tinctura cardamomi composita.

Tinctura Stramo'nii, *Tinc'ture of Stramo'nium.* (*Stramon. sem.* cont. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, ten to twenty minims.

Tinctura Strych'niæ, *Tinc'ture of Strych'nia.* (*Alcohol.* s. g. ·837, Oj, *Strychniæ,* gr. iij.) Dose, 6 drops to 24. Properties, those of strychnia.

Tinctura (seu Al'cohol) Sulphu'ricoæthe'rea Fer'ri, *Gut'tæ nervi'næ, Liq'uor Anod'ynus Martia'lis, Al'cohol æthe'reus ferra'tus, Noph'tha Vitri'oli Martia'lis, Solu'tio Muria'tis fer'rici æthe'rea, Spir'itus sulphu'ricoæthe'reus martia'lis, Tinctu'ra nervi'na Halen'sis* seu *Ton'iconervi'na Halen'sis* seu *an'rea* seu *nervi'na Bestuchef'fi* seu *nervinoton'ica* (Lamotte's) seu *æthe'rea fer'ri, Æ'ther Martia'lis, De La Motte's Gold'en Drops, Bestucheff's Ner'vous Tinc'ture,* (F.) *Elixir d'Or de M. le Général De La Motte.* (An ethereal solution of chloride of iron.) It is much used in gout, hypochondriasis, &c.

Tinctura Sulphuris Volatilis, Liquor fumans Boylii — t. Thebaica, Tinctura opii, Vinum opii.

Tinctura Toluif'eræ Bal'sami, *T. Bal'sami Toluta'ni, T. Toluta'ni* (Ph. U. S., 1842.), *T. Toluta'na* (Ph. U. S., 1851 and 1863), *Tinc'ture of Bal'sam of Tolu',* (*Bals. Tolutan.* ℥iij, *Alcohol.* Oij.) Reputed to be expectorant and corroborant. Dose. f℥ss to f℥j, or more.

Tinctura Tonica Nervina Halensis, Tinctura (seu Alcohol) sulphuricoæthera ferri.

Tinctura Valeria'næ, *Tinc'ture of Vale'rian.* (*Valerian.* cont. ℥iv, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and strain. It may also be prepared by displacement. *Ph. U. S.*) Stimulant and antispasmodic. Dose, f℥ss to f℥ij.

Tinctura Valeria'næ Ammonia'ta, *T. Valeria'næ Volat'ilis, Ammo'niated or Vol'atile Tinc'ture of Vale'rian.* (*Valerianæ* cont. ℥iv. *Sp. ammon. arom.* Oij. Macerate for seven days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Like the former. Dose, f℥ss to f℥ij.

Tinctura Vera'tri, *T. Veratri al'bi, Tinc'ture of White Hel'lebore.* (*Rad. veratri alb.* cont. ℥viij, *Alcohol. dilut.* Oijss. *Ph. E.*) Emetic and cathartic; but not very manageable. Dose, gtt. v to x.

Tinctura Vera'tri Vir'idis, *Tincture of Amer'ican Hel'lebore.* (*Veratr. virid.* pulv. ℥xvj, *Alcohol.* q. s. to produce by percolation two pints. Ph. U. S. 1863.) Sedative. Dose, gtt. vij, every three hours until the pulse is reduced.

Tinctura Zingib'eris, *T. Amo'mi Zingib'eris, Tinc'ture of Gin'ger.* (*Zingib.* cont. ℥viij, *Alcohol.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Stimulant and carminative. Dose, f℥ss to f℥j.

TINCTURE, Tinctura—t. of Aconite, Tinctura aconiti — t. of Aconite root, Tinctura aconiti radicis — t. of Aloes, Tinctura aloes — t. of Aloes, compound, Tinctura aloes composita—t. of Aloes, ethereal, Tinctura aloes ætherea—t. of Ammonia, compound, Spiritus ammoniæ succinatus — t. of Angustura, Tinctura angusturæ — t. of Arnica, Tinctura arnicæ—t. of Assafetida, Tinctura assafœtidæ—t. of Balsam of Tolu, Tinctura toluiferæ balsami — t. of Bark, Tinctura cinchonæ — t. of Bark, ammoniated, Tinctura cinchonæ ammoniata —t. of Bark, compound, Tinctura cinchonæ composita—t. of Bark, Huxham's, Tinctura cinchonæ composita—t. of Bark, volatile, Tinctura cinchonæ ammoniata—t. of Belladonna, Tinctura belladonnæ —t. of Benzoin, compound, Tinctura benzoini composita—t. Stomach, Tinctura cardamomi composita — t. of Stramonium, Tinctura stramonii — t. of Strychnia, Tinctura strychniæ—t. for the Teeth, Greenough's, see Spiritus armoraciæ compositus — t. Toothache, Tinctura antiodontalgica—t. of Valerian, Tinctura valerianæ—t. of Valerian, ammoniated, Tinctura valerianæ ammoniata—t. of Valerian, volatile, Tinctura valerianæ ammoniata—t. of Wormwood, compound, Tinctura absinthii composita.

TINDER, ([Sax.] *tyndre*, *tendre*, from *tynan*, 'to kindle,') Boletus igniarius.

TINEA, 'a gnawing worm,' Porrigo—t. Capitis, Porrigo—t. Ciliaris, see Ophthalmia tarsi—t. of the Eyelids, see Ophthalmia tarsi—t. Faciei, Porrigo larvalis — t. Favosa, Porrigo favosa — t. Ficosa, Porrigo scutulata—t. Furfuracea, Porrigo furfurans — t. Granulata, Porrigo scutulata, Porrigo lupinosa—t. Lactea, Porrigo larvalis—t. Lupina, Porrigo lupinosa — t. Mucosa, Porrigo lupinosa—t. Porriginosa, Porrigo furfurans—t. Tarsi, see Ophthalmia tarsi—t. Tondens, Porrigo decalvans—t. Tonsurans, Porrigo decalvans—t. Vera, Porrigo favosa.

TINEÆ, pl. of Tinea, Worms.

TINESMUS, Tenesmus.

TING'LING, (*tinnire*, 'to jingle.') (Sc.) *Dirling*. A sharp, purring or thrilling sensation, not always painful.

TINKER'S WEED, Triosteum.

TINKLING, METALLIC, (like tingling,) *Tintement métallique*.

TINNIMENTUM METALLICUM, (from *tinnio*, 'to tinkle,') *Tintement métallique*.

TINNI'TUS AU'RIUM, (from *tinnio*, *tinnitum*, 'to tinkle,') 'ringing of the ears.' *Fluctua'tio* seu *Son'itus* seu *Susur'rus* seu *Sib'ilus* seu *Strep'itus* seu *Sibilism'us au'rium*, *Paracu'sis imagina'ria*, *Ote'chus*, *Syrig'mus*, *Syring'mus*, *Sib'ilus clango'sus*, *E'chos*, *Eneche'ma*, *Bom'bus*, *Bombita'tio*, *Mur'mur*, (F.) *Tintement*, *T. d'Oreille*, *Tintouin*, *Bourdonnement*, *Bruissement*. An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

TINTEMENT, Tinnitus aurium — *t. Bullaire*, *T. métallique*.

TINTEMENT MÉTALLIQUE (F.), *Cliquetis métallique*, *Tintement bullaire*, *Tinnimen'tum metal'licum*, *Ca'nor stethoscop'icus*, *Metal'lic Respiration*, *Metal'lic Voice*, *Metal'lic Tink'ling*. A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuffbox. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metal'lic res'onance*. The 'metallic tinkling' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax*.

TINTEMENT D'OREILLE, Tinnitus aurium.

TINTINNABULUM, 'a bell,' (from *tintinnio*, 'to ring,') Uvula.

TINTOUIN, Tinnitus aurium.

TIPFOOT, see Kyllosis.

TIPSARIA, Decoctum hordei.

TIQUE (F.), (G.) Zecke, Ixodes ricinus.

TIRE-BALLE, (*tirer*, 'to draw,' and *balle*, a ball,') Forceps (bullet.)

TIRE-FOND (F.), (*tirer*, 'to draw,' and *fond*, 'bottom.') A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

TIRE-PUS, Pyulcon.

TIRE TÊTE (F.), (*tirer*, 'to draw,' and *tête*, 'head,') *Tractor*. A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crotchet is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

TIRES, Milk sickness.

TIRETOIR (F.), *Tirtoir*, (from *tirer*, 'to draw.') An instrument used by dentists for extracting the incisors of the lower jaw.

TISANE (F.), *Ptis'ana* or *Ptis'sana*, *Ptisan*, from πτισανη, 'pearl barley,' itself from πτισσω, 'I decorticate.' (F.) *Hydrolé*. A name given to aqueous medicines, containing but little, if any, medicinal agent. The ancients gave the name particularly to the decoction of barley.

TISANE COMMUNE, Decoctum hordei.

TISANE DE FELTZ. A celebrated antisyphilitic, formed of *sarsaparilla*, *isinglass*, *sulphuret of antimony* and *water*, boiled together. According to some, bichloride of mercury; and, to others, arsenic enters into its composition. M. Rayer, supposing that it acts by the arsenic it contains, proposes to replace it by arseniate of potassa; and Guibourt, who is of the same opinion, by arsenious acid, in order to ensure certainty of action.

TISIC, Phthisis.

TISICAL, Phthisicus.

TISSICK, see Phthisic.

TISSU, (from *texere*, *textum*, 'to weave,') Tissue—*t. Accidental*, see Accidental, and Tissue, accidental—*t. Aréolaire*, Cellular tissue—*t. Caverneux*, Cavernous texture—*t. Cellulaire*, Cellular tissue—*t. Celluleux des os*, Cancelli—*t. Conjonctif*, Cellular tissue—*t. Criblenx*, Cellular tissue—*t. Inodulaire*, Tissue, inodular—*t. Jaune*, see Fibrous—*t. Lamineux*, Cellular tissue—*t. Lardacé*, see Lardaceous—*t. Muqueux*, Cellular tissue—*t. Poreux*, Cellular tissue—*t. Réticulé*, Cellular tissue—*t. Spongoïde*, Spongoid tissue—*t. Unitif*, Cellular tissue.

TISSUE, *Tex'tus*, *Te'la*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see Fibre. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed; but every division is imperfect and liable to objection.

Tissue, Accidental or Adventit'ious, consists of every substance—foreign to the primitive organization of the economy, but yet organized and living—which may be developed in the interior or at the surface of organs. Laënnec divides the accidental tissues into two sections: 1. Those that resemble others in the animal economy, or *anal'ogous accidental tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterol'ogous* or *het'eroclite accidental tissues*. To the first class belong, ossifications; accidental fibrous, fibrocartilaginous, cartilaginous, areolar, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanosis, &c.

Tissue, Areolar, Cellular tissue.

Tissue, Cartilag''inous, *Hymenochondro'des* seu *Hymenochondroï'des* (*Textu'ra* seu *Te'la*.)

Tissue, Cellular, Cellular tissue—t. Connective, Cellular tissue—t. Cribriform, Cellular tissue—t. Fibrous, see Fibrous—t. Filamentous, Cellular tissue.

Tissue Formation, Histogeny.

Tissue, Inod'ular, *Te'la inodula'ris*, (F.) *Inodule*, *Tissu inodulaire*. A name given by Delpech to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellulofibrous layer; but soon loses its vascularity; and its fibres, which pass, in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

Tissue, Laminated, Cellular tissue—t. Ligamentous, Desmoid tissue—t. Mucous, Cellular tissue—t. Porous, Cellular tissue—t. Reticulated, Cellular tissue.

TIT, (τιτθη, [Sax.] τιτ,) Nipple.

TITHENE, (τιθηνη,) Nurse.

TITHYMALUS CYPARISSIAS, (τιθυμαλος,) Euphorbia cyparissias—t. Lathyris, Euphorbia lathyris—t. Latifolius, Euphorbia lathyris—t. Palustris, Euphorbia palustris—t. Paralias, Euphorbia paralias.

TITILLAMENTUM, Gargarism.

TITILLATION, (*titillare*, *titillatum*, 'to tickle,') Tickling.

TITTHE, (τιτθη,) Mamma, Nipple.

TITTHION, (τιτθιον, dim. of *titthos*,) Nipple.

TITTHIS, (τιτθις,) Mamma, Nipple.

TITTHOS, (τιτθος,) Mamma, Nipple.

TITTY, Mamma, Nipple.

TITUBANTIA, 'a staggering,' *Bredouillement*.

TITUBATIO, (*titubare*, *titubatum*, 'to stagger or totter,') Fidgets, Vacillatio—t. Linguæ, Balbuties.

TJETTEK, Upas tieuté.

TMETICA, (τμητικα, from τεμνω, 'to cut,') Incidentia.

TO-AND-FRO-SOUND, *Bruit de frottement*.

TOADFLAX, Antirhinum linaria—t. Bastard, Comandra umbellata.

TOASTWATER, *A'qua tos'tæ pan'is*, (F.) *Eau panée*. (Toast well half a slice of a stale quartern loaf; put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread.) It is a common drink in febrile affections.

TOBACCO, (from *tabacos*, the Caribbean name for the pipe in which it was smoked [?]), Nicotiana tabacum—t. English, Nicotiana rustica—t. Indian, Lobelia inflata—t. Poison, Hyoscyamus niger.

Tobacco Root, see Valeriana.

Tobacco, Wild, Lobelia inflata, Nicotiana rustica.

TOCETUS, (τοκετος,) Parturition.

TOCODOMYCODORITIS MALIGNA VAGINALIS, (*tocus*, μυκος, 'mucus,' δορα, 'skin,' and *itis*,) Colpocace puerperarum.

TOCOLOGY, (*tocus*, and λογος, 'a discourse,') Obstetrics.

TOCUS, (τοκος,) Parturition.

TODDY. A name given, by the English, to sweet, delicious and refreshing liquors procured in India by wounding the *spathæ* of certain palms. The best is obtained from the Cocos nucifera.

It is obtained in large quantities from *Saguë'rus sac'charifer* seu *Rum'phii*, *Pal'ma In'dica vina'ria secun'da*, *Saguë'rus* seu *Gomu'tus Gomu'to*, *Aren'ga saccharif'era*, *Gomu'to palm*. It is called, also, *Ne'va*, and, by boiling, yields a coarse kind

of sugar, called *Jag'gery*. The inhabitants of the Moluccas used, in their wars, a liquor obtained by macerating the fruit, which the Dutch called *Hell water, A'qua inferna'lis.*

Toddy is, also, the common name for a mixture of spirit and water sweetened, and usually spiced with nutmeg.

TODDY TREE, Mamei.

TOE, ([Sax.] ταˌ) Digitus pedis — t. Supernumerary, see Monster.

TOEPLITZ, see Töplitz.

TOFUS, Tophus.

TOILE D'ARAIGNÉE, 'spider's web,' Aranea tela—*t. Choroïdienne*, see Choroid—*t. de Gautier*, Sparadrapum Galteri.

TOKAS, (τοκας, gen. τοκαδος,) Puerpera.

TOKEN, PLAGUE, see Plague token.

TOKOLOGY, (*tocus*, and λογος, 'a discourse,') Obstetrics.

TOLA, Tonsil.

TOL'ERANCE, *Toleran'tia*, (*tolerare*, 'to bear.') The power of bearing. A word used by the Italian school of Rasori, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See Contro-stimulus.

TOLES, Tonsil.

TOLIUM, Tonsil.

TOLLES, Tonsil.

TOLLUM, Tonsil.

TOLU, (from Tolu in South America,) see Toluifera balsamum.

TOLUIF'ERA BAL'SAMUM, (*tolu*, and *ferre*, 'to bear,') *Myrox'ylon* seu *Myrosperm'um Toluif'erum*. *Ord.* Leguminosæ. *Sex. Syst.* Decandria Monogynia. The name of the tree which affords the *Tolu, Bal'sam of Tolu', Bal'samum Toluta'num*, (Ph. U. S.), *Toluta'num, Toluif'eræ Bal'sami Bal'samum, Goac'onaz, Red Bal'sam of Peru'*, (F.) *Baume de Tolu, B. de Carthagène* ou *d'Amérique* ou *de Saint Thomas*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant [?], and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see Toluifera balsamum.

TOM OF BEDLAM, see Abraham man.

TOMACINUM, (τομη, 'a cutting up,') Isicium.

TOMACLUM, (same etymon,) Isicium.

TOMACULUM, (same etymon,) Isicium.

TOMATA, (Indian,) Solanum lycopersicum.

TOMATO, Solanum lycopersicum.

TOMĒ, *To'mus*, (τομη, τομος, 'incision.') A common suffix, as in Litho*tomy*, Bronchoto*mus*, &c.

TOMĒ, Cut, Incision.

TOMEION, (τομειον,) Knife.

TOMEN'TUM CER'EBRI, (*tomentum*, 'a flock of wool.') The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, (τομευς,) Knife.

TOMIS, (τομις,) Scissors.

TOMOTOCIA, (τομη, 'section,' and τοκος, 'parturition,') Cæsarean section.

TOM TOE, Pollex, see Digitus pedis.

TONE, *To'nus*, (τονος, from τονοω, 'I brace or give vigour.') The state of tension or firmness proper to each organic tissue. It is the effect of tonicity.

TONE, see Elasticity.

TONGA, see Datura sanguinea.

TONGRES, MIN'ERAL WA'TERS OF. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate containing carbonates of iron and magnesia.

TONGUE, (Sax. τunz, [D.] Tong,) *Lin'gua, Glos'sa, Glot'ta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and exspuition. It has the shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its *upper surface*, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea media'na;* at the posterior extremity of which is the *fora'men cæ'cum* or *Fora'men of Morgag'ni*. The *inferior surface* is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw by means of the genio-glossus; and to the hyoides by the hyoglossus. Its *margins* are rounded; thick behind, thinner anteriorly. Its *tip*, or *point*, or *dental extremity* is rounded and free: — the *root, base*, or *hy'oid extrem'ity, Ra'dix lin'guæ*, is continuous with the epiglottis and velum palati. It is very thick at the foramen cæcum; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane—*Periglot'tis, Involu'crum lin'guæ, Membra'na* seu *Tu'nica vagina'lis* seu *Cu'tis* seu *Epider'mis* seu *Tu'nica* seu *Involu'crum muco'sum* seu *Crus'ta villo'sa lin'guæ*—which forms also the frænum beneath the tongue. On this membrane are seen the different *papillæ*. The nerves of the organ proceed from the *inferior maxillary, glosso-pharyngeal* and *hypoglossal*. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the glosso-pharyngeal to be the special nerve of gustation. The arteries are the *lin'gual*, from the external carotid; and the *pal'atine* and *ton'sillar*, from the labial. The veins are the *superficialis lin'guæ, ran'na, lingua'lis*, and *submenta'lis*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the hyoglossi muscles.

TONGUE, BLACK. A fever which prevailed in the Western States in the winter of 1842–3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, Glossocele.

TONGUE HOLDER, Glossocatochus.

TONGUE, INFLAMMATION OF THE, Glossitis — t. Red, fever, see Typhus.

TONGUE SCRAPER, *Cure-langue* — t. Tie, see Ankyloglossum.

TON'IC, (τονικος,) *Ton'icus*, (F.) *Tonique*. Relating to tone.

Tonic, Ton'icus, Tono'ticus, Antasthen'icus, (F.) *Tonique, Fortifiant*, in Therapeutics, means a medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortan'tia, Confortati'va, Corroboran'tia, Confirman'tia, Roboran'tia*, &c.

The following are the chief Tonics: — Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argenti Nitras, Bismuthi Subnitras, Carbo Ligni, Cascarilla, Cinchona, Cinchonia, Colomba, Cornus Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cusparia, Eupatorium perfoliatum, Ferri Præparata, Gentiana, Liriodendron, Lupulina, Piperina, Prunus Virginiana, Quassia, Quinia, Salix, Salicina, Serpentaria, Zinci

præparata; Aquæ minerales acidulæ et ferruginеæ; and Mental Tonics, (Confidence, Hope, Amusement.)

TONIC POWER, Irritability.

TONIC SPASM, *Spas'mus ton'icus, Convul'sio tonica, Conduc'tio, Spas'ticus, Tonus, Enton'ia, En'tasis, Enta'sia.* A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

TONIC"ITY, *Tonic"itas.* The faculty that determines the general tone of the solids. Excessive tonicity causes *er'ethism* or *crispness*; deficient tonicity, *at'ony* or *weakness. Tonicity* has been used in the same sense as irritability.

TONIQUE, Tonic.

TONKA BEAN, Dipterix odorata.

TONODES, (τονωδης,) Tensive.

TONOTICUS, (τονωτικος,) Tonic.

TON'SIL, *Tonsil'la, Amyg'dala, Paristh'mia, Paristh'mium, Amphibran'chium, Glan'dula colli, To'la, Tol'les, To'les, To'lium, Tol'lum, Spong'os, An'tiae*, pl. *Anti'ades, Al'monds of the ear, Al'monds* or *Bulbs of the throat*, (F.) *Amygdale, Tonsille*, (Prov.) *Earkecker.* An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSIL-GUILLOTINE, Amygdalatome.

TONSILLA, pl. Tonsillæ, Tonsil.

TONSILLÆ PESTILENTES, Cynanche maligna.

TON'SILLAR, *Tonsilla'ris*, (F.) *Tonsillaire.* Appertaining or relating to the tonsils.

TONSILLARUM GANGRÆNA, Cynanche maligna.

TONSILLE, Tonsil.

TONSILLIA, Cynanche tonsillaris.

TONSILLIT'IC, *Tonsillit'icus*, (better *Tonsillar.*) Belonging or relating to the tonsils; as the '*tonsillitic* branches of the glossopharyngeal nerve.'

TONSILLITIS, (*tonsilla*, and *itis*,) Cynanche tonsillaris.

TONSILLITOME, (*tonsilla*, and τεμνειν, 'to cut,') Amygdalatome.

TONSORIUS CULTER, (*tonsor*, 'a barber,' and *culter*, 'a knife,') Razor.

TONUS, (τονος,) Tonic spasm—t. Trismus, Trismus.

TOODLE, Tooth.

TOOTH, (Sax. τοθ,) *Dens, Mor'dex, O'dous*, (Prov.) *Toodle*, (F.) *Dent.* The teeth, *Den'tes, Mord'ices*, are small, hard bodies fixed in the alveoli of each jaw, and serving to seize, and to cut, tear, and triturate, alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *crown* or *coro'na.* It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus — the *fang* or *root, Odontorrhi'za*, (F.) *racine.* In the adult, the teeth are 32 in number; 16 to each jaw: these consist of 4 *incisors*, 2 *canine*, 4 *bicuspidati*, and 6 *molares.* (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cavi'tas Pul'pæ, Cu'vum Den'tis, An'trum dental'e.* They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enam'el.* The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See Dentition. Researches by Retzius, Müller and others, have led them to believe that the *ivory* of the tooth, *Den'tine* or *Dentin, E'bur, Substan'tia os'sea* of Malpighi, *proper tooth sub'stance, bone of the tooth, os'seous substance of tooth, toothbone*, consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called, by Professor Owen, *calcig"erous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crus'ta petro'sa, cæmen'tum, cemen'tum* or *cortical sub'stance*, commences in an extremely thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the cavitas pulpæ. They gave it the name *Substantia ostoïdea.* It is the *mate'ria tarta'rea* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horn'y substance* of Blumenbach, the *osteoden'tine* of Owen, and the *sec'ondary den'tine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum.* Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTHACHE, Odontalgia—t. Bush, Xanthoxylum fraxineum — t. Tree, Aralia spinosa, Xanthoxylum clava Herculis.

TOOTHBONE, see Tooth—t. Edge, *Agacement des dents*, Hæmodia — t. Paste, Dentrifricium — t. Rake, Dentiscalpium — t. Rash, Strophulus — t. Shell, dog-like, Dentalium

TOPHA'CEOUS, *Topha'ceus*, (F.) *Tophacé*; (from *tophus.*) Relating or belonging to tophus, —as '*a tophaceous* concretion.'

TOPHACEOUS CONCRETION, Tophus.

TO'PHUS, (τοφος,) *To'fus*, 'a porous or friable stone.' *Osteot'ophus, Topha'ceous Concre'tion.* A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout, *Arthrot'ophus*, (see Calculi, arthritic,) and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel, and chalaza.

TOP'IC, *Top'icus*, (from τοπος, *locus*, 'a place.') A local application; (F.) *Topique.* See Local.

TOPICUS, (τοπικος), Local, Topic.

TOPINARIA, Talpa.

TOPIQUE, Topic.

TÖP'LITZ or TEP'LITZ, MIN'ERAL WA'TERS OF. Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium; carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fah. Season, from the 1st of June to the 15th of September.

TOPOGRAPHICAL ANATOMY, (τοπος, 'a place or region,' and γραφω, 'to describe,') see Anatomy.

TOQUE, (a kind of hat,) Scutellaria galericulata.

TOR'CULAR, (from *torqueo*, 'to twist,') Tourniquet. A press for wine, oil, or cider.

TOR'CULAR HEROPH'ILI, *Press of Herophilus*,

Lechenei'on, Le'nos, Le'num, Fourth Sinus, (F.) *Confluent des Sinus, Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it;—one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, (from *torqueo*, 'to twist,') Tourniquet.

TORDYL'IUM, (τορδύλιον,) *T. Officina'lē, Tor'dylum*, (τορδύλον,) *Ses'eli Cre'ticum* seu *Monta'num*, (F.) *Séseli de Crète*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

TORE'NIA ASIAT'ICA, (after Olaf Toren, of Gothenburg, a pupil of Linnæus,) *Cœla-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, Geranium maculatum, Tormentilla.

TORMENTIL'LA, (from *tormina*, for which it was used,) *T. erec'ta* seu *sylves'tris* seu *officina'lis* seu *tubero'sa, Fraga'ria tormentil'la officina'lis, Potentil'la tormentil'la, Heptaphyl'lum, Consol'ida ru'bra, Com'mon Tor'mentil, Up'right Sept'foil*, (F.) *Tormentille*. *Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The root, *Tormentilla* (Ph. U. S.), has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x to ʒj.

TORMENTUM, 'pain, suffering,' (from *torqueo*, 'to twist,') Ileus, Intussusceptio.

TOR'MINA, pl. of *Tormen, Stro'phus, Cœlial'gia, Encœlial'gia, Anile'ma, Anile'sis, Gripes, Mul'ligrubs, Fret'ting*, (F.) *Tranchées*, (from *torqueo*, 'I twist.') Acute colicky pains. Dysentery.

TORMINA CELSI, Dysentery — t. Parturientium, Pains, labour—t. Post partum, see Pains, labour.

TORNACULUM, (from *torquere*, 'to twist,') Tourniquet.

TOROS'ITAS, (from *torosus*, 'brawny,'—*torus*, 'brawn,') *Corpulen'tia carno'sa, Hab'itus athlet'icus*. Muscular strength.

TOROSUS, Muscular.

TORPEDO, (*torpeo*, 'to be torpid,') Narcosis.

TORPEFACTIO UNIVERSALIS, (*torpeo*, 'to be torpid,' and *facere*, 'to make,') Holonarcosis.

TORPEUR, Torpor.

TOR'PID, *Tor'pidus*, (F.) *Torpide, Engourdi*, (from *torpeo*, 'to be sluggish.') Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

TORPIDITAS, Torpor.

TORPIDUS, Narcotized, Torpid.

TOR'POR, gen. *Torpo'ris, Torpid'itas, Noth'rotes, Parap'sis ex'pers, Torpid'ity*, (F.) *Engourdissement*. State of a part which becomes numb, and almost incapable of motion. *Tor'por, Torpid'ity, Torpid'ness, Tor'pitude* are also applied to a debilitated, sluggish condition of a part, or of the whole of the body; *Aër'gia*, (F.) *Accablement*.

TORPOR, Narcosis — t. of the Colon, see Colon, torpor of the — t. Intestinorum, Constipation — t. Soporificus, Nocar.

TORQUAY, (pron. *Torkee'*.) A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthisical invalid.

TOR'SION, *Tor'sio*, (from *torquere, tortum*, 'to twist.') The act of twisting. Torsion of the extremities of bleeding vessels — *Angios'trophē* — until the blood ceases to flow, is sometimes used to arrest hemorrhage.

TORSK, see Oleum jecoris aselli.

TORTELLE, Erysimum.

TORTICOL'LIS, (*torquere, tortum*, 'to twist,' and *collum*, 'the neck,') *Tortico'lis, Ca'put* seu *Col'lum obsti'pum, Obsti'pa cer'vix, Obstip'itas cap'itis* seu *Col'li, Trachel'agra, Enta'sia Lox'ia, Lox'ias, Ce'phalolox'ia, Ancylod'erē, Ancylod'eris, Rhæbocra'nia, Rhæbau'chen, Rhæbod'erē, Auchenorrhcu'ma, Rheumatis'mus col'li* seu *cervi'cis, Stiff-neck, Wry'neck*, (Prov.) *Slab*, (F.) *Obstipité*. A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, (*torquere, tortum*, 'to twist, to wind,') Hydraspis expansa.

TORTUE, 'tortoise,' Testudo.

TORTURA ORIS, (from *torqueo*, 'to twist,') Canine laugh, Neuralgia faciei—t. Oris paralytica Linnæi, Paralysis, Bell's.

TOR'ULA CEREVIS'IÆ, (from. *torus*, 'a knot,') *T. Ace'ti, Saccharom'yces* seu *Mycoder'ma cerevis'iæ, Cryptococ'cus ferment'um* seu *cerevis'iæ*, (F.) *Champignon du ferment, Yeast plant*. One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in fæces.

TORULUS GLANDIS, (dim. of *torus*, 'a fleshy part,') Crown of the glans.

TORUS, 'a fleshy part,' Muscle — t. Manûs, Metacarpus.

TOTA BONA, 'all good,' Chenopodium bonus Henricus.

TOTSU KASO, Sphæria Sinensis.

TOTTY, Vertiginous.

TOTUM CARNOSUM, 'all fleshy,' Pancreas.

TOUCH, *Tac'tus, Tac'tio, Ha'phē, Hap'sis, Tac'tion, Palpa'tion*, (F.) *Toucher*, (from [I.] *toccare*, 'to touch.') One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active. See Esaphe, and Palpation.

'*To touch* the mouth with mercury' is to produce the constitutional effects of that agent, as evinced by the falling away of the gums, &c.

TOUCH-ME-NOT, Impatiens fulva.

TOUCH, ROY'AL. It was at one time almost universally believed, in England, that the royal touch would remove *Scrofula* or *King's Evil* (as it was thence called.) This superstition is now entirely exploded. Edward, the Confessor, was the first English king who *touched* for the Evil. Medals of gold or silver were often suspended around the necks of the persons touched. These were called *touching* or *healing pieces*.

TOUCHER, 'touch,' Esaphe, Touch — *t. Vaginal*, Esaphe.

TOUCHING PIECE, see Touch, royal.

TOUCHWOOD, Boletus igniarius.

TOULOUCOUNIN, see Carapa touloucouna.

TOUR DE MAÎTRE, 'a master turn or feat,' *Coup de maître*.

TOURBILLON VASCULAIRE, (from *turbo*, gen. *tur'binis*, 'a whirlpool,') Vasa vasorum.

TOURNESOL, ([F.] *tourner*, 'to turn.' and

sol, 'the sun,'—a translation of *'ηλιοτροπιον, heliotropium,*) Heliotropium Europæum.

TOURNIOLE, (from *tourner,* 'to turn,' like *Runround,*) Paronychia.

TOUR'NIQUET, (pron. *toorniket* or *turniket,*) *Tor'cular, Tor'culum, Tornac'ulum, Præ'lum, Præ'lum, Præ'lium* seu *Prelum arteria'lē, Verticil'lum, Fas'cia tor'tilis,* (from [F.] *tourner,* 'to turn.') A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

TOUS-LES-MOIS, 'every month,' *Am'ylum canna'ceum, Canna* (Ph. U. S.), *Can'na Starch.* A fecula obtained from the root of *Canna edu'lis,* which flowers every month. It resembles potato starch, and may be substituted for arrowroot. It is obtained from St. Kitts.

TOUT, Nates.

TOUTE BONNE, 'all good,' Salvia sclarea.

TOUTE ÉPICE, 'all spice,' see Myrtus pimenta—*t. Sainte,* Sanicula.

TOUX, Tussis—*t. Bleue,* Pertussis—*t. Bronchique,* Bronchial cough, Cough, tubal—*t. Caverneuse,* see Cavernous respiration—*t. Convulsive,* Pertussis—*t. Quinteuse,* Pertussis—*t. Tubaire,* Bronchial cough, Cough, tubal.

TOW, ([Sax.] τοϸ,) Stupa.

TOXÆMIA, Toxicohæmia.

TOXÆ'MIC, *Toxicohæ'mic, Toxicæ'mic, Hæmatox'ic, Hæmatotox'ic, Hæmotox'ic, Toxæ'micus, Toxicohæ'micus, Toxæ'micus, Hæmatox'icus, Hæmatotox'icus, Hæmotox'icus.* Relating or appertaining to a poisoned state of the blood.

TOXÉMIE, Toxicohæmia.

TOXICÆMIA, Toxicohæmia.

TOXICARIA MACASSARÏENSIS, see Upas.

TOXICAL, Poisonous.

TOXICATIO, (from *toxicum,*) Poisoning.

TOXICÉMIE, Toxicohæmia.

TOXICODENDRON, (*toxicum,* and *δενδρον,* 'a tree,') Rhus toxicodendron.

TOXICOHÆ'MIA, *Toxicæ'mia, Toxæ'mia,* (F.) *Toxicohémie, Toxicémie, Toxémie,* (*toxicum,* and *'αιμα,* 'blood.') Poisoning of the blood.

TOXICOHÉMIE, Toxicohæmia.

TOX'ICOID, *Toxicoï'des,* (*toxicum,* and *ειδος,* 'resemblance.') Resembling poison.

TOXICOL'OGY, *Toxicolog''ia,* (*toxicum,* and *λογος,* 'a description.') A treatise on poisons.

TOXICO'SES, (G.) Toxikosen, (from *toxicum,* 'an arrow,' originally 'arrow poison,' and *osis.*) A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

TOXICUM, (*τοξικον,* from *τοξον,*) Poison, Venom.

TOXIQUE, Poisonous.

TRABEC'ULA, (dim. of *trabs,* gen. *trabis,* 'a beam,') (F.) *Trabécule,* 'a small beam.' Applied to prolongations of fibrous membrane, for example, which form septa, as in the corpora cavernosa; to the medullary fibres, which form the commissures; and to the fleshy projections, which form the columnæ carneæ, &c.

TRABECULA CEREBRI, Corpus callosum.

TRABECULÆ CARNEÆ, Columnæ carneæ—t. Cordis, Columnæ carneæ—t. Corporum cavernosorum, see Cavernous bodies—t. Splenis, see Spleen—t. Willisii, Chordæ Willisii.

TRABES CORDIS, (pl. of *trabs,*) Columnæ carneæ.

TRABS, 'a beam,' Penis—t. Cerebri, Corpus callosum—t. Medullaris, Corpus callosum.

TRACE, PRIMITIVE, Groove, primitive.

TRACHE'A, (*τραχεια,* fem. of *τραχυς,* 'rough,' *αρτηρια,* 'understood,') (generally, however, accented *Tra'chea ;*) *Trache'a* seu *Trachei'a arte'ria (τραχεια αρτηρια,) Trache'lus, Bron'chus, As'pera arte'ria, Fis'tula spiritua'lis* seu *pulmona'lis, Can'na, Syrin'ga, Sy'rinx ;* the *Wind'pipe, Wo'sen, Weas'and, Wizen, Wee'sel, Throt'tle,* (Sc.) *Throp'ill,* (Prov.) *Keck'corn, Kec'ker, Throp'ple,* (F.) *Trachée, Trachée artère ;* (composed of *αηρ,* 'air,' and *τηρεω,* 'to keep.') The trachea is a cylindrical, fibrocartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia,* which separate, one to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *An'nuli cartilagin'ei, Segmen'ta cartilagin'ea, Orbes cartilagino'si,* incomplete behind; situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverso muscular fibres, not well-marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroideal; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia.

The breathing tubes of insects are termed *Trache'æ.*

TRACHEA ARTERIA, Trachea.

TRACHEÆ, see Trachea.

TRA'CHEAL, *Trachea'lis,* (F.) *Trachéal.* Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

TRACHEAL GLANDS. Mucous follicles on the posterior surface of the trachea. They are small, flattened ovoid bodies.

TRACHEALIA, (from *trachea,*) Cynanche trachealis.

TRACHEA'LIS. The fibres of unstriped muscle, which pass from one portion of each of the tracheal cartilages to the other, at the posterior part of the trachea, have been so called by some anatomists. When they contract, they approximate the extremities of the cartilage; diminish the calibre of the trachea; and thus increase the velocity of the air forced through it, as in coughing; and facilitate the removal of any irritating substance in contact with the lining membrane.

TRACHÉE, Trachea—*t. Artère,* Trachea.

TRACHEITIS, (*trachea* and *itis,*) Cynanche trachealis.

TRACHELAGRA, Torticollis, (*τραχηλος,* 'neck,' and *αγρα,* 'seizure.') Also, gout in the neck.

TRACHELIAN, (from *trachelus,*) Cervical.

TRACHELISM'US, (from *trachelus.*) A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head.

TRACHELITIS, (*trachelus,* and *itis,*) Cynanche trachealis.

TRACHELIUM AMERICANUM, (from *trachelus,* having been used in throat affections,) Lobelia cardinalis.

TRACHÉLO-ATLOÏDO-BASILAIRE, Rectus capitis lateralis—*t. Atloïdo-occipital,* Obliquus superior capitis—*t. Basilaire,* Rectus capitis in-

ternus major—*t. Basilaire, petit,* Rectus capitis internus minor.

TRACHE'LODIAPHRAGMAT'IC, *Trachelodiaphragmat'icus.* The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises.

TRACHELODYN'IA, (*trachelus,* and *ὀδυνη,* 'pain.') Pain in the neck.

TRACHÉLO-MASTOÏDIEN, Complexus minor—*t. Occipital,* Complexus—*t. Scapulaire,* Levator scapulæ.

TRACHELUS, Collum, Trachea.

TRACHE'OBRONCHI'TIS. Inflammation of the trachea and bronchia.

TRACHEOCELE, (*trachea,* and *κηλη,* 'a tumor,') Bronchocele.

TRACHEOPHONY, (*trachea,* and *φωνη,* 'voice,') Laryngophony.

TRACHEOPHTHISIS, see Phthisis laryngea.

TRACHEOPHYMA, (*trachea,* and *φυμα,* 'a swelling,') Bronchocele.

TRACHEOPYRA, (*trachea,* and *πυρ,* 'fever,') Cynanche trachealis.

TRACHEORRHAG''IA, *Hæmop'toë* seu *Hæmop'tysis laryngeʹa et tracheaʹlis,* (*trachea,* and *ῥηγνυμι,* 'to break forth.') Hæmorrhage from the trachea.

TRACHEOSTENO'SIS, (*trachea,* and *στενωσις,* 'contraction.') Contraction or narrowness of the trachea.

TRACH'EOTOME, (*trachea,* and *τεμνω,* 'to cut.') An instrument of the trocar kind, for opening the trachea.

TRACHEOTOMY, see Bronchotomy.

TRACHITIS, (*trachea,* and *itis,*) Cynanche trachealis.

TRACHO'MA, gen. *Tracho'matis,* (from *τραχυς,* 'rough.') *Aspreʹdo, Aspritu'do, Pladar'otes, Asperitu'do, Scabrit''ies, Granʹular conjuncti'va, Granʹular eyeʹlid,* (F.) *Aspérité des Paupières.* A roughness of the inner surface of the eyelids. A variety of ophthalmia, of which three kinds have been designated:—*T. sabuloʹsum,* from sand, &c., getting between the eyelids; *T. carunculoʹsum, Pladarʹotes, Pladaroʹsis, Morum palʹpebræ interʹnæ,* from fleshy excrescences; and *T. herpetʹicum,* from hard pustules on the inner surface of the eyelids. This last is, also, called *Ficoʹsis,* and *Palʹpebra ficoʹsa.*

TRACHYPHO'NIA, (*τραχυς,* 'rough,' and *φωνη,* 'voice.') Roughness of the voice.

TRACT, *Tracʹtus,* (from *trahere, tractum,* 'to draw out lengthwise.') A track or course; a region.

TRACT, OPTIC, see Optic nerves—t. Respiratory, see Respiratory tract.

TRACTATIO MANUARIA, (*tractare, tractatum,* 'to handle.') Diachcirismus, Surgery.

TRACTORATION, (*trahere, tractum,* 'to attract, influence,') Perkinism, see Tractors, metallic.

TRACTATORES, (*tractare, tractatum,* 'to handle,') see Shampooing.

TRACTOR, (*trahere, tractum,* 'to draw,') Lever, *Tirc-tête.*

TRAC'TORS, METAL'LIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractoraʹtion.* The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

TRACTUS, Tract—t. Intestinorum, Intestinal Tube—t. Opticus, see Optic nerves—t. Respiratorius, Respiratory tract.

TRACTUS SPIRA'LIS FORAMINULEN'TUS. Minute openings at the base of the modiolus, arranged in a spiral manner, which transmit the filaments of the cochlear nerve. The central canal of the Tractus is longer than the rest, and is called *Tu'bulus centruʹlis modiʹoli.*

TRADESCAN'TIA VIRGIN'ICA, (after John Tradescant, gardener to Charles I.,) *Spider'wort;* indigenous; *Order,* Commelynaceæ; flowering from May to August. The roots are demulcent.

TRAGACAN'THA, (*τραγος,* 'a goat,' and *ακανθα,* 'a thorn,' owing to its hirsute boughs.) *Gummi Tragacanʹtha* seu *Astragʹali Tragacanʹthæ, Gum Tragʹacanth, Gum Dragʹon.* The concrete juice of *Astragʹalus Tragacanʹtha* or *Astragalus Veʹrus,* a native of Persia. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. (F.) *Gomme Adragant, Adragant, Adragante, Adraganthe.* This gum is inodorous; nearly insipid; of a whitish colour; semitransparent and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA, Tragema—t. Aromatica, Pulvis cinnamomi compositus.

TRAGE'MA, gen. *Trageʹmatis,* (*τραγημα,* 'a sweetmeat.') Of old, in the plural,—*Trageʹmata,*—it meant a dessert. Afterwards, like *Tragea,* it meant an aromatic powder, containing much sugar.

TRAG''ICUS, *Tragien* (Ch.), (from Tragus.) A small, flat, triangular muscle, which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, Tragicus.

TRAGOMASCHA'LIA, *Tragomasʹchalē,* (*τραγος,* 'a goat,' and *μασχαλη,* 'axilla.') The strong, unpleasant odour of the armpits.

TRAGOPHONIA, (*τραγος,* 'a goat,' and *φωνη,* 'voice,') Egophony.

TRAGOPO'GON, *Barʹba hirʹci,* (*τραγος,* 'a goat,' and *πωγων,* 'beard.') A genus of plants; *Ord.* Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia Æqualis. (F.) *Barbe de Bouc;* of which the roots of the *Tragopoʹgon porrifoʹlium, Salʹsifi, Salʹsify, Salʹsafy, Oysterplant, Oysterroot, Vegʹetable oyster,* (F.) *Salsifis* ou *Cercifis;* and the young shoots of the *T. pratenʹsē, Meadʹow Salʹsifi, Comʹmon Goat's Beard,* (F.) *Salsifis des prés,* are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, (*τραγος,* 'a goat,' and *σελινον,* 'parsley,') Pimpinella saxifraga—t. Angelica. Ligusticum podagraria—t. Magnum, Pimpinella magna—t. Majus, Pimpinella magna—t. Saxifraga, Pimpinella magna.

TRA'GUS, (*τραγος,* 'a goat;' from its being furnished, in some persons, with hair, like the beard of a goat.) *Hirʹcus, Hirʹquus.* A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goatlike smell of the axillæ.

TRAGUS MATTHIOLI, Salsola kali.

TRAINASSE, (from *trainer,* 'to trail,') Polygonum aviculare.

TRAINING, ([F.] *trainer,* from *trahere,* 'to draw,') (F.) *Entraînement.* A system of treating man and animals, so as to develop their full physical powers. It is practised especially as regards the prize-fighter and the race-horse, and appertains to what have been termed by the French *Organoplastics.*

TRAITEMENT, ([L.] *tractare,* [F.] *traiter,* 'to treat,') Curatio—*t. Palliatif,* see Palliation.

TRAME, (*τραμη,*) Perinæum.

TRAMIS, (*τραμις,*) Perinæum.

TRANCE, Catalepsy, Ecstasis—t. Death, see Asphyxia.

TRANCHÉES, (from *transcindere,* 'to cut across,') Tormina—*t. Utérines,* Pains, after.

TRANS, in composition, through, across, over, or beyond.

TRANSFIGURATIO, (*trans*, and *figurare, figuratum*, 'to form,') Transformation.

TRANSFORMA'TION, *Transforma'tio, Transfigura'tio, Transmuta'tio, Metab'olē*, (*trans*, and *forma*, 'form.') Change of form.

TRANSFORMATIONS DE TISSU (F.). The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFU'SION, *Transfu'sio, Metach'ysis*, (from *transfundere* (*trans*, and *fundere, fusum*, 'to pour.') To pour from one vessel into another.

Transfusion of Blood, *Transfusio San'guinis, Cu'ra Medea'na, Methæmachym'ia, Hæmatometach'ysis, Hæmometach'ysis, Diach'ysis, Transplanta'tio med'ica no'va, Chirur'gia transfuso'ria, Exotichæmato'sis.* The act of passing the blood of one animal into the veins of another; an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

TRANSLATION, (*trans*, and *ferre, latum*, 'to carry,') Metastasis.

TRANSMISSIBILITY, (*trans*, and *mittere, missum*, 'to send,') see Sensibility.

TRANSMUTATIO, (*trans*, and *mutare, mutatum*, 'to change,') Transformation.

TRANSPIRATIO, (*trans*, and *spirare, spiratum*, 'to breathe,') Perspiration — t. Unilatera, Hemidiaphoresis.

TRANSPIRATOIRE, Perspiratory.

TRANSPLANTATIO, (*trans*, and *plantare, plantatum*, 'to plant,') *Metaphytei'a.* A pretended method of curing diseases, devised by Paracelsus — by making them pass from one individual to another, either animal or vegetable.

Transplantatio, Morioplastice.

Transplanta'tio Den'tis, *Insit''io dentis.* The act of transplanting a tooth from one person to another.

Transplantatio Medica Nova, Transfusion.

TRANSPORT, (*trans*, and *portare*, 'to carry,') Delirium.

TRANSPOSITIO, (*trans*, and *ponere, positum*, 'to place,') Metathesis, Transposition.

TRANSPOSIT''ION, *Transposit''io, Metath'esis.* Change of situation.

Transposition of the Vis'cera, *Polype'ria promis'cua translati'va, In'tus inver'sus*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, (*trans*, and *sudare, sudatum*, 'to sweat,') Diapedesis, Transudation.

TRANSUDA'TION, *Transuda'tio*, (F.) *Transsudation.* The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

Transudation, Exosmose.

TRANSVERSAIRE, Transverse—*t. Épineux*, Transversalis dorsi — *t. Épineux du cou*, Semispinalis colli—*t. Épineux du dos*, Semispinatus dorsi —*t. Grêle*, see Sacrolumbalis.

TRANSVERSAL DE LA CONQUE, Transversalis auris—*t. du Nez*, Compressor nasi—*t. des Orteils*, Transversus pedis.

TRANSVERSALIS, (from *transverse*,) Transverse.

Transversa'lis Abdom'inis, (F.) *Lombo-abdominal*, (Ch.) *Transverse de l'Abdomen.* This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

Transversalis Anticus Primus, Rectus capitis lateralis — t. Collateralis colli, see Sacrolumbalis.

Transversalis Col'li, *Transversalis Ma'jor col'li, Por'tion of the Sa'crospi'nal* (Ch.), (F.) *Transversaire.* A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebræ of the neck; and to those of the four or five first dorsal. It extends the vertebræ of the neck, and inclines them to its side. See Semispinalis colli.

Transversalis Dor'si, *Transversospina'lis, Multif'idus Spi'næ, Lumbocer'vical por'tion of the Spi'nal* (Ch.), (*Transverso-spina'lis Lumbo'rum, Transversospinalis Dor'si, Transversospinalis Col'li,*) *Mus'culus sa'cer, Spina'les et transversa'les lumbo'rum, Semispina'lis inter'nus* sive *Transverso-spina'lis col'li pars inter'na* (Winslow), *Lombo-dorsi-spinal*, &c., (F.) *Transversaire épineux.* This muscle, usually called, by English anatomists, *Multif'idus spi'næ*, and including all the *transversospinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebra. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is to straighten the vertebral column, and to impress upon it a slight rotary motion.

Transversalis Nasi, Compressor naris.

TRANSVERSARIUS, Transverse.

TRANS'VERSE, *Transver'sus, Transversa'lis, Transversa'rius*, (F.) *Transverse, Transversaire*, (from *trans*, 'across,' and *vertere, versum*, 'to turn.') That which runs across: also, that which relates to the transverse processes of the vertebræ.

Transverse Ar'tery of the Face, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

Transverse Fissure, see Liver—t. Fossa, see Liver — t. Ligament of the Atlas, Annular ligament.

Transverse Perine'al Ar'tery, *Ure'throbulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transversus perinæi muscles, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

Transverse Proc''esses of the Ver'tebræ, *Diapoph'yses* of Owen, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebræ.

Transverse Su'ture, *Sutu'ra transversa'lis*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE, Transverse—*t. de l'Abdomen*, Transversalis abdominis — *t. de l'Oreille*, Transversus auris—*t. du Périnée*, Transversus perinæi.

TRANSVERSOSPINAL, Semispinalis colli, Semispinalis dorsi — t. Spinalis, Transversalis

dorsi—t. Spinalis colli, Semispinalis colli—t. Spinalis dorsi, Semispinalis dorsi.

TRANSVER'SUS, Transverse.

TRANSVERSUS AURIS, *Transver'sus Auric'ulæ*, (F.) *Transverse de l'Oricule*, (Ch.) *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVERSUS PE'DIS, *Scandula'rius*, (F.) *Transversal des Orteils, Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

TRANSVERSUS PERINÆ'I, *Leva'tor A'ni par'vus*, (F.) *Ischio-périnéal*, (Ch.), *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbocavernosus. The use of this muscle is,—to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle, Santorini has given the name *Ure'thræ Eleva'tor* seu *Ejacula'tor*.

TRANSVERSUS PERINÆ'I ALTER, *Prostat'icus infe'rior*. A small muscle which occasionally accompanies the last.

TRA'PA NA'TANS, *Trib'alus*, (F.) *Macre flottante, Noix* ou *Châtaigne d'Eau*. *Ord.* Onagraceæ. *Sex. Syst.* Tetrandria Monogynia. The plant which affords the *Nu'ces Aquat'icæ*, *Trib'uli aquatici*, *Caltrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPEZA, (τραπεζα,) Mensa.

TRAPÈZE, Trapezium, Trapezius.

TRAPE'ZIUM OS, (τραπεζιον, 'a trapezium.') So called from its shape. *Os multan'gulum* seu *polygo'num ma'jus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated above with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPE'ZIUS, *Cuculla'ris*, (F.) *Dorso-sus-acromien*, (Ch.), *Trapèze, Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebræ; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAPEZOID, (τραπεζιον, 'a trapezium,' and ειδος, 'shape or resemblance,') Trapezoïdes.

TRAP'EZOID LIGAMENT, *Ligamen'tum trapezoï'des*. The anterior part of the coracoclavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely between the acromion process and clavicle.

TRAPEZOÏ'DES OS, *Os multan'gulum* seu *polygo'num mi'nus* seu *pyramida'lē carpi*. The second bone of the second row of the carpus—so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

TRAUBENKUR, Grape cure.

TRAULISMUS, (τραυλισμος,) see Balbuties, and Blæsitas.

TRAULOTES, (τραυλοτης,) see Blæsitas.

TRAUMA, gen. *Trau'matis*, (τραυμα, gen. τραυματος,) Wound.

TRAUMAT'IC, *Traumat'icus*, *Vulnera'rius*, *Vul'nerary*, (F.) *Traumatique*, (τραυματικος, from *trauma*.) Anything relating to a wound.

TRAUMATICA, Detergents, Vulneraries.

TRAUMATICINE, (from *trauma*,) Liquor Guttaperchæ.

TRAUMATICUS, Traumatic, Vulnerary.

TRAUM'ATISM, *Traumatis'mus*. The condition of the organism occasioned by a grave wound.

TRAUMATOCOMI'UM, (*trauma*, and κομεω, 'I take care of.') An hospital for the reception of the wounded.

TRAUMATOP'YRA, *Febris traumat'ica*, (*trauma*, and πυρ, 'fever.') A wound fever, or fever consecutive to a wound.

TRAVAIL, ([F.] *travailler*, 'to labor,') Parturition.

TRAVAIL D'ENFANT, 'child labor,' Parturition.

TRAVELLER'S JOY, Clematis vitalba.

TREACLE, (from Θηριακα,) (F.) *Thériaque*, (old E.) *Triacle*, Melasses, Theriaca—t. English, Teucrium chamædrys—t. Venice, Theriaca.

TREAD, Cicatricula—t. of the Cock, Molecule.

TREATMENT, (from [L.] *tractare*, [F.] *traiter*, 'to treat,') Curatio.

TREAT'MENT, DRY. One in which the patient is almost wholly, if not wholly, restricted from the alimentary use of fluids; a valuable *modus medendi* in inflammatory and hemorrhagic conditions.

TREE, ELK, Andromeda arborea—t. of Heaven, Ailanthus glandulosa—t. of Life, Thuya occidentalis—t. Sour, Andromeda arborea.

TRÈFLE DE CASTOR, (from [L.] *trifolium*, from *tri*, and *folium*, 'a leaf,') Menyanthes trifoliata—*t. d'Eau*, Menyanthes trifoliata—*t. des Marais*, Menyanthes trifoliata.

TREFOIL, Hepatica triloba—t. Bean, stinking, Anagyris—t. Marsh, Menyanthes verna—t. Shrubby, Ptelea trifoliata—t. Sour, Oxalis acetosella—t. Water, Menyanthes trifoliata.

TREMA, (τρημα,) Foramen, Vulva.

TREMBLEMENT, Tremor—*t. Métallique*, see Tremor.

TREMBLES, Milksickness.

TREMBLING, Tremor—t. Fevers, Intermittent fever.

TREMELLA AURICULA JUDÆ, (from *tremere*, 'to tremble,') Peziza auricula.

TRE'MOR, *Trepida'tio*, *Syn'clonus Tre'mor*, *Tro'maspus'mus*, *Tro'mus*, *Trem'bling*, (F.) *Tremblement*, (from *tremere*, 'to tremble.') Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement*

métallique ; Tremor metal'licus. Tremor seems to resemble paralysis more than convulsion. See Paralysis agitans, and Pavitatio.

TREMOR CORDIS, Hippus, Palpitation — t. Metallicus, see Tremor — t. Potatorum, see Delirium tremens — t. Purring, *Frémissement cataire.*

TREPAN', *Trep'anum,* (τρυπανον,) *Try'panon, Trip'anon, Terebel'la, Pereter'ium, Peretor'ium, Ser'ra versat'ilis, Chœn'icis, Chœnic'ion, Ter'ebra, Ter'etron, Tere'trium, Vertib'ulum,* (F.) *Trépan,* (from τρεπω, 'to turn,' or from τρυπαω, 'to perforate.') A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trepan* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits, — as the crown, the *Trépan perforatif* or *Perite'rion,* the *T. exfoliatif* or *Desquamato'rium trep'anum,* and the *T. abaptis'ta. 'To trepan'* is to use the trepan.

In Great Britain and the United States this instrument has been superseded by the trephine, which is more manageable.

TREPANATIO, Trepanning.

TRÉPANATION, Trepanning.

TREPANG, *Biche de Mer.*

TREPAN'NING, *Terebra'tio, Anatre'sis, Cephalotrype'sis, Craniotrype'sis, Trepana'tio, Trype'sis, Tre'sis, Pri'sis, Pris'mus, Fora'tio,* (F.) *Trépanation.* The methodical application of the trepan.

TREPANUM, Trepan.

TREPHINE', (from τρεπω, 'to turn.') The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Cen'trepin.* The centrepin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw. See Trepan. *'To trephine'* is to use the trephine.

TREPIDATIO, (*trepidare, trepidatum,* 'to be agitated,') Tremor — t. Cordis, Cardiotromus.

TRÉPIED (tripod), *CŒLIAQUE,* see Cœliac artery — t. Vital, Tripod, vital.

TREPON'DO, (*tres,* 'three,' and *pondus,* 'a pound.') A weight of three pounds.

TRE'SIS, (τρησις, from τρεω, 'I bore.') Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

TRESIS, Trepanning, Wound — t. Causis, Burn — t. Punctura, Puncture — t. Vulnus, Wound — t. Vulnus lacerатum, see Laceration — t. Vulnus simplex, Cut.

TRESSAILLEMENT, (*trans,* 'beyond,' and *salio,* 'to leap,') Shuddering.

TRESSO'RIA, (low Latin,) *Episi'on.* A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, (τρι,) in composition, three.

TRIACLE (old E.), Melasses.

TRI'AL BY BIER'RIGHT. An ordeal, founded on a superstition formerly prevalent, that the wounds of a murdered person would bleed afresh if the body were touched ever so lightly, in any part, by the murderer.

TRIANGLE MÉDULLAIRE, (*tri,* and *angulus,* 'an angle,') Fornix.

TRIANGLE, VESICAL, see Urinary Bladder.

TRIANGLES, CERVICAL, see Cervical.

TRIAN'GULAR, *Trigo'nos, Triangula'ris,* (F.) *Triangulaire.* That which has three angles.

TRIANGULAR or INFRAPU'BIAN LIG'AMENT, *Ligamen'tum triangula're* seu *in'frapubia'num,* is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens. Also, a ligament extending from the coracoid to the acromial process of the scapula.

TRIANGULARIS, Depressor anguli oris — t. Coccygis, Coccygeus—t. Nasi, Compressor naris.

TRIANGULA'RIS STER'NI, *Sternocostal,* (Ch.), *Pectora'lis inter'nus.* A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBALUS, (τριβαλος,) Trapa natans.

TRIBAS, gen. *Tri'badis,* (τριβας,) (F.) *Tribade,* (from τριβω, 'I rub,') *Fric'trix, Frica'trix, Futu'trix, Mas'cula, Subagita'trix, Subigita'trix, Etæristria.* A female whose clitoris is so large as to cause her to be regarded as a hermaphrodite. One who acts as a male with another female.

TRIBASIC, (from *tri,* and *basis,*) see Salt.

TRIBULI AQUATICI, (pl. of *tribulus,* from τριβαλος,) see Trapa natans.

TRIBUTUM LUNARE, 'lunar or monthly tribute,' Menses — t. Menstruum, Menses.

TRICÆ, (from θριξ, gen. τριχος, 'a hair,') Plica — t. Incuborum, Plica — t. Scroforum, Plica.

TRICAGO, Teucrium chamædrys.

TRICAUDALIS, (*tri,* and *cauda,* 'a tail,') Retrahens auris.

TRICEPH'ALUS, (*tri,* and κεφαλη, 'head.') A monster with three heads.

TRI'CEPS, gen. *Tricip'itis,* (*tri,* and *caput,* 'head.') A name given to muscles that have three fleshy bundles at one of their extremities.

TRICEPS ADDUC'TOR FEM'ORIS. Under this appellation are comprehended three distinct muscles; *Adductor brevis, A. longus,* and *A. magnus.*

TRICEPS AURIS, Retrahens auris—t. Brachialis, Triceps extensor cubiti.

TRICEPS CRURAL, Triceps cruris.

TRICEPS CRU'RIS, *Femora'lis,* (F.) *Trifémoro-rotulien,* (Ch.) *Crural, Trifémoro-tibi-rotulien, Triceps crural* ou *de la cuisse,* is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz.: 1. A middle fasciculus (the *crura'lis* of most anatomists). 2. An external fasciculus (the *vastus externus*); and 3. An inner fasciculus (the *vastus internus*). It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

TRICEPS DE LA CUISSE, Triceps cruris.

TRICEPS EXTEN'SOR CU'BITI, *Tri'ceps brachia'lis,* (F.) *Scapulo-huméro-olécranien,* (Ch.) *Triceps brachial.* This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head, — *long head of the biceps externus* of Douglas, *Anconæ'us ma'jor* of Winslow,—arises from the anterior extremity of the inferior costa of the

scapula, near its neck, and below the origin of the teres minor. The second head, or *short head of the biceps externus* of Douglas, *Ancone'us externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head,—*Brachialis externus* of Douglas, *Ancone'us inter'nus* of Winslow,—the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the latissimus dorsi. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, Adductor magnus—t. Minor, Adductor longus femoris—t. Secundus, Adductor brevis.

TRICHÆ INCUBORUM, (θριξ, gen. τριχος, 'a hair,' and *incubi*, 'the Fauns,' [?]) Plica.

TRICHANGIA, (*tricho*, and αγγεια, 'vessels,') Capillary vessels.

TRICHANGIECTA'SIA, *Angidiecta'sia, Trichocir'sus*, (*tricho*, αγγειον, 'a vessel,' and εκτασις, 'dilatation.') Morbid dilatation of the capillary vessels.

TRICHAUX'Ē, (*tricho*, and αυξη, 'increase.') Increase in the quantity and size of the hair, without change of texture.

TRICHERA ARVENSIS, (from θριξ, gen. τριχος, 'hair,') Scabiosa.

TRICHIA, (from θριξ, gen. τριχος, 'hair,') Entropion.

TRICHI'ASIS, *Trichio'sis, Tricho'sis*, (from θριξ, gen. τριχος, 'hair,') *Mor'bus pila'ris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimic'tio*. It must be regarded as a variety of *Catar'rhus vesi'cæ*. 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty: a disease attributed, by Aristotle, to a hair swallowed by accident, and carried to the breasts through the circulation; and 3dly, To inversion of the eyelashes. See Entropion.

TRICHIASIS LACTEA, Infarctus mammæ lacteus.

TRICHIL'IA EMET'ICA, *Elcaja*. A tree, *Order*, Meliaceæ, common on the mountains of Yemen and in Senegal. The fruit is used by the Arabs as an emetic. The ripe seeds are formed with sesamum oil into an ointment for the itch.

TRICHILIA TRIFOLIA'TA, a bush of Curaçoa, a decoction of the roots of which is used to promote abortion.

TRICHI'INA SPIRA'LIS, (from θριξ, gen. τριχος, 'hair,' from its small size,) *Pseuda'lius trich'ina*. A small species of entozoa, *Fam.* Nematoidea, discovered in the muscles of voluntary motion. Trichinæ consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and colour, to young pediculi, and are somewhat allied to the eels found in paste and vinegar. Küchenmeister regarded them as the primitive state of Trichocephalus dispar; but this has not been confirmed. When taken with the food, they multiply in the intestines and then migrate to the muscles. No symptoms have, as yet, been observed to be pathognomonic of their presence in the muscles. It would appear, however, that they may be the cause of the morbid phenomena caused by eating the flesh of animals in which they existed, and may be the cause of sausage poisoning, see *Allantotoxicum*, and of the poisoning produced by eating pork and ham. The disease thus induced has been called *Trichini'asis* or *Trich'ina disease*.

TRICHINIASIS, see Trichina spiralis.

TRICHIOSIS, (from θριξ, gen. τριχος, 'hair,') Trichiasis—t. Distrix, Distrix.

TRICHIS'MUS, *Capilla'tio, Fissu'ra pila'ris*. A capillary fracture, fissure, or crack.

TRICHIURIA, (*tricho*, and ουρα, 'tail,') Trichocephalus.

TRICHO, (θριξ, gen. τριχος, 'a hair,') in composition, hair.

TRICHOCÉPHALE DE L'HOMME, Trichocephalus.

TRICHOCEPH'ALUS, *Trichoceph'alus dis'par*, (*tricho*, and κεφαλη, 'head.') *Trichu'ris, T. vulga'ris* seu *intestina'lis, As'caris trichu'ria, Trichiu'ria, Trichoceph'alus* seu *Mastigo'des hom'inis, Long thread'worm*, (F.) *Trichocéphale de l'homme*. A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICHOCIRSUS, (*tricho*, and κιρσος, 'a dilated vessel,') Trichangiectasia.

TRICHOG''ENOUS, (*tricho*, and γενναω, 'I generate.') Hair-forming; as a '*trichogenous* remedy,'—one that promotes the growth of hair.

TRICHOLABIS, (τριχολαβις, from *tricho*, and λαμβανω, 'to seize hold of,') Madisterium.

TRICHOLABIUM, (τριχολαβιον,) Madisterium.

TRICHOLOGIA, (*tricho*, and λεγω, 'I collect or pluck,') Carphologia. See Trichology.

TRICHOL'OGY, *Tricholog''ia*, (*tricho*, and λογος, 'a description.') A treatise on the hair.

TRICHOMA, gen. *Tricho'matis*, (from θριξ, gen. τριχος, 'hair,') Capillamentum, Plica.

TRICHOMANES, (*tricho*, and μανος, 'thin,') Asplenium trichomanoides—t. Crenata, Asplenium trichomanoides.

TRI'CHOMAPHYTE, *Trichomaph'yton*, (*trichoma*, 'plica,' and φυτον, 'a vegetable.') A cryptogamous growth, found in plica, and said, by some, to be its cause. Mycoderma plicæ.

TRICHOMATION, (τριχωματιον,) Capillamentum.

TRICHOMATOSE HAIR, (from *trichoma*,) Plica.

TRICHOM'ONAS, *Trichom'onad*, (*tricho*, and *monad*.) An animalcule found by M. Donné in the mucus of the vagina, where cleanliness had not been attended to, and to which he has given the name *Trichom'onas vagina'lis*. By some it is considered to be nothing more than ciliated epithelium separated from the uterus.

TRICHOMYCES DECALVANS, (*tricho*, and μυκης, 'fungus,') see Porrigo decalvans—t. Tonsurans, see Porrigo decalvans.

TRICHONOSIS, Porrigo—t. Furfuracea, Porrigo decalvans—t. Plica, Plica—t. Poliosis, Poliosis.

TRICHON'OSUS, (*tricho*, and νοσος, 'disease.') A disease of the hair.

TRICHOPHY'IA, *Trichophyt'ica*, (*tricho*, and φυειν, 'to grow.') Remedies that promote the growth of the hair.

TRICHOPHYTON, (*tricho*, and φυτον, 'a vegetable,') see Plica—t. Decalvans, see Porrigo decalvans—t. Sporuloides, see Fungus—t. Tonsurans, see Fungus, and Porrigo decalvans.

TRICHOSAN'THES AMA'RA, (*tricho*, and ανθη, 'a flower,' from the ciliated corollæ.) *Order*, Cucurbitaceæ; a plant of India; the seeds are bitter and astringent, sometimes emetic. In Jamaica, it is considered to be a poison, and is used for killing rats.

TRICHOSANTHES CORDA'TA. The root is used by the natives of India as a substitute for Calumba root.

TRICHOSANTHES CUCUMER'INA. The fruit is considered in India to be anthelmintic.

TRICHOSANTHES INCI'SA, *Gashed Trichosanthes*, of the forests of India. The fruit is esteemed to be poisonous. Pounded and intimately blended with cocoa nut oil, it is issued in India as an application to offensive sores of the ears, and to ozæna.

TRICHOSANTHES VILLO'SA, of Java. The fruit acts like colocynth.

TRICHOSCHISIS, (*tricho*, and σχιζω, 'to split,') Schizatrichia.

TRICHO'SIS, *Pila'rē ma'lum*, (from θριξ, gen. τριχος, 'hair,' and *osis*.) Morbid organization or deficiency of hair. A genus in the system of Good.

TRICHOSIS, Entropion, Trichiasis—t. Area, Porrigo decalvans—t. Athrix, Alopecia—t. Distrix, Distrix—t. Furfuracea, Porrigo furfurans—t. Hirsuties, Hirsuties—t. Plica, Plica—t. Poliosis, Poliosis—t. Setosa, Hystriciasis.

TRICHOTON, (τριχωτος, 'covered with hair,') Scalp.

TRICHURIS, (*tricho*, and ουρα, 'a tail,') Trichocephalus.

TRICLISPERMA GRANDIFLORA, (θριξ, 'hair,' and σπερμα, 'seed,') Polygala pauciflora.

TRICUS'PID, *Tricus'pis*, *Tricuspida'lis*, *Tricuspida'tus*, (*tri*, and *cuspis*, gen. *cuspidis*, 'a cusp, a point.') That which has three points.

TRICUSPID VALVES, *Val'vulæ Tricus'pides* seu *triglo'chines* seu *trisul'cæ*, are three triangular valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendineæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRICUSPIS, gen. *Tricusp'idis*, Tricuspid.

TRIENCEPH'ALUS, *Trioceph'alus*, (F.) *Triencéphale*, *Triocéphale*, (*tri*, and εγκεφαλος, 'the encephalon.') A monster wanting three cephalic organs of sense,—smell, hearing, and vision.

TRI'ENS, *Un'ciæ quat'uor*. (From *tri*, 'three.') The third part of a pound. Four ounces, Troy.

TRIFACIAL, Trigemini.

TRIFÉMORO-ROTULIEN, Triceps cruris—t. *Tibi-rotulien*, Triceps cruris.

TRIFOLIUM ACETOSUM, (*tri*, and *folium*, 'a leaf,') Oxalis acetosella—t. Aquaticum, Menyanthes trifoliata—t. Aureum, Hepatica triloba—t. Cervinum, Eupatorium cannabinum—t. Fibrinum, Menyanthes trifoliata—t. Hepaticum, Hepatica triloba.

TRIFO'LIUM MELILO'TUS OFFICINA'LIS, *T. offic''a ina'lē* seu *odora'tum* seu *caballi'num*; (from *tri*, and *folium*, 'a leaf;') *Melilo'tus*, *Melilo'tus citrina*, *Lo'tus sylves'tris*, *Ser'tula Campa'na*, *Coro'na re'gia*, *Common mel'ilot*, (F.) *Mélilot*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, glysters, &c.

TRIFOLIUM OFFICINALE, T. melilotus officinalis—t. Paludosum, Menyanthes trifoliata—t. Palustre, Menyanthes trifoliata.

TRIGAS'TRIC, *Trigas'tricus*, *Triven'ter*, (*tri*, and γαστηρ, 'belly.') That which has three bellies. An epithet for muscles so circumstanced.

TRIGEM'INI, *Tergem'ini*, (*tri*, and *gem'inus*, 'double;' 'threefold,' 'triplets.') The *fifth pair of nerves*, *Ner'vi divi'si* seu *gustato'rii*, *Ner'vus quin'tus* seu *tremel'lus* seu *mix'tus* seu *sympathet'icus me'dius* seu *sympath'icus me'dius* seu *anony'mus* seu *innomina'tus*, *Par trigem'inum* seu *quin'tum nervo'rum cerebra'lium* seu *tri'um funiculo'rum*, *Trifa'cial*, (F.) *Nerf gustatif innominé*, *Nerf à trois cordes*, *Nerf trijumeau*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion—the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first* or *ophthalmic branch*, and the *second* or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third—the *man'ducatory* or *mas'ticatory*—is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

TRIGONE CÉRÉBRAL, (τριγωνον, 'a triangle,') Fornix—*t. Vésical*, see Urinary Bladder.

TRIGONEL'LA FŒNUM, *T. Fœ'num Græ'cum*, (dim. of τριγωνον, 'a triangle,' from the shape of its flower.) *Fen'ugreek*, *Fœ'nugreek*, *Fœ'num Græ'cum*, *Bu'ceras*, *B. Fœ'num Græ'cum*, *Car'phos*, *Ægoc''eras*, (F.) *Fénugrec*, *Sénégrain*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONOS, (τριγωνος,,) Triangular.

TRIGONUM OLFACTORIUM, 'olfactory triangle,' see Mammillary eminence.

TRIGONUM VESICÆ, see Urinary bladder.

TRIGONUS LIEUTAUDI, (τριγωνον,) see Urinary bladder—t. Vesicæ, see Urinary bladder.

TRIJUMEAUX, (*tri*, and *jumeau*, 'a twin,') Trigemini.

TRIL'LIUM LATIFO'LIUM, (from *trilix*, 'triple,' its parts being chiefly in *threes*.) *Broad-leaf Bethroot*, *Beth'root*, *Rattlesnake root*, *Wake'-robin*, *Cough'root*, *In'dian Balm*, *Ground Lil'y*, *Jews' Harp*, *In'dian Sham'rock*, *Pariswort*, *Truelove*. *Ord.* Trilliaceæ. *Sex. Syst.* Hexandria Trigynia. A plant peculiar to North America, which blossoms in the spring. The root is astringent.

There are many species of Trillium, all of which possess the same properties.

TRINTANELLE MALHERBE, Passerina tartonraira.

TRIOCÉPHALE, Triocephalus.

TRIOCEPHALIA, Aprosopia, see Triencephalus.

TRIOCEPHALUS, Triencephalus.

TRIOR'CHIS, (*tri*, and ορχις, 'a testicle.') One who has three testicles.

TRIOSTEOSPERMUM, Triosteum.

TRIOS'TEUM, *T. Perfolia'tum* seu *ma'jus*, (*tri*, and οστεον, 'a bone,' in allusion to the three bony nuts;) *Triosteosper'mum*, *Bas'tard Ipecacuan'ha*, *Fe'ver Root*, *Fever'wort*, *Tink'er's weed*, *Horse gin'seng* or *gen'tian*, *Ip'ecac.*, *Wild Cof'fee*, *White gin'seng*, *Gen'tian*, *White Gen'tian*, *Sweet Bit'ter*. Indigenous; *Ord.* Caprifoliaceæ. In very large doses, *Triosteum* (Ph. U. S.) proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

TRIOSTEUM AUGUSTIFOLIUM, *T. mixus*, has similar virtues.

TRIPE DE ROCHE, 'rock tripe.' Different lichens—*Rock li'chens*, *Stone moss*—of the species

Gyrophora, inhabiting the Arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPHAR'MACUM, (*τριφαρμακον*, from *tri*, and *φαρμακον*, 'a medicine.') A medicine composed of three ingredients.

TRIP'LET, (*triplex*, 'triple.') One of three children born at the same accouchement or gestation. Also, relating to triplets — as a '*triplet* conception.'

TRIPLET MONSTERS, *Mon'stra tripli'ca* seu *trigemi'na*, are such as have parts of the body tripled. They are rare.

TRI'POD, VI'TAL, (*τριπος*, from *tri*, and *πους*, gen. *ποδος*, 'foot,') (F.) *Trépied vital*. The heart, lungs, and brain have been so called, as their united action is necessary for the maintenance of life.

TRIPSIS, (*τριψις*,) Contusio, Trituration.

TRIPUDIATIO SPASTICA, (*tripudiare*, *tripudiatum*, 'to leap, to dance,') Chorea.

TRIPUS, ('tripod,') CŒLIACUS seu HALLERI. see Cœliac artery.

TRIQUE-MADAME, Sedum album.

TRIQUETRA OSSA, (*triquetrus*, 'three cornered,') Worminna ossa.

TRIQUETRUM, (OS,) Cuneiform (bone.)

TRISM'US, (*τρισμος*, from *τριζω*, 'I gnash.') *Enta'sia* seu *To'nus Trismus*, *Capis'trum*, *Mas'ticatory spasm of the face*, *Lock'ed Jaw*, *Spas'mus* seu *Ri'gor* seu *Tet'anus maxill'æ inferio'ris*, *Gnathospas'mus*, *Stomatospas'mus*, (F.) *Mal de Machoire*. Spastic closure of the under jaw, a partial tetanus, arising from erethism of the masticatory or motor branch of the fifth pair of nerves. Cullen makes two varieties — *T. nascen'tium* seu *neonato'rum*, *Nineday fits*, (F.) *Sarrète*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

In the West Indies and in South America, Trismus nascentium is called *Seven days' disease*, (F.) *M. de sept Jours*.

TRISMUS CAPISTRATUS, *Brédissure*—t. Catarrhalis maxillaris, Neuralgia maxillaris—t. Clonicus, Neuralgia facici—t. Cynicus, see Canine laugh—t. Diastrophe Sauvagesii, Paralysis, Bell's—t. Dolorificus, Neuralgia facici—t. Maxillaris, Neuralgia facici—t. Nascentium, see Trismus—t. Neonatorum, see Trismus—t. Sardonicus, Risus sardonicus.

TRISPERM'UM, (*tri*, and *σπερμα*, 'a grain or seed.') An ancient cataplasm, consisting of three seeds,—*cumin*, *bay*, and *smallage*.

TRISPLANCHNIA, (*tri*, and *σπλαγχνον*, 'viscus,') Cholera.

TRISPLANCH'NIC, *Trisplanch'nicus*, . (F.) *Trisplanchnique*. That which relates to the viscera of the great cavities.

TRISPLANCHNIC NERVE, *Ner'vus trisplanch'nicus* seu *sympathet'icus mag'nus* seu *sympath'icus* seu *ganglion'icus* seu *vasomoto'rius*, (F.) *Nerf sympathique* ou *grand sympathique*, *Great sympathet'ic*, *Intercos'tal*, *Ganglion'ic* or *Ver'tebral nerve*, *Nerve of organ'ic life*;—named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *ner'vous sys'tem of the automat'ic func'tions*. It has also been called the *ganglion'ic ner'vous sys'tem*. It is termed *Trisplanch'nic* because it distributes its branches to the organs in the three great splanchnic cavities — the chest, abdomen, and pelvis. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *supe'rior*, *mid'dle*, (*thy'roid gan'glion*,) and *infe'rior*, (*ver'tebral gan'glion*); 12 in the back—the *thorac''ic*; 5 in the loins — the *lum'bar*; and three or four *sa'cral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccyge'al*, *gan'glion im'par*, *az'ygous gan'glion*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which is the *semilunar* and *solar plexuses*. 2. The *external ganglions*, *limitrophes* or *external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either. Its special functions are not yet, however, well understood, and are the subject — as they have always been — of much interesting investigation.

TRISPLANCHNITIS, (*trisplanchnic*, and *itis*,) Cholera (spasmodic).

TRISSAGO, gen. *Trissag''inis*, Teucrium chamædrys—t. Palustris, Teucrium scordium.

TRISTEMANIA, (*tristis*, 'sad,' and *mania*,) Melancholy.

TRISTERN'AL. Béclard has given this name to the third bony portion of the sternum;—that which corresponds to the third intercostal space.

TRISTITIA, (from *tristis*, 'sad,') Athymia, Mœror.

TRITÆOPHYA AMERICANA, Fever, yellow.

TRITÆOPH'YES, *Tritæoph'ya*, (*τριταιοφυης*, from *tritæus*, and *φυη*, 'form.') A fever whose type approaches the tertian. Sauvages gave the name *Tritæophya Vratislavien'sis* to an epidemic which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITÆUS, (*τριταιος*,) Tertian fever.

TRIT'ICUM ÆSTI'VUM, (from *terere*, *tritum*, 'to thrash,') *T. cerea'lē* seu *Cevallos* seu *compac'tum* seu *erina'ceum* seu *Gaertneria'num* seu *Linnæa'num* seu *prunino'sum*, *Sum'merwheat*; and TRIT'ICUM HYBERN'UM seu *glau'cum* seu *Mu'ticum* seu *Sic'ulum*, *Win'terwheat*, (F.) *Froment*. *Ord.* Graminеæ. *Sex. Syst.* Triandria Digynia. From these plants our wheaten flour is obtained, by grinding the seeds—*Wheat*, *Pyrus*, *Frumen'tum*—and to them we are indebted for our bread and pastry. The nutritive properties of wheaten flour are so well known as not to need comment.

Bread, *Pa'nis*, (F.) *Pain*, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread*, *Mi'cæ pa'nis*, are a common excipient for pills and boluses.

TRITICUM ARVENSE, T. repens—t. Cereale, T. æstivum—t. Cevallos, T. æstivum—t. Compactum, T. æstivum—t. Erinaceum, Triticum æstivum—t. Faginum, Polygonum fagopyrum—t. Gaertnerianum, T. æstivum—t. Glaucum, T. hybernum, and T. repens—t. Hybernum, see T. æstivum—t. Linnæanum, T. æstivum—t. Muticum, T. hybernum—t. Pruinosum, T. æstivum.

TRIT'ICUM RE'PENS, *T. arven'sē* seu *glau'cum*, *Agrop'yrum lævis'simum*, *Bro'mus gla'ber*, *Gru'men* seu *Gra'men cani'num* seu *Dioscor'idis* seu *re'pens*, *Lolia'ceum radi'cē repen'tē*, *Grass*, *Dog'grass*, *Couch'grass*, *Quick'ens*, *Twitch'grass*, (Sc.) *Rounachs*, (F.) *Chiendent*. The roots are sweet, and

possess aperient properties. They are said also to be diuretic.

TRITICUM SICULUM, T. hybernum.

TRITIO, (*terere, tritum*, 'to rub, to grind,') Contritio, Trituration.

TRITON PALUSTRIS, (from Τριτων, 'the sea deity,') see Ectozoa.

TRITORIUM, (from *terere, tritum*, 'to wear away,') Infundibulum.

TRITURA, Contritio, Trituration.

TRITURA'TION, *Tritura'tio, Tritu'ra, Tri'tus, Tri'tio, Trip'sis*, (*terere, tritum*, 'to rub, to grind.') The act of reducing a substance to powder. See Contritio.

TRITUS, gen. *Tritûs*, Contritio, Trituration.

TRIVENTER, (*tri*, and *venter*, 'belly,') Trigastric.

TROCAR, *Trochar, A'cus paracent'ica* seu *paracentet'ica* seu *trîq'uetra vulga'ris, Paracenti'cion, Paracentete'rion*. (Corrupted from the (F.) *Troisquarts* or *Trocart*, 'three quarters;') so called from the triangular shape of the point—*Triq'uetrum*. An instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a canula, which is so adapted to the perforator, that when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the canula remains in the wound, and affords the fluid a ready passage outwards.

TROCART, Trocar.

TROCH, (from τροχος, 'a wheel,') Trochiscus.

TROCHAN'TER, gen. *Trochante'ris, Trokan'ter, Rota'tor*, (from τροχαω, 'to run or roll.') Anatomists have given the names *great* and *little trochanter* to two processes at the upper extremity of the femur. The great *trochan'ter, glu'tus*, is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter*, means the larger process; the smaller he calls *trochantin*.

TROCHANTER'IAN, *Trochanteria'nus, Trokanter'ian*. That which belongs or relates to the great trochanter.

TROCHANTIN'IAN, *Trokantin'ian, Trochantinia'nus*. That which belongs or relates to the trochantin or less trochanter.

TROCHAR, Trocar.

TROCHES (pl. of troch) OF CARBONATE OF LIME, Trochisci carbonatis calcis — t. of Chalk, Trochisci carbonatis calcis — t. of Cubebs, Trochisci cubebæ—t. Escharotic, Trochisci escharotici —t. of Ginger, Trochisci zingiberis—t. Gum, Trochisci gummosi—t. of Gum Arabic, Trochisci acaciæ—t. of Ipecacuanha, Trochisci ipecacuanhæ—t. of Subcarbonate of Iron, Trochisci Ferri subcarbonatis—t. of Lactucarium, Trochisci lactucarii —t. Liquorice, Trochisci glycyrrhizæ—t. Liquorice with opium, Trochisci glycyrrhizæ cum opio —t. of Magnesia, Trochisci magnesiæ—t. of Morphia, Trochisci morphiæ—t. of Morphia and ipecacuanha, Trochisci morphiæ et ipecacuanhæ—t. Nitre, Trochisci nitratis potassæ—t. of Peppermint, Trochisci menthæ piperitæ—t. of Tartaric acid, Trochisci acidi tartarici.

TROCHIA, (τροχια, 'the rut of a wheel,') Orbit.

TROCHILIA, (τροχιλια,) Trochlea.

TROCHIN, (from τροχαειν, 'to turn.') Chaussier has given this name to the smaller of the tuberosities at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm,—the subscapularis.

TROCHIN'IAN, *Trochinia'nus*. That which belongs or relates to the trochin.

TROCHIS'CUS, (τροχισκος.) *Phtho'is, Artis'cus, Col'lix, Co'lix, Phthois'cus, Rot'ula, Cyclis'mus*, (dim. of τροχος, 'a wheel,' 'any thing circular.') A *trochi* or *round* table, (F.) *Trochisque*. See Pastil, and Tabella. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablette*, — the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

TROCHISCI ACA'CIÆ, *Troches of Gum Ar'abic.* (*Acac.* ℥iv; *Amyli*, ℥j; *Sacchar.* ℔j. Make into a mass with *rose water*, and form lozenges. — Ph. E.) To allay cough.

TROCHISCI AC''IDI TAN'NICI, *Tan'nin Loz'enges.* (*Acid. tannic.* gr. ccclx; *Tinct. tolut.* f℥ss; *Sacchar. purif.* ℥xxv; *Acaciæ* pulv. ℥j; *Mucilag. Acaciæ*, f℥ij; *Aq. destillat.* bullient. f℥j. To be divided into 720 lozenges. Mix. Ph. B., 1864.) Each lozenge contains half a grain of tannic acid.

TROCHISCI AC''IDI TARTAR'ICI, *Troches of Tartar'ic Ac''id.* (*Acid. Tartar.* ℥ij; *Sacchar.* ℥viij; *Ol. Limon.* ♏x. Form into troches with mucilage. — Ph. E.) Refrigerant and demulcent.

TROCHISCI BECHICI NIGRI, T. glycyrrhizæ glabræ.

TROCHISCI BISMU'THI, *Bis'muth Loz'enges.* (*Bismuth. alb.* gr. 1440; *Magnes. carb.* ℥iv; *Calcis carb. præcip.* ℥vj; *Sacchar. purif.* ℥xxx; *Acaciæ* pulv. ℥j; *Aq. destillat.* f℥vj; *Ol. Cinnam.* f℥ss. Mix. To be divided into 720 lozenges. Ph. B., 1864.)

TROCHISCI CARBONA'TIS CAL'CIS, *T. e Cre'tâ, T. Cre'tæ* (Ph. U. S.), *Troches of Car'bonate of lime* or *chalk, Loz'enges for the heart'burn, Tubel'læ ad ardo'rem ventriv'uli* seu *cardial'gicæ* seu *ad so'dam.* (*Cret.* ppt. ℥iv; *Acaciæ*, in pulv. ℥j; *Myrist.* in pulv. ℥j; *Sacch.* in pulv. ℥vj. M. Form into troches with *water*.) Antacid and absorbent.

TROCHISCI CAT'ECHU, *Cat'echu Loz'enges.* (*Catechu*, in pulv. ℥ij; *Sacchar. purif.* ℔j; *Acaciæ* pulv. ℥j: *Tinct. capsic.* f℥ss; *Aq. destillat.* q. s. Mix, and divide into 720 lozenges. Ph. B., 1864.)

TROCHISCI E CRETÂ, T. carbonatis calcis — t. Cretæ, T. carbonatis calcis.

TROCHISCI CUBEB'Æ, *Troches of Cu'bebs.* (*Oleoresin. cubeb.* f℥j; *Ol. sassaf.* f℥j; *Glycyrrhiz.* pulv., *Acaciæ* pulv., *Sacchar.* pulv. āā ℥iij; *Syrup. Tolutan.* q. s. To be divided into troches, each weighing ten grains. Ph. U. S., 1863.) Excitant; in relaxed sore throat, &c.

TROCHISCI seu PASTIL'LI EMETI'NÆ PECTORA'LES, *Pec'toral Loz'enges of Em'etine.* (*Sugar*, ℥iv; *Emetine*, 32 grains. Form into lozenges of nine grains each.) One is a dose.

TROCHISCI ESCHAROT'ICI, *Escharot'ic Troches.* (*Hydrarg. oxymur.* p. 8; *Amyli*, p. 16; *Mucilag. g. tragac.* q. s. Make into troches, to which a few drops of laudanum may be added. — Ph. P.) Used in foul ulcers, to remove excrescences, &c.

TROCHISCI ESCHAROT'ICI DE MIN'IO. (*Oxyd. plumbi. rubr.* p. 16; *Hydrarg. oxymur.* p. 32; *Mic. panis*, p. 128; *Aq. rosæ*, q. s.—Ph. P.) Used like the last.

TROCHISCI FER'RI SUBCARBONA'TIS, *Troches of Subcar'bonate of I'ron.* (*Ferri subcarb.* ℥v; *Vanill.* gr. lx; *Sacch.* in pulv. ℥xv; *Mucilag. tragac.* q. s. To be divided into troches, each weighing 20 grains. Ph. U. S., 1863.) Tonic.

TROCHISCI GLYCYRRHI'ZÆ, *T. G. Gla'bræ* seu *Be'chici ni'gri, Liq'uorice troches, Black pec'toral loz'enges.* (*Ext. glyc. glabr., Gum. acac.* āā p. j; *Sacch. purif.* p. ij. Dissolve in warm water; strain; evaporate, and form into troches.—Ph. E.) Demulcent. To allay cough.

TROCHISCI GLYCYRRHI'ZÆ CUM O'PIO, *T. G. et o'pii* (Ph. U. S.) seu *Theba'ici* seu *sedati'vobalsam'ici* seu *pectora'les re'gis Dano'rum, Liq'uorice Troches with O'pium, Wis'tar's Loz'enges.* (*Opii*,

m pulv. ℥ss; *Glycyrrhiz.* in pulv., *Sacchar.* in pulv., *Acaciæ,* in pulv., āā ℥x; *Ol. anisi,* f℥j. Make into troches, each weighing six grains.—Ph. U. S.) Demulcent and anodyne. An analogous formula is given in the British Pharmacopœia (1864), under the name *Trochisci o'pii,* Opium Lozenges.

Spit'ta's Loz'enges for coryza, hoarseness, and sore-throat, are composed as follows:—(*Cubeb. recent.* in pulv. ℥ij; *Extract. glycyrrhiz.* ℥j; *Myroxyl,* ℥j; *Acaciæ,* ℥iv; *Syrup,* q. s. Make into troches of ten grains each.)

Trochisci Gummo'si, *Gum Troches.* (*G. acac.* p. v; *Amyli,* p. i; *Sacch. pur.* p. xij. Make up the troches with rose-water.—Ph. E.) Demulcent.

Trochisci Ipecacuan'hæ, *Troches of Ipecacuan'ha.* (*Ipecacuanh.* in pulv. ℥ss: *Sacchar.* in pulv. ℥xiv; *Marantæ,* in pulv. ℥iv; *Mucilag. tragacanth.* q. s. Make into troches, each weighing ten grains.—Ph. U. S.)

Trochisci Lactuca'rii, *Troches of Lactuca'rium.* (Prepared with *Lactucarium* in the same proportion and manner as the opium lozenges.—Ph. E.) Each lozenge contains between the fifth and sixth of a grain of lactucarium.

Trochisci Magne'siæ, *Troches of Magne'sia.* (*Magnes.* ℥iv; *Sacchar.* ℔j; *Myrist.* pulv. ℥j; *Mucilag. tragacanth.* q. s. Make into troches, each weighing ten grains.—Ph. U. S.) Useful in acidity of the stomach, with constipation.

Trochisci Men'thæ Piperi'tæ, *Troches of Pep'permint.* (*Ol. menth. piperit.* f℥j; *Sacchar.* in pulv. ℔j; *Mucilag. tragacanthæ,* q. s. Make into troches, each weighing ten grains—Ph. U. S.) Used as a carminative.

Trochisci Morph'iæ, *Troches of Morph'ia.* (*Morph. Muriat.* ℈j; *Tinct. Tolut.* ℥ss; *Sacchar.* ℥xxv. Make into lozenges, with mucilage, weighing fifteen grains each.—Ph. E.) Each lozenge contains about onefortieth of a grain of muriate of morphia. Used to allay cough.

Trochisci Morph'iæ et Ipecacuan'hæ, *Troches of Morph'ia and Ipecacuan'ha.* (*Morph. mur.* ℈j; *Ipecac.* pulv. ℥j; *Tinct. Tolut.* f℥ss; *Sacchar.* ℥xxv. Make into a mass with mucilage, and form lozenges, fifteen grains each.—Ph. E.) Each lozenge contains about onefortieth of a grain of the muriate. Used to allay cough.

Trochisci Nitra'tis Potas'sæ, *Ni'tre Troches.* (*Potassæ nitrat.* p. j; *Sacch. pur.* p. iij. Make into troches with mucilage of tragacanth.—Ph. E.) In slight inflammatory sorethroat and fever.

Trochisci Opii, see T. Glycyrrhizæ cum opio.

Trochisci Pectorales Regis Danorum, T. glycyrrhizæ cum opio—t. Sedativobalsamica, T. glycyrrhizæ cum opio.

Trochisci So'dæ Bicarbona'tis, *Troches of Bicar'bonate of So'da.* (*Sodæ bicarb.* ℥iv; *Sacchar.* in pulv. ℔j; *Mucilag. tragacanth.* q. s. To be divided into troches, each weighing ten grains.—Ph. U. S.) Antacid.

The *Pastilles de Vichy, Pastilles digestives d'Hauterive-Vichy, Pastil'li digesti'vi Darcet'ii,* composed of *Bicarbonate of soda, Oil of peppermint,* and *Sugar,* are much used in France, like the Vichy waters, in cardialgia, gout, and lithiasis.

Trochisci Stibiati, Tabellæ antimoniales Kunckelii—t. Thebaici, T. glycyrrhizæ cum opio.

Trochisci Zingib'eris, *Troches of Gin'ger.* (*Tinct. Zingib.* f℥j; *Tragac.* pulv. gr. cxx; *Sacchar.* ℥xij; *Syrup. Zingib.* q. s. Make into troches, each weighing twenty grains.)

TROCHISQUE, Trochiscus.

Troch'iter, gen. *Trochite'ris,* (from τροχαειν, 'to turn.') The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles.

Trochite'rian, in the language of Chaussier, means any thing belonging or relating to the trochiter.

Troch'lea, (τροχιλια,) *Trochil'ia,* (F.) *Trochlée* ou *Troklée.* A *pulley;* (from τροχαειν, 'to turn,')—for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm. Also, the cartilaginous pulley over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit. Pulleys are needed as mechanical powers in the reduction of dislocations where much force is required.

Trochlea Labyrinthi, Cochlea.

Trochlearis, Obliquus superior oculi.

TROCHLÉATEUR, GRAND, Obliquus superior oculi—*t. Petit,* Obliquus superior oculi.

TROCHLÉE, Trochlea.

Tro'choid, (τροχοειδης, from τροχος, 'a wheel,' and ειδος, 'resemblance.') *Trochoï'des, Ax'ea commissu'ra.* An articulation, in which one bone turns upon another, like a wheel upon its axle; as the *Atlŏïdŏäxoid articulation.* See Axea commissura.

TROËNE, Ligustrum vulgare.

TROISQUARTS, (*trois,* 'three,' and *quarts,* pl. of *quart,* 'a fourth,') Trocar.

TROKANTER, Trochanter.

TROKANTERIAN, Trochanterian.

TROKANTINIAN, Trochantinian.

TROKLÉE, Trochlea.

Troll'ius Lax'us, *T. America'nus, Globe flow'er; Order,* Ranunculaceæ; indigenous; has the same medical properties as the Ranunculus.

TROMOMANIA, (*tromus,* and *mania,*) Delirium tremens.

TROMOPARANŒA, (*tromus,* and *paranœa,*) Delirium tremens.

TROMOS, (τρομος,) Paralysis agitans, Tremor.

TROMOSPASMUS, (*tromus,* and *spasmus,*) Tremor.

TROMPE, 'a trump,' Tuba—*t. d'Eustache,* Eustachian tube—*t. de Fallope,* Tuba Fallopiana—*t. Utérine,* Tuba Fallopiana.

TROMUS, (τρομος,) Paralysis agitans, Tremor.

TROMYLE, (τρομος, 'trembling,' and ὑλη, 'matter,') see Cilia.

TRONC, Trunk—*t. Basilaire,* Basilary artery—*t. Brachial,* Brachial artery.

TROPÆ'OLUM MA'JUS, (from τροπαιον, 'a trophy,' the leaves resembling a buckler,') *Nastur'tium Ind'icum* seu *Peruvia'num, Acrivi'ola, Flos sanguin'eus monar'di, Cardami'num minus, Ind'ian Cress. Ord.* Geraniaceæ. *Sex. Syst.* Octandria Monogynia. (F.) *Cresson des Indes, Cresson du Mexique, Capucine.* An antiscorbutic.

Tropæolum Tubero'sum, *Ulluco.* A tuberous plant, cultivated in the Sierra, Peru. It is smaller than the potato.

TROPHALIS, (from τροφη, 'nourishment,') Colostrum.

TROPHE, (τροφη,) Aliment, Cibatio, Pabulum.

TROPHI, (from τροφη, 'nourishment.') In insects, the parts of the mouth that are employed in receiving and preparing the food.

Troph'ical, *Troph'icus,* (from *trophe,*) (F.) *Trophique.* Relating to nourishment or nutrition.

Trophical Nerves. The organic nerves or nerves of the sympathetic system have been so termed, from the belief that they are concerned in nutrition.

TROPHIMUS, (τροφιμος,) Nutrition.

TROPHODES, (τροφωδης, from τροφη, 'nourishment,') and *odes,*) Nutritious.

TROPHONEURO'SES, (τροφη, 'nourishment,' and *neurosis.*) Morbid conditions of the process of nutrition, owing to modified nervous influence.

TROPHON'OSI, *Trophonu'si,* (τροφη, 'nourishment,' and νοσος, 'a disease.') Diseases of nutrition.

TROPHY, *Troph'ia*, (τροφή, a suffix denoting 'nourishment or nutrition;') as in hyper*trophy*, 'excess of nourishment or nutrition.'

TROPONU'SI, *Morbi trop'ici*, (τροπη, 'the solstitial or tropical point where the sun turns or alters it course,' and νουσος, 'a disease.') Diseases that prevail in the tropics.

TROSTER, ([G.] 'a comforter,') see Spirit.

TROU, Foramen—*t. Anonyme*, Foramen stylomastoideum — *t. Aveugle* ou *Borgne*, Cæcum foramen — *t. Borgne* of the Medulla oblongata, Foramen cæcum of the medulla oblongata — *t. de Botal*, Botal foramen, Ovale foramen—*t. Déchiré antérieur*, Lacerum anterius foramen — *t. Déchiré postérieur*, Lacerum posterius foramen — *t. Épineux*, Spinale foramen — *t. de Galien*, Botal foramen—*t. Mentonnier*, Mental foramen—*t. Optique*, Foramen opticum—*t. Orbitaire supérieur*, Orbitar foramen superior — *t. Ovale*, Ovale foramen — *t. Rond, petit*, Spinale foramen — *t. Sous-orbitaire*, see Suborbitar canal — *t. Sous-pubien*, Obturatorium foramen — *t. Sphéno-épineux*, Spinale foramen—*t. Sus-orbitaire*, Foramen supraörbitarium.

TROUS (pl. of *trou*) *CAROTIDIENS*, Carotica foramina—*t. Condyloïdiens*, Condyloidca foramina—*t. de Conjugaison*, Conjugationis foramina, see Vertebræ—*t. Olfactifs*, Olfactory foramina—*t. Rachidiens*, Spinal foramina.

TROUSSE, Case (pocket).

TROUSSE-GALANT, (*trousser*, 'to despatch,' and *galant*, 'a gallant,') Cholera morbus.

TROUSSEAU, 'a bundle,' Fasciculus.

TROUSSEAUX ARRIÈRE-MÉSENTÉRIQUES (F.) A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUCK, see Medicament.

TRUCULENTUS, (from *trux*, gen. *trucis*, 'ferocious,') Homicidal.

TRUDGEBACKED, see Hump.

TRUELOVE, Paris, Trillium latifolium.

TRUFFE, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber—t. Hart's, Elaphomyces granulatus.

TRUMPET CREEPER, Tecoma radicans — t. Flower, Tecoma radicans — t. Weed, Eupatorium purpureum.

TRUNCUS, Trunk.

TRUNK, *Trunc'us*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts: — a *superior*, the *head*; a *middle*, the *thorax*, and an *inferior*, the *pelvis*. These three regions contain the great splanchnic cavities. They are united by a common *stalk* — the vertebral column. To the *middle* are articulated the superior extremities; and, to the *inferior*, the lower extremities.

The *trunk* of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, ([F.] *trousser*, 'to tie up.') *Brache'rium*, *Brachie'rium*, *Brachi'lē*, *Brachi'rolum*, *Bracheri'olum*, *Am'ma*, *Hom'ma*, *Subligac'ulum*, *Subligatu'ra*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac, and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates, opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex *pad*, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, (τρυγωδης, from τρυξ, gen. τρυγος, 'lees,' and *odes*,) Feculent.

TRYPANON, (τρυπανον,) Trepan.

TRYPESIS, (τρυπησις, from τρυπαω, 'to bore,') Trepanning.

TRYPSIS, (τρυω, 'to rub,') Friction.

TSCHERBET, Sherbet.

TSETSE, Glossina morsitans.

TSHETTIK, Upas tieuté.

TSIANA, Costus.

TSITLA. A South African root of the Araceæ family, which contains a very large quantity of sweet tasted starch. According to Dr. Livingstone, when dried, pounded into meal, and allowed to ferment, it is not an unpleasant article for food.

TSJAMPACA, Michelia champaca.

TUBA, 'a trumpet,' Tube — t. Aristotelica, Eustachian tube — t. Cæca, Tuba Fallopiana — t. Uterina, Tuba Fallopiana—t. Vocalis, Tube, vocal.

TUBAGE, see Catheterismus.

TUBAIRE, Tubal.

TUBAL, *Tuba'ris*, (F.) *Tubaire*, (from *tuba*, and *tubus*.) Relating to a tube or tubes, and especially to the Fallopian.

TUBAL PREGNANCY, see Pregnancy, tubal —t. Respiration, see Murmur, respiratory.

TUBE. A name given to some parts which are hollow, and which have, at times, the shape of a trumpet. *Tu'ba*, *Tu'bus*, *Sal'pinx*, (F.) *Trompe*, *Tube*.

TUBE, ALIMENTARY, Canal, alimentary.

TUBE CASTS. A term applied to the casts or moulds of the uriniferous tubes of the kidney, observed in the urine by the microscope in diseases of those organs. The casts are fatty, desquamative, hyaline, granular, &c., and are observed especially in Bright's disease.

TUBE, EUSTACHIAN, Eustachian tube.

TUBE, FALLO'PIAN, *Tu'ba Fallopia'na* seu *Fallo'pii* seu *uteri'na* seu *cæ'ca*, *Me'trosal'pinx*, *Hys'terosal'pinx*, *Oviduc'tus muli'ebris*, *Vas def'erens muli'eris*, *Duc'tus varico'sus* seu *Proces'sus lateru'lis* seu *Mea'tus semina'lis* seu *Me'atus semina'rius u'teri*, *O'viduct*, *Vec'tor canal'*, (F.) *Trompe de Fallope* ou *utérine*, is a canal floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fim'briated extrem'ity*; called, also, *Folia'ceum ornamen'tum*, *Mor'sus diab'oli*, *Infundib'ulum* seu *Digitatio'nes* seu *Fim'briæ* seu *Vexil'læ* seu *Lacin'iæ tuba'rum Fallo'pii*, (F.) *Morceau frangé*, *Pavillon de la trompe*, *Morceau* ou *Morsure du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopian tubes is to conduct the sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the uterus, the abdominal termination being termed *Os'tium abdomina'lē*; the uterine *Os'tium*

uteri'num. When the tube embraces the ovary, a funnelshaped cavity—*Coroll'la infundibuliform'is*—is formed at its extremity, into which the ovule passes.

TUBE, INTESTINAL, Canal, alimentary.

TUBE, ŒSOPHAGE'AL, *Stomach Tube*. A long elastic gum tube, capable of being passed into the œsophagus or stomach.

TUBE, POLLEN, see Pollen.

TUBE, REC'TAL, *Defeca'tion tube*. An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

TUBE, STOMACH, see Tube, œsophageal.

TUBE, VO'CAL, *Tu'ba voca'lis*. The part of the air passages above the inferior ligaments of the larynx, including the passages through the nose and mouth,

TUBER, ([L.], 'a bump, a protuberance,') Hump, Lycoperdon tuber, Tubercle—t. Annulare, Pons varolii — t. *Atloïdo-occipital*, Rectus capitis posticus minor — t. Cervinum, Elaphomyces granulatus—t. Cibarium, Lycoperdon tuber.

TU'BER CINE'REUM, *T. C. cum Infundib'ulo*. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER CORPORIS CALLOSI, see Corpus callosum.

TUBER FRONTALE, Frontal protuberance — t. Gulosorum, Lycoperdon tuber — t. Gutturosum, Bronchocele — t. Ischii, see Ischiatic — t. *Ischiotrochantérien*, Quadratus femoris—t. Nigrum, Lycoperdon tuber — t. Parietale, see Parietal Bones —t. Pellagra, Pellagra—t. Tympani, Promontory of the tympanum.

TUBERA TERRÆ, Lycoperdon tuber.

TU'BERCLE, *Tuber'culum*, (dim. of *tuber*,) *Tu'ber, Strangal'ion, Stran'galis, Tuber'culous depos'it*, (vulg.) a *Ker'nel, a Knot*, (F.) *Tubercule*. A tumour in the substance of organs, from the production of new matter; — sensation null; growth sluggish. In *Pathological Anatomy*, the term is generally given to a species of degeneration which consists of an opake matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen: it subsequently becomes soft and friable, and gradually acquires a consistence and appearance analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophy'mata, Tuber'cula Pulmo'num*, (F.) *Tubercules pulmonaires*, characterize *Tuber'cular Phthi'sis. Mesenteri'ic tu'bercles* are often met with in the same affection, but particularly in *Tabes Mesenterica*. Laënnec classes tubercles among the accidental tissues, which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculiza'tion*, is termed *Tuberculo'sis, Mor'bus tuberculo'sus, Strumo'sis* seu *Phymato'sis pulmo'num*, and *Dyscra'sia Tuberculo'sa*. Tubercles are seen of various forms,—to wit, in fine points, (F.) *Poussière tuberculeuse*, gray and yellow granulations, miliary tubercles; and gray and yellow tubercular masses, softened, and cretaceous.

TUBERCLE, BLACK, Melanosis — t. Painful subcutaneous, see Neuroma.

TUBERCLES OF THE AREOLA, see Mamma—t. Cretaceous, see Cretaceous—t. Miliary, see Granulation, and Tubercle.

TUBERCLES, PEARL'Y, *T. seba'ceous mil'iary, Follic'ular eleva'tions*. Small collections of sebaceous matter in the sebaceous glands or ducts, often seen in the thin skin of the lower eyelids, where they sometimes attain an inconvenient size.

TUBERCLES, SEBACEOUS MILIARY, T. pearly.

TUBER'CULA (pl. of *tuberculum*) ARAN'TII, *Cor'pora* seu *Corpus'cula Aran'tii, Tu'bercles of Aran'tius* or *Aran'zi*. Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

TUBERCULA ARTHRITICA, Calculi, arthritic — t. Cerebri, Encephalophymata—t. Gonorrhoica, Gonorrhœa impura — t. Gummata, see Gumma — t. Hepatis, *Hépatostrumosie*—t. Intestinorum, Enterophymata—t. Nervorum nodosa, Ganglions, nervous—t. Parva duræ matris, Glandulæ Pacchioni —t. Peritonæi, Cœliophymata—t. Pulmonum, see Tubercles (of the lungs)—t. Quadrigemina, Quadrigemina Tubercula.

TUBER'CULAR, *Tuber'culous, Tuberculo'sus, Tuber'culate, Tuber'culated*, (F.) *Tuberculeux, Tuberculé*. That which relates to tubercles, or which is formed by tubercles.

TUBERCULAR or TUBER'CULOUS CONSTITU'TION or DIATH'ESIS, *Phthisio'sis*, is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachex'ia, Tuberculo'sis, Morbus tuberculo'sus, Dyscra'sia tuberculo'sa*, is the constitutional condition of one affected with tubercles.

TUBERCULAR MATTER. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pultaceous, semifluid, and curdy. See Tubercle.

TUBERCULAR PHTHISIS is that produced by the development of tubercles in the lungs.

TUBERCULAR SORE THROAT, Pharyngitis, follicular.

TUBERCULATE, Tubercular.

TUBER'CULATE SARCO'MA of AB'ERNETHY, *Emphy'ma Sarco'ma tuberculo'sum, Tu'mor tuberculo'sus*. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED, Tubercular — t. Liver, Cirrhosis.

TUBERCULE, Tubercle.

TUBERCULÉ, Tubercular.

TUBERCULES BIJUMEAUX, Quadrigemina tubercula—*t. Crétacés*, see Cretaceous—*t. du Foie, Hépatostrumosie* — *t. des Ganglions Mésentériques*, Tabes mesenterica—*t. des Glandes lymphatiques*, Scrofula — t. of the Larynx and Fauces, Pharyngitis, follicular — t. Miliary, see Granulation—*t. Pisiformes*, Mamillary tubercles—*t. Pulmonaires*, see Tubercle — *t. Quadrijumeaux*, Quadrigemina corpora.

TUBERCULEUX, Tubercular.

TUBERCULI'TIS, (*tubercle*, and *itis*.) Inflammation of a tubercle or of tubercular masses.

TUBERCULIZATION, see Tubercle.

TUBERCULOSIS, see Tubercle, and Tubercular Cachexia — t. Laryngis et Tracheæ, Phthisis laryngea—t. Pulmonum, Phthisis pulmonalis—t. Vertebrarum, Vertebral disease.

TUBERCULOSUS, Tubercular.

TUBERCULOUS, Tubercular—t. Deposit, Tu-

bercle—t. Disease of the Lungs, Phthisis pulmonalis—t. Dust, *Poussière tuberculeuse.*

TUBERCULUM, (dim. of *tuber,*) Tubercle.

TUBER'CULUM CINE'REUM. *Fasci'ola cine'rea.* A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the cord, and on the sides with the corpus restiforme.

TUBERCULUM LACRYMALE, see Lachrymal puncta—t. Loweri, Lower, tubercle of.

TUBEROSITAS, Tuberosity—t. Tympani, Promontory of the tympanum.

TUBÉROSITÉ BICIPITALE, Bicipital tubercle—*t. Sciatique,* see Ischiatic.

TUBEROS'ITY, *Tuberos'itas,* (F.) *Tubérosité,* (from *tuber,* 'a bump or protuberance.') Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

TUBES OF FERREIN, see Uriniferous Tubes.

TUBI MEMBRANACEI, (pl. of *tubus,* 'a tube,') see Villous membranes.

TU'BULAR, *Tubula'ris, Tubulo'sus,* (F.) *Tubuleux, Tubulaire,* (from *tubule.*) Relating to or having the form of a small tube. An epithet applied to glands—*Glan'dulæ tubulo'sæ,* which, like those of the stomach, have the shape of small tubes.

TUBULAR BLOWING SOUND, see Murmur, respiratory—t. Neurine, see Neurine—t. Substance of the Kidney, see Kidney.

TUBULE, *Tu'bulus,* (dim. of *tubus,* 'a tube.') A small tube or tubelet.

TUBULEUX, Tubular.

TUBULI (pl. of *tubulus*) BELLINI, Uriniferous tubes—t. Contorti, see Uriniferous tubes—t. Duræ matris, Sinuses of the dura mater—t. Ferreini, see Uriniferous tubes—t. Nervei, Nerve fibres—t. Pelvis renum, see Calix—t. Recti, see Rete testis and Uriniferous tubes—t. Seminales, see Testicle—t. Seminiferi, see Testicle—t. Seminiferi recti, see Rete testis—t. Uriniferi Bellini, Uriniferous tubes.

TUBULOSUS, Tubular.

TUBULUS, (dim. of *tubus,* 'a tube,') Canula, Tubule—t. Centralis Modioli, see Tractus spiralis foraminulentus.

TUBUS, Tube—t. Acusticus, Ear trumpet—t. Alimentarius, Canal, alimentary—t. Intestinorum, Canal, alimentary—t. Nervorum, Neurilemma—t. Pollinicus, see Pollen—t. Vermicularis cæci, Appendix vermiformis cæci.

TUCKAHO, Lycoperdon tuber.

TUE-CHIEN, 'kill dog,' Colchicum autumnale, Veratrum album—*t. Loup,* 'kill wolf,' Aconitum napellus.

TULBAG'HIA ALLIACEA, (after Tulbagh, a Dutch governor of the Cape of Good Hope.) A South African plant, *Nat. Ord.* Asphodeleæ, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

Tulbaghia cepa'cea and *T. viola'cea,* serve the same purpose.

TULIP, CAPE, Homeria collina—t. Tree, Liriodendron.

TULIPIER, Liriodendron.

TULIPIFERA LIRIODENDRON, (*tulipa,* 'tulip,' and *ferre,* 'to bear,') Liriodendron tulipifera.

TUMEFACTIO, (*tumere,* 'to swell,' and *facere,* 'to make.') Swelling—t. Mollis, Puffiness.

TUMESCENTIA PITUITOSA, (from *tumescere,* 'to swell,') Leucophlegmatia.

TUMEUR, Tumour—*t. Anomale,* see Hæmatodes fungus—*t. Blanche,* Hydrarthrus—*t. Caverneuse,* see Hæmatodes fungus—*t. Encéphaloïde,* Encephaloid—*t. Érectile,* see Hæmatodes fungus—*t. Fongoïde,* Encephaloid—*t. Fongueuse,* Encephaloid—*t. Gommeuse,* Gumma—*t. Hémorrhagiale circonscrite,* see Aneurism—*t. Lymphatique des articulations,* Hydrarthrus—*t. Ossivore,* Encephaloid—*t. Pulpeuse,* Encephaloid—*t. Spléniforme,* Encephaloid—*t. Spongieuse,* Encephaloid—*t. Variqueuse,* see Hæmatodes fungus.

TUMOR, gen. *Tumo'ris,* (from *tumere,* 'to swell,') Swelling, Tumour—t. Albus, Hydrarthrus—t. Anomalus, Hæmatodes fungus—t. Artuum, Obdormitio—t. Capitis Sanguineus, Cephalæmatoma—t. Carneus, Sarcoma—t. Cysticus, Encystis—t. Cysticus serosus, Hygroma—t. Desmoides, Tumour, fibrous—t. Fibrosus, Tumour, fibrous—t. Ficosus, Ficus—t. Flatulentus, Emphysema—t. Fugax, see Fugacious—t. Fungosus articuli, Spina ventosa—t. Fungosus sanguineus, Hæmatodes fungus—t. Gangliformis, Ganglion, nervous—t. Genarum, Meloncus—t. Genu albus, Genocace—t. Glandulæ parotideæ, Parotidoncus—t. Gummatus, Gumma—t. Lacteus, Galactocele—t. Lardeus, Steatoma—t. Malarum, Meloncus—t. Ovarii, Oarioncus—t. Parotidis, Parotidoncus—t. Prostatæ, Prostatoncus—t. Renalis, Nephroncus—t. Sanguineus, Hæmatoma—t. Squamiformis carnosus, Lepidosarcoma—t. Tuberculosus, Tuberculate sarcoma—t. Tunicatus, Encystis—t. Uteri, Hysteroncus.

TU'MOUR, (*tumere,* 'to swell,') *Tu'mor, On'cos, On'cus, Epar'ma, Epar'sis, Emphy'ma, Excrescen'tia* (Sauvages), *Ecphy'ma,* (Sc.) *Swalme,* (F.) *Tumeur.* A rising or prominence, of greater or less size, developed by a morbific cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *excrescences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swel'ling;*—see Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous, or of the soft, parts about the joint.

Scrofula is the most common cause of these affections.

TUMOUR, CELLULOFIBROUS, Tumour fibrocellular—t. Epithelial, see Epithelial.

TUMOUR, EREC'TILE. A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See Erectile.

TUMOUR, FI'BROCEL'LULAR, *Cel'lulofi'brous tu'mour.* A soft and elastic form of fibrous tumour, a variety of the *gelat'inous sarco'ma* of Rokitansky of which the softer kind of polypus of the nose is an example.

TUMOUR, FIBROPLASTIC, Sarcoma.

TUMOUR, FI'BROUS, *Fi'brous growth, Fibro'ma, Fi'broid, Ino'ma, Tu'mor fibro'sus* seu *desmoï'des, Inohylo'ma.* A tumour or growth formed of fibrous tissue.

TUMOUR, LAMINATED NACREOUS FATTY, Cholesteatoma—t. Milklike, Encephaloid—t. Phantom, see Fantom.

TUMOUR, VAR'ICOSE, *Tu'mor varico'sus.* A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

TUMOUR, VASCULAR, see Hæmorrhois and Nævus.

TUNAS, see Cactus opuntia.

TUNBELLY, Physconia.

TUN'BRIDGE, MIN'ERAL WA'TERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNDA OCULI, Conjunctiva membrana.

TUNDUS CORDIS, Mucro cordis.

TU'NIC, *Tu'nica, Chi'ton, Coat,* (F.) *Tunique.* An envelope. A name given to different membranes, which envelop organs; as the tunics or coats of the eye, stomach, bladder, &c.

TUNICA, Tunic—t. Acinális, Uvea—t. Aciniformis, Uvea—t. Acinosa, Uvea—t. Adnata, Conjunctiva—t. Adventitia, see Artery—t. Agnata, Conjunctiva—t. Alba oculi, Sclerotic—t. Albuginea, Albuginea, see Kidney—t. Albuginea oculi, Sclerotic—t. Allantoides, Allantois—t. Arachnodes, Arachnoid membrane—t. Aranea, Arachnoid membrane—t. Caduca, Decidua—t. Candida oculi, Sclerotic—t. Carnosa, Panniculus carnosus—t. Cellularis, see Artery—t. Conjunctiva, Conjunctiva—t. Costalis. Pleura—t. Crassa, Decidua—t. Crystallina, Arachnoid membrane—t. Dartos, see Dartos—t. Dura oculi, Sclerotic—t. Durior et crassa, Sclerotic—t. Elastica, see Artery—t. Elytroides, Vaginal coat—t. Erythroides, Cremaster—t. Exterior ovi, Decidua—t. Externa, see Artery—t. Extima oculi, Sclerotic—t. Farciminalis, Allantois—t. Fibrosa, see Folliculi Graafiani—t. Filamentosa, Decidua—t. Glabra, see Artery.

TUNICA GRANULO'SA, 'granular coat.' An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which, as a structure, distinct and independent from the membrana granulosa, is denied.

TUNICA HORTENSIS, Dianthus caryophyllus—t. Innominata oculi, Sclerotic—t. Interna oculi, Retina—t. Intima, see Artery—t. Intima oculi, Retina.

TUNICA JACO'BI, *Membra'na Jaco'bi, Ja'cob's coat* or *mem'brane.* A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staffshaped bodies, *Bacil'li,* — hence called *Stra'tum bacillo'sum* seu *bacilla'tum, Bac''illar lay'er of the ret'ina,*— which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum, and are continued into the more internal layers of the retina, by means of thin processes—the *filaments* or *fibres of Müller.*

TUNICA MEDIA, 'middle coat,' see Artery—t. Muscularis, Dartos—t. Nervea oculi, Retina—t. Nervorum, Neurilemma—t. Perforata, Uvea—t. Prætensa abdominis, Peritonæum—t. Propria, see Kidney—t. Reticularis, Retina—t. Retiformis, Retina—t. Rhagoides, Choroïdea tunica, Uvea—t. Rubicunda scroti, Dartos—t. Rubra, Dianthus caryophyllus—t. Ruyschiana, see Choroid—t. Subcostalis, Pleura—t. Thoracis, Corset—t. Uvalis, Uvea—t. Uvea, Uvea—t. Uviformis, Uvea—t. Vaginalis, see Vaginal—t. Vaginalis linguæ, see Tongue—t. Vaginalis propria, Vaginal coat of the Testicle—t. Vaginalis reflexa, Vaginal coat of the Testicle—t. Vaginalis testis, see Testicle—t. Vasculosa oculi, Choroid, see Eye.

TUNICA VASCULO'SA TESTIS, 'vascular coat of the testis,' *Pi'a ma'ter tes'tis.* An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situate immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

TUNICA VITREA, Hyaloid membrane.

TUNICULA, (dim. of *tunica,*) *Tu'nicle,* (F.) *Tunicule.* A fine membrane, coat, or skin. Clitoris.

TUNIQUE, Tunic—*t. Albuginée,* Albuginea—*t. Commune de Bichat,* Endangium.

TUN'NELLING. A term, sometimes employed for the treatment of stricture of the urethra, by making pressure upon it from within so as to promote its removal by absorption.

TUNNYFISH, SALTED, Omotarichos.

TUPHLOËNTERITIS, Typhloënteritis.

TUPHUS, Typhus.

TUPINARIA, Talpa.

TURBA HÆMORRHOIDALIS, 'hemorrhoidal disorder,' see Hæmorrhois.

TURBATIONES ANIMI, (*turbare, turbatum,* 'to disorder,') Affections of the mind.

TUR'BINATED BONES, *Ossa turbina'ta.* Bones shaped like a top; (from *turba,* gen. *turbinis* or *turbon,* 'a top;') *Os'sa spongio'sa, O. ter'tia maxil'læ superio'ris, Cor'nua, Con'chæ na'rium* seu *ven'eris, Tur'bines na'si* seu *na'rium, Conchyl'ia, Bucci'na, Lam'inæ spongio'sæ na'si,* (F.) *Cornets.* Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossa. 1. *Os spongio'sum supe'rius* or *Cornet de Morgagni;*—the highest. 2. *Os spongiosum me'dium,* the *middle cor'nu* of French anatomists,—the *ethmoid'al cor'nu* or *Os spongio'sum supe'rius* seu *turbina'tum,* of English anatomists, *Os convolu'tum supe'rius, Con'cha, C. na'rium supe'rior* seu *Morgagnia'na,* (F.) *Cornet moyen.* This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Os spongio'sum* seu *turbina'tum infe'rius, Con'cha infe'rior, Convolu'tum infe'rius os, Os sous-ethmoïdal* (Ch.), projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoïd'al cornu.*

All the turbinated bones extend the olfactory surface.

TURBINES NASI SEU NARIUM, (pl. of *turbo,* gen. *tur'binis,* 'a top,') Turbinated bones.

TURBITH BLANC, Globularia alypum—t. Mineral, Hydrargyrus vitriolatus—t. Montpellier, Globularia alypum—*t. Noir,* see Hydrargyri oxydum cinereum—t. Plant, Convolvulus turpethum.

TURBO CEREBRI, Pineal gland.

TURGENTIA, Turgescence.

TURGES'CENCE, *Turges'cency, Turgid'ity, Tur'gidness, Turgescen'tia, Turgen'tia, Orgas'mus,* (from *turgescere,* 'to begin to swell,' *turgere,* 'to swell.') Superabundance of humours in a part. The term *Turges'cence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility—*Turgor vita'lis*—has been presumed to exist in the capillaries of certain organs, and in erectile tissues; but the generality of physiologists do not admit it.

TURGESCENTIA, Turgescence.

TURGESCEN'TIA VESIC'ULÆ FEL'LEÆ, *Ascites Hep'atocys'ticus, Physco'nia* seu *Cystoce'lē bilio'sa, Hepatal'gia Petitia'na, Hydrocholecys'tis, Hydrops vesi'cæ fell'eæ,* (F.) *Hydropisie de la Vésicule du Fiel, Distension de la Vésicule du Fiel, Cholicystiectasie.* Distension of the gall-bladder by bile.

TURGIDITY, Turgescence.

TURGIDNESS, Turgescence.

TURGOR VITALIS, see Turgescence.

TURMERIC, Curcuma longa, Sanguinaria Canadensis.

TURN OF LIFE, see Menses.

TURN'ING, *Ver'sio*, (from [F.] *tourner*, 'to turn.') (F.) *Version*.

Turning of the Fœtus, *Ver'sio Fœtûs*. Generally, the operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts. This has been termed *podal'ic version*, in contradistinction to *cephal'ic version*, which consists in bringing the head down,—in shoulder-presentations, for example.

TURNIP, (*turn*, and [Sax.] næpe, 'navew,') Brassica rapa — t. Dragon, Arum triphyllum — t. Indian, Arum triphyllum, Psoralea esculenta —t. Pepper, Arum triphyllum—t. Prairie, Camassia esculenta.

TURNS, Menses.

TURPENTINE, Terebinthina — t. Bordeaux, see Pinus sylvestris—t. Briançon, see Pinus cembra — t. Chio, see Pistacia terebinthus — t. Common, see Pinus sylvestris—t. Common, American, see Pinus sylvestris — t. Cyprus, see Pistacia terebinthus — t. Damarra, see Pinus damarra—t. Dombeya, see Dombeya excelsa — t. Horse, see Pinus sylvestris—t. Strasburg, see Pinus picea.

Turpentine Tree, Pistacia terebinthus.

Turpentine, Venice, see Pinus larix — t. Venice, true, see Pistacia terebinthus—t. White, see Pinus sylvestris.

TURPETHUM, Convolvulus turpethum — t. Minerale, Hydrargyrus vitriolatus — t. Nigrum, Hydrargyri oxydum cinereum.

TURQUETTE, (from Turkey,) Herniaria glabra.

TURQUOISE, (from (I.) *turchino*, 'greenish-blue.') This stone has been long imagined to change its colour, according as the wearer is at the time in good or bad health: a superstitious notion.

TURTLE BLOOM, Chelone glabra — t. Green, Chelonia mydas—t. Head, Chelone glabra.

TURTUR, gen. *Tur'turis*, Penis.

TURUNDA, Tent.

TURUN'DÆ ITAL'ICÆ. Pastes made of the finest and most glutinous wheat — known under the names of *Macaroni*, *Vermicelli* and *Italian* or *Cagliari paste*. Similar preparations, made in Pennsylvania of flour and eggs, are called *noodles*, from the German N u d e l n, 'pastry.'

TURUNDULA, (dim. of *turunda*,) Tent.

TUS, see Pinus abies.

TUSCARORA ACID SPRING, see Canada, mineral waters of.

TUSSACA RETICULATA, (after G. R. De Tussac, a French botanist,) Goodyera pubescens.

TUSSEDO, Tussis.

TUSSICULA, see Tussis.

TUSSIC'ULAR, *Tussicula'ris*, *Tussiculo'sus*, (from *tussicula*.) Relating to a cough, or a slight cough.

TUSSICULOSUS, Tussicular.

TUSSILA'GO, gen. *Tussilag''inis*, *T. Far'fara* seu *vulga'ris*, (from *tussis*, which it relieves;) *Be'chium*, *Be'chion*, *Cal'ceum equi'num*, *Chamæleu'cē*, *Chamægei'ron*, *Fil'ius an'tē pa'trem*, *Farfarel'la*, *Galiomar'chus*, *Far'fara*, *F. Be'chium*, *Un'gula caballi'na*, *Colts'foot*, *Foal'foot*, (F.) *Pas d'âne*, *Herbe de Saint-Quirin*. *Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

Tussilago Farfara, Tussilago — t. Hybrida, T petasites.

Tussilago Petasi'tes, *T. hy'brida* seu *petasi'tes hermaphrodi'ta*, *Petasi'tes*, *P. ma'jor* seu *ru'bens* seu *officina'lis* seu *hy'bridus* seu *vulga'ris*, *Butterbur*, *Pest'ilentwort*, (F.) *Pétasite*, *Herbe aux teigneux*, *Chapelière*. The roots of this plant have been recommended as aperient and alexipharmic. They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

Tussilago Petasites Hermaphrodita, T. petasites—t. Vulgaris, Tussilago.

TUSSIS; dim. *Tussic'ula*; *Beg'ma*, *Bex*, *Tusse'do*, *Bex'is*, *Tus'sis nervo'sa*, *Catar'rhus*, *Pneu'sis Tus'sis*, *Cough*, *Cough'ing*, *Haust*, *Hoast*, (Prov.) *Couf*, (Sc.) *Host*, *Hoist*, (F.) *Toux*. A violent, sonorous, frequent, and short expiration, by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry*, when unaccompanied by expectoration. It is symptomatic of many diseases. See Bronchitis.

Tussis Amphemerina, Pertussis — t. Asinina, Pertussis — t. Bronchica, Cough, tubal, see Bronchitis — t. Canina, Pertussis—t. Catarrhalis Simplex, Catarrh — t. Clamosa, Pertussis — t. Clangosa, Pertussis — t. Convulsiva, Pertussis — t. Delassans, Pertussis — t. Ferina, Pertussis — t. Pueros strangulans, Pertussis — t. Quinta, Pertussis — t. Senilis, Bronchitis (chronic)—t. Spasmodica, Pertussis — t. Stomachalis, Pertussis — t. Suffocans, Pertussis — t. Suffocativa, Pertussis —t. Tussiculosa, Pertussis.

TUSS'IVE, *Tussi'vus*, (from *tussis*.) Belonging or relating to cough:—as *tussive* vibration; the vibration of the parietes of the chest, caused by coughing.

TUTAM'INA, pl. of *tuta'men*, 'a defence,' 'a protection,' (from *tutare*, 'to defend.') Parts are so called which defend or protect others.

Tutamina Cer'ebri are the scalp, pericranium, bones of the skull, and the meninges.

Tutamina Oc'uli are the eyebrows, eyelids, and lachrymal apparatus.

TUTENAG, Zincum.

TUTHIA, Tutia.

TU'TIA, *Pom'pholyx*, *Cadmi'a*, *Alfasa*, *Mesera*, *Capni'tis*, *Tu'thia*, *Ox'ydum zin'ci impu'rum*, *Tutty*. The oxyd of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

TUTTERING, Stuttering.

TUTTY, Tutia.

TWIGG'S HAIR DYE, see Hair dye.

TWIN, ([Sax.] τpa, τpι, 'two,') Gemellus.

TWINGE, (from [D.] *dwingen*, 'to force,') see Pain.

TWINKLING OF THE EYE, Nictation.

TWINLEAF, COMMON, Jeffersonia Bartoni.

TWINROOT, Orchis.

TWINS, SIAMESE'. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrium of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They have lived in North Carolina, are married, and have children. See Xiphopages.

TWITCHGRASS, Triticum repens.

TWITCHING, (from [Sax.] τpiccian, 'to wrest,') Tic.

TYCH'ICA, (from τυχη, 'accident.') Fortuitous lesions or deformities. The 7th class of Good's *Nosology*.

TYLE, (τυλη,) Callosity.

TYLOMA, (τυλωμα, from *tylus*, and *oma*,) Callosity.

TYLOPH'ORA ASTHMAT'ICA, (*tylus*, and φερειν, 'to bear,' from the fleshiness of the leaflets of the the corolla.) *Ascle'pias asthmat'ica*, *Cynan'chum Ipecacuan'ha* seu *vomito'rium* seu *viridiflo'rum* seu *tomento'sum*, *Ipecacuan'ha of the Isle*

of France,(F.) *Ipecacuanha blanc de l'Île de France*. *Order*, Asclepiadaceæ. A native of various parts of the East Indies, both of the continent and islands. The root is acrid, and is used on the coast of Coromandel as a substitute for ipecacuanha. In large doses, it is emetic; in smaller, often repeated, it is cathartic. It is recommended, also, as a diaphoretic, and especially in humeral asthma.

TYLOSIS, (τυλωσις, from *tylus*, and *osis*,) Callosity.

TYLUS, (τυλος,) Callosity.

TYMMA, gen. *Tym'matis*, (τυμμα,) Wound.

TYMPAN, Tympanum—*t. Membrane du*, see Tympanum.

TYMPANAL, Tympanic.

TYMPANAL, Cadre du tympan.

TYMPANIA, Tympanites.

TYMPANIAS, Tympanites.

TYMPAN'IC OR TYM'PANIC, *Tympan'icus*, *Tym'panal*, (F.) *Tympanique*, (from *tympanum*.) Relating to the tympanum, as 'tympanic canal.'

TYMPANIC NERVE, see Petrous ganglion.

TYMPANIQUE, Tympanic.

TYM'PANISM, *Tympanism'us*, (from *tympanum*.) State of parts affected with tympanites.

TYMPANITA, Tympanites.

TYMPANITE, Tympanites.

TYMPANI'TES, (τυμπανιτης,) *Emphyse'ma* seu *Pneumato'sis Abdom'inis*, *Hy'drops Tympanites*, *Affec'tio tympanit'ica*, *Ectympano'sis*, *Hy'drops abdom'inis aë'reus*, *Aëro'sis*, *A'ëroëntorecta'sia*, *Aërenterecta'sia*, *Enteraërecta'sia*, *Physocœ'lia*, *Tympano'sis*, *Physe'ma*, *Physe'sis*, *Hy'drops sic'cus et flatulen'tus*, *Tympa'nia*, *Tympa'nias*, *Tympani'ta*, *Tympani'tis*, *Emphyse'ma Tympanites*, *E. Tympanit'icum*, *Meteorism'us*, *Tym'pany*, *Me'teorism*, *Drum belly*, *Wind drop'sy*, (F.) *Tympanite*, *Pneumatose péritonéale*, *Ballonnement*. (from τυμπανον, 'a drum,' so called because the abdomen is distended with wind, and sounds like a drum when struck.) A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from decomposition of substances contained in it: the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection, in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs: but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympani'tes abdomina'lis*, *Aëropéritonie* of some:—the accumulation in the intestines being called *Tympani'tes intestina'lis*.

TYMPANITES, UTERINE, Physometra.

TYMPANI'TIS, *Inflamma'tio tym'pani*, (*tympanum*, and *itis*.) Inflammation of the lining membrane of the middle ear. Also, tympanites.

TYMPANOSIS, Tympanites.

TYM'PANUM, (τυμπανον, 'a drum.') The *Drum* or *bar'rel of the ear*, *Ear drum*. The names *Cav'ity of the Tym'panum* or *of the Drum*, *Cav'itas* seu *Cav'um Tym'pani*, *An'trum* seu *cav'itas antro'sa An'ris*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour* ou *du Tympan* — have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external*, which is almost entirely formed of the *Mem'brane of the Drum*, *Membra'na tym'pani*, *Diaphrag'ma* seu *Mediasti'num* seu *Tegumen'tum au'ris*, *Myrin'ga*, *My'rinx*, (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenes'tra ova'lis*, *Prom'ontory*, and *Fora'men rotun'dum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior*, on which are the *Proces'sus cochleaform'is* and the inner orifice of the *Eusta'chian tube*. The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called the *Bones* or *Os'sicles of the Ear*, and are the malleus, incus, os orbiculare, and stapes.

For the nervous plexus of the tympanum, see Petrosal Ganglion, and Otic Ganglion.

TYMPANUM MINUS, see Fenestra — t. Secundarium, see Fenestra.

TYMPANY, Tympanites — t. of the Womb, Physometra.

TYPE, *Ty'pus*, *Peri'odus mor'bi*, (τυπος, 'a stamp,' itself from τυπτω, 'I strike.') The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA ANGUSTIFOLIA, (τυφη,) has the same properties as

TYPHA AROMATICA, Acorus calamus, and

TYPHA LATIFOLIA, *Cattail*, *Reedmace*, *Greater Reedmace*, *Bullsegg*, (F.) *Massette*, *Masse* ou *Quenouille d'Eau*. A plant common in marshes and ponds, in this country and Europe. *Ord.* Typhaceæ. *Sex. Syst.* Monœcia triandria. Its roots have been used in dysentery and blennorrhagia. The young shoots, before they reach the surface of the water, when boiled, taste like asparagus.

The down, (F.) *Aigrette*, *Poils*, which accompanies the flowers, has been applied like cotton to burns.

TYPHICUS, (from *typhus*,) Typhoid.

TYPHIQUE, Typhoid, Typhus.

TYPHLITIS, (*typhlo*, and *itis*,) Typhloënteritis.

TYPHLO, (from τυφλος, *cæcus*, 'blind,') in composition, the cæcum.

TYPHLODICLIDI'TIS, (*typhlo*, δυκλς, gen. δυκλιδος, 'a double door, a valve,' and *itis*.) Inflammation of the ileocæcal valve.

TYPHLOENTERI'TIS, *Typhloënteri'tis*, *Typhli'tis*, *Inflamma'tio Cæ'ci*, *Phleg'monous Tu'mour of the Cæ'cum*, (F.) *Inflammation du Cæcum*, *Cæcite* (Piorry); (*typhlo*, and *enteritis*, 'inflammation of the intestines.') Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, (*typhlo*, and εντερον, 'intestine,') Cæcum.

TYPHLOPS, (*typhlo*, and ωψ, 'eye,') Cæcum.

TYPHLOSIS, (τυφλωσις,) Cæcitas.

TYPHLOTERITIS, (*typhloterum*, and *itis*,) Typhloënteritis.

TYPHLOTERUM, Cæcum.

TYPHLOTES, (τυφλοτης,) Cæcitas.

TYPHO, (from τυφος, 'stupor,') in composition, typhus.

TYPHODES, (τυφωδης, affected with τυφος, 'stupor,') Typhous.

TYPHOÉMIE, Typhohæmia — *t. Entérique*, see Typhus.

TYPHOHÆMIA, (*typhus*, and *αἷμα*, 'blood,') see Putrefaction.

TY'PHOID, *Typhoï'des*, (*τυφώδης*, 'stupefied,') *Ty'phicus*, *Typhoï'sus*, *Lac'tica*, (F.) *Typhique*, *Typhoïde*, (*typho*, and *εἶδος*, 'resemblance.') Appertaining to or resembling typhus; as *Typhoid Fever*. Also, according to some, *Typhous Fever*, typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *Phlogoses*; of this family, *Stomacace*, *Pharyngocace*, and *Pneumocace* are examples.

TYPHOID AFFECTION, see Typhus—t. Fever of India, Cholera.

TYPHOMA'NIA, (*τυφομανία*, from *typho*, and *μανία*, 'delirium.') *Delir'ium with stu'por*, *Subdelir'ium*. The kind of delirium common in typhus.

TYPHOMANIA, Coma vigil, Insomnia.

TYPHONIA, (from *typhus*,) Coma vigil.

TYPHOSEPSES, Typhoseptoses.

TYPHOSEPTO'SES, *Typhosep'ses*, (*typho*, and *σηπώ*, 'putrefaction.') Typhous affections.

TYPHOSIS, (*typhus*, and *osis*.) The typhous condition or diathesis.

TYPHOSUS, (from *typhus*,) Typhoid, Typhous.

TY'PHOUS, *Typho'sus*, (F.) *Typhique*, *Typhode*. Belonging or relating to typhus.

TYPHOUS DEPOS'IT. A peculiar substance of new formation found in the areolar membrane, between the mucous and muscular coats of the patches of Peyer in typhoid fever.

TYPHOUS FEVER, see Typhoid.

TY'PHUS, *Semipes'tis*, *Tu'phus*, *Fe'bris Typhoï'des* seu *asthen'ica* seu *adynam'ica*, *Asthenop'yra*, *Ene'cia typhus*, (F.) *Fièvre adynamique* ou *ataxique* ou *adynamique ataxique*, *Typhus d'Europe*; (from *τυφος*, 'stupor.') A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being generally from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease was formerly divided into two varieties—*Ty'phus mit''ior* and *Ty'phus gra'vior*.

TYPHUS MIT''IOR seu *sim'plex* seu *nervo'sus* seu *comato'sus*, *Fe'bris len'ta nervo'sa* seu *pu'trida nervo'sa* seu *hec'tica malig'na nervo'sa*, *Blechrop'yrus*, *Neurop'yra*, *Neuropyr'etus*, *Ner'vous Fe'ver*, (F.) *Fièvre nerveuse*, is characterized by slight shiverings; heavy, vertiginous headach; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium.

TYPHUS GRA'VIOR seu *car'cerum* seu *castren'sis* seu *anthropophthor'acus* seu *contagio'sus exanthemat'icus* seu *nos'tras* seu *Europæ'us* seu *commu'nis* seu *bel'licus* seu *exanthemat'icus* seu *Hiber'nicus* seu *petechia'lis*, *Fe'bris nervo'sa cpidem'ica* seu *nervo'sa exanthemat'ica* seu *malig'na cum sopo're* seu *typho'des* seu *nervo'sa petechia'lis* seu *pestilentia'lis Euro'pæ* seu *punctic'ula'ris* seu *saprop'yra* seu *car'cerum et nosocomio'rum* seu *pu'trida* seu *con'tinens pu'trida* seu *contin'ua pu'trida* seu *pes'tilens malig'na* seu *naut'ica pestilentia'lis* seu *petechia'lis*, *Septop'yra*, *Porphyroty'phus*, *Saproty'phus*, *Pulicula'ris mor'bus*, *Pes'tis bel'lica*, *True* or *Exanthemat'ic* or *conta'gious ty'phus*, *Ner'vous fe'ver with exanthem'atous erup'tion*, *Pu'trid*, *Jail*, *Hos'pital* or *Ship Fe'ver*, (F.) *Fièvre des Camps*, *F. nautique*, *F. d'hôpital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, *Typhus contagieux*, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; a 'mulberry rash,' appearing on the fifth to the seventh day of the disease, and lasting till the end; delirium succeeded by stupor, signs of incipient putrescency,—as true petechiæ, vibices, hemorrhages, &c., *Pete'chial*, *Mac'ulated* or *Spotted Fever*, *Febris maculo'sa*. Typhus, under particular circumstances, seems to be communicable; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold ablution or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuants; the latter cannot.

It is now maintained that there is an essential difference between the two varieties, typhoid fever and typhus; that the former is essentially an abdominal affection, and dependent upon, or connected with, an inflamed or ulcerated condition of the follicles or glands of Peyer; hence it has received the names *Fièvre mésentérique*, *F. typhoïde*, *Maladie* ou *Affection typhoïde*, *F. entéro-mésentérique*, *Entérite typho-hémique*, *Typhoémie entérique*, *Entéro-mésentérite typhoïde*, *Exanthème intestinale*, *Dothinentéric*, *Dothinentérite*, &c., *Ileodiclidite*, *Typhodiclidite*, *Entérite folliculeuse*, *Gastro-entérite* with nervous affection of the brain, *Follic'ular gastroënteri'tis*, *F. enteri'tis*, *Enteri'tis folliculo'sa*, *Ty'phus abdomina'lis*, *T. intestina'lis*, *T. Sporad'icus*, *Enteroty'phus*, *T. ganglioma'ris abdomina'lis*, *Fe'bris intestina'lis ulcero'sa*, *F. nervo'sa gas'trica*, *F. nervo'sa enter'ica*, *F. enter'ica*, *F. nervo'sa mesenter'ica*, *Enterhelco'sis nervo'sa*, *Ty'phus enter'icus*, *Ileop'yra*, *Ileoty'phus*, *Ty'phoid affec'tion*, *Enter'icfe'ver*, *Pythogen'icfever*. Accompanying this form of fever there is generally pain or gurgling or pressing the right iliac fossa, over the seat of the intestinal lesion; with more or less diarrhœa, and a typhoid eruption, consisting of rose-red papulæ, (see Spots, red,) which appears mostly on the abdomen in the second week of the disease. They are distinct from true petechiæ, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever or synochus of Great Britain, and of this country, belongs tothis variety, and the *Red Tongue Fever* of Kentucky was considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Ty'phus of Europe*, *pestilen'tial fe'ver*, *conta'gious ty'phus*, *Hun'gary fe'ver*, *Hos'pital fe'ver*, *camp fe'ver*, *jail fe'ver*, *lentic'ular pete'chial fe'ver*, (F.) *Peste d'Europe*, &c., to be identical with the typhoid affection. They admit but one fever on the European continent—the typhoid. Typhus, they maintain—but by no means establish the position—to be peculiar to England.

TYP'IC, *Typ'ical*, *Typ'icus*, (τυπικος,) (F.) *Typique*. Characterized by a particular type, as a '*typical* fever.'

TYPOSES, (from *typus*,) see Periodicity.

TYPUS, (τυπος,) Type.

TYRANNUS, 'a tyrant,' see Critical days.

TYRBASIA, (τυρβασια,) Agitation.

TYRBE, (τυρβη,) Agitation.

TYREM'ESIS, *Tyrotem'esis*, (*tyros*, and εμεσις, 'vomiting;') *Tyro'sis*, *Tyreu'sis*. Vomiting of curdy matter, in infants especially.

TYREUSIS, (τυρευσις, 'cheese-making,') Tyremesis, Tyrosis.

TYRIA, Porrigo decalvans.

TYRIASIS, Elephantiasis Arabica.

TYRINE, (from *tyrus*,) Casein.

TYRODES, (τυροδης, from *tyrus* and *odes*,) Cheesy.

TYROMA, gen. *Tyro'matis*, Porrigo decalvans.

TYRUS, (τυρος,) Cheese.

TYROSIS, (from *tyrus*, and *osis*,) Tyremesis. Also, the curdling of milk in the stomach; *Tyreu'sis*.

TYROTEMESIS, (τυρωτος, 'made into cheese,' and εμεσις, 'vomiting.') Tyremesis.

U.

UBER, see Mamma.

UBERIS APEX, 'apex of the breast,' Nipple, Papilla.

UDDER, (Sax. uder,) see Mamma.

ULA, (ουλα, from ουλος, 'solid,') Gingivæ.

ULÆMORRHAGIA, Ulorrhagia.

ULATROPH'IA, (ουλον, 'the gum,' and *atrophia*, 'atrophy.') Shrinking of the gums; falling away of the gums.

UL'CER, (ἑλκος,) *Ul'cus*, *Hel'cos*, *Elco'sis*, *Elco'ma*, *Hel'cus*, *Helco'ma*, a *Sore*, (Sc.) *Sair*, (Prov.) *Kile*, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body:—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic:—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary:—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is perverted nutrition; the formative cells losing their plastic power. Ulcers have been variously divided, according to their nature;—into *simple*, *sinuous*, *fistulous*, *fungous*, *gangrenous*, *scorbutic*, *syphilitic*, *cancerous*, *scirrhous*, *epithelial*, *encephaloid*, *inveterate*, *scrofulous*, *phagedenic*, *virulent*, *cacoëthic*, *sordid*, *carious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

ULCER, ADEN, see Beriberi—u. Delhi, see Delhi—u. Jacob's, Lupus—u. Malignant, Hospital gangrene—u. Putrid, Hospital gangrene—u. Warty of Marjolin, see Warty Tumor of Cicatrices—u. Yemen, see Beriberi.

ULCERA INTESTINALIA, (pl. of *ulcus*,) Gastrelcosis—u. Laryngis, Phthisis laryngea—u. Serpentaria oris, Aphthæ—u. Uteri, see Metrophthisis—u. Ventriculi, Gastrelcosis—u. Vesicæ, Cystophthisis.

UL'CERATED, *Ulcera'tus*, *Exulcera'tus*, *Helco'des*, (F.) *Ulcéré*; (*ulcerare*, *ulceratum*, 'to make sore,' from *ulcus*.) In the state of an ulcer. Affected with ulcers.

ULCERATIO, Ulceration—u. Intestinalis, Enterelcosis—u. Ventriculi, Gastrelcosis.

ULCERA'TION, *Ulcera'tio*, *Exulcera'tio*, *Pyogen'ia corrosi'va*. A superficial ulcer. The formation of an ulcer—*Exelco'sis*, *Elco'sis*, and *Helco'sis*.

UL'CERATIVE, *Ulcerati'vus*, (F.) *Ulcératif*. Relating to ulceration,—as an '*ulcerative* process.'

ULCÈRE, Ulcer—*u. du Larynx*, Phthisis laryngea.

ULCÉREUX, Ulcerous.

UL'CEROUS, *Ulcero'sus*, *Helco'des*, *Helcoï'des*, (from *ulcus*,) (F.) *Ulcéreux*. Having the character of an ulcer. Affected with ulcers.

ULCERS, EGYPTIAN, Ægyptia ulcera.

ULCUS, gen. *Ul'ceris*, (ἑλκος,) Ulcer—u. Atonicum, Rupia—u. Cacoëthes, see Cacoëthes—u. Cancrosum, Cancer, Chancre—u. Dacryodes, see Dacryodes—u. Depascens, Phagedenic ulcer—u. Ferinum, Phagedenic ulcer—u. Fistulosum, Hypophora—u. Hypulum, see Hypulus—u. Narium fœtens, Ozæna—u. Obambulans, Phagedenic ulcer—u. Pulmonum, Phthisis pulmonalis—u. Sinuosum, Hypophora—u. Syriacum, Cynanche maligna—u. Telephium, Telephium—u. Tuberculosum, Lupus—u. Uteri, Hysterelcosis, Leucorrhœa.

ULCUSCULA PRÆPUTII, (pl. of *ulcusculum*,) Herpes præputii.

ULCUSCULUM, (dim. of *ulcus*,) Ulcer—u. Cancrosum, Chancre.

ULE, (υλη,) Cicatrix.

ULETICUS, (from *ulon*,) Gingivális.

ULICUS, Gingivalis.

ULI'TIS, (*ulon*, and *itis*,) *Ouli'tis*, *Inflamma'tio gingi'væ*, *Periodonti'tis gingiva'rum*, (F.) *Ulite*, *Gengivite*, *Inflammation des gencives*. Inflammation of the gums.

ULITIS SEPTICA, Cancer aquaticus.

ULLUCO, Tropæolum tuberosum.

ULMAIRE, Spiræa ulmaria.

ULMARIA, (from *ulmus*,) Spiræa ulmaria—u. Palustris, Spiræa ulmaria.

ULM'US, *U. campes'tris* seu *gla'bra* seu *monta'na* seu *nu'da* seu *sati'va* seu *sca'bra*, *Pte'lea*, *Com'mon Elm*, (F.) *Orme*, *Ormeau*, *Orme pyramidale* ou *champêtre*. *Ord.* Ulmaceæ. *Sex. Syst.* Pentandria Digynia. The inner, rough bark—*Ulmus*, (Ph. B.)—of this tree is inodorous; and has a

bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

Ulmus Ala'ta, *Lynn Wahoo'*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

Ulmus America'na, *U. ful'va* seu *ru'bra, Rough-leaved, Red,* or *Slip'pery Elm*. The inner bark—*Ulmus fulva,* (Ph. U. S. 1863,)—is highly mucilaginous, and is used in coughs, diarrhœas, and dysenteries; and, as a poultice for tumours, lacerated and contused wounds, &c. It may be employed, also, as a tent for dilating openings or passages.

Ulmus Campestris, Ulmus—u. Fulva, U. Americana, U. rubra—u. Glabra, Ulmus—u. Montana, Ulmus—u. Nuda, Ulmus — u. Sativa, Ulmus — u. Scabra, Ulmus.

Ul'na, (ωλενη,) *O'lenē, Fœc''ilē infe'rius* seu *ma'jus, Can'na Bra'chii, Os cu'biti infe'rius, Os procubita'lē, Cu'bitus, Arun'do bra'chii ma'jor, Cu'bit*. Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olec'ranon;* and, before, a smaller one, called *cor'onoid*. These two eminences are separated from each other by the greater *sig'moid* or *semilu'nar fos'sa* or *olec'ranoid cav'ity,* which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus*. On the outside of this extremity of the bone is the *les'ser sig'moid cav'ity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibrocartilage which separates it from the os cuneiforme; and a pointed process called *sty'loid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification. Also the elbow.

ULNAD, see Ulnar aspect.

ULNAIRE, Ulnar.

ULNAR, Cubital.

Ul'nar As'pect. An aspect towards the side on which the ulna is situated.—(Barclay.) *Ulnad* is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

ULNARIS, (from *ulna,*) Cubital—u. Externus, see Cubital muscles — u. Gracilis, Palmaris longus—u. Internus, see Cubital muscles.

ULOCACE, (*ulon,* and κακος, 'evil,') Cancer aquaticus, Stomacace.

ULON, (ουλον,) Gingiva.

ULON'CUS, (F.) *Uloncie,* (*ulon,* and ογκος, 'tumour.') Swelling of the gums; epulis.

ULORRHAG''IA, *Ulœmorrhag''ia, Oulorrhag''ia, Stomatorrhag''ia, Hœmorrhag''ia gingiva'rum, Ulorrhœ'a,* (*ulon,* and ῥηγνυμι, 'I break forth.') Bleeding from the gums.

ULORRHŒA, (*ulon,* and ῥεω, 'to flow,') Ulorrhagia.

ULOSIS, (*ule,* and the suffix *osis,*) Cicatrization.

ULOTICA, (from *ule,*) Cicatrisantia.

UL'TIMISTERNAL. Professor Béclard gave this appellation to the sixth or last bony portion f the sternum. He calls it also *Ensistern'al*.

UL'TIMUM MO'RIENS, 'last dying.' A term given to the part of the economy which dies last.

ULUM, (ουλον,) Gingiva.

ULVA CRISPA, Fucus crispus.

Ul'va Latis'sima, *Broad Green Lo'ver, Green Sloke, Oys'ter green; Order,* Algæ; is used at table cooked in the same way as the next, to which it is greatly inferior.

Ulva Umbilica'lis, *Por'phyra laciniu'ta* seu *umbilica'lis, Lacin'iated Pur'ple Lu'ver*. abundant on the shores of Great Britain, is pickled with salt and sold in London as *Lu'ver*. It is eaten at table, stewed with pepper, butter or oil and lemonjuice or vinegar. It has been suggested, also, as an antiscorbutic.

UMBEL, YELLOW, Cypripedium luteum.

UMBILIC, Umbilical, Umbilicus.

UMBIL'ICAL, *Um'bilic, Umbilica'lis,* (F.) *Ombilical,* (from *umbilicus.*) That which belongs or relates to the navel.

Umbilical Ar'teries, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords, — the vein forming the *Ligamen'tum rotun'dum* of the liver.

Umbilical Cord, Funiculus umbilicalis.

Umbilical Re'gion, *Re'gio umbilica'lis* seu *gas'trica* seu *me'sogas'trica, Mesogas'trium,* (F.) *Région ombilicale,* is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lum'bar re'gions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

Umbilical Ring, *An'nulus umbilica'lis,* (F.) *Anneau ombilical,* is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

Umbilical Vesicle, Vesicula umbilicalis.

Umbilical Ves'sels, (F.) *Vaisseaux ombilicaux,* include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBIL'ICATED, *Umbilica'tus,* (F.) *Ombiliqué*. Depressed in the centre like the umbilicus, — as an '*umbilicated* pustule.'

UMBILI'CUS, *Umbili'cum, Um'bo, Om'phalos, Ra'dix* seu *Me'dium ven'tris, Mesompha'lium, Mesom'phalum, Protme'sis* (*navel of a newborn child*); the *um'bilic, na'vel,* (Prov.) *Spoon;* (from *umbo,* 'the button or prominence in the middle of a buckler,' or from νμφαλος, or rather ομφαλος, which signifies the same, as well as the navel;) (F.) *Ombilic, Nombril*. A round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

Umbilicus Mari'nus, *Cotyle'don mari'na, Andro'sacē, Acetab'ulum mari'num, Andro'sacē Matthi'oli, Fun'gus petræ'us mari'nus*. A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, (dim. of *umbra,* 'a shade,') Magnolia tripetala.

UMSCHLAG, ([G.] um, 'around,' and schlagen, 'to throw,') see Compress.

UNBOWELING, Exenterismus.

UNCARIA GAMBIR, Nauclea Gambir.

UNCAS, INDIAN, Veratrum viride.

UNCIA, (ουγγια,) Ounce.

UN'CIFORM, *Uncifor'mis, Uncina'tus,* (*uncus,*

and *forma*, 'shape.') That which has the shape of a hook.

Uniform Bone, *Os uniform'ē.* seu *hama'tum* seu *uncina'tum*, (F.) *Os crochu.* The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

Uniform Eminence, Hippocampus minor.

Uniform Proc''ess, *Proces'sus uncina'tus* seu *Blumenbach'ii, Great Proc''ess of the Eth'moid.* The most considerable of the thin irregularly twisted laminæ on the inferior surface of the ethmoid bone, which narrow the opening of the maxillary sinuses.

UNCINATUS, (from *uncinus,*) Unciform.

UNCINUS, Hook.

UNCTION, (*ungere, unctum,* 'to anoint,') Inunction, Unguentum, Unguentum hydrargyri.

UNC'TOR, (same etymon as Unction.) The anointer in ancient bathing establishments.

UNCTORIUM, Elæothesion.

UNCTUARIUM, Elæothesion.

UNCUS, gen. *Unci*, Hook.

UNDER'CLIFF, ISLE OF WIGHT, (CLI'MATE OF.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

UNDIM'IA. A name given by Paracelsus to a tumour filled with a gelatinous matter, like the white of egg.

UNDOSUS, (from *unda*, 'a wave,') Cymatodes.

UNDULATIO, (from *unda*, 'a wave,') Fluctuation.

UNEDO, gen. *Unedo'nis*, Arbutus unedo — u. Papyracea, Arbutus unedo.

UN'GUEAL, *Unguea'lis, Un'gual, Ungua'lis*, (from *unguis*, 'a nail.') Belonging or relating to the nails of the hands or feet.

UNGUEAL MATRIX, see Nail.

UNGUEN, (from *ungere, unctum*, 'to anoint,') Unguentum — u. Articulare, Synovia.

UNGUENT, ARMATORY, Hoplochrysma.

UNGUENTARIA, see Myristica Moschata.

UNGUENTA'RIUS, *Myrep'sus, Myropœ'us, Myropo'les, Myropo'lus, Pigmenta'rius*, (from *unguen'tum.* One who makes and sells ointments. A perfumer.

UNGUEN'TUM, *Un'guen, Diachrysm'a, My'ron, Unc'tion, Salve*, (F.) *Onguent*, (from *ungere, unctum*, 'to anoint.') Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used chiefly as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment shall be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately. See Pomatum, (F.) *Pommade.*

Unguentum Ac''idi Nitro'si, *Oint'ment of Ni'trous Ac''id, Poma'tum* seu *Unguen'tum Ni'tricum* seu *Oxygena'tum*, (F.) *Pommade oxygénée, Graisse oxygénée, Pommade d'Alyon.* (*Adip. suilli*, ℔j; *Acid nitros.* ℥vj. Melt the fat, and rub in the acid gradually, till cold. *Ph. E.*) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

Unguentum Ac''idi Tan'nici, *Ointment of Tannic Acid.* (*Acid. Tannic.* gr. xxx; *Aq.* f℥j; *Adipis.* ℥j. Rub the acid with the water, and mix with the lard. Ph. U. S., 1863.) Used like Unguentum Gallæ.

Unguentum Aconi'tiæ, *Ointment of Aconit'ia.* (*Aconitiæ*, gr. viij; *Sp. rectif*, f℥ss; *Adipis præparat.* ℥j M.) In neuralgic pains.

Unguentum Adipis, U. Ceræ.

Unguentum Adipoceræ Cetorum, Ceratum cetacei — u. Ægyptiacum, Linimentum æruginis — u. Ægyptium album, Crinomyron — u. Æruginis, U. subacetatis cupri — u. Album, Unguentum cetacei—u. Album Resolvens, Linimentum ammoniæ fortius.

Unguentum de Althæ'â, *U. de Terebin'thinâ et ce'râ* seu *cit'rinum* seu *resi'næ pi'ni sylves'tris compos'itum* seu *resumpti'vum* seu *lenitivum, Cera'tum de Althæ'a, Emplas'trum mucilagino'sum* seu *emol'liens* seu *cit'rinum* seu *fla'vum* seu *de Althæ'â, Unguentum flu'vum, Marshmallow Oint'ment*, (F.) *Onguent de guimauve, O. d'althéa.* (*Olei de mucilaginibus*, 1000 p., *Ceræ flavæ*, 250 p., *Resinæ, Terebinthin.*, ää 125 p. Liquefy; strain and stir till cold. *Ph. P.*) *Common Olive Oil* might be substituted for the *Oil of Mucilages.*

Unguentum Ammoniacale Gondreti, *Pommade de Gondret*—u. Amygdalinum, Ceratum Galeni.

Unguentum Antimo'nii, *U. Antimonia'lē, U. A. Tartariza'ti, U. A. Potassiotartra'tis, U. tartari emet'ici, Oint'ment of tar'tarized an'timony, Antimo'nial Oint'ment, Tar'tar emet'ic oint'ment.* (*Antimon. et potass. tartrat.* in pulv. subtiliss. ℥ij, *Adipis*, ℥j. *Ph. U. S.*) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counterirritant. This preparation is also called *Ung. Tar'tari stibia'ti* seu *emet'ici, Ung. e Tar'taro stibia'to, A'deps Tar'tarē stib'ii medica'tus, Ung. Tartra'tis Potass'æ stibia'ti*, (F.) *Pommade d'Autenrieth, Pommade stibiée.* This method of employing the tartrate of antimony and potassa, as a revellent, is, at times, called *stib'iodermic*, (F.) *La méthode stibio-dermique.*

Unguentum Antimonii Potassiotartratis, Unguentum antimonii — u. Antimonii tartarizati, U. antimonii—u. Antipernium, see Antipernius—u. Antipsoricum Werlhofii, Unguentum hydrargyri præcipitati albi.

Unguentum A'quæ Ro'sæ, *Oint'ment of Rose wa'ter, Cold Cream.* (*Aq. Rosæ*, f℥ij; *Ol. amygdal.* ℥iiiss; *Cetacei*, ℥i; *Ceræ albæ*, ℥j. Melt together, in a water bath, the oil, spermaceti, and wax; then add the rose-water, and stir until it is cold. *Ph. U. S.*) Cooling to irritated surfaces.

Unguentum Armarium, Hoplochrysma—u. Arthanitæ, see Arthanita — u. Articulare, Synovia.

Unguentum Atrop'iæ, *Ointment of Atrop'ia.* (*Atropiæ*, gr. viij; *Spir. rectif.* f℥ss; *Adipis præparat.* ℥j M. Ph. B., 1864.) Smeared around the eye to dilate the pupil.

Unguentum Basilicon Flavum, Ceratum resinæ — u. Basilicon nigrum, Unguentum resinæ nigræ — u. Basilicum viride, Unguentum subacetatis cupri.

Unguentum Belladon'næ, *Oint'ment of Belladon'na.* (*Ext. belladonnæ*, ℥j; *Aq.* f℥ss; *Adipis*, ℥j; M. *Ph. U. S.*) An anodyne application to irritable ulcers, &c.

Unguentum Benzo'ini, *Ointment of Ben'zoin, Ben'zoated Lard.* (*Benzoin.* ℥j; *Adipis*, ℥xvj. Heat them together; strain without pressing, and stir while cooling. Ph. U. S., 1863.) A substitute for lard in seasons when the latter may become rancid.

Unguentum Calomel'anos, *Ointment of Cal'omel.* (*Calomel*, gr. lxxx; *Prepared Lard*, ℥j. Ph. B., 1864.) In chronic cutaneous affections

Unguentum Calomelanos Compos'itum, *Compound Oint'ment of Cal'omel, Ban'yer's Oint'ment.*

(*Calomel*, ℥ij; *Burnt alum*, ℥iv; *Carbonate of lead*, ℥iv; *Venice turpentine*, ℥vj; *Spermaceti ointment*, ℥iss.) In scalled head and other chronic cutaneous affections.

Unguentum Cantharidis, Unguentum lyttæ.

Unguentum Ceræ (*al'bæ* vel *flu'væ*), *Unguen'tum sim'plex* (*Ph. U. S.*, 1851), *Unguentum ad'ipis*, *Linimen'tum sim'plex*, *Wax Ointment*, *Ointment of Lard*, *Oil and Bees' wax*, (F.) *Onguent de cire.* (*Ceræ*, ℥ij; *Adipis*, ℥viii [*Ph. U. S.*]:—or—*Ceræ*, ℥ij, *Ol. oliv.* ℥v.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

Unguentum Ceratum, Ceratum Galeni—u. Cerussæ, Unguentum oxidi plumbi albi, Unguentum plumbi subcarbonatis—u. Cerussæ acetatæ, Ceratum plumbi superacetatis, U. plumbi superacetatis.

Unguentum Ceta'cei, *U. Sper'matis Ce'ti* seu *al'bum*, *Linimen'tum al'bum. Spermace'ti oint'ment*, (F.) *Onguent de blanc de baleine.* (*Cetacei*, ℥vj, *Ceræ albæ*, ℥iv, *Ol. oliv.* f℥iij. *Ph. L.*) The ordinary dressing for blisters and excoriations. See Ceratum cetacei.

Unguentum Citrinum, U. de althæa, U. hydrargyri nitratis.

Unguentum Coc'culi, *Oint'ment of Coc'culus In'dicus.* (Take any quantity of *Cocculus Indicus*; separate and preserve the kernels; beat them well in a mortar, first alone, and then with a little *lard*; then add *lard* till it amounts altogether to five times the weight of the kernels. *Ph. E.*) Used to destroy vermin, and to cure scabics, and ringworm of the scalp.

Unguentum Coni'i, *Ointment of Hem'lock.* (*Conii fol.* recent.; *Adipis*, āā ℔j. Boil the hemlock in the lard till it becomes crisp, and express through linen. *Ph. L.*) Used to irritable tumours and ulcers.

Unguentum Contra Scabiem Werlhofii, Unguentum hydrargyri præcipitati albi.

Unguentum Creaso'ti, *Oint'ment of Cre'asote.* (*Creasot.* f℥ss; *Adipis*, ℥j. Add the creasote to the lard previously melted by a moderate heat, and stir constantly till cold. *Ph. U. S.*) Used in chronic cutaneous affections.

It is double the strength in the Ph. B., 1864.

Unguentum Cupri Subacetatis, Unguentum subacetatis cupri—u. Diapompholygos, Unguentum oxidi zinci impuri.

Unguentum Digesti'vum Sim'plex, *U. Terebin'thinæ et ovo'rum vitel'li*, *Sim'ple diges'tive oint'ment*, (F.) *Onguent digestif simple.* (*Terebinthin. pur.* 64 p. *Vitell. ovorum*, No. 2, vel 32 p. Mix, for a long time, in a glass mortar, and add, gradually, enough of the *Oil of Hypericum* (*Millepertuis*) to make a soft ointment. *Ph. P.*) Detergent. It may be rendered more so by adding a little of the *Acetate of copper.*

Unguentum El'emi, *Oint'ment of El'emi.* (*Elemi*, ℥ij; *Simple ointment*, ℥j. Melt, strain through flannel, and stir until the ointment solidifies. Ph. B., 1864.) Uses, the same as the next.

Unguentum El'emi Compos'itum, *Unguen'tum e gum'mi el'emi* seu *de terebin'thinâ et adip'ibus* seu *El'emi*, *Linimen'tum* seu *Bal'samum Arcæ'i*, *Com'pound Oint'ment of El'emi*, *Balsam of Arcæ'us*, (F.) *Baume d'Arcéus.* (*Elemi*, ℔j, *Terebinthinæ vulgaris*, ℥x, *Sevi præparati* ℔j, *Olivæ olei*, f℥ij. Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. *Ph. L.*) Stimulant and digestive. To keep open issues, &c.

Unguentum Epispas'ticum de Daph'nē Gnid'io, *A'deps Cor'ticē daph'nes gnid'ii medica'tus*, (F.) *Pommade de Garou.* (*Adip. præpar.* 320 p., *ceræ*, 32 p., *Cort. daphn. gnid.* 128 p. Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated; then pass through cloth. *Ph. P.*) To keep open blisters, issues, &c. See Unguentum Mezerei.

Unguentum Epispasticum Fortius, Cerate of cantharides—u. Epispasticum mitius, Unguentum lyttæ—u. Epispasticum viride, Unguentum lyttæ medicatum—u. Flavum, Unguentum de althæâ.

Unguentum Gal'læ, *Oint'ment of Galls.* (*Gallæ* in pulv. ℥j; *Adipis*, ℥vij. M. *Ph. U. S.*) As an astringent in piles, indolent ulcers, &c.

Unguentum Gal'læ Compos'itum, *U. Gal'læ et O'pii*, *U. Gallæ cum O'pio*, *Com'pound Oint'ment of Galls.* (*Gall.* in pulv. subtil. ℥vj, *Adipis*, ℥vj, *Opii* pulv. ℥iss. M. *Ph. L.*) Used in painful hemorrhoids. ℥ss or ℥j, of camphor is sometimes added.

Unguentum e Gummi Elemi, Unguentum compositum—u. Hellebori albi, Unguentum veratri.

Unguentum Hydrar'gyri, *U. cæru'leum* seu *Neapolita'num* seu *mercuria'lē*, *Cera'tum mercuria'lē*, *A'deps Hydrar'gyro medica'tus*, *Mercu'rial Oint'ment*, *Blue oint'ment*, *Unc'tion*, (F.) *Onguent mercuriel ou Napolitain.*

The *Strong Mercu'rial Oint'ment*, *Unguen'tum Hydrar'gyri fortius* of the London Pharmacopœia, *U. Hydrar'gyri* (*Ph. U. S.*), is thus made—*Hydrarg.* ℥xxiv, *Adipis*, *Sevi*, āā ℥xij. Rub till the globules entirely disappear.

The *Mild'er Mercu'rial Oint'ment*, *U. Hydrargyri Mit'ius*, is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisyphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The *stronger* ointment is used for this purpose. The *weaker* is employed as a dressing, or as an application to cutaneous eruptions.

Unguentum Hydrargyri Ammoniati, Unguentum hydrargyri præcipitati albi—u. Hydrargyri calcis albæ, Unguentum hydrargyri præcipitati albi—u. Hydrargyri compositum, Unguentum hydrargyri nitratis—u. Hydrargyri deutoxydi nitrati, Unguentum hydrargyri nitricoöxydi.

Unguentum Hydrar'gyri Io'didi, *Oint'ment of I'odide of Mer'cury.* (*Hydrarg. Iodid.* ℥j, *Ceræ alb.* ℥ij, *Adipis* ℥vj. *Ph. L.*)

Unguentum Hydrar'gyri Io'didi Ru'bri, *Oint'ment of Red I'odide of Mer'cury.* (*Hydrarg. Iodid. Rubr.* ℥j, *Ung. ceræ albæ* ℥vij. *Ph. D.*) Both these ointments may be applied to scrofulous and indolent ulcers.

Unguentum ex Hydrargyro mitius dictum cinereum, Unguentum oxydi hydrargyri cinereum.

Unguentum Hydrargyri Nitra'tis, *U. hydrargyri nitra'ti* seu *supernitra'tis hydrar'gyri* seu *hydrar'gyri compos'itum* seu *mercuria'lē cit'rinum* seu *cit'rinum ad scа'biem*, *Bal'samum mercuria'lē*, *A'deps nitra'tē hydrar'gyri medica'tus*, *Oint'ment of Ni'trate of Mer'cury*, *Cit'rine Oint'ment*, (F.) *Onguent de nitrate de mercure*, *O. citrin contre la gale.* (*Hydrarg.* ℥iss, *Acid. nitric.* ℥iiiss, *Olei bubuli* ℥xij, *Adipis* ℥ivss. Dissolve the mercury in the acid; and, while hot, add the oil (for which *butter* might be substituted) and melted lard. *Ph. U. S.*

A milder ointment, *Ung. ni'tratis Hydrar'gyri mit'ius*, is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

Unguentum Hydrargyri Ni'tricoöx'ydi, *U. subnitra'tis hydrar'gyri* seu *Ox'ydi Hydrar'gyri ru'bri*, *U. H. ox'idi ru'bri* (*Ph. U. S.*), *U. deutox'ydi hydrarg. nitra'ti* seu *Hydrargyri ru'bri* seu *ex Hydrar'gyro oxyda'to ru'bro* seu *mercu'rii ru'brum* seu *ophthal'micum ru'brum* seu *subnitra'tis hydrargyr'ici*, *Bal'samum ophthal'micum ru'brum*, *Oint'ment of Ni'tric Ox'yd of Mer'cury*, *Red Precip'itate Oint'ment*, *Gold'en Oint'ment*, *Sin'gleton's Eye Salve.* (*Hydrarg. oxid. rubr.* in pulv.

subtiliss. ℥j; *Ung. adipis* ℥j. Add the oxyd, reduced to a fine powder, to the melted ointment. *Ph. U. S.*) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

Belleville's Ce'rate, which has been long used in cases of scalled head, and of chronic cutaneous diseases in general, is made as follows: — *Plumbi acet.* ℥j; *Hydrarg. oxid. rubr.* ℥ss; *Hyd. chlorid. mit.* ℥ij; *Ceræ albæ* ℥iv; *Ol. oliv.* ℥vj. Melt the last two, and add the others in fine powder.

Unguentum Hydrargyri Oxidi Rubri, Unguentum hydrargyri nitricoöxydi — u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitricoöxydi.

Unguentum Hydrargyri Præcipita'ti Al'bi, *U. Hydrar'gyri ammonia'ti* (*Ph. U. S.*) seu *submuria'tis hydrargyri ammonia'ti* seu *antipsoricum Werlhofii* seu *ad sca'biem Zelleri* seu *mercuria'lē al'bum* seu *mundif'icans Zel'leri* seu *e mercu'rio præcipita'to* seu *cale'is hydrar'gyri al'bæ, Oint'ment of white precip'itate.* (*Hyd. ammon.* ℥j, *Ung. simpl.* ℥iss. Melt the fat, and add the precipitate.) Detergent. Used incutaneous eruptions, to destroy vermin, &c.

Unguentum Hydrargyri Rubri, U. Hydrargyri nitricoöxydi — u. Hydrargyri submuriatis ammoniati, U. Hydrargyri præcipitati albi — u. Hydrargyri subnitratis, U. hydrargyri nitricooxydi — u. Hydrargyri supernitratis, U. hydrargyri nitratis—u. Hydrargyrici subnitratis, U. hydrargyri nitricoöxydi—u. Infusi meloes vesicatorii, U. lyttæ.

Unguentum Io'dini, *U. Iodin'ii, Oint'ment of Iodine.* (*Iodin.* ℈j; *Potass. iodid.* gr. iv; *Aquæ* ♏vi; *Adipis.* ℥j. Rub the iodine and iodide first with the water until liquefied, and then with the lard until mixed. *Ph. U. S.*) Used as a local application to goitrous and other swellings.

Uugentum Io'dini Compos'itum, *U. Iodin'ii compos'itum, U. Io'di compos'itum, Com'pound Oint'ment of Iodine.* (*Iodin.* gr. xv; *Potassii iodid.* gr. xxx; *Aq.* ♏ xxx; *Adipis* ℥j. Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. *Ph. U. S.*)

Unguentum Irritans, U. lyttæ.

Unguentum Lauri'num, *O'leum lauri'num, A'deps lauro medica'tus, Bay Oint'ment,* (F.) *Onguent* ou *Huile de laurier.* (*Fol. lauri,* 500 p., *Adip. suilli,* 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add *Bay berries,* in powder, 500 p. Digest and pass through linen. *Ph. P.*) Reputed to be corroborant and nervine. It is simply emollient.

Unguentum Lenitivum, U. de althæa — u. Liliaceum, Crinomyron.

Unguentum Lyt'tæ, *Ung. canthar'idis* seu *vesicato'rium* seu *irri'tans* seu *ad vesica'ta* seu *infu'si mel'oës vesicato'rii* seu *epispas'ticum mit''ius, Blis'tering Salve, Oint'ment of Span'ish Flies, Oint'ment of Infu'sion of Span'ish Flies, Mild'er blis'tering Oint'ment.* (*Cantharid.* in pulv. ℥ij; *Aquæ destillat.* Oss; *Cerat. resin.* ℥viij. Boil down the water with the Spanish flies to one half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper consistence. *Ph. U. S.*) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

Unguentum Lyt'tæ Medica'tum, *A'deps cantharid'ibus medica'tus, Poma'tum* seu *Unguen'tum epispas'ticum vir'idē stim'ulans ae'ribus, Green blis'tering Oint'ment,* (F.) *Pommade épispastique verte.* (*Pomati* seu *unguenti cantharid.* 64 p., *Unguent populei* 168 p., *Ceræ albæ* 256 p., *Cupri acetat., Ext. opii,* āā 24 p. Melt the unguentum populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. *Ph. P.*) Use, same as the last.

Unguentum Lyt'tæ Medica'tum A'liud, *A'deps cantharid'ibus medica'tus a'lius, Poma'tum epispas'ticum fla'vum et mit''ius, Yel'low Blis'tering Oint'ment,* (F.) *Pommade épipastique jaune.* (*Pulv. cantharid.* 120 p., *Adip. præp.* 1680 p., *Aquæ* 250 p. Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water-bath, and add powdered *Turmeric,* 8 p. Let it cool till the superfluous liquid separates; pour off and add *Yellow wax,* 250 p., *Oil of Lemon,* 8 p. *Ph. P.*) A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Phys'ick's Is'sue Oint'ment.*" It is made by boiling half an ounce of powdered *Cantharides* in two ounces of *Rosewater,* and evaporating until onehalf of the fluid is driven off, having previously added 15 grains of *Tartar emetic.* The decoction is to be strained, and three ounces of *Olive oil,* an ounce and a half of *White wax,* and one ounce of *Spermaceti* added to it, and the mixture then boiled till all the water is evaporated.

Unguentum Melanicum Causticum, Causticum Æthiopicum.

Unguentum Mercuriale, Unguentum hydrargyri — u. Mercuriale album, Unguentum hydrargyri præcipitati albi—u. Mercuriale citrinum, Unguentum hydrargyri nitratis—u. e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi — u. Mercurii rubrum, Unguentum hydrargyri nitricoöxidi.

Unguentum Meze'rei, *Oint'ment of Meze'reon.* (*Mezer.* incis. transversim, ℥iv; *Adipis,* ℥xiv; *Ceræ albæ,* ℥ij; moisten the mezereon with a little alcohol, and beat in an iron mortar, until it is reduced to a fibrous mass; then digest it with the lard, in a saltwater bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold. Ph. U. S.) To keep open blisters, issues, &c.

Unguentum Mundificans Zelleri, Unguentum hydrargyri præcipitati albi.

Unguentum Muria'tis Hydrar'gyri Oxygena'to Medica'tum, *A'deps muria'tē hydrar'gyri oxygena'to medica'tus, Cyrillo's Oint'ment,* (F.) *Pommade de Cyrillo.* (*Hydrar. oxymur.* 4 p.; *Adipis suilli præp.* 32 p.—Ph. P.) Antivenereal and alterative. Used in friction, ℥ss at a time.

Unguentum Nardinum, see Nardus Indica — u. Neapolitanum, Unguentum hydrargyri — u. Nervinum, Unguentum Sambuci — u. Nitricum seu oxygenatum, Unguentum acidi nitrosi — u. Nutritum, Unguentum plumbi superacetatis.

Unguentum Ophthal'micum, *A'deps ox'ido hydrargyri ru'bro et plum'bi aceta'tē medica'tus, Re'gent's Pommade ophthalmique,* (F.) *Pommade ophthalmique.* (*Butyr. recent. Aq. rosar. lavat.* p. 68; *Camphor.* p. 0.3; *Oxyd. hydrarg. rubr., Acetatis plumbi,* āā p. 4. Mix intimately.—Ph. P.) In chronic inflammation of the conjunctiva or tarsi.

Unguentum Ophthalmicum, Unguentum oxidi zinci impuri—u. Ophthalmicum rubrum, Unguentum hydrargyri nitricoöxydi.

Unguentum O'pii, *Oint'ment of O'pium.* (*Opii* pulv. ℈j; *Adipis* ℥j; M. — Ph. L.) To be used where the local application of opium by inunction is needed.

Unguentum Ox'idi Hydrargyri Cine'rei, *A'deps* seu *Unguen'tum ex hydrar'gyro mit''ius dic'tum cine'reum, Oint'ment of gray ox'ide of mer'cury,* (F.) *Onguent gris.* (*Oxyd. hydrarg. ciner.* p. j; *Adipis suilli,* p. iij.—Ph. E.) Properties

like the mercurial ointment. It is not much used.

Unguentum Ox'idi Plum'bi Al'bi, *U. cerus'sæ* seu *al'bum, Oint'ment of white ox'ide of lead, White oint'ment.* (*Ung. simplicis*, p. v; *Oxyd. plumb. alb.* p. j.—Ph. E. and P.) Cooling and desiccative. Applied to excoriated and burnt surfaces.

Unguentum Ox'idi Plumbi Carbonati, U. Plumbi subcarbonatis — u. Oxidi zinci, Unguentum zinci.

Unguentum Ox'idi Zin'ci Impu'ri, *U. tu'tiæ* seu *ophthal'micum* seu *diapomphol'ygos, A'deps ox'idi zin'ci medica'tus, Eyesalve, Tut'ty oint'ment, Oint'ment of impure ox'ide of zinc.* (*Linim. simpl.* p. v; *Oxyd. zinc. impur. præp.* p. j.—Ph. E.) Generally used in ophthalmia tarsi and atonic ophthalmia.

Unguentum Pi'cis Liq'uidæ, *U. Pi'cis* seu *e Pi'cē, Tar Oint'ment.* (*Picis liquid., Sevi*, sing. ℔j. Melt, and stir till cold.—Ph. U. S.) Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

Unguentum Picis Nigræ, Unguentum resinæ nigræ — u. Plumbi acetatis, Ceratum plumbi superacetatis — u. Plumbi carbonatis, Unguentum plumbi subcarbonatis.

Unguentum Plum'bi Compos'itum, *Com'pound Oint'ment of Lead.* (*Emp. Plumbi*, ℔iij; *Ol. oliv.* f℥xviij; *Cret. præpar.* ℥vj; *Acid. acet. dil.* f℥vj. Dissolve the plaster in the oil with a slow fire; then add the chalk, and afterwards the acid, constantly stirring until they become cold.—Ph. L.) Used as a dressing to flabby, indolent ulcers.

Unguentum Plum'bi Io'didi, *Oint'ment of Iodide of Lead.* (*Plumb. iodid.* ℥j; *Adipis*, ℥viij; M.—Ph. L.) Used as a eutrophic in chronic, glandular, and other swellings.

Unguentum Plumbi Oxydi Carbonati, Unguentum plumbi subcarbonatis.

Unguentum Plumbi Subcarbona'tis, *U. plum'bi carbona'tis* (Ph. U. S.) seu *al'bum* seu *al'bum sim'plex* seu *carbona'tis plum'bici* seu *cerus'sæ* seu *oxi'di plum'bi carbona'ti, Cera'tum de cerus'sâ*, (F.) *Onguent blanc de Rhazes, O. de céruse, O. de Tornamira.* (*Plumbi carbonat.* in pulv. subtiliss. gr. lxxx, *Unguent. simpl.* ℥j. Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.—Ph. U. S.) Chiefly used as a dressing for burns.

Unguentum Plum'bi Superaceta'tis, *U. aceta'tis plum'bi* seu *saturni'num* seu *nutri'tum* seu *cerus'sæ aceta'tæ, Bal'samum universa'lē, Oint'ment of sugar of lead, Sat'urnine oint'ment.* (*Olive oil*, ℔ss; *White wax*, ℥iss; *Superacetate of lead*, ℥ij.) Cooling, desiccative. Called, also, *Bal'samum saturni'num, Buty'rum satur'ni, Linimen'tum plumba'tum, Poma'tum satur'ni, Ung. triphar'macum.*

Unguentum Plumbici Carbonatis, Unguentum plumbi subcarbonatis.

Unguentum Popule'um, *A'deps papav'erē, hyoscy'amo, et belladon'nâ medica'tus.* (Fresh buds of the *Populus nigra*, 500 p., macerated in *Adeps suillus præp.* melted, 1500 p., for 24 hours. Preserve this. Take *Black poppy leaves, Belladonna, Hyoscyamus, Black nightshade*, āā 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain.—Ph. P.) Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

Unguentum Populeum, see Populus.

Unguentum Potas'sæ Hydrioda'tis, *U. potas'sii io'didi* (Ph. U. S.), *Oint'ment of hydri'odate of potass.* (*Potass. iodid.* in pulv. subtil. ℥j; *Aq.* f℥j; *Adipis*, ℥j. Dissolve the iodide in the water, and mix the solution with the lard.—Ph. U. S.) Half a drachm of this ointment is rubbed on scrofulous glands, goître, &c.

Unguentum Potassii Iodidi, Unguentum Potassæ Hydriodatis — u. Pulveris meloes vesicatorii, Cerate of cantharides — u. Resinæ flavæ, Ceratum resinæ flavæ.

Unguentum Resi'næ Ni'græ, *U. resi'næ ni'grum* seu *basil'icon ni'grum* seu *Pi'cis ni'græ* seu *Pi'cis tetrapharm'acum, Black basil'icon, Black res'in oint'ment, Oint'ment of pitch, Oint'ment of black pitch.* (*Resin nigr., Ceræ flavæ, Resinæ flav.* āā ℥ix; *Olei olivæ*, Oj.—Ph. L.) Uses, the same as those of *Ceratum resinæ* or *Yellow basilicon.*

Unguentum Resinæ Pini Sylvestris Compositum, Unguentum de Althæa — u. Resinosum, Ceratum resinæ flavæ—u. Resumptivum, Unguentum de althæâ.

Unguentum Sabinæ, Ceratum Sabinæ.

Unguentum Sambu'ci, *U. sambuci'num* seu *nervi'num, Green oint'ment, El'der oint'ment*, (F.) *Onguent de sureau.* (*Sambuci flor.* ℔ij; *Adipis præp.* ℔ij. Boil.—Ph. L.) Emollient.

Unguentum Saturninum, Unguentum plumbi superacetatis—u. ad Scabiem Zelleri, Unguentum hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, Unguentum ceræ — u. Solidum de cicutâ, Emplastrum cicutæ — u. Spermatis ceti, Unguentum cetacei.

Unguentum Stramo'nii, *Oint'ment of Stramo'nium.* (*Ext. stramon. fol.* ℥j; *Aq.* f℥ss; *Adipis*, ℥j. Rub the extract with a little water until uniformly soft, and then with the lard. — Ph. U. S.) An anodyne ointment to irritable ulcers, hemorrhoids, &c.

Unguentum Subaceta'tis Cu'pri, *U. cu'pri subaceta'tis* (Ph. U. S.) seu *deter'gens* seu *basil'icum vir'idē* seu *æru'ginis, Bal'samum* seu *Cera'tum* seu *Unguen'tum vir'idē, Oint'ment of subac'etate of cop'per, Ver'digris oint'ment.* (*Cu'pri subacet.* in pulv. subtiliss. ℥j; *Ung. simpl.* ℥xv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold. — Ph. U. S.) Detergent and escharotic.

Unguentum Sulphura'tum ad Sca'biem, *A'deps sulphurē et ammo'niæ muria'tē medica'tus.* (*Adipis*, 120 p.; *Sulph. lot.* 60 p.; *Ammoniæ muriat., Aluminæ sulphat.* āā 4 p.; fiat unguentum. — Ph. P.) Antipsoric.

Bail'ey's Itch Oint'ment is composed of *olive oil, lard, nitre, alum, sulphate of zinc*, and *cinnabar*; scented with *oil of aniseed, oil of origanum*, and *oil of spike*, and coloured with *alkanet root.*

Unguentum Sulphura'tum Alcali'num ad Sca'biem, *A'deps sulph'urē et carbona'tē potas'sæ medica'tus, Hel'merich's Al'caline Sulphura'ted Itch Oint'ment, Pommade antipsorique de Helmerich, Pommade de Helmerich.* (*Adip. præp.* 800 p.; *Sulphur. lot.* 200 p.; *Carbonat. potass. pur.* 100 p.; fiat ung.—Ph. P.) Use, same as the last.

Bate'man's Itch Oint'ment resembles this. It is coloured with *cinnabar*, and scented with *essence of bergamot.*

Unguentum Sul'phuris, *U. e sul'phurē, Sulphur oint'ment.* (*Sulph.* ℥i; *Adip.* ℥ij.—Ph. U. S.) In Ph. B. (1864) *sulphur*, ℥j; *lard*, ℥iv. Used chiefly in itch, and some herpetic affections.

Unguentum Sul'phuris Compos'itum, *U. Antipso'ricum, Com'pound Sul'phur Oint'ment, Itch Oint'ment, Jack'son's Itch Oint'ment*, (F.) *Pommade Antipsorique de Jasser.* (*Sulph. sublim.* ℔ss; *Veratri rad.* contus. ℥ij; *Potassæ nitrat.* ℥j; *Saponis mollis*, ℔ss; *Adipis*, ℔iss; *Ol. bergamot.* ♏xxx.—Ph. L.) The Unguen'tum Sul'phuris Compos'itum of the Pharm. U. S. is made as follows:—*Sulphur.* ℥j; *Hydrargyri ammoniat., Acid. benzoic.* āā ℥j; *Ol. bergamot., Acid. Sulphuric.* āā f℥j; *Potassæ nitrat.* ℥ij; *Adipis*, ℔ss. To the melted lard add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating.

Unguentum Sul'phuris Io'didi, *Oint'ment of Iodide of Sul'phur.* (*Sulphur. iodid.* ℥ss; *Adipis*, ℥j. Rub the iodide with a little of the lard; add

the remainder, and mix.—Ph. U. S.) An excellent application in chronic cutaneous affections.

UNGUENTUM SUSINUM, Crinomyron.

UNGUENTUM TABA'CI, *Tobac'co Oint'ment.* (*Tabac. recent.* concis. ℥j; *Adipis*, ℔j. Boil the tobacco in the lard, over a gentle fire, till it becomes friable; then strain through linen.—Ph. U. S. 1851.) In the Ph. U. S. 1863, it is directed to be made as follows, (*Tabac.* in pulv. ℥ss; *Adipis*, ℥viii; *Aq.* q. s. Moisten the tobacco with water, and, by percolation, pass water through it until four fluidounces are obtained. Evaporate to the consistence of a soft extract, and mix with the lard.) Applied to irritable ulcers, tinea capitis, &c.

UNGUENTUM TARTARI EMETICI, U. antimonii—u. Tartari stibiati, U. antimonii—u. e Tartaro potassæ stibiati, U. antimonii—u. Tartratis potassæ stibiati, U. antimonii.

UNGUENTUM TEREBIN'THINÆ, *Oint'ment of Tur'pentine.* (*Oil of Turpentine*, f℥j; *Resin*, in coarse powder, gr. lx; *Yellow wax*, ℥ss; *Prepared lard*, ℥ss. Melt together. Ph. B. 1864.) Uses, the same as *Ceratum Resinæ* or *Yellow Basilicon.*

UNGUENTUM DE TEREBINTHINÂ ET ADIPIBUS, U. elemi compositum—u. de Terebinthinâ et cerâ, U. de althæâ—u. Terebinthinæ et ovorum vitelli, U. digestivum simplex—u. Tetrapharmacum, Basilicon, U. resinæ nigræ—u. Tripharmacum, U. plumbi superacetatis—u. Tutiæ, U. oxidi zinci impuri.

UNGUENTUM VERA'TRI, *U. Vera'tri al'bi* (Ph. U. S.) seu *hellеb'ori al'bi, White hel'lebore oint'ment.* (*Veratr.* pulv. ℥ij; *Adipis*, ℥viij; *Olei limon.* ♏xx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the ED'INBURGH OINT'MENT are *white hellebore* and *muriate of ammonia.*

UNGUENTUM VERA'TRIÆ, *Oint'ment of Vera'tria*, (*Veratr.* gr. xx; *Adipis*, ℥j. Mix. Ph. U. S. 1863.) In the British Pharmacopœia (1864) it is directed to be made of *Veratria*, gr. viij; *Prepared lard*, ℥j; *Olive oil*, f℥ss; well mixed together. To be rubbed on the part in neuralgic and other pains.

UNGUENTUM AD VESICATA, U. lyttæ—u. ad Vesicatoria, Cerate of cantharides—u. Vesicatorium, Unguentum lyttæ—u. Viride, Unguentum subacetatis cupri.

UNGUENTUM ZIN'CI, *U. ox'idi zin'ci* seu *zin'ci ox'idi* (Ph. U. S.), *Zinc oint'ment.* (*Zinci oxid.* gr. lxxx; *Adipis*, ℥i.) Use, the same as that of the *Unguentum tutiæ.*

UNGUENTUM ZINCI OXIDI, U. zinci.

UNGUIS, 'a nail,' Hippocampus minor, Nail, Onyx, Pterygion—u. Avis, Hippocampus minor—u. Halleri, Hippocampus minor—u. Odoratus, Blatta Byzantia.

UN'GUIS OS, *Os lacryma'lē, Lach'rymal bone.* A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human *nail*, and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and inferior spongy bones, and is developed by a single *punctum ossificationis.*

UNGULA CABALLINA, 'horse's hoof,' Tussilago.

UNGULÆ PALPEBRARUM, 'hoofs of the eyelids,' see Tarsus.

UNHEALTHY, Sickly.

UNICORN ROOT, Chamælirium luteum.

UNILOC'ULAR, *Unilocula'ris*, (*unus*, 'one,' and *loculus*, (diminutive of *locus*,) 'a cell.') Having one cell or cavity; as *biloc'ular* means having two cells or cavities; *multiloc'ular*, having many.

UNIO, gen. *Unio'nis*, Pearl.

UNIOCULUS, (*unus*, 'one,' and *oculus*, 'eye,') Cyclops, Monoculus.

UNION BY THE FIRST AND SECOND INTENTIONS, see Intention.

UNIPARIENS, Uniparous.

UNIP'AROUS, *Unipa'rient, Unipa'riens*, (*unus*, 'one,' and *pario*, 'I bring forth.') Producing one at a birth.

UNIPOLAR, (*unus*, 'one,' and *polus*, 'pole,') see Neurine.

UNISE'MA DELTIFO'LIA, (*unus*, 'one,' and *semen*, 'seed' [?], *Pontede'ria corda'ta, Shovel Pick'erelweed, Pond Shovel, Shovelleaf, Water Plantain.* An indigenous plant, *Ord.* Pontederiaceæ, *Sex. Syst.* Hexandria Monogynia, which grows in water, and flowers from June to August. The root is emollient and astringent.

UNITAIRES (*MONSTRES*) (F.), (from *unitas*, 'oneness.') A class of monsters in which are found only the complete or incomplete elements of a single individual; in contradistinction to *Compound monsters*, (F.) *Monstres composés*, in which there are the complete or incomplete elements of more than one.

UNI'TING BAN'DAGE, (from *unire, unitum*, (*unus*, 'one,') 'to join into one,') (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement of such a bandage differs according as the wound is transverse or longitudinal.

UNIVOCAL GENERATION, (*unus*, 'one,' and *vox*, gen. *vocis*, 'voice,') see Generation.

UNOCULUS, (*unus*, 'one,' and *oculus*, 'eye,') *Borgne*, Cyclops, Monoculus.

UNORGANIZED, Inorganic.

UNSTRIPED MUSCULAR FIBRE, see Muscular fibre.

UNWELL, see Indisposition. 'To be unwell,'—and, in Scotland, 'to alter,'—is, popularly, to menstruate.

U'PAS. A word used in the Archipelagos of Moluccа and Sunda, and signifying *Veg''etable Poi'son*; *Ipo, Bo'hon, Po'hon*, or *Boa* or *Bo'on U'pas, Po'hon Antiar, Ants'jar.* A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antia'ris* seu *Ipo Toxica'ria, Toxicaria Macassarien'sis.* Another species of upas, *U. Tieuté, Tshettik* or *Tjettek*, is the produce of a *Strychnos, S. Ticuté. Upas antiar*, like corroval and vao, the South American arrow poisons, appears to kill by paralyzing the heart; whilst *U. tieuté* causes the most violent convulsions. Many idle stories are told regarding the upas tree, most of which are fabulous.

U'RACHUS, *U'racus, Urinac'ulum*, (*uron*, and *ἐχω*, 'to contain,') (F.) *Ouraque.* The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois.* According to Sabatier, this is the arrangement of the urachus in the human fœtus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeurosis.

URACRATIA, (*uron*, a priv., and *κρατος*, 'power,') Enuresis.

URACUS, Urachus.

URÆ'MIA, *Urhæ'mia*, (F.) *Urémie, Uroémie*, (*uron*, and *αἱμα*, 'blood.') A condition of the blood in which it contains, or is presumed to contain, urea, and to give rise to sundry morbid phenomena implicating the nervous centres more especially.

URÆ'MIC, *Uræ'micus*, (F.) *Urémique.* Relating or appertaining to uræmia.

URALI. Curare.

URANA, (from *uron*,) Ureter.

URANE, (*ουρανη*,) Urinal.

URANISCONI'TIS, (*uraniscus*, and *itis*,) *Palati'tis*, (F.) *Palatite*. Inflammation of the palate.

URANIS'COPLAS'TY, *Uraniscoplas'ticē*, (*uraniscus*, and *πλαστικος*, 'forming.' The operation of engrafting in case of deficiency of the soft palate.

URANISCORRHAPHIA, (*uraniscus*, and *ῥαφη*, 'a suture,') Staphylorraphy.

URANISCUS, (*ουρανισκος*, 'a round ceiling or canopy,') Palate.

URANOPLAS'TY. Staphyloplasty.

URANORRHAPHIA. Staphylorraphy.

URANUS, (*ουρανος*, 'heaven,') Palate.

URAPOSTE'MA, gen. *Uraposte'matis*, *Abscess'us urino'sus*, *Urœde'ma*, (*uron*, and *αποστημα*, 'an abscess.') A tumefaction produced by the escape of urine. An abscess containing urine.

URARI, Curare.

URAS, Urate.

U'RATE, *U'ras*, *Lith'ate*, *Li'thas*, (from *uron*.) A generic name for salts, formed by the combination of uric or lithic acid with different bases. *U'rate* or *Lith'ate of So'da*, for example, is found in arthritic and certain urinary concretions:—*U'rate* or *Lith'ate of Ammo'nia* in certain urinary deposits.

URE'A, or U'REA, *Ure'um*, *U'ren*, *Uren'ium*, *U'ricum*, *Mate'ria urino'sa*, *Princip'ium* seu *Sal urino'sum*, *Neph'rin*, (F.) *Urée*, (from *uron*.) A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv to ℈j. *Nitrate of urea* has been used in like cases, in doses of 2 to 10 grains in the day, in solution or in pill.

URE'AL or U'REAL, *Urea'lis*. Relating or appertaining to urea.

UREC'CHYSIS, *Urech'ysis*, (*uron*, and *εκχυσις*, 'effusion.') Effusion of urine into the areolar membrane.

UREDO, gen. *Ure'dinis*, (*urere*, 'to burn,') Urticaria.

URÉE, Urea.

UREMA, gen. *Ure'matis*, (*ουρημα*,) Urine.

URÉMIE, Uræmia.

URÉMIQUE, Uræmic.

UREN, Urea.

URENIUM, Urea.

URENS, (from *urere*, 'to burn,') Caustic.

UREORRHŒA, (*uron*, and *ῥεω*, 'to flow,') Diabetes.

URESIÆSTHESIS, (*uresis*, and *αισθησις*, 'feeling,') Diuresiæsthesis.

URESIS, (*ουρησις*,) Micturition.

URE'TER, (*ουρητηρ*.) *U'rana*, *Ve'na al'ba re'num*, *Cana'lis ner'veus fistulo'sus re'num*, *Duc'tus* seu *Duc'tor Uri'næ*, *Vas urina'rium*, (F.) *Urétère*. A long, excretory canal—membranous and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas-fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vésical*. The ureter is formed of an exterior, white, opake, and fibrous membrane; and of an inner, which is mucous.

URETERAL'GIA, (*ureter*, and *αλγος*, 'pain.') Pain in the course of the ureter, — as from calculus. *Ureteral'gia calculo'sa*.

URETERALGIA CALCULOSA, see Ureteralgia — u. Inflammatoria, Ureteritis.

URÉTÈRE, Ureter.

URETER'ICUS, (from *ureter*.) An epithet for ischury, &c., arising from an affection of the ureter.

URETERI'TIS, *Ureteral'gia inflammato'ria*, *Ureterophlegma'sia*, (*ureter*, and *itis*.) Inflammation of the ureter: generally caused by calculus.

URETEROLITH'ICUS. (*ureter*, and *λιθος*, 'a stone.') An epithet applied to ischury or other affection caused by a stone in the ureter.

URETEROL'ITHUS. Calculus in the ureter.

URETEROPHLEGMASIA, (*ureter* and *phlegmasia*, 'inflammation,') Ureteritis.

URETEROPHLEGMAT'ICUS, (*ureter*, and *φλεγμα*, 'phlegm or mucus.') Any affection caused by mucus accumulated in the ureter.

URETEROPY'ICUS, (*ureter*, and *πυον*, 'pus.') An epithet applied to affections caused by the presence of pus in the ureter.

URETERORRHAG''IA, (*ureter*, and *ῥαγη*, 'rupture.') Hemorrhage from the ureter.

URETEROSTOMAT'ICUS, (*ureter*, and *στομα*, 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETEROTHROMBOÏ'DES, (*ureter*, *θρομβος*, 'grumous blood,' and *ειδος*, 'resemblance.') Ischury from grumous blood in the ureter.

URE'THRA, (*ουρηθρα*, from *ουρεω*, 'to pass the urine.') *Cana'lis* seu *Mea'tus* seu *Duc'tus urina'rius*, *U'rias*, *Ure'tra*, *Fis'tula urina'ria*, *I'ter urina'rium* seu *Uri'næ*; (F.) *Urèthre*, *Urètre*. The excretory ducts for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder, *os'tium vesica'lē*, to the extremity of the penis, in which its external aperture, *os'tium cuta'neum*, is situate. In the male urethra, three portions are distinguished:—1. A *prostat'ic por'tion*, near the bladder, about an inch and a quarter in length, which traverses the prostate gland: 2. A *mem'branous por'tion*, *Isth'mus ure'thræ*, *Pars ure'thræ membrana'cea*, from 8 to 10 lines long, which is separated from the rectum by the areolar tissue only:—3. A *spon'gy por'tion*, which expands, anteriorly, to form the glands, and which commences at the *bulb of the urethra*. Before opening externally the canal has a dilatation, called the *Fos'sa* seu *Fo'vea* seu *Fossic'ula navicula'ris* seu *Morgagni'i*. On the interior of the urethra two white lines are perceptible — the one above, the other below. The latter commences at the *verumontanum*; and at the surface of this, the *ejaculatory ducts*, and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Lacu'næ* or *Si'nuses of Morgagni*, (F.) *Lacunes de Morgagni*, proceeding from or constituting the *Glands of Morgagni* or of *Littre*, (F.) *Glandes de Morgagni ou de Littre*, *Glandulæ Littria'næ*. At about an inch and a half from the opening of the meatus, one of these lacunæ is generally found, much larger than the rest, and is named *Lacu'na Mag'na*. The arteries of the urethra are numerous, and proceed from the internal pudic, — the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female*, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *mea'tus urina'rius*, *os'tium vagina'lē ure'thræ*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, BLIND DUCTS OF THE, see Cæcus—u. Mucous lacunæ of the, see Cæcus.

URE'THRAL or U'RETHRAL, *Urethra'lis, Ure'thricus.* Relating to the urethra.

URETHRAL'GIA, (*urethra,* and *ἀλγος,* 'pain.') Pain in the urethra. Gonorrhœa.

URÈTHRE, Urethra.

URETHREMPHRAXIS, Urethrophraxis.

URETHRITIS, (*urethra,* and *itis.*) Inflammation of the urethra. Gonorrhœa.

URETHROBLENNORRHŒA, (*urethra, βλεννα,* 'mucus,' and *ῥεω,* 'I flow.') Gonorrhœa; gleet.

URETHROCYSTAUCHENOTOMIA, (*urethra, cystauchen,* 'neck of the bladder,' and *τεμνειν,* 'to cut,') see Lithotomy.

URETHROCYSTEOANEURYSMATOTOMIA, (*urethra, κυστις,* 'the bladder,' *ανευρυσμα,* 'dilatation,' and *τεμνειν,* 'to cut,') see Lithotomy.

URETHROCYSTEOTRACHELOTOMIA, (*urethra, κυστις,* 'the bladder,' *τραχηλος,* 'neck,' and *τεμνειν,* 'to cut,') see Lithotomy.

URETHROHÆMORRHAGIA, (*urethra, ἁιμα,* 'blood,' and *ῥηγνυμι,* 'to break forth,') Urethrorrhagia.

URETHROPHRAX'IS, *Urethremphrax'is* (*urethra,* and *φρασσω;* 'I obstruct.') Obstruction of the urethra.

URETHROPLAS'TIC, *Urethroplas'ticus,* (*urethra,* and *πλασσω,* 'I form.') An epithet given to the operation, *U'rethroplasty,* which supplies defects in the canal of the urethra through which the urine escapes.

URETHRORAPHY, Urethrorrhaphy.

URETHRORRHA'GIA, *Urethrohæmorrha'gia, Caulorrha'gia* seu *Hæmatu'ria stillatit'ia,* (*urethra,* and *ῥηγνυμι,* 'I break out.') Hemorrhage from the urethra.

URETHROR'RHAPHY, *Urethrorraph'ia, Urethro'raphy,* (*urethra,* and *ῥαφη,* 'a suture.') 'suture of the urethra.' The operation of closing a urethral fistula by suture.

URETHRORRHŒ'A, (*urethra,* and *ῥεω,* 'I flow.') A discharge of any kind from the urethra.

URE'THROSCOPE, *Urethroscop'ium,* (*urethra,* and *σκοπεω,* 'I examine.') An instrument on the principle of the ophthalmoscope, laryngoscope, &c., for inspecting the interior of the urethra.

URETHROSTENO'SIS, *Strictu'ra, ure'thræ, Urosteno'sis, Urethrosten'ia,* (F.) *Uréthrosténie, Rétrécissement de l'Urèthre,* (*urethra,* and *στενωσις,* 'narrowness.') Stricture of the urethra.

URE'THROTOME, *Urethrot'omus,* (F.) *Uréthrotome,* (*urethra,* and *τεμνω,* 'I cut.') An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHROT'OMY, *Urethrotom'ia, Stricturot'omy.* An operation, which consists in opening the urethra with the *Urethrotome,* for the removal of stricture. See *Boutonnière.*

URETHRYMENO'DES, (*urethra, ὑμην,* 'a membrane,' and *odes.*) That which is caused by a membrane formed in the urethra.

URETICUS, (*ουρητικος,*) Diuretic, Urinary.

URETRA, Urethra.

URÈTRE, Urethra.

URETRIS, (*ουρητρις,*) Urinal.

UREUM, Urea.

URGINEA SCILLA, Scilla.

URHÆMIA, Uræmia.

URIAGE, MIN'ERAL WA'TERS OF. Simple sulphurous springs in the department of Isère, France, which are visited from the 15th of May to the 15th of September.

URIAS, gen. *Uri'odis,* (from *uron,*) Fistula (urinary), Urethra.

URIASIS, (from *uron,*) Lithia, Uresis.

U'RIC ACID, *Ac'idum u'ricum* seu *urolith'icum* seu *lith'icum, Lith'ic, Uryl'ic, Cal'culous, Bezoär'dic, Lithia'sic* or *Lithen'ic Acid,* (F.) *Acide urique* ou *lithique* ou *lithénique* ou *lithiasique* ou *de l'urine.* An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is very sparingly soluble, and often deposited in combination from the urine in health. See Calculi, urinary.

U'RIC OX'IDE, *Ox'idum u'ricum, Xan'thic ox'ide, Xan'thine, U'rous ac'id.* A substance not discovered in healthy urine, although probably bearing some relation to the yellow colouring matter. It is a very rare ingredient of calculous concretions, and little is known either of its chemical or pathological history.

URICUM, Urea.

URICUS, (from *uron,*) Urinary.

URIDRO'SIS, (*uron,* and *ἱδρως,* 'sweat.') Urinous sweating: (F.) *Sueur urineuse.*

URINA, Urine—u. Cerebella, see Cerebella—u. Chyli, see Urine—u. Cibi, see Urine—u. Diabetica, Urine, diabetic—u. Febrilis, Urine, febrile—u. Furfuracea, see Furfuraceous—u. Galactodes, see Galactodes—u. Genitalis, Sperm—u. Jumentosa seu Jumentaria, Urine, jumentous—u. Mucosa, Cystirrhœa—u. Nephelodes, see Nepheloid—u. Oroboides seu Orobodes, see Oroboides—u. Pericardii, see Pericardium—u. Potûs, see Urine—u. Sanguinis, see Urine—u. Vaccæ, Urine, cows'.

URINACULUM, Urachus, Urinal.

URINÆ PROFLUVIUM, 'a flux of urine,' Diabetes—u. Stillicidium, Strangury—u. Substillum, Strangury—u. Suppressio, Ischuria.

URINAIRE, Urinary.

U'RINAL, *Urinato'rium, Chernib'ium, U'ranē, Ure'tris, Urinac'ulum, Urodochi'um, Urod'ochē, Urodoche'um, Matra'cium, Mat'ula, Matel'la,* (from *urina.*) A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINALIS, Diuretic, Urinary.

URINARIA, Antirhinum linaria, Leontodon taraxacum.

U'RINARY, *Urina'rius, Urina'lis, Urino'sus, U'ricus, Uret'icus,* (F.) *Urinaire,* (from *urina.*) That which relates to the urine.

URINARY APPARATUS, Urinary organs.

URINARY BLAD'DER. The *Blad'der, Vesi'ca Urina'ria, Cys'tis, Urocys'tis,* (F.) *Vessie.* A musculomembranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man; and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *u'rachus.* Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond.* The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibrocellular expansion called the *anterior ligament.* The *poste'rior lig'aments* or *rec'tovesi'cal folds—pli'cæ semiluna'res*—are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peritoneum; —of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface by a mucous membrane, which is sometimes raised up, here and there, in long promi-

nences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term—*vessie à colonnes*. In the *bas fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is called, by the French, the *Trigone vésical* or *Ves'ical tri'angle, Trigo'nus* seu *Trigo'num vesi'cæ* seu *Lieutaud'i, Cor'pus trigo'num*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Ves'ical u'vula, U'vula vesi'cæ*, (F.) *Luette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexus; and its lymphatic vessels pass into the hypogastric ganglia.

URINARY CAL'CULI. The calculi which form in the urinary passages. See Calculi, urinary.

URINARY OR'GANS, *Urinary appara'tus, Or'gana uropoët'ica, Appara'tus uropoët'icus*. The organs concerned in the formation of urine—the kidneys. The common acceptation includes, also, the urinary passages.

URINARY PAS'SAGES, (F.) *Voies urinaires*. The aggregate of canals and cavities intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

URINA'TION, (from *urina*,) Micturition. M. Béraud elaborately defines it after Ch. Robin,—a function, the result of which is the expulsion of matters principally solid, but held in solution, which have become improper for nutrition.

URINATORIUM, (from *urina*,) Urinal.

UR'INE, *Uri'na*, (*ουρον*,) *U'rum, Ure'ma, Lo'tium, Lot, La'pis au'reus, Omich'ma, Recremen'tum* seu *Retrimen'ta vesi'cæ, A'qua pe'dum, A'qua, Water*, (Old Eng.) *Stale, Lee, Chamber-lie*, (Prov.) *Herrin, Netting, Saag*. An excrementitial fluid; secreted by the cortical part of the kidney; filtered through the tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour; of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *Uri'na po'tûs*, (F.) *Urine de la Boisson* ou *des Boissons, U'rine of drink*:—the latter *Uri'na sanguinis*, (F.) *Urine de la digestion, Urine de la coction, Urine cuite* ou *du Chyle, Coc'ted u'rine, U'rine of diges'tion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognised: *First*, That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity—1.003 to 1.009—*Urina po'tûs*. *Secondly*. That secreted after the digestion of a full meal; s. g. 1.020 to 1.028, or even 1.030—*Urina chy'li* seu *ci'bi*. *Thirdly*. That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1.015 to 1.025, and presents the essential characters of urine—*Uri'na sanguinis*.

The following are the ordinary constituents of healthy human urine:—urea, uric acid, [hippuric acid;] extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown colouring matter of the urine, (hæmaphæin;) red colouring matter of the urine, (uroërythrin;) carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 30 to 70 and upwards. The following table expresses the relative amounts of the different components in every 100 parts of the solid matter, according to the analysis of different observers:

	Berzelius.	Lehmann.	Simon.	Marchand.
Urea,	45.10	49.68	33.80	48.91
Uric Acid,	1.50	1.61	1.40	1.59
Extractive matter, Ammonia Salts, and Chloride of Sodium.	36.30	28.95	42.60	32.49
Alkaline Sulphates,	10.30	11.58	8.14	10.18
Alkaline Phosphates,	6.88	5.96	6.50	4.57
Phosphates of lime and magnesia.	1.50	1.97	1.59	1.81

Its average specific gravity is about 1.015. The quantity passed by the adult in the 24 hours varies. On the average, it may amount to two pounds and a half.

Dr. Golding Bird obtained the following results on examining 1000 parts of urine passed in health after 10 hours' fasting; and after dinner in the evening.

	Urina sanguinis.	Urina cibi
Specific gravity	1.016	1.030
Water,	962.72	930.10
Solids,	37.28	69.90
Urea,	14.30	24.40
Uric acid,	0.23	1.33
Fixed salts, chiefly chlorides, sulphates, and phosphates.	5.10	9.90
Organic matter, creatin, creatinin, colouring matter, and volatile salts.	17.80	34.27

The urine, when first passed, is generally acid, and this has been ascribed to uric acid, hippuric acid or lactic acid. It is, doubtless, however, owing to the phosphatic supersalts, and especially perhaps to the superphosphate or biphosphate of soda.

Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydru'ria*, (*ὑδωρ*, 'water;') by a deficiency of urea, *Anazotu'ria*, (*αν*, privative, and *azote*;) by a superabundance of urea, *Azotu'ria*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithu'ria*; and that in which the deposit consists of the earthy and earthy alkaline phosphates, *Phosphu'ria, Ceramu'ria*, (*κεραμος*, 'potters' earth,') &c. &c. At times, a *pellicle* forms on the surface (*Cre'mor uri'næ*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubec'ula, Nubes*,) towards its upper part, which is called *Enæore'ma* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypos'tasis, Sedimen'tum*, &c., have been given. (See these various words.) The urine is deserving of attention in disease; but it has often been considered a matter of more importance than it merits. Some empiries have presumed to pronounce on the nature of disease by simply inspecting it. See Uroscopy.

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cows' urine, *Uri'na vac'cæ*,

All flower wa'ter, was once used, warm from the cow, as a purge, in the dose of Oss.

Urine has been variously designated by pathologists, according to its appearance, &c.;—for example:—

Urine, Anæ'mic, *Uri'na anæ'mica*. A term used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.

URINE ARDENTE, Ardent urine—u. Bloody, Hæmaturia—*u. de la Boisson*, Urine, hysterical, see Urine—*u. Briqueté*, see Lateritious—*u. de la Coction*, see Urine.

Urine, Crude, (F.) *Urine crue*. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposit.

URINE CRUE, Urine, crude—*u. Cuite*, see Urine.

Urine, Cystin'ic, *Cystinu'ria*. Urine containing cystine or cystic oxide in solution, or as a deposit.

Urine, Diabe'tic, *Uri'na diabe'tica*. Urine passed in *Diabe'tes melli'tus*, *Melitu'ria*, *Saccharine urine*. It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

URINE DE LA DIGESTION, see Urine.

Urine, Drop'sical, is an ammoniacal urine, often containing much albumen and scarcely any urea.

Urine, Dyspep'tic, has been found to precipitate tannin abundantly, and to putrefy soon.

URINE ÉPAISSE, Urine, mucilaginous.

Urine, Fe'brile, *Uri'na febri'lis*. Urine discharged in inflammation and inflammatory fever.

Urine, Filamentous, see Filamentous.

Urine, Floc'culent, (F.) *Urine floconneuse*, is when it is troubled by flocculi suspended in it.

URINE FLOCONNEUSE, Urine, flocculent—*u. des Goutteux*, Urine, gouty—u. Furfuraceous, see Furfuraceous.

Urine, Gout'y, (F.) *Urine des Goutteux*, contains much phosphate of lime, and after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

URINE HUILEUSE, Urine, oily.

Urine, Hyster'ical, is clear, colourless, and similar to the *Urine de la Boisson*.

Urine, Icter'ical, contains bile.

Urine, Incontinence of, Enuresis.

Urine of Inflam'matory Diseases. This is, generally, small in quantity, and very high-coloured.

Urine, Involuntary Discharge of, Enuresis.

Urine, Jumen'tous, *Uri'na jumento'sa* seu *jumenta'ria*, (F.) *Urine Jumenteuse*. A term sometimes used for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

URINE LACTESCENTE, U. milky—*u. Laiteuse*, Urine, milky.

Urine, Mil'ky, (F.) *Urine lactescente* ou *laiteuse*. White and troubled urine.

Urine, Mucilag''inous, (F.) *Urine épaisse*. Urine containing much mucus.

Urine, Ner'vous. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

Urine of Ner'vous Fe'vers is generally very thin; and often deposits a mixture of uric and rosacic acids.

Urine, Oil'y, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

Urine, Oxal'ic, *Oxalu'ria*. Urine containing a salt of the oxalic acid.

Urine, Phosphores'cent, *Phosphoru'ria*, *Phosphuria*. Urine which is luminous or phosphorescent.

Urine, Purpuric, see Porphyruria.

Urine, Rick'ety, contains much phosphate of lime.

Urine, Saccharine, Urine, diabetic—u. Sandy, Arenosa urina—u. Stoppage of, Ischuria—*u. Ténue*, Urine, thin.

Urine, Thin, (F.) *Urine ténue*. Urine that is transparent, slightly coloured, and but little dense.

URINEUX, Urinous.

URINIF'EROUS, *Urinifer*, (F.) *Urinifère*, (from *urina*, and *fero*, 'I carry.') That which carries urine.

Uriniferous Substance of the Kidney, see kidney.

Uriniferous Tubes or Ducts of Belli'ni, *Tu'buli* seu *duc'tus urinif'eri Belli'ni*, *vel Bellinia'ni*, *Tu'buli Belli'ni* seu *rec'ti*, *Bellinia'ni Duc'tus*, *Bellinia'næ Fis'tulæ*. The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ. The tortuous uriniferous ducts are called *Tubes of Ferrein*, *Tu'buli contor'ti* seu *Ferrein'i*.

URINIP'AROUS, (F.) *Urinipare*, (ουρον, and *parere*, 'to produce.') An epithet for tubes in the cortical portion of the kidney, which prepare the urine.

URINODES, (from *urina*, and *odes*.) Urinous.

URINOM'ETER, (from *urina*, and μετρον, 'measure.') A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity: thus, supposing the number cut by the surface of the liquid to be 30, it would indicate a s. g. of 1.030. The letters H. S. on the back of the scale mean "healthy standard," which ranges from 10° to 20°.

U'RINOUS, *Urino'sus*, *Urino'des*, (F.) *Urineux*, (from *urina*.) Having the character of urine. Similar to urine.

URINOVAGINAL, Vesicovaginal.

UROCE'LE, *Œde'ma scro'ti urino'sum*, *Uroscheoce'lē*, *Oscheoce'lē urina'lis*, (*uron*, und κηλη, 'a rupture.') A tumour of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

UROCHES'IA, *Urochez'ia*, (*uron*, and χεζειν, 'to go to stool.') A discharge of urine by the bowels.

UROCRIS'IA, (*uron*, and κρινω, 'I judge.') *Urocrite'rion*. A judgment formed either of the urine, or of disease after inspecting the urine. Also, the crisis of a disease by uresis. *Urocriterion* is the symptom by which such judgment is formed.

UROCRITERION, (*uron*, and κριτηριον, 'criterion,') see Urocrisia.

UROCYSTIS, (*uron*, and κυστις, 'a bladder,') Urinary bladder.

UROCYSTITIS, (*urocystis*, and *itis*,) Cystitis.

UROCYSTOCATARRHUS, Cystirrhœa.

URODIAL'YSIS, (*uron*, and διαλυσις, 'dissolution, loss of strength.') A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodial'ysis Neonato'rum*; in the aged, *Urodial'ysis Se'num*.

URODÒCHIUM, (ουροδοχιον, ουροδοχειον, from *urine*, and δεχομαι, 'to receive,') Urinal.

URODYN'IA, (*uron*, and οδυνη, 'pain.') Pain during the excretion of the urine.

URŒDEMA, gen. *Urœde'matis*, (*uron*, and *οἴδημα*, 'a swelling,') Uraposteina.

UROÉMIE, Uræmia.

UROËRYTHRIN, (*uron*, and *ἐρυθρος*, 'red,') see Porphyruria.

UROGEN'ITAL, *Urogenita'lis*, *Gen'itoü'rinary*, *Gen'itoürina'rius*. Relating or appertaining to the urinary and genital apparatus—as the 'urogenital organs,' *Or'gana urogenita'lia*.

UROGEN'ITAL SI'NUS, *Sinus urogenita'lis*. A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the efferent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urina'ria* and a *pars genita'lis*. The former, extending towards the urachus, is converted into the urinary bladder; whilst from the latter are formed the *vesiculæ seminales* in the male, and the middle portion of the uterus in the female.

UROGLAUCIN, (*uron*, and *γλαυκος*, 'blue,') see Uroxanthin.

UROHÆMATIN, Hæmaphæin.

UROLITHI, (*uron*, and *λιθος*, 'a stone,') Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG''IA, (*uron*, *λιθος*, 'a stone,' and *λογος*, 'a description.') A description of, or treatise on, ordinary calculi.

UROLITHOTOMIA, Lithotomy.

UROLOGY, Uronology.

U'ROMANCY, *Uromanti'a*, (from *uron*, and *μαντεια*, 'divination.') The art of divining diseases by simple inspection of the urine; *Uroscop'ia*, *U'roscopy*, *Ouroscop'ia*, *Ou'roscopy*. One professing to be able to do this is called *Uroman'tes*. Vulgarly, a *water-doctor*, *water-caster*.

UROM'ELES, (F.) *Uromèle*, (*ουρα*, 'a tail,' and *μελος*, 'a limb.') A genus of monsters in which the two lower limbs are united, very incomplete, and terminated by a single foot, which is almost always imperfect, and the sole of which is turned forwards.

UROMPH'ALUS, (*uron*, and *ομφαλος*, 'navel,') *Her'nia U'rachi*. A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

URON, (*ουρον*,) Urine.

URON'CUS, (*uron*, and *ογκος*, 'a swelling.') A urinary swelling.

URONOL'OGY, *Uronolog''ia*, *Ourolog''ia*, *Ourol'ogy*, *Urol'ogy*, *Urolog''ia*, (*uron*, and *λογος*, 'a discourse.') The part of medicine which treats of the urine.

UROPHTHISIS, (*uron*, and *phthisis*,) Diabetes mellitus.

UROPLA'NIA, (*uron*, and *πλανη*, 'wandering.') The presence of urine in other parts than the urinary organs.

UROPOE'SIS, *Uropoë'sis*, (*uron*, and *ποιεω*, 'I make.') *Secre'tio uri'næ* seu *lo'tii*. The secretion of urine by the kidney.

UROPOËT'IC, *Uropoët'icus*,, (F.) *Uropoétique*. Concerning or favouring the production of urine.

UROPOIESIS, Uropoesis.

UROPYGION, (*ουρα*, 'tail,' and *πυγη*, 'rump,') Coccyx.

UROPYGIUM, *Croupion*.

URORRHAGIA, (*uron*, and *ῥαγη*, 'a breaking forth,') Diabetes.

URORRHODIN, (*uron*, and *ῥοδον*, 'a rose,') see Porphyruria.

URORRHŒA, (*uron*, and *ῥεω*, 'to flow,') Eneuresis. Diabetes.

UROSACIN, (*uron*, and *rosa*,) see Porphyruria.

UROSCHEOCELE, (*uron*, *οσχεον*, 'scrotum,' and *κηλη*, 'rupture,') Urocele.

UROSCOPY and UROSCOPIA, (*uron*, and *σκοπεω*, 'I examine,') see Uromantia.

URO'SES, (from *uron*, and *osis*.) Diseases of the urinary organs.

UROS'TEALITH, *Urosteal'ithus*, (*uron*, *στεαρ*, 'suet,' and *λιθος*, 'stone.') A peculiar fatty ingredient of urinary calculi, discovered by Heller.

UROSTENOSIS, Urethrostenosis.

UROUS ACID, Uric oxide.

UROXAN'THIN, *Uroxan'thine*, (*uron*, and *ξανθος*, 'yellow.') A yellow colouring matter found in the urine by Heller, which is decomposable into a red colouring matter, *ur'rhodine*, and a blue, *uroglauc'in*,—the former having the same composition as *indigo red*; the latter as *indigo blue*.

UROZEMIA (*uron*, and *ζημια*, 'loss,') Diabetes —u. Albuminosa, Kidney, Bright's disease of the —u. Mellita, Diabetes mellitus.

URRHODIN, (*uron*, and *ῥοδον*, 'rose,') see Porphyruria.

URROSACIN, (*uron*, and *rosa*, 'rose,') see Porphyruria.

URTI'CA, (from *urere*, 'to burn,') *U. Dioic'a* seu *ma'jor* seu *his'pida*, *Cni'dē*, *Pyr'ethrum*, *Ad'icē*, *Com'mon sting'ing net'tle*, (Prov.) *Et'tle*, (F.) *Ortie*. *Ord.* Urticaceæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and anticorbutic properties. The pain produced by its sting is well known, but it is not to be compared to the torture occasioned by *Urti'ca stimu'lans*, and *U. crenula'ta* of India; and, still less, to *Urti'ca urentissi'ma* of Timor, which is called by the natives *Daoun Setan*, '*Devil's leaf*,' on account of the persistence and severity of the pain.

URTICA BALEARICA, U. pilulifera — u. Crenulata, see Urtica — u. Dioica, Urtica — u. Hispida, Urtica—u. Iners magna fœtidissima, Galeop-is— u. Major, U. dioica—u. Minor, U. urens—u. Mortua, Lamium album.

URTICA PILULIF'ERA, *U. Pilulo'sa* seu *Roma'na* seu *Balea'rica*, *Pillbearing Net'tle*, (F.) *Ortie Romaine*. The seed was formerly given in diseases of the chest.

URTICA PILULOSA, U. pilulifera — u. Romana, U. pilulifera—u. Stimulans, see Urtica.

URTICA U'RENS, *U. mi'nor*, *Dwarf net'tle*, (F.) *Ortie brulante*. A lesser variety of the nettle, possessing similar virtues.

URTICA URENTISSIMA, see Urtica.

Nettles have been used as stimulants to paralytic limbs.

URTICAIRE, Urticaria.

URTICA'RIA, *Enanthe'sis urtica'ria*, *Ure'do*, *Scarlati'na* seu *Fe'bris* seu *Pur'pura urtica'ta*, *Cnido'sis*, *Urtica'ria porcel'lana*, *Exanthe'ma urtica'tum*, *Epinyc'tis prurigino'sa*, *Fe'bris ru'bra prurigino'sa*, *Sal'tans ro'sa*, (F.) *Urticaire*, *Fièvre Ortie*, *Porcelaine*, *Nettlerash*, (Prov.) *Nettlespringe*; vulgarly *Hives*, *Bold Hives*; (from *urtica*, because the eruption resembles that produced by the stings of a nettle.) A disease distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettlerash is induced by shellfish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint:— *Urtica'ria febri'lis*, *U. evan'ida*, *U.*

per'stans, *U. confer'ta*, *U. subcuta'nea*, and *U. tubero'sa*.

URTICARIA PORCELLANA, Essera, Urticaria.

URTICA'TIO, *Cnido'sis*, *Urtica'tion*, (from *urtica*.) A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, Terra Orleana.

URYLIC ACID, Uric acid.

USNEA CRANII HUMANI, Lichen saxatilis — u. Florida hirta, Lichen plicatus — u. Hirta, Lichen plicatus—u. Plicata, Lichen plicatus.

USSACU, Hura Brasiliensis.

USQUEBAUGH, Whisky, see Spirit.

USTILAGO, (same etymon as *ustio*,) Ergot.

USTILAG''INOUS, *Ustilagin'ea*, (F.) *Ustilagineux*. Relating or belonging to ergot, as Gangræna ustilaginea; see Ergotism.

USTIO, (*urere*, *ustum*, 'to burn,') Burn, Ustion.

US'TION, *Us'tio*, *Caus'is*. The act of burning or of applying the actual cautery. Also, the effect of cauterization; a burn.

USTULA'TIO, *Ustula'tion*, (dim. of *ustio*.) A pharmaceutical operation by which a substance is dried by heat. It is often restricted to the roasting of ores to drive off the volatile matters, as in the case of arsenic.

USUALIA, (pl. of *usualis*, 'usual, ordinary,' from *usus*, 'use,') Officinals.

USURE DES DENTS, ('wearing out of the teeth' from use,) Odontotripsis.

USUS, 'use,' Habit.

UTER, gen. *U'tris*, 'a leather bottle,' Uterus.

UTERAL'GIA, A hybrid word, (from *uterus*, and *ἀλγος*, 'pain,') Metralgia.

UTERI ADSCENSUS, Hysteria — u. Anteversio, Hysteroloxia anterior—u. Carcinoma, Metrocarcinoma—u. Convulsivus morbus, Lorind matricis—u. Coryza, Leucorrhœa — u. Exulceratio, Hysterelcosis—u. Flexio, Hysteroloxia—u. Inclinatio, Hysteroloxia—u. Obliquitas, Hysteroloxia —u. Pronatio, Hysteroloxia anterior — u. Pruritus, Nymphomania—u. Reflexio completa, Hysteroloxia posterior—u. Retroversio, Hysteroloxia posterior — u. Rheuma, Leucorrhœa — u. Ulcus, Hysterelcosis — u. Versio incompleta, Hysteroloxia.

U'TERINE, *Uteri'nus*, (F.) *Utérin*, (from *uterus*.) That which belongs or relates to the womb.

UTERINE AN'TERY, *Arte'ria uteri'na hypogas'trica*. Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE BOUGIE, Sound, uterine.

UTERINE BROTH'ER, *Uteri'nus fra'ter*. One born of the same mother, but of a different father.

UTERINE ELEVATOR, see Pessary, intrauterine —u. Glands, Utricular glands—u. Murmur, *Bruit placentaire*.

UTERINE MUS'CLE OF RUYSCH consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERINE RUSH, *Bruit placentaire* — u. Sound, Sound, uterine.

UTERINUS FRATER, Uterine brother.

UTEROÄBDOMINAL SUPPORTER. See Belt, Russian.

UTEROGESTATION, (*uterus*, and *gestare*, 'to carry,') Pregnancy.

UTEROMANIA, Nymphomania.

UTEROÖVARIAN ARTERY, see Spermatic artery.

U'TERUS, (*ὑστερα*,) *U'ter*, *Utric'ulus*, *Vul'va*, *Lo'ci*, *L. muli'ebres*, *Ven'ter*, *Vis'cera*, *Conceptac'ulum*, *Ma'trix*, *Ar'vum* seu *A'ger natu'ræ*, *Hys'tera*, *Me'tra*, *Eugi'um*, *Engi'on*, *An'gus*, *Del'phys*, *Al'vus*, *Epompha'lion*, *Gas'ter*, *Ma'ter*, *Me'ter*, *Ne'dys*, the *Womb*, (Sc. and Prov.) *Wayme*, *Wame*, *Weam*, *Wem*, (F.) *Matrice*, *Sein*. The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cer'vix* or *neck*, to distinguish it from the rest of the organ, called the *bod'y*. From its *fun'dus* or upper portion, the Fallopian tubes pass off. The mouth is called *Os u'teri*, *Os tin'cæ*, *Os u'teri extern'um*, *Orific''ium vagina'lē*. At the point where the body of the uterus is continuous, below, with the neck, the cavity is slightly constricted, forming what is sometimes named the *inter'nal or'ifice*, *Os u'teri intern'um*, *Os intern'um*, *Isth'mus* seu *os'tium u'teri*, *Orific''ium uteri'num*. Between these is the *Canal'is cervi'cis*.

The cavity of the uterus is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. These folds of the peritoneum are sometimes called, respectively, the *anterior*, and the *posterior*, ligaments. The former are also named the *vesico-uterine*, and the latter the *recto-uterine* folds or *pli'cæ semilu'næ*, (F.) *Plis de Douglas*, — the *pouch*, thus formed, being termed *Douglas's cul-de-sac*. It forms, also, the *broad lig'aments of the u'terus*, *Ligamen'ta la'ta*, *A'læ vespertilio'nis*, *Re'tia U'teri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *Uterine Si'nuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, Abdomen — u. Anteversion of the, Hysteroloxia anterior.

UTERUS BIF'IDUS, 'a bifid uterus.' A double uterus. One separated into two cavities.

Uterus Duplex, 'a double uterus,' Dihysteria—u. Hourglass contraction of the, *Chaton*—u. Inclinatus, Hysteroloxia.

Uterus, Inver'sion of the, *Inver'sio U'teri, Metrunas'trophē, Ædopto'sis U'teri inver'sa*, (F.) *Inversion* ou *Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

Uterus, Ir'ritable, *Neural'gia of the U'terus*. A disease characterized by deepseated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure, *Metrypercesthe'sis;* and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See Hysteralgia.

Uterus Masculinus, see Ejaculatory ducts—u. Obliquus, Hysteroloxia—u. Retroversion of the, Hysteroloxia posterior.

Uterus, Rup'ture of the, *Metrorrhex'is, Hysterorrhex'is, Ruptu'ra* seu *Perfora'tio U'teri, Lacera'tion of the Womb*, (F.) *Rupture* ou *Déchirure de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE, *Utriculus*, (dim. of *uter*, gen. *utris*,) 'a small bag or bottle,') see Ejaculatory ducts, Semicircular canals, Uterus.

U'tricle, Primor'dial, *Utric'ulus primordia'lis*. A delicate membrane, of protein composition, which lines the cell wall of vegetable structures, and from the exterior of which the layer of cellulose is secreted.

UTRIC'ULAR, *Utricula'ris*. Relating to or resembling a small bag or bottle.

Utricular Glands, *Glan'dulæ utricula'res* seu *uteri'næ*. The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

UTRICULUS, Utricle, see Ejaculatory ducts, Semicircular canals, Uterus—u. Communis, see Semicircular canals—u. Lacteus, Receptaculum chyli—u. Primordialis, Utricle, primordial—u. Prostaticus, see Ejaculatory ducts.

UVA, 'a grape, or a bunch of grapes,' Uvula, see Vitis vinifera—u. Inversa, Paris—u. Lupina, Paris—u. Passa, see Vitis vinifera—u. Ursi, see Arbutus uva ursi—u. Vulpina, Paris.

Uvæ Corinthiacæ, see Vitis Corinthiaca.

Uvæ Pas'sæ, 'Dried Grapes,' *Rha'ges, Raisins*, see Vitis vinifera.

Uvæ Passæ Majores, see Vitis vinifera—u. Passæ minores, see Vitis Corinthiaca—u. Passæ sole siccatæ, see Vitis vinifera.

UVARIA TRILOBA, (from *uva*, 'a grape,') see Carica papaya.

UVATIO, (from *uva*, 'a grape,') Ceratocele, Staphyloma.

U'VEA, (from *uva*, 'a grape,') *Tu'nica acino'sa* seu *acinifor'mis* seu *uva'lis* seu *acinu'lis* seu *uvifor'mis* seu *rhagoï'des* seu *u'vea* seu *perfora'ta, Membra'na u'vea, Rhagoï'des, Rhox*, (F.) *Uvée*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it. See Iris.

Uvea, Commissure of the, Ciliary ligament.

UVÉE, Uvea.

UVEI'TIS, (F.) *Uvéite*, (*uvea*, and *itis*,) properly, *Rhagoideï'tis*. Inflammation of the uvea. See Iritis.

UVIGENA, Uvula.

UVIGERA, Uvula.

U'VULA, (dim. of *uva*, 'a grape,') *Pinnac'ulum for'nicis guttura'lis, U'va, Staph'ylē, Tintinnab'ulum, Columel'la, Ci'on, Ci'onis, Gurga'reon, Colum'na o'ris, Gurgu'lio, Intersep'tum, Proces'sus* seu *Cartila'go U'vifer, Uvig''ena, Uvig''era, Hi'mas, Plec'trum, Sublin'gua, Sublin'guium, Pap of the Throat*, (Sc.) *Pap of the Hass*, (F.) *Luette*. A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains within it the azygos uvulæ muscle. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle, *U'vula cerebel'li*. It is on the median line, and behind the nodulus.

Uvula, see Vermiform process inferior—u. Cerebelli, see Uvula—u. Decidua, Staphylœdema—u. Relaxata, Staphylœdema—u. Vesicæ, see Urinary bladder—u. Vesical, see Urinary bladder.

U'VULAR, *Uvula'ris*, (F.) *Uvulaire*, (from *uvula*.) That which belongs to the uvula.

Uvular Glands are small follicles, belonging to the mucous membrane covering the uvula.

UVULA'RIA, (so called from the flowers hanging like the uvula, [?]) Ruscus hypoglossum.

Uvularia Perfolia'ta, *Smaller Bellwort;* indigenous; *Order*, Melanthaceæ; flowering in May and June. The root, when fresh, is subacrid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

Uvularia Grandiflo'ra and *U. Sessilifo'lia* have similar properties.

UVULI'TIS, (*uvula*, and *itis*,) *Angi'na uvula'ris, Staphyli'tis, Cioni'tis, Inflamma'tio u'vulæ*, (F.) *Inflammation de la Luette, Falling down of the Palate*. Inflammation of the uvula. When to a slight degree, *Hypostaphyli'tis*.

V.

VACCIN, see Vaccina.

VACCI'NA, *V. primig''ena* seu *vaccinato'ria* seu *antivariolo'sa, Vaccin'ia, Vari'ola vacci'na, V. vaccin'ica* seu *tuto'ria* seu *tu'trix, Exanthe'ma vacci'na* seu *antivariolo'sum, Syn'ocha vacci'na, Em'phlysis vacci'na inser'ta, Vacci'ola, V. scutella'ta, V. ve'ra, Vari'olæ tuto'riæ, Cowpox, Cowpock, Kine Pock, Inoc'ulated Cowpox,* (from *vacca,* 'a cow,') (F.) *Vaccine.* The cowpox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, may preserve him from smallpox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for smallpox in Gloucestershire in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect, although they had never passed through smallpox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow; which they had taken by milking the animal; and which eruption they called *Cowpox.* This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vac'cine Vi'rus, Vi'rus Vacci'num,* (F.) *Vaccin,* the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated that it is perhaps as efficacious when obtained from the human vesicle. The characteristic of cowpox eruption is: — a semitransparent, pearlcoloured vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph, contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour and hardness of the adjoining areolar membrane. This areola declines on the 11th or 12th day; the surface of the vesicle then becomes brown in the centre; and the fluid in the cells gradually concretes into a hard, rounded scab or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *genuine cowpox.* At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cowpox.* If the eruption runs speedily to a height, has an areola too early, is irregular at its edges, and contains pus instead of a limpid fluid, it cannot at all be depended upon.

Smallpox occurs, occasionally, as an epidemic after vaccination. For a while, the enthusiastic advocates of vaccination would not admit the affection to be smallpox; and, accordingly, they gave it the name Varioloid. It is unquestionably smallpox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *smallpox inocula'tion.* Vaccination is now practised everywhere, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection *revaccina'tion* may be occasionally necessary.

VACCINA ANTIVARIOLOSA, Vaccina — v. Primigena, Vaccina — v. Tutoria, Vaccina — v. Tutrix, Vaccina — v. Vaccinatoria, Vaccina.

VACCINAL, Vaccine.

VACCINA'TION, *Vaccina'tio,* (from *vacca,* 'a cow;') *Cowpox inocula'tion, Jenne'rian inocula'tion.* An operation which consists in inserting the vaccine virus under the cuticle, so that it may enter into the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter from the *Cowpox vesicle,* for vaccination, is about the 7th or 8th day, before the appearance of the areola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence, it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later—is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VAC'CINATOR, *Vac'cinist.* One who inoculates for the cowpox.

VACCINE, *Vacci'nus, Vaccina'lis,* (F.) *Vaccinal;* (same etymon as Vaccination.) Relating or appertaining to vaccination, as the '*vaccine* vesicle,' 'a *vaccine* physician.'

VACCINE, Vaccina.

VACCINEL'LA, (dim. of *vaccina.*) A term employed by some to designate spurious cowpox. *Vaccin'oïs, Vacci'ola spu'ria* seu *lepro'sa,* (F.) *Vaccinelle, Vaccinoïde.*

VACCINIA, Vaccina—v. Palustris, Vaccinium oxycoccos.

VACCINIST, Vaccinator.

VACCINIUM MACROCARPON, see V. oxycoccos.

VACCIN'IUM MYRTYL'LUS, (either corrupted from *hyacinthus,* or, and more probably, from *baccinium;* from *baccæ,* 'berries,' in allusion to its fruit.) *Vi'tis idæ'a myrtil'lus, Vaccin'ia myrtil'lus, Vaccin'ium nï'grum, Myr'tleber'ry, Bil'berry, Bleaberry, Whor'tleberry, Black Whorts,* (Sc.) *Blae'berry,* (Prov.) *Hur'tleberry, Whim'berry,* (F.) *Airelle Anguleuse, Raisin de Bois. Ord.* Vaccinieæ. *Sex. Syst.* Octandria Monogynia. The berries — *Baccæ Myrtillo'rum* — are esteemed to be anti scorbutic, when prepared with vinegar. They are also said to possess antiseptic and subastringent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, V. myrtillus.

VACCINIUM OXYCOC'COS, *Oxycoc'cos, O. palus'tris, Schollera oxycoc'cos, Vaccin'ia palus'tris, Vi'tis Idæ'a palus'tris, Moor'berry, Cran'berry, Moss'berry, Swamp Red'berry, Sour'berry,* (F.) *Canneberge.* The berries are pleasantly acid and cooling. They make an agreeable preserve. The common American Cranberry is from *Vaccinium macrocarpon, Oxycoccos macrocarpus.*

Vaccinium Pennsylva'nicum, *Low Blue'berry.* The leaves and bark of the root are astringent.

Vaccinium Punctatum, V. vitis idæa — v. Resinosum, Gaylussacia resinosa.

Vaccinium Stamin'eum, *Buck'berry, Squaw Huck'leberry, Deer'berry.* The leaves of these plants are astringent.

Vaccinium Vi'tis Idæ'a, *V. puncta'tum, Vi'tis Idæ'a puncta'ta, Am'pelos Idæ'a, Red Bil'berry,* (Sc.) *Braw'lins, Al'pine Crau'berry, Whor'tleberry, Cow'berry,* (F.) *Aircelle* ou *Canneberge ponctuée.* A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of Vaccinium.

VACCINOÏDE, (*vaccina,* and *εἶδος,* 'resemblance,') Vaccinella.

VACCINOIS, Vaccinella.

VACCINUS, Vaccine.

VACCIOLA, Vaccina — v. Leprosa, Vaccinella — v. Scutellata, Vaccina — v. Spuria, Vaccinella —v. Vera, Vaccina.

VACILLA'TIO, *Tituba'tio,* (from *vacillare, vacillatum,* 'to waver.') Staggering; waddling—*claudica'tio anat'ica.*

Vacillatio Dentium, Odontoscisis.

VACUOLE, (dim. of (L.) *vacuus,* 'empty,') Areola.

VAGIN, Vagina.

VAGI'NA, 'a sheath,' *V. muli'ebris* seu *uteri'na* seu *Ut'eri* seu *Pe'nis, Si'nus muli'ebris* seu *Pudo'ris* seu *Puden'di, Co'leus, Pe'ris, Pe'rin, Colpus, Vulvoü'terine canal,* (F.) *Vagin, Conduit* ou *Canal de la pudeur.* A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Aul'us* seu *Intro'itus,* with the vulva; by the other, *For'nix* seu *Fun'dus,* with the womb, the *Pars* seu *Por'tio vagina'lis u'teri,* the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and caruncule myrtiformes. Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulovascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also enter into the composition of the organ.

The term *Vagina* or Sheath, *The'ca,* (F.) *Gaîne,* is extended to many parts, which serve as envelopes to others. Thus, it is sometimes applied to the fascia enveloping the limbs; to areolar membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the bloodvessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

Vagina Cordis, Pericardium—v. Femoris, Fascia lata aponeurosis—v. Funiculi umbilicalis, see Funiculus umbilicalis — v. Glissonii, Capsule of Glisson — v. Malleolaris externa, Retinaculum tendinum perinæorum—v. Muliebris, Vagina—v. Muscularis, Perimysium — v. Nervorum, Neurilemma — v. Penis, Vagina — v. Pili, see Hair—v. Portæ, Capsule of Glisson—v. Uterina, Vagina.

Vagina of the Ve'na Por'ta, *Sheath of the Vena Porta,* (F.) *Gaîne de la Veine-porte,* is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

VAGINÆ SYNOVIALES, 'synovial sheaths,' Bursæ mucosæ.

VAG''INAL, or VAGI'NAL, *Vagina'lis,* (from *vagina,* 'a sheath.') Relating or pertaining to a sheath.

Vaginal Ar'tery. This exists, as a matter of course, only in the female. It arises from the hypogastric, or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

Vaginal Bil'iary Plex'us. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

Vaginal Branch'es of the Ve'na Por'ta are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form the *vaginal plex'us.* There are, also, *vaginal branches,* and a *vaginal plexus* formed by the hepatic artery.

Vaginal Coat of the Eye, see Eye.

Vaginal Coat of the Tes'ticle, *Tu'nica Vagina'lis* seu *Elytroï'des* seu *Elytro'des,* is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tu'nica vagina'lis pro'pria* and *Tu'nica vagina'lis reflex'a.* Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

Inflammation of the tunica vaginalis has been called *Vaginali'tis,* (F.) *Vaginalite.*

Vaginal Ganglia, see Spermatic ganglion—v. Plexus, see Vaginal branches of the vena porta.

Vaginal Proc''ess of the Tem'poral Bone, (F.) *Apophyse vaginale* ou *engaînante, Gaîne de l'apophyse styloïde, Chaton,* is a bony crista, which embraces the base of the styloid process.

Vaginal Pulse, Pulse, vaginal.

VAGINALITIS, see Vaginal coat of the testicle.

VAGINISM'US. A name given by Dr. J. Marion Sims to spasm of the sphincter muscle of the vagina, with hyperæsthesia of the surrounding parts, and altered structure, which requires division by the knife.

VAGINITIS, (*vagina,* and *itis.*) Inflammation of the vagina, see Leucorrhœa (vaginal.)

VAGINODYNIA, (*vagina,* and *ὀδυνη,* 'pain,') Colpalgia.

VAGINOVESICAL, Vesicovaginal.

VAGISSEMENT, (from *vagitus,*) Cry, Vagitus.

VAGI'TUS, (*vagire, vagitum,* 'to cry,') (F.) *Vagissement.* The cry of the newborn child. *Squall'ing.*

Vagi'tus Uteri'nus. The cry of the child in utero.

VAGUS (NERVUS), 'wandering (nerve,') Pneumogastric.

VAIRON (F.), (from *varius,* 'of different colours,') *Dispar oc'ulus.* One who has eyes of different colors. It also means a *wall-eyed* animal, or one whose iris is surrounded by a whitish circle.

VAISSEAU, (from *vas,* dim. *vasculum,*) Vessel —*v. Sanguin,* Bloodvessel.

VAISSEAUX (pl. of *vaisseau*) *CAPILLAIRES,* Capillary vessels—*v. Chylifères,* Chyliferous vessels — *v. Courts,* Brevia vasa — *v. Droits,* see Rete testis—*v. Efférents,* see Efferent — *v. Lactés,* Chyliferous vessels — *v. Lactifères,* Lactiferous vessels—*v. Ombilicaux,* Umbilical vessels — *v. Tourbillonnés,* Vasa vorticosa — *v. des Vaisseaux,* Vasa vasorum.

VALANIDA, Fagus sylvatica.

VALANTIA APARINE, (after S. Vaillant, a French botanist,) Galium aparine.

VALENTINIAN VESICLES, (after Valentin, the German physiologist,) see Molecule.

VALERIAN, AMERICAN, (from *valere,* 'to have efficacy' [?]), Cypripedium luteum, Valeriana pauciflora—v. Garden, Valeriana phu—v. Greek, Polemonium reptans—v. Officinal, Valeriana—v. Wild, Senecio aureus, Valeriana, V. pauciflora.

VALERIA'NA, *V. officina'lis* seu *mi'nor, Leucolach'anum, Wild* or *Offic''inal Vale'rian. Ord.* Valerianaceæ. *Sex. Syst.* Triandria Monogynia. The root, *Valeria'na* (Ph. U. S.), has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacrid, and warm taste; and its virtues are extracted by water and alcohol. The distilled oil is officinal in the Pharmacopœia of the United States.

The *Kooyah root* or *Kooyahs* of the Indians in Oregon, used by them for making a bread called *Supale*, is said to be that of *Valeriana officinalis* or *Valeriana edu'lis*, probably the same as that sometimes written *Kous*. It is frequently called *Tobac'co root*. It has to be buried in the ground for two days to deprive it of its noxious properties. The bread has an offensive taste to those not accustomed to it.

VALERIANA CAPEN'SIS, a South African species, has similar virtues.

VALERIANA CELT'ICA, *V. Saxat'ilis, Spi'ca Cel'tica* seu *Cel'tica Dioscor'idis* seu *Alpi'na, Nar'dus Cel'tica, Saliun'ca, Nar'dum Gal'licum, Cel'tic Nard*, (F.) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative, and diuretic. It has a moderately strong smell, and a warm, bitterish, subacrid taste.

VALERIANA DENTA'TA, *V. locus'ta, Corn Sal'ad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALERIANA EDULIS, see Valeriana—v. Locusta, V. dentata—v. Major, V. phu—v. Minor, Valeriana—v. Officinalis, Valeriana.

VALERIANA PAUCIFLO'RA, *Amer'ican* or *Wild Vale'rian*, and *V. sylvat'ica*, have the properties of the other Valerians.

VALERIANA PHU, *V. ma'jor, Gar'den Vale'rian*. (F.) *Grande Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

VALERIANA SAXATILIS, V. celtica—v. Spica, Nardus Indica—v. Sylvatica, see V. pauciflora.

VALÉRIANE, GRANDE, Valeriana phu.

VALET À PATIN (F.), *Volsel'la Pati'ni*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALÉTUDINAIRE, Valetudinary.

VALETUDINARIUM, (from *valetudo*,) Hospital.

VALETUDINARIUS, Sickly, Valetudinary.

VALETU'DINARY, *Valetudina'rian, Valetudina'rius, Inval'idus*, (F.) *Valétudinaire*. One of delicate health. One subject to frequent diseases. An *Invalid*.

VALETUDO, gen. *Valetu'dinis*, 'health, whether good or bad,' Sanitas—v. Adversa, Disease—v. Bona, Sanitas—v. Cominoda, Sanitas—v. Secunda, Sanitas.

VALGUS, 'bowlegged,' see Cnemoscoliosis and Kyllosis.

VALIGA, Tinctura jalapii.

VALITUDO, gen. *Valitudinis*, Sanitas.

VALLECULA, (dim. of *vallis*,) Valley—v. Unguis, see Nail.

VAL'LEY, *Vallis*, dim. *Vallec'ula, V. Reil'ii*, (F.) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

VALLIS, Valley—v. Alarum, 'valley of the armpits,' Axilla—v. Femorum, Vulva.

VALLUM, 'a palisaded rampart.' The eyebrow or supercilium. Also, a species of bandage.

VALS, MIN'ERAL WA'TERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron and alum. They are employed in passive hemorrhages, leucorrhœa, &c. Season, from the 1st of June to the 15th of September.

VALVA, Valve.

VALVE, *Valva*, dim. *Val'vula, Di'clis*, (F.) *Valvule*, (*valvæ*, 'folding-doors,' itself from *volva*, 'to fold up.') A small door. Any membrane or duplicature of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *mitral, sigmoid, tricuspid, ileocœcal valve*, &c.

VALVE OF FALLOPIUS, Bauhin, valve of—v. Ileocœcal, Bauhin, valve of—v. Ileocolic, Bauhin, valve of—v. of Tulpius, Bauhin, valve of—v. of Varolius, Bauhin, valve of.

VALVES, KERKRINGIAN, Valvulæ conniventes—v. Semilunar, Sigmoid valves.

VALVULA, pl. *val'vulæ*, (dim. of *vulva*,) Valve—v. Cæci, Bauhin, valve of—v. Cerebelli, Valvula Vieussenii—v. Coli, Bauhin, valve of—v. Foraminis ovalis, Ovalis fossa—v. Guiffartiana, see Thebesius, veins of—v. Ilei, Bauhin, valve of—v. Magna cerebri, V. Vieussenii.

VALVULA SEMILUNA'RIS, *Pli'ca Semiluna'ris* seu *luna'ta, Membran'ula semiluna'ris conjuncti'va*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membra'na nicti'tans* seu *Pal'pebra ter'tia*.

VALVULA TARINI, Velum medullare posterius—v. Thebesii, see Thebesius, veins of—v. Tulpii, Bauhin, valve of—v. Vaginæ, Hymen—v. Venæ magnæ, see Thebesius, valve of.

VALVULA VIEUSSE'NII, *V. cerebel'li* seu *Willisia'na* seu *mag'na cer'ebri, Ve'lum Vieusse'nii* seu *interjec'tum cerebel'li, V. apoph'ysi vermiform'i obtentum, V. medulla'rē* seu *medulla'rē anti'cum* seu *ante'rius, Lacu'nar ventric'uli quar'ti supe'rior*, (F.) *Valvule de Vieussens, Voile médullaire supérieure*. A thin, medullary lamina, over the under end of the Aqueductus Sylvii and upper part of the fourth ventricle. At the sides of the valves are two medullary tracts, called *Proces'us od Testes, Oblum'næ Val'vulæ Vieussenii* or *Oblique intercer'ebral Commissure*.

VALVULA WILLISIANA, Valvula Vieussenii.

VALVULÆ, pl. of *Valvula*—v. Bicuspidales, Mitral valves.

VALVULÆ CONNIVEN'TES, 'self-closing valvulæ,' *V. C. Kerkrin'gii, Pli'cæ conniven'tes, Kerkrin'gian valves*. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be, to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyliferous vessels.

VALVULÆ CORDIS, Ostiola cordis—v. Cordis mitrales, Mitral valves—v. Semilunares, Sigmoid valves—v. Triglochines, Tricuspid valves—v. Trisulcæ, Tricuspid valves.

VALVULE, Valve—*v. d'Eustache*, Eustachian valve—*v. de Pylore*, see Pylorus—*v. de Vieussens*, Valvula Vieussenii.

VALVULES ÉPISCOPALES, Mitral valves—*v. Sigmoïdes* ou *Semilunaires*, Sigmoid valves.

VANDEL'LIA DIFFU'SA, (after *Vandelli*, professor of botany at Coimbra.) A native of Brazil, Guiana and Isle of France; *Order*, Scrophulariaceæ; is used there as an antibilious emetic and

antiperiodic; and is regarded as an efficacious remedy in malignant fever and dysentery, especially in cases connected with a disordered state of the liver.

VANELLOE, Vanilla.

VANIL'LA, *Banil'ia, Banil'as, Banil'loes, Banil'la, Benzo'enil, Ar'acus aromat'icus,* (F.) *Vanille, Baume de Vanille,* ([S.] *vainilla,* dim. of *vaina,* 'a sheath, a pod.') The *Vanel'loe—Sil'iqua vanill'æ* seu *Banill'æ* seu *Vaniglиæ* seu *vanil'liæ* seu *Ar'aci aromat'ici*—is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epidev'drum Vanil'la, Vanil'la aromat'ica* seu *Mexica'na,* and other species. *Family,* Orchidaceæ. *Sex. Syst.* Gynandria Monandria. Vanelloes have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

VANILLA AROMATICA, see Vanilla.

VAO, see Currare.

VAPEURS, 'vapors,' Hypochondriasis, Hysteria—*v. de Rate,* Hypochondriasis.

VAPOR SANGUINIS, 'vapour of the blood,' Gaz sanguinis.

VAPORA'RIUM, *Atmiste'rion, Atmolu'tron, Lacon'icum, Bal'neum vapo'ris, Vapour bath,* (F.) *Bain de vapeur,* (from *vapor,* 'steam.') A remedy in rheumatic and cutaneous affections; and wherever it is important to impress the cutaneous surface. In the *Rus'sian Va'pour Bath,* the vapour is produced in Russia by throwing water over hot stones, and the bather passes, at once, from the heated condition to cool or cold water, not only with impunity, but with positive pleasure. Its temperature is from 122° to 145°.

VAPORARIUM, Hypocaustum, see Stove.

VAPORATIO, (*vaporare, vaporatum,* 'to emit steam or vapour.') Evaporation.

VAPORES UTERINI, Hysteria.

VAPORS, Hypochondriasis, Hysteria.

VAPOUR, Flatulence—v. Bath, Vaporarium.

VAPOURISH, Hypochondriac, Hysterical.

VAPOUROUS, Windy.

VAPOURY, Hypochondriacal, Hysterical.

VARA, *Barre.*

VARAIRE, Veratrum album.

VAREC, 'wrack,' Kelp—*v. Vésiculeux,* Fucus vesiculosus.

VARENI, Ambuloflatulentus, Gout, (wandering.)

VARICE, Varix.

VARICEL'LA, (dim. of *Variola,*) *Em'phlysis* seu *Exanthe'ma* seu *Syntochus varicel'la, Vari'ola lymphat'ica* seu *spu'ria* seu *sylves'tris, Vari'olæ no'thæ* seu *illegit'imæ* seu *volat'icæ* seu *pucel'læ, Pseudovari'olæ, Æol'lion, Æol'linm, Chick'enpox,* (F.) *Varicelle, Pétite vérole volante, Vérolétte, Vérette, Fausse variole.* A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops, are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance, burst at the top, and concrete into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiform'es* or *lentic'ular chick'enpox,* which are irregulary circular, and flattened on the top; the fluid being at first whitish, and afterward straw-coloured. This is the *common chickenpox.* 2. The *Varicella conifor'mis, Pem'phigus variolo'des, Vari'ola lymphat'ica, Hydrach'nis, Conoid'al Chick'enpox, Swinepox, Waterpox, Waterjags,* in which the vesicles are generally acuminated, and the fluid pellucid throughout; and, 3. The *Varicel'la globula'ris* or *Hives,* in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Horapox is a papular variety of varicella.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Varicella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required. See Varioloid.

VARICELLA VARIOLOIDEA, Varioloid.

VARICELLAR FEVER, see Varioloid.

VARICIFOR'MES PARAS'TATÆ, (*varix,* pl. *varices,* and *forma,* 'form.') With some authors, the ducts of the epididymis, because they seem knotty and varicose.

VARICOBLEPH'ARON, (*varix,* and *βλεφαρον,* 'eyelid.') A varicose tumour of the eyelid.

VARICOCE'LĒ, (*varix,* and *κηλη,* 'a tumour;') *Oscheocc'lē varico'sa, Her'nia varico'sa, Ra'mex varico'sus, Spermatoce'lē, Cirsoce'lē.* A varicose dilatation of the veins of the scrotum and spermatic cord; usually, by English and American writers, restricted to the latter, like Cirsocele. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the scrotum, so as to render the remainder of the scrotum a natural bandage. This plan has been found effectual.

VARICOM'PHALUS, (*varix,* and *ομφαλος,* 'the umbilicus.') Varicose tumour of the umbilicus; cirsomphalus.

VAR'ICOSE, *Varico'sus, Var'icous,* (F.) *Variqueux,* (from *varix.*) Affected with varix: or belonging to, or connected with, varix;—as a *varicose vein;* a *varicose ulcer,* one kept up by *varices.*

VARICOSITAS, see Varix—v. Conjunctivæ, Cirsophthalmia.

VARICOSITY, see Varix.

VARIC'ULA, dim. of *Varix.* Also, a varicose swelling of the veins of the tunica conjunctiva.

VARI'OLA, *Vari'olæ, V. ve'rræ, Vari'oli, Empye'sis Vari'ola, Pes'tis* seu *Fe'bris variolo'sa, Æolec'thyma, Smallpox, Pox* (North of England); (from *varius,* 'spotted,' or from *vari,* 'pimples;') (F.) *Variole, Petite Vérole, Picote.* A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, but this *inoculated smallpox—Vari'ola inser'ta*—communicates the disease as readily through the air as the *natural smallpox,* or that received without inoculation.

Smallpox is distinguished into two classes, according to the character of the eruption, the *discrete'* or *distinct',* and the *confluent.* 1. In VARIOLA DISCRE'TA, *Empye'sis vari'ola discre'ta, Va-*

ri'ola discre'ta benig'na, Vari'olæ regula'res seu *discre'tæ, Distinct' Smallpox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In VARI'OLA CON'FLUENS, *Empye'sis vari'ola con'fluens, Vari'olæ regula'res confluen'tes, Vesic'ulæ Di'væ Bar'baræ, Vésicules de Sainte-Barbe, Con'fluent Smallpox*, the pustules are confluent, or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet, generally appear, towards the period of the *secondary fe'ver*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Erup'tive fe'ver*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches being, however, separated by intervals of unaffected skin; it constitutes the clustered, coherent, or corymbose variety—*Vari'ola corymbo'sa*.

VARIOLA AMBOINENSIS, Framboœsia—v. Corymbosa, see Variola—v. Inserta, Variola (by inoculation)—v. Lymphatica, Varicella—v. Mitigata, Varioloid—v. Spuria, Varicella—v. Vaccina, Vaccina—v. Vaccinatorum, Varioloid.

VARI'OLA sine VARI'OLIS, *Vari'olous Fe'ver*. These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

VARIOLÆ, Variola—v. Equinæ, see Grease—v. Illegitimæ, Varicella—v. Modificatæ, Varioloid—v. Nothæ, Varicella—v. Pucellæ, Varicella—v. Sylvestris, Varicella—v. Tutoriæ, Vaccina—v. Veræ, Variola—v. Volaticæ, Varicella.

VARIOLATION, Inoculation (Smallpox.)

VARIOLE, Variola.

VARIOLEUX, Variolous.

VARIOLI, Variola.

VARIOLIC, Variolous.

VARIOLIQUE, Variolous.

VAR'IOLOID, *Variol'oïs, Variolo'ides, Vari'ola modifica'ta* seu *mitiga'ta* seu *vaccinato'rum Varicel'la* (of some), *Varicel'la Variolo'ides*, (*variola*, 'smallpox,' and εἶδος, 'form,')—resembling smallpox. This is, really, smallpox, modified by previous inoculation or vaccination; and hence it has been properly called *modified smallpox*. That it is smallpox is proved by the fact, that matter, taken from a varioloid pustule, will communicate smallpox to one who has never been vaccinated. It is, almost always, a milder disease than smallpox; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

Occasionally, when varioloid is epidemic, *varioloid* or *varicel'lar fe'ver* occurs without the eruption. This is the *varicel'læ sine varicel'lis* of Mr. Erasmus Wilson, who calls varioloid, *varicella*.

VARIOLOID FEVER, see Varioloid.

VARIOLOIS, Varioloid.

VARI'OLOUS, *Variolo'sus, Vari'olic*, (F.) *Variolenx, Variolique*. Relating or belonging to variola.

VARIQUEUX, (from *varix*,) Varicose.

VARIX, gen. *Var'icis, Phlebeurys'ma, Phlebec'tasis, Her'nia* seu *Ecta'sia vena'rum, Angiecta'sia veno'sa, Ix'ia, Cir'sus, Ced'ma, Var'icose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' 'to twist,'—on account of the sinuosities of varicose veins. Dilatation of a vein; *Varicos'itas, Varicosity*. Varices are owing to local retardation of the venous circulation; and, in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein or ligature. The second course is apt to be followed by phlebitis.

VAROLI, BRIDGE OF, Pons Varolii.

VARUS, (*varius*, 'spotted.') A spot or pimple on the face; Acne, Ionthus. Also, Entogonyancon and Kyllosis, (from *varus*, 'having the legs bent.')

VARUS MENTAGRA, Sycosis—v. Punctatus, see Acne.

VAS, gen. *Va'sis*, Vessel, Penis—v. Aberrans Halleri, Vasculum aberrans—v. Deferens, see Deferens—v. Deferens mulieris, Tuba Fallopiana—Urinarium, Ureter.

VASA (pl. of *Vas*) ABERRAN'TIA. Peculiar ramifications of the biliary duct in the liver are so called by E. H. Weber.

VASA ABSORBENTIA, Absorbent vessels—v. Afferentia, see Afferent and Efferent—v. Brevia, see Brevia vasa—v. Capillaria, Capillary vessels—v. Chylifera seu Chylofera, Chyliferous vessels.

VASA CHYLOPOËT'ICA URINIF'ERA. Blood-vessels, which, according to Lippi, convey drinks from the chyliferous vessels to the renal veins.

VASA EFFERENTIA, see Efferent—v. Exhalantia, Exhalant vessels—v. Graafiana, see Efferent—v. Hydragoga, Lymphatic vessels—v. Inferentia, see Afferent and Efferent—v. Lactea, Chyliferous vessels, Lactiferous vessels—v. Lymphatica, Lymphatic vessels—v. Meningea, Meningeal vessels—v. Nutrientia, Vasa vasorum—v. Nutritia, Vasa vasorum—v. Recta, see Rete testis—v. Resorbentia, Absorbent vessels, Lymphatic vessels—v. Sedalia, Hæmorrhoidal vessels—v. Serosa, see Capillary vessels.

VASA VASO'RUM, 'vessels of vessels,' *V. nutrit'ia* seu *nutrien'tia*, (F.) *Vaisseaux des vaisseaux*. Small vessels that supply larger with blood for their nutrition. The cardiac or coronary arteries and veins may be regarded as the vasa vasorum of the heart. However minutely a vessel is traced, its parietes will be found supplied with blood for their nutrition by a smaller vessel.

VASA VORTICO'SA, (*vortex*, 'a whirlpool,') (F.) *Vaisseaux tourbillonnés, Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye; ciliary veins.

VASCO'A AMPLEXICAUL'IS, (after Vasco de Gama.) A South African shrub, *Nat. Ord.* Leguminosæ, the roots of which taste like liquorice. They are used, in decoction, in catarrh and phthisis, and are a good substitute for liquorice.

VASCULA SERPENTINA, see Testicle.

VAS'CULAR, *Vascula'ris, Vasculo'sus, Angei'al*, (F.) *Vasculaire, Vasculeux*, (from *vas*, 'a ves-

sel,' *vasculum*, 'a little vessel.') That which belongs or relates to vessels; — arterial, venous, or lymphatic; but generally restricted to bloodvessels only. Full of vessels. Bichat gave the name *Vas'cular sys'tem, Syste'ma vaso'rum, Hæmatan'lica*, to the blood-vessels, and of this he made two divisions. 1. The *Arte'rial sys'tem*, or *Sys'tem of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart, and the aorta with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Ve'nous sys'tem* or *Vas'cular sys'tem of black blood*, (F.) *Système vasculaire à sang noir*, carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR GLANDS, see Ganglion — v. Layer, see *Tache embryonnaire* — v. Radicles, Radical vessels—v. Substance of the Kidney, see Kidney — v. System, see Vascular — v. System, intermediate, Capillary system — v. System, peripheral, Capillary system—v. Tumour, see Hæmorrhois.

VASCULAR'ITY, *Vascular'itas*, (F.) *Vascularité*. The state of being vascular, or largely supplied with vessels.

VASCULEUX, Vascular.

VASCULOMOTOR, Vasomotor.

VASCULUM, (dim. of *vas*, 'a vessel,') Penis, Vessel.

VAS'CULUM ABER'RANS, (*aberrare*, 'to wander from,') *Vas aber'rans Halleri, Appen'dix to the Epidid'ymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

VASE À SAIGNER, 'bleeding vessel,' Cup.

VASOMO'TOR, *Vas'culomo'tor*, (F.) *Vaso-moteur, Vasculo-moteur*, (from *vas*, 'vessel,' and *motor*, 'mover.') That which causes movement in the vessels. Fibres of the great sympathetic are 'vasomotor.'

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and VASTUS INTERNUS are two considerable, fleshy masses, which form part of the Triceps cruris.

VASUM, Vessel.

VA'TER, AMPUL'LA OF, (F.) *Ampoule de Vater*, (called after Vater, a German anatomist.) An ampulla formed by the orifice of the pancreatic duct in the duodenum.

VATER, CORPUSCLES OF, Corpuscles, Pacinian.

VATERIA INDICA, (after Abraham Vater, a physician and botanist of Wittenberg,) see Copal.

VATICINIUM CHIROMANTICUM, (*vaticinor*, 'to foretell,') Chiromancy.

VAULT, (old F. *Voulte*, 'a round or turn;' from *volvere, volutum*, 'to turn;') *For'nix, Cam'era*, (F.) *Voûte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly, — as the *Vault of the cranium* or the upper part of the skull,—the *Palatine vault* or *roof of the month*, &c. &c.

VAUQUELINE, (after Vauquelin, the French chemist,) Strychnia.

VEAL TEA. This may be made in the same manner as beef tea, by using a pound of fillet of *veal*, free from fat and sliced, and a pint and a half of *boiling water*; and boiling for half an hour. It may also be made with the same quantity of the fleshy part of a knuckle of veal.

VECORDIA, 'want of reason,' Idiotism.

VECTIS, (*vehere, vectum*, 'to carry,') Lever — v. Elevatorius, Elevator—v. Triploides, Elevator, triploid.

VECTOR CANAL, (*vehere, vectum*, 'to carry,') Tube, Fallopian.

VEG"ETABLE, *Vegetab'ilis*, (F.) *Végétal*, (from *vegetus*, 'lively,' and *vegeo* or *vigeo*, 'I flourish.') Appertaining or relating to plants. A vegetable, *Phyton*, (φυτον), is an organized being devoid of sensation and voluntary motion, which receives its nutriment, essentially, by the roots. The study of vegetables is *Phytol'ogy, Phytolog''ia*.

VÉGÉTAL, Vegetable.

VEGETAL'ITY, *Vegetal'itas*, (F.) *Végétalité*, (from *vegeo* or *vigeo*, 'to be active.') The aggregate of physiological phenomena, which exist alone in the vegetable, but are common to both plants and animals. See Animality.

VEGETARIAN, see Vegetarianism.

VEGETA'RIANISM. Same etymon as Vegetation. A modern term, employed to designate the view, that man, for his full mental and corporeal development, ought to subsist on the direct productions of the vegetable kingdom, and totally abstain from flesh and blood. An embracer and practiser of this doctrine is called a *vegetarian*.

VÉGÉTATIF, Vegetative.

VEGETA'TION, *Vegeta'tio*, 'growing like a plant,' (from *vegeo*, or *vigeo*, 'to be active.') A morbid production, which rises as an excrescence on an organ or part, as on the valves of the heart. The term is also applied to the fleshy granulations or *Hypersarcosis*, which sometimes arises at the surfaces of wounds or ulcers.

VEG"ETATIVE, *Vegetati'vus, Phy'ticus*, (F.) *Végétatif*. Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

VEGETATIVE LAYER, see *Tache embryonnaire*.

VEGETATIVUS, Vegetative.

VE'HICLE, *Vehic'ulum*, 'a carriage,' *Oche'ma, Constit'uens*, (F.) *Véhicule*, (from *vehere*, 'to carry.') Anything which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

VÉHICULE, Vehicle.

VEILED PUFF, see Cavernous respiration.

VEIN, *Ve'na*, dim. *Ve'nula, Phlebs, Phleps*, (F.) *Veine*. The veins are vessels for the conveyance of blood from every part of the body to the heart. They are found wherever there are arteries, and, altogether, form the *venous system*, which may be subdivided into two distinct secondary systems. 1. The *Gen'eral ve'nous sys'tem*, which commences in all the organs, by very minute radicles; and terminates in the heart by the cava and the coronary vein. 2. The *Abdom'inal ve'nous sys'tem*, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *Sys'tem of the Ve'na Por'ta* or the *Por'tal Sys'tem*. See Porta. The veins form two sets, one *deepseat'ed, Ve'næ satell'lites, V. concom'ites*, which accompany the arteries; the other *superfic''ial* or *subcuta'neous*. Their parietes, which are thinner than those of the arteries, are composed of three coats; the outermost, of dense areolar tissue; the middle coat elastic, with parallel, longitudinal fibres—the *proper membrane*; the other, the *common* or *inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments,—vasomotor,—are from the great sympathetic.

TABLE OF THE VEINS.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

- 1. Subclavians.
  - Receive the 1. Axillary which
    - Receives the 1. Basilic, formed of the
      - 1. Posterior ulnar.
      - 2. Anterior ulnar.
      - 3. Median basilic.
    - 2. Cephalic, forming the
      - 1. Superficial radial.
      - 2. Median cephalic.
    - 3. Circumflex veins.
    - 4. Inferior scapular.
    - 5. Long thoracic.
    - 6. Superior thoracic.
    - 7. Acromial veins.
  - 2. External Jugular.
    - Receives the 1. Internal maxillary, composed of the
      - 1. Pterygoid.
      - 2. Sphenopalatine.
      - 3. Alveolar.
      - 4. Infraörbitar.
      - 5. Mental.
      - 6. Inferior dental.
      - 7. Deep temporal.
    - 2. Superficial Temporal, composed of
      - 1. Middle temporal.
      - 2. Anterior auriculars.
      - 3. Transverse of the face.
    - 3. Posterior Auricular. The trunk then takes the name of *External Jugular*, and in its course along the neck, receives—
    - 4. Cervical cutaneous.
    - 5. Tracheloscapular, &c.
  - 3. Internal Jugular. Receives
    - 1. Superior Cerebral Veins.
    - 2. Veins of the Corpus Striatum.
    - 3. Veins of the Choroid plexus.
    - 4. Superior Cerebellar Veins.
    - 5. Inferior Cerebellar Veins.
    - 6. Lateral and inferior Cerebral Veins.
    - 7. Ophthalmic Vein, composed of the
      - 1. Lachrymal.
      - 2. Central of the retina.
      - 3. Infraörbitar.
      - 4. Ciliary.
      - 5. Ethmoidal.
      - 6. Palpedral, and
      - 7. Nasal Veins.
    - 8. Facial vein, called *angular*, near the eye, receiving the
      - 1. Palpebral, and
      - 2. Superciliary Veins.
      - 3. Dorsals of the nose.
      - 4. Superior } Coronaries
      - 5. Inferior } of the lip.
      - 6. Several Buccal, and
      - 7. Masseteric veins.
      - 8. Ranine.
      - 9. Submental, and
      - 10. Inferior Palatine.
    - 9. Lingual and Pharyngeal Veins.
    - 10. Superior thyroid.
    - 11. Occipital, and
    - 12. Veins of the Diploë.
- 2. Right Internal Mammary Vein.
- 3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.
- 4. Vena Azygos, which receives the
  - 1. Right Bronchial.
  - 2. Intercostal Veins.
  - 3. Semiäzygos.

2. VEINS WHICH FORM THE INFERIOR VENA CAVA.

- 1. Common Iliacs.
  - Receive the 1. External Iliacs, formed by the—
    - 1. Femoral or Crural, which is a continuation of the
    - 2. Popliteal, commencing by 3. veins which accompany the fibular arteries, and receiving the—
      - 1. External Saphena and
        - 1. Several abdominal veins.
        - 2. Circumflex Iliac, and
        - 3. External pudic veins.
      - 2. Internal Saphena, which receive—
  - 2. Internal Iliacs which receive the—
    - 1. Vesical Veins commencing with the
      - 1. Dorsal veins of the penis of the male.
      - 2. Veins of the clitoris, in the female.
    - 2. Sacrolateral Veins.
  - 3. Middle Sacral Vein.
  - 4. Lumbar Veins—four in number on each side, commencing by an—
    - 1. Abdominal branch.
    - 2. Dorsal branch.
  - 5. Spermatic Veins, commencing with the
    - 1. Spermatic plexus in the male.
    - 2. Those of the Ovarium, Fallopian tube, &c., in the female.
  - 6. Renal Veins.
  - 7. Capsular and Adipose Veins.
  - 8. Hepatic Veins.
  - 9. Middle, } Hepatic Veins
  - 10. Left, and } Hepatic Veins
  - 11. Right, } Hepatic Veins
  - 12. Inferior Diaphragmatic Veins, two in number.

3. VEINS OF THE HEART.

1. Great right Coronary.
2. Small right Coronary.
3. Left Coronary Veins.

4. VEINS WHICH FORM THE VENA PORTA.

- 1. Splenic Vein. Receives the
  - 1. Veins which correspond to the vasa brevia.
  - 2. Right and left gastroëpiploic.
  - 3. Duodenal, and
  - 4. Pancreatic veins
  - 5. Coronary vein of the stomach, and
  - 6. Small mesenteric vein.
- 2. Superior Mesenteric Vein.

VEIN OF BRESCHET, see Diploic—v. Bronchial, left, see Azygous—v. Coronary, Cardiac veins—v. Demiazygous, see Azygous—v. Diploetic, see Diploic—v. Frontal, see Facial vein — v. of Galen, see Cardiac veins, and Choroides venæ—v. Intralobular, Hepatic veins — v. Palatolabial, Facial vein — v. Peroneomalleolar, Saphena minor — v. Semiazygous, see Azygous vein—v. Superior intercostal, left, see Azygous vein—v. Suprahepatic Hepatic veins—v. Tibiomalleolar, Saphena, great —v. Varicose, Varix.

VEINE, Vein—*v. Cave*, Cava vena—*v. Céphalique*, Jugular vein, internal — *v. Céphalique du pouce*, Cephalic vein of the thumb — *v. Cubitale cutanée*, Basilic vein — *v. Fessière*, Gluteal vein — *v. Hypogastrique*, Hypogastric vein—*v. de Médine*, Dracunculus—*v. Porte*, Porta vena—*v. Prélombothoracique*, Azygous vein — *v. Préparate*, Facial vein—*v. Radiale cutanée*, Cephalic vein—*v. Sans paire*, Azygous vein — *v. Trachélo-sous-cutanée*, Jugular vein, external.

VEINES ARTÉRIELLES, Arterial veins — *v. Ciliaires*, Ciliary veins—*v. Sous-clavières*, Subclavian veins—*v. Sus-hépatiques*, Hepatic veins.

VEINEUX, Venous.

VEINSTONE Phlebolite.

VEINULE, (dim. of *veine*,) Venula.

VEJUCO DE MAVACURE, see Curare.

VELAMEN ('a covering') NATIVUM, Integument.

VELAMENTA (pl. of *velamentum*, 'a covering') BOMBYCINA, Villous membranes — v. Cerebralia, Meninges—v. Infantis, Membranes of the fœtus.

VELAMENTUM ('a covering') ABDOMINALE, Peritonæum — v. Corporis commune, Integument — v. Linguæ, Glossoëpiglottic ligament —v. Nativum, Integument.

VÉLAR, Erysimum.

VELLICATION, (*vellicare*, *vellicatum*, 'to twitch,') Tic.

VELOSYNTHESIS, (*velum*, and *συνθεσις*, 'a putting together,') Staphylorraphy.

VELUM, 'a veil, a cover,' Velum pendulum palati — v. Apophysi vermiformi obtentum, Valvula Vieussenii — v. Interjectum cerebelli, Valvula Vieussenii — v. Medullare anticum, Valvula Vieussenii.

VE'LUM MEDULLA'RE INFE'RIUS, (F.) *Voile mé-*

dullaire inférieur. A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

Velum Medulla'rē Poste'rius seu Posti'cus seu Semiluna'rē, *Val'vula Tari'ni.* The small posterior valve of the cerebellum; a thin medullary plate, situate between the medulla oblongata and vermis inferior, in front of the nodulus.

Velum Palati, Velum pendulum palati—v. Palatinum, Velum pendulum palati.

Velum Pen'dulum Pala'ti, 'pendulous veil of the palate.' *Ve'lum, V. Palati'num* seu *Pala'ti* seu *Pen'dulum* seu *Staphyli'num, Pala'tum pen'dulum* seu *mol'lē* seu *mob'ilē, Pen'dulum* seu *Claus'trum Pala'ti, Pala'tum Mol'lē, Soft Pal'ate,* (F.) *Septum Staphylin* (Ch.), *Voile du Palais.* A movable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its *anterior surface* corresponds to the mouth; the *posterior* to the pharynx. Its *superior edge* is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle — the *uvula.* The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars;* the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glossostaphylini, the pharyngostaphylini and the palatostaphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glossopharyngeal nerve, likewise, sends it some filaments.

Velum Pupillæ, Pupillary membrane — v. Staphylinum, Velum pendulum palati—v. Vieussenii, Valvula Vieussenii.

VELVET LEAF, Abutilon Avicennæ, Pareira.

VENA, Vein, Penis, — v. Alba renum, Ureter — v. Alba thoracis, Thoracic duct — v. Apoplectica, Jugular vein, internal — v. Arteriosa, Porta vena, Pulmonary artery — v. Capitis, Cephalic vein—v. Cava, Cava vena—v. Cubiti interior, Basilic vein—v. Demiazygos, see Azygos—v. Diploeticæ, see Diploic — v. Falcis cerebri, Sinus longitudinalis inferior—v. Galeni, see Cardiac veins, and Choroideæ venæ—v. Hemiazyga, see Azygous vein—v. Lactea, Porta vena—v. Lienalis, Splenic vein—v. Magna, Porta vena—v. Medina Arabum, Dracunculus — v. Medinensis, Dracunculus —v. Ostiaria, Porta vena—v. Pari carens, Azygos, (vena)—v. sine Pari, Azygos, (vena)—v. Portalis, Porta vena—v. Portarum, Porta vena—v. ad Portas, Porta vena—v. quæ ad Portas est, Porta vena — v. Præparata, Facial vein — v. Ramalis, Porta vena — v. Splenica, Splenic vein — v. Stelechiæa, Porta vena—v. Subalaris, Vena axillaris—v. Terminalis, Circulus venosus.

VENÆ, pl. of Vena — v. Apoplecticæ, Jugular veins — v. Cavæ hepatis, Hepatic veins—v. Centrales, Intralobular veins — v. Concomites, see Vein — v. Galeni, Choroid, (veins) — v. Innominatæ, see Innominatum—v. Intralobulares, Intralobular veins—v. Lacteæ, Chyliferous vessels—v. Lymphaticæ, Lymphatic vessels — v. Micantes, (arteries,) see Artery — v. Pulsatiles, (arteries,) see Artery—v. Satellites, see Vein—v. Soporales, Jugular veins — v. Spermaticæ, Spermatic veins — v. Sphagitides, Jugular veins.

Venæ Vortico'sæ. The veins which principally form the external or venous layer of the choroid coat of the eye; so called from their peculiar arrangement; (from *vertex* seu *vortex,* 'a whirlpool.')

VENÆSECTIO, (*vena,* 'a vein,' and *secare, sectum,* 'to cut,') see Bloodletting—v. Revulsoria, see Bloodletting.

VENAL, Venous.

VENEFICIUM, (*venenum,* and *facere,* 'to make,') Poisoning.

VENENATION, (from *venenum,*) Poison, Poisoning, Venom.

VENENATUS, Venomous.

VÉNÉNEUX, Poisonous.

VENENOSE, Venomous.

VENENUM, Poison, Venom.

VENE'REAL, *Vene'reus, Aphrodisi'acus Vene'rean,* (F.) *Vénérien,* (from *Venus,* gen. *Ven'eris,* 'the goddess of pleasure.') That which relates to the pleasures of love. In a more restricted sense, the word *vene'real*—as well as *aphrodit'ic*—is synonymous with *syphilit'ic,* and also with *syphilis.* Some authors have proposed that those diseases which are produced by excess in venery should be called *vene'real;* and that *syphilit'ic* should be limited to those which are the result of impure connexion. It is, also, used in the same sense as aphrodisiac,—adapted to excite venereal desire.

Venereal Desire, Libido — v. Diseases, Syphilis.

VÉNÉRIEN, Venereal. Also, one labouring under syphilis; as *Hôpital des vénériens.*

VENERIVAGUS, (*venus,* gen. *veneris,* 'the pleasures of love,' and *vagare,* 'to wander,') Libidinous.

VEN'ERY, (from *venus,* gen. *vene'ris.*) The pleasures of love. Sexual communication. Coition.

VENESECTION, (*vena,* 'a vein,' and *secare, sectum,* 'to cut,') see Bloodletting.

VENIMEUX, Venomous.

VENIN, (from *venenum.*) Venom.

VENO BENO, see Falsification, table of.

VEN'OM, *Vene'num, Tox'icum, Venena'tion,* (F.) *Venin.* A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus,* as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.

Venom, Quickening, Sperm—v. Vital, Sperm.

VEN'OMOUS, *Venena'tus, Ven'enose,* (F.) *Venimeux.* An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., as well as to the venom itself; and, by some, to liquids in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. Virus is more commonly used in this case.

VENOSITAS, (from *vena,* 'a vein,') Venosity —v. Sanguinis, Prædominium sanguinis venosi.

VENOS'ITY, *Venos'itas, Ve'nousness, Ve'nous state* or *cachex'ia, Malanæ'mia, Melano'sis universa'lis,* (F.) *Mélanémie,* (from *vena,* 'a vein.') A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c. In general, it signifies abundance of veins in a part; afflux of blood into the veins.

VE'NOUS, *Ve'nal, Veno'sus,* (F.) *Veineux,* (from *vena,* 'a vein.') Appertaining to a vein, or to the blood of the veins; as *venous* cachexia, *venous* pulse.

Venous Cachexia, Venosity — v. Hum, *Bruit de Diable* — v. State, Venosity — v. System, see Vascular—v. System, abdominal, Porta vena.

Ve'nous Sys'tem of Ja'cobson. A system of vessels in the three classes of vertebrated ani-

mals other than the mammalia, which forms a communication between the vena porta and the vena cava.

VENOUSNESS, Venosity.

VENT, ([L.] *ventus*,) Wind.

VEN'TER, gen. *Ventris*, Abdomen, Belly, Uterus. In law, venter designates the maternal parentage of children. Thus, if A were B's child by his first wife, he would be described in law as 'by the first *venter*.' 'A died seised, leaving two infant daughters by different *venters*.'

VENTER IMUS, 'lowest belly,' Abdomen, Hypogastrium—v. Inferius, Abdomen — v. Infimus, Abdomen — v. Magnus, Ingluvies — v. Medius, Thorax—v. Musculi, see Muscle—v. Parvus, Hypogastrium—v. Propendens, Hysteroloxia anterior — v. Renum, Pelvis of the kidney— v. Supremus, Cavum cranii.

VENTEUX, (from *ventus*, 'wind,') Windy.

VENTILA'TION, *Ventila'tio*, (from *ventilare*, *ventilatum*, 'to fan;') (F.) *Ventilation*, *Aérage*, *Aération*. The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities, and where numbers are crowded together, a large amount of zymotic or fermentable matter is exhaled from the lungs, and taken in again during respiration. This is, indeed, a great cause of the mortality which occurs in camps and cities, and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air, and various arrangements have been made for this purpose in hospitals and similar establishments. They are almost all, however, based on the renewal of air by suction, forcing, or both.

Ventilation is one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOSITY, (from *ventus*, 'wind,') Flatulence.

VENTOUSES SCARIFIÉES, (from *ventosus*, 'full of wind,') Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping dry.

VEN'TRAL, (from *venter*, 'the belly.') Abdominal.

VENTRAL HER'NIA, *Her'nia ventra'lis*. Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

VENTRALE, 'a belly band,' Belt (Russian.)

VENTRALE CUTA'NEUM, 'cutaneous apron.' (F.) *Tablier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

VENTRE, (from *venter*, 'the belly,') Abdomen —*v. Inférieur*, Abdomen —*v. Relâché*, see Diarrhœa—*v. Resserré*, Constipation.

VENTRE INSPICIENDO DE, see De ventre inspiciendo.

VEN'TRICLE, *Ventric'ulus*, (dim. of *venter*, 'a belly.') (F.) *Ventricule*. Literally, a *little belly*. A name given, in anatomy, to various parts.

VENTRICLE OF ARAN'TIUS. A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventric'uli* seu *Cavita'tes* seu *Si'nus Cer'ebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lat'eral ven'tricles*, *mid'dle ven'tricle*, *fourth ven'tricle* or *ven'tricle of the cerebel'lum*, and *fifth ven'tricle*. The *mid'dle ven'tricle* or *third ven'tricle*, (F.) *Ventricule moyen du cerveau*, is situate in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticorum; *anteriorly*, by a medullary cord, called the *anterior commissure*; and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lat'eral ven'tricles*, *Ventric'uli latera'les* seu *mag'ni* seu *majo'res* seu *prio'res* seu *superio'res* seu *tricor'nes*, (F.) *Ventricules latéraux*, are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral substance; and, *internally*, they are separated from each other by the septum of the ventricles, —a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Cor'pora stria'ta*, *Thal'ami op'tici*, and *Tæ'nia semicircula'ris*: — their inferior portion contains the *cor'pus fimbria'tum*, *cor'nu Ammo'nis*, &c. Each of the ventricles has a *body* or *centre* —*cella me'dia*—and *horns*, cornua. The *Fourth ventricle*, *Ventric'ulus cerebel'li* seu *quar'tus* seu *Aran'tii*, *Si'nus rhomboïdeus*, (F.) *Quatrième ventricule*, is situate beneath the *aqueduct of Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth ven'tricle*, *Ventric'ulus sep'ti pellu'cidi*, *Incisu'ra sep'ti*, (F.) *Cinquième ventricule*, is the small serous cavity between the laminæ of the septum lucidum; called, also, *Sinus of the septum lu'cidum*, *S. of the medium septum* (Ch.).

VENTRICLES OF THE HEART, *Ventric'uli cor'dis*, *Spe'cus cor'dis*, (F.) *Ventricules du cœur*, are two in number. The *Right ven'tricle*, *Pul'monary ven'tricle*, *Ventric'ulus ante'rior* seu *pri'mus* seu *pulmona'lis*, (F.) *Ventricule droit* ou *pulmonaire*, is situate at the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Colum'næ car'neæ* and *Cor'dæ tendineæ*. The right ventricle communicates with the right auricle by the *Os'tium veno'sum*, and from it the *Pul'monary ar'tery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left ven'tricle*, *Ventric'ulus aör'ticus* seu *poste'rior* seu *accun'dus*, (F.) *Ventricule gauche* ou *aortique*, is situate at the posterior and left part of the heart. Its parietes are thrice thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ carneæ* and *Cor'dæ tendin'eæ* are, however, much stronger. It communicates with the left auricle by means of the *Mi'tral valve*; and from it proceeds the largest bloodvessel of the body — the aorta.

VENTRICLES OF THE LAR'YNX, *Ventric'uli* seu *Sac'culi laryngæ'i*, *Ventric'uli Morgagn'ii*, *Si'nuses of the lar'ynx*, (F.) *Ventricules* ou *Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, V. right.

VEN'TRICOUS, *Ven'tricose*, *Ventrico'sus*, (F.) *Ventru*. Bellied. Having a large belly.

VENTRIC'ULAR, *Ventricula'ris*, (F.) *Ventriculaire*. Relating to a ventricle.

VENTRICULE, Ventricule.

VENTRICULE AORTIQUE, Ventricle, left — *v. Cinquième*, Ventricle, fifth — *v. Droit*, Ventricle, right—*v. Gauche*, Ventricle, left—*v. Moyen du Cerveau*, Ventricle, middle, of the brain — *v. Pulmonaire*, Ventricle, right—*v. Quatrième*, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain—*v. du Cœur*, Ventricles of the heart — *v. Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, (pl. of *ventriculus*,) Ventricles of the heart—v. Dilatatio, Gastrectasis — v. Dissolutio, Gastromalacia — v. Duræ matris, Sinuses of the dura mater—v. Emollitio, Gastromalacia—v. Exulceratio, Gastrelcosis—v. Fluxus, Gastrorrhœa — v. Inflammatio, Gastritis — v. Laryngei, Ventricles of the larynx — v. Laterales, see Ventricles, lateral, of the brain — v. Magni, Ventricles, lateral, of the brain—v. Majores, Ventricles, lateral — v. Metamorphosis gelatiniformis, Gastromalacia — v. Morgagnii, Ventricles of the larynx — v. Perforatio, Gastrobrosis — v. Priores, Ventricles, lateral—v. Pseudophlogosis resolutiva et colliquativa, Gastromalacia — v. Superiores, Ventricles, lateral — v. Tricornes, Ventricles, lateral — v. Ulceratio, Gastrelcosis.

VENTRICULUS, (dim. of *venter*, 'belly,') Stomach, Ventricle—v. Anterior, Ventricle, right —v. Aorticus, Ventricle, left—v. Arantii, see Ventricles of the brain.

VENTRICULUS CALLO'SUS, 'callous stomach.' The *gizzard* or *third stomach* of the gallinaceous bird. (F.) *Gésier*. It consists of a doublebellied or *digastric* muscle; is lined by a firm cuticle, and forms a kind of pouch, depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturia'tus* issues. In the interior of the gizzard there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS CEREBELLI, see Ventricles of the brain — v. Intestinalis, Abomasus — v. Posterior, Ventricle, left — v. Primus, Ventricle, right — v. Pulmonalis, Ventricle, right — v. Quartus, see Ventricles of the brain — v. Secundus, Ventricle, left — v. Septi Pellucidi, see Ventricles of the brain — v. Succenturiatus, Duodenum; see Ventriculus Callosus.

VENTRIÈRE, (from *venter*, 'belly, uterus,') Midwife.

VENTRILOQUE, (*venter*, 'belly,' and *loquor*, 'to speak,') Engastrimythus.

VENTRILOQUISM, see Engastrimyth.

VENTRILOQUIST, Engastrimyth.

VENTRILOQUY, see Engastrimyth.

VENTRIOSUS, (from *venter*,) Abdominous.

VENTRIPOTENT, (*venter*, and *potens*, 'powerful,') Abdominous.

VENTROSITAS, (from *venter*,) Physconia.

VENTROSUS, Abdominous.

VENTS, (pl. of *vent*, [L.] *ventus*, 'wind,') Flatulence.

VENTUS, Wind.

VE'NULA, (dim. of *vena*,) *Phleb'ion*. See Vein. (F.) *Veinule*, *Vénule*. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENULÆ CENTRALES, Intralobular veins — v. Intralobulares, Interlobular veins.

VÉNULE, Venula.

VENUS, gen. *Ven'eris*, 'the goddess of love,' Clitoris, Coition, Cuprum, Venery — v. Crystals of, Cupri subacetas — *v. Crystaux de*, Cupri subacetas.

VER, (from *vermis*,) Worm — *v. Cucurbitin*, Tænia solium — *v. Cutané*, Dracunculus — *v. Filaire*, Dracunculus—*v. de Guinée*, Dracunculus—*v. Luisant*, Cicindela—*v. de Médine*, Dracunculus —*v. Sanguin*, Hæmatozoon—*v. Solitaire*, Bothriocephalus latus, Tænia solium.

VÉRAIRE BLANC, Veratrum album.

VÉRATRE BLANC, Veratrum album.

VERATRIA, Veratrina.

VERATRI'NA, *Vera'tria*, *Veratri'num*, *Ver'atrin*, *Ver'atrine*, (from *veratrum*.) A vegetable alkali, found in the seeds of *Vera'trum sabadil'la*, *V. officina'lē*, *Helo'nias officina'lis*, and *Asagræ'a officina'lis*, which are known in commerce under the names *Cebadill'a*, *Cevadill'a*, and *Sebadill'a*, and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black colour, and are shining, flat, shrivelled, winged, and elastic seeds. *Veratrine* is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances,—*Sabadil'lin*, *Ver'atrin*, gum resin of the sabadilla, and black greasy matter. It is extremely poisonous, and but little used internally in medicine. Magendie gave it as an emetic and drastic in very small doses. It has been recommended to be applied in the way of friction, or endermically, (from gr. v to xx to ʒj of lard or cerate,) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States: — Take of *Ceradilla*, ℔ij; *Alcohol*, 2 gallons; *Sulphuric acid*, *Solution of ammonia*, *Purified animal charcoal*, and *Magnesia*, each a sufficient quantity. Boil the cevadilla in a gallon of the alcohol, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the alcohol, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining alcohol, and with that distilled in the previous operation. Press the cevadilla, mix and strain the liquors, and, by means of a waterbath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of syrup. Add magnesia in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquor, boil the residue for fifteen minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the veratria. Lastly, separate and dry the precipitate.

An analogous form is given in the British Pharmacopœia for 1864.

VERATRINE, Veratrina.

VER'ATRINE or VERA'TRIA, SUL'PHATE OF, *Vera'triæ sul'phas*, (F.) *Sulfate de Vératrine*, possesses the same virtues as veratrine. A solution of one grain in two ounces of distilled water has been suggested as a substitute for the *Eau médicinale d'Husson* — a celebrated gout remedy — in the dose of fʒj to fʒij.

VERATRINUM, Veratrina.

VERA'TRUM AL'BUM, (*verē atrum*, 'truly black,' from the colour of the roots [?]). *Helleb'orus al bus*, *Elleb'orum al'bum*, *Elleb'orus al'bus*,

Chei'lanthum, White hel'lebore, Laug'wort, (F.) *Vératre blanc, Hellébore ou Ellébore blanc, Véraire blanc, Varaire, Tue-chien. Sex. Syst.* Polygamia Monœcia. *Nat. Ord.* Melanthaceæ (Lindley). The root or rhizoma of this common European plant is indebted to the veratrine for its properties. It is inodorous; has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder;* but it operates with great violence. It forms, also, an itch ointment. See Unguentum Veratri.

VERATRUM LUTEUM, Chamælirium luteum.

VERATRUM SABADIL'LA, *Sabadil'la, Sabatil'la, Cu'nis Interfec'tor, Caus'ticum Americ'anum, Cevadil'la Hispano'rum, Sevadil'la, Hor'denm caus'ticum,* (F.) *Cévadille.* The seed — dried fruit — of this plant, *Sabadil'la, Cevadil'la,* (Ph. U. S. and Ph. B.) have been used mostly as anthelmintics. Dose, gr. ij to a child four years old. It possesses the same general properties as the veratrum album.

VERATRUM VIR'IDĒ, *Amer'icon Hel'lebore, Swamp hel'lebore, In'dian poke, In'dian Un'cus, Poke'weed, Bear'weed, Itch'weed, Tickleweed, Earth'gall, Dev'ilbit, Wolf'bane, Pup'pet root,* is indigenous in the swampy districts of almost every part of the United States. The properties of the rhizoma are like those of the genus. It has been brought forward, however, in recent times, in the Southern States, as a powerful sedative in inflammatory diseases. Dose, eight drops of a saturated tincture, every three hours, until its sedative effects are induced.

VERBASCULUM, Primula veris.

VERBASCUM ALATUM, (supposed to be a corruption from *barbascum,* 'bearded,' owing to its hairy coat; *barba,* 'a beard,'[?]) V. thapsus — v. Album, V. thapsus—v. Collinum, V. thapsus—v. Crassifolium, V. thapsus — v. Elongatum, V. thapsus—v. Lychnitis, V. thapsus—v. Montanum, V. thapsus.

VERBAS'CUM NI'GRUM, *Cande'la re'gia, Thap'sus barba'tus, Tap'sus barba'tus, Candela'ria, Lana'ria, Black Mul'lein;* and VERBAS'CUM THAP'SUS, *V. thapsoï'des* seu *ala'tum* seu *colli'num* seu *al'bum* seu *crassifo'lium* seu *elonga'tum* seu *lychni'tis* seu *monta'num* seu *sim'plex, Phlog'mus, Phlo'mus, Phlox, Great broadleaved or yellow Mul'lein, High Ta'per, Cow's Lung'wort,* (F.) *Molène, Bouillon blanc, Bonhomme, Cierge de notre dame, Herbe Saint-Fiacre. Ord.* Scrophulariaceæ, *Sex. Syst.* Pentandria Monogynia, — especially the latter, — have been used as emollients, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

VERBASCUM SIMPLEX, V. thapsus — v. Thapsoides, V. thapsus — v. Thapsus, see V. nigrum.

VERBE'NA HAS'TATA, *V. paniculu'ta, Blue ver'vain, Sim'plet's Joy,* an American species, is more bitter than the European, and said to be emetic.

VERBENA OFFICINA'LIS, *Verbena, Dichro'mus, Verbe'naca, Periste'rium, Hierobot'anē, Her'ba sa'cra, Ver'vain, Pur'vain,* (Prov.) *Ber'bine, Juno's Tears,* (F.) *Verveine, Herbe à tous les maux. Ord.* Verbenaceæ. *Sex. Syst.* Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in scrofula. It is not used.

VERBENA PANICULATA, V. hastata.

VERBENA URTICIFO'LIA, an indigenous species, has been used in poisoning from Rhus Toxicodendron.

VERBENACA, Verbena officinalis.

VERBESINA ACMELLA, (changed from *verbena,* [?]) Spilanthus Acmella.

VERBESI'NA VIRGIN'ICA, *Crown Beard.* Indigenous. *Order,* Compositæ. A decoction of the roots is used by the Indians as a diaphoretic and depurative.

VERCOQUIN, (*ver,* 'a worm,' and *coquin,* 'a rascal,') *Phreni'tis vermino'sa.* A form of phrenitis, attributed to the presence of a worm in the brain!

VERDET, (from *verd,* [L.] *viridis,* 'green,') Cupri subacetas.

VERDIGRIS, (from [F.] *verd,* [L.] *viridis,* 'green,' and *gris,* 'gray,') Cupri subacetas.

VERENDA, (from *vereor,* 'to reverence,') Genital organs.

VERETRUM, (from *vereor,* [?]) Penis.

VÉRETTE, Varicella.

VERGE, (from [L.] *virga,* 'a rod,') Penis — *v. d'Or,* Solidago vigaurea.

VERGERETTE DE PHILADELPHIE, Erigeron Philadelphicum.

VERGETTURES, (from *virga,* 'a rod,') Vibices.

VERJUICE, *Om'phacē, Ompha'cion, Ompha'cium,* (F.) *Verjus, Verdjus,* (*verd,* 'green,' and *jus,* 'juice.') 'The juice of green fruits.' A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crabapples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See Vitis vinifera.

VERJUS, Verjuice.

VERMES, (pl. of *vermis,*) Worms — v. Cerebri, Choroid plexus — v. Intestini, see Worms.

VERMICELLI (L.), (from [L.] *vermiculus,* dim. of *vermis,* 'a worm,' from its resemblance,) see Turundæ Italicæ.

VERMICULAIRE BRÛLANTE, Sedum.

VERMICULAR, (dim. of *vermis,* 'a worm,') Vermiform. Also, wormlike; as the *vermicular* or wormlike motion of peristole.

VERMICULARIS, Lumbricalis, Sedum.

VERMICULI SPERMATICI, (pl. of *vermiculus,* dim. of *vermis,* 'a worm,') Spermatozoa.

VERMIC'ULUM, *Vermyc'ilum.* An elixir; a tincture, according to Ruland and Johnson.

VERMICULUS CAPILLARIS, 'hair worm,' Dracunculus.

VER'MIFORM, *Vermic'ular, Vermicula'ris, Vermifor'mis,* (F.) *Vermiculaire, Vermiforme,* (*vermis,* 'a worm,' and *forma,* 'form.') That which resembles a worm.

VER'MIFORM PROC''ESSES, *Proces'sus* seu *Protuberan'tiæ* seu *appen'dices vermifor'mes, Ver'mes, Montic'uli cerebel'li, Worms,* (F.) *Éminences vermiformes du cervelet,* are two medullary projections at the surface of the cerebellum. The *supe'rior ver'miform proc''ess, Ver'mis supe'rior cerebel'li,* is an elongated projection at the anterior and middle part of the superior surface of the cerebellum; and the *infe'rior ver'miform proc''ess, Ver'mis infe'rior cerebel'li, Pyr'amid of Malacarne',* is a somewhat larger projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions, — the *pyramid,* the *uvula,* and the *nodulus.* The anterior portion of the superior vermiform process is elevated, and termed *Montic'ulus.*

VERMIFUGE, (*vermis,* 'a worm,' and *fugare,* 'to drive away,') Anthelmintic.

VERM'IFUGE, MATHIEU'S. This consisted of two distinct electuaries; the one for killing, the other for expelling tapeworm. The former is

made of an ounce of *tin filings*, and six drachms of *fern root*.

VERMIFUGUS, (Vermifuge,) Anthelmintic.

VERMILION, (from *ver*, 'a worm,' the colour being like that from the cochineal insect. It also means cochineal,) Hydrargyri sulphuretum rubrum.

VERMILLON DE PROVENCE, Antimonii sulphuretum rubrum.

VERMINATIO, (from *vermis*, 'a worm,') Helminthiasis, Vermination.

VERMINATION, Helminthiasis — v. Cutaneous, Malis.

VERMINEUX, Verminous.

VERM'INOUS, *Vermino'sus*, (F.) *Vermineux*, (from *vermis*, 'a worm.') That which is caused by worms; as 'a *verminous affection*.'

VERMIS, (from *vertere*, 'to wind about,' [?]) see Vermiform processes — v. Bombycinus, Cornu ammonis — v. Cerebelli, Vermiform process — v. Cerebri, Fever, Hungary—v. Cucurbitinus, Tænia solium — v. Digiti, Paronychia.

VERMITIO, (from *vermis*, 'a worm,') Helminthiasis.

VERNIX CASEO'SA, 'cheesy varnish,' (F.) *Vernis Caséeux*. The fatty varnish, or deposit, often found on the fœtus, which is secreted by the sebaceous follicles of the skin.

VERNIX SICCA, 'dry varnish,' Sandarac.

VERNO'NIA ANTHELMIN'TICA, (after William Vernon, an English botanical traveller in North America,) *Ascari'cida anthelmin'tica*, *Calagi'rah*, *Calage'ri*. A plant which is indigenous in India. *Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic in cases of ascarides and lumbrici in children.

VERNONIA NOVEBORACEN'SIS, *Iron weed*, *Flat top*; an indigenous plant, whose purple flowers appear in August and September, is reported to possess cathartic properties.

VÉROLE, (from *varius*, 'spotted,' [?]) Syphilis—*v. Grande*, Syphilis—*v. Grosse*, Syphilis—*v. Petite*, Variola — *v. Petite volante*, Varicella.

VÉROLÉ, Syphilitic.

VÉROLETTE, (dim. of *vérole*,) Varicella.

VÉROLIQUE, Syphilitic.

VERONI'CA OR VERON'ICA, after St. Veronica, *V. officina'lis* seu *Tournefor'tii* seu *mas*, *The'a German'ica*, *Beton'ica Paul'i*, *Chamæ'drys*, *Male Veronica*, *Fluel'lin*, *Offic''inal Speed'well*, *Eye'bright*, *Paul's Bet'ony*, (F.) *Véronique*, *Thé d'Europe*, *Herbe aux ladres*. *Ord.* Scrophulariaceæ. *Sex. Syst.* Diandria Monogynia. This plant was once used as a pectoral.

VERONICA AQUATICA, V. beccabunga.

VERONICA BECCABUN'GA, *Beccabun'ga*, *Anagal'lis* seu *Veronica aquat'ica*, *Lu'ver German'icum*, *Cepæ'a*, *Wa'ter Pim'pernel*, *Brook'lime*, *Brook'lime Speed'well*, *Wa'ter Speed'well*, *Neck'weed*, *Wa'ter Pur'slain*, (Sc.) *Wa'terpur'pie*, (F.) *Véronique cressonée*. This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous, and has been long banished from practice.

VERONICA MAS, Veronica—v. Officinalis, Veronica.

VERONICA PEREGRI'NA, *Neck'weed*, *Pur'slain*, *Speed'well*; indigenous; flowering from April to June, has been given internally in scrofulosis, and is applied as a wash to scrofulous tumours.

VERONICA PURPUREA, Betonica officinalis—v. Tournefortii, Veronica—v. Virginica, Leptandra Virginica.

VÉRONIQUE, Veronica—*v. Cressonée*, Veronica beccabunga.

VERPA, Penis.

VERPUS, Circumcisus, Medius digitus.

VERRE, Vitrum—*v. d'Antimoine*, Antimonii vitrum.

VERRU'CA, dim. *Verru'cula*, *Ecphy'ma verru'ca*, *Phymato'sis verruco'sa*, an *Excrescence*, a *Wart*, (Prov.) *Wret*, (F.) *Verrue*, *Poireau*. A small, hard, mamillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA CARNOSA, Condyloma — v. Formicaria, Formica.

VERRUCA MINOR, Thymion—v. Palpebrarum, see Hydatid—v. Pensilis, Acrochordon—v. Rhagoïdea, Thymion.

VERRUCA NECROGEN'ICA. A name proposed for productions of morbid epithelium, caused, in dissecting, by the acrid fluids of the dead body.

VERRUCARIA, (from *verruca*,) Calendula officinalis, Heliotropium Europæum.

VERRUCOSE, Warty.

VERRUCOUS, Warty.

VERRUCULA, (dim. of) Verruca.

VERRUE, Verruca.

VERRUQUEUX, Warty.

VERS, pl. of *Ver*, Worms.

VERSE CHARMS, see Charm.

VERSIO, (*vertere*, *versum*, 'to turn,') Turning — v. Fœtûs, Turning — v. Spontanea, Evolution, spontaneous—v. Uteri, Hysteroloxia.

VERSION, Turning—v. Cephalic, see Turning —v. Podalic, see Turning.

VERT-DE-GRIS, ([F.] *vert*, 'green,' and *gris*, 'gray,') Cupri subacetas.

VERTEBRA DENTATA, 'toothed vertebra,' Axis — v. Dorsi Prima, Lophia — v. Lumborum Prima, Asphaltites—v. Magna, Sacrum—v. Proëminens, see Vertebra.

VER'TEBRÆ, pl. of *Vertebra*, *Spon'dyli*, *Spon'dles*, *Whet'lebones*, (F.) *Vertèbres*, (from *vertere*, 'to turn.') This name has been given to the bones which by their union form the vertebral or spinal column. The vertebræ are short, thick, very angular bones, twenty-four in number, and situate one above another. The *body—centrum*, of Owen—of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibrocartilage, with the contiguous vertebræ. The *Proc''esses*, (F.) *Masses apophysaires*, of each vertebra are: — 1. The *spi'nous proc''ess*, situate behind, and in the median line. 2. The two *trans'verse proc''esses*, standing off from each side. 3. The four *artic'ular* or *oblique' proc''esses—zygapophyses*, of Owen—two *supe'rior*, and two *infe'rior*—which serve to unite the vertebræ with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison*, through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of *ring* of the lateral and posterior parts of the vertebra; and the foramen within this,—that is, between the body and processes, *fora'men vertebra'lē rachid'inum*,—concurs in forming the vertebral canal. The *arch* or *lam'ina* of a vertebra, *neurapoph'ysis*, is the part from which the several

processes project. The vertebræ have particular characters, according to the regions they occupy. They are divided into seven *cer'vical*, twelve *dor'sal*, and five *lum'bar*. The first cervical is called *at'las;* the second, *ax'is* or *ver'tebra den-ta'ta;* and the seventh, *ver'tebra proëm'inens*. The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs by their articulating surfaces—*parapoph'yses*. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra of the sacrum. The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

VER'TEBRAL, *Vertebra'lis*. That which relates or belongs to the vertebræ.

Vertebral Ar'tery, *Poste'rior cer'ebral ar'tery* (Ch.), is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertébral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to unastomose with its fellow of the opposite side, and to form the *Bas'ilary ar'tery*. Besides the branches sent to the neck, the vertebral artery gives off the *ante'rior* and *poste'rior spi'nal ar'teries*, and the *infe'rior cerebel'lous*, in the cavity of the cranium.

Vertebral Canal, see Vertebral column.

Vertebral Col'umn, *Rac'his, Rha'chis, No'tus, Aeucs'tis, Cari'na, C. hom'inis, Spi'na, S. dor'si* seu *vertebra'lis, Colum'na spina'lis* seu *vertebra'lis* seu *dor'si, Dor'sum, Ter'gum, Compa'ges Vertebra'rum, Acan'tha, Sa'cra fis'tula, Hi'eva Sy'rinx, Spine, Backbone*, (Sc.) *Backsprent*, (F.) *Colonne vertébrale, Épine du dos, Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid, and hollowed by a *canal* called *ver'tebral*, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also in the dorsal region a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *ante'rior* or *prespi'nal* surface; a *poste'rior* or *spi'nal;* two *lat'eral;* a *base;* and an *a'pex* or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trache'lian;* in the back, *predor'sal;* and in the loins, *prelum'bar*. The dorsal surface has at its middle the spinous processes; and at its sides the *ver'tebral gut'ters*, (F.) *Gouttières vertébrales*, formed by the union of the *ver'tebral plates*, (F.) *Lames vertébrales*, which, by their junction, constitute the spinous processes. These are filled by the sacrospinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *ver'tebral not'ches*, (F.) *Échancrures vertébrales:* These are called *ver'tebral foram'ina*, (F.) *Trous de conjugaison*, and give passage to the *ver'tebral nerves*. The base of the vertebral column is oblique, to unite with the sacrum, and forms with it an angle called *sa'crover'tebral an'gle* or *prom'ontory*. The *a'pex* or *top* of the vertebral column is articulated with the occipital bone. Sometimes the term *ver'tebral col'umn* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Ver'tebral* or *Spi'nal* or *Rachid'ian Canal', So'len, Cana'lis vertebra'lis* seu *medul'læ Spina'lis, Spe'cus pro medul'la Spina'li* seu *vertebra'lis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *The'ca vertebra'lis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

Vertebral Disease', *Rachial'gia* (of some), *Ca'ries of the Ver'tebræ, Spondylarthroc'acé, Spondyloc'acē, Kypho'sis inflammato'ria* seu *paraly't'ica, Gibbos'itas cario'sa, Ca'ries vertebra'rum, Spondylal'gia, Spondylopyo'sis, Tuberculo'sis Vertebra'rum*. The spinal column is liable to distortion (see Hump), at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and hence it has been called by the French, *Maladie de Pott, Malum* seu *Gib'bus Pott'ii, Pott's disease* or *cur'vature*. It usually occurs in scrofulous subjects, and the treatment consists in establishing a counterirritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebræ. The sore must be suffered to remain open, and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

Vertebral Lig'aments, (F.) *Ligaments vertébraux, Surtouts ligamenteux de la colonne vertébrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipitoäxoid ligament, and seated behind the bodies of the vertebræ, from the axis to the sacrum.

Vertebral Nerve, Trisplanchnic.

Vertebral Nerves, *Spi'nal Nerves*, (F.) *Nerfs rachidiens*, spring successively from the spinal marrow, from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *ante'rior*, from the *an'terior* or *an'terolat'eral col'umn* of the spinal marrow, and the other *poste'rior*, from the *poste'rior* or *pos'terolat'eral col'umn*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See Nerves.

VER'TEBRATED, *Vertebra'tus*, (F.) *Vertébré*. Provided with vertebræ.

VERTÈBRES, Vertebræ.

VERTEBRODYMIA, (*vertebra*, and *ἐνεω*, 'to mingle,') see Somatodymia.

VERTEBROÏLIAC LIGAMENT, Ileolumbar ligament.

VERTEX, gen. *Ver'ticis, Cor'yphē, Corys, Acrori'a, Spon'dylus*. The top or highest part or *crown* of the head, (F.) *Sommet;* (Sc.) *Can'tel, Now, Pal'lat, Pal'ad*. See Sinciput.

Vertex Cordis, Mucro Cordis—v. Cubiti Oleeranon—v. Palpitans, Fontanella.

VERTIBULUM, (from *vertere*, 'to turn.') The rounded head of a bone; a joint; trepan.

VERTICULA, (from *vertere*, 'to turn,') Articulation.

VERTICULUM, Articulation.

VERTICULUS, Articulation.

VERTIGE, Vertigo.

VERTIG''INOUS, *Vertigino'sus*, (Old Eng. and Prov.) *Tutty*, (F.) *Vertigineux*. Relating or pertaining to vertigo; *Gid'dy*. *Diz'zy*.

VERTI'GO, gen. *Vertig''inis*, (from *vertere*, 'to turn,') *Di'nos*, *Ilin'gos*, *Di'nus* seu *Hallucina'tio* seu *Antal'gia verti'go*, *Circumgyra'tio*, *Gid'diness*, *Diz'ziness*, *Swim'ming of the head*, (Prov.) *Swce*, *Swin'nying*, (F.) *Vertige*, *Étourdissement*. A state in which it seems that all objects are turning round, or that the individual himself is performing a movement of gyration. Two varieties have been designated;—*sim'ple verti'go*, where the objects are seen; and *scotodyn'ia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain as affected by the circulation, and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICOSA, Scotodynia.

VERUGAS, (S.) (from *verruca*, 'a wart.') A peculiar disease, affecting certain localities of Peru, which manifests itself by sorethroat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of Surea, called *Aqua de Veruga*.

VERU MONTANUM, 'a mountain spit,' Gallinaginis caput.

VERVAIN, Verbena officinalis—v. Blue, Verbena hastata.

VERVEINE, Verbena officinalis.

VESA'NIA, *Vesa'niæ*, (from *ve*, negative, and *sanus*, 'sound,') 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term, under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and some even hydrophobia. See Nosology.

VESANIA MANIA, Mania.

VESANIÆ, Insanity, Vesania.

VESICA, 'a bladder,' Urinary bladder — v. Biliaria, Gallbladder—v. Cordis, see Pericardium —v. Fellea, Gallbladder—v. Intestinalis, Vesicula umbilicalis—v. Natatoria, Airbladder—v. Prostatica, see Ejaculatory ducts—v. Saccata, Cystostenochoria—v. Urinaria, Urinary bladder.

VESICÆ IRRITABILITAS, Cysterethismus—v. Unguinosæ tendinum, Bursæ mucosæ.

VES'ICAL, *Vesica'lis*, (F.) *Vésical*, (from *vesica*.) That which belongs or relates to the bladder.

VESICAL AR'TERIES vary in number and origin. The umbilical artery always sends off two or three: the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesicoprostatic* (Ch.), and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL GANGLIA, see Spermatic Ganglion—v. Ligaments, see Urinary bladder — v. Oxyd, Oxyd, cystic—v. Triangle, see Urinary bladder.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, (from *vesico*,) Blister.

VESICARIUM, Ovarium.

VESICA'TION, *Vesica'tio*, (from *vesica*.) The action of a vesicant. The formation of blisters.

VÉSICATION VOLANTE (F.), 'a flying vesication.' A temporary vesication produced by art.

VÉSICATOIRE, Blister — *v. Magistral*, Blister, magistral—*v. Volant*, see Blister.

VESICATORIUM, Blister.

VESICLE, (dim. of *vesica*,) Vesicula—v. Allantoid, Allantois—v. Blastodermic, see Molecule—v. Cowpox, see Vaccination.

VESICLE OF BAER, *Vesic'ula Baerii*, (F.) *Vésicule de Baer*. The ovule in the follicle of De Graaf; which was well described by Baer in 1827.

VESICLE OF DEVEL'OPMENT, *V. of Evolu'tion*. A vesicle or cyst concerned in histogeny.

VESICLE OF EVOLUTION, V. of Development — v. Germinal, see Molecule — v. Purkinjean, see Molecule—v. Umbilical, Vesicula umbilicalis—v. Valentinian, see Molecule—v. Wagner's, see Molecule.

VES'ICLES, ASCHERSO'NIAN. When fluid fat and fluid albumen are shaken together, the resulting fat globules become surrounded by an albuminous layer. The vesicles, thus formed, are called after Ascherson, their describer.

VESICLES OF DE GRAAF, Folliculi Graafiani — v. Lung, see Pulmo — v. Malpighian, Cellules, bronchic, see Pulmo—v. Seminal, Vesiculæ seminales.

VESICOCE'LÊ, (*vesica*, 'a bladder, and *κηλη*, 'a rupture,') Cystocele.

VESICOPROSTATIC, see Vesical.

VES'IQOÜ'RACHAL, *Vesi'coürach'lis*. Relating or appertaining to the bladder and urachus, —as a 'vesicoürachal fistula.'

VES'ICOÜ'TERINE, *Vesi'coüteri'nus*. Appertaining, or relating, to the bladder and uterus.

VESICOÜTERINE FOLDS, see Uterus.

VES'ICOVAG''INAL, *Vesi'covagina'lis*, *Vag''inoves'ical*, *U'rinovag''inal*. Relating to the bladder and the vagina; as *vesicovaginal fistula*.

VESIC'ULA, *Cyst'inx*, *Ves'icle*, *Blis'ter*, (F.) *Vésicule*, (dim. of *vesica*.) A small bladder or cyst.

VESICULA, *Ves'icle*, *Ec'phlyis*, *Cyst'inx*, *Pomphus*, in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opake and whitish or pearlcoloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULA ÆNIGMATOSA, Vesicula umbilicalis — v. Alba, Vesicula umbilicalis — v. Bilis, Gall bladder — v. Blastodermatica, see Molecule — v. Blastodermica, see Molecule — v. Chyli, Receptaculum chyli — v. Erythroidea, Erythroid vesicle — v. Fellis, Gallbladder — v. Gangrænescens, see Anthrax—v. Germinativa, see Molecule—v. Omphalomesenterica, Vesicula umbilicalis — v. Ovalis, Vesicula umbilicalis — v. Prolifera, see Molecule—v. Prostatica, see Ejaculatory ducts.

VESICULA UMBILICA'LIS, *V. al'ba* seu *om'phalomesenter'ica* seu *ænigmato'sa* seu *ova'lis*, *Vesi'ca intestina'lis*, *Vitellic'ulus*, *Umbil'ical* or *Intes'tinal Ves'icle*, *Vit'elline Pouch*, *Vitel'licle*, (F.) *Vésicule ombilicale*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vi'telline ped'icle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow,—*Duc'tus om'phalomesenter'icus* seu *vitellointestina'lis* seu *vitella'rius*, *Vit'elline Duct*. Its arteries are the omphalomesenteric. The *Vit'-*

elline fluid, contained in the vesicle—in the *Vitelline* or *Yolk membrane* — has been compared, from analogy, to the *vitellus* or *yolk* of birds; and, like it, is an oleaginous and albuminous substanee, whieh is inservient to the nutrition of the embryo.

VESIC'ULÆ, pl. of *vesicula*, constitute the 6th order of Bateman's classification of *Cutaneous Diseases*.

VESICULÆ, see Villous membranes, Vesiculæ aereæ, Cellules, bronchic—v. Bronchicæ, Cellules, bronchic — v. Diviæ Barbaræ, Variola confluens —v. Gingivarum, Aphthæ — v. Graafianæ, Folliculi Graafiani — v. Malpighianæ, Cellules, bronchic—v. Pulmonales, Cellules, bronchic — v. Rotundæ cervicis uteri, Nabothi glandulæ—v. Sanguinis, Globules of the blood.

VESICULÆ SEMINA'LES, *V. Semina'riæ* seu *spermat'icæ, Cap'sulæ semina'les, Conceptac'ula seminaria, Gonecyst'ides, Spermatocyst'ides, Sem'inal ves'icles*, (F.) *Vésicules séminales, Gardouches, Greuiers*, are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with it. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their *posterior extremity* or *fundus* terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESICULÆ SEMINALES MULIERUM, Nabothi glandulæ—v. Spermatieæ, Vesiculæ seminales.

VESIC'ULAR, *Vesicula'ris*, (F.) *Vésiculaire*. Of or belonging to a vesicle:—full of or containing small vesicles or cells. The cortical or gray matter of the brain is sometimes termed *vesicular*. See Cortex cerebri and Neurine.

VESICULAR FEVER, Pemphigus.

VESICULE, Vesicula—*v. Biliaire*, Gallbladder — *v. du Fiel*, Gallbladder — *v. Germinative*, see Molecule—*v. Ombilicale*, Vesicula umbilicalis — — *v. Ovulifère*, see Follieuli Graafiani.

VÉSICULES DE DE GRAAF, Follieuli Graafiani — *v. de Naboth*, Nabothi glandulæ — *v. de Sainte Barbe*, Variola confluens — *v. Séminales*, Vesiculæ seminales.

VESIC'ULOUS, *Vesiculo'sus*, (F.) *Vésiculeux*, (from *vesica*.) Shaped like, or characterized by, vesicles.

VESIC'ULOTYMPANIT'IC, *Vesic'ulotympanit'icus*. An epithet for a sound or resonance heard on percussion, which consists of the vesicular and tympanitic sounds combined. It occurs, according to Dr. Flint, when the parenchyma of the lungs is incompletely solidified.

VESPA, Wasp.

VES'SEL, *Vas, Va'sum*, dim. *Vas'culum; Ange'ion, An'gus, Conceptac'ulum* ([L.] *vas, vasculum*,) (F.) *Vaisseau*. A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery, Vein*, and *Lymphatic*. See, also, Vascular.

VESSELOUP, 'wolf fizzle,' Lycoperdon.

VESSIE, (from *vesica*, 'a bladder,') Urinary bladder — *v. Col de la*, Collum vesicæ — *v. Natatoire*, Airbladder.

VESSIE A COLONNES, see Urinary bladder.

VESTIB'ULAR, *Vestibula'ris*, (F.) *Vestibulaire*. Relating or appertaining to a vestibule.

VESTIBULAR NERVE, see Auditory nerve.

VES'TIBULE, *Vestib'ulum*, 'from *vestio*, 'to clothe or cover.') The porch or entrance to a house.

VESTIBULE, *Vestib'ulum, V. Vagi'næ, Prona'us, A'trium Vagi'næ, Am'bitus genita'lis muli'ebris*, is a smooth eavity between the perinæum and nymphæ in the female, whieh leads to two passages — to the urethra above, and to the vagina below.

VESTIBULE OF THE EAR, *Vestib'ulum, V. labyrin'thi*, (F.) *Vestibule*. A eavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semieircular eanals, and behind the eochlea. It is lined by a partieular membrane, and contains the liquor of Cotunnius and branches of the auditory nerve. There is also another membrane, constituting the *mem'branous ves'tibule*, but it is not an exact imitation of the osseous eavity. It is composed of two distinet sacs, whieh open into each other — the *sac'culus vestib'uli*, and the *sac'culus*. There are three contiguous *cavities* in the vestibule; one of which, the *semiö'val*, is situate above; another, the *hemispher'ical*, below; and the third, or *sul'ciform*, which is the orifice of the aquæductus vestibuli, behind.

VESTIBULUM LABYRINTHI, Vestibule of the ear—v. Vaginæ, Vestibule.

VESTIGE (F.), *Vestig''ium*, 'a vestige,' 'a traee.' A kind of fracture of flat bones, consisting of a simple ineision having the mark of the instrument that eaused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the museles of the external ear in man are almost devoid of use, or are *vestiges* of what they are in certain animals.

VESTIGIUM, Sole, *Vestige* — v. Foraminis ovalis, Ovalis fossa—v. Pedis, Metatarsus.

VESTIMENTUM, Vestitus.

VESTI'TUS, *Vestimen'tum, Esthe'ma, Esthe'sis, Res vestia'ria, Vest'ment, Clo'thing, Dress, Ves'ture*, (F.) *Vêtement*, (from *vestire, vestitum*, 'to clothe.') Any substance used for the purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded — the darkest hues transmitting solar heat most readily through them. It has been found that the same rule applies to odours — the darker colours retaining a greater amount of odorous particles than the lighter. Hence the necessity of white walls, white bedclothes, &c., in the wards of hospitals; for it is probable that the like law applies to contagious miasms.

VESTMENT, Vestitus.

VESTURE, Vestitus.

VETA, Puna.

VÉTEMENT, ([L.] *Vestimentum*,) Vestitus.

VETERANA, Rubeola.

VETERINARIUS, see Hippiater and Veterinary.

VET'ERINARY, *Veterina'rius*, (F.) *Vétérinaire*, (from *veterinus*, 'that which bears burdens;' itself, perhaps, from *vehiterinus*, from *vehere*, 'to carry.') That which appertains to beasts of burden: hence, *veterinary surgeon*, (see Farrier,) *veterinary college, veterinary medicine*, &c.

VETERINARY ANATOMY, see Anatomy.

VETERINARY ART, *Ars* seu *Medici'na veterina'rin, Zoöi'asis, Zoiatri'a, Theriat'rica, Mu'lomedici'na, Zoötherapi'a, Zoötherapeu'ticē, Ars zoiat'-

rica, Far'riery. The art of treating the diseases, &c., of cattle.

VETERNOSITAS, (from *veternus*, 'aged;' because old persons are subject to somnolency,) Coma vigil.

VETERNUS, Coma vigil.

VÉTIVER, Andropogon muricatus.

VETIVERIA ODORATA. Andropogon muricatus.

VETTIVERT, Andropogon muricatus.

VETTONICA, (after the *Vettones* of Spain,) Betonica officinalis.

VETULA, Sacrum.

VETYVER, Andropogon muriaticus.

VEXILLA (pl. of *vexillum*) TUBARUM FALLOPII, see Tube, Fallopian.

VEXILLUM, 'a flag,' *Drapeau.*

VIA, Way — v. Curandi, Ratio medendi — v. Stomachi et ventris, Œsophagus.

VIABILITY, see Viable.

VI'ABLE, *Viab'ilis*, (from *vita*, [F.] *vie*, 'life,' and *habilis*, 'able.') A word introduced with great advantage from the French into our language. It is an epithet applied to a fœtus whose organs are properly formed, and so developed as to permit its continued existence. Every fœtus is not *viable.* Anencephali have lived ten or twelve days, yet they are not viable. The older the fœtus, the more viable is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is viable.

VIÆ (pl. of *via*) CHYLIFERÆ, Chyliferous vessels.

VIÆ CLANDESTI'NÆ, *Clandes'tine Pas'sages.* Suppositious secret ways or passages or 'royal roads,' to account, for example, for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

VIÆ EXTRAORDINARIÆ LACTIS, Galactoplania —v. Lacrymales, Lachrymal passages—v. Primæ, Ways, digestive—v. Secundæ, Ways, second.

VIAL, Phiala.

VIANDES FAISANDÉES, ([L.] *vivenda*, from *vivere*, 'to live,') see Hyposaprus.

VIBI'CES, (pl. of *vibex*, 'the mark of a stripe,') *Mol'opes, Stri'æ*, (F.) *Vergettures.* Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRAMEN, (*vibrare*, 'to quiver,') Oscillation.

VIBRANS, Vibratory.

VIBRATILE, (from *vibrare, vibratum*, 'to quiver,') Vibratory.

VIBRATIL'ITY, *Vibratil'itas*, (F.) *Vibratilité.* Capability of being thrown into vibration.

VIBRATIO, Oscillation, Vibration—v. Cardiaca, Palpitation—v. Cordis, Palpitation.

VIBRATION, Vibratio—v. Pectoral, see Fremitus — v. Tactile, see Fremitus—v. Tussive, see Tussive.

VIBRATIONS OF SOUND, see Sound.

VIBRATOR, Deferens vas.

VI'BRATORY, *Vi'brans, Vi'brative*, (F.) *Vibratile, Vibratoire.* An epithet applied to the pain that accompanies some neuralgiæ, which seems to the patient to vibrate among the nerves.

VIBRATORY MOTION, see Cilia.

VIBRATUS, Oscillation.

VIB'RIO, gen. *Vibrio'nis*, (from *vibrare*, 'to quiver.') A genus of infusory animalcules, of which different species are met with, — for example, *Vib'rio pro'lifer* in almost all putrescent fluids containing protein, and in the pus of chancres; in which last the *V. line'ola* has likewise been found.

VIBRIS'SÆ, (from *vibrare*, 'to quiver.') The hairs which grow at the entrance of the nostrils and of other apertures. In the feline tribe, the whiskers.

VIBURNUM ACERIFO'LIUM, *Ma'pleleaved, Ar'rowwood*, (from *viere*, 'to bind;' several species having long flexible twigs.) *Dockmackie; Ord.* Caprifoliaceæ. A plant used by the Indians, and afterwards by the Dutch, as an external application to tumours.

VIBURNUM CASSINOIDES, Ilex Paraguensis.

VIBUR'NUM DENTA'TUM, *Ar'row Wood, Meal'y Tree, Til'y* of the Indians. *Ord.* Caprifoliaceæ. A high indigenous shrub, of the same family as V. lentago; the bark of which has been used by the Indians as a diuretic.

VIBURNUM EDU'LE flourishes in the Hudson's Bay territory. The fruit has an orange colour, and is less acid, more fleshy, and more agreeable to the taste than the cranberry.

VIBURNUM LÆVIGATUM, Ilex Paraguensis.

VIBURNUM LENTA'GO, *Sweet Vibur'num, Nann'yberry.* A handsome indigenous tree, which flowers in May and June. It has been used as an antiperiodic.

VIBURNUM PRUNIFO'LIUM, *Black Haw, Sloeleaved Viburnum, Sloe.* Indigenous: flowering in May. The leaves have been used as tea.

VIBURNUM, SLOWLEAVED, V. prunifolium — v. Sweet, V. lentago.

VIC-LE-COMPTE, MIN'ERAL WA'TERS OF. Vic-le-Compte is a small village in the department of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICA'RIOUS, *Vica'rius*, (from *vicis*, 'change.') Taking the place of another: — as 'vicarious secretion,' *Secre'tio vica'ria;* a secretion which takes place in one part instead of another.

VICAR'S BRAY, MIN'ERAL WA'TERS OF. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarngone. The water is one of the strongest chalybeates known.

VICE, (*vitium*, 'a defect,' 'a fault,') Cacosis —v. Secret, Masturbation.

VICE DE CONFORMATION. Faulty formation of a part of the body.

VICHY, MIN'ERAL WA'TERS OF. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c. The season is from the 15th of May to the 15th of September.

VICHY WATER, FACTIT'IOUS, *A'qua Vician'sis*, (F.) *Eau de Vichy*, is made of simple *Acidulous water*, impregnated with twice its bulk of *Carbonic acid*, ℥xxss; *Subcarbonate of soda*, gr. xxxij; *Sulphate of soda*, gr. xvj; *Chloride of sodium*, gr. iv; *Subcarbonate of magnesia*, gr. ss; *Chloride of iron*, gr. ¼. Mix. *Ph. P.*)

A VICHY WATER POWDER, (F.) *Poudre pour Eau de Vichy*, is made as follows:—*Sodæ bicarb.* 5 gram.; *Sodii chlorid.* 20 centigram.; *Sodæ sulph.* 50 centigram.; *Magnes. sulph.* 15 centigram.; *Ferri sulph.* 1 centigram.; *Aquæ*, 625 gram. Mix. To render it gaseous, add *Acid. citric*, 3 gram.

VICIA ERVILIA, Ervum.

VIC'IA FA'BA, *Fa'ba, F. ma'jor* seu *vulga'ris, Or'obus fa'ba, Com'mon Gar'denbean*, (F.) *Fève* ou *Fève des marais*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINITRACTUS, (*vicinus*, 'near,' and *trahere, tractum*, 'to draw,') Erysipelas.

VICINITRAHA, Erysipelas.

VICIS'SITUDE, *Vicissitu'do*, (from *vicis*, 'change.') Constant change. The vicissitudes of the atmosphere, as regards its barometric, thermometric, and hygrometric condition, have to be guarded against by the delicate; and yet, by the new impressions they produce, they are probably a cause of the greater mental and corporeal activity of the inhabitants of the temperate regions of the globe.

VICTORIALIS FEMINEA, Gladiolus vulgaris—v. Longa, Allium victoriale—v. Rotunda, Gladiolus vulgaris.

VICTÛS RATIO, 'order of victuals,' (from *vivere, victum*, 'to live.') Dietary.

VIDANGES, (from *vider*, 'to empty,') Lochia.

VIDIAN CANAL, (after Vidus Vidius,) Pterygoid canal—v. Nerve, Pterygoid nerve.

VIE, (from *vita*,) Life—*v. Durée de la*, see Longevity—*v. Moyenne*, see Longevity.

VIEILLESSE, (from [L.] *vetulus*, 'an old person.') Senectus.

VIELLOTTE, Colchicum autumnale.

VIENNA PASTE AND POWDER, see Powder, Vienna.

VIERGE, ([L.] *virgo*,) Virgin.

VIF ARGENT, 'quicksilver,' Hydrargyrum.

VIGILANCE, Insomnia.

VIGILANTIA, (from *vigil*, 'on the watch,') Egregorsis.

VIGILATIO, Egregorsis.

VIGILIA, Egregorsis.

VIGILIÆ, Egregorsis—v. Nimiæ, Coma vigil.

VIGILIUM, Egregorsis.

VIGNE, ([L.] *vinea*,) Vitis vinifera—*v. Blanche*, Bryonia alba—*v. de Judée*, Solanum dulcamara—*v. du Nord*, Humulus lupulus—*v. Vierge*, Bryonia alba.

VIGNETTE, (dim. of *vigne*,) Spiræa ulmaria.

VIGNOBLE, ([L.] *vinea*, 'vine,') Mercurialis.

VIGOR, 'activity, force,' Acme.

VIL'LA FRANCA, CLI'MATE OF. This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains; and is more effectually sheltered from the north and northwest winds than Nice, with the climate of which that of Villa Franca closely corresponds.

VILLI, (pl. of *villus*, 'a tuft of hair,') see Villous membranes.

VILLOSITÉS, see Villous membranes.

VIL'LOUS, *Villo'sus*, (F.) *Villeux*, (from *villus*, 'a tuft of hair.') Furnished with villi.

VIL'LOUS MEM'BRANES or COATS, *Velamen'ta Bombyc''ina*, (F.) *Membranes villeuses, Membranes veloutés*, are such as are covered with fine delicate prolongations, *Papillæ* or *Vil'li, Floc'ci, Floc'culi, Vesic'ulæ, Cylin'dri, Tu'bi Membrana'cei*, (F.) *Villosités*, constituted of blood-vessels, nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *sim'ple vil'lous mem'branes* to the serous membranes; and that of *com'plicated* or *follic'ular vil'lous mem'branes* to the mucous membranes.

VIN, ([L.] *vinum*,) Wine—*v. de Bordeaux*, Claret—*v. de Poulet*, see *Poulet*—*v. de Quinquina composé*, Vinum de kinâ kinâ compositum—*v. Rouge d'Oporto*, Vinum Portugallicum—*v. Sec*, Sack.

VINAIGRE, (*vin*, 'wine,' and *aigre*, 'sharp or sour,') Acetum, see Aceticum acidum—*v. Aromatique*, Acetum aromaticum—*v. de Bois*, Pyroligneous acid—*v. Distillé*, Aceticum acidum dilutum—*v. de Quatre voleurs*, Acetum aromaticum—*v. Scillitique*, Acetum scillæ.

VINAIGRES MÉDICINAUX, Acetica.

VIN'CA MI'NOR, *V. pervin'ca*, (from *vincio*, 'I bind,' because of its usefulness in making bands [?]). *Clem'atis daphnoï'des ma'jor, Les'ser per'iwinkle*, (F.) *Pervenche, Violette des Sorciers*. It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

VINCETOXICUM, (*vincere*, 'to overcome,' and *toxicum*, 'poison,') Asclepias vincetoxicum.

VINCTURA, (*vincire, vinctum*, 'to bind,') Fascia.

VIN'CULA (pl. of *vinculum*) ACCESSO'RIA. On the thecæ of the fingers several small tendinous fasciculi are seen, which pass between the phalanges and the edges of the tendons, and are so called.

VINCULUM, (*vincire, vinctum*, 'to bind,') Bandage, Fascia, Lien—v. Caninum, Frænum penis—v. Linguæ, Frænum linguæ—v. Præputii, Frænum penis—v. Umbilicale, Funiculus umbilicalis.

VINE, ([L.] *vinea*,) Vitis vinifera—v. Grape, Vitis vinifera—v. Poison, Rhus radicans—v. Wild, Pareira.

VIN'EGAR, (F.) *Vinaigre*, (itself from *vin*, [L.] *vinum*, 'wine,' and *aigre*, [L.] *acris*, 'sharp or sour,') Acetum—v. Aromatic spirit of, see Aceticum acidum.

VINEGAR OF CANTHARIDES, Acetum cantharidis.

VINEGAR, COMMON, Acetum—v. Distilled, see Aceticum acidum—v. Estragon, see Artemisia dracunculus—v. Marseilles, Acetum aromaticum.

VINEGAR OF MEADOW SAFFRON, Acetum colchici—v. of Opium, Guttæ nigræ.

VINEGAR, RADICAL, Aceticum acidum.

VINEGAR OF SQUILLS, Acetum scillæ—v. of the Four Thieves, Acetum aromaticum.

VINEGAR, THIEVES', (so called, because, under its use, four thieves—it was said—plundered, with impunity, the bodies of those dead of the plague in London [?]), Acetum aromaticum—v. Whey, see Acetum.

VINEGAR OF WOOD, see Aceticum acidum.

VINETTE, Rumex acetosa.

VINETTIER, Oxyacantha Galeni.

VINEUX, Vinous.

VINOLENTA, (from *vinum*,) see Temulentia

VINOLENTIA, Temulentia.

VINOSUS, Vinous.

VI'NOUS, *Vino'sus, Œno'des, Œnoï'des*, (F.) *Vineux*, (from *vinum*.) Relating to wine. Having the character of, or resembling, wine. Made of wine.

VINUM, (*οινος*,) Wine, Sherry wine. See Wine. A medicinal wine, (F.) *Vin médicinal, Onolé, Onolature*.

VI'NUM ABSINTHI'TES, *Wine of Worm'wood*. (*Fol. absinth. exsicc., Absinth. Pontic.*, āā ℥vj, *Vini albi* Oiv. Macerate for 24 hours, and strain. *Ph. P.*) Stimulant, tonic, febrifuge, vermifuge.

VINUM ADUSTUM, Brandy—v. Album, Sherry wine (Ph. U. S. 1851), see Wine—v. Album Hispanicum, see Wine—v. Album, Montanum, see Wine.

VINUM ALOËS, *V. aloës Socotori'næ* seu *aloët'icum* seu *aro'maloët'icum, Tinctu'ra hi'era, Tinctu'ra su'cra, Wine of Al'oes*. (*Aloës* in pulv. ℥j, *Curdam.* cont., *Zingib.* cont., āā ℥j; *Vini alb.* Oj. Macerate for 14 days, and filter. *Ph. U. S.*) Pur-

gative and stomachic, according to the dose. Dose, f℥j to f℥ij.

Vinum Amarum, V. Gentianæ comp.—v. Amarum scilliticum, &c., V. diureticum amarum — v. Amarum cum spiritû vini, V. gentianæ compositum—v. Antimoniale, V. antimonii tartarizati —v. Antimoniatum Huxhami, V. antimonii tartarizati —v. Antimonii potassiotartratis, V. antimonii tartarizati.

Vinum Antimo'nii, *V. antimo'nii tartariza'ti* seu *tartra'tis antimonii* seu *antimo'nii potas'siotartra'tis* seu *benedic'tum* seu *stibia'tum* seu *stibiatum Huxha'mi* seu *antimonia'tum* seu *antimonia'tum Huxha'mi* seu *antimonia'tum emet'icum, Essen'tia antimonii* seu *stib'ii, A'qua benedic'ta Rulan'di, Solu'tion of tar'tarized ant'imony, Antimo'nial wine.* (*Ant. et Potass. tart.* gr. xxxij, *Aq. destillat. bullient.* f℥j, *Vini albi*, q. s. Dissolve the tartarized antimony in the distilled water, and while hot add the wine to make a pint. *Ph. U. S.* 1863.) Each fluidounce contains two grains of the tartrate.

The ordinary *Antimonial wine* was formerly made with *Glass of antimony*, ℥j, *Sherry*, Oiss.

Ward's Red Drop consists of a strong vinous solution of *tartarized antimony.*

Vinum Antiscorbu'ticum, *Antiscorbu'tic wine.* (*Rad. armoraciæ recent.* ℥j, *Fol. cochleariæ recent., Nasturtii aquatic., Trifol. aquatic., Semin. sinap.,* āā ℥ss, *Ammoniæ muriat.* ℥ij, *Vin. albi* Oij. Macerate for 36 hours; filter, and add *Tincturæ cochlear.* ℥ss. *Ph. P.*) Stimulant and tonic. Dose, f℥ss to f℥ij.

Vinum Aromat'icum, *Aromat'ic wine.* (*Species aromatic.* ℥iv, *Vin. rubr.* Oij. Macerate for 6 days and filter. *Ph. P.*) Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

Vinum Aromoäloeticum, V. aloes — v. Benedictum, V. antimonii tartarizati.

Vinum Campa'num, *V. Campana'ceum.* Champagne wine. A well-known sparkling wine of France. See Wine.

Vinum Canarinum, see Wine—v. Chalybeatum, V. ferri—v. Cinchonæ compositum, V. de kinâ kinâ comp.

Vinum Col'chici, *V. Col'chici Radi'cis, Wine of Col'chicum, Want's Eau d'Husson.* (*Colchic. rad.* bene contus. lbj, *Vini alb.* Oij. Macerate for 24 days, with occasional agitation, and then express strongly, and filter. It may also be prepared by displacement. *Ph. U. S.*) Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gtt. 40 to f℥j.

Reyn'old's Specif'ic for gout and rheumatism consisted of the fresh bulb of *Colchicum*, ℥viij, *Sherry wine*, f℥xvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat: coloured with *Syrup of poppies*, and flavoured with *Rum.* Reynolds is said to have killed himself by taking an over-dose of it.

Vinum Colchici Radicis, V. colchici.

Vinum Colchici Sem'inis, *Wine of Col'chicum seed.* (*Colchic. sem.* cont. ℥iv; *Vini alb.* Oij. Macerate for 14 days, with occasional agitation, then express and filter. *Ph. U. S.*) Dose, f℥j to f℥ij.

Vinum Crematum, Brandy.

Vinum Diuret'icum Ama'rum, *V. ama'rum scillit'icum compos'itum in Charita'tis Nosocomi'o usurpa'tum, Bit'ter diuret'ic wine.* (*Cort. cinchon., C. Winteran., Limon.,* āā ℥ij, *Rhi toxicodendr., Scillæ Cacumin., Angelicæ,* āā ℥ss, *Fol. absinth., Melissæ,* āā ℥j, *Baccar. junip., Macis,* āā ℥ss, *Vin. alb.* Oviij. Macerate and filter. *Ph. P.*) Stimulant, tonic, and diuretic. Dose, f℥ss to f℥iss.

Vinum Emeticum, V. antimonii tartarizati.

Vinum Er'gotæ, *Wine of Er'got.* (*Ergotæ* cont., ℥iv; *Vini alb.* Oij. Macerate for 14 days, with occasional agitation; then express and filter. It may be prepared, also, by displacement. *Ph. U. S.*) Dose, ♏xx to f℥j to produce the peculiar effects of ergot.

Vinum Ferratum, V. Ferri.

Vinum Fer'ri, *V. Chalybea'tum* seu *ferra'tum* seu *Martia'tum* seu *Mar'tis, Tinctu'ra Mar'tis vino'sa* seu *Mar'tis cum vi'no, Steel wine, Wine of Iron.* (*Iron wire*, ℥j; *Sherry wine*, Oij (Imp. meas.). Digest for thirty days and filter. *Ph. L.*) Tonic. Dose, f℥j to f℥iv.

It is sometimes made by adding *two pints of Wine* to *two ounces of Iron filings*; macerating and filtering.

Vinum Gentia'næ, *V. G. Compos'itum* seu *Ama'rum* seu *Ama'rum cum spir'itu Vi'ni, Infu'sum ama'rum vino'sum. Com'pound wine of gen'tian, Wine bit'ters.* (*Rad. gentian. lutææ*, ℥ss, *Cort. cinchon. offic.* ℥j, *Cort. aurant.* ℥ij, *Canellæ alb*, ℥j. *Alcohol. dilut.* f℥iv, *Vini alb. Hispanic.* Oijss. *Ph. E.*) Dose, f℥j to f℥vj.

Vinum Hippocraticum, Claret—v. Hispanicum, Vinum, see Wine—v. Hordeaceum, Cerevisia—v. Hydatodes, see Hydatoid.

Vinum Ipecacuan'hæ, *Ipecacuan'ha wine.* (*Ipecacuan.* cont. ℥ij, *Vini alb.* Oij.) Macerate for 14 days, express, and filter. It may be prepared, also, by displacement. Ph. U. S.) Emetic and diaphoretic. Dose, as an emetic, f℥iv to f℥x.

Vinum de Ki'nâ Ki'nâ Compos'itum, *V. cincho'næ compos'itum, Com'pound bark wine,* (F.) *Vin de quinquina composé,* (*Cort. cinchon.* pulv. lbss, *Quassiæ, Cort. Winteran., Cort. aurant.* sicc. āā ℥ss, *Alcohol.* (12° to 22° Beaumé) Oj. Macerate for 24 hours; and add *Vini albi*, Ovj. Macerate for four days, and filter. *Ph. P.*) Tonic, febrifuge, and stomachic. Dose, f℥ss to f℥ij.

Vinum Martiatum, V. Ferri — v. Martis, V. ferri—v. Medicatum, see Claret.

Vinum Medicina'lē, *Med'icated Wine.* Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicines employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures, but old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines. See Vinum.

Vinum Merum, Acratum—v. Nicotianæ tabaci, V. tabaci — v. Opiatum fermentatione paratum, Laudanum abbatis Rousseau.

Vinum O'pii, *V. de Opio compos'itum, Laud'anum liq'uidum Sydenha'mi* seu *Hoffman'ni, Tinctu'ra Theba'ica, Wine of O'pium, Syd'enham's Laud'anum, Ford's laud'anum,* (*Opii* in pulv. ℥ij; *Cinnam.* cont., *Caryophyll.* cont. āā ℥j, *Vini albi*, Oj. Macerate for 14 days; express and filter. It may be made, also, by displacement. *Ph. U. S.*) Narcotic. Dose, gtt. xv to f℥j.

Vinum de Opio Compositum, V. opii — v. Picatum. Pissites.

Vinum Portugal'licum, *V. ru'brum,* (*Ph. U. S.* 1851,) *V. Porten'sē.* (Ph. U. S. 1863,) (F.) *Vin rouge d'Oporto.* Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States, but greatly used in England.

Vinum Qui'niæ, *Wine of Qui'nia.* (*Wine*, lbij, *Sulphate of quinia*, gr. x. Mix.) Dose, f℥iss or more; according as it is used as a stomachic, or to arrest ague. A *Vinum Cincho'niæ* may be made in the same way.

Vinum Rhabarbari, V. rhei palmati.

Vinum Rhe'i, *V. R. palma'ti, V. Rhabar'bari, Tinctu'ra Rhabar'bari Vino'sa, Elix'ir Rhe'i dul'cē, E. R. Compos'itum, Rhu'barb Wine.* (*Rhei* cont. ℥ij, *Canellæ* cont. ℥j, *Alcohol. dilut.* f℥ij, *Vini albi*, ℥xiv. Macerate for 14 days; express, and filter. It may be made, also, by displacement.

Ph. U. S.) Laxative and stimulant. Dose, f℥iv to f℥iss.

VINUM RHEI PALMATI, V. Rhei—v. Rhenanum, see Wine—v. Rubrum, V. Portugallicum—v. Rubrum Portugallicum, see Wine—v. Stibiatum, V. Antimonii.

VINUM TABA'CI, *Vi'num Nicotia'næ Taba'ci, Tobac'co Wine.* (*Tabac.* incis. ℥j, *Vini albi*, Oj. Macerate for 14 days; express and filter. *Ph. U. S.*) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not much used. Dose, gtt. xx to xxxvj.

VINUM VERA'TRI, *V. V. al'bi, Wine of White Hel'lebore.* (*Veratri cont.* ℥iv; *Vini albi*, Oj. Macerate for 14 days, express and filter.—*Ph. U. S.*) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRI ALBI, V. Veratri—v. Xericum, see Vinum.

VIOL, (from *violare*, 'to defile,') Stuprum.

VI'OLA, (after *Ion*, ων, 'the violet,') *Vi'ola odora'ta* seu *mar'tia, I'on, Matrona'lis, Viola'ria, Sweet Vi'olet*, (F.) *Violette à bouquets, V. odorante. Ord.* Violaceæ. The flowers of the sweet violet have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANI'NA, *V. sylves'tris, Dog Vi'olet.* The root of this plant is emetic and cathartic. Dose, ℈j.

VIOLA IPECACUANHA, see Ipecacuanha—v. Lutea, Cheiranthus cheiri—v. Martia, Viola—v. Odorata, Viola—v. Palustris, Pinguicola vulgaris.

VIOLA PEDA'TA, *Vi'ola* (*Ph. U. S.*) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA SYLVESTRIS, V. Canina.

VIOLA TRI'COLOR, *Jace'a tri'color, Her'ba* seu *Flos Trinita'tis, Heart's ease, Pan'sy, Pen'sy, Pan'sies, Johnny Jumper*, (Prov.) *Beedy's eyes, Biddy's eyes*, (F.) *Pensée, P. sauvage.* A decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, Viola.

VIOLET, Viola—v. Dog, Viola canina—v. Dog's Tooth, Erythronium Americanum.

VIOLET BLOOM, Solanum dulcamara.

VIOLET, SWEET, Viola.

VIOLETTE À BOUQUETS, Viola—*v. Odorante*, Viola—*v. des Sorciers*, Vinca minor.

VIOLIER JAUNE, Cheiranthus cheiri.

VIORNA, Clematis vitalba.

VIPER, EGYPTIAN, (see Vipera,) Aspis—v. Ten inch long, Echidna ocellata.

VIPER GRASS, Scorzonera.

VIPERA, ([L.] *vipera*, for *vivip'ara*, from *vivus*, 'alive,' and *pario*, 'to bring forth,') Coluber berus.

VIPERARIA, (from *vipera*,) Aristolochia serpentaria, Scorzonera.

VIPERINA VIRGINIANA, (from *vipera*,) Aristolochia serpentaria.

VIPÉRINE DE VIRGINIE, Aristolochia serpentaria.

VIPER'S DANCE, Chorea.

VIR, gen. *Vi'ris*, 'a man,' Aner, Penis—v. Effœminatus, Gynæcaner.

VIRA, Woman.

VIRAGO, (from *vir*, 'a man,') see Pogoniasis.

VIREUX, Virous.

VIRGA, 'a rod,' Penis—v. Cerea, *Bougie*—v. Cerebri, Pineal gland.

VIRGILIA, (after the poet Virgil,) Cladrastis tinctoria.

VIR'GIN, *Vir'go*, gen. *Vir'ginis, Par'thenus, Ex'pers nuptia'rum*, (F.) *Vierge, Pucelle.* A female who has never had sexual intercourse. Applied, also, occasionally to the male so circumstanced.

VIRGIN MARY THISTLE, Centaurea benedicta.

VIR'GINAL, (from *virgo.*) The external genital organs, of the virgin especially.

VIRGINAL MEMBRANE, Hymen.

VIRGINALE CLAUSTRUM, 'a virginal fence,' Hymen.

VIRGIN'IA, MIN'ERAL WA'TERS OF. There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two *Thermal* springs are in Bath county. The *Warm Spring*, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The *Hot Spring* is a few miles from the warm. Its temperature is 107°. They are both slightly sulphureous. The *Sweet Springs* are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The *White Sulphur*, as well as the *Red Sulphur*, and *Salt Sulphur Springs*, are also much visited. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. Prof. W. B. Rogers analyzed the water of the White Sulphur, and found it to be composed as follows:—Gaseous contents in a wine gallon; *Sulphuretted hydrogen*, 2·5 cubic inches, *carbonic acid*, 2; *oxygen*, 1·448; *nitrogen*, 3·552.—Total, 9·5. Solid contents in a pint; *sulphate of magnesia*, 5·588 grains; *sulphate of lime*, 7·744; *carbonate of lime*, 1·150; *chloride of calcium*, 0·204; *chloride of sodium*, 0·180; *oxide of iron*, a trace; loss, 0·410. Total, 15·276 grains.

The *Rock'bridge Al'um Springs* are situated 17 miles west of Lexington, and are in much favour. Their solid constituents are said to be,—sulphate of potassa, 1.765 gr.; sulphate of lime, 3·263; sulphate of magnesia, 1·763; protoxide of iron, 4·863; alumina, 17·905; crenate of ammonia, 0·700; chloride of sodium, 1·008; silicic acid, 2.840; free sulphuric acid, 15·224; free carbonic acid, 7·536—water 58315·133. They are used in dyspepsia, scrofula, chronic diarrhœa, and cutaneous affections. The *Bath Alum Springs* are about 17 miles west of the Rockbridge Springs, in Bath county. They consist of free sulphuric acid, 7·878 grains; carbonic acid, 3·846; sulphate of potassa, 0·258; magnesia, 1·282; lime, 2·539; protoxide of iron, 21·776; alumina, 12·293; crenate of ammonia, 1·776; silicate of soda, 3·150; water, 58317·202. They are more chalybeate than the last.

About 15 miles from Staunton are *Strib'ling's Springs*—a sulphuretted water; and near *Warrenton*, in *Fauquier county*, there is a sulphureous water, called *Lee's Springs*, which is much frequented. *Berkley* or *Bath*, and *Ca'pon Springs* are likewise celebrated.

VIRGINIS VITIATIO, 'violation of a virgin,' Defloration.

VIRGIN'ITY, *Virgin'itas, Parthenei'a, Integ'ritas, Maid'enhood, Maid'enhead*, (F.) *Virginité, Pucélage*, (from *virgo.*) The state of one who has never had carnal commerce.

VIRGIN'S BOWER, COMMON, Clematis vitalba, Clematis virginica—v. Bower, upright, Clematis recta—v. Sweetscented, Clematis flammula.

VIR'GIN'S MILK, *Lac Vir'ginis* seu *Virgina'lē* seu *Virgin'eum*, (F.) *Lait virginal.* A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, subacetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGINITAS, Virginity—v. Deflorata. Defloration.

VIRGO, gen. *Vir'ginis*, Virgin—v. Aurea, Solidago virgaurea.

VIRGULA, (dim. of *virga*, 'a rod,') Penis.

VIRIDE ÆRIS, 'green of brass,' Cupri subacetas—v. Montanum, Cuprum.

VIRILE, (from *vir*, 'a man,') Penis.

VIR'ILE, *Viri'lis*, (from *vir*, 'a man.') Relating or appertaining to the adult age.

VIRILE AGE, see Age.

VIRILES'CENCE, (from *virilis* (*vir*, 'a man'), 'manly.') The state of the aged female in which she assumes certain of the characteristics of the male.

VIRILIA, (from *vir*, 'a man,') Pudibilia.

VIRILITAS, Adult age, see Age.

VIRILITY, Adult age, see Age.

VIROSE, Virous.

VI'ROUS, *Vi'rose*, *Viro'sus*, (F.) *Vireux*, (from *virus*.) Possessed of noxious properties. Also, substances having a peculiar nauseous taste and odour.

VIROSUS, Virous.

VIRTUE, Faculty.

VIRTUS, 'power,' (allied to *vir*, 'a man,') Faculty, Property—v. Formatrix, Plastic force—v. Plastica, Plastic force.

VIR'ULENT, *Virulen'tus*, (from *virus*.) That which is of the nature of a virus or which is caused by a virus. Highly noxious.

VI'RUS. A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic*, the *vaccine*, and the *syphilitic viruses*. *Virus* differs from *venom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process,—a *morbid poison*.

VIRUS, Ichor, Poison, Sanies — v. Vaccine, see Vaccina—v. Vitale, Sperm.

VIS, gen. *Vi'ris*, (allied to *vir*, 'a man,') Force —v. Adhæsionis, Cohesion (force of)—v. Attractionis, Cohesion (force of)—v. Aucta, Sthenia—v. Cohæsionis, Cohesion (force of)—v. Conservatrix, V. medicatrix naturæ—v. Elastica, Elasticity—v. Essentialis, Plastic force.

VIS EXPUL'TRIX. The organic force by which, it was supposed, the useless and effete was removed from the body.

VIS FORMATIVA, Plastic force.

VIS A FRON'TE, 'force from the front.' An action which is exerted from before; as that of the capillaries in the circulation of the blood.

VIS GENERATRIX, Potentia generandi — v. Imminuta, Asthenia—v. Insita, Irritability—v. Irritabilitas, Irritability.

VIS MEDICA'TRIX NATU'RÆ, *V. conserva'trix*, *Autocrati'a*, *Autonom'ia*, *Autocrato'ria*, *Authygian'sis*, *Autotherapei'a*, *Physiot'ricē*, *Physioautocrati'a*, *Physiautocrati'a*, *Physiautotherapi'a*, (F.) *Force médicatrice*. A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS METABOLICA, Metabolic force.

VIS MOR'TUA. Under this name Haller included the mechanical properties of membrane, —flexibility, extensibility, elasticity, &c. — which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS MUSCULARIS, Myodynamia—v. Nervorum, Nervous power—v. Nervosa, Nervous power — v. Plastica, Plastic force — v. Reproductiva, Plastic force.

VIS A TER'GO, 'force from behind.' An action of impulsion or prepulsion, as that of the heart in the circulation of the blood.

VIS VITÆ, Irritability.

VIS VITA'LIS, *Vis Vi'tæ*, *Vis* seu *Fac'ultas Zo'tica*, (F.) *Force vitale*. The *vital force*—*Bi'od* of Von Reichenbach — which distinguishes living matter from the dead. Also, Irritability.

VIS ZOTICA, Vis vitalis.

VISAGE, (from [L.] *videre*, *visum*, 'to see,') Countenance.

VISCAGO BELLEN, (*viscum*, 'birdlime,') Cucubalus behen.

VISCERA, (pl. of *viscus*, 'an internal organ,') Entrails, Uterus.

VISCERAL, Splanchnic.

VISCERALIS, Splanchnic, Stomachal.

VISCERATION, Exenterismus.

VISCÈRES, ([L.] *viscera*,) Entrails.

VISCONIA, Physconia.

VIS'CUM AL'BUM, *Ix'us*, *Ix'ia*, *Du'bach*, *Mis'tletoe*, (F.) *Gui*, *Gui de Chêne*, *Gillon*. A parasitic plant, which grows on a number of trees. *Order*, Loranthaceæ. *Sex. Syst.* Dioecia Tetrandria. That of the oak—*Vis'cum quercī'num*—has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves being given in powder, in the dose of ℥ss or ℥j. The berries, also called *Pommes hémorrhoïdales*, from their supposed virtues, are drastic; and, when applied externally, are maturative.

VISCUM CAPEN'SE. A South African parasitic shrub, which grows on the stems of several species of Rhus and Euclea.

VISCUM FLAVES'CENS, *V. verticilla'tum*, *Yel'low* or *Yel'lowish Mis'tletoe*, indigenous, has been given in similar cases as the *Viscum album*.

VISCUM VERTICILLATUM, V. flavescens.

VISCUS, gen. *Vis'ceris*. Any internal organ of the body.

VISIO, Pupil, Vision.

VIS'ION, *Sight*, *Vis'io*, *Vi'sus*, (from *videre*, *visum*, 'to see;') *Op'sis*, *Om'ma*, (F.) *Vue*. The action of seeing. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours, and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections, which might otherwise occur, the anterior of the eye is lined by a membrane — the choroid — which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

VISION, BINOCULAR, see Binocular—v. Coloured, Chromopsia—v. Double, Diplopia—v. Iridescent, Chromopsia — v. Manifold, Polyopsia — v. Multiple, Polyopsia—v. Phantasmatum, Metamorphopsia—v. Single, see Binocular.

VISNOMY, Physiognomy.

VISORIUM ORGANUM, (from *videre, visum*, 'to see,') Eye.

VISORIUS, Visual.

VIS'UAL, *Visua'lis, Viso'rius*, (F.) *Visuel*. That which concerns the sight or belongs to vision.

VISUAL AN'GLE is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

VISUEL, Visual.

VISUS, (from *videre, visum*, 'to see,') Vision—v. Acrior, Nyctalopia—v. Acris, Oxydercia—v. Coloratus, Chromopsia—v. Debilitas, Asthenopia—v. Decolor, Achromatopsia—v. Defiguratus, Metamorphopsia—v. Dimidiatus, Hemiopia—v. Diurnus, Hemeralopia—v. Duplicatus, Diplopia—v. Hebetudo, Amblyopia—v. Juvenum, Myopia—v. Lucidus, Photopsia—v. Muscarum, see Metamorphopsia—v. Nebulosus, Nebula—v. Nocturnus, Nyctalopia—v. Senilis, Presbytia.

VITA, Life—v. Propria, Irritability.

VI'TAL, *Vita'lis, Biot'ic, Biot'icus*, (F.) *Vital*, (from *vita*.) Relating or appertaining to life.

VITAL CAPAC''ITY, *Pulmon'ic* or *Lung capac''ity*. A term employed by Dr. Hutchinson to designate the number of cubic inches of air, which a person can forcibly expire after a full inspiration. He found, that for every inch of height—from five feet to six—eight additional cubic inches of air can be given out by a forced expiration. The quantity, however, is influenced, also, by weight and age. See Respiration.

VITAL CENTRE, Centrum vitale—v. Dynamics, see Dynamic—v. Force, Vis vitalis—v. Point, see Centrum vitale.

VITAL PRIN'CIPLE, *Flam'mula* seu *Au'ra vita'lis, Microcosme'tor*, (F.) *Flamme vitale, Vital Flame*. The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except as a force in connexion with organization.

VITAL PROPERTIES, see Properties, vital—v. Statistics, Statistics, medical.

VITALBA, (*vitis*, 'vine,' and *albus*, 'white,') Clematis vitalba.

VI'TALISM, *Vitalismus*, (from *vita*.) The doctrine of the *vitalist—vitalis'ta*—who ascribes every function of the organism to the direct agency of a vital principle or force.

VITALIST, see Vitalism.

VITAL'ITY, *Vital'itas*, (F.) *Vitalité*. The vital principle: also, used in the sense of vital action or movement.

VITALIZE. To endow with life.

VI'TALS, *Vita'lia*. Parts that are necessary for life—the heart, lungs, and nervous centres more especially.

VI'TAROB'ORANT, PALM'ER'S, (*vita*, and *roborare*, 'to strengthen.') A farinaceous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears considerable resemblance to Revalenta.

VITELLARY, Vitelline—v. Membrane, Zona pellucida.

VITELLINE, Zona pellucida.

VIT'ELLINE, *Vitel'linus, Vit'ellary, Lecitho'des*, (from *vitellus*, 'the yolk of an egg.') Appertaining to or resembling the vitellus or yolk. Also, the yolk membrane. See Vesicula umbilicalis.

VITELLINE DISC, Proligerous Disc—v. Fluid, see Vesicula umbilicalis.

VITELLINE PED'ICLE or APOPH'YSIS is the pedicle which attaches the umbilical vesicle to the embryo. See Vesicula umbilicalis.

VITELLINE POUCH, Vesicula umbilicalis—v. Vessels, Omphalomesenteric.

VITELLOMESENTERIC, Omphalomesenteric.

VITELLUM OVI, 'the yolk of an egg,' see Ovum.

VITELLUS OVI, see Ovum.

VITEX, gen. *Vi'ticis*, (from *vieo*, 'I bind' [?];) *V. Ag'nus cas'tus* seu *verticilla'tus*, (F.) *Gattilier, Petit Poivre, Poivre de moine* ou *sauvage*. *Ord.* Verbenaceæ. *Sex. Syst.* Didynamia Angiospermia. The *Chaste Tree*. The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

VITI SALTUS, 'Vitus's dance,' Chorea.

VITIA (pl. of *vitium*) PRIMÆ CONFORMATIONIS, see Monster.

VITIATIO, (*vitiare, vitiatum*, 'to violate,') Stuprum.

VITILIGINES, Ephelides.

VITILIGO, gen. *Vitilig''inis*, (from *vitulus*, 'a calf;' hence 'calfskin.') Achroma, Herpes exedens, Lepra, Porrigo decalvans—v. Alphus, Lepra alphoides—v. Melas, Lepra nigricans—v. Nigra, Lepra nigricans.

VITILIGOÏDEA, (*vitiligo*, and *εἶδος*, 'resemblance.') A disease of the skin, so called from its resembling the vitiligo of Willan. It appears under two forms; either as tubercles—*V. tubero'sa*—varying from the size of a pin's head to that of a large pea, isolated or confluent; or as yellow patches of irregular outline, slightly elevated, and with but little hardness—*V. pla'na*.

VITIS ALBA SYLVESTRIS, (*vieo*, 'to bind,' from its numerous tendrils,) Bryonia alba—v. Apyrena, see V. Corinthiaca.

VI'TIS CORINTHI'ACA. *Ord.* Vitaceæ. *Sex. Syst.* Pentandria Monogynia. This plant affords the *U'væ Coriuthi'acæ pas'sæ mino'res, Pas'sæ Corinthi'acæ, Pas'sulæ mino'res, Corinthi'acæ, Cur'rants*, (Prov.) *Curu'berries*, (F.) *Raisins de Corinthe*; which are the dried fruit of the *Vitis Corinthi'aca* or *Vitis apyre'na*; and are similar, in their properties, to the raisin.

VITIS IDÆA MYRTILLUS, Vaccinium myrtillus—v. Idæa palustris, Vaccinium oxycoccos—v. Idæa punctata, Vaccinium vitis idæa—v. Sativa, V. vinifera.

VITIS VINIF'ERA, *V. sati'va, Am'pelos, A. Œnoph'oros, Grapevine, Vine*, (F.) *Vigne*. Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lac'ryma*, has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Ver'juice*. The *Grape, U'va, Bo'trys, Staph'ylē, Rhax*, (F.) *Raisin*, when ripe, is a wholesome, delicious fruit; and, when dried, forms the *U'væ pas'sæ majo'res, Pass'ulæ majo'res, U'væ pas'sæ so'lē sicca'tæ, U'va pas'sa* (Ph. U. S.) *Zibebæ, Raisins*. These are inodorous; and to the taste, subacidulous, sweet, and mucilaginous. They are demulcent and nutritive.

VITIUM, Disease—v. Caducum, Epilepsy.

VITIUM CONFORMA'TIONIS. A disease or fault of conformation.

VITIUM DIVINUM, Epilepsy—v. Herculeum, Epilepsy—v. Scrophulosum, Scrofula.

VITRARIA, Parietaria.

VITRÉ, (from *vitrum*,) Hyaline.

VITREOCAPSULITIS, (*vitreo*, 'appertaining to the vitreous humor,' and *capsulitis*, 'inflammation of a capsule,') Hyalitis.

VITREOUS, (from *vitrum*,) Hyaline—v. Humour, Corpus vitreum—v. Humour of the ear, *Vitrine auditive*.

VITREUS, Hyaline.

VITREUX, Hyaline.

VITRINA OCULARIS, Corpus vitreum.

VITRINE AUDITIVE (F.), *Humeur vitrée*, (from *vitrum*.) *Aqu'ula vit'rea auditi'va, Endolymph'a, End'olymph, Liq'nor* or *Flu'id of Scar'pa, Vit'reous Hu'mour of the Ear.* The fluid contained in the *membranous labyrinth* of the ear, so called from its resemblance to the *vitreous* humour of the eye.

VITRIOL, (from *vitrum*, 'glass,') Ferri sulphas — v. Blue, Cupri sulphas — v. Green, Ferri sulphas—v. Roman, Cupri sulphas—v. White, Zinci sulphas.

VITRIOLUM ALBUM, Zinci sulphas — v. Ammoniacale, Ammoniæ sulphas—v. Cæruleum, Cupri sulphas — v. Cupri, Cupri sulphas —v. Cyprium, Cupri sulphas—v. Ferri, Ferri sulphas—v. Goslariense, Zinci sulphas — v. Martis, Ferri sulphas — v. Romanum, Cupri sulphas — v. Veneris, Cupri sulphas—v. Viride, Ferri sulphas—v. Zinci, Zinci sulphas.

VI'TRUM, *Hy'alos, Glass, Bran'cia*, (F.) *Verre.* Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in toothpowders. It is called *San'diver, Sel de verre, Glass Gall, Fel vi'tri*, &c.

Vitrum Antimonii, see Antimonii vitrum — v. Hypoclepticum, Separatorium — v. Oculare, see Spectacles—v. Sublimatorium, Aludel.

VITTA, *Bandelette*, Caul.

VITTARIA CETERACH, (*vitta*, 'a band, a fillet.') Asplenium ceterach.

VITTIE VAYR, Andropogon muricatus.

VIVACE, (from *vivax*, gen. *viva'cis*, (from *vivere*, 'to live,') 'living long, tenacious of life.' An epithet given by Levret to uterine polypi, which he considers to be, commonly, vegetations of some ulcer in the interior of the uterus, and incurable.

VIVÆSECTIO, (*vivus*, 'alive,' and *secare, sectum*, 'to cut,') Vivisection.

VIVERRA CIVETTA, see Civetta.

VIVIPARE, Viviparous.

VIVIPARITÉ, see Viviparous.

VIVIP'AROUS, (F.) *Vivipare*, (*vivus*, 'alive,' and *pario*, 'to bring forth.') An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous.* The condition may be termed *Vivip'arousness*, (F.) *Viviparité.* See Generation.

VIVIPAROUSNESS, see Viviparous.

VIVISEC'TION, *Vivisec'tio, Vivæsec'tio, Biotom'ia*, (*vivus*, 'alive,' and *secare, sectum*, 'to cut.') The act of opening or dissecting living animals. One who performs vivisections is a *Vivisec'tor.*

VOCAL, (from *vox*,) Oral—v. Cords, see Cords, vocal—v. Ligaments, see Cords, vocal—v. Tube, see Tube, vocal.

VOCALIS, Vowel.

VOCE DI PETTO, 'chest voice,' see Voice—*v. di Testa*, 'head voice,' see Voice.

VOICE, *Vox, Au'dē, Pho'nē*, (F.) *Voix*, (from *vocare*, 'to name. to call.') An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phona'tion.* It is a function of *animal* life; and, in animals, is limited to the production of the *simple* or *instinct'ive voice*, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated,—an evidence of his intellectual superiority.

Voice, Artic'ulated, *Speech, Loque'la, Glos'sa, Glot'ta, La'lia, Phra'sis*, (F.) *Parole, Voix articulée*, is the voice as produced by the glottis, modified by the motions of the tongue, lip, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyroarytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube*, or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarionet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supralaryngeal*, or *notes of the sec'ond reg''ister.* They constitute the *pharyngeal voice, falsetto* or *fausette* voice or *voce di testa* (I.), *Voix de tête, Voix de fausset* (F.). The *laryngeal voice* or *voice of the first reg''ister, Chest voice*, is the *Voce di Petto* (I.), *Voix de Poitrine* (F.). The laryngeal voice, which is always more elevated, by an octave, in the female than in the male, furnishes the types called *Sopra'no, Al'to* or *Contral'to, Tenore* and *Basso.* The first two belong to the female voice; the last two to the male. The *Bar'itone* is between the bass and tenor.

Voice, Bleating, Egophony — v. Cavernous, Pectoriloquy—v. Chest, see Voice, articulated.

Voice, Chol'eric, *Vox Choler'ica, Cholerophō'nē, Cholerapho'nia.* The peculiar husky voice of those affected with cholera.

Voice, Convul'sive, *Vox convulsi'va*, (F.) *Voix convulsive.* A neurosis of the voice, consisting in the production of discordant sounds — acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

Voice, Falsetto, see Voice — v. Goat's, Egophony — v. Laryngeal, Laryngophony, see Voice —v. Pharyngeal, see Voice—v. Tracheal, Laryngophony.

VOIE, ([L.] *via*,) Way.

VOIES DIGESTIVES, Ways, digestive — *v. Lacrymales*, Lachrymal passages — *v. Premières*, Ways, digestive—*v. Secondes*, Ways, second — *v. Urinaires*, Urinary passages.

VOILE ([L.] *velum*) *DU PALAIS*, Velum pendulum palati — *v. Médullaire inférieure*, Velum medullare inferius—*v. Médullaire supérieure*, Valvula Vieussenii.

VOIX, ([L.] *Vox*,) Voice — *v. Aigre*, see Acid —*v. Articulée*, Voice, articulated, Pectoriloquy—*v. Bourdonnante*, see Resonance — *v. Bronchique*, Resonance—*v. Caverneuse*, Pectoriloquy—*v. Chévrotante*, Egophony — *v. Égophonique*, Egophony —*v. de Fausset*, see Voice, articulated—*v. de Poitrine*, see Voice, articulated — *v. de Polichinelle*, Egophony—*v. Sénile*, Egophony — *v. de Tête*, see Voice, articulated—*v. Tubaire*, see Resonance.

VOLA, Palm—v. Manûs, Palm—v. Pedis, Sole.

VOLANT D'EAU, Nymphæa alba.

VOLATICA, (*volare*, 'to fly,') Lichen.

VOLATILIZA'TION, *Volatilisa'tio, Volatisa'tio*, (from *volare*, 'to fly.') The operation of reducing volatilizable substances into gas or vapour.

VOLATISATIO, (*volare*, 'to fly,') Volatilization.

VOLCANISATION, see Vulcanite.

VOLIT''ION, *Volit''io*, (from *volo*, 'to will.') The act of willing. Hence:

VOLIT''IONAL, Relating to volition. Thus

the muscles may be moved by a *volitional* or by an *emotional* impulse.

VOLNUS, Wound.

VOLONTAIRE, Voluntary.

VOLONTÉ, Voluntas.

VOLSELLA, (*vellere*, 'to pluck,') Acanthabolus, Forceps, Madisterium—v. Patini, *Valet à Patin*.

VOLTAISM, (after Volta,) Galvanism.

VOLTUS, Countenance, Face.

VOLUMET'RIC, *Volumet'ricus*, (F.) *Volumétrique*, (from *volume*, and *meter*.) Relating to the measurement of volumes; as the *volumet'ric* method of analysis for the urine, the principle of which consists in adding to a known quantity of urine the exact amount of a test liquid required to precipitate the whole of any one ingredient contained in it.

It is usually employed only for the determination of the chlorine, urea, phosphoric and sulphuric acids, and sugar, of the urine.

VOL'UNTARY, *Hecu'sius*, *Volunta'rius*, (F.) *Volontaire*, (from *voluntas*, 'will.') Relating to the will; as '*voluntary* muscles;' muscles which act in obedience to the will.

VOLUN'TAS, gen. *Volunta'tis*, *Volen'tia*, *Arbit'rium*, *Cupid'itas*, *Boule'sis*, *Bule'sis*, *Thele'ma*, (F.) *Volonté*, (from *volo*, 'to will.') Will or desire.

VOLUNTAS seu CUPID'ITAS DESEDEND'I, *Lubi'do intesti'ni*. Desire to go to stool.

VOLVA, Vulva.

VOLVULUS, (from *volvere*, 'to roll,') Ileus—v. Intestinorum, Intussusceptio.

VOMENDI CONAMEN INANE, 'vain effort at vomiting,' Vomiturition.

VO'MER, gen. *Vo'meris*, 'a ploughshare;' *Os vo'meris*, *Os maxill'æ superio'ris undec''imum*, *Ara'trum*. One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification. Also, the penis.

VOM'ICA, gen. *Vom'icæ*, *Pyocys'tis*, (from *vomere*, 'to vomit,' 'to cast up.') (F.) *Vomique*, *Crachement de pus*. A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. It is commonly, however, restricted to a purulent collection in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomicæ are distinguished; the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

VOMICINE, Brucine.

VOMIQUE, Vomica.

VOMIQUIER, Strychnos nux vomica.

VOMISSEMENT, (from *vomir*, [L.] *vomere*, 'to vomit,') Vomiting—*v. de Sang*, Hæmatemesis.

VOMIT, (*vomere*, *vomitum*, 'to vomit,') Emetic—v. Black, Fever, yellow, Melæna.

VOMIT, DRY, OF MAR'RIOTT. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

VOMITIF, Emetic.

VOMITINE, Emetine.

VOM'ITING, *Vom'itus*, *Vomit''io*, *Vomit''ium*, *Vom'itum*, *Evomit''io*, *Ana'tropē*, *Em'esis*, *Em'etus*, *Pal'mus vom'itus*, *Ægritu'do ventric'uli*, *Spew'ing*, *Pu'king*, *Sick'ness of the Stom'ach*, (Old Eng.) *Par'breaking*, (Sc.) *Bok'king*, *Bock'ing*, *Bra'king*, *Brocht*, (Prov.) *Hull'uping*, (vulg.) *Casca'ding*, *Cust'ing*, (F.) *Vomissement*. The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach, calling, by reflex action, on the appropriate muscles to expel the contents of the viscus. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms, or blisters to the epigastric region, &c.

VOMITING AT PLEASURE, Regurgitation—v. of Blood, Hæmatemesis—v. Stercoraceous, Copremesis.

VOMITIO, Vomiting—v. Sanguinis, Hæmatemesis.

VOMITIUM, Vomiting.

VOMITO NEGRO, 'black vomit,' Fever, yellow—*v. Prieto*, Fever, yellow.

VOMITORIUM, Emetic.

VOMITORY, Emetic.

VOMITUM, Vomiting.

VOMITURIT''ION, *Vomiturit''io*, *En.·s'ia*, *Dysemes'ia*, *Subver'sio stom'achi*; ineffectual efforts to vomit; *Vomen'di cona'men ina'nē*, *Retch'ing*, *Reach'ing*, *Heav'ing*, (Old Eng.) *Bolke*, (Sc.) *Bok*, *Bock*, *Braking*. Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptation is the most general.

VOMITUS, (from *vomere*, *vomitum*, 'to vomit,') Vomiting—v. Cruentus, Hæmatemesis—v. Fæculentus, Copremesis—v. Marinus, Nausea marina—v. Navigantium, Nausea marina—v. Niger, Fever, yellow—v. Pituitosus, Blennemesis—v. Profusus, Hyperemesis—v. Purulentus, Pyemesis—v. Sanguinis, Hæmatemesis—v. Stercoris, Copremesis.

VOORARA, Curare.

VOTIVE TABLET, (from *votum*, 'a vow,') Tabula votiva.

VOUACAPOUA AMERICANA, Geoffræa inermis.

VOUSSURE PRÉCORDIALE, (*vouter*, 'to arch,' from [L.] *volvere*, *volutum*, 'to curve,') 'præcordial arching or prominence.' The elevation or arching of the parietes of the thorax, witnessed in certain thoracic affections, as in hypertrophy of the heart.

VOÛTE, (from [L.] *volvere*, *volutum*, 'to curve,') Vault—*v. Médullaire*, Corpus callosum—*v. à Trois Piliers*, Fornix.

VOW'EL, *Voca'lis*, (from *vox*, gen. *vo'cis*, 'the voice.') (F.) *Voyelle*. Physiologically, a continuous breath or sound, produced in the glottis, but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a*, *e*, *i*, *o*, *u*, *w*, and *y*, are vowels.

VOX, gen. *Vo'cis*, Voice—v. Cholerica, Voice, choleric—v. Clandestina, Whispering—v. Clangosa, Oxyphonia—v. Convulsiva, *Voix Convulsive*—v. Nasalis, Rhinophonia—v. Rauca, Raucedo, Raucous voice—v. Raucisona, Raucous voice.

VOYELLE, Vowel.

VUE, (*voir*, 'to see,' *vu*, 'seen,') Vision—*v. Basse*, Myopia—*v. Courte*, Myopia—*v. Diurne*, Hemeralopia—*v. Faible*, Amblyopia—*v. Longue*, Presbytia—*v. Louche*, Strabismus—*v. Nocturne*, Nyctalopia.

VUL'CANITE, DEN'TAL, (from *Vulca'nus, Vulcan*, 'the god of fire.') A compound of caoutchouc and sulphur or sulphur compounds, used in the formation of plates for artificial teeth, &c. The formation of vulcanite is termed *Vul'canisation*, (F.) *Volcanisation, Sulfuration.*

VULGA, Vulva.

VULNERA SCLOPETARIA, (pl. of *vulnus*, and *sclope'tum*, 'a gun,') see Sclopetarius and Wound — v. Sclopetica, see Sclopetarius and Wound — v. a Sclopetis, see Sclopetarius and Wound.

VULNÉRAIRE, Vulnerary — *v. Suisse*, see Falltranck.

VULNERARIUS, Traumatic.

VUL'NERARY, *Vulnera'rius, Traumat'icus, Traumat'ic*, (from *vulnus*, gen. *vul'neris*, 'a wound.') (F.) *Vulnéraire.* A name applied by the ancients to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNERATIO NERVI, (*vulnerare, vulnera'tum*, 'to wound,') Neurotrosis.

VULNERUM VINCTURA, 'binding of wounds,' Deligation.

VULNUS, gen. *Vul'neris*, (from *vellere*, 'to pluck or tear,') Wound—v. Laceratum, see Laceration — v. Sclopetarium, Wound, gun-shot — v. Simplex, Cut.

VULNUSCULUM, (dim. of *vulnus*,) Wound.

VULPIS MORBUS, 'disease of the fox,' Alopecia.

VULTUEUX, (F.) *Vultuo'sus*, 'full of expression,' (from *vultus*.) Corvisart has used the expression,' *Face vultueuse, Fa'cies vultuo'sa*, for the face when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée.*

VULTUS, Countenance, Face — v. Tetricus et Mœstus, Scythropasmus.

VULVA, (from *volvere*, 'to enfold,' or from *valvæ*, 'folding doors,' [?]) Uterus, especially of animals; see Vulva.

VUL'VA, *Volva, Hor'tus, Cun'nus, Puden'dum mu-li'ebrĕ, Pudenda mulieb'ria, Si'nus pudo'ris, Ie'tur, Chœrus, Ar'vum, Buc'ca, Bul'ga, Cadur'cus, Cus'tos, Fe'men, An'nulus, Fe'mur sum'mum, Follic'ulus, Fun'dus, Gre'mium, Hia'tus, Lanu'vium, Navis, Oppid'ulum, Spe'cus, Vulga, Cym'ba, Cys'thus, Sal'tus, Clitor'ium, Os'tium, Sul'cus, Con'cha, Por'cus, Por'ta, Fores* (of virgins), *Inte'femin'eum, Muli'ebria, Fossa magna muli'ebris, Episci'on, Es'chara, Tre'ma, Hor'tulus cupid'inis, Byssos, Ca'va, Caver'na, Del'phys, Del'ta, Fo'vea, Gynæce'um, Secess'us, Vallis fem'orum, Engi'um, Engi'on, Lo'ci mulie'bres, Fe'male puden'dum, Fe'male or'gans of genera'tion, Fe'male parts, Shape*, (F.) *Vulve.* A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna.* Some anatomists mean, by this term, the whole of the external genital organs of the female:—mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the caruncule myrtiformes, fossa navicularis and fourchette.

VULVA, *Fora'men commu'nĕ ante'rius, It'er* seu *Ad'itus ad infundib'ulum, I.* seu *Ad'itus ad ter'tium ventric'ulum, Ri'ma ad infundib'ulum, Aper'tu'ra ante'rior ventric'uli ter'tii cer'ebri.* An opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

VULVAIRE, Chenopodium vulvaria, Vulvar.

VUL'VAR, *Vul'varis*, (F.) *Vulvaire*, (from *vulva*.) That which relates to the vulva. Chaussier gives this name to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, (from its use in diseases of the vulva [?]), Chenopodium vulvaria.

VULVE, Vulva.

VULVI'TIS, (*vulva* and *itis*.) Inflammation of the vulva.

VULVOU'TERINE, *Vulvoüteri'nus*, (F.) *Vulvoutérin.* Relating or appertaining to the vulva and uterus.

VULVOUTERINE CANAL, Vagina.

VULVOVAG''INAL, *Vulvovagina'lis.* Relating or appertaining to the vulva and vagina.

VULVOVAGINAL GLANDS, Cowper's glands in the female.

W.

WABRAN or WAYBREAD, ([Sax.] pæg-bpæde,) Plantago.

WAD, ([Sax.] Pad,) Graphites.

WAFERTREE, Ptelea trifoliata.

WAGNER, CORPUSCLES OF, Corpuscula tactûs—w. Vesicles of, see Molecule.

WAGNERIAN SPOT, see Molecule.

WAHOO, see Euonymus.

WAIR, see Pila marina.

WAIST'COAT, STRAIT, *Indu'cula*, (F.) *Camisole, Gilet de force.* A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

WAKEROBIN, Arum maculatum, Trillium latifolium.

WALE, ([Sax.] palan, 'marks of stripes,') Wheal.

WALK'ING, *Gres'sus, Inces'sus, Deambula'tio, Ambula'tio, Bad'isis*, (F.) *La Marche, Progression.* ([Sax.] pealcan, 'to walk.') The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thighbones, the extent of which is regulated by volition, under the guidance of vision.

WALLA'CHIA, MIN'ERAL WA'TERS OF. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Fineeschti, Sibitschiudi Suz, Bräsa, Otschin, Serboneschte, Kimpalungi, Kosia, and Oloneschti. Chalybeate and saline springs have, also, been found at Sibitschiudi Suz.

WALL EYED, (of uncertain etymology.) Applied to a horse — not perfectly white or cream-coloured—which has a white iris. (Prov.) Having eyes with too much white. In the north of England persons having the white of the eye very large and to one side, are so called. Applied, also, to an eye with little or no sight, "all white like a plaistered wall."

WALLFLOWER, (probably *Gaulflower*,) Cheiranthus cheiri.

WALLRUE, Asplenium ruta muraria.

WALLTEETH, Molar teeth.

WALNUT, (probably *Gaulnut*,) Juglans regia — w. Black, Juglans regia — w. White, Juglans cinerea.

WALTHER, DUCT OF, see Sublingual gland.

WALTHE'RIA DOURADINHA, (after A. F. Walther, medical professor at Leipsic.) A plant of Brazil, *Order*, Sterculiaceæ, which is used there in diseases of the chest, and in venereal affections. It is a demulcent.

WAL'TON, MIN'ERAL WA'TERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

WAME, (womb,) Belly, Uterus.

WAMPEE, Peltandra Virginica.

WANG, ([Sax. ƿang, ƿeng, 'the cheek,') Gena.

WANG TEETH, Molar teeth.

WANT, (from past participle of Sax. ƿanian, 'to wane,' 'to fall away;') 'need of that which is necessary.' (F.) *Besoin*. This word is sometimes used to express the imperious necessity which impels us to take food, drink, &c. (See Hunger and Thirst.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act: these wants are called *instinc'tive desires* and *internal sensations* or *stim'uli*. Such are the desires or wants to eat, drink, void the urine, breathe (*besoin de respirer*), &c.

WANT, in the sense of indigence, (L.) *Eges'tas, Indigen'tia*, is the cause of a number of diseases.

WAPS, Wasp.

WARBURG'S FEVER DROPS, see Bebeeru.

WARD'S ESSENCE FOR THE HEADACH, Linimentum camphoræ compositum — w. White Drops, see Hydrargyri nitras.

WARE, see Pila marina.

WARK, ([Sax.] ƿæƿc,) Pain.

WARMBRUNN, MIN'ERAL WA'TERS OF. Much frequented springs in Silesia, about a league from Hirschberg. They are thermal, 95° to 100° Fah., and are chiefly used as baths. The impregnating materials are carbonate of soda, sulphate of soda, sulphate of lime, chloride of sodium, carbonate of magnesia, and sulphohydric acid gas.

WARM SPRINGS, see Georgia, Mineral waters of, and Virginia, Mineral waters of.

WARNERA CANADENSIS, (after Mr. Richard Warner, of Woodford, England,) Hydrastis Canadensis.

WARRENTON SPRINGS, see Virginia, mineral waters of.

WART, (Sax. ƿeaƿt,) Verruca — w. Corneous, Cornu—w. Moist, Acrothymion.

WARTY, *Ver'rucose, Ver'rucous, Verruco'sus*, (F.) *Verruqueux*. Full of warts. Resembling, relating, or belonging to warts.

WARTY TU'MOUR OF CIC'ATRICES. A name given by Mr. Howship to the tumour, which sometimes appears on an old scar, many years, perhaps, after the injury that caused it. The ulcer, formed under such circumstances, has been called the *warty ulcer of Marjolin* — having been well described by that surgeon.

WASH, BLACK, see Hydrargyri submurias — w. Phagedenic, see Hydrargyri submurias — w. Preventive, Lotion, Hannay's — w. Red, Lotio rubra, and Lotion, camphorated, of Bates — w. White, Liquor plumbi subacetatis dilutus — w. Yellow, see Hydrargyri oxymurias.

WASHERWOMAN'S SCALL, Psoriasis diffusa.

WASHITAW SPRINGS, see Arkansas, mineral waters of.

WASP, *Wops*, ([Sax.] ƿæsƿ, ƿæps,) (Prov.) *Whamp, Ves'pa, Sphex*, (F.) *Guêpe*. A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See Poisons, Table of.) The best application is the sp. ammoniæ aromaticus, or some preparation of ammonia.

WAS'SERBURG, MIN'ERAL WA'TERS OF. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of Munich. The water, called, also, *Aqua Aga'tii*, contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

WASSERKUR (G.), 'water cure,' Hydrosudotherapeia.

WASTING, ([Sax.] ƿesƿan, 'to waste,') Consumption, Tabes.

WASSERSCHLAG (G.), 'water stroke,' see Hydrocephalus internus.

WA'TER, ([Sax.] ƿæƿeƿ, [G.] Wasser,) *A'qua, Hy'dor*, (F.) *Eau, Protôx'ide of hydrogen*. Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212° of Fahrenheit; and is taken as the unit in all tables of specific gravity of solid and liquid substances. Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in seawater and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, *"Aqua levissima pluvialis est; deinde fontana; tum ex flumine; tum ex puteo; post hæc ex nive, aut glacie: gravior his ex lacu; gravissima ex palude."* Pure water — *A'qua pu'ra* — is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

WATER, Urine—w. of Aix-la-Chapelle, see Aix-la-Chapelle—w. Allflower, Urine, cows'—w. Alum, Bates's, Liquor aluminis compositus—w. of Ammonia, stronger, see Liquor ammoniæ — w. of carbonate of Ammonia, Liquor ammoniæ subcarbonatis — w. Angel, Angel water — w. Anise, see Pimpinella anisum — w. Apple, Apple tree — w. Barley, Decoctum hordei — w. Bath, see Bath, water.

WATER BED, *Hydrostat'ic bed*. A bed, contrived by Dr. Arnott, which, in consequence of its being placed on water, is well adapted for the bedridden.

WATER, BINELLI, Aqua Binellii.

WATER OF BITTER ALMONDS, Aqua Amygdalarum concentrata.

WATER BLEBS, Pemphigus—w. Brash, Pyrosis.

WATER, BROCCHIERI, Aqua Brocchierii — w. Camphor, Mistura Camphoræ.

WATER CANKER, Cancer aquaticus.

WATER, CARAWAY, see Carum carui—w. Caraway, strong, Spiritus carui — w. Carmelite, see Melissa — w. of Cassia, see Laurus Cassia.

Water Caster, see Uromantia.

Water, Cherry Laurel, see Prunus laurocerasus — w. Chicken, Chickentea — w. Chlorine, see Chlorine — w. Cinnamon, Aqua cinnamomi — w. Cinnamon, strong, Spiritus cinnamomi — w. Cologne, *Eau de Cologne.*

Water, Creasote, see Creasote.

Water Cress, Sisymbrium nasturtium — w. Cure, Hydrosudotherapeia.

Water, Dill, see Anethum graveolens.

Water, Distil'led, *A'qua destilla'ta, Ho'ly Water,* (F.) *Eau distillée, Hydrolat,* is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary; — the water, containing any saline impregnation—hard water, for example—decomposing certain substances. Distilled water has been recommended as a dietdrink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the Pharmacopœia of the United States, it is directed to be made as follows: — Take of *water,* ten gallons. First distil two pints, and throw them away; then distil eight gallons. Keep the distiled water in glass bottles.

Distil'led wa'ters, (F.) *Hydrolats,* consist of common water, charged by distillation with the volatile principles of medicinal agents. See Aquæ destillatæ.

Waterdoctor, see Uromantia.

Waterdress'ing. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part:—the whole being covered with oiled silk, elastic gum, or spongiopiline. *Wa'ter strap'ping* or *wet strap'ping* means the treatment of ulcers, and certain cutaneous affections of the extremities, &c., with strips of linen or cotton saturated with water.

Water, Elder, see Sambucus — w. Epileptic, of Langius, Langii aqua epileptica — w. Fennel, Aqua fœniculi.

Water Flag, Yellow, Iris pseudacorus.

Water, Flor'ida, — a celebrated perfume, — may be made of *Ol. Bergami,* f℥iv; *Tinct. benzoin. comp.* f℥ij; *Alcohol.* cong.

Waterfright, Hydrophobia.

Water, Goulard, Liquor plumbi subacetatis dilutus.

Water Gruel, see Avena, and Grits.

Water, Hard. Common water, which decomposes and curdles soap; in contradistinction to *soft water,* which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

Water in the Head, Hydrocephalus—w. Hell, see Toddy.

Water, Holy, Water, distilled—w. Honey, see Mel.

Water, Hungary, Spiritus rosmarini.

Water Jags, see Varicella.

Water, Lake, *A'qua ex la'cu,* (F.) *Eau de lac,* is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

Water, Laurel, see Prunus laurocerasus — w. Lavender, Spiritus lavandulæ — w. Lead, Liquor plumbi subacetatis dilutus — w. Lemonpeel, see Lemonpeel Tea—w. Lime, Liquor calcis — w. Lime, compound, Liquor calcis compositus — w. Magnesia, aerated, Magnesia, fluid—w. Magnesia, carbonated, Magnesia, fluid.

Water, Marsh, *A'qua paludo'sa,* (F.) *Eau de Marais,* is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

Water, Medicated, see Aquæ medicatæ.

Water, Min'eral, *A'qua minera'lis* seu *salu'bris* seu *medica'ta* seu *sote'ria, Fons saluta'ris* seu *medica'tus* seu *sote'rius,* (F.) *Eau minérale* ou *médicinale naturelle.* Water, holding in solution different saline and gazeous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

Various mineral waters are referred to under their appropriate heads; and a table of the fixed constituents, which enter into the composition of some of the more celebrated springs abroad, is given by Dr. Pereira, in his "Elements of Materia Medica and Therapeutics." There is, also, a "Table of some of the principal Mineral Waters," at home and abroad, in the "Author's General Therapeutics and Materia Medica," Vol. 2, p. 460, 6th edit., Philadelphia, 1857.

Mineral waters may be divided into four classes: —1. *Ga'zeous* or *Acid'ulous.* 2. *Chalyb'eate.* 3. *Saline'.* 4. *Sulphu'reous.* These may be *ther'mal,* or *cold,* — *nat'ural,* or *artific''ial.* Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to others.

1. *Ga'zeous, Acid'ulous* or *Car'bonated Min'eral Wa'ters, So'da* or *Beer Springs, A'quæ minera'les acid'ulæ,* (F.) *Eaux minérales gazeuses* ou *acidules.* The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated amongst the acidulous waters, are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer, Schlangenbad, Sultzmatt, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalyb'eate* or *Ferru'ginous Min'eral Wa'ters, A'quæ minera'les ferrugino'sæ* seu *Chalybea'tæ* seu *Martia'les* seu *Ferro'sæ, Chalybope'gæ, Chalybokre'næ, Siderope'gæ, Siderokre'næ,* (F.) *Eaux minérales ferrugineuses,* contain iron — sulphate, chloride or carbonate, generally the latter — held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary, those only are specified which have some celebrity; yet there are about one hundred; more than sixty of these being saline, and forty sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline' Min'eral Wa'ters, A'quæ minera'les sali'næ, Am'na alcaliza'ta* (Paracelsus), *Hydral'mæ,* (F.) *Eaux minérales salines.* Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts con-

tained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphu'reous Min'eral Wa'ters, A'quæ minera'les sulphu'reæ;* when warm, termed *Theiother'mæ, Theiope'gæ, Thiother'mæ, Fon'tes sulphu'rei cal'idi,* (F.) *Eaux minérales sulfureuses* ou *sulfurées* ou *sulfureuses* ou *hépatiques,* &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognised by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Barèges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-chapelle, Enghien, Harrowgate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Ther'mal Min'eral Wa'ters.* They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

WATER, MINERAL, Acidulous water, simple.

WATERS, MIN'ERAL, ARTIFIC''IAL, (F.) *Eaux minérales artificielles* ou *factices.* These are imitations of the natural; and some of them — as the factitious Cheltenham water, and Sedlitz water — answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

WATER, NUTMEG, Spiritus myristicæ — w. Orange flower, see Citrus aurantium—w. Oxygenated, Hydrogen, peroxide of.

WATER PANG, Pyrosis — w. Parsnep, creeping, Sium.

WATER, PENNYROYAL, SPIRITUOUS, Spiritus pulegii — w. Peppermint, Aqua menthæ piperitæ — w. Pimento, see Myrtus pimenta.

WATER POX, see Varicella.

WATER, PROTOXIDE OF NITROGEN, Aqua nitrogenii protoxydi.

WATER PURPIE, Veronica beccabunga — w. Qualm, Pyrosis.

WATER, RAIN, *A'qua pluvia'lis* seu *plu'via* seu *im'brium,* (F.) *Eau de pluie,* when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.

WATER, RICE, see Oryza.

WATER, RIV'ER, *A'qua fluviat'ilis,* is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.

WATER, ROSE, Aqua rosæ.

WATER, SEA, *A'qua Mari'na, Alma, Hu'mor Do'ridis,* (F.) *Eau de Mer, Eau salée.* This contains chlorides of sodium, magnesium, and calcium, and sulphate of magnesia. It is cathartic, and forms the usual glyster at sea. It makes an excellent tonic bath; superior in most cases—especially in scrofula—to the freshwater bath.

WATER, SEARLE'S PATENT OXYGENOUS AËRATED, Aqua Nitrogenii protoxydi—w. Seydschütz, Sedlitz water.

WATER SHIELD, Brasenia hydropeltis.

WATER, SNOW, *A'qua nivea'ta,* (F.) *Eau de neige,* has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.

WATER, SODA, Acidulous water, simple — w. Soft, see Water, hard—w. Spearmint, Aqua menthæ viridis.

WATER, SPRING, *A'qua fonta'na, Hydrope'gē,* (F.) *Eau de fontaine,* contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard;* if not, *soft.* Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

WATER STRAPPING, see Water dressing — w. Stroke, see Hydrocephalus internus.

WATER, STYPTIC, SYDENHAM'S, Solutio sulphatis cupri composita—w. Tar, see Pinus sylvestris.

WATER TARGET, Brasenia hydropeltis.

WATER, TOAST, see Toast water.

WATER, WELL, *A'qua putea'lis* seu *putea'na* seu *ex pu'teo,* (F.) *Eau de puit* ou *de source,* is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

WATERS, THE, Liquor Amnii — w. Bag of, see Liquor Amnii—w. Discharged or broken, Profusio aquæ — w. Distilled, Aquæ destillatæ — w. First, Primitiæ—w. Green, see Lochia.

WATTWEILER, MIN'ERAL WA'TERS OF. Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda, chloride of sodium, and free carbonic acid.

WAX, ([Sax.] Pæxe,] Cera—w. Ear, Cerumen.

WAX, JAPAN. Obtained from *Rhus succeda'nea* of Japan. It is of a medium quality between beeswax and the ordinary vegetable tallows.

WAX, MYRTLE, *Bayberry tallow.* A wax obtained from the fruit of *Myri'ca cerif'era, Wax myrtle, Candleberry myrtle;* an indigenous plant, which yields the *bayberry bark,* possessing tonic, stimulant and astringent properties. It has been prescribed in dysentery.

WAX, YELLOW AND WHITE, Cera flava et alba.

WAX'ING KER'NELS, *Wax'enkernels, Crescen'tiæ,* (F.) *Croissances. Croissants, Glandes de croissance.* A popular term for small tumours, formed by an enlargement of the lymphatic glands — in the groins of children particularly. They have been looked upon as connected with the growth of the body,—hence their name.

WAY, ([Sax.] Pæg,) *O'dos, V'ia, Passage,* (F.) *Voie.* A name given to different canals.

WAYBREAD, ([Sax.] Pæg bnæde,) Plantago major.

WAYME, Womb, Belly, Uterus.

WAYS, DIGES'TIVE, *Diges'tive Pas'sages, Pri'mæ Vi'æ,* (F.) *Voies digestives, Premières voies,* are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.

WAYS, SEC'OND, *Second Pas'sages, Secun'dæ vi'æ,* (F.) *Secondes voies,* comprise the chyliferous, lymphatic and blood-vessels.

WEAKSIGHTEDNESS, Asthenopia.

WEAL, ([Sax.] palan, 'marks of stripes,') Wheal.

WEAM, (Womb,) Belly, Uterus.

WEAM ILL, Colic.

WEAN'ING, (from [Saxon] ᵽenan, 'to wean;') *Ablacta'tio, Apogalactis'mus,* (Prov.) *Spa'ning,* (F.) *Sévrage.* The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

WEANING BRASH, see Brash, weaning.

WEASAND, ([Sax.] ᵽæᵹanꝺ,) Trachea.

WEARING, (from [Sax.] ᵽeᵹan, 'to wear,') Consumption.

WEATHERCOCKS, Impatiens.

WEB, ([Sax.] ᵽeb,) Caligo, Pterygium — w. Muscular, Panniculus carnosus.

WEBEYE, Caligo, Pterygium.

WEBBED FINGERS, Dactylion.

WEBERIAN CORPUSCLES, (after Weber, a German anatomist,) see Ejaculatory Ducts—w. Organ, see Ejaculatory Ducts.

WED'GED, ([Sax.] ᵽæᵹ, 'a wedge,') *Inclu'sus, Inhæ'rens,* (F.) *Enclavé.* The head of the fœtus is said to be *wedged, locked* or *impacted* in the pelvis, when it remains fixed, notwithstanding the uterine efforts.

The condition is called *Incunea'tio* seu *Inclava'tio fœ'tûs, Spheno'sis,* (F.) *Enclavement.* See Paragomphosis.

WEEBO, Senecio Jacobæa.

WEED, (from [Sax.] ᵽeꝺan, 'to rage,') see Mastitis.

WEED, ARROW, ([Sax.] ᵽeoꝺ,) Sagittaria variabilis—w. Beetle, Galaxaphylla—w. Breast, Saururus cernuus—w. in the Breast, see Mastitis—w. Butter, Erigeron Canadense—w. Cancer, Goodyera pubescens—w. Dyer's, Reseda luteola—w. Field, Anthemis cotula — w. Horse, Erigeron Canadense —w. Horsefly, Sophora tinctoria—w. Milk, Apocynum androsæmifolium — w. Phthisis, Ludwigia palustris—w. Pride, Erigeron Canadense—w. Red, Phytolacca decandra—w. Silver, Potentilla anserina—w. Soldiers', Matico—w. Thimble, Rudbeckia laciniata—w. Wind, Asclepias tuberosa.

WEEPING, (from [Sax.] ᵽeopan, 'to weep,') Fletus—w. Tear, Tear.

WEESEL, Trachea.

WEID, (Weed,) see Mastitis.

WEIGHT, (from [Sax.] ᵽæᵹan, 'to weigh;') (F.) *Pesanteur,* see Stature. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head, for example.

WEIGHTS AND MEAS'URES, *Pon'dera et Mensu'ræ,* (F.) *Poids et Mésures.* The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are upon decidedly the best footing, but they are not yet generally adopted. The greatest diversity, indeed, prevails in the measures, both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.

WEIGHTS.

Troy Weights, as used by the British Apothecaries, —Pondus pharmaceuticum seu *medicinale.*

The *pound* ℔	contains	12 ounces.
The *ounce* ℥		8 drachms.
The *drachm* ʒ		3 scruples.
The *scruple* ℈		20 grains.
The *grain* gr.		

These, and the signs by which they are denoted, have been the same in all the British Pharmacopœias, as well as in the American.

lb.	*Oz.*	*Drachms.*	*Scrup.*	*Grs.*
1 =	12 =	96 =	288 =	5760
	1 =	8 =	24 =	480
		1 =	3 =	60
			1 =	20

Poids de Marc.

The *pound*	contains	16 ounces.
The *ounce*		8 drachms.
The *drachm*		3 scruples.
The *scruple*		24 grains.
The *grain*		

Avoirdupois.

Pound.	*Ounces.*	*Drachms.*	*Troy grains.*
lb. 1. =	16 =	256 =	7000
	1 =	16 =	437·5
		1 =	27·3437ᵬ

The avoirdupois drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains avoirdupois=7000 grains troy, and hence 1 grain troy = ·97 grain avoirdupois.

The *Poids de Marc* is that employed by the French Pharmaciens, when the new weights are not. The Avoirdupois has been used by the Dublin College.

To avoid the danger of mistakes by confounding the troy and the avoirdupois pounds, the term *pound* has been discontinued in the formulæ of the Ph. U. S. 1863—the desired weight being expressed in ounces, each containing 480 grains. The ounce is always written *troyounce;* and the *drachm* and *scruple* are disused, their equivalents being expressed in grains. On the other hand, the General Medical Council of Great Britain resolved (1863) that "the weights used in the British Pharmacopœia shall be the Imperial or avoirdupois pound, ounce, and grain; and that the terms *drachm* and *scruple,* as designating specific weights, shall be discontinued." The following are the weights and measures of that Pharmacopœia with their symbols.

WEIGHTS.

The Avoirdupois pound =	16 oz. =	7000 grs.
	1 oz. =	437·5 grs.
	1 gr. =	1 gr.

MEASURES.

C. 1 gallon	= 8 pints	weighing 10 pounds.
O. 1 pint	= 20 fluid ounces	" 1¼ "
fl. oz. 1 fluid ounce	= 8 fluid drachms	" 437·5 grs.
fl. dr. 1 fluid drachm	= 60 minims	" 54·68 "
♏. 1 minim		·91 "

The gallon holds 10℔ avoirdupois of distilled water, at a temperature of 60° Fahrenheit.

The measures in the Ph. U. S., 1863, have the same names as in the British; but their value is different; the pint weighing 16 oz. 291·2 grs. avoirdupois, and the fluidounce 455·7 grs. In the formulæ, the Acids and the Oils are ordered by weight; other liquids by measure. The gallon is not used, that measure being always expressed in pints. In Continental Europe all medicines are weighed, and the gramme is becoming universall used.

The following tables exhibit the relative value of the old French and English weights:

Poids de Marc.	*Troy. Wt.*	*Avoird.*	*Troy grs.*
1 pd. (*livre*) =	1·3126*8lb* =	1·0801*43lb* =	7561
1 oz. (*once*) =	·984504*oz* =	1·0801*43oz* =	472·5625
1 dr. (*gros.*) =	·954504*dr* =		59·0703125
1 gr. =			·820421

Troy.		*Poids de Marc.*		*French grains.*
1 pound	=	0·76180 *lb.*	=	7561
1 ounce	=	1·01574 *once*	=	585·083
1 drachm	=	1·01574 *gros*	=	73·135
1 grain				1·219

Avoirdupois.		*Poids de Marc.*		*French grains.*
1 pound	=	0·925803 *lb.*	=	8532·3
1 ounce	=	0·925803 *once*	=	533·27

To convert French grains into Troy grains, divide by " Troy grains into French grains, multiply by	1·2189
" French ounces into Troy ounces, divide by " Troy ounces into French ounces, multiply by	1·015734
" French pounds (*poids de marc*) into Troy pounds, multiply by " Troy pounds into French pounds, divide by	1·31268

The *obolus*			11
The *siliqua*			4

The Greeks divided their obolus into *chalci* and *lepta:* some divided it into 6 *chalci*, and each *chalcus* into 7 lepta; others into 8 chalci, and every chalcus into 8 lepta or *minuta*.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use amongst the Romans.

	Urna.	*Libra.*	*Uncia.*	*Denarius.*	*Scrupulus.*	*Sextans.*	*Chalcus.*	*Grana.*
Amphora	2 =	80 =	960 =	6720 =	20160 =	40320 =	403200 =	420480
Urna	1 =	40 =	480 =	3360 =	10080 =	26160 =	210600 =	210240
Congius	¼ =	10 =	120 =	840 =	2540 =	5040 =	50400 =	52920
Sextarius		1⅔ =	20 =	140 =	420 =	840 =	8400 =	8760
Libra		1 =	12 =	84 =	252 =	504 =	5040 =	5256
Hemina			8 4-7 =	60 =	180 =	360 =	3600 =	3759
Acetabulum			2 1-7 =	15 =	45 =	90 =	900 =	939
Sesqui-cyathus			2 1-7 =	15 =	45 =	90 =	900 =	939
Cyathus			1 3-7 =	10 =	30 =	60 =	600 =	626
Sescuncia			1½ =	10½ =	31½ =	63 =	630 =	657
Uncia			1 =	7 =	21 =	42 =	420 =	438
Cochleare				2½ =	7½ =	15 =	150 =	156
Drachma				1 =	3 =	6 =	60 =	62 4-7
Denarius				1 =	3 =	6 =	60 =	62 4-7
Scrupulus					1 =	2 =	20 =	20⅔
Scrupulus dimidiatus					½ =	1 =	10 =	10⅓
Obolus						1 =	10 =	10⅓
Sextans						1 =	10 =	10⅓
Chalcus							1 =	1 1-30

He gives also the following '*Carmen Mnemonicum*,' which exhibits the analogies of the Roman and British imperial weights.

To the congius and gallon, each, ten pounds allow,
On the bushel and amphora eighty bestow;
Rome's pound, as in Troy weight, twelve ounces obtains,
But her ounce is Aboirdupois, strictly, in grains:
Denarii drams, scruples scrupli define,
Septarius answers to our bottle of wine,
And the mna's a short pint—fourteen ounces in fine.

3. *Weights said to be of the Arabians, Moors, Greeks, and Latins of the barbarous periods of the Middle Ages.*

	oz.	dr.	gr.

A good section on weights and measures is contained in the edition of "The Seven Books of Paulus Ægineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii. p. 609, London, 1847.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:—

A *glassful* or *cupful*, ([F.] *Verre,*) is reckoned to contain 4 or 5 fluidounces.
A *wineglassful*, 1½ ounce or two fluidounces.
A *tablespoonful*, ([F.] *Cuiller à bouche,*) about half a fluidounce.
A *coffee* or *dessertspoonful*, about 3 fluidrachms.
A *teaspoonful*, a fluidrachm.
A *handful*, *manipulus*, ([F.] *Poignée,*) as much as can be held in the hand.
The *Pugillus* ([F.] *Pincée*) is as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

	French.	
	oz.	*dr.*
A *Manipulus* of barley weighs	3	2½
" linseed	1	4
" linseed meal	3	3
" dried mallow leaves	1	3
" dried cichory leaves	1	0
" " flowers of the tilia	1	2½

	dr.	*gr.*
A *Pugillus* of chamomile flowers weighs	2	
" arnica	1	48
" marshmallow	1	24
" mallow		60
" fennel seeds	1	60
" aniseed	1	12

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WEIL'BACH, MIN'ERAL WA'TERS OF. The village of Weilbach is in the plain between the Maine and the southern extremity of the Taunus hills. It has in its neighbourhood a cold sulphureous alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs in Nassau, and of Baden-Baden, in various chronic abdominal and thoracic affections.

WEINTRAUBENKUR, Grape cure.

WELCOME TO OUR HOUSE, Euphorbia cyparissias.

WELD, Reseda luteola.

WELK, *Whelk*, (like *Wheal.*) An inequality; a protuberance; a cutaneous eruption of this character. Aene.

WELTER'S BITTER, Acid, carbazotic.

WEM, (Womb,) Belly, Uterus.

WEM'DING, MIN'ERAL WA'TERS OF. These waters are situate about four leagues from Donauwörth, in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, ([Sax.] pen,) *Lu'pia*, (F.) *Loup.* A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocele.

WESTERN ISLANDS, Azores.

WEST IN'DIES, CLI'MATE OF. The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WEST'S SPRING, see South Carolina, mineral waters of.

WET STRAPPING, see Water dressing.

WHAHOO, see Euonymus.

WHAMP, Wasp.

WHARTON'S DUCT, (after Dr. Thomas Wharton, an English anatomist,) Ductus salivalis inferior.

WHEAL, ([Sax.] Palan, 'marks of stripes,') *Weal*, *Wale*, *Pom'phus.* A ridge, or elevation of the skin, produced by a rod or whip; or as if produced in that manner. Such elevations are seen in urticaria.

WHEAT, ([Sax.] hpeate,) Triticum—w. Indian, Zea mays—w. Turkey, Zea mays.

WHEEZE, ([Sax.] hpeopan,) (Prov.) *Rez'zle*, (formed probably, like *whiz* and *whisper*, from the sound it expresses.) To breathe with difficulty and noise, as in asthma.

WHELK, (like *wheal,*) Acne, Welk—w. Chin, Sycosis—w. Rosy, Gutta rosea.

WHETLEBONES, Vertebræ.

WHEY, ([Sax.] hpæg.) Serum lactis.

WHEY CURE, (G.) Molkenkur, (F.) *Cure de petit lait.* In the Kursaal of many of the German watering places, a space is set apart for whey drinkers. The whey is a pleasant diluent, and the saccharine matter it contains may act as a eutrophic; but the main effect on the valetudinarian is probably produced by the new impressions made upon him by his visit to the watering place.

WHEY, MUSTARD, see Sinapis—w. Rennet, see Serum lactis—w. Sack, Winewhey—w. Tamarind, see Tamarindus—w. Vinegar, see Acetum—w. Wine, Winewhey.

WHICKFLAW, Whitlow.

WHIFFING MURMUR, see Murmur, respiratory.

WHIG, ([Sax.] hpæg,) Buttermilk, Serum lactis.

WHIMBERRY Vaccinium myrtillus.

WHIRLING CHAIR, see Chair.

WHISKY, see Spirit.

WHISKY LIVER, Liver, nutmeg.

WHISPER, CAVERNOUS, see Cavernous.

WHIS'PERING, *Vox clandesti'na*, (from [Sax.] hpipplan, 'to whisper.') An example of onomatopœia. *Susurra'tio*, *Susurra'tion.* Articulation of the air sent through the vocal tube without any action of the glottis.

WHISPERING SOUFFLE, see *Souffle.*

WHISTLING, (a case of onomatopœia, from [Sax.] hpiplan, 'to whistle,') *Sifflement*, see *Râle sibilant.*

WHITE BALL, Cephalanthus occidentalis—w. Blisters, Rupia escharotica.

WHITE, FLAKE, Plumbi subcarbonas.

WHITE LEAF, Pyrola maculata, Spiræa tomentosa—w. Leg, Phlegmatia dolens—w. Matter of the brain, see Cerebrum—w. Root, Angelica lucida, Asclepias tuberosa, Ligusticum actæifolium.

WHITE, SPANISH, Bismuth, subnitrate of.

WHITE SUBSTANCE OF SCHWANN, see Nerve fibre—w. Sulphur, see Virginia, mineral waters of—w. Swelling, Hydrarthrus—w. Swelling of

lying-in women, Phlegmatia dolens — w. Weed, Chrysanthemum leucanthemum—w. Wood, Liriodendron, Tilia Americana.

WHITENESS OF COMPLEXION, Paleness.

WHITES, THE, Leucorrhœa.

WHITLEYA STRAMONIFOLIA, (after Whitley, an English botanist,) Anisodus luridus.

WHITLOW, ([Sax.] hpit, 'white,' and *low*, 'a flame,') Paronychia.

WHOOPINGCOUGH, (from the attendant *whoop*,) Pertussis.

WHORLYWORT, Leptandria purpurea.

WHORTLEBERRY, Vaccinium myrtillus, Vaccinium vitis idæa—w. Bears', Arbutus uva ursi.

WHORTS, BLACK, Vaccinium myrtillus.

WHYTT'S DISEASE, (after Dr. Robt. Whytt, of Edinburgh,) Hydrocephalus internus.

WIDOWWAIL, Cneorum tricoccum, Daphne Alpina.

WIESBADEN, MIN'ERAL WA'TERS OF, see Wisbaden.

WIESSAU, MIN'ERAL WA'TERS OF. These waters are situate about four leagues from the convent of Waldsassen in Bavaria. They contain carbonic acid, carbonates of lime and magnesia, chlorides of calcium, magnesium, and aluminium, carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

WILD, ([Sax.] pilo.) An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong mental emotion;—a *wild look*, (F.) *Physiognomie égarée*.

WILD'BAD, MIN'ERAL WA'TERS OF. Wildbad is a small town of Wurtemberg, three German miles from Baden-Baden. It is much frequented as a watering-place. The water is thermal, from 95° to 100° of Fah., and is much employed in cases in which thermal waters are indicated. It is used internally, a pint not containing more than a grain of solid ingredients, which consist of salts of soda and lime. The proportion of carbonic acid gas is very small.

WILDFIRE, Erysipelas.

Wildfire Rash, Ignis sylvaticus.

WILDUNGEN, MIN'ERAL WA'TERS OF. Wildungen is situate a few miles from Cassel in Germany. In its neighborhood are several mineral springs, the chief of which, according to Stucke, contain a bituminous matter, chloride of sodium and sulphate of soda, carbonate and sulphate of lime, &c. They are used chiefly as refrigerants,

WILL, ([Sax.] pilla,) Voluntas.

WILLAN, Salix.

WILLOW, ([Sax.] pelig,) Salix—w. Bedford, Salix fragilis—w. Broadleaved, Salix latifolia—w. Crack, Salix fragilis—w. Great roundleaved, Salix caprea—w. Herb, common, Lythrum salicaria—w. Herb, great, Epilobium angustifolium—w. Herb, purple, Lythrum salicaria—w. Herb, purple veined, Epilobium coloratum.

Willow, Low Bush, Salix humilis—w. Red, Cornus sericea—w. Rose, Cornus sericea—w. Speckled, Salix humilis—w. Sweet, Myrica gale—w. White, Salix alba.

WIND, ([Sax.] pind.) (an example of onamatopœia — *oaind*,) *Ven'tus*, *An'emos*, (F.) *Vent*. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds which they transport to greater or less distances. The winds which blow over a considerable extent of country are dry and serene: those which come from the ocean are moist and chilly.

Wind, Breath, see Flatulence.

Wind of a Ball or Shot. A term applied to the compression of air, supposed to be produced by the passage of a ball near a part of the body, so as to occasion what has been called a *wind contusion*.

Wind Contusion, see Wind of a Ball — w. Dropsy, Emphysema, Tympanites — w. Flower, Anemone—w. Pipe, Trachea—w. Root, Asclepias tuberosa—w. Weed, Asclepias tuberosa.

WINDINESS, Flatulence.

WIND'Y, *Flatulen'tus*, *Flat'ulent*, *Va'porous*, (F.) *Venteux*, *Flatueux*. That which causes wind or flatulence; also, that which is caused by wind or flatulence; as *windy food*, *windy colic*, &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

WINE, ([Sax.] pin, [G.] Wein, originally, perhaps, from οινος,) *Œ'nos*, *Vi'num*, *Meth'u*, (F.) *Vin*. A name given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol, œnanthic ether, saccharine matter, malic acid, tartaric acid, bitartrate of potassa, acetic acid, an extractive colouring matter more or less bitter and partly resinous, and of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation. In all wines, too, there is more or less of an odorous principle, partly derived directly from the grape, and partly formed during fermentation, which has the characters of an essential oil, constitutes the perfume or *bouquet* of the wine, and is said not to exceed the forty-thousandth part of the wine. It is regarded as a true ether—a combination of oxide of ethyle with œnanthic acid.

The following table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more brandied or "reinforced" than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

Proportion of Alcohol, s. g. 0·825, in one hundred parts by measure of the following Wines, and Malt and Spirituous Liquors.

The only wine recommended in some pharmacopœias is *Sher'ry, Vi'num, V. al'bum, V. al'bum Hispan'icum, V. Xer'icum, Leucœ'nus.* It is a *dry wine;* the least variable in its properties, and agrees best with the dyspeptic. The *brown* sherries differ from the *pale* in the addition of a colouring liquid to the former, termed *Arrope,* which is prepared by boiling sherry down to a syrup; but they frequently owe their hue to burnt sugar or caramel. Other wines used officinally are,—*Cana'ry* or *Sack wine, Vi'num Canari'num; Moun'tain wine, Vi'num al'bum monta'num; Tent wine, Vinum tinto; Rhen'ish wine, Vi'num Rhena'num;* and *Port wine, Vi'num ru'brum, V. rubrum Portugal'licum, V. Porten'sĕ.*

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

Mull'ed Wine is made as follows:—Take of bruised *Cinnamon* ℥ss, half a *Nutmeg,* grated, and ten bruised *Cloves.* Infuse in *boiling Water* Oss for an hour; strain, and add *Sugar* ℥j. Pour the whole into a pint of hot *Port* or *Sherry.* Useful in adynamic conditions.

Wine, Aminæan, Aminæum vinum.

Wine of Aloes, Vinum aloes.

Wine, Antimonial, Vinum antimonii—w. Antiscorbutic, Vinum antiscorbuticum—w. Aromatic, Vinum aromaticum—w. Bark, compound, Vinum de kinâ kinâ compositum—w. Barley, Cervisia—w. Bitter, diuretic, Vinum diureticum amarum.

Wine Bit'ters, *Vi'num gentia'næ compos'itum.* The formulæ for these may be various. The following is as good and as agreeable as any. (*Rad. gentian.* ℔j, *Cort. aurant.* ℥x, *Sem. cardam.* cont. ℥iv, *Cinnam. cort.* ℥iv, *Wine,* foreign or domestic, three gallons and a half.) Tonic and stomachic.

Wine, Cedar, Cedrinum vinum—w. Champagne, Vinum campanum—w. Chian, Chium vinum.

Wine of Colchicum, Vinum colchici—w. of Colchicum seed, Vinum colchici seminis—w. of Ergot, Vinum ergotæ—w. of Gentian, compound, Vinum gentianæ compositum—w. of Hellebore, white, Vinum veratri.

Wine, Ipecacuanha, Vinum Ipecacuanhæ.

Wine of Iron, Vinum ferri.

Wine, Medicated, Vinum medicinale—w. Mulled, see Wine.

Wine of Opium, Vinum opii.

Wine, Port, Vinum Portugallicum—w. Pullet, *Poulet, vin de.*

Wine of Quinia, Vinum quiniæ.

Wine, Rhubarb, Vinum rhei—w. Sherry, Vinum—w. Steel, Vinum ferri—w. Tar, see Pinus sylvestris—w. Tobacco, Vinum tabaci.

Wine Whey, *White wine whey,* (Prov.) *Sack'whey.* Take of good *milk* two-thirds of a pint, and add *water* to make a pint. Take of *sherry,* or any other good white *wine,* two glasses, and of *sugar* a dessertspoonful. Place the milk and water in a deep pan on the fire, and the moment it boils, pour into it the wine and sugar. Stir assiduously for 12 or 15 minutes, whilst it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

Wine, White, see Wine.

Wine of Wormwood, Vinum absinthites.

WINGSEED, Ptelea trifoliata.

WINKERS, Cilia.

WINKING, ([Sax.] pincian, 'to wink,') Nictation, Scardamygmus.

WINTER BERRY, SMOOTH, Prinos lævigatus—w. Berry, Virginia, Prinos—w. Berry

(c) 14·50 H. (d) 12·91 H.

whorled, Prinos — w. Bloom, Hamamelis Virginiana—w. Cough, Bronchitis, chronic—w. Green, Gaultheria — w. Green, roundleaved, Pyrola — w. Green, spotted, Pyrola maculata.

WINTER'S BARK TREE, Wintera aromatica.

WINTERA, (after Captain Winter, who first carried it to Europe,) see Wintera aromatica.

WINTERA AROMAT'ICA, *Dri'mys Winteri, Wintera'na aromat'ica, Win'ter's bark Tree; Ord.* Magnoliaceæ. The bark, *Wintera* (Ph. U. S.), *Cortex Wintera'nus* seu *Wintera'nus Magellan'icus, C. Magellan'icus, Cinnamo'mum Magellan'icum,* (F.) *Écorce de Winter, Cannelle poivrée,* is very much allied in its properties to Canella alba.

WINTERANA AROMATICA, Wintera aromatica.

WIRSUNG'S DUCT, see Pancreas.

WIRTSPRINGS, Hangnails.

WISBADEN, MIN'ERAL WA'TERS OF. Wisbaden is a town of Germany, about 6 miles north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs, and is much frequented. There are numerous cold and thermal springs:—the former containing sulphohydric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fah.

WISMUTHUM, Bismuth.

WITCHEN, Sorbus aucuparia.

WITCHHAZEL, Hamamelis Virginiana, Sorbus aucuparia.

WITCHMEAL, Lycopodium.

WITCHWOOD, Sorbus aucuparia.

WIT TEETH, see Dentition.

WITTER, (corr. from *guttur,*) Throat.

WIZEN, (Weasand,) Trachea.

WOAD, ([Sax.] ƿaad,) Isatis tinctoria.

WOD, ([Sax.] ƿoð,) Insane.

WODNES, Insanity, Mania.

WOLFBANE, Veratrum viride.

WOLFSBANE, Aconitum — w. Wholesome, Aconitum anthora.

WOLFSCLAW, Lycopodium.

WOLFSJAW, see Harelip.

WOMAN, pl. *Women, Gy'nē, Mu'lier, Fœ'mina, Vi'ra,* (F.) *Femme,* (Sax. ƿiꝑman, 'wifeman,' 'woefman.') The adult female of the human race.

WOMANHOOD, Mulieritas.

WOMB, ([Sax.] ƿamb,) Uterus — w. Falling down of the, Prolapsus uteri.

WOMB GRAIN, Ergot.

WOMB, LACERATION OF THE, Uterus, rupture of the—w. Tympany of the, Physometra.

WONGE, ([Sax.] ƿæng,) Cheek.

WOOD, BRAZIL, Cæsalpinia echinata — w. Elk, Andromeda arborea.

WOOD LICE, Onisci aselli—w. March, Sanicle.

WOOD, NICARAGUA, see Cæsalpinia—w. Peach, see Cæsalpinia — w. Pernambuco, Cæsalpinia echinata — w. Sampfen, Cæsalpinia sappan — w. Sappan, Cæsalpinia sappan.

WOOD SORREL, Oxalis acetosella — w. Sorrel, yellow, Oxalis stricta.

WOOD, SOUR, Andromeda arborea—w. Waxen, Genista tinctoria—w. Witch, Sorbus aucuparia.

WOODBINE, COMMON, Lonicera periclymenum.

WOODROOF, SWEETSCENTED, Asperula odorata.

WOODWEX, Genista tinctoria.

WOODS, SUDORIF'IC, (F.) *Bois sudorifiques.* This term is applied, collectively, to guaiacum, sassafras, china, and sarsaparilla, which are often used together to form the sudorific decoction.

WOORALI, Curare.

WOORARA, Curare.

WORM, see Alembic, Vermiform process and Worms — w. Bark tree, Geoffræa inermis — w. Cakes, Story's, see Cakes, worm, Story's—w. Disease, Helminthiasis—w. Goosefoot, Chenopodium anthelminticum — w. Grass, perennial, Spigelia Marilandica.

WORM, GUINEA, Dracunculus.

WORM, LOZ'ENGES, CHING'S. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges.* (*Saffron,* ℥ss, *Water,* ℥j; boil, and strain; and add of *White panacea of mercury,* (calomel washed in spirit of wine,) ℔j, *White sugar.* 28 ℔s, *Mucilage of gum tragacanth* q. s. to make a mass. Divide, so that each lozenge may contain a grain of the panacea.) The *Brown Lozenges.* (*Panacea* ℥vij, *Resin of Jalap* ℔iijss, *White sugar* ℔ix, *Mucilage of gum tragac.* q. s. Each lozenge to contain gr. ss of the panacea.)

SHER'MAN'S WORM LOZENGES, are said to be composed of *calomel, gamboge,* and *sugar.*

Pe'ters's Worm Lozenges are said to be composed in a similar manner.

WORM ROOT, Spigelia Marilandica — w. Seed, Artemisia santonica, Chenopodium anthelminticum — w. Seed, goosefoot, Chenopodium anthelminticum — w. Weed, Corsican, Corallina Corsicana, Polanisia graveolens—w. Weed, white, Corallina — w. Wood, biennial, Artemisia biennis — w. Wood, Canada, Artemisia canadensis — w. Wood, common, Artemisia absinthium—w. Wood, creeping, Artemisia rupestris — w. Wood, lesser, Artemisia Pontica—w. Wood, Roman, Artemisia Pontica—w. Wood, sea, Artemisia maritima—w. Wood, silky, Artemisia glacialis.

WORMIA'NA OS'SA SEU OSSIC'ULA. *O. epacta'lia* seu *raphogeminan'tia* seu *triq'uetra* seu *triangula'ria Bla'sii* seu *sutura'rum, Cla'res calva'riæ, Worm'ian bones,* (F.) *Os Wormiens* ou *épactaux* ou *surnuméraires* (Ch.) ou *intercalés* ou *triangulaires* ou *Clefs du crâne.* Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They are called *Wormia'na,* from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The Ossa Wormiana exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMIT, Artemisia absinthium.

WORMS, originally from (L.) *Vermes;* (F.) *Vers; Entozo'a, Entozoa'ria, Enterozo'a, Endozo'a, Entelminth'a, Enthelminth'es, Tin'eæ, Helminth'i, Entoparasites,* (F.) *Entozoaires.* Animals whose common character is that of existing only in other animals; (hence their name *entozoa,* from ἐντος, 'within,' and ζωον, 'animal.') They are met with, not only in the natural cavities, but even in the tissue of the organs, but chiefly in the intestines — *Ver'mes intesti'ni, Helmin'thia al'vi* seu *pod'icis, Splanchnelminth'ia, Intes'tinal worms,* (F.) *Vers intestinaux, Angibromelminthie* of Piorry. Cuvier, Rudolphi, Brera, Bremser, Laënnec, Küchenmeister, and others, have endeavoured to classify them,—some according to their shape; others, according to their anatomical characters.

Worms form the second class of the first group of Animal Parasites according to the classification of Küchenmeister. They are subdivided by him as follows:

VERMES, HELMINTHA.

A. Platyelmia, Flat worms, (πλατυς, 'flat,' and 'ελμις, 'a worm.')

First Subclass.—Cestoidea, cestode or tape worms, (κεστος, 'a band or girdle,' and ειδος, 'resemblance.')

First Order—Bothriocephali.
Bothriocephalus latus.
Second Order—Tæniæ.

I. Tæniæ, which occur in the mature state.
1. Tænia solium.
2. Tænia mediocancellata.
3. Tænia nana.

II. Immature Tæniæ.
1. Cysticercus cellulosæ.
2. Cysticercus tenuicollis.
3. Echinococci.
Appendix,—Acephalocysts.
4. Cysticercus vesicæ hominis.

Second Subclass.—Trematoda, (*trema*, and *odes.*)
Family I. Monostoma.
1. Monostoma lentis.
Family II. Distoma.
1. Distoma hepaticum.
2. Distoma lanceolatum.
3. Distomum heterophyes.
4. Distomum hæmatobium.
5. Distomum ophthalmobium.

B. Nematelmia, Round or thread worms, (νημα, 'a thread,' and 'ελμις, 'a worm.')
1. Tricocephalus dispar.
Trichina spiralis.
2. Oxyuris vermicularis.
3. Strongylus gigas.
4. S. longevaginatus.
5. Ancylostomum duodenale.
6. Ascaris lumbricoides.

The following table exhibits most of the entozoa which have been met with in the human body, and their usual habitats:—

Entozoa.	*Where found.*
Trichoceph'alus dispar,	Intestines.
Oxyu'ris vermicula'ris,	
As'caris ala'ta,	
As'caris lumbricoï'des,	
Ancyclos'toma duodenale,	
Bothrioceph'alus latus,	
Tæ'nia so'lium,	
Pentas'toma constric'tum,	" and Liver.
Tæ'nia nana,	
Distoma hæmato'bium,	Intestines and Vena porta.
Ditrachyc'eras rudis, (?)	Intestines.
Diploso'ma crena'tum,	Urinary bladder.
Spirop'tera hom'inis,	
Dactyl'ius aculea'tus,	
Dis'toma hepat'icum,	Gall bladder.
Dis'toma lanceola'tum,	Hepatic duct.
Stron'gylus gigas,	Kidney.
Tetras'toma rena'lē,	
Fila'ria oc'uli,	Eye.
Monos'toma lentis,	Crystalline.
Dis'toma oc'uli huma'ni,	Capsule of crystalline.
Acephalocyst'is endog''ena,	Liver.
Echinococ'cus hom'inis,	Liver, Spleen, and Omentum.
Polys'toma pingnic'ola,	Ovary.
Hexathyrid'ium pinguic'ola	
Polys'toma vena'rum seu sanguic'ola,	Veins.
Hexathyrid'ium venarum,	
Fila'ria bronchia'lis,	Bronchial glands.
Trich'ina spira'lis,	Muscles.
Cysticer'cus cellulo'sæ,	
Acephalocyst'is multif'ida,	Brain.
Fila'ria medinen'sis,	Areolar texture.

The most common of these are:—the Oxyuris vermicularis, Ascaris lumbricoïdes, and Tæniæ, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptoms, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes. See Anthelmintics.

WORMS, Acne punctata.

WORSUM, (from [Sax.] þýr, 'pus,') Pus.

WORT, *Must'um, Infu'sum By'nes* seu *Bra'sii* seu *Malt'i*, (F.) *Moût de la Bière.* An infusion of malt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WORT, (Sax. þýrt,) Herb.

WORTWALE, Haugnäil.

WOSEN, (Weasand,) Trachea.

WOUND, (Sax. þunð,) *Vul'nus*, (diminutive *Vulnus'culum*), *Vul'nus, Pla'ga, Traum'a, Tro'ma, Tre'sis, Tre'sis Vul'nus, Bla'bē, Tym'ma*, (F.) *Plaie, Blessure.* A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure, Incision*, when made by a cutting instrument;—*punc'tured, Nyg'ma*, (F.) *Piqure*, when made by a pointed instrument;—*lac''erated*, (F.) *Déchirure, Plaie par arrachement*, when the parts are lacerated or torn by the wounded body; *poi'soned, Celtuli'tis venena'ta, Necu'sia*, (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced;—and *contu'sed*, (F.) *Plaie contuse*, when produced by a blunt body. *Gun'shot wounds, Sclopetopla'gæ, Vul'nera sclopeta'ria* seu *à sclope'tis* seu *Sclopet'ica*, (F.) *Plaies d'armes à feu* ou *d'arquebusade* ou *d'arquebuse, Coup de feu*, belong to the last division.

WOURALI, Curare.

WOURARI, Curare.

WOURARU, Curare.

WOURSUM, ([Sc.] from [Sax.] þýr, 'pus,') Pus.

WRACK BLADDER, YELLOW, (F.) *Varec*, Fucus vesiculosus—w. Sea, Fucus vesiculosus, Pila marina.

WRAMP, Sprain.

WRAPPING UP, (of the hydropathists,) *Emaillottage.*

WRATACK, Nanus.

WRENCH, (from [Sax.] þrencan, 'to wring,') Sprain.

WRET, 'Wart,' Verruca.

WRETWEED, Euphorbia palustris.

WRICK, Sprain.

WRIGHTIA ANTIDYSENTERICA, (after Dr. Wright, a physician and botanist of Jamaica,) Nerium antidysentericum.

WRINK'LE, (Sax. ᵽnincle,) *Ru'ga, Rhy'tis, Ry'tis, Rha'cus, Rha'chus, Rhu'gus, Rhyse'ma, Corruga'tio cu'tis, Rucl'les,* (Sc.) *Ruu'kle, Run'kill,* (Prov.) *Crin'klecran'kle,* (F.) *Ride.* A furrow or fold in the skin of the face, forehead, vagina, &c. See Corrugation.

WRINKLED, *Rugo'sus, Ru'gous, Ru'gose,* (F.) *Ridé.* Full of wrinkles.

WRIST, ([Sax. ᵽýɼɼt, from ᵽnæɼtan, 'to wrest,') Carpus.

WRISTDROP. Paralysis of the muscles of the forearm, induced by the poison of lead.

WRITER'S SPASM, see Spasm, writers'.

WRONG HEIR, Cancellus.

WURALI, Curare.

WURSTGIFT, 'sausage poison,' Allontotoxicum.

WRYNECK, Torticollis.

X.

X LEG. Entogonyancon.

XALAPPA, Convolvulus jalapa.

XANTHIC OXIDE, Uric oxide

XANTHINE, Uric oxide.

XAN'THIUM, *X. Struma'rium* seu *Orienta'lē,* seu *Vulga'rē, Barda'na mi'nor, Lap'pa mi'nor, Les'ser Bur'dock, Bur'weed, Bur'thi'stle, Clot'bur, Cockle'bur,* (F.) *Lampourde, Petit Glouteron, Petite Bardane,* (from *xanthos,* because of the colour the plant yields.) This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHIURIA, Xanthuria.

XANTHOPICRIN and XANTHOPICRITE, (*πικρος,* 'bitter,') see Xanthoxylum clava Herculis.

XANTHOP'SIA, (from *xanthos,* and *οψις,* 'vision.') Yellow vision,—as sometimes occurs in jaundice.

XANTHORRHI'ZA, (*xanthos,* and *ῥιζα,* 'root.') Xanthorrhiza apiifolia.

Xanthorrhiza Apiifo'lia, *Xanthorrhi'za, X. simplicis'sima* seu *Morbo'rica, Xanthorrhi'za tincto'ria, Yel'lowroot, Par'sley-lea'ved Yel'lowroot, Yel'lowwort, Shrub yel'lowroot.* The root of this American plant—*Xanthorrhi'za,* (Ph. U. S.)—is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHORRHŒ'A, (*xanthos,* and *ῥεω,* 'to flow,' from its yellow resin,) *Grasstree.* A genus of trees in Australia, *Nat. Order,* Liliaceæ, of which there are several species. Two resins are obtained from them; one the *yel'low res'in of Xanthorrhœ'a* or *of New Hol'land, Resi'na lu'tea No'vi Bel'gii, Bot'any Bay res'in* or *gum, Ac'aroid res'in* or *gum, Resi'na* vel *Gum'mi acaroï'des,* which probably resembles tolu and storax in medicinal properties; the other the *red resin of Xanthorrhœa, Blackboy gum.*

XANTHOS, (*ξανθος,*) Yellow.

XANTHO'SIS, *Xanthose,* (from *xanthos,* and *osis.*) A term applied to the yellow discoloration often observed in cancerous tumours—especially in encephaloid of the testicle.

XANTHOXYLIN, see Xanthoxylum clava Herculis.

XANTHOX'YLUM, (*xanthos,* and *ξυλον,* 'wood,') *X. Fraxin'eum, X. America'num, X. fraxinifo'lium, X. ramiflo'rum, X. tricar'pum, Prick'ly ash, Shrub'by prick'ly ash, Tooth'ache bush, Tooth'ache tree, Pell'itory, Yel'lowwood, Su'terberry. Ord.* Xanthoxylaceæ. A spirituous infusion of the bark—*Xanthox'ylum*—Ph. U. S.—has been highly recommended in cases of violent colic. The fresh juice, expressed from the root of xanthoxylum, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

Xanthoxylum Carolinia'num has similar properties; but is more acrid.

Xanthoxylum Cla'va Her'culis of the West Indies, (F.) *Clavalier à feuilles de frêne, Frêne épineux,* is a very strong stimulant and powerful sialogogue; and has been given internally in rheumatism. A neutral, very bitter, and astringent substance has been obtained from it, called *Xanthopi'crin, Xanthopi'crite,* and *Xanthox'ylin.*

Xanthoxylum Fraxineum, Xanthoxylum—x. Fraxinifolium, Xanthoxylum.

Xanthoxylum Octandra, Fagara octandra—x. Piperitum, Fagara piperita—x. Ramiflorum, Xanthoylum—x. Tricarpum, Xanthoxylum.

XANTHIU'RIA, *Xanthiu'ria,* (from *xanthos,* and *ουρον,* 'urine.') A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

XANTOLINA, Artemisia santoniea.

XENODOCEUM, (*ξενοδοκειον,* from *ξενος,* 'a stranger,' and *δεχομαι,* 'to receive,') Hospital.

XENODOCHEUM, (*ξενοδοχειον,*) Hospital.

XERANSIS, (*ξηρανσις,* from *ξηρος,* 'dry,') Arefaction, Drying.

XERANTIA, (from *ξηρος,* 'dry,') Siccantia.

XERA'SIA, (from *ξηρος,* 'dry.') A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.

XERION, (from *ξηρος,* 'dry,') Catapasma.

XERO, (from *ξηρος,* 'dry,') in composition, dry.

XEROCOLLYR'IUM, (*xero,* and *κολλουριον,* 'a collyrium,') *Collyr'ium sic'cum.* A dry collyrium.

XERODER'MA, gen. *Xeroder'matis,* (*xero,* and *δερμα,* 'skin.') Diminution of secretion of the sebaceous glands.

XEROMA, gen. *Xero'matis,* (*xero,* and *oma,*) Xeropthalmia—x. Conjunctival, Xerophthalmia.

Xeroma, Lach'rymal. Suppression of the lachrymal secretion. See Xerophthalmia.

XEROMYCTER, Xeromycteria.

XEROMYCTE'RIA, *Xeromycter,* (*xero,* and *μυκτηρ,* 'the nose.') Dryness of the nose.

XEROM'YRON, *Unguen'tum sic'cum,* (from *xero,* and *μυρον,* 'an ointment.') A dry ointment.

XEROPHA'GIA, (*xero,* and *φαγω,* 'I eat.') Excessive use of dry aliment. A kind of regimen to which the ancient athletæ subjected themselves, with the view of increasing their strength.

XEROPHTHAL'MIA, *Ophthal'mia sic'ca, Ophthalmoxero'sis, Xero'ma,* (*xero,* and *οφθαλμια,* 'inflammation of the eye.') An inflammation of the eye, without discharge. The term—as well as *Conjuncti'val* and *Lach'rymal Xero'ma,* and *Cutic'ular Conjuncti'va*—has been given to cases

in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, lipitudo.

XEROTRIBIA, (*xero*, and *τρίβω*, 'to rub,') see Friction.

XEROTRIPSIS, Friction, dry.

XIPHISTERNUM, (*xipho*, and *sternum*,) Xiphoid.

XIPHO, (from *ξίφος*, 'a sword,') in composition, the ensiform cartilage.

XIPHODES, Xiphoid.

XIPHODYMUS, (*xipho*, and *δύειν*, 'to mingle,') Thoracogastrodidymus.

XIPHOID, *Xiphoï'des, Xipho'des, Ensifor'mis, xipho*, and *εἶδος*, 'shape.') *Cartila'go Xiphoïdes* seu *Xiphoïdea* seu *Scuta'lis* seu *Ensiformis* seu *Pelta'lis* seu *Pelta'tus, Furcel'la infe'rior, Mucrona'tum os, Mucrona'ta Cartila'go, Chon'drus, Proces'sus xiphosterna'lis* seu *xiphoï'des* seu *Ster'ni xiphoïdeus, Xiphister'num, En'siform car'tilage*, (F.) *Appendice* ou *cartilage xiphoïde, C. Mucroné, Appendice sous-sternale, Palette.* The name of the appendix which terminates the sternum beneath.

XIPHOID LIG'AMENT, *Costoxyphoid L.* (F.) *Ligament xiphoïdien* ou *costo-xiphoïdien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOPA'GES, *Did'ymus Symphyoepigas'trius*, (*xipho*, and *πηγνυμι*, 'I fix.') A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

XYLOĀLOES, (*ξυλον*, 'wood,' and *aloes*,) Agallochum—x. Balsamum, see Amyris opobalsamum — x. Cassia, Laurus cassia — x. Cinnamomum, Laurus cinnamomum.

XYMPATHIA, Sympathy.

XYRIS, (from *ξυρον*, 'a razor,' from the shape of its leaves,) Iris fœtidissima.

XY'RIS BULBO'SA, *X. In'dica* seu *Carolinia'na, Yel'low-eyed Grass*; indigenous; *Order*, Xyridaceæ; flowering from July to September. The roots and leaves are said to be used by the Hindoos in lepra, and chronic cutaneous diseases in general.

XYRUM, (*ξυρον*,) Novacula.

XYRUS, (*ξυρος*,) Novacula.

XYSMA, (*ξυσμα*,) Linteum, Rasura, Scobs.

XYSMUS, (from *ξυω*, 'to scrape,') Rasura.

XYSTER, (*ξυστηρ*,) Raspatorium.

XYSTOS, (*ξυστος*, 'scraped,') Linteum.

XYSTRUM, (*ξυστρον*,) Raspatorium — x. Ophthalmicum, Ophthalmoxyster.

Y.

YAM. This esculent root is principally obtained from three species of *Dioscore'a*,—*ala'ta bulbif'era*, and *sati'va*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like that of the potato.

YAM ROOT, WILD, Dioscorea villosa.

YARD, ([Sax.] *ȝyrd*,) Penis.

YARROW, COMMON, ([Sax.] *ȝearpe*,) Achillea millefolium.

YAUPON, Ilex vomitoria.

YAVA SKIN, Elephantiasis Arabum.

YAWN'ING, (from [Sax.] *ȝeonan*, 'to yawn,') *Chas'mē, Chas'mus, Hia'tus, Ric'tus, Osce'do, Oscita'tio, Clo'nus pandicula'tio maxilla'rum, Ga'ping*, (F.) *Baillement.* Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *ennui*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency and obstinacy, become a true disease.

YAW ROOT, Stillingia.

YAWS, Framboesia.

YEAST, Yest — y. Plant, Torula cerevisiæ.

YÈBLE, (from *Ebulus*,) Sambucus ebulus.

YECKE, (Yuke,) Psora.

YELK, ([Sax.] *ȝeleƿ*, 'yellow,') see Ovum.

YELLOT, (Yellow,) Icterus.

YEL'LOW, ([Sax.] *ȝealƿ*,) *Fla'vus, Lu'teus, Xan'thus*, (from past participle of Sax. *ȝeælan*, 'to burn.') One of the seven primitive colours.

YELLOW ASH, Cladrastis tinctoria — y. Berry, Podophyllum montanum — y. Fever, see Fever, yellow — y. Fever, mild, see Relapse — y. Jack, Fever, yellow.

YELLOW LIG'AMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the *vertebral plates*, from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

YELLOW PAINT, Hydrastis Canadensis — y. Root, Jeffersonia Bartoni — y. Root, parsley-leaved, Xanthorrhiza apiifolia — y. Root, shrub, Xanthorrhiza apiifolia.

YELLOW SPRING, see Ohio, mineral waters of.

YELLOW SPRINGS. These are in Chester county, Pennsylvania. The temperature of the chief spring is 52° Fah. The water contains no impregnation.

YELLOW STAR, Helenium autumnale—y. Weed, Ranunculus acris—y. Wood, Xanthoxylum fraxineum — y. Wort, parsleyleaved, Xanthorrhiza apiifolia.

YELLOWS, Cypripedium luteum, Icterus, see Leucorrhœa, Ranunculus acris.

YEMEN ULCER, see Beriberi.

YERBA DEL SOLDADA, 'soldier's herb,' Matico — *y. de Huaca*, Datura sanguinea.

YERNIN, Rennet.

YEST, *Yeast*, ([Sax.] *ȝeȝt*, from *ýȝt*, 'a storm,' *ýȝtiȝ*, 'stormy.') *Cerevis'iæ Fermen'tum, Spu'ma Cerevis'iæ, Barm*, (F.) *Levûre, Levûre de la Bière.* A peculiar product which collects on the surface of beer whilst fermenting. Yest is antiseptic and tonic. It has been much extolled in putrid fevers,—a tablespoonful being given as a dose, in porter, wine, &c. It is also applied in the form of cataplasm to foul ulcers. In all these cases it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, Ardent eyes — *y. d'Écrevisse*, Cancrorum chelæ.

YEW TREE, ([Sax.] *iƿ*,) Taxus baccata — y. American, Taxus Canadensis.

YEWER, see Mamma.
YEX, (by onomatopœia,) Singultus.
YLECH, Ilech.
YLIATER, Ilech.
YOKE, (by onomatopœia,) Singultus.
YOLK, (Yelk,) see Ovum, and Vesicula umbilicalis—y. Membrane, see Vesicula umbilicalis.
YOPON, Ilex vomitoria.
YORK SPRINGS. These are in Adams county, Pennsylvania. One of them—a saline, containing sulphates of magnesia and lime, and chloride of sodium—is a mild cathartic and diuretic; the other is a strong chalybeate.
YOUK, ([G.] jucken, 'to itch,') Itching, Psora.
YOUNG, Mr. JAMES, DISINFECTANT OF, see Manganese, sulphate of.
YOUTH, ([Sax. ẏeoguð,) Adolescence.
YPSELOGLOSSUS, Basioglossus.
YRIDES, Orpiment.
YSAM'BRA, *Pedigam'bra.* An ancient Spanish poison, of which hellebore formed the greatest part.
YSOPE, Hyssopus.
YUCCA, (Peruvian name,) Jatropha manihot.
YUC'CA FILAMENTO'SA, *Bear's grass, Silkgrass*, indigenous. A tincture of the root has been used in gonorrhœa.
YUKE, ([G.] jucken, 'to itch,') Itching, Psora.
YUX, (by onomatopœia,) Singultus.
Y-WER-A, see Spirit.

Z.

ZACCHARUM, Saccharum.
ZAEL, Borosail.
ZAFFRAN, Crocus.
ZAFFRE, Smalt.
ZAMBO, see Mulatto, and Sambo.
ZAMIA INTEGRIFOLIA, see Arrowroot—z. Pumila, see Arrowroot.
ZAN'NA. A kind of Armenian bole, used by the ancients as a dessicative. It was also called *Zarnacha.*
ZANTHORRHIZA APIIFOLIA, Xanthorrhiza apiifolia.
ZANTHOXYLUM, Xanthoxylum.
ZAPPANIA NODIFLORA, (after P. A. Zappa, an Italian botanist,) Anacoluppa.
ZARNACHA, Zanna.
ZARSA, Smilax sarsaparilla.
ZARZAPARILLA, Smilax sarsaparilla.
ZEA MAYS, (ζεα or ζεια, was the ancient name of a sort of corn, from ζαεω, 'to live.') *Z. vulga'ris, Mays, M. ze'a* seu *America'na, A'dor, In'dian Corn, Corn, Turk'ey* or *In'dian Wheat, Maize, Mayz,* (F.) *Mais, Graine de Turquie, Blé d'Inde* ou *d'Espagne* ou *d'Italie* ou *de Turquie. Ord.* Gramineæ. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread. The fecula or starch—*corn starch, maize'na*—makes an agreeable aliment; four tablespoonfuls of the starch to a quart of milk; boiled for a few minutes. It may be sweetened and flavoured, and eaten like *blancmanger.*
ZÉDOAIRE ROND, Kæmpferia rotunda.
ZEDOARIA, Kæmpferia rotunda—z. Longa, see Kæmpferia—z. Rotunda, see Kæmpferia.
ZEDOARY, Kæmpferia rotunda.
ZELOSIS, (ζηλωσις,) Zelotypia.
ZELOTYP'IA, (from ζελος, 'love,' and τυπος, 'form,' 'model;') *Zelo'sis.* It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection;—melancholy, mania, &c.
ZEMA, gen. *Zem'atis,* (ζεμα,) Decoction.
ZEN'ICON, (ζενικον.) Ancient name of a Keltic poison, used for poisoning arrows.
ZEOCRITON DISTICHUM, (ζεα, 'corn,' and κριθη, 'barley,') Hordeum distichon.
ZEPHACH, Peritonæum.
ZERMA, Zerna.
ZER'NA, *Zerma.* Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impeti'go ulcera'ta.*
ZERUMBET, Cassumuniar.
ZESIS, (ζεσις,) Effervescence, Decoction.
ZEST, see Citrus medica.
ZESTOLUSIA, (ζεστολουσια, from ζεστος, 'hot,' and λουω, 'to wash.') Bath. hot.
ZIBEBÆ, see Vitis vinifera.
ZIBETHUM, Civetta.
ZIGNITES, Zingrites.
ZINC, *Zink, Zin'cum, Zin'kum, Spel'trum, Spean'ter, Tu'tenag, Zin'chum, Zint, Stan'num In'dicum.* (Perhaps formed etymologically from (G.) Zin, 'tin.') A metal obtained from calamine and blende. Its colour is bluishwhite; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. g. 7·190. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.
ZINC, ACÉTATE DE, Zinci acetas—z. Butter of, Zinci chloridum—z. Chloride of, Zinci chloridum—z. *Chlorure de,* Zinci chloridum—z. *Cyanure de,* Zinci cyanuretum—z. Ferrohydrocyanate of, Zinci cyanuretum—z. Flowers of, Zinci oxydum—z. Hydrocyanate of, Zinci cyanuretum—z. Iodide of, Zinci Iodidum—z. Ioduret of, Zinci Iodidum.
ZINC AND MORPH'IA, DOUBLE I'ODIDE OF, (F.) *Iodure double de Zinc et de Morphine.* (This salt is prepared by boiling *iodide of iodhydrate of morphia* with *water* and *zinc*, after they have acted on each other for some days; filtering and crystallizing.) It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.
ZINC, OXIDE DE, Zinci oxydum—z. Oxyd of, Zinci oxydum.
ZINC AND STRYCH'NIA, DOUBLE I'ODIDE OF. This salt is prepared by digesting for several days in hot water, *iodide of iodhydrate of strychnia* and *zinc;* filtering and crystallizing. It has been proposed in the same cases as strychnia.
ZINC, SULFATE DE, Zinci sulphas—z. Sulphate of, Zinci sulphas—z. Valerianate of, Zinci Valerianas.
ZINCHUM, Zincum.
ZIN'CI ACE'TAS, *Ac"etate of Zinc,* (F.) *Acétate de Zinc.* (*Plumbi acet.* ℔j, *Zinc. granul.* ℥ix, *Aquæ destillat.* Oiij. Dissolve the acetate

of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquor yields no precipitate with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one-fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and, having heated the solution, drop into it, while hot, recently prepared carbonate of zinc until a little of the liquid, on being filtered, passes colourless; then filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

Zinci Carbonas Impurus, Calamina.

Zinci Carbo'nas Præcipita'tus seu Præcipita'ta (Ph. U. S., 1863), *Precip'itated carb'onate of Zinc.* (*Zinci sulphat., Sodæ carbonat.* āā ℔j; *Aq. bullient.* cong. Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv of water. Mix the solutions; stir, and set the mixture by, that the powder may subside. Having poured off the liquid, wash the precipitated carbonate of zinc with hot water, until the fluid of the washings is nearly tasteless, and dry with a gentle heat.—*Ph. U. S.*) Used to prepare the Zinci oxidum.

Zinci Carbonas Præparatus, Calamina præparata—z. Chloridi liquor, see Burnett's Disinfecting Liquid—z. Chloretum, zinci chloridum.

Zinci Chlo'ridum, *Z. chlorure'tum* seu *Chlore'tum, Zin'cum chlora'tum* seu *muriat'icum, Chlo'ride* or *Chlo'ruret of Zinc*, (F.) *Chlorure de Zinc.* (*Zinc.* in frustulis, ℥ijss; *Acid. nitric., Oxetæ præparat.* āā ℥j; *Acid muriat., Aquæ* q. s. To the zinc, in the porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *But'ter of Zinc, Buty'rum Zin'ci.*

Chloride of zinc is a powerful escharotic, and has been lately employed as an effective antiseptic. See Burnett's Disinfecting Liquid.

Zinci Chloruretum, Z. chloridum.

Zinci Cyanure'tum, *Z. cyan'idum* seu *Hydrocy'anas* seu *Prus'sias, Zin'cum Cyanogena'tum* seu *Borus'sicum* seu *Zoöt'icum, Hydrocy'anate of Zinc*, (F.) *Cyanure de Zinc.* (This salt is formed by adding *sulphate of zinc* to *hydrocyanate of potassa* so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium.) It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

Zinci Ferrohydrocy'anas, *Zin'ci ferrocyanure'tum, Cyanure'tum Ferrozin'cicum, Zin'cum Ferrohydrocyan'icum, Ferrohydrocy'anate of Zinc.* (Made by the mutual decomposition of boiling-hot solutions of *sulphate of zinc* and *ferrocyanate of potassa.*) It has been recommended in the same cases as the last preparation.

Zinci Hydrocyanas, Zinci cyanuretum.

Zinci Io'didum, *Z. Iodure'tum, Zin'cum Ioda'tum, Iode'tum Zin'ci* seu *Zin'cicum, Protoïodure'tum Zin'ci, Iodide* or *Iod'uret of Zinc*, (F.) *Iodure de Zinc.* (This salt is made by boiling together *iodine* and *zinc* to dryness, and subliming.) An ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated

Zinci Ioduretum, Z. iodidum—z. Nix, Zinci oxydum.

Zinci Ox'ydum seu Ox'idum, *Zin'cum calcina'tum, Ni'hil Al'bum, La'na Philosopho'rum* seu *Philosoph'ica, Nix Zin'ci, Ni'hil Gri'seum, Pom'pholyx, Ox'yd of Zinc, Flow'ers of Zinc*, (F.) *Oxide* ou *Blanc de Zinc.* (Procured by burning zinc in a long, deep crucible, placed so as to collect the sublimate. Also, by exposing *precipitated carbonate of zinc* to a strong heat, so as to drive off the carbonic acid.—*Ph. U. S.*) It is said to be tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. Usual dose, gr. ij to x; but it is probably inert. For its external use, see Ung. Zinci.

Zinci Oxydum Impurum, Tutia—z. Prussias, Zinci cyanuretum.

Zinci Sul'phas, *Sul'phate of Zinc, Zin'cum Vitriola'tum, Vitri'olum Al'bum* seu *Goslarien'sē* seu *Zin'ci, Sul'phas Zin'cicum, Gil'la Vitri'oli* seu *Theophras'ti, Sal Vitri'oli* seu *Vomito'rium Vitri'oli, Chalcan'thum Al'bum, White Vit'riol, White Cop'peras*, (F.) *Sulfate de Zinc, Couperose blanc.* (*Zinc.* in frustulis, ℥iv; *Acid. sulphuric.* ℥vj; *Aquæ destillat.* Oiv. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—*Ph. U. S.*) Sulphate of zinc is inodorous; taste, styptic. It is in white, semitransparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antipertus'sis*, and, as its title imports, given in hoopingcough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ℥ss; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j to water f℥j. A solution of the salt, to which a little sulphate of copper has been added, is said to constitute the *Disinfecting Liquid of Larnaudès.*

Zinci Valeria'nas, *Zin'cum valerian'icum, Vale'rianate of Zinc.* (A salt formed by saturating *valerianic acid* with freshly prepared *carbonate of zinc*, or by the double decomposition of *valerianate of soda* and *sulphate of zinc*—Ph. U. S., 1863, and Ph. B., 1864). It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day. It is officinal in the Dublin Pharmacopœia.

ZINCUM, Zinc—z. Borussicum, Zinci cyanuretum—z. Calcinatum, Zinci oxydum—z. Chloratum, Zinci chloridum—z. Cyanogenatum, Zinci cyanuretum—z. Ferrohydrocyanicum, Zinci ferrohydrocyanas—z. Iodatum, Zinci iodidum—z. Muriaticum, Zinci chloridum—z. Valerianicum, Zinci valerianas—z. Vitriolatum, Zinci sulphas—z. Zooticum, Zinci cyanuretum.

ZINGIBER, gen. *Zingib'eris*, (ζιγγίβερ,) Amomum zingiber—z. Cassumuniar, see Cassumuniar—z. Germanicum, Arum maculatum—z. Officinale, Amomum zingiber—z. Purpureum, see Cassumuniar—z. Spurium, see Cassumuniar—z. Zerumbet, see Cassumuniar.

ZINGIBERIN, Piperoid.

ZINGRI'TES, *Zingri'tes.* A stone, resembling glass; to which the ancients attributed marvellous properties.

ZINK, Zinc.

ZINKUM, Zinc.

ZINT, Zincum.

ZINZIBER, (ζιγγίβερ,) Amomum zingiber.

ZIPHAC, Peritonæum.

ZIRBUS, Epiploon — z. Adipinus, Epiploon, gastrocolic.

ZIZA'NIA AQUAT'ICA, (Ζιζανιον was the ancient name of some wild grain,) *Wild Rice, Canada Rice, Water Oats. Ord.* Gramineæ; called by the Indians, *Menomene*, grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages and the Canadian traders and hunters with their annual supplies of grain.

ZIZYPHUM, (Arab.), Jujube.

ZIZYPHUS JUJUBA, see Jujube — z. Nitida, see Jujube.

Ziz'yphus Œnop'lia, *Z. Nape'ca; Ord.* Rhamnaceæ; common all over India. The fruit is eaten by the natives. It is of a pleasant acid taste. A decoction of the bark of the fresh root is used to promote the healing of fresh wounds.

Zizyphus Sativa, see Jujube — z. Sylvestris, see Jujube.

ZOA'GRIA, (ζωη, 'life,' and αγρεω, 'I catch up.') The saving and preservation of life. *Zoö'sis.* A reward for preserving life; *Sos'trum.* A votive offering hung up in the temples for a life saved.

ZOANTHRO'PIA, *Melancholi'a zoänthro'pia*, (*zoon*, and ανθρωπος, 'a man.') A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and Cynanthropia belong to this species of monomania.

ZOARA, Insomnia.

ZOE, (ζωη,) Life.

ZOGRAPHIA, Zoographia.

ZOIATRIA, (*zoon*, and ιατρεια, 'medical treatment,') Veterinary art.

ZOIATRUS, (*zoon*, and ιατρος, 'a physician,') Hippiater.

ZOISMUS, (from *zoon*,) Animality.

ZOMIDIUM, (ζωμιδιον, dim. of ζωμος,) Jus.

ZOMOS, (ζωμος,) *Consommé*, Jus. See Broth.

ZONA, (ζωνη, 'a girdle,') Herpes zoster—z. Castitatis, Hymen—z. Ciliaris, Ciliary zone—z. Ignea, Herpes zoster.

Zona Pellu'cida, *Oolem'ma pellu'cidum, Vitellary mem'brane, Cho'rion* (of some), (F.) *Vitelline, Membrane vitelline.* The membrane that surrounds the yolk in the mammalia is so called on account of its breadth and peculiar transparency.

Zona Serpiginosa, Herpes zoster.

Zona Tendino'sa. The whitish circle around each auriculoventricular orifice of the heart, see Circulus callosus Halleri.

Zona Virginitatis, Hymen.

ZONE, Cingulum.

ZONULA CILIARIS, (dim. of *zona*,) see Ciliary, and Ciliary zone—z. Cochleæ, see Lamina spiralis—z. Hildani, Cingulum Hildani—z. Zinnii, see Ciliary zone.

ZOOBIOLOGIA, (*zoon*, βιος, 'life,' and λογος, 'a treatise,') see Physiology.

ZOÖCHEMIA, Chymistry, animal.

ZOÖCHEM'ICAL, *Zoöchym'ical, Zoöchem'icus, Zoöchym'icus.* Appertaining or having relation to animal chymistry.

ZOÖCHEMY, Chymistry, animal.

ZOÖCHYMY, Chymistry, animal.

ZOOGÉNIES, see Zoögeny. Bouchut has applied the term *Zoogénies* to animal parasites infesting the body.

ZOÖDES, (ζωωδης, from *zoon*, and *odes*,) Animal.

ZOÖG''ENY, *Zoögen'ia, Zoögen'esis*, (*zoon*, and γενναω, 'to beget.') The doctrine of animal formation.

ZOÖG'RAPHY, *Zoögra'phia, Zogra'phia*, (*zoon*, and γραφη, 'a description.') A description of animals. The natural history of animals.

ZOÖHEMATINE, Hæmatine.

ZOÖHYLAS, (*zoon*, and ὑλη, 'matter.') Animal matter.

ZOÖHY'LICA CONCREMEN'TA. Concretions formed of animal matter.

ZOÖIASIS, (*zoon*, and ιασις, 'curation,') Veterinary art.

ZO'OID, *Zoöi'des*, (ζωοειδης, from *zoon*, and ειδος, 'resemblance.') Resembling or belonging to an animal. Every living cell may be regarded as a Zooid.

ZOÖLOG''ICAL, *Zoölog''icus*, (F.) *Zoologique*, (*zoon*, and λογος, 'a description.') Relating or appertaining to the natural history of animals.

ZOÖL'OGIST, *Zoölogis'ta, Zoöl'ogus.* One skilled in the natural history of animals.

ZOÖL'OGY, *Zoölog''ia.* The natural history of animals.

ZOÖMAGNETISMUS, Magnetism, animal.

ZOÖMYCUS, (*zoon*, and μυκος, 'mucus,') Mucus.

ZOÖMYXA, (*zoon*, and μυξα, 'mucus,') Mucus.

ZOÖN, (ζωον,) Animal.

ZOÖNOM'IA, *Organozoönom'ia, Zoönom'ia*, (*zoon*, and νομος, 'law.') The law which governs the organic actions of animals in general: — *Animal Physiol'ogy, Zoophysiolog''ia.*

ZOÖNOSOLOGY, *Zoonosolog''ia*, (*zoon*, νοσος, 'a disease,' and λογος, 'a description.') The nosology of animals.

ZOÖPATHOL'OGY, *Zoöpatholog''ia*, (*zoon*, παθος, 'a disease,' and λογος, 'a description.') The pathology of animals.

ZOÖPH'AGOUS, *Zoöph'agus*, (F.) *Zoöphage*, (ζωοφαγος, from *zoon*, and φαγω, 'I eat.') Feeding on animals. Carnivorous.

ZOÖPHTHALMUS, (ζωοφθαλμος,) Hydrophthalmia.

ZOÖPHYSIOLOGY, *Zoöphysiolog''ia*, (*zoon*, and *physiologia*,) Physiology, animal, Zoonomia.

ZOÖPHYTE, *Zoöph'ytum*, (*zoon*, and φυτον, 'a plant,') *Phytozo'ön*, (F.) *Phytozoaire, Animal plant.* A name given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.

ZOÖSIS, (from *zoon*,) Animation, Zoagria.

ZOÖSPERMATA, Spermatozoa.

ZOÖSPERMES, Spermatozoa.

ZOÖTHAP'SIS, (ζωη, 'life,' and θαπτω, 'I inter.') Burial alive. Premature interment.

ZOÖT'OMIST, *Zootom'icus*, (*zoon*, and τεμνω, 'I cut.') One who dissects animals.

ZOÖT'OMY, *Zoötom'ia, Anatom'ia anima'lis* seu *comparati'va* seu *compara'ta, Theriot'omy, Compar'ative Anat'omy.* The anatomy of animals. Animal anatomy.

ZOPISSA, (ζωπισσα, from ζωος, 'living,' and πισσα, 'pitch,') see Pinus sylvestris.

ZOPYRON, (ζωπυρον, from ζαω, 'to be alive,' and πυρ, 'fire,') Fomites.

ZOSTER, (ζωστηρ, 'a girth,') Herpes zoster.

ZOSTERA MARINA, Pila marina — z. Maritima, Pila marina.

ZOSTÈRE, Pila marina.

ZOUZINETTE, Narcissus pseudonarcissus.

ZOZAR, Saccharum.

ZUCARO, Saccharum.

ZUCCARUM, Saccharum.

ZUCHAR, Saccharum.

ZUCHARUM, Saccharum.

ZUCHRA, Saccharum.

ZULAPIUM. Julep.

ZYGAPOPHYSES, (ζυγον, 'a yoke,' and *apophysis*,) see Vertebræ.

ZYGOMA, (ζυγωμα, from ζυγον, 'a yoke,') Malæ os, see Zygomatic process.

ZYGOMAT'IC, *Zygomat'icus*, *Juga'lis*, *Ju'gal*, (F.) *Zygomatique*. That which relates to the *zygoma* or cheekbone.

Zygomatic Arch, see Zygomatic process — z. Bone, Malæ os.

Zygomatic Fos'sa is the space included between the posterior margin of the outer ala of the pterygoid process and the crista which descends from the malar tuberosity to the superior alveolar margin.

Zygomatic Mus'cles are two in number. 1. *Zygomat'icus ma'jor*, *Distort'or O'ris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore-part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malæ, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus mi'nor*, (F.) *Petit Zygomato-labial*, (Ch.), *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malæ, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

Zygomatic Proc''ess, *Proces'sus zygomat'icus*, *Apoph'ysis Zygomat'ica*, *Ma'lar* or *Ju'gal proc''ess*, (F.) *Apophyse Zygomatique*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, (Ch.,) and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the os malæ, with which it forms a bony bridge, called the *Zygomat'ic arch*, *Ar'cus* seu *Pons zygomat'icus*, (F.) *Arcade zygomatique*. The cavity beneath the bridge is sometimes called *Zygo'ma*.

Zygomatic Su'ture is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

ZYGOMATIQUE, Zygomatic — z. *Grand*, Zygomaticus major—z. *Petit*, Zygomaticus minor.

ZYGOMATO-AURICULAIRE, Anterior auris —z. *Labial*, Zygomaticus major—z. *Labial, petit*, Zygomaticus major — z. *Maxillaire*, Masseter—z. *Oriculaire*, Anterior auris.

ZYGOPHYL'LUM FABA'GO, (ζυγος, 'yoke, a pair,' and φυλλον, 'a leaf,') (F.) *Fabagelle*. *Ord.* Zygophyllaceæ. A Syrian and Mauritanic plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygophyl'lum sim'plex*, is capable of removing specks from the cornea.

ZYMA, (ζυμη,) Ferment.

ZYMOMA, gen. *Zymo'matis*, (ζυμωμα,) Ferment.

ZYMOSIS, (ζυμωσις, from *zyma*, and *osis*,) Fermentation, see Zymotic.

ZYMOT'IC, *Zymot'icus*, (F.) *Zymotique*, (from *zyma*.) Relating or appertaining to fermentation. A *zymotic disease* is any epidemic, endemic, contagious or sporadic affection, which is produced by some morbific principle acting on the organism similar to a ferment — as the major exanthemata. *Zymosis* has been used by some to signify such affections.

ZYTHOGALA, (*zythus*, and γαλα, 'milk.') Posset.

ZYTHUM, Cerevisia.

ZYTHUS, (ζυθος,) Cerevisia.

THE END.

HENRY C. LEA'S

(LATE LEA & BLANCHARD'S)

CLASSIFIED CATALOGUE

OF

MEDICAL AND SURGICAL PUBLICATIONS.

In asking the attention of the profession to the works contained in the following pages, the publisher would state that no pains are spared to secure a continuance o the confidence earned for the publications of the house by their careful selection and accuracy and finish of execution.

It will be observed that the prices during the last four years have not been advanced in anything like proportion to the increased cost of manufacture, and there is no probability of a decrease of cost that will warrant a reduction during the coming season. The printed prices are those at which books can generally be supplied by booksellers throughout the United States, who can readily procure for their customers any works not kept in stock. Where access to bookstores is not convenient, books will be sent by mail post-paid on receipt of the price, but no risks are assumed either on the money or the books, and no publications but my own are supplied. Gentlemen will therefore in most cases find it more convenient to deal with the nearest bookseller.

An Illustrated Catalogue, of 64 octavo pages, handsomely printed, will be forwarded by mail, postpaid, on receipt of ten cents.

HENRY C. LEA.

Nos. 706 and 708 Sansom St., Philadelphia, March, 1867.

ADDITIONAL INDUCEMENT FOR SUBSCRIBERS TO

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES.

THREE MEDICAL JOURNALS, containing over 2000 LARGE PAGES,

Free of Postage, for SIX DOLLARS Per Annum.

TERMS—IN ADVANCE:

The American Journal of the Medical Sciences, and The Medical News and Library, } Five Dollars per annum, in advance.

The Medical News and Library, separate, One Dollar per annum, in advance.

Ranking's Half-Yearly Abstract of the Medical Sciences, separate, Two Dollars and a Half per annum in advance.

OR,

The American Journal of the Medical Sciences, published quarterly, with
The Medical News and Library, published monthly, and
Ranking's Abstract of the Medical Sciences, published half-yearly, } Six Dollars per annum in advance.

(ALL FREE OF POSTAGE.)

In thus offering to the profession this unprecedented amount of valuable practical matter, the publisher can only be saved from loss by a very large increase in the sub-

☞ Gentlemen receiving this Catalogue would confer a favor on the Publisher by communicating it to their professional friends.

scription list. It is his desire to furnish to the practitioner in every section of the country the utmost that can be supplied for an amount within the reach of every one, and his long connection with the profession warrants him in the hope that his efforts will be seconded by the interest which all practitioners must feel in insuring the success of his undertaking and rendering it permanent. It is only by a circulation hitherto unknown in the history of American medical journalism that so vast an amount of the choicest reading can be afforded at so moderate a sum, and the publisher therefore relies on the co-operation of the profession at large to respond to his endeavor to lay on the table of every physician a monthly, a quarterly, and a half-yearly journal, at a price which is without example.

These periodicals are universally known for their high professional standing in their several spheres.

I.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES,

EDITED BY ISAAC HAYS, M. D.,

is published Quarterly, on the first of January, April, July, and October. Each number contains nearly three hundred large octavo pages, appropriately illustrated, wherever necessary. It has now been issued regularly for over FORTY years, during nearly the whole of which time it has been under the control of the present editor. Throughout this long period, it has maintained its position in the highest rank of medical periodicals both at home and abroad, and has received the cordial support of the entire profession in this country. Among its Collaborators will be found a large number of the most distinguished names of the profession in every section of the United States, rendering the department devoted to

ORIGINAL COMMUNICATIONS

full of varied and important matter, of great interest to all practitioners. Thus, during 1866, contributions have appeared in its pages from the following gentlemen.*

Following this is the "REVIEW DEPARTMENT," containing extended and impartial reviews of all important new works, together with numerous elaborate "BIBLIOGRAPHICAL NOTICES" of nearly all the publications of the day.

This is followed by the "QUARTERLY SUMMARY OF IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES," classified and arranged under different heads, presenting a very complete digest of all that is new and interesting to the physician, abroad as well as at home.

Thus, during the year 1866, the "JOURNAL" has furnished to its subscribers One Hundred and Twenty Original Communications, Sixty-five Reviews and Bibliographical Notices, and Two Hundred and Thirty-two articles in the Quarterly Summaries, making a total of over FOUR HUNDRED articles emanating from the best professional minds in America and Europe.

To old subscribers, many of whom have been on the list for twenty or thirty years, the publisher feels that no promises for the future are necessary; but gentlemen who may now propose for the first time to subscribe may rest assured that no exertion will be spared to maintain the "JOURNAL" in the high position which it has so long occupied as a national exponent of scientific medicine, and as a medium of intercommunication between the profession of Europe and America—to render it, in fact, necessary to every practitioner who desires to keep on a level with the progress of his science.

The subscription price of the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES" has never been raised, during its long career. It is still FIVE DOLLARS per annum in advance, for which sum the subscriber receives in addition the "MEDICAL NEWS AND LIBRARY," making in all about 1500 large octavo pages per annum, free of postage.

II.

THE MEDICAL NEWS AND LIBRARY

is a monthly periodical of Thirty-two large octavo pages, making 384 pages per annum. Its "NEWS DEPARTMENT" presents the current information of the day, with Clinical Lectures and Hospital Gleanings; while the "LIBRARY DEPARTMENT" is devoted to publishing standard works on the various branches of medical science, paged separately, so that they can be removed and bound on completion. In this manner subscribers have received, without expense, such works as "WATSON'S PRACTICE,"

"TODD AND BOWMAN'S PHYSIOLOGY," "WEST ON CHILDREN," "MALGAIGNE'S SURGERY," &c. &c. Professor ERICHSEN'S new and valuable practical work "ON RAILWAY AND OTHER INJURIES OF THE NERVOUS SYSTEM" is commenced in the number for January, 1867, rendering this a particularly desirable time for new subscriptions.

As stated above, the subscription price of the "MEDICAL NEWS AND LIBRARY" is ONE DOLLAR per annum in advance; and it is furnished without charge to all subscribers to the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES."

III.

RANKING'S ABSTRACT OF THE MEDICAL SCIENCES

is issued in half-yearly volumes, which will be delivered to subscribers about the first of March, and first of September. Each volume will contain nearly 300 closely printed octavo pages, making nearly six hundred pages per annum.

"RANKING'S ABSTRACT" has now been published in England regularly for more than twenty years, and has acquired the highest reputation for the ability and industry with which the essence of medical literature is condensed into its pages. It purports to be "*An Analytical and Critical Digest of the principal British and Continental Medical Works published in the preceding Six Months*," and, in addition to the matter thus derived from independent treatises, it presents an abstract of all that is important or interesting in about sixty British and Continental journals. About four hundred articles are thus annually presented to its readers, affording a very complete view of the progress of medical science throughout the world. Each volume is systematically arranged and thoroughly indexed, thus facilitating the researches of the reader in pursuit of particular subjects, and enabling him to refer without loss of time to the vast amount of information contained in its pages.

The subscription price of the "ABSTRACT," mailed free of postage, will be TWO DOLLARS AND A HALF per annum, payable in advance. Single volumes, $1 50 each.

As stated above, however, it will be supplied in conjunction with the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES" and the "MEDICAL NEWS AND LIBRARY," the whole *free of postage*, for SIX DOLLARS PER ANNUM IN ADVANCE.

For this small sum the subscriber will therefore receive three periodicals, each of the highest reputation in its class, containing in all over TWO THOUSAND PAGES of the choicest reading, and presenting a complete view of medical progress throughout the world.

In this effort to bring so large an amount of practical information within the reach of every member of the profession, the publisher confidently anticipates the friendly aid of all who are interested in the dissemination of sound medical literature. He trusts, especially, that the subscribers to the "AMERICAN MEDICAL JOURNAL" will call the attention of their acquaintances to the advantages thus offered, and that he will be sustained in the endeavor to permanently establish medical periodical literature on a footing of cheapness never heretofore attempted.

*** Gentlemen desiring to avail themselves of the advantages thus offered will do well to forward their subscriptions at an early day, in order to insure the receipt of complete sets for the year 1867.

☞ The safest mode of remittance is by postal money order, drawn to the order of the undersigned. Where money order post-offices are not accessible, remittances for the "JOURNAL" may be made at the risk of the publisher, by taking the postmaster's certificate of the inclosure and forwarding of the money. Address,

HENRY C. LEA,
Nos. 706 and 708 SANSOM ST., PHILADELPHIA, PA.

DUNGLISON (*ROBLEY*), *M. D.*,

Professor of Institutes of Medicine in Jefferson Medical College, Philadelphia.

MEDICAL LEXICON; A DICTIONARY OF MEDICAL SCIENCE: Containing a concise explanation of the various Subjects and Terms of Anatomy, Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Pharmacy, Surgery, Obstetrics, Medical Jurisprudence, and Dentistry. Notices of Climate and of Mineral Waters; Formulæ for Officinal, Empirical, and Dietetic Preparations; with the Accentuation and Etymology of the Terms, and the French and other Synonymes; so as to constitute a French as well as English Medical Lexicon. Thoroughly Revised, and very greatly Modified and Augmented. In one very large and handsome royal octavo volume of 1048 double-columned pages, in small type; strongly done up in extra cloth, $6 00; leather, raised bands, $6 75.

The object of the author from the outset has not been to make the work a mere lexicon or dictionary of terms, but to afford, under each, a condensed view of its various medical relations, and thus to render the work an epitome of the existing condition of medical science. Starting with this view, the immense demand which has existed for the work has enabled him, in repeated revisions, to augment its completeness and usefulness, until at length it has attained the position of a recognized and standard authority wherever the language is spoken. The mechanical execution of this edition will be found greatly superior to that of previous impressions. By enlarging the size of the volume to a royal octavo, and by the employment of a small but clear type, on extra fine paper, the additions have been incorporated without materially increasing the bulk of the volume, and the matter of two or three ordinary octavos has been compressed into the space of one not unhandy for consultation and reference.

It would be a work of supererogation to bestow a word of praise upon this Lexicon. We can only wonder at the labor expended, for whenever we refer to its pages for information we are seldom disappointed in finding all we desire, whether it be in accentuation, etymology, or definition of terms.—*New York Medical Journal*, November, 1865.

It would be mere waste of words in us to express our admiration of a work which is so universally and deservedly appreciated. The most admirable work of its kind in the English language. As a book of reference it is invaluable to the medical practitioner, and in every instance that we have turned over its pages for information we have been charmed by the clearness of language and the accuracy of detail with which each abounds. We can most cordially and confidently commend it to our readers.—*Glasgow Medical Journal*, January, 1866.

A work to which there is no equal in the English language.—*Edinburgh Medical Journal.*

It is something more than a dictionary, and something less than an encyclopædia. This edition of the well-known work is a great improvement on its predecessors. The book is one of the very few of which it may be said with truth that every medical man should possess it.—*London Medical Times*, Aug. 26, 1865.

Few works of the class exhibit a grander monument of patient research and of scientific lore. The extent of the sale of this lexicon is sufficient to testify to its usefulness, and to the great service conferred by Dr. Robley Dunglison on the profession, and indeed on others, by its issue.—*London Lancet*, May 13, 1865.

The old edition, which is now superseded by the new, has been universally looked upon by the medical profession as a work of immense research and great value. The new has increased usefulness; for medicine, in all its branches, has been making such progress that many new terms and subjects have recently been introduced; all of which may be found fully defined in the present edition. We know of no other dictionary in the English language that can bear a comparison with it in point of completeness of subjects and accuracy of statement.—*N. Y. Druggists' Circular*, 1865.

For many years Dunglison's Dictionary has been the standard book of reference with most practitioners in this country, and we can certainly commend this work to the renewed confidence and regard of our readers.—*Cincinnati Lancet*, April, 1865.

It is undoubtedly the most complete and useful medical dictionary hitherto published in this country. —*Chicago Med. Examiner*, February, 1865.

What we take to be decidedly the best medical dictionary in the English language. The present edition is brought fully up to the advanced state of science. For many a long year "Dunglison" has been at our elbow, a constant companion and friend, and we greet him in his replenished and improved form with especial satisfaction.—*Pacific Med. and Surg. Journal*, June 27, 1865.

This is, perhaps, the book of all others which the physician or surgeon should have on his shelves. It is more needed at the present day than a few years back.—*Canada Med. Journal*, July, 1865.

It deservedly stands at the head, and cannot be surpassed in excellence.—*Buffalo Med. and Surg. Journal*, April, 1865.

We can sincerely commend Dr. Dunglison's work as most thorough, scientific, and accurate. We have tested it by searching its pages for new terms, which have abounded so much of late in medical nomenclature, and our search has been successful in every instance. We have been particularly struck with the fulness of the synonymy and the accuracy of the derivation of words. It is as necessary a work to every enlightened physician as Worcester's English Dictionary is to every one who would keep up his knowledge of the English tongue to the standard of the present day. It is, to our mind, the most complete work of the kind with which we are acquainted.—*Boston Med. and Surg. Journal*, June 22, 1865.

We are free to confess that we know of no medical dictionary more complete; no one better, if so well adapted for the use of the student; no one that may be consulted with more satisfaction by the medical practitioner.—*Am. Jour. Med. Sciences*, April, 1865.

The value of the present edition has been greatly enhanced by the introduction of new subjects and terms, and a more complete etymology and accentuation, which renders the work not only satisfactory and desirable, but indispensable to the physician.—*Chicago Med. Journal*, April, 1865.

No intelligent member of the profession can or will be without it.—*St. Louis Med. and Surg. Journal*, April, 1865.

It has the rare merit that it certainly has no rival in the English language for accuracy and extent of references.—*London Medical Gazette.*

HOBLYN (*RICHARD D.*), *M. D.*

A DICTIONARY OF THE TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES. A new American edition, revised, with numerous additions, by ISAAC HAYS, M. D., Editor of the "American Journal of the Medical Sciences." In one large royal 12mo. volume of over 500 double-columned pages; extra cloth, $1 50; leather, $2 00.

It is the best book of definitions we have, and ought always to be upon the student's table.—*Southern Med. and Surg. Journal.*

NEILL (*JOHN*), *M. D.*, and SMITH (*FRANCIS G.*), *M. D.*,

Prof. of the Institutes of Medicine in the Univ. of Penna.

AN ANALYTICAL COMPENDIUM OF THE VARIOUS BRANCHES OF MEDICAL SCIENCE; for the Use and Examination of Students. A new edition, revised and improved. In one very large and handsomely printed royal 12mo. volume, of about one thousand pages, with 374 wood cuts, extra cloth, $4; strongly bound in leather, with raised bands, $4 75.

The Compend of Drs. Neill and Smith is incomparably the most valuable work of its class ever published in this country. Attempts have been made in various quarters to squeeze Anatomy, Physiology, Surgery, the Practice of Medicine, Obstetrics, Materia Medica, and Chemistry into a single manual; but the operation has signally failed in the hands of all up to the advent of "Neill and Smith's" volume, which is quite a miracle of success. The outlines of the whole are admirably drawn and illustrated, and the authors are eminently entitled to the grateful consideration of the student of every class.—*N. O. Med. and Surg. Journal.*

This popular favorite with the student is so well known that it requires no more at the hands of a medical editor than the announciation of a new and improved edition. There is no sort of comparison between this work and any other on a similar plan, and for a similar object.—*Nash. Journ of Medicine.*

There are but few students or practitioners of medicine unacquainted with the former editions of this unassuming though highly instructive work. The whole science of medicine appears to have been sifted, as the gold-bearing sands of El Dorado, and the precious facts treasured up in this little volume. A complete portable library so condensed that the student may make it his constant pocket companion.—*Western Lancet.*

To compress the whole science of medicine in less than 1,000 pages is an impossibility, but we think that the book before us approaches as near to it as is possible. Altogether, it is the best of its class, and has met with a deserved success. As an elementary textbook for students, it has been useful, and will continue to be employed in the examination of private classes, whilst it will often be referred to by the country practitioner.—*Va. Med. Journal.*

As a handbook for students it is invaluable, containing in the most condensed form the established facts and principles of medicine and its collateral sciences.—*N. H. Journal of Medicine.*

In the rapid course of lectures, where work for the students is heavy, and review necessary for an examination, a compend is not only valuable, but it is almost a *sine qua non*. The one before us is, in most of the divisions, the most unexceptionable of all books of the kind that we know of. The newest and soundest doctrines and the latest improvements and discoveries are explicitly, though concisely, laid before the student. Of course it is useless for us to recommend it to all last course students, but there is a class to whom we very sincerely commend this cheap book as worth its weight in silver—that class is the graduates in medicine of more than ten years' standing, who have not studied medicine since. They will perhaps find out from it that the science is not exactly now what it was when they left it off.—*The Stethoscope.*

Having made free use of this volume in our examinations of pupils, we can speak from experience in recommending it as an admirable compend for students, and especially useful to preceptors who examine their pupils. It will save the teacher much labor by enabling him readily to recall all of the points upon which his pupils should be examined. A work of this sort should be in the hands of every one who takes pupils into his office with a view of examining them; and this is unquestionably the best of its class. Let every practitioner who has pupils provide himself with it, and he will find the labor of refreshing his knowledge so much facilitated that he will be able to do justice to his pupils at very little cost of time or trouble to himself.—*Transylvania Med. Journal.*

LUDLOW (*J. L.*), *M. D.*,

A MANUAL OF EXAMINATIONS upon Anatomy, Physiology, Surgery, Practice of Medicine, Obstetrics, Materia Medica, Chemistry, Pharmacy, and Therapeutics. To which is added a Medical Formulary. Third edition, thoroughly revised and greatly extended and enlarged. With 370 illustrations. In one handsome royal 12mo. volume of 816 large pages, extra cloth, $3 25; leather, $3 75.

The arrangement of this volume in the form of question and answer renders it especially suitable for the office examination of students, and for those preparing for graduation.

We know of no better companion for the student during the hours spent in the lecture-room, or to refresh, at a glance, his memory of the various topics *crammed* into his head by the various professors to whom he is compelled to listen.—*Western Lancet.*

As it embraces the whole range of medical studies it is necessarily voluminous, containing 816 large duodecimo pages. After a somewhat careful examination of its contents, we have formed a much more favorable opinion of it than we are wont to regard such works. Although well adapted to meet the wants of the student in preparing for his final examination, it might be profitably consulted by the practitioner also, who is most apt to become rusty in the very kind of details here given, and who, amid the hurry of his daily routine, is but too prone to neglect the study of more elaborate works. The possession of a volume of this kind might serve as an inducement for him to seize the moment of excited curiosity to inform himself on any subject, and which is otherwise too often allowed to pass unimproved.—*St. Louis Med. and Surg. Journal.*

TANNER (*THOMAS HAWKES*), *M. D.*,

A MANUAL OF CLINICAL MEDICINE AND PHYSICAL DIAGNOSIS. Third American, from the second enlarged and revised English edition. To which is added The Code of Ethics of the American Medical Association. In one handsome volume 12mo. (*Preparing for early publication.*)

This work, after undergoing a very thorough revision at the hands of the author, may now be expected to appear shortly. The title scarcely affords a proper idea of the range of subjects embraced in the volume, as it contains not only very full details of diagnostic symptoms properly classified, but also a large amount of information on matters of every day practical importance, not usually touched upon in the systematic works, or scattered through many different volumes.

GRAY (HENRY), F.R.S.,

Lecturer on Anatomy at St. George's Hospital, London.

ANATOMY, DESCRIPTIVE AND SURGICAL. The Drawings by H. V. CARTER, M. D., late Demonstrator on Anatomy at St. George's Hospital; the Dissections jointly by the AUTHOR and DR. CARTER. Second American, from the second revised and improved London edition. In one magnificent imperial octavo volume, of over 800 pages, with 388 large and elaborate engravings on wood. Price in extra cloth, $6 00; leather, raised bands, $7 00.

The author has endeavored in this work to cover a more extended range of subjects than is customary in the ordinary text-books, by giving not only the details necessary for the student, but also the application of those details in the practice of medicine and surgery, thus rendering it both a guide for the learner, and an admirable work of reference for the active practitioner. The engravings form a special feature in the work, many of them being the size of nature, nearly all original, and having the names of the various parts printed on the body of the cut, in place of figures of reference, with descriptions at the foot. They thus form a complete and splendid series, which will greatly assist the student in obtaining a clear idea of Anatomy, and will also serve to refresh the memory of those who may find in the exigencies of practice the necessity of recalling the details of the dissecting room; while combining, as it does, a complete Atlas of Anatomy, with a thorough treatise on systematic, descriptive, and applied Anatomy, the work will be found of essential use to all physicians who receive students in their offices, relieving both preceptor and pupil of much labor in laying the groundwork of a thorough medical education.

Notwithstanding its exceedingly low price, the work will be found, in every detail of mechanical execution, one of the handsomest that has yet been offered to the American profession; while the careful scrutiny of a competent anatomist has relieved it of whatever typographical errors existed in the English edition.

Thus it is that book after book makes the labor of the student easier than before, and since we have seen Blanchard & Lea's new edition of Gray's Anatomy, certainly the finest work of the kind now extant, we would fain hope that the bugbear of medical students will lose half its horrors, and this necessary foundation of physiological science will be much facilitated and advanced.—*N. O. Med. News.*

The various points illustrated are marked directly on the structure; that is, whether it be muscle, process, artery, nerve, valve, etc. etc.—we say each point is distinctly marked by lettered engravings, so that the student perceives at once each point described as readily as if pointed out on the subject by the demonstrator. Most of the illustrations are thus rendered exceedingly satisfactory, and to the physician they serve to refresh the memory with great readiness and with scarce a reference to the printed text. The surgical application of the various regions is also presented with force and clearness, impressing upon the student at each step of his research all the important relations of the structure demonstrated.—*Cincinnati Lancet.*

This is, we believe, the handsomest book on Anatomy as yet published in our language, and bids fair to become in a short time THE standard text-book of our colleges and studies. Students and practitioners will alike appreciate this book. We predict for it a bright career, and are fully prepared to endorse the statement of the *London Lancet*, that "We are not acquainted with any work in any language which can take equal rank with the one before us." Paper, printing, binding, all are excellent, and we feel that a grateful profession will not allow the publishers to go unrewarded.—*Nashville Med. and Surg. Journal.*

SMITH (HENRY H.), M.D., and HORNER (WILLIAM E.), M.D.,

Prof. of Surgery in the Univ. of Penna., &c. *Late Prof. of Anatomy in the Univ. of Penna., &c.*

AN ANATOMICAL ATLAS, illustrative of the Structure of the Human Body. In one volume, large imperial octavo, extra cloth, with about six hundred and fifty beautiful figures. $4 50.

The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistical execution, have been already pointed out. We must congratulate the student upon the completion of this Atlas, as it is the most convenient work of the kind that has yet appeared; and we must add, the very beautiful manner in which it is "got up" is so creditable to the country as to be flattering to our national pride.—*American Medical Journal.*

HORNER (WILLIAM E.), M.D.,

SPECIAL ANATOMY AND HISTOLOGY. Eighth edition, extensively revised and modified. In two large octavo volumes of over 1000 pages, with more than 300 wood-cuts; extra cloth, $6 00.

SHARPEY (WILLIAM), M.D., and QUAIN (JONES & RICHARD).

HUMAN ANATOMY. Revised, with Notes and Additions, by JOSEPH LEIDY, M.D., Professor of Anatomy in the University of Pennsylvania. Complete in two large octavo volumes, of about 1300 pages, with 511 illustrations; extra cloth, $6 00.

The very low price of this standard work, and its completeness in all departments of the subject, should command for it a place in the library of all anatomical students.

ALLEN (J. M.), M.D.

THE PRACTICAL ANATOMIST; OR, THE STUDENT'S GUIDE IN THE DISSECTING ROOM. With 266 illustrations. In one very handsome royal 12mo. volume, of over 600 pages; extra cloth, $2 00.

One of the most useful works upon the subject ever written.—*Medical Examiner.*

WILSON (*ERASMUS*), *F.R.S.*

A SYSTEM OF HUMAN ANATOMY, General and Special. A new and revised American, from the last and enlarged English edition. Edited by W. H. GOBRECHT, M. D., Professor of General and Surgical Anatomy in the Medical College of Ohio. Illustrated with three hundred and ninety-seven engravings on wood. In one large and handsome octavo volume, of over 600 large pages; extra cloth, $4 00; leather, $5 00.

The publisher trusts that the well-earned reputation of this long-established favorite will be more than maintained by the present edition. Besides a very thorough revision by the author, it has been most carefully examined by the editor, and the efforts of both have been directed to introducing everything which increased experience in its use has suggested as desirable to render it a complete text-book for those seeking to obtain or to renew an acquaintance with Human Anatomy. The amount of additions which it has thus received may be estimated from the fact that the present edition contains over one-fourth more matter than the last, rendering a smaller type and an enlarged page requisite to keep the volume within a convenient size. The author has not only thus added largely to the work, but he has also made alterations throughout, wherever there appeared the opportunity of improving the arrangement or style, so as to present every fact in its most appropriate manner, and to render the whole as clear and intelligible as possible. The editor has exercised the utmost caution to obtain entire accuracy in the text, and has largely increased the number of illustrations, of which there are about one hundred and fifty more in this edition than in the last, thus bringing distinctly before the eye of the student everything of interest or importance.

BY THE SAME AUTHOR.

THE DISSECTOR'S MANUAL; OR, PRACTICAL AND SURGICAL ANATOMY. Third American, from the last revised and enlarged English edition. Modified and rearranged by WILLIAM HUNT, M. D., late Demonstrator of Anatomy in the University of Pennsylvania. In one large and handsome royal 12mo. volume, of 582 pages, with 154 illustrations; extra cloth, $2 00.

HODGES, (*RICHARD M.*), *M.D.*,

Late Demonstrator of Anatomy in the Medical Department of Harvard University.

PRACTICAL DISSECTIONS. Second Edition, thoroughly revised. In one neat royal 12mo. volume. (*Just Ready.*)

A second edition of this little work being called for, the author has endeavored, by a very thorough and careful revision, to adapt it still more completely to the wants of the student in the dissecting room.

MACLISE (*JOSEPH*).

SURGICAL ANATOMY. By JOSEPH MACLISE, Surgeon. In one volume, very large imperial quarto; with 68 large and splendid plates, drawn in the best style and beautifully colored, containing 190 figures, many of them the size of life; together with copious explanatory letter-press. Strongly and handsomely bound in extra cloth. Price $14 00.

As no complete work of the kind has heretofore been published in the English language, the present volume will supply a want long felt in this country of an accurate and comprehensive Atlas of Surgical Anatomy, to which the student and practitioner can at all times refer to ascertain the exact relative positions of the various portions of the human frame towards each other and to the surface, as well as their abnormal deviations. The importance of such a work to the student, in the absence of anatomical material, and to practitioners, either for consultation in emergencies or to refresh their recollections of the dissecting room, is evident. Notwithstanding the large size, beauty and finish of the very numerous illustrations, it will be observed that the price is so low as to place it within the reach of all members of the profession.

We know of no work on surgical anatomy which can compete with it.—*Lancet.*

The work of Maclise on surgical anatomy is of the highest value. In some respects it is the best publication of its kind we have seen, and is worthy of a place in the library of any medical man, while the student could scarcely make a better investment than this.—*The Western Journal of Medicine and Surgery.*

No such lithographic illustrations of surgical regions have hitherto, we think, been given. While the operator is shown every vessel and nerve where an operation is contemplated, the exact anatomist is refreshed by those clear and distinct dissections, which every one must appreciate who has a particle of enthusiasm. The English medical press has quite exhausted the words of praise, in recommending this admirable treatise. Those who have any curiosity to gratify, in reference to the perfectibility of the lithographic art in delineating the complex mechanism of the human body, are invited to examine our specimen copy. If anything will induce surgeons and students to patronize a book of such rare value and everyday importance to them, it will be a survey of the artistical skill exhibited in these fac-similes of nature.—*Boston Med. and Surg. Journal.*

PEASLEE (*E. R.*), *M.D.*,

Professor of Anatomy and Physiology in Dartmouth Med. College, N. H.

HUMAN HISTOLOGY, in its relations to Anatomy, Physiology, and Pathology; for the use of medical students. With four hundred and thirty-four illustrations. In one handsome octavo volume of over 600 pages, extra cloth. $3 75.

We would recommend it as containing a summary of all that is known of the important subjects which it treats: of all that is in the great works of Simon and Lehmann, and the organic chemists in general. Master this one volume, and you know all that is known of the great fundamental principles of medicine, and we have no hesitation in saying that it is an honor to the American medical profession.—*St. Louis Med. and Surg. Journal.*

CARPENTER (*WILLIAM B.*), *M. D., F. R. S.*,

Examiner in Physiology and Comparative Anatomy in the University of London.

PRINCIPLES OF HUMAN PHYSIOLOGY; with their chief applications to Psychology, Pathology, Therapeutics, Hygiene and Forensic Medicine.

A new American from the last and revised London edition. With nearly three hundred illustrations. Edited, with additions, by FRANCIS GURNEY SMITH, M. D., Professor of the Institutes of Medicine in the University of Pennsylvania, &c. In one very large and beautiful octavo volume, of about 900 large pages, handsomely printed; extra cloth, $5 50; leather, raised bands, $6 50.

The highest compliment that can be extended to this great work of Dr. Carpenter is to call attention to this, another new edition, which the favorable regard of the profession has called for. Carpenter is the standard authority on physiology, and no physician or medical student will regard his library as complete without a copy of it.—*Cincinnati Med. Observer.*

With Dr. Smith, we confidently believe "that the present will more than sustain the enviable reputation already attained by former editions, of being one of the fullest and most complete treatises on the subject in the English language." We know of none from the pages of which a satisfactory knowledge of the physiology of the human organism can be as well obtained, none better adapted for the use of such as take up the study of physiology in its reference to the institutes and practice of medicine.—*Am. Jour. Med. Sciences.*

A complete cyclopædia of this branch of science.—*N. Y. Med. Times.*

We doubt not it is destined to retain a strong hold on public favor, and remain the favorite text-book in our colleges.—*Virginia Medical Journal.*

We have so often spoken in terms of high commendation of Dr. Carpenter's elaborate work on human physiology that, in announcing a new edition, it is unnecessary to add anything to what has heretofore been said, and especially is this the case since every intelligent physician is as well aware of the character and merits of the work as we ourselves are.—*St. Louis Med. and Surg. Journal.*

The above is the title of what is emphatically *the* great work on physiology; and we are conscious that it would be a useless effort to attempt to add anything to the reputation of this invaluable work, and can only say to all with whom our opinion has any influence, that it is our *authority*.—*Atlanta Med. Journal.*

The greatest, the most reliable, and the best book on the subject which we know of in the English language.—*Stethoscope.*

BY THE SAME AUTHOR.

PRINCIPLES OF COMPARATIVE PHYSIOLOGY.

New American, from the Fourth and Revised London Edition. In one large and handsome octavo volume, with over three hundred beautiful illustrations. Pp. 752. Extra cloth, $5 00.

As a complete and condensed treatise on its extended and important subject, this work becomes a necessity to students of natural science, while the very low price at which it is offered places it within the reach of all.

BY THE SAME AUTHOR.

THE MICROSCOPE AND ITS REVELATIONS.

With an Appendix containing the Applications of the Microscope to Clinical Medicine, &c. By F. G. SMITH, M. D. Illustrated by four hundred and thirty-four beautiful engravings on wood. In one large and very handsome octavo volume, of 724 pages, extra cloth, $5 25.

TODD (*ROBERT B.*), *M.D. F.R.S., and BOWMAN* (*W.*), *F.R.S.*

THE PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN.

With about three hundred large and beautiful illustrations on wood. Complete in one large octavo volume of 950 pages, extra cloth. Price $4 75.

The names of Todd and Bowman have long been familiar to the student of physiology. In this work we have the ripe experience of these laborious physiologists on every branch of this science. They gave each subject the most thorough and critical examination before making it a matter of record. Thus, while they advanced tardily, apparently, in their publication, the work thus issued was a complete exponent of the science of physiology at the time of its final appearance. We can, therefore, recommend this work as one of the most reliable which the student or practitioner can consult relating to physiology.—*N. Y. Journal of Medicine.*

To it the rising generation of medical men will owe, in great measure, a familiar acquaintance with all the chief truths respecting the healthy structure and working of the frames which are to form the subject of their care. The possession of such knowledge will do more to make sound and able practitioners than anything else.—*British and Foreign Medico-Chirurgical Review.*

KIRKES (*WILLIAM SENHOUSE*), *M.D.*,

A MANUAL OF PHYSIOLOGY.

A new American from the third and improved London edition. With two hundred illustrations. In one large and handsome royal 12mo. volume. Pp. 586. Extra cloth, $2 25; leather, $2 75.

By the use of a fine and clear type, a very large amount of matter has been condensed into a comparatively small volume, and at its exceedingly low price it will be found a most desirable manual for students or for gentlemen desirous to refresh their knowledge of modern physiology.

It is at once convenient in size, comprehensive in design, and concise in statement, and altogether well adapted for the purpose designed.—*St. Louis Med. and Surg. Journal.*

The physiological reader will find it a most excellent guide in the study of physiology in its most advanced and perfect form. The author has shown himself capable of giving details sufficiently ample in a condensed and concentrated shape, on a science in which it is necessary at once to be correct and not lengthened.—*Edinburgh Med. and Surg. Journal.*

DALTON (*J. C.*), *M. D.*,

Professor of Physiology in the College of Physicians and Surgeons, New York, &c.

A TREATISE ON HUMAN PHYSIOLOGY, Designed for the use of Students and Practitioners of Medicine. Third edition, revised, with nearly three hundred illustrations on wood. In one very beautiful octavo volume, of 700 pages, extra cloth, $5 25; leather, $6 25.

"In the present edition of this work the general plan and arrangement of the two former ones are retained. The improvements and additions which have been introduced consist in the incorporation into the text of certain new facts and discoveries, relating mainly to details, which have made their appearance within the last three years."—*Author's Preface.*

The rapid demand for another edition of this work sufficiently shows that the author has succeeded in his efforts to produce a text-book of standard and permanent value, embodying within a moderate compass all that is definitively and positively known within the domain of Human Physiology. His high reputation as an original observer and investigator is a guarantee that in again revising it he has introduced whatever is necessary to render it thoroughly on a level with the advanced science of the day, and this has been accomplished without unduly increasing the size of the volume.

No exertion has been spared to maintain the standard of typographical execution which has rendered this work admittedly one of the handsomest volumes as yet produced in this country.

We believe we fully recognize the value of Draper and Dunglison, Carpenter and Kirkes, and Todd and Bowman, and yet we unhesitatingly place Dalton at the head of the list, for qualities already enumerated. In the important feature of illustration, Dalton's work is without a peer, either in adaptedness to the text, simplicity and graphicness of design, or elegance of artistic execution.—*Chicago Med. Examiner.*

In calling attention to the recent publication of the third edition of this book, it will only be necessary to say that it retains all the merits and essentially the same plan of the two former editions, with which every American student of medicine is undoubtedly familiar. The distinguished author has added to the text all the important discoveries in experimental physiology and embryology which have appeared during the last three years.—*Boston Med. and Surg. Journal*, June 30, 1864.

The arrangement of the work is excellent. The facts and theories put forward in it are brought up to the present time. Indeed, it may be looked upon as presenting the latest views of physiologists in a condensed form, written in a clear, distinct manner, and in a style which makes it not only a book of study to the student, or of reference to the medical practitioner, but a book which may be taken up and read with both pleasure and profit at any time.—*Canada Med. Journal*, October, 1864.

In Dr. Dalton's excellent treatise we have one of the latest contributions of our American brethren to medical science, and its popularity may be estimated by the fact that this, the second edition, follows upon the first with the short interval of two years. The author has succeeded in giving his readers an exceedingly accurate and at the same time most readable *résumé* of the present condition of physiological science; and, moreover, he has not been content with mere compilation, but has ably investigated the functions of the body for himself, many of the original experiments and observations being of the greatest value.—*London Med. Review.*

This work, recognized as a standard text-book by the medical schools, and with which the members of the profession are so familiar, demands but a brief notice. Its popularity is attested by the rapidity with which former editions have been exhausted.—*Chicago Med. Journal*, April, 1864.

To the student of physiology, no work as yet published could be more satisfactory as a guide, not only to a correct knowledge of the physiological subjects embraced in its limits, but, what is of far greater importance, it will prove the best teacher of the modes of investigation by which that knowledge can be acquired, and, if necessary, tested.—*The Columbus Review of Med. and Surgery.*

Until within a very recent date, American works on physiology were almost entirely unknown in Europe, a circumstance solely due to the fact of their being little else than crude compilations of European works. Within the last few years, however, a great change has taken place for the better, and our friends on the other side of the Atlantic can now boast of possessing manuals equalled by few and excelled by none of our own. In Dr. Dalton's treatise we are glad to find a valuable addition to physiological literature. With pleasure we have observed throughout the volume proof of the author not being a mere compiler of the ideas of others, but an active laborer in the field of science.—*The Brit. and For. Medico-Chirurgical Review.*

DUNGLISON (*ROBLEY*), *M. D.*,

Professor of Institutes of Medicine in Jefferson Medical College, Philadelphia.

HUMAN PHYSIOLOGY. Eighth edition. Thoroughly revised and extensively modified and enlarged, with five hundred and thirty-two illustrations. In two large and handsomely printed octavo volumes of about 1500 pages, extra cloth. $7 00.

LEHMANN (*C. G.*)

PHYSIOLOGICAL CHEMISTRY. Translated from the second edition by GEORGE E. DAY, M. D., F. R. S., &c., edited by R. E. ROGERS, M. D., Professor of Chemistry in the Medical Department of the University of Pennsylvania, with illustrations selected from Funke's Atlas of Physiological Chemistry, and an Appendix of plates. Complete in two large and handsome octavo volumes, containing 1200 pages, with nearly two hundred illustrations, extra cloth. $6 00.

BY THE SAME AUTHOR.

MANUAL OF CHEMICAL PHYSIOLOGY. Translated from the German, with Notes and Additions, by J. CHESTON MORRIS, M. D., with an Introductory Essay on Vital Force, by Professor SAMUEL JACKSON, M. D., of the University of Pennsylvania. With illustrations on wood. In one very handsome octavo volume of 336 pages, extra cloth. $2 25.

BRANDE (*WM. T.*), *D. C. L.*, *and TAYLOR* (*ALFRED S.*), *M. D.*, *F. R. S.*

CHEMISTRY. In one handsome 8vo. vol. (*New and revised edition preparing.*)

A most comprehensive and compact volume. Its information is recent, and is conveyed in clear language. Its index of sixty closely-printed columns shows with what care new discoveries have been added to well-known facts.—*The Chemical News.*

THE HANDBOOK IN CHEMISTRY OF THE STUDENT.—For clearness of language, accuracy of description, extent of information, and freedom from pedantry and mysticism, no other text-book comes into competition with it.—*The Lancet.*

The authors set out with the definite purpose of writing a book which shall be intelligible to any educated man. Thus conceived, and worked out in the most sturdy, common-sense method, this book gives in the clearest and most summary method possible all the facts and doctrines of chemistry.—*Medical Times.*

We can cordially recommend this work as one of the clearest, and most practical that can be put in the hands of the student.—*Edinburgh Med. Journal.*

It abounds in innumerable interesting facts not to be found elsewhere; and from the masterly manner in which every subject is handled, with its pleasing mode of describing even the dryest details, it cannot fail to prove acceptable, not only to those for whom it is intended, but to the profession at large.—*Canada Lancet.*

We have for a long time felt that the preparation of a proper chemical text-book for students would be time better spent than in the invention of a novel system of classification or the discovery of half a dozen new elements ending in *ium*. We believe this want has at last been satisfied in the book now before us, which has been prepared expressly for medical students by two of the most experienced teachers of the science in England.—*Boston Med. and Surgical Journal.*

BOWMAN (*JOHN E.*), *M. D.*

PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY. Edited by C. L. BLOXAM, Professor of Practical Chemistry in King's College, London. Fourth American, from the fourth and revised English Edition. In one neat volume, royal 12mo., pp. 351, with numerous illustrations, extra cloth. $2 25.

The fourth edition of this invaluable text-book of Medical Chemistry was published in England in October of the last year. The Editor has brought down the Handbook to that date, introducing, as far as was compatible with the necessary conciseness of such a work, all the valuable discoveries in the science which have come to light since the previous edition was printed. The work is indispensable to every student of medicine or enlightened practitioner. It is printed in clear type, and the illustrations are numerous and intelligible.—*Boston Med. and Surg. Journal.*

The medical student and practitioner have already appreciated properly this small manual, in which instruction for the examination and analysis of the urine, blood and other animal products, both healthy and morbid, are accurately given. The directions for the detection of poisons in organic mixtures and in the tissues are exceedingly well exposed in a concise and simple manner. This fourth edition has been thoroughly revised by the editor, and brought up to the present state of practical medical chemistry.—*Pacific Med. and Surg. Journal.*

BY THE SAME AUTHOR.

INTRODUCTION TO PRACTICAL CHEMISTRY, INCLUDING ANALYSIS. Fourth American, from the fifth and revised London edition. With numerous illustrations. In one neat vol., royal 12mo., extra cloth. $2 25. (*Just ready*)

One of the most complete manuals that has for a long time been given to the medical student.—*Athenæum.*

We regard it as realizing almost everything to be desired in an introduction to Practical Chemistry. It is by far the best adapted for the Chemical student of any that has yet fallen in our way.—*British and Foreign Medico-Chirurgical Review.*

The best introductory work on the subject with which we are acquainted.—*Edinburgh Monthly Jour.*

This little treatise, or manual, is designed especially for beginners. With this view the author has very judiciously simplified his subjects and illustrations as much as possible, and presents all of the details pertaining to chemical analysis, and other portions difficult for beginners to comprehend, in such a clear and distinct manner as to remove all doubt or difficulty. Thus a subject which is usually regarded by students as almost beyond their comprehension, is rendered very easy of acquisition. Several valuable tables, a glossary, etc., all combine to render the work peculiarly adapted to the wants of such; and as such we commend it to them.—*The Western Lancet.*

GRAHAM (*THOMAS*), *F. R. S.*

THE ELEMENTS OF INORGANIC CHEMISTRY, including the Applications of the Science in the Arts. New and much enlarged edition, by HENRY WATTS and ROBERT BRIDGES, M. D. Complete in one large and handsome octavo volume, of over 800 very large pages, with two hundred and thirty-two wood-cuts, extra cloth. $5 50.

Part II., completing the work from p. 431 to end, with Index, Title Matter, &c., may be had separate, cloth backs and paper sides. Price $3 00.

From Prof. E. N. Horsford, Harvard College.

It has, in its earlier and less perfect editions, been familiar to me, and the excellence of its plan and the clearness and completeness of its discussions, have long been my admiration.

No reader of English works on this science can afford to be without this edition of Prof. Graham's Elements.—*Silliman's Journal*, March, 1858.

From Prof. Wolcott Gibbs, N. Y. Free Academy.

The work is an admirable one in all respects, and its republication here cannot fail to exert a positive influence upon the progress of science in this country.

FOWNES (GEORGE), Ph. D.

A MANUAL OF ELEMENTARY CHEMISTRY; Theoretical and Practical.

With one hundred and ninety-seven illustrations. Edited by ROBERT BRIDGES, M. D. In one large royal 12mo. volume, of 600 pages, extra cloth, $2 00; leather, $2 50.

We know of no treatise in the language so well calculated to aid the student in becoming familiar with the numerous facts in the intrinsic science on which it treats, or one better calculated as a text-book for those attending Chemical lectures. * * * * The best text-book on Chemistry that has issued from our press.—*American Medical Journal.*

We again most cheerfully recommend it as the best text-book for students in attendance upon Chemical lectures that we have yet examined.—*Ill. and Ind. Med. and Surg. Journal.*

A first-rate work upon a first-rate subject.—*St. Louis Med. and Surg. Journal.*

No manual of Chemistry which we have met comes so near meeting the wants of the beginner.—*Western Journal of Medicine and Surgery.*

We know of none within the same limits which has higher claims to our confidence as a college class-book, both for accuracy of detail and scientific arrangement.—*Augusta Medical Journal.*

We know of no text-book on chemistry that we would sooner recommend to the student than this edition of Prof. Fownes' work.—*Montreal Medical Chronicle.*

A new and revised edition of one of the best elementary works on chemistry accessible to the American and English student.—*N. Y. Journal of Medical and Collateral Science.*

We unhesitatingly recommend it to medical students.—*N. W. Med. and Surg. Journal.*

This is a most excellent text-book for class instruction in chemistry, whether for schools or colleges.—*Silliman's Journal.*

ABEL AND BLOXAM'S HANDBOOK OF CHEMISTRY, Theoretical, Practical, and Technical. With a recommendatory Preface, by Dr. HOFFMAN. In one large octavo volume of 662 pages, with illustrations, extra cloth, $4 50.

GARDNER'S MEDICAL CHEMISTRY, for the Use of Students, and the Profession. In one royal 12mo. volume, with wood-cuts; pp. 396, extra cloth, $1 00.

KNAPP'S TECHNOLOGY; or Chemistry Applied to the Arts, and to Manufactures. Edited, with numerous notes and additions, by Dr. EDMUND RONALS, and Dr. THOMAS RICHARDSON. With American additions, by Prof. WALTER R. JOHNSON. In two very handsome octavo volumes, containing about 1000 pages, and 500 wood engravings, extra cloth, $6 00.

PARRISH (EDWARD),

Professor of Materia Medica in the Philadelphia College of Pharmacy.

A TREATISE ON PHARMACY.

Designed as a Text-Book for the Student, and as a Guide for the Physician and Pharmaceutist. With many Formulæ and Prescriptions. Third Edition, greatly improved. In one handsome octavo volume, of 850 pages, with several hundred illustrations, extra cloth. $5 00.

The rapid progress made in the science and art of Pharmacy, and the many changes in the last edition of the Pharmacopœia have required a very thorough revision of this work to render it worthy the continued confidence with which it has heretofore been favored. In effecting this, many portions have been condensed, and every effort has been made to avoid increasing unduly the bulk of the volume, yet, notwithstanding this, it will be found enlarged by about one hundred and fifty pages. The author's aim has been to present in a clear and compendious manner everything of value to the prescriber and dispenser of medicines, and the work, it is hoped, will be found more than ever a complete book of reference and text-book, indispensable to all who desire to keep on a level with the advance of knowledge connected with their profession.

The immense amount of practical information condensed in its pages may be estimated from the fact that the Index contains about 4700 items. Under the head of Acids there are 312 references; under Emplastrum, 36; Extracts, 159; Lozenges, 25; Mixtures, 55; Pills, 56; Syrups, 131; Tinctures, 138; Unguentum, 57, &c.

We have examined this large volume with a good deal of care, and find that the author has completely exhausted the subject upon which he treats; a more complete work, we think, it would be impossible to find. To the student of pharmacy the work is indispensable; indeed, so far as we know, it is the only one of its kind in existence, and even to the physician or medical student who can spare five dollars to purchase it, we feel sure the practical information he will obtain will more than compensate him for the outlay.—*Canada Med. Journal*, Nov. 1864.

The medical student and the practising physician will find the volume of inestimable worth for study and reference.—*San Francisco Med. Press*, July, 1864.

When we say that this book is in some respects the best which has been published on the subject in the English language for a great many years, we do not wish it to be understood as very extravagant praise. In truth, it is not so much the best as the only book.—*The London Chemical News.*

An attempt to furnish anything like an analysis of Parrish's very valuable and elaborate *Treatise on Practical Pharmacy* would require more space than we have at our disposal. This, however, is not so much a matter of regret, inasmuch as it would be difficult to think of any point, however minute and apparently trivial, connected with the manipulation of pharmaceutic substances or appliances which has not been clearly and carefully discussed in this volume. Want of space prevents our enlarging further on this valuable work, and we must conclude by a simple expression of our hearty appreciation of its merits.—*Dublin Quarterly Jour. of Medical Science*, August, 1864.

We have in this able and elaborate work a fair exposition of pharmaceutical science as it exists in the United States; and it shows that our transatlantic friends have given the subject most elaborate consideration, and have brought their art to a degree of perfection which, we believe, is scarcely to be surpassed anywhere. The book is, of course, of more direct value to the medicine maker than to the physician; yet Mr. PARRISH has not failed to introduce matter in which the prescriber is quite as much interested as the compounder of remedies. In conclusion, we can only express our high opinion of the value of this work as a guide to the pharmaceutist, and in many respects to the physician, not only in America, but in other parts of the world.—*British Med. Journal*, Nov. 12th, 1864.

The former editions have been sufficiently long before the medical public to render the merits of the work well known. It is certainly one of the most complete and valuable works on practical pharmacy to which the student, the practitioner, or the apothecary can have access.—*Chicago Medical Examiner*, March, 1864.

GRIFFITH (*ROBERT E.*), *M.D.*

A UNIVERSAL FORMULARY, Containing the Methods of Preparing and Administering Officinal and other Medicines. The whole adapted to Physicians and Pharmaceutists. Second edition, thoroughly revised, with numerous additions, by ROBERT P. THOMAS, M.D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one large and handsome octavo volume of 650 pages, double-columns. Extra cloth, $4 00; leather, $5 00.

In this volume, the Formulary proper occupies over 400 double-column pages, and contains about 5000 formulas, among which, besides those strictly medical, will be found numerous valuable receipts for the preparation of essences, perfumes, inks, soaps, varnishes, &c. &c. In addition to this, the work contains a vast amount of information indispensable for daily reference by the practising physician and apothecary, embracing Tables of Weights and Measures, Specific Gravity, Temperature for Pharmaceutical Operations, Hydrometrical Equivalents, Specific Gravities of some of the Preparations of the Pharmacopœias, Relation between different Thermometrical Scales, Explanation of Abbreviations used in Formulæ, Vocabulary of Words used in Prescriptions, Observations on the Management of the Sick Room, Doses of Medicines, Rules for the Administration of Medicines, Management of Convalescence and Relapses, Dietetic Preparations not included in the Formulary, List of Incompatibles, Posological Table, Table of Pharmaceutical Names which differ in the Pharmacopœias, Officinal Preparations and Directions, and Poisons.

Three complete and extended Indexes render the work especially adapted for immediate consultation. One, of DISEASES AND THEIR REMEDIES, presents under the head of each disease the remedial agents which have been usefully exhibited in it, with reference to the formulæ containing them—while another of PHARMACEUTICAL and BOTANICAL NAMES, and a very thorough GENERAL INDEX afford the means of obtaining at once any information desired. The Formulary itself is arranged alphabetically, under the heads of the leading constituents of the prescriptions.

This is one of the most useful books for the practising physician which has been issued from the press of late years, containing a vast variety of formulas for the safe and convenient administration of medicines, all arranged upon scientific and rational principles, with the quantities stated in full, without signs or abbreviations.—*Memphis Med. Recorder.*

We know of none in our language, or any other, so comprehensive in its details.—*London Lancet.*

One of the most complete works of the kind in any language.—*Edinburgh Med. Journal.*

We are not cognizant of the existence of a parallel work.—*London Med. Gazette.*

STILLÉ (*ALFRED*), *M.D.*,

Professor of Theory and Practice of Medicine in the University of Penna.

THERAPEUTICS AND MATERIA MEDICA; a Systematic Treatise on the Action and Uses of Medicinal Agents, including their Description and History. Second edition, revised and enlarged. In two large and handsome octavo volumes, of 1592 pages. Extra cloth, $10 00; leather, raised bands, $12 00.

Dr. Stillé's splendid work on therapeutics and materia medica.—*London Med. Times*, April 8, 1865.

We have placed first on the list Dr. Stillé's great work on therapeutics.—*Edinburgh Med. Journ.*, 1865.

ELLIS (*BENJAMIN*), *M.D.*

THE MEDICAL FORMULARY: being a Collection of Prescriptions derived from the writings and practice of many of the most eminent physicians of America and Europe. Together with the usual Dietetic Preparations and Antidotes for Poisons. To which is added an Appendix, on the Endermic use of Medicines, and on the use of Ether and Chloroform. The whole accompanied with a few brief Pharmaceutic and Medical Observations. Eleventh edition, carefully revised and much extended by ROBERT P. THOMAS, M.D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one volume 8vo., of about 350 pages. $3 00.

We endorse the favorable opinion which the book has so long established for itself, and take this occasion to commend it to our readers as one of the convenient handbooks of the office and library.—*Cincinnati Lancet*, Feb. 1864.

The work has long been before the profession, and its merits are well known. The present edition contains many valuable additions, and will be found to be an exceedingly convenient and useful volume for reference by the medical practitioner.—*Chicago Medical Examiner*, March, 1864.

The work is now so well known, and has been so frequently noticed in this Journal as the successive editions appeared, that it is sufficient, on the present occasion, to state that the editor has introduced into the eleventh edition a large amount of new matter, derived from the current medical and pharmaceutical works, as well as a number of valuable prescriptions furnished from private sources. A very comprehensive and extremely useful index has also been supplied, which facilitates reference to the particular article the prescriber may wish to administer; and the language of the Formulary has been made to correspond with the nomenclature of the new national Pharmacopœia.—*Am. Jour. Med. Sciences*, Jan. 1864.

DUNGLISON (*ROBLEY*), *M.D.*,

Professor of Institutes of Medicine in Jefferson Medical College, Philadelphia.

GENERAL THERAPEUTICS AND MATERIA MEDICA; adapted for a Medical Text-Book. With Indexes of Remedies and of Diseases and their Remedies. Sixth edition, revised and improved. With one hundred and ninety-three illustrations. In two large and handsomely printed octavo vols. of about 1100 pages, extra cloth. $6 50.

BY THE SAME AUTHOR.

NEW REMEDIES, WITH FORMULÆ FOR THEIR PREPARATION AND ADMINISTRATION. Seventh edition, with extensive additions. In one very large octavo volume of 770 pages, extra cloth. $4 00.

PEREIRA (*JONATHAN*), *M.D., F.R.S. and L.S.*

MATERIA MEDICA AND THERAPEUTICS; being an Abridgment of the late Dr. Pereira's Elements of Materia Medica, arranged in conformity with the British Pharmacopœia, and adapted to the use of Medical Practitioners, Chemists and Druggists, Medical and Pharmaceutical Students, &c. By F. J. FARRE, M.D., Senior Physician to St. Bartholomew's Hospital, and London Editor of the British Pharmacopœia; assisted by ROBERT BENTLEY, M.R.C.S., Professor of Materia Medica and Botany to the Pharmaceutical Society of Great Britain; and by ROBERT WARINGTON, F.R.S., Chemical Operator to the Society of Apothecaries. With numerous additions and references to the United States Pharmacopœia, by HORATIO C. WOOD, M.D., Professor of Botany in the University of Pennsylvania. In one large and handsome octavo volume of 1040 closely printed pages, with 236 illustrations, extra cloth, $7 00; leather, raised bands, $8 00. (*Now Ready.*)

The task of the American editor has evidently been no sinecure, for not only has he given to us all that is contained in the abridgment useful for our purposes, but by a careful and judicious embodiment of over a hundred new remedies has increased the size of the former work fully one-third, besides adding many new illustrations, some of which are original. We unhesitatingly say that by so doing he has proportionately increased the value, not only of the condensed edition, but has extended the applicability of the great original, and has placed his medical countrymen under lasting obligations to him. The American physician now has all that is needed in the shape of a complete treatise on materia medica, and the medical student has a text-book which, for practical utility and intrinsic worth, stands unparalleled. Although of considerable size, it is none too large for the purposes for which it has been intended, and every medical man should, in justice to himself, spare a place for it upon his book-shelf, resting assured that the more he consults it the better he will be satisfied of its excellence.—*N. Y. Med. Record*, Nov. 15, 1866.

It will fill a place which no other work can occupy in the library of the physician, student, and apothecary.—*Boston Med. and Surg. Journal*, Nov. 8, 1866.

We have here presented, in a volume of a thousand pages, that which we sincerely believe the best work on materia medica in the English language. No physician, no medical student, can purchase this book, and make anything like a proper use of it, without being amply rewarded for his outlay.—*The Cincinnati Journal of Medicine*, November, 1866.

The American editor can very justly say, then, that "his office has been no sinecure." The result, however, of the labors of the different gentlemen engaged on the work has been to give us a compendium that is admirably adapted for the wants and necessities of the student. We willingly concede to the American editor that we have rarely examined a work that, on the whole, is more carefully and laboriously edited than this; or, we may add, that is more improved in the process of editing.—*New York Medical Journal*, December, 1866.

Of the many works on Materia Medica which have appeared since the issuing of the British Pharmacopœia, none will be more acceptable to the student and practitioner than the present. Pereira's Materia Medica had long ago asserted for itself the position of being the most complete work on the subject in the English language. But its very completeness stood in the way of its success. Except in the way of reference, or to those who made a special study of Materia Medica, Dr. Pereira's work was too full, and its perusal required an amount of time which few had at their disposal. Dr. Farre has very judiciously availed himself of the opportunity of the publication of the new Pharmacopœia, by bringing out an abridged edition of the great work. This edition of Pereira is by no means a mere abridged re-issue, but contains many improvements, both in the descriptive and therapeutical departments. We can recommend it as a very excellent and reliable text-book.—*Edinburgh Med. Journal*, February, 1866.

Dr. Farre has conferred on both students and practitioners a real boon in presenting in a comprehensive form, and within the limits of a moderate octavo volume, the more important and more practical portions of his predecessor's great work. That Dr. Farre has spared no endeavor to perform his task in every department, in the most perfect manner, may be already inferred from the fact of his having associated with himself in the work, the two distinguished gentlemen whose names appear with his own upon the title-page.—*Dublin Quarterly Journal*, May, 1866.

With their able co-operation he has succeeded not only in reducing Dr. Pereira's work to a convenient size, but in producing a very reliable and instructive work on the authorized British Materia Medica.—*British Medical Journal*, December 2, 1865.

Only 592 pages, while Pereira's original volumes included 2000, and yet the results of many years' additional research in pharmacology and therapeutics are embodied in the new edition. Unquestionably Dr. Farre has conferred a great benefit upon medical students and practitioners. And in both respects we think he has acted very judiciously. And the work is now condensed—brought fully into accordance with the pharmacological opinions in vogue, and can be used with great advantage as a handbook for examinations.—*The Lancet*, December, 1865.

CARSON (*JOSEPH*), *M.D.*,

Professor of Materia Medica and Pharmacy in the University of Pennsylvania, &c.

SYNOPSIS OF THE COURSE OF LECTURES ON MATERIA MEDICA AND PHARMACY, delivered in the University of Pennsylvania. With three Lectures on the Modus Operandi of Medicines. Third edition, revised. In one handsome octavo volume. $2 50.

ROYLE'S MATERIA MEDICA AND THERAPEUTICS; including the Preparations of the Pharmacopœias of London, Edinburgh, Dublin, and of the United States. With many new medicines. Edited by JOSEPH CARSON, M.D. With ninety-eight illustrations. In one large octavo volume of about 700 pages, extra cloth. $3 00.

CHRISTISON'S DISPENSATORY; OR, COMMENTARY on the Pharmacopœias of Great Britain and the United States; comprising the Natural History, Description, Chemistry, Pharmacy, Actions, Uses, and Doses of the Articles of the Materia Medica. Second edition, revised and improved, with a Supplement containing the most important New Remedies. With copious additions, and two hundred and thirteen large wood-engravings. By R. EGLESFELD GRIFFITH, M.D. In one very handsome octavo volume of over 1000 pages, extra cloth. $4 00.

CARPENTER'S PRIZE ESSAY ON THE USE OF ALCOHOLIC LIQUORS IN HEALTH AND DISEASE. New edition, with a Preface by D. F. CONDIE, M.D., and explanations of scientific words. In one neat 12mo. volume, pp. 178, extra cloth. 60 cents.

BEALE ON THE LAWS OF HEALTH IN RELATION TO MIND AND BODY. In one vol. royal 12mo., extra cloth. pp. 296. 80 cents.

DE JONGH ON THE THREE KINDS OF COD-LIVER OIL, with their Chemical and Therapeutic Properties. 1 vol. 12mo., cloth. 75 cents.

MAYNE'S DISPENSATORY AND THERAPEUTICAL REMEMBRANCER. With every Practical Formula contained in the three British Pharmacopœias. Edited, with the addition of the Formulæ of the U. S. Pharmacopœia, by R. E. GRIFFITH, M.D. In one 12mo. volume, 300 pp., extra cloth. 75 cents.

GROSS (*SAMUEL D.*), *M. D.*,

Professor of Surgery in the Jefferson Medical College of Philadelphia.

ELEMENTS OF PATHOLOGICAL ANATOMY. Third edition,

thoroughly revised and greatly improved. In one large and very handsome octavo volume of nearly 800 pages, with about three hundred and fifty beautiful illustrations, of which a large number are from original drawings; extra cloth. $4 00.

The very beautiful execution of this valuable work, and the exceedingly low price at which it is offered, should command for it a place in the library of every practitioner.

To the student of medicine we would say that we know of no work which we can more heartily commend than Gross's Pathological Anatomy.—*Southern Med. and Surg. Journal.*

The volume commends itself to the medical student; it will repay a careful perusal, and should be upon the book-shelf of every American physician.—*Charleston Med. Journal.*

It contains much new matter, and brings down our knowledge of pathology to the latest period.—*London Lancet.*

JONES (*C. HANDFIELD*), *F. R. S.*, *and SIEVEKING* (*ED. H.*), *M. D.*,

Assistant Physicians and Lecturers in St. Mary's Hospital.

A MANUAL OF PATHOLOGICAL ANATOMY. First American

edition, revised. With three hundred and ninety-seven handsome wood engravings. In one large and beautifully printed octavo volume of nearly 750 pages, extra cloth, $3 50.

Our limited space alone restrains us from noticing more at length the various subjects treated of in this interesting work; presenting, as it does, an excellent summary of the existing state of knowledge in relation to pathological anatomy, we cannot too strongly urge upon the student the necessity of a thorough acquaintance with its contents.—*Medical Examiner.*

We have long had need of a hand-book of pathological anatomy which should thoroughly reflect the present state of that science. In the treatise before us this desideratum is supplied. Within the limits of a moderate octavo, we have the outlines of this great department of medical science accurately defined, and the most recent investigations presented in sufficient detail for the student of pathology. We cannot at this time undertake a formal analysis of this treatise, as it would involve a separate and lengthy consideration of nearly every subject discussed; nor would such analysis be advantageous to the medical reader. The work is of such a character that every physician ought to obtain it, both for reference and study.—*N. Y. Journal of Medicine.*

Its importance to the physician cannot be too highly estimated, and we would recommend our readers to add it to their library as soon as they conveniently can.—*Montreal Med. Chronicle.*

ROKITANSKY (*CARL*), *M. D.*,

Curator of the Imperial Pathological Museum, and Professor at the University of Vienna.

A MANUAL OF PATHOLOGICAL ANATOMY. Translated by

W. E. SWAINE, EDWARD SIEVEKING, C. H. MOORE, and G. E. DAY. Four volumes octavo, bound in two, of about 1200 pages, extra cloth. $7 50.

GLUGE'S ATLAS OF PATHOLOGICAL HISTOLOGY. Translated, with Notes and Additions, by JOSEPH LEIDY, M. D. In one volume, very large imperial quarto, with 320 copper-plate figures, plain and colored, extra cloth. $4 00.

SIMON'S GENERAL PATHOLOGY, as conducive to the Establishment of Rational Principles for the Prevention and Cure of Disease. In one octavo volume of 212 pages, extra cloth. $1 25.

WILLIAMS (*CHARLES J. B.*), *M. D.*,

Professor of Clinical Medicine in University College, London.

PRINCIPLES OF MEDICINE. An Elementary View of the Causes,

Nature, Treatment, Diagnosis, and Prognosis of Disease; with brief remarks on Hygienics, or the preservation of health. A new American, from the third and revised London edition. In one octavo volume of about 500 pages, extra cloth. $3 50.

The unequivocal favor with which this work has been received by the profession, both in Europe and America, is one among the many gratifying evidences which might be adduced as going to show that there is a steady progress taking place in the science as well as in the art of medicine.—*St. Louis Med. and Surg. Journal.*

No work has ever achieved or maintained a more deserved reputation.—*Virginia Med. and Surg. Journal.*

One of the best works on the subject of which it treats in our language.

It has already commended itself to the high regard of the profession; and we may well say that we know of no single volume that will afford the source of so thorough a drilling in the principles of practice as this. Students and practitioners should make themselves intimately familiar with its teachings—they will find their labor and study most amply repaid.—*Cincinnati Med. Observer.*

There is no work in medical literature which can fill the place of this one. It is the *Primer* of the young practitioner, the *Koran* of the scientific one.—*Stethoscope.*

A text-book to which no other in our language is comparable.—*Charleston Med. Journal.*

The lengthened analysis we have given of Dr. Williams's Principles of Medicine will, we trust, clearly prove to our readers his perfect competency for the task he has undertaken—that of imparting to the student, as well as to the more experienced practitioner, a knowledge of those general principles of pathology on which alone a correct practice can be founded. The absolute necessity of such a work must be evident to all who pretend to more than mere empiricism. We must conclude by again expressing our high sense of the immense benefit which Dr. Williams has conferred on medicine by the publication of this work. We are certain that in the present state of our knowledge his Principles of Medicine could not possibly be surpassed. While we regret the loss which many of the rising generation of practitioners have sustained by his resignation o the Chair at University College, it is comforting to feel that his writings must long continue to exert a powerful influence on the practice of that profession for the improvement of which he has so assiduously and successfully labored, and in which he holds so distinguished a position.—*London Jour. of Medicine*

FLINT (AUSTIN), M. D.,

Professor of the Principles and Practice of Medicine in Bellevue Med. College, N. Y.

A TREATISE ON THE PRINCIPLES AND PRACTICE OF MEDICINE;

designed for the use of Students and Practitioners of Medicine. Second edition, revised and enlarged. In one large and closely printed octavo volume of nearly 1000 pages; handsome extra cloth, $6 50; or strongly bound in leather, with raised bands, $7 50. (*Now Ready.*)

From the Preface to the Second Edition.

Four months after the publication of this treatise, the author was notified that a second edition was called for. The speedy exhaustion of the first edition, unexpected in view of its large size, naturally intensified the desire to make the work still more acceptable to practitioners and students of Medicine; and, notwithstanding the brief period allowed for a revision, additions have been made which, it is believed, will enhance the practical utility of the volume. The portion treating of Pyæmia has been rewritten; three affections, omitted in the first edition, have been introduced, viz., Pertussis, General Cerebral Paralysis, and Polyuria; Epidemic Cholera has been considered at greater length; the thermometric phenomena of disease have received fuller consideration, and, in connection with many affections, there has been added new matter, much of which relates to special therapeutics.

We consider the book, in all its essentials, as the best adapted to the student of any of our numerous text-books on this subject.—*N. Y. Medical Journal*, Jan. 1867.

Its terse conciseness fully redeems it from being ranked among heavy and common-place works, while the unmistakable way in which Dr. Flint gives his own views is quite refreshing, and far from common. It is a book of enormous research; the writer is evidently a man of observation and large experience; his views are practically sound and theoretically moderate, and we have no hesitation in commending his *magnum opus* to our readers.—*Dublin Medical Press and Circular*, May 16, 1866.

We are happy to think that this object is very successfully attained in the work before us. Solid, compact, yet clear, it adequately represents the present condition of practical medicine as it could be done only by a physician who unites to scientific culture a large and well-digested experience in the clinical study of medicine.—*Am. Journal Medical Sciences*, July, 1866.

In the plan of the work and the treatment of individual subjects there is a freshness and an originality which make it worthy of the study of practitioners as well as students. It is, indeed, an admirable book, and highly creditable to American medicine. For clearness and conciseness in style, for careful reasoning upon what is known, for lucid distinction between what we know and what we do not know, between what nature does in disease and what the physician can do and should, for richness in good clinical observation, for independence of statement and opinion on great points of practice, and for general sagacity and good judgment, the work is most meritorious. It is singularly rich in good qualities, and free from faults.—*London Lancet*, June 23, 1866.

We have no hesitation in expressing a favorable opinion of it.—*London Medical Times and Gazette*, June 23, 1866.

For terseness, simplicity and distinctness of style, comprehensiveness of scope, and cool, impartial and well-balanced judgment in the examination of disputed questions, it has no superior—we are tempted to say, no equal. Its sentences are brief—shorter than those of any medical book we know of, and you get their meaning at a glance. Every sentence gives you a distinct idea.—*Pacific Medical and Surgical Journal*, June, 1866.

A book of inestimable value, as the recorded experience of one of the clearest and best educated minds ever devoted to the theory and practice of medicine. Dr. Flint's THEORY AND PRACTICE OF MEDICINE will be eagerly perused by all our readers—will be regarded as the BIBLE of practical medicine.—*Buffalo Med. and Surg. Journal*, May, 1866.

In following out such a plan Dr. Flint has succeeded most admirably, and gives to his readers a work that is not only very readable, interesting, and concise, but in every respect calculated to meet the requirements of professional men of every class. The student has presented to him, in the plainest possible manner, the symptoms of disease, the principles which should guide him in its treatment, and the difficulties which have to be surmounted in order to arrive at a correct diagnosis. The practitioner, besides having such aids, has offered to him the conclusion which the experience of the professor has enabled him to arrive at in reference to the relative merits of different therapeutical agents, and different methods of treatment. This new work, as a whole, will add not a little to the well-earned reputation of Prof. Flint as a medical writer and teacher. The number of years in which he has been engaged in the active duties of his profession, both in public and private life, have given him an amount of experience which has eminently fitted him for the production of a work which must necessarily extend over such a wide range of subjects. We cannot see how it can fail to meet with universal favor.—*N. Y. Med. Record*, April 2, 1866.

The Practice of Medicine of Prof. Flint is, undoubtedly, a most excellent work, and is much better suited to the special needs of the American student and practitioner than any other accessible to them. We predict for the book a very great, and, as we believe, well deserved popularity.—*Cincinnati Journal of Medicine*, March, 1866.

Contains all that has recently been added to our knowledge of this department of medicine.—*Detroit Review*, April, 1866.

DUNGLISON, FORBES, TWEEDIE, AND CONOLLY.

THE CYCLOPÆDIA OF PRACTICAL MEDICINE:

comprising Treatises on the Nature and Treatment of Diseases, Materia Medica and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &c. &c. In four large super-royal octavo volumes, of 3254 double-columned pages, strongly and handsomely bound. $15.

*** This work contains no less than four hundred and eighteen distinct treatises, contributed by sixty-eight distinguished physicians.

The most complete work on practical medicine extant, or at least in our language.—*Buffalo Medical and Surgical Journal.*

For reference, it is above all price to every practitioner.—*Western Lancet.*

One of the most valuable medical publications of the day. As a work of reference it is invaluable.—*Western Journal of Medicine and Surgery.*

It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English medicine is exhibited in the most advantageous light.—*Medical Examiner.*

BARLOW (GEORGE H.), M. D.

A MANUAL OF THE PRACTICE OF MEDICINE.

With Additions by D. F. CONDIE, M.D., author of "A Practical Treatise on Diseases of Children," &c. In one handsome octavo volume of over 600 pages, extra cloth. $2 50.

WATSON (THOMAS), M. D., &c.

LECTURES ON THE PRINCIPLES AND PRACTICE OF PHYSIC.

Delivered at King's College, London. A new American, from the last revised and enlarged English edition, with Additions, by D. FRANCIS CONDIE, M. D., author of "A Practical Treatise on the Diseases of Children," &c. With one hundred and eighty-five illustrations on wood. In one very large and handsome volume, imperial octavo, of over 1200 closely printed pages in small type; extra cloth, $6 50; strongly bound in leather, with raised bands, $7 50.

Believing this to be a work which should lie on the table of every physician, and be in the hands of every student, every effort has been made to condense the vast amount of matter which it contains within a convenient compass, and at a very reasonable price, to place it within reach of all. In its present enlarged form, the work contains the matter of at least three ordinary octavos, rendering it one of the cheapest works now offered to the American profession, while its mechanical execution makes it an exceedingly attractive volume.

Confessedly, by the concurrent opinions of the highest critical authorities both of Great Britain and this country, the best compend of the principles and practice of physic that has yet appeared.—*Am. Jour. of the Med. Sciences.*

Commendation of these lectures would be only reiterating the often recorded opinion of the profession. By universal consent the work ranks among the very best text-books in our language.—*Ill. and Ind. Med. and Surg. Journal.*

It stands now confessedly in the first rank of the publications relating to the practice of medicine.—*Western Journal of Med. and Surg.*

Dr. WATSON'S Lectures may, without exaggeration, be styled a *mirror* of the practice of medicine.—*Cincinnati Lancet.*

We cannot speak too highly of this truly classical work on the practice of medicine. Take it all in all, it is the very best of books of its kind; equalled by none in beauty and elegance of diction, and not surpassed in the completeness and comprehensiveness of its contents. It will be an indispensable guide to the student in the acquirement of his profession, and no less worthy of frequent consultation and reference by the most enlightened practitioner.—*Chicago Med. Journal.*

Dr. WATSON'S Lectures have been so long known and celebrated for their rare combination of intrinsic excellence and attractive style, that we need say no more of this edition than that it is the *best* work on the subject in the English language, for the general purposes both of students and of practitioners—all of whom we advise to possess themselves of a copy, if they are not already so fortunate as to have one.—*Boston Medical and Surgical Journal.*

Young men will find in the work before us the councils of wisdom, and the old men the words of comfort. Few men have succeeded so well as Dr. WATSON in throwing together science and common sense in the treatment of disease.—*Ohio Med. Journ.*

No practitioner should be without the new edition.—*N. O. Med. News.*

This work is now truly a cyclopædia of practical medicine.—*New York Journal of Medicine.*

DICKSON (SAMUEL H.), M. D.,

Professor of Practice of Medicine in Jefferson Medical College, Philadelphia.

ELEMENTS OF MEDICINE; a Compendious View of Pathology and Therapeutics, or the History and Treatment of Diseases.

Second edition, revised. In one large and handsome octavo volume, of 750 pages, extra cloth. $4 00.

BARCLAY (A. W.), M. D.

A MANUAL OF MEDICAL DIAGNOSIS; being an Analysis of the Signs and Symptoms of Disease.

Third American from the second and revised London edition. In one neat octavo volume of 451 pages, extra cloth. $3 50.

A work of immense practical utility.—*London Med. Times and Gazette.*

The book should be in the hands of every practical man.—*Dublin Med. Press.*

HARTSHORNE (HENRY), M. D.

ESSENTIALS OF THE PRINCIPLES AND PRACTICE OF MEDICINE.

A handy-book for Students and Practitioners. In one handsome royal 12mo. volume. (*Preparing.*)

LALLEMAND AND WILSON.

A PRACTICAL TREATISE ON THE CAUSES, SYMPTOMS, AND TREATMENT OF SPERMATORRHŒA.

By M. LALLEMAND. Translated and edited by HENRY J. MCDOUGALL. Fifth American edition. To which is added ——— ON DISEASES OF THE VESICULÆ SEMINALES, AND THEIR ASSOCIATED ORGANS. With special reference to the Morbid Secretions of the Prostatic and Urethral Mucous Membrane. By MARRIS WILSON, M.D. In one neat octavo volume, of about 400 pp., extra cloth, $2 75.

LONDON SOCIETY OF MEDICAL OBSERVATION.

WHAT TO OBSERVE AT THE BEDSIDE AND AFTER DEATH IN MEDICAL CASES.

Published under the authority of the London Society for Medical Observation. A new American, from the second and revised London edition. In one very handsome volume, royal 12mo., extra cloth. $1 00.

LAYCOCK'S LECTURES ON THE PRINCIPLES AND METHODS OF MEDICAL OBSERVATION AND RESEARCH. For the use of advanced students and junior practitioners. In one very neat royal 12mo. volume, extra cloth. $1 00.

HOLLAND'S MEDICAL NOTES AND REFLECTIONS. From the third and enlarged English edition. In one handsome octavo volume of about 500 pages, extra cloth. $3 50.

FLINT (*AUSTIN*), *M. D.*,

Professor of the Principles and Practice of Medicine in Bellevue Hospital Med. College, N. Y.

A PRACTICAL TREATISE ON THE PHYSICAL EXPLORATION OF THE CHEST AND THE DIAGNOSIS OF DISEASES AFFECTING THE RESPIRATORY ORGANS. Second and revised edition. In one handsome octavo volume of 595 pages, extra cloth, $4 50. (*Now ready.*)

During the ten years which have elapsed since the preparation of the first edition of this work, much has been added to our knowledge of its subject. The position of the author has been such as to keep him necessarily familiar with every step of progress, and to enable him to test the importance of all investigations. He has revised the work thoroughly, and it may therefore be regarded as entirely on a level with the most advanced condition of its important topic.

The chapter on Phthisis is replete with interest; and his remarks on the diagnosis, especially in the early stages, are remarkable for their acumen and great practical value. Dr. Flint's style is clear and elegant, and the tone of freshness and originality which pervades his whole work lends an additional force to its thoroughly practical character, which cannot fail to obtain for it a place as a standard work on diseases of the respiratory system.—*London Lancet*, Jan. 19, 1867.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON THE DIAGNOSIS, PATHOLOGY, AND TREATMENT OF DISEASES OF THE HEART. In one neat octavo volume of nearly 500 pages, with a plate; extra cloth, $3 50.

We question the fact of any recent American author in our profession being more extensively known, or more deservedly esteemed in this country than Dr. Flint. We willingly acknowledge his success, more particularly in the volume on diseases of the heart, in making an extended personal clinical study available for purposes of illustration, in connection with cases which have been reported by other trustworthy observers. The work of Dr. Flint, which has received this short notice at our hands, in connection with his other volume, whose title we have placed at the head of our observations, may be regarded as constituting a complete guide to the diagnosis of diseases of the chest; and for this purpose we have much pleasure and every confidence in recommending them.—*Brit. and For. Med.-Chir. Review.*

CHAMBERS (*T. K.*), *M. D.*,

Consulting Physician to St. Mary's Hospital, London, &c.

THE INDIGESTIONS; or, Diseases of the Digestive Organs Functionally Treated. In one handsome octavo volume, extra cloth, $2 50. (*Now Ready.*)

As a practical work, illustrated by a large number of cases, and detailing the experience of its distinguished author on so important and intractable a class of diseases, this volume can scarcely fail to command the immediate attention of the profession.

CONTENTS. CHAP. I. Introduction. II. Indigestion of Various Foods. III. Habits of Social Life Leading to Indigestion. IV. Abdominal Pains. V. Vomiting. VI. Flatulence. VII. Diarrhœa. VIII. Constipation and Costiveness. IX. Nervous Diseases Connected with Indigestion—Analysis.

It is in the combination of these qualities—clear and vivid expression, with thorough scientific knowledge and practical skill—that his success as a teacher or literary expositor of the medical art consists; and the volume before us is a better illustration than its author has yet produced of the rare degree in which those combined qualities are at his command. Next to the diseases of children, there is no subject on which the young practitioner is oftener consulted, or on which the public are more apt to form their opinions of his professional skill, than the various phenomena of indigestion. Dr. Chambers comes most opportunely and effectively to his assistance. In fact, there are few situations in which the commencing practitioner can place himself in which Dr. Chambers' conclusions on digestion will not be of service.—*London Lancet*, February 23, 1867.

This elegant volume, by the author of "Lectures, chiefly Clinical," has been our Christmas book, and we found it as interesting as any of the popular annuals which deluge us at that festive season. We hope the author will accept as a well-deserved compliment the remark, "that, after all that has been written upon this subject, we consider it a thorough triumph to have put forth so instructive a volume on indigestion."—*Dublin Medical Press and Circular*, January 23, 1867.

BRINTON (*WILLIAM*), *M. D.*, *F. R. S.*

LECTURES ON THE DISEASES OF THE STOMACH; with an Introduction on its Anatomy and Physiology. From the second and enlarged London edition. With illustrations on wood. In one handsome octavo volume of about 300 pages, extra cloth. $3 25. (*Just issued.*)

Nowhere can be found a more full, accurate, plain, and instructive history of these diseases, or more rational views respecting their pathology and therapeutics.—*Am. Journ. of the Med. Sciences*, April, 1865.

The first edition of this work became, immediately after its publication, a standard authority on the diseases, functional and organic, of the primal organ of the human machine. It is unnecessary here to repeat the praise which we formerly bestowed on the book when it was a debutant, soliciting professional favor.—*Brit. and For. Med.-Chir. Review*, April, 1865.

The most complete work in our language upon the diagnosis and treatment of these puzzling and important diseases.—*Boston Med. and Surg. Journal*, Nov. 1865.

These lectures comprise a brief but condensed and quite perfect account of what is at present known concerning diseases of the stomach. The anatomy, physiology, symptoms, and treatment are so presented as to make the work a very instructive and popular one with practitioners of medicine.—*Buffalo Med. and Surg. Journal*, Dec. 1865.

HABERSHON (*S. O.*), *M. D.*

PATHOLOGICAL AND PRACTICAL OBSERVATIONS ON DISEASES OF THE ALIMENTARY CANAL, ŒSOPHAGUS, STOMACH, CÆCUM, AND INTESTINES. With illustrations on wood. In one handsome octavo volume of 312 pages, extra cloth. $2 50.

BUMSTEAD (FREEMAN J.), M. D.,

Lecturer on Materia Medica and Venereal Diseases at the Col. of Phys. and Surg., New York, &c.

THE PATHOLOGY AND TREATMENT OF VENEREAL DISEASES.

Including the results of recent investigations upon the subject. A new and revised edition, with illustrations. In one large and handsome octavo volume of 640 pages, extra cloth, $5 00. (*Lately Issued.*)

During the short time which has elapsed since the appearance of this work, it has assumed the position of a recognized authority on the subject wherever the language is spoken, and its translation into Italian shows that its reputation is not confined to our own tongue. The singular clearness with which the modern doctrines of venereal diseases are set forth renders it admirably adapted to the student, while the fulness of its practical details and directions as to treatment makes it indispensable to the practitioner. The few notices subjoined will show the very high position universally accorded to it by the medical press of both hemispheres.

Well known as one of the best authorities of the present day on the subject.—*British and For. Med.-Chirurg. Review*, April, 1866.

A regular store-house of special information.—*London Lancet*, Feb. 24, 1866.

A remarkably clear and full systematic treatise on the whole subject.—*Lond. Med. Times and Gazette.*

The best, completest, fullest monograph on this subject in our language.—*British American Journal.*

Indispensable in a medical library.—*Pacific Med. and Surg. Journal.*

We have no doubt that it will supersede in America every other treatise on Venereal.—*San Francisco Med. Press*, Oct. 1864.

A perfect compilation of all that is worth knowing on venereal diseases in general. It fills up a gap which has long been felt in English medical literature.—*Brit. and Foreign Med.-Chirurg. Review*, Jan., '65.

We have not met with any which so highly merits our approval and praise as the second edition of Dr. Bumstead's work.—*Glasgow Med. Journal*, Oct. 1864.

We know of no treatise in any language which is its equal in point of completeness and practical simplicity.—*Boston Medical and Surgical Journal*, Jan. 30, 1864.

The book is one which every practitioner should have in his possession, and, we may further say, the *only* book upon the subject which he should acknowledge as competent authority.—*Buffalo Medical and Surgical Journal*, July, 1864.

The best work with which we are acquainted, and the most convenient hand-book for the busy practitioner.—*Cincinnati Lancet*, July, 1864.

The author has spared no labor to make this edition worthy of the reputation acquired by the last, and we believe that no improvement or suggestion worthy of notice, recorded since the last edition was published, has been left unnoticed.—*Dublin Quarterly Journal of Medical Science*, August, 1864.

BLAKISTON ON CERTAIN DISEASES OF THE CHEST. In one volume octavo. $1 25.

BUCKLER ON FIBRO-BRONCHITIS AND RHEUMATIC PNEUMONIA. In one octavo vol., extra cloth, pp. 150. $1 25.

TODD'S CLINICAL LECTURES ON CERTAIN ACUTE DISEASES. In one neat octavo volume, of 320 pages, extra cloth. $2 50.

ROBERTS (WILLIAM), M. D.,
Lecturer on Medicine in the Manchester School of Medicine, &c.

A PRACTICAL TREATISE ON URINARY AND RENAL DISEASES, including Urinary Deposits. Illustrated by numerous cases and engravings. In one very handsome octavo volume of 516 pp., extra cloth. $4 50. (*Now Ready.*)

The want has for some time been felt of a work which should render accessible to the American profession in a compendious and convenient form, the results of the numerous and important researches which have of late years elucidated the pathology of Urinary and Renal Diseases. It has been the aim of the author in the present volume to set forth in a form divested of undue technicality, the practical condition of the subject in its most advanced stage of progress. In endeavoring to accomplish this, he has refrained from crowding the volume with minute chemical and physiological details, which would unfit it for its object of affording to the physician a guide in his daily practice, and to the student a condensed and intelligible compendium of all that is practically important on the subject. To aid in this, numerous cases and illustrations have been introduced throughout the work.

In carrying out this design, he has not only made good use of his own practical knowledge, but has brought together from various sources a vast amount of information, some of which is not generally possessed by the profession in this country. We must now bring our notice of this book to a close, regretting only that we are obliged to resist the temptation of giving further extracts from it. Dr. Roberts has already on several occasions placed before the profession the results of researches made by him on various points connected with the urine, and had thus led us to expect from him something good—in which expectation we have been by no means disappointed. The book is, beyond question, the most comprehensive work on urinary and renal diseases, considered in their strictly practical aspect, that we possess in the English language.—*British Medical Journal*, Dec. 9, 1865.

We have read this book with much satisfaction. It will take its place beside the best treatises in our language upon urinary pathology and therapeutics. Not the least of its merits is that the author, unlike some other book-makers, is contented to withhold much that he is well qualified to discuss in order to impart to his volume such a strictly practical character as cannot fail to render it popular among British readers.—*London Med. Times and Gazette*, March 17, 1866.

*** "Bird on Urinary Deposits," being for the present out of print, gentlemen will find in the above work a trustworthy substitute.

BUCKNILL (J. C.), M.D., *Med. Superintendent of the Devon Lunatic Asylum,* and *DANIEL H. TUKE, M.D.,* *Visiting Medical Officer to the York Retreat.*

A MANUAL OF PSYCHOLOGICAL MEDICINE; containing the History, Nosology, Description, Statistics, Diagnosis, Pathology, and Treatment of Insanity. With a Plate. In one handsome octavo volume, of 536 pages, extra cloth. $4 25.

A work alike characterized by great classical elegance and a careful and judicious discrimination on the diagnosis, pathology and treatment of this dreadful malady.—*Va. Med. and Surg. Journal.*

We do not know where anything can be found in the literature of the specialty to compare with these essays, in complete and logical treatment, and the clear, practical manner in which their subjects are discussed. They will be cited as authority wherever the language is used, and will, no doubt, be extensively translated.—*Amer. Journal of Insanity.*

HARRISON'S ESSAY TOWARDS A CORRECT THEORY OF THE NERVOUS SYSTEM. In one octavo volume of 292 pp. $1 50.

SOLLY ON THE HUMAN BRAIN; its Structure, Physiology, and Diseases. From the Second and much enlarged London edition. In one octavo volume of 500 pages, with 120 wood-cuts; extra cloth. $2 50.

SMITH (EDWARD), M.D.

CONSUMPTION; ITS EARLY AND REMEDIABLE STAGES. In one neat octavo volume of 254 pages, extra cloth. $2 25.

SALTER (H. H.), M.D.

ASTHMA; its Pathology, Causes, Consequences, and Treatment. In one volume, octavo, extra cloth. $2 50.

SLADE (D. D.), M.D.

DIPHTHERIA; its Nature and Treatment, with an account of the History of its Prevalence in various Countries. Second and revised edition. In one neat royal 12mo. volume, extra cloth. $1 25. (*Just issued.*)

JONES (C. HANDFIELD), M. D.,
Physician to St. Mary's Hospital, &c.

CLINICAL OBSERVATIONS ON FUNCTIONAL NERVOUS DISORDERS. In one handsome octavo volume of 348 pages, extra cloth, $3 25. (*Now Ready.*)

The wide scope of the treatise, and its practical character, as illustrated by the large number of cases reported in detail by the author, can hardly fail to render it exceedingly valuable to the profession.

WILSON (*ERASMUS*), *F.R.S.*,

ON DISEASES OF THE SKIN. The sixth American, from the fifth and enlarged English edition. In one large octavo volume of nearly 700 pages, extra cloth. $4 50. Also—

A SERIES OF PLATES ILLUSTRATING "WILSON ON DISEASES OF THE SKIN;" consisting of twenty beautifully executed plates, of which thirteen are exquisitely colored, presenting the Normal Anatomy and Pathology of the Skin, and embracing accurate representations of about one hundred varieties of disease, most of them the size of nature. Price, in extra cloth, $5 50.

Also, the Text and Plates, bound in one handsome volume, extra cloth. Price $9 50.

This classical work has for twenty years occupied the position of the leading authority on cutaneous diseases in the English language, and the industry of the author keeps it on a level with the advance of science, in the frequent revisions which it receives at his hands. The large size of the volume enables him to enter thoroughly into detail on all the subjects embraced in it, while its very moderate price places it within the reach of every one interested in this department of practice.

Such a work as the one before us is a most capital and acceptable help. Mr. Wilson has long been held as high authority in this department of medicine, and his book on diseases of the skin has long been regarded as one of the best text-books extant on the subject. The present edition is carefully prepared, and brought up in its revision to the present time. In this edition we have also included the beautiful series of plates illustrative of the text, and in the last edition published separately. There are twenty of these plates, nearly all of them colored to nature, and exhibiting with great fidelity the various groups of diseases treated of in the body of the work.—*Cincinnati Lancet*, June, 1863.

No one treating skin diseases should be without a copy of this standard work.—*Canada Lancet*. August, 1863.

We can safely recommend it to the profession as the best work on the subject now in existence in the English language.—*Medical Times and Gazette.*

Mr. Wilson's volume is an excellent digest of the actual amount of knowledge of cutaneous diseases; it includes almost every fact or opinion of importance connected with the anatomy and pathology of the skin.—*British and Foreign Medical Review.*

These plates are very accurate, and are executed with an elegance and taste which are highly creditable to the artistic skill of the American artist who executed them.—*St. Louis Med. Journal.*

The drawings are very perfect, and the finish and coloring artistic and correct; the volume is an indispensable companion to the book it illustrates and completes.—*Charleston Medical Journal.*

BY THE SAME AUTHOR.

THE STUDENT'S BOOK OF CUTANEOUS MEDICINE and DISEASES OF THE SKIN. In one very handsome royal 12mo. volume. $3 50. (*Now Ready.*)

This new class-book will be admirably adapted to the necessities of students.—*Lancet.*

Thoroughly practical in the best sense.—*Brit. Med. Journal.*

BY THE SAME AUTHOR.

HEALTHY SKIN; a Popular Treatise on the Skin and Hair, their Preservation and Management. One vol. 12mo., pp. 291, with illustrations, cloth. $1 00

NELIGAN (*J. MOORE*), *M.D., M.R.I.A.*,

A PRACTICAL TREATISE ON DISEASES OF THE SKIN. Fifth American, from the second and enlarged Dublin edition by T. W. Belcher, M.D. In one neat royal 12mo. volume of 462 pages, extra cloth. $2 25. (*Now Ready.*)

BY THE SAME AUTHOR.

ATLAS OF CUTANEOUS DISEASES. In one beautiful quarto volume, with exquisitely colored plates, &c., presenting about one hundred varieties of disease. Extra cloth, $5 50.

The diagnosis of eruptive disease, however, under all circumstances, is very difficult. Nevertheless, Dr. Neligan has certainly, "as far as possible," given a faithful and accurate representation of this class of diseases, and there can be no doubt that these plates will be of great use to the student and practitioner in drawing a diagnosis as to the class, order, and species to which the particular case may belong. While looking over the "Atlas" we have been induced to examine also the "Practical Treatise," and we are inclined to consider it a very superior work, combining accurate verbal description with sound views of the pathology and treatment of eruptive diseases. It possesses the merit of giving short and condensed descriptions, avoiding the tedious minuteness of many writers, while at the same time the work, as its title implies, is strictly practical.—*Glasgow Med. Journal.*

A compend which will very much aid the practitioner in this difficult branch of diagnosis. Taken with the beautiful plates of the Atlas, which are remarkable for their accuracy and beauty of coloring, it constitutes a very valuable addition to the library of a practical man.—*Buffalo Med. Journal.*

HILLIER (*THOMAS*), *M.D.*,

Physician to the Skin Department of University College Hospital, &c.

HAND-BOOK OF SKIN DISEASES, for Students and Practitioners. In one neat royal 12mo. volume of about 300 pages, with two plates; extra cloth, $2 25. (*Just Issued.*)

The work of Dr. Hillier will unquestionably serve the student as a useful and faithful guide to the acquirement of a knowledge of skin diseases. The treatment laid down by the author is simple, rational, and in accordance with the results of an extended experience. Dr. H. avoids all unnecessary multiplication of remedies, and rejects all of doubtful value.—*Am. Journal Med. Sciences*, July, 1865.

A text-book well adapted to the student, and the information contained in it shows the author to be *au niveau* with the scientific medicine of the day.—*London Lancet*, Feb. 25, 1865.

In the 350 pages, the practitioner will find scattered a great deal of very valuable information not to be met with in more pretentious and extensive works.—*Med. and Surg. Review* (*Australasian*), Oct. 1, 1865.

WEST (*CHARLES*), *M. D.*,

Physician to the Hospital for Sick Children, &c.

LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.

Fourth American from the fifth revised and enlarged English edition. In one large and handsome octavo volume of 656 closely-printed pages. Extra cloth, $4 50; leather, $5 50. (*Just issued.*)

This work may now fairly claim the position of a standard authority and medical classic. Five editions in England, four in America, four in Germany, and translations in French, Danish, Dutch, and Russian, show how fully it has met the wants of the profession by the soundness of its views and the clearness with which they are presented. Few practitioners, indeed, have had the opportunities of observation and experience enjoyed by the Author. In his Preface he remarks, "The present edition embodies the results of 1200 recorded cases and of nearly 400 post-mortem examinations, collected from between 30,000 and 40,000 children, who, during the past twenty-six years, have come under my care, either in public or in private practice." The universal favor with which the work has been received shows that the author has made good use of these unusual advantages.

Of all the English writers on the diseases of children, there is no one so entirely satisfactory to us as Dr. West. For years we have held his opinion as judicial, and have regarded him as one of the highest living authorities in the difficult department of medical science in which he is most widely known. His writings are characterized by a sound, practical common sense, at the same time that they bear the marks of the most laborious study and investigation. We commend it to all as a most reliable adviser on many occasions when many treatises on the same subjects will utterly fail to help us. It is supplied with a very copious general index, and a special index to the formulæ scattered throughout the work.—*Boston Med. and Surg. Journal*, April 26, 1866.

Dr. West's volume is, in our opinion, incomparably the best authority upon the maladies of children that the practitioner can consult. Withal, too—a minor matter, truly, but still not one that should be neglected—Dr. West's composition possesses a peculiar charm, beauty and clearness of expression, thus affording the reader much pleasure, even independent of that which arises from the acquisition of valuable truths.—*Cincinnati Jour. of Medicine*, March, 1866.

We have long regarded it as the most scientific and practical book on diseases of children which has yet appeared in this country.—*Buffalo Medical Journal.*

Dr. West's book is the best that has ever been written in the English language on the diseases of infancy and childhood.—*Columbus Review of Med. and Surgery.*

To occupy in medical literature, in regard to diseases of children the enviable position which Dr. Watson's treatise does on the diseases of adults is now very generally assigned to our author, and his book is in the hands of the profession everywhere as an original work of great value.—*Md. and Va. Med. and Surg. Journal.*

Dr. West's works need no recommendation at this date from any hands. The volume before us, especially, has won for itself a large and well-deserved popularity among the profession, wherever the English tongue is spoken. Many years will elapse before it will be replaced in public estimation by any similar treatise, and seldom again will the same subject be discussed in a clearer, more vigorous, or pleasing style, with equal simplicity and power.—*Charleston Med. Jour. and Review.*

There is no part of the volume, no subject on which it treats which does not exhibit the keen perception, the clear judgment, and the sound reasoning of the author. It will be found a most useful guide to the young practitioner, directing him in his management of children's diseases in the clearest possible manner, and enlightening him on many a dubious pathological point, while the older one will find in it many a suggestion and practical hint of great value.—*Brit. Am. Med. Journal.*

CONDIE (*D. FRANCIS*), *M. D.*

A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN.

Fifth edition, revised and augmented. In one large octavo volume of over 750 closely-printed pages, extra cloth. $4 50.

Dr. Condie's scholarship, acumen, industry, and practical sense are manifested in this, as in all his numerous contributions to science.—*Dr. Holmes's Report to the American Medical Association.*

Taken as a whole, in our judgment, Dr. Condie's treatise is the one from the perusal of which the practitioner in this country will rise with the greatest satisfaction.—*Western Journal of Medicine and Surgery.*

We pronounced the first edition to be the best work on the diseases of children in the English language, and, notwithstanding all that has been published, we still regard it in that light.—*Medical Examiner.*

The value of works by native authors on the diseases which the physician is called upon to combat will be appreciated by all, and the work of Dr. Condie has gained for itself the character of a safe guide for students, and a useful work for consultation by those engaged in practice.—*N. Y. Med. Times.*

CHURCHILL (*FLEETWOOD*), *M.D., M.R.I.A.*,

Prof. of Midwifery and Diseases of Women and Children in the Dublin College of Physicians.

ON THE DISEASES OF INFANTS AND CHILDREN.

Second American edition, revised and enlarged by the author. Edited, with Notes, by W. V. KEATING, M. D. In one large and handsome volume of over 700 pages, extra cloth. $4 50.

DEWEES (*WILLIAM P.*), *M. D.*,

Late Professor of Midwifery, &c., in the University of Pennsylvania, &c.

A TREATISE ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN.

Eleventh edition, with the author's last improvements and corrections. In one octavo volume of 548 pages. $2 80.

MEIGS (*CHARLES D.*), *M. D.*,

Late Professor of Obstetrics, &c. in Jefferson Medical College, Philadelphia.

WOMAN: HER DISEASES AND THEIR REMEDIES. A Series of Lectures to his Class. Fourth and Improved edition. In one large and beautifully printed octavo volume of over 700 pages, extra cloth, $5 00; leather, $6 00.

That this work has been thoroughly appreciated by the profession of this country as well as of Europe, is fully attested by the fact of its having reached its fourth edition in a period of less than twelve years. Its value has been much enhanced by many important additions, and it contains a fund of useful information, conveyed in an easy and delightful style. Every topic discussed by the author is rendered so plain as to be readily understood by every student: and, for our own part, we consider it not only one of the most readable of books, but one of priceless value to the practitioner engaged in the practice of those diseases peculiar to females.—*N. Am. Med.-Chir. Review.*

We read the book and find him more—an original thinker, an eloquent expounder, and a thorough practitioner. The book is but twelve years old, but it has been so much appreciated by the profession that edition after edition has been demanded, and now the fourth is on the table by us. We recommend with great pleasnre a much improved edition of a work in which we saw little room for improvement.—*Nashville Medical Journal.*

We greet this new edition of Dr. MEIGS' work on woman with much pleasnre, and commend it to the profession, especially to the younger members, who may receive much valuable instruction from its pages, conveyed in a pleasing style. The teaching throughout the work reflects the highest credit upon the head and heart of the author.—*Chicago Medical Journal.*

The rules of the art here described, the obstetrical opinions here expressed, the general directions and advice given and suggested, are, beyond any cavil, unexceptionably sagacious and prudent. They are founded on a large practice, have been tested by a long experience, and come from lips to whose teaching thousands have listened for many years, and never without profit.—*Charleston Med. Journal and Review.*

BY THE SAME AUTHOR.

ON THE NATURE, SIGNS, AND TREATMENT OF CHILDBED FEVER. In a Series of Letters addressed to the Students of his Class. In one handsome octavo volume of 365 pages, extra cloth. $2 00.

CHURCHILL (*FLEETWOOD*), *M. D., M. R. I. A.*

ON THE DISEASES OF WOMEN; including those of Pregnancy and Childbed. A new American edition, revised by the Author. With Notes and Additions, by D. FRANCIS CONDIE, M. D., author of "A Practical Treatise on the Diseases of Children." With numerous illustrations. In one large and handsome octavo volume of 768 pages, extra cloth, $4 00; leather, $5 00.

From the Author's Preface.

In reviewing this edition, at the request of my American publishers, I have inserted several new sections and chapters, and I have added, I believe, all the information we have derived from recent researches; in addition to which the publishers have been fortunate enough to secure the services of an able and highly esteemed editor in Dr. Condie.

As an epitome of all that is known in this department of medicine, the book before us is perhaps the fullest and most valuable in the English language. —*Dublin Medical Press.*

It was left for Dr CHURCHILL to gather the scattered facts from their various sources, and reduce them to a general system. This he has done with a masterly hand in the volume now before us; in which, to the results of his own extensive observation, he has added the views of all British and foreign writers of any note; thus giving us in a complete form, all that is known upon this subject at the present day. To Dr. CHURCHILL, then, are the profession deeply indebted for supplying them with so great a desideratum—the achievement of which deservedly entitles his name, already intimately associated with the diseases of women, to rank very high as an authority upon this subject. We would briefly characterize it as one of the most useful which has issued from the press for many years. To all it bears its own recommendation; and will be found to be invaluable to the student as a text-book, no less than as a compendious work of reference to the qualified practitioner.—*Glasgow Med. Journal.*

BY THE SAME AUTHOR.

ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN. Selected from the writings of British Authors previous to the close of the Eighteenth Century. In one neat octavo volume of about 450 pages, extra cloth. $2 50.

THOMAS (*T. GAILLARD*), *M. D.*,

Professor of Obstetrics, &c. in the College of Physicians and Surgeons, N. Y., &c.

A COMPLETE PRACTICAL TREATISE ON THE DISEASES OF FEMALES. In one large and handsome octavo volume, with illustrations. (*Preparing.*)

BROWN (*ISAAC BAKER*), *M. D.*

ON SOME DISEASES OF WOMEN ADMITTING OF SURGICAL TREATMENT. With handsome illustrations. One volume 8vo., extra cloth, pp. 276. $1 60.

ASHWELL'S PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN. Illustrated by Cases derived from Hospital and Private Practice. Third American, from the Third and revised London edition. In one octavo volume, extra cloth, of 528 pages. $3 50.

RIGBY ON THE CONSTITUTIONAL TREATMENT OF FEMALE DISEASES. In one neat royal 12mo. volume, extra cloth, of about 250 pages. $1 00.

DEWEES'S TREATISE ON THE DISEASES OF FEMALES. With illustrations. Eleventh Edition, with the Author's last improvements and corrections. In one octavo volume of 536 pages, with plates, extra cloth, $3 00.

COLOMBAT DE L'ISERE ON THE DISEASES OF FEMALES. Translated by C. D. MEIGS, M. D. Second edition. In one vol. 8vo, extra cloth, with numerous wood-cuts. pp. 720. $3 75.

HODGE (HUGH L.), M.D.

ON DISEASES PECULIAR TO WOMEN; including Displacements

of the Uterus. With original illustrations. In one beautifully printed octavo volume of nearly 500 pages, extra cloth. $3 75.

Indeed, although no part of the volume is not eminently deserving of perusal and study, we think that the nine chapters devoted to this subject are especially so, and we know of no more valuable monograph upon the symptoms, prognosis, and management of these annoying maladies than is constituted by this part of the work. We cannot but regard it as one of the most original and most practical works of the day—one which every accoucheur and physician should most carefully read: for we are persuaded that he will arise from its perusal with new ideas, which will induct him into a more rational practice in regard to many a suffering female who may have placed her health in his hands.—*British American Journal*, Feb. 1861.

WEST (CHARLES), M.D.

LECTURES ON THE DISEASES OF WOMEN. Second American,

from the second London edition. In one neat octavo volume of about 500 pages, extra cloth. $3 25.

We have thus embodied, in this series of lectures, one of the most valuable treatises on the diseases of the female sexual system unconnected with gestation, in our language, and one which cannot fail, from the lucid manner in which the various subjects have been treated, and the careful discrimination used in dealing only with facts, to recommend the volume to the careful study of every practitioner, as affording his safest guides to practice within our knowledge. We have seldom perused a work of a more thoroughly practical character than the one before us. Every page teems with the most truthful and accurate information, and we certainly do not know of any other work from which the physician, in active practice, can more readily obtain advice of the soundest character upon the peculiar diseases which have been made the subject of elucidation.—*British Am. Med. Journal.*

We return the author our grateful thanks for the vast amount of instruction he has afforded us. His valuable treatise needs no eulogy on our part. His graphic diction and truthful pictures of disease all speak for themselves.—*Medico-Chirurg. Review.*

Most justly esteemed a standard work. . . . . It bears evidence of having been carefully revised, and is well worthy of the fame it has already obtained. —*Dub. Med. Quar. Jour.*

As a writer, Dr. West stands, in our opinion, second only to Watson, the "Macaulay of Medicine;" he possesses that happy faculty of clothing instruction in easy garments; combining pleasure with profit, he leads his pupils, in spite of the ancient proverb, along a royal road to learning. His work is one which will not satisfy the extreme on either side, but it is one that will please the great majority who are seeking truth, and one that will convince the student that he has committed himself to a candid, safe, and valuable guide.—*N. A. Med.-Chirurg Review.*

We must now conclude this hastily written sketch with the confident assurance to our readers that the work will well repay perusal. The conscientious, painstaking, practical physician is apparent on every page.—*N. Y. Journal of Medicine.*

We have to say of it, briefly and decidedly, that it is the best work on the subject in any language, and that it stamps Dr. West as the *facile princeps* of British obstetric authors.—*Edinburgh Med. Journal.*

We gladly recommend his lectures as in the highest degree instructive to all who are interested in obstetric practice.—*London. Lancet.*

We know of no treatise of the kind so complete, and yet so compact.—*Chicago Med. Journal.*

BY THE SAME AUTHOR.

AN ENQUIRY INTO THE PATHOLOGICAL IMPORTANCE OF

ULCERATION OF THE OS UTERI. In one neat octavo volume, extra cloth. $1 25.

SIMPSON (SIR JAMES Y.), M.D.

CLINICAL LECTURES ON THE DISEASES OF WOMEN. With

numerous illustrations. In one handsome octave volume of over 500 pages, extra cloth. $4.

The principal topics embraced in the Lectures are Vesico-Vaginal Fistula, Cancer of the Uterus, Treatment of Carcinoma by Caustics, Dysmenorrhœa, Amenorrhœa, Closures, Contractions, &c., of the Vagina, Vulvitis, Causes of Death after Surgical Operations, Surgical Fever, Phlegmasia Dolens, Coccyodinia, Pelvic Cellulitis, Pelvic Hæmatoma, Spurious Pregnancy, Ovarian Dropsy, Ovariotomy, Cranioclasm, Diseases of the Fallopian Tubes, Puerperal Mania, Sub-Involution and Super-Involution of the Uterus, &c. &c.

BENNET (HENRY), M.D.

A PRACTICAL TREATISE ON INFLAMMATION OF THE

UTERUS, ITS CERVIX AND APPENDAGES, and on its connection with Uterine Disease. Sixth American, from the fourth and revised English edition. In one octavo volume of about 500 pages, extra cloth. $3 75. (*Recently Issued.*)

From the Author's Preface.

During the past two years, this revision of former labors has been my principal occupation, and in its present state the work may be considered to embody the matured experience of the many years I have devoted to the study of uterine disease.

Indeed, the entire volume is so replete with information, to all appearance so perfect in its details, that we could scarcely have thought another page or paragraph was required for the full description of all that is now known with regard to the diseases under consideration if we had not been so informed by the author. To speak of it except in terms of the highest approval would be impossible, and we gladly avail ourselves of the present opportunity to recommend it in the most unqualified manner to the profession. —*Dublin Med. Press.*

BY THE SAME AUTHOR.

A REVIEW OF THE PRESENT STATE OF UTERINE PATHO-

LOGY. In one small octavo volume, extra cloth. 50 cents.

HODGE (HUGH L.), M.D.,

Late Professor of Midwifery, &c. in the University of Pennsylvania, &c.

THE PRINCIPLES AND PRACTICE OF OBSTETRICS. Illustrated with large lithographic plates containing one hundred and fifty-nine figures from original photographs, and with numerous wood-cuts. In one large and beautifully printed quarto volume of 550 double-columned pages, strongly bound in extra cloth, $14. (*Lately published.*)

FROM THE AUTHOR'S PREFACE.

"Influenced by these motives, the author has, in this volume, endeavored to present not simply his own opinions, but also those of the most distinguished authorities in the profession; so that it may be considered a digest of the theory and practice of Obstetrics at the present period."

In carrying out this design, the ample space afforded by the quarto form has enabled the author to enter thoroughly into all details, and in combining the results of his long experience and study with the teachings of other distinguished authors, he cannot fail to afford to the practitioner whatever counsel and assistance may be required in doubtful cases and emergencies.

A distinguishing feature of the work is the profuseness of its illustrations. The lithographic plates are all original, and, to insure their accuracy, they have been copied from photographs taken expressly for the purpose. Besides these, a very full series of engravings on wood will be found scattered through the text, so that all the details given by the author are amply elucidated by the illustrations. It may be added that no pains or expense have been spared to render the mechanical execution of the work in every respect worthy of the character and value of the teachings it contains.

*** Specimens of the plates and letterpress will be forwarded to any address free by mail on receipt of six cents in postage stamps.

The work of Dr. Hodge is something more than a simple presentation of his particular views in the department of Obstetrics; it is something more than an ordinary treatise on midwifery; it is, in fact, a cyclopædia of midwifery. He has aimed to embody in a single volume the whole science and art of Obstetrics. An elaborate text is combined with accurate and varied pictorial illustrations, so that no fact or principle is left unstated or unexplained.—*Am. Med. Times*, Sept. 3, 1864.

We should like to analyze the remainder of this excellent work, but already has this review extended beyond our limited space. We cannot conclude this notice without referring to the excellent finish of the work. In typography it is not to be excelled; the paper is superior to what is usually afforded by our American cousins, quite equal to the best of English books. The engravings and lithographs are most beautifully executed. The work recommends itself for its originality, and is in every way a most valuable addition to those on the subject of obstetrics.—*Canada Med. Journal*, Oct. 1864.

It is very large, profusely and elegantly illustrated, and is fitted to take its place near the works of great obstetricians. Of the American works on the subject it is decidedly the best.—*Edinb. Med. Jour.*, Dec. '64.

We have examined Professor Hodge's work with great satisfaction; every topic is elaborated most fully. The views of the author are comprehensive, and concisely stated. The rules of practice are judicious, and will enable the practitioner to meet every emergency of obstetric complication with confidence.—*Chicago Med. Journal*, Aug. 1864.

More time than we have had at our disposal since we received the great work of Dr. Hodge is necessary to do it justice. It is undoubtedly by far the most original, complete, and carefully composed treatise on the principles and practice of Obstetrics which has ever been issued from the American press.—*Pacific Med. and Surg. Journal*, July, 1864.

We have read Dr. Hodge's book with great pleasure, and have much satisfaction in expressing our commendation of it as a whole. It is certainly highly instructive, and in the main, we believe, correct. The great attention which the author has devoted to the mechanism of parturition, taken along with the conclusions at which he has arrived, point, we think, conclusively to the fact that, in Britain at least, the doctrines of Naegele have been too blindly received.—*Glasgow Med. Journal*, Oct. 1864.

MONTGOMERY (W. F.), M.D.,

Professor of Midwifery in the King's and Queen's College of Physicians in Ireland.

AN EXPOSITION OF THE SIGNS AND SYMPTOMS OF PREGNANCY. With some other Papers on Subjects connected with Midwifery. From the second and enlarged English edition. With two exquisite colored plates, and numerous wood-cuts. In one very handsome octavo volume of nearly 600 pages, extra cloth. $3 75.

MILLER (HENRY), M.D.,

Professor of Obstetrics and Diseases of Women and Children in the University of Louisville.

PRINCIPLES AND PRACTICE OF OBSTETRICS, &c.; including the Treatment of Chronic Inflammation of the Cervix and Body of the Uterus considered as a frequent cause of Abortion. With about one hundred illustrations on wood. In one very handsome octavo volume of over 600 pages, extra cloth. $3 75.

TYLER SMITH ON PARTURITION, AND THE PRINCIPLES AND PRACTICE OF OBSTETRICS. In one royal 12mo. volume, extra cloth, of 400 pages. $1 50.

RIGBY'S SYSTEM OF MIDWIFERY. With Notes and Additional Illustrations. Second American edition. One volume octavo, extra cloth, 422 pages. $2 50.

DEWEES'S COMPREHENSIVE SYSTEM OF MIDWIFERY. Illustrated by occasional cases and many engravings. Twelfth edition, with the author's last improvements and corrections. In one octavo volume, extra cloth, of 600 pages. $3 50.

RAMSBOTHAM (FRANCIS H.), M.D.

THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY, in reference to the Process of Parturition. A new and enlarged edition, thoroughly revised by the author. With additions by W. V. KEATING, M.D., Professor of Obstetrics, &c., in the Jefferson Medical College, Philadelphia. In one large and handsome imperial octavo volume of 650 pages, strongly bound in leather, with raised bands; with sixty-four beautiful plates, and numerous wood-cuts in the text, containing in all nearly 200 large and beautiful figures. $7 00.

We will only add that the student will learn from it all he need to know, and the practitioner will find it, as a book of reference, surpassed by none other.—*Stethoscope.*

The character and merits of Dr. Ramsbotham's work are so well known and thoroughly established, that commeut is unnecessary and praise superfinous. The illustrations, which are numerous and accurate, are executed in the highest style of art. We cannot too highly recoumend the work to our readers.—*St. Louis Med. and Surg. Journal.*

To the physician's library it is indispensable, while to the student, as a text-book, from which to extract the material for laying the foundation of an education on obstetrical science, it has no superior.—*Ohio Med. and Surg. Journal.*

When we call to mind the toil we underwent in acquiring a knowledge of this subject, we cannot but envy the student of the present day the aid which this work will afford him.—*Am. Jour. of the Med. Sciences.*

MEIGS (CHARLES D.), M.D.,

Lately Professor of Obstetrics, &c., in the Jefferson Medical College, Philadelphia.

OBSTETRICS: THE SCIENCE AND THE ART. Fourth edition, revised and improved. With one hundred and twenty-nine illustrations. In one beautifully printed octavo volume of 730 large pages. Extra cloth, $5 00; leather, $6 00.

We have, therefore, great satisfaction in bringing under our readers' notice the matured views of the highest American authority in the department to which he has devoted his life and talents. They comprise not only the "fruit of many years of paiuful toil in the acquisition of clinical experience and knowledge," but they contain also the evidences of an extended acquaintance with European medical literature, both continental and British. This feature, together with the elevation of tone and eloquence in style often exhibited by the author, constitute no slight merit in works on the subjects with which the author is here occupied.—*London Med. Gazette.*

We have made a somewhat careful examination of this new edition of the Science and the Art of Obstetrics, and are satisfied that there is no better or more useful guide to the educated practitioner.—*New Orleans Monthly Med. Register.*

CHURCHILL (FLEETWOOD), M.D., M.R.I.A.

ON THE THEORY AND PRACTICE OF MIDWIFERY. A new American from the fourth revised and enlarged London edition. With notes and additions by D. FRANCIS CONDIE, M.D., author of a "Practical Treatise on the Diseases of Children," &c. With one hundred and ninety-four illustrations. In one very handsome octavo volume of nearly 700 large pages. Extra cloth, $4 00; leather, $5 00.

In adapting this standard favorite to the wants of the profession in the United States, the editor has endeavored to insert everything that his experience has shown him would be desirable for the American student, including a large number of illustrations. With the sanction of the author, he has added, in the form of an appendix, some chapters from a little "Manual for Midwives and Nurses," recently issued by Dr. Churchill, believing that the details there presented can hardly fail to prove of advantage to the junior practitioner. The result of all these additions is that the work now contains fully one-half more matter than the last American edition, with nearly one-half more illustrations; so that, notwithstanding the use of a smaller type, the volume contains almost two hundred pages more than before.

No effort has been spared to secure an improvement in the mechanical execution of the work equal to that which the text has received, and the volume is confidently presented as one of the handsomest that has thus far been laid before the American profession; while the very low price at which it is offered should secure for it a place in every lecture-room and on every office table.

These additions render the work still more complete and acceptable than ever; and with the excellent style in which the publishers have presented this edition of Churchill, we can commend it to the profession with great cordiality and pleasure.—*Cincinnati Lancet.*

Few works on this branch of medical science are equal to it, certainly none excel it, whether in regard to theory or practice, and in one respect it is superior to all others, viz., in its statistical information, and therefore, on these grounds a most valuable work for the physician, student, or lecturer, all of whom will find in it the information which they are seeking.—*Brit. Am. Journal.*

The present treatise is very much enlarged and amplified beyond the previous editions but nothing has been added which could be well dispensed with. An examination of the table of contents shows how thoroughly the author has gone over the ground, and the care he has taken in the text to present the subjects in all their bearings, will render this new edition even more necessary to the obstetric student than were either of the former editions at the date of their appearance. No treatise on obstetrics with which we are acquainted can compare favorably with this, in respect to the amount of material which has been gathered from every source.—*Boston Med. and Surg. Journal.*

There is no better text-book for students, or work of reference and study for the practising physician than this. It should adorn and enrich every medical library.—*Chicago Med. Journal.*

GROSS (SAMUEL D.), M.D.,

Professor of Surgery in the Jefferson Medical College of Philadelphia.

A SYSTEM OF SURGERY: Pathological, Diagnostic, Therapeutic, and Operative.

Illustrated by upwards of Thirteen Hundred Engravings. Fourth edition, carefully revised, and improved. In two large and beautifully printed royal octavo volumes of 2200 pages, strongly bound in leather, with raised bands. $15 00.

The continued favor, shown by the exhaustion of successive large editions of this great work, proves that it has successfully supplied a want felt by American practitioners and students. Though but little over six years have elapsed since its first publication, it has already reached its fourth edition, while the care of the author in its revision and correction has kept it in a constantly improved shape. By the use of a close, though very legible type, an unusually large amount of matter is condensed in its pages, the two volumes containing as much as four or five ordinary octavos. This, combined with the most careful mechanical execution, and its very durable binding, renders it one of the cheapest works accessible to the profession. Every subject properly belonging to the domain of surgery is treated in detail, so that the student who possesses this work may be said to have in it a surgical library.

It must long remain the most comprehensive work on this important part of medicine.—*Boston Medical and Surgical Journal*, March 23, 1865.

We have compared it with most of our standard works, such as those of Erichsen, Miller, Fergusson, Syme, and others, and we must, in justice to our author, award it the pre-eminence. As a work, complete in almost every detail, no matter how minute or trifling, and embracing every subject known in the principles and practice of surgery, we believe it stands without a rival. Dr. Gross, in his preface, remarks "my aim has been to embrace the whole domain of surgery, and to allot to every subject its legitimate claim to notice;" and, we assure our readers, he has kept his word. It is a work which we can most confidently recommend to our brethren, for its utility is becoming the more evident the longer it is upon the shelves of our library.—*Canada Med. Journal*, September, 1865.

The first two editions of Professor Gross' System of Surgery are so well known to the profession, and so highly prized, that it would be idle for us to speak in praise of this work.— *Chicago Medical Journal*, September, 1865.

We gladly indorse the favorable recommendation of the work, both as regards matter and style, which we made when noticing its first appearance.—*British and Foreign Medico-Chirurgical Review*, Oct. 1865.

The most complete work that has yet issued from the press on the science and practice of surgery.—*London Lancet.*

This system of surgery is, we predict, destined to take a commanding position in our surgical literature, and be the crowning glory of the author's well earned fame. As an authority on general surgical subjects, this work is long to occupy a pre-eminent place, not only at home, but abroad. We have no hesitation in pronouncing it without a rival in our language, and equal to the best systems of surgery in any language.—*N. Y. Med. Journal.*

Not only by far the best text-book on the subject, as a whole, within the reach of American students, but one which will be much more than ever likely to be resorted to and regarded as a high authority abroad.—*Am. Journal Med. Sciences*, Jan. 1865.

The work contains everything, minor and major, operative and diagnostic, including mensuration and examination, venereal diseases, and uterine manipulations and operations. It is a complete Thesaurus of modern surgery, where the student and practitioner shall not seek in vain for what they desire.—*San Francisco Med. Press*, Jan. 1865.

Open it where we may, we find sound practical information conveyed in plain language. This book is no mere provincial or even national system of surgery, but a work which, while very largely indebted to the past, has a strong claim on the gratitude of the future of surgical science.—*Edinburgh Med. Journal*, Jan. 1865.

A glance at the work is sufficient to show that the author and publisher have spared no labor in making it the most complete "System of Surgery" ever published in any country.—*St. Louis Med. and Surg. Journal*, April, 1865.

The third opportunity is now offered during our editorial life to review, or rather to indorse and recommend this great American work on Surgery. Upon this last edition a great amount of labor has been expended, though to all others except the author the work was regarded in its previous editions as so full and complete as to be hardly capable of improvement. Every chapter has been revised; the text augmented by nearly two hundred pages, and a considerable number of wood-cuts have been introduced. Many portions have been entirely re-written, and the additions made to the text are principally of a practical character. This comprehensive treatise upon surgery has undergone revisions and enlargements, keeping pace with the progress of the art and science of surgery, so that whoever is in possession of this work may consult its pages upon any topic embraced within the scope of its department, and rest satisfied that its teaching is fully up to the present standard of surgical knowledge. It is also so comprehensive that it may truthfully be said to embrace all that is actually known, that is really of any value in the diagnosis and treatment of surgical diseases and accidents. Wherever illustration will add clearness to the subject, or make better or more lasting impression, it is not wanting; in this respect the work is eminently superior.—*Buffalo Med. Journal*, Dec. 1864.

A system of surgery which we think unrivalled in our language, and which will indelibly associate his name with surgical science. And what, in our opinion, enhances the value of the work is that, while the practising surgeon will find all that he requires in it, it is at the same time one of the most valuable treatises which can be put into the hands of the student seeking to know the principles and practice of this branch of the profession which he designs subsequently to follow.—*The Brit. Am. Journ., Montreal.*

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE URINARY BLADDER, THE PROSTATE GLAND, AND THE URETHRA.

Second edition, revised and much enlarged, with one hundred and eighty-four illustrations. In one large and very handsome octavo volume, of over nine hundred pages, extra cloth. $4 00.

Whoever will peruse the vast amount of valuable practical information it contains will, we think, agree with us, that there is no work in the English language which can make any just pretensions to be its equal.—*N. Y. Journal of Medicine.*

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON FOREIGN BODIES IN THE AIR-PASSAGES.

In one handsome octavo volume, extra cloth, with illustrations. pp. 468. $2 75.

ERICHSEN (JOHN),
Professor of Surgery in University College, London.

THE SCIENCE AND ART OF SURGERY; being a Treatise on Surgical Injuries, Diseases, and Operations.

New and improved American, from the Second enlarged and carefully revised London edition. Illustrated with over four hundred wood engravings. In one large and handsome octavo volume of 1000 closely printed pages; extra cloth, $6; leather, raised bands, $7.

We are bound to state, and we do so without wishing to draw invidious comparisons, that the work of Mr. Erichsen, in most respects, surpasses any that has preceded it. Mr. Erichsen's is a practical work, combining a due proportion of the "Science and Art of Surgery." Having derived no little instruction from it, in many important branches of surgery, we can have no hesitation in recommending it as a valuable book alike to the practitioner and the student. —*Dublin Quarterly.*

Gives a very admirable practical view of the science and art of surgery.—*Edinburgh Med. and Surg. Journal.*

We recommend it as the best compendium of surgery in our language.—*London Lancet.*

It is, we think, the most valuable practical work on surgery in existence, both for young and old practitioners.—*Nashville Med. and Surg. Journal.*

The limited time we have to review this improved edition of a work, the first issue of which we prized as one of the very best, if not the best text-book of surgery with which we were acquainted, permits us to give it but a passing notice totally unworthy of its merits. It may be confidently asserted, that no work on the science and art of surgery has ever received more universal commendation or occupied a higher position as a general text-book on surgery, than this treatise of Professor Erichsen.—*Savannah Journal of Medicine.*

In fulness of practical detail and perspicuity of style, convenience of arrangement and soundness of discrimination, as well as fairness and completeness of discussion, it is better suited to the wants of both student and practitioner than any of its predecessors. —*Am. Journal of Med. Sciences.*

After careful and frequent perusals of Erichsen's surgery, we are at a loss fully to express our admiration of it. The author's style is eminently didactic, and characterized by a most admirable directness, clearness, and compactness.—*Ohio Med. and Surg. Journal.*

BY THE SAME AUTHOR.

ON RAILWAY, AND OTHER INJURIES OF THE NERVOUS SYSTEM.

To make one small octavo volume. (*Publishing in the* "MEDICAL NEWS AND LIBRARY" *for* 1867.)

This new work of the distinguished author has been selected for publication in the "MEDICAL NEWS AND LIBRARY" for 1867, under the impression that its able treatment of a subject comparatively novel, and yet of wide importance, will prove eminently satisfactory to subscribers.

MILLER (JAMES),
Late Professor of Surgery in the University of Edinburgh, &c.

PRINCIPLES OF SURGERY.

Fourth American, from the third and revised Edinburgh edition. In one large and very beautiful volume of 700 pages, with two hundred and forty illustrations on wood, extra cloth. $3 75.

BY THE SAME AUTHOR.

THE PRACTICE OF SURGERY.

Fourth American, from the last Edinburgh edition. Revised by the American editor. Illustrated by three hundred and sixty-four engravings on wood. In one large octavo volume of nearly 700 pages, extra cloth. $3 75.

It is seldom that two volumes have ever made so profound an impression in so short a time as the "Principles" and the "Practice" of Surgery by Mr. Miller, or so richly merited the reputation they have acquired. The author is an eminently sensible, practical, and well-informed man, who knows exactly what he is talking about and exactly how to talk it. —*Kentucky Medical Recorder.*

PIRRIE (WILLIAM), F. R. S. E.,
Professor of Surgery in the University of Aberdeen.

THE PRINCIPLES AND PRACTICE OF SURGERY.

Edited by JOHN NEILL, M. D., Professor of Surgery in the Penna. Medical College, Surgeon to the Pennsylvania Hospital, &c. In one very handsome octavo volume of 780 pages, with 316 illustrations, extra cloth. $3 75.

SARGENT (F. W.), M. D.

ON BANDAGING AND OTHER OPERATIONS OF MINOR SURGERY.

New edition, with an additional chapter on Military Surgery. One handsome royal 12mo. volume, of nearly 400 pages, with 184 wood-cuts. Extra cloth, $1 75.

Exceedingly convenient and valuable to all members of the profession.—*Chicago Medical Examiner*, May, 1862.

The very best manual of Minor Surgery we have seen.—*Buffalo Med. Journal.*

We cordially commend this volume as one which the medical student should most closely study; and to the surgeon in practice it must prove itself instructive on many points which he may have forgotten.—*Brit. Am. Journal*, May, 1862.

MALGAIGNE'S OPERATIVE SURGERY. With numerous illustrations on wood. In one handsome octavo volume, extra cloth, of nearly 600 pp. $2 50.

SKEY'S OPERATIVE SURGERY. In one very handsome octavo volume, extra cloth, of over 650 pages, with about 100 wood-cuts. $3 25.

FERGUSSON'S SYSTEM OF PRACTICAL SURGERY. Fourth American, from the third and enlarged London edition. In one large and beautifully printed octavo volume of about 700 pages, with 393 handsome illustrations. Leather, $4.

DRUITT (ROBERT), M.R.C.S., &c.

THE PRINCIPLES AND PRACTICE OF MODERN SURGERY.

A new and revised American, from the eighth enlarged and improved London edition. Illustrated with four hundred and thirty-two wood-engravings. In one very handsome octavo volume, of nearly 700 large and closely printed pages. Extra cloth, $4 00; leather, $5 00.

All that the surgical student or practitioner could desire.—*Dublin Quarterly Journal.*

It is a most admirable book. We do not know when we have examined one with more pleasure.—*Boston Med. and Surg. Journal.*

In Mr. Druitt's book, though containing only some seven hundred pages, both the principles and the practice of surgery are treated, and so clearly and perspicuously, as to elucidate every important topic. The fact that twelve editions have already been called for, in these days of active competition, would of itself show it to possess marked superiority. We have examined the book most thoroughly, and can say that this success is well merited. His book, moreover, possesses the inestimable advantages of having the subjects perfectly well arranged and classified, and of being written in a style at once clear and succinct.—*Am. Journal of Med. Sciences.*

Whether we view Druitt's Surgery as a guide to operative procedures, or as representing the latest theoretical surgical opinions, no work that we are at present acquainted with can at all compare with it. It is a compendium of surgical theory (if we may use the word) and practice in itself, and well deserves the estimate placed upon it.—*Brit. Am. Journal.*

Thus enlarged and improved, it will continue to rank among our best text-books on elementary surgery.—*Columbus Rev. of Med. and Surg.*

We must close this brief notice of an admirable work by recommending it to the earnest attention of every medical student.—*Charleston Medical Journal and Review.*

A text-book which the general voice of the profession in both England and America has commended as one of the most admirable "manuals," or, "*vade mecum*," as its English title runs, which can be placed in the hands of the student. The merits of Druitt's Surgery are too well known to every one to need any further eulogium from us.—*Nashville Med. Journal.*

HAMILTON (FRANK H.), M.D.,

Professor of Fractures and Dislocations, &c. in Bellevue Hosp. Med. College, New York.

A PRACTICAL TREATISE ON FRACTURES AND DISLOCATIONS.

Third edition, thoroughly revised. In one large and handsome octavo volume of 777 pages, with 294 illustrations, extra cloth, $5 75. (*Now ready.*)

The demand which has so speedily exhausted two large editions of this work shows that the author has succeeded in supplying a want, felt by the profession at large, of an exhaustive treatise on a frequent and troublesome class of accidents. The unanimous voice of the profession, abroad as well as at home, has pronounced it the most complete work to which the surgeon can refer for information respecting all details of the subject. In the preparation of this new edition, the author has sedulously endeavored to render it worthy a continuance of the favor which has been accorded to it, and the experience of the recent war has afforded a large amount of material which he has sought to turn to the best practical account.

The volume before us is (we say it with a pang of wounded patriotism) the best and handiest book on the subject in the English language. It is in vain to attempt a review of it; nearly as vain to seek for any sins, either of commission or omission.—*Edinburgh Med. and Surg. Journal.*

From the great labor and time bestowed upon its preparation, we had been led to anticipate a very thorough and elaborate monograph, and an attentive perusal of its pages has satisfied us that our expectations have been fully realized. The work is by far the most complete disquisition on fractures and dislocations in the English language. It is not our intention to present anything like a formal analysis of this work; to do so would carry us far beyond the limits which we have assigned to us, to say nothing of the fact that it would be a matter of supererogation, inasmuch as no intelligent practitioner will be likely to be without a copy of it for ready use. No library, however extensive, will be complete without it.—*North American Medico-Chirurgical Review.*

This is a valuable contribution to the surgery of most important affections, and is the more welcome, inasmuch as at the present time we do not possess a single complete treatise on Fractures and Dislocations in the English language. It has remained for our American brother to produce a complete treatise upon the subject.—*London Lancet.*

CURLING (T. B.), F.R.S.,

Surgeon to the London Hospital, President of the Hunterian Society, &c.

A PRACTICAL TREATISE ON DISEASES OF THE TESTIS, SPERMATIC CORD, AND SCROTUM.

Second American, from the second and enlarged English edition. In one handsome octavo volume, extra cloth, with numerous illustrations. pp. 420. $2 00.

BARWELL (RICHARD), F.R.C.S.,

Assistant Surgeon Charing Cross Hospital, &c.

A TREATISE ON DISEASES OF THE JOINTS.

Illustrated with engravings on wood. In one very handsome octavo volume of about 500 pages; extra cloth, $3.

BRODIE'S CLINICAL LECTURES ON SURGERY. 1 vol. 8vo., 350 pp.; cloth, $1 25.

COOPER ON THE STRUCTURE AND DISEASES OF THE TESTIS, AND ON THE THYMUS GLAND. One vol. imperial 8vo., extra cloth, with 177 figures on 29 plates. $2 50.

COOPER'S LECTURES ON THE PRINCIPLES AND PRACTICE OF SURGERY. In one very large octavo volume, extra cloth, of 750 pages. $2 00.

GIBSON'S INSTITUTES AND PRACTICE OF SURGERY. Eighth edition, improved and altered. With thirty-four plates. In two handsome octavo volumes, about 1000 pages, leather, raised bands. $6 50

TOYNBEE (*JOSEPH*), *F. R. S.*,

Aural Surgeon to and Lecturer on Surgery at St. Mary's Hospital.

THE DISEASES OF THE EAR: their Nature, Diagnosis, and Treatment. With one hundred engravings on wood. Second American edition. In one very handsomely printed octavo volume of 440 pages; extra cloth, $4.

The appearance of a volume of Mr. Toynbee's, therefore, in which the subject of aural disease is treated in the most scientific manner, and our knowledge in respect to it placed fully on a par with that which we possess respecting most other organs of the body, is a matter for sincere congratulation. We may reasonably hope that henceforth the subject of this treatise will cease to be among the *opprobria* of medical science.—*London Medical Review.*

The work, as was stated at the outset of our notice, is a model of its kind, and every page and paragraph of it are worthy of the most thorough study. Considered all in all—as an original work, well written, philosophically elaborated, and happily illustrated with cases and drawings—it is by far the ablest monograph that has ever appeared on the anatomy and diseases of the ear, and one of the most valuable contributions to the art and science of surgery in the nineteenth century.—*N. Am. Med.-Chirurg. Review.*

LAURENCE (*JOHN Z.*), *F. R. C. S.*, and *MOON* (*ROBERT C.*),

Editor of the Ophthalmic Review, &c. *House Surgeon to the Southwark Ophthalmic Hospital, &c.*

A HANDY-BOOK OF OPHTHALMIC SURGERY, for the use of Practitioners. With numerous illustrations. In one very handsome octavo volume, extra cloth. $2 50. (*Now Ready.*)

(FROM THE AUTHORS' PREFACE.)

"In writing these pages it has been our aim to bring the principles and practice of modern ophthalmic surgery within a small compass, to supply the wants of the busy practitioner, who may have neither time nor opportunity to read the innumerable contributions that ophthalmic surgery and science have received within the last fifteen years.

"In describing symptoms, we have limited ourselves to those which are essential for the *recognition* of disease; in describing operations, &c., to those details which are essential for its *treatment*."

JONES (*T. WHARTON*), *F. R. S.*,

Professor of Ophthalmic Med. and Surg. in University College, London.

THE PRINCIPLES AND PRACTICE OF OPHTHALMIC MEDICINE AND SURGERY. With one hundred and seventeen illustrations. Third and revised American, with Additions from the second London edition. In one handsome octavo volume of 455 pages, extra cloth. $3 25.

We know of no work which contains the same amount of information in the same compass; we especially recommend the book to the American physician and medical student.—*San Francisco Med. Press.*

It is an excellent practical treatise on the medical and surgical diseases of the eye, and is well adapted to the wants both of the student and practitioner.—*Chicago Med. Examiner.*

MACKENZIE (*W.*), *M. D.*,

Surgeon Oculist in Scotland in ordinary to her Majesty, &c.

A PRACTICAL TREATISE ON DISEASES AND INJURIES OF THE EYE. To which is prefixed an Anatomical Introduction explanatory of a Horizontal Section of the Human Eyeball, by THOMAS WHARTON JONES, F. R. S. From the fourth revised and enlarged London edition. With Notes and Additions by ADDINELL HEWSON, M. D., Surgeon to Wills Hospital, &c. &c. In one very large and handsome octavo volume of 1027 pages, extra cloth, with plates and numerous wood-cuts. $6 50.

MORLAND (*W. W.*), *M. D.*

DISEASES OF THE URINARY ORGANS; a Compendium of their Diagnosis, Pathology, and Treatment. With illustrations. In one large and handsome octavo volume of about 600 pages, extra cloth. $3 50.

Taken as a whole, we can recommend Dr. Morland's compendium as a very desirable addition to the library of every medical or surgical practitioner.—*Brit. and For. Med.-Chir. Review*, April, 1859.

ASHTON (*T. J.*)

ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE RECTUM AND ANUS; with remarks on Habitual Constipation. Second American, from the fourth and enlarged London edition. With handsome illustrations. In one very beautifully printed octavo volume of about 300 pages. $3 25. (*Just Issued.*)

We can recommend this volume of Mr Ashton's in the strongest terms, as containing all the latest details of the pathology and treatment of diseases connected with the rectum.—*Canada Med. Journ.*, March, 1866.

This is a new and carefully revised edition of one of the most valuable special treatises that the physician and surgeon can have in his library.—*Chicago Medical Examiner*, Jan. 1866.

The short period which has elapsed since the appearance of the former American reprint, and the numerous editions published in England, are the best arguments we can offer of the merits, and of the uselessness of any commendation on our part of a book already so favorably known to our readers.—*Boston Med. and Surg. Journal*, Jan. 25, 1866.

TAYLOR (ALFRED S.), M.D.,

Lecturer on Med. Jurisp. and Chemistry in Guy's Hospital.

MEDICAL JURISPRUDENCE.

Sixth American, from the eighth and revised London edition. With Notes and References to American Decisions, by CLEMENT B. PENROSE, of the Philadelphia Bar. In one large octavo volume of 776 pages, extra cloth, $4 50; leather, $5 50. (*Now Ready.*)

Considerable additions have been made by the editor to this edition, comprising some important sections from the author's larger work, "The Principles and Practice of Medical Jurisprudence," as well as references to American law and practice. The notes of the former editor, Dr. Hartshorne, have likewise been retained, and the whole is presented as fully worthy to maintain the distinguished position which the work has acquired as a leading text-book and authority on the subject.

Taylor's Medical Jurisprudence has been the text-book in our colleges for years, and the present edition, with the valuable additions made by the American editor, render it the most standard work of the day, on the peculiar province of medicine on which it treats. The American editor, Dr. Hartshorne, has done his duty to the text, and, upon the whole, we cannot but consider this volume the best and richest treatise on medical jurisprudence in our language.—*Brit. Am. Med. Journal.*

The presentation to the profession of a new and improved edition of this well-known and deservedly popular work cannot be looked upon otherwise than as a subject of congratulation. The book has many merits. It is brief, it is comprehensive; it treats in a clear and satisfactory manner upon a large number of medico-legal subjects, the most interesting and important that can be presented to the attention of the physician, and the completeness of the work is enhanced, especially to the American reader, by the appropriate though not very copious notes and references to recent American cases, by Dr. Hartshorne. —*Chicago Med. Jour.*

We need hardly say that this work is quite beyond the pale of criticism, and that all we have to do is to congratulate the profession on having its contents again laid before them, in 1861, in a thoroughly revised condition.—*British Med. Journal.*

We have the more pleasure in expressing our hearty coincidence with the general verdict of the two professions, medical and legal, in favor of this admirable treatise, which, like the one just mentioned, although printed in the manual form, is really the most elaborate work on the subject that our literature possesses, and will unquestionably hold its ground as the standard of medical jurisprudence in this country so long as it shall be kept by its author so completely up to the mark as it now is.—*The British and Foreign Medico-Chirurgical Review.*

Without materially increasing the bulk of this most admirable work, we have a new edition brought close up to the present day, with old errors removed and very many new discoveries added. This is a work well worthy the high position of its author, and a fair representative and exponent of the state of forensic medicine in this country, second to none, we venture to say, in the world. To attain this every chapter has undergone a close revision, and many new cases and observations have been added; at the same time no extensive changes have been made because uncalled for. It would be a waste of time to attempt any description of this work, which must have found its way to the bookshelf of almost every practitioner in the kingdom; those who have it not should possess it forthwith. There is no more useful work of reference on this or any subject.—*London Medical Review.*

WINSLOW (FORBES), M.D., D.C.L., &c.

ON OBSCURE DISEASES OF THE BRAIN AND DISORDERS OF THE MIND;

their incipient Symptoms, Pathology, Diagnosis, Treatment, and Prophylaxis. Second American, from the third and revised English edition. In one handsome octavo volume of nearly 600 pages, extra cloth. $4 25. (*Just Issued.*)

SUMMARY OF CONTENTS.

CHAPTER I. Introduction—II. Morbid Phenomena of Intelligence—III. Premonitory Symptoms of Insanity—IV. Confessions of Patients after Recovery—V. State of the Mind during Recovery—VI. Anomalous and Masked Affections of the Mind—VII. Stage of Consciousness—VIII. Stage of Exaltation—IX. Stage of Mental Depression—X. Stage of Aberration—XI. Impairment of Mind—XII. Morbid Phenomena of Attention—XIII. Morbid Phenomena of Memory —XIV. Acute Disorders of Memory—XV. Chronic Affections of Memory—XVI. Perversion and Exaltation of Memory—XVII. Psychology and Pathology of Memory—XVIII. Morbid Phenomena of Motion—XIX. Morbid Phenomena of Speech—XX. Morbid Phenomena of Sensation—XXI. Morbid Phenomena of the Special Senses—XXII. Morbid Phenomena of Vision, Hearing, Taste, Touch, and Smell—XXIII. Morbid Phenomena of Sleep and Dreaming—XXIV. Morbid Phenomena of Organic and Nutritive Life—XXV. General Principles of Pathology, Diagnosis, Treatment, and Prophylaxis.

Of the merits of Dr. Winslow's treatise the profession has sufficiently judged. It has taken its place in the front rank of the works upon the special department of practical medicine to which it pertains.—*Cincinnati Journal of Medicine*, March, 1866.

It is an interesting volume that will amply repay for a careful perusal by all intelligent readers.—*Chicago Med. Examiner*, Feb. 1866.

A work which, like the present, will largely aid the practitioner in recognizing and arresting the first insidious advances of cerebral and mental disease, is one of immense practical value, and demands earnest attention and diligent study on the part of all who have embraced the medical profession, and have thereby undertaken responsibilities in which the welfare and happiness of individuals and families are largely involved. We shall therefore close this brief and necessarily very imperfect notice of Dr. Winslow's great and classical work by expressing our conviction that it is long since so important and beautifully written a volume has issued from the British medical press. The details of the management of confirmed cases of insanity more nearly interest those who have made mental diseases their special study; but Dr. Winslow's masterly exposition of the early symptoms, and his graphic descriptions of the insidious advances of incipient insanity, together with his judicious observations on the treatment of disorders of the mind, should, we repeat, be carefully studied by all who have undertaken the responsibilities of medical practice.—*Dublin Medical Press.*

It is the most interesting as well as valuable book that we have seen for a long time. It is truly fascinating.—*Am. Jour. Med. Sciences.*

Dr. Winslow's work will undoubtedly occupy an unique position in the medico-psychological literature of this country.—*London Med. Review.*
